As soon as the Archon enters office, he begins by issuing a proclamation that whatever any one possessed before he entered into office, that he shall possess and hold until the end of his term. Next he assigns Choregi to the tragic poets, choosing three of the richest persons out of the whole body of Athenians. Formerly he used also to assign five Choregi to the comic poets, but now the tribes provide the Choregi for them. Then he receives the Choregi who have been appointed by the tribes for the men's and boys' choruses and the comic poets at the Dionysia, and for the men's and boys' choruses at the Thargelia (at the Dionysia there is a chorus for each tribe, but at the Thargelia one between two tribes, each tribe bearing its share in providing it); he transacts the exchanges of properties for them, and reports any excuses that are tendered, if any one says that he has already borne this burden, or that he is exempt because he has borne a similar burden and the period of his exemption has not yet expired, or that he is not of the required age; since the Choregus of a boys' chorus must be over forty years of age. He also appoints Choregi for the festival at Delos, and a chief of the mission for the thirty-oar boat which conveys the youths thither. He also superintends sacred processions, both that in honour of Asclepius, when the initiated keep house, and that of the great Dionysia-the latter in conjunction with the Superintendents of that festival. These officers, ten in number, were formerly elected by open vote in the Assembly, and used to provide for the expenses of the procession out of their private means; but now one is elected by lot from each tribe, and the state contributes a hundred minas for the expenses. The Archon also superintends the procession at the Thargelia, and that in honour of Zeus the Saviour. He also manages the contests at the Dionysia and the Thargelia.

These, then, are the festivals which he superintends. The suits and indictments which come before him, and which he, after a preliminary inquiry, brings up before the lawcourts, are as follows. Injury to parents (for bringing these actions the prosecutor cannot suffer any penalty); injury to orphans (these actions lie against their guardians); injury to a ward of state (these lie against their guardians or their husbands), injury to an orphan's estate (these too lie against the guardians); mental derangement, where a party charges another with destroying his own property through unsoundness of mind; for appointment of liquidators, where a party refuses to divide property in which others have a share; for constituting a wardship; for determining between rival claims to a wardship; for granting inspection of property to which another party lays claim; for appointing oneself as guardian; and for determining disputes as to inheritances and wards of state. The Archon also has the care of orphans and wards of state, and of women who, on the death of their husbands, declare themselves to be with child; and he has power to inflict a fine on those who offend against the persons under his charge, or to bring the case before the law-courts. He also leases the houses of orphans and wards of state until they reach the age of fourteen, and takes mortgages on them; and if the guardians fail to provide the necessary food for the children under their charge, he exacts it from them. Such are the duties of the Archon.

57

The King in the first place superintends the mysteries, in conjunction with the Superintendents of Mysteries. The latter are elected in the Assembly by open vote, two from the general body of Athenians, one from the Eumolpidae, and one from the Ceryces. Next, he superintends the Lenaean Dionysia, which consists of a procession and a contest. The procession is ordered by the King and the Superintendents in conjunction; but the contest is managed by the King alone. He also manages all the contests of the torch-race; and to speak broadly, he administers all the ancestral sacrifices. Indictments for impiety come before him, or any disputes between parties concerning priestly rites; and he also determines all controversies concerning sacred rites for the ancient families and the priests. All actions for homicide come before him, and it is he that makes the proclamation requiring polluted persons to keep away from sacred ceremonies. Actions for homicide and wounding are heard, if the homicide or wounding be willful, in the Areopagus; so also in cases of killing by poison, and of arson. These are the only cases heard by that Council. Cases of unintentional homicide, or of intent to kill, or of killing a slave or a resident alien or a foreigner, are heard by the court of Palladium. When the homicide is acknowledged, but legal justification is pleaded, as when a man takes an adulterer in the act, or kills another by mistake in battle, or in an athletic contest, the prisoner is tried in the court of Delphinium. If a man who is in banishment for a homicide which admits of reconcilliation incurs a further charge of killing or wounding, he is tried in Phreatto, and he makes his defence from a boat moored near the shore. All these cases, except those which are heard in the Areopagus, are tried by the Ephetae on whom the lot falls. The King introduces them, and the hearing is held within sacred precincts and in the open air. Whenever the King hears a case he takes off his crown. The person who is charged with homicide is at all other times excluded from the temples, nor is it even lawful for him to enter the market-place; but on the occasion of his trial he enters the temple and makes his defence. If the actual offender is unknown, the writ runs against ‘the doer of the deed’. The King and the tribe-kings also hear the cases in which the guilt rests on inanimate objects and the lower animal.

58

The Polemarch performs the sacrifices to Artemis the huntress and to Enyalius, and arranges the contest at the funeral of those who have fallen in war, and makes offerings to the memory of Harmodius and Aristogeiton. Only private actions come before him, namely those in which resident aliens, both ordinary and privileged, and agents of foreign states are concerned. It is his duty to receive these cases and divide them into ten groups, and assign to each tribe the group which comes to it by lot; after which the magistrates who introduce cases for the tribe hand them over to the Arbitrators. The Polemarch, however, brings up in person cases in which an alien is charged with deserting his patron or neglecting to provide himself with one, and also of inheritances and wards of state where aliens are concerned; and in fact, generally, whatever the Archon does for citizens, the Polemarch does for aliens.

59

The Thesmothetae in the first place have the power of prescribing on what days the lawcourts are to sit, and next of assigning them to the several magistrates; for the latter must follow the arrangement which the Thesmothetae assign. Moreover they introduce impeachments before the Assembly, and bring up all votes for removal from office, challenges of a magistrate’s conduct before the Assembly, indictments for illegal proposals, or for proposing a law which is contrary to the interests of the state, complaints against Proedri or their president for their conduct in office, and the accounts presented by the generals. All indictments also come before them in which a deposit has to be made by the prosecutor, namely, indictments for concealment of foreign origin, for corrupt evasion of foreign origin (when a man escapes the disqualification by bribery), for blackmailing accusations, bribery, false entry of another as a state debtor, false testimony to the service of a summons, conspiracy to enter a man as a state debtor, corrupt removal from the list of debtors, and adultery. They also bring up the examinations of all magistrates, and the rejections by the demes and the condemnations by the Council. Moreover they bring up certain private suits in cases of merchandise and mines, or where a slave has slandered a free man. It is they also who cast lots to assign the courts to the various magistrates, whether for private or public cases. They ratify commercial treaties, and bring up the cases which arise out of such treaties; and they also bring up cases of perjury from the Areopagus. The casting of lots for the jurors is conducted by all the nine Archons, with the clerk to the Thesmothetae as the tenth, each performing the duty for his own tribe. Such are the duties of the nine Archons.

There are also ten Commissioners of Games (Athlothetae), elected by lot, one from each tribe. These officers, after passing an examination, serve for four years; and they manage the Panathenaic procession, the contest in music and that in gymnastic, and the horse-race; they also provide the robe of Athena and, in conjunction with the Council, the vases, and they present the oil to the athletes. This oil is collected from the sacred olives. The Archon requisitions it from the owners of the farms on which the sacred olives grow, at the rate of three-quarters of a pint from each plant. Formerly the state used to sell the fruit itself, and if any one dug up or broke down one of the sacred olives, he was tried by the Council of Areopagus, and if he was condemned, the penalty was death. Since, however, the oil has been paid by the owner of the farm, the procedure has lapsed, though the law remains; and the oil is a state charge upon the property instead of being taken from the individual plants. When, then, the Archon has collected the oil for his year of office, he hands it over to the Treasurers to preserve in the Acropolis, and he may not take his seat in the Areopagus until he has paid over to the Treasurers the full amount. The Treasurers keep it in the Acropolis until the Panathenaea, when they measure it out to the Commissioners of Games, and they again to the victorious competitors. The prizes for the victors in the musical contest consist of silver and gold, for the victors in manly vigour, of shields, and for the victors in the gymnastic contest and the horse-race, of oil.

All officers connected with military service are elected by open vote. In the first place, ten Generals (Strategi), who were formerly elected one from each tribe, but now are chosen from the whole mass of citizens. Their duties are assigned to them by open vote; one is appointed to command the heavy infantry, and leads them if they go out to war; one to the defence of the country, who remains on the defensive, and fights if there is war within the borders of the country; two to Piraeus, one of whom is assigned to Munichia, and one to the south shore, and these have charge of the defence of the Piraeus; and one to superintend the symmories, who nominates the trierarchs arranges exchanges of properties for them, and brings up actions to decide on rival claims in connexion with them. The rest are dispatched to whatever business may be on hand at the moment. The appointment of these officers is submitted for confirmation in each prytany, when the question is put whether they are considered to be doing their duty. If any officer is rejected on this vote, he is tried in the lawcourt, and if he is found guilty the people decide what punishment or fine shall be inflicted on him; but if he is acquitted he resumes his office. The Generals have full power, when on active service, to arrest any one for insubordination, or to cashier him publicly, or to inflict a fine; the latter is, however, unusual.

There are also ten Taxiarchs, one from each tribe, elected by open vote; and each commands his own tribesmen and appoints captains of companies (Lochagi). There are also two Hipparchs, elected by open vote from the whole mass of the citizens, who command the cavalry, each taking five tribes. They have the same powers as the Generals have in respect of the infantry, and their appointments are also subject to confirmation. There are also ten Phylarchs, elected by open vote, one from each tribe, to command the cavalry, as the Taxiarchs do the infantry. There is also a Hipparch for Lemnos, elected by open vote, who has charge of the cavalry in Lemnos. There is also a treasurer of the Paralus, and another of the Ammonias, similarly elected.

Of the magistrates elected by lot, in former times some including the nine Archons, were elected out of the tribe as a whole, while others, namely those who are now elected in the Theseum, were apportioned among the demes; but since the demes used to sell the elections, these magistrates too are now elected from the whole tribe, except the members of the Council and the guards of the dockyards, who are still left to the demes.

Pay is received for the following services. First the members of the Assembly receive a drachma for the ordinary meetings, and nine obols for the 'sovereign' meeting. Then the jurors at the law-courts receive three obols; and the members of the Council five obols. They Prytanes receive an allowance of an obol for their maintenance. The nine Archons receive four obols apiece for maintenance, and also keep a herald and a flute-player; and the Archon for Salamis receives a drachma a day. The Commissioners for Games dine in the Prytaneum during the month of Hecatombaeon in which the Panathenaic festival takes place, from the fourteenth day onwards. The Amphictyonic deputies to Delos receive a drachma a day from the exchequer of Delos. Also all magistrates sent to Samos, Scyros, Lemnos, or Imbros receive an allowance for their maintenance. The military offices may be held any number of times, but none of the others more than once, except the membership of the Council, which may be held twice.

63

The juries for the law-courts are chosen by lot by the nine Archons, each for their own tribe, and by the clerk to the Thesmothetae for the tenth. There are ten entrances into the courts, one for each tribe; twenty rooms in which the lots are drawn, two for each tribe; a hundred chests, ten for each tribe; other chests, in which are placed the tickets of the jurors on whom the lot falls; and two vases. Further, staves, equal in number to the jurors required, are placed by the side of each entrance; and counters are put into one vase, equal in number to the staves. These are inscribed with letters of the alphabet beginning with the eleventh (lambda), equal in number to the courts which require to be filled. All persons above thirty years of age are qualified to serve as jurors, provided they are not debtors to the state and have not lost their civil rights. If any unqualified person serves as juror, an information is laid against him, and he is brought before the court; and, if he is convicted, the jurors assess the punishment or fine which they consider him to deserve. If he is condemned to a money fine, he must be imprisoned until he has paid up both the original debt, on account of which the information was laid against him, and also the fine which the court as imposed upon him. Each juror has his ticket of boxwood, on which is inscribed his name, with the name of his father and his deme, and one of the letters of the alphabet up to kappa; for the jurors in their several tribes are divided into ten sections, with approximately an equal number in each letter. When the Thesmothetes has decided by lot which letters are required to attend at the courts, the servant puts up above each court the letter which has been assigned to it by the lot.

The ten chests above mentioned are placed in front of the entrance used by each tribe, and are inscribed with the letters of the alphabet from alpha to kappa. The jurors cast in their tickets, each into the chest on which is inscribed the letter which is on his ticket; then the servant shakes them all up, and the Archon draws one ticket from each chest. The individual so selected is called the Ticket-hanger (Empectes), and his function is to hang up the tickets out of his chest on the bar which bears the same letter as that on the chest. He is chosen by lot, lest, if the Ticket-hanger were always the same person, he might tamper with the results. There are five of these bars in each of the rooms assigned for the lot-drawing. Then the Archon casts in the dice and thereby chooses the jurors from each tribe, room by room. The dice are made of brass, coloured black or white; and according to the number of jurors required, so many white dice are put in, one for each five tickets, while the remainder are black, in the same proportion. As the Archon draws out the dice, the crier calls out the names of the individuals chosen. The Ticket-hanger is included among those selected. Each juror, as he is chosen and answers to his name, draws a counter from the vase, and holding it out with the letter uppermost shows it first to the presiding Archon; and he, when he has seen it, throws the ticket of the juror into the chest on which is inscribed the letter which is on the counter, so that the juror must go into the court assigned to him by lot, and not into one chosen by himself, and that it may be impossible for any one to collect the jurors of his choice into any particular court. For this purpose chests are placed near the Archon, as many in number as there are courts to be filled that day, bearing the letters of the courts on which the lot has fallen.

The juror thereupon, after showing his counter again to the attendant, passes through the barrier into the court. The attendant gives him a staff of the same colour as the court bearing the letter which is on his counter, so as to ensure his going into the court assigned to him by lot; since, if he were to go into any other, he would be betrayed by the colour of his staff. Each court has a certain colour painted on the lintel of the entrance. Accordingly the juror, bearing his staff, enters the court which has the same colour as his staff, and the same letter as his counter. As he enters, he receives a voucher from the official to whom this duty has been assigned by lot. So with their counters and their staves the selected jurors take their seats in the court, having thus completed the process of admission. The unsuccessful candidates receive back their tickets from the Ticket-hangers. The public servants carry the chests from each tribe, one to each court, containing the names of the members of the tribe who are in that court, and hand them over to the officials assigned to the duty of giving back their tickets to the jurors in each court, so that these officials may call them up by name and pay them their fee.

When all the courts are full, two ballot boxes are placed in the first court, and a number of brazen dice, bearing the colours of the several courts, and other dice inscribed with the names of the presiding magistrates. Then two of the Thesmothetae, selected by lot, severally throw the dice with the colours into one box, and those with the magistrates’ names into the other. The magistrate whose name is first drawn is thereupon proclaimed by the crier as assigned for duty in the court which is first drawn, and the second in the second, and similarly with the rest. The object of this procedure is that no one may know which court he will have, but that each may take the court assigned to him by lot.

When the jurors have come in, and have been assigned to their respective courts, the presiding magistrate in each court draws one ticket out of each chest (making ten in all, one out of each tribe), and throws them into another empty chest. He then draws out five of them, and assigns one to the superintendence of the water-clock, and the other four to the telling of the votes. This is to prevent any tampering beforehand with either the superintendent of the clock or the tellers of the votes, and to secure that there is no malpractice in these respects. The five who have not been selected for these duties receive from them a statement of the order in which the jurors shall receive their fees, and of the places where the several tribes shall respectively gather in the court for this purpose when their duties are completed; the object being that the jurors may be broken up into small groups for the reception of their pay, and not all crowd together and impede one another.

67

These preliminaries being concluded, the cases are called on. If it is a day for private cases, the private litigants are called. Four cases are taken in each of the categories defined in the law, and the litigants swear to confine their speeches to the point at issue. If it is a day for public causes, the public litigants are called, and only one case is tried. Water-clocks are provided, having small supply-tubes, into which the water is poured by which the length of the pleadings is regulated. Ten gallons are allowed for a case in which an amount of more than five thousand drachmas is involved, and three for the second speech on each side. When the amount is between one and five thousand drachmas, seven gallons are allowed for the first speech and two for the second; when it is less than one thousand, five and two. Six gallons are allowed for arbitrations between rival claimants, in which there is no second speech. The official chosen by lot to superintend the water-clock places his hand on the supply tube whenever the clerk is about to read a resolution or law or affidavit or treaty. When, however, a case is conducted according to a set measurement of the day, he does not stop the supply, but each party receives an equal allowance of water. The standard of measurement is the length of the days in the month Poseideon.... The measured day is employed in cases when imprisonment, death, exile, loss of civil rights, or confiscation of goods is assigned as the penalty.

Most of the courts consist of 500 members...; and when it is necessary to bring public cases before a jury of 1,000 members, two courts combine for the purpose, the most important cases of all are brought 1,500 jurors, or three courts. The ballot balls are made of brass with stems running through the centre, half of them having the stem pierced and the other half solid. When the speeches are concluded, the officials assigned to the taking of the votes give each juror two ballot balls, one pierced and one solid. This is done in full view of the rival litigants, to secure that no one shall receive two pierced or two solid balls. Then the official designated for the purpose takes away the jurors staves, in return for which each one as he records his vote receives a brass voucher market with the numeral 3 (because he gets three obols when he gives it up). This is to ensure that all shall vote; since no one can get a voucher unless he votes. Two urns, one of brass and the other of wood, stand in the court, in distinct spots so that no one may surreptitiously insert ballot balls; in these the jurors record their votes. The brazen urn is for effective votes, the wooden for unused votes; and the brazen urn has a lid pierced so as to take only one ballot ball, in order that no one may put in two at a time.

When the jurors are about to vote, the crier demands first whether the litigants enter a protest against any of the evidence; for no protest can be received after the voting has begun. Then he proclaims again, ‘The pierced ballot for the plaintiff, the solid for the defendant’; and the juror, taking his two ballot balls from the stand, with his hand closed over the stem so as not to show either the pierced or the solid ballot to the litigants, casts the one which is to count into the brazen urn, and the other into the wooden urn.

When all the jurors have voted, the attendants take the urn containing the effective votes and discharge them on to a reckoning board having as many cavities as there are ballot balls, so that the effective votes, whether pierced or solid, may be plainly displayed and easily counted. Then the officials assigned to the taking of the votes tell them off on the board, the solid in one place and the pierced in another, and the crier announces the numbers of the votes, the pierced ballots being for the prosecutor and the solid for the defendant. Whichever has the majority is victorious; but if the votes are equal the verdict is for the defendant. Each juror receives two ballots, and uses one to record his vote, and throws the other away.

Then, if damages have to be awarded, they vote again in the same way, first returning their pay-vouchers and receiving back their staves. Half a gallon of water is allowed to each party for the discussion of the damages. Finally, when all has been completed in accordance with the law, the jurors receive their pay in the order assigned by the lot.

Ὅταν ἕτερον καθ’ ἑτέρου κατηγορῆται ὡς καθ’ ὑποκειμένου, ὅσα κατὰ τοῦ κατηγορουμένου λέγεται, πάντα καὶ κατὰ τοῦ ὑποκειμένου ῥηθήσεται· οἷον ἄνθρωπος κατὰ τοῦ τινὸς ἀνθρώπου κατηγορεῖται, τὸ δὲ ζῷον κατὰ τοῦ ἀνθρώπου· οὐκοῦν καὶ κατὰ τοῦ τινὸς ἀνθρώπου τὸ ζῷον κατηγορηθήσεται· ὁ γὰρ τὶς ἄνθρωπος καὶ ἄνθρωπός ἐστι καὶ ζῷον.

τῶν ἑτερογενῶν καὶ μὴ ὑπ’ ἄλληλα τεταγμένων ἕτεραι τῷ εἴδει καὶ αἱ διαφοραί, οἷον ζῴου καὶ ἐπιστήμης· ζῴου μὲν γὰρ διαφοραὶ τό τε πεζὸν καὶ τὸ πτηνὸν καὶ τὸ ἔνυδρον καὶ τὸ δίπουν, ἐπιστήμης δὲ οὐδεμία τούτων· οὐ γὰρ διαφέρει ἐπιστήμη ἐπιστήμης τῷ δίπους εἶναι. τῶν δέ γε ὑπ’ ἄλληλα γενῶν οὐδὲν κωλύει τὰς αὐτὰς διαφορὰς εἶναι· τὰ γὰρ ἐπάνω τῶν ὑπ’ αὐτὰ γενῶν κατηγορεῖται, ὥστε ὅσαι τοῦ κατηγορουμένου διαφοραί εἰσι τοσαῦται καὶ τοῦ ὑποκειμένου ἔσονται.

Κεφάλαιο 4

Τῶν κατὰ μηδεμίαν συμπλοκὴν λεγομένων ἕκαστον ἤτοι οὐσίαν σημαίνει ἢ ποσὸν ἢ ποιὸν ἢ πρός τι ἢ ποὺ ἢ ποτὲ ἢ κεῖσθαι ἢ ἔχειν ἢ ποιεῖν ἢ πάσχειν. ἔστι δὲ οὐσία μὲν ὡς τύπῳ εἰπεῖν οἷον ἄνθρωπος, ἵππος· ποσὸν δὲ οἷον δίπηχυ, τρίπηχυ· ποιὸν δὲ οἷον λευκόν, γραμματικόν· πρός τι δὲ [2a] οἷον διπλάσιον, ἥμισυ, μεῖζον· ποὺ δὲ οἷον ἐν Λυκείῳ, ἐν ἀγορᾷ· ποτὲ δὲ οἷον χθές, πέρυσιν· κεῖσθαι δὲ οἷον ἀνάκειται,κάθηται· ἔχειν δὲ οἷον ὑποδέδεται, ὥπλισται· ποιεῖν δὲ οἷον τέμνειν, καίειν· πάσχειν δὲ οἷον τέμνεσθαι, καίεσθαι. ἕκαστον δὲ τῶν εἰρημένων αὐτὸ μὲν καθ’ αὑτὸ ἐν οὐδεμιᾷ καταφάσει λέγεται, τῇ δὲ πρὸς ἄλληλα τούτων συμπλοκῇ κατάφασις γίγνεται· ἅπασα γὰρ δοκεῖ κατάφασις ἤτοι ἀληθὴς ἢ ψευδὴς εἶναι, τῶν δὲ κατὰ μηδεμίαν συμπλοκὴν λεγομένων οὐδὲν οὔτε ἀληθὲς οὔτε ψεῦδός ἐστιν, οἷον ἄνθρωπος, λευκόν, τρέχει, νικᾷ.

Κεφάλαιο 5

Οὐσία δέ ἐστιν ἡ κυριώτατά τε καὶ πρώτως καὶ μάλιστα λεγομένη, ἣ μήτε καθ’ ὑποκειμένου τινὸς λέγεται μήτε ἐν ὑποκειμένῳ τινί ἐστιν, οἷον ὁ τὶς ἄνθρωπος ἢ ὁ τὶς ἵππος. δεύτεραι δὲ οὐσίαι λέγονται, ἐν οἷς εἴδεσιν αἱ πρώτως οὐσίαι λεγόμεναι ὑπάρχουσιν, ταῦτά τε καὶ τὰ τῶν εἰδῶν τούτων γένη· οἷον ὁ τὶς ἄνθρωπος ἐν εἴδει μὲν ὑπάρχει τῷ ἀνθρώπῳ, γένος δὲ τοῦ εἴδους ἐστὶ τὸ ζῷον· δεύτεραι οὖν αὗται λέγονται οὐσίαι, οἷον ὅ τε ἄνθρωπος καὶ τὸ ζῷον. — φανερὸν δὲ ἐκ τῶν εἰρημένων ὅτι τῶν καθ’ ὑποκειμένου λεγομένων ἀναγκαῖον καὶ τοὔνομα καὶ τὸν λόγον κατηγορεῖσθαι τοῦ ὑποκειμένου· οἷον ἄνθρωπος καθ’ ὑποκειμένου λέγεται τοῦ τινὸς ἀνθρώπου, καὶ κατηγορεῖταί γε τοὔνομα, — τὸν γὰρ ἄνθρωπον κατὰ τοῦ τινὸς ἀνθρώπου κατηγορήσεις· — καὶ ὁ λόγος δὲ τοῦ ἀνθρώπου κατὰ τοῦ τινὸς ἀνθρώπου κατηγορηθήσεται, — ὁ γὰρ τὶς ἄνθρωπος καὶ ἄνθρωπός ἐστιν· — ὥστε καὶ τοὔνομα καὶ ὁ λόγος κατὰ τοῦ ὑποκειμένου κατηγορηθήσεται. τῶν δ’ ἐν ὑποκειμένῳ ὄντων ἐπὶ μὲν τῶν πλείστων οὔτε τοὔνομα οὔτε ὁ λόγος κατηγορεῖται τοῦ ὑποκειμένου· ἐπ’ ἐνίων δὲ τοὔνομα μὲν οὐδὲν κωλύει κατηγορεῖσθαι τοῦ ὑποκειμένου, τὸν δὲ λόγον ἀδύνατον· οἷον τὸ λευκὸν ἐν ὑποκειμένῳ ὂν τῷ σώματι κατηγορεῖται τοῦ ὑποκειμένου, — λευκὸν γὰρ σῶμα λέγεται, — ὁδὲ λόγος τοῦ λευκοῦ οὐδέποτε κατὰ τοῦ σώματος κατηγορηθήσεται. — τὰ δ’ ἄλλα πάντα ἤτοι καθ’ ὑποκειμένων λέγεται τῶν πρώτων οὐσιῶν ἢ ἐν ὑποκειμέναις αὐταῖς ἐστίν. τοῦτο δὲ φανερὸν ἐκ τῶν καθ’ ἕκαστα προχειριζομένων· οἷον τὸ ζῷον κατὰ τοῦ ἀνθρώπου κατηγορεῖται, οὐκοῦν καὶ κατὰ τοῦ τινὸς ἀνθρώπου, — εἰ γὰρ κατὰ μηδενὸς τῶν τινῶν [2b] ἀνθρώπων, οὐδὲ κατὰ ἀνθρώπου ὅλως· — πάλιν τὸ χρῶμα ἐν σώματι, οὐκοῦν καὶ ἐν τινὶ σώματι· εἰ γὰρ μὴ ἐν τινὶ τῶν καθ’ ἕκαστα, οὐδὲ ἐν σώματι ὅλως· ὥστε τὰ ἄλλα πάντα ἤτοι καθ’ ὑποκειμένων τῶν πρώτων οὐσιῶν λέγεται ἢ ἐν ὑποκειμέναις αὐταῖς ἐστίν. μὴ οὐσῶν οὖν τῶν πρώτων οὐσιῶν ἀδύνατον τῶν ἄλλων τι εἶναι· πάντα γὰρ τὰ ἄλλα ἤτοι καθ’ ὑποκειμένων τούτων λέγεται ἢ ἐν ὑποκειμέναις αὐταῖς ἐστίν· ὥστε μὴ οὐσῶν τῶν πρώτων οὐσιῶν ἀδύνατον τῶν ἄλλων τι εἶναι.

Τῶν δὲ δευτέρων οὐσιῶν μᾶλλον οὐσία τὸ εἶδος τοῦ γένους· ἔγγιον γὰρ τῆς πρώτης οὐσίας ἐστίν. ἐὰν γὰρ ἀποδιδῷ τις τὴν πρώτην οὐσίαν τί ἐστι, γνωριμώτερον καὶ οἰκειότερον ἀποδώσει τὸ εἶδος ἀποδιδοὺς ἢ τὸ γένος· οἷον τὸν τινὰ ἄνθρωπον γνωριμώτερον ἂν ἀποδοίη ἄνθρωπον ἀποδιδοὺς ἢ ζῷον, — τὸ μὲν γὰρ ἴδιον μᾶλλον τοῦ τινὸς ἀνθρώπου, τὸ δὲ κοινότερον, — καὶ τὸ τὶ δένδρον ἀποδιδοὺς γνωριμώτερον ἀποδώσει δένδρον ἀποδιδοὺς ἢ φυτόν. ἔτι αἱ πρῶται οὐσίαι διὰ τὸ τοῖς ἄλλοις ἅπασιν ὑποκεῖσθαι καὶ πάντα τὰ ἄλλα κατὰ τούτων κατηγορεῖσθαι ἢ ἐν ταύταις εἶναι διὰ τοῦτο μάλιστα οὐσίαι λέγονται· ὡς δέ γε αἱ πρῶται οὐσίαι πρὸς τὰ ἄλλα ἔχουσιν, οὕτω καὶ τὸ εἶδος πρὸς τὸ γένος ἔχει· — ὑπόκειται γὰρ τὸ εἶδος τῷ γένει· τὰ μὲν γὰρ γένη κατὰ τῶν εἰδῶν κατηγορεῖται, τὰ δὲ εἴδη κατὰ τῶν γενῶν οὐκ ἀντιστρέφει· — ὥστε καὶ ἐκτούτων τὸ εἶδος τοῦ γένους μᾶλλον οὐσία. — αὐτῶν δὲ τῶν εἰδῶν ὅσα μή ἐστι γένη, οὐδὲν μᾶλλον ἕτερον ἑτέρου οὐσία ἐστίν· οὐδὲν γὰρ οἰκειότερον ἀποδώσει κατὰ τοῦ τινὸς ἀνθρώπου τὸν ἄνθρωπον ἀποδιδοὺς ἢ κατὰ τοῦ τινὸς ἵππου τὸν ἵππον. ὡσαύτως δὲ καὶ τῶν πρώτων οὐσιῶν οὐδὲν μᾶλλον ἕτερον ἑτέρου οὐσία ἐστίν· οὐδὲν γὰρ μᾶλλον ὁ τὶς ἄνθρωπος οὐσία ἢ ὁ τὶς βοῦς.

Εἰκότως δὲ μετὰ τὰς πρώτας οὐσίας μόνα τῶν ἄλλων τὰ εἴδη καὶ τὰ γένη δεύτεραι οὐσίαι λέγονται· μόνα γὰρ δηλοῖ τὴν πρώτην οὐσίαν τῶν κατηγορουμένων· τὸν γὰρ τινὰ ἄνθρωπον ἐὰν ἀποδιδῷ τις τί ἐστιν, τὸ μὲν εἶδος ἢ τὸ γένος ἀποδιδοὺς οἰκείως ἀποδώσει, — καὶ γνωριμώτερον ποιήσει ἄνθρωπον ἢ ζῷον ἀποδιδούς· — τῶν δ’ ἄλλων ὅ τι ἂν ἀποδιδῷ τις, ἀλλοτρίως ἔσται ἀποδεδωκώς, οἷον λευκὸν ἢ τρέχει ἢ ὁτιοῦν τῶν τοιούτων ἀποδιδούς· ὥστε εἰκότως ταῦτα μόνα τῶν ἄλλων οὐσίαι λέγονται. ἔτι αἱ πρῶται οὐσίαι διὰ τὸ τοῖς ἄλλοις ἅπασιν ὑποκεῖσθαι κυριώτατα οὐσίαι [3a] λέγονται· ὡς δέ γε αἱ πρῶται οὐσίαι πρὸς τὰ ἄλλα πάντα ἔχουσιν, οὕτω τὰ εἴδη καὶ τὰ γένη τῶν πρώτων οὐσιῶν πρὸς τὰ λοιπὰ πάντα ἔχει· κατὰ τούτων γὰρ πάντα τὰ λοιπὰ κατηγορεῖται· τὸν γὰρ τινὰ ἄνθρωπον ἐρεῖς γραμματικόν, οὐκοῦν καὶ ἄνθρωπον καὶ ζῷον γραμματικὸν ἐρεῖς· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων.

Κοινὸν δὲ κατὰ πάσης οὐσίας τὸ μὴ ἐν ὑποκειμένῳ εἶναι. ἡ μὲν γὰρ πρώτη οὐσία οὔτε καθ’ ὑποκειμένου λέγεται οὔτε ἐν ὑποκειμένῳ ἐστίν. τῶν δὲ δευτέρων οὐσιῶν φανερὸν μὲν καὶ οὕτως ὅτι οὐκ εἰσὶν ἐν ὑποκειμένῳ· ὁ γὰρ ἄνθρωπος καθ’ ὑποκειμένου μὲν τοῦ τινὸς ἀνθρώπου λέγεται, ἐν ὑποκειμένῳ δὲ οὐκ ἔστιν, — οὐ γὰρ ἐν τῷ τινὶ ἀνθρώπῳ ὁ ἄνθρωπός ἐστιν· — ὡσαύτως δὲ καὶ τὸ ζῷον καθ’ ὑποκειμένου μὲν λέγεται τοῦ τινὸς ἀνθρώπου, οὐκ ἔστι δὲ τὸ ζῷον ἐν τῷ τινὶ ἀνθρώπῳ. ἔτι δὲ τῶν ἐν ὑποκειμένῳ ὄντων τὸ μὲν ὄνομα οὐδὲν κωλύει κατηγορεῖσθαί ποτε τοῦ ὑποκειμένου, τὸν δὲ λόγον ἀδύνατον· τῶν δὲ δευτέρων οὐσιῶν κατηγορεῖται καὶ ὁ λόγος κατὰ τοῦ ὑποκειμένου καὶ τοὔνομα, — τὸν γὰρ τοῦ ἀνθρώπου λόγον κατὰ τοῦ τινὸς ἀνθρώπου κατηγορήσεις καὶ τὸν τοῦ ζῴου. — ὥστε οὐκ ἂν εἴη οὐσία τῶν ἐν ὑποκειμένῳ. — οὐκ ἴδιον δὲ οὐσίας τοῦτο, ἀλλὰ καὶ ἡ διαφορὰ τῶν μὴ ἐν ὑποκειμένῳ ἐστίν· τὸ γὰρ πεζὸν καὶ τὸ δίπουν καθ’ ὑποκειμένου μὲν λέγεται τοῦ ἀνθρώπου, ἐν ὑποκειμένῳ δὲ οὐκ ἔστιν, — οὐ γὰρ ἐν τῷ ἀνθρώπῳ ἐστὶ τὸ δίπουν οὐδὲ τὸ πεζόν. — καὶ ὁ λόγος δὲ κατηγορεῖται ὁ τῆς διαφορᾶς καθ’ οὗ ἂν λέγηται ἡ διαφορά· οἷον εἰ τὸ πεζὸν κατὰ ἀνθρώπου λέγεται, καὶ ὁ λόγος τοῦ πεζοῦ κατηγορηθήσεται τοῦ ἀνθρώπου, — πεζὸν γάρ ἐστιν ὁ ἄνθρωπος. — μὴ ταραττέτω δὲ ἡμᾶς τὰ μέρη τῶν οὐσιῶν ὡς ἐν ὑποκειμένοις ὄντα τοῖς ὅλοις, μή ποτε ἀναγκασθῶμεν οὐκ οὐσίας αὐτὰ φάσκειν εἶναι· οὐ γὰρ οὕτω τὰ ἐν ὑποκειμένῳ ἐλέγετο τὰ ὡς μέρη ὑπάρχοντα ἔν τινι.

Ὑπάρχει δὲ ταῖς οὐσίαις καὶ ταῖς διαφοραῖς τὸ πάντα συνωνύμως ἀπ’ αὐτῶν λέγεσθαι· πᾶσαι γὰρ αἱ ἀπὸ τούτων κατηγορίαι ἤτοι κατὰ τῶν ἀτόμων κατηγοροῦνται ἢ κατὰ τῶν εἰδῶν. ἀπὸ μὲν γὰρ τῆς πρώτης οὐσίας οὐδεμία ἐστὶ κατηγορία, — κατ’ οὐδενὸς γὰρ ὑποκειμένου λέγεται· — τῶν δὲ δευτέρων οὐσιῶν τὸ μὲν εἶδος κατὰ τοῦ ἀτόμου κατηγορεῖται, τὸ δὲ γένος καὶ κατὰ τοῦ εἴδους καὶ κατὰ τοῦ ἀτόμου· [3b] ὡσαύτως δὲ καὶ αἱ διαφοραὶ καὶ κατὰ τῶν εἰδῶν καὶ κατὰ τῶν ἀτόμων κατηγοροῦνται. καὶ τὸν λόγον δὲ ἐπιδέχονται αἱ πρῶται οὐσίαι τὸν τῶν εἰδῶν καὶ τὸν τῶν γενῶν, καὶ τὸ εἶδος δὲ τὸν τοῦ γένους. — ὅσα γὰρ κατὰ τοῦ κατηγορουμένου λέγεται, καὶ κατὰ τοῦ ὑποκειμένου ῥηθήσεται· — ὡσαύτως δὲ καὶ τὸν τῶν διαφορῶν λόγον ἐπιδέχεται τά τε εἴδη καὶ τὰ ἄτομα· συνώνυμα δέ γε ἦν ὧν καὶ τοὔνομα κοινὸν καὶ ὁ λόγος ὁ αὐτός. ὥστε πάντα τὰ ἀπὸ τῶν οὐσιῶν καὶ τῶν διαφορῶν συνωνύμως λέγεται.

Πᾶσα δὲ οὐσία δοκεῖ τόδε τι σημαίνειν. ἐπὶ μὲν οὖν τῶν πρώτων οὐσιῶν ἀναμφισβήτητον καὶ ἀληθές ἐστιν ὅτι τόδε τι σημαίνει· ἄτομον γὰρ καὶ ἓν ἀριθμῷ τὸ δηλούμενόν ἐστιν. ἐπὶ δὲ τῶν δευτέρων οὐσιῶν φαίνεται μὲν ὁμοίως τῷ σχήματι τῆς προσηγορίας τόδε τι σημαίνειν, ὅταν εἴπῃ ἄνθρωπον ἢ ζῷον· οὐ μὴν ἀληθές γε, ἀλλὰ μᾶλλον ποιόν τι σημαίνει, — οὐ γὰρ ἕν ἐστι τὸ ὑποκείμενον ὥσπερ ἡ πρώτη οὐσία, ἀλλὰ κατὰ πολλῶν ὁ ἄνθρωπος λέγεται καὶ τὸ ζῷον· — οὐχ ἁπλῶς δὲ ποιόν τι σημαίνει, ὥσπερ τὸ λευκόν· οὐδὲν γὰρ ἄλλο σημαίνει τὸ λευκὸν ἀλλ’ ἢ ποιόν, τὸ δὲ εἶδος καὶ τὸ γένος περὶ οὐσίαν τὸ ποιὸν ἀφορίζει, — ποιὰν γάρ τινα οὐσίαν σημαίνει. — ἐπὶ πλεῖον δὲ τῷ γένει ἢ τῷ εἴδει τὸν ἀφορισμὸν ποιεῖται· ὁ γὰρ ζῷον εἰπὼν ἐπὶ πλεῖον περιλαμβάνει ἢ ὁ τὸν ἄνθρωπον.

Ὑπάρχει δὲ ταῖς οὐσίαις καὶ τὸ μηδὲν αὐταῖς ἐναντίον εἶναι. τῇ γὰρ πρώτῃ οὐσίᾳ τί ἂν εἴη ἐναντίον; οἷον τῷ τινὶ ἀνθρώπῳ οὐδέν ἐστιν ἐναντίον, οὐδέ γε τῷ ἀνθρώπῳ ἢ τῷ ζῴῳ οὐδέν ἐστιν ἐναντίον. οὐκ ἴδιον δὲ τῆς οὐσίας τοῦτο, ἀλλὰ καὶ ἐπ’ ἄλλων πολλῶν οἷον ἐπὶ τοῦ ποσοῦ· τῷ γὰρ διπήχει οὐδέν ἐστιν ἐναντίον, οὐδὲ τοῖς δέκα, οὐδὲ τῶν τοιούτων οὐδενί, εἰ μή τις τὸ πολὺ τῷ ὀλίγῳ φαίη ἐναντίον εἶναι ἢ τὸ μέγα τῷ μικρῷ· τῶν δὲ ἀφωρισμένων ποσῶν οὐδὲν οὐδενὶ ἐναντίον ἐστίν.

Δοκεῖ δὲ ἡ οὐσία οὐκ ἐπιδέχεσθαι τὸ μᾶλλον καὶ τὸ ἧττον· λέγω δὲ οὐχ ὅτι οὐσία οὐσίας οὐκ ἔστι μᾶλλον οὐσία, — τοῦτο μὲν γὰρ εἴρηται ὅτι ἔστιν, — ἀλλ’ ὅτι ἑκάστη οὐσία τοῦθ’ ὅπερ ἐστὶν οὐ λέγεται μᾶλλον καὶ ἧττον· οἷον εἰ ἔστιν αὕτη ἡ οὐσία ἄνθρωπος, οὐκ ἔσται μᾶλλον καὶ ἧττον ἄνθρωπος, οὔτε αὐτὸς αὑτοῦ οὔτε ἕτερος ἑτέρου. οὐ γάρ ἐστιν ἕτερος ἑτέρου μᾶλλον ἄνθρωπος, ὥσπερ [4a] τὸ λευκόν ἐστιν ἕτερον ἑτέρου μᾶλλον λευκόν, καὶ καλὸν ἕτερον ἑτέρου μᾶλλον· καὶ αὐτὸ δὲ αὑτοῦ μᾶλλον καὶ ἧττον λέγεται, οἷον τὸ σῶμα λευκὸν ὂν μᾶλλον λευκὸν λέγεται νῦν ἢ πρότερον, καὶ θερμὸν ὂν μᾶλλον θερμὸν καὶ ἧττον λέγεται· ἡ δέ γε οὐσία οὐδὲν λέγεται, — οὐδὲ γὰρ ἄνθρωπος μᾶλλον νῦν ἄνθρωπος ἢ πρότερον λέγεται, οὐδὲ τῶν ἄλλων οὐδέν, ὅσα ἐστὶν οὐσία· — ὥστε οὐκ ἂν ἐπιδέχοιτο ἡ οὐσία τὸ μᾶλλον καὶ ἧττον.

Μάλιστα δὲ ἴδιον τῆς οὐσίας δοκεῖ εἶναι τὸ ταὐτὸν καὶ ἓν ἀριθμῷ ὂν τῶν ἐναντίων εἶναι δεκτικόν· οἷον ἐπὶ μὲν τῶν ἄλλων οὐδενὸς ἂν ἔχοι τις προενεγκεῖν [ὅσα μή ἐστιν οὐσία], ὃ ἓν ἀριθμῷ ὂν τῶν ἐναντίων δεκτικόν ἐστιν· οἷον τὸ χρῶμα, ὅ ἐστιν ἓν καὶ ταὐτὸν ἀριθμῷ, οὐκ ἔσται λευκὸν καὶ μέλαν, οὐδὲ ἡ αὐτὴ πρᾶξις καὶ μία τῷ ἀριθμῷ οὐκ ἔσται φαύλη καὶ σπουδαία, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, ὅσα μή ἐστιν οὐσία. ἡ δέ γε οὐσία ἓν καὶ ταὐτὸν ἀριθμῷ ὂν δεκτικὸν τῶν ἐναντίων ἐστίν· οἷον ὁ τὶς ἄνθρωπος, εἷς καὶ ὁ αὐτὸς ὤν, ὁτὲ μὲν λευκὸς ὁτὲ δὲ μέλας γίγνεται, καὶ θερμὸς καὶ ψυχρός, καὶ φαῦλος καὶ σπουδαῖος. ἐπὶ δὲ τῶν ἄλλων οὐδενὸς φαίνεται τὸ τοιοῦτον, εἰ μή τις ἐνίσταιτο τὸν λόγον καὶ τὴν δόξαν φάσκων τῶν τοιούτων εἶναι· ὁ γὰρ αὐτὸς λόγος ἀληθής τε καὶ ψευδὴς εἶναι δοκεῖ, οἷον εἰ ἀληθὴς εἴη ὁ λόγος τὸ καθῆσθαί τινα, ἀναστάντος αὐτοῦ ὁ αὐτὸς οὗτος ψευδὴς ἔσται· ὡσαύτως δὲ καὶ ἐπὶ τῆς δόξης· εἰ γάρ τις ἀληθῶςδοξάζοι τὸ καθῆσθαί τινα, ἀναστάντος αὐτοῦ ψευδῶς δοξάσει τὴν αὐτὴν ἔχων περὶ αὐτοῦ δόξαν. εἰ δέ τις καὶ τοῦτο παραδέχοιτο, ἀλλὰ τῷ γε τρόπῳ διαφέρει· τὰ μὲν γὰρ ἐπὶ τῶν οὐσιῶν αὐτὰ μεταβάλλοντα δεκτικὰ τῶν ἐναντίων ἐστίν, — ψυχρὸν γὰρ ἐκ θερμοῦ γενόμενον μετέβαλεν (ἠλλοίωται γάρ), καὶ μέλαν ἐκ λευκοῦ καὶ σπουδαῖον ἐκ φαύλου, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων ἕκαστον αὐτὸ μεταβολὴν δεχόμενον τῶν ἐναντίων δεκτικόν ἐστιν· — ὁ δὲ λόγος καὶ ἡ δόξα αὐτὰ μὲν ἀκίνητα πάντῃ πάντως διαμένει, τοῦ δὲ πράγματος κινουμένου τὸ ἐναντίον περὶ αὐτὰ γίγνεται· ὁ μὲν γὰρ λόγος διαμένει ὁ αὐτὸς τὸ καθῆσθαί τινα, τοῦ δὲ [4b] πράγματος κινηθέντος ὁτὲ μὲν ἀληθὴς ὁτὲ δὲ ψευδὴς γίγνεται· ὡσαύτως δὲ καὶ ἐπὶ τῆς δόξης. ὥστε τῷ τρόπῳ γε ἴδιον ἂν εἴη τῆς οὐσίας τὸ κατὰ τὴν αὑτῆς μεταβολὴν δεκτικὴν τῶν ἐναντίων εἶναι, — εἰ δή τις καὶ ταῦτα παραδέχοιτο, τὴν δόξαν καὶ τὸν λόγον δεκτικὰ τῶν ἐναντίων εἶναι. οὐκ ἔστι δὲ ἀληθὲς τοῦτο· ὁ γὰρ λόγος καὶ ἡ δόξα οὐ τῷ αὐτὰ δέχεσθαί τι τῶν ἐναντίων εἶναι δεκτικὰ λέγεται, ἀλλὰ τῷ περὶ ἕτερόν τι τὸ πάθος γεγενῆσθαι· — τῷ γὰρ τὸ πρᾶγμα εἶναι ἢ μὴ εἶναι, τούτῳ καὶ ὁ λόγος ἀληθὴς ἢ ψευδὴς εἶναι λέγεται, οὐ τῷ αὐτὸν δεκτικὸν εἶναι τῶν ἐναντίων· ἁπλῶς γὰρ οὐδὲν ὑπ’ οὐδενὸς οὔτε ὁ λόγος κινεῖται οὔτε ἡ δόξα, ὥστε οὐκ ἂν εἴη δεκτικὰ τῶν ἐναντίων μηδενὸς ἐν αὐτοῖς γιγνομένου· — ἡ δέ γε οὐσία τῷ αὐτὴν τὰ ἐναντία δέχεσθαι, τούτῳ δεκτικὴ τῶν ἐναντίων λέγεται· νόσον γὰρ καὶ ὑγίειαν δέχεται, καὶ λευκότητα καὶ μελανίαν, καὶ ἕκαστον τῶν τοιούτων αὐτὴ δεχομένη τῶν ἐναντίων εἶναι δεκτικὴ λέγεται. ὥστε ἴδιον ἂν οὐσίας εἴη τὸ ταὐτὸν καὶ ἓν ἀριθμῷ ὂν δεκτικὸν εἶναι τῶν ἐναντίων. περὶ μὲν οὖν οὐσίας τοσαῦτα εἰρήσθω.

Κεφάλαιο 6

Τοῦ δὲ ποσοῦ τὸ μέν ἐστι διωρισμένον, τὸ δὲ συνεχές· καὶ τὸ μὲν ἐκ θέσιν ἐχόντων πρὸς ἄλληλα τῶν ἐν αὐτοῖς μορίων συνέστηκε, τὸ δὲ οὐκ ἐξ ἐχόντων θέσιν. ἔστι δὲ διωρισμένον μὲν οἷον ἀριθμὸς καὶ λόγος, συνεχὲς δὲ γραμμή, ἐπιφάνεια, σῶμα, ἔτι δὲ παρὰ ταῦτα χρόνος καὶ τόπος. — τῶν μὲν γὰρ τοῦ ἀριθμοῦ μορίων οὐδείς ἐστι κοινὸς ὅρος, πρὸς ὃν συνάπτει τὰ μόρια αὐτοῦ· οἷον τὰ πέντε εἰ ἔστι τῶν δέκα μόριον, πρὸς οὐδένα κοινὸν ὅρον συνάπτει τὰ πέντε καὶ τὰ πέντε, ἀλλὰ διώρισται· καὶ τὰ τρία γε καὶ τὰ ἑπτὰ πρὸς οὐδένα κοινὸν ὅρον συνάπτει· οὐδ᾽ ὅλως ἂν ἔχοις ἐπ᾽ ἀριθμοῦ λαβεῖν κοινὸν ὅρον τῶν μορίων, ἀλλ᾽ ἀεὶ διώρισται· ὥστε ὁ μὲν ἀριθμὸς τῶν διωρισμένων ἐστίν. ὡσαύτως δὲ καὶ ὁ λόγος τῶν διωρισμένων ἐστίν· (ὅτι μὲν γὰρ ποσόν ἐστιν ὁ λόγος φανερόν· καταμετρεῖται γὰρ συλλαβῇ μακρᾷ καὶ βραχείᾳ· λέγω δὲ αὐτὸν τὸν μετὰ φωνῆς λόγον γιγνόμενον)· πρὸς οὐδένα γὰρ κοινὸν ὅρον αὐτοῦ τὰ μόρια συνάπτει· οὐ γὰρ ἔστι κοινὸς ὅρος πρὸς ὃν αἱ συλλαβαὶ συνάπτουσιν, ἀλλ᾽ ἑκάστη διώρισται αὐτὴ καθ᾽ αὑτήν. [5a] — ἡ δὲ γραμμὴ συνεχές ἐστιν· ἔστι γὰρ λαβεῖν κοινὸν ὅρον πρὸς ὃν τὰ μόρια αὐτῆς συνάπτει, στιγμήν· καὶ τῆς ἐπιφανείας γραμμήν, — τὰ γὰρ τοῦ ἐπιπέδου μόρια πρός τινα κοινὸν ὅρον συνάπτει. — ὡσαύτως δὲ καὶ ἐπὶ τοῦ σώματος ἔχοις ἂν λαβεῖν κοινὸν ὅρον, γραμμὴν ἢ ἐπιφάνειαν, πρὸς ἣν τὰ τοῦ σώματος μόρια συνάπτει. ἔστι δὲ καὶ ὁ χρόνος καὶ ὁ τόπος τῶν τοιούτων· ὁ γὰρ νῦν χρόνος συνάπτει πρός τε τὸν παρεληλυθότα καὶ τὸν μέλλοντα. πάλιν ὁ τόπος τῶν συνεχῶν ἐστιν· τόπον γάρ τινα τὰ τοῦ σώματος μόρια κατέχει, ἃ πρός τινα κοινὸν ὅρον συνάπτει· οὐκοῦν καὶ τὰ τοῦ τόπου μόρια, ἃ κατέχει ἕκαστον τῶν τοῦ σώματος μορίων, πρὸς τὸν αὐτὸν ὅρον συνάπτει πρὸς ὃν καὶ τὰ τοῦ σώμα — τος μόρια· ὥστε συνεχὲς ἂν εἴη καὶ ὁ τόπος· πρὸς γὰρ ἕνα κοινὸν ὅρον αὐτοῦ τὰ μόρια συνάπτει.

Ἔτι τὰ μὲν ἐκ θέσιν ἐχόντων πρὸς ἄλληλα τῶν ἐν αὐτοῖς μορίων συνέστηκεν, τὰ δὲ οὐκ ἐξ ἐχόντων θέσιν· οἷον τὰ μὲν τῆς γραμμῆς μόρια θέσιν ἔχει πρὸς ἄλληλα, — ἕκαστον γὰρ αὐτῶν κεῖταί που, καὶ ἔχοις ἂν διαλαβεῖν καὶ ἀποδοῦναι οὗ ἕκαστον κεῖται ἐν τῷ ἐπιπέδῳ καὶ πρὸς ποῖον μόριον τῶν λοιπῶν συνάπτει· — ὡσαύτως δὲ καὶ τὰ τοῦ ἐπιπέδου μόρια θέσιν ἔχει τινά, — ὁμοίως γὰρ ἂν ἀποδοθείη ἕκαστον οὗ κεῖται, καὶ ποῖα συνάπτει πρὸς ἄλληλα. — καὶ τὰ τοῦ στερεοῦ δὲ ὡσαύτως καὶ τὰ τοῦ τόπου. ἐπὶ δέ γε τοῦ ἀριθμοῦ οὐκ ἂν ἔχοι τις ἐπιβλέψαι ὡς τὰ μόρια θέσιν τινὰ ἔχει πρὸς ἄλληλα ἢ κεῖταί που, ἢ ποῖά γε πρὸς ἄλληλα συνάπτει τῶν μορίων· οὐδὲ τὰ τοῦ χρόνου· ὑπομένει γὰρ οὐδὲν τῶν τοῦ χρόνου μορίων, ὃ δὲ μή ἐστιν ὑπομένον, πῶς ἂν τοῦτο θέσιν τινὰ ἔχοι; ἀλλὰ μᾶλλον τάξιν τινὰ εἴποις ἂν ἔχειν τῷ τὸ μὲν πρότερον εἶναι τοῦ χρόνου τὸ δ’ ὕστερον. καὶ ἐπὶ τοῦ ἀριθμοῦ δὲ ὡσαύτως, τῷ πρότερον ἀριθμεῖσθαι τὸ ἓν τῶν δύο καὶ τὰ δύο τῶν τριῶν· καὶ οὕτω τάξιν ἄν τινα ἔχοι, θέσιν δὲ οὐ πάνυ λάβοις ἄν. καὶ ὁ λόγος δὲ ὡσαύτως· οὐδὲν γὰρ ὑπομένει τῶν μορίων αὐτοῦ, ἀλλ’ εἴρηταί τε καὶ οὐκ ἔστιν ἔτι τοῦτο λαβεῖν, ὥστε οὐκ ἂν εἴη θέσις τῶν μορίων αὐτοῦ, εἴγε μηδὲν ὑπομένει. — τὰ μὲν οὖν ἐκ θέσιν ἐχόντων τῶν μορίων συνέστηκε, τὰ δὲ οὐκ ἐξ ἐχόντων θέσιν.

Κυρίως δὲ ποσὰ ταῦτα μόνα λέγεται τὰ εἰρημένα, τὰ δὲ ἄλλα πάντα κατὰ συμβεβηκός· εἰς ταῦτα γὰρ [5b] βλέποντες καὶ τἆλλα ποσὰ λέγομεν, οἷον πολὺ τὸ λευκὸν λέγεται τῷ τὴν ἐπιφάνειαν πολλὴν εἶναι, καὶ ἡ πρᾶξις μακρὰ τῷ γε τὸν χρόνον πολὺν εἶναι, καὶ ἡ κίνησις πολλή· οὐ γὰρκαθ’ αὑτὸ ἕκαστον τούτων ποσὸν λέγεται· οἷον ἐὰν ἀποδιδῷ τις πόση τις ἡ πρᾶξίς ἐστι, τῷ χρόνῳ ὁριεῖ ἐνιαυσίαν ἢ οὕτω πως ἀποδιδούς, καὶ τὸ λευκὸν ποσόν τι ἀποδιδοὺς τῇ ἐπιφανείᾳ ὁριεῖ, — ὅση γὰρ ἂν ἡ ἐπιφάνεια ᾖ, τοσοῦτον καὶ τὸ λευκὸν φήσει εἶναι· — ὥστε μόνα κυρίως καὶ καθ’ αὑτὰ ποσὰ λέγεται τὰ εἰρημένα, τῶν δὲ ἄλλων οὐδὲν αὐτὸ καθ’ αὑτό, ἀλλ’ εἰ ἄρα κατὰ συμβεβηκός.

Ἔτι τῷ ποσῷ οὐδέν ἐστιν ἐναντίον, (ἐπὶ μὲν γὰρ τῶν ἀφωρισμένων φανερὸν ὅτι οὐδέν ἐστιν ἐναντίον, οἷον τῷ διπήχει ἢ τριπήχει ἢ τῇ ἐπιφανείᾳ ἢ τῶν τοιούτων τινί, — οὐδὲν γάρ ἐστιν ἐναντίον), εἰ μὴ τὸ πολὺ τῷ ὀλίγῳ φαίη τις εἶναι ἐναντίον ἢ τὸ μέγα τῷ μικρῷ. τούτων δὲ οὐδέν ἐστι ποσὸν ἀλλὰ τῶν πρός τι· οὐδὲν γὰρ αὐτὸ καθ’ αὑτὸ μέγα λέγεται ἢ μικρόν, ἀλλὰ πρὸς ἕτερον ἀναφέρεται, οἷον ὄρος μὲν μικρὸν λέγεται, κέγχρος δὲ μεγάλη τῷ τὴν μὲν τῶν ὁμογενῶν μεῖζον εἶναι, τὸ δὲ ἔλαττον τῶν ὁμογενῶν· οὐκοῦν πρὸς ἕτερον ἡ ἀναφορά, ἐπεὶ εἴγε καθ’ αὑτὸ μικρὸν ἢ μέγα ἐλέγετο, οὐκ ἄν ποτε τὸ μὲν ὄρος μικρὸν ἐλέγετο, ἡ δὲ κέγχρος μεγάλη. πάλιν ἐν μὲν τῇ κώμῃ πολλούς φαμεν ἀνθρώπους εἶναι, ἐν Ἀθήναις δὲ ὀλίγους πολλαπλασίους αὐτῶν ὄντας, καὶ ἐν μὲν τῇ οἰκίᾳ πολλούς, ἐν δὲ τῷ θεάτρῳ ὀλίγους πολλῷ πλείους ὄντας. — ἔτι τὸ μὲν δίπηχυ καὶ τρίπηχυ καὶ ἕκαστον τῶν τοιούτων ποσὸν σημαίνει, τὸ δὲ μέγα ἢ μικρὸν οὐ σημαίνει ποσὸν ἀλλὰ μᾶλλον πρός τι· πρὸς γὰρ ἕτερον θεωρεῖται τὸ μέγα καὶ τὸ μικρόν· ὥστε φανερὸν ὅτι ταῦτα τῶν πρός τί ἐστιν. — ἔτι ἐάν τε τιθῇ τις αὐτὰ ποσὰ εἶναι ἐάν τε μὴ τιθῇ, οὐκ ἔστιν αὐτοῖς ἐναντίον οὐδέν· ὃ γὰρ μὴ ἔστιν αὐτὸ καθ’ αὑτὸ λαβεῖν ἀλλὰ πρὸς ἕτερον ἀναφέροντα, πῶς ἂν εἴη τούτῳ τι ἐναντίον; — ἔτι εἰ ἔσται τὸ μέγα καὶ τὸ μικρὸνἐναντία, συμβήσεται τὸ αὐτὸ ἅμα τὰ ἐναντία ἐπιδέχεσθαι καὶ αὐτὰ αὑτοῖς εἶναι ἐναντία. συμβαίνει γὰρ ἅμα τὸ αὐτὸ μέγα τε καὶ μικρὸν εἶναι, — ἔστι γὰρ πρὸς μὲν τοῦτο μικρόν, πρὸς ἕτερον δὲ τὸ αὐτὸ τοῦτο μέγα· — ὥστε τὸ αὐτὸ καὶ μέγα καὶ μικρὸν κατὰ τὸν αὐτὸν χρόνον εἶναι συμβαίνει, ὥστε ἅμα τὰ ἐναντία ἐπιδέχεσθαι· ἀλλ' οὐδὲν δοκεῖ [6a] ἅμα τὰ ἐναντία ἐπιδέχεσθαι· οἷον ἐπὶ τῆς οὐσίας, δεκτικὴ μὲν τῶν ἐναντίων δοκεῖ εἶναι, ἀλλ' οὔτι γε ἅμα νοσεῖ καὶ ὑγιαίνει, οὐδὲ λευκὸν καὶ μέλαν ἐστὶν ἅμα, οὐδὲ τῶν ἄλλων οὐδὲν ἅμα τὰ ἐναντία ἐπιδέχεται. καὶ αὐτὰ δ' αὑτοῖς συμβαίνει ἐναντία εἶναι· εἰ γάρ ἐστι τὸ μέγα τῷ μικρῷ ἐναντίον, τὸ δ' αὐτό ἐστιν ἅμα μέγα καὶ μικρόν, αὐτὸ αὑτῷ ἂν εἴη ἐναντίον· ἀλλὰ τῶν ἀδυνάτων ἐστὶν αὐτὸ αὑτῷ εἶναι ἐναντίον. — οὐκ ἔστιν ἄρα τὸ μέγα τῷ μικρῷ ἐναντίον, οὐδὲ τὸ πολὺ τῷ ὀλίγῳ, ὥστε κἂν μὴ τῶν πρός τι ταῦτά τις ἐρεῖ ἀλλὰ τοῦ ποσοῦ, οὐδὲν ἐναντίον ἕξει. — μάλιστα δὲ ἡ ἐναντιότης τοῦ ποσοῦ περὶ τὸν τόπον δοκεῖ ὑπάρχειν· τὸ γὰρ ἄνω τῷ κάτω ἐναντίον τιθέασι, τὴν πρὸς τὸ μέσον χώραν κάτω λέγοντες, διὰ τὸ πλείστην τῷ μέσῳ διάστασιν πρὸς τὰ πέρατα τοῦ κόσμου εἶναι. ἐοίκασι δὲ καὶ τὸν τῶν ἄλλων ἐναντίων ὁρισμὸν ἀπὸ τούτων ἐπιφέρειν· τὰ γὰρ πλεῖστον ἀλλήλων διεστηκότα τῶν ἐν τῷ αὐτῷ γένει ἐναντία ὁρίζονται.

Οὐ δοκεῖ δὲ τὸ ποσὸν ἐπιδέχεσθαι τὸ μᾶλλον καὶ τὸ ἧττον, οἷον τὸ δίπηχυ, — οὐ γάρ ἐστιν ἕτερον ἑτέρου μᾶλλον δίπηχυ· — οὐδ' ἐπὶ τοῦ ἀριθμοῦ, οἷον τὰ τρία τῶν πέντε οὐδὲν μᾶλλον [πέντε ἢ] τρία λέγεται, οὐδὲ τὰ τρία τῶν τριῶν· οὐδέ γε ὁ χρόνος ἕτερος ἑτέρου μᾶλλον χρόνος λέγεται· οὐδ' ἐπὶ τῶν εἰρημένων ὅλως οὐδενὸς τὸ μᾶλλον καὶ τὸ ἧττον λέγεται· ὥστε τὸ ποσὸν οὐκ ἐπιδέχεται τὸ μᾶλλον καὶ τὸ ἧττον.

Ἴδιον δὲ μάλιστα τοῦ ποσοῦ τὸ ἴσον τε καὶ ἄνισον λέγεσθαι. ἕκαστον γὰρ τῶν εἰρημένων ποσῶν καὶ ἴσον καὶ ἄνισον λέγεται, οἷον σῶμα καὶ ἴσον καὶ ἄνισον λέγεται, καὶ ἀριθμὸς καὶ ἴσος καὶ ἄνισος λέγεται, καὶ χρόνος καὶ ἴσος καὶ ἄνισος· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν ῥηθέντων ἕκαστον ἴσον τε καὶ ἄνισον λέγεται. τῶν δὲ λοιπῶν ὅσα μή ἐστι ποσόν, οὐ πάνυ ἂν δόξαι ἴσον τε καὶ ἄνισον λέγεσθαι, οἷον ἡ διάθεσις ἴση τε καὶ ἄνισος οὐ πάνυ λέγεται ἀλλὰ μᾶλλον ὁμοία, καὶ τὸ λευκὸν ἴσον τε καὶ ἄνισον οὐ πάνυ, ἀλλ' ὅμοιον. ὥστε τοῦ ποσοῦ μάλιστα ἂν εἴη ἴδιον τὸ ἴσον τε καὶ ἄνισον λέγεσθαι.

Κεφάλαιο 7

Πρός τι δὲ τὰ τοιαῦτα λέγεται, ὅσα αὐτὰ ἅπερ ἐστὶν ἑτέρων εἶναι λέγεται ἢ ὁπωσοῦν ἄλλως πρὸς ἕτερον· οἷον τὸ μεῖζον τοῦθ’ ὅπερ ἐστὶν ἑτέρου λέγεται, — τινὸς γὰρ μεῖζον λέγεται, — καὶ τὸ διπλάσιον ἑτέρου λέγεται τοῦθ’ ὅπερ [6b] ἐστίν, — τινὸς γὰρ διπλάσιον λέγεται· — ὡσαύτως δὲ καὶ ὅσα ἄλλα τοιαῦτα. ἔστι δὲ καὶ τὰ τοιαῦτα τῶν πρός τι οἷον ἕξις, διάθεσις, αἴσθησις, ἐπιστήμη, θέσις· πάντα γὰρ τὰ εἰρημένα τοῦθ’ ὅπερ ἐστὶν ἑτέρων λέγεται καὶ οὐκ ἄλλο τι· ἡ γὰρ ἕξις τινὸς ἕξις λέγεται καὶ ἡ ἐπιστήμη τινὸς ἐπιστήμη καὶ ἡ θέσις τινὸς θέσις, καὶ τὰ ἄλλα δὲ ὡσαύτως. πρός τι οὖν ἐστὶν ὅσα αὐτὰ ἅπερ ἐστὶν ἑτέρων λέγεται, ἢ ὁπωσοῦν ἄλλως πρὸς ἕτερον· οἷον ὄρος μέγα λέγεται πρὸς ἕτερον, — πρός τι γὰρ μέγα λέγεται τὸ ὄρος, — καὶ τὸ ὅμοιον τινὶ ὅμοιον λέγεται, καὶ τὰ ἄλλα δὲ τὰ τοιαῦτα ὡσαύτως πρός τι λέγεται. ἔστι δὲ καὶ ἡ ἀνάκλισις καὶ ἡ στάσις καὶ ἡ καθέδρα θέσεις τινές, ἡ δὲ θέσις τῶν πρός τι· τὸ δὲ ἀνακε<κλ>ίσθαι ἢ ἑστάναι ἢ καθῆσθαι αὐτὰ μὲν οὐκ εἰσὶ θέσεις, παρωνύμως δὲ ἀπὸ τῶν εἰρημένων θέσεων λέγεται.

Ὑπάρχει δὲ καὶ ἐναντιότης ἐν τοῖς πρός τι, οἷον ἀρετὴ κακίᾳ ἐναντίον, ἑκάτερον αὐτῶν πρός τι ὄν, καὶ ἐπιστήμη ἀγνοίᾳ. οὐ πᾶσι δὲ τοῖς πρός τι ὑπάρχει ἐναντίον· τῷ γὰρ διπλασίῳ οὐδέν ἐστιν ἐναντίον οὐδὲ τῷ τριπλασίῳ οὐδὲ τῶν τοιούτων οὐδενί. — δοκεῖ δὲ καὶ τὸ μᾶλλον καὶ τὸ ἧττον ἐπιδέχεσθαι τὰ πρός τι· ὅμοιον γὰρ μᾶλλον καὶ ἧττον λέγεται, καὶ ἄνισον μᾶλλον καὶ ἧττον λέγεται, ἑκάτερον αὐτῶν πρός τι ὄν· τό τε γὰρ ὅμοιον τινὶ ὅμοιον λέγεται καὶ τὸ ἄνισον τινὶ ἄνισον. οὐ πάντα δὲ ἐπιδέχεται τὸ μᾶλλον καὶ ἧττον· τὸ γὰρ διπλάσιον οὐ λέγεται μᾶλλον καὶ ἧττον διπλάσιον οὐδὲ τῶν τοιούτων οὐδέν.

Πάντα δὲ τὰ πρός τι πρὸς ἀντιστρέφοντα λέγεται, οἷον ὁ δοῦλος δεσπότου λέγεται δοῦλος καὶ ὁ δεσπότης δούλου δεσπότης λέγεται, καὶ τὸ διπλάσιον ἡμίσεος διπλάσιον καὶ τὸ ἥμισυ διπλασίου ἥμισυ, καὶ τὸ μεῖζον ἐλάττονος μεῖζον καὶ τὸ ἔλαττον μείζονος ἔλαττον· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων· πλὴν τῇ πτώσει ἐνίοτε διοίσει κατὰ τὴν λέξιν, οἷον ἡ ἐπιστήμη ἐπιστητοῦ λέγεται ἐπιστήμη καὶ τὸ ἐπιστητὸν ἐπιστήμῃ ἐπιστητόν, καὶ ἡ αἴσθησις αἰσθητοῦ αἴσθησις καὶ τὸ αἰσθητὸν αἰσθήσει αἰσθητόν. οὐ μὴν ἀλλ’ ἐνίοτε οὐ δόξει ἀντιστρέφειν, ἐὰν μὴ οἰκείως πρὸς ὃ λέγεται ἀποδοθῇ ἀλλὰ διαμάρτῃ ὁ ἀποδιδούς· οἷον τὸ πτερὸν ἐὰν ἀποδοθῇ ὄρνιθος, οὐκ ἀντιστρέφει ὄρνις πτεροῦ· οὐ γὰρ οἰκείως τὸ [7a] πρῶτον ἀποδέδοται

πτερὸν ὄρνιθος, — οὐ γὰρ ᾗ ὄρνις, ταύτῃ τὸ πτερὸν αὐτῆς λέγεται, ἀλλ’ ᾗ πτερωτόν ἐστιν· πολλῶν γὰρ καὶ ἄλλων πτερά ἐστιν ἃ οὐκ εἰσὶν ὄρνιθες· — ὥστε ἐὰν ἀποδοθῇ οἰκείως, καὶ ἀντιστρέφει, οἷον τὸ πτερὸν πτερωτοῦ πτερὸν καὶ τὸ πτερωτὸν πτερῷ πτερωτόν. — ἐνίοτε δὲ καὶ ὀνοματοποιεῖν ἴσως ἀναγκαῖον, ἐὰν μὴ κείμενον ᾖ ὄνομα πρὸς ὃ οἰκείως ἂν ἀποδοθείη· οἷον τὸ πηδάλιον πλοίου ἐὰν ἀπο — δοθῇ, οὐκ οἰκεία ἡ ἀπόδοσις, — οὐ γὰρ ᾗ πλοῖον ταύτῃ αὐτοῦ τὸ πηδάλιον λέγεται· ἔστι γὰρ πλοῖα ὧν οὐκ ἔστι πηδάλια· — διὸ οὐκ ἀντιστρέφει· τὸ γὰρ πλοῖον οὐ λέγεται πηδαλίου πλοῖον. ἀλλ’ ἴσως οἰκειοτέρα ἂν ἡ ἀπόδοσις εἴη, εἰ οὕτω πως ἀποδοθείη τὸ πηδάλιον πηδαλιωτοῦ πηδάλιον ἢ ὁπωσοῦν ἄλλως, — ὄνομα γὰρ οὐ κεῖται· — καὶ ἀντιστρέφει γε, ἐὰν οἰκείως ἀποδοθῇ· τὸ γὰρ πηδαλιωτὸν πηδαλίῳ πηδαλιωτόν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, οἷον ἡ κεφαλὴ οἰκειοτέρως ἂν ἀποδοθείη κεφαλωτοῦ ἢ ζῴου ἀποδιδομένη· οὐ γὰρ ᾗ ζῷον κεφαλὴν ἔχει· πολλὰ γὰρ τῶν ζῴων κεφαλὴν οὐκ ἔχει. οὕτω δὲ ῥᾷστα ἂν ἴσως τις λαμβάνοι οἷς μὴ κεῖται ὀνόματα, εἰ ἀπὸ τῶν πρώτων καὶ τοῖς πρὸς αὐτὰ ἀντιστρέφουσι τιθείη τὰ ὀνόματα, ὥσπερ ἐπὶ τῶν προειρημένων ἀπὸ τοῦ πτεροῦ τὸ πτερωτὸν καὶ ἀπὸ τοῦ πηδαλίου τὸ πηδαλιωτόν. πάντα οὖν τὰ πρός τι, ἐάνπερ οἰκείως ἀποδιδῶται, πρὸς ἀντιστρέφοντα λέγεται· ἐπεί, ἐάν γε πρὸς τὸ τυχὸν ἀποδιδῶται καὶ μὴ πρὸς αὐτὸ ὃ λέγεται, οὐκ ἀντιστρέφει. — λέγω δὲ ὅτι οὐδὲ τῶν ὁμολογουμένως πρὸς ἀντιστρέφοντα λεγομένων καὶ ὀνομάτων αὐτοῖς κειμένων οὐδὲν ἀντιστρέφει, ἐὰν πρός τι τῶν συμβεβηκότων ἀποδιδῶται καὶ μὴ πρὸς αὐτὸ ὃ λέγεται· οἷον ὁ δοῦλος ἐὰν μὴ δεσπότου ἀποδοθῇ ἀλλ’ ἀνθρώπου ἢ δίποδος ἢ ὁτουοῦν τῶν τοιούτων, οὐκ ἀντιστρέφει· οὐ γὰρ οἰκεία ἡ ἀπόδοσις. — ἔτι ἐὰν μὲν οἰκείως ἀποδεδομένον ᾖ πρὸς ὃ λέγεται, πάντων περιαιρουμένων τῶν ἄλλων ὅσα συμβεβηκότα ἐστίν, καταλειπομένου δὲ τούτου μόνου πρὸς ὃ ἀπεδόθη οἰκείως, ἀεὶ πρὸς αὐτὸ ῥηθήσεται· οἷον εἰ ὁ δοῦλος πρὸς δεσπότην λέγεται, περιαιρουμένων ἁπάντων ὅσα συμβεβηκότα ἐστὶ τῷ δεσπότῃ, οἷον τὸ δίποδι εἶναι, τὸ ἐπιστήμης δεκτικῷ, τὸ ἀνθρώπῳ, καταλειπο — μένου δὲ μόνου τοῦ δεσπότην εἶναι, ἀεὶ ὁ δοῦλος πρὸς αὐτὸ ῥηθήσεται· ὁ γὰρ δοῦλος δεσπότου δοῦλος [7b] λέγεται. ἐὰν δέ γε μὴ οἰκείως ἀποδοθῇ πρὸς ὅ ποτε λέγεται, περιαιρουμένων μὲν τῶν ἄλλων καταλειπομένου δὲ μόνου τοῦ πρὸς ὃ ἀπεδόθη, οὐ ῥηθήσεται πρὸς αὐτό· ἀποδεδόσθω γὰρ ὁ δοῦλος ἀνθρώπου καὶ τὸ πτερὸν ὄρνιθος, καὶ περιῃρήσθω τοῦ ἀνθρώπου τὸ δεσπότῃ αὐτῷ εἶναι· οὐ γὰρ ἔτι ὁ δοῦλος πρὸς ἄνθρωπον ῥηθήσεται, — μὴ γὰρ ὄντος δεσπότου οὐδὲ δοῦλός ἐστιν· — ὡσαύτως δὲ καὶ τοῦ ὄρνιθος περιῃρήσθω τὸ πτερωτῷ εἶναι· οὐ γὰρ ἔτι ἔσται τὸ πτερὸν τῶν πρός τι· μὴ

γὰρ ὄντος πτερωτοῦ οὐδὲ πτερὸν ἔσται τινός. — ὥστε δεῖ μὲν ἀποδιδόναι πρὸς ὅ ποτε οἰκείως λέγεται· κἂν μὲν ὄνομα ᾖ κείμενον ῥᾳδία ἡ ἀπόδοσις γίγνεται, μὴ ὄντος δὲ ἀναγκαῖον ἴσως ὀνοματοποιεῖν. οὕτω δὲ ἀποδιδομένων φανερὸν ὅτι πάντα τὰ πρός τι πρὸς ἀντιστρέφοντα ῥηθήσεται.

Δοκεῖ δὲ τὰ πρός τι ἅμα τῇ φύσει εἶναι. καὶ ἐπὶ μὲν τῶν πλείστων ἀληθές ἐστιν· ἅμα γὰρ διπλάσιόν τέ ἐστι καὶ ἥμισυ, καὶ ἡμίσεος ὄντος διπλάσιόν ἐστιν, καὶ δούλου ὄντος δεσπότης ἐστίν· ὁμοίως δὲ τούτοις καὶ τὰ ἄλλα. καὶ συναναιρεῖ δὲ ταῦτα ἄλληλα· μὴ γὰρ ὄντος διπλασίου οὐκ ἔστιν ἥμισυ, καὶ ἡμίσεος μὴ ὄντος οὐκ ἔστι διπλάσιον· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων ὅσα τοιαῦτα. — οὐκ ἐπὶ πάντων δὲ τῶν πρός τι ἀληθὲς δοκεῖ τὸ ἅμα τῇ φύσει εἶναι· τὸ γὰρ ἐπιστητὸν τῆς ἐπιστήμης πρότερον ἂν δόξειεν εἶναι· ὡς γὰρ ἐπὶ τὸ πολὺ προϋπαρχόντων τῶν πραγμάτων τὰς ἐπιστήμας λαμβάνομεν· ἐπ’ ὀλίγων γὰρ ἢ ἐπ’ οὐδενὸς ἴδοι τις ἂν ἅμα τῷ ἐπιστητῷ τὴν ἐπιστήμην γιγνομένην. ἔτι τὸ μὲν ἐπιστητὸν ἀναιρεθὲν συναναιρεῖ τὴν ἐπιστήμην, ἡ δὲ ἐπιστήμη τὸ ἐπιστητὸν οὐ συν — αναιρεῖ· ἐπιστητοῦ γὰρ μὴ ὄντος οὐκ ἔστιν ἐπιστήμη, — οὐδενὸς γὰρ ἔτι ἔσται ἐπιστήμη, — ἐπιστήμης δὲ μὴ οὔσης οὐδὲν κωλύει ἐπιστητὸν εἶναι· οἷον καὶ ὁ τοῦ κύκλου τετραγωνισμὸς εἴγε ἔστιν ἐπιστητόν, ἐπιστήμη μὲν αὐτοῦ οὐκ ἔστιν οὐδέπω, αὐτὸ δὲ τὸ ἐπιστητὸν ἔστιν. ἔτι ζῴου μὲν ἀναιρεθέντος οὐκ ἔστιν ἐπιστήμη, τῶν δ’ ἐπιστητῶν πολλὰ ἐνδέχεται εἶναι. — ὁμοίως δὲ τούτοις καὶ τὰ ἐπὶ τῆς αἰσθήσεως ἔχει· τὸ γὰρ αἰσθητὸν πρότερον τῆς αἰσθήσεως δοκεῖ εἶναι· τὸ μὲν γὰρ αἰσθητὸν ἀναιρεθὲν συναναιρεῖ τὴν αἴσθησιν, ἡ δὲ αἴσθησις τὸ αἰσθητὸν οὐ συναναιρεῖ. αἱ γὰρ αἰσθήσεις περὶ σῶμα καὶ ἐν σώματί εἰσιν, αἰσθητοῦ δὲ ἀναιρεθέντος [8a] ἀνῄρηται καὶ σῶμα, — τῶν γὰρ αἰσθητῶν καὶ τὸ σῶμα, — σώματος δὲ μὴ ὄντος ἀνῄρηται καὶ ἡ αἴσθησις, ὥστε συναναιρεῖ τὸ αἰσθητὸν τὴν αἴσθησιν. ἡ δέ γε αἴσθησις τὸ αἰσθητὸν οὔ· ζῴου γὰρ ἀναιρεθέντος αἴσθησις μὲν ἀνῄρηται, αἰσθητὸν δὲ ἔσται, οἷον σῶμα, θερμόν, γλυκύ, πικρόν, καὶ τὰ ἄλλα πάντα ὅσα ἐστὶν αἰσθητά. ἔτι ἡ μὲν αἴσθησις ἅμα τῷ αἰσθητικῷ γίγνεται, — ἅμα γὰρ ζῷόν τε γίγνεται καὶ αἴσθησις, — τὸ δέ γε αἰσθητὸν ἔστι καὶ πρὸ τοῦ αἴσθησιν εἶναι, — πῦρ γὰρ καὶ ὕδωρ καὶ τὰ τοιαῦτα, ἐξ ὧν καὶ τὸ ζῷον συνίσταται, ἔστι καὶ πρὸ τοῦ ζῷον ὅλως εἶναι ἢ αἴσθησιν, — ὥστε πρότερον ἂν τῆς αἰσθήσεως τὸ αἰσθητὸν εἶναι δόξειεν.

Ἔχει δὲ ἀπορίαν πότερον οὐδεμία οὐσία τῶν πρός τι λέγεται, καθάπερ δοκεῖ, ἢ τοῦτο ἐνδέχεται κατά τινας τῶν δευτέρων οὐσιῶν. ἐπὶ μὲν γὰρ τῶν πρώτων οὐσιῶν ἀληθές ἐστιν· οὔτε γὰρ τὰ ὅλα οὔτε τὰ μέρη πρός τι λέγεται· ὁ γὰρ τὶς ἄνθρωπος οὐ λέγεται τινός τις ἄνθρωπος, οὐδὲ ὁ τὶς βοῦς τινός τις βοῦς· ὡσαύτως δὲ καὶ τὰ μέρη· ἡ γὰρ τὶς χεὶρ οὐ λέγεται τινός τις χεὶρ ἀλλὰ τινὸς χείρ,καὶ ἡ τὶς κεφαλὴ οὐ λέγεται τινός τις κεφαλὴ ἀλλὰ τινὸς κεφαλή. ὡσαύτως δὲ καὶ ἐπὶ τῶν δευτέρων οὐσιῶν, ἐπί γε τῶν πλείστων· οἷον ὁ ἄνθρωπος οὐ λέγεται τινὸς ἄνθρωπος, οὐδὲ ὁ βοῦς τινὸς βοῦς, οὐδὲ τὸ ξύλον τινὸς ξύλον, ἀλλὰ τινὸς κτῆμα λέγεται. ἐπὶ μὲν οὖν τῶν τοιούτων φανερὸν ὅτι οὐκ ἔστι τῶν πρός τι, ἐπ' ἐνίων δὲ τῶν δευτέρων οὐσιῶν ἔχει ἀμφισβήτησιν· οἷον ἡ κεφαλὴ τινὸς λέγεται κεφαλὴ καὶ ἡ χεὶρ τινὸς λέγεται χεὶρ καὶ ἕκαστον τῶν τοιούτων, ὥστε ταῦτα τῶν πρός τι δόξειεν ἂν εἶναι. — εἰ μὲν οὖν ἱκανῶς ὁ τῶν πρός τι ὁρισμὸς ἀποδέδοται, ἢ τῶν πάνυ χαλεπῶν ἢ τῶν ἀδυνάτων ἐστὶ τὸ λῦσαι ὡς οὐδεμία οὐσία τῶν πρός τι λέγεται· εἰ δὲ μὴ ἱκανῶς, ἀλλ' ἔστι τὰ πρός τι οἷς τὸ εἶναι ταὐτόν ἐστι τῷ πρός τί πως ἔχειν, ἴσως ἂν ῥηθείη τι πρὸς αὐτά. ὁ δὲ πρότερος ὁρισμὸς παρακολουθεῖ μὲν πᾶσι τοῖς πρός τι, οὐ μὴν τοῦτό γέ ἐστι τὸ πρός τι αὐτοῖς εἶναι τὸ αὐτὰ ἅπερ ἐστὶν ἑτέρων λέγεσθαι. ἐκ δὲ τούτων δῆλόν ἐστιν ὅτι ἐάν τις εἰδῇ τι ὡρισμένως τῶν πρός τι, κἀκεῖνο πρὸς ὃ λέγεται ὡρισμένως εἴσεται. φανερὸν μὲν οὖν καὶ ἐξ αὐτοῦ ἐστίν· εἰ γὰρ οἶδέ τις τόδε τι ὅτι τῶν πρός τί ἐστιν, ἔστι δὲ τὸ εἶναι τοῖς πρός τι ταὐτὸ τῷ [8b] πρός τί πως ἔχειν, κἀκεῖνο οἶδε πρὸς ὃ τοῦτό πως ἔχει· εἰ γὰρ οὐκ οἶδεν ὅλως πρὸς ὃ τοῦτό πως ἔχει, οὐδ' εἰ πρός τί πως ἔχει εἴσεται. καὶ ἐπὶ τῶν καθ' ἕκαστα δὲ δῆλον τὸ τοιοῦτον· οἷον τόδε τι εἰ οἶδεν ἀφωρισμένως ὅτι ἔστι διπλάσιον, καὶ ὅτου διπλάσιόν ἐστιν εὐθὺς ἀφωρισμένως οἶδεν, — εἰ γὰρ μηδενὸς τῶν ἀφωρισμένων οἶδεν αὐτὸ διπλάσιον, οὐδ' εἰ ἔστι διπλάσιον ὅλως οἶδεν· — ὡσαύτως δὲ καὶ τόδε τι εἰ οἶδεν ὅτι κάλλιόν ἐστι, καὶ ὅτου κάλλιόν ἐστιν ἀφωρισμένως ἀναγκαῖον εἰδέναι διὰ ταῦτα, (οὐκ ἀορίστως δὲ εἴσεται ὅτι τοῦτό ἐστι χείρονος κάλλιον· ὑπόληψις γὰρ τὸ τοιοῦτο γίγνεται, οὐκ ἐπιστήμη· οὐ γὰρ ἔτι εἴσεται ἀκριβῶς ὅτι ἐστὶ χείρονος κάλλιον· εἰ γὰρ οὕτως ἔτυχεν, οὐδέν ἐστι χεῖρον αὐτοῦ)· ὥστε φανερὸν ὅτι ἀναγκαῖόν ἐστιν, ὃ ἂν εἰδῇ τις τῶν πρός τι ὡρισμένως, κἀκεῖνο πρὸς ὃ λέγεται ὡρισμένως εἰδέναι. τὴν δέ γε κεφαλὴν καὶ τὴν χεῖρα καὶ ἕκαστον τῶν τοιούτων αἵ εἰσιν οὐσίαι αὐτὸ μὲν ὅπερ ἐστὶν ὡρισμένως ἔστιν εἰδέναι, πρὸς ὃ δὲ λέγεται οὐκ ἀναγκαῖον· τίνος γὰρ αὕτη ἡ κεφαλὴ ἢ τίνος ἡ χεὶρ οὐκ ἔστιν εἰδέναι ὡρισμένως· ὥστε οὐκ ἂν εἴη ταῦτα τῶν πρός τι· εἰ δὲ μή ἐστι τῶν πρός τι, ἀληθὲς ἂν εἴη λέγειν ὅτι οὐδεμία οὐσία τῶν πρός τί ἐστιν. ἴσως δὲ χαλεπὸν περὶ τῶν τοιούτων σφοδρῶς ἀποφαίνεσθαι μὴ πολλάκις ἐπεσκεμμένον, τὸ μέντοι διηπορηκέναι ἐφ' ἕκαστον αὐτῶν οὐκ ἄχρηστόν ἐστιν.

Κεφάλαιο 8

Ποιότητα δὲ λέγω καθ’ ἣν ποιοί τινες λέγονται· ἔστι δὲ ἡ ποιότης τῶν πλεοναχῶς λεγομένων. ἓν μὲν οὖν εἶδος ποιότητος ἕξις καὶ διάθεσις λεγέσθωσαν. διαφέρει δὲ ἕξις διαθέσεως τῷ μονιμώτερον καὶ πολυχρονιώτερον εἶναι· τοιαῦται δὲ αἵ τε ἐπιστῆμαι καὶ αἱ ἀρεταί· ἥ τε γὰρ ἐπιστήμη δοκεῖ τῶν παραμονίμων εἶναι καὶ δυσκινήτων, ἐὰν καὶ μετρίως τις ἐπιστήμην λάβῃ, ἐάνπερ μὴ μεγάλη μεταβολὴ γένηται ὑπὸ νόσου ἢ ἄλλου τινὸς τοιούτου· ὡσαύτως δὲ καὶ ἡ ἀρετή· οἷον ἡ δικαιοσύνη καὶ ἡ σωφροσύνη καὶ ἕκαστον τῶν τοιούτων οὐκ εὐκίνητον δοκεῖ εἶναι οὐδ’ εὐμετάβολον. διαθέσεις δὲ λέγονται ἅ ἐστιν εὐκίνητα καὶ ταχὺ μεταβάλλοντα, οἷον θερμότης καὶ κατάψυξις καὶ νόσος καὶ ὑγίεια καὶ ὅσα ἄλλα τοιαῦτα· διάκειται μὲν γάρ πως κατὰ ταύτας ὁ ἄνθρωπος, ταχὺ δὲ μεταβάλλει ἐκ θερμοῦ ψυχρὸς γιγνόμενος καὶ ἐκ τοῦ ὑγιαίνειν εἰς τὸ νο[9a] σεῖν· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, εἰ μή τις καὶ αὐ — τῶν τούτων τυγχάνοι διὰ χρόνου πλῆθος ἤδη πεφυσιωμένη καὶ ἀνίατος ἢ πάνυ δυσκίνητος οὖσα, ἣν ἄν τις ἴσως ἕξιν ἤδη προσαγορεύοι. φανερὸν δὲ ὅτι ταῦτα βούλονται ἕξεις λέγειν ἅ ἐστι πολυχρονιώτερα καὶ δυσκινητότερα· τοὺς γὰρ τῶν ἐπιστημῶν μὴ πάνυ κατέχοντας ἀλλ’ εὐκινήτους ὄντας οὔ φασιν ἕξιν ἔχειν, καίτοι διάκεινταί γέ πως κατὰ τὴν ἐπιστήμην ἢ χεῖρον ἢ βέλτιον. ὥστε διαφέρει ἕξις διαθέσεως τῷ τὸ μὲν εὐκίνητον εἶναι τὸ δὲ πολυχρονιώτερόν τε καὶ δυσκινητότερον. — εἰσὶ δὲ αἱ μὲν ἕξεις καὶ διαθέσεις, αἱ δὲ διαθέσεις οὐκ ἐξ ἀνάγκης ἕξεις· οἱ μὲν γὰρ ἕξεις ἔχοντες καὶ διάκεινταί πως κατὰ ταύτας, οἱ δὲ διακείμενοι οὐ πάντως καὶ ἕξιν ἔχουσιν.

Ἕτερον δὲ γένος ποιότητος καθ’ ὃ πυκτικοὺς ἢ δρομικοὺς ἢ ὑγιεινοὺς ἢ νοσώδεις λέγομεν, καὶ ἁπλῶς ὅσα κατὰ δύναμιν φυσικὴν ἢ ἀδυναμίαν λέγεται. οὐ γὰρ τῷ διακεῖσθαί πως ἕκαστον τῶν τοιούτων λέγεται, ἀλλὰ τῷ δύναμιν ἔχειν φυσικὴν τοῦ ποιῆσαί τι ῥᾳδίως ἢ μηδὲν πάσχειν· οἷον πυκτικοὶ ἢ δρομικοὶ λέγονται οὐ τῷ διακεῖσθαί πως ἀλλὰ τῷ δύναμιν ἔχειν φυσικὴν τοῦ ποιῆσαί τι ῥᾳδίως, ὑγιεινοὶ δὲ λέγονται τῷ δύναμιν ἔχειν φυσικὴν τοῦ μηδὲν πάσχειν ὑπὸ τῶν τυχόντων ῥᾳδίως, νοσώδεις δὲ τῷ ἀδυναμίαν ἔχειν τοῦ μηδὲν πάσχειν. ὁμοίως δὲ τούτοις καὶ τὸ σκληρὸν καὶ τὸ μαλακὸν ἔχει· τὸ μὲν γὰρ σκληρὸν λέγεται τῷ δύναμιν ἔχειν τοῦ μὴ ῥᾳδίως διαιρεῖσθαι, τὸ δὲ μαλακὸν τῷ ἀδυναμίαν ἔχειν τοῦ αὐτοῦ τούτου.

Τρίτον δὲ γένος ποιότητος παθητικαὶ ποιότητες καὶ πάθη· ἔστι δὲ τὰ τοιάδε οἷον γλυκύτης τε καὶ πικρότης καὶ στρυφνότης καὶ πάντα τὰ τούτοις συγγενῆ, ἔτι δὲ θερμότης καὶ ψυχρότης καὶ λευκότης καὶ μελανία. ὅτι μὲν οὖν αὗ — ται ποιότητές εἰσιν φανερόν· τὰ γὰρ δεδεγμένα ποιὰ λέγεται κατ' αὐτάς· οἷον τὸ μέλι τῷ γλυκύτητα δεδέχθαι λέγεται γλυκύ, καὶ τὸ σῶμα λευκὸν τῷ λευκότητα δεδέχθαι· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων ἔχει. παθητικαὶ δὲ ποιότητες λέγονται οὐ τῷ αὐτὰ τὰ δεδεγμένα τὰς [9b] ποιότητας πεπονθέναι τι· οὔτε γὰρ τὸ μέλι τῷ πεπονθέναι τι λέγεται γλυκύ, οὔτε τῶν ἄλλων τῶν τοιούτων οὐδέν· ὁμοίως δὲ τούτοις καὶ ἡ θερμότης καὶ ἡ ψυχρότης παθητικαὶ ποιότητες λέγονται οὐ τῷ αὐτὰ τὰ δεδεγμένα πεπονθέναι τι, τῷ δὲ κατὰ τὰς αἰσθήσεις ἑκάστην τῶν εἰρημένων ποιοτήτων πάθους εἶναι ποιητικὴν παθητικαὶ ποιότητες λέγονται· ἥ τε γὰρ γλυκύτης πάθος τι κατὰ τὴν γεῦσιν ἐμποιεῖ καὶ ἡ θερμότης κατὰ τὴν ἁφήν, ὁμοίως δὲ καὶ αἱ ἄλλαι. λευκότης δὲ καὶ μελανία καὶ αἱ ἄλλαι χροιαὶ οὐ τὸν αὐτὸν τρόπον τοῖς εἰρημένοις παθητικαὶ ποιότητες λέγονται, ἀλλὰ τῷ αὐτὰς ἀπὸ πάθους γεγενῆσθαι. ὅτι μὲν οὖν γίγνονται διὰ πάθος πολλαὶ μεταβολαὶ χρωμάτων, δῆλον· αἰσχυνθεὶς γάρ τις ἐρυθρὸς ἐγένετο καὶ φοβηθεὶς ὠχρὸς καὶ ἕκαστον τῶν τοιούτων· ὥστε καὶ εἴ τις φύσει τῶν τοιούτων τι παθῶν πέπονθεν, τὴν ὁμοίαν χροιὰν εἰκός ἐστιν ἔχειν αὐτόν· ἥτις γὰρ νῦν ἐν τῷ αἰσχυνθῆναι διάθεσις τῶν περὶ τὸ σῶμα ἐγένετο, καὶ κατὰ φυσικὴν σύστασιν ἡ αὐτὴ γένοιτ' ἂν διάθεσις, ὥστε φύσει καὶ τὴν χροιὰν ὁμοίαν γίγνεσθαι. — ὅσα μὲν οὖν τῶν τοιούτων συμπτωμάτων ἀπό τινων παθῶν δυσκινήτων καὶ παραμονίμων τὴν ἀρχὴν εἴληφε ποιότητες λέγονται· εἴτε γὰρ ἐν τῇ κατὰ φύσιν συστάσει ὠχρότης ἢ μελανία γεγένηται, ποιότης λέγεται, — ποιοὶ γὰρ κατὰ ταύτας λεγόμεθα, — εἴτε διὰ νόσον μακρὰν ἢ διὰ καῦμα [τὸ αὐτὸ] συμβέβηκεν ὠχρότης ἢ μελανία, καὶ μὴ ῥᾳδίως ἀποκαθ — ίστανται ἢ καὶ διὰ βίου παραμένουσι, ποιότητες καὶ αὐταὶ λέγονται, — ὁμοίως γὰρ ποιοὶ κατὰ ταύτας λεγόμεθα. — ὅσα δὲ ἀπὸ ῥᾳδίως διαλυομένων καὶ ταχὺ ἀποκαθισταμένων γίγνεται πάθη λέγεται· οὐ γὰρ λέγονται ποιοί τινες κατὰ ταῦτα· οὔτε γὰρ ὁ ἐρυθριῶν διὰ τὸ αἰσχυνθῆναι ἐρυθρίας λέγεται, οὔτε ὁ ὠχριῶν διὰ τὸ φοβεῖσθαι ὠχρίας, ἀλλὰ μᾶλλον πεπονθέναι τι· ὥστε πάθη μὲν τὰ τοιαῦτα λέγεται, ποιότητες δὲ οὔ. — ὁμοίως δὲ τούτοις καὶ κατὰ τὴν ψυχὴν παθητικαὶ ποιότητες καὶ πάθη λέγεται. ὅσα τε γὰρ ἐν τῇ γενέσει εὐθὺς ἀπό τινων παθῶν γεγένηται ποιότητες λέγονται, οἷον ἥ τε μανικὴ [10a] ἔκστασις καὶ ἡ ὀργὴ καὶ τὰ τοιαῦτα· ποιοὶ γὰρ κατὰ ταύτας λέγονται, ὀργίλοι τε καὶ μανικοί. ὁμοίως δὲ καὶ ὅσαι ἐκστάσεις μὴ φυσικαί, ἀλλ' ἀπό τινων ἄλλων συμπτωμάτων γεγένηνται δυσαπάλλακτοι ἢ καὶ ὅλως ἀκίνητοι, ποιότητες καὶ τὰ τοιαῦτα· ποιοὶ γὰρ κατὰ ταύτας λέγονται. ὅσα δὲ ἀπὸ ταχὺ καθισταμένων γίγνεται πάθη λέγεται, οἷον εἰ λυπούμενος ὀργιλώτερός ἐστιν· οὐ γὰρ λέγεται ὀργίλος ὁ ἐν τῷ τοιούτῳ πάθει ὀργιλώτερος ὤν, ἀλλὰ μᾶλλον πεπονθέναι τι· ὥστε πάθη μὲν λέγεται τὰ τοιαῦτα, ποιότητες δὲ οὔ.

Τέταρτον δὲ γένος ποιότητος σχῆμά τε καὶ ἡ περὶ ἕκαστον ὑπάρχουσα μορφή, ἔτι δὲ πρὸς τούτοις εὐθύτης καὶ καμπυλότης καὶ εἴ τι τούτοις ὅμοιόν ἐστιν· καθ’ ἕκαστον γὰρ τούτων ποιόν τι λέγεται· τῷ γὰρ τρίγωνον ἢ τετράγωνον εἶναι ποιόν τι λέγεται, καὶ τῷ εὐθὺ ἢ καμπύλον. καὶ κατὰ τὴν μορφὴν δὲ ἕκαστον ποιόν τι λέγεται. τὸ δὲ μανὸν καὶ τὸ πυκνὸν καὶ τὸ τραχὺ καὶ τὸ λεῖον δόξειε μὲν ἂν ποιὸν σημαίνειν, ἔοικε δὲ ἀλλότρια τὰ τοιαῦτα εἶναι τῆς περὶ τὸ ποιὸν διαιρέσεως· θέσιν γάρ τινα μᾶλλον φαίνεται τῶν μορίων ἑκάτερον δηλοῦν· πυκνὸν μὲν γὰρ τῷ τὰ μόρια σύνεγγυς εἶναι ἀλλήλοις, μανὸν δὲ τῷ διεστάναι ἀπ’ ἀλλήλων· καὶ λεῖον μὲν τῷ ἐπ’ εὐθείας πως τὰ μόρια κεῖσθαι, τραχὺ δὲ τῷ τὸ μὲν ὑπερέχειν τὸ δὲ ἐλλείπειν. — ἴσως μὲν οὖν καὶ ἄλλος ἄν τις φανείη τρόπος ποιότητος, ἀλλ’ οἵ γε μάλιστα λεγόμενοι σχεδὸν τοσοῦτοί εἰσιν.

Ποιότητες μὲν οὖν εἰσὶν αἱ εἰρημέναι, ποιὰ δὲ τὰ κατὰ ταύτας παρωνύμως λεγόμενα ἢ ὁπωσοῦν ἄλλως ἀπ’ αὐτῶν. ἐπὶ μὲν οὖν τῶν πλείστων καὶ σχεδὸν ἐπὶ πάντων παρωνύμως λέγεται, οἷον ἀπὸ τῆς λευκότητος ὁ λευκὸς καὶ ἀπὸ τῆς γραμματικῆς ὁ γραμματικὸς καὶ ἀπὸ τῆς δικαιοσύνης ὁ δίκαιος, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων. ἐπ’ ἐνίων δὲ διὰ τὸ μὴ κεῖσθαι ταῖς ποιότησιν ὀνόματα οὐκ ἐνδέχεται παρωνύμως ἀπ’ αὐτῶν λέγεσθαι· οἷον ὁ δρομικὸς ἢ ὁ πυκτικὸς ὁ κατὰ δύναμιν φυσικὴν λεγόμενος ἀπ’ οὐδεμιᾶς ποιότητος [10b] παρωνύμως λέγεται· οὐ γὰρ κεῖται ὀνόματα ταῖς δυνάμεσι καθ’ ἃς οὗτοι ποιοὶ λέγονται, ὥσπερ καὶ ταῖς ἐπιστήμαις καθ’ ἃς πυκτικοὶ ἢ παλαιστρικοὶ οἱ κατὰ διάθεσιν λέγονται, — πυκτικὴ γὰρ ἐπιστήμη λέγεται καὶ παλαιστρική, ποιοὶ δὲ ἀπὸ τούτων παρωνύμως οἱ διακείμενοι λέγονται. — ἐνίοτε δὲ καὶ ὀνόματος κειμένου οὐ λέγεται παρωνύμως τὸ κατ’ αὐτὴν ποιὸν λεγόμενον, οἷον ἀπὸ τῆς ἀρετῆς ὁ σπουδαῖος· τῷ γὰρ ἀρετὴν ἔχειν σπουδαῖος λέγεται, ἀλλ’ οὐ παρωνύμως ἀπὸ τῆς ἀρετῆς· οὐκ ἐπὶ πολλῶν δὲ τὸ τοιοῦτόν ἐστιν. ποιὰ οὖν λέγεται τὰ παρωνύμως ἀπὸ τῶν εἰρημένων ποιοτήτων λεγόμενα ἢ ὁπωσοῦν ἄλλως ἀπ’ αὐτῶν.

Ὑπάρχει δὲ καὶ ἐναντιότης κατὰ τὸ ποιόν, οἷον δικαιοσύνη ἀδικίᾳ ἐναντίον καὶ λευκότης μελανίᾳ καὶ τἆλλα ὡσαύτως, καὶ τὰ κατ’ αὐτὰς δὲ ποιὰ λεγόμενα, οἷον τὸ ἄδικον τῷ δικαίῳ καὶ τὸ λευκὸν τῷ μέλανι. οὐκ ἐπὶ πάν — των δὲ τὸ τοιοῦτον· τῷ γὰρ πυῤῥῷ ἢ ὠχρῷ ἢ ταῖς τοιαύταις χροιαῖς οὐδέν ἐστιν ἐναντίον ποιοῖς οὖσιν. — ἔτι ἐὰν τῶν ἐναντίων θάτερον ᾖ ποιόν, καὶ τὸ λοιπὸν ἔσται ποιόν. τοῦτο δὲ δῆλον προχειριζομένῳ τὰς ἄλλας κατηγορίας, οἷον εἰ ἔστιν ἡ δικαιοσύνη τῇ ἀδικίᾳ ἐναντίον, ποιὸν δὲ ἡ δικαιοσύνη, ποιὸν ἄρα καὶ ἡ ἀδικία· οὐδεμία γὰρ τῶν ἄλλων κατηγοριῶν ἐφαρμόζει τῇ ἀδικίᾳ, οὔτε ποσὸν οὔτε πρός τι οὔτε πού, οὐδ’ ὅλως τι τῶν τοιούτων οὐδὲν ἀλλ’ ἢ ποιόν· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων κατὰ τὸ ποιὸν ἐναντίων.

Ἐπιδέχεται δὲ καὶ τὸ μᾶλλον καὶ τὸ ἧττον τὰ ποιά· λευκὸν γὰρ μᾶλλον καὶ ἧττον ἕτερον ἑτέρου λέγεται, καὶ δίκαιον ἕτερον ἑτέρου μᾶλλον. καὶ αὐτὸ δὲ ἐπίδοσιν λαμβάνει, — λευκὸν γὰρ ὂν ἔτι ἐνδέχεται λευκότερον γενέσθαι· — οὐ πάντα δέ, ἀλλὰ τὰ πλεῖστα· δικαιοσύνη γὰρ δικαιοσύνης εἰ λέγεται μᾶλλον ἀπορήσειεν ἄν τις, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων διαθέσεων. ἔνιοι γὰρ διαμφισβητοῦσι περὶ τῶν τοιούτων· δικαιοσύνην μὲν γὰρ δικαιοσύνης οὐ πάνυ φασὶ μᾶλλον καὶ ἧττον λέγεσθαι, οὐδὲ ὑγίειαν ὑγιείας, ἧττον μέντοι ἔχειν ἕτερον ἑτέρου ὑγίειάν φασι, καὶ [11a] δικαιοσύνην ἧττον ἕτερον ἑτέρου, ὡσαύτως δὲ καὶ γραμματικὴν καὶ τὰς ἄλλας διαθέσεις. ἀλλ’ οὖν τά γε κατὰ ταύτας λεγόμενα ἀναμφισβητήτως ἐπιδέχεται τὸ μᾶλλον καὶ ἧττον· γραμματικώτερος γὰρ ἕτερος ἑτέρου λέγεται καὶ δικαιότερος καὶ ὑγιεινότερος, καὶ ἐπὶ τῶν ἄλλων ὡσαύτως. τρίγωνον δὲ καὶ τετράγωνον οὐ δοκεῖ τὸ μᾶλλον ἐπιδέχεσθαι, οὐδὲ τῶν ἄλλων σχημάτων οὐδέν· τὰ μὲν γὰρ ἐπιδεχόμενα τὸν τοῦ τριγώνου λόγον καὶ τὸν τοῦ κύκλου πάνθ’ ὁμοίως τρίγωνα ἢ κύκλοι εἰσίν, τῶν δὲ μὴ ἐπιδεχομένων οὐδὲν ἕτερον ἑτέρου μᾶλλον ῥηθήσεται· οὐδὲν γὰρ μᾶλλον τὸ τετράγωνον τοῦ ἑτε — ρομήκους κύκλος ἐστίν· οὐδέτερον γὰρ ἐπιδέχεται τὸν τοῦ κύκλου λόγον. ἁπλῶς δέ, ἐὰν μὴ ἐπιδέχηται ἀμφότερα τὸν τοῦ προκειμένου λόγον, οὐ ῥηθήσεται τὸ ἕτερον τοῦ ἑτέρου μᾶλλον. οὐ πάντα οὖν τὰ ποιὰ ἐπιδέχεται τὸ μᾶλλον καὶ τὸ ἧττον.

Τῶν μὲν οὖν εἰρημένων οὐδὲν ἴδιον ποιότητος, ὅμοια δὲ καὶ ἀνόμοια κατὰ μόνας τὰς ποιότητας λέγεται· ὅμοιον γὰρ ἕτερον ἑτέρῳ οὐκ ἔστι κατ’ ἄλλο οὐδὲν ἢ καθ’ ὃ ποιόν ἐστιν. ὥστε ἴδιον ἂν εἴη ποιότητος τὸ ὅμοιον ἢ ἀνόμοιον λέγεσθαι κατ’ αὐτήν.

Οὐ δεῖ δὲ ταράττεσθαι μή τις ἡμᾶς φήσῃ ὑπὲρ ποιότητος τὴν πρόθεσιν ποιησαμένους πολλὰ τῶν πρός τι συγκαταριθμεῖσθαι· τὰς γὰρ ἕξεις καὶ τὰς διαθέσεις τῶν πρός τι εἶναι. σχεδὸν γὰρ ἐπὶ πάντων τῶν τοιούτων τὰ γένη πρός τι λέγεται, τῶν δὲ καθ’ ἕκαστα οὐδέν· ἡ μὲν γὰρ ἐπιστήμη, γένος οὖσα, αὐτὸ ὅπερ ἐστὶν ἑτέρου λέγεται, — τινὸς γὰρ ἐπιστήμη λέγεται. —

τῶν δὲ καθ’ ἕκαστα οὐδὲν αὐτὸ ὅπερ ἐστὶν ἑτέρου λέγεται, οἷον ἡ γραμματικὴ οὐ λέγεται τινὸς γραμματικὴ οὐδ’ ἡ μουσικὴ τινὸς μουσική, ἀλλ’ εἰ ἄρα κατὰ τὸ γένος καὶ αὗται πρός τι λέγεται· οἷον ἡ γραμματικὴ λέγεται τινὸς ἐπιστήμη, οὐ τινὸς γραμματική, καὶ ἡ μουσικὴ τινὸς ἐπιστήμη, οὐ τινὸς μουσική· ὥστε αἱ καθ’ ἕκαστα οὐκ εἰσὶ τῶν πρός τι. λεγόμεθα δὲ ποιοὶ ταῖς καθ’ ἕκαστα· ταύτας γὰρ καὶ ἔχομεν, — ἐπιστήμονες γὰρ λεγόμεθα τῷ ἔχειν τῶν καθ’ ἕκαστα ἐπιστημῶν τινά· — ὥστε αὗται ἂν καὶ ποιότητες εἴησαν αἱ καθ’ ἕκαστα, καθ’ ἅς ποτε καὶ ποιοὶ λεγόμεθα· αὗται δὲ οὐκ εἰσὶ τῶν πρός τι. — ἔτι εἰ τυγχάνει τὸ αὐτὸ ποιὸν καὶ πρός τι ὄν, οὐδὲν ἄτοπον ἐν ἀμφοτέροις τοῖς γένεσιν αὐτὸ καταριθμεῖσθαι. <.........>

Κεφάλαιο 9

Ἐπιδέχεται δὲ καὶ τὸ ποιεῖν καὶ πάσχειν ἐναντιό — τητα καὶ τὸ μᾶλλον καὶ τὸ ἧττον· τὸ γὰρ θερμαίνειν τῷ ψύχειν ἐναντίον καὶ τὸ θερμαίνεσθαι τῷ ψύχεσθαι καὶ τὸ ἥδεσθαι τῷ λυπεῖσθαι· ὥστε ἐπιδέχεται ἐναντιότητα. καὶ τὸ μᾶλλον δὲ καὶ τὸ ἧττον· θερμαίνειν γὰρ μᾶλλον καὶ ἧττον ἔστι, καὶ θερμαίνεσθαι μᾶλλον καὶ ἧττον, καὶ λυπεῖσθαι μᾶλλον καὶ ἧττον· ἐπιδέχεται οὖν τὸ μᾶλλον καὶ τὸ ἧττον τὸ ποιεῖν καὶ τὸ πάσχειν. <........>

[Ὑπὲρ μὲν οὖν τούτων τοσαῦτα λέγεται· εἴρηται δὲ καὶ ὑπὲρ τοῦ κεῖσθαι ἐν τοῖς πρός τι, ὅτι παρωνύμως ἀπὸ τῶν θέσεων λέγεται. ὑπὲρ δὲ τῶν λοιπῶν, τοῦ τε ποτὲ καὶ τοῦ ποὺ καὶ τοῦ ἔχειν, διὰ τὸ προφανῆ εἶναι οὐδὲν ὑπὲρ αὐτῶν ἄλλο λέγεται ἢ ὅσα ἐν ἀρχῇ ἐῤῥήθη, ὅτι τὸ ἔχειν μὲν σημαίνει τὸ ὑποδεδέσθαι, τὸ ὡπλίσθαι, τὸ δὲ ποὺ οἷον ἐν Λυκείῳ, καὶ τὰ ἄλλα δὲ ὅσα ὑπὲρ αὐτῶν ἐῤῥήθη. — ὑπὲρ μὲν οὖν τῶν προτεθέντων γενῶν ἱκανὰ τὰ εἰρημένα· περὶ δὲ τῶν ἀντικειμένων, ποσαχῶς εἴωθε ἀντιτίθεσθαι, ῥητέον.]

Κεφάλαιο 10

Λέγεται δὲ ἕτερον ἑτέρῳ ἀντικεῖσθαι τετραχῶς, ἢ ὡς τὰ πρός τι, ἢ ὡς τὰ ἐναντία, ἢ ὡς στέρησις καὶ ἕξις, ἢ ὡς κατάφασις καὶ ἀπόφασις. ἀντίκειται δὲ ἕκαστον τῶν τοιούτων, ὡς τύπῳ εἰπεῖν, ὡς μὲν τὰ πρός τι οἷον τὸ διπλάσιον τῷ ἡμίσει, ὡς δὲ τὰ ἐναντία οἷον τὸ κακὸν τῷ ἀγαθῷ, ὡς δὲ κατὰ στέρησιν καὶ ἕξιν οἷον τυφλότης καὶ ὄψις, ὡς δὲ κατάφασις καὶ ἀπόφασις οἷον κάθηται — οὐ κάθηται.

Ὅσα μὲν οὖν ὡς τὰ πρός τι ἀντίκειται αὐτὰ ἅπερ ἐστὶ τῶν ἀντικειμένων λέγεται ἢ ὁπωσοῦν ἄλλως πρὸς αὐτά· οἷον τὸ διπλάσιον τοῦ ἡμίσεος αὐτὸ ὅπερ ἐστὶ διπλάσιον λέγεται· καὶ ἡ ἐπιστήμη δὲ τῷ ἐπιστητῷ ὡς τὰ πρός τι ἀντίκειται, καὶ λέγεταί γε ἡ ἐπιστήμη αὐτὸ ὅπερ ἐστὶ τοῦ ἐπιστητοῦ· καὶ τὸ ἐπιστητὸν δὲ αὐτὸ ὅπερ ἐστὶ πρὸς τὸ ἀντικείμενον λέγεται τὴν ἐπιστήμην· τὸ γὰρ ἐπιστητὸν τινὶ λέγεται ἐπιστητὸν τῇ ἐπιστήμῃ.

Ὅσα οὖν ἀντίκειται ὡς τὰ πρός τι αὐτὰ ἅπερ ἐστὶ τῶν ἀντικειμένων ἢ ὁπωσδήποτε πρὸς ἄλληλα λέγεται· τὰ δὲ ὡς τὰ ἐναντία, αὐτὰ μὲν ἅπερ ἐστὶν οὐδαμῶς πρὸς ἄλληλα λέγεται, ἐναντία μέντοι ἀλλήλων λέγεται· οὔτε γὰρ τὸ ἀγαθὸν τοῦ κακοῦ λέγεται ἀγαθόν, ἀλλ’ ἐναντίον, οὔτε τὸ λευκὸν τοῦ μέλανος λευκόν, ἀλλ’ ἐναντίον. ὥστε διαφέρουσιν αὗται αἱ ἀντιθέσεις ἀλλήλων. — ὅσα δὲ τῶν ἐναντίων τοιαῦτά ἐστιν [12a] ὥστε ἐν οἷς πέφυκε γίγνεσθαι ἢ ὧν κατηγορεῖται ἀναγκαῖον αὐτῶν θάτερον ὑπάρχειν, τούτων οὐδέν ἐστιν ἀνὰ μέσον· [ὧν δέ γε μὴ ἀναγκαῖον θάτερον ὑπάρχειν, τούτων ἔστι τι ἀνὰ μέσον πάντως.] οἷον νόσος καὶ ὑγίεια ἐν σώματι ζῴου πέφυκε γίγνεσθαι, καὶ ἀναγκαῖόν γε θάτερον ὑπάρχειν τῷ τοῦ ζῴου σώματι ἢ νόσον ἢ ὑγίειαν· καὶ περιττὸν δὲ καὶ ἄρτιον ἀριθμοῦ κατηγορεῖται, καὶ ἀναγκαῖόν γε θάτερον τῷ ἀριθμῷ ὑπάρχειν ἢ περιττὸν ἢ ἄρτιον· καὶ οὐκ ἔστι γε τούτων οὐδὲν ἀνὰ μέσον, οὔτε νόσου καὶ ὑγιείας οὔτε περιττοῦ καὶ ἀρτίου. ὧν δέ γε μὴ ἀναγκαῖον θάτερον ὑπάρχειν, τούτων ἔστι τι ἀνὰ μέσον· οἷον μέλαν καὶ λευκὸν ἐν σώματι πέφυκε γίγνεσθαι, καὶ οὐκ ἀναγκαῖόν γε θάτερον αὐτῶν ὑπάρχειν τῷ σώματι, — οὐ γὰρ πᾶν ἤτοι λευκὸν ἢ μέλαν ἐστίν· — καὶ φαῦλον δὲ καὶ σπουδαῖον κατηγορεῖται μὲν καὶ κατ’ ἀνθρώπου καὶ κατ’ ἄλλων πολλῶν, οὐκ ἀναγκαῖον δὲ θάτερον αὐτῶν ὑπάρχειν ἐκείνοις ὧν κατηγορεῖται· οὐ γὰρ πάντα ἤτοι φαῦλα ἢ σπουδαῖά ἐστιν. καὶ ἔστι γέ τι τούτων ἀνὰ μέσον, οἷον τοῦ μὲν λευκοῦ καὶ τοῦ μέλανος τὸ φαιὸν καὶ ὠχρὸν καὶ ὅσα ἄλλα χρώματα, τοῦ δὲ φαύλου καὶ τοῦ σπουδαίου τὸ οὔτε φαῦλον οὔτε σπουδαῖον. ἐπ’ ἐνίων μὲν οὖν ὀνόματα κεῖται τοῖς ἀνὰ μέσον, οἷον λευκοῦ καὶ μέλανος τὸ φαιὸν καὶ ὠχρόν· ἐπ' ἐνίων δὲ ὀνόματι μὲν οὐκ εὔπορον τὸ ἀνὰ μέσον ἀποδοῦναι, τῇ δὲ ἑκατέρου τῶν ἄκρων ἀποφάσει τὸ ἀνὰ μέσον ὁρίζεται,οἷον τὸ οὔτε ἀγαθὸν οὔτε κακὸν καὶ οὔτε δίκαιον οὔτε ἄδικον.

Στέρησις δὲ καὶ ἕξις λέγεται μὲν περὶ ταὐτόν τι, οἷον ἡ ὄψις καὶ ἡ τυφλότης περὶ ὀφθαλμόν· καθόλου δὲ εἰπεῖν, ἐν ᾧ πέφυκεν ἡ ἕξις γίγνεσθαι, περὶ τοῦτο λέγεται ἑκάτερον αὐτῶν. ἐστερῆσθαι δὲ τότε λέγομεν ἕκαστον τῶν τῆς ἕξεως δεκτικῶν, ὅταν ἐν ᾧ πέφυκεν ὑπάρχειν καὶ ὅτε πέφυκεν ἔχειν μηδαμῶς ὑπάρχῃ· νωδόν τε γὰρ λέγομεν οὐ τὸ μὴ ἔχον ὀδόντας, καὶ τυφλὸν οὐ τὸ μὴ ἔχον ὄψιν, ἀλλὰ τὸ μὴ ἔχον ὅτε πέφυκεν ἔχειν· τινὰ γὰρ ἐκ γενετῆς οὔτε ὄψιν οὔτε ὀδόντας ἔχει, ἀλλ' οὐ λέγεται νωδὰ οὐδὲ τυφλά. τὸ δὲ ἐστερῆσθαι καὶ τὸ ἔχειν τὴν ἕξιν οὐκ ἔστι στέρησις καὶ ἕξις· ἕξις μὲν γάρ ἐστιν ἡ ὄψις, στέρησις δὲ ἡ τυφλότης, τὸ δὲ ἔχειν τὴν ὄψιν οὐκ ἔστιν ὄψις, οὐδὲ τὸ τυφλὸν εἶναι τυφλότης· στέρησις γάρ τις ἡ τυφλότης ἐστίν, τὸ δὲ τυφλὸν εἶναι ἐστερῆσθαι, οὐ στέρησίς ἐστιν. ἔτι εἰ ἦν ἡ τυφλότης ταὐτὸν τῷ τυφλὸν εἶναι, κατηγορεῖτο ἂν ἀμφότερα κατὰ τοῦ αὐτοῦ· ἀλλὰ τυφλὸς μὲν λέγεται ὁ ἄνθρωπος, τυφλότης [12b] δὲ ὁ ἄνθρωπος οὐδαμῶς λέγεται. ἀντικεῖσθαι δὲ καὶ ταῦτα δοκεῖ, τὸ ἐστερῆσθαι καὶ τὸ τὴν ἕξιν ἔχειν ὡς στέρησις καὶ ἕξις· ὁ γὰρ τρόπος τῆς ἀντιθέσεως ὁ αὐτός· ὡς γὰρ ἡ τυφλότης τῇ ὄψει ἀντίκειται, οὕτω καὶ τὸ τυφλὸν εἶναι τῷ ὄψιν ἔχειν ἀντίκειται. (οὐκ ἔστι δὲ οὐδὲ τὸ ὑπὸ τὴν κατάφασιν καὶ ἀπόφασιν κατάφασις καὶ ἀπόφασις· ἡ μὲν γὰρ κατάφασις λόγος ἐστὶ καταφατικὸς καὶ ἡ ἀπόφασις λόγος ἀποφατικός, τῶν δὲ ὑπὸ τὴν κατάφασιν ἢ ἀπόφασιν οὐδέν ἐστι λόγος. λέγεται δὲ καὶ ταῦτα ἀντικεῖσθαι ἀλλήλοις ὡς κατάφασις καὶ ἀπόφασις· καὶ γὰρ ἐπὶ τούτων ὁ τρόπος τῆς ἀντιθέσεως ὁ αὐτός· ὡς γάρ ποτε ἡ κατάφασις πρὸς τὴν ἀπόφασιν ἀντίκειται, οἷον τὸ κάθηται — οὐ κάθηται, οὕτω καὶ τὸ ὑφ' ἑκάτερον πρᾶγμα ἀντίκειται, τὸ καθῆσθαι — μὴ καθῆσθαι.) — ὅτι δὲ ἡ στέρησις καὶ ἡ ἕξις οὐκ ἀντίκειται ὡς τὰ πρός τι, φανερόν· οὐ γὰρ λέγεται αὐτὸ ὅπερ ἐστὶ τοῦ ἀντικειμένου· ἡ γὰρ ὄψις οὐκ ἔστι τυφλότητος ὄψις, οὐδ' ἄλλως οὐδαμῶς πρὸς αὐτὸ λέγεται· ὡσαύτως δὲ οὐδὲ ἡ τυφλότης λέγοιτ' ἂν τυφλότης ὄψεως, ἀλλὰ στέρησις μὲν ὄψεως ἡ τυφλότης λέγεται, τυφλότης δὲ ὄψεως οὐ λέγεται. ἔτι τὰ πρός τι πάντα πρὸς ἀντιστρέφοντα λέγεται, ὥστε καὶ ἡ τυφλότης εἴπερ ἦν τῶν πρός τι, ἀντέστρεφεν ἂν κἀκεῖνο πρὸς ὃ λέγεται· ἀλλ' οὐκ ἀντιστρέφει· οὐ γὰρ λέγεται ἡ ὄψις τυφλότητος ὄψις.

Ὅτι δὲ οὐδ' ὡς τὰ ἐναντία ἀντίκειται τὰ κατὰ στέρησιν λεγόμενα καὶ ἕξιν ἐκ τῶνδε δῆλον. τῶν μὲν γὰρ ἐναντίων, ὧν μηδέν ἐστιν ἀνὰ μέσον, ἀναγκαῖον, ἐν οἷς πέφυκε γίγνεσθαι ἢ ὧν κατηγορεῖται, θάτερον αὐτῶν ὑπάρχειν ἀεί· τούτων γὰρ οὐδὲν ἦν ἀνὰ μέσον, ὧν θάτερον ἀναγκαῖον ἦν τῷ δεκτικῷ ὑπάρχειν, οἷον ἐπὶ νόσου καὶ ὑγιείας καὶ περιττοῦ καὶ ἀρτίου· ὧν δὲ ἔστι τι ἀνὰ μέσον, οὐδέποτε ἀνάγκη παντὶ ὑπάρχειν θάτερον· οὔτε γὰρ λευκὸν ἢ μέλαν ἀνάγκη πᾶν εἶναι τὸ δεκτικόν, οὔτε θερμὸν ἢ ψυχρόν, — τούτων γὰρ ἀνὰ μέσον τι οὐδὲν κωλύει ὑπάρχειν· — ἔτι δὲ καὶ τούτων ἦν τι ἀνὰ μέσον ὧν μὴ ἀναγκαῖον ἦν θάτερον ὑπάρχειν τῷ δεκτικῷ, εἰ μὴ οἷς φύσει τὸ ἓν ὑπάρχει, οἷον τῷ πυρὶ τὸ θερμῷ εἶναι καὶ τῇ χιόνι τὸ λευκῇ· — ἐπὶ δὲ τούτων ἀφωρισμένως ἀναγκαῖον θάτερον ὑπάρχειν, καὶ οὐχ ὁπότερον ἔτυχεν· οὐ γὰρ ἐνδέχεται τὸ πῦρ ψυχρὸν εἶναι οὐδὲ τὴν χιόνα μέλαιναν· — ὥστε παντὶ μὲν οὐκ ἀνάγκη [13a] τῷ δεκτικῷ θάτερον αὐτῶν ὑπάρχειν, ἀλλὰ μόνον οἷς φύσει τὸ ἓν ὑπάρχει, καὶ τούτοις ἀφωρισμένως τὸ ἓν καὶ οὐχ ὁπότερον ἔτυχεν. ἐπὶ δὲ τῆς στερήσεως καὶ τῆς ἕξεως οὐδέτερον τῶν εἰρημένων ἀληθές· οὐδὲ γὰρ ἀεὶ τῷ δεκτικῷ ἀναγκαῖον θάτερον αὐτῶν ὑπάρχειν, — τὸ γὰρ μήπω πεφυκὸς ὄψιν ἔχειν οὔτε τυφλὸν οὔτε ὄψιν ἔχειν λέγεται, ὥστε οὐκ ἂν εἴη ταῦτα τῶν τοιούτων ἐναντίων ὧν οὐδέν ἐστιν ἀνὰ μέσον· — ἀλλ’ οὐδὲ ὧν τι ἔστιν ἀνὰ μέσον· ἀναγκαῖον γάρ ποτε παντὶ τῷ δεκτικῷ θάτερον αὐτῶν ὑπάρχειν· ὅταν γὰρ ἤδη πεφυκὸς ᾖ ἔχειν ὄψιν, τότε ἢ τυφλὸν ἢ ἔχον ὄψιν ῥηθήσεται, καὶ τούτων οὐκ ἀφωρισμένως θάτερον, ἀλλ’ ὁπότερον ἔτυχεν, — οὐ γὰρ ἀναγκαῖον ἢ τυφλὸν ἢ ὄψιν ἔχον εἶναι, ἀλλ’ ὁπότερον ἔτυχεν· — ἐπὶ δέ γε τῶν ἐναντίων, ὧν ἔστιν ἀνὰ μέσον τι, οὐδέποτε ἀναγκαῖον ἦν παντὶ θάτερον ὑπάρχειν, ἀλλὰ τισίν, καὶ τούτοις ἀφωρισμένως τὸ ἕν. ὥστε δῆλον ὅτι κατ’ οὐδέτερον τῶν τρόπων ὡς τὰ ἐναντία ἀντίκειται τὰ κατὰ στέρησιν καὶ ἕξιν ἀντικείμενα. — ἔτι ἐπὶ μὲν τῶν ἐναντίων ὑπάρχοντος τοῦ δεκτικοῦ δυνατὸν εἰς ἄλληλα μεταβολὴν γενέσθαι, εἰ μή τινι φύσει τὸ ἓν ὑπάρχει, οἷον τῷ πυρὶ τὸ θερμῷ εἶναι· καὶ γὰρ τὸ ὑγιαῖνον δυνατὸν νοσῆσαι καὶ τὸ λευκὸν μέλαν γενέσθαι καὶ τὸ ψυχρὸν θερμόν, καὶ ἐκ σπουδαίου γε φαῦλον καὶ ἐκ φαύλου σπουδαῖον δυνατὸν γενέσθαι· — ὁ γὰρ φαῦλος εἰς βελτίους διατριβὰς ἀγόμενος καὶ λόγους κἂν μικρόν γέ τι ἐπιδοίη εἰς τὸ βελτίω εἶναι· ἐὰν δὲ ἅπαξ κἂν μικρὰν ἐπίδοσιν λάβῃ, φανερὸν ὅτι ἢ τελείως ἂν μεταβάλοι ἢ πάνυ πολλὴν ἂν ἐπίδοσιν λάβοι· ἀεὶ γὰρ εὐκινητότερος πρὸς ἀρετὴν γίγνεται, κἂν ἡντινοῦν ἐπίδοσιν εἰληφὼς ἐξ ἀρχῆς ᾖ, ὥστε καὶ πλείω εἰκὸς ἐπίδοσιν λαμβάνειν· καὶ τοῦτο ἀεὶ γιγνόμενον τελείως εἰς τὴν ἐναντίαν ἕξιν ἀποκαθίστησιν, ἐάνπερ μὴ χρόνῳ ἐξείργηται· — ἐπὶ δέ γε τῆς στερήσεως καὶ τῆς ἕξεως ἀδύνατον εἰς ἄλληλα μεταβολὴν γενέσθαι· ἀπὸ μὲν γὰρ τῆς ἕξεως ἐπὶ τὴν στέρησιν γίγνεται μεταβολή, ἀπὸ δὲ τῆς στερήσεως ἐπὶ τὴν ἕξιν ἀδύνατον· οὔτε γὰρ τυφλὸς γενόμενός τις πάλιν ἔβλεψεν, οὔτε φαλακρὸς ὢν κομήτης ἐγένετο, οὔτε νωδὸς ὢν ὀδόντας ἔφυσεν.

Ὅσα δὲ ὡς κατάφασις καὶ ἀπόφασις ἀντίκειται, [13b] φανερὸν ὅτι κατ’ οὐδένα τῶν εἰρημένων τρόπων ἀντίκειται· ἐπὶ μόνων γὰρ τούτων ἀναγκαῖον ἀεὶ τὸ μὲν ἀληθὲς τὸ δὲ ψεῦδος αὐτῶν εἶναι. οὔτε γὰρ ἐπὶ τῶν ἐναντίων ἀναγκαῖον ἀεὶ θάτερον μὲν ἀληθὲς εἶναι θάτερον δὲ ψεῦδος, οὔτε ἐπὶ τῶν πρός τι, οὔτε ἐπὶ τῆς ἕξεως καὶ στερήσεως· οἷον ὑγίεια καὶ νόσος ἐναντία, καὶ οὐδέτερόν γε οὔτε ἀληθὲς οὔτε ψεῦδός ἐστιν· ὡσαύτως δὲ καὶ τὸ διπλάσιον καὶ τὸ ἥμισυ ὡς τὰ πρός τι ἀντίκειται, καὶ οὐκ ἔστιν αὐτῶν οὐδέτερον οὔτε ἀληθὲς οὔτε ψεῦδος· οὐδέ γε τὰ κατὰ στέρησιν καὶ ἕξιν, οἷον ἡ ὄψις καὶ ἡ τυφλότης· ὅλως δὲ τῶν κατὰ μηδεμίαν συμπλοκὴν λεγομένων οὐδὲν οὔτε ἀληθὲς οὔτε ψεῦδός ἐστιν· πάντα δὲ τὰ εἰρημένα ἄνευ συμπλοκῆς λέγεται. οὐ μὴν ἀλλὰ μάλιστα δόξειεν ἂν τὸ τοιοῦτο συμβαίνειν ἐπὶ τῶν κατὰ συμπλοκὴν ἐναντίων λεγομένων, — τὸ γὰρ ὑγιαίνειν Σωκράτη τῷ νοσεῖν Σωκράτη ἐναντίον ἐστίν, — ἀλλ’ οὐδ’ ἐπὶ τούτων ἀναγκαῖον ἀεὶ θάτερον μὲν ἀληθὲς θάτερον δὲ ψεῦδος εἶναι· ὄντος μὲν γὰρ Σωκράτους ἔσται τὸ μὲν ἀληθὲς τὸ δὲ ψεῦδος, μὴ ὄντος δὲ ἀμφότερα ψευδῆ· οὔτε γὰρ τὸ νοσεῖν Σωκράτη οὔτε τὸ ὑγιαίνειν ἀληθὲς αὐτοῦ μὴ ὄντος ὅλως τοῦ Σωκράτους. ἐπὶ δὲ τῆς στερήσεως καὶ τῆς ἕξεως μὴ ὄντος γε ὅλως οὐδέτερον ἀληθές, ὄντος δὲ οὐκ ἀεὶ θάτερον ἀληθές· τὸ γὰρ ὄψιν ἔχειν Σωκράτη τῷ τυφλὸν εἶναι Σωκράτη ἀντίκειται ὡς στέρησις καὶ ἕξις, καὶ ὄντος γε οὐκ ἀναγκαῖον θάτερον ἀληθὲς εἶναι ἢ ψεῦδος, — ὅτε γὰρ μήπω πέφυκεν ἔχειν, ἀμφότερα ψευδῆ, — μὴ ὄντος δὲ ὅλως τοῦ Σωκράτους καὶ οὕτω ψευδῆ ἀμφότερα, καὶ τὸ ὄψιν αὐτὸν ἔχειν καὶ τὸ τυφλὸν εἶναι. ἐπὶ δέ γε τῆς καταφάσεως καὶ τῆς ἀποφάσεως ἀεί, ἐάν τε ᾖ ἐάν τε μὴ ᾖ, τὸ μὲν ἕτερον ἔσται ψεῦδος τὸ δὲ ἕτερον ἀληθές· τὸ γὰρ νοσεῖν Σωκράτη καὶ τὸ μὴ νοσεῖν Σωκράτη, ὄντος τε αὐτοῦ φανερὸν ὅτι τὸ ἕτερον αὐτῶν ἀληθὲς ἢ ψεῦδος, καὶ μὴ ὄντος ὁμοίως· τὸ μὲν γὰρ νοσεῖν μὴ ὄντος ψεῦδος, τὸ δὲ μὴ νοσεῖν ἀληθές· ὥστε ἐπὶ μόνων τούτων ἴδιον ἂν εἴη τὸ ἀεὶ θάτερον αὐτῶν ἀληθὲς ἢ ψεῦδος εἶναι, ὅσα ὡς κατάφασις καὶ ἀπόφασις ἀντίκειται.

Ἐναντίον δέ ἐστιν ἀγαθῷ μὲν ἐξ ἀνάγκης κακόν, — τοῦτο δὲ δῆλον τῇ καθ’ ἕκαστον ἐπαγωγῇ, οἷον ὑγιείᾳ νόσος καὶ δικαιοσύνῃ [14a] ἀδικία καὶ ἀνδρείᾳ δειλία, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, — κακῷ δὲ ὁτὲ μὲν ἀγαθὸν ἐναντίον ἐστίν, ὁτὲ δὲ κακόν· τῇ γὰρ ἐνδείᾳ κακῷ ὄντι ἡ ὑπερβολὴ ἐναντίον κακὸν ὄν· ὁμοίως δὲ καὶ ἡ μεσότης ἐναντία ἑκατέρῳ οὖσα ἀγαθόν. ἐπ’ ὀλίγων δ’ ἂν τὸ τοιοῦτον ἴδοι τις, ἐπὶ δὲ τῶν πλείστων ἀεὶ τῷ κακῷ τὸ ἀγαθὸν ἐναντίον ἐστίν. — ἔτι τῶν ἐναντίων οὐκ ἀναγκαῖον, ἐὰν θάτερον ᾖ, καὶ τὸ λοιπὸν εἶναι· ὑγιαινόντων γὰρ ἁπάντων ὑγίεια μὲν ἔσται, νόσος δὲ οὔ· ὁμοίως δὲ καὶ λευκῶν ὄντων ἁπάντων λευκότης μὲν ἔσται, μελανία δὲ οὔ. ἔτι εἰ τὸ Σωκράτη ὑγιαίνειν τῷ Σωκράτη νοσεῖν ἐναντίον ἐστίν, μὴ ἐνδέχεται δὲ ἅμα ἀμφότερα τῷ αὐτῷ ὑπάρχειν, οὐκ ἂν ἐνδέχοιτο τοῦ ἑτέρου τῶν ἐναντίων ὄντος καὶ τὸ λοιπὸν εἶναι· ὄντος γὰρ τοῦ Σωκράτη ὑγιαίνειν οὐκ ἂν εἴη τὸ νοσεῖν Σωκράτη.

Δῆλον δὲ ὅτι καὶ περὶ ταὐτὸν ἢ εἴδει ἢ γένει πέφυκε γίγνεσθαι τὰ ἐναντία· νόσος μὲν γὰρ καὶ ὑγίεια ἐν σώματι ζῴου, λευκότης δὲ καὶ μελανία ἁπλῶς ἐν σώματι, δικαιοσύνη δὲ καὶ ἀδικία ἐν ψυχῇ. ἀνάγκη δὲ πάντα τὰ ἐναντία ἢ ἐν τῷ αὐτῷ γένει εἶναι ἢ ἐν τοῖς ἐναντίοις γένεσιν, ἢ αὐτὰ γένη εἶναι· λευκὸν μὲν γὰρ καὶ μέλαν ἐν τῷ αὐτῷ γένει, — χρῶμα γὰρ αὐτῶν τὸ γένος, — δικαιοσύνη δὲ καὶ ἀδικία ἐν τοῖς ἐναντίοιςγένεσιν, — τοῦ μὲν γὰρ ἀρετή, τοῦ δὲ κακία τὸ γένος, — ἀγαθὸν δὲ καὶ κακὸν οὐκ ἔστιν ἐν γένει, ἀλλ’ αὐτὰ τυγχάνει γένη τινῶν ὄντα.

Κεφάλαιο 12

Πρότερον ἕτερον ἑτέρου λέγεται τετραχῶς· πρῶτον μὲν καὶ κυριώτατα κατὰ χρόνον, καθ' ὃ πρεσβύτερον ἕτερον ἑτέρου καὶ παλαιότερον λέγεται, — τῷ γὰρ τὸν χρόνον πλείω εἶναι καὶ πρεσβύτερον καὶ παλαιότερον λέγεται· — δεύτερον δὲ τὸ μὴ ἀντιστρέφον κατὰ τὴν τοῦ εἶναι ἀκολούθησιν, οἷον τὸ ἓν τῶν δύο πρότερον· δυεῖν μὲν γὰρ ὄντων ἀκολουθεῖ εὐθὺς τὸ ἓν εἶναι, ἑνὸς δὲ ὄντος οὐκ ἀναγκαῖον δύο εἶναι, ὥστε οὐκ ἀντιστρέφει ἀπὸ τοῦ ἑνὸς ἡ ἀκολούθησις τοῦ εἶναι τὸ λοιπόν, πρότερον δὲ δοκεῖ τὸ τοιοῦτον εἶναι ἀφ' οὗ μὴ ἀντιστρέφει ἡ τοῦ εἶναι ἀκολούθησις. τρίτον δὲ κατά τινα τάξιν πρότερον λέγεται, καθάπερ ἐπὶ τῶν ἐπιστημῶν καὶ τῶν λόγων· ἔν τε γὰρ ταῖς ἀποδεικτικαῖς ἐπιστήμαις ὑπάρχει τὸ πρότερον καὶ τὸ ὕστερον τῇ τάξει, — τὰ γὰρ στοιχεῖα πρότερα τῶν [14b] διαγραμμάτων τῇ τάξει, καὶ ἐπὶ τῆς γραμματικῆς τὰ στοιχεῖα πρότερα τῶν συλλαβῶν, — ἐπί τε τῶν λόγων ὁμοίως, — τὸ γὰρ προοίμιον τῆς διηγήσεως πρότερον τῇ τάξει ἐστίν. — ἔτι παρὰ τὰ εἰρημένα τὸ βέλτιον καὶ τὸ τιμιώτερον πρότερον εἶναι τῇ φύσει δοκεῖ· εἰώθασι δὲ καὶ οἱ πολλοὶ τοὺς ἐντιμοτέρους καὶ μᾶλλον ἀγαπωμένους ὑπ' αὐτῶν προτέρους φάσκειν εἶναι· ἔστι μὲν δὴ σχεδὸν ἀλλοτριώτατος τῶν τρόπων οὗτος.

Οἱ μὲν οὖν λεγόμενοι τοῦ προτέρου τρόποι τοσοῦτοί εἰσιν. δόξειε δ' ἂν καὶ παρὰ τοὺς εἰρημένους ἕτερος εἶναι προτέρου τρόπος· τῶν γὰρ ἀντιστρεφόντων κατὰ τὴν τοῦ εἶναι ἀκολούθησιν τὸ αἴτιον ὁπωσοῦν θατέρῳ τοῦ εἶναι πρότερον εἰκότως φύσει λέγοιτ' ἄν. ὅτι δ' ἔστι τινὰ τοιαῦτα, δῆλον· τὸ γὰρ εἶναι ἄνθρωπον ἀντιστρέφει κατὰ τὴν τοῦ εἶ — ναι ἀκολούθησιν πρὸς τὸν ἀληθῆ περὶ αὐτοῦ λόγον· εἰ γὰρ ἔστιν ἄνθρωπος, ἀληθὴς ὁ λόγος ᾧ λέγομεν ὅτι ἔστιν ἄνθρωπος· καὶ ἀντιστρέφει γε, — εἰ γὰρ ἀληθὴς ὁ λόγος ᾧ λέγομεν ὅτι ἔστιν ἄνθρωπος, ἔστιν ἄνθρωπος· — ἔστι δὲ ὁ μὲν ἀληθὴς λόγος οὐδαμῶς αἴτιος τοῦ εἶναι τὸ πρᾶγμα, τὸ μέντοι πρᾶγμα φαίνεταί πως αἴτιον τοῦ εἶναι ἀληθῆ τὸν λόγον· τῷ γὰρ εἶναι τὸ πρᾶγμα ἢ μὴ ἀληθὴς ὁ λόγος ἢ ψευδὴς λέγεται. ὥστε κατὰ πέντε τρόπους πρότερον ἕτερον ἑτέρου λέγοιτ' ἄν.

Κεφάλαιο 13

Ἅμα δὲ λέγεται ἁπλῶς μὲν καὶ κυριώτατα ὧν ἡ γένεσις ἐν τῷ αὐτῷ χρόνῳ· οὐδέτερον γὰρ πρότερον οὐδὲ ὕστερόν ἐστιν· ἅμα δὲ κατὰ τὸν χρόνον ταῦτα λέγεται. φύσει δὲ ἅμα ὅσα ἀντιστρέφει μὲν κατὰ τὴν τοῦ εἶναι ἀκολούθησιν, μηδαμῶς δὲ αἴτιον θάτερον θατέρῳ τοῦ εἶναί ἐστιν, οἷον ἐπὶ τοῦ διπλασίου καὶ τοῦ ἡμίσεος· ἀντιστρέφει μὲν γὰρ ταῦτα, — διπλασίου γὰρ ὄντος ἐστὶν ἥμισυ, καὶ ἡμίσεος ὄντος διπλάσιόν ἐστιν, — οὐδέτερον δὲ οὐδετέρῳ αἴτιον τοῦ εἶναί ἐστιν. καὶ τὰ ἐκ τοῦ αὐτοῦ γένους ἀντιδιῃρημένα ἀλλήλοις ἅμα τῇ φύσει λέγεται. ἀντιδιῃρῆσθαι δὲ λέγεται ἀλλήλοις τὰ κατὰ τὴν αὐτὴν διαίρεσιν, οἷον τὸ πτηνὸν τῷ πεζῷ καὶ τῷ ἐνύδρῳ· ταῦτα γὰρ ἀλλήλοις ἀντιδιῄρηται ἐκ τοῦ αὐτοῦ γένους ὄντα· τὸ γὰρ ζῷον διαιρεῖται εἰς ταῦτα, εἴς τε τὸ πτηνὸν καὶ τὸ πεζὸν καὶ τὸ ἔνυδρον, καὶ οὐδέν γε τούτων πρότερον ἢ ὕστερόν ἐστιν, ἀλλ’ ἅμα τῇ φύσει τὰ [15a] τοιαῦτα δοκεῖ εἶναι· (διαιρεθείη δ’ ἂν καὶ ἕκαστον τούτων εἰς εἴδη πάλιν, οἷον τὸ πεζὸν καὶ τὸ πτηνὸν καὶ τὸ ἔνυδρον.) ἔσται οὖν κἀκεῖνα ἅμα τῇ φύσει, ὅσα ἐκ τοῦ αὐτοῦ γένους κατὰ τὴν αὐτὴν διαίρεσίν ἐστιν· τὰ δὲ γένη τῶν εἰδῶν ἀεὶ πρότερα· οὐ γὰρ ἀντιστρέφει κατὰ τὴν τοῦ εἶναι ἀκολούθησιν· οἷον ἐνύδρου μὲν ὄντος ἔστι ζῷον, ζῴου δὲ ὄντοςοὐκ ἀνάγκη ἔνυδρον εἶναι. — ἅμα οὖν τῇ φύσει λέγεται ὅσα ἀντιστρέφει μὲν κατὰ τὴν τοῦ εἶναι ἀκολούθησιν, μηδαμῶς δὲ αἴτιον τὸ ἕτερον τῷ ἑτέρῳ τοῦ εἶναί ἐστιν, καὶ τὰ ἐκ τοῦ αὐτοῦ γένους ἀντιδιῃρημένα ἀλλήλοις· ἁπλῶς δὲ ἅμα, ὧν ἡ γένεσις ἐν τῷ αὐτῷ χρόνῳ.

Κινήσεως δέ ἐστιν εἴδη ἕξ· γένεσις, φθορά, αὔξησις, μείωσις, ἀλλοίωσις, κατὰ τόπον μεταβολή. αἱ μὲν οὖν ἄλλαι κινήσεις φανερὸν ὅτι ἕτεραι ἀλλήλων εἰσίν· οὐ γάρ ἐστιν ἡ γένεσις φθορὰ οὐδέ γε ἡ αὔξησις μείωσις οὐδὲ ἡ κατὰ τόπον μεταβολή, ὡσαύτως δὲ καὶ αἱ ἄλλαι· ἐπὶ δὲ τῆς ἀλλοιώσεως ἔχει τινὰ ἀπορίαν, μήποτε ἀναγκαῖον ᾖ τὸ ἀλλοιούμενον κατά τινα τῶν λοιπῶν κινήσεων ἀλλοιοῦσθαι. τοῦτο δὲ οὐκ ἀληθές ἐστιν· σχεδὸν γὰρ κατὰ πάντα τὰ πάθη ἢ τὰ πλεῖστα ἀλλοιοῦσθαι συμβέβηκεν ἡμῖν οὐδεμιᾶς τῶν ἄλλων κινήσεων κοινωνοῦσιν· οὔτε γὰρ αὔξεσθαι ἀναγκαῖον τὸ κατὰ πάθος κινούμενον οὔτε μειοῦσθαι, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, ὥσθ’ ἑτέρα ἂν εἴη παρὰ τὰς ἄλλας κινήσεις ἡ ἀλλοίωσις· εἰ γὰρ ἦν ἡ αὐτή, ἔδει τὸ ἀλλοιούμενον εὐθὺς καὶ αὔξεσθαι ἢ μειοῦσθαι ἤ τινα τῶν ἄλλων ἀκολουθεῖν κινήσεων· ἀλλ’ οὐκ ἀνάγκη. ὡσαύτως δὲ καὶ τὸ αὐξόμενον ἤ τινα ἄλλην κίνησιν κινούμενον ἀλλοιοῦσθαι· ἀλλ’ ἔστι τινὰ αὐξανόμενα ἃ οὐκ ἀλλοιοῦται· οἷον τὸ τετράγωνον γνώμονος περιτεθέντος ηὔξηται μέν, ἀλλοιότερον δὲ οὐδὲν γεγένηται· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων. ὥσθ’ ἕτεραι ἂν εἴησαν αἱ κινήσεις ἀλλήλων. Ἔστι δὲ ἁπλῶς μὲν κίνησις ἠρεμίᾳ ἐναντίον· ταῖς δὲ καθ’ ἕκαστα, γενέσει μὲν φθορά, αὐξήσει δὲ μείωσις· τῇ δὲ κατὰ τόπον μεταβολῇ ἡ κατὰ τόπον ἠρεμία μάλιστα ἔοικεν ἀντικεῖσθαι, καὶ εἰ ἄρα ἡ εἰς τὸν ἐναντίον τόπον μεταβολή, οἷον τῇ κάτωθεν ἡ ἄνω, τῇ ἄνωθεν ἡκάτω. τῇ δὲ λοιπῇ τῶν ἀποδοθεισῶν κινήσεων οὐ ῥᾴδιον ἀποδοῦναι τί ποτέ ἐστιν ἐναντίον, ἔοικε δὲ οὐδὲν εἶναι αὐτῇ ἐναντίον, εἰ μή τις καὶ ἐπὶ ταύτης τὴν κατὰ τὸ ποιὸν ἠρεμίαν ἀντιθείη <ἢ> τὴ<ν> εἰς τὸ ἐναντίον τοῦ ποιοῦ μεταβολή<ν>, καθάπερ καὶ ἐπὶ τῆς κατὰ τόπον μεταβολῆς τὴν κατὰ τόπον ἠρεμίαν ἢ τὴν εἰς τὸ ἐναντίον τόπον μεταβολήν, — ἔστι γὰρ ἡ ἀλλοίωσις μεταβολὴ κατὰ τὸ ποιόν· — ὥστε ἀντίκειται τῇ <κατὰ τὸ ποιὸν κινήσει ἡ> κατὰ τὸ ποιὸν ἠρεμία <ἢ> ἡ εἰς τὸ ἐναντίον τοῦ ποιοῦ μεταβολή, οἷον τὸ λευκὸν γίγνεσθαι τῷ μέλαν γίγνεσθαι· ἀλλοιοῦται γὰρ εἰς τὰ ἐναντία τοῦ ποιοῦ μεταβολῆς γιγνομένης.

Τὸ ἔχειν κατὰ πλείονας τρόπους λέγεται· ἢ γὰρ ὡς ἕξιν καὶ διάθεσιν ἢ ἄλλην τινὰ ποιότητα, — λεγόμεθα γὰρ ἐπιστήμην ἔχειν καὶ ἀρετήν· — ἢ ὡς ποσόν, οἷον ὃ τυγχάνει τις ἔχων μέγεθος, — λέγεται γὰρ τρίπηχυ μέγεθος ἔχειν ἢ τετράπηχυ· — ἢ ὡς τὰ περὶ τὸ σῶμα, οἷον ἱμάτιον ἢ χιτῶνα· ἢ ὡς ἐν μορίῳ, οἷον ἐν χειρὶ δακτύλιον· ἢ ὡς μέρος, οἷον χεῖρα ἢ πόδα· ἢ ὡς ἐν ἀγγείῳ, οἷον ὁ μέδιμνος τοὺς πυροὺς ἢ τὸ κεράμιον τὸν οἶνον, — οἶνον γὰρ ἔχειν τὸ κεράμιον λέγεται, καὶ ὁ μέδιμνος πυρούς· ταῦτ’ οὖν ἔχειν λέγεται ὡς ἐν ἀγγείῳ· — ἢ ὡς κτῆμα· ἔχειν γὰρ οἰκίαν καὶ ἀγρὸν λεγόμεθα. λεγόμεθα δὲ καὶ γυναῖκα ἔχειν καὶ ἡ γυνὴ ἄνδρα· ἔοικε δὲ ἀλλοτριώτατος ὁ νῦν ῥηθεὶς τρόπος τοῦ ἔχειν εἶναι· οὐδὲν γὰρ ἄλλο τῷ ἔχειν γυναῖκα σημαίνομεν ἢ ὅτι συνοικεῖ. ἴσως δ’ ἂν καὶ ἄλλοι τινὲς φανείησαν τοῦ ἔχειν τρόποι, οἱ δὲ εἰωθότες λέγεσθαι σχεδὸν ἅπαντες κατηρίθμηνται.

Κεφάλαιο 1

[16a] Πρῶτον δεῖ θέσθαι τί ὄνομα καὶ τί ῥῆμα, ἔπειτα τί ἐστιν ἀπόφασις καὶ κατάφασις καὶ ἀπόφανσις καὶ λόγος.

Ἔστι μὲν οὖν τὰ ἐν τῇ φωνῇ τῶν ἐν τῇ ψυχῇ παθημάτων σύμβολα, καὶ τὰ γραφόμενα τῶν ἐν τῇ φωνῇ. καὶ ὥσπερ οὐδὲ γράμματα πᾶσι τὰ αὐτά, οὐδὲ φωναὶ αἱ αὐταί· ὧν μέντοι ταῦτα σημεῖα πρώτων, ταὐτὰ πᾶσι παθήματα τῆς ψυχῆς, καὶ ὧν ταῦτα ὁμοιώματα πράγματα ἤδη ταὐτά. περὶ μὲν οὖν τούτων εἴρηται ἐν τοῖς περὶ ψυχῆς, — ἄλλης γὰρ πραγματείας· — ἔστι δέ, ὥσπερ ἐν τῇ ψυχῇ ὁτὲ μὲν νόημα ἄνευ τοῦ ἀληθεύειν ἢ ψεύδεσθαι ὁτὲ δὲ ἤδη ᾧ ἀνάγκη τούτων ὑπάρχειν θάτερον, οὕτω καὶ ἐν τῇ φωνῇ· περὶ γὰρ σύνθεσιν καὶ διαίρεσίν ἐστι τὸ ψεῦδός τε καὶ τὸ ἀληθές. τὰ μὲν οὖν ὀνόματα αὐτὰ καὶ τὰ ῥήματα ἔοικε τῷ ἄνευ συνθέσεως καὶ διαιρέσεως νοήματι, οἷον τὸ ἄνθρωπος ἢ λευκόν, ὅταν μὴ προστεθῇ τι· οὔτε γὰρ ψεῦδος οὔτε ἀληθές πω. σημεῖον δ’ ἐστὶ τοῦδε· καὶ γὰρ ὁ τραγέλαφος σημαίνει μέν τι, οὔπω δὲ ἀληθὲς ἢ ψεῦδος, ἐὰν μὴ τὸ εἶναι ἢ μὴ εἶναι προστεθῇ ἢ ἁπλῶς ἢ κατὰ χρόνον.

Κεφάλαιο 2

Ὄνομα μὲν οὖν ἐστὶ φωνὴ σημαντικὴ κατὰ συνθήκην ἄνευ χρόνου, ἧς μηδὲν μέρος ἐστὶ σημαντικὸν κεχωρισμένον· ἐν γὰρ τῷ Κάλλιππος τὸ ιππος οὐδὲν καθ’ αὐτὸ σημαίνει, ὥσπερ ἐν τῷ λόγῳ τῷ καλὸς ἵππος. οὐ μὴν οὐδ’ ὥσπερ ἐν τοῖς ἁπλοῖς ὀνόμασιν, οὕτως ἔχει καὶ ἐν τοῖς πεπλεγμένοις· ἐν ἐκείνοις μὲν γὰρ οὐδαμῶς τὸ μέρος σημαντικόν, ἐν δὲ τούτοις βούλεται μέν, ἀλλ’ οὐδενὸς κεχωρισμένον, οἷον ἐν τῷ ἐπακτροκέλης τὸ κελης. τὸ δὲ κατὰ συνθήκην, ὅτι φύσει τῶν ὀνομάτων οὐδέν ἐστιν, ἀλλ’ ὅταν γένηται σύμβολον· ἐπεὶ δηλοῦσί γέ τι καὶ οἱ ἀγράμματοι ψόφοι, οἷον θηρίων, ὧν οὐδέν ἐστιν ὄνομα. — τὸ δ’ οὐκ ἄνθρωπος οὐκ ὄνομα· οὐ μὴν οὐδὲ κεῖται ὄνομα ὅ τι δεῖ καλεῖν αὐτό, — οὔτε γὰρ λόγος οὔτε ἀπόφασίς ἐστιν· — ἀλλ’ ἔστω ὄνομα ἀόριστον. τὸ δὲ Φίλωνος ἢ Φίλωνι καὶ ὅσα [16b] τοιαῦτα οὐκ ὀνόματα ἀλλὰ πτώσεις ὀνόματος. λόγος δέ ἐστιν αὐτοῦ τὰ μὲν ἄλλα κατὰ τὰ αὐτά, ὅτι δὲ μετὰ τοῦ ἔστιν ἢ ἦν ἢ ἔσται οὐκ ἀληθεύει ἢ ψεύδεται, — τὸ δ’ ὄνομα ἀεί, — οἷον Φίλωνός ἐστιν ἢ οὐκ ἔστιν· οὐδὲν γάρ πω οὔτε ἀληθεύει οὔτε ψεύδεται.

Κεφάλαιο 3

Ῥῆμα δέ ἐστι τὸ προσσημαῖνον χρόνον, οὗ μέρος οὐδὲν σημαίνει χωρίς· ἔστι δὲ τῶν καθ’ ἑτέρου λεγομένων σημεῖον. λέγω δ’ ὅτι προσσημαίνει χρόνον, οἷον ὑγίεια μὲν ὄνομα, τὸ δ’ ὑγιαίνει ῥῆμα· προσσημαίνει γὰρ τὸ νῦν ὑπάρχειν. καὶ ἀεὶ τῶν ὑπαρχόντων σημεῖόν ἐστιν, οἷον τῶν καθ’ ὑποκειμένου. — τὸ δὲ οὐχ ὑγιαίνει καὶ τὸ οὐ κάμνει οὐ ῥῆμα λέγω· προσσημαίνει μὲν γὰρ χρόνον καὶ ἀεὶ κατά τινος ὑπάρχει, τῇ διαφορᾷ δὲ ὄνομα οὐ κεῖται· ἀλλ’ ἔστω ἀόριστον ῥῆμα, ὅτι ὁμοίως ἐφ’ ὁτουοῦν ὑπάρχει καὶ ὄντος καὶ μὴ ὄντος. ὁμοίως δὲ καὶ τὸ ὑγίανεν ἢ τὸ ὑγιανεῖ οὐ ῥῆμα, ἀλλὰ πτῶσις ῥήματος· διαφέρει δὲ τοῦ ῥήματος, ὅτι τὸ μὲν τὸν παρόντα προσσημαίνει χρόνον, τὰ δὲ τὸν πέριξ. — αὐτὰ μὲν οὖν καθ’ αὑτὰ λεγόμενα τὰ ῥήματα ὀνόματά ἐστι καὶ σημαίνει τι, — ἵστησι γὰρ ὁ λέγων τὴν διάνοιαν, καὶ ὁ ἀκούσας ἠρέμησεν, — ἀλλ’ εἰ ἔστιν ἢ μή οὔπω σημαίνει· οὐ γὰρ τὸ εἶναι ἢ μὴ εἶναι σημεῖόν ἐστι τοῦ πράγματος, οὐδ’ ἐὰν τὸ ὂν εἴπῃς ψιλόν. αὐτὸ μὲν γὰρ οὐδέν ἐστιν, προσσημαίνει δὲ σύνθεσίν τινα, ἣν ἄνευ τῶν συγκειμένων οὐκ ἔστι νοῆσαι.

Κεφάλαιο 4

Λόγος δέ ἐστι φωνὴ σημαντική, ἧς τῶν μερῶν τι σημαντικόν ἐστι κεχωρισμένον, ὡς φάσις ἀλλ’ οὐχ ὡς κατάφασις. λέγω δέ, οἷον ἄνθρωπος σημαίνει τι, ἀλλ’ οὐχ ὅτι ἔστιν ἢ οὐκ ἔστιν (ἀλλ’ ἔσται κατάφασις ἢ ἀπόφασις ἐάν τι προστεθῇ)· ἀλλ’ οὐχ ἡ τοῦ ἀνθρώπου συλλαβὴ μία· οὐδὲ γὰρ ἐν τῷ μῦς τὸ υς σημαντικόν, ἀλλὰ φωνή ἐστι νῦν μόνον. ἐν δὲ τοῖς διπλοῖς σημαίνει μέν, ἀλλ’ οὐ καθ’ αὑτό, ὥσπερ εἴρηται. ἔστι δὲ λόγος ἅπας μὲν [17a] σημαντικός, οὐχ ὡς ὄργανον δέ, ἀλλ’ ὥσπερ εἴρηται κατὰ συνθήκην· ἀποφαντικὸς δὲ οὐ πᾶς, ἀλλ’ ἐν ᾧ τὸ ἀληθεύειν ἢ ψεύδεσθαι ὑπάρχει· οὐκ ἐν ἅπασι δὲ ὑπάρχει, οἷον ἡ εὐχὴ λόγος μέν, ἀλλ’ οὔτ’ ἀληθὴς οὔτε ψευδής. οἱ μὲν οὖν ἄλλοι ἀφείσθωσαν, — ῥητορικῆς γὰρ ἢ ποιητικῆς οἰκειοτέρα ἡ σκέψις, — ὁ δὲ ἀποφαντικὸς τῆς νῦν θεωρίας.

Κεφάλαιο 5

Ἔστι δὲ εἷς πρῶτος λόγος ἀποφαντικὸς κατάφασις, εἶτα ἀπόφασις· οἱ δὲ ἄλλοι συνδέσμῳ εἷς. ἀνάγκη δὲ πάντα λόγον ἀποφαντικὸν ἐκ ῥήματος εἶναι ἢ πτώσεως· καὶ γὰρ ὁ τοῦ ἀνθρώπου λόγος, ἐὰν μὴ τὸ ἔστιν ἢ ἔσται ἢ ἦν ἤ τι τοιοῦτο προστεθῇ, οὔπω λόγος ἀποφαντικός (διότι δὲ ἕν τί ἐστιν ἀλλ' οὐ πολλὰ τὸ ζῷον πεζὸν δίπουν, — οὐ γὰρ δὴ τῷ σύνεγγυς εἰρῆσθαι εἷς ἔσται, — ἔστι δὲ ἄλλης τοῦτο πραγματείας εἰπεῖν). ἔστι δὲ εἷς λόγος ἀποφαντικὸς ἢ ὁ ἓν δηλῶν ἢ ὁ συνδέσμῳ εἷς, πολλοὶ δὲ οἱ πολλὰ καὶ μὴ ἓν ἢ οἱ ἀσύνδετοι. τὸ μὲν οὖν ὄνομα καὶ τὸ ῥῆμα φάσις ἔστω μόνον, ἐπεὶ οὐκ ἔστιν εἰπεῖν οὕτω δηλοῦντά τι τῇ φωνῇ ὥστ' ἀποφαίνεσθαι, ἢ ἐρωτῶντός τινος, ἢ μὴ ἀλλ' αὐτὸν προαιρούμενον. τούτων δ' ἡ μὲν ἁπλῆ ἐστὶν ἀπόφανσις, οἷον τὶ κατὰ τινὸς ἢ τὶ ἀπὸ τινός, ἡ δ' ἐκ τούτων συγκειμένη, οἷον λόγος τις ἤδη σύνθετος.

Κεφάλαιο 6

Ἔστι δ’ ἡ μὲν ἁπλῆ ἀπόφανσις φωνὴ σημαντικὴ περὶ τοῦ εἰ ὑπάρχει τι ἢ μὴ ὑπάρχει, ὡς οἱ χρόνοι διῄρηνται· κατάφασις δέ ἐστιν ἀπόφανσις τινὸς κατὰ τινός, ἀπόφασις δέ ἐστιν ἀπόφανσις τινὸς ἀπὸ τινός. ἐπεὶ δὲ ἔστι καὶ τὸ ὑπάρχον ἀποφαίνεσθαι ὡς μὴ ὑπάρχον καὶ τὸ μὴ ὑπάρχον ὡς ὑπάρχον καὶ τὸ ὑπάρχον ὡς ὑπάρχον καὶ τὸ μὴ ὑπάρχον ὡς μὴ ὑπάρχον, καὶ περὶ τοὺς ἐκτὸς δὲ τοῦ νῦν χρόνους ὡσαύτως, ἅπαν ἂν ἐνδέχοιτο καὶ ὃ κατέφησέ τις ἀποφῆσαι καὶ ὃ ἀπέφησε καταφῆσαι· ὥστε δῆλον ὅτι πάσῃ καταφάσει ἐστὶν ἀπόφασις ἀντικειμένη καὶ πάσῃ ἀποφάσει κατάφασις. καὶ ἔστω ἀντίφασις τοῦτο, κατάφασις καὶ ἀπόφασις αἱ ἀντικείμεναι· λέγω δὲ ἀντικεῖσθαι τὴν τοῦ αὐτοῦ κατὰ τοῦ αὐτοῦ, — μὴ ὁμωνύμως δέ, καὶ ὅσα ἄλλα τῶν τοιούτων προσδιοριζόμεθα πρὸς τὰς σοφιστικὰς ἐνοχλήσεις.

Κεφάλαιο 7

Ἐπεὶ δέ ἐστι τὰ μὲν καθόλου τῶν πραγμάτων τὰ δὲ καθ’ ἕκαστον, — λέγω δὲ καθόλου μὲν ὃ ἐπὶ πλειόνων πέφυκε κατηγορεῖσθαι, καθ’ ἕκαστον δὲ ὃ μή, οἷον ἄνθρωπος μὲν [17b] τῶν καθόλου Καλλίας δὲ τῶν καθ’ ἕκαστον, — ἀνάγκη δ’ ἀποφαίνεσθαι ὡς ὑπάρχει τι ἢ μή, ὁτὲ μὲν τῶν καθόλου τινί, ὁτὲ δὲ τῶν καθ’ ἕκαστον. ἐὰν μὲν οὖν καθόλου ἀποφαίνηται ἐπὶ τοῦ καθόλου ὅτι ὑπάρχει ἢ μή, ἔσονται ἐναντίαι ἀποφάνσεις, — λέγω δὲ ἐπὶ τοῦ καθόλου ἀποφαίνεσθαι καθόλου, οἷον πᾶς ἄνθρωπος λευκός, οὐδεὶς ἄνθρωπος λευκός· — ὅταν δὲ ἐπὶ τῶν καθόλου μέν, μὴ καθόλου δέ, οὐκ εἰσὶν ἐναντίαι, τὰ μέντοι δηλούμενα ἔστιν εἶναι ἐναντία, — λέγω δὲ τὸ μὴ καθόλου ἀποφαίνεσθαι ἐπὶ τῶν καθόλου, οἷον ἔστι λευκὸς ἄνθρωπος, οὐκ ἔστι λευκὸς ἄνθρωπος· καθόλου γὰρ ὄντος τοῦ ἄνθρωπος οὐχ ὡς καθόλου χρῆται τῇ ἀποφάνσει· τὸ γὰρ πᾶς οὐ τὸ καθόλου σημαίνει ἀλλ’ ὅτι καθόλου. — ἐπὶ δὲ τοῦ κατηγορουμένου τὸ καθόλου κατηγορεῖν καθόλου οὐκ ἔστιν ἀληθές· οὐδεμία γὰρ κατάφασις ἔσται, ἐν ᾗ τοῦ κατηγορουμένου καθόλου τὸ καθόλου κατηγορηθήσεται, οἷον ἔστι πᾶς ἄνθρωπος πᾶν ζῷον.

Ἀντικεῖσθαι μὲν οὖν κατάφασιν ἀποφάσει λέγω ἀντιφατικῶς τὴν τὸ καθόλου σημαίνουσαν τῷ αὐτῷ ὅτι οὐ καθόλου, οἷον πᾶς ἄνθρωπος λευκός — οὐ πᾶς ἄνθρωπος λευκός, οὐδεὶς ἄνθρωπος λευκός — ἔστι τις ἄνθρωπος λευκός· ἐναντίως δὲ τὴν τοῦ καθόλου κατάφασιν καὶ τὴν τοῦ καθόλου ἀπόφασιν, οἷον πᾶς ἄνθρωπος δίκαιος — οὐδεὶς ἄνθρωπος δίκαιος· διὸ ταύτας μὲν οὐχ οἷόν τε ἅμα ἀληθεῖς εἶναι, τὰς δὲ ἀντικειμένας αὐταῖς ἐνδέχεται ἐπὶ τοῦ αὐτοῦ, οἷον οὐ πᾶς ἄνθρωπος λευκός, καὶ ἔστι τις ἄνθρωπος λευκός. ὅσαι μὲν οὖν ἀντιφάσεις τῶν καθόλου εἰσὶ καθόλου, ἀνάγκη τὴν ἑτέραν ἀληθῆ εἶναι ἢ ψευδῆ, καὶ ὅσαι ἐπὶ τῶν καθ’ ἕκαστα, οἷον ἔστι Σωκράτης λευκός — οὐκ ἔστι Σωκράτης λευκός· ὅσαι δ’ ἐπὶ τῶν καθόλου μὴ καθόλου, οὐκ ἀεὶ ἡ μὲν ἀληθὴς ἡ δὲ ψευδής· — ἅμα γὰρ ἀληθές ἐστιν εἰπεῖν ὅτι ἔστιν ἄνθρωπος λευκὸς καὶ ὅτι οὐκ ἔστιν ἄνθρωπος λευκός, καὶ ἔστιν ἄνθρωπος καλὸς καὶ οὐκ ἔστιν ἄνθρωπος καλός· εἰ γὰρ αἰσχρός, καὶ οὐ καλός· καὶ εἰ γίγνεταί τι, καὶ οὐκ ἔστιν. — δόξειε δ’ ἂν ἐξαίφνης ἄτοπον εἶναι διὰ τὸ φαίνεσθαι σημαίνειν τὸ οὐκ ἔστιν ἄνθρωπος λευκός ἅμα καὶ ὅτι οὐδεὶς ἄνθρωπος λευκός· τὸ δὲ οὔτε ταὐτὸν σημαίνει οὔθ’ ἅμα ἐξ ἀνάγκης. — φανερὸν δ’ ὅτι καὶ μία ἀπόφασις μιᾶς καταφάσεως· τὸ γὰρ αὐτὸ δεῖ ἀποφῆσαι τὴν ἀπόφασιν ὅπερ κατέφησεν ἡ κατάφασις, καὶ ἀπὸ τοῦ αὐτοῦ, ἢ τῶν καθ’ ἕκαστά [18a] τινος ἢ ἀπὸ τῶν καθόλου τινός, ἢ ὡς καθόλου ἢ ὡς μὴ καθόλου· λέγω δὲ οἷον ἔστι Σωκράτης λευκός — οὐκ ἔστι Σωκράτης λευκός (ἐὰν δὲ ἄλλο τι ἢ ἀπ’ ἄλλου τὸ αὐτό, οὐχ ἡ ἀντικειμένη ἀλλ’ ἔσται ἐκείνης ἑτέρα), τῇ δὲ πᾶς ἄνθρωπος λευκός ἡ οὐ πᾶς ἄνθρωπος λευκός, τῇ δὲ τὶς ἄνθρωπος λευκός ἡ οὐδεὶς ἄνθρωπος λευκός, τῇ δὲ ἔστιν ἄνθρωπος λευκός ἡ οὐκ ἔστιν ἄνθρωπος λευκός.

Ὅτι μὲν οὖν μία κατάφασις μιᾷ ἀποφάσει ἀντίκειται ἀντιφατικῶς, καὶ τίνες εἰσὶν αὗται, εἴρηται, καὶ ὅτι αἱ ἐναντίαι ἄλλαι, καὶ τίνες εἰσὶν αὗται, καὶ ὅτι οὐ πᾶσα ἀληθὴς ἢ ψευδὴς ἀντίφασις, καὶ διὰ τί, καὶ πότε ἀληθὴς ἢ ψευδής.

Κεφάλαιο 8

μία δέ ἐστι κατάφασις καὶ ἀπόφασις ἡ ἓν καθ’ ἑνὸς σημαίνουσα, ἢ καθόλου ὄντος καθόλου ἢ μὴ ὁμοίως, οἷον πᾶς ἄνθρωπος λευκός ἐστιν — οὐκ ἔστι πᾶς ἄνθρωπος λευκός, ἔστιν ἄνθρωπος λευκός — οὐκ ἔστιν ἄνθρωπος λευκός, οὐδεὶς ἄνθρωπος λευκός — ἔστι τις ἄνθρωπος λευκός, εἰ τὸ λευκὸν ἓν σημαίνει. εἰ δὲ δυεῖν ἓν ὄνομα κεῖται, ἐξ ὧν μή ἐστιν ἕν, οὐ μία κατά φασις· οἷον εἴ τις θεῖτο ὄνομα ἱμάτιον ἵππῳ καὶ ἀνθρώπῳ, τὸ ἔστιν ἱμάτιον λευκόν, αὕτη οὐ μία κατάφασις [οὐδὲ ἀπόφασις μία]· οὐδὲν γὰρ διαφέρει τοῦτο εἰπεῖν ἢ ἔστιν ἵππος καὶ ἄνθρωπος λευκός, τοῦτο δ’ οὐδὲν διαφέρει τοῦ εἰπεῖν ἔστιν ἵππος λευκὸς καὶ ἔστιν ἄνθρωπος λευκός. εἰ οὖν αὗται πολλὰ σημαίνουσι καὶ εἰσὶ πολλαί, δῆλον ὅτι καὶ ἡ πρώτη ἤτοι πολλὰ ἢ οὐδὲν σημαίνει, — οὐ γάρ ἐστιν τὶς ἄνθρωπος ἵππος· — ὥστε οὐδ’ ἐν ταύταις ἀνάγκη τὴν μὲν ἀληθῆ τὴν δὲ ψευδῆ εἶναι ἀντίφασιν.

Κεφάλαιο 9

Ἐπὶ μὲν οὖν τῶν ὄντων καὶ γενομένων ἀνάγκη τὴν κατάφασιν ἢ τὴν ἀπόφασιν ἀληθῆ ἢ ψευδῆ εἶναι· καὶ ἐπὶ μὲν τῶν καθόλου ὡς καθόλου ἀεὶ τὴν μὲν ἀληθῆ τὴν δὲ ψευδῆ καὶ ἐπὶ τῶν καθ’ ἕκαστα, ὥσπερ εἴρηται· ἐπὶ δὲ τῶν καθόλου μὴ καθόλου λεχθέντων οὐκ ἀνάγκη· εἴρηται δὲ καὶ περὶ τούτων. — ἐπὶ δὲ τῶν καθ’ ἕκαστα καὶ μελλόντων οὐχ ὁμοίως. εἰ γὰρ πᾶσα κατάφασις ἢ ἀπόφασις ἀληθὴς ἢ ψευδής, καὶ ἅπαν ἀνάγκη ἢ ὑπάρχειν ἢ μὴ ὑπάρχειν· εἰ γὰρ ὁ μὲν φήσει ἔσεσθαί τι ὁ δὲ μὴ φήσει τὸ αὐτὸ τοῦτο, δῆλον ὅτι ἀνάγκη ἀληθεύειν τὸν ἕτερον αὐτῶν, εἰ πᾶσα κατάφασις ἀληθὴς ἢ ψευδής· ἄμφω γὰρ οὐχ ὑπάρξει ἅμα ἐπὶ τοῖςτοιούτοις. εἰ γὰρ ἀληθὲς εἰπεῖν ὅτι λευκὸν ἢ οὐ [18b] λευκόν ἐστιν, ἀνάγκη εἶναι λευκὸν ἢ οὐ λευκόν, καὶ εἰ ἔστι λευκὸν ἢ οὐ λευκόν, ἀληθὲς ἦν φάναι ἢ ἀποφάναι· καὶ εἰ μὴ ὑπάρχει, ψεύδεται, καὶ εἰ ψεύδεται, οὐχ ὑπάρχει· ὥστ’ ἀνάγκη τὴν κατάφασιν ἢ τὴν ἀπόφασιν ἀληθῆ εἶναι. οὐδὲν ἄρα οὔτε ἔστιν οὔτε γίγνεται οὔτε ἀπὸ τύχης οὔθ’ ὁπότερ’ ἔτυχεν, οὐδ’ ἔσται ἢ οὐκ ἔσται, ἀλλ’ ἐξ ἀνάγκης ἅπαντα καὶ οὐχ ὁπότερ’ ἔτυχεν (ἢ γὰρ ὁ φὰς ἀληθεύει ἢ ὁ ἀποφάς)· ὁμοίως γὰρ ἂν ἐγίγνετο ἢ οὐκ ἐγίγνετο· τὸ γὰρ ὁπότερ’ ἔτυχεν οὐδὲν μᾶλλον οὕτως ἢ μὴ οὕτως ἔχει ἢ ἕξει. — ἔτι εἰ ἔστι λευκὸν νῦν, ἀληθὲς ἦν εἰπεῖν πρότερον ὅτι ἔσται λευκόν, ὥστε ἀεὶ ἀληθὲς ἦν εἰπεῖν ὁτιοῦν τῶν γενομένων ὅτι ἔσται· εἰ δ’ ἀεὶ ἀληθὲς ἦν εἰπεῖν ὅτι ἔστιν ἢ ἔσται, οὐχ οἷόν τε τοῦτο μὴ εἶναι οὐδὲ μὴ ἔσεσθαι. ὃ δὲ μὴ οἷόν τε μὴ γενέσθαι, ἀδύνατον μὴ γενέσθαι· ὃ δὲ ἀδύνατον μὴ γενέσθαι, ἀνάγκη γενέσθαι· ἅπαντα οὖν τὰ ἐσόμενα ἀναγκαῖον γενέσθαι. οὐδὲν ἄρα ὁπότερ’ ἔτυχεν οὐδ’ ἀπὸ τύχης ἔσται· εἰ γὰρ ἀπὸ τύχης, οὐκ ἐξ ἀνάγκης. — ἀλλὰ μὴν οὐδ’ ὡς οὐδέτερόν γε ἀληθὲς ἐνδέχεται λέγειν, οἷον ὅτι οὔτ’ ἔσται οὔτε οὐκ ἔσται. πρῶτον μὲν γὰρ οὔσης τῆς καταφάσεως ψευδοῦς ἡ ἀπόφασις οὐκ ἀληθής, καὶ ταύτης ψευδοῦς οὔσης τὴν κατάφασιν συμβαίνει μὴ ἀληθῆ εἶναι. καὶ πρὸς τούτοις, εἰ ἀληθὲς εἰπεῖν ὅτι λευκὸν καὶ μέλαν, δεῖ ἄμφω ὑπάρχειν, εἰ δὲ ὑπάρξειν εἰς αὔριον, ὑπάρξει εἰς αὔριον· εἰ δὲ μήτ’ ἔσται μήτε μὴ ἔσται αὔριον, οὐκ ἂν εἴη τὸ ὁπότερ’ ἔτυχεν, οἷον ναυμαχία· δέοι γὰρ ἂν μήτε γενέσθαι ναυμαχίαν μήτε μὴ γενέσθαι.

Τὰ μὲν δὴ συμβαίνοντα ἄτοπα ταῦτα καὶ τοιαῦθ’ ἕτερα, εἴπερ πάσης καταφάσεως καὶ ἀποφάσεως, ἢ ἐπὶ τῶν καθόλου λεγομένων ὡς καθόλου ἢ ἐπὶ τῶν καθ’ ἕκαστα, ἀνάγκη τῶν ἀντικειμένων εἶναι τὴν μὲν ἀληθῆ τὴν δὲ ψευδῆ, μηδὲν δὲ ὁπότερ’ ἔτυχεν εἶναι ἐν τοῖς γιγνομένοις, ἀλλὰ πάντα εἶναι καὶ γίγνεσθαι ἐξ ἀνάγκης. ὥστε οὔτε βουλεύεσθαι δέοι ἂν οὔτε πραγματεύεσθαι, ὡς ἐὰν μὲν τοδὶ ποιήσωμεν, ἔσται τοδί, ἐὰν δὲ μὴ τοδί, οὐκ ἔσται. οὐδὲν γὰρ κωλύει εἰς μυριοστὸν ἔτος τὸν μὲν φάναι τοῦτ' ἔσεσθαι τὸν δὲ μὴ φάναι, ὥστε ἐξ ἀνάγκης ἔσεσθαι ὁπότερον αὐτῶν ἀληθὲς ἦν εἰπεῖν τότε. ἀλλὰ μὴν οὐδὲ τοῦτο διαφέρει, εἴ τινες εἶπον τὴν ἀντίφασιν ἢ μὴ εἶπον· δῆλον γὰρ ὅτι οὕτως ἔχει τὰ πράγματα, κἂν μὴ ὁ μὲν καταφήσῃ ὁ δὲ ἀποφήσῃ· οὐ γὰρ διὰ τὸ καταφάναι ἢ ἀποφάναι ἔσται ἢ οὐκ ἔσται, οὐδ' εἰς [19a] μυριοστὸν ἔτος μᾶλλον ἢ ἐν ὁποσῳοῦν χρόνῳ. ὥστ' εἰ ἐν ἅπαντι τῷ χρόνῳ οὕτως εἶχεν ὥστε τὸ ἕτερον ἀληθεύεσθαι, ἀναγκαῖον ἦν τοῦτο γενέσθαι, καὶ ἕκαστον τῶν γενομένων ἀεὶ οὕτως ἔχειν ὥστε ἐξ ἀνάγκης γενέσθαι· ὅ τε γὰρ ἀληθῶς εἶπέ τις ὅτι ἔσται, οὐχ οἷόν τε μὴ γενέσθαι· καὶ τὸ γενόμενον ἀληθὲς ἦν εἰπεῖν ἀεὶ ὅτι ἔσται.

Εἰ δὴ ταῦτα ἀδύνατα, — ὁρῶμεν γὰρ ὅτι ἔστιν ἀρχὴ τῶν ἐσομένων καὶ ἀπὸ τοῦ βουλεύεσθαι καὶ ἀπὸ τοῦ πρᾶξαί τι, καὶ ὅτι ὅλως ἔστιν ἐν τοῖς μὴ ἀεὶ ἐνεργοῦσι τὸ δυνατὸν εἶναι καὶ μή, ἐν οἷς ἄμφω ἐνδέχεται καὶ τὸ εἶναι καὶ τὸ μὴ εἶναι, ὥστε καὶ τὸ γενέσθαι καὶ τὸ μὴ γενέσθαι· καὶ πολλὰ ἡμῖν δῆλά ἐστιν οὕτως ἔχοντα, οἷον ὅτι τουτὶ τὸ ἱμάτιον δυνατόν ἐστι διατμηθῆναι καὶ οὐ διατμηθήσεται, ἀλλ' ἔμπροσθεν κατατριβήσεται· ὁμοίως δὲ καὶ τὸ μὴ διατμηθῆναι δυνατόν· οὐ γὰρ ἂν ὑπῆρχε τὸ ἔμπροσθεν αὐτὸ κατατριβῆναι, εἴγε μὴ δυνατὸν ἦν τὸ μὴ διατμηθῆναι· ὥστε καὶ ἐπὶ τῶν ἄλλων γενέσεων, ὅσαι κατὰ δύναμιν λέγονται τὴν τοιαύτην· — φανερὸν ἄρα ὅτι οὐχ ἅπαντα ἐξ ἀνάγκης οὔτ' ἔστιν οὔτε γίγνεται, ἀλλὰ τὰ μὲν ὁπότερ' ἔτυχε καὶ οὐδὲν μᾶλλον ἢ ἡ κατάφασις ἢ ἡ ἀπόφασις ἀληθής, τὰ δὲ μᾶλλον μὲν καὶ ὡς ἐπὶ τὸ πολὺ θάτερον, οὐ μὴν ἀλλ' ἐνδέχεται γενέσθαι καὶ θάτερον, θάτερον δὲ μή.

Τὸ μὲν οὖν εἶναι τὸ ὂν ὅταν ᾖ, καὶ τὸ μὴ ὂν μὴ εἶναι ὅταν μὴ ᾖ, ἀνάγκη· οὐ μέντοι οὔτε τὸ ὂν ἅπαν ἀνάγκη εἶναι οὔτε τὸ μὴ ὂν μὴ εἶναι· — οὐ γὰρ ταὐτόν ἐστι τὸ ὂν ἅπαν εἶναι ἐξ ἀνάγκης ὅτε ἔστιν, καὶ τὸ ἁπλῶς εἶναι ἐξ ἀνάγκης· ὁμοίως δὲ καὶ ἐπὶ τοῦ μὴ ὄντος. — καὶ ἐπὶ τῆς ἀντιφάσεως ὁ αὐτὸς λόγος· εἶναι μὲν ἢ μὴ εἶναι ἅπαν ἀνάγκη, καὶ ἔσεσθαί γε ἢ μή· οὐ μέντοι διελόντα γε εἰπεῖν θάτερον ἀναγκαῖον. λέγω δὲ οἷον ἀνάγκη μὲν ἔσεσθαι ναυμαχίαν αὔριον ἢ μὴ ἔσεσθαι, οὐ μέντοι γενέσθαι αὔριον ναυμαχίαν ἀναγκαῖον οὐδὲ μὴ γενέσθαι· γενέσθαι μέντοι ἢ μὴ γενέσθαι ἀναγκαῖον. ὥστε, ἐπεὶ ὁμοίως οἱ λόγοι ἀληθεῖς ὥσπερ τὰ πράγματα, δῆλον ὅτι ὅσα οὕτως ἔχει ὥστε ὁπότερ' ἔτυχε καὶ τὰ ἐναντία ἐνδέχεσθαι, ἀνάγκη ὁμοίως ἔχειν καὶ τὴν ἀντίφασιν· ὅπερ συμβαίνει ἐπὶ τοῖς μὴ ἀεὶ οὖσιν ἢ μὴ ἀεὶ μὴ οὖσιν· τούτων γὰρ ἀνάγκη μὲν θάτερον μόριον τῆς ἀντιφάσεως ἀληθὲς εἶναι ἢ ψεῦδος, οὐ μέντοι τόδε ἢ τόδε ἀλλ’ ὁπότερ’ ἔτυχεν, καὶ μᾶλλον μὲν ἀληθῆ τὴν ἑτέραν, οὐ μέντοι ἤδη ἀληθῆ ἢ ψευδῆ. ὥστε δῆλον [19b] ὅτι οὐκ ἀνάγκη πάσης καταφάσεως καὶ ἀποφάσεως τῶν ἀντικειμένων τὴν μὲν ἀληθῆ τὴν δὲ ψευδῆ εἶναι· οὐ γὰρ ὥσπερ ἐπὶ τῶν ὄντων οὕτως ἔχει καὶ ἐπὶ τῶν μὴ ὄντων, δυνατῶν δὲ εἶναι ἢ μὴ εἶναι, ἀλλ’ ὥσπερ εἴρηται.

Κεφάλαιο 10

Ἐπεὶ δέ ἐστι τὶ κατὰ τινὸς ἡ κατάφασις σημαίνουσα, τοῦτο δ’ ἐστὶν ἢ ὄνομα ἢ τὸ ἀνώνυμον, ἓν δὲ δεῖ εἶναι καὶ καθ’ ἑνὸς τὸ ἐν τῇ καταφάσει (τὸ δὲ ὄνομα εἴρηται καὶ τὸ ἀνώνυμον πρότερον· τὸ γὰρ οὐκ ἄνθρωπος ὄνομα μὲν οὐ λέγω ἀλλὰ ἀόριστον ὄνομα, — ἓν γάρ πως σημαίνει ἀόριστον, — ὥσπερ καὶ τὸ οὐχ ὑγιαίνει οὐ ῥῆμα), ἔσται πᾶσα κατάφασις ἢ ἐξ ὀνόματος καὶ ῥήματος ἢ ἐξ ἀορίστου ὀνόματος καὶ ῥήματος. ἄνευ δὲ ῥήματος οὐδεμία κατάφασις οὐδ’ ἀπόφασις·τὸ γὰρ ἔστιν ἢ ἔσται ἢ ἦν ἢ γίγνεται ἢ ὅσα ἄλλα τοιαῦτα, ῥήματα ἐκ τῶν κειμένων ἐστίν· προσσημαίνει γὰρ χρόνον. ὥστε πρώτη κατάφασις καὶ ἀπόφασις τὸ ἔστιν ἄνθρωπος — οὐκ ἔστιν ἄνθρωπος, εἶτα ἔστιν οὐκ ἄνθρωπος — οὐκ ἔστιν οὐκ ἄνθρωπος, πάλιν ἔστι πᾶς ἄνθρωπος — οὐκ ἔστι πᾶς ἄνθρωπος, ἔστι πᾶς οὐκ ἄνθρωπος — οὐκ ἔστι πᾶς οὐκ ἄνθρωπος· καὶ ἐπὶ τῶν ἐκτὸς δὲ χρόνων ὁ αὐτὸς λόγος.

Ὅταν δὲ τὸ ἔστι τρίτον προσκατηγορηθῇ, διχῶς λέγονται αἱ ἀντιθέσεις. λέγω δὲ οἷον ἔστι δίκαιος ἄνθρωπος, τὸ ἔστι τρίτον φημὶ συγκεῖσθαι ὄνομα ἢ ῥῆμα ἐν τῇ καταφάσει. ὥστε διὰ τοῦτο τέτταρα ἔσται ταῦτα, ὧν τὰ μὲν δύο πρὸς τὴν κατάφασιν καὶ ἀπόφασιν ἕξει κατὰ τὸ στοιχοῦν ὡς αἱ στερήσεις, τὰ δὲ δύο οὔ· λέγω δὲ ὅτι τὸ ἔστιν ἢ τῷ δικαίῳ προσκείσεται ἢ τῷ οὐ δικαίῳ, ὥστε καὶ ἡ ἀπόφασις. τέτταρα οὖν ἔσται. νοῶμεν δὲ τὸ λεγόμενον ἐκ τῶν ὑπογεγραμμένων· ἔστι δίκαιος ἄνθρωπος — ἀπόφασις τούτου, οὐκ ἔστι δίκαιος ἄνθρωπος· ἔστιν οὐ δίκαιος ἄνθρωπος — τούτου ἀπόφασις, οὐκ ἔστιν οὐ δίκαιος ἄνθρωπος. τὸ γὰρ ἔστιν ἐνταῦθα καὶ τὸ οὐκ ἔστιν τῷ δικαίῳ καὶ τῷ οὐ δικαίῳ πρόσκειται. ταῦτα μὲν οὖν, ὥσπερ ἐν τοῖς Ἀναλυτικοῖς λέγεται, οὕτω τέτακται. ὁμοίως δὲ ἔχει κἂν καθόλου τοῦ ὀνόματος ᾖ ἡ κατάφασις, οἷον πᾶς ἐστὶν ἄνθρωπος δίκαιος — [ἀπόφασις] οὐ πᾶς ἐστὶν ἄνθρωπος δίκαιος, πᾶς ἐστὶν ἄνθρωπος οὐ δίκαιος — οὐ πᾶς ἐστὶν ἄνθρωπος οὐ δίκαιος. πλὴν οὐχ ὁμοίως τὰς κατὰ διάμετρον ἐνδέχεται συναληθεύεσθαι, ἐνδέχεται δὲ ποτέ. αὗται μὲν οὖν δύο ἀντίκεινται, ἄλλαι δὲ πρὸς τὸ οὐκ ἄνθρωπος ὡς ὑποκείμενόν τι προστεθέντος· ἔστι δίκαιος οὐκ ἄνθρωπος — οὐκ ἔστι δίκαιος οὐκ ἄνθρωπος, ἔστιν οὐ δίκαιος οὐκ ἄνθρωπος — οὐκ ἔστιν οὐ δίκαιος [20a] οὐκ ἄνθρωπος. πλείους δὲ τούτων οὐκ ἔσονται ἀντιθέσεις· αὗται δὲ χωρὶς ἐκείνων αὐταὶ καθ’ αὑτάς εἰσιν, ὡς ὀνόματι τῷ οὐκ ἄνθρωπος χρώμεναι.

Ἐφ’ ὅσων δὲ τὸ ἔστι μὴ ἁρμόττει, οἷον ἐπὶ τοῦ ὑγιαίνειν καὶ βαδίζειν, ἐπὶ τούτων τὸ αὐτὸ ποιεῖ οὕτω τιθέμενα ὡς ἂν εἰ τὸ ἔστι προσήπτετο· οἷον ὑγιαίνει πᾶς ἄνθρωπος — οὐχ ὑγιαίνει πᾶς ἄνθρωπος, ὑγιαίνει πᾶς οὐκ ἄνθρωπος — οὐχ ὑγιαίνει πᾶς οὐκ ἄνθρωπος· οὐ γάρ ἐστι τὸ οὐ πᾶς ἄνθρωπος λεκτέον, ἀλλὰ τὸ οὔ, τὴν ἀπόφασιν, τῷ ἄνθρωπος προσθετέον· τὸ γὰρ πᾶς οὐ τὸ καθόλου σημαίνει, ἀλλ’ ὅτι καθόλου· δῆλον δὲ ἐκ τοῦδε, ὑγιαίνει ἄνθρωπος — οὐχ ὑγιαίνει ἄνθρωπος, ὑγιαίνει οὐκ ἄνθρωπος — οὐχ ὑγιαίνει οὐκ ἄνθρωπος· ταῦτα γὰρ ἐκείνων διαφέρει τῷ μὴ καθόλου· ὥστε τὸ πᾶς ἢ μηδείς οὐδὲν ἄλλο προσσημαίνει ἢ ὅτι καθόλου τοῦ ὀνόματος κατάφησιν ἢ ἀπόφησιν· τὰ οὖν ἄλλα τὰ αὐτὰ δεῖ προστιθέναι.

Ἐπεὶ δ’ ἐναντία ἀπόφασίς ἐστι τῇ ἅπαν ἐστὶ ζῷον δίκαιον ἡ σημαίνουσα ὅτι οὐδέν ἐστι ζῷον δίκαιον, αὗται μὲν φανερὸν ὅτι οὐδέποτε ἔσονται οὔτε ἀληθεῖς ἅμα οὔτε ἐπὶ τοῦ αὐτοῦ, αἱ δὲ ἀντικείμεναι ταύταις ἔσονταί ποτε· οἷον οὐ πᾶν ζῷον δίκαιον καὶ ἔστι τι ζῷον δίκαιον. ἀκολουθοῦσι δ’ αὗται, τῇ μὲν πᾶς ἐστὶν ἄνθρωπος οὐ δίκαιος ἡ οὐδείς ἐστιν ἄνθρωπος δίκαιος, τῇ δὲ ἔστι τις δίκαιος ἄνθρωπος ἡ ἀντικειμένη ὅτι οὐ πᾶς ἐστὶν ἄνθρωπος οὐ δίκαιος· ἀνάγκη γὰρ εἶναί τινα. φανερὸν δὲ ὅτι καὶ ἐπὶ μὲν τῶν καθ’ ἕκαστον, εἰ ἀληθὲς ἐρωτηθέντα ἀποφῆσαι, ὅτι καὶ καταφῆσαι ἀληθές, οἷον ἆρά γε Σωκράτης σοφός; οὔ· Σωκράτης ἄρα οὐ σοφός. ἐπὶ δὲ τῶν καθόλου οὐκ ἀληθὴς ἡ ὁμοίως λεγομένη, ἀληθὴς δὲ ἡ ἀπόφασις, οἷον· ἆρά γε πᾶς ἄνθρωπος σοφός; οὔ· πᾶς ἄρα ἄνθρωπος οὐ σοφός· τοῦτο γὰρ ψεῦδος, ἀλλὰ τὸ οὐ πᾶς ἄρα ἄνθρωπος σοφός ἀληθές· αὕτη δέ ἐστιν ἡ ἀντικειμένη, ἐκείνη δὲ ἡ ἐναντία.

Αἱ δὲ κατὰ τὰ ἀόριστα ἀντικείμεναι ὀνόματα καὶ ῥήματα, οἷον ἐπὶ τοῦ μὴ ἄνθρωπος καὶ μὴ δίκαιος, ὥσπερ ἀποφάσεις ἄνευ ὀνόματος καὶ ῥήματος δόξαιεν ἂν εἶναι· οὐκ εἰσὶ δέ· ἀεὶ γὰρ ἀληθεύειν ἀνάγκη ἢ ψεύδεσθαι τὴν ἀπόφασιν, ὁ δ’ εἰπὼν οὐκ ἄνθρωπος οὐδὲν μᾶλλον τοῦ ἄνθρωπος ἀλλὰ καὶ ἧττον ἠλήθευκέ τι ἢ ἔψευσται, ἐὰν μή τι προστεθῇ. σημαίνει δὲ τὸ ἔστι πᾶς οὐκ ἄνθρωπος δίκαιος οὐδεμιᾷ ἐκείνων ταὐτόν, οὐδ’ ἡ ἀντικειμένη ταύτῃ ἡ οὐκ ἔστι πᾶς οὐκ ἄνθρωπος δίκαιος· τὸ δὲ πᾶς οὐ δίκαιος οὐκ ἄνθρωπος τῷ οὐδεὶς δίκαιος οὐκ ἄνθρωπος ταὐτὸν σημαίνει. [20b]

Μετατιθέμενα δὲ τὰ ὀνόματα καὶ τὰ ῥήματα ταὐτὸν σημαίνει, οἷον ἔστι λευκὸς ἄνθρωπος — ἔστιν ἄνθρωπος λευκός· εἰ γὰρ μὴ τοῦτό ἐστιν, τοῦ αὐτοῦ πλείους ἔσονται ἀποφάσεις, ἀλλ’ ἐδέδεικτο ὅτι μία μιᾶς. τοῦ μὲν γὰρ ἔστι λευκὸς ἄνθρωπος ἀπόφασις τὸ οὐκ ἔστι λευκὸς ἄνθρωπος· τοῦ δὲ ἔστιν ἄνθρωπος λευκός, εἰ μὴ ἡ αὐτή ἐστι τῇ ἔστι λευκὸς ἄνθρωπος, ἔσται ἀπόφασις ἤτοι τὸ οὐκ ἔστιν οὐκ ἄνθρωπος λευκός ἢ τὸ οὐκ ἔστιν ἄνθρωπος λευκός. ἀλλ’ ἡ ἑτέρα μέν ἐστιν ἀπόφασις τοῦ ἔστιν οὐκ ἄνθρωπος λευκός, ἡ ἑτέρα δὲ τοῦ ἔστι λευκὸς ἄνθρωπος, ὥστε ἔσονται δύο μιᾶς. ὅτι μὲν οὖν μετατιθεμένου τοῦ ὀνόματος καὶ τοῦ ῥήματος ἡ αὐτὴ γίγνεται κατάφασις καὶ ἀπόφασις, δῆλον.

Κεφάλαιο 11

τὸ δὲ ἓν κατὰ πολλῶν ἢ πολλὰ καθ’ ἑνὸς καταφάναι ἢ ἀποφάναι, ἐὰν μὴ ἕν τι ᾖ τὸ ἐκ τῶν πολλῶν συγκείμενον, οὐκ ἔστι κατάφασις μία οὐδὲ ἀπόφασις. λέγω δὲ ἓν οὐκ ἐὰν ὄνομα ἓν ᾖ κείμενον, μὴ ᾖ δὲ ἕν τι ἐξ ἐκείνων, οἷον ὁ ἄνθρωπος ἴσως ἐστὶ καὶ ζῷον καὶ δίπουν καὶ ἥμερον, ἀλλὰ καὶ ἕν τι γίγνεται ἐκ τούτων· ἐκ δὲ τοῦ λευκοῦ καὶ τοῦ ἀνθρώπου καὶ τοῦ βαδίζειν οὐχ ἕν. ὥστε οὔτ’ ἐὰν ἕν τι κατὰ τούτων καταφήσῃ τις μία κατάφασις, ἀλλὰ φωνὴ μὲν μία καταφάσεις δὲ πολλαί, οὔτ’ ἐὰν καθ’ ἑνὸς ταῦτα, ἀλλ’ ὁμοίως πολλαί. εἰ οὖν ἡ ἐρώτησις ἡ διαλεκτικὴ ἀποκρίσεώς ἐστιν αἴτησις, ἢ τῆς προτάσεως ἢ θατέρου μορίου τῆς ἀντιφάσεως, ἡ δὲ πρότασις ἀντιφάσεως μιᾶς μόριον, οὐκ ἂν εἴη μία ἀπόκρισις πρὸς ταῦτα· οὐδὲ γὰρ ἡ ἐρώτησις μία, οὐδ’ ἂν ᾖ ἀληθής. εἴρηται δὲ ἐν τοῖς Τοπικοῖς περὶ αὐτῶν. ἅμα δὲ δῆλον ὅτι οὐδὲ τὸ τί ἐστιν ἐρώτησίς ἐστι διαλεκτική· δεῖ γὰρ δεδόσθαι ἐκ τῆς ἐρωτήσεως ἑλέσθαι ὁπότερον βούλεται τῆς ἀντιφάσεως μόριον ἀποφήνασθαι. ἀλλὰ δεῖ τὸν ἐρωτῶντα προσδιορίσαι πότερον τόδε ἐστὶν ὁ ἄνθρωπος ἢ οὐ τοῦτο.

Ἐπεὶ δὲ τὰ μὲν κατηγορεῖται συντιθέμενα, ὡς ἓν τὸ πᾶν κατηγόρημα τῶν χωρὶς κατηγορουμένων, τὰ δὲ οὔ, τίς ἡ διαφορά; κατὰ γὰρ τοῦ ἀνθρώπου ἀληθὲς εἰπεῖν καὶ χωρὶς ζῷον καὶ χωρὶς δίπουν, καὶ ὡς ἕν, καὶ ἄνθρωπον καὶ λευκόν, καὶ ταῦθ’ ὡς ἕν· ἀλλ’ οὐχί, εἰ σκυτεὺς καὶ ἀγαθός, καὶ σκυτεὺς ἀγαθός. εἰ γάρ, ὅτι ἑκάτερον, καὶ τὸ συνάμφω, πολλὰ καὶ ἄτοπα ἔσται. κατὰ γὰρ τοῦ ἀνθρώπου καὶ τὸ ἄνθρωπος ἀληθὲς καὶ τὸ λευκόν, ὥστε καὶ τὸ ἅπαν· πάλιν εἰ τὸ λευκόν, καὶ τὸ ἅπαν, ὥστε ἔσται ἄνθρωπος λευκὸς λευκός, καὶ τοῦτο εἰς ἄπειρον· καὶ πάλιν [21a] μουσικὸς λευκὸς βαδίζων, καὶ ταῦτα πολλάκις πεπλεγμένα. ἔτι εἰ ὁ Σωκράτης Σωκράτης καὶ ἄνθρωπος, καὶ Σωκράτης ἄνθρωπος, καὶ εἰ ἄνθρωπος καὶ δίπους, καὶ ἄνθρωπος δίπους.

Ὅτι μὲν οὖν, εἴ τις ἁπλῶς θήσει τὰς συμπλοκὰς γίγνεσθαι, πολλὰ συμβαίνει λέγειν ἄτοπα, δῆλον· ὅπως δὲ θετέον, λέγομεν νῦν. τῶν δὴ κατηγορουμένων, καὶ ἐφ’ οἷς κατηγορεῖσθαι συμβαίνει, ὅσα μὲν λέγεται κατὰ συμβεβηκὸς ἢ κατὰ τοῦ αὐτοῦ ἢ θάτερον κατὰ θατέρου, ταῦτα οὐκ ἔσται ἕν· οἷον ἄνθρωπος λευκός ἐστι καὶ μουσικός, ἀλλ’ οὐχ ἓν τὸ λευκὸν καὶ τὸ μουσικόν· συμβεβηκότα γὰρ ἄμφω τῷ αὐτῷ. οὐδ’ εἰ τὸ λευκὸν μουσικὸν ἀληθὲς εἰπεῖν, ὅμως οὐκ ἔσται τὸ μουσικὸν λευκὸν ἕν τι· κατὰ συμβεβηκὸς γὰρ τὸ μουσικὸν λευκόν, ὥστε οὐκ ἔσται τὸ λευκὸν μουσικόν.

διὸ οὐδ’ ὁ σκυτεὺς ἁπλῶς ἀγαθός, ἀλλὰ ζῷον δίπουν· οὐ γὰρ κατὰ συμβεβηκός. ἔτι οὐδ’ ὅσα ἐνυπάρχει ἐν τῷ ἑτέρῳ· διὸ οὔτε τὸ λευκὸν πολλάκις οὔτε ὁ ἄνθρωπος ἄνθρωπος ζῷον ἢ δίπουν· ἐνυπάρχει γὰρ ἐν τῷ ἀνθρώπῳ τὸ δίπουν καὶ τὸ ζῷον. ἀληθὲς δ’ ἐστὶν εἰπεῖν κατὰ τοῦ τινὸς καὶ ἁπλῶς, οἷον τὸν τινὰ ἄνθρωπον ἄνθρωπον ἢ τὸν τινὰ λευκὸν ἄνθρωπον λευκόν· οὐκ ἀεὶ δέ, ἀλλ’ ὅταν μὲν ἐν τῷ προσκειμένῳ τῶν ἀντικειμένων τι ἐνυπάρχῃ οἷς ἕπεται ἀντίφασις, οὐκ ἀληθὲς ἀλλὰ ψεῦδος, — οἷον τὸν τεθνεῶτα ἄνθρωπον ἄνθρωπον εἰπεῖν, — ὅταν δὲ μὴ ἐνυπάρχῃ, ἀληθές. ἢ ὅταν μὲν ἐνυπάρχῃ, ἀεὶ οὐκ ἀληθές, ὅταν δὲ μὴ ἐνυπάρχῃ, οὐκ ἀεὶ ἀληθές· ὥσπερ Ὅμηρός ἐστί τι, οἷον ποιητής· ἆρ’ οὖν καὶ ἔστιν, ἢ οὔ; κατὰ συμβεβηκὸς γὰρ κατηγορεῖται τὸ ἔστιν τοῦ Ὁμήρου· ὅτι γὰρ ποιητής ἐστιν, ἀλλ’ οὐ καθ’ αὑτό, κατηγορεῖται κατὰ τοῦ Ὁμήρου τὸ ἔστιν. ὥστ’ ἐν ὅσαις κατηγορίαις μήτε ἐναντιότης ἔνεστιν, ἐὰν λόγοι ἀντ’ ὀνομάτων λέγωνται, καὶ καθ’ αὑτὰ κατηγορῆται καὶ μὴ κατὰ συμβεβηκός, ἐπὶ τούτων τὸ τὶ καὶ ἁπλῶς ἀληθὲς ἔσται εἰπεῖν. τὸ δὲ μὴ ὄν, ὅτι δοξαστόν, οὐκ ἀληθὲς εἰπεῖν ὄν τι· δόξα γὰρ αὐτοῦ οὐκ ἔστιν ὅτι ἔστιν, ἀλλ’ ὅτι οὐκ ἔστιν.

Κεφάλαιο 12

Τούτων δὲ διωρισμένων σκεπτέον ὅπως ἔχουσιν αἱ ἀποφάσεις καὶ καταφάσεις πρὸς ἀλλήλας αἱ τοῦ δυνατὸν εἶναι καὶ μὴ δυνατόν, καὶ ἐνδεχόμενον καὶ μὴ ἐνδεχόμενον, καὶ περὶ τοῦ ἀδυνάτου τε καὶ ἀναγκαίου· ἔχει γὰρ ἀπορίας τινάς. εἰ γὰρ τῶν συμπλεκομένων αὗται ἀλλήλαις ἀντίκεινται αἱ ἀντιφάσεις, ὅσαι κατὰ τὸ εἶναι καὶ μὴ εἶναι τάττονται, οἷον [21b] τοῦ εἶναι ἄνθρωπον ἀπόφασις τὸ μὴ εἶναι ἄνθρωπον, οὐ τὸ εἶναι μὴ ἄνθρωπον, καὶ τοῦ εἶναι λευκὸν ἄνθρωπον τὸ μὴ εἶναι λευκὸν ἄνθρωπον, ἀλλ’ οὐ τὸ εἶναι μὴ λευκὸν ἄνθρωπον, — εἰ γὰρκατὰ παντὸς ἡ κατάφασις ἢ ἡ ἀπόφασις, τὸ ξύλον ἔσται ἀληθὲς εἰπεῖν εἶναι μὴ λευκὸν ἄνθρωπον· εἰ δὲ οὕτως, καὶ ὅσοις τὸ εἶναι μὴ προστίθεται, τὸ αὐτὸ ποιήσει τὸ ἀντὶ τοῦ εἶναι λεγόμενον, οἷον τοῦ ἄνθρωπος βαδίζει οὐ τὸ οὐκ ἄνθρωπος βαδίζει ἀπόφασις, ἀλλὰ τὸ οὐ βαδίζει ἄνθρωπος· οὐδὲν γὰρ διαφέρει εἰπεῖν ἄνθρωπον βαδίζειν ἢ ἄνθρωπον βαδίζοντα εἶναι· — ὥστε εἰ οὕτω πανταχοῦ, καὶ τοῦ δυνατὸν εἶναι ἀπόφασις τὸ δυνατὸν μὴ εἶναι, ἀλλ’ οὐ τὸ μὴ δυνατὸν εἶναι. δοκεῖ δὲ τὸ αὐτὸ δύνασθαι καὶ εἶναι καὶ μὴ εἶναι· πᾶν γὰρ τὸ δυνατὸν τέμνεσθαι ἢ βαδίζειν καὶ μὴ βαδίζειν καὶ μὴ τέμνεσθαι δυνατόν· λόγος δ’ ὅτι ἅπαν τὸ οὕτω δυνατὸν οὐκ ἀεὶ ἐνεργεῖ, ὥστε ὑπάρξει αὐτῷ καὶ ἡ ἀπόφασις· δύναται γὰρ καὶ μὴ βαδίζειν τὸ βαδιστικὸν καὶ μὴ ὁρᾶσθαι τὸ ὁρατόν. ἀλλὰ μὴν ἀδύνατον κατὰ τοῦ αὐτοῦ ἀληθεύεσθαι τὰς ἀντικειμένας φάσεις· οὐκ ἄρα αὕτη ἀπόφασις· συμβαίνει γὰρ ἐκ τούτων ἢ τὸ αὐτὸ φάναι καὶ ἀποφάναι ἅμα κατὰ τοῦ αὐτοῦ, ἢ μὴ κατὰ τὸ εἶναι καὶ μὴ εἶναι τὰ προστιθέμενα γίγνεσθαι φάσεις καὶ ἀποφάσεις. εἰ οὖν ἐκεῖνο ἀδύνατον, τοῦτ’ ἂν εἴη αἱρετόν. ἔστιν ἄρα ἀπόφασις τοῦ δυνατὸν εἶναι τὸ μὴ δυνατὸν εἶναι. ὁ δ’ αὐτὸς λόγος καὶ περὶ τοῦ ἐνδεχόμενον εἶναι· καὶ γὰρ τούτου ἀπόφασις τὸ μὴ ἐνδεχόμενον εἶναι. καὶ ἐπὶ τῶν ἄλλων δὲ ὁμοιοτρόπως, οἷον ἀναγκαίου τε καὶ ἀδυνάτου. γίγνεται γάρ, ὥσπερ ἐπ’ ἐκείνων τὸ εἶναι καὶ μὴ εἶναι προσθέσεις, τὰ δ’ ὑποκείμενα πράγματα τὸ μὲν λευκὸν τὸ δὲ ἄνθρωπος, οὕτως ἐνταῦθα τὸ μὲν εἶναι ὡς ὑποκείμενον γίγνεται, τὸ δὲ δύνασθαι καὶ ἐνδέχεσθαι προσθέσεις διορίζουσαι, ὥσπερ ἐπ’ ἐκείνων τὸ εἶναι καὶ μὴ εἶναι τὸ ἀληθές, ὁμοίως αὗται ἐπὶ τοῦ εἶναι δυνατὸν καὶ εἶναι οὐ δυνατόν.

Τοῦ δὲ δυνατὸν μὴ εἶναι ἀπόφασις τὸ οὐ δυνατὸν μὴ εἶναι. διὸ καὶ ἀκολουθεῖν ἂν δόξαιεν ἀλλήλαις αἱ δυνατὸν εἶναι — δυνατὸν μὴ εἶναι· τὸ γὰρ αὐτὸ δυνατὸν εἶναι καὶ μὴ εἶναι· οὐ γὰρ ἀντιφάσεις ἀλλήλων αἱ τοιαῦται. ἀλλὰ τὸ δυνατὸν εἶναι καὶ [22a] μὴ δυνατὸν εἶναι οὐδέποτε ἅμα· ἀντίκεινται γάρ. οὐδέ γε τὸ δυνατὸν μὴ εἶναι καὶ οὐ δυνατὸν μὴ εἶναι οὐδέποτε ἅμα. ὁμοίως δὲ καὶ τοῦ ἀναγκαῖον εἶναι ἀπόφασις οὐ τὸ ἀναγκαῖον μὴ εἶναι, ἀλλὰ τὸ μὴ ἀναγκαῖον εἶναι· τοῦ δὲ ἀναγκαῖον μὴ εἶναι τὸ μὴ ἀναγκαῖον μὴ εἶναι. καὶ τοῦ ἀδύνατον εἶναι οὐ τὸ ἀδύνατον μὴ εἶναι, ἀλλὰ τὸ μὴ ἀδύνατον εἶναι· τοῦ δὲ ἀδύνατον μὴ εἶναι τὸ οὐκ ἀδύνατον μὴ εἶναι. — καὶ καθόλου δέ, ὥσπερ εἴρηται, τὸ μὲν εἶναι καὶ μὴ εἶναι δεῖ τιθέναι ὡς τὰ ὑποκείμενα, κατάφασιν δὲ καὶ ἀπόφασιν ταῦτα ποιοῦντα πρὸς τὸ εἶναι καὶ μὴ εἶναι συνάπτειν. καὶ ταύτας οἴεσθαι χρὴ εἶναι τὰς ἀντικειμένας φάσεις, δυνατόν — οὐ δυνατόν, ἐνδεχόμενον — οὐκ ἐνδεχόμενον, ἀδύνατον — οὐκ ἀδύνατον, ἀναγκαῖον — οὐκ ἀναγκαῖον, ἀληθές — οὐκ ἀληθές.

Κεφάλαιο 13

Καὶ αἱ ἀκολουθήσεις δὲ κατὰ λόγον γίγνονται οὕτω τιθεμένοις· τῷ μὲν γὰρ δυνατῷ εἶναι τὸ ἐνδέχεσθαι εἶναι, καὶ τοῦτο ἐκείνῳ ἀντιστρέφει, καὶ τὸ μὴ ἀδύνατον εἶναι καὶ τὸ μὴ ἀναγκαῖον εἶναι· τῷ δὲ δυνατῷ μὴ εἶναι καὶ ἐνδεχομένῳ μὴ εἶναι τό τε μὴ ἀναγκαῖον μὴ εἶναι καὶ οὐκ ἀδύνατον μὴ εἶναι, τῷ δὲ μὴ δυνατῷ εἶναι καὶ μὴ ἐνδεχομένῳ εἶναι τὸ ἀναγκαῖον μὴ εἶναι καὶ τὸ ἀδύνατον εἶναι, τῷ δὲ μὴ δυνατῷ μὴ εἶναι καὶ μὴ ἐνδεχομένῳ μὴ εἶναι τὸ ἀναγκαῖον εἶναι καὶ τὸ ἀδύνατον μὴ εἶναι. θεωρείσθω δὲ ἐκ τῆς ὑπογραφῆς ὡς λέγομεν·

δυνατὸν εἶναι	οὐ δυνατὸν εἶναι
ἐνδεχόμενον εἶναι	οὐκ ἐνδεχόμενον εἶναι
οὐκ ἀδύνατον εἶναι	ἀδύνατον εἶναι
οὐκ ἀναγκαῖον εἶναι	ἀναγκαῖον εἶναι
δυνατὸν μὴ εἶναι	οὐ δυνατὸν μὴ εἶναι
δυνατὸν μὴ εἶναι	οὐ δυνατὸν μὴ εἶναι
ἐνδεχόμενον μὴ εἶναι	οὐκ ἐνδεχόμενον μὴ εἶναι
οὐκ ἀδύνατον μὴ εἶναι	ἀδύνατον μὴ εἶναι
οὐκ ἀναγκαῖον μὴ εἶναι	ἀναγκαῖον εἶναι.

Τὸ μὲν οὖν ἀδύνατον καὶ οὐκ ἀδύνατον τῷ ἐνδεχομένῳ καὶ δυνατῷ καὶ οὐκ ἐνδεχομένῳ καὶ μὴ δυνατῷ ἀκολουθεῖ μὲν ἀντιφατικῶς, ἀντεστραμμένως δέ· τῷ μὲν γὰρ δυνατῷ εἶναι ἡ ἀπόφασις τοῦ ἀδυνάτου, τῇ δὲ ἀποφάσει ἡ κατάφασις· τῷ γὰρ οὐ δυνατῷ εἶναι τὸ ἀδύνατον εἶναι· κατάφασις γὰρ τὸ ἀδύνατον εἶναι, τὸ δὲ οὐκ ἀδύνατον ἀπόφασις.

Τὸ δ' ἀναγκαῖον πῶς, ὀπτέον. φανερὸν δὴ ὅτι οὐχ οὕτως, ἀλλ' αἱ ἐναντίαι ἕπονται, αἱ δ' ἀντιφάσεις χωρίς. οὐ γάρ ἐστιν [22b] ἀπόφασις τοῦ ἀνάγκη μὴ εἶναι τὸ οὐκ ἀνάγκη εἶναι· ἐνδέχεται γὰρ ἀληθεύεσθαι ἐπὶ τοῦ αὐτοῦ ἀμφοτέρας· τὸ γὰρ ἀναγκαῖον μὴ εἶναι οὐκ ἀναγκαῖον εἶναι. αἴτιον δὲ τοῦ μὴ ἀκολουθεῖν ὁμοίως τοῖς ἑτέροις ὅτι ἐναντίως τὸ ἀδύνατον τῷ ἀναγκαίῳ ἀποδίδοται, τὸ αὐτὸ δυνάμενον· εἰ γὰρ ἀδύνατον εἶναι, ἀναγκαῖον τοῦτο οὐχὶ εἶναι ἀλλὰ μὴ εἶναι· εἰ δὲ ἀδύνατον μὴ εἶναι, τοῦτο ἀνάγκη εἶναι· ὥστ’ εἰ ἐκεῖνα ὁμοίως τῷ δυνατῷ καὶ μή, ταῦτα ἐξ ἐναντίας, ἐπεὶ σημαίνει γε ταὐτὸν τό τε ἀναγκαῖον καὶ τὸ ἀδύνατον, ἀλλ’ ὥσπερ εἴρηται, ἀντεστραμμένως. ἢ ἀδύνατον οὕτω κεῖσθαι τὰς τοῦ ἀναγκαίου ἀντιφάσεις; τὸ μὲν γὰρ ἀναγκαῖον εἶναι δυνατὸν εἶναι· εἰ γὰρ μή, ἡ ἀπόφασις ἀκολουθήσει· ἀνάγκη γὰρ ἢ φάναι ἢ ἀποφάναι· ὥστ’ εἰ μὴ δυνατὸν εἶναι, ἀδύνατον εἶναι· ἀδύνατον ἄρα εἶναι τὸ ἀναγκαῖον εἶναι, ὅπερ ἄτοπον. ἀλλὰ μὴν τῷ γε δυνατὸν εἶναι τὸ οὐκ ἀδύνατον εἶναι ἀκολουθεῖ, τούτῳ δὲ τὸ μὴ ἀναγκαῖον εἶναι· ὥστε συμβαίνει τὸ ἀναγκαῖον εἶναι μὴ ἀναγκαῖον εἶναι, ὅπερ ἄτοπον. ἀλλὰ μὴν οὐδὲ τὸ ἀναγκαῖον εἶναι ἀκολουθεῖ τῷ δυνατὸν εἶναι, οὐδὲ τὸ ἀναγκαῖον μὴ εἶναι· τῷ μὲν γὰρ ἄμφω ἐνδέχεται συμβαίνειν, τούτων δ’ ὁπότερον ἂν ἀληθὲς ᾖ, οὐκέτι ἔσται ἐκεῖνα ἀληθῆ· ἅμα γὰρ δυνατὸν εἶναι καὶ μὴ εἶναι· εἰ δ’ ἀνάγκη εἶναι ἢ μὴ εἶναι, οὐκ ἔσται δυνατὸν ἄμφω. λείπεται τοίνυν τὸ οὐκ ἀναγκαῖον μὴ εἶναι ἀκολουθεῖν τῷ δυνατὸν εἶναι· τοῦτο γὰρ ἀληθὲς καὶ κατὰ τοῦ ἀναγκαῖον εἶναι. καὶ γὰρ αὕτη γίγνεται ἀντίφασις τῇ ἑπομένῃ τῷ οὐ δυνατῷ εἶναι· ἐκείνῳ γὰρ ἀκολουθεῖ τὸ ἀδύνατον εἶναι καὶ ἀναγκαῖον μὴ εἶναι, οὗ ἀπόφασις τὸ οὐκ ἀναγκαῖον μὴ εἶναι. ἀκολουθοῦσιν ἄρα καὶ αὗται αἱ ἀντιφάσεις κατὰ τὸν εἰρημένον τρόπον, καὶ οὐδὲν ἀδύνατον συμβαίνει τιθεμένων οὕτως.

Ἀπορήσειε δ’ ἄν τις εἰ τῷ ἀναγκαῖον εἶναι τὸ δυνατὸν εἶναι ἕπεται. εἴ τε γὰρ μὴ ἕπεται, ἡ ἀντίφασις ἀκολουθήσει, τὸ μὴ δυνατὸν εἶναι· καὶ εἴ τις ταύτην μὴ φήσειεν εἶναι ἀντίφασιν, ἀνάγκη λέγειν τὸ δυνατὸν μὴ εἶναι· ἅπερ ἄμφω ψευδῆ κατὰ τοῦ ἀναγκαῖον εἶναι. ἀλλὰ μὴν πάλιν τὸ αὐτὸ εἶναι δοκεῖ δυνατὸν τέμνεσθαι καὶ μὴ τέμνεσθαι, καὶ εἶναι καὶ μὴ εἶναι, ὥστε ἔσται τὸ ἀναγκαῖον εἶναι ἐνδεχόμενον μὴ εἶναι· τοῦτο δὲ ψεῦδος. φανερὸν δὴ ὅτι οὐ πᾶν τὸ δυνατὸν ἢ εἶναι ἢ βαδίζειν καὶ τὰ ἀντικείμενα δύναται, ἀλλ’ ἔστιν ἐφ’ ὧν οὐκ ἀληθές· πρῶτον μὲν ἐπὶ τῶν μὴ κατὰ λόγον δυνατῶν, οἷον τὸ πῦρ θερμαντικὸν καὶ ἔχει δύναμιν ἄλογον, — αἱ μὲν οὖν μετὰ λόγου [23a] δυνάμεις αἱ αὐταὶ πλειόνων καὶ τῶν ἐναντίων, αἱ δ’ ἄλογοι οὐ πᾶσαι, ἀλλ’ ὥσπερ εἴρηται, τὸ πῦρ οὐ δυνατὸν θερμαίνειν καὶ μή, οὐδ’ ὅσα ἄλλα ἐνεργεῖ ἀεί· ἔνια μέντοι δύναται καὶ τῶν κατὰ τὰς ἀλόγους δυνάμεις ἅμα τὰ ἀντικείμενα· ἀλλὰ τοῦτο μὲν τούτου χάριν εἴρηται, ὅτι οὐ πᾶσα δύναμις τῶν ἀντικειμένων, οὐδ’ ὅσαι λέγονται κατὰ τὸ αὐτὸ εἶδος, — ἔνιαι δὲ δυνάμεις ὁμώνυμοί εἰσιν· τὸ γὰρ δυνατὸν οὐχ ἁπλῶς λέγεται, ἀλλὰ τὸ μὲν ὅτι ἀληθὲς ὡς ἐνεργείᾳ ὄν, οἷον δυνατὸν βαδίζειν ὅτι βαδίζει, καὶ ὅλως δυνατὸν εἶναι ὅτι ἤδη ἔστι κατ’ ἐνέργειαν ὃ λέγεται δυνατόν, τὸ δὲ ὅτι ἐνεργήσειεν ἄν, οἷον δυνατὸν βαδίζειν ὅτι βαδίσειεν ἄν. καὶ αὕτη μὲν ἐπὶ τοῖς κινητοῖς ἐστὶ μόνοις ἡ δύναμις, ἐκείνη δὲ καὶ ἐπὶ τοῖς ἀκινήτοις· ἄμφω δὲ ἀληθὲς εἰπεῖν τὸ μὴ ἀδύνατον εἶναι βαδίζειν ἢ εἶναι, καὶ τὸ βαδίζον ἤδη καὶ ἐνεργοῦν καὶ τὸ βαδιστικόν. τὸ μὲν οὖν οὕτω δυνατὸν οὐκ ἀληθὲς κατὰ τοῦ ἀναγκαίου ἁπλῶς εἰπεῖν, θάτερον δὲ ἀληθές. ὥστε, ἐπεὶ τῷ ἐν μέρει τὸ καθόλου ἕπεται, τῷ ἐξ ἀνάγκης ὄντι ἕπεται τὸ δύνασθαι εἶναι, οὐ μέντοι πᾶν. καὶ ἔστι δὴ ἀρχὴ ἴσως τὸ ἀναγκαῖον καὶ μὴ ἀναγκαῖον πάντων ἢ εἶναι ἢ μὴ εἶναι, καὶ τὰ ἄλλα ὡς τούτοις ἀκολουθοῦντα ἐπισκοπεῖν δεῖ. Φανερὸν δὴ ἐκ τῶν εἰρημένων ὅτι τὸ ἐξ ἀνάγκης ὂν κατ’ ἐνέργειάν ἐστιν, ὥστε εἰ πρότερα τὰ ἀίδια, καὶ ἐνέργεια δυνάμεως προτέρα. καὶ τὰ μὲν ἄνευ δυνάμεως ἐνέργειαί εἰσιν, οἷον αἱ πρῶται οὐσίαι, τὰ δὲ μετὰ δυνάμεως, ἃ τῇ μὲν φύσει πρότερα, τῷ χρόνῳ δὲ ὕστερα, τὰ δὲ οὐδέποτε ἐνέργειαί εἰσιν ἀλλὰ δυνάμεις μόνον.

Κεφάλαιο 14

Πότερον δὲ ἐναντία ἐστὶν ἡ κατάφασις τῇ ἀποφάσει ἢ ἡ κατάφασις τῇ καταφάσει, καὶ ὁ λόγος τῷ λόγῳ ὁ λέγων ὅτι πᾶς ἄνθρωπος δίκαιος τῷ οὐδεὶς ἄνθρωπος δίκαιος, ἢ τὸ πᾶς ἄνθρωπος δίκαιος τῷ πᾶς ἄνθρωπος ἄδικος; οἷον ἔστι Καλλίας δίκαιος — οὐκ ἔστι Καλλίας δίκαιος — Καλλίας ἄδικός ἐστιν, ποτέρα ἐναντία τούτων; — εἰ γὰρ τὰ μὲν ἐν τῇ φωνῇ ἀκολουθεῖ τοῖς ἐν τῇ διανοίᾳ, ἐκεῖ δ' ἐναντία δόξα ἡ τοῦ ἐναντίου, οἷον ὅτι πᾶς ἄνθρωπος δίκαιος τῇ πᾶς ἄνθρωπος ἄδικος, καὶ ἐπὶ τῶν ἐν τῇ φωνῇ καταφάσεων ἀνάγκη ὁμοίως ἔχειν. εἰ δὲ μηδὲ ἐκεῖ ἡ τοῦ ἐναντίου δόξα ἐναντία ἐστίν, οὐδ' ἡ κατάφασις τῇ καταφάσει ἔσται ἐναντία, ἀλλ' ἡ εἰρημένη ἀπόφασις. ὥστε σκεπτέον ποία δόξα ἀληθὴς ψευδεῖ δόξῃ ἐναντία, πότερον ἡ τῆς ἀποφάσεως ἢ ἡ τὸ ἐναντίον εἶναι δοξάζουσα. λέγω δὲ ὧδε· ἔστι τις δόξα ἀληθὴς τοῦ ἀγαθοῦ ὅτι ἀγαθόν, ἄλλη δὲ [23b] ὅτι οὐκ ἀγαθὸν ψευδής, ἑτέρα δὲ ὅτι κακόν· ποτέρα δὴ τούτων ἐναντία τῇ ἀληθεῖ; καὶ εἰ ἔστι μία, κατὰ ποτέραν ἐναντία; (τὸ μὲν δὴ τούτῳ οἴεσθαι τὰς ἐναντίας δόξας ὡρίσθαι, τῷ τῶν ἐναντίων εἶναι, ψεῦδος· τοῦ γὰρ ἀγαθοῦ ὅτι ἀγαθὸν καὶ τοῦ κακοῦ ὅτι κακὸν ἡ αὐτὴ ἴσως καὶ ἀληθής, εἴτε πλείους εἴτε μία ἐστίν· ἐναντία δὲ ταῦτα· ἀλλ' οὐ τῷ ἐναντίων εἶναι ἐναντίαι, ἀλλὰ μᾶλλον τῷ ἐναντίως.)

Εἰ δὴ ἔστι μὲν τοῦ ἀγαθοῦ ὅτι ἐστὶν ἀγαθὸν δόξα, ἔστι δ' ὅτι οὐκ ἀγαθόν, ἔστι δὲ ὅτι ἄλλο τι ὃ οὐχ ὑπάρχει οὐδ' οἷόν τε ὑπάρξαι (τῶν μὲν δὴ ἄλλων οὐδεμίαν θετέον, οὔθ' ὅσαι ὑπάρχειν τὸ μὴ ὑπάρχον δοξάζουσιν οὔθ' ὅσαι μὴ ὑπάρχειν τὸ ὑπάρχον, — ἄπειροι γὰρ ἀμφότεραι, καὶ ὅσαι ὑπάρχειν δοξάζουσι τὸ μὴ ὑπάρχον καὶ ὅσαι μὴ ὑπάρχειν τὸ ὑπάρχον, — ἀλλ' ἐν ὅσαις ἐστὶν ἡ ἀπάτη· αὗται δὲ ἐξ ὧν αἱ γενέσεις· ἐκ τῶν ἀντικειμένων δὲ αἱ γενέσεις, ὥστε καὶ αἱ ἀπάται), εἰ οὖν τὸ ἀγαθὸν καὶ ἀγαθὸν καὶ οὐ κακόν ἐστιν, καὶ τὸ μὲν καθ' αὑτὸ τὸ δὲ κατὰ συμβεβηκός (συμβέβηκε γὰρ αὐτῷ οὐ κακῷ εἶναι), μᾶλλον δ' ἑκάστου ἀληθὴς ἡ καθ' αὑτό, καὶ ψευδὴς εἴπερ καὶ ἀληθής. — ἡ μὲν οὖν ὅτι οὐκ ἀγαθὸν τὸ ἀγαθὸν τοῦ καθ' αὑτὸ ὑπάρχοντος ψευδής, ἡ δὲ τοῦ ὅτι κακὸν τοῦ κατὰ συμβεβηκός, ὥστε μᾶλλον ἂν εἴη ψευδὴς τοῦ ἀγαθοῦ ἡ τῆς ἀποφάσεως ἢ ἡ τοῦ ἐναντίου. διέψευσται δὲ μάλιστα περὶ ἕκαστον ὁ τὴν ἐναντίαν ἔχων δόξαν· τὰ γὰρ ἐναντία τῶν πλεῖστον διαφερόντων περὶ τὸ αὐτό. εἰ οὖν ἐναντία μὲν τούτων ἡ ἑτέρα, ἐναντιωτέρα δὲ ἡ τῆς ἀντιφάσεως, δῆλον ὅτι αὕτη ἂν εἴη ἡ ἐναντία. ἡ δὲ τοῦ ὅτι κακὸν τὸ ἀγαθὸν συμπεπλεγμένη ἐστίν· καὶ γὰρ ὅτι οὐκ ἀγαθὸν ἀνάγκη ἴσως ὑπολαμβάνειν τὸν αὐτόν.

Ἔτι δ’ εἰ καὶ ἐπὶ τῶν ἄλλων ὁμοίως δεῖ ἔχειν, καὶ ταύτῃ ἂν δόξειε καλῶς εἰρῆσθαι· ἢ γὰρ παν — ταχοῦ τὸ τῆς ἀντιφάσεως ἢ οὐδαμοῦ· ὅσοις δὲ μή ἐστιν ἐναντία, περὶ τούτων ἔστι μὲν ψευδὴς ἡ τῇ ἀληθεῖ ἀντικειμένη, οἷον ὁ τὸν ἄνθρωπον μὴ ἄνθρωπον οἰόμενος διέψευσται. εἰ οὖν αὗται ἐναντίαι, καὶ αἱ ἄλλαι αἱ τῆς ἀντιφάσεως.

Ἔτι ὁμοίως ἔχει ἡ τοῦ ἀγαθοῦ ὅτι ἀγαθὸν καὶ ἡ τοῦ μὴ ἀγαθοῦ ὅτι οὐκ ἀγαθόν, καὶ πρὸς ταύταις ἡ τοῦ ἀγαθοῦ ὅτι οὐκ ἀγαθὸν καὶ ἡ τοῦ μὴ ἀγαθοῦ ὅτι ἀγαθόν. τῇ οὖν τοῦ μὴ ἀγαθοῦ ὅτι οὐκ ἀγαθὸν ἀληθεῖ οὔσῃ δόξῃ τίς ἐναντία; οὐ γὰρ δὴ ἡ λέγουσα ὅτι κακόν· ἅμα γὰρ ἄν ποτε εἴη ἀληθής, οὐδέποτε δὲ ἀληθὴς ἀληθεῖ ἐναντία· ἔστι γάρ τι μὴ ἀγαθὸν κακόν, ὥστε ἐνδέχεται ἅμα ἀληθεῖς εἶναι. οὐδ’ αὖ ἡ ὅτι οὐ κακόν· [ἀληθὴς γὰρ καὶ αὕτη·] ἅμα γὰρ καὶ ταῦτα ἂν εἴη. λείπεται δὴ τῇ τοῦ μὴ ἀγαθοῦ [24a] ὅτι οὐκ ἀγαθὸν ἐναντία ἡ τοῦ μὴ ἀγαθοῦ ὅτι ἀγαθόν [ψευδής· ἀληθὴς γὰρ αὕτη]. ὥστε καὶ ἡ τοῦ ἀγαθοῦ ὅτι οὐκ ἀγαθὸν τῇ τοῦ ἀγαθοῦ ὅτι ἀγαθόν.

Φανερὸν δὲ ὅτι οὐδὲν διοίσει οὐδ’ ἂν καθόλου τιθῶμεν τὴν κατάφασιν· ἡ γὰρ καθόλου ἀπόφασις ἐναντία ἔσται, οἷον τῇ δόξῃ τῇ δοξαζούσῃ ὅτι πᾶν ἀγαθὸν ἀγαθόν ἡ ὅτι οὐδὲν τῶν ἀγαθῶν ἀγαθόν. ἡ γὰρ τοῦ ἀγαθοῦ ὅτι ἀγαθόν, εἰ καθόλου τὸ ἀγαθόν, ἡ αὐτή ἐστι τῇ ὅ τι ἂν ᾖ ἀγαθὸν δοξαζούσῃ ὅτι ἀγαθόν· τοῦτο δὲ οὐδὲν διαφέρει τοῦ ὅτι πᾶν ὃ ἂν ᾖ ἀγαθὸν ἀγαθόν ἐστιν. ὁμοίως δὲ καὶ ἐπὶ τοῦ μὴ [24b] ἀγαθοῦ.

Ὥστ’ εἴπερ ἐπὶ δόξης οὕτως ἔχει, εἰσὶ δὲ αἱ ἐν τῇ φωνῇ καταφάσεις καὶ ἀποφάσεις σύμβολα τῶν ἐν τῇ ψυχῇ, δῆλον ὅτι καὶ καταφάσει ἐναντία μὲν ἀπόφασις ἡ περὶ τοῦ αὐτοῦ καθόλου, οἷον <τῇ> ὅτι πᾶν ἀγαθὸν ἀγαθόν ἢ ὅτι πᾶς ἄνθρωπος ἀγαθός ἡ ὅτι οὐδὲν ἢ οὐδείς, ἀντιφατικῶς δὲ ὅτι ἢ οὐ πᾶν ἢ οὐ πᾶς. φανερὸν δὲ καὶ ὅτι ἀληθῆ ἀληθεῖ οὐκ ἐνδέχεται ἐναντίαν εἶναι οὔτε δόξαν οὔτε ἀντίφασιν· ἐναντίαι μὲν γὰρ αἱ περὶ τὰ ἀντικείμενα, περὶ ταῦτα δ’ ἐνδέχεται ἀληθεύειν τὸν αὐτόν· ἅμα δὲ οὐκ ἐνδέχεται τὰ ἐναντία ὑπάρχειν τῷ αὐτῷ.

Κεφάλαιο 1

[24a] Πρῶτον εἰπεῖν περὶ τί καὶ τίνος ἐστὶν ἡ σκέψις, ὅτι περὶ ἀπόδειξιν καὶ ἐπιστήμης ἀποδεικτικῆς· εἶτα διορίσαι τί ἐστι πρότασις καὶ τί ὅρος καὶ τί συλλογισμός, καὶ ποῖος τέλειος καὶ ποῖος ἀτελής, μετὰ δὲ ταῦτα τί τὸ ἐν ὅλῳ εἶναι ἢ μὴ εἶναι τόδε τῷδε, καὶ τί λέγομεν τὸ κατὰ παντὸς ἢ μηδενὸς κατηγορεῖσθαι.

Πρότασις μὲν οὖν ἐστὶ λόγος καταφατικὸς ἢ ἀποφατικός τινος κατά τινος· οὗτος δὲ ἢ καθόλου ἢ ἐν μέρει ἢ ἀδιόριστος. λέγω δὲ καθόλου μὲν τὸ παντὶ ἢ μηδενὶ ὑπάρχειν, ἐν μέρει δὲ τὸ τινὶ ἢ μὴ τινὶ ἢ μὴ παντὶ ὑπάρχειν, ἀδιόριστον δὲ τὸ ὑπάρχειν ἢ μὴ ὑπάρχειν ἄνευ τοῦ καθόλου ἢ κατὰ μέρος, οἷον τὸ τῶν ἐναντίων εἶναι τὴν αὐτὴν ἐπιστήμην ἢ τὸ τὴν ἡδονὴν μὴ εἶναι ἀγαθόν. διαφέρει δὲ ἡ ἀποδεικτικὴ πρότασις τῆς διαλεκτικῆς, ὅτι ἡ μὲν ἀποδεικτικὴ λῆψις θατέρου μορίου τῆς ἀντιφάσεώς ἐστιν (οὐ γὰρ ἐρωτᾷ ἀλλὰ λαμβάνει ὁ ἀποδεικνύων), ἡ δὲ διαλεκτικὴ ἐρώτησις ἀντιφάσεώς ἐστιν. οὐδὲν δὲ διοίσει πρὸς τὸ γενέσθαι τὸν ἑκατέρου συλλογισμόν· καὶ γὰρ ὁ ἀποδεικνύων καὶ ὁ ἐρωτῶν συλλογίζεται λαβών τι κατά τινος ὑπάρχειν ἢ μὴ ὑπάρχειν. ὥστε ἔσται συλλογιστικὴ μὲν πρότασις ἁπλῶς κατάφασις ἢ ἀπόφασίς τινος κατά τινος τὸν εἰρημένον τρόπον, ἀποδεικτικὴ δέ, ἐὰν ἀληθὴς ᾖ καὶ διὰ τῶν ἐξ ἀρχῆς [24b] ὑποθέσεων εἰλημμένη, διαλεκτικὴ δὲ πυνθανομένῳ μὲν ἐρώτησις ἀντιφάσεως, συλλογιζομένῳ δὲ λῆψις τοῦ φαινομένου καὶ ἐνδόξου, καθάπερ ἐν τοῖς Τοπικοῖς εἴρηται. τί μὲν οὖν ἐστὶ πρότασις, καὶ τί διαφέρει συλλογιστικὴ καὶ ἀποδεικτικὴ καὶ διαλεκτική, δι’ ἀκριβείας μὲν ἐν τοῖς ἑπομένοις ῥηθήσεται, πρὸς δὲ τὴν παροῦσαν χρείαν ἱκανῶς ἡμῖν διωρίσθω τὰ νῦν.

Ὅρον δὲ καλῶ εἰς ὃν διαλύεται ἡ πρότασις, οἷον τό τε κατηγορούμενον καὶ τὸ καθ’ οὗ κατηγορεῖται, προστιθεμένου [ἢ διαιρουμένου] τοῦ εἶναι ἢ μὴ εἶναι. συλλογισμὸς δέ ἐστι λόγος ἐνῷ τεθέντων τινῶν ἕτερόν τι τῶν κειμένων ἐξ ἀνάγκης συμβαίνει τῷ ταῦτα εἶναι. λέγω δὲ τῷ ταῦτα εἶναι τὸ διὰ ταῦτα συμβαίνειν, τὸ δὲ διὰ ταῦτα συμβαίνειν τὸ μηδενὸς ἔξωθεν ὅρου προσδεῖν πρὸς τὸ γενέσθαι τὸ ἀναγκαῖον. τέλειον μὲν οὖν καλῶ συλλογισμὸν τὸν μηδενὸς ἄλλου προσδεόμενον παρὰ τὰ εἰλημμένα πρὸς τὸ φανῆναι τὸ ἀναγκαῖον, ἀτελῆ δὲ τὸν προσδεόμενον ἢ ἑνὸς ἢ πλειόνων, ἃ ἔστι μὲν ἀναγκαῖα διὰ τῶν ὑποκειμένων ὅρων, οὐ μὴν εἴληπται διὰ προτάσεων. τὸ δὲ ἐν ὅλῳ εἶναι ἕτερον ἑτέρῳ καὶ τὸ κατὰ παντὸς κατηγορεῖσθαι θατέρου θάτερον ταὐτόν ἐστιν. λέγομεν δὲ τὸ κατὰ παντὸς κατηγορεῖσθαι ὅταν μηδὲν ᾖ λαβεῖν [τοῦ ὑποκειμένου] καθ’ οὗ θάτερον οὐ λεχθήσεται· καὶ τὸ κατὰ μηδενὸς ὡσαύτως. [25a]

Κεφάλαιο 2

Ἐπεὶ δὲ πᾶσα πρότασίς ἐστιν ἢ τοῦ ὑπάρχειν ἢ τοῦ ἐξ ἀνάγκης ὑπάρχειν ἢ τοῦ ἐνδέχεσθαι ὑπάρχειν, τούτων δὲ αἱ μὲν καταφατικαὶ αἱ δὲ ἀποφατικαὶ καθ’ ἑκάστην πρόσρησιν, πάλιν δὲ τῶν καταφατικῶν καὶ ἀποφατικῶν αἱ μὲν καθόλου αἱ δὲ ἐν μέρει αἱ δὲ ἀδιόριστοι, τὴν μὲν ἐν τῷ ὑπάρχειν καθόλου στερητικὴν ἀνάγκη τοῖς ὅροις ἀντιστρέφειν, οἷον εἰ μηδεμία ἡδονὴ ἀγαθόν, οὐδ’ ἀγαθὸν οὐδὲν ἔσται ἡδονή· τὴν δὲ κατηγορικὴν ἀντιστρέφειν μὲν ἀναγκαῖον, οὐ μὴν καθόλου ἀλλ’ ἐν μέρει, οἷον εἰ πᾶσα ἡδονὴ ἀγαθόν, καὶ ἀγαθόν τι εἶναι ἡδονήν· τῶν δὲ ἐν μέρει τὴν μὲν καταφατικὴν ἀντιστρέφειν ἀνάγκη κατὰ μέρος (εἰ γὰρ ἡδονή τις ἀγαθόν, καὶ ἀγαθόν τι ἔσται ἡδονή), τὴν δὲ στερητικὴν οὐκ ἀναγκαῖον· (οὐ γὰρ εἰ ἄνθρωπος μὴ ὑπάρχει τινὶ ζῴῳ, καὶ ζῷον οὐχ ὑπάρχει τινὶ ἀνθρώπῳ).

Πρῶτον μὲν οὖν ἔστω στερητικὴ καθόλου ἡ Α Β πρότασις. εἰ οὖν μηδενὶ τῷ Β τὸ Α ὑπάρχει, οὐδὲ τῷ Α οὐδενὶ ὑπάρξει τὸ Β· εἰ γάρ τινι, οἷον τῷ Γ, οὐκ ἀληθὲς ἔσται τὸ μηδενὶ τῷ Β τὸ Α ὑπάρχειν· τὸ γὰρ Γ τῶν Β τί ἐστιν. εἰ δὲ παντὶ τὸ Α τῷ Β, καὶ τὸ Β τινὶ τῷ Α ὑπάρξει· εἰ γὰρ μηδενί, οὐδὲ τὸ Α οὐδενὶ τῷ Β ὑπάρξει· ἀλλ’ ὑπέκειτο παντὶ ὑπάρχειν. ὁμοίως δὲ καὶ εἰ κατὰ μέρος ἐστὶν ἡ πρότασις. εἰ γὰρ τὸ Α τινὶ τῷ Β, καὶ τὸ Β τινὶ τῷ Α ἀνάγκη ὑπάρχειν· εἰ γὰρ μηδενί, οὐδὲ τὸ Α οὐδενὶ τῷ Β. εἰ δέ γε τὸ Α τινὶ τῷ Β μὴ ὑπάρχει, οὐκ ἀνάγκη καὶ τὸ Β τινὶ τῷ Α μὴ ὑπάρχειν, οἷον εἰ τὸ μὲν Β ἐστὶ ζῷον, τὸ δὲ Α ἄνθρωπος· ἄνθρωπος μὲν γὰρ οὐ παντὶ ζῴῳ, ζῷον δὲ παντὶ ἀνθρώπῳ ὑπάρχει.

Κεφάλαιο 3

Τὸν αὐτὸν δὲ τρόπον ἕξει καὶ ἐπὶ τῶν ἀναγκαίων προτάσεων. ἡ μὲν γὰρ καθόλου στερητικὴ καθόλου ἀντιστρέφει, τῶν δὲ καταφατικῶν ἑκατέρα κατὰ μέρος. εἰ μὲν γὰρ ἀνάγκη τὸ Α τῷ Β μηδενὶ ὑπάρχειν, ἀνάγκη καὶ τὸ Β τῷ Α μηδενὶ ὑπάρχειν· εἰ γὰρ τινὶ ἐνδέχεται, καὶ τὸ Α τῷ Β τινὶ ἐνδέχοιτο ἄν. εἰ δὲ ἐξ ἀνάγκης τὸ Α παντὶ ἢ τινὶ τῷ Β ὑπάρχει, καὶ τὸ Β τινὶ τῷ Α ἀνάγκη ὑπάρχειν· εἰ γὰρ μὴ ἀνάγκη, οὐδ’ ἂν τὸ Α τινὶ τῷ Β ἐξ ἀνάγκης ὑπάρχοι. τὸ δ’ ἐν μέρει στερητικὸν οὐκ ἀντιστρέφει, διὰ τὴν αὐτὴν αἰτίαν δι’ ἣν καὶ πρότερον ἔφαμεν.

Ἐπὶ δὲ τῶν ἐνδεχομένων, ἐπειδὴ πολλαχῶς λέγεται τὸ ἐνδέχεσθαι (καὶ γὰρ τὸ ἀναγκαῖον καὶ τὸ μὴ ἀναγκαῖον καὶ τὸ δυνατὸν ἐνδέχεσθαι λέγομεν), ἐν μὲν τοῖς καταφατικοῖς ὁμοίως ἕξει κατὰ τὴν ἀντιστροφὴν ἐν ἅπασιν. εἰ γὰρ τὸ Α [25b] παντὶ ἢ τινὶ τῷ Β ἐνδέχεται, καὶ τὸ Β τινὶ τῷ Α ἐνδέχοιτο ἄν· εἰ γὰρ μηδενί, οὐδ’ ἂν τὸ Α οὐδενὶ τῷ Β· δέδεικται γὰρ τοῦτο πρότερον. ἐν δὲ τοῖς ἀποφατικοῖς οὐχ ὡσαύτως, ἀλλ’ ὅσα μὲν ἐνδέχεσθαι λέγεται τῷ ἐξ ἀνάγκης ὑπάρχειν ἢ τῷ μὴ ἐξ ἀνάγκης μὴ ὑπάρχειν, ὁμοίως, οἷον εἴ τις φαίη τὸν ἄνθρωπον ἐνδέχεσθαι μὴ εἶναι ἵππον ἢ τὸ λευκὸν μηδενὶ ἱματίῳ ὑπάρχειν (τούτων γὰρ τὸ μὲν ἐξ ἀνάγκης οὐχ ὑπάρχει, τὸ δὲ οὐκ ἀνάγκη ὑπάρχειν, καὶ ὁμοίως ἀντιστρέφει ἡ πρότασις· εἰ γὰρ ἐνδέχεται μηδενὶ ἀνθρώπῳ ἵππον, καὶ ἄνθρωπον ἐγχωρεῖ μηδενὶ ἵππῳ· καὶ εἰ τὸ λευκὸν ἐγχωρεῖ μηδενὶ ἱματίῳ, καὶ τὸ ἱμάτιον ἐγχωρεῖ μηδενὶ λευκῷ· εἰ γάρ τινι ἀνάγκη, καὶ τὸ λευκὸν ἱματίῳ τινὶ ἔσται ἐξ ἀνάγκης· τοῦτο γὰρ δέδεικται πρότερον), ὁμοίως δὲ καὶ ἐπὶ τῆς ἐν μέρει ἀποφατικῆς· ὅσα δὲ τῷ ὡς ἐπὶ τὸ πολὺ καὶ τῷ πεφυκέναι λέγεται ἐνδέχεσθαι, καθ’ ὃν τρόπον διορίζομεν τὸ ἐνδεχόμενον, οὐχ ὁμοίως ἕξει ἐν ταῖς στερητικαῖς ἀντιστροφαῖς, ἀλλ’ ἡ μὲν καθόλου στερητικὴ πρότασις οὐκ ἀντιστρέφει, ἡ δὲ ἐν μέρει ἀντιστρέφει. τοῦτο δὲ ἔσται φανερὸν ὅταν περὶ τοῦ ἐνδεχομένου λέγωμεν. νῦν δὲ τοσοῦτον ἡμῖν ἔστω πρὸς τοῖς εἰρημένοις δῆλον, ὅτι τὸ ἐνδέχεσθαι μηδενὶ ἢ τινὶ μὴ ὑπάρχειν καταφατικὸν ἔχει τὸ σχῆμα (τὸ γὰρ ἐνδέχεται τῷ ἔστιν ὁμοίως τάττεται, τὸ δὲ ἔστιν, οἷς ἂν προσκατηγορῆται, κατάφασιν ἀεὶ ποιεῖ καὶ πάντως, οἷον τὸ ἔστιν οὐκ ἀγαθόν ἢ ἔστιν οὐ λευκόν ἢ ἁπλῶς τὸ ἔστιν οὐ τοῦτο· δειχθήσεται δὲ καὶ τοῦτο διὰ τῶν ἑπομένων), κατὰ δὲ τὰς ἀντιστροφὰς ὁμοίως ἕξουσι ταῖς ἄλλαις.

Κεφάλαιο 4

Διωρισμένων δὲ τούτων λέγωμεν ἤδη διὰ τίνων καὶ πότε καὶ πῶς γίνεται πᾶς συλλογισμός· ὕστερον δὲ λεκτέον περὶ ἀποδείξεως. πρότερον δὲ περὶ συλλογισμοῦ λεκτέον ἢ περὶ ἀποδείξεως διὰ τὸ καθόλου μᾶλλον εἶναι τὸν συλλογισμόν· ἡ μὲν γὰρ ἀπόδειξις συλλογισμός τις, ὁ συλλογισμὸς δὲ οὐ πᾶς ἀπόδειξις.

Ὅταν οὖν ὅροι τρεῖς οὕτως ἔχωσι πρὸς ἀλλήλους ὥστε τὸν ἔσχατον ἐν ὅλῳ εἶναι τῷ μέσῳ καὶ τὸν μέσον ἐν ὅλῳ τῷ πρώτῳ ἢ εἶναι ἢ μὴ εἶναι, ἀνάγκη τῶν ἄκρων εἶναι συλλογισμὸν τέλειον. καλῶ δὲ μέσον μὲν ὃ καὶ αὐτὸ ἐν ἄλλῳ καὶ ἄλλο ἐν τούτῳ ἐστίν, ὃ καὶ τῇ θέσει γίνεται μέσον· ἄκρα δὲ τὸ αὐτό τε ἐν ἄλλῳ ὂν καὶ ἐν ᾧ ἄλλο ἐστίν. εἰ γὰρ τὸ Α κατὰ παντὸς τοῦ Β καὶ τὸ Β κατὰ παντὸς τοῦ Γ, ἀνάγκη τὸ Α κατὰ παντὸς τοῦ Γ κατηγορεῖσθαι· πρότερον γὰρ εἴρηται πῶς τὸ κατὰ παντὸς λέγομεν. ὁμοίως δὲ καὶ εἰ τὸ μὲν Α κατὰ μη[26a] δενὸς τοῦ Β, τὸ δὲ Β κατὰ παντὸς τοῦ Γ, ὅτι τὸ Α οὐδενὶ τῷ Γ ὑπάρξει. εἰ δὲ τὸ μὲν πρῶτον παντὶ τῷ μέσῳ ἀκολουθεῖ, τὸ δὲ μέσον μηδενὶ τῷ ἐσχάτῳ ὑπάρχει, οὐκ ἔσται συλλογισμὸς τῶν ἄκρων· οὐδὲν γὰρ ἀναγκαῖον συμβαίνει τῷ ταῦτα εἶναι· καὶ γὰρ παντὶ καὶ μηδενὶ ἐνδέχεται τὸ πρῶτον τῷ ἐσχάτῳ ὑπάρχειν, ὥστε οὔτε τὸ κατὰ μέρος οὔτε τὸ καθόλου γίνεται ἀναγκαῖον· μηδενὸς δὲ ὄντος ἀναγκαίου διὰ τούτων οὐκ ἔσται συλλογισμός. ὅροι τοῦ παντὶ ὑπάρχειν ζῷον — ἄνθρωπος — ἵππος, τοῦ μηδενὶ ζῷον — ἄνθρωπος — λίθος. οὐδ’ ὅταν μήτε τὸ πρῶτον τῷ μέσῳ μήτε τὸ μέσον τῷ ἐσχάτῳ μηδενὶ ὑπάρχῃ, οὐδ’ οὕτως ἔσται συλλογισμός. ὅροι τοῦ ὑπάρχειν ἐπιστήμη — γραμμή — ἰατρική, τοῦ μὴ ὑπάρχειν ἐπιστήμη — γραμμή — μονάς. καθόλου μὲν οὖν ὄντων τῶν ὅρων, δῆλον ἐν τούτῳ τῷ σχήματι πότε ἔσται καὶ πότε οὐκ ἔσται συλλογισμός, καὶ ὅτι ὄντος τε συλλογισμοῦ τοὺς ὅρους ἀναγκαῖον ἔχειν ὡς εἴπομεν, ἄν θ’ οὕτως ἔχωσιν, ὅτι ἔσται συλλογισμός.

Εἰ δ’ ὁ μὲν καθόλου τῶν ὅρων ὁ δ’ ἐν μέρει πρὸς τὸν ἕτερον, ὅταν μὲν τὸ καθόλου τεθῇ πρὸς τὸ μεῖζον ἄκρον ἢ κατηγορικὸν ἢ στερητικόν, τὸ δὲ ἐν μέρει πρὸς τὸ ἔλαττον κατηγορικόν, ἀνάγκη συλλογισμὸν εἶναι τέλειον, ὅταν δὲ πρὸς τὸ ἔλαττον ἢ καὶ ἄλλως πως ἔχωσιν οἱ ὅροι, ἀδύνατον. λέγω δὲ μεῖζον μὲν ἄκρον ἐν ᾧ τὸ μέσον ἐστίν, ἔλαττον δὲ τὸ ὑπὸ τὸ μέσον ὄν. ὑπαρχέτω γὰρ τὸ μὲν Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ. οὐκοῦν εἰ ἔστι παντὸς κατηγορεῖσθαι τὸ ἐν ἀρχῇ λεχθέν, ἀνάγκη τὸ Α τινὶ τῷ Γ ὑπάρχειν. καὶ εἰ τὸ μὲν Α μηδενὶ τῷ Β ὑπάρχει, τὸ δὲ Β τινὶ τῷ Γ, ἀνάγκη τὸ Α τινὶ τῷ Γ μὴ ὑπάρχειν· ὥρισται γὰρ καὶ τὸ κατὰ μηδενὸς πῶς λέγομεν· ὥστε ἔσται συλλογισμὸς τέλειος. ὁμοίως δὲ καὶ εἰ ἀδιόριστον εἴη τὸ Β Γ, κατηγορικὸν ὄν· ὁ γὰρ αὐτὸς ἔσται συλλογισμὸς ἀδιορίστου τε καὶ ἐν μέρει ληφθέντος.

Ἐὰν δὲ πρὸς τὸ ἔλαττον ἄκρον τὸ καθόλου τεθῇ ἢ κατηγορικὸν ἢ στερητικόν, οὐκ ἔσται συλλογισμός, οὔτε καταφατικοῦ οὔτε ἀποφατικοῦ τοῦ ἀδιορίστου ἢ κατὰ μέρος ὄντος, οἷον εἰ τὸ μὲν Α τινὶ τῷ Β ὑπάρχει ἢ μὴ ὑπάρχει, τὸ δὲ Β παντὶ τῷ Γ ὑπάρχει· ὅροι τοῦ ὑπάρχειν ἀγαθόν — ἕξις — φρόνησις, τοῦ μὴ ὑπάρχειν ἀγαθόν — ἕξις — ἀμαθία. πάλιν εἰ τὸ μὲν Β μηδενὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Β ἢ ὑπάρχει ἢ μὴ ὑπάρχει ἢ μὴ παντὶ ὑπάρχει, οὐδ’ οὕτως ἔσται συλλογισμός. ὅροι λευκόν — ἵππος — κύκνος, λευκόν — ἵππος — κόραξ. οἱ αὐτοὶ δὲ καὶ εἰ τὸ Α Β ἀδιόριστον. Οὐδ’ ὅταν τὸ μὲν πρὸς [26b] τῷ μείζονι ἄκρῳ καθόλου γένηται ἢ κατηγορικὸν ἢ στερητικόν, τὸ δὲ πρὸς τῷ ἐλάττονι στερητικὸν κατὰ μέρος, οὐκ ἔσται συλλογισμός [ἀδιορίστου τε καὶ ἐν μέρει ληφθέντος], οἷον εἰ τὸ μὲν Α παντὶ τῷ Β ὑπάρχει, τὸ δὲ Β τινὶ τῷ Γ μή, ἢ εἰ μὴ παντὶ ὑπάρχει· ᾧ γὰρ ἄν τινι μὴ ὑπάρχῃ τὸ μέσον, τούτῳ καὶ παντὶ καὶ οὐδενὶ ἀκολουθήσει τὸ πρῶτον. ὑποκείσθωσαν γὰρ οἱ ὅροι ζῷον — ἄνθρωπος — λευκόν· εἶτα καὶ ὧν μὴ κατηγορεῖται λευκῶν ὁ ἄνθρωπος, εἰλήφθω κύκνος καὶ χιών· οὐκοῦν τὸ ζῷον τοῦ μὲν παντὸς κατηγορεῖται, τοῦ δὲ οὐδενός, ὥστε οὐκ ἔσται συλλογισμός. πάλιν τὸ μὲν Α μηδενὶ τῷ Β ὑπαρχέτω, τὸ δὲ Β τινὶ τῷ Γ μὴ ὑπαρχέτω· καὶ οἱ ὅροι ἔστωσαν ἄψυχον — ἄνθρωπος — λευκόν· εἶτα εἰλήφθωσαν, ὧν μὴ κατηγορεῖται λευκῶν ὁ ἄνθρωπος, κύκνος καὶ χιών· τὸ γὰρ ἄψυχον τοῦ μὲν παντὸς κατηγορεῖται, τοῦ δὲ οὐδενός. ἔτι ἐπεὶ ἀδιόριστον τὸ τινὶ τῷ Γ τὸ Β μὴ ὑπάρχειν, ἀληθεύεται δέ, καὶ εἰ μηδενὶ ὑπάρχει καὶ εἰ μὴ παντί, ὅτι τινὶ οὐχ ὑπάρχει, ληφθέντων δὲ τοιούτων ὅρων ὥστε μηδενὶ ὑπάρχειν οὐ γίνεται συλλογισμός (τοῦτο γὰρ εἴρηται πρότερον), φανερὸν οὖν ὅτι τῷ οὕτως ἔχειν τοὺς ὅρους οὐκ ἔσται συλλογισμός· ἦν γὰρ ἂν καὶ ἐπὶ τούτων. ὁμοίως δὲ δειχθήσεται καὶ εἰ τὸ καθόλου τεθείη στερητικόν. Οὐδὲ ἐὰν ἄμφω τὰ διαστήματα κατὰ μέρος ἢ κατηγορικῶς ἢ στερητικῶς, ἢ τὸ μὲν κατηγορικῶς τὸ δὲ στερητικῶς λέγηται, ἢ τὸ μὲν ἀδιόριστον τὸ δὲ διωρισμένον, ἢ ἄμφω ἀδιόριστα, οὐκ ἔσται συλλογισμὸς οὐδαμῶς. ὅροι δὲ κοινοὶ πάντων ζῷον — λευκόν — ἵππος, ζῷον — λευκόν — λίθος.

Φανερὸν οὖν ἐκ τῶν εἰρημένων ὡς ἐὰν ᾖ συλλογισμὸς ἐν τούτῳ τῷ σχήματι κατὰ μέρος, ὅτι ἀνάγκη τοὺς ὅρους οὕτως ἔχειν ὡς εἴπομεν· ἄλλως γὰρ ἐχόντων οὐδαμῶς γίνεται. δῆλον δὲ καὶ ὅτι πάντες οἱ ἐν αὐτῷ συλλογισμοὶ τέλειοί εἰσι· (πάντες γὰρ ἐπιτελοῦνται διὰ τῶν ἐξ ἀρχῆς ληφθέντων), καὶ ὅτι πάντα τὰ προβλήματα δείκνυται διὰ τούτου τοῦ σχήματος· καὶ γὰρ τὸ παντὶ καὶ τὸ μηδενὶ καὶ τὸ τινὶ καὶ τὸ μή τινι ὑπάρχειν. καλῶ δὲ τὸ τοιοῦτον σχῆμα πρῶτον.

Ὅταν δὲ τὸ αὐτὸ τῷ μὲν παντὶ τῷ δὲ μηδενὶ ὑπάρχῃ, ἢ ἑκατέρῳ παντὶ ἢ μηδενί, τὸ μὲν σχῆμα τὸ τοιοῦτον καλῶ δεύτερον, μέσον δὲ ἐν αὐτῷ λέγω τὸ κατηγορούμενον ἀμφοῖν, ἄκρα δὲ καθ’ ὧν λέγεται τοῦτο, μεῖζον δὲ ἄκρον τὸ πρὸς τῷ μέσῳ κείμενον· ἔλαττον δὲ τὸ πορρωτέρω τοῦ μέσου. τίθεται δὲ τὸ μέσον ἔξω μὲν τῶν ἄκρων, πρῶτον δὲ τῇ θέσει. [27a] τέλειος μὲν οὖν οὐκ ἔσται συλλογισμὸς οὐδαμῶς ἐν τούτῳ τῷ σχήματι, δυνατὸς δ’ ἔσται καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων. καθόλου μὲν οὖν ὄντων ἔσται συλλογισμὸς ὅταν τὸ μέσον τῷ μὲν παντὶ τῷ δὲ μηδενὶ ὑπάρχῃ, ἂν πρὸς ὁποτερῳοῦν ᾖ τὸ στερητικόν· ἄλλως δ’ οὐδαμῶς. κατηγορείσθω γὰρ τὸ Μ τοῦ μὲν Ν μηδενός, τοῦ δὲ Ξ παντός. ἐπεὶ οὖν ἀντιστρέφει τὸ στερητικόν, οὐδενὶ τῷ Μ ὑπάρξει τὸ Ν· τὸ δέ γε Μ παντὶ τῷ Ξ ὑπέκειτο· ὥστε τὸ Ν οὐδενὶ τῷ Ξ· τοῦτο γὰρ δέδεικται πρότερον. πάλιν εἰ τὸ Μ τῷ μὲν Ν παντὶ τῷ δὲ Ξ μηδενί, οὐδὲ τὸ Ξ τῷ Ν οὐδενὶ ὑπάρξει (εἰ γὰρ τὸ Μ οὐδενὶ τῷ Ξ, οὐδὲ τὸ Ξ οὐδενὶ τῷ Μ· τὸ δέ γε Μ παντὶ τῷ Ν ὑπῆρχεν· τὸ ἄρα Ξ οὐδενὶ τῷ Ν ὑπάρξει· γεγένηται γὰρ πάλιν τὸ πρῶτον σχῆμα)· ἐπεὶ δὲ ἀντιστρέφει τὸ στερητικόν, οὐδὲ τὸ Ν οὐδενὶ τῷ Ξ ὑπάρξει, ὥστ’ ἔσται ὁ αὐτὸς συλλογισμός. ἔστι δὲ δεικνύναι ταῦτα καὶ εἰς τὸ ἀδύνατον ἄγοντας. ὅτι μὲν οὖν γίνεται συλλογισμὸς οὕτως ἐχόντων τῶν ὅρων, φανερόν, ἀλλ’ οὐ τέλειος· οὐ γὰρ μόνον ἐκ τῶν ἐξ ἀρχῆς ἀλλὰ καὶ ἐξ ἄλλων ἐπιτελεῖται τὸ ἀναγκαῖον. ἐὰν δὲ τὸ Μ παντὸς τοῦ Ν καὶ τοῦ Ξ κατηγορῆται, οὐκ ἔσται συλλογισμός. ὅροι τοῦ ὑπάρχειν οὐσία — ζῷον — ἄνθρωπος, τοῦ μὴ ὑπάρχειν οὐσία — ζῷον — ἀριθμός· μέσον οὐσία. οὐδ’ ὅταν μήτε τοῦ Ν μήτε τοῦ Ξ μηδενὸς κατηγορῆται τὸ Μ. ὅροι τοῦ ὑπάρχειν γραμμή — ζῷον — ἄνθρωπος, τοῦ μὴ ὑπάρχειν γραμμή — ζῷον — λίθος. φανερὸν οὖν ὅτι ἂν ᾖ συλλογισμὸς καθόλου τῶν ὅρων ὄντων, ἀνάγκη τοὺς ὅρους ἔχειν ὡς ἐν ἀρχῇ εἴπομεν· ἄλλως γὰρ ἐχόντων οὐ γίνεται τὸ ἀναγκαῖον.

Ἐὰν δὲ πρὸς τὸν ἕτερον ᾖ καθόλου τὸ μέσον, ὅταν μὲν πρὸς τὸν μείζω γένηται καθόλου ἢ κατηγορικῶς ἢ στερητικῶς, πρὸς δὲ τὸν ἐλάττω κατὰ μέρος καὶ ἀντικειμένως τῷ καθόλου (λέγω δὲ τὸ ἀντικειμένως, εἰ μὲν τὸ καθόλου στερητικόν, τὸ ἐν μέρει καταφατικόν· εἰ δὲ κατηγορικὸν τὸ καθόλου, τὸ ἐν μέρει στερητικόν), ἀνάγκη γίνεσθαι συλλογισμὸν στερητικὸν κατὰ μέρος. εἰ γὰρ τὸ Μ τῷ μὲν Ν μηδενὶ τῷ δὲ Ξ τινὶ ὑπάρχει, ἀνάγκη τὸ Ν τινὶ τῷ Ξ μὴ ὑπάρχειν. ἐπεὶ γὰρ ἀντιστρέφει τὸ στερητικόν, οὐδενὶ τῷ Μ ὑπάρξει τὸ Ν· τὸ δέ γε Μ ὑπέκειτο τινὶ τῷ Ξ ὑπάρχειν· ὥστε τὸ Ν τινὶ τῷ Ξ οὐχ ὑπάρξει· γίνεται γὰρ συλλογισμὸς διὰ τοῦ πρώτου σχήματος. πάλιν εἰ τῷ μὲν Ν παντὶ τὸ Μ, τῷ δὲ Ξ τινὶ μὴ ὑπάρχει, ἀνάγκη τὸ Ν τινὶ τῷ Ξ μὴ ὑπάρχειν· εἰ γὰρ παντὶ ὑπάρχει, κατηγορεῖται δὲ καὶ τὸ Μ παντὸς τοῦ Ν, ἀνάγκη τὸ Μ [27b] παντὶ τῷ Ξ ὑπάρχειν· ὑπέκειτο δὲ τινὶ μὴ ὑπάρχειν. καὶ εἰ τὸ Μ τῷ μὲν Ν παντὶ ὑπάρχει τῷ δὲ Ξ μὴ παντί, ἔσται συλλογισμὸς ὅτι οὐ παντὶ τῷ Ξ τὸ Ν· ἀπόδειξις δ’ ἡ αὐτή. ἐὰν δὲ τοῦ μὲν Ξ παντὸς τοῦ δὲ Ν μὴ παντὸς κατηγορῆται, οὐκ ἔσται συλλογισμός. ὅροι ζῷον — οὐσία — κόραξ, ζῷον — λευκόν — κόραξ. οὐδ’ ὅταν τοῦ μὲν Ξ μηδενός, τοῦ δὲ Ν τινός. ὅροι τοῦ ὑπάρχειν ζῷον — οὐσία — μονάς, τοῦ μὴ ὑπάρχειν ζῷον — οὐσία — ἐπιστήμη.

Ὅταν μὲν οὖν ἀντικείμενον ᾖ τὸ καθόλου τῷ κατὰ μέρος, εἴρηται πότ’ ἔσται καὶ πότ’ οὐκ ἔσται συλλογισμός· ὅταν δὲ ὁμοιοσχήμονες ὦσιν αἱ προτάσεις, οἷον ἀμφότεραι στερητικαὶ ἢ καταφατικαί, οὐδαμῶς ἔσται συλλογισμός. ἔστωσαν γὰρ πρῶτον στερητικαί, καὶ τὸ καθόλου κείσθω πρὸς τὸ μεῖζον ἄκρον, οἷον τὸ Μ τῷ μὲν Ν μηδενὶ τῷ δὲ Ξ τινὶ μὴ ὑπαρχέτω· ἐνδέχεται δὴ καὶ παντὶ καὶ μηδενὶ τῷ Ξ τὸ Ν ὑπάρχειν. ὅροι τοῦ μὲν μὴ ὑπάρχειν μέλαν — χιών — ζῷον· τοῦ δὲ παντὶ ὑπάρχειν οὐκ ἔστι λαβεῖν, εἰ τὸ Μ τῷ Ξ τινὶ μὲν ὑπάρχει τινὶ δὲ μή. εἰ γὰρ παντὶ τῷ Ξ τὸ Ν, τὸ δὲ Μ μηδενὶ τῷ Ν, τὸ Μ οὐδενὶ τῷ Ξ ὑπάρξει· ἀλλ’ ὑπέκειτο τινὶ ὑπάρχειν. οὕτω μὲν οὖν οὐκ ἐγχωρεῖ λαβεῖν ὅρους, ἐκ δὲ τοῦ ἀδιορίστου δεικτέον· ἐπεὶ γὰρ ἀληθεύεται τὸ τινὶ μὴ ὑπάρχειν τὸ Μ τῷ Ξ καὶ εἰ μηδενὶ ὑπάρχει, μηδενὶ δὲ ὑπάρχοντος οὐκ ἦν συλλογισμός, φανερὸν ὅτι οὐδὲ νῦν ἔσται. πάλιν ἔστωσαν κατηγορικαί, καὶ τὸ καθόλου κείσθω ὁμοίως, οἷον τὸ Μ τῷ μὲν Ν παντὶ τῷ δὲ Ξ τινὶ ὑπαρχέτω. ἐνδέχεται δὴ τὸ Ν τῷ Ξ καὶ παντὶ καὶ μηδενὶ ὑπάρχειν. ὅροι τοῦ μηδενὶ ὑπάρχειν λευκόν — κύκνος — λίθος τοῦ δὲ παντὶ οὐκ ἔσται λαβεῖν διὰ τὴν αὐτὴν αἰτίαν ἥνπερ πρότερον, ἀλλ’ ἐκ τοῦ ἀδιορίστου δεικτέον. εἰ δὲ τὸκαθόλου πρὸς τὸ ἔλαττον ἄκρον ἐστί, καὶ τὸ Μ τῷ μὲν Ξ μηδενὶ τῷ δὲ Ν τινὶ μὴ ὑπάρχει, ἐνδέχεται τὸ Ν τῷ Ξ καὶ παντὶ καὶ μηδενὶ ὑπάρχειν. ὅροι τοῦ ὑπάρχειν λευκόν — ζῷον — κόραξ, τοῦ μὴ ὑπάρχειν λευκόν — λίθος — κόραξ. εἰ δὲ κατηγορικαὶ αἱ προτάσεις, ὅροι τοῦ μὴ ὑπάρχειν λευκόν — ζῷον — χιών, τοῦ ὑπάρχειν λευκόν — ζῷον — κύκνος. φανερὸν οὖν, ὅταν ὁμοιοσχήμονες ὦσιν αἱ προτάσεις καὶ ἡ μὲν καθόλου ἡ δ’ ἐν μέρει, ὅτι οὐδαμῶς γίνεται συλλογισμός. ἀλλ’ οὐδ’ εἰ τινὶ ἑκατέρῳ ὑπάρχει ἢ μὴ ὑπάρχει, ἢ τῷ μὲν τῷ δὲ μή, ἢ μηδετέρῳ παντί, ἢ ἀδιορίστως. ὅροι δὲ κοινοὶ πάντων λευκόν — ζῷον — ἄνθρωπος, λευκόν — ζῷον — ἄψυχον. [28a]

Φανερὸν οὖν ἐκ τῶν εἰρημένων ὅτι ἐάν τε οὕτως ἔχωσιν οἱ ὅροι πρὸς ἀλλήλους ὡς ἐλέχθη, γίνεται συλλογισμὸς ἐξ ἀνάγκης, ἄν τ' ᾖ συλλογισμός, ἀνάγκη τοὺς ὅρους οὕτως ἔχειν. δῆλον δὲ καὶ ὅτι πάντες ἀτελεῖς εἰσὶν οἱ ἐν τούτῳ τῷ σχήματι συλλογισμοί (πάντες γὰρ ἐπιτελοῦνται προσλαμβανομένων τινῶν, ἃ ἢ ἐνυπάρχει τοῖς ὅροις ἐξ ἀνάγκης ἢ τίθενται ὡς ὑποθέσεις, οἷον ὅταν διὰ τοῦ ἀδυνάτου δεικνύωμεν), καὶ ὅτι οὐ γίνεται καταφατικὸς συλλογισμὸς διὰ τούτου τοῦ σχήματος, ἀλλὰ πάντες στερητικοί, καὶ οἱ καθόλου καὶ οἱ κατὰ μέρος.

Ἐὰν δὲ τῷ αὐτῷ τὸ μὲν παντὶ τὸ δὲ μηδενὶ ὑπάρχῃ, ἢ ἄμφω παντὶ ἢ μηδενί, τὸ μὲν σχῆμα τὸ τοιοῦτον καλῶ τρίτον, μέσον δ' ἐν αὐτῷ λέγω καθ' οὗ ἄμφω τὰ κατηγορούμενα, ἄκρα δὲ τὰ κατηγορούμενα, μεῖζον δ' ἄκρον τὸ πορρώτερον τοῦ μέσου, ἔλαττον δὲ τὸ ἐγγύτερον. τίθεται δὲ τὸ μέσον ἔξω μὲν τῶν ἄκρων, ἔσχατον δὲ τῇ θέσει. τέλειος μὲν οὖν οὐ γίνεται συλλογισμὸς οὐδ' ἐν τούτῳ τῷ σχήματι, δυνατὸς δ' ἔσται καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων πρὸς τὸ μέσον.

Καθόλου μὲν οὖν ὄντων, ὅταν καὶ τὸ Π καὶ τὸ Ρ παντὶ τῷ Σ ὑπάρχῃ, ὅτι τινὶ τῷ Ρ τὸ Π ὑπάρξει ἐξ ἀνάγκης· ἐπεὶ γὰρ ἀντιστρέφει τὸ κατηγορικόν, ὑπάρξει τὸ Σ τινὶ τῷ Ρ, ὥστ' ἐπεὶ τῷ μὲν Σ παντὶ τὸ Π, τῷ δὲ Ρ τινὶ τὸ Σ, ἀνάγκη τὸ Π τινὶ τῷ Ρ ὑπάρχειν· γίνεται γὰρ συλλογισμὸς διὰ τοῦ πρώτου σχήματος. ἔστι δὲ καὶ διὰ τοῦ ἀδυνάτου καὶ τῷ ἐκθέσθαι ποιεῖν τὴν ἀπόδειξιν· εἰ γὰρ ἄμφω παντὶ τῷ Σ ὑπάρχει, ἂν ληφθῇ τι τῶν Σ οἷον τὸ Ν, τούτῳ καὶ τὸ Π καὶ τὸ Ρ ὑπάρξει, ὥστε τινὶ τῷ Ρ τὸ Π ὑπάρξει. καὶ ἂν τὸ μὲν Ρ παντὶ τῷ Σ, τὸ δὲ Π μηδενὶ ὑπάρχῃ, ἔσται συλλογισμὸς ὅτι τὸ Π τινὶ τῷ Ρ οὐχ ὑπάρξει ἐξ ἀνάγκης· ὁ γὰρ αὐτὸς τρόπος τῆς ἀποδείξεως ἀντιστραφείσης τῆς Ρ Σ προτάσεως. δειχθείη δ' ἂν καὶ διὰ τοῦ ἀδυνάτου, καθάπερ ἐπὶ τῶν πρότερον. ἐὰν δὲ τὸ μὲν Ρ μηδενὶ τὸ δὲ Π παντὶ ὑπάρχῃ τῷ Σ, οὐκ ἔσται συλλογισμός. ὅροι τοῦ ὑπάρχειν ζῷον — ἵππος — ἄνθρωπος, τοῦ μὴ ὑπάρχειν ζῷον — ἄψυχον — ἄνθρωπος. οὐδ' ὅταν ἄμφω κατὰ μηδενὸς τοῦ Σ λέγηται, οὐκ ἔσται συλλογισμός. ὅροι τοῦ ὑπάρχειν ζῷον — ἵππος — ἄψυχον, τοῦ μὴ ὑπάρχειν ἄνθρωπος — ἵππος — ἄψυχον· μέσον ἄψυχον. φανερὸν οὖν καὶ ἐν τούτῳ τῷ σχήματι πότ' ἔσται καὶ πότ' οὐκ ἔσται συλλογισμὸς καθόλου τῶν ὅρων ὄντων. ὅταν μὲν γὰρ ἀμφότεροι οἱ ὅροι ὦσι κατηγορικοί, ἔσται συλλογισμὸς ὅτι τινὶ ὑπάρχει τὸ ἄκρον τῷ ἄκρῳ, ὅταν δὲ στερητικοί, οὐκ [28b] ἔσται. ὅταν δ' ὁ μὲν ᾖ στερητικὸς ὁ δὲ καταφατικός, ἐὰν μὲν ὁ μείζων γένηται στερητικὸς ἅτερος δὲ καταφατικός, ἔσται συλλογισμὸς ὅτι τινὶ οὐχ ὑπάρχει τὸ ἄκρον τῷ ἄκρῳ, ἐὰν δ' ἀνάπαλιν, οὐκ ἔσται.

Ἐὰν δ' ὁ μὲν ᾖ καθόλου πρὸς τὸ μέσον ὁ δ' ἐν μέρει, κατηγορικῶν μὲν ὄντων ἀμφοῖν ἀνάγκη γίνεσθαι συλλογισμόν, ἂν ὁποτεροσοῦν ᾖ καθόλου τῶν ὅρων. εἰ γὰρ τὸ μὲν Ρ παντὶ τῷ Σ τὸ δὲ Π τινί, ἀνάγκη τὸ Π τινὶ τῷ Ρ ὑπάρχειν. ἐπεὶ γὰρ ἀντιστρέφει τὸ καταφατικόν, ὑπάρξει τὸ Στινὶ τῷ Π, ὥστ' ἐπεὶ τὸ μὲν Ρ παντὶ τῷ Σ, τὸ δὲ Σ τινὶ τῷ Π, καὶ τὸ Ρ τινὶ τῷ Π ὑπάρξει· ὥστε τὸ Π τινὶ τῷ Ρ. πάλιν εἰ τὸ μὲν Ρ τινὶ τῷ Σ τὸ δὲ Π παντὶ ὑπάρχει, ἀνάγκη τὸ Π τινὶ τῷ Ρ ὑπάρχειν· ὁ γὰρ αὐτὸς τρόπος τῆς ἀποδείξεως. ἔστι δ’ ἀποδεῖξαι καὶ διὰ τοῦ ἀδυνάτου καὶ τῇ ἐκθέσει, καθάπερ ἐπὶ τῶν πρότερον.

Ἐὰν δ’ ὁ μὲν ᾖ κατηγορικὸς ὁ δὲ στερητικός, καθόλου δὲ ὁ κατηγορικός, ὅταν μὲν ὁ ἐλάττων ᾖ κατηγορικός, ἔσται συλλογισμός. εἰ γὰρ τὸ Ρ παντὶ τῷ Σ, τὸ δὲ Π τινὶ μὴ ὑπάρχει, ἀνάγκη τὸ Π τινὶ τῷ Ρ μὴ ὑπάρχειν. εἰ γὰρ παντί, καὶ τὸ Ρ παντὶ τῷ Σ, καὶ τὸ Π παντὶ τῷ Σ ὑπάρξει· ἀλλ’ οὐχ ὑπῆρχεν. δείκνυται δὲ καὶ ἄνευ τῆς ἀπαγωγῆς, ἐὰν ληφθῇ τι τῶν Σ ᾧ τὸ Π μὴ ὑπάρχει. ὅταν δ’ ὁ μείζων ᾖ κατηγορικός, οὐκ ἔσται συλλογισμός, οἷον εἰ τὸ μὲν Π παντὶ τῷ Σ, τὸ δὲ Ρ τινὶ τῷ Σ μὴ ὑπάρχει. ὅροι τοῦ παντὶ ὑπάρχειν ἔμψυχον — ἄνθρωπος — ζῷον. τοῦ δὲ μηδενὶ οὐκ ἔστι λαβεῖν ὅρους, εἰ τινὶ μὲν ὑπάρχει τῷ Σ τὸ Ρ, τινὶ δὲ μή· εἰ γὰρ παντὶ τὸ Π τῷ Σ ὑπάρχει, τὸ δὲ Ρ τινὶ τῷ Σ, καὶ τὸ Π τινὶ τῷ Ρ ὑπάρξει· ὑπέκειτο δὲ μηδενὶ ὑπάρχειν. ἀλλ’ ὥσπερ ἐν τοῖς πρότερον ληπτέον· ἀδιορίστου γὰρ ὄντος τοῦ τινὶ μὴ ὑπάρχειν καὶ τὸ μηδενὶ ὑπάρχον ἀληθὲς εἰπεῖν τινὶ μὴ ὑπάρχειν· μηδενὶ δὲ ὑπάρχοντος οὐκ ἦν συλλογισμός. φανερὸν οὖν ὅτι οὐκ ἔσται συλλογισμός. ἐὰν δ’ ὁ στερητικὸς ᾖ καθόλου τῶν ὅρων, ὅταν μὲν ὁ μείζων ᾖ στερητικὸς ὁ δὲ ἐλάττων κατηγορικός, ἔσται συλλογισμός. εἰ γὰρ τὸ Π μηδενὶ τῷ Σ, τὸ δὲ Ρ τινὶ ὑπάρχει τῷ Σ, τὸ Π τινὶ τῷ Ρ οὐχ ὑπάρξει· πάλιν γὰρ ἔσται τὸ πρῶτον σχῆμα τῆς Ρ Σ προτάσεως ἀντιστραφείσης. ὅταν δὲ ὁ ἐλάττων ᾖ στερητικός, οὐκ ἔσται συλλογισμός. ὅροι τοῦ ὑπάρχειν ζῷον — ἄνθρωπος — ἄγριον, τοῦ μὴ ὑπάρχειν ζῷον — ἐπιστήμη — ἄγριον· μέσον ἐν ἀμφοῖν τὸ ἄγριον. οὐδ’ ὅταν ἀμφότεροι στερητικοὶ τεθῶσιν, ᾖ δ’ ὁ μὲν καθόλου ὁ δ’ ἐν μέρει. ὅροι [29a] ὅταν ὁ ἐλάττων ᾖ καθόλου πρὸς τὸ μέσον, ζῷον — ἐπιστήμη — ἄγριον, ζῷον — ἄνθρωπος — ἄγριον· ὅταν δ’ ὁ μείζων, τοῦ μὲν μὴ ὑπάρχειν κόραξ — χιών — λευκόν. τοῦ δ’ ὑπάρχειν οὐκ ἔστι λαβεῖν, εἰ τὸ Ρ τινὶ μὲν ὑπάρχει τῷ Σ, τινὶ δὲ μὴ ὑπάρχει. εἰ γὰρ τὸ Π παντὶ τῷ Ρ, τὸ δὲ Ρ τινὶ τῷ Σ, καὶ τὸ Π τινὶ τῷ Σ· ὑπέκειτο δὲ μηδενί. ἀλλ’ ἐκ τοῦ ἀδιορίστου δεικτέον.

Οὐδ’ ἂν ἑκάτερος τινὶ τῷ μέσῳ ὑπάρχῃ ἢ μὴ ὑπάρχῃ, ἢ ὁ μὲν ὑπάρχῃ ὁ δὲ μὴ ὑπάρχῃ, ἢ ὁ μὲν τινὶ ὁ δὲ μὴ παντί, ἢ ἀδιορίστως, οὐκ ἔσται συλλογισμὸς οὐδαμῶς. ὅροι δὲ κοινοὶ πάντων ζῷον — ἄνθρωπος — λευκόν, ζῷον — ἄψυχον — λευκόν.

Φανερὸν οὖν καὶ ἐν τούτῳ τῷ σχήματι πότ’ ἔσται καὶ πότ’ οὐκ ἔσται συλλογισμός, καὶ ὅτι ἐχόντων τε τῶν ὅρων ὡς ἐλέχθη γίνεται συλλογισμὸς ἐξ ἀνάγκης, ἄν τ’ ᾖ συλλογισμός, ἀνάγκη τοὺς ὅρους οὕτως ἔχειν. φανερὸν δὲ καὶ ὅτι πάντες ἀτελεῖς εἰσὶν οἱ ἐν τούτῳ τῷ σχήματι συλλογισμοί (πάντες γὰρ τελειοῦνται προσλαμβανομένων τινῶν) καὶ ὅτι συλλογίσασθαι τὸ καθόλου διὰ τούτου τοῦ σχήματος οὐκ ἔσται, οὔτε στερητικὸν οὔτε καταφατικόν.

Κεφάλαιο 7

Δῆλον δὲ καὶ ὅτι ἐν ἅπασι τοῖς σχήμασιν, ὅταν μὴ γίνηται συλλογισμός, κατηγορικῶν μὲν ἢ στερητικῶν ἀμφοτέρων ὄντων τῶν ὅρων οὐδὲν ὅλως γίνεται ἀναγκαῖον, κατηγορικοῦ δὲ καὶ στερητικοῦ, καθόλου ληφθέντος τοῦ στερητικοῦ ἀεὶ γίνεται συλλογισμὸς τοῦ ἐλάττονος ἄκρου πρὸς τὸ μεῖζον, οἷον εἰ τὸ μὲν Α παντὶ τῷ Β ἢ τινί, τὸ δὲ Β μηδενὶ τῷ Γ· ἀντιστρεφομένων γὰρ τῶν προτάσεων ἀνάγκη τὸ Γ τινὶ τῷ Α μὴ ὑπάρχειν. ὁμοίως δὲ κἀπὶ τῶν ἑτέρων σχημάτων· ἀεὶ γὰρ γίνεται διὰ τῆς ἀντιστροφῆς συλλογισμός. δῆλον δὲ καὶ ὅτι τὸ ἀδιόριστον ἀντὶ τοῦ κατηγορικοῦ τοῦ ἐν μέρει τιθέμενον τὸν αὐτὸν ποιήσει συλλογισμὸν ἐν ἅπασι τοῖς σχήμασιν.

Φανερὸν δὲ καὶ ὅτι πάντες οἱ ἀτελεῖς συλλογισμοὶ τελειοῦνται διὰ τοῦ πρώτου σχήματος. ἢ γὰρ δεικτικῶς ἢ διὰ τοῦ ἀδυνάτου περαίνονται πάντες· ἀμφοτέρως δὲ γίνεται τὸ πρῶτον σχῆμα, δεικτικῶς μὲν τελειουμένων, ὅτι διὰ τῆς ἀντιστροφῆς ἐπεραίνοντο πάντες, ἡ δ’ ἀντιστροφὴ τὸ πρῶτον ἐποίει σχῆμα, διὰ δὲ τοῦ ἀδυνάτου δεικνυμένων, ὅτι τεθέντος τοῦ ψεύδους ὁ συλλογισμὸς γίνεται διὰ τοῦ πρώτου σχήματος, οἷον ἐν τῷ τελευταίῳ σχήματι, εἰ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχει, ὅτι τὸ Α τινὶ τῷ Β ὑπάρχει· εἰ γὰρ μηδενί, τὸ δὲ Β παντὶ τῷ Γ, οὐδενὶ τῷ Γ τὸ Α· ἀλλ’ ἦν παντί. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. [29b]

Ἔστι δὲ καὶ ἀναγαγεῖν πάντας τοὺς συλλογισμοὺς εἰς τοὺς ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμούς. οἱ μὲν γὰρ ἐν τῷ δευτέρῳ φανερὸν ὅτι δι’ ἐκείνων τελειοῦνται, πλὴν οὐχ ὁμοίως πάντες, ἀλλ’ οἱ μὲν καθόλου τοῦ στερητικοῦ ἀντιστραφέντος, τῶν δ’ ἐν μέρει ἑκάτερος διὰ τῆς εἰς τὸ ἀδύνατον ἀπαγωγῆς. οἱ δ’ ἐν τῷ πρώτῳ, οἱ κατὰ μέρος, ἐπιτελοῦνται μὲν καὶ δι’ αὑτῶν, ἔστι δὲ καὶ διὰ τοῦ δευτέρου σχήματος δεικνύναι εἰς ἀδύνατον ἀπάγοντας, οἷον εἰ τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, ὅτι τὸ Α τινὶ τῷ Γ· εἰ γὰρ μηδενί, τῷ δὲ Β παντί, οὐδενὶ τῷ Γ τὸ Β ὑπάρξει· τοῦτο γὰρ ἴσμεν διὰ τοῦ δευτέρου σχήματος. ὁμοίως δὲ καὶ ἐπὶ τοῦ στερητικοῦ ἔσται ἡ ἀπόδειξις. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχει, τὸ Α τινὶ τῷ Γ οὐχ ὑπάρξει· εἰ γὰρ παντί, τῷ δὲ Β μηδενὶ ὑπάρχει, οὐδενὶ τῷ Γ τὸ Β ὑπάρξει· τοῦτο δ’ ἦν τὸ μέσον σχῆμα. ὥστ’ ἐπεὶ οἱ μὲν ἐν τῷ μέσῳ σχήματι συλλογισμοὶ πάντες ἀνάγονται εἰς τοὺς ἐν τῷ πρώτῳ καθόλου συλλογισμούς, οἱ δὲ κατὰ μέρος ἐν τῷ πρώτῳ εἰς τοὺς ἐν τῷ μέσῳ, φανερὸν ὅτι καὶ οἱ κατὰ μέρος ἀναχθήσονται εἰς τοὺς ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμούς. οἱ δ’ἐν τῷ τρίτῳ καθόλου μὲν ὄντων τῶν ὅρων εὐθὺς ἐπιτελοῦνται δι’ ἐκείνων τῶν συλλογισμῶν, ὅταν δ’ ἐν μέρει ληφθῶσι, διὰ τῶν ἐν μέρει συλλογισμῶν τῶν ἐν τῷ πρώτῳ σχήματι· οὗτοι δὲ ἀνήχθησαν εἰς ἐκείνους, ὥστε καὶ οἱ ἐν τῷ τρίτῳ σχήματι, οἱ κατὰ μέρος. φανερὸν οὖν ὅτι πάντες ἀναχθήσονται εἰς τοὺς ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμούς.

Οἱ μὲν οὖν τῶν συλλογισμῶν ὑπάρχειν ἢ μὴ ὑπάρχειν δεικνύντες εἴρηται πῶς ἔχουσι, καὶ καθ’ ἑαυτοὺς οἱ ἐκ τοῦ αὐτοῦ σχήματος καὶ πρὸς ἀλλήλους οἱ ἐκ τῶν ἑτέρων.

Κεφάλαιο 8

Ἐπεὶ δ’ ἕτερόν ἐστιν ὑπάρχειν τε καὶ ἐξ ἀνάγκης ὑπάρχειν καὶ ἐνδέχεσθαι ὑπάρχειν (πολλὰ γὰρ ὑπάρχει μέν, οὐ μέντοι ἐξ ἀνάγκης· τὰ δ’ οὔτ’ ἐξ ἀνάγκης οὔθ’ ὑπάρχει ὅλως, ἐνδέχεται δ’ ὑπάρχειν), δῆλον ὅτι καὶ συλλογισμὸς ἑκάστου τούτων ἕτερος ἔσται, καὶ οὐχ ὁμοίως ἐχόντων τῶν ὅρων, ἀλλ’ ὁ μὲν ἐξ ἀναγκαίων, ὁ δ’ ἐξ ὑπαρχόντων, ὁ δ’ ἐξ ἐνδεχομένων.

Ἐπὶ μὲν οὖν τῶν ἀναγκαίων σχεδὸν ὁμοίως ἔχει καὶ ἐπὶ τῶν ὑπαρχόντων· ὡσαύτως γὰρ τιθεμένων τῶν ὅρων ἔν τε τῷ ὑπάρχειν καὶ τῷ ἐξ ἀνάγκης ὑπάρχειν ἢ μὴ ὑπάρχειν ἔσται τε καὶ οὐκ ἔσται συλλογισμός, πλὴν διοίσει τῷ [30a] προσκεῖσθαι τοῖς ὅροις τὸ ἐξ ἀνάγκης ὑπάρχειν ἢ μὴ ὑπάρχειν. τό τε γὰρ στερητικὸν ὡσαύτως ἀντιστρέφει, καὶ τὸ ἐν ὅλῳ εἶναι καὶ τὸ κατὰ παντὸς ὁμοίως ἀποδώσομεν. ἐν μὲν οὖν τοῖς ἄλλοις τὸν αὐτὸν τρόπον δειχθήσεται διὰ τῆς ἀντιστροφῆς τὸ συμπέρασμα ἀναγκαῖον, ὥσπερ ἐπὶ τοῦ ὑπάρχειν· ἐν δὲ τῷ μέσῳ σχήματι, ὅταν ᾖ τὸ καθόλου καταφατικὸν τὸ δ’ ἐν μέρει στερητικόν, καὶ πάλιν ἐν τῷ τρίτῳ, ὅταν τὸ μὲν καθόλου κατηγορικὸν τὸ δ’ ἐν μέρει στερητικόν, οὐχ ὁμοίως ἔσται ἡ ἀπόδειξις, ἀλλ’ ἀνάγκη ἐκθεμένους ᾧ τινὶ ἑκάτερον μὴ ὑπάρχει, κατὰ τούτου ποιεῖν τὸν συλλογισμόν· ἔσται γὰρ ἀναγκαῖος ἐπὶ τούτων· εἰ δὲ κατὰ τοῦ ἐκτεθέντος ἐστὶν ἀναγκαῖος, καὶ κατ’ ἐκείνου τινός· τὸ γὰρ ἐκτεθὲν ὅπερ ἐκεῖνό τί ἐστιν. γίνεται δὲ τῶν συλλογισμῶν ἑκάτερος ἐν τῷ οἰκείῳ σχήματι.

Κεφάλαιο 9

Συμβαίνει δέ ποτε καὶ τῆς ἑτέρας προτάσεως ἀναγκαίας οὔσης ἀναγκαῖον γίνεσθαι τὸν συλλογισμόν, πλὴν οὐχ ὁποτέρας ἔτυχεν, ἀλλὰ τῆς πρὸς τὸ μεῖζον ἄκρον, οἷον εἰ τὸ μὲν Α τῷ Β ἐξ ἀνάγκης εἴληπται ὑπάρχον ἢ μὴ ὑπάρχον, τὸ δὲ Β τῷ Γ ὑπάρχον μόνον· οὕτως γὰρ εἰλημμένων τῶν προτάσεων ἐξ ἀνάγκης τὸ Α τῷ Γ ὑπάρξει ἢ οὐχ ὑπάρξει. ἐπεὶ γὰρ παντὶ τῷ Β ἐξ ἀνάγκης ὑπάρχει ἢ οὐχ ὑπάρχει τὸ Α, τὸ δὲ Γ τι τῶν Β ἐστί, φανερὸν ὅτι καὶ τῷ Γ ἐξ ἀνάγκης ἔσται θάτερον τούτων. εἰ δὲ τὸ μὲν Α Β μὴ ἔστιν ἀναγκαῖον, τὸ δὲ Β Γ ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. εἰ γὰρ ἔστι, συμβήσεται τὸ Α τινὶ τῷ Β ὑπάρχειν ἐξ ἀνάγκης διά τε τοῦ πρώτου καὶ διὰ τοῦ τρίτου σχήματος. τοῦτο δὲ ψεῦδος· ἐνδέχεται γὰρ τοιοῦτον εἶναι τὸ Β ᾧ ἐγχωρεῖ τὸ Α μηδενὶ ὑπάρχειν. ἔτι καὶ ἐκ τῶν ὅρων φανερὸν ὅτι οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον, οἷον εἰ τὸ μὲν Α εἴη κίνησις, τὸ δὲ Β ζῷον, ἐφ' ᾧ δὲ τὸ Γ ἄνθρωπος· ζῷον μὲν γὰρ ὁ ἄνθρωπος ἐξ ἀνάγκης ἐστί, κινεῖται δὲ τὸ ζῷον οὐκ ἐξ ἀνάγκης, οὐδ' ὁ ἄνθρωπος. ὁμοίως δὲ καὶ εἰ στερητικὸν εἴη τὸ Α Β· ἡ γὰρ αὐτὴ ἀπόδειξις. ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν, εἰ μὲν τὸ καθόλου ἐστὶν ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον, εἰ δὲ τὸ κατὰ μέρος, οὐκ ἀναγκαῖον, οὔτε στερητικῆς οὔτε κατηγορικῆς οὔσης τῆς καθόλου προτάσεως. ἔστω δὴ πρῶτον τὸ καθόλου ἀναγκαῖον, καὶ τὸ μὲν Α παντὶ τῷ Β ὑπαρχέτω ἐξ ἀνάγκης, τὸ δὲ Β τινὶ τῷ Γ ὑπαρχέτω μόνον· ἀνάγκη δὴ τὸ Α τινὶ τῷ Γ ὑπάρχειν ἐξ ἀνάγκης· τὸ γὰρ Γ ὑπὸ τὸ Β ἐστί, τῷ δὲ Β παντὶ {{χ|40)[30b] ὑπῆρχεν ἐξ ἀνάγκης, ὁμοίως δὲ καὶ εἰ στερητικὸς εἴη ὁ συλλογισμός· ἡ γὰρ αὐτὴ ἔσται ἀπόδειξις. εἰ δὲ τὸ κατὰ μέρος ἐστὶν ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον (οὐδὲν γὰρ ἀδύνατον συμπίπτει), καθάπερ οὐδ' ἐν τοῖς καθόλου συλλογισμοῖς. ὁμοίως δὲ κἀπὶ τῶν στερητικῶν. ὅροι κίνησις — ζῷον — λευκόν.

Κεφάλαιο 10

Ἐπὶ δὲ τοῦ δευτέρου σχήματος, εἰ μὲν ἡ στερητικὴ πρότασίς ἐστιν ἀναγκαία, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον, εἰ δ’ ἡ κατηγορική, οὐκ ἀναγκαῖον. ἔστω γὰρ πρῶτον ἡ στερητικὴ ἀναγκαία, καὶ τὸ Α τῷ μὲν Β μηδενὶ ἐνδεχέσθω, τῷ δὲ Γ ὑπαρχέτω μόνον. ἐπεὶ οὖν ἀντιστρέφει τὸ στερητικόν, οὐδὲ τὸ Β τῷ Α οὐδενὶ ἐνδέχεται· τὸ δὲ Α παντὶ τῷ Γ ὑπάρχει, ὥστ’ οὐδενὶ τῷ Γ τὸ Β ἐνδέχεται· τὸ γὰρ Γ ὑπὸ τὸ Α ἐστίν. ὡσαύτως δὲ καὶ εἰ πρὸς τῷ Γ τεθείη τὸ στερητικόν· εἰ γὰρ τὸ Α μηδενὶ τῷ Γ ἐνδέχεται, οὐδὲ τὸ Γ οὐδενὶ τῷ Α ἐγχωρεῖ· τὸ δὲ Α παντὶ τῷ Β ὑπάρχει, ὥστ’ οὐδενὶ τῷ Β τὸ Γ ἐνδέχεται· γίνεται γὰρ τὸ πρῶτον σχῆμα πάλιν. οὐκ ἄρα οὐδὲ τὸ Β τῷ Γ· ἀντιστρέφει γὰρ ὁμοίως.

Εἰ δὲ ἡ κατηγορικὴ πρότασίς ἐστιν ἀναγκαία, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β ἐξ ἀνάγκης, τῷ δὲ Γ μηδενὶ ὑπαρχέτω μόνον. ἀντιστραφέντος οὖν τοῦ στερητικοῦ τὸ πρῶτον γίνεται σχῆμα· δέδεικται δ’ ἐν τῷ πρώτῳ ὅτι μὴ ἀναγκαίας οὔσης τῆς πρὸς τὸ μεῖζον στερητικῆς οὐδὲ τὸ συμπέρασμα ἔσται ἀναγκαῖον, ὥστ’ οὐδ’ ἐπὶ τούτων ἔσται ἐξ ἀνάγκης. ἔτι δ’ εἰ τὸ συμπέρασμά ἐστιν ἀναγκαῖον, συμβαίνει τὸ Γ τινὶ τῷ Α μὴ ὑπάρχειν ἐξ ἀνάγκης. εἰ γὰρ τὸ Β τῷ Γ μηδενὶ ὑπάρχει ἐξ ἀνάγκης, οὐδὲ τὸ Γ τῷ Β οὐδενὶ ὑπάρξει ἐξ ἀνάγκης. τὸ δέ γε Β τινὶ τῷ Α ἀνάγκη ὑπάρχειν, εἴπερ καὶ τὸ Α παντὶ τῷ Β ἐξ ἀνάγκης ὑπῆρχεν. ὥστε τὸ Γ ἀνάγκη τινὶ τῷ Α μὴ ὑπάρχειν. ἀλλ’ οὐδὲν κωλύει τὸ Α τοιοῦτον ληφθῆναι ᾧ παντὶ τὸ Γ ἐνδέχεται ὑπάρχειν. ἔτι κἂν ὅρους ἐκθέμενον εἴη δεῖξαι ὅτι τὸ συμπέρασμα οὐκ ἔστιν ἀναγκαῖον ἁπλῶς, ἀλλὰ τούτων ὄντων ἀναγκαῖον. οἷον ἔστω τὸ Α ζῷον, τὸ δὲ Β ἄνθρωπος, τὸ δὲ Γ λευκόν, καὶ αἱ προτάσεις ὁμοίως εἰλήφθωσαν· ἐνδέχεται γὰρ τὸ ζῷον μηδενὶ λευκῷ ὑπάρχειν. οὐχ ὑπάρξει δὴ οὐδ’ ὁ ἄνθρωπος οὐδενὶ λευκῷ, ἀλλ’ οὐκ ἐξ ἀνάγκης· ἐνδέχεται γὰρ ἄνθρωπον γενέσθαι λευκόν, οὐ μέντοι ἕως ἂν ζῷον μηδενὶ λευκῷ ὑπάρχῃ. ὥστε τούτων μὲν ὄντων ἀναγκαῖον ἔσται τὸ συμπέρασμα, ἁπλῶς δ’ οὐκ ἀναγκαῖον. [31a]

Ὁμοίως δ’ ἕξει καὶ ἐπὶ τῶν ἐν μέρει συλλογισμῶν. ὅταν μὲν γὰρ ἡ στερητικὴ πρότασις καθόλου τ’ ᾖ καὶ ἀναγκαία, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον· ὅταν δὲ ἡ κατηγορικὴ καθόλου, ἡ δὲ στερητικὴ κατὰ μέρος, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ἔστω δὴ πρῶτον ἡ στερητικὴ καθόλου τε καὶ ἀναγκαία, καὶ τὸ Α τῷ μὲν Β μηδενὶ ἐνδεχέσθω ὑπάρχειν, τῷ δὲ Γ τινὶ ὑπαρχέτω. ἐπεὶ οὖν ἀντιστρέφει τὸ στερητικόν, οὐδὲ τὸ Β τῷ Α οὐδενὶ ἐνδέχοιτ’ ἂν ὑπάρχειν· τὸ δέ γε Α τινὶ τῷ Γ ὑπάρχει, ὥστ’ ἐξ ἀνάγκης τινὶ τῷ Γ οὐχ ὑπάρξει τὸ Β. πάλιν ἔστω ἡ κατηγορικὴ καθόλου τε καὶ ἀναγκαία, καὶ κείσθω πρὸς τῷ Β τὸ κατηγορικόν. εἰ δὴ τὸ Α παντὶ τῷ Β ἐξ ἀνάγκης ὑπάρχει, τῷ δὲ Γ τινὶ μὴ ὑπάρχει, ὅτι μὲν οὐχ ὑπάρξει τὸ Β τινὶ τῷ Γ, φανερόν, ἀλλ’ οὐκ ἐξ ἀνάγκης· οἱ γὰρ αὐτοὶ ὅροι ἔσονται πρὸς τὴν ἀπόδειξιν οἵπερ ἐπὶ τῶν καθόλου συλλογισμῶν. ἀλλ’ οὐδ’ εἰ τὸ στερητικὸν ἀναγκαῖόν ἐστιν ἐν μέρει ληφθέν, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον· διὰ γὰρ τῶν αὐτῶν ὅρων ἡ ἀπόδειξις.

Κεφάλαιο 11

Ἐν δὲ τῷ τελευταίῳ σχήματι καθόλου μὲν ὄντων τῶν ὅρων πρὸς τὸ μέσον καὶ κατηγορικῶν ἀμφοτέρων τῶν προτάσεων, ἐὰν ὁποτερονοῦν ᾖ ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον. ἐὰν δὲ τὸ μὲν ᾖ στερητικὸν τὸ δὲ κατηγορικόν, ὅταν μὲν τὸ στερητικὸν ἀναγκαῖον ᾖ, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον, ὅταν δὲ τὸ κατηγορικόν, οὐκ ἔσται ἀναγκαῖον. ἔστωσαν γὰρ ἀμφότεραι κατηγορικαὶ πρῶτον αἱ προτάσεις, καὶ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπαρχέτω, ἀναγκαῖον δ’ ἔστω τὸ Α Γ. ἐπεὶ οὖν τὸ Β παντὶ τῷ Γ ὑπάρχει, καὶ τὸ Γ τινὶ τῷ Β ὑπάρξει διὰ τὸ ἀντιστρέφειν τὸ καθόλου τῷ κατὰ μέρος, ὥστ’ εἰ παντὶ τῷ Γ τὸ Α ἐξ ἀνάγκης ὑπάρχει καὶ τὸ Γ τῷ Β τινί, καὶ τῷ Β τινὶ ἀναγκαῖον ὑπάρχειν τὸ Α· τὸ γὰρ Β ὑπὸ τὸ Γ ἐστίν. γίγνεται οὖν τὸ πρῶτον σχῆμα. ὁμοίως δὲ δειχθήσεται καὶ εἰ τὸ Β Γ ἐστὶν ἀναγκαῖον· ἀντιστρέφει γὰρ τὸ Γ τῷ Α τινί, ὥστ’ εἰ παντὶ τῷ Γ τὸ Β ἐξ ἀνάγκης ὑπάρχει, καὶ τῷ Α τινὶ ὑπάρξει ἐξ ἀνάγκης.

Πάλιν ἔστω τὸ μὲν Α Γ στερητικόν, τὸ δὲ Β Γ καταφατικόν, ἀναγκαῖον δὲ τὸ στερητικόν. ἐπεὶ οὖν ἀντιστρέφει τινὶ τῷ Β τὸ Γ, τὸ δὲ Α οὐδενὶ τῷ Γ ἐξ ἀνάγκης, οὐδὲ τῷ Β τινὶ ὑπάρξει ἐξ ἀνάγκης τὸ Α· τὸ γὰρ Β ὑπὸ τὸ Γ ἐστίν. εἰ δὲ τὸ κατηγορικὸν ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ἔστω γὰρ τὸ Β Γ κατηγορικὸν καὶ ἀναγκαῖον, τὸ δὲ Α Γ στερητικὸν καὶ μὴ ἀναγκαῖον. ἐπεὶ οὖν ἀντιστρέφει τὸ καταφατικόν, ὑπάρξει καὶ τὸ Γ τινὶ τῷ Β ἐξ ἀνάγκης, ὥστ’ εἰ τὸ μὲν Α μηδενὶ τῷ Γ τὸ [31b] δὲ Γ τινὶ τῷ Β, τὸ Α τινὶ τῷ Β οὐχ ὑπάρξει· ἀλλ’ οὐκ ἐξ ἀνάγκης· δέδεικται γὰρ ἐν τῷ πρώτῳ σχήματι ὅτι τῆς στερητικῆς προτάσεως μὴ ἀναγκαίας οὔσης οὐδὲ τὸ συμπέρασμα ἔσται ἀναγκαῖον. ἔτι κἂν διὰ τῶν ὅρων εἴη φανερόν. ἔστω γὰρ τὸ μὲν Α ἀγαθόν, τὸ δ’ ἐφ’ ᾧ Β ζῷον, τὸ δὲ Γ ἵππος. τὸ μὲν οὖν ἀγαθὸν ἐνδέχεται μηδενὶ ἵππῳ ὑπάρχειν, τὸ δὲ ζῷον ἀνάγκη παντὶ ὑπάρχειν· ἀλλ’ οὐκ ἀνάγκη ζῷόν τι μὴ εἶναιἀγαθόν, εἴπερ ἐνδέχεται πᾶν εἶναι ἀγαθόν. ἢ εἰ μὴ τοῦτο δυνατόν, ἀλλὰ τὸ ἐγρηγορέναι ἢ τὸ καθεύδειν ὅρον θετέον· ἅπαν γὰρ ζῷον δεκτικὸν τούτων.

Εἰ μὲν οὖν οἱ ὅροι καθόλου πρὸς τὸ μέσον εἰσίν, εἴρηται πότε ἔσται τὸ συμπέρασμα ἀναγκαῖον· εἰ δ’ ὁ μὲν καθόλου ὁ δ’ ἐν μέρει, κατηγορικῶν μὲν ὄντων ἀμφοτέρων, ὅταν τὸ καθόλου γένηται ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον. ἀπόδειξις δ’ ἡ αὐτὴ ἣ καὶ πρότερον· ἀντιστρέφει γὰρ καὶ τὸ ἐν μέρει κατηγορικόν. εἰ οὖν ἀνάγκη τὸ Β παντὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α ὑπὸ τὸ Γ ἐστίν, ἀνάγκη τὸ Β τινὶ τῷ Α ὑπάρχειν. εἰ δὲ τὸ Β τῷ Α τινί, καὶ τὸ Α τῷ Β τινὶ ὑπάρχειν ἀναγκαῖον· ἀντιστρέφει γάρ. ὁμοίως δὲ καὶ εἰ τὸ Α Γ εἴη ἀναγκαῖον καθόλου ὄν· τὸ γὰρ Β ὑπὸ τὸ Γ ἐστίν. εἰ δὲ τὸ ἐν μέρει ἐστὶν ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ἔστω γὰρ τὸ Β Γ ἐν μέρει τε καὶ ἀναγκαῖον, τὸ δὲ Α παντὶ τῷ Γ ὑπαρχέτω, μὴ μέντοι ἐξ ἀνάγκης. ἀντιστραφέντος οὖν τοῦ Β Γ τὸ πρῶτον γίγνεται σχῆμα, καὶ ἡ μὲν καθόλου πρότασις οὐκ ἀναγκαία, ἡ δ' ἐν μέρει ἀναγκαία. ὅτε δ' οὕτως ἔχοιεν αἱ προτάσεις, οὐκ ἦν τὸ συμπέρασμα ἀναγκαῖον, ὥστ' οὐδ' ἐπὶ τούτων. ἔτι δὲ καὶ ἐκ τῶν ὅρων φανερόν. ἔστω γὰρ τὸ μὲν Α ἐγρήγορσις, τὸ δὲ Β δίπουν, ἐφ' ᾧ δὲ τὸ Γ ζῷον. τὸ μὲν οὖν Β τινὶ τῷ Γ ἀνάγκη ὑπάρχειν, τὸ δὲ Α τῷ Γ ἐνδέχεται, καὶ τὸ Α τῷ Β οὐκ ἀναγκαῖον· οὐ γὰρ ἀνάγκη δίπουν τι καθεύδειν ἢ ἐγρηγορέναι. ὁμοίως δὲ καὶ διὰ τῶν αὐτῶν ὅρων δειχθήσεται καὶ εἰ τὸ Α Γ εἴη ἐν μέρει τε καὶ ἀναγκαῖον.

Εἰ δ' ὁ μὲν κατηγορικὸς ὁ δὲ στερητικὸς τῶν ὅρων, ὅταν μὲν ᾖ τὸ καθόλου στερητικόν τε καὶ ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον· εἰ γὰρ τὸ Α τῷ Γ μηδενὶ ἐνδέχεται, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχει, τὸ Α τινὶ τῷ Β ἀνάγκημὴ ὑπάρχειν. ὅταν δὲ τὸ καταφατικὸν ἀναγκαῖον τεθῇ, ἢ καθόλου ὂν ἢ ἐν μέρει, ἢ τὸ στερητικὸν κατὰ μέρος, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. τὰ μὲν γὰρ ἄλλα ταὐτὰ ἃ καὶ ἐπὶ τῶν πρότερον ἐροῦμεν, ὅροι δ' ὅταν μὲν ᾖ καθόλου τὸ κατηγορικὸν ἀναγκαῖον, ἐγρήγορσις — ζῷον — ἄνθρωπος, μέσον [32a] ἄνθρωπος, ὅταν δ' ἐν μέρει τὸ κατηγορικὸν ἀναγκαῖον, ἐγρήγορσις — ζῷον — λευκόν· ζῷον μὲν γὰρ ἀνάγκη τινὶ λευκῷ ὑπάρχειν, ἐγρήγορσις δ' ἐνδέχεται μηδενί, καὶ οὐκ ἀνάγκη τινὶ ζῴῳ μὴ ὑπάρχειν ἐγρήγορσιν. ὅταν δὲ τὸ στερητικὸν ἐν μέρει ὂν ἀναγκαῖον ᾖ, δίπουν — κινούμενον — ζῷον, μέσον ζῷον.

Κεφάλαιο 12

Φανερὸν οὖν ὅτι τοῦ μὲν ὑπάρχειν οὐκ ἔστι συλλογισμός, ἐὰν μὴ ἀμφότεραι ὦσιν αἱ προτάσεις ἐν τῷ ὑπάρχειν, τοῦ δ’ ἀναγκαίου ἔστι καὶ τῆς ἑτέρας μόνον ἀναγκαίας οὔσης. ἐν ἀμφοτέροις δέ, καὶ καταφατικῶν καὶ στερητικῶν ὄντων τῶν συλλογισμῶν, ἀνάγκη τὴν ἑτέραν πρότασιν ὁμοίαν εἶναι τῷ συμπεράσματι. λέγω δὲ τὸ ὁμοίαν, εἰ μὲν ὑπάρχον, ὑπάρχουσαν, εἰ δ’ ἀναγκαῖον, ἀναγκαίαν. ὥστε καὶ τοῦτο δῆλον, ὅτι οὐκ ἔσται τὸ συμπέρασμα οὔτ’ ἀναγκαῖον οὔθ’ ὑπάρχον εἶναι μὴ ληφθείσης ἀναγκαίας ἢ ὑπαρχούσης προτάσεως.

Κεφάλαιο 13

Περὶ μὲν οὖν τοῦ ἀναγκαίου, πῶς γίγνεται καὶ τίνα διαφορὰν ἔχει πρὸς τὸ ὑπάρχον, εἴρηται σχεδὸν ἱκανῶς· περὶ δὲ τοῦ ἐνδεχομένου μετὰ ταῦτα λέγωμεν πότε καὶ πῶς καὶ διὰ τίνων ἔσται συλλογισμός. λέγω δ’ ἐνδέχεσθαι καὶ τὸ ἐνδεχόμενον, οὗ μὴ ὄντος ἀναγκαίου, τεθέντος δ’ ὑπάρχειν, οὐδὲν ἔσται διὰ τοῦτ’ ἀδύνατον· τὸ γὰρ ἀναγκαῖον ὁμωνύμως ἐνδέχεσθαι λέγομεν. [ὅτι δὲ τοῦτ’ ἔστι τὸ ἐνδεχόμενον, φανερὸν ἔκ τε τῶν ἀποφάσεων καὶ τῶν καταφάσεων τῶν ἀντικειμένων· τὸ γὰρ οὐκ ἐνδέχεται ὑπάρχειν καὶ ἀδύνατον ὑπάρχειν καὶ ἀνάγκη μὴ ὑπάρχειν ἤτοι ταὐτά ἐστιν ἢ ἀκολουθεῖ ἀλλήλοις, ὥστε καὶ τὰ ἀντικείμενα, τὸ ἐνδέχεται ὑπάρχειν καὶ οὐκ ἀδύνατον ὑπάρχειν καὶ οὐκ ἀνάγκη μὴ ὑπάρχειν, ἤτοι ταὐτὰ ἔσται ἢ ἀκολουθοῦντα ἀλλήλοις· κατὰ παντὸς γὰρ ἡ φάσις ἢ ἡ ἀπόφασις. ἔσται ἄρα τὸ ἐνδεχόμενον οὐκ ἀναγκαῖον καὶ τὸ μὴ ἀναγκαῖον ἐνδεχόμενον.] συμβαίνει δὲ πάσας τὰς κατὰ τὸ ἐνδέχεσθαι προτάσεις ἀντιστρέφειν ἀλλήλαις. λέγω δὲ οὐ τὰς καταφατικὰς ταῖς ἀποφατικαῖς, ἀλλ’ ὅσαι καταφατικὸν ἔχουσι τὸ σχῆμα κατὰ τὴν ἀντίθεσιν, οἷον τὸ ἐνδέχεσθαι ὑπάρχειν τῷ ἐνδέχεσθαι μὴ ὑπάρχειν, καὶ τὸ παντὶ ἐνδέχεσθαι τῷ ἐνδέχεσθαι μηδενὶ καὶ μὴ παντί, καὶ τὸ τινὶ τῷ μὴ τινί. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων. ἐπεὶ γὰρ τὸ ἐνδεχόμενον οὐκ ἔστιν ἀναγκαῖον, τὸ δὲ μὴ ἀναγκαῖον ἐγχωρεῖ μὴ ὑπάρχειν, φανερὸν ὅτι, εἰ ἐνδέχεται τὸ Α τῷ Β ὑπάρχειν, ἐνδέχεται καὶ μὴ ὑπάρχειν· καὶ εἰ παντὶ ἐνδέχεται ὑπάρχειν, καὶ παντὶ ἐνδέχεται μὴ ὑπάρχειν. ὁμοίως δὲ κἀπὶ τῶν ἐν μέρει καταφάσεων· ἡ γὰρ αὐτὴ [32b] ἀπόδειξις. εἰσὶ δ’ αἱ τοιαῦται προτάσεις κατηγορικαὶ καὶ οὐ στερητικαί· τὸ γὰρ ἐνδέχεσθαι τῷ εἶναι ὁμοίως τάττεται, καθάπερ ἐλέχθη πρότερον.

Διωρισμένων δὲ τούτων πάλιν λέγωμεν ὅτι τὸ ἐνδέχεσθαι κατὰ δύο λέγεται τρόπους, ἕνα μὲν τὸ ὡς ἐπὶ τὸ πολὺ γίνεσθαι καὶ διαλείπειν τὸ ἀναγκαῖον, οἷον τὸ πολιοῦσθαι ἄνθρωπον ἢ τὸ αὐξάνεσθαι ἢ φθίνειν, ἢ ὅλως τὸ πεφυκὸς ὑπάρχειν (τοῦτο γὰρ οὐ συνεχὲς μὲν ἔχει τὸ ἀναγκαῖον διὰ τὸ μὴ ἀεὶ εἶναι ἄνθρωπον, ὄντος μέντοι ἀνθρώπου ἢ ἐξ ἀνάγκης ἢ ὡς ἐπὶ τὸ πολύ ἐστιν), ἄλλον δὲ τὸ ἀόριστον, ὃ καὶ οὕτως καὶ μὴ οὕτως δυνατόν, οἷον τὸ βαδίζειν ζῷον ἢ βαδίζοντος γενέσθαι σεισμόν, ἢ ὅλως τὸ ἀπὸ τύχης γινόμενον· οὐδὲν γὰρ μᾶλλον οὕτως πέφυκεν ἢ ἐναντίως. ἀντιστρέφει μὲν οὖν καὶ κατὰ τὰς ἀντικειμένας προτάσεις ἑκάτερον τῶν ἐνδεχομένων, οὐ μὴν τὸν αὐτόν γε τρόπον, ἀλλὰ τὸ μὲν πεφυκὸς εἶναι τῷ μὴ ἐξ ἀνάγκης ὑπάρχειν (οὕτω γὰρ ἐνδέχεται μὴ πολιοῦσθαι ἄνθρωπον), τὸ δ’ ἀόριστον τῷ μηδὲν μᾶλλον οὕτως ἢ ἐκείνως. ἐπιστήμη δὲ καὶ συλλογισμὸς ἀποδεικτικὸς τῶν μὲν ἀορίστων οὐκ ἔστι διὰ τὸ ἄτακτον εἶναι τὸ μέσον, τῶν δὲ πεφυκότων ἔστι, καὶ σχεδὸν οἱ λόγοι καὶ αἱ σκέψεις γίνονται περὶ τῶν οὕτως ἐνδεχομένων· ἐκείνων δ’ ἐγχωρεῖ μὲν γενέσθαι συλλογισμόν, οὐ μὴν εἴωθέ γε ζητεῖσθαι.

Ταῦτα μὲν οὖν διορισθήσεται μᾶλλον ἐν τοῖς ἑπομένοις· νῦν δὲ λέγωμεν πότε καὶ πῶς καὶ τίς ἔσται συλλογισμὸς ἐκ τῶν ἐνδεχομένων προτάσεων. ἐπεὶ δὲ τὸ ἐνδέχεσθαι τόδε τῷδε ὑπάρχειν διχῶς ἔστιν ἐκλαβεῖν· ἢ γὰρ ᾧ ὑπάρχει τόδε ἢ ᾧ ἐνδέχεται αὐτὸ ὑπάρχειν — τὸ γάρ, καθ’ οὗ τὸ Β, τὸ Α ἐνδέχεσθαι τούτων σημαίνει θάτερον, ἢ καθ’ οὗ λέγεται τὸ Β ἢ καθ’ οὗ ἐνδέχεται λέγεσθαι· τὸ δέ, καθ’ οὗ τὸ Β, τὸ Α ἐνδέχεσθαι ἢ παντὶ τῷ Β τὸ Α ἐγχωρεῖν οὐδὲν διαφέρει — φανερὸν ὅτι διχῶς ἂν λέγοιτο τὸ Α τῷ Β παντὶ ἐνδέχεσθαι ὑπάρχειν. πρῶτον οὖν εἴπωμεν, εἰ καθ’ οὗ τὸ Γ τὸ Β ἐνδέχεται, καὶ καθ’ οὗ τὸ Β τὸ Α, τίς ἔσται καὶ ποῖος συλλογισμός· οὕτω γὰρ αἱ προτάσεις ἀμφότεραι λαμβάνονται κατὰ τὸ ἐνδέχεσθαι, ὅταν δὲ καθ’ οὗ τὸ Β ὑπάρχει τὸ Α ἐνδέχηται, ἡ μὲν ὑπάρχουσα ἡ δ’ ἐνδεχομένη. ὥστ’ ἀπὸ τῶν ὁμοιοσχημόνων ἀρκτέον, καθάπερ καὶ ἐν τοῖς ἄλλοις.

Κεφάλαιο 14

Ὅταν οὖν τὸ Α παντὶ τῷ Β ἐνδέχηται καὶ τὸ Β παντὶ τῷ Γ, συλλογισμὸς ἔσται τέλειος ὅτι τὸ Α παντὶ τῷ Γ ἐνδέχεται ὑπάρχειν. τοῦτο δὲ φανερὸν ἐκ τοῦ ὁρισμοῦ· τὸ γὰρ [33a] ἐνδέχεσθαι παντὶ ὑπάρχειν οὕτως ἐλέγομεν. ὁμοίως δὲ καὶ εἰ τὸ μὲν Α ἐνδέχεται μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, ὅτι τὸ Α ἐνδέχεται μηδενὶ τῷ Γ· τὸ γὰρ καθ’ οὗ τὸ Β ἐνδέχεται, τὸ Α μὴ ἐνδέχεσθαι, τοῦτ’ ἦν τὸ μηδὲν ἀπολείπειν τῶν ὑπὸ τὸ Β ἐνδεχομένων. ὅταν δὲ τὸ Α παντὶ τῷ Β ἐνδέχηται, τὸ δὲ Β ἐνδέχηται μηδενὶ τῷ Γ, διὰ μὲν τῶν εἰλημμένων προτάσεων οὐδεὶς γίνεται συλλογισμός, ἀντιστραφείσης δὲ τῆς Β Γ κατὰ τὸ ἐνδέχεσθαι γίνεται ὁ αὐτὸς ὅσπερ πρότερον. ἐπεὶ γὰρ ἐνδέχεται τὸ Β μηδενὶ τῷ Γ ὑπάρχειν, ἐνδέχεται καὶ παντὶ ὑπάρχειν· τοῦτο δ’ εἴρηται πρότερον. ὥστ’ εἰ τὸ μὲν Β παντὶ τῷ Γ, τὸ δ’ Α παντὶ τῷ Β, πάλιν ὁ αὐτὸς γίνεται συλλογισμός. ὁμοίως δὲ καὶ εἰ πρὸς ἀμφοτέρας τὰς προτάσεις ἡ ἀπόφασις τεθείη μετὰ τοῦ ἐνδέχεσθαι. λέγω δ’ οἷον εἰ τὸ Α ἐνδέχεται μηδενὶ τῷ Β καὶ τὸ Β μηδενὶ τῷ Γ· διὰ μὲν γὰρ τῶν εἰλημμένων προτάσεων οὐδεὶς γίνεται συλλογισμός, ἀντιστρεφομένων δὲ πάλιν ὁ αὐτὸς ἔσται ὅσπερ καὶ πρότερον. φανερὸν οὖν ὅτι τῆς ἀποφάσεως τιθεμένης πρὸς τὸ ἔλαττον ἄκρον ἢ πρὸς ἀμφοτέρας τὰς προτάσεις ἢ οὐ γίνεται συλλογισμὸς ἢ γίνεται μὲν ἀλλ’ οὐ τέλειος· ἐκ γὰρ τῆς ἀντιστροφῆς περαίνεται τὸ ἀναγκαῖον.

Ἐὰν δ’ ἡ μὲν καθόλου τῶν προτάσεων ἡ δ’ ἐν μέρει ληφθῇ, πρὸς μὲν τὸ μεῖζον ἄκρον κειμένης τῆς καθόλου συλλογισμὸς ἔσται [τέλειος]. εἰ γὰρ τὸ Α παντὶ τῷ Β ἐνδέχεται, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ τῷ Γ ἐνδέχεται. τοῦτο δὲ φανερὸν ἐκ τοῦ ὁρισμοῦ τοῦ ἐνδέχεσθαι. πάλιν εἰ τὸ Α ἐνδέχεται μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται ὑπάρχειν, ἀνάγκη τὸ Α ἐνδέχεσθαί τινι τῶν Γ μὴ ὑπάρχειν. ἀπόδειξις δ’ ἡ αὐτή. ἐὰν δὲ στερητικὴ ληφθῇ ἡ ἐν μέρει πρότασις, ἡ δὲ καθόλου καταφατική, τῇ δὲ θέσει ὁμοίως ἔχωσιν (οἷον τὸ μὲν Α παντὶ τῷ Β ἐνδέχεται, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται μὴ ὑπάρχειν), διὰ μὲν τῶν εἰλημμένων προτάσεων οὐ γίνεται φανερὸς συλλογισμός, ἀντιστραφείσης δὲ τῆς ἐν μέρει καὶ τεθέντος τοῦ Β τινὶ τῷ Γ ἐνδέχεσθαι ὑπάρχειν τὸ αὐτὸ ἔσται συμπέρασμα ὃ καὶ πρότερον, καθάπερ ἐν τοῖς ἐξ ἀρχῆς.

Ἐὰν δ’ ἡ πρὸς τὸ μεῖζον ἄκρον ἐν μέρει ληφθῇ, ἡ δὲ πρὸς τὸ ἔλαττον καθόλου, ἐάν τ’ ἀμφότεραι καταφατικαὶ τεθῶσιν ἐάν τε στερητικαὶ ἐάν τε μὴ ὁμοιοσχήμονες, ἐάν τ’ ἀμφότεραι ἀδιόριστοι ἢ κατὰ μέρος, οὐδαμῶς ἔσται συλλογισμός· οὐδὲν γὰρ κωλύει τὸ Β ὑπερτείνειν τοῦ Α καὶ μὴ κατηγορεῖσθαι ἐπ’ ἴσων· ᾧ δ’ ὑπερτείνει τὸ Β τοῦ Α, εἰλήφθω τὸ Γ· τούτῳ γὰρ οὔτε παντὶ [33b] οὔτε μηδενὶ οὔτε τινὶ οὔτε μή τινι ἐνδέχεται τὸ Α ὑπάρχειν, εἴπερ ἀντιστρέφουσιν αἱ κατὰ τὸ ἐνδέχεσθαι προτάσεις καὶ τὸ Β πλείοσιν ἐνδέχεται ἢ τὸ Α ὑπάρχειν. ἔτι δὲ καὶ ἐκ τῶν ὅρων φανερόν· οὕτω γὰρ ἐχουσῶν τῶν προτάσεων τὸ πρῶτον τῷ ἐσχάτῳ καὶ οὐδενὶ ἐνδέχεται καὶ παντὶ ὑπάρχειν ἀναγκαῖον. ὅροι δὲ κοινοὶ πάντων τοῦ μὲν ὑπάρχειν ἐξ ἀνάγκης ζῷον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῷον — λευκόν — ἱμάτιον. φανερὸν οὖν τοῦτον τὸν τρόπον ἐχόντων τῶν ὅρων ὅτι οὐδεὶς γίνεται συλλογισμός. ἢ γὰρ τοῦ ὑπάρχειν ἢ τοῦ ἐξ ἀνάγκης ἢ τοῦ ἐνδέχεσθαι πᾶς ἐστὶ συλλογισμός. τοῦ μὲν οὖν ὑπάρχειν καὶ τοῦ ἀναγκαίου φανερὸν ὅτι οὐκ ἔστιν· ὁ μὲν γὰρ καταφατικὸς ἀναιρεῖται τῷ στερητικῷ, ὁ δὲ στερητικὸς τῷ καταφατικῷ. λείπεται δὴ τοῦ ἐνδέχεσθαι εἶναι· τοῦτο δ’ ἀδύνατον· δέδεικται γὰρ ὅτι οὕτως ἐχόντων τῶν ὅρων καὶ παντὶ τῷ ἐσχάτῳ τὸ πρῶτον ἀνάγκη καὶ οὐδενὶ ἐνδέχεται ὑπάρχειν. ὥστ’ οὐκ ἂν εἴη τοῦ ἐνδέχεσθαι συλλογισμός· τὸ γὰρ ἀναγκαῖον οὐκ ἦν ἐνδεχόμενον.

Φανερὸν δὲ ὅτι καθόλου τῶν ὅρων ὄντων ἐν ταῖς ἐνδεχομέναις προτάσεσιν ἀεὶ γίνεται συλλογισμὸς ἐν τῷ πρώτῳ σχήματι, καὶ κατηγορικῶν καὶ στερητικῶν ὄντων, πλὴν κατηγορικῶν μὲν τέλειος, στερητικῶν δὲ ἀτελής. δεῖ δὲ τὸ ἐνδέχεσθαι λαμβάνειν μὴ ἐν τοῖς ἀναγκαίοις, ἀλλὰ κατὰ τὸν εἰρημένον διορισμόν. ἐνίοτε δὲ λανθάνει τὸ τοιοῦτον.

Κεφάλαιο 15

Ἐὰν δ’ ἡ μὲν ὑπάρχειν ἡ δ’ ἐνδέχεσθαι λαμβάνηται τῶν προτάσεων, ὅταν μὲν ἡ πρὸς τὸ μεῖζον ἄκρον ἐνδέχεσθαι σημαίνῃ, τέλειοί τ’ ἔσονται πάντες οἱ συλλογισμοὶ καὶ τοῦ ἐνδέχεσθαι κατὰ τὸν εἰρημένον διορισμόν, ὅταν δ’ ἡ πρὸς τὸ ἔλαττον, ἀτελεῖς τε πάντες, καὶ οἱ στερητικοὶ τῶν συλλογισμῶν οὐ τοῦ κατὰ τὸν διορισμὸν ἐνδεχομένου, ἀλλὰ τοῦ μηδενὶ ἢ μὴ παντὶ ἐξ ἀνάγκης ὑπάρχειν· εἰ γὰρ μηδενὶ ἢ μὴ παντὶ ἐξ ἀνάγκης, ἐνδέχεσθαί φαμεν καὶ μηδενὶ καὶ μὴ παντὶ ὑπάρχειν. ἐνδεχέσθω γὰρ τὸ Α παντὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ κείσθω ὑπάρχειν. ἐπεὶ οὖν ὑπὸ τὸ Β ἐστὶ τὸ Γ, τῷ δὲ Β παντὶ ἐνδέχεται τὸ Α, φανερὸν ὅτι καὶ τῷ Γ παντὶ ἐνδέχεται. γίνεται δὴ τέλειος συλλογισμός· ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως, τῆς δὲ Β Γ καταφατικῆς, καὶ τῆς μὲν ἐνδέχεσθαι τῆς δ’ ὑπάρχειν λαμβανομένης, τέλειος ἔσται συλλογισμὸς ὅτι τὸ Α ἐνδέχεται μηδενὶ τῷ Γ ὑπάρχειν. [34a]

Ὅτι μὲν οὖν τοῦ ὑπάρχειν τιθεμένου πρὸς τὸ ἔλαττον ἄκρον τέλειοι γίγνονται συλλογισμοί, φανερόν· ὅτι δ’ ἐναντίως ἔχοντος ἔσονται συλλογισμοί, διὰ τοῦ ἀδυνάτου δεικτέον. ἅμα δ’ ἔσται δῆλον καὶ ὅτι ἀτελεῖς· ἡ γὰρ δεῖξις οὐκ ἐκ τῶν εἰλημμένων προτάσεων. πρῶτον δὲ λεκτέον ὅτι εἰ τοῦ Α ὄντος ἀνάγκη τὸ Β εἶναι, καὶ δυνατοῦ ὄντος τοῦ Α δυνατὸν ἔσται καὶ τὸ Β ἐξ ἀνάγκης. ἔστω γὰρ οὕτως ἐχόντων τὸ μὲν ἐφ’ ᾧ τὸ Α δυνατόν, τὸ δ’ ἐφ’ ᾧ τὸ Β ἀδύνατον. εἰ οὖν τὸ μὲν δυνατόν, ὅτε δυνατὸν εἶναι, γένοιτ’ ἄν, τὸ δ’ ἀδύνατον, ὅτ’ ἀδύνατον, οὐκ ἂν γένοιτο, ἅμα δ’ εἴη τὸ Α δυνατὸν καὶ τὸ Β ἀδύνατον, ἐνδέχοιτ’ ἂν τὸ Α γενέσθαι ἄνευ τοῦ Β, εἰ δὲ γενέσθαι, καὶ εἶναι· τὸ γὰρ γεγονός, ὅτε γέγονεν, ἔστιν. δεῖ δὲ λαμβάνειν μὴ μόνον ἐν τῇ γενέσει τὸ ἀδύνατον καὶ δυνατόν, ἀλλὰ καὶ ἐν τῷ ἀληθεύεσθαι καὶ ἐν τῷ ὑπάρχειν, καὶ ὁσαχῶς ἄλλως λέγεται τὸ δυνατόν· ἐν ἅπασι γὰρ ὁμοίως ἕξει. ἔτι τὸ ὄντος τοῦ Α τὸ Β εἶναι, οὐχ ὡς ἑνός τινος ὄντος τοῦ Α τὸ Β ἔσται δεῖ ὑπολαβεῖν· οὐ γὰρ ἔστιν οὐδὲν ἐξ ἀνάγκης ἑνός τινος ὄντος, ἀλλὰ δυοῖν ἐλαχίστοιν, οἷον ὅταν αἱ προτάσεις οὕτως ἔχωσιν ὡς ἐλέχθη κατὰ τὸν συλλογισμόν. εἰ γὰρ τὸ Γ κατὰ τοῦ Δ, τὸ δὲ Δ κατὰ τοῦ Ζ, καὶ τὸ Γ κατὰ τοῦ Ζ ἐξ ἀνάγκης· καὶ εἰ δυνατὸν ἑκάτερον, καὶ τὸ συμπέρασμα δυνατόν. ὥσπερ οὖν εἴ τις θείη τὸ μὲν Α τὰς προτάσεις, τὸ δὲ Β τὸ συμπέρασμα, συμβαίνοι ἂν οὐ μόνον ἀναγκαίου τοῦ Α ὄντος ἅμα καὶ τὸ Β εἶναι ἀναγκαῖον, ἀλλὰ καὶ δυνατοῦ δυνατόν.

Τούτου δὲ δειχθέντος, φανερὸν ὅτι ψεύδους ὑποτεθέντος καὶ μὴ ἀδυνάτου καὶ τὸ συμβαῖνον διὰ τὴν ὑπόθεσιν ψεῦδος ἔσται καὶ οὐκ ἀδύνατον. οἷον εἰ τὸ Α ψεῦδος μέν ἐστι μὴ μέντοι ἀδύνατον, ὄντος δὲ τοῦ Α τὸ Β ἔστι, καὶ τὸ Β ἔσται ψεῦδος μὲν οὐ μέντοι ἀδύνατον. ἐπεὶ γὰρ δέδεικται ὅτι εἰ τοῦ Α ὄντος τὸ Β ἔστι, καὶ δυνατοῦ ὄντος τοῦ Α ἔσται τὸ Β δυνατόν, ὑπόκειται δὲ τὸ Α δυνατὸν εἶναι, καὶ τὸ Β ἔσται δυνατόν· εἰ γὰρ ἀδύνατον, ἅμα δυνατὸν ἔσται τὸ αὐτὸ καὶ ἀδύνατον. Διωρισμένων δὴ τούτων ὑπαρχέτω τὸ Α παντὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ ἐνδεχέσθω· ἀνάγκη οὖν τὸ Α παντὶ τῷ Γ ἐνδέχεσθαι ὑπάρχειν. μὴ γὰρ ἐνδεχέσθω, τὸ δὲ Β παντὶ τῷ Γ κείσθω ὡς ὑπάρχον· τοῦτο δὲ ψεῦδος μέν, οὐ μέντοι ἀδύνατον. εἰ οὖν τὸ μὲν Α μὴ ἐνδέχεται παντὶ τῷ Γ, τὸ δὲ Β παντὶ ὑπάρχει τῷ Γ, τὸ Α οὐ παντὶ τῷ Β ἐνδέχεται· γίνεται γὰρ συλλογισμὸς διὰ τοῦ τρίτου σχήματος. ἀλλ’ ὑπέκειτο παντὶ ἐνδέχεσθαι ὑπάρχειν. ἀνάγκη ἄρα τὸ Α παντὶ [34b] τῷ Γ ἐνδέχεσθαι· ψεύδους γὰρ τεθέντος καὶ οὐκ ἀδυνάτου τὸ συμβαῖνόν ἐστιν ἀδύνατον. [ἐγχωρεῖ δὲ καὶ διὰ τοῦ πρώτου σχήματος ποιῆσαι τὸ ἀδύνατον, θέντας τῷ Γ τὸ Β ὑπάρχειν. εἰ γὰρ τὸ Β παντὶ τῷ Γ ὑπάρχει, τὸ δὲ Α παντὶ τῷ Β ἐνδέχεται, κἂν τῷ Γ παντὶ ἐνδέχοιτο τὸ Α. ἀλλ’ ὑπέκειτο μὴ παντὶ ἐγχωρεῖν.]

Δεῖ δὲ λαμβάνειν τὸ παντὶ ὑπάρχον μὴ κατὰ χρόνον ὁρίσαντας, οἷον νῦν ἢ ἐν τῷδε τῷ χρόνῳ, ἀλλ’ ἁπλῶς· διὰ τοιούτων γὰρ προτάσεων καὶ τοὺς συλλογισμοὺς ποιοῦμεν, ἐπεὶ κατά γε τὸ νῦν λαμβανομένης τῆς προτάσεως οὐκ ἔσται συλλογισμός· οὐδὲν γὰρ ἴσως κωλύει ποτὲ καὶ παντὶ κινουμένῳ ἄνθρωπον ὑπάρχειν, οἷον εἰ μηδὲν ἄλλο κινοῖτο· τὸ δὲ κινούμενον ἐνδέχεται παντὶ ἵππῳ· ἀλλ’ ἄνθρωπον οὐδενὶ ἵππῳ ἐνδέχεται. ἔτι ἔστω τὸ μὲν πρῶτον ζῷον, τὸ δὲ μέσον κινούμενον, τὸ δ’ ἔσχατον ἄνθρωπος. αἱ μὲν οὖν προτάσεις ὁμοίως ἕξουσι, τὸ δὲ συμπέρασμα ἀναγκαῖον, οὐκ ἐνδεχόμενον· ἐξ ἀνάγκης γὰρ ὁ ἄνθρωπος ζῷον. φανερὸν οὖν ὅτι τὸ καθόλου ληπτέον ἁπλῶς, καὶ οὐ χρόνῳ διορίζοντας.

Πάλιν ἔστω στερητικὴ πρότασις καθόλου ἡ Α Β, καὶ εἰλήφθω τὸ μὲν Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β παντὶ ἐνδεχέσθω ὑπάρχειν τῷ Γ. τούτων οὖν τεθέντων ἀνάγκη τὸ Α ἐνδέχεσθαι μηδενὶ τῷ Γ ὑπάρχειν. μὴ γὰρ ἐνδεχέσθω, τὸ δὲ Β τῷ Γ κείσθω ὑπάρχον, καθάπερ πρότερον. ἀνάγκη δὴ τὸ Α τινὶ τῷ Β ὑπάρχειν· γίνεται γὰρ συλλογισμὸς διὰ τοῦ τρίτου σχήματος· τοῦτο δὲ ἀδύνατον. ὥστ’ ἐνδέχοιτ’ ἂν τὸ Α μηδενὶ τῷ Γ· ψεύδους γὰρ τεθέντος ἀδύνατον τὸ συμβαῖνον. οὗτος οὖν ὁ συλλογισμὸς οὐκ ἔστι τοῦ κατὰ τὸν διορισμὸν ἐνδεχομένου, ἀλλὰ τοῦ μηδενὶ ἐξ ἀνάγκης (αὕτη γάρ ἐστιν ἡ ἀντίφασις τῆς γενομένης ὑποθέσεως· ἐτέθη γὰρ ἐξ ἀνάγκης τὸ Α τινὶ τῷ Γ ὑπάρχειν, ὁ δὲ διὰ τοῦ ἀδυνάτου συλλογισμὸς τῆς ἀντικειμένης ἐστὶν φάσεως). ἔτι δὲ καὶ ἐκ τῶν ὅρων φανερὸν ὅτι οὐκ ἔσται τὸ συμπέρασμα ἐνδεχόμενον. ἔστω γὰρ τὸ μὲν Α κόραξ, τὸ δ’ ἐφ’ ᾧ Β διανοούμενον, ἐφ’ᾧ δὲ Γ ἄνθρωπος. οὐδενὶ δὴ τῷ Β τὸ Α ὑπάρχει· οὐδὲν γὰρ διανοούμενον κόραξ. τὸ δὲ Β παντὶ ἐνδέχεται τῷ Γ· παντὶ γὰρ ἀνθρώπῳ τὸ διανοεῖσθαι. ἀλλὰ τὸ Α ἐξ ἀνάγκης οὐδενὶ τῷ Γ· οὐκ ἄρα τὸ συμπέρασμα ἐνδεχόμενον. ἀλλ’ οὐδ’ ἀναγκαῖον ἀεί. ἔστω γὰρ τὸ μὲν Α κινούμενον, τὸ δὲ Β ἐπιστήμη, τὸ δ’ ἐφ’ ᾧ Γ ἄνθρωπος. τὸ μὲν οὖν Α οὐδενὶ τῷ Β ὑπάρξει, τὸ δὲ Β παντὶ τῷ Γ ἐνδέχεται, καὶ οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον· οὐ γὰρ ἀνάγκη μηδένα κινεῖσθαι ἄνθρωπον, ἀλλ’ [35a] οὐκ ἀνάγκη τινά. δῆλον οὖν ὅτι τὸ συμπέρασμά ἐστι τοῦ μηδενὶ ἐξ ἀνάγκης ὑπάρχειν. ληπτέον δὲ βέλτιον τοὺς ὅρους.

Ἐὰν δὲ τὸ στερητικὸν τεθῇ πρὸς τὸ ἔλαττον ἄκρον ἐνδέχεσθαι σημαῖνον, ἐξ αὐτῶν μὲν τῶν εἰλημμένων προτάσεων οὐδεὶς ἔσται συλλογισμός, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως ἔσται, καθάπερ ἐν τοῖς πρότερον. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τὸ δὲ Β ἐνδεχέσθω μηδενὶ τῷ Γ. οὕτω μὲν οὖν ἐχόντων τῶν ὅρων οὐδὲν ἔσται ἀναγκαῖον· ἐὰν δ’ ἀντιστραφῇ τὸ Β Γ καὶ ληφθῇ τὸ Β παντὶ τῷ Γ ἐνδέχεσθαι, γίνεται συλλογισμὸς ὥσπερ πρότερον· ὁμοίως γὰρ ἔχουσιν οἱ ὅροι τῇ θέσει. τὸν αὐτὸν δὲ τρόπον καὶ στερητικῶν ὄντων ἀμφοτέρων τῶν διαστημάτων, ἐὰν τὸ μὲν Α Β μὴ ὑπάρχειν, τὸ δὲ Β Γ μηδενὶ ἐνδέχεσθαι σημαίνῃ· δι’ αὐτῶν μὲν γὰρ τῶν εἰλημμένων οὐδαμῶς γίνεται τὸ ἀναγκαῖον, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως ἔσται συλλογισμός. εἰλήφθω γὰρ τὸ μὲν Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β ἐνδέχεσθαι μηδενὶ τῷ Γ. διὰ μὲν οὖν τούτων οὐδὲν ἀναγκαῖον· ἐὰν δὲ ληφθῇ τὸ Β παντὶ τῷ Γ ἐνδέχεσθαι, ὅπερ ἐστὶν ἀληθές, ἡ δὲ Α Β πρότασις ὁμοίως ἔχῃ, πάλιν ὁ αὐτὸς ἔσται συλλογισμός. ἐὰν δὲ μὴ ὑπάρχειν τεθῇ τὸ Β παντὶ τῷ Γ καὶ μὴ ἐνδέχεσθαι μὴ ὑπάρχειν, οὐκ ἔσται συλλογισμὸς οὐδαμῶς, οὔτε στερητικῆς οὔσης οὔτε καταφατικῆς τῆςΑ Β προτάσεως. ὅροι δὲ κοινοὶ τοῦ μὲν ἐξ ἀνάγκης ὑπάρχειν λευκόν — ζῷον — χιών, τοῦ δὲ μὴ ἐνδέχεσθαι λευκόν — ζῷον — πίττα. Φανερὸν οὖν ὅτι καθόλου τῶν ὅρων ὄντων, καὶ τῆς μὲν ὑπάρχειν τῆς δ’ ἐνδέχεσθαι λαμβανομένης τῶν προτάσεων, ὅταν ἡ πρὸς τὸ ἔλαττον ἄκρον ἐνδέχεσθαι λαμβάνηται πρότασις, ἀεὶ γίνεται συλλογισμός, πλὴν ὁτὲ μὲν ἐξ αὐτῶν ὁτὲ δ’ ἀντιστραφείσης τῆς προτάσεως. πότε δὲ τούτων ἑκάτερος καὶ διὰ τίν’ αἰτίαν, εἰρήκαμεν.

Ἐὰν δὲ τὸ μὲν καθόλου τὸ δ’ ἐν μέρει ληφθῇ τῶν διαστημάτων, ὅταν μὲν τὸ πρὸς τὸ μεῖζον ἄκρον καθόλου τεθῇ καὶ ἐνδεχόμενον, εἴτ’ ἀποφατικὸν εἴτε καταφατικόν, τὸ δ’ ἐν μέρει καταφατικὸν καὶ ὑπάρχον, ἔσται συλλογισμὸς τέλειος, καθάπερ καὶ καθόλου τῶν ὅρων ὄντων. ἀπόδειξις δ’ ἡ αὐτὴ ἣ καὶ πρότερον. ὅταν δὲ καθόλου μὲν ᾖ τὸ πρὸς τὸ μεῖζον ἄκρον, ὑπάρχον δὲ καὶ μὴ ἐνδεχόμενον, θάτερον δ’ ἐν μέρει καὶ ἐνδεχόμενον, ἐάν τ’ ἀποφατικαὶ ἐάν τε καταφατικαὶ τεθῶσιν ἀμφότεραι, ἐάν τε ἡ μὲν ἀποφατικὴ ἡ δὲ καταφατική, πάντως ἔσται συλλογισμὸς ἀτελής. πλὴν οἱ μὲν διὰ τοῦ ἀδυνάτου δειχθήσονται, [35b] οἱ δὲ καὶ διὰ τῆς ἀντιστροφῆς τῆς τοῦ ἐνδέχεσθαι, καθάπερ ἐν τοῖς πρότερον. ἔσται δὲ συλλογισμὸς διὰ τῆς ἀντιστροφῆς [καὶ] ὅταν ἡ μὲν καθόλου πρὸς τὸ μεῖζον ἄκρον τεθεῖσα σημαίνῃ τὸ ὑπάρχειν [ἢ μὴ ὑπάρχειν], ἡ δ’ ἐν μέρει στερητικὴ οὖσα τὸ ἐνδέχεσθαι λαμβάνῃ, οἷον εἰ τὸ μὲν Α παντὶ τῷ Β ὑπάρχει ἢ μὴ ὑπάρχει, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται μὴ ὑπάρχειν· ἀντιστραφέντος γὰρ τοῦ Β Γ κατὰ τὸ ἐνδέχεσθαι γίνεται συλλογισμός. ὅταν δὲ τὸ μὴ ὑπάρχειν λαμβάνῃ ἡ κατὰ μέρος τεθεῖσα, οὐκ ἔσται συλλογισμός. ὅροι τοῦ μὲν ὑπάρχειν λευκόν — ζῷον — χιών, τοῦ δὲ μὴ ὑπάρχειν λευκόν — ζῷον — πίττα· διὰ γὰρ τοῦ ἀδιορίστου ληπτέον τὴν ἀπόδειξιν. ἐὰν δὲ τὸ καθόλου τεθῇ πρὸς τὸ ἔλαττον ἄκρον, τὸ δ’ ἐν μέρει πρὸς τὸ μεῖζον, ἐάν τε στερητικὸν ἐάν τε καταφατικόν, ἐάν τ’ ἐνδεχόμενον ἐάν θ’ ὑπάρχον ὁποτερονοῦν, οὐδαμῶς ἔσται συλλογισμός.

Οὐδ’ ὅταν ἐν μέρει ἢ ἀδιόριστοι τεθῶσιν αἱ προτάσεις, εἴτ’ ἐνδέχεσθαι λαμβάνουσαι εἴθ’ ὑπάρχειν εἴτ’ ἐναλλάξ, οὐδ’ οὕτως ἔσται συλλογισμός. ἀπόδειξις δ’ ἡ αὐτὴ ἥπερ κἀπὶ τῶν πρότερον. ὅροι δὲ κοινοὶ τοῦ μὲν ὑπάρχειν ἐξ ἀνάγκης ζῷον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῷον — λευκόν — ἱμάτιον. φανερὸν οὖν ὅτι τοῦ μὲν πρὸς τὸ μεῖζον ἄκρον καθόλου τεθέντος ἀεὶ γίνεται συλλογισμός, τοῦ δὲ πρὸς τὸ ἔλαττον οὐδέποτ’ οὐδενός.

Κεφάλαιο 16

Ὅταν δ’ ἡ μὲν ἐξ ἀνάγκης ὑπάρχειν ἡ δ’ ἐνδέχεσθαι σημαίνῃ τῶν προτάσεων, ὁ μὲν συλλογισμὸς ἔσται τὸν αὐτὸν τρόπον ἐχόντων τῶν ὅρων, καὶ τέλειος ὅταν πρὸς τῷ ἐλάττονι ἄκρῳ τεθῇ τὸ ἀναγκαῖον· τὸ δὲ συμπέρασμα κατηγορικῶν μὲν ὄντων τῶν ὅρων τοῦ ἐνδέχεσθαι καὶ οὐ τοῦ ὑπάρχειν ἔσται, καὶ καθόλου καὶ μὴ καθόλου τιθεμένων, ἐὰν δ’ ᾖ τὸ μὲν καταφατικὸν τὸ δὲ στερητικόν, ὅταν μὲν ᾖ τὸ καταφατικὸν ἀναγκαῖον, τοῦ ἐνδέχεσθαι καὶ οὐ τοῦ μὴ ὑπάρχειν, ὅταν δὲ τὸ στερητικόν, καὶ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν καὶ τοῦ μὴ ὑπάρχειν, καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων· τὸ δ’ ἐνδέχεσθαι ἐν τῷ συμπεράσματι τὸν αὐτὸν τρόπον ληπτέον ὅνπερ καὶ ἐν τοῖς πρότερον. τοῦ δ’ ἐξ ἀνάγκης μὴ ὑπάρχειν οὐκ ἔσται συλλογισμός· ἕτερον γὰρ τὸ μὴ ἐξ ἀνάγκης ὑπάρχειν καὶ τὸ ἐξ ἀνάγκης μὴ ὑπάρχειν.

Ὅτι μὲν οὖν καταφατικῶν ὄντων τῶν ὅρων οὐ γίνεται τὸ συμπέρασμα ἀναγκαῖον, φανερόν. ὑπαρχέτω γὰρ τὸ μὲν Α παντὶ τῷ Β ἐξ ἀνάγκης, τὸ δὲ Β ἐνδεχέσθω παντὶ τῷ Γ. ἔσται δὴ συλλογισμὸς ἀτελὴς ὅτι ἐνδέχεται τὸ Α παντὶ τῷ Γ [36a] ὑπάρχειν. ὅτι δ’ ἀτελής, ἐκ τῆς ἀποδείξεως δῆλον· τὸν αὐτὸν γὰρ τρόπον δειχθήσεται ὅνπερ κἀπὶ τῶν πρότερον. πάλιν τὸ μὲν Α ἐνδεχέσθω παντὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ ὑπαρχέτω ἐξ ἀνάγκης. ἔσται δὴ συλλογισμὸς ὅτι τὸ Α παντὶ τῷ Γ ἐνδέχεται ὑπάρχειν, ἀλλ’ οὐχ ὅτι ὑπάρχει, καὶ τέλειος, ἀλλ’ οὐκ ἀτελής· εὐθὺς γὰρ ἐπιτελεῖται διὰ τῶν ἐξ ἀρχῆς προτάσεων.

Εἰ δὲ μὴ ὁμοιοσχήμονες αἱ προτάσεις, ἔστω πρῶτον ἡ στερητικὴ ἀναγκαία, καὶ τὸ μὲν Α μηδενὶ ἐνδεχέσθω τῷ Β, τὸ δὲ Β παντὶ τῷ Γ ἐνδεχέσθω. ἀνάγκη δὴ τὸ Α μηδενὶ τῷ Γ ὑπάρχειν. κείσθω γὰρ ὑπάρχειν ἢ παντὶ ἢ τινί· τῷ δὲ Β ὑπέκειτο μηδενὶ ἐνδέχεσθαι. ἐπεὶ οὖν ἀντιστρέφει τὸ στερητικόν, οὐδὲ τὸ Β τῷ Α οὐδενὶ ἐνδέχεται· τὸ δὲ Α τῷ Γ ἢ παντὶ ἢ τινὶ κεῖται ὑπάρχειν· ὥστ’ οὐδενὶ ἢ οὐ παντὶ τῷ Γ τὸ Β ἐνδέχοιτ’ ἂν ὑπάρχειν· ὑπέκειτο δὲ παντὶ ἐξ ἀρχῆς. φανερὸν δ’ ὅτι καὶ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν γίγνεται συλλογισμός, εἴπερ καὶ τοῦ μὴ ὑπάρχειν. πάλιν ἔστω ἡ καταφατικὴ πρότασις ἀναγκαία, καὶ τὸ μὲν Α ἐνδεχέσθω μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β παντὶ τῷ Γ ὑπαρχέτω ἐξ ἀνάγκης. ὁ μὲν οὖν συλλογισμὸς ἔσται τέλειος, ἀλλ’ οὐ τοῦ μὴ ὑπάρχειν ἀλλὰ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν· ἥ τε γὰρ πρότασις οὕτως ἐλήφθη ἡ ἀπὸ τοῦ μείζονος ἄκρου, καὶ εἰς τὸ ἀδύνατον οὐκ ἔστιν ἀγαγεῖν· εἰ γὰρ ὑποτεθείη τὸ Α τῷ Γ τινὶ ὑπάρχειν, κεῖται δὲ καὶ τῷ Β ἐνδέχεσθαι μηδενὶ ὑπάρχειν, οὐδὲν συμβαίνει διὰ τούτων ἀδύνατον. ἐὰν δὲ πρὸς τῷ ἐλάττονι ἄκρῳ τεθῇ τὸ στερητικόν, ὅταν μὲν ἐνδέχεσθαι σημαίνῃ, συλλογισμὸς ἔσται διὰ τῆς ἀντιστροφῆς, καθάπερ ἐν τοῖς πρότερον, ὅταν δὲ μὴ ἐνδέχεσθαι, οὐκ ἔσται. οὐδ’ ὅταν ἄμφω μὲν τεθῇ στερητικά, μὴ ᾖ δ’ ἐνδεχόμενον τὸ πρὸς τὸ ἔλαττον. ὅροι δ’ οἱ αὐτοί, τοῦ μὲνὑπάρχειν λευκόν — ζῷον — χιών, τοῦ δὲ μὴ ὑπάρχειν λευκόν — ζῷον — πίττα.

Τὸν αὐτὸν δὲ τρόπον ἕξει κἀπὶ τῶν ἐν μέρει συλλογισμῶν. ὅταν μὲν γὰρ ᾖ τὸ στερητικὸν ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται τοῦ μὴ ὑπάρχειν. οἷον εἰ τὸ μὲν Α μηδενὶ τῷ Β ἐνδέχεται ὑπάρχειν, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται ὑπάρχειν, ἀνάγκη τὸ Α τινὶ τῷ Γ μὴ ὑπάρχειν. εἰ γὰρ παντὶ ὑπάρχει, τῷ δὲ Β μηδενὶ ἐνδέχεται, οὐδὲ τὸ Β οὐδενὶ τῷ Α ἐνδέχεται ὑπάρχειν. ὥστ’ εἰ τὸ Α παντὶ τῷ Γ ὑπάρχει, οὐδενὶ τῷ Γ τὸ Β ἐνδέχεται. ἀλλ’ ὑπέκειτό τινι ἐνδέχεσθαι. ὅταν δὲ τὸ ἐν μέρει καταφατικὸν ἀναγκαῖον ᾖ, τὸ ἐν τῷ στερητικῷ συλλογισμῷ, οἷον τὸ Β Γ, ἢ τὸ [36b] καθόλου τὸ ἐν τῷ κατηγορικῷ, οἷον τὸ Α Β, οὐκ ἔσται τοῦ ὑπάρχειν συλλογισμός. ἀπόδειξις δ’ ἡ αὐτὴ ἣ καὶ ἐπὶ τῶν πρότερον. ἐὰν δὲ τὸ μὲν καθόλου τεθῇ πρὸς τὸ ἔλαττον ἄκρον, ἢ καταφατικὸν ἢ στερητικόν, ἐνδεχόμενον, τὸ δ’ ἐν μέρει ἀναγκαῖον [πρὸς τῷ μείζονι ἄκρῳ], οὐκ ἔσται συλλογισμός (ὅροι δὲ τοῦ μὲν ὑπάρχειν ἐξ ἀνάγκης ζῷον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῷον — λευκόν — ἱμάτιον)· ὅταν δ’ ἀναγκαῖον ᾖ τὸ καθόλου, τὸ δ’ ἐν μέρει ἐνδεχόμενον, στερητικοῦ μὲν ὄντος τοῦ καθόλου τοῦ μὲν ὑπάρχειν ὅροι ζῷον — λευκόν — κόραξ, τοῦ δὲ μὴ ὑπάρχειν ζῷον — λευκόν — πίττα, καταφατικοῦ δὲ τοῦ μὲν ὑπάρχειν ζῷον — λευκόν — κύκνος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῷον — λευκόν — χιών. οὐδ’ ὅταν ἀδιόριστοι ληφθῶσιν αἱ προτάσεις ἢ ἀμφότεραι κατὰ μέρος, οὐδ’ οὕτως ἔσται συλλογισμός. ὅροι δὲ κοινοὶ τοῦ μὲν ὑπάρχειν ζῷον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ὑπάρχειν ζῷον — λευκόν — ἄψυχον. καὶ γὰρ τὸ ζῷον τινὶ λευκῷ καὶ τὸ λευκὸν ἀψύχῳ τινὶ καὶ ἀναγκαῖον ὑπάρχειν καὶ οὐκ ἐνδέχεται ὑπάρχειν. κἀπὶ τοῦ ἐνδέχεσθαι ὁμοίως, ὥστε πρὸς ἅπαντα χρήσιμοι οἱ ὅροι.

Φανερὸν οὖν ἐκ τῶν εἰρημένων ὅτι ὁμοίως ἐχόντων τῶνὅρων ἔν τε τῷ ὑπάρχειν καὶ ἐν τοῖς ἀναγκαίοις γίνεταί τε καὶ οὐ γίνεται συλλογισμός, πλὴν κατὰ μὲν τὸ ὑπάρχειν τιθεμένης τῆς στερητικῆς προτάσεως τοῦ ἐνδέχεσθαι ἦν ὁ συλλογισμός, κατὰ δὲ τὸ ἀναγκαῖον τῆς στερητικῆς καὶ τοῦ ἐνδέχεσθαι καὶ τοῦ μὴ ὑπάρχειν. [δῆλον δὲ καὶ ὅτι πάντες ἀτελεῖς οἱ συλλογισμοὶ καὶ ὅτι τελειοῦνται διὰ τῶν προειρημένων σχημάτων.]

Κεφάλαιο 17

Ἐν δὲ τῷ δευτέρῳ σχήματι ὅταν μὲν ἐνδέχεσθαι λαμβάνωσιν ἀμφότεραι αἱ προτάσεις, οὐδεὶς ἔσται συλλογισμός, οὔτε κατηγορικῶν οὔτε στερητικῶν τιθεμένων, οὔτε καθόλου οὔτε κατὰ μέρος· ὅταν δὲ ἡ μὲν ὑπάρχειν ἡ δ’ ἐνδέχεσθαι σημαίνῃ, τῆς μὲν καταφατικῆς ὑπάρχειν σημαινούσης οὐδέποτ’ ἔσται, τῆς δὲ στερητικῆς τῆς καθόλου ἀεί. τὸν αὐτὸν δὲ τρόπον καὶ ὅταν ἡ μὲν ἐξ ἀνάγκης ἡ δ’ ἐνδέχεσθαι λαμβάνηται τῶν προτάσεων. δεῖ δὲ καὶ ἐν τούτοις λαμβάνειν τὸ ἐν τοῖς συμπεράσμασιν ἐνδεχόμενον ὥσπερ ἐν τοῖς πρότερον.

Πρῶτον οὖν δεικτέον ὅτι οὐκ ἀντιστρέφει τὸ ἐν τῷ ἐνδέχεσθαι στερητικόν, οἷον εἰ τὸ Α ἐνδέχεται μηδενὶ τῷ Β, οὐκ ἀνάγκη καὶ τὸ Β ἐνδέχεσθαι μηδενὶ τῷ Α. κείσθω γὰρ τοῦτο, καὶ ἐνδεχέσθω τὸ Β μηδενὶ τῷ Α ὑπάρχειν. οὐκοῦν ἐπεὶ ἀντιστρέφουσιν αἱ ἐν τῷ ἐνδέχεσθαι καταφάσεις ταῖς ἀποφάσεσι, καὶ αἱ ἐναντίαι καὶ αἱ ἀντικείμεναι, τὸ δὲ Β τῷ Α ἐνδέχεται μηδενὶ [37a] ὑπάρχειν, φανερὸν ὅτι καὶ παντὶ ἂν ἐνδέχοιτο τῷ Α ὑπάρχειν. τοῦτο δὲ ψεῦδος· οὐ γὰρ εἰ τόδε τῷδε παντὶ ἐνδέχεται, καὶ τόδε τῷδε ἀναγκαῖον· ὥστ’ οὐκ ἀντιστρέφει τὸ στερητικόν. ἔτι δ’ οὐδὲν κωλύει τὸ μὲν Α τῷ Β ἐνδέχεσθαι μηδενί, τὸ δὲ Β τινὶ τῶν Α ἐξ ἀνάγκης μὴ ὑπάρχειν, οἷον τὸ μὲν λευκὸν παντὶ ἀνθρώπῳ ἐνδέχεται μὴ ὑπάρχειν (καὶ γὰρ ὑπάρχειν), ἄνθρωπον δ’ οὐκ ἀληθὲς εἰπεῖν ὡς ἐνδέχεται μηδενὶ λευκῷ· πολλοῖς γὰρ ἐξ ἀνάγκης οὐχ ὑπάρχει, τὸ δ’ ἀναγκαῖον οὐκ ἦν ἐνδεχόμενον.

Ἀλλὰ μὴν οὐδ’ ἐκ τοῦ ἀδυνάτου δειχθήσε ται ἀντιστρέφον, οἷον εἴ τις ἀξιώσειεν, ἐπεὶ ψεῦδος τὸ ἐνδέχεσθαι τὸ Β τῷ Α μηδενὶ ὑπάρχειν, ἀληθὲς τὸ μὴ ἐνδέχεσθαι μηδενί (φάσις γὰρ καὶ ἀπόφασις), εἰ δὲ τοῦτ’, ἀληθὲς ἐξ ἀνάγκης τινὶ τῷ Α ὑπάρχειν· ὥστε καὶ τὸ Α τινὶ τῷ Β· τοῦτο δ’ ἀδύνατον. οὐ γὰρ εἰ μὴ ἐνδέχεται μηδενὶ τὸ Β τῷ Α, ἀνάγκη τινὶ ὑπάρχειν. τὸ γὰρ μὴ ἐνδέχεσθαι μηδενὶ διχῶς λέγεται, τὸ μὲν εἰ ἐξ ἀνάγκης τινὶ ὑπάρχει, τὸ δ’ εἰ ἐξ ἀνάγκης τινὶ μὴ ὑπάρχει· τὸ γὰρ ἐξ ἀνάγκης τινὶ τῶν Α μὴ ὑπάρχον οὐκ ἀληθὲς εἰπεῖν ὡς παντὶ ἐνδέχεται μὴ ὑπάρχειν, ὥσπερ οὐδὲ τὸ τινὶ ὑπάρχον ἐξ ἀνάγκης ὅτι παντὶ ἐνδέχεται ὑπάρχειν. εἰ οὖν τις ἀξιοίη, ἐπεὶ οὐκ ἐνδέχεται τὸ Γ τῷ Δ παντὶ ὑπάρχειν, ἐξ ἀνάγκης τινὶ μὴ ὑπάρχειν αὐτό, ψεῦδος ἂν λαμβάνοι· παντὶ γὰρ ὑπάρχει, ἀλλ’ ὅτι ἐνίοις ἐξ ἀνάγκης ὑπάρχει, διὰ τοῦτό φαμεν οὐ παντὶ ἐνδέχεσθαι. ὥστε τῷ ἐνδέχεσθαι παντὶ ὑπάρχειν τό τ’ ἐξ ἀνάγκης τινὶ ὑπάρχειν ἀντίκειται καὶ τὸ ἐξ ἀνάγκης τινὶ μὴ ὑπάρχειν. ὁμοίως δὲ καὶ τῷ ἐνδέχεσθαι μηδενί. δῆλον οὖν ὅτι πρὸς τὸ οὕτως ἐνδεχόμενον καὶ μὴ ἐνδεχόμενον ὡς ἐν ἀρχῇ διωρίσαμεν οὐ τὸ ἐξ ἀνάγκης τινὶ ὑπάρχειν ἀλλὰ τὸ ἐξ ἀνάγκης τινὶ μὴ ὑπάρχειν ληπτέον. τούτου δὲ ληφθέντος οὐδὲν συμβαίνει ἀδύνατον, ὥστ' οὐ γίνεται συλλογισμός. φανερὸν οὖν ἐκ τῶν εἰρημένων ὅτι οὐκ ἀντιστρέφει τὸ στερητικόν.

Τούτου δὲ δειχθέντος κείσθω τὸ Α τῷ μὲν Β ἐνδέχεσθαι μηδενί, τῷ δὲ Γ παντί. διὰ μὲν οὖν τῆς ἀντιστροφῆς οὐκ ἔσται συλλογισμός· εἴρηται γὰρ ὅτι οὐκ ἀντιστρέφει ἡ τοιαύτη πρότασις. ἀλλ' οὐδὲ διὰ τοῦ ἀδυνάτου· τεθέντος γὰρ τοῦ Β <μὴ> παντὶ τῷ Γ ἐνδέχεσθαι <μὴ> ὑπάρχειν οὐδὲν συμβαίνει ψεῦδος· ἐνδέχοιτο γὰρ ἂν τὸ Α τῷ Γ καὶ παντὶ καὶ μηδενὶ ὑπάρχειν. ὅλως δ' εἰ ἔστι συλλογισμός, δῆλον ὅτι τοῦ ἐνδέχεσθαι ἂνεἴη διὰ τὸ μηδετέραν τῶν προτάσεων εἰλῆφθαι ἐν τῷ ὑπάρχειν, καὶ οὗτος ἢ καταφατικὸς ἢ στερητικός· οὐδετέρως δ' [37b] ἐγχωρεῖ. καταφατικοῦ μὲν γὰρ τεθέντος δειχθήσεται διὰ τῶν ὅρων ὅτι οὐκ ἐνδέχεται ὑπάρχειν, στερητικοῦ δέ, ὅτι τὸ συμπέρασμα οὐκ ἐνδεχόμενον ἀλλ' ἀναγκαῖόν ἐστιν. ἔστω γὰρ τὸ μὲν Α λευκόν, τὸ δὲ Β ἄνθρωπος, ἐφ' ᾧ δὲ Γ ἵππος. τὸ δὴ Α, τὸ λευκόν, ἐνδέχεται τῷ μὲν παντὶ τῷ δὲ μηδενὶ ὑπάρχειν. ἀλλὰ τὸ Β τῷ Γ οὔτε ὑπάρχειν ἐνδέχεται οὔτε μὴ ὑπάρχειν. ὅτι μὲν οὖν ὑπάρχειν οὐκ ἐγχωρεῖ, φανερόν· οὐδεὶς γὰρ ἵππος ἄνθρωπος. ἀλλ' οὐδ' ἐνδέχεσθαι μὴ ὑπάρχειν· ἀνάγκη γὰρ μηδένα ἵππον ἄνθρωπον εἶναι, τὸ δ' ἀναγκαῖον οὐκ ἦν ἐνδεχόμενον. οὐκ ἄρα γίνεται συλλογισμός. ὁμοίως δὲ δειχθήσεται καὶ ἂν ἀνάπαλιν τεθῇ τὸ στερητικόν, κἂν ἀμφότεραι καταφατικαὶ ληφθῶσιν ἢ στερητικαί (διὰ γὰρ τῶν αὐτῶν ὅρων ἔσται ἡ ἀπόδειξις)· καὶ ὅταν ἡ μὲν καθόλου ἡ δ' ἐν μέρει, ἢ ἀμφότεραι κατὰ μέρος ἢ ἀδιόριστοι, ἢ ὁσαχῶς ἄλλως ἐνδέχεται μεταλαβεῖν τὰς προτάσεις· ἀεὶ γὰρ ἔσται διὰ τῶν αὐτῶν ὅρων ἡ ἀπόδειξις. φανερὸν οὖν ὅτι ἀμφοτέρων τῶν προτάσεων κατὰ τὸ ἐνδέχεσθαι τιθεμένων οὐδεὶς γίνεται συλλογισμός.

Κεφάλαιο 18

Εἰ δ’ ἡ μὲν ὑπάρχειν ἡ δ’ ἐνδέχεσθαι σημαίνει, τῆς μὲν κατηγορικῆς ὑπάρχειν τεθείσης τῆς δὲ στερητικῆς ἐνδέχεσθαι οὐδέποτ’ ἔσται συλλογισμός, οὔτε καθόλου τῶν ὅρων οὔτ’ ἐν μέρει λαμβανομένων (ἀπόδειξις δ’ ἡ αὐτὴ καὶ διὰ τῶν αὐτῶν ὅρων)· ὅταν δ’ ἡ μὲν καταφατικὴ ἐνδέχεσθαι ἡ δὲ στερητικὴ ὑπάρχειν, ἔσται συλλογισμός. εἰλήφθω γὰρ τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχειν, τῷ δὲ Γ παντὶ ἐνδέχεσθαι. ἀντιστραφέντος οὖν τοῦ στερητικοῦ τὸ Β τῷ Α οὐδενὶ ὑπάρξει· τὸ δὲ Α παντὶ τῷ Γ ἐνεδέχετο· γίνεται δὴ συλλογισμὸς ὅτι ἐνδέχεται τὸ Β μηδενὶ τῷ Γ διὰ τοῦ πρώτου σχήματος.ὁμοίως δὲ καὶ εἰ πρὸς τῷ Γ τεθείη τὸ στερητικόν. ἐὰν δ’ ἀμφότεραι μὲν ὦσι στερητικαί, σημαίνῃ δ’ ἡ μὲν μὴ ὑπάρχειν ἡ δ’ ἐνδέχεσθαι, δι’ αὐτῶν μὲν τῶν εἰλημμένων οὐδὲν συμβαίνει ἀναγκαῖον, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως γίγνεται συλλογισμὸς ὅτι τὸ Β τῷ Γ ἐνδέχεται μηδενὶ ὑπάρχειν, καθάπερ ἐν τοῖς πρότερον· ἔσται γὰρ πάλιν τὸ πρῶτον σχῆμα. ἐὰν δ’ ἀμφότεραι τεθῶσι κατηγορικαί, οὐκ ἔσται συλλογισμός. ὅροι τοῦ μὲν ὑπάρχειν ὑγίεια — ζῷον — ἄνθρωπος, τοῦ δὲ μὴ ὑπάρχειν ὑγίεια — ἵππος — ἄνθρωπος.

Τὸν αὐτὸν δὲ τρόπον ἕξει κἀπὶ τῶν ἐν μέρει συλλογισμῶν. ὅταν μὲν γὰρ ᾖ τὸ καταφατικὸν ὑπάρχον, εἴτε [38a] καθόλου εἴτ’ ἐν μέρει ληφθέν, οὐδεὶς ἔσται συλλογισμός (τοῦτο δ’ ὁμοίως καὶ διὰ τῶν αὐτῶν ὅρων δείκνυται τοῖς πρότερον), ὅταν δὲ τὸ στερητικόν, ἔσται διὰ τῆς ἀντιστροφῆς, καθάπερ ἐν τοῖς πρότερον. πάλιν ἐὰν ἄμφω μὲν τὰ διαστήματα στερητικὰ ληφθῇ, καθόλου δὲ τὸ μὴ ὑπάρχειν, ἐξ αὐτῶν μὲν τῶν προτάσεων οὐκ ἔσται τὸ ἀναγκαῖον, ἀντιστραφέντος δὲ τοῦ ἐνδέχεσθαι καθάπερ ἐν τοῖς πρότερον ἔσται συλλογισμός. ἐὰν δὲ ὑπάρχον μὲν ᾖ τὸ στερητικόν, ἐν μέρει δὲ ληφθῇ, οὐκ ἔσται συλλογισμός, οὔτε καταφατικῆς οὔτε στερητικῆς οὔσης τῆς ἑτέρας προτάσεως. οὐδ’ ὅταν ἀμφότεραι ληφθῶσιν ἀδιόριστοι — ἢ καταφατικαὶ ἢ ἀποφατικαί — ἢ κατὰ μέρος. ἀπόδειξις δ’ ἡ αὐτὴ καὶ διὰ τῶν αὐτῶν ὅρων.

Κεφάλαιο 19

Ἐὰν δ᾽ ἡ μὲν ἐξ ἀνάγκης ἡ δ᾽ ἐνδέχεσθαι σημαίνῃ τῶν προτάσεων, τῆς μὲν στερητικῆς ἀναγκαίας οὔσης ἔσται συλλογισμός, οὐ μόνον ὅτι ἐνδέχεται μὴ ὑπάρχειν, ἀλλὰ καὶ ὅτι οὐχ ὑπάρχει, τῆς δὲ καταφατικῆς οὐκ ἔσται. κείσθω γὰρ τὸ Α τῷ μὲν Β ἐξ ἀνάγκης μηδενὶ ὑπάρχειν, τῷ δὲ Γ παντὶ ἐνδέχεσθαι. ἀντιστραφείσης οὖν τῆς στερητικῆς οὐδὲτὸ Β τῷ Α οὐδενὶ ὑπάρξει· τὸ δὲ Α παντὶ τῷ Γ ἐνεδέχετο· γίνεται δὴ πάλιν διὰ τοῦ πρώτου σχήματος ὁ συλλογισμὸς ὅτι τὸ Β τῷ Γ ἐνδέχεται μηδενὶ ὑπάρχειν. ἅμα δὲ δῆλον ὅτι οὐδ᾽ ὑπάρξει τὸ Β οὐδενὶ τῷ Γ. κείσθω γὰρ ὑπάρχειν· οὐκοῦν εἰ τὸ Α τῷ Β μηδενὶ ἐνδέχεται, τὸ δὲ Β ὑπάρχει τινὶ τῷ Γ, τὸ Α τῷ Γ τινὶ οὐκ ἐνδέχεται· ἀλλὰ παντὶ ὑπέκειτο ἐνδέχεσθαι. τὸν αὐτὸν δὲ τρόπον δειχθήσεται καὶ εἰ πρὸς τῷ Γ τεθείη τὸ στερητικόν.

Πάλιν ἔστω τὸ κατηγορικὸν ἀναγκαῖον, θάτερον δ᾽ ἐνδεχόμενον, καὶ τὸ Α τῷ μὲν Β ἐνδεχέσθω μηδενί, τῷ δὲ Γ παντὶ ὑπαρχέτω ἐξ ἀνάγκης. οὕτως οὖν ἐχόντων τῶν ὅρων οὐδεὶς ἔσται συλλογισμός. συμβαίνει γὰρ τὸ Β τῷ Γ ἐξ ἀνάγκης μὴ ὑπάρχειν. ἔστω γὰρ τὸ μὲν Α λευκόν, ἐφ᾽ ᾧ δὲ τὸ Β ἄνθρωπος, ἐφ᾽ ᾧ δὲ τὸ Γ κύκνος. τὸ δὴ λευκὸν κύκνῳ μὲν ἐξ ἀνάγκης ὑπάρχει, ἀνθρώπῳ δ᾽ ἐνδέχεται μηδενί· καὶ ἄνθρωπος οὐδενὶ κύκνῳ ἐξ ἀνάγκης. ὅτι μὲν οὖν τοῦ ἐνδέχεσθαι οὐκ ἔστι συλλογισμός, φανερόν· τὸ γὰρ ἐξ ἀνάγκης οὐκ ἦν ἐνδεχόμενον. ἀλλὰ μὴν οὐδὲ τοῦ ἀναγκαίου· τὸ γὰρ ἀναγκαῖον ἢ ἐξ ἀμφοτέρων ἀναγκαίων ἢ ἐκ τῆς στερητικῆς συνέβαινεν. ἔτι δὲ καὶ ἐγχωρεῖ τούτων κειμένων τὸ Β τῷ Γ ὑπάρχειν· οὐδὲν γὰρ κωλύει τὸ μὲν Γ ὑπὸ τὸ Β εἶναι, τὸ δὲ Α τῷ μὲν Β παντὶ ἐνδέχεσθαι, τῷ δὲ Γ ἐξ ἀνάγκης ὑπάρχειν, οἷον εἰ τὸ μὲν Γ εἴη ἐγρηγορός, τὸ δὲ Β ζῷον, τὸ δ᾽ ἐφ᾽ ᾧ τὸ Α κίνησις. τῷ μὲν γὰρ ἐγρηγορότι ἐξ [38b] ἀνάγκης κίνησις, ζῴῳ δὲ παντὶ ἐνδέχεται· καὶ πᾶν τὸ ἐγρηγορὸς ζῷον. φανερὸν οὖν ὅτι οὐδὲ τοῦ μὴ ὑπάρχειν, εἴπερ οὕτως ἐχόντων ἀνάγκη ὑπάρχειν. οὐδὲ δὴ τῶν ἀντικειμένων καταφάσεων, ὥστ᾽ οὐδεὶς ἔσται συλλογισμός. ὁμοίως δὲ δειχθήσεται καὶ ἀνάπαλιν τεθείσης τῆς καταφατικῆς.

Ἐὰν δ᾽ ὁμοιοσχήμονες ὦσιν αἱ προτάσεις, στερητικῶν μὲν οὐσῶν ἀεὶ γίνεται συλλογισμὸς ἀντιστραφείσης τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως καθάπερ ἐν τοῖς πρότερον. εἰλήφθω γὰρ τὸ Α τῷ μὲν Β ἐξ ἀνάγκης μὴ ὑπάρχειν, τῷ δὲ Γ ἐνδέχεσθαι μὴ ὑπάρχειν· ἀντιστραφεισῶν οὖν τῶν προτάσεων τὸ μὲν Β τῷ Α οὐδενὶ ὑπάρχει, τὸ δὲ Α παντὶ τῷ Γ ἐνδέχεται· γίνεται δὴ τὸ πρῶτον σχῆμα. κἂν εἰ πρὸς τῷ Γ τεθείη τὸ στερητικόν, ὡσαύτως. ἐὰν δὲ κατηγορικαὶ τεθῶσιν, οὐκ ἔσται συλλογισμός. τοῦ μὲν γὰρ μὴ ὑπάρχειν ἢ τοῦ ἐξ ἀνάγκης μὴ ὑπάρχειν φανερὸν ὅτι οὐκ ἔσται διὰ τὸ μὴ εἰλῆφθαι στερητικὴν πρότασιν μήτ’ ἐν τῷ ὑπάρχειν μήτ’ ἐν τῷ ἐξ ἀνάγκης ὑπάρχειν. ἀλλὰ μὴν οὐδὲ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν· ἐξ ἀνάγκης γὰρ οὕτως ἐχόντων τὸ Β τῷ Γ οὐχ ὑπάρξει, οἷον εἰ τὸ μὲν Α τεθείη λευκόν, ἐφ’ ᾧ δὲ τὸ Β κύκνος, τὸ δὲ Γ ἄνθρωπος. οὐδέ γε τῶν ἀντικειμένων καταφάσεων, ἐπεὶ δέδεικται τὸ Β τῷ Γ ἐξ ἀνάγκης οὐχ ὑπάρχον. οὐκ ἄρα γίνεται συλλογισμὸς ὅλως.

Ὁμοίως δ’ ἕξει κἀπὶ τῶν ἐν μέρει συλλογισμῶν· ὅταν μὲν γὰρ ᾖ τὸ στερητικὸν καθόλου τε καὶ ἀναγκαῖον, ἀεὶ συλλογισμὸς ἔσται καὶ τοῦ ἐνδέχεσθαι καὶ τοῦ μὴ ὑπάρχειν (ἀπόδειξις δὲ διὰ τῆς ἀντιστροφῆς), ὅταν δὲ τὸ καταφατικόν, οὐδέποτε· τὸν αὐτὸν γὰρ τρόπον δειχθήσεται ὃν καὶ ἐν τοῖς καθόλου, καὶ διὰ τῶν αὐτῶν ὅρων. οὐδ’ ὅταν ἀμφότεραι ληφθῶσι καταφατικαί· καὶ γὰρ τούτου ἡ αὐτὴ ἀπόδειξις ἣ καὶ πρότερον. ὅταν δὲ ἀμφότεραι μὲν στερητικαί, καθόλου δὲ καὶ ἀναγκαία ἡ τὸ μὴ ὑπάρχειν σημαίνουσα, δι’ αὐτῶν μὲν τῶν εἰλημμένων οὐκ ἔσται τὸ ἀναγκαῖον, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως ἔσται συλλογισμός, καθάπερ ἐν τοῖς πρότερον. ἐὰν δ’ ἀμφότεραι ἀδιόριστοι ἢ ἐν μέρει τεθῶσιν, οὐκ ἔσται συλλογισμός. ἀπόδειξις δ’ ἡ αὐτὴ καὶ διὰ τῶν αὐτῶν ὅρων.

Φανερὸν οὖν ἐκ τῶν εἰρημένων ὅτι τῆς μὲν στερητικῆς τῆς καθόλου τιθεμένης ἀναγκαίας ἀεὶ γίνεται συλλογισμὸς οὐ μόνον τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν, ἀλλὰ καὶ τοῦ μὴ ὑπάρχειν, τῆς δὲ καταφατικῆς οὐδέποτε. καὶ ὅτι τὸν αὐτὸν τρόπον ἐχόντων ἔν τε τοῖς ἀναγκαίοις καὶ ἐν τοῖς [39a] ὑπάρχουσι γίνεταί τε καὶ οὐ γίνεται συλλογισμός. δῆλον δὲ καὶ ὅτι πάντες ἀτελεῖς οἱ συλλογισμοί, καὶ ὅτι τελειοῦνται διὰ τῶν προειρημένων σχημάτων.

Κεφάλαιο 20

Ἐν δὲ τῷ τελευταίῳ σχήματι καὶ ἀμφοτέρων ἐνδεχομένων καὶ τῆς ἑτέρας ἔσται συλλογισμός. ὅταν μὲν οὖν ἐνδέχεσθαι σημαίνωσιν αἱ προτάσεις, καὶ τὸ συμπέρασμα ἔσται ἐνδεχόμενον· καὶ ὅταν ἡ μὲν ἐνδέχεσθαι ἡ δ' ὑπάρχειν. ὅταν δ' ἡ ἑτέρα τεθῇ ἀναγκαία, ἐὰν μὲν ᾖ καταφατική, οὐκ ἔσται τὸ συμπέρασμα οὔτε ἀναγκαῖον οὔθ' ὑπάρχον, ἐὰν δ' ᾖ στερητική, τοῦ μὴ ὑπάρχειν ἔσται συλλογισμός, καθάπερ καὶ ἐν τοῖς πρότερον· ληπτέον δὲ καὶ ἐν τούτοις ὁμοίως τὸ ἐν τοῖς συμπεράσμασιν ἐνδεχόμενον.

Ἔστωσαν δὴ πρῶτον ἐνδεχόμεναι, καὶ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ἐνδεχέσθω ὑπάρχειν. ἐπεὶ οὖν ἀντιστρέφει τὸ καταφατικὸν ἐπὶ μέρους, τὸ δὲ Β παντὶ τῷ Γ ἐνδέχεται, καὶ τὸ Γ τινὶ τῷ Β ἐνδέχοιτ' ἄν. ὥστ' εἰ τὸ μὲν Α παντὶ τῷ Γ ἐνδέχεται, τὸ δὲ Γ τινὶ τῷ Β, ἀνάγκη καὶ τὸ Α τινὶ τῷ Β ἐνδέχεσθαι· γίγνεται γὰρ τὸ πρῶτον σχῆμα. καὶ εἰ τὸ μὲν Α ἐνδέχεται μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Β παντὶ τῷ Γ, ἀνάγκη τὸ Α τινὶ τῷ Β ἐνδέχεσθαι μὴ ὑπάρχειν· ἔσται γὰρ πάλιν τὸ πρῶτον σχῆμα διὰ τῆς ἀντιστροφῆς. εἰ δ' ἀμφότεραι στερητικαὶ τεθείησαν, ἐξ αὐτῶνμὲν τῶν εἰλημμένων οὐκ ἔσται τὸ ἀναγκαῖον, ἀντιστραφεισῶν δὲ τῶν προτάσεων ἔσται συλλογισμός, καθάπερ ἐν τοῖς πρότερον. εἰ γὰρ τὸ Α καὶ τὸ Β τῷ Γ ἐνδέχεται μὴ ὑπάρχειν, ἐὰν μεταληφθῇ τὸ ἐνδέχεσθαι ὑπάρχειν, πάλιν ἔσται τὸ πρῶτον σχῆμα διὰ τῆς ἀντιστροφῆς. εἰ δ' ὁ μέν ἐστι καθόλου τῶν ὅρων ὁ δ' ἐν μέρει, τὸν αὐτὸν τρόπον ἐχόντων τῶν ὅρων ὅνπερ ἐπὶ τοῦ ὑπάρχειν, ἔσται τε καὶ οὐκ ἔσται συλλογισμός. ἐνδεχέσθω γὰρ τὸ μὲν Α παντὶ τῷ Γ, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχειν. ἔσται δὴ πάλιν τὸ πρῶτον σχῆμα τῆς ἐν μέρει προτάσεως ἀντιστραφείσης· εἰ γὰρ τὸ Α παντὶ τῷ Γ, τὸ δὲ Γ τινὶ τῷ Β, τὸ Α τινὶ τῷ Β ἐνδέχεται. καὶ εἰ πρὸς τῷ Β Γ τεθείη τὸ καθόλου, ὡσαύτως. ὁμοίως δὲ καὶ εἰ τὸ μὲν Α Γ στερητικὸν εἴη, τὸ δὲ Β Γ καταφατικόν· ἔσται γὰρ πάλιν τὸ πρῶτον σχῆμα διὰ τῆς ἀντιστροφῆς. εἰ δ' ἀμφότεραι στερητικαὶ τεθείησαν, ἡ μὲν καθόλου ἡ δ' ἐν μέρει, δι' αὐτῶν μὲν τῶν [39b] εἰλημμένων οὐκ ἔσται συλλογισμός, ἀντιστραφεισῶν δ' ἔσται, καθάπερ ἐν τοῖς πρότερον. ὅταν δὲ ἀμφότεραι ἀδιόριστοι ἢ ἐν μέρει ληφθῶσιν, οὐκ ἔσται συλλογισμός· καὶ γὰρ παντὶ ἀνάγκη τὸ Α τῷ Β καὶ μηδενὶ ὑπάρχειν. ὅροι τοῦ ὑπάρχειν ζῷον — ἄνθρωπος — λευκόν, τοῦ μὴ ὑπάρχειν ἵππος — ἄνθρωπος — λευκόν, μέσον λευκόν.

Κεφάλαιο 21

Ἐὰν δὲ ἡ μὲν ὑπάρχειν ἡ δ’ ἐνδέχεσθαι σημαίνῃ τῶν προτάσεων, τὸ μὲν συμπέρασμα ἔσται ὅτι ἐνδέχεται καὶ οὐχ ὅτι ὑπάρχει, συλλογισμὸς δ’ ἔσται τὸν αὐτὸν τρόπον ἐχόντων τῶν ὅρων ὃν καὶ ἐν τοῖς πρότερον. ἔστωσαν γὰρ πρῶτον κατηγορικοί, καὶ τὸ μὲν Α παντὶ τῷ Γ ὑπαρχέτω, τὸ δὲ Β παντὶ ἐνδεχέσθω ὑπάρχειν. ἀντιστραφέντος οὖν τοῦ Β Γ τὸ πρῶτον ἔσται σχῆμα, καὶ τὸ συμπέρασμα ὅτι ἐνδέχεται τὸ Α τινὶ τῷ Β ὑπάρχειν· ὅτε γὰρ ἡ ἑτέρα τῶνπροτάσεων ἐν τῷ πρώτῳ σχήματι σημαίνοι ἐνδέχεσθαι, καὶ τὸ συμπέρασμα ἦν ἐνδεχόμενον. ὁμοίως δὲ καὶ εἰ τὸ μὲν Β Γ ὑπάρχειν τὸ δὲ Α Γ ἐνδέχεσθαι, καὶ εἰ τὸ μὲν Α Γ στερητικὸν τὸ δὲ Β Γ κατηγορικόν, ὑπάρχοι δ’ ὁποτερονοῦν, ἀμφοτέρως ἐνδεχόμενον ἔσται τὸ συμπέρασμα· γίνεται γὰρ πάλιν τὸ πρῶτον σχῆμα, δέδεικται δ’ ὅτι τῆς ἑτέρας προτάσεως ἐνδέχεσθαι σημαινούσης ἐν αὐτῷ καὶ τὸ συμπέρασμα ἔσται ἐνδεχόμενον. εἰ δὲ τὸ στερητικὸν τεθείη πρὸς τὸ ἔλαττον ἄκρον, ἢ καὶ ἄμφω ληφθείη στερητικά, δι’ αὐτῶν μὲν τῶν κειμένων οὐκ ἔσται συλλογισμός, ἀντιστραφέντων δ’ ἔσται, καθάπερ ἐν τοῖς πρότερον.

Εἰ δ’ ἡ μὲν καθόλου τῶν προτάσεων ἡ δ’ ἐν μέρει, κατηγορικῶν μὲν οὐσῶν ἀμφοτέρων, ἢ τῆς μὲν καθόλου στερητικῆς τῆς δ’ ἐν μέρει καταφατικῆς, ὁ αὐτὸς τρόπος ἔσται τῶν συλλογισμῶν· πάντες γὰρ περαίνονται διὰ τοῦ πρώτου σχήματος. ὥστε φανερὸν ὅτι τοῦ ἐνδέχεσθαι καὶ οὐ τοῦ ὑπάρχειν ἔσται ὁ συλλογισμός. εἰ δ’ ἡ μὲν καταφατικὴ καθόλου ἡ δὲ στερητικὴ ἐν μέρει, διὰ τοῦ ἀδυνάτου ἔσται ἡ ἀπόδειξις. ὑπαρχέτω γὰρ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α ἐνδεχέσθω τινὶ τῷ Γ μὴ ὑπάρχειν· ἀνάγκη δὴ τὸ Α ἐνδέχεσθαι τινὶ τῷ Β μὴ ὑπάρχειν. εἰ γὰρ παντὶ τῷ Β τὸ Α ὑπάρχει ἐξ ἀνάγκης, τὸ δὲ Β παντὶ τῷ Γ κεῖται ὑπάρχειν, τὸ Α παντὶ τῷ Γ ἐξ ἀνάγκης ὑπάρξει· τοῦτο γὰρ δέδεικται πρότερον. ἀλλ’ ὑπέκειτο τινὶ ἐνδέχεσθαι μὴ ὑπάρχειν. [40a]

Ὅταν δ’ ἀδιόριστοι ἢ ἐν μέρει ληφθῶσιν ἀμφότεραι, οὐκ ἔσται συλλογισμός. ἀπόδειξις δ’ ἡ αὐτὴ ἣ καὶ ἐν τοῖς πρότερον, καὶ διὰ τῶν αὐτῶν ὅρων.

Κεφάλαιο 22

Εἰ δ’ ἐστὶν ἡ μὲν ἀναγκαία τῶν προτάσεων ἡ δ’ ἐνδεχομένη, κατηγορικῶν μὲν ὄντων τῶν ὅρων ἀεὶ τοῦ ἐνδέχεσθαι ἔσται συλλογισμός, ὅταν δ’ ᾖ τὸ μὲν κατηγορικὸν τὸ δὲ στερητικόν, ἐὰν μὲν ᾖ τὸ καταφατικὸν ἀναγκαῖον, τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν, ἐὰν δὲ τὸ στερητικόν, καὶ τοῦ ἐνδέχεσθαι καὶ τοῦ μὴ ὑπάρχειν. τοῦ δ’ ἐξ ἀνάγκης μὴ ὑπάρχειν οὐκ ἔσται συλλογισμός, ὥσπερ οὐδ’ ἐν τοῖς ἑτέροις σχήμασιν.

Ἔστωσαν δὴ κατηγορικοὶ πρῶτον οἱ ὅροι, καὶ τὸ μὲν Α παντὶ τῷ Γ ὑπαρχέτω ἐξ ἀνάγκης, τὸ δὲ Β παντὶ ἐνδεχέσθω ὑπάρχειν. ἐπεὶ οὖν τὸ μὲν Α παντὶ τῷ Γ ἀνάγκη, τὸ δὲ Γ τινὶ τῷ Β ἐνδέχεται, καὶ τὸ Ατινὶ τῷ Β ἐνδεχόμενον ἔσται καὶ οὐχ ὑπάρχον· οὕτω γὰρ συνέπιπτεν ἐπὶ τοῦ πρώτου σχήματος. ὁμοίως δὲ δειχθήσεται καὶ εἰ τὸ μὲν Β Γ τεθείη ἀναγκαῖον, τὸ δὲ Α Γ ἐνδεχόμενον. πάλιν ἔστω τὸ μὲν κατηγορικὸν τὸ δὲ στερητικόν, ἀναγκαῖον δὲ τὸ κατηγορικόν· καὶ τὸ μὲν Α ἐνδεχέσθω μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Β παντὶ ὑπαρχέτω ἐξ ἀνάγκης. ἔσται δὴ πάλιν τὸ πρῶτον σχῆμα· καὶ γὰρ ἡ στερητικὴ πρότασις ἐνδέχεσθαι σημαίνει· φανερὸν οὖν ὅτι τὸ συμπέρασμα ἔσται ἐνδεχόμενον· ὅτε γὰρ οὕτως ἔχοιεν αἱ προτάσεις ἐν τῷ πρώτῳ σχήματι, καὶ τὸ συμπέρασμα ἦν ἐνδεχόμενον. εἰ δ’ ἡ στερητικὴ πρότασις ἀναγκαία, τὸ συμπέρασμα ἔσται καὶ ὅτι ἐνδέχεται τινὶ μὴ ὑπάρχειν καὶ ὅτι οὐχ ὑπάρχει. κείσθω γὰρ τὸ Α τῷ Γ μὴ ὑπάρχειν ἐξ ἀνάγκης, τὸ δὲ Β παντὶ ἐνδέχεσθαι. ἀντιστραφέντος οὖν τοῦ Β Γ καταφατικοῦ τὸ πρῶτον ἔσται σχῆμα, καὶ ἀναγκαία ἡ στερητικὴ πρότασις. ὅτε δ’ οὕτως ἔχοιεν αἱ προτάσεις, συνέβαινε τὸ Α τῷ Γ καὶ ἐνδέχεσθαι τινὶ μὴ ὑπάρχειν καὶ μὴ ὑπάρχειν, ὥστε καὶ τὸ Α τῷ Β ἀνάγκη τινὶ μὴ ὑπάρχειν. ὅταν δὲ τὸ στερητικὸν τεθῇ πρὸς τὸ ἔλαττον ἄκρον, ἐὰν μὲν ἐνδεχόμενον, ἔσται συλλογισμὸς μεταληφθείσης τῆς προτάσεως, καθάπερ ἐν τοῖς πρότερον, ἐὰν δ’ ἀναγκαῖον, οὐκ ἔσται· καὶ γὰρ παντὶ ἀνάγκη καὶ οὐδενὶ ἐνδέχεται ὑπάρχειν. ὅροι τοῦ παντὶ ὑπάρχειν ὕπνος — ἵππος καθεύδων — ἄνθρωπος, τοῦ μηδενὶ ὕπνος — ἵππος ἐγρηγορώς — ἄνθρωπος.

Ὁμοίως δ’ ἕξει καὶ εἰ ὁ μὲν καθόλου τῶν ὅρων ὁ δ’ ἐν μέρει πρὸς τὸ μέσον· κατηγορικῶν μὲν γὰρ ὄντων [40b] ἀμφοτέρων τοῦ ἐνδέχεσθαι καὶ οὐ τοῦ ὑπάρχειν ἔσται συλλογισμός, καὶ ὅταν τὸ μὲν στερητικὸν ληφθῇ τὸ δὲ καταφατικόν, ἀναγκαῖον δὲ τὸ καταφατικόν. ὅταν δὲ τὸ στερητικὸν ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται τοῦ μὴ ὑπάρχειν· ὁ γὰραὐτὸς τρόπος ἔσται τῆς δείξεως καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων. ἀνάγκη γὰρ διὰ τοῦ πρώτου σχήματος τελειοῦσθαι τοὺς συλλογισμούς, ὥστε καθάπερ ἐν ἐκείνοις, καὶ ἐπὶ τούτων ἀναγκαῖον συμπίπτειν. ὅταν δὲ τὸ στερητικὸν καθόλου ληφθὲν τεθῇ πρὸς τὸ ἔλαττον ἄκρον, ἐὰν μὲν ἐνδεχόμενον, ἔσται συλλογισμὸς διὰ τῆς ἀντιστροφῆς, ἐὰν δ’ ἀναγκαῖον, οὐκ ἔσται. δειχθήσεται δὲ τὸν αὐτὸν τρόπον ὃν καὶ ἐν τοῖς καθόλου, καὶ διὰ τῶν αὐτῶν ὅρων. φανερὸν οὖν καὶ ἐν τούτῳ τῷ σχήματι πότε καὶ πῶς ἔσται συλλογισμός, καὶ πότε τοῦ ἐνδέχεσθαι καὶ πότε τοῦ ὑπάρχειν. δῆλον δὲ καὶ ὅτι πάντες ἀτελεῖς, καὶ ὅτι τελειοῦνται διὰ τοῦ πρώτου σχήματος.

Κεφάλαιο 23

Ὅτι μὲν οὖν οἱ ἐν τούτοις τοῖς σχήμασι συλλογισμοὶ τελειοῦνταί τε διὰ τῶν ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμῶν καὶ εἰς τούτους ἀνάγονται, δῆλον ἐκ τῶν εἰρημένων· ὅτι δ’ ἁπλῶς πᾶς συλλογισμὸς οὕτως ἕξει, νῦν ἔσται φανερόν, ὅταν δειχθῇ πᾶς γινόμενος διὰ τούτων τινὸς τῶν σχημάτων. Ἀνάγκη δὴ πᾶσαν ἀπόδειξιν καὶ πάντα συλλογισμὸν ἢ ὑπάρχον τι ἢ μὴ ὑπάρχον δεικνύναι, καὶ τοῦτο ἢ καθόλου ἢ κατὰ μέρος, ἔτι ἢ δεικτικῶς ἢ ἐξ ὑποθέσεως. τοῦ δ’ ἐξ ὑποθέσεως μέρος τὸ διὰ τοῦ ἀδυνάτου. πρῶτον οὖν εἴπωμεν περὶ τῶν δεικτικῶν· τούτων γὰρ δειχθέντων φανερὸν ἔσται καὶ ἐπὶ τῶν εἰς τὸ ἀδύνατον καὶ ὅλως τῶν ἐξ ὑποθέσεως.

Εἰ δὴ δέοι τὸ Α κατὰ τοῦ Β συλλογίσασθαι ἢ ὑπάρχον ἢ μὴ ὑπάρχον, ἀνάγκη λαβεῖν τι κατά τινος. εἰ μὲν οὖν τὸ Α κατὰ τοῦ Β ληφθείη, τὸ ἐξ ἀρχῆς ἔσται εἰλημμένον. εἰ δὲ κατὰ τοῦ Γ, τὸ δὲ Γ κατὰ μηδενός, μηδ’ ἄλλο κατ’ ἐκείνου, μηδὲ κατὰ τοῦ Α ἕτερον, οὐδεὶς ἔσται συλλογισμός· τῷ γὰρ ἓν καθ’ ἑνὸς ληφθῆναι οὐδὲν συμβαίνει ἐξ ἀνάγκης. ὥστε προσληπτέον καὶ ἑτέραν πρότασιν. ἐὰν μὲν οὖν ληφθῇ τὸ Α κατ’ ἄλλου ἢ ἄλλο κατὰ τοῦ Α, ἢ κατὰ τοῦ Γ ἕτερον, εἶναι μὲν συλλογισμὸν οὐδὲν κωλύει, πρὸς μέντοι τὸ Β οὐκ ἔσται διὰ τῶν εἰλημμένων. οὐδ’ ὅταν τὸ Γ ἑτέρῳ, κἀκεῖνο ἄλλῳ, καὶ τοῦτο ἑτέρῳ, μὴ [41a] συνάπτῃ δὲ πρὸς τὸ Β, οὐδ’ οὕτως ἔσται πρὸς τὸ Β συλλογισμός. ὅλως γὰρ εἴπομεν ὅτι οὐδεὶς οὐδέποτε ἔσται συλλογισμὸς ἄλλου κατ’ ἄλλου μὴ ληφθέντος τινὸς μέσου, ὃ πρὸς ἑκάτερον ἔχει πως ταῖς κατηγορίαις· ὁ μὲν γὰρ συλλογισμὸς ἁπλῶς ἐκ προτάσεών ἐστιν, ὁ δὲ πρὸς τόδε συλλογισμὸς ἐκ τῶν πρὸς τόδε προτάσεων, ὁ δὲ τοῦδε πρὸς τόδε διὰ τῶν τοῦδε πρὸς τόδε προτάσεων. ἀδύνατον δὲ πρὸς τὸ Β λαβεῖν πρότασιν μηδὲν μήτε κατηγοροῦντας αὐτοῦ μήτ’ ἀπαρνουμένους, ἢ πάλιν τοῦ Α πρὸς τὸ Β μηδὲν κοινὸν λαμβάνοντας ἀλλ’ ἑκατέρου ἴδια ἄττα κατηγοροῦντας ἢ ἀπαρνουμένους. ὥστε ληπτέον τι μέσον ἀμφοῖν, ὃ συνάψει τὰς κατηγορίας, εἴπερ ἔσται τοῦδε πρὸς τόδε συλλογισμός. εἰ οὖν ἀνάγκη μέν τι λαβεῖν πρὸς ἄμφω κοινόν, τοῦτο δ’ ἐνδέχεται τριχῶς (ἢ γὰρ τὸ Α τοῦ Γ καὶ τὸ Γ τοῦ Β κατηγορήσαντας, ἢ τὸ Γ κατ’ ἀμφοῖν, ἢ ἄμφω κατὰ τοῦ Γ), ταῦτα δ’ ἐστὶ τὰ εἰρημένα σχήματα, φανερὸν ὅτι πάντα συλλογισμὸν ἀνάγκη γίνεσθαι διὰ τούτων τινὸς τῶν σχημάτων. ὁ γὰρ αὐτὸς λόγος καὶ εἰ διὰ πλειόνων συνάπτοι πρὸς τὸ Β· ταὐτὸ γὰρ ἔσται σχῆμα καὶ ἐπὶ τῶν πολλῶν.

Ὅτι μὲν οὖν οἱ δεικτικοὶ περαίνονται διὰ τῶν προειρημένων σχημάτων, φανερόν· ὅτι δὲ καὶ οἱ εἰς τὸ ἀδύνατον, δῆλον ἔσται διὰ τούτων. πάντες γὰρ οἱ διὰ τοῦ ἀδυνάτου περαίνοντες τὸ μὲν ψεῦδος συλλογίζονται, τὸ δ' ἐξ ἀρχῆς ἐξὑποθέσεως δεικνύουσιν, ὅταν ἀδύνατόν τι συμβαίνῃ τῆς ἀντιφάσεως τεθείσης, οἷον ὅτι ἀσύμμετρος ἡ διάμετρος διὰ τὸ γίνεσθαι τὰ περιττὰ ἴσα τοῖς ἀρτίοις συμμέτρου τεθείσης. τὸ μὲν οὖν ἴσα γίνεσθαι τὰ περιττὰ τοῖς ἀρτίοις συλλογίζεται, τὸ δ' ἀσύμμετρον εἶναι τὴν διάμετρον ἐξ ὑποθέσεως δείκνυσιν, ἐπεὶ ψεῦδος συμβαίνει διὰ τὴν ἀντίφασιν. τοῦτο γὰρ ἦν τὸ διὰ τοῦ ἀδυνάτου συλλογίσασθαι, τὸ δεῖξαί τι ἀδύνατον διὰ τὴν ἐξ ἀρχῆς ὑπόθεσιν. ὥστ' ἐπεὶ τοῦ ψεύδους γίνεται συλλογισμὸς δεικτικὸς ἐν τοῖς εἰς τὸ ἀδύνατον ἀπαγομένοις, τὸ δ' ἐξ ἀρχῆς ἐξ ὑποθέσεως δείκνυται, τοὺς δὲ δεικτικοὺς πρότερον εἴπομεν ὅτι διὰ τούτων περαίνονται τῶν σχημάτων, φανερὸν ὅτι καὶ οἱ διὰ τοῦ ἀδυνάτου συλλογισμοὶ διὰ τούτων ἔσονται τῶν σχημάτων. ὡσαύτως δὲ καὶ οἱ ἄλλοι πάντες οἱ ἐξ ὑποθέσεως· ἐν ἅπασι γὰρ ὁ μὲν συλλογισμὸς γίνεται πρὸς τὸ μεταλαμβανόμενον, τὸ δ' ἐξ ἀρχῆς περαίνεται δι' ὁμολογίας ἤ τινος ἄλλης [41b] ὑποθέσεως. εἰ δὲ τοῦτ' ἀληθές, πᾶσαν ἀπόδειξιν καὶ πάντα συλλογισμὸν ἀνάγκη γίνεσθαι διὰ τριῶν τῶν προειρημένων σχημάτων. τούτου δὲ δειχθέντος δῆλον ὡς ἅπας τε συλλογισμὸς ἐπιτελεῖται διὰ τοῦ πρώτου σχήματος καὶ ἀνάγεται εἰς τοὺς ἐν τούτῳ καθόλου συλλογισμούς.

Κεφάλαιο 24

Ἔτι τε ἐν ἅπαντι δεῖ κατηγορικόν τινα τῶν ὅρων εἶναι καὶ τὸ καθόλου ὑπάρχειν· ἄνευ γὰρ τοῦ καθόλου ἢ οὐκ ἔσται συλλογισμὸς ἢ οὐ πρὸς τὸ κείμενον, ἢ τὸ ἐξ ἀρχῆς αἰτήσεται. κείσθω γὰρ τὴν μουσικὴν ἡδονὴν εἶναι σπουδαίαν. εἰ μὲν οὖν ἀξιώσειεν ἡδονὴν εἶναι σπουδαίαν μὴ προσθεὶς τὸ πᾶσαν, οὐκ ἔσται συλλογισμός· εἰ δὲ τινὰ ἡδονήν, εἰ μὲν ἄλλην, οὐδὲν πρὸς τὸ κείμενον, εἰ δ' αὐτὴν ταύτην, τὸ ἐξ ἀρχῆς λαμβάνει. μᾶλλον δὲ γίνεται φανερὸν ἐν τοῖς διαγράμμασιν, οἷον ὅτι τοῦ ἰσοσκελοῦς ἴσαι αἱ πρὸς τῇ βάσει. ἔστωσαν εἰς τὸ κέντρον ἠγμέναι αἱ Α Β. εἰ οὖν ἴσην λαμβάνοι τὴν Α Γ γωνίαν τῇ Β Δ μὴ ὅλως ἀξιώσας ἴσας τὰς τῶν ἡμικυκλίων, καὶ πάλιν τὴν Γ τῇ Δ μὴ πᾶσαν προσλαβὼν τὴν τοῦ τμήματος, ἔτι δ' ἀπ' ἴσων οὐσῶν τῶν ὅλων γωνιῶν καὶ ἴσων ἀφῃρημένων ἴσας εἶναι τὰς λοιπὰς τὰς Ε Ζ, τὸ ἐξ ἀρχῆς αἰτήσεται, ἐὰν μὴ λάβῃ ἀπὸ τῶν ἴσων ἴσων ἀφαιρουμένων ἴσα λείπεσθαι. φανερὸν οὖν ὅτι ἐν ἅπαντι δεῖ τὸ καθόλου ὑπάρχειν, καὶ ὅτι τὸ μὲν καθόλου ἐξ ἁπάντων τῶν ὅρων καθόλου δείκνυται, τὸ δ' ἐν μέρει καὶ οὕτως κἀκείνως, ὥστ' ἐὰν μὲν ᾖ τὸ συμπέρασμα καθόλου, καὶ τοὺς ὅρους ἀνάγκη καθόλου εἶναι, ἐὰν δ' οἱ ὅροι καθόλου, ἐνδέχεται τὸ συμπέρασμα μὴ εἶναι καθόλου. δῆλον δὲ καὶ ὅτι ἐν ἅπαντι συλλογισμῷ ἢ ἀμφοτέρας ἢ τὴν ἑτέραν πρότασιν ὁμοίαν ἀνάγκη γίνεσθαι τῷ συμπεράσματι. λέγω δ' οὐ μόνον τῷ καταφατικὴν εἶναι ἢ στερητικήν, ἀλλὰ καὶ τῷ ἀναγκαίαν ἢ ὑπάρχουσαν ἢ ἐνδεχομένην. ἐπισκέψασθαι δὲ δεῖ καὶ τὰς ἄλλας κατηγορίας.

Φανερὸν δὲ καὶ ἁπλῶς πότ' ἔσται καὶ πότ' οὐκ ἔσται συλλογισμός, καὶ πότε δυνατὸς καὶ πότε τέλειος, καὶ ὅτι συλλογισμοῦ ὄντος ἀναγκαῖον ἔχειν τοὺς ὅρους κατά τινα τῶν εἰρημένων τρόπων.

Κεφάλαιο 25

Δῆλον δὲ καὶ ὅτι πᾶσα ἀπόδειξις ἔσται διὰ τριῶν ὅρων καὶ οὐ πλειόνων, ἐὰν μὴ δι’ ἄλλων καὶ ἄλλων τὸ αὐτὸ συμπέρασμα γίνηται, οἷον τὸ Ε διά τε τῶν Α Β καὶ διὰ τῶν Γ Δ, ἢ διὰ τῶν Α Β καὶ Α Γ Δ· πλείω γὰρ μέσα τῶν αὐτῶν οὐδὲν εἶναι κωλύει. τούτων δ’ ὄντων οὐχ εἷς ἀλλὰ [42a] πλείους εἰσὶν οἱ συλλογισμοί. ἢ πάλιν ὅταν ἑκάτερον τῶν Α Β διὰ συλλογισμοῦ ληφθῇ (οἷον τὸ Α διὰ τῶν Δ Ε καὶ πάλιν τὸ Β διὰ τῶν Ζ Θ), ἢ τὸ μὲν ἐπαγωγῇ, τὸ δὲ συλλογισμῷ. ἀλλὰ καὶ οὕτως πλείους οἱ συλλογισμοί· πλείω γὰρτὰ συμπεράσματα ἐστιν, οἷον τό τε Α καὶ τὸ Β καὶ τὸ Γ. Εἰ δ’ οὖν μὴ πλείους ἀλλ’ εἷς, οὕτω μὲν ἐνδέχεται γενέσθαι διὰ πλειόνων τὸ αὐτὸ συμπέρασμα, ὡς δὲ τὸ Γ διὰ τῶν Α Β, ἀδύνατον. ἔστω γὰρ τὸ Ε συμπεπερασμένον ἐκ τῶν Α Β Γ Δ. οὐκοῦν ἀνάγκη τι αὐτῶν ἄλλο πρὸς ἄλλο εἰλῆφθαι, τὸ μὲν ὡς ὅλον τὸ δ’ ὡς μέρος· τοῦτο γὰρ δέδεικται πρότερον, ὅτι ὄντος συλλογισμοῦ ἀναγκαῖον οὕτως τινὰς ἔχειν τῶν ὅρων. ἐχέτω οὖν τὸ Α οὕτως πρὸς τὸ Β. ἔστιν ἄρα τι ἐξ αὐτῶν συμπέρασμα. οὐκοῦν ἤτοι τὸ Ε ἢ τῶν Γ Δ θάτερον ἢ ἄλλο τι παρὰ ταῦτα. καὶ εἰ μὲν τὸ Ε, ἐκ τῶν Α Β μόνον ἂν εἴη ὁ συλλογισμός. τὰ δὲ Γ Δ εἰ μὲν ἔχει οὕτως ὥστ’ εἶναι τὸ μὲν ὡς ὅλον τὸ δ’ ὡς μέρος, ἔσται τι καὶ ἐξ ἐκείνων, καὶ ἤτοι τὸ Ε ἢ τῶν Α Β θάτερον ἢ ἄλλο τι παρὰ ταῦτα. καὶ εἰ μὲν τὸ Ε ἢ τῶν Α Β θάτερον, ἢ πλείους ἔσονται οἱ συλλογισμοί, ἢ ὡς ἐνεδέχετο ταὐτὸ διὰ πλειόνων ὅρων περαίνεσθαι συμβαίνει· εἰ δ’ ἄλλο τι παρὰ ταῦτα, πλείους ἔσονται καὶ ἀσύναπτοι οἱ συλλογισμοὶ πρὸς ἀλλήλους. εἰ δὲ μὴ οὕτως ἔχοι τὸ Γ πρὸς τὸ Δ ὥστε ποιεῖν συλλογισμόν, μάτην ἔσται εἰλημμένα, εἰ μὴ ἐπαγωγῆς ἢ κρύψεως ἤ τινος ἄλλου τῶν τοιούτων χάριν.

Εἰ δ’ ἐκ τῶν Α Β μὴ τὸ Ε ἀλλ’ ἄλλο τι γίγνεται συμπέρασμα, ἐκ δὲ τῶν Γ Δ ἢ τούτων θάτερον ἢ ἄλλο παρὰ ταῦτα, πλείους τε οἱ συλλογισμοὶ γίνονται καὶ οὐ τοῦ ὑποκειμένου· ὑπέκειτο γὰρ εἶναι τοῦ Ε τὸν συλλογισμόν. εἰ δὲ μὴ γίνεται ἐκ τῶν Γ Δ μηδὲν συμπέρασμα, μάτην τε εἰλῆφθαι αὐτὰ συμβαίνει καὶ μὴ τοῦ ἐξ ἀρχῆς εἶναι τὸν συλλογισμόν. ὥστε φανερὸν ὅτι πᾶσα ἀπόδειξις καὶ πᾶς συλλογισμὸς ἔσται διὰ τριῶν ὅρων μόνον.

Τούτου δ’ ὄντος φανεροῦ, δῆλον ὡς καὶ ἐκ δύο προτάσεων καὶ οὐ πλειόνων (οἱ γὰρ τρεῖς ὅροι δύο προτάσεις), εἰμὴ προσλαμβάνοιτό τι, καθάπερ ἐν τοῖς ἐξ ἀρχῆς ἐλέχθη, πρὸς τὴν τελείωσιν τῶν συλλογισμῶν. φανερὸν οὖν ὡς ἐν ᾧ λόγῳ συλλογιστικῷ μὴ ἄρτιαί εἰσιν αἱ προτάσεις δι’ ὧν γίνεται τὸ συμπέρασμα τὸ κύριον (ἔνια γὰρ τῶν ἄνωθεν συμπερασμάτων ἀναγκαῖον εἶναι προτάσεις), οὗτος ὁ λόγος ἢ οὐ συλλελόγισται ἢ πλείω τῶν ἀναγκαίων ἠρώτηκε πρὸς τὴν θέσιν. [42b]

Κατὰ μὲν οὖν τὰς κυρίας προτάσεις λαμβανομένων τῶν συλλογισμῶν, ἅπας ἔσται συλλογισμὸς ἐκ προτάσεων μὲν ἀρτίων ἐξ ὅρων δὲ περιττῶν· ἑνὶ γὰρ πλείους οἱ ὅροι τῶν προτάσεων. ἔσται δὲ καὶ τὰ συμπεράσματα ἡμίση τῶν προτάσεων. ὅταν δὲ διὰ προσυλλογισμῶν περαίνηται ἢ διὰ πλειόνων μέσων συνεχῶν, οἷον τὸ Α Β διὰ τῶν Γ Δ, τὸ μὲν πλῆθος τῶν ὅρων ὡσαύτως ἑνὶ ὑπερέξει τὰς προτάσεις (ἢ γὰρ ἔξωθεν ἢ εἰς τὸ μέσον τεθήσεται ὁ παρεμπίπτων ὅρος· ἀμφοτέρως δὲ συμβαίνει ἑνὶ ἐλάττω εἶναι τὰ διαστήματα τῶν ὅρων), αἱ δὲ προτάσεις ἴσαι τοῖς διαστήμασιν· οὐ μέντοι αἰεὶ αἱ μὲν ἄρτιαι ἔσονται οἱ δὲ περιττοί, ἀλλ’ ἐναλλάξ, ὅταν μὲν αἱ προτάσεις ἄρτιαι, περιττοὶ οἱ ὅροι, ὅταν δ’ οἱ ὅροι ἄρτιοι, περιτταὶ αἱ προτάσεις· ἅμα γὰρ τῷ ὅρῳ μία προστίθεται πρότασις, ἂν ὁποθενοῦν προστεθῇ ὁ ὅρος, ὥστ’ ἐπεὶ αἱ μὲν ἄρτιαι οἱ δὲ περιττοὶ ἦσαν, ἀνάγκη παραλλάττειν τῆς αὐτῆς προσθέσεως γινομένης. τὰ δὲ συμπεράσματα οὐκέτι τὴν αὐτὴν ἕξει τάξιν οὔτε πρὸς τοὺς ὅρους οὔτε πρὸς τὰς προτάσεις· ἑνὸς γὰρ ὅρου προστιθεμένου συμπεράσματα προστεθήσεται ἑνὶ ἐλάττω τῶν προϋπαρχόντων ὅρων· πρὸς μόνον γὰρ τὸν ἔσχατον οὐ ποιεῖ συμπέρασμα, πρὸς δὲ τοὺς ἄλλους πάντας, οἷον εἰ τῷ Α Β Γ πρόσκειται τὸ Δ, εὐθὺς καὶ συμπεράσματα δύο πρόσκειται, τό τε πρὸς τὸ Α καὶ τὸ πρὸς τὸ Β. ὁμοίως δὲ κἀπὶ τῶν ἄλλων. κἂν εἰς τὸ μέσον δὲ παρεμπίπτῃ, τὸν αὐτὸν τρόπον· πρὸς ἕνα γὰρ μόνον οὐ ποιήσει συλλογισμόν. ὥστε πολὺ πλείω τὰ συμπεράσματα καὶ τῶν ὅρων ἔσται καὶ τῶν προτάσεων.

Κεφάλαιο 26

Ἐπεὶ δ’ ἔχομεν περὶ ὧν οἱ συλλογισμοί, καὶ ποῖον ἐν ἑκάστῳ σχήματι καὶ ποσαχῶς δείκνυται, φανερὸν ἡμῖν ἐστὶ καὶ ποῖον πρόβλημα χαλεπὸν καὶ ποῖον εὐεπιχείρητον· τὸ μὲν γὰρ ἐν πλείοσι σχήμασι καὶ διὰ πλειόνων πτώσεων περαινόμενον ῥᾷον, τὸ δ’ ἐν ἐλάττοσι καὶ δι’ ἐλαττόνων δυσεπιχειρητότερον. τὸ μὲν οὖν καταφατικὸν τὸ καθόλου διὰ τοῦ πρώτου σχήματος δείκνυται μόνου, καὶ διὰ τούτου μοναχῶς· τὸ δὲ στερητικὸν διά τε τοῦ πρώτου καὶ διὰ τοῦ μέσου, καὶ διὰ μὲν τοῦ πρώτου μοναχῶς, διὰ δὲ τοῦ μέσου διχῶς· τὸ δ’ ἐν μέρει καταφατικὸν διὰ τοῦ πρώτου καὶ διὰ τοῦ ἐσχάτου, μοναχῶς μὲν διὰ τοῦ πρώτου, τριχῶς δὲ διὰ τοῦ ἐσχάτου. τὸ δὲ στερητικὸν τὸ κατὰ μέρος ἐν ἅπασι τοῖς σχήμασι δείκνυται, πλὴν ἐν μὲν τῷ πρώτῳ μοναχῶς, ἐν δὲ τῷ μέσῳ καὶ τῷ ἐσχάτῳ ἐν τῷ μὲν διχῶς ἐν τῷ δὲ τριχῶς. [43a] φανερὸν οὖν ὅτι τὸ καθόλου κατηγορικὸν κατασκευάσαι μὲν χαλεπώτατον, ἀνασκευάσαι δὲ ῥᾷστον. ὅλως δ’ ἐστὶν ἀναιροῦντι μὲν τὰ καθόλου τῶν ἐν μέρει ῥᾴω· καὶ γὰρ ἣν μηδενὶ καὶ ἣν τινὶ μὴ ὑπάρχῃ, ἀνῄρηται· τούτων δὲ τὸ μὲν τινὶ μὴ ἐν ἅπασι τοῖς σχήμασι δείκνυται, τὸ δὲ μηδενὶ ἐν τοῖς δυσίν. τὸν αὐτὸν δὲ τρόπον κἀπὶ τῶν στερητικῶν· καὶ γὰρ εἰ παντὶ καὶ εἰ τινί, ἀνῄρηται τὸ ἐξ ἀρχῆς· τοῦτο δ’ ἦν ἐν δύο σχήμασιν. ἐπὶ δὲ τῶν ἐν μέρει μοναχῶς, ἢ παντὶ ἢ μηδενὶ δείξαντα ὑπάρχειν. κατασκευάζοντι δὲ ῥᾴω τὰ ἐν μέρει· καὶ γὰρ ἐν πλείοσι σχήμασι καὶ διὰ πλειόνων τρόπων. ὅλως τε οὐ δεῖ λανθάνειν ὅτι ἀνασκευάσαι μὲν δι’ ἀλλήλων ἔστι καὶ τὰ καθόλου διὰ τῶν ἐν μέρει καὶ ταῦτα διὰ τῶν καθόλου, κατασκευάσαι δ’ οὐκ ἔστι διὰ τῶν κατὰ μέρος τὰ καθόλου, δι’ ἐκείνων δὲ ταῦτ’ ἔστιν. ἅμα δὲ δῆλον ὅτι καὶ τὸ ἀνασκευάζειν ἐστὶ τοῦ κατασκευάζειν ῥᾷον.

Πῶς μὲν οὖν γίνεται πᾶς συλλογισμὸς καὶ διὰ πόσων ὅρων καὶ προτάσεων, καὶ πῶς ἐχουσῶν πρὸς ἀλλήλας, ἔτι δὲ ποῖον πρόβλημα ἐν ἑκάστῳ σχήματι καὶ ποῖον ἐν πλείοσι καὶ ποῖον ἐν ἐλάττοσι δείκνυται, δῆλον ἐκ τῶν εἰρημένων.

Κεφάλαιο 27

πῶς δ’ εὐπορήσομεν αὐτοὶ πρὸς τὸ τιθέμενον ἀεὶ συλλογισμῶν, καὶ διὰ ποίας ὁδοῦ ληψόμεθα τὰς περὶ ἕκαστον ἀρχάς, νῦν ἤδη λεκτέον· οὐ γὰρ μόνον ἴσως δεῖ τὴν γένεσιν θεωρεῖν τῶν συλλογισμῶν, ἀλλὰ καὶ τὴν δύναμιν ἔχειν τοῦ ποιεῖν. Ἁπάντων δὴ τῶν ὄντων τὰ μέν ἐστι τοιαῦτα ὥστε κατὰ μηδενὸς ἄλλου κατηγορεῖσθαι ἀληθῶς καθόλου (οἷον Κλέων καὶ Καλλίας καὶ τὸ καθ’ ἕκαστον καὶ αἰσθητόν), κατὰ δὲ τούτων ἄλλα (καὶ γὰρ ἄνθρωπος καὶ ζῷον ἑκάτερος τούτων ἐστί)· τὰ δ’ αὐτὰ μὲν κατ’ ἄλλων κατηγορεῖται, κατὰ δὲ τούτων ἄλλα πρότερον οὐ κατηγορεῖται· τὰ δὲ καὶ αὐτὰ ἄλλων καὶ αὐτῶν ἕτερα, οἷον ἄνθρωπος Καλλίου καὶ ἀνθρώπου ζῷον. ὅτι μὲν οὖν ἔνια τῶν ὄντων κατ’ οὐδενὸς πέφυκε λέγεσθαι, δῆλον· τῶν γὰρ αἰσθητῶν σχεδὸν ἕκαστόν ἐστι τοιοῦτον ὥστε μὴ κατηγορεῖσθαι κατὰ μηδενός, πλὴν ὡς κατὰ συμβεβηκός· φαμὲν γάρ ποτε τὸ λευκὸν ἐκεῖνο Σωκράτην εἶναι καὶ τὸ προσιὸν Καλλίαν. ὅτι δὲ καὶ ἐπὶ τὸ ἄνω πορευομένοις ἵσταταί ποτε, πάλιν ἐροῦμεν· νῦν δ’ ἔστω τοῦτο κείμενον. κατὰ μὲν οὖν τούτων οὐκ ἔστιν ἀποδεῖξαι κατηγορούμενον ἕτερον, πλὴν εἰ μὴ κατὰ δόξαν, ἀλλὰ ταῦτα κατ’ ἄλλων· οὐδὲ τὰ καθ’ ἕκαστα κατ’ ἄλλων, ἀλλ’ ἕτερα κατ’ ἐκείνων. τὰ δὲ μεταξὺ δῆλον ὡς ἀμφοτέρως ἐνδέχεται (καὶ γὰρ αὐτὰ κατ’ ἄλλων καὶ ἄλλα κατὰ τούτων λεχθήσεται)· καὶ σχεδὸν οἱ λόγοι καὶ αἱ σκέψεις εἰσὶ μάλιστα περὶ τούτων.[43b] Δεῖ δὴ τὰς προτάσεις περὶ ἕκαστον οὕτως ἐκλαμβάνειν, ὑποθέμενον αὐτὸ πρῶτον καὶ τοὺς ὁρισμούς τε καὶ ὅσα ἴδια τοῦ πράγματός ἐστιν, εἶτα μετὰ τοῦτο ὅσα ἕπεται τῷ πράγματι, καὶ πάλιν οἷς τὸ πρᾶγμα ἀκολουθεῖ, καὶ ὅσα μὴ ἐνδέχεται αὐτῷ ὑπάρχειν. οἷς δ’ αὐτὸ μὴ ἐνδέχεται, οὐκ ἐκληπτέον διὰ τὸ ἀντιστρέφειν τὸ στερητικόν. διαιρετέον δὲ καὶ τῶν ἑπομένων ὅσα τε ἐν τῷ τί ἐστι καὶ ὅσα ἴδια καὶ ὅσα ὡς συμβεβηκότα κατηγορεῖται, καὶ τούτων ποῖα δοξαστικῶς καὶ ποῖα κατ’ ἀλήθειαν· ὅσῳ μὲν γὰρ ἂν πλειόνων τοιούτων εὐπορῇ τις, θᾶττον ἐντεύξεται συμπεράσματι, ὅσῳ δ’ ἂν ἀληθεστέρων, μᾶλλον ἀποδείξει.

Δεῖ δ’ ἐκλέγειν μὴ τὰ ἑπόμενα τινί, ἀλλ’ ὅσα ὅλῳ τῷ πράγματι ἕπεται, οἷον μὴ τί τινὶ ἀνθρώπῳ ἀλλὰ τί παντὶ ἀνθρώπῳ ἕπεται· διὰ γὰρ τῶν καθόλου προτάσεων ὁ συλλογισμός. ἀδιορίστου μὲν οὖν ὄντος ἄδηλον εἰ καθόλου ἡ πρότασις, διωρισμένου δὲ φανερόν. ὁμοίως δ’ ἐκλεκτέον καὶ οἷς αὐτὸ ἕπεται ὅλοις, διὰ τὴν εἰρημένην αἰτίαν. αὐτὸ δὲ τὸ ἑπόμενον οὐ ληπτέον ὅλον ἕπεσθαι, λέγω δ’ οἷον ἀνθρώπῳ πᾶν ζῷον ἢ μουσικῇ πᾶσαν ἐπιστήμην, ἀλλὰ μόνον ἁπλῶς ἀκολουθεῖν, καθάπερ καὶ προτεινόμεθα· καὶ γὰρ ἄχρηστον θάτερον καὶ ἀδύνατον, οἷον πάντα ἄνθρωπον εἶναι πᾶν ζῷον ἢ δικαιοσύνην ἅπαν ἀγαθόν. ἀλλ’ ᾧ ἕπεται, ἐπ’ ἐκείνου τὸ παντὶ λέγεται. ὅταν δ’ ὑπό τινος περιέχηται τὸ ὑποκείμενον ᾧ τὰ ἑπόμενα δεῖ λαβεῖν, τὰ μὲν τῷ καθόλου ἑπόμενα ἢ μὴ ἑπόμενα οὐκ ἐκλεκτέον ἐν τούτοις (εἴληπται γὰρ ἐν ἐκείνοις· ὅσα γὰρ ζῴῳ, καὶ ἀνθρώπῳ ἕπεται, καὶ ὅσα μὴ ὑπάρχει, ὡσαύτως), τὰ δὲ περὶ ἕκαστον ἴδια ληπτέον· ἔστι γὰρ ἄττα τῷ εἴδει ἴδια παρὰ τὸ γένος· ἀνάγκη γὰρ τοῖς ἑτέροις εἴδεσιν ἴδια ἄττα ὑπάρχειν. οὐδὲ δὴ τῷ καθόλου ἐκλεκτέον οἷς ἕπεται τὸ περιεχόμενον, οἷον ζῴῳ οἷς ἕπεται ἄνθρωπος· ἀνάγκη γάρ, εἰ ἀνθρώπῳ ἀκολουθεῖ τὸ ζῷον, καὶ τούτοις ἅπασιν ἀκολουθεῖν, οἰκειότερα δὲ ταῦτα τῆς τοῦ ἀνθρώπου ἐκλογῆς. ληπτέον δὲ καὶ τὰ ὡς ἐπὶ τὸ πολὺ ἑπόμενα καὶ οἷς ἕπεται· τῶν γὰρ ὡς ἐπὶ τὸ πολὺ προβλημάτων καὶ ὁ συλλογισμὸς ἐκ τῶν ὡς ἐπὶ τὸ πολὺ προτάσεων, ἢ πασῶν ἢ τινῶν· ὅμοιον γὰρ ἑκάστου τὸ συμπέρασμα ταῖς ἀρχαῖς. ἔτι τὰ πᾶσιν ἑπόμενα οὐκ ἐκλεκτέον· οὐ γὰρ ἔσται συλλογισμὸς ἐξ αὐτῶν. δι’ ἣν δ’ αἰτίαν, ἐν τοῖς ἑπομένοις ἔσται δῆλον.

Κεφάλαιο 28

Κατασκευάζειν μὲν οὖν βουλομένοις κατά τινος ὅλου τοῦ μὲν κατασκευαζομένου βλεπτέον εἰς τὰ ὑποκείμενα καθ’ ὧν αὐτὸ τυγχάνει λεγόμενον, οὗ δὲ δεῖ κατηγορεῖσθαι, ὅσα τούτῳ ἕπεται· ἂν γάρ τι τούτων ᾖ ταὐτόν, ἀνάγκη θάτερον θατέρῳ ὑπάρχειν. ἢν δὲ μὴ ὅτι παντὶ ἀλλ’ ὅτι τινί, οἷς [44a] ἕπεται ἑκάτερον· εἰ γάρ τι τούτων ταὐτόν, ἀνάγκη τινὶ ὑπάρχειν. ὅταν δὲ μηδενὶ δέῃ ὑπάρχειν, ᾧ μὲν οὐ δεῖ ὑπάρχειν, εἰς τὰ ἑπόμενα, ὃ δὲ δεῖ μὴ ὑπάρχειν, εἰς ἃ μὴ ἐνδέχεται αὐτῷ παρεῖναι· ἢ ἀνάπαλιν, ᾧ μὲν δεῖ μὴ ὑπάρχειν, εἰς ἃ μὴ ἐνδέχεται αὐτῷ παρεῖναι, ὃ δὲ μὴ ὑπάρχειν, εἰς τὰ ἑπόμενα. τούτων γὰρ ὄντων τῶν αὐτῶν ὁποτερωνοῦν, οὐδενὶ ἐνδέχεται θατέρῳ θάτερον ὑπάρχειν· γίνεται γὰρ ὁτὲ μὲν ὁ ἐν τῷ πρώτῳ σχήματι συλλογισμός, ὁτὲ δ’ ὁ ἐν τῷ μέσῳ. ἐὰν δὲ τινὶ μὴ ὑπάρχειν, ᾧ μὲν δεῖ μὴ ὑπάρχειν, οἷς ἕπεται, ὃ δὲ μὴ ὑπάρχειν, ἃ μὴ δυνατὸν αὐτῷ ὑπάρχειν· εἰ γάρ τι τούτων εἴη ταὐτόν, ἀνάγκη τινὶ μὴ ὑπάρχειν.

Μᾶλλον δ’ ἴσως ὧδ’ ἔσται τῶν λεγομένων ἕκαστον φανερόν. ἔστω γὰρ τὰ μὲν ἑπόμενα τῷ Α ἐφ’ ὧν Β, οἷς δ’ αὐτὸ ἕπεται, ἐφ’ ὧν Γ, ἃ δὲ μὴ ἐνδέχεται αὐτῷ ὑπάρχειν, ἐφ’ ὧν Δ· πάλιν δὲ τῷ Ε τὰ μὲν ὑπάρχοντα, ἐφ’ οἷς Ζ, οἷς δ’ αὐτὸ ἕπεται, ἐφ’ οἷς Η, ἃ δὲ μὴ ἐνδέχεται αὐτῷ ὑπάρχειν, ἐφ’ οἷς Θ. εἰ μὲν οὖν ταὐτό τί ἐστι τῶν Γ τινὶ τῶν Ζ, ἀνάγκη τὸ Α παντὶ τῷ Ε ὑπάρχειν· τὸ μὲν γὰρ Ζ παντὶ τῷ Ε, τῷ δὲ Γ παντὶ τὸ Α, ὥστε παντὶ τῷ Ε τὸ Α. εἰ δὲ τὸ Γ καὶ τὸ Η ταὐτόν, ἀνάγκη τινὶ τῷ Ε τὸ Α ὑπάρχειν· τῷ μὲν γὰρ Γ τὸ Α, τῷ δὲ Η τὸ Ε παντὶ ἀκολουθεῖ. εἰ δὲ τὸ Ζ καὶ τὸ Δ ταὐτόν, οὐδενὶ τῶν Ε τὸ Α ὑπάρξει ἐκ προσυλλογισμοῦ· ἐπεὶ γὰρ ἀντιστρέφει τὸ στερητικὸν καὶ τὸ Ζ τῷ Δ ταὐτόν, οὐδενὶ τῶν Ζ ὑπάρξει τὸ Α, τὸ δὲ Ζ παντὶ τῷ Ε. πάλιν εἰ τὸ Β καὶ τὸ Θ ταὐτόν, οὐδενὶ τῶν Ε τὸ Α ὑπάρξει· τὸ γὰρ Β τῷ μὲν Α παντί, τῷ δ’ ἐφ’ ᾧ τὸ Ε οὐδενὶ ὑπάρξει· ταὐτὸ γὰρ ἦν τῷ Θ, τὸ δὲ Θ οὐδενὶ τῶν Ε ὑπῆρχεν. εἰ δὲ τὸ Δ καὶ τὸ Η ταὐτόν, τὸ Α τινὶ τῷ Ε οὐχ ὑπάρξει· τῷ γὰρ Η οὐχ ὑπάρξει, ὅτι οὐδὲ τῷ Δ· τὸ δὲ Η ἐστὶν ὑπὸ τὸ Ε, ὥστε τινὶ τῶν Ε οὐχ ὑπάρξει. εἰ δὲ τῷ Η τὸ Β ταὐτόν, ἀντεστραμμένος ἔσται συλλογισμός· τὸ μὲν γὰρ Ε τῷ Α ὑπάρξει παντί — τὸ γὰρ Β τῷ Α, τὸ δὲ Ε τῷ Β (ταὐτὸ γὰρ ἦν τῷ Η) — τὸ δὲ Α τῷ Ε παντὶ μὲν οὐκ ἀνάγκη ὑπάρχειν, τινὶ δ’ ἀνάγκη διὰ τὸ ἀντιστρέφειν τὴν καθόλου κατηγορίαν τῇ κατὰ μέρος.

Φανερὸν οὖν ὅτι εἰς τὰ προειρημένα βλεπτέον ἑκατέρου καθ’ ἕκαστον πρόβλημα· διὰ τούτων γὰρ ἅπαντες οἱ συλλογισμοί. δεῖ δὲ καὶ τῶν

ἑπομένων, καὶ οἷς ἕπεται ἕκαστον, εἰς τὰ πρῶτα καὶ τὰ καθόλου μάλιστα βλέπειν, οἷον τοῦ μὲν Ε μᾶλλον εἰς τὸ Κ Ζ ἢ εἰς τὸ Ζ μόνον, τοῦ δὲ Α εἰς [44b] τὸ Κ Γ ἢ εἰς τὸ Γ μόνον. εἰ μὲν γὰρ τῷ Κ Ζ ὑπάρχει τὸ Α, καὶ τῷ Ζ καὶ τῷ Ε ὑπάρχει· εἰ δὲ τούτῳ μὴ ἕπεται, ἐγχωρεῖ τῷ Ζ ἕπεσθαι. ὁμοίως δὲ καὶ ἐφ’ ὧν αὐτὸ ἀκολουθεῖ σκεπτέον· εἰ μὲν γὰρ τοῖς πρώτοις, καὶ τοῖς ὑπ’ ἐκεῖνα ἕπεται, εἰ δὲ μὴ τούτοις, ἀλλὰ τοῖς ὑπὸ ταῦτα ἐγχωρεῖ.

Δῆλον δὲ καὶ ὅτι διὰ τῶν τριῶν ὅρων καὶ τῶν δύο προτάσεων ἡ σκέψις, καὶ διὰ τῶν προειρημένων σχημάτων οἱ συλλογισμοὶ πάντες. δείκνυται γὰρ ὑπάρχειν μὲν παντὶ τῷ Ε τὸ Α, ὅταν τῶν Γ καὶ Ζ ταὐτόν τι ληφθῇ. τοῦτο δ’ ἔσται μέσον, ἄκρα δὲ τὸ Α καὶ Ε· γίνεται οὖν τὸ πρῶτον σχῆμα. τινὶ δέ, ὅταν τὸ Γ καὶ τὸ Η ληφθῇ ταὐτόν. τοῦτο δὲ τὸ ἔσχατον σχῆμα· μέσον γὰρ τὸ Η γίνεται. μηδενὶ δέ, ὅταν τὸ Δ καὶ Ζ ταὐτόν. οὕτω δὲ καὶ τὸ πρῶτον σχῆμα καὶ τὸ μέσον, τὸ μὲν πρῶτον ὅτι οὐδενὶ τῷ Ζ ὑπάρχει τὸ Α (εἴπερ ἀντιστρέφει τὸ στερητικόν), τὸ δὲ Ζ παντὶ τῷ Ε, τὸ δὲ μέσον ὅτι τὸ Δ τῷ μὲν Α οὐδενὶ τῷ δὲ Ε παντὶ ὑπάρχει. τινὶ δὲ μὴ ὑπάρχειν, ὅταν τὸ Δ καὶ Η ταὐτὸν ᾖ. τοῦτο δὲ τὸ ἔσχατον σχῆμα· τὸ μὲν γὰρ Α οὐδενὶ τῷ Η ὑπάρξει, τὸ δὲ Ε παντὶ τῷ Η. φανερὸν οὖν ὅτι διὰ τῶν προειρημένων σχημάτων οἱ συλλογισμοὶ πάντες, καὶ ὅτι οὐκ ἐκλεκτέον ὅσα πᾶσιν ἕπεται, διὰ τὸ μηδένα γίγνεσθαι συλλογισμὸν ἐξ αὐτῶν. κατασκευάζειν μὲν γὰρ ὅλως οὐκ ἦν ἐκ τῶν ἑπομένων, ἀποστερεῖν δ’ οὐκ ἐνδέχεται διὰ τοῦ πᾶσιν ἑπομένου· δεῖ γὰρ τῷ μὲν ὑπάρχειν τῷ δὲ μὴ ὑπάρχειν.

Φανερὸν δὲ καὶ ὅτι αἱ ἄλλαι σκέψεις τῶν κατὰ τὰς ἐκλογὰς ἄχρειοι πρὸς τὸ ποιεῖν συλλογισμόν, οἷον εἰ τὰ ἑπόμενα ἑκατέρῳ ταὐτά ἐστιν, ἢ εἰ οἷς ἕπεται τὸ Α καὶ ἃ μὴ ἐνδέχεται τῷ Ε, ἢ ὅσα πάλιν μὴ ἐγχωρεῖ ἑκατέρῳ ὑπάρχειν· οὐ γὰρ γίνεται συλλογισμὸς διὰ τούτων. εἰ μὲν γὰρ τὰ ἑπόμενα ταὐτά, οἷον τὸ Β καὶ τὸ Ζ, τὸ μέσον γίνεται σχῆμα κατηγορικὰς ἔχον τὰς προτάσεις· εἰ δ’ οἷς ἕπεται τὸ Α καὶ ἃ μὴ ἐνδέχεται τῷ Ε, οἷον τὸ Γ καὶ τὸ Θ, τὸ πρῶτον σχῆμα στερητικὴν ἔχον τὴν πρὸς τὸ ἔλαττον ἄκρον πρότασιν. εἰ δ’ ὅσα μὴ ἐνδέχεται ἑκατέρῳ, οἷον τὸ Δ καὶ τὸ Θ, στερητικαὶ ἀμφότεραι αἱ προτάσεις, ἢ ἐν τῷ πρώτῳ ἢ ἐν τῷ μέσῳ σχήματι. οὕτως δ’ οὐδαμῶς συλλογισμός.

Δῆλον δὲ καὶ ὅτι ὁποῖα ταὐτὰ ληπτέον τὰ κατὰ τὴν ἐπίσκεψιν, καὶ οὐχ ὁποῖα ἕτερα ἢ ἐναντία, πρῶτον μὲν ὅτι τοῦ μέσου χάριν ἡ ἐπίβλεψις, τὸ δὲ μέσον οὐχ ἕτερον [45a] ἀλλὰ ταὐτὸν δεῖ λαβεῖν. εἶτα ἐν ὅσοις καὶ συμβαίνει γίνεσθαι συλλογισμὸν τῷ ληφθῆναι ἐναντία ἢ μὴ ἐνδεχόμενα τῷ αὐτῷ ὑπάρχειν, εἰς τοὺς προειρημένους ἅπαντα ἀναχθήσεται τρόπους, οἷον εἰ τὸ Β καὶ τὸ Ζ ἐναντία ἢ μὴ ἐνδέχεται τῷ αὐτῷ ὑπάρχειν· ἔσται μὲν γὰρ τούτων ληφθέντων συλλογισμὸς ὅτι οὐδενὶ τῶν Ε τὸ Α ὑπάρχει, ἀλλ’ οὐκ ἐξ αὐτῶν ἀλλ’ ἐκ τοῦ προειρημένου τρόπου· τὸ γὰρ Β τῷ μὲν Α παντὶ τῷ δὲ Ε οὐδενὶ ὑπάρξει· ὥστ’ ἀνάγκη ταὐτὸ εἶναι τὸ Β τινὶ τῷ Θ. [πάλιν εἰ τὸ Β καὶ Η μὴ ἐγχωρεῖ τῷ αὐτῷ παρεῖναι, ὅτι τινὶ τῷ Ε οὐχ ὑπάρξει τὸ Α· καὶ γὰρ οὕτως τὸ μέσον ἔσται σχῆμα· τὸ γὰρ Β τῷ μὲν Α παντὶ τῷ δὲ Ε οὐδενὶ ὑπάρξει· ὥστ’ ἀνάγκη τὸ Β ταὐτόν τινι εἶναι τῶν Θ. τὸ γὰρ μὴ ἐνδέχεσθαι τὸ Β καὶ τὸ Η τῷ αὐτῷ ὑπάρχειν οὐδὲν διαφέρει ἢ τὸ Β τῶν Θ τινὶ ταὐτὸν εἶναι· πάντα γὰρ εἴληπται τὰ μὴ ἐνδεχόμενα τῷ Ε ὑπάρχειν.]

Φανερὸν οὖν ὅτι ἐξ αὐτῶν μὲν τούτων τῶν ἐπιβλέψεων οὐδεὶς γίνεται συλλογισμός, ἀνάγκη δ’ εἰ τὸ Β καὶ τὸ Ζ ἐναντία, ταὐτόν τινι εἶναι τὸ Β τῶν Θ καὶ τὸν συλλογισμὸν γίγνεσθαι διὰ τούτων. συμβαίνει δὴ τοῖς οὕτως ἐπισκοποῦσι προσεπιβλέπειν ἄλλην ὁδὸν τῆς ἀναγκαίας διὰ τὸ λανθάνειν τὴν ταὐτότητα τῶν Β καὶ τῶν Θ.

Κεφάλαιο 29

Τὸν αὐτὸν δὲ τρόπον ἔχουσι καὶ οἱ εἰς τὸ ἀδύνατον ἄγοντες συλλογισμοὶ τοῖς δεικτικοῖς· καὶ γὰρ οὗτοι γίνονται διὰ τῶν ἑπομένων καὶ οἷς ἕπεται ἑκάτερον. καὶ ἡ αὐτὴ ἐπίσκεψις ἐν ἀμφοῖν· ὃ γὰρ δείκνυται δεικτικῶς, καὶ διὰ τοῦ ἀδυνάτου ἔστι συλλογίσασθαι διὰ τῶν αὐτῶν ὅρων, καὶ ὃ διὰ τοῦ ἀδυνάτου, καὶ δεικτικῶς, οἷον ὅτι τὸ Α οὐδενὶ τῷ Ε ὑπάρχει. κείσθω γὰρ τινὶ ὑπάρχειν· οὐκοῦν ἐπεὶ τὸ Β παντὶ τῷ Α, τὸ δὲ Α τινὶ τῷ Ε, τὸ Β τινὶ τῶν Ε ὑπάρξει· ἀλλ’ οὐδενὶ ὑπῆρχεν. πάλιν ὅτι τινὶ ὑπάρχει· εἰ γὰρ μηδενὶ τῷ Ε τὸ Α, τὸ δὲ Ε παντὶ τῷ Η, οὐδενὶ τῶν Η ὑπάρξει τὸ Α· ἀλλὰ παντὶ ὑπῆρχεν. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων προβλημάτων· ἀεὶ γὰρ ἔσται καὶ ἐν ἅπασιν ἡ διὰ τοῦ ἀδυνάτου δεῖξις ἐκ τῶν ἑπομένων καὶ οἷς ἕπεται ἑκάτερον. καὶ καθ’ ἕκαστον πρόβλημα ἡ αὐτὴ σκέψις δεικτικῶς τε βουλομένῳ συλλογίσασθαι καὶ εἰς ἀδύνατον ἀγαγεῖν· ἐκ γὰρ τῶν αὐτῶν ὅρων ἀμφότεραι αἱ ἀποδείξεις, οἷον εἰ δέδεικται μηδενὶ ὑπάρχειν τῷ Ε τὸ Α, ὅτι συμβαίνει καὶ τὸ Β τινὶ τῷ Ε ὑπάρχειν, ὅπερ ἀδύνατον· ἐὰν ληφθῇ τῷ μὲν Ε μηδενὶ τῷ δὲ Α παντὶ ὑπάρχειν τὸ Β, φανερὸν [45b] ὅτι οὐδενὶ τῷ Ε τὸ Α ὑπάρξει. πάλιν εἰ δεικτικῶς συλλελόγισται τὸ Α τῷ Ε μηδενὶ ὑπάρχειν, ὑποθεμένοις ὑπάρχειν τινὶ διὰ τοῦ ἀδυνάτου δειχθήσεται οὐδενὶ ὑπάρχον. ὁμοίως δὲ κἀπὶ τῶν ἄλλων· ἐν ἅπασι γὰρ ἀνάγκη κοινόν τινα λαβεῖν ὅρον ἄλλον τῶν ὑποκειμένων, πρὸς ὃν ἔσται τοῦ ψεύδους ὁ συλλογισμός, ὥστ’ ἀντιστραφείσης ταύτης τῆς προτάσεως, τῆς δ’ ἑτέρας ὁμοίως ἐχούσης, δεικτικὸς ἔσται ὁ συλλογισμὸς διὰ τῶν αὐτῶν ὅρων. διαφέρει γὰρ ὁ δεικτικὸς τοῦ εἰς τὸ ἀδύνατον, ὅτι ἐν μὲν τῷ δεικτικῷ κατ’ ἀλήθειαν ἀμφότεραι τίθενται αἱ προτάσεις, ἐν δὲ τῷ εἰς τὸ ἀδύνατον ψευδῶς ἡ μία.

Ταῦτα μὲν οὖν ἔσται μᾶλλον φανερὰ διὰ τῶν ἑπομένων, ὅταν περὶ τοῦ ἀδυνάτου λέγωμεν· νῦν δὲ τοσοῦτον ἡμῖν ἔστω δῆλον, ὅτι εἰς ταὐτὰ βλεπτέον δεικτικῶς τε βουλομένῳ συλλογίζεσθαι καὶ εἰς τὸ ἀδύνατον ἄγειν. ἐν δὲ τοῖς ἄλλοις συλλογισμοῖς τοῖς ἐξ ὑποθέσεως, οἷον ὅσοι κατὰ μετάληψιν ἢ κατὰ ποιότητα, ἐν τοῖς ὑποκειμένοις, οὐκ ἐν τοῖς ἐξ ἀρχῆς ἀλλ’ ἐν τοῖς μεταλαμβανομένοις, ἔσται ἡ σκέψις, ὁ δὲ τρόπος ὁ αὐτὸς τῆς ἐπιβλέψεως. ἐπισκέψασθαι δὲ δεῖ καὶ διελεῖν ποσαχῶς οἱ ἐξ ὑποθέσεως.

Δείκνυται μὲν οὖν ἕκαστον τῶν προβλημάτων οὕτως, ἔστι δὲ καὶ ἄλλον τρόπον ἔνια συλλογίσασθαι τούτων, οἷον τὰ καθόλου διὰ τῆς κατὰ μέρος ἐπιβλέψεως ἐξ ὑποθέσεως. εἰ γὰρ τὸ Γ καὶ τὸ Η ταὐτὰ εἴη, μόνοις δὲ ληφθείη τοῖς Η τὸ Ε ὑπάρχειν, παντὶ ἂν τῷ Ε τὸ Α ὑπάρχοι· καὶ πάλιν εἰ τὸ

Δ καὶ Η ταὐτά, μόνων δὲ τῶν Η τὸ Ε κατηγοροῖτο, ὅτι οὐδενὶ τῷ Ε τὸ Α ὑπάρξει. φανερὸν οὖν ὅτι καὶ οὕτως ἐπιβλεπτέον. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἀναγκαίων καὶ τῶν ἐνδεχομένων· ἡ γὰρ αὐτὴ σκέψις, καὶ διὰ τῶν αὐτῶν ὅρων ἔσται τῇ τάξει τοῦ τ' ἐνδέχεσθαι καὶ τοῦ ὑπάρχειν ὁ συλλογισμός. ληπτέον δ' ἐπὶ τῶν ἐνδεχομένων καὶ τὰ μὴ ὑπάρχοντα δυνατὰ δ' ὑπάρχειν· δέδεικται γὰρ ὅτι καὶ διὰ τούτων γίνεται ὁ τοῦ ἐνδέχεσθαι συλλογισμός. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων κατηγοριῶν.

Φανερὸν οὖν ἐκ τῶν εἰρημένων οὐ μόνον ὅτι ἐγχωρεῖ διὰ ταύτης τῆς ὁδοῦ γίνεσθαι πάντας τοὺς συλλογισμούς, ἀλλὰ καὶ ὅτι δι' ἄλλης ἀδύνατον. ἅπας μὲν γὰρ συλλογισμὸς δέδεικται διά τινος τῶν προειρημένων σχημάτων γινόμενος, ταῦτα δ' οὐκ ἐγχωρεῖ δι' ἄλλων συσταθῆναι πλὴν διὰ τῶν ἑπομένων καὶ οἷς ἕπεται ἕκαστον· ἐκ τούτων γὰρ [46a] αἱ προτάσεις καὶ ἡ τοῦ μέσου λῆψις, ὥστ' οὐδὲ συλλογισμὸν ἐγχωρεῖ γίνεσθαι δι' ἄλλων.

Κεφάλαιο 30

Ἡ μὲν οὖν ὁδὸς κατὰ πάντων ἡ αὐτὴ καὶ περὶ φιλοσοφίαν καὶ περὶ τέχνην ὁποιανοῦν καὶ μάθημα· δεῖ γὰρ τὰ ὑπάρχοντα καὶ οἷς ὑπάρχει περὶ ἑκάτερον ἀθρεῖν, καὶ τούτων ὡς πλείστων εὐπορεῖν, καὶ ταῦτα διὰ τῶν τριῶν ὅρων σκοπεῖν, ἀνασκευάζοντα μὲν ὡδί, κατασκευάζοντα δὲ ὡδί, κατὰ μὲν ἀλήθειαν ἐκ τῶν κατ’ ἀλήθειαν διαγεγραμμένων ὑπάρχειν, εἰς δὲ τοὺς διαλεκτικοὺς συλλογισμοὺς ἐκ τῶν κατὰ δόξαν προτάσεων. αἱ δ’ ἀρχαὶ τῶν συλλογισμῶν καθόλου μὲν εἴρηνται, ὃν τρόπον τ’ ἔχουσι καὶ ὃν τρόπον δεῖ θηρεύειν αὐτάς, ὅπως μὴ βλέπωμεν εἰς ἅπαντα τὰ λεγόμενα, μηδ’ εἰς ταὐτὰ κατασκευάζοντες καὶ ἀνασκευάζοντες, μηδὲ κατασκευάζοντές τε κατὰ παντὸς ἢ τινὸς καὶ ἀνασκευάζοντες ἀπὸ πάντων ἢ τινῶν, ἀλλ’ εἰς ἐλάττω καὶ ὡρισμένα, καθ’ ἕκαστον δὲ ἐκλέγειν τῶν ὄντων, οἷον περὶ ἀγαθοῦ ἢ ἐπιστήμης. ἴδιαι δὲ καθ’ ἑκάστην αἱ πλεῖσται. διὸ τὰς μὲν ἀρχὰς τὰς περὶ ἕκαστον ἐμπειρίας ἐστὶ παραδοῦναι, λέγω δ’ οἷον τὴν ἀστρολογικὴν μὲν ἐμπειρίαν τῆς ἀστρολογικῆς ἐπιστήμης (ληφθέντων γὰρ ἱκανῶς τῶν φαινομένων οὕτως εὑρέθησαν αἱ ἀστρολογικαὶ ἀποδείξεις), ὁμοίως δὲ καὶ περὶ ἄλλην ὁποιανοῦν ἔχει τέχνην τε καὶ ἐπιστήμην· ὥστ’ ἐὰν ληφθῇ τὰ ὑπάρχοντα περὶ ἕκαστον, ἡμέτερον ἤδη τὰς ἀποδείξεις ἑτοίμως ἐμφανίζειν. εἰ γὰρ μηδὲν κατὰ τὴν ἱστορίαν παραλειφθείη τῶν ἀληθῶς ὑπαρχόντων τοῖς πράγμασιν, ἕξομεν περὶ ἅπαντος οὗ μὲν ἔστιν ἀπόδειξις, ταύτην εὑρεῖν καὶ ἀποδεικνύναι, οὗ δὲ μὴ πέφυκεν ἀπόδειξις, τοῦτο ποιεῖν φανερόν.

Καθόλου μὲν οὖν, ὃν δεῖ τρόπον τὰς προτάσεις ἐκλέγειν, εἴρηται σχεδόν· δι’ ἀκριβείας δὲ διεληλύθαμεν ἐν τῇ πραγματείᾳ τῇ περὶ τὴν διαλεκτικήν.

Κεφάλαιο 31

Ὅτι δ’ ἡ διὰ τῶν γενῶν διαίρεσις μικρόν τι μόριόν ἐστι τῆς εἰρημένης μεθόδου, ῥᾴδιον ἰδεῖν· ἔστι γὰρ ἡ διαίρεσις οἷον ἀσθενὴς συλλογισμός· ὃ μὲν γὰρ δεῖ δεῖξαι αἰτεῖται, συλλογίζεται δ’ ἀεί τι τῶν ἄνωθεν. πρῶτον δ’ αὐτὸ τοῦτο ἐλελήθει τοὺς χρωμένους αὐτῇ πάντας, καὶ πείθειν ἐπεχείρουν ὡς ὄντος δυνατοῦ περὶ οὐσίας ἀπόδειξιν γενέσθαι καὶ τοῦ τί ἐστιν. ὥστ’ οὔτε ὅ τι ἐνδέχεται συλλογίσασθαι διαιρουμένοις ξυνίεσαν, οὔτε ὅτι οὕτως ἐνεδέχετο ὥσπερ εἰρήκαμεν. ἐν μὲν οὖν ταῖς ἀποδείξεσιν, ὅταν δέῃ τι συλλογίσασθαι ὑπάρχειν, δεῖ τὸ μέσον, δι’ οὗ γίνεται ὁ συλλο[46b] γισμός, καὶ ἧττον ἀεὶ εἶναι καὶ μὴ καθόλου τοῦ πρώτου τῶν ἄκρων· ἡ δὲ διαίρεσις τοὐναντίον βούλεται· τὸ γὰρ καθόλου λαμβάνει μέσον. ἔστω γὰρ ζῷον ἐφ’ οὗ Α, τὸ δὲ θνητὸν ἐφ’ οὗ Β, καὶ ἀθάνατον ἐφ’ οὗ Γ, ὁ δ’ ἄνθρωπος, οὗ τὸν λόγον δεῖ λαβεῖν, ἐφ’ οὗ τὸ Δ. ἅπαν δὴ ζῷον λαμβάνει ἢ θνητὸν ἢ ἀθάνατον· τοῦτο δ’ ἐστίν, ὃ ἂν ᾖ Α, ἅπαν εἶναι ἢ Β ἢ Γ. πάλιν τὸν ἄνθρωπον ἀεὶ διαιρούμενος τίθεται ζῷον εἶναι, ὥστε κατὰ τοῦ Δ τὸ Α λαμβάνει ὑπάρχειν. ὁ μὲν οὖν συλλογισμός ἐστιν ὅτι τὸ Δ ἢ Β ἢ Γ ἅπαν ἔσται, ὥστε τὸν ἄνθρωπον ἢ θνητὸν μὲν ἢ ἀθάνατον ἀναγκαῖον εἶναι, ζῷον θνητὸν δὲ οὐκ ἀναγκαῖον, ἀλλ’ αἰτεῖται· τοῦτο δ’ ἦν ὃ ἔδει συλλογίσασθαι. καὶ πάλιν θέμενος τὸ μὲν Α ζῷον θνητόν, ἐφ’ οὗ δὲ τὸ Β ὑπόπουν, ἐφ’ οὗ δὲ τὸ Γ ἄπουν, τὸν δ’ ἄνθρωπον τὸ Δ, ὡσαύτως λαμβάνει τὸ μὲν Α ἤτοι ἐν τῷ Β ἢ ἐν τῷ Γ εἶναι (ἅπαν γὰρ ζῷον θνητὸν ἢ ὑπόπουν ἢ ἄπουν ἐστί), κατὰ δὲ τοῦ Δ τὸ Α (τὸν γὰρ ἄνθρωπον ζῷον θνητὸν εἶναι ἔλαβεν)· ὥσθ’ ὑπόπουν μὲν ἢ ἄπουν εἶναι ζῷον ἀνάγκη τὸν ἄνθρωπον, ὑπόπουν δ’ οὐκ ἀνάγκη, ἀλλὰ λαμβάνει· τοῦτο δ’ ἦν ὃ ἔδει πάλιν δεῖξαι. καὶ τοῦτον δὴ τὸν τρόπον ἀεὶ διαιρουμένοις τὸ μὲν καθόλου συμβαίνει αὐτοῖς μέσον λαμβάνειν, καθ’ οὗ δ’ ἔδει δεῖξαι καὶ τὰς διαφορὰς ἄκρα. τέλος δέ, ὅτι τοῦτ’ ἔστιν ἄνθρωπος ἢ ὅ τι ποτ’ ἂν ᾖ τὸ ζητούμενον, οὐδὲν λέγουσι σαφὲς ὥστ’ ἀναγκαῖον εἶναι· καὶ γὰρ τὴν ἄλλην ὁδὸν ποιοῦνται πᾶσαν, οὐδὲ τὰς ἐνδεχομένας εὐπορίας ὑπολαμβάνοντες ὑπάρχειν.

Φανερὸν δ’ ὅτι οὔτ’ ἀνασκευάσαι ταύτῃ τῇ μεθόδῳ ἔστιν, οὔτε περὶ συμβεβηκότος ἢ ἰδίου συλλογίσασθαι, οὔτε περὶ γένους, οὔτ’ ἐν οἷς ἀγνοεῖται τὸ πότερον ὡδὶ ἢ ὡδὶ ἔχει, οἷον ἆρ’ ἡ διάμετρος ἀσύμμετρος ἢ σύμμετρος. ἐὰν γὰρ λάβῃ ὅτι ἅπαν μῆκος ἢ σύμμετρον ἢ ἀσύμμετρον, ἡ δὲ διάμετρος μῆκος, συλλελόγισται ὅτι ἀσύμμετρος ἢ σύμμετρος ἡ διάμετρος. εἰ δὲ λήψεται ἀσύμμετρον, ὃ ἔδει συλλογίσασθαι λήψεται. οὐκ ἄρα ἔστι δεῖξαι· ἡ μὲν γὰρ ὁδὸς αὕτη, διὰ ταύτης δ’ οὐκ ἔστιν. τὸ ἀσύμμετρον ἢ σύμμετρον ἐφ’ οὗ Α, μῆκος Β, διάμετρος Γ. φανερὸν οὖν ὅτι οὔτε πρὸς πᾶσαν σκέψιν ἁρμόζει τῆς ζητήσεως ὁ τρόπος, οὔτ’ ἐν οἷς μάλιστα δοκεῖ πρέπειν, ἐν τούτοις ἐστὶ χρήσιμος.

Ἐκ τίνων μὲν οὖν αἱ ἀποδείξεις γίνονται καὶ πῶς, καὶ εἰς ὁποῖα βλεπτέον καθ’ ἕκαστον πρόβλημα, φανερὸν ἐκ τῶν εἰρημένων·

Κεφάλαιο 32

πῶς δ’ ἀνάξομεν τοὺς συλλογισμοὺς εἰς [47a] τὰ προειρημένα σχήματα, λεκτέον ἂν εἴη μετὰ ταῦτα· λοιπὸν γὰρ ἔτι τοῦτο τῆς σκέψεως. εἰ γὰρ τήν τε γένεσιν τῶν συλλογισμῶν θεωροῖμεν καὶ τοῦ εὑρίσκειν ἔχοιμεν δύναμιν, ἔτι δὲ τοὺς γεγενημένους ἀναλύοιμεν εἰς τὰ προειρημένα σχήματα, τέλος ἂν ἔχοι ἡ ἐξ ἀρχῆς πρόθεσις. συμβήσεται δ’ ἅμα καὶ τὰ πρότερον εἰρημένα ἐπιβεβαιοῦσθαι καὶ φανερώτερα εἶναι ὅτι οὕτως ἔχει, διὰ τῶν νῦν λεχθησομένων· δεῖ γὰρ πᾶν τὸ ἀληθὲς αὐτὸ ἑαυτῷ ὁμολογούμενον εἶναι πάντῃ.

Πρῶτον μὲν οὖν δεῖ πειρᾶσθαι τὰς δύο προτάσεις ἐκλαμβάνειν τοῦ συλλογισμοῦ (ῥᾶον γὰρ εἰς τὰ μείζω διελεῖν ἢ τὰ ἐλάττω, μείζω δὲ τὰ συγκείμενα ἢ ἐξ ὧν), εἶτα σκοπεῖν ποτέρα ἐν ὅλῳ καὶ ποτέρα ἐν μέρει, καί, εἰμὴ ἄμφω εἰλημμέναι εἶεν, αὐτὸν τιθέναι τὴν ἑτέραν. ἐνίοτε γὰρ τὴν καθόλου προτείναντες τὴν ἐν ταύτῃ οὐ λαμβάνουσιν, οὔτε γράφοντες οὔτ’ ἐρωτῶντες· ἢ ταύτας μὲν προτείνουσι, δι’ ὧν δ’ αὗται περαίνονται, παραλείπουσιν, ἄλλα δὲ μάτην ἐρωτῶσιν. σκεπτέον οὖν εἴ τι περίεργον εἴληπται καὶ εἴ τι τῶν ἀναγκαίων παραλέλειπται, καὶ τὸ μὲν θετέον τὸ δ’ ἀφαιρετέον, ἕως ἂν ἔλθῃ εἰς τὰς δύο προτάσεις· ἄνευ γὰρ τούτων οὐκ ἔστιν ἀναγαγεῖν τοὺς οὕτως ἠρωτημένους λόγους. ἐνίων μὲν οὖν ῥᾴδιον ἰδεῖν τὸ ἐνδεές, ἔνιοι δὲ λανθάνουσι καὶ δοκοῦσι συλλογίζεσθαι διὰ τὸ ἀναγκαῖόν τι συμβαίνειν ἐκ τῶν κειμένων, οἷον εἰ ληφθείη μὴ οὐσίας ἀναιρουμένης μὴ ἀναιρεῖσθαι οὐσίαν, ἐξ ὧν δ’ ἐστὶν ἀναιρουμένων, καὶ τὸ ἐκ τούτων φθείρεσθαι· τούτων γὰρ τεθέντων ἀναγκαῖον μὲν τὸ οὐσίας μέρος εἶναι οὐσίαν, οὐ μὴν συλλελόγισται διὰ τῶν εἰλημμένων, ἀλλ’ ἐλλείπουσι προτάσεις. πάλιν εἰ ἀνθρώπου ὄντος ἀνάγκη ζῷον εἶναι καὶ ζῴου οὐσίαν, ἀνθρώπου ὄντος ἀνάγκη οὐσίαν εἶναι· ἀλλ’ οὔπω συλλελόγισται· οὐ γὰρ ἔχουσιν αἱ προτάσεις ὡς εἴπομεν.

Ἀπατώμεθα δ’ ἐν τοῖς τοιούτοις διὰ τὸ ἀναγκαῖόν τι συμβαίνειν ἐκ τῶν κειμένων, ὅτι καὶ ὁ συλλογισμὸς ἀναγκαῖόν ἐστιν. ἐπὶ πλέον δὲ τὸ ἀναγκαῖον ἢ ὁ συλλογισμός· ὁ μὲν γὰρ συλλογισμὸς πᾶς ἀναγκαῖον, τὸ δ’ ἀναγκαῖον οὐ πᾶν συλλογισμός. ὥστ’ οὐκ εἴ τι συμβαίνει τεθέντων τινῶν, πειρατέον ἀνάγειν εὐθύς, ἀλλὰ πρῶτον ληπτέον τὰς δύο προτάσεις, εἶθ’ οὕτω διαιρετέον εἰς τοὺς ὅρους, μέσον δὲ θετέον τῶν ὅρων τὸν ἐν ἀμφοτέραις ταῖς προτάσεσι λεγόμενον· ἀνάγκη γὰρ τὸ μέσον ἐν ἀμφοτέραις ὑπάρχειν ἐν ἅπασι τοῖς σχήμασιν.

Ἐὰν μὲν οὖν [47b] κατηγορῇ καὶ κατηγορῆται τὸ μέσον, ἢ αὐτὸ μὲν κατηγορῇ, ἄλλο δ’ ἐκείνου ἀπαρνῆται, τὸ πρῶτον ἔσται σχῆμα· ἐὰν δὲ καὶ κατηγορῇ καὶ ἀπαρνῆται ἀπό τινος, τὸ μέσον· ἐὰν δ’ ἄλλα ἐκείνου κατηγορῆται, ἢ τὸ μὲν ἀπαρνῆται τὸ δὲ κατηγορῆται, τὸ ἔσχατον. οὕτω γὰρ εἶχεν ἐν ἑκάστῳ σχήματι τὸ μέσον. ὁμοίως δὲ καὶ ἐὰν μὴ καθόλου ὦσιν αἱ προτάσεις· ὁ γὰρ αὐτὸς διορισμὸς τοῦ μέσου. φανερὸν οὖν ὡς ἐν ᾧ λόγῳ μὴ λέγεται ταὐτὸ πλεονάκις, ὅτι οὐ γίνεται συλλογισμός· οὐ γὰρ εἴληπται μέσον. ἐπεὶ δ’ ἔχομεν ποῖον ἐν ἑκάστῳ σχήματι περαίνεται τῶν προβλημάτων, καὶ ἐν τίνι τὸ καθόλου καὶ ἐν ποίῳ τὸ ἐν μέρει, φανερὸν ὡς οὐκ εἰς ἅπαντα τὰ σχήματα βλεπτέον, ἀλλ’ ἑκάστου προβλήματος εἰς τὸ οἰκεῖον. ὅσα δ’ ἐν πλείοσι περαίνεται, τῇ τοῦ μέσου θέσει γνωριοῦμεν τὸ σχῆμα.

Κεφάλαιο 33

Πολλάκις μὲν οὖν ἀπατᾶσθαι συμβαίνει περὶ τοὺς συλλογισμοὺς διὰ τὸ ἀναγκαῖον, ὥσπερ εἴρηται πρότερον, ἐνίοτε δὲ παρὰ τὴν ὁμοιότητα τῆς τῶν ὅρων θέσεως· ὅπερ οὐ χρὴ λανθάνειν ἡμᾶς. οἷον εἰ τὸ Α κατὰ τοῦ Β λέγεται καὶ τὸ Β κατὰ τοῦ Γ· δόξειε γὰρ ἂν οὕτως ἐχόντων τῶν ὅρων εἶναι συλλογισμός, οὐ γίνεται δ' οὔτ' ἀναγκαῖον οὐδὲν οὔτε συλλογισμός. ἔστω γὰρ ἐφ' ᾧ Α τὸ ἀεὶ εἶναι, ἐφ' ᾧ δὲ Β διανοητὸς Ἀριστομένης, τὸ δ' ἐφ' ᾧ Γ Ἀριστομένης. ἀληθὲς δὴ τὸ Α τῷ Β ὑπάρχειν· ἀεὶ γάρ ἐστι διανοητὸς Ἀριστομένης. ἀλλὰ καὶ τὸ Β τῷ Γ· ὁ γὰρ Ἀριστομένης ἐστὶ διανοητὸς Ἀριστομένης. τὸ δ' Α τῷ Γ οὐχ ὑπάρχει· φθαρτὸς γάρ ἐστιν ὁ Ἀριστομένης. οὐ γὰρ ἐγίνετο συλλογισμὸς οὕτως ἐχόντων τῶν ὅρων, ἀλλ' ἔδει καθόλου τὴν Α Β ληφθῆναι πρότασιν. τοῦτο δὲ ψεῦδος, τὸ ἀξιοῦν πάντα τὸν διανοητὸν Ἀριστομένην ἀεὶ εἶναι, φθαρτοῦ ὄντος Ἀριστομένους. πάλιν ἔστω τὸ μὲν ἐφ' ᾧ Γ Μίκκαλος, τὸ δ' ἐφ' ᾧ Β μουσικὸς Μίκκαλος, ἐφ' ᾧ δὲ τὸ Α τὸ φθείρεσθαι αὔριον. ἀληθὲςδὴ τὸ Β τοῦ Γ κατηγορεῖν· ὁ γὰρ Μίκκαλός ἐστι μουσικὸς Μίκκαλος. ἀλλὰ καὶ τὸ Α τοῦ Β· φθείροιτο γὰρ ἂν αὔριον μουσικὸς Μίκκαλος. τὸ δέ γε Α τοῦ Γ ψεῦδος. τοῦτο δὴ ταὐτόν ἐστι τῷ πρότερον· οὐ γὰρ ἀληθὲς καθόλου, Μίκκαλος μουσικὸς ὅτι φθείρεται αὔριον· τούτου δὲ μὴ ληφθέντος οὐκ ἦν συλλογισμός.

Αὕτη μὲν οὖν ἡ ἀπάτη γίνεται ἐν τῷ παρὰ μικρόν· ὡς γὰρ οὐδὲν διαφέρον εἰπεῖν τόδε τῷδε ὑπάρχειν ἢ τόδε τῷδε παντὶ ὑπάρχειν, συγχωροῦμεν.

Κεφάλαιο 34

πολλάκις δὲ [48a] διαψεύδεσθαι συμπεσεῖται παρὰ τὸ μὴ καλῶς ἐκτίθεσθαι τοὺς κατὰ τὴν πρότασιν ὅρους, οἷον εἰ τὸ μὲν Α εἴη ὑγίεια, τὸ δ’ ἐφ’ ᾧ Β νόσος, ἐφ’ ᾧ δὲ Γ ἄνθρωπος. ἀληθὲς γὰρ εἰπεῖν ὅτι τὸ Α οὐδενὶ τῷ Β ἐνδέχεται ὑπάρχειν (οὐδεμιᾷ γὰρ νόσῳ ὑγίεια ὑπάρχει), καὶ πάλιν ὅτι τὸ Β παντὶ τῷ Γ ὑπάρχει (πᾶς γὰρ ἄνθρωπος δεκτικὸς νόσου). δόξειεν ἂν οὖν συμβαίνειν μηδενὶ ἀνθρώπῳ ἐνδέχεσθαι ὑγίειαν ὑπάρχειν. τούτου δ’ αἴτιον τὸ μὴ καλῶς ἐκκεῖσθαι τοὺς ὅρους κατὰ τὴν λέξιν, ἐπεὶ μεταληφθέντων τῶν κατὰ τὰς ἕξεις οὐκ ἔσται συλλογισμός, οἷον ἀντὶ μὲν τῆς ὑγιείας εἰ τεθείη τὸ ὑγιαῖνον, ἀντὶ δὲ τῆς νόσου τὸ νοσοῦν. οὐ γὰρ ἀληθὲς εἰπεῖν ὡς οὐκ ἐνδέχεται τῷ νοσοῦντι τὸ ὑγιαίνειν ὑπάρξαι. τούτου δὲ μὴ ληφθέντος οὐ γίνεται συλλογισμός, εἰ μὴ τοῦ ἐνδέχεσθαι· τοῦτο δ’ οὐκ ἀδύνατον· ἐνδέχεται γὰρ μηδενὶ ἀνθρώπῳ ὑπάρχειν ὑγίειαν. πάλιν ἐπὶ τοῦ μέσου σχήματος ὁμοίως ἔσται τὸ ψεῦδος· τὴν γὰρ ὑγίειαν νόσῳ μὲν οὐδεμιᾷ ἀνθρώπῳ δὲ παντὶ ἐνδέχεται ὑπάρχειν, ὥστ’ οὐδενὶ ἀνθρώπῳ νόσον. ἐν δὲ τῷ τρίτῳ σχήματι κατὰ τὸ ἐνδέχεσθαι συμβαίνει τὸ ψεῦδος, καὶ γὰρ ὑγίειαν καὶ νόσον καὶ ἐπιστήμην καὶ ἄγνοιαν καὶ ὅλως τὰ ἐναντία τῷ αὐτῷ ἐνδέχεται ὑπάρχειν, ἀλλήλοις δ’ ἀδύνατον. τοῦτο δ’ ἀνομολογούμενοντοῖς προειρημένοις· ὅτε γὰρ τῷ αὐτῷ πλείω ἐνεδέχετο ὑπάρχειν, ἐνεδέχετο καὶ ἀλλήλοις.

Φανερὸν οὖν ὅτι ἐν ἅπασι τούτοις ἡ ἀπάτη γίνεται παρὰ τὴν τῶν ὅρων ἔκθεσιν· μεταληφθέντων γὰρ τῶν κατὰ τὰς ἕξεις οὐδὲν γίνεται ψεῦδος. δῆλον οὖν ὅτι κατὰ τὰς τοιαύτας προτάσεις ἀεὶ τὸ κατὰ τὴν ἕξιν ἀντὶ τῆς ἕξεως μεταληπτέον καὶ θετέον ὅρον.

Κεφάλαιο 35

Οὐ δεῖ δὲ τοὺς ὅρους ἀεὶ ζητεῖν ὀνόματι ἐκτίθεσθαι· πολλάκις γὰρ ἔσονται λόγοι οἷς οὐ κεῖται ὄνομα· διὸ χαλεπὸν ἀνάγειν τοὺς τοιούτους συλλογισμούς. ἐνίοτε δὲ καὶ ἀπατᾶσθαι συμβήσεται διὰ τὴν τοιαύτην ζήτησιν, οἷον ὅτι τῶν ἀμέσων ἔστι συλλογισμός. ἔστω τὸ Α δύο ὀρθαί, τὸ ἐφ’ ᾧ Β τρίγωνον, ἐφ’ ᾧ δὲ Γ ἰσοσκελές. τῷ μὲν οὖν Γ ὑπάρχει τὸ Α διὰ τὸ Β, τῷ δὲ Β οὐκέτι δι’ ἄλλο (καθ’ αὑτὸ γὰρ τὸ τρίγωνον ἔχει δύο ὀρθάς), ὥστ’ οὐκ ἔσται μέσον τοῦ Α Β, ἀποδεικτοῦ ὄντος. φανερὸν γὰρ ὅτι τὸ μέσον οὐχ οὕτως ἀεὶ ληπτέον ὡς τόδε τι, ἀλλ’ ἐνίοτε λόγον, ὅπερ συμβαίνει κἀπὶ τοῦ λεχθέντος.

Κεφάλαιο 36

Τὸ δὲ ὑπάρχειν τὸ πρῶτον τῷ μέσῳ καὶ τοῦτο τῷ ἄκρῳ οὐ δεῖ λαμβάνειν ὡς αἰεὶ κατηγορηθησομένων [48b] ἀλλήλων ἢ ὁμοίως τό τε πρῶτον τοῦ μέσου καὶ τοῦτο τοῦ ἐσχάτου. καὶ ἐπὶ τοῦ μὴ ὑπάρχειν δ’ ὡσαύτως. ἀλλ’ ὁσαχῶς τὸ εἶναι λέγεται καὶ τὸ ἀληθὲς εἰπεῖν αὐτὸ τοῦτο, τοσαυταχῶς οἴεσθαι χρὴ σημαίνειν καὶ τὸ ὑπάρχειν. οἷον ὅτι τῶν ἐναντίων ἔστι μία ἐπιστήμη. ἔστω γὰρ τὸ Α τὸ μίαν εἶναι ἐπιστήμην, τὰ ἐναντία ἀλλήλοις ἐφ’ οὗ Β. τὸ δὴ Α τῷ Β ὑπάρχει οὐχ ὥστε τὰ ἐναντία [τὸ] μίαν εἶναι [αὐτῶν] ἐπιστήμην, ἀλλ’ ὅτι ἀληθὲς εἰπεῖν κατ’ αὐτῶν μίαν εἶναι αὐτῶν ἐπιστήμην.

Συμβαίνει δ’ ὁτὲ μὲν ἐπὶ τοῦ μέσου τὸ πρῶτον λέγεσθαι, τὸ δὲ μέσον ἐπὶ τοῦ τρίτου μὴ λέγεσθαι, οἷον εἰ ἡ σοφία ἐστὶν ἐπιστήμη, τοῦ δ’ ἀγαθοῦ ἐστὶν ἡ σοφία, συμπέρασμα ὅτι τοῦ ἀγαθοῦ ἔστιν ἐπιστήμη· τὸ μὲν δὴ ἀγαθὸν οὐκ ἔστιν ἐπιστήμη, ἡ δὲ σοφία ἐστὶν ἐπιστήμη. ὁτὲ δὲ τὸ μὲν μέσον ἐπὶ τοῦ τρίτου λέγεται, τὸ δὲ πρῶτον ἐπὶ τοῦ μέσου οὐ λέγεται, οἷον εἰ τοῦ ποιοῦ παντὸς ἔστιν ἐπιστήμη ἢ ἐναντίου, τὸ δ’ ἀγαθὸν καὶ ἐναντίον καὶ ποιόν, συμπέρασμα μὲν ὅτι τοῦ ἀγαθοῦ ἔστιν ἐπιστήμη, οὐκ ἔστι δὲ τὸ ἀγαθὸν ἐπιστήμη οὐδὲ τὸ ποιὸν οὐδὲ τὸ ἐναντίον, ἀλλὰ τὸ ἀγαθὸν ταῦτα. ἔστι δὲ μήτε τὸ πρῶτον κατὰ τοῦ μέσου μήτε τοῦτο κατὰ τοῦ τρίτου, τοῦ πρώτου κατὰ τοῦ τρίτου ὁτὲ μὲν λεγομένου ὁτὲ δὲ μὴ λεγομένου. οἷον εἰ οὗ ἐπιστήμη ἔστιν, ἔστι τούτου γένος, τοῦ δ’ ἀγαθοῦ ἔστιν ἐπιστήμη, συμπέρασμα ὅτι τοῦ ἀγαθοῦ ἔστι γένος· κατηγορεῖται δ’ οὐδὲν κατ’ οὐδενός. εἰ δ’ οὗ ἔστιν ἐπιστήμη, γένος ἐστὶ τοῦτο, τοῦ δ’ ἀγαθοῦ ἔστιν ἐπιστήμη, συμπέρασμα ὅτι τἀγαθόν ἐστι γένος· κατὰ μὲν δὴ τοῦ ἄκρου κατηγορεῖται τὸ πρῶτον, κατ’ ἀλλήλων δ’ οὐ λέγεται.

Τὸν αὐτὸν δὴ {{χ|27) τρόπον καὶ ἐπὶ τοῦ μὴ ὑπάρχειν ληπτέον. οὐ γὰρ ἀεὶ σημαίνει τὸ μὴ ὑπάρχειν τόδε τῷδε μὴ εἶναι τόδε τόδε, ἀλλ’ ἐνίοτε τὸ μὴ εἶναι τόδε τοῦδε ἢ τόδε τῷδε, οἷον ὅτι οὐκ ἔστι κινήσεως κίνησις ἢ γενέσεως γένεσις, ἡδονῆς δ’ ἔστιν· οὐκ ἄρα ἡ ἡδονὴ γένεσις. ἢ πάλιν ὅτι γέλωτος μὲν ἔστι σημεῖον, σημείου δ’ οὐκ ἔστι σημεῖον, ὥστ’ οὐ σημεῖον ὁ γέλως. ὁμοίως δὲ κἀν τοῖς ἄλλοις ἐν ὅσοις ἀναιρεῖται τὸ πρόβλημα τῷ λέγεσθαί πως πρὸς αὐτὸ τὸ γένος. πάλιν ὅτι ὁ καιρὸς οὐκ ἔστι χρόνος δέων· θεῷ γὰρ καιρὸς μὲν ἔστι, χρόνος δ’ οὐκ ἔστι δέων διὰ τὸ μηδὲν εἶναι θεῷ ὠφέλιμον. ὅρους μὲν γὰρ θετέον καιρὸν καὶ χρόνον δέοντα καὶ θεόν, τὴν δὲ πρότασιν ληπτέον κατὰ τὴν τοῦ ὀνόματος πτῶσιν. ἁπλῶς γὰρ τοῦτολέγομεν κατὰ πάντων, ὅτι τοὺς μὲν ὅρους ἀεὶ θετέον κατὰ τὰς κλήσεις τῶν ὀνομάτων, οἷον ἄνθρωπος ἢ ἀγαθόν ἢ [49a] ἐναντία, οὐκ ἀνθρώπου ἢ ἀγαθοῦ ἢ ἐναντίων, τὰς δὲ προτάσεις ληπτέον κατὰ τὰς ἑκάστου πτώσεις· ἢ γὰρ ὅτι τούτῳ, οἷον τὸ ἴσον, ἢ ὅτι τούτου, οἷον τὸ διπλάσιον, ἢ ὅτι τοῦτο, οἷον τὸ τύπτον ἢ ὁρῶν, ἢ ὅτι οὗτος, οἷον ὁ ἄνθρωπος ζῷον, ἢ εἴ πως ἄλλως πίπτει τοὔνομα κατὰ τὴν πρότασιν.

Κεφάλαιο 37

Τὸ δ’ ὑπάρχειν τόδε τῷδε καὶ τὸ ἀληθεύεσθαι τόδε κατὰ τοῦδε τοσαυταχῶς ληπτέον ὁσαχῶς αἱ κατηγορίαι διῄρηνται, καὶ ταύτας ἢ πῇ ἢ ἁπλῶς, ἔτι ἢ ἁπλᾶς ἢ συμπεπλεγμένας· ὁμοίως δὲ καὶ τὸ μὴ ὑπάρχειν. ἐπισκεπτέον δὲ ταῦτα καὶ διοριστέον βέλτιον.

Κεφάλαιο 38

Τὸ δ’ ἐπαναδιπλούμενον ἐν ταῖς προτάσεσι πρὸς τῷ πρώτῳ ἄκρῳ θετέον, οὐ πρὸς τῷ μέσῳ. λέγω δ’ οἷον εἰ γένοιτο συλλογισμὸς ὅτι τῆς δικαιοσύνης ἔστιν ἐπιστήμη ὅτι ἀγαθόν, τὸ ὅτι ἀγαθόν ἢ ᾗ ἀγαθόν πρὸς τῷ πρώτῳ θετέον. ἔστω γὰρ τὸ Α ἐπιστήμη ὅτι ἀγαθόν, ἐφ’ ᾧ δὲ Β ἀγαθόν, ἐφ’ ᾧ δὲ Γ δικαιοσύνη. τὸ δὴ Α ἀληθὲς τοῦ Β κατηγορῆσαι· τοῦ γὰρ ἀγαθοῦ ἔστιν ἐπιστήμη ὅτι ἀγαθόν. ἀλλὰ καὶ τὸ Β τοῦ Γ· ἡ γὰρ δικαιοσύνη ὅπερ ἀγαθόν. οὕτω μὲν οὖν γίνεται ἀνάλυσις. εἰ δὲ πρὸς τῷ Β τεθείη τὸ ὅτι ἀγαθόν, οὐκ ἔσται· τὸ μὲν γὰρ Α κατὰ τοῦ Β ἀληθὲς ἔσται, τὸ δὲ Β κατὰ τοῦ Γ οὐκ ἀληθὲς ἔσται· τὸ γὰρ ἀγαθὸν ὅτι ἀγαθὸν κατηγορεῖν τῆς δικαιοσύνης ψεῦδος καὶ οὐ συνετόν. ὁμοίως δὲ καὶ εἰ τὸ ὑγιεινὸν δειχθείη ὅτι ἔστιν ἐπιστητὸν ᾗ ἀγαθόν, ἢ τραγέλαφος ᾗ μὴ ὄν, ἢ ὁ ἄνθρωπος φθαρτὸν ᾗ αἰσθητόν· ἐν ἅπασι γὰρ τοῖς ἐπικατηγορουμένοις πρὸς τῷ ἄκρῳ τὴν ἐπαναδίπλωσιν θετέον.

Οὐχ ἡ αὐτὴ δὲ θέσις τῶν ὅρων ὅταν ἁπλῶς τι συλλογισθῇ καὶ ὅταν τόδε τι ἢ πῇ ἢ πώς, λέγω δ’ οἷον ὅταντἀγαθὸν ἐπιστητὸν δειχθῇ καὶ ὅταν ἐπιστητὸν ὅτι ἀγαθόν· ἀλλ’ εἰ μὲν ἁπλῶς ἐπιστητὸν δέδεικται, μέσον θετέον τὸ ὄν, εἰ δ’ ὅτι ἀγαθόν, τὸ τὶ ὄν. ἔστω γὰρ τὸ μὲν Α ἐπιστήμη ὅτι τὶ ὄν, ἐφ’ ᾧ δὲ Β ὄν τι, τὸ δ’ ἐφ’ ᾧ Γ ἀγαθόν. ἀληθὲς δὴ τὸ Α τοῦ Β κατηγορεῖν· ἦν γὰρ ἐπιστήμη τοῦ τινὸς ὄντος ὅτι τὶ ὄν. ἀλλὰ καὶ τὸ Β τοῦ Γ· τὸ γὰρ ἐφ’ ᾧ Γ ὄν τι. ὥστε καὶ τὸ Α τοῦ Γ· ἔσται ἄρα ἐπιστήμη τἀγαθοῦ ὅτι ἀγαθόν· ἦν γὰρ τὸ τὶ ὂν τῆς ἰδίου σημεῖον οὐσίας. εἰ δὲ τὸ ὂν μέσον ἐτέθη καὶ πρὸς τῷ ἄκρῳ τὸ ὂν ἁπλῶς καὶ μὴ τὸ τὶ ὂν ἐλέχθη, οὐκ ἂν ἦν συλλογισμὸς ὅτι ἔστιν ἐπιστήμη τἀγαθοῦ ὅτι ἀγαθόν, ἀλλ’ ὅτι ὄν, οἷον ἐφ’ ᾧ τὸ Α ἐπιστήμη [49b] ὅτι ὄν, ἐφ’ ᾧ Β ὄν, ἐφ’ ᾧ Γ ἀγαθόν. φανερὸν οὖν ὅτι ἐν τοῖς ἐν μέρει συλλογισμοῖς οὕτως ληπτέον τοὺς ὅρους.

Κεφάλαιο 39

Δεῖ δὲ καὶ μεταλαμβάνειν ἃ τὸ αὐτὸ δύναται, ὀνόματα ἀντ’ ὀνομάτων καὶ λόγους ἀντὶ λόγων καὶ ὄνομα καὶ λόγον, καὶ ἀεὶ ἀντὶ τοῦ λόγου τοὔνομα λαμβάνειν· ῥᾴων γὰρ ἡ τῶν ὅρων ἔκθεσις. οἷον εἰ μηδὲν διαφέρει εἰπεῖν τὸ ὑποληπτὸν τοῦ δοξαστοῦ μὴ εἶναι γένος ἢ μὴ εἶναι ὅπερ ὑποληπτόν τι τὸ δοξαστόν (ταὐτὸν γὰρ τὸ σημαινόμενον), ἀντὶ τοῦ λόγου τοῦ λεχθέντος τὸ ὑποληπτὸν καὶ τὸ δοξαστὸν ὅρους θετέον.

Κεφάλαιο 40

Ἐπεὶ δ’ οὐ ταὐτόν ἐστι τὸ εἶναι τὴν ἡδονὴν ἀγαθὸν καὶ τὸ εἶναι τὴν ἡδονὴν τὸ ἀγαθόν, οὐχ ὁμοίως θετέον τοὺς ὅρους, ἀλλ’ εἰ μέν ἐστιν ὁ συλλογισμὸς ὅτι ἡ ἡδονὴ τἀγαθόν, τἀγαθόν, εἰ δ’ ὅτι ἀγαθόν, ἀγαθόν. οὕτως κἀπὶ τῶν ἄλλων.

Κεφάλαιο 41

Οὐκ ἔστι δὲ ταὐτὸν οὔτ’ εἶναι οὔτ’ εἰπεῖν, ὅτι ᾧ τὸ Β ὑπάρχει, τούτῳ παντὶ τὸ Α ὑπάρχει, καὶ τὸ εἰπεῖν τὸ ᾧ παντὶ τὸ Β ὑπάρχει, καὶ τὸ Α παντὶ ὑπάρχει· οὐδὲν γὰρ κωλύει τὸ Β τῷ Γ ὑπάρχειν, μὴ παντὶ δέ. οἷον ἔστω τὸ Β καλόν, τὸ δὲ Γ λευκόν. εἰ δὴ λευκῷ τινὶ ὑπάρχει καλόν, ἀληθὲς εἰπεῖν ὅτι τῷ λευκῷ ὑπάρχει καλόν· ἀλλ’ οὐ παντὶ ἴσως. εἰ μὲν οὖν τὸ Α τῷ Β ὑπάρχει, μὴ παντὶ δὲ καθ’ οὗ τὸ Β, οὔτ’ εἰ παντὶ τῷ Γ τὸ Β, οὔτ’ εἰ μόνον ὑπάρχει, ἀνάγκη τὸ Α οὐχ ὅτι οὐ παντί, ἀλλ’ οὐδ’ ὑπάρχειν. εἰ δὲ καθ’ οὗ ἂν τὸ Β λέγηται ἀληθῶς, τούτῳ παντὶ ὑπάρχει, συμβήσεται τὸ Α, καθ’ οὗ παντὸς τὸ Β λέγεται, κατὰ τούτου παντὸς λέγεσθαι. εἰ μέντοι τὸ Α λέγεται καθ’ οὗ ἂν τὸ Β λέγηται κατὰ παντός, οὐδὲν κωλύει τῷ Γ ὑπάρχειν τὸ Β, μὴ παντὶ δὲ τὸ Α ἢ ὅλως μὴ ὑπάρχειν. ἐν δὴ τοῖς τρισὶν ὅροις δῆλον ὅτι τὸ καθ’ οὗ τὸ Β παντὸς τὸ Α λέγεσθαι τοῦτ’ ἔστι, καθ’ ὅσων τὸ Β λέγεται, κατὰ πάντων λέγεσθαι καὶ τὸ Α. καὶ εἰ μὲν κατὰ παντὸς τὸ Β, καὶ τὸ Α οὕτως· εἰ δὲ μὴ κατὰ παντός, οὐκ ἀνάγκη τὸ Α κατὰ παντός.

Οὐ δεῖ δ’ οἴεσθαι παρὰ τὸ ἐκτίθεσθαί τι συμβαίνειν ἄτοπον· οὐδὲν γὰρ προσχρώμεθα τῷ τόδε τι εἶναι, ἀλλ’ ὥσπερ ὁ γεωμέτρης τὴν ποδιαίαν καὶ εὐθεῖαν τήνδε καὶ ἀπλατῆ εἶναι λέγει οὐκ οὔσας, ἀλλ’ οὐχ οὕτως χρῆται ὡς ἐκ τούτων συλλογιζόμενος. ὅλως γὰρ ὃ μὴ ἔστιν ὡς ὅλον πρὸς μέρος καὶ ἄλλο πρὸς τοῦτο ὡς μέρος πρὸς ὅλον, ἐξ οὐδενὸς τῶν τοιούτων δείκνυσιν ὁ δεικνύων, ὥστε οὐδὲ γίνεται [50a] συλλογισμός. τῷ δ’ ἐκτίθεσθαι οὕτω χρώμεθα ὥσπερ καὶ τῷ αἰσθάνεσθαι, τὸν μανθάνοντ’ ἀλέγοντες· οὐ γὰρ οὕτως ὡς ἄνευ τούτων οὐχ οἷόν τ’ ἀποδειχθῆναι, ὥσπερ ἐξ ὧν ὁ συλλογισμός.

Κεφάλαιο 42

Μὴ λανθανέτω δ’ ἡμᾶς ὅτι ἐν τῷ αὐτῷ συλλογισμῷ οὐχ ἅπαντα τὰ συμπεράσματα δι’ ἑνὸς σχήματός ἐστιν, ἀλλὰ τὸ μὲν διὰ τούτου τὸ δὲ δι’ ἄλλου. δῆλον οὖν ὅτι καὶ τὰς ἀναλύσεις οὕτω ποιητέον. ἐπεὶ δ’ οὐ πᾶν πρόβλημα ἐν ἅπαντι σχήματι ἀλλ’ ἐν ἑκάστῳ τεταγμένα, φανερὸν ἐκ τοῦ συμπεράσματος ἐν ᾧ σχήματι ζητητέον.

Κεφάλαιο 43

Τούς τε πρὸς ὁρισμὸν τῶν λόγων, ὅσοι πρὸς ἕν τι τυγχάνουσι διειλεγμένοι τῶν ἐν τῷ ὅρῳ, πρὸς ὃ διείλεκται θετέον ὅρον, καὶ οὐ τὸν ἅπαντα λόγον· ἧττον γὰρ συμβήσεται ταράττεσθαι διὰ τὸ μῆκος, οἷον εἰ τὸ ὕδωρ ἔδειξεν ὅτι ὑγρὸν ποτόν, τὸ ποτὸν καὶ τὸ ὕδωρ ὅρους θετέον.

Κεφάλαιο 44

Ἔτι δὲ τοὺς ἐξ ὑποθέσεως συλλογισμοὺς οὐ πειρατέον ἀνάγειν· οὐ γὰρ ἔστιν ἐκ τῶν κειμένων ἀνάγειν. οὐ γὰρ διὰ συλλογισμοῦ δεδειγμένοι εἰσίν, ἀλλὰ διὰ συνθήκης ὡμολογημένοι πάντες. οἷον εἰ ὑποθέμενος, ἂν δύναμίς τις μία μὴ ᾖ τῶν ἐναντίων, μηδ’ ἐπιστήμην μίαν εἶναι, εἶτα διαλεχθείη ὅτι οὐκ ἔστι πᾶσα δύναμις τῶν ἐναντίων, οἱονεὶ τοῦ ὑγιεινοῦ καὶ τοῦ νοσώδους· ἅμα γὰρ ἔσται τὸ αὐτὸ ὑγιεινὸν καὶ νοσῶδες. ὅτι μὲν οὖν οὐκ ἔστι μία πάντων τῶν ἐναντίων δύναμις, ἐπιδέδεικται, ὅτι δ’ ἐπιστήμη οὐκ ἔστιν, οὐ δέδεικται. καίτοι ὁμολογεῖν ἀναγκαῖον· ἀλλ’ οὐκ ἐκ συλλογισμοῦ, ἀλλ’ ἐξ ὑποθέσεως. τοῦτον μὲν οὖν οὐκ ἔστιν ἀναγαγεῖν, ὅτι δ’ οὐ μία δύναμις, ἔστιν· οὗτος γὰρ ἴσως καὶ ἦν συλλογισμός, ἐκεῖνο δ’ ὑπόθεσις.

Ὁμοίως δὲ καὶ ἐπὶ τῶν διὰ τοῦ ἀδυνάτου περαινομένων· οὐδὲ γὰρ τούτους οὐκ ἔστιν ἀναλύειν, ἀλλὰ τὴν μὲν εἰς τὸ ἀδύνατον ἀπαγωγὴν ἔστι (συλλογισμῷ γὰρ δείκνυται), θάτερον δ’ οὐκ ἔστιν· ἐξ ὑποθέσεως γὰρ περαίνεται. διαφέρουσι δὲ τῶν προειρημένων ὅτι ἐν ἐκείνοις μὲν δεῖ προδιομολογήσασθαι, εἰ μέλλει συμφήσειν, οἷον ἂν δειχθῇ μία δύναμις τῶν ἐναντίων, καὶ ἐπιστήμην εἶναι τὴν αὐτήν· ἐνταῦθα δὲ καὶ μὴ προδιομολογησάμενοι συγχωροῦσι διὰ τὸ φανερὸν εἶναι τὸ ψεῦδος, οἷον τεθείσης τῆς διαμέτρου συμμέτρου τὸ τὰ περιττὰ ἴσα εἶναι τοῖς ἀρτίοις.

Πολλοὶ δὲ καὶ ἕτεροι περαίνονται ἐξ ὑποθέσεως, οὓς ἐπισκέψασθαι δεῖ καὶ διασημῆναι καθαρῶς. τίνες μὲν οὖν αἱ [50b] διαφοραὶ τούτων, καὶ ποσαχῶς γίνεται τὸ ἐξ ὑποθέσεως, ὕστερον ἐροῦμεν· νῦν δὲ τοσοῦτον ἡμῖν ἔστω φανερόν, ὅτι οὐκ ἔστιν ἀναλύειν εἰς τὰ σχήματα τοὺς τοιούτους συλλογισμούς. καὶ δι’ ἣν αἰτίαν, εἰρήκαμεν.

Κεφάλαιο 45

Ὅσα δ’ ἐν πλείοσι σχήμασι δείκνυται τῶν προβλημάτων, ἢν ἐν θατέρῳ συλλογισθῇ, ἔστιν ἀναγαγεῖν τὸν συλλογισμὸν εἰς θάτερον, οἷον τὸν ἐν τῷ πρώτῳ στερητικὸν εἰς τὸ δεύτερον, καὶ τὸν ἐν τῷ μέσῳ εἰς τὸ πρῶτον, οὐχ ἅπαντας δὲ ἀλλ’ ἐνίους. ἔσται δὲ φανερὸν ἐν τοῖς ἑπομένοις. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, τὸ Α οὐδενὶ τῷ Γ. οὕτω μὲν οὖν τὸ πρῶτον σχῆμα, ἐὰν δ’ ἀντιστραφῇ τὸ στερητικόν, τὸ μέσον ἔσται· τὸ γὰρ Β τῷ μὲν Α οὐδενί, τῷ δὲ Γ παντὶ ὑπάρχει. ὁμοίως δὲ καὶ εἰ μὴ καθόλου ἀλλ’ ἐν μέρει ὁ συλλογισμός, οἷον εἰ τὸ μὲν Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ· ἀντιστραφέντος γὰρ τοῦ στερητικοῦ τὸ μέσον ἔσται σχῆμα.

Τῶν δ’ ἐν τῷ δευτέρῳ συλλογισμῶν οἱ μὲν καθόλου ἀναχθήσονται εἰς τὸ πρῶτον, τῶν δ’ ἐν μέρει ἅτερος μόνος. ἔστω γὰρ τὸ Α τῷ μὲν Β μηδενὶ τῷ δὲ Γ παντὶ ὑπάρχον. ἀντιστραφέντος οὖν τοῦ στερητικοῦ τὸ πρῶτον ἔσται σχῆμα· τὸ μὲν γὰρ Β οὐδενὶ τῷ Α, τὸ δὲ Α παντὶ τῷ Γ ὑπάρξει. ἐὰν δὲ τὸ κατηγορικὸν ᾖ πρὸς τῷ Β, τὸ δὲ στερητικὸν πρὸς τῷ Γ, πρῶτον ὅρον θετέον τὸ Γ· τοῦτο γὰρ οὐδενὶ τῷ Α, τὸ δὲ Α παντὶ τῷ Β· ὥστ’ οὐδενὶ τῷ Β τὸ Γ. οὐδ’ ἄρα τὸ Β τῷ Γ οὐδενί· ἀντιστρέφει γὰρ τὸ στερητικόν. ἐὰν δ’ ἐν μέρει ᾖ ὁ συλλογισμός, ὅταν μὲν ᾖ τὸ στερητικὸν πρὸς τῷ μείζονι ἄκρῳ, ἀναχθήσεται εἰς τὸ πρῶτον, οἷον εἰ τὸ Α μηδενὶ τῷ Β, τῷ δὲ Γ τινί· ἀντιστραφέντος γὰρ τοῦ στερητικοῦ τὸ πρῶτον ἔσται σχῆμα· τὸ μὲν γὰρ Β οὐδενὶ τῷ Α, τὸ δὲ Α τινὶ τῷ Γ. ὅταν δὲ τὸ κατηγορικόν, οὐκ ἀναλυθήσεται, οἷον εἰ τὸ Α τῷ μὲν Β παντί, τῷ δὲ Γ οὐ παντί· οὔτε γὰρ δέχεται ἀντιστροφὴν τὸ Α Β, οὔτε γενομένης ἔσται συλλογισμός.

Πάλιν οἱ μὲν ἐν τῷ τρίτῳ σχήματι οὐκ ἀναλυθήσονται πάντες εἰς τὸ πρῶτον, οἱ δ’ ἐν τῷ πρώτῳ πάντες εἰς τὸ τρίτον. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ. οὐκοῦν ἐπειδὴ ἀντιστρέφει τὸ ἐν μέρει κατηγορικόν, ὑπάρξει τὸ Γ τινὶ τῷ Β· τὸ δὲ Α παντὶ ὑπῆρχεν, ὥστε γίνεται τὸ τρίτον σχῆμα. καὶ εἰ στερητικὸς ὁ συλλογισμός, ὡσαύτως· ἀντιστρέφει γὰρ τὸ ἐν μέρει κατηγορικόν, ὥστε τὸ μὲν Α οὐδενὶ τῷ Β, τὸ δὲ Γ τινὶ ὑπάρξει. [51a]

Τῶν δ’ ἐν τῷ τελευταίῳ σχήματι συλλογισμῶν εἷς μόνος οὐκ ἀναλύεται εἰς τὸ πρῶτον, ὅταν μὴ καθόλου τεθῇ τὸ στερητικόν, οἱ δ’ ἄλλοι πάντες ἀναλύονται. κατηγορείσθω γὰρ παντὸς τοῦ Γ τὸ Α καὶ τὸ Β· οὐκοῦν ἀντιστρέψει τὸ Γ πρὸς ἑκάτερον ἐπὶ μέρους· ὑπάρχει ἄρα τινὶ τῷ Β. ὥστ’ ἔσται τὸ πρῶτον σχῆμα, εἰ τὸ μὲν Α παντὶ τῷ Γ, τὸ δὲ Γ τινὶ τῷ Β. καὶ εἰ τὸ μὲν Α παντὶ τῷ Γ, τὸ δὲ Β τινί, ὁ αὐτὸς λόγος· ἀντιστρέφει γὰρ πρὸς τὸ Β τὸ Γ. ἐὰν δὲ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Γ, πρῶτος ὅρος θετέος τὸ Β· τὸ γὰρ Β παντὶ τῷ Γ, τὸ δὲ Γ τινὶ τῷ Α, ὥστε τὸ Β τινὶ τῷ Α. ἐπεὶ δ’ ἀντιστρέφει τὸ ἐν μέρει, καὶ τὸ Α τινὶ τῷ Β ὑπάρξει. καὶ εἰ στερητικὸς ὁ συλλογισμός, καθάλου τῶν ὅρων ὄντων, ὁμοίως ληπτέον. ὑπαρχέτω γὰρ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α μηδενί· οὐκοῦν τινὶ τῷ Β ὑπάρξει τὸ Γ, τὸ δὲ Α οὐδενὶ τῷ Γ, ὥστ’ ἔσται μέσον τὸ Γ. ὁμοίως δὲ καὶ εἰ τὸ μὲν στερητικὸν καθόλου, τὸ δὲ κατηγορικὸν ἐν μέρει· τὸ μὲν γὰρ Α οὐδενὶ τῷ Γ, τὸ δὲ Γ τινὶ τῶν Β ὑπάρξει. ἐὰν δ’ ἐν μέρει ληφθῇ τὸ στερητικόν, οὐκ ἔσται ἀνάλυσις, οἷον εἰ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ μὴ ὑπάρχει· ἀντιστραφέντος γὰρ τοῦ Β Γ ἀμφότεραι αἱ προτάσεις ἔσονται κατὰ μέρος.

Φανερὸν δὲ καὶ ὅτι πρὸς τὸ ἀναλύειν εἰς ἄλληλα τὰ σχήματα ἡ πρὸς τῷ ἐλάττονι ἄκρῳ πρότασις ἀντιστρεπτέα ἐν ἀμφοτέροις τοῖς σχήμασι· ταύτης γὰρ μετατιθεμένης ἡ μετάβασις ἐγίνετο.

Τῶν δ’ ἐν τῷ μέσῳ σχήματι ἅτερος μὲν ἀναλύεται, ἅτερος δ’ οὐκ ἀναλύεται, εἰς τὸ τρίτον. ὅταν μὲν γὰρ ᾖ τὸ καθόλου στερητικόν, ἀναλύεται. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τῷ δὲ Γ τινί, ἀμφότερα ὁμοίως ἀντιστρέφει πρὸς τὸ Α, ὥστε τὸ μὲν Β οὐδενὶ τῷ Α, τὸ δὲ Γ τινί· μέσον ἄρα τὸ Α. ὅταν δὲ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ τινὶ μὴ ὑπάρχῃ, οὐκ ἔσται ἀνάλυσις· οὐδετέρα γὰρ τῶν προτάσεων ἐκ τῆς ἀντιστροφῆς καθόλου. Καὶ οἱ ἐκ τοῦ τρίτου δὲ σχήματος ἀναλυθήσονται εἰς τὸ μέσον, ὅταν ᾖ καθόλου τὸ στερητικόν, οἷον εἰ τὸ Α μηδενὶ τῷ Γ, τὸ δὲ Β τινὶ ἢ παντί. καὶ γὰρ τὸ Γ τῷ μὲν Α οὐδενί, τῷ δὲ Β τινὶ ὑπάρξει. ἐὰν δ’ ἐπὶ μέρους ᾖ τὸ στερητικόν, οὐκ ἀναλυθήσεται· οὐ γὰρ δέχεται ἀντιστροφὴν τὸ ἐν μέρει ἀποφατικόν.

Φανερὸν οὖν ὅτι οἱ αὐτοὶ συλλογισμοὶ οὐκ ἀναλύονται ἐν τούτοις τοῖς σχήμασιν οἵπερ οὐδ’ εἰς τὸ πρῶτον ἀνελύοντο, [51b] καὶ ὅτι εἰς τὸ πρῶτον σχῆμα τῶν συλλογισμῶν ἀναγομένων οὗτοι μόνοι διὰ τοῦ ἀδυνάτου περαίνονται.

Πῶς μὲν οὖν δεῖ τοὺς συλλογισμοὺς ἀνάγειν, καὶ ὅτι ἀναλύεται τὰ σχήματα εἰς ἄλληλα, φανερὸν ἐκ τῶν εἰρημένων.

Κεφάλαιο 46

Διαφέρει δέ τι ἐν τῷ κατασκευάζειν ἢ ἀνασκευάζειν τὸ ὑπολαμβάνειν ἢ ταὐτὸν ἢ ἕτερον σημαίνειν τὸ μὴ εἶναι τοδὶ καὶ εἶναι μὴ τοῦτο, οἷον τὸ μὴ εἶναι λευκὸν τῷ εἶναι μὴ λευκόν. οὐ γὰρ ταὐτὸν σημαίνει, οὐδ’ ἔστιν ἀπόφασις τοῦ εἶναι λευκὸν τὸ εἶναι μὴ λευκόν, ἀλλὰ τὸ μὴεἶναι λευκόν. λόγος δὲ τούτου ὅδε. ὁμοίως γὰρ ἔχει τὸ δύναται βαδίζειν πρὸς τὸ δύναται οὐ βαδίζειν τῷ ἔστι λευκόν πρὸς τὸ ἔστιν οὐ λευκόν, καὶ ἐπίσταται τἀγαθόν πρὸς τὸ ἐπίσταται τὸ οὐκ ἀγαθόν. τὸ γὰρ ἐπίσταται τἀγαθόν ἢ ἔστιν ἐπιστάμενος τἀγαθόν οὐδὲν διαφέρει, οὐδὲ τὸ δύναται βαδίζειν ἢ ἔστι δυνάμενος βαδίζειν· ὥστε καὶ τὰ ἀντικείμενα, οὐ δύναται βαδίζειν — οὐκ ἔστι δυνάμενος βαδίζειν. εἰ οὖν τὸ οὐκ ἔστι δυνάμενος βαδίζειν ταὐτὸ σημαίνει καὶ ἔστι δυνάμενος οὐ βαδίζειν ἢ μὴ βαδίζειν, ταῦτά γε ἅμα ὑπάρξει ταὐτῷ (ὁ γὰρ αὐτὸς δύναται καὶ βαδίζειν καὶ μὴ βαδίζειν, καὶ ἐπιστήμων τἀγαθοῦ καὶ τοῦ μὴ ἀγαθοῦ ἐστί), φάσις δὲ καὶ ἀπόφασις οὐχ ὑπάρχουσιν αἱ ἀντικείμεναι ἅμα τῷ αὐτῷ. ὥσπερ οὖν οὐ ταὐτό ἐστι τὸ μὴ ἐπίστασθαι τἀγαθὸν καὶ ἐπίστασθαι τὸ μὴ ἀγαθόν, οὐδ’ εἶναι μὴ ἀγαθὸν καὶ μὴ εἶναι ἀγαθὸν ταὐτόν. τῶν γὰρ ἀνάλογον ἐὰν θάτερα ᾖ ἕτερα, καὶ θάτερα. οὐδὲ τὸ εἶναι μὴ ἴσον καὶ τὸ μὴ εἶναι ἴσον· τῷ μὲν γὰρ ὑπόκειταί τι, τῷ ὄντι μὴ ἴσῳ, καὶ τοῦτ’ ἔστι τὸ ἄνισον, τῷ δ’ οὐδέν. διόπερ ἴσον μὲν ἢ ἄνισον οὐ πᾶν, ἴσον δ’ ἢ οὐκ ἴσον πᾶν. ἔτι τὸ ἔστιν οὐ λευκὸν ξύλον καὶ οὐκ ἔστι λευκὸν ξύλον οὐχ ἅμα ὑπάρχει. εἰ γάρ ἐστι ξύλον οὐ λευκόν, ἔσται ξύλον· τὸ δὲ μὴ ὂν λευκὸν ξύλον οὐκ ἀνάγκη ξύλον εἶναι. ὥστε φανερὸν ὅτι οὐκ ἔστι τοῦ ἔστιν ἀγαθόν τὸ ἔστιν οὐκ ἀγαθόν ἀπόφασις. εἰ οὖν κατὰ παντὸς ἑνὸς ἢ φάσις ἢ ἀπόφασις ἀληθής, εἰ μὴ ἔστιν ἀπόφασις, δῆλον ὡς κατάφασις ἄν πως εἴη. καταφάσεως δὲ πάσης ἀπόφασις ἔστιν· καὶ ταύτης ἄρα τὸ οὐκ ἔστιν οὐκ ἀγαθόν.

Ἔχει δὲ τάξιν τήνδε πρὸς ἄλληλα. ἔστω τὸ εἶναι ἀγαθὸν ἐφ’ οὗ Α, τὸ δὲ μὴ εἶναι ἀγαθὸν ἐφ’ οὗ Β, τὸ δὲ εἶναι μὴ ἀγαθὸν ἐφ’ οὗ Γ, ὑπὸ τὸ Β, τὸ δὲ μὴ εἶναι μὴ ἀγαθὸν ἐφ’ οὗ Δ, ὑπὸ τὸ Α. παντὶ δὴ ὑπάρξει ἢ τὸ Α ἢ τὸΒ, καὶ οὐδενὶ τῷ αὐτῷ· καὶ ἢ τὸ Γ ἢ τὸ Δ, καὶ οὐδενὶ τῷ αὐτῷ. καὶ ᾧ τὸ Γ, ἀνάγκη τὸ Β παντὶ ὑπάρχειν (εἰ [52a] γὰρ ἀληθὲς εἰπεῖν ὅτι ἐστὶν οὐ λευκόν, καὶ ὅτι οὐκ ἔστι λευκὸν ἀληθές· ἀδύνατον γὰρ ἅμα εἶναι λευκὸν καὶ εἶναι μὴ λευκόν, ἢ εἶναι ξύλον οὐ λευκὸν καὶ εἶναι ξύλον λευκόν, ὥστ’ εἰ μὴ ἡ κατάφασις, ἡ ἀπόφασις ὑπάρξει), τῷ δὲ Β τὸ Γ οὐκ ἀεί (ὃ γὰρ ὅλως μὴ ξύλον, οὐδὲ ξύλον ἔσται οὐ λευκόν). ἀνάπαλιν τοίνυν, ᾧ τὸ Α, τὸ Δ παντί (ἢ γὰρ τὸ Γ ἢ τὸ Δ· ἐπεὶ δ’ οὐχ οἷόν τε ἅμα εἶναι μὴ λευκὸν καὶ λευκόν, τὸ Δ ὑπάρξει· κατὰ γὰρ τοῦ ὄντος λευκοῦ ἀληθὲς εἰπεῖν ὅτι οὐκ ἔστιν οὐ λευκόν), κατὰ δὲ τοῦ Δ οὐ παντὸς τὸ Α (κατὰ γὰρ τοῦ ὅλως μὴ ὄντος ξύλου οὐκ ἀληθὲς τὸ Α εἰπεῖν, ὡς ἔστι ξύλον λευκόν, ὥστε τὸ Δ ἀληθές, τὸ δ’ Α οὐκ ἀληθές, ὅτι ξύλον λευκόν). δῆλον δ’ ὅτι καὶ τὸ Α Γ οὐδενὶ τῷ αὐτῷ καὶ τὸ Β καὶ τὸ Δ ἐνδέχεται τινὶ τῷ αὐτῷ ὑπάρξαι. Ὁμοίως δ’ ἔχουσι καὶ αἱ στερήσεις πρὸς τὰς κατηγορίας ταύτῃ τῇ θέσει. ἴσον ἐφ’ οὗ τὸ Α, οὐκ ἴσον ἐφ’ οὗ Β, ἄνισον ἐφ’ οὗ Γ, οὐκ ἄνισον ἐφ’ οὗ Δ.

Καὶ ἐπὶ πολλῶν δέ, ὧν τοῖς μὲν ὑπάρχει τοῖς δ’ οὐχ ὑπάρχει ταὐτόν, ἡ μὲν ἀπόφασις ὁμοίως ἀληθεύοιτ’ ἄν, ὅτι οὐκ ἔστι λευκὰ πάντα ἢ ὅτι οὐκ ἔστι λευκὸν ἕκαστον· ὅτι δ’ ἐστὶν οὐ λευκὸν ἕκαστον ἢ πάντα ἐστὶν οὐ λευκά, ψεῦδος. ὁμοίως δὲ καὶ τοῦ ἔστι πᾶν ζῷον λευκόν οὐ τὸ ἔστιν οὐ λευκὸν ἅπαν ζῷον ἀπόφασις (ἄμφω γὰρ ψευδεῖς), ἀλλὰ τὸ οὐκ ἔστι πᾶν ζῷον λευκόν.

Ἐπεὶ δὲ δῆλον ὅτι ἕτερον σημαίνει τὸ ἔστιν οὐ λευκόν καὶ οὐκ ἔστι λευκόν, καὶ τὸ μὲν κατάφασις τὸ δ’ ἀπόφασις, φανερὸν ὡς οὐχ ὁ αὐτὸς τρόπος τοῦ δεικνύναι ἑκάτερον, οἷον ὅτι ὃ ἂν ᾖ ζῷον οὐκ ἔστι λευκὸν ἢ ἐνδέχεται μὴ εἶναι λευκόν, καὶ ὅτι ἀληθὲς εἰπεῖν μὴ λευκόν· τοῦτο γάρ ἐστιν εἶναι μὴ λευκόν. ἀλλὰ τὸ μὲν ἀληθὲς εἰπεῖν ἔστι λευκόν εἴτε μὴ λευκόν ὁ αὐτὸς τρόπος· κατασκευαστικῶς γὰρ ἄμφω διὰ τοῦ πρώτου δείκνυται σχήματος· τὸ γὰρ ἀληθὲς τῷ ἔστιν ὁμοίως τάττεται· τοῦ γὰρ ἀληθὲς εἰπεῖν λευκὸν οὐ τὸ ἀληθὲς εἰπεῖν μὴ λευκὸν ἀπόφασις, ἀλλὰ τὸ μὴ ἀληθὲς εἰπεῖν λευκόν. εἰ δὴ ἔσται ἀληθὲς εἰπεῖν ὃ ἂν ᾖ ἄνθρωπος μουσικὸν εἶναι ἢ μὴ μουσικὸν εἶναι, ὃ ἂν ᾖ ζῷον ληπτέον ἢ εἶναι μουσικὸν ἢ εἶναι μὴ μουσικόν, καὶ δέδεικται. τὸ δὲ μὴ εἶναι μουσικὸν ὃ ἂν ᾖ ἄνθρωπος, ἀνασκευαστικῶς δείκνυται κατὰ τοὺς εἰρημένους τρόπους τρεῖς. Ἁπλῶς δ’ ὅταν οὕτως ἔχῃ τὸ Α καὶ τὸ Β ὥσθ’ ἅμα μὲν τῷ αὐτῷ μὴ ἐνδέχεσθαι, παντὶ δὲ ἐξ ἀνάγκης [52b] θάτερον, καὶ πάλιν τὸ Γ καὶ τὸ Δ ὡσαύτως, ἕπηται δὲ τῷ Γ τὸ Α καὶ μὴ ἀντιστρέφῃ, καὶ τῷ Β τὸ Δ ἀκολουθήσει καὶ οὐκ ἀντιστρέψει· καὶ τὸ μὲν Α καὶ Δ ἐνδέχεται τῷ αὐτῷ, τὸ δὲ Β καὶ Γ οὐκ ἐνδέχεται. πρῶτον μὲν οὖν ὅτι τῷ Β τὸ Δ ἕπεται, ἐνθένδε φανερόν. ἐπεὶ γὰρ παντὶ τῶν Γ Δ θάτερον ἐξ ἀνάγκης, ᾧ δὲ τὸ Β, οὐκ ἐνδέχεται τὸ Γ διὰ τὸ συνεπιφέρειν τὸ Α, τὸ δὲ Α καὶ Β μὴ ἐνδέχεσθαι τῷ αὐτῷ, φανερὸν ὅτι τὸ Δ ἀκολουθήσει. πάλιν ἐπεὶ τῷ Α τὸ Γ οὐκ ἀντιστρέφει, παντὶ δὲ τὸ Γ ἢ τὸ Δ, ἐνδέχεται τὸ Α καὶ τὸ Δ τῷ αὐτῷ ὑπάρχειν. τὸ δέ γε Β καὶ τὸ Γ οὐκ ἐνδέχεται διὰ τὸ συνακολουθεῖν τῷ Γ τὸ Α· συμβαίνει γάρ τι ἀδύνατον.

φανερὸν οὖν ὅτι οὐδὲ τῷ Δ τὸ Β ἀντιστρέφει, ἐπείπερ ἐγχωρεῖ ἅμα τὸ Δ καὶ τὸ Α ὑπάρχειν.

Συμβαίνει δ’ ἐνίοτε καὶ ἐν τῇ τοιαύτῃ τάξει τῶν ὅρων ἀπατᾶσθαι διὰ τὸ μὴ τὰ ἀντικείμενα λαμβάνειν ὀρθῶς ὧν ἀνάγκη παντὶ θάτερον ὑπάρχειν· οἷον εἰ τὸ Α καὶ τὸ Β μὴ ἐνδέχεται ἅμα τῷ αὐτῷ, ἀνάγκη δ’ ὑπάρχειν, ᾧ μὴ θάτερον, θάτερον, καὶ πάλιν τὸ Γ καὶ τὸ Δ ὡσαύτως, ᾧ δὲ τὸ Γ, παντὶ ἕπεται τὸ Α. συμβήσεται γὰρ ᾧ τὸ Δ, τὸ Β ὑπάρχειν ἐξ ἀνάγκης, ὅπερ ἐστὶ ψεῦδος. εἰλήφθω γὰρ ἀπόφασις τῶν Α Β ἡ ἐφ’ ᾧ Ζ, καὶ πάλιν τῶν Γ Δ ἡ ἐφ’ ᾧ Θ. ἀνάγκη δὴ παντὶ ἢ τὸ Α ἢ τὸ Ζ· ἢ γὰρ τὴν φάσιν ἢ τὴν ἀπόφασιν. καὶ πάλιν ἢ τὸ Γ ἢ τὸ Θ· φάσις γὰρ καὶ ἀπόφασις. καὶ ᾧ τὸ Γ, παντὶ τὸ Α ὑπόκειται. ὥστε ᾧ τὸ Ζ, παντὶ τὸ Θ. πάλιν ἐπεὶ τῶν Ζ Β παντὶ θάτερον καὶ τῶν Θ Δ ὡσαύτως, ἀκολουθεῖ δὲ τῷ Ζ τὸ Θ, καὶ τῷ Δ ἀκολουθήσει τὸ Β· τοῦτο γὰρ ἴσμεν. εἰ ἄρα τῷ Γ τὸ Α, καὶ τῷ Δ τὸ Β. τοῦτο δὲ ψεῦδος· ἀνάπαλιν γὰρ ἦν ἐν τοῖς οὕτως ἔχουσιν ἡ ἀκολούθησις. οὐ γὰρ ἴσως ἀνάγκη παντὶ τὸ Α ἢ τὸ Ζ, οὐδὲ τὸ Ζ ἢ τὸ Β· οὐ γάρ ἐστιν ἀπόφασις τοῦ Α τὸ Ζ. τοῦ γὰρ ἀγαθοῦ τὸ οὐκ ἀγαθὸν ἀπόφασις· οὐ ταὐτὸ δ’ ἐστὶ τὸ οὐκ ἀγαθὸν τῷ οὔτ’ ἀγαθὸν οὔτ’ οὐκ ἀγαθόν. ὁμοίως δὲ καὶ ἐπὶ τῶν Γ Δ· αἱ γὰρ ἀποφάσεις αἱ εἰλημμέναι δύο εἰσίν.

Βιβλίο 2

Κεφάλαιο 1

Ἐν πόσοις μὲν οὖν σχήμασι καὶ διὰ ποίων καὶ πόσων προτάσεων καὶ πότε καὶ πῶς γίνεται συλλογισμός, ἔτι δ’ εἰς ποῖα βλεπτέον ἀνασκευάζοντι καὶ κατασκευά[53a] ζοντι, καὶ πῶς δεῖ ζητεῖν περὶ τοῦ προκειμένου καθ’ ὁποιανοῦν μέθοδον, ἔτι δὲ διὰ ποίας ὁδοῦ ληψόμεθα τὰς περὶ ἕκαστον ἀρχάς, ἤδη διεληλύθαμεν. ἐπεὶ δ’ οἱ μὲν καθόλου τῶν συλλογισμῶν εἰσὶν οἱ δὲ κατὰ μέρος, οἱ μὲν καθόλου πάντες αἰεὶ πλείω συλλογίζονται, τῶν δ’ ἐν μέρει οἱ μὲν κατηγορικοὶ πλείω, οἱ δ’ ἀποφατικοὶ τὸ συμπέρασμα μόνον. αἱ μὲν γὰρ ἄλλαι προτάσεις ἀντιστρέφουσιν, ἡ δὲ στερητικὴ οὐκ ἀντιστρέφει. τὸ δὲ συμπέρασμα τὶ κατά τινός ἐστιν, ὥσθ’ οἱ μὲν ἄλλοι συλλογισμοὶ πλείω συλλογίζονται, οἷον εἰ τὸ Α δέδεικται παντὶ τῷ Β ἢ τινί, καὶ τὸ Β τινὶ τῷ Α ἀναγκαῖον ὑπάρχειν, καὶ εἰ μηδενὶ τῷ Β τὸ Α, οὐδὲ τὸ Β οὐδενὶ τῷ Α, τοῦτο δ’ ἕτερον τοῦ ἔμπροσθεν· εἰ δὲ τινὶ μὴ ὑπάρχει, οὐκ ἀνάγκη καὶ τὸ Β τινὶ τῷ Α μὴ ὑπάρχειν· ἐνδέχεται γὰρ παντὶ ὑπάρχειν.

Αὕτη μὲν οὖν κοινὴ πάντων αἰτία, τῶν τε καθόλου καὶ τῶν κατὰ μέρος· ἔστι δὲ περὶ τῶν καθόλου καὶ ἄλλως εἰπεῖν. ὅσα γὰρ ἢ ὑπὸ τὸ μέσον ἢ ὑπὸ τὸ συμπέρασμά ἐστιν, ἁπάντων ἔσται ὁ αὐτὸς συλλογισμός, ἐὰν τὰ μὲν ἐν τῷ μέσῳ τὰ δ’ ἐν τῷ συμπεράσματι τεθῇ, οἷον εἰ τὸ Α Β συμπέρασμα διὰ τοῦ Γ, ὅσα ὑπὸ τὸ Β ἢ τὸ Γ ἐστίν, ἀνάγκη κατὰ πάντων λέγεσθαι τὸ Α· εἰ γὰρ τὸ Δ ἐν ὅλῳ τῷ Β, τὸ δὲ Β ἐν τῷ Α, καὶ τὸ Δ ἔσται ἐν τῷ Α· πάλιν εἰ τὸ Ε ἐν ὅλῳ τῷ Γ, τὸ δὲ Γ ἐν τῷ Α, καὶ τὸ Ε ἐν τῷ Α ἔσται. ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμός. ἐπὶ δὲ τοῦ δευτέρου σχήματος τὸ ὑπὸ τὸ συμπέρασμα μόνον ἔσται συλλογίσασθαι, οἷον εἰ τὸ Α τῷ Β μηδενί, τῷ δὲ Γ παντί· συμπέρασμα ὅτι οὐδενὶ τῷ Γ τὸ Β. εἰ δὴ τὸ Δ ὑπὸ τὸ Γ ἐστί, φανερὸν ὅτι οὐχ ὑπάρχει αὐτῷ τὸ Β· τοῖς δ’ ὑπὸ τὸ Α ὅτι οὐχ ὑπάρχει, οὐ δῆλον διὰ τοῦ συλλογισμοῦ. καίτοι οὐχ ὑπάρχει τῷ Ε, εἰ ἔστιν ὑπὸ τὸ Α· ἀλλὰ τὸ μὲν τῷ Γ μηδενὶ ὑπάρχειν τὸ Β διὰ τοῦ συλλογισμοῦ δέδεικται, τὸ δὲ τῷ Α μὴ ὑπάρχειν ἀναπόδεικτον εἴληπται, ὥστ’ οὐ διὰ τὸν συλλογισμὸν συμβαίνει τὸ Β τῷ Ε μὴ ὑπάρχειν. ἐπὶ δὲ τῶν ἐν μέρει τῶν μὲν ὑπὸ τὸ συμπέρασμα οὐκ ἔσται τὸ ἀναγκαῖον (οὐ γὰρ γίνεται συλλογισμός, ὅταν αὕτη ληφθῇ ἐν μέρει), τῶν δ’ ὑπὸ τὸ μέσον ἔσται πάντων, πλὴν οὐ διὰ τὸν συλλογισμόν· οἷον εἰ τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ· τοῦ μὲν γὰρ ὑπὸ τὸ Γ τεθέντος οὐκ ἔσται συλλογισμός, τοῦ δ’ ὑπὸ τὸ Β ἔσται, ἀλλ’ οὐ διὰ τὸν προγεγενημένον. ὁμοίως δὲ κἀπὶ τῶν ἄλλων σχημάτων· τοῦ μὲν γὰρ ὑπὸ τὸ συμπέρασμα οὐκ ἔσται, [53b] θατέρου δ’ ἔσται, πλὴν οὐ διὰ τὸν συλλογισμόν, ᾗ καὶ ἐν τοῖς καθόλου ἐξ ἀναποδείκτου τῆς προτάσεως τὰ ὑπὸ τὸ μέσον ἐδείκνυτο· ὥστ’ ἢ οὐδ’ ἐκεῖ ἔσται ἢ καὶ ἐπὶ τούτων.

Κεφάλαιο 2

Ἔστι μὲν οὖν οὕτως ἔχειν ὥστ’ ἀληθεῖς εἶναι τὰς προτάσεις δι’ ὧν ὁ συλλογισμός, ἔστι δ’ ὥστε ψευδεῖς, ἔστι δ’ ὥστε τὴν μὲν ἀληθῆ τὴν δὲ ψευδῆ. τὸ δὲ συμπέρασμα ἢ ἀληθὲς ἢ ψεῦδος ἐξ ἀνάγκης. ἐξ ἀληθῶν μὲν οὖν οὐκ ἔστι ψεῦδος συλλογίσασθαι, ἐκ ψευδῶν δ’ ἔστιν ἀληθές, πλὴν οὐ διότι ἀλλ’ ὅτι· τοῦ γὰρ διότι οὐκ ἔστιν ἐκ ψευδῶν συλλογισμός· δι’ ἣν δ’ αἰτίαν, ἐν τοῖς ἑπομένοις λεχθήσεται.

Πρῶτον μὲν οὖν ὅτι ἐξ ἀληθῶν οὐχ οἷόν τε ψεῦδος συλλογίσασθαι, ἐντεῦθεν δῆλον. εἰ γὰρ τοῦ Α ὄντος ἀνάγκη τὸ Β εἶναι, τοῦ Β μὴ ὄντος ἀνάγκη τὸ Α μὴ εἶναι. εἰ οὖν ἀληθές ἐστι τὸ Α, ἀνάγκη τὸ Β ἀληθὲς εἶναι, ἢ συμβήσεται τὸ αὐτὸ ἅμα εἶναί τε καὶ οὐκ εἶναι· τοῦτο δ’ ἀδύνατον. μὴ ὅτι δὲ κεῖται τὸ Α εἷς ὅρος, ὑποληφθήτω ἐνδέχεσθαι ἑνός τινος ὄντος ἐξ ἀνάγκης τι συμβαίνειν· οὐ γὰρ οἷόν τε· τὸ μὲν γὰρ συμβαῖνον ἐξ ἀνάγκης τὸ συμπέρασμά ἐστι, δι’ ὧν δὲ τοῦτο γίνεται ἐλαχίστων, τρεῖς ὅροι, δύο δὲ διαστήματα καὶ προτάσεις. εἰ οὖν ἀληθές, ᾧ τὸ Β ὑπάρχει, τὸ Α παντί, ᾧ δὲ τὸ Γ, τὸ Β, ᾧ τὸ Γ, ἀνάγκη τὸ Α ὑπάρχειν καὶ οὐχ οἷόν τε τοῦτο ψεῦδος εἶναι· ἅμα γὰρ ὑπάρξει ταὐτὸ καὶ οὐχ ὑπάρξει. τὸ οὖν Α ὥσπερ ἓν κεῖται, δύο προτάσεις συλληφθεῖσαι. ὁμοίως δὲ καὶ ἐπὶ τῶν στερητικῶν ἔχει· οὐ γὰρ ἔστιν ἐξ ἀληθῶν δεῖξαι ψεῦδος.

Ἐκ ψευδῶν δ’ ἀληθὲς ἔστι συλλογίσασθαι καὶ ἀμφοτέρων τῶν προτάσεων ψευδῶν οὐσῶν καὶ τῆς μιᾶς, ταύτης δ’ οὐχ ὁποτέρας ἔτυχεν ἀλλὰ τῆς δευτέρας, ἐάνπερ ὅλην λαμβάνῃ ψευδῆ· μὴ ὅλης δὲ λαμβανομένης ἔστιν ὁποτερασοῦν. ἔστω γὰρ τὸ Α ὅλῳ τῷ Γ ὑπάρχον, τῷ δὲ Β μηδενί, μηδὲ τὸ Β τῷ Γ. ἐνδέχεται δὲ τοῦτο, οἷον λίθῳ οὐδενὶ ζῷον, οὐδὲ λίθος οὐδενὶ ἀνθρώπῳ. ἐὰν οὖν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Γ, τὸ Α παντὶ τῷ Γ ὑπάρξει, ὥστ’ ἐξ ἀμφοῖν ψευδῶν ἀληθὲς τὸ συμπέρασμα· πᾶς γὰρ ἄνθρωπος ζῷον. ὡσαύτως δὲ καὶ τὸ στερητικόν. ἔστι γὰρ τῷ Γ μήτε τὸ Α ὑπάρχειν μηδενὶ μήτε τὸ Β, τὸ μέντοι Α τῷ Β παντί, οἷον ἐὰν τῶν αὐτῶν ὅρων ληφθέντων μέσον τεθῇ ὁ ἄνθρωπος· λίθῳ γὰρ οὔτε ζῷον οὔτε ἄνθρωπος οὐδενὶ ὑπάρχει, ἀνθρώπῳ δὲ παντὶ ζῷον. ὥστ’ ἐὰν ᾧ μὲν ὑπάρχει, λάβῃ μηδενὶ ὑπάρχειν, ᾧ δὲ μὴ ὑπάρχει, παντὶ ὑπάρχειν, ἐκ ψευδῶν ἀμφοῖν ἀληθὲς ἔσται τὸ [54a] συμπέρασμα. ὁμοίως δὲ δειχθήσεται καὶ ἐὰν ἐπί τι ψευδὴς ἑκατέρα ληφθῇ. Ἐὰν δ’ ἡ ἑτέρα τεθῇ ψευδής, τῆς μὲν πρώτης ὅλης ψευδοῦς οὔσης, οἷον τῆς Α Β, οὐκ ἔσται τὸ συμπέρασμα ἀληθές, τῆς δὲ Β Γ ἔσται. λέγω δ’ ὅλην ψευδῆ τὴν ἐναντίαν, οἷον εἰ μηδενὶ ὑπάρχον παντὶ εἴληπται ἢ εἰ παντὶ μηδενὶ ὑπάρχειν. ἔστω γὰρ τὸ Α τῷ Β μηδενὶ ὑπάρχον, τὸ δὲ Β τῷ Γ παντί. ἂν δὴ τὴν μὲν Β Γ πρότασιν λάβω ἀληθῆ, τὴν δὲ τὸ Α Β ψευδῆ ὅλην, καὶ παντὶ ὑπάρχειν τῷ Β τὸ Α, ἀδύνατον τὸ συμπέρασμα ἀληθὲς εἶναι· οὐδενὶ γὰρ ὑπῆρχε τῶν Γ, εἴπερ ᾧ τὸ Β, μηδενὶ τὸ Α, τὸ δὲ Β παντὶ τῷ Γ. ὁμοίως δ' οὐδ' εἰ τὸ Α τῷ Β παντὶ ὑπάρχει καὶ τὸ Β τῷ Γ, ἐλήφθη δ' ἡ μὲν τὸ Β Γ ἀληθὴς πρότασις, ἡ δὲ τὸ Α Β ψευδὴς ὅλη, καὶ μηδενὶ ᾧ τὸ Β, τὸ Α — τὸ συμπέρασμα ψεῦδος ἔσται· παντὶ γὰρ ὑπάρξει τῷ Γ τὸ Α, εἴπερ ᾧ τὸ Β, παντὶ τὸ Α, τὸ δὲ Β παντὶ τῷ Γ. φανερὸν οὖν ὅτι τῆς πρώτης ὅλης λαμβανομένης ψευδοῦς, ἐάν τε καταφατικῆς ἐάν τε στερητικῆς, τῆς δ' ἑτέρας ἀληθοῦς, οὐ γίνεται ἀληθὲς τὸ συμπέρασμα.

Μὴ ὅλης δὲ λαμβανομένης ψευδοῦς ἔσται. εἰ γὰρ τὸ Α τῷ μὲν Γ παντὶ ὑπάρχει τῷ δὲ Β τινί, τὸ δὲ Β παντὶ τῷ Γ, οἷον ζῷον κύκνῳ μὲν παντὶ λευκῷ δὲ τινί, τὸ δὲ λευκὸν παντὶ κύκνῳ, ἐὰν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Γ, τὸ Α παντὶ τῷ Γ ὑπάρξει ἀληθῶς· πᾶς γὰρ κύκνος ζῷον. ὁμοίως δὲ καὶ εἰ στερητικὸν εἴη τὸ Α Β· ἐγχωρεῖ γὰρ τὸ Α τῷ μὲν Β τινὶ ὑπάρχειν τῷ δὲ Γ μηδενί, τὸ δὲ Β παντὶ τῷ Γ, οἷον ζῷον τινὶ λευκῷ χίονι δ' οὐδεμιᾷ, λευκὸν δὲ πάσῃ χιόνι. εἰ οὖν ληφθείη τὸ μὲν Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, τὸ Α οὐδενὶ τῷ Γ ὑπάρξει. Ἐὰν δ' ἡ μὲν Α Β πρότασις ὅλη ληφθῇ (28) ἀληθής, ἡ δὲ Β Γ ὅλη ψευδής, ἔσται συλλογισμὸς ἀληθής· οὐδὲν γὰρ κωλύει τὸ Α τῷ Β καὶ τῷ Γ παντὶ ὑπάρχειν, τὸ μέντοι Β μηδενὶ τῷ Γ, οἷον ὅσα τοῦ αὐτοῦ γένους εἴδη μὴ ὑπ' ἄλληλα· τὸ γὰρ ζῷον καὶ ἵππῳ καὶ ἀνθρώπῳ ὑπάρχει, ἵππος δ' οὐδενὶ ἀνθρώπῳ. ἐὰν οὖν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Γ, ἀληθὲς ἔσται τὸ συμπέρασμα, ψευδοῦς ὅλης οὔσης τῆς Β Γ προτάσεως. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως. ἐνδέχεται γὰρ τὸ Α μήτε τῷ Β μήτε τῷ Γ μηδενὶ ὑπάρχειν, μηδὲ τὸ Β μηδενὶ τῷ Γ, οἷον τοῖς ἐξ ἄλλου γένους εἴδεσι τὸ γένος· τὸ γὰρ ζῷον οὔτε μουσικῇ οὔτ' ἰατρικῇ ὑπάρχει, οὐδ' [54b] ἡ μουσικὴ ἰατρικῇ. ληφθέντος οὖν τοῦ μὲν Α μηδενὶ τῷ Β, τοῦ δὲ Β παντὶ τῷ Γ, ἀληθὲς ἔσται τὸ συμπέρασμα. καὶ εἰ μὴ ὅλη ψευδὴς ἡ Β Γ ἀλλ' ἐπί τι, καὶ οὕτως ἔσται τὸ συμπέρασμα ἀληθές. οὐδὲν γὰρ κωλύει τὸ Α καὶ τῷ Β καὶ τῷ Γ ὅλῳ ὑπάρχειν, τὸ μέντοι Β τινὶ τῷ Γ, οἷον τὸ γένος τῷ εἴδει καὶ τῇ διαφορᾷ· τὸ γὰρ ζῷον παντὶ ἀνθρώπῳ καὶ παντὶ πεζῷ, ὁ δ' ἄνθρωπος τινὶ πεζῷ καὶ οὐ παντί. εἰ οὖν τὸ Α παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Γ ληφθείη, τὸ Α παντὶ τῷ Γ ὑπάρξει· ὅπερ ἦν ἀληθές. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως. ἐνδέχεται γὰρ τὸ Α μήτε τῷ Β μήτε τῷ Γ μηδενὶ ὑπάρχειν, τὸ μέντοι Β τινὶ τῷ Γ, οἷον τὸ γένος τῷ ἐξ ἄλλου γένους εἴδει καὶ διαφορᾷ· τὸ γὰρ ζῷον οὔτε φρονήσει οὐδεμιᾷ ὑπάρχει οὔτε θεωρητικῇ, ἡ δὲ φρόνησις τινὶ θεωρητικῇ. εἰ οὖν ληφθείη τὸ μὲν Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, οὐδενὶ τῷ Γ τὸ Α ὑπάρξει· τοῦτο δ’ ἦν ἀληθές.

Ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν ἐνδέχεται καὶ τῆς πρώτης προτάσεως ὅλης οὔσης ψευδοῦς τῆς δ’ ἑτέρας ἀληθοῦς ἀληθὲς εἶναι τὸ συμπέρασμα, καὶ ἐπί τι ψευδοῦς οὔσης τῆς πρώτης τῆς δ’ ἑτέρας ἀληθοῦς, καὶ τῆς μὲν ἀληθοῦς τῆς δ’ ἐν μέρει ψευδοῦς, καὶ ἀμφοτέρων ψευδῶν. οὐδὲν γὰρ κωλύει τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχειν τῷ δὲ Γ τινί, καὶ τὸ Β τῷ Γ τινί, οἷον ζῷον οὐδεμιᾷ χιόνι λευκῷ δὲ τινὶ ὑπάρχει, καὶ ἡ χιὼν λευκῷ τινί. εἰ οὖν μέσον τεθείη ἡ χιών, πρῶτον δὲ τὸ ζῷον, καὶ ληφθείη τὸ μὲν Α ὅλῳ τῷ Β ὑπάρχειν, τὸ δὲ Β τινὶ τῷ Γ, ἡ μὲν Α Β ὅλη ψευδής, ἡ δὲ Β Γ ἀληθής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως· ἐγχωρεῖ γὰρ τὸ Α τῷ μὲν Β ὅλῳ ὑπάρχειν τῷ δὲ Γ τινὶ μὴ ὑπάρχειν, τὸ μέντοι Β τινὶ τῷ Γ ὑπάρχειν, οἷον τὸ ζῷον ἀνθρώπῳ μὲν παντὶ ὑπάρχει, λευκῷ δὲ τινὶ οὐχ ἕπεται, ὁ δ’ ἄνθρωπος τινὶ λευκῷ ὑπάρχει, ὥστ’ εἰ μέσου τεθέντος τοῦ ἀνθρώπου ληφθείη τὸ Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχειν, ἀληθὲς ἔσται τὸ συμπέρασμα ψευδοῦς οὔσης ὅλης τῆς Α Β προτάσεως. καὶ εἰ ἐπί τι ψευδὴς ἡ Α Β πρότασις, ἔσται τὸ συμπέρασμα ἀληθές. οὐδὲν γὰρ κωλύει τὸ Α καὶ τῷ Β καὶ τῷ Γ τινὶ ὑπάρχειν, καὶ τὸ Β τῷ Γ τινὶ ὑπάρχειν, οἷον τὸ ζῷον τινὶ καλῷ καὶ τινὶ μεγάλῳ, καὶ τὸ καλὸν τινὶ μεγάλῳ ὑπάρχειν. ἐὰν οὖν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β τινὶ τῷ Γ, [55a] ἡ μὲν Α Β πρότασις ἐπί τι ψευδὴς ἔσται, ἡ δὲ Β Γ ἀληθής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως· οἱ γὰρ αὐτοὶ ὅροι ἔσονται καὶ ὡσαύτως κείμενοι πρὸς τὴν ἀπόδειξιν.

Πάλιν εἰ ἡ μὲν Α Β ἀληθὴς ἡ δὲ Β Γ ψευδής, ἀληθὲς ἔσται τὸ συμπέρασμα. οὐδὲν γὰρ κωλύει τὸ Α τῷ μὲν Β ὅλῳ ὑπάρχειν τῷ δὲ Γ τινί, καὶ τὸ Β τῷ Γ μηδενὶ ὑπάρχειν, οἷον ζῷον κύκνῳ μὲν παντὶ μέλανι δὲ τινί, κύκνος δὲ οὐδενὶ μέλανι. ὥστ’ εἰ ληφθείη παντὶ τῷ Β τὸ Α καὶ τὸ Β τινὶ τῷ Γ, ἀληθὲς ἔσται τὸ συμπέρασμα ψευδοῦς ὄντος τοῦ Β Γ. ὁμοίως δὲ καὶ στερητικῆς λαμβανομένης τῆς Α Β προτάσεως. ἐγχωρεῖ γὰρ τὸ Α τῷ μὲν Β μηδενὶ τῷ δὲ Γ τινὶ μὴ ὑπάρχειν, τὸ μέντοι Β μηδενὶ τῷ Γ, οἷον τὸ γένος τῷ ἐξ ἄλλου γένους εἴδει καὶ τῷ συμβεβηκότι τοῖς αὑτοῦ εἴδεσι· τὸ γὰρ ζῷον ἀριθμῷ μὲν οὐδενὶ ὑπάρχει λευκῷ δὲ τινί, ὁ δ’ ἀριθμὸς οὐδενὶ λευκῷ· ἐὰν οὖν μέσον τεθῇ ὁ ἀριθμός, καὶ ληφθῇ τὸ μὲν Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ τῷ Γ οὐχ ὑπάρξει, ὅπερ ἦν ἀληθές· καὶ ἡ μὲν Α Β πρότασις ἀληθής, ἡ δὲ Β Γ ψευδής. καὶ εἰ ἐπί τι ψευδὴς ἡ Α Β, ψευδὴς δὲ καὶ ἡ Β Γ, ἔσται τὸ συμπέρασμα ἀληθές. οὐδὲν γὰρ κωλύει τὸ Α τῷ Β τινὶ καὶ τῷ Γ τινὶ ὑπάρχειν ἑκατέρῳ, τὸ δὲ Β μηδενὶ τῷ Γ, οἷον εἰ ἐναντίον τὸ Β τῷ Γ, ἄμφω δὲ συμβεβηκότα τῷ αὐτῷ γένει· τὸ γὰρ ζῷον τινὶ λευκῷ καὶ τινὶ μέλανι ὑπάρχει, λευκὸν δ’ οὐδενὶ μέλανι. ἐὰν οὖν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β τινὶ τῷ Γ, ἀληθὲς ἔσται τὸ συμπέρασμα. καὶ στερητικῆς δὲ λαμβανομένης τῆς Α Β ὡσαύτως· οἱ γὰρ αὐτοὶ ὅροι καὶ ὡσαύτως τεθήσονται πρὸς τὴν ἀπόδειξιν. καὶ ἀμφοτέρων δὲ ψευδῶν οὐσῶν ἔσται τὸ συμπέρασμα ἀληθές· ἐγχωρεῖ γὰρ τὸ Α τῷ μὲν Β μηδενὶ τῷ δὲ Γ τινὶ ὑπάρχειν, τὸ μέντοι Β μηδενὶ τῷ Γ, οἷον τὸ γένος τῷ ἐξ ἄλλου γένους εἴδει καὶ τῷ συμβεβηκότι τοῖς εἴδεσι τοῖς αὑτοῦ· ζῷον γὰρ ἀριθμῷ μὲν οὐδενὶ λευκῷ δὲ τινὶ ὑπάρχει, καὶ ὁ ἀριθμὸς οὐδενὶ λευκῷ. ἐὰν οὖν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β τινὶ τῷ Γ, τὸ μὲν συμπέρασμα ἀληθές, αἱ δὲ προτάσεις ἄμφω ψευδεῖς. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β. οὐδὲν γὰρ κωλύει τὸ Α τῷ μὲν Β ὅλῳ ὑπάρχειν τῷ δὲ Γ τινὶ μὴ ὑπάρχειν, μηδὲ τὸ Β μηδενὶ τῷ Γ, οἷον ζῷον κύκνῳ μὲν παντὶ μέλανι δὲ τινὶ οὐχ ὑπάρχει, κύκνος δ’ οὐδενὶ μέλανι. ὥστ’ εἰ ληφθείη τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ [55b] τῷ Γ οὐχ ὑπάρξει. τὸ μὲν οὖν συμπέρασμα ἀληθές, αἱ δὲ προτάσεις ψευδεῖς.

Ἐν δὲ τῷ μέσῳ σχήματι πάντως ἐγχωρεῖ διὰ ψευδῶν ἀληθὲς συλλογίσασθαι, καὶ ἀμφοτέρων τῶν προτάσεων ὅλων ψευδῶν λαμβανομένων καὶ ἐπί τι ἑκατέρας, καὶ τῆς μὲν ἀληθοῦς τῆς δὲ ψευδοῦς οὔσης [ὅλης] ὁποτερασοῦν ψευδοῦς τιθεμένης, [καὶ εἰ ἀμφότεραι ἐπί τι ψευδεῖς, καὶ εἰ ἡ μὲν ἁπλῶς ἀληθὴς ἡ δ’ ἐπί τι ψευδής, καὶ εἰ ἡ μὲν ὅλη ψευδὴς ἡ δ’ ἐπί τι ἀληθής,] καὶ ἐν τοῖς καθόλου καὶ ἐπὶ τῶν ἐν μέρει συλλογισμῶν. εἰ γὰρ τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχει τῷ δὲ Γ παντί, οἷον ζῷον λίθῳ μὲν οὐδενὶ ἵππῳ δὲ παντί, ἐὰν ἐναντίως τεθῶσιν αἱ προτάσεις καὶ ληφθῇ τὸ Α τῷ μὲν Β παντὶ τῷ δὲ Γ μηδενί, ἐκ ψευδῶν ὅλων τῶν προτάσεων ἀληθὲς ἔσται τὸ συμπέρασμα. ὁμοίως δὲ καὶ εἰ τῷ μὲν Β παντὶ τῷ δὲ Γ μηδενὶ ὑπάρχει τὸ Α· ὁ γὰρ αὐτὸς ἔσται συλλογισμός.

Ἔσται δὲ καὶ ἐν τῷ ἐσχάτῳ σχήματι διὰ ψευδῶν ἀληθές, καὶ ἀμφοτέρων ψευδῶν οὐσῶν ὅλων καὶ ἐπί τι ἑκατέρας, καὶ τῆς μὲν ἑτέρας ἀληθοῦς ὅλης τῆς δ’ ἑτέρας ψευδοῦς, καὶ τῆς μὲν ἐπί τι ψευδοῦς τῆς δ’ ὅλης ἀληθοῦς, καὶ ἀνάπαλιν, καὶ ὁσαχῶς ἄλλως ἐγχωρεῖ μεταλαβεῖν τὰς προτάσεις. οὐδὲν γὰρ κωλύει μήτε τὸ Α μήτε τὸ Β μηδενὶ τῷ Γ ὑπάρχειν, τὸ μέντοι Α τινὶ τῷ Β ὑπάρχειν, οἷον οὔτ’ ἄνθρωπος οὔτε πεζὸν οὐδενὶ ἀψύχῳ ἕπεται, ἄνθρωπος μέντοι τινὶ πεζῷ ὑπάρχει. ἐὰν οὖν ληφθῇ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχειν, αἱ μὲν προτάσεις ὅλαι ψευδεῖς, τὸ δὲ συμπέρασμα ἀληθές. ὡσαύτως δὲ καὶ τῆς μὲν στερητικῆς τῆς δὲ καταφατικῆς οὔσης. ἐγχωρεῖ γὰρ τὸ μὲν Β μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α παντί, καὶ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, οἷον τὸ μέλαν οὐδενὶ κύκνῳ, ζῷον δὲ παντί, καὶ τὸ ζῷον οὐ παντὶ μέλανι. ὥστ’ ἂν ληφθῇ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α μηδενί, τὸ Α τινὶ τῷ Β οὐχ ὑπάρξει· καὶ τὸ μὲν συμπέρασμα ἀληθές, αἱ δὲ προτάσεις ψευδεῖς. καὶ εἰ ἐπί τι ἑκατέρα ψευδής, ἔσται τὸ συμπέρασμα ἀληθές. οὐδὲν γὰρ κωλύει καὶ τὸ Α καὶ τὸ Β τινὶ τῷ Γ ὑπάρχειν, καὶ τὸΑ τινὶ τῷ Β, οἷον τὸ λευκὸν καὶ τὸ καλὸν τινὶ ζῴῳ ὑπάρχει, καὶ τὸ λευκὸν τινὶ καλῷ. ἐὰν οὖν τεθῇ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχειν, αἱ μὲν προτάσεις ἐπί τι ψευδεῖς, τὸ δὲ συμπέρασμα ἀληθές. καὶ στερητικῆς δὲ τῆς Α Γ τιθεμένης ὁμοίως. οὐδὲν γὰρ κωλύει τὸ μὲν Α τινὶ τῷ Γ μὴ ὑπάρχειν, τὸ δὲ Β τινὶ ὑπάρχειν, καὶ τὸ Α τῷ Β μὴ παντὶ ὑπάρχειν, οἷον τὸ λευκὸν τινὶ ζῴῳ οὐχ ὑπάρχει, τὸ δὲ καλὸν τινὶ ὑπάρχει, καὶ τὸ λευκὸν οὐ παντὶ καλῷ. ὥστ’ ἂν ληφθῇ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β παντί, ἀμφότεραι μὲν αἱ προτάσεις ἐπί τι ψευδεῖς, τὸ δὲ συμπέρασμα ἀληθές.

Ὡσαύτως δὲ καὶ τῆς μὲν ὅλης ψευδοῦς τῆς δ’ ὅλης (33) ἀληθοῦς λαμβανομένης. ἐγχωρεῖ γὰρ καὶ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ἕπεσθαι, τὸ μέντοι Α τινὶ τῷ Β μὴ ὑπάρχειν, οἷον ζῷον καὶ λευκὸν παντὶ κύκνῳ ἕπεται, τὸ μέντοι ζῷον οὐ παντὶ ὑπάρχει λευκῷ. τεθέντων οὖν ὅρων τοιούτων, ἐὰν ληφθῇ τὸ μὲν Β ὅλῳ τῷ Γ ὑπάρχειν, τὸ δὲ Α ὅλῳ μὴ ὑπάρχειν, ἡ μὲν Β Γ ὅλη ἔσται ἀληθής, ἡ δὲ Α Γ ὅλη ψευδής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ εἰ τὸ μὲν Β Γ ψεῦδος, τὸ δὲ Α Γ ἀληθές· οἱ γὰρ αὐτοὶ ὅροι πρὸς τὴν ἀπό[57a] δειξιν [μέλαν — κύκνος — ἄψυχον]. ἀλλὰ καὶ εἰ ἀμφότεραι λαμβάνοιντο καταφατικαί. οὐδὲν γὰρ κωλύει τὸ μὲν Β παντὶ τῷ Γ ἕπεσθαι, τὸ δὲ Α ὅλῳ μὴ ὑπάρχειν, καὶ τὸ Α τινὶ τῷ Β ὑπάρχειν, οἷον κύκνῳ παντὶ ζῷον, μέλαν δ’ οὐδενὶ κύκνῳ, καὶ τὸ μέλαν ὑπάρχει τινὶ ζῴῳ.

ὥστ’ ἂν ληφθῇ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχειν, ἡ μὲν Β Γ ὅλη ἀληθής, ἡ δὲ Α Γ ὅλη ψευδής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ τῆς Α Γ ληφθείσης ἀληθοῦς· διὰ γὰρ τῶν αὐτῶν ὅρων ἡ ἀπόδειξις.

Πάλιν τῆς μὲν ὅλης ἀλη(9)θοῦς οὔσης, τῆς δ’ ἐπί τι ψευδοῦς. ἐγχωρεῖ γὰρ τὸ μὲν Β παντὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α τινί, καὶ τὸ Α τινὶ τῷ Β, οἷον δίπουν μὲν παντὶ ἀνθρώπῳ, καλὸν δ’ οὐ παντί, καὶ τὸ καλὸν τινὶ δίποδι ὑπάρχει. ἐὰν οὖν ληφθῇ καὶ τὸ Α καὶ τὸ Β ὅλῳ τῷ Γ ὑπάρχειν, ἡ μὲν Β Γ ὅλη ἀληθής, ἡ δὲ Α Γ ἐπί τι ψευδής, τὸ δὲ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ τῆς μὲν Α Γ ἀληθοῦς τῆς δὲ Β Γ ἐπί τι ψευδοῦς λαμβανομένης· μετατεθέντων γὰρ τῶν αὐτῶν ὅρων ἔσται ἡ ἀπόδειξις. καὶ τῆς μὲν στερητικῆς τῆς δὲ καταφατικῆς οὔσης. ἐπεὶ γὰρ ἐγχωρεῖ τὸ μὲν Β ὅλῳ τῷ Γ ὑπάρχειν, τὸ δὲ Α τινί, καὶ ὅταν οὕτως ἔχωσιν, οὐ παντὶ τῷ Β τὸ Α, ἐὰν οὖν ληφθῇ τὸ μὲν Β ὅλῳ τῷ Γ ὑπάρχειν, τὸ δὲ Α μηδενί, ἡ μὲν στερητικὴ ἐπί τι ψευδής, ἡ δ’ ἑτέρα ὅλη ἀληθὴς καὶ τὸ συμπέρασμα. πάλιν ἐπεὶ δέδεικται ὅτι τοῦ μὲν Α μηδενὶ ὑπάρχοντος τῷ Γ, τοῦ δὲ Β τινί, ἐγχωρεῖ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, φανερὸν ὅτι καὶ τῆς μὲν Α Γ ὅλης ἀληθοῦς οὔσης, τῆς δὲ Β Γ ἐπί τι ψευδοῦς, ἐγχωρεῖ τὸ συμπέρασμα εἶναι ἀληθές. ἐὰν γὰρ ληφθῇ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β παντί, ἡ μὲν Α Γ ὅλη ἀληθής, ἡ δὲ Β Γ ἐπί τι ψευδής.

Φανερὸν δὲ καὶ ἐπὶ τῶν ἐν μέρει συλλογισμῶν ὅτι πάντως ἔσται διὰ ψευδῶν ἀληθές. οἱ γὰρ αὐτοὶ ὅροι ληπτέοι καὶ ὅταν καθόλου ὦσιν αἱ προτάσεις, οἱ μὲν ἐν τοῖς κατηγορικοῖς κατηγορικοί, οἱ δ’ ἐν τοῖς στερητικοῖς στερητικοί. οὐδὲν γὰρ διαφέρει μηδενὶ ὑπάρχοντος παντὶ λαβεῖν ὑπάρχειν, καὶ τινὶ ὑπάρχοντος καθόλου λαβεῖν ὑπάρχειν, πρὸς τὴν τῶν ὅρων ἔκθεσιν· ὁμοίως δὲ καὶ ἐπὶ τῶν στερητικῶν.

Φανερὸν οὖν ὅτι ἂν μὲν ᾖ τὸ συμπέρασμα ψεῦδος, ἀνάγκη, ἐξ ὧν ὁ λόγος, ψευδῆ εἶναι ἢ πάντα ἢ ἔνια, ὅταν δ’ ἀληθές, οὐκ ἀνάγκη ἀληθὲς εἶναι οὔτε τὶ οὔτε πάντα, ἀλλ’ ἔστι μηδενὸς ὄντος ἀληθοῦς τῶν ἐν τῷ συλλογισμῷ τὸ συμπέρασμα ὁμοίως εἶναι ἀληθές· οὐ μὴν ἐξ ἀνάγκης. αἴτιον δ’ [57b] ὅτι ὅταν δύο ἔχῃ οὕτω πρὸς ἄλληλα ὥστε θατέρου ὄντος ἐξ ἀνάγκης εἶναι θάτερον, τούτου μὴ ὄντος μὲν οὐδὲ θάτερον ἔσται, ὄντος δ’ οὐκ ἀνάγκη εἶναι θάτερον· τοῦ δ’ αὐτοῦ ὄντος καὶ μὴ ὄντος ἀδύνατον ἐξ ἀνάγκης εἶναι τὸ αὐτό· λέγω δ’ οἷον τοῦ Α ὄντος λευκοῦ τὸ Β εἶναι μέγα ἐξ ἀνάγκης, καὶ μὴ ὄντος λευκοῦ τοῦ Α τὸ Β εἶναι μέγα ἐξ ἀνάγκης. ὅταν γὰρ τουδὶ ὄντος λευκοῦ, τοῦ Α, τοδὶ ἀνάγκη μέγα εἶναι, τὸ Β, μεγάλου δὲ τοῦ Β ὄντος τὸ Γ μὴ λευκόν, ἀνάγκη, εἰ τὸ Α λευκόν, τὸ Γ μὴ εἶναι λευκόν. καὶ ὅταν δύο ὄντων θατέρου ὄντος ἀνάγκη θάτερον εἶναι, τούτου μὴ ὄντος ἀνάγκη τὸ πρῶτον μὴ εἶναι. τοῦ δὴ Β μὴ ὄντος μεγάλου τὸ Α οὐχ οἷόν τε λευκὸν εἶναι. τοῦ δὲ A μὴ ὄντος λευκοῦ εἰ ἀνάγκη τὸ B μέγα εἶναι, συμβαίνει ἐξ ἀνάγκης τοῦ B μεγάλου μὴ ὄντος αὐτὸ τὸ B εἶναι μέγα· τοῦτο δ’ ἀδύνατον. εἰ γὰρ τὸ B μὴ ἔστι μέγα, τὸ A οὐκ ἔσται λευκὸν ἐξ ἀνάγκης. εἰ οὖν μὴ ὄντος τούτου λευκοῦ τὸ B ἔσται μέγα, συμβαίνει, εἰ τὸ B μὴ ἔστι μέγα, εἶναι μέγα, ὡς διὰ τριῶν.

Κεφάλαιο 5

Τὸ δὲ κύκλῳ καὶ ἐξ ἀλλήλων δείκνυσθαί ἐστι τὸ διὰ τοῦ συμπεράσματος καὶ τοῦ ἀνάπαλιν τῇ κατηγορίᾳ τὴν ἑτέραν λαβόντα πρότασιν συμπεράνασθαι τὴν λοιπήν, ἣν ἐλάμβανεν ἐν θατέρῳ συλλογισμῷ. οἷον εἰ ἔδει δεῖξαι ὅτι τὸ Α τῷ Γ παντὶ ὑπάρχει, ἔδειξε δὲ διὰ τοῦ Β, πάλιν εἰ δεικνύοι ὅτι τὸ Α τῷ Β ὑπάρχει, λαβὼν τὸ μὲν Α τῷ Γ ὑπάρχειν τὸ δὲ Γ τῷ Β [καὶ τὸ Α τῷ Β]· πρότερον δ’ ἀνάπαλιν ἔλαβε τὸ Β τῷ Γ ὑπάρχον. ἢ εἰ [ὅτι] τὸ Β τῷ Γ δεῖ δεῖξαι ὑπάρχον, εἰ λάβοι τὸ Α κατὰ τοῦ Γ, ὃ ἦν συμπέρασμα, τὸ δὲ Β κατὰ τοῦ Α ὑπάρχειν· πρότερον δ’ ἐλήφθη ἀνάπαλιν τὸ Α κατὰ τοῦ Β. ἄλλως δ’ οὐκ ἔστιν ἐξ ἀλλήλων δεῖξαι. εἴτε γὰρ ἄλλο μέσον λήψεται, οὐ κύκλῳ·οὐδὲν γὰρ λαμβάνεται τῶν αὐτῶν· εἴτε τούτων τι, ἀνάγκη θάτερον μόνον· εἰ γὰρ ἄμφω, ταὐτὸν ἔσται συμπέρασμα, δεῖ δ’ ἕτερον.

Ἐν μὲν οὖν τοῖς μὴ ἀντιστρέφουσιν ἐξ ἀναποδείκτου τῆς ἑτέρας προτάσεως γίνεται ὁ συλλογισμός· οὐ γὰρ ἔστιν ἀποδεῖξαι διὰ τούτων τῶν ὅρων ὅτι τῷ μέσῳ τὸ τρίτον ὑπάρχει ἢ τῷ πρώτῳ τὸ μέσον. ἐν δὲ τοῖς ἀντιστρέφουσιν ἔστι πάντα δεικνύναι δι’ ἀλλήλων, οἷον εἰ τὸ Α καὶ τὸ Β καὶ τὸ Γ ἀντιστρέφουσιν ἀλλήλοις. δεδείχθω γὰρ τὸ Α Γ διὰ μέσου τοῦ Β, καὶ πάλιν τὸ Α Β διά τε τοῦ συμπεράσματος καὶ διὰ τῆς Β Γ προτάσεως ἀντιστραφείσης, ὡσαύτως δὲ καὶ τὸ Β Γ διά τε τοῦ συμπεράσματος καὶ τῆς Α Β [58a] προτάσεως ἀντεστραμμένης. δεῖ δὲ τήν τε Γ Β καὶ τὴν Β Α πρότασιν ἀποδεῖξαι· ταύταις γὰρ ἀναποδείκτοις κεχρήμεθα μόναις. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Γ ὑπάρχειν καὶ τὸ Γ παντὶ τῷ Α, συλλογισμὸς ἔσται τοῦ Β πρὸς τὸ Α. πάλιν ἐὰν ληφθῇ τὸ μὲν Γ παντὶ τῷ Α, τὸ δὲ Α παντὶ τῷ Β, παντὶ τῷ Β τὸ Γ ἀνάγκη ὑπάρχειν. ἐν ἀμφοτέροις δὴ τούτοις τοῖς συλλογισμοῖς ἡ Γ Α πρότασις εἴληπται ἀναπόδεικτος· αἱ γὰρ ἕτεραι δεδειγμέναι ἦσαν. ὥστ’ ἂν ταύτην ἀποδείξωμεν, ἅπασαι ἔσονται δεδειγμέναι δι’ ἀλλήλων. ἐὰν οὖν ληφθῇ τὸ Γ παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Α ὑπάρχειν, ἀμφότεραί τε αἱ προτάσεις ἀποδεδειγμέναι λαμβάνονται, καὶ τὸ Γ τῷ Α ἀνάγκη ὑπάρχειν. φανερὸν οὖν ὅτι ἐν μόνοις τοῖς ἀντιστρέφουσι κύκλῳ καὶ δι’ ἀλλήλων ἐνδέχεται γίνεσθαι τὰς ἀποδείξεις, ἐν δὲ τοῖς ἄλλοις ὡς πρότερον εἴπομεν. συμβαίνει δὲ καὶ ἐν τούτοις αὐτῷ τῷ δεικνυμένῳ χρῆσθαι πρὸς τὴν ἀπόδειξιν· τὸ μὲν γὰρ Γ κατὰ τοῦ Β καὶ τὸ Β κατὰ τοῦ Α δείκνυται ληφθέντος τοῦ Γ κατὰ τοῦ Α λέγεσθαι, τὸ δὲ Γ κατὰ τοῦ Α διὰ τούτων δείκνυται τῶν προτάσεων, ὥστε τῷ συμπεράσματι χρώμεθα πρὸς τὴν ἀπόδειξιν.

Ἐπὶ δὲ τῶν στερητικῶν συλλογισμῶν ὧδε δείκνυται ἐξ ἀλλήλων. ἔστω τὸ μὲν Β παντὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α οὐδενὶ τῷ Β· συμπέρασμα ὅτι τὸ Α οὐδενὶ τῷ Γ. εἰ δὴ πάλιν δεῖ συμπεράνασθαι ὅτι τὸ Α οὐδενὶ τῷ Β, ὃ πάλαι ἔλαβεν, ἔστω τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Γ παντὶ τῷ Β· οὕτω γὰρ ἀνάπαλιν ἡ πρότασις. εἰ δ᾽ ὅτι τὸ Β τῷ Γ δεῖ συμπεράνασθαι, οὐκέθ᾽ ὁμοίως ἀντιστρεπτέον τὸ Α Β (ἡ γὰρ αὐτὴ πρότασις, τὸ Β μηδενὶ τῷ Α καὶ τὸ Α μηδενὶ τῷ Β ὑπάρχειν), ἀλλὰ ληπτέον, ᾧ τὸ Α μηδενὶ ὑπάρχει, τὸ Β παντὶ ὑπάρχειν. ἔστω τὸ Α μηδενὶ τῷ Γ ὑπάρχειν, ὅπερ ἦν τὸ συμπέρασμα· ᾧ δὲ τὸ Α μηδενί, τὸ Β εἰλήφθω παντὶ ὑπάρχειν· ἀνάγκη οὖν τὸ Β παντὶ τῷ Γ ὑπάρχειν. ὥστε τριῶν ὄντων ἕκαστον συμπέρασμα γέγονε, καὶ τὸ κύκλῳ ἀποδεικνύναι τοῦτ᾽ ἔστι, τὸ τὸ συμπέρασμα λαμβάνοντα καὶ ἀνάπαλιν τὴν ἑτέραν πρότασιν τὴν λοιπὴν συλλογίζεσθαι.

Ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν τὴν μὲν καθόλου πρότασιν οὐκ ἔστιν ἀποδεῖξαι διὰ τῶν ἑτέρων, τὴν δὲ κατὰ μέρος ἔστιν. ὅτι μὲν οὖν οὐκ ἔστιν ἀποδεῖξαι τὴν καθόλου, φανερόν· τὸ μὲν γὰρ καθόλου δείκνυται διὰ τῶν καθόλου, τὸ δὲ συμπέρασμα οὐκ ἔστι καθόλου, δεῖ δ᾽ ἐκ τοῦ συμπεράσματος δεῖξαι καὶ τῆς ἑτέρας προτάσεως. ἔτι ὅλως οὐδὲ γίνεται [58b] συλλογισμὸς ἀντιστραφείσης τῆς προτάσεως· ἐν μέρει γὰρ ἀμφότεραι γίνονται αἱ προτάσεις. τὴν δ᾽ ἐπὶ μέρους ἔστιν. δεδείχθω γὰρ τὸ Α κατὰ τινὸς τοῦ Γ διὰ τοῦ Β. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Α καὶ τὸ συμπέρασμα μένῃ, τὸ Β τινὶ τῷ Γ ὑπάρξει· γίνεται γὰρ τὸ πρῶτον σχῆμα, καὶ τὸ Α μέσον. εἰ δὲ στερητικὸς ὁ συλλογισμός, τὴν μὲν καθόλου πρότασιν οὐκ ἔστι δεῖξαι, δι᾽ ὃ καὶ πρότερον ἐλέχθη· τὴν δ᾽ ἐν μέρει ἔστιν, ἐὰν ὁμοίως ἀντιστραφῇ τὸ Α Β ὥσπερ κἀπὶ τῶν καθόλου, [οὐκ ἔστι, διὰ προσλήψεως δ᾽ ἔστιν,] οἷον ᾧ τὸ Α τινὶ μὴ ὑπάρχει, τὸ Β τινὶ ὑπάρχειν· ἄλλως γὰρ οὐ γίνεται συλλογισμὸς διὰ τὸ ἀποφατικὴν εἶναι τὴν ἐν μέρει πρότασιν.

Κεφάλαιο 6

Ἐν δὲ τῷ δευτέρῳ σχήματι τὸ μὲν καταφατικὸν οὐκ ἔστι δεῖξαι διὰ τούτου τοῦ τρόπου, τὸ δὲ στερητικὸν ἔστιν. τὸ μὲν οὖν κατηγορικὸν οὐ δείκνυται διὰ τὸ μὴ ἀμφοτέρας εἶναι τὰς προτάσεις καταφατικάς· τὸ γὰρ συμπέρασμα στερητικόν ἐστι, τὸ δὲ κατηγορικὸν ἐξ ἀμφοτέρων ἐδείκνυτο καταφατικῶν. τὸ δὲ στερητικὸν ὧδε δείκνυται. ὑπαρχέτω τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί· συμπέρασμα τὸ Β οὐδενὶ τῷ Γ. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Α ὑπάρχον, [τῷ δὲ Γ μηδενί,] ἀνάγκη τὸ Α μηδενὶ τῷ Γ ὑπάρχειν· γίνεται γὰρ τὸ δεύτερον σχῆμα· μέσον τὸ Β. εἰ δὲ τὸ Α Β στερητικὸν ἐλήφθη, θάτερον δὲ κατηγορικόν, τὸ πρῶτον ἔσται σχῆμα. τὸ μὲν γὰρ Γ παντὶ τῷ Α, τὸ δὲ Β οὐδενὶ τῷ Γ, ὥστ' οὐδενὶ τῷ Α τὸ Β· οὐδ' ἄρα τὸ Α τῷ Β. διὰ μὲν οὖν τοῦ συμπεράσματος καὶ τῆς μιᾶς προτάσεως οὐ γίνεται συλλογισμός, προσληφθείσης δ' ἑτέρας ἔσται. εἰ δὲ μὴ καθόλου ὁ συλλογισμός, ἡ μὲν ἐν ὅλῳ πρότασις οὐ δείκνυται διὰ τὴν αὐτὴν αἰτίαν ἥνπερ εἴπομεν καὶ πρότερον, ἡ δ' ἐν μέρει δείκνυται, ὅταν ᾖ τὸ καθόλου κατηγορικόν· ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μὴ παντί· συμπέρασμα Β Γ. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Α, τῷ δὲ Γ οὐ παντί, τὸ Α τινὶ τῷ Γ οὐχ ὑπάρξει· μέσον Β. εἰ δ' ἐστὶν ἡ καθόλου στερητική, οὐ δειχθήσεται ἡ Α Γ πρότασις ἀντιστραφέντος τοῦ Α Β· συμβαίνει γὰρ ἢ ἀμφοτέρας ἢ τὴν ἑτέραν πρότασιν γίνεσθαι ἀποφατικήν, ὥστ' οὐκ ἔσται συλλογισμός. ἀλλ' ὁμοίως δειχθήσεται ὡς καὶ ἐπὶ τῶν καθόλου, ἐὰν ληφθῇ, ᾧ τὸ Βτινὶ μὴ ὑπάρχει, τὸ Α τινὶ ὑπάρχειν.

Κεφάλαιο 7

Ἐπὶ δὲ τοῦ τρίτου σχήματος ὅταν μὲν ἀμφότεραι αἱ προτάσεις καθόλου ληφθῶσιν, οὐκ ἐνδέχεται δεῖξαι δι’ ἀλλήλων· τὸ μὲν γὰρ καθόλου δείκνυται διὰ τῶν καθόλου, τὸ [59a] δ’ ἐν τούτῳ συμπέρασμα ἀεὶ κατὰ μέρος, ὥστε φανερὸν ὅτι ὅλως οὐκ ἐνδέχεται δεῖξαι διὰ τούτου τοῦ σχήματος τὴν καθόλου πρότασιν. Ἐὰν δ’ ἡ μὲν ᾖ καθόλου ἡ δ’ ἐν μέρει, (3) ποτὲ μὲν ἔσται ποτὲ δ’ οὐκ ἔσται. ὅταν μὲν οὖν ἀμφότεραι κατηγορικαὶ ληφθῶσι καὶ τὸ καθόλου γένηται πρὸς τῷ ἐλάττονι ἄκρῳ, ἔσται, ὅταν δὲ πρὸς θατέρῳ, οὐκ ἔσται. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Γ, τὸ δὲ Β τινί· συμπέρασμα τὸ Α Β. ἐὰν οὖν ληφθῇ τὸ Γ παντὶ τῷ Α ὑπάρχειν, τὸ μὲν Γ δέδεικται τινὶ τῷ Β ὑπάρχον, τὸ δὲ Β τινὶ τῷ Γ οὐ δέδεικται. καίτοι ἀνάγκη, εἰ τὸ Γ τινὶ τῷ Β, καὶ τὸ Β τινὶ τῷ Γ ὑπάρχειν. ἀλλ’ οὐ ταὐτόν ἐστι τόδε τῷδε καὶ τόδε τῷδε ὑπάρχειν· ἀλλὰ προσληπτέον, εἰ τόδε τινὶ τῷδε, καὶ θάτερον τινὶ τῷδε. τούτου δὲ ληφθέντος οὐκέτι γίνεται ἐκ τοῦ συμπεράσματος καὶ τῆς ἑτέρας προτάσεως ὁ συλλογισμός. εἰ δὲ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Γ, ἔσται δεῖξαι τὸ Α Γ, ὅταν ληφθῇ τὸ μὲν Γ παντὶ τῷ Β ὑπάρχειν, τὸ δὲ Α τινί. εἰ γὰρ τὸ Γ παντὶ τῷ Β, τὸ δὲ Α τινὶ τῷ Β, ἀνάγκη τὸ Α τινὶ τῷ Γ ὑπάρχειν· μέσον τὸ Β. καὶ ὅταν ᾖ ἡ μὲν κατηγορικὴ ἡ δὲ στερητική, καθόλου δ’ ἡ κατηγορική, δειχθήσεται ἡ ἑτέρα. ὑπαρχέτω γὰρ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ μὴ ὑπαρχέτω· συμπέρασμα ὅτι τὸ Α τινὶ τῷ Β οὐχ ὑπάρχει. ἐὰν οὖν προσληφθῇ τὸ Γ παντὶ τῷ Β ὑπάρχειν, ἀνάγκη τὸ Α τινὶ τῷ Γ μὴ ὑπάρχειν· μέσον τὸ Β. ὅταν δ’ ἡ στερητικὴ καθόλου γένηται, οὐ δείκνυται ἡ ἑτέρα, εἰ μὴ ὥσπερ ἐπὶ τῶν πρότερον, ἐὰν ληφθῇ, ᾧ τοῦτο τινὶ μὴ ὑπάρχει, θάτερον τινὶ ὑπάρχειν, οἷον εἰ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β τινί· συμπέρασμα ὅτι τὸ Α τινὶ τῷ Β οὐχ ὑπάρχει. ἐὰν οὖν ληφθῇ, ᾧ τὸ Α τινὶ μὴ ὑπάρχει, τὸ Γ τινὶ ὑπάρχειν, ἀνάγκη τὸ Γ τινὶ τῷ Β ὑπάρχειν. ἄλλως δ’ οὐκ ἔστιν ἀντιστρέφοντα τὴν καθόλου πρότασιν δεῖξαι τὴν ἑτέραν· οὐδαμῶς γὰρ ἔσται συλλογισμός.

[Φανερὸν οὖν ὅτι ἐν μὲν τῷ πρώτῳ σχήματι ἡ δι’ ἀλλήλων δεῖξις διά τε τοῦ τρίτου καὶ διὰ τοῦ πρώτου γίνεται σχήματος. κατηγορικοῦ μὲν γὰρ ὄντος τοῦ συμπεράσματος διὰ τοῦ πρώτου, στερητικοῦ δὲ διὰ τοῦ ἐσχάτου· λαμβάνεται γάρ, ᾧ τοῦτο μηδενί, θάτερον παντὶ ὑπάρχειν. ἐν δὲ τῷ μέσῳ καθόλου μὲν ὄντος τοῦ συλλογισμοῦ δι’ αὐτοῦ τε καὶ διὰ τοῦ πρώτου σχήματος, ὅταν δ’ ἐν μέρει, δι’ αὐτοῦ τε καὶ τοῦ ἐσχάτου. ἐν δὲ τῷ τρίτῳ δι’ αὐτοῦ πάντες. φανερὸν δὲ καὶ ὅτι ἐν τῷ τρίτῳ καὶ τῷ μέσῳ οἱ μὴ δι’ αὐτῶν γινόμενοι συλλογισμοὶ ἢ οὐκ εἰσὶ κατὰ τὴν κύκλῳ δεῖξιν ἢ ἀτελεῖς.] [59b]

Κεφάλαιο 8

Τὸ δ’ ἀντιστρέφειν ἐστὶ τὸ μετατιθέντα τὸ συμπέρασμα ποιεῖν τὸν συλλογισμὸν ὅτι ἢ τὸ ἄκρον τῷ μέσῳ οὐχ ὑπάρξει ἢ τοῦτο τῷ τελευταίῳ. ἀνάγκη γὰρ τοῦ συμπεράσματος ἀντιστραφέντος καὶ τῆς ἑτέρας μενούσης προτάσεως ἀναιρεῖσθαι τὴν λοιπήν· εἰ γὰρ ἔσται, καὶ τὸ συμπέρασμα ἔσται. διαφέρει δὲ τὸ ἀντικειμένως ἢ ἐναντίως ἀντιστρέφειν τὸ συμπέρασμα· οὐ γὰρ ὁ αὐτὸς γίνεται συλλογισμὸς ἑκατέρως ἀντιστραφέντος· δῆλον δὲ τοῦτ’ ἔσται διὰ τῶν ἑπομένων. λέγω δ’ ἀντικεῖσθαι μὲν τὸ παντὶ τῷ οὐ παντὶ καὶ τὸ τινὶ τῷ οὐδενί, ἐναντίως δὲ τὸ παντὶ τῷ οὐδενὶ καὶ τὸ τινὶ τῷ οὐ τινὶ ὑπάρχειν. ἔστω γὰρ δεδειγμένον τὸ Α κατὰ τοῦ Γ διὰ μέσου τοῦ Β. εἰ δὴ τὸ Α ληφθείη μηδενὶ τῷ Γ ὑπάρχειν, τῷ δὲ Β παντί, οὐδενὶ τῷ Γ ὑπάρξει τὸ Β. καὶ εἰ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β παντὶ τῷ Γ, τὸ Α οὐ παντὶ τῷ Βκαὶ οὐχ ἁπλῶς οὐδενί· οὐ γὰρ ἐδείκνυτο τὸ καθόλου διὰ τοῦ ἐσχάτου σχήματος. ὅλως δὲ τὴν πρὸς τῷ μείζονι ἄκρῳ πρότασιν οὐκ ἔστιν ἀνασκευάσαι καθόλου διὰ τῆς ἀντιστροφῆς· ἀεὶ γὰρ ἀναιρεῖται διὰ τοῦ τρίτου σχήματος· ἀνάγκη γὰρ πρὸς τὸ ἔσχατον ἄκρον ἀμφοτέρας λαβεῖν τὰς προτάσεις. καὶ εἰ στερητικὸς ὁ συλλογισμός, ὡσαύτως. δεδείχθω γὰρ τὸ Α μηδενὶ τῷ Γ ὑπάρχον διὰ τοῦ Β. οὐκοῦν ἂν ληφθῇ τὸ Α τῷ Γ παντὶ ὑπάρχειν, τῷ δὲ Β μηδενί, οὐδενὶ τῷ Γ τὸ Β ὑπάρξει. καὶ εἰ τὸ Α καὶ τὸ Β παντὶ τῷ Γ, τὸ Α τινὶ τῷ Β· ἀλλ’ οὐδενὶ ὑπῆρχεν.

Ἐὰν δ’ ἀντικειμένως ἀντιστραφῇ τὸ συμπέρασμα, καὶ οἱ συλλογισμοὶ ἀντικείμενοι καὶ οὐ καθόλου ἔσονται. γίνεται γὰρ ἡ ἑτέρα πρότασις ἐν μέρει, ὥστε καὶ τὸ συμπέρασμα ἔσται κατὰ μέρος. ἔστω γὰρ κατηγορικὸς ὁ συλλογισμός, καὶ ἀντιστρεφέσθω οὕτως. οὐκοῦν εἰ τὸ Α οὐ παντὶ τῷ Γ, τῷ δὲ Β παντί, τὸ Β οὐ παντὶ τῷ Γ· καὶ εἰ τὸ μὲν Α μὴ παντὶ τῷ Γ, τὸ δὲ Β παντί, τὸ Α οὐ παντὶ τῷ Β. ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμός. εἰ γὰρ τὸ Α τινὶ τῷ Γ ὑπάρχει, τῷ δὲ Β μηδενί, τὸ Β τινὶ τῷ Γ οὐχ ὑπάρξει, οὐχ ἁπλῶς οὐδενί· καὶ εἰ τὸ μὲν Α τῷ Γ τινί, τὸ δὲ Β παντί, ὥσπερ ἐν ἀρχῇ ἐλήφθη, τὸ Α τινὶ τῷ Β ὑπάρξει.

Ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν ὅταν μὲν ἀντικειμένως ἀντιστρέφηται τὸ συμπέρασμα, ἀναιροῦνται ἀμφότεραι αἱ προτάσεις, ὅταν δ’ ἐναντίως, οὐδετέρα. οὐ γὰρ ἔτι συμβαίνει, καθάπερ ἐν τοῖς καθόλου, ἀναιρεῖν ἐλλείποντος τοῦ συμπεράσματος κατὰ τὴν ἀντιστροφήν, ἀλλ’ οὐδ’ ὅλως [60a] ἀναιρεῖν. δεδείχθω γὰρ τὸ Α κατὰ τινὸς τοῦ Γ. οὐκοῦν ἂν ληφθῇ τὸ Α μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Β τινί, τὸ Α τῷ Β τινὶ οὐχ ὑπάρξει· καὶ εἰ τὸ Α μηδενὶ τῷ Γ, τῷ δὲ Β παντί, οὐδενὶ τῷ Γ τὸ Β. ὥστ’ ἀναιροῦνται ἀμφότεραι. ἐὰν δ’ ἐναντίως ἀντιστραφῇ, οὐδετέρα. εἰ γὰρ τὸ Α τινὶ τῷ Γ μὴ ὑπάρχει, τῷ δὲ Β παντί, τὸ Β τινὶ τῷ Γ οὐχ ὑπάρξει, ἀλλ’ οὔπω ἀναιρεῖται τὸ ἐξ ἀρχῆς· ἐνδέχεται γὰρ τινὶ ὑπάρχειν καὶ τινὶ μὴ ὑπάρχειν. τῆς δὲ καθόλου, τῆς Α Β, ὅλως οὐδὲ γίνεται συλλογισμός· εἰ γὰρ τὸ μὲν Α τινὶ τῷ Γ μὴ ὑπάρχει, τὸ δὲ Β τινὶ ὑπάρχει, οὐδετέρα καθόλου τῶν προτάσεων. ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμός· εἰ μὲν γὰρ ληφθείη τὸ Α παντὶ τῷ Γ ὑπάρχειν, ἀναιροῦνται ἀμφότεραι, εἰ δὲ τινί, οὐδετέρα. ἀπόδειξις δ’ ἡ αὐτή.

Κεφάλαιο 9

Ἐν δὲ τῷ δευτέρῳ σχήματι τὴν μὲν πρὸς τῷ μείζονι ἄκρῳ πρότασιν οὐκ ἔστιν ἀνελεῖν ἐναντίως, ὁποτερωσοῦν τῆς ἀντιστροφῆς γινομένης· ἀεὶ γὰρ ἔσται τὸ συμπέρασμα ἐν τῷ τρίτῳ σχήματι, καθόλου δ' οὐκ ἦν ἐν τούτῳ συλλογισμός. τὴν δ' ἑτέραν ὁμοίως ἀναιρήσομεν τῇ ἀντιστροφῇ. λέγω δὲ τὸ ὁμοίως, εἰ μὲν ἐναντίως ἀντιστρέφεται, ἐναντίως, εἰ δ' ἀντικειμένως, ἀντικειμένως. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί· συμπέρασμα Β Γ. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Γ ὑπάρχειν καὶ τὸ Α Β μένῃ, τὸ Α παντὶ τῷ Γ ὑπάρξει· γίνεται γὰρ τὸ πρῶτον σχῆμα. εἰ δὲ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α μηδενὶ τῷ Γ, τὸ Α οὐ παντὶ τῷ Β· σχῆμα τὸ ἔσχατον. ἐὰν δ' ἀντικειμένως ἀντιστραφῇ τὸ Β Γ, ἡ μὲν Α Β ὁμοίως δειχθήσεται, ἡ δὲ Α Γ ἀντικειμένως. εἰ γὰρ τὸ Β τινὶ τῷ Γ, τὸ δὲ Α μηδενὶ τῷ Γ, τὸ Α τινὶ τῷ Β οὐχ ὑπάρξει. πάλιν εἰ τὸ Β τινὶ τῷ Γ, τὸ δὲ Α παντὶ τῷ Β, τὸ Α τινὶ τῷ Γ, ὥστ' ἀντικείμενος γίνεται ὁ συλλογισμός. ὁμοίως δὲ δειχθήσεται καὶ εἰ ἀνάπαλιν ἔχοιεν αἱ προτάσεις. εἰ δ' ἐστὶν ἐπὶ μέρους ὁ συλλογισμός, ἐναντίως μὲν ἀντιστρεφομένου τοῦ συμπεράσματος οὐδετέρα τῶν προτάσεων ἀναιρεῖται, καθάπερ οὐδ' ἐν τῷ πρώτῳ σχήματι, ἀντικειμένως δ' ἀμφότεραι. κείσθω γὰρ τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχειν, τῷ δὲ Γ τινί· συμπέρασμα Β Γ. ἐὰν οὖν τεθῇ τὸ Β τινὶ τῷ Γ ὑπάρχειν καὶ τὸ Α Β μένῃ, συμπέρασμα ἔσται ὅτι τὸ Α τινὶ τῷ Γ οὐχ ὑπάρχει, ἀλλ' οὐκ ἀνῄρηται τὸ ἐξ ἀρχῆς· ἐνδέχεται γὰρ τινὶ ὑπάρχειν καὶ μὴ ὑπάρχειν. πάλιν εἰ τὸ Β τινὶ τῷ Γ καὶ τὸ Α τινὶ τῷ Γ, οὐκ ἔσται συλλογισμός· οὐδέτερον γὰρ καθόλου τῶν εἰλημμένων. [60b] ὥστ' οὐκ ἀναιρεῖται τὸ Α Β. ἐὰν δ' ἀντικειμένως ἀντιστρέφηται, ἀναιροῦνται ἀμφότεραι. εἰ γὰρ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α μηδενὶ τῷ Β, οὐδενὶ τῷ Γ τὸ Α· ἦν δὲ τινί. πάλιν εἰ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Γ, τινὶ τῷ Β τὸ Α. ἡ αὐτὴ δ' ἀπόδειξις καὶ εἰ τὸ καθόλου κατηγορικόν.

Κεφάλαιο 10

Ἐπὶ δὲ τοῦ τρίτου σχήματος ὅταν μὲν ἐναντίως ἀντιστρέφηται τὸ συμπέρασμα, οὐδετέρα τῶν προτάσεων ἀναιρεῖται κατ’ οὐδένα τῶν συλλογισμῶν, ὅταν δ’ ἀντικειμένως, ἀμφότεραι καὶ ἐν ἅπασιν. δεδείχθω γὰρ τὸ Α τινὶ τῷ Β ὑπάρχον, μέσον δ’ εἰλήφθω τὸ Γ, ἔστωσαν δὲ καθόλου αἱ προτάσεις. οὐκοῦν ἐὰν ληφθῇ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, τὸ δὲ Β παντὶ τῷ Γ, οὐ γίνεται συλλογισμὸς τοῦ Α καὶ τοῦ Γ. οὐδ’ εἰ τὸ Α τῷ μὲν Β τινὶ μὴ ὑπάρχει, τῷ δὲ Γ παντί, οὐκ ἔσται τοῦ Β καὶ τοῦ Γ συλλογισμός. ὁμοίως δὲ δειχθήσεται καὶ εἰ μὴ καθόλου αἱ προτάσεις. ἢ γὰρ ἀμφοτέρας ἀνάγκη κατὰ μέρος εἶναι διὰ τῆς ἀντιστροφῆς, ἢ τὸ καθόλου πρὸς τῷ ἐλάττονι ἄκρῳ γίνεσθαι· οὕτω δ’ οὐκ ἦν συλλογισμὸς οὔτ’ ἐν τῷ πρώτῳ σχήματι οὔτ’ ἐν τῷ μέσῳ. ἐὰν δ’ ἀντικειμένως ἀντιστρέφηται, αἱ προτάσεις ἀναιροῦνται ἀμφότεραι. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, τὸ Α οὐδενὶ τῷ Γ· πάλιν εἰ τὸ Α τῷ μὲν Β μηδενί, τῷ δὲ Γ παντί, τὸ Β οὐδενὶ τῷ Γ. καὶ εἰ ἡ ἑτέραμὴ καθόλου, ὡσαύτως. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ τῷ Γ οὐχ ὑπάρξει· εἰ δὲ τὸ Α τῷ μὲν Β μηδενί, τῷ δὲ Γ παντί, οὐδενὶ τῷ Γ τὸ Β.

Ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμός. δεδείχθω γὰρ τὸ Α τινὶ τῷ Β μὴ ὑπάρχον, ἔστω δὲ κατηγορικὸν μὲν τὸ Β Γ, ἀποφατικὸν δὲ τὸ Α Γ· οὕτω γὰρ ἐγίνετο ὁ συλλογισμός. ὅταν μὲν οὖν τὸ ἐναντίον ληφθῇ τῷ συμπεράσματι, οὐκ ἔσται συλλογισμός. εἰ γὰρ τὸ Α τινὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, οὐκ ἦν συλλογισμὸς τοῦ Α καὶ τοῦ Γ. οὐδ’ εἰ τὸ Α τινὶ τῷ Β, τῷ δὲ Γ μηδενί, οὐκ ἦν τοῦ Β καὶ τοῦ Γ συλλογισμός. ὥστε οὐκ ἀναιροῦνται αἱ προτάσεις. ὅταν δὲ τὸ ἀντικείμενον, ἀναιροῦνται. εἰ γὰρ τὸ Α παντὶ τῷ Β καὶ τὸ Β τῷ Γ, τὸ Α παντὶ τῷ Γ· ἀλλ’ οὐδενὶ ὑπῆρχεν. πάλιν εἰ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί, τὸ Β οὐδενὶ τῷ Γ· ἀλλὰ παντὶ ὑπῆρχεν. ὁμοίως δὲ δείκνυται καὶ εἰ μὴ καθόλου εἰσὶν αἱ προτάσεις. γίνεται γὰρ τὸ Α Γ καθόλου τε καὶ στερητικόν, θάτερον δ’ ἐπὶ μέρους καὶ κατηγορικόν. εἰ μὲν οὖν τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ τῷ Γ συμβαίνει· ἀλλ’ οὐδενὶ ὑπῆρχεν. πάλιν εἰ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ [61a] μηδενί, τὸ Β οὐδενὶ τῷ Γ· ἔκειτο δὲ τινί. εἰ δὲ τὸ Α τινὶ τῷ Β καὶ τὸ Β τινὶ τῷ Γ, οὐ γίνεται συλλογισμός· οὐδ’ εἰ τὸ Α τινὶ τῷ Β, τῷ δὲ Γ μηδενί, οὐδ’ οὕτως. ὥστ’ ἐκείνως μὲν ἀναιροῦνται, οὕτω δ’ οὐκ ἀναιροῦνται αἱ προτάσεις.

Φανερὸν οὖν διὰ τῶν εἰρημένων πῶς ἀντιστρεφομένου τοῦ συμπεράσματος ἐν ἑκάστῳ σχήματι γίνεται συλλογισμός, καὶ πότ’ ἐναντίος τῇ προτάσει καὶ πότ’ ἀντικείμενος, καὶ ὅτι ἐν μὲν τῷ πρώτῳ σχήματι διὰ τοῦ μέσου καὶ τοῦ ἐσχάτου γίνονται οἱ συλλογισμοί, καὶ ἡ μὲν πρὸς τῷ ἐλάττονι ἄκρῳ ἀεὶ διὰ τοῦ μέσου ἀναιρεῖται, ἡ δὲ πρὸς τῷ μείζονι διὰ τοῦ ἐσχάτου· ἐν δὲ τῷ δευτέρῳ διὰ τοῦ πρώτου καὶ τοῦ ἐσχάτου, ἡ μὲν πρὸς τῷ ἐλάττονι ἄκρῳ ἀεὶ διὰ τοῦ πρώτου σχήματος, ἡ δὲ πρὸς τῷ μείζονι διὰ τοῦ ἐσχάτου· ἐν δὲ τῷ τρίτῳ διὰ τοῦ πρώτου καὶ διὰ τοῦ μέσου, καὶ ἡ μὲν πρὸς τῷ μείζονι διὰ τοῦ πρώτου ἀεί, ἡ δὲ πρὸς τῷ ἐλάττονι διὰ τοῦ μέσου.

Κεφάλαιο 11

Τί μὲν οὖν ἐστὶ τὸ ἀντιστρέφειν καὶ πῶς ἐν ἑκάστῳ σχήματι καὶ τίς γίνεται συλλογισμός, φανερόν. ὁ δὲ διὰ τοῦ ἀδυνάτου συλλογισμὸς δείκνυται μὲν ὅταν ἡ ἀντίφασις τεθῇ τοῦ συμπεράσματος καὶ προσληφθῇ ἄλλη πρότασις, γίνεται δ’ ἐν ἅπασι τοῖς σχήμασιν· ὅμοιον γάρ ἐστι τῇ ἀντιστροφῇ, πλὴν διαφέρει τοσοῦτον ὅτι ἀντιστρέφεται μὲν γεγενημένου συλλογισμοῦ καὶ εἰλημμένων ἀμφοῖν τῶν προτάσεων, ἀπάγεται δ’ εἰς ἀδύνατον οὐ προομολογηθέντος τοῦ ἀντικειμένου πρότερον, ἀλλὰ φανεροῦ ὄντος ὅτι ἀληθές. οἱ δ’ ὅροι ὁμοίως ἔχουσιν ἐν ἀμφοῖν, καὶ ἡ αὐτὴ λῆψις ἀμφοτέρων. οἷον εἰ τὸ Α τῷ Β παντὶ ὑπάρχει, μέσον δὲ τὸ Γ, ἐὰν ὑποτεθῇ τὸ Α ἢ μὴ παντὶ ἢ μηδενὶ τῷ Β ὑπάρχειν, τῷ δὲ Γ παντί, ὅπερ ἦν ἀληθές, ἀνάγκη τὸ Γ τῷ Β ἢ μηδενὶ ἢ μὴ παντὶ ὑπάρχειν. τοῦτο δ’ ἀδύνατον, ὥστε ψεῦδος τὸ ὑποτεθέν· ἀληθὲς ἄρα τὸ ἀντικείμενον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων σχημάτων· ὅσα γὰρ ἀντιστροφὴν δέχεται, καὶ τὸν διὰ τοῦ ἀδυνάτου συλλογισμόν.

Τὰ μὲν οὖν ἄλλα προβλήματα πάντα δείκνυται διὰ τοῦ ἀδυνάτου ἐν ἅπασι τοῖς σχήμασι, τὸ δὲ καθόλου κατηγορικὸν ἐν μὲν τῷ μέσῳ καὶ τῷ τρίτῳ δείκνυται, ἐν δὲ τῷ πρώτῳ οὐ δείκνυται. ὑποκείσθω γὰρ τὸ Α τῷ Β μὴ παντὶ ἢ μηδενὶ ὑπάρχειν, καὶ προσειλήφθω ἄλλη πρότασις ὁποτερωθενοῦν, εἴτε τῷ Α παντὶ ὑπάρχειν τὸ Γ εἴτε τὸ Β παντὶ τῷ Δ· οὕτω γὰρ ἂν εἴη τὸ πρῶτον σχῆμα. εἰ μὲν οὖν ὑπόκειται μὴ παντὶ ὑπάρχειν τὸ Α τῷ Β, οὐ γίνεται [61b] συλλογισμὸς ὁποτερωθενοῦν τῆς προτάσεως λαμβανομένης, εἰ δὲ μηδενί, ὅταν μὲν ἡ Β Δ προσληφθῇ, συλλογισμὸς μὲν ἔσται τοῦ ψεύδους, οὐ δείκνυται δὲ τὸ προκείμενον. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Δ, τὸ Α οὐδενὶ τῷ Δ. τοῦτο δ’ ἔστω ἀδύνατον· ψεῦδος ἄρα τὸ μηδενὶ τῷ Β τὸ Α ὑπάρχειν. ἀλλ’ οὐκ εἰ τὸ μηδενὶ ψεῦδος, τὸ παντὶ ἀληθές. ἐὰν δ’ ἡ Γ Α προσληφθῇ, οὐ γίνεται συλλογισμός, οὐδ’ ὅταν ὑποτεθῇ μὴ παντὶ τῷ Β τὸ Α ὑπάρχειν. ὥστε φανερὸν ὅτι τὸ παντὶ ὑπάρχειν οὐ δείκνυται ἐν τῷ πρώτῳ σχήματι διὰ τοῦ ἀδυνάτου. Τὸ δέ γε τινὶ καὶ τὸ μηδενὶ καὶ μὴ παντὶ δείκνυται. ὑποκείσθω γὰρ τὸ Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β εἰλήφθω παντὶ ἢ τινὶ τῷ Γ. οὐκοῦν ἀνάγκη τὸ Α μηδενὶ ἢ μὴ παντὶ τῷ Γ ὑπάρχειν. τοῦτο δ’ ἀδύνατον — ἔστω γὰρ ἀληθὲς καὶ φανερὸν ὅτι παντὶ ὑπάρχει τῷ Γ τὸ Α — ὥστ’ εἰ τοῦτο ψεῦδος, ἀνάγκη τὸ Α τινὶ τῷ Β ὑπάρχειν. ἐὰν δὲ πρὸς τῷ Α ληφθῇ ἡ ἑτέρα πρότασις, οὐκ ἔσται συλλογισμός. οὐδ’ ὅταν τὸ ἐναντίον τῷ συμπεράσματι ὑποτεθῇ, οἷον τὸ τινὶ μὴ ὑπάρχειν. φανερὸν οὖν ὅτι τὸ ἀντικείμενον ὑποθετέον.

Πάλιν ὑποκείσθω τὸ Α τινὶ τῷ Β ὑπάρχειν, εἰλήφθω δὲ τὸ Γ παντὶ τῷ Α. ἀνάγκη οὖν τὸ Γ τινὶ τῷ Β ὑπάρχειν. τοῦτο δ’ ἔστω ἀδύνατον, ὥστε ψεῦδος τὸ ὑποτεθέν. εἰ δ’ οὕτως, ἀληθὲς τὸ μηδενὶ ὑπάρχειν. ὁμοίως δὲ καὶ εἰ στερητικὸν ἐλήφθη τὸ Γ Α. εἰ δ’ ἡ πρὸς τῷ Β εἴληπται πρότασις, οὐκ ἔσται συλλογισμός. ἐὰν δὲ τὸ ἐναντίον ὑποτεθῇ, συλλογισμὸς μὲν ἔσται καὶ τὸ ἀδύνατον, οὐ δείκνυται δὲ τὸ προτεθέν. ὑποκείσθω γὰρ παντὶ τῷ Β τὸ Α ὑπάρχειν, καὶ τὸ Γ τῷ Α εἰλήφθω παντί. οὐκοῦν ἀνάγκη τὸ Γ παντὶ τῷΒ ὑπάρχειν. τοῦτο δ’ ἀδύνατον, ὥστε ψεῦδος τὸ παντὶ τῷ Β τὸ Α ὑπάρχειν. ἀλλ’ οὔπω γε ἀναγκαῖον, εἰ μὴ παντί, μηδενὶ ὑπάρχειν. ὁμοίως δὲ καὶ εἰ πρὸς τῷ Β ληφθείη ἡ ἑτέρα πρότασις· συλλογισμὸς μὲν γὰρ ἔσται καὶ τὸ ἀδύνατον, οὐκ ἀναιρεῖται δ’ ἡ ὑπόθεσις· ὥστε τὸ ἀντικείμενον ὑποθετέον.

Πρὸς δὲ τὸ μὴ παντὶ δεῖξαι ὑπάρχον τῷ Β τὸ Α, ὑποθετέον παντὶ ὑπάρχειν· εἰ γὰρ τὸ Α παντὶ τῷ Β καὶ τὸ Γ παντὶ τῷ Α, τὸ Γ παντὶ τῷ Β, ὥστ’ εἰ τοῦτο ἀδύνατον, ψεῦδος τὸ ὑποτεθέν. ὁμοίως δὲ καὶ εἰ πρὸς τῷ Β ἐλήφθη ἡ ἑτέρα πρότασις. καὶ εἰ στερητικὸν ἦν τὸ Γ Α, ὡσαύτως· καὶ γὰρ οὕτω γίνεται συλλογισμός. ἐὰν δὲ πρὸς τῷ Β ᾖ τὸ στερητικόν, οὐδὲν δείκνυται. ἐὰν δὲ μὴ παντὶ ἀλλὰ τινὶ ὑπάρχειν ὑποτεθῇ, οὐ δείκνυται ὅτι οὐ παντὶ ἀλλ’ ὅτι οὐδενί. εἰ γὰρ τὸ Α τινὶ τῷ Β, τὸ δὲ Γ παντὶ τῷ Α, τινὶ [62a] τῷ Β τὸ Γ ὑπάρξει. εἰ οὖν τοῦτ’ ἀδύνατον, ψεῦδος τὸ τινὶ ὑπάρχειν τῷ Β τὸ Α, ὥστ’ ἀληθὲς τὸ μηδενί. τούτου δὲ δειχθέντος προσαναιρεῖται τὸ ἀληθές· τὸ γὰρ Α τῷ Β τινὶ μὲν ὑπῆρχε, τινὶ δ’ οὐχ ὑπῆρχεν. ἔτι οὐδὲν παρὰ τὴν ὑπόθεσιν συμβαίνει [τὸ] ἀδύνατον· ψεῦδος γὰρ ἂν εἴη, εἴπερ ἐξ ἀληθῶν μὴ ἔστι ψεῦδος συλλογίσασθαι· νῦν δ’ ἐστὶν ἀληθές· ὑπάρχει γὰρ τὸ Α τινὶ τῷ Β. ὥστ’ οὐχ ὑποθετέον τινὶ ὑπάρχειν, ἀλλὰ παντί. ὁμοίως δὲ καὶ εἰ τινὶ μὴ ὑπάρχον τῷ Β τὸ Α δεικνύοιμεν· εἰ γὰρ ταὐτὸ τὸ τινὶ μὴ ὑπάρχειν καὶ μὴ παντὶ ὑπάρχειν, ἡ αὐτὴ ἀμφοῖν ἀπόδειξις.

Φανερὸν οὖν ὅτι οὐ τὸ ἐναντίον ἀλλὰ τὸ ἀντικείμενον ὑποθετέον ἐν ἅπασι τοῖς συλλογισμοῖς. οὕτω γὰρ τό τε ἀναγκαῖον ἔσται καὶ τὸ ἀξίωμα ἔνδοξον. εἰ γὰρ κατὰ παντὸς ἡ φάσις ἢ ἡ ἀπόφασις, δειχθέντος ὅτι οὐχ ἡ ἀπόφασις, ἀνάγκη τὴν κατάφασιν ἀληθεύεσθαι. πάλιν εἰ μὴ τίθησιν ἀληθεύεσθαι τὴν κατάφασιν, ἔνδοξον τὸ ἀξιῶσαι τὴν ἀπόφασιν. τὸ δ’ ἐναντίον οὐδετέρως ἁρμόττει ἀξιοῦν· οὔτε γὰρ ἀναγκαῖον, εἰ τὸ μηδενὶ ψεῦδος, τὸ παντὶ ἀληθές, οὔτ’ ἔνδοξον ὡς εἰ θάτερον ψεῦδος, ὅτι θάτερον ἀληθές.

Κεφάλαιο 12

Φανερὸν οὖν ὅτι ἐν τῷ πρώτῳ σχήματι τὰ μὲν ἄλλα προβλήματα πάντα δείκνυται διὰ τοῦ ἀδυνάτου, τὸ δὲ καθόλου καταφατικὸν οὐ δείκνυται. ἐν δὲ τῷ μέσῳ καὶ τῷ ἐσχάτῳ καὶ τοῦτο δείκνυται. κείσθω γὰρ τὸ Α μὴ παντὶ τῷ Β ὑπάρχειν, εἰλήφθω δὲ τῷ Γ παντὶ ὑπάρχειν τὸ Α. οὐκοῦν εἰ τῷ μὲν Β μὴ παντί, τῷ δὲ Γ παντί, οὐ παντὶ τῷ Β τὸ Γ. τοῦτο δ’ ἀδύνατον· ἔστω γὰρ φανερὸν ὅτι παντὶ τῷ Β ὑπάρχει τὸ Γ, ὥστε ψεῦδος τὸ ὑποκείμενον. ἀληθὲς ἄρα τὸ παντὶ ὑπάρχειν. ἐὰν δὲ τὸ ἐναντίον ὑποτεθῇ, συλλογισμὸς μὲν ἔσται καὶ τὸ ὀδύνατον, οὐ μὴν δείκνυται τὸ προτεθέν. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τῷ δὲ Γ παντί, οὐδενὶ τῷ Β τὸ Γ. τοῦτο δ’ ἀδύνατον, ὥστε ψεῦδος τὸ μηδενὶ ὑπάρχειν. ἀλλ’ οὐκ εἰ τοῦτο ψεῦδος, τὸ παντὶ ἀληθές. ὅτι δὲ τινὶ τῷ Β ὑπάρχει τὸ Α, ὑποκείσθω τὸ Α μηδενὶ τῷ Β ὑπάρχειν, τῷ δὲ Γ παντὶ ὑπαρχέτω. ἀνάγκη οὖν τὸ Γ μηδενὶ τῷ Β. ὥστ’ εἰ τοῦτ’ ἀδύνατον, ἀνάγκη τὸ Α τινὶ τῷ Β ὑπάρχειν. ἐὰν δ’ ὑποτεθῇ τινὶ μὴ ὑπάρχειν, ταὐτ’ ἔσται ἅπερ ἐπὶ τοῦ πρώτου σχήματος. πάλιν ὑποκείσθω τὸ Α τινὶ τῷ Β ὑπάρχειν, τῷ δὲ Γ μηδενὶ ὑπαρχέτω. ἀνάγκη οὖν τὸ Γ τινὶ τῷ Β μὴ ὑπάρχειν. ἀλλὰ παντὶ ὑπῆρχεν, ὥστε ψεῦδος τὸ ὑποτεθέν· οὐδενὶ ἄρα τῷ Β τὸ Α ὑπάρξει. ὅτι δ’ οὐ παντὶ τὸ Α τῷ Β, ὑποκείσθω παντὶ ὑπάρχειν, τῷ [62b] δὲ Γ μηδενί. ἀνάγκη οὖν τὸ Γ μηδενὶ τῷ Β ὑπάρχειν. τοῦτο δ’ ἀδύνατον, ὥστ’ ἀληθὲς τὸ μὴ παντὶ ὑπάρχειν. φανερὸν οὖν ὅτι πάντες οἱ συλλογισμοὶ γίνονται διὰ τοῦ μέσου σχήματος.

Κεφάλαιο 13

Ὁμοίως δὲ καὶ διὰ τοῦ ἐσχάτου. κείσθω γὰρ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, τὸ δὲ Γ παντί· τὸ ἄρα Α τινὶ τῷ Γ οὐχ ὑπάρχει. εἰ οὖν τοῦτ' ἀδύνατον, ψεῦδος τὸ τινὶ μὴ ὑπάρχειν, ὥστ' ἀληθὲς τὸ παντί. ἐὰν δ' ὑποτεθῇ μηδενὶ ὑπάρχειν, συλλογισμὸς μὲν ἔσται καὶ τὸ ἀδύνατον, οὐ δείκνυται δὲ τὸ προτεθέν· ἐὰν γὰρ τὸ ἐναντίον ὑποτεθῇ, ταὐτ' ἔσται ἅπερ ἐπὶ τῶν πρότερον. ἀλλὰ πρὸς τὸ τινὶ ὑπάρχειν αὕτη ληπτέα ἡ ὑπόθεσις. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Γ τινὶ τῷ Β, τὸ Α οὐ παντὶ τῷ Γ. εἰ οὖν τοῦτο ψεῦδος, ἀληθὲς τὸ Α τινὶ τῷ Β ὑπάρχειν. ὅτι δ' οὐδενὶ τῷ Β ὑπάρχει τὸ Α, ὑποκείσθω τινὶ ὑπάρχειν, εἰλήφθω δὲ καὶ τὸ Γ παντὶ τῷ Β ὑπάρχον. οὐκοῦν ἀνάγκη τῷ Γ τινὶ τὸ Α ὑπάρχειν. ἀλλ' οὐδενὶ ὑπῆρχεν, ὥστε ψεῦδος τὸ τινὶ τῷ Β ὑπάρχειν τὸ Α. ἐὰν δ' ὑποτεθῇ παντὶ τῷ Β ὑπάρχειν τὸ Α, οὐ δείκνυται τὸ προτεθέν, ἀλλὰ πρὸς τὸ μὴ παντὶ ὑπάρχειν αὕτη ληπτέα ἡ ὑπόθεσις. εἰ γὰρ τὸ Α παντὶ τῷ Β καὶ τὸ Γ παντὶ τῷ Β, τὸ Α ὑπάρχει τινὶ τῷ Γ. τοῦτο δὲ οὐκ ἦν, ὥστε ψεῦδος τὸ παντὶ ὑπάρχειν. εἰ δ' οὕτως, ἀληθὲς τὸ μὴ παντί. ἐὰν δ' ὑποτεθῇ τινὶ ὑπάρχειν, ταὐτ' ἔσται ἃ καὶ ἐπὶ τῶν προειρημένων.

Φανερὸν οὖν ὅτι ἐν ἅπασι τοῖς διὰ τοῦ ἀδυνάτου συλλογισμοῖς τὸ ἀντικείμενον ὑποθετέον. δῆλον δὲ καὶ ὅτι ἐν τῷ μέσῳ σχήματι δείκνυταί πως τὸ καταφατικὸν καὶ ἐν τῷ ἐσχάτῳ τὸ καθόλου.

Διαφέρει δ’ ἡ εἰς τὸ ἀδύνατον ἀπόδειξις τῆς δεικτικῆς τῷ τιθέναι ὃ βούλεται ἀναιρεῖν ἀπάγουσα εἰς ὁμολογούμενον ψεῦδος· ἡ δὲ δεικτικὴ ἄρχεται ἐξ ὁμολογουμένων θέσεων. λαμβάνουσι μὲν οὖν ἀμφότεραι δύο προτάσεις ὁμολογουμένας· ἀλλ’ ἡ μὲν ἐξ ὧν ὁ συλλογισμός, ἡ δὲ μίαν μὲν τούτων, μίαν δὲ τὴν ἀντίφασιν τοῦ συμπεράσματος. καὶ ἔνθα μὲν οὐκ ἀνάγκη γνώριμον εἶναι τὸ συμπέρασμα, οὐδὲ προϋπολαμβάνειν ὡς ἔστιν ἢ οὔ· ἔνθα δὲ ἀνάγκη ὡς οὐκ ἔστιν. διαφέρει δ’ οὐδὲν φάσιν ἢ ἀπόφασιν εἶναι τὸ συμπέρασμα, ἀλλ’ ὁμοίως ἔχει περὶ ἀμφοῖν. Ἅπαν (38) δὲ τὸ δεικτικῶς περαινόμενον καὶ διὰ τοῦ ἀδυνάτου δειχθήσεται, καὶ τὸ διὰ τοῦ ἀδυνάτου δεικτικῶς διὰ τῶν αὐτῶν ὅρων [οὐκ ἐν τοῖς αὐτοῖς δὲ σχήμασιν]. ὅταν μὲν γὰρ ὁ [63a] συλλογισμὸς ἐν τῷ πρώτῳ σχήματι γένηται, τὸ ἀληθὲς ἔσται ἐν τῷ μέσῳ ἢ τῷ ἐσχάτῳ, τὸ μὲν στερητικὸν ἐν τῷ μέσῳ, τὸ δὲ κατηγορικὸν ἐν τῷ ἐσχάτῳ. ὅταν δ’ ἐν τῷ μέσῳ ὁ συλλογισμός, τὸ ἀληθὲς ἐν τῷ πρώτῳ ἐπὶ πάντων τῶν προβλημάτων. ὅταν δ’ ἐν τῷ ἐσχάτῳ ὁ συλλογισμός, τὸ ἀληθὲς ἐν τῷ πρώτῳ καὶ τῷ μέσῳ, τὰ μὲν καταφατικὰ ἐν τῷ πρώτῳ, τὰ δὲ στερητικὰ ἐν τῷ μέσῳ. ἔστω γὰρ δεδειγμένον τὸ Α μηδενὶ ἢ μὴ παντὶ τῷ Β διὰ τοῦ πρώτου σχήματος. οὐκοῦν ἡ μὲν ὑπόθεσις ἦν τινὶ τῷ Β ὑπάρχειν τὸ Α, τὸ δὲ Γ ἐλαμβάνετο τῷ μὲν Α παντὶ ὑπάρχειν, τῷ δὲ Β οὐδενί· οὕτω γὰρ ἐγίνετο ὁ συλλογισμὸς καὶ τὸ ἀδύνατον. τοῦτο δὲ τὸ μέσον σχῆμα, εἰ τὸ Γ τῷ μὲν Α παντὶ τῷ δὲ Β μηδενὶ ὑπάρχει. καὶ φανερὸν ἐκ τούτων ὅτι οὐδενὶ τῷ Β ὑπάρχει τὸ Α. ὁμοίως δὲ καὶ εἰ μὴ παντὶ δέδεικται ὑπάρχον. ἡ μὲν γὰρ ὑπόθεσίς ἐστι παντὶ ὑπάρχειν, τὸ δὲ Γ ἐλαμβάνετο τῷ μὲν Α παντί, τῷ δὲ Β οὐ παντί. καὶ εἰ στερητικὸν λαμβάνοιτο τὸ Γ Α, ὡσαύτως· καὶ γὰρ οὕτω γίνεται τὸ μέσον σχῆμα. πάλιν δεδείχθω τινὶ ὑπάρχον τῷ Β τὸ Α. ἡ μὲν οὖν ὑπόθεσις μηδενὶ ὑπάρχειν, τὸ δὲ Β ἐλαμβάνετο παντὶ τῷ Γ ὑπάρχειν καὶ τὸ Α ἢ παντὶ ἢ τινὶ τῷ Γ· οὕτω γὰρ ἔσται τὸ ἀδύνατον. τοῦτο δὲ τὸ ἔσχατον σχῆμα, εἰ τὸ Α καὶ τὸ Β παντὶ τῷ Γ. καὶ φανερὸν ἐκ τούτων ὅτι ἀνάγκη τὸ Α τινὶ τῷ Β ὑπάρχειν. ὁμοίως δὲ καὶ εἰ τινὶ τῷ Γ ληφθείη ὑπάρχον τὸ Β ἢ τὸ Α.

Πάλιν ἐν τῷ μέσῳ σχήματι δεδείχθω τὸ Α παντὶ τῷ Β ὑπάρχον. οὐκοῦν ἡ μὲν ὑπόθεσις ἦν μὴ παντὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Α παντὶ τῷ Γ καὶ τὸ Γ παντὶ τῷ Β· οὕτω γὰρ ἔσται τὸ ἀδύνατον. τοῦτο δὲ τὸ πρῶτον σχῆμα, τὸ Α παντὶ τῷ Γ καὶ τὸ Γ παντὶ τῷ Β. ὁμοίως δὲ καὶ εἰ τινὶ δέδεικται ὑπάρχον· ἡ μὲν γὰρ ὑπόθεσις ἦν μηδενὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ

Α παντὶ τῷ Γ καὶ τὸ Γ τινὶ τῷ Β. εἰ δὲ στερητικὸς ὁ συλλογισμός, ἡ μὲν ὑπόθεσις τὸ Α τινὶ τῷ Β ὑπάρχειν, εἴληπται δὲ τὸ Α μηδενὶ τῷ Γ καὶ τὸ Γ παντὶ τῷ Β, ὥστε γίνεται τὸ πρῶτον σχῆμα. καὶ εἰ μὴ καθόλου ὁ συλλογισμός, ἀλλὰ τὸ Α τινὶ τῷ Β δέδεικται μὴ ὑπάρχειν, ὡσαύτως. ὑπόθεσις μὲν γὰρ παντὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Α μηδενὶ τῷ Γ καὶ τὸ Γ τινὶ τῷ Β· οὕτω γὰρ τὸ πρῶτον σχῆμα.

Πάλιν ἐν τῷ τρίτῳ σχήματι δεδείχθω τὸ Α παντὶ τῷ Β ὑπάρχειν. οὐκοῦν ἡ μὲν ὑπόθεσις ἦν μὴ παντὶ τῷ Β τὸ [63b] Α ὑπάρχειν, εἴληπται δὲ τὸ Γ παντὶ τῷ Β καὶ τὸ Α παντὶ τῷ Γ· οὕτω γὰρ ἔσται τὸ ἀδύνατον. τοῦτο δὲ τὸ πρῶτον σχῆμα. ὡσαύτως δὲ καὶ εἰ ἐπὶ τινὸς ἡ ἀπόδειξις· ἡ μὲν γὰρ ὑπόθεσις μηδενὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Γ τινὶ τῷ Β καὶ τὸ Α παντὶ τῷ Γ. εἰ δὲ στερητικὸς ὁ συλλογισμός, ὑπόθεσις μὲν τὸ Α τινὶ τῷ Β ὑπάρχειν, εἴληπται δὲ τὸ Γ τῷ μὲν Α μηδενί, τῷ δὲ Β παντί· τοῦτο δὲ τὸ μέσον σχῆμα. ὁμοίως δὲ καὶ εἰ μὴ καθόλου ἡ ἀπόδειξις. ὑπόθεσις μὲν γὰρ ἔσται παντὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Γ τῷ μὲν Α μηδενί, τῷ δὲ Β τινί· τοῦτο δὲ τὸ μέσον σχῆμα.Φανερὸν οὖν ὅτι διὰ τῶν αὐτῶν ὅρων καὶ δεικτικῶς ἔστι δεικνύναι τῶν προβλημάτων ἕκαστον [καὶ διὰ τοῦ ἀδυνάτου]. ὁμοίως δ’ ἔσται καὶ δεικτικῶν ὄντων τῶν συλλογισμῶν εἰς ἀδύνατον ἀπάγειν ἐν τοῖς εἰλημμένοις ὅροις, ὅταν ἡ ἀντικειμένη πρότασις τῷ συμπεράσματι ληφθῇ. γίνονται γὰρ οἱ αὐτοὶ συλλογισμοὶ τοῖς διὰ τῆς ἀντιστροφῆς, ὥστ’ εὐθὺς ἔχομεν καὶ τὰ σχήματα δι’ ὧν ἕκαστον ἔσται. δῆλον οὖν ὅτι πᾶν πρόβλημα δείκνυται κατ’ ἀμφοτέρους τοὺς τρόπους, διά τε τοῦ ἀδυνάτου καὶ δεικτικῶς, καὶ οὐκ ἐνδέχεται χωρίζεσθαι τὸν ἕτερον.

Κεφάλαιο 15

Ἐν ποίῳ δὲ σχήματι ἔστιν ἐξ ἀντικειμένων προτάσεων συλλογίσασθαι καὶ ἐν ποίῳ οὐκ ἔστιν, ὧδ’ ἔσται φανερόν. λέγω δ’ ἀντικειμένας εἶναι προτάσεις κατὰ μὲν τὴν λέξιν τέτταρας, οἷον τὸ παντὶ τῷ οὐδενί, καὶ τὸ παντὶ τῷ οὐ παντί, καὶ τὸ τινὶ τῷ οὐδενί, καὶ τὸ τινὶ τῷ οὐ τινί, κατ’ ἀλήθειαν δὲ τρεῖς· τὸ γὰρ τινὶ τῷ οὐ τινὶ κατὰ τὴν λέξιν ἀντίκειται μόνον. τούτων δ’ ἐναντίας μὲν τὰς καθόλου, τὸ παντὶ τῷ μηδενὶ ὑπάρχειν, οἷον τὸ πᾶσαν ἐπιστήμην εἶναι σπουδαίαν τῷ μηδεμίαν εἶναι σπουδαίαν, τὰς δ’ ἄλλας ἀντικειμένας.

Ἐν μὲν οὖν τῷ πρώτῳ σχήματι οὐκ ἔστιν ἐξ ἀντικειμένων προτάσεων συλλογισμός, οὔτε καταφατικὸς οὔτε ἀποφατικός, καταφατικὸς μὲν ὅτι ἀμφοτέρας δεῖ καταφατικὰς εἶναι τὰς προτάσεις, αἱ δ’ ἀντικείμεναι φάσις καὶ ἀπόφασις, στερητικὸς δὲ ὅτι αἱ μὲν ἀντικείμεναι τὸ αὐτὸ τοῦ αὐτοῦ κατηγοροῦσι καὶ ἀπαρνοῦνται, τὸ δ’ ἐν τῷ πρώτῳ μέσον οὐ λέγεται κατ’ ἀμφοῖν, ἀλλ’ ἐκείνου μὲν ἄλλο ἀπαρνεῖται, αὐτὸ δὲ ἄλλου κατηγορεῖται· αὗται δ’ οὐκ ἀντίκεινται.

Ἐν δὲ τῷ μέσῳ σχήματι καὶ ἐκ τῶν ἀντικειμένων καὶ ἐκ τῶν ἐναντίων ἐνδέχεται γίγνεσθαι συλλογισμόν. ἔστω γὰρ [64a] ἀγαθὸν μὲν ἐφ’ οὗ Α, ἐπιστήμη δὲ ἐφ’ οὗ Β καὶ Γ. εἰ δὴ πᾶσαν ἐπιστήμην σπουδαίαν ἔλαβε καὶ μηδεμίαν, τὸ Α τῷ Β παντὶ ὑπάρχει καὶ τῷ Γ οὐδενί, ὥστε τὸ Β τῷ Γ οὐδενί· οὐδεμία ἄρα ἐπιστήμη ἐπιστήμη ἐστίν. ὁμοίως δὲ καὶ εἰ πᾶσαν λαβὼν σπουδαίαν τὴν ἰατρικὴν μὴ σπουδαίαν ἔλαβε· τῷ μὲν γὰρ Β παντὶ τὸ Α, τῷ δὲ Γ οὐδενί, ὥστε ἡ τὶς ἐπιστήμη οὐκ ἔσται ἐπιστήμη. καὶ εἰ τῷ μὲν Γ παντὶ τὸ Α, τῷ δὲ Β μηδενί, ἔστι δὲ τὸ μὲν Β ἐπιστήμη, τὸ δὲ Γ ἰατρική, τὸ δὲ Α ὑπόληψις· οὐδεμίαν γὰρ ἐπιστήμην ὑπόληψιν λαβὼν εἴληφε τινὰ εἶναι ὑπόληψιν. διαφέρει δὲ τοῦ πάλαι τῷ ἐπὶ τῶν ὅρων ἀντιστρέφεσθαι· πρότερον μὲν γὰρ πρὸς τῷ Β, νῦν δὲ πρὸς τῷ Γ τὸ καταφατικόν. καὶ ἂν ᾖ δὲ μὴ καθόλου ἡ ἑτέρα πρότασις, ὡσαύτως· ἀεὶ γὰρ τὸ μέσον ἐστὶν ὃ ἀπὸ θατέρου μὲν ἀποφατικῶς λέγεται, κατὰ θατέρου δὲ καταφατικῶς. ὥστ’ ἐνδέχεται τἀντικείμενα περαίνεσθαι, πλὴν οὐκ ἀεὶ οὐδὲ πάντως, ἀλλ’ ἐὰν οὕτως ἔχῃ τὰ ὑπὸ τὸ μέσον ὥστ’ ἢ ταὐτὰ εἶναι ἢ ὅλον πρὸς μέρος. ἄλλως δ’ ἀδύνατον· οὐ γὰρ ἔσονται οὐδαμῶς αἱ προτάσεις οὔτ’ ἐναντίαι οὔτ’ ἀντικείμεναι.

Ἐν δὲ τῷ τρίτῳ σχήματι καταφατικὸς μὲν συλλογισμὸς οὐδέποτ’ ἔσται ἐξ ἀντικειμένων προτάσεων διὰ τὴν εἰρημένην αἰτίαν καὶ ἐπὶ τοῦ πρώτου σχήματος, ἀποφατικὸς δ’ ἔσται, καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων. ἔστω γὰρ ἐπιστήμη ἐφ’ οὗ τὸ Β καὶ Γ, ἰατρικὴ δ’ ἐφ’ οὗ Α. εἰ οὖν λάβοι πᾶσαν ἰατρικὴν ἐπιστήμην καὶ μηδεμίαν ἰατρικὴν ἐπιστήμην, τὸ Β παντὶ τῷ Α εἴληφε καὶ τὸ Γ οὐδενί, ὥστ’ ἔσται τις ἐπιστήμη οὐκ ἐπιστήμη. ὁμοίως δὲ καὶ ἂν μὴ καθόλου ληφθῇ ἡ Β Α πρότασις· εἰ γάρ ἐστί τις ἰατρικὴ ἐπιστήμη καὶ πάλιν μηδεμία ἰατρικὴ ἐπιστήμη, συμβαίνει ἐπιστήμην τινὰ μὴ εἶναι ἐπιστήμην. εἰσὶ δὲ καθόλου μὲν τῶν ὅρων λαμβανομένων ἐναντίαι αἱ προτάσεις, ἐὰν δ’ ἐν μέρει ἅτερος, ἀντικείμεναι. Δεῖ δὲ κατανοεῖν ὅτι ἐνδέχεται μὲν οὕτω τὰ ἀντικείμενα λαμβάνειν ὥσπερ εἴπομεν πᾶσαν ἐπιστήμην σπουδαίαν εἶναι καὶ πάλιν μηδεμίαν, ἢ τινὰ μὴ σπουδαίαν· ὅπερ οὐκ εἴωθε λανθάνειν. ἔστι δὲ δι’ ἄλλων ἐρωτημάτων συλλογίσασθαι θάτερον, ἢ ὡς ἐν τοῖς Τοπικοῖς ἐλέχθη λαβεῖν. ἐπεὶ δὲ τῶν καταφάσεων αἱ ἀντιθέσεις τρεῖς, ἑξαχῶς συμβαίνει τὰ ἀντικείμενα λαμβάνειν, ἢ παντὶ καὶ μηδενί, ἢ παντὶ καὶ μὴ παντί, ἢ τινὶ καὶ μηδενί, καὶ τοῦτο ἀντιστρέψαι ἐπὶ [64b] τῶν ὅρων, οἷον τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί, ἢ τῷ Γ παντί, τῷ δὲ Β μηδενί, ἢ τῷ μὲν παντί, τῷ δὲ μὴ παντί, καὶ πάλιν τοῦτο ἀντιστρέψαι κατὰ τοὺς ὅρους. ὁμοίως δὲ καὶ ἐπὶ τοῦ τρίτου σχήματος. ὥστε φανερὸν ὁσαχῶς τε καὶ ἐν ποίοις σχήμασιν ἐνδέχεται διὰ τῶν ἀντικειμένων προτάσεων γενέσθαι συλλογισμόν.

Φανερὸν δὲ καὶ ὅτι ἐκ ψευδῶν μὲν ἔστιν ἀληθὲς συλλογίσασθαι, καθάπερ εἴρηται πρότερον, ἐκ δὲ τῶν ἀντικειμένων οὐκ ἔστιν· ἀεὶ γὰρ ἐναντίος ὁ συλλογισμὸς γίνεται τῷ πράγματι, οἷον εἰ ἔστιν ἀγαθόν, μὴ εἶναι ἀγαθόν, ἢ εἰ ζῷον, μὴ ζῷον, διὰ τὸ ἐξ ἀντιφάσεως εἶναι τὸν συλλογισμὸν καὶ τοὺς ὑποκειμένους ὅρους ἢ τοὺς αὐτοὺς εἶναι ἢ τὸν μὲν ὅλον τὸν δὲ μέρος. δῆλον δὲ καὶ ὅτι ἐν τοῖς παραλογισμοῖς οὐδὲν κωλύει γίνεσθαι τῆς ὑποθέσεως ἀντίφασιν, οἷον εἰ ἔστι περιττόν, μὴ εἶναι περιττόν. ἐκ γὰρ τῶν ἀντικειμένων προτάσεων ἐναντίος ἦν ὁ συλλογισμός· ἐὰν οὖν λάβῃ τοιαύτας, ἔσται τῆς ὑποθέσεως ἀντίφασις, δεῖ δὲ κατανοεῖν ὅτι οὕτω μὲν οὐκ ἔστιν ἐναντία συμπεράνασθαι ἐξ ἑνὸς συλλογισμοῦ ὥστ’ εἶναι τὸ συμπέρασμα τὸ μὴ ὂν ἀγαθὸν ἀγαθὸν ἢ ἄλλο τι τοιοῦτον, ἐὰν μὴ εὐθὺς ἡ πρότασις τοιαύτη ληφθῇ (οἷον πᾶν ζῷον λευκὸν εἶναι καὶ μὴ λευκόν, τὸν δ’ ἄνθρωπον ζῷον), ἀλλ’ ἢ προσλαβεῖν δεῖ τὴν ἀντίφασιν (οἷον ὅτι πᾶσα ἐπιστήμη ὑπόληψις [καὶ οὐχ ὑπόληψις], εἶτα λαβεῖν ὅτι ἡ ἰατρικὴ ἐπιστήμη μέν ἐστιν, οὐδεμία δ’ ὑπόληψις, ὥσπερ οἱ ἔλεγχοι γίνονται), ἢ ἐκ δύο συλλογισμῶν. ὥστε δ’ εἶναι ἐναντία κατ’ ἀλήθειαν τὰ εἰλημμένα, οὐκ ἔστιν ἄλλον τρόπον ἢ τοῦτον, καθάπερ εἴρηται πρότερον.

Κεφάλαιο 16

Τὸ δ’ ἐν ἀρχῇ αἰτεῖσθαι καὶ λαμβάνειν ἐστὶ μέν, ὡς ἐν γένει λαβεῖν, ἐν τῷ μὴ ἀποδεικνύναι τὸ προκείμενον, τοῦτο δὲ συμβαίνει πολλαχῶς· καὶ γὰρ εἰ ὅλως μὴ συλλογίζεται, καὶ εἰ δι’ ἀγνωστοτέρων ἢ ὁμοίως ἀγνώστων, καὶ εἰ διὰ τῶν ὑστέρων τὸ πρότερον· ἡ γὰρ ἀπόδειξις ἐκ πιστοτέρων τε καὶ προτέρων ἐστίν. τούτων μὲν οὖν οὐδέν ἐστι τὸ αἰτεῖσθαι τὸ ἐξ ἀρχῆς· ἀλλ’ ἐπεὶ τὰ μὲν δι’ αὑτῶν πέφυκε γνωρίζεσθαι τὰ δὲ δι’ ἄλλων (αἱ μὲν γὰρ ἀρχαὶ δι’ αὑτῶν, τὰ δ’ ὑπὸ τὰς ἀρχὰς δι’ ἄλλων), ὅταν μὴ τὸ δι’ αὑτοῦ γνωστὸν δι’ αὑτοῦ τις ἐπιχειρῇ δεικνύναι, τότ’ αἰτεῖται τὸ ἐξ ἀρχῆς. τοῦτο δ’ ἔστι μὲν οὕτω ποιεῖν ὥστ’ εὐθὺς ἀξιῶσαι τὸ προκείμενον, ἐνδέχεται δὲ καὶ μεταβάντας ἐπ’ ἄλλα ἄττα τῶν πεφυκότων δι’ ἐκείνου δείκνυσθαι διὰ τούτων [65a] ἀποδεικνύναι τὸ ἐξ ἀρχῆς, οἷον εἰ τὸ Α δεικνύοιτο διὰ τοῦ Β, τὸ δὲ Β διὰ τοῦ Γ, τὸ δὲ Γ πεφυκὸς εἴη δείκνυσθαι διὰ τοῦ Α· συμβαίνει γὰρ αὐτὸ δι’ αὑτοῦ τὸ Α δεικνύναι τοὺς οὕτω συλλογιζομένους. ὅπερ ποιοῦσιν οἱ τὰς παραλλήλους οἰόμενοι γράφειν· λανθάνουσι γὰρ αὐτοὶ ἑαυτοὺς τοιαῦτα λαμβάνοντες ἃ οὐχ οἷόν τε ἀποδεῖξαι μὴ οὐσῶν τῶν παραλλήλων. ὥστε συμβαίνει τοῖς οὕτω συλλογιζομένοις ἕκαστον εἶναι λέγειν, εἰ ἔστιν ἕκαστον· οὕτω δ’ ἅπαν ἔσται δι’ αὑτοῦ γνωστόν· ὅπερ ἀδύνατον.

Εἰ οὖν τις ἀδήλου ὄντος ὅτι τὸ Α ὑπάρχει τῷ Γ, ὁμοίως δὲ καὶ ὅτι τῷ Β, αἰτοῖτο τῷ Β ὑπάρχειν τὸ Α, οὔπω δῆλον εἰ τὸ ἐν ἀρχῇ αἰτεῖται, ἀλλ’ ὅτι οὐκ ἀποδείκνυσι, δῆλον· οὐ γὰρ ἀρχὴ ἀποδείξεως τὸ ὁμοίως ἄδηλον. εἰ μέντοι τὸ Β πρὸς τὸ Γ οὕτως ἔχει ὥστε ταὐτὸν εἶναι, ἢ δῆλον ὅτι ἀντιστρέφουσιν, ἢ ἐνυπάρχει θάτερον θατέρῳ, τὸ ἐν ἀρχῇ αἰτεῖται. καὶ γὰρ ἂν ὅτι τῷ Β τὸ Α ὑπάρχει δι’ ἐκείνων δεικνύοι, εἰ ἀντιστρέφοι (νῦν δὲ τοῦτο κωλύει, ἀλλ’ οὐχ ὁ τρόπος). εἰ δὲ τοῦτο ποιοῖ, τὸ εἰρημένον ἂν ποιοῖ καὶ ἀντιστρέφοι διὰ τριῶν. ὡσαύτως δὲ κἂν εἰ τὸ Β τῷ Γ λαμβάνοι ὑπάρχειν, ὁμοίως ἄδηλον ὂν καὶ εἰ τὸ Α, οὔπω τὸ ἐξ ἀρχῆς, ἀλλ’ οὐκ ἀποδείκνυσιν. ἐὰν δὲ ταὐτὸν ᾖ τὸ Α καὶ Β ἢ τῷ ἀντιστρέφειν ἢ τῷ ἕπεσθαι τῷ Β τὸ Α, τὸ ἐξ ἀρχῆς αἰτεῖται διὰ τὴν αὐτὴν αἰτίαν· τὸ γὰρ ἐξ ἀρχῆς τί δύναται, εἴρηται ἡμῖν, ὅτι τὸ δι’ αὑτοῦ δεικνύναι τὸ μὴ δι’ αὑτοῦ δῆλον.

Εἰ οὖν ἐστι τὸ ἐν ἀρχῇ αἰτεῖσθαι τὸ δι’ αὑτοῦ δεικνύναι τὸ μὴ δι’ αὑτοῦ δῆλον, τοῦτο δ’ ἐστὶ τὸ μὴ δεικνύναι, ὅταν ὁμοίως ἀδήλων ὄντων τοῦ δεικνυμένου καὶ δι’ οὗ δείκνυσιν ἢ τῷ ταὐτὰ τῷ αὐτῷ ἢ τῷ ταὐτὸν τοῖς αὐτοῖς ὑπάρχειν, ἐν μὲν τῷ μέσῳ σχήματι καὶ τρίτῳ ἀμφοτέρως ἂν ἐνδέχοιτο τὸ ἐν ἀρχῇ αἰτεῖσθαι, ἐν δὲ κατηγορικῷ συλλογισμῷ ἔν τε τῷ τρίτῳ καὶ τῷ πρώτῳ. ὅταν δ’ ἀποφατικῶς, ὅταν τὰ αὐτὰ ἀπὸ τοῦ αὐτοῦ· καὶ οὐχ ὁμοίως ἀμφότεραι αἱ προτάσεις (ὡσαύτως δὲ καὶ ἐν τῷ μέσῳ), διὰ τὸ μὴ ἀντιστρέφειν τοὺς ὅρους κατὰ τοὺς ἀποφατικοὺς συλλογισμούς. ἔστι δὲ τὸ ἐν ἀρχῇ αἰτεῖσθαι ἐν μὲν ταῖς ἀποδείξεσι τὰ κατ’ ἀλήθειαν οὕτως ἔχοντα, ἐν δὲ τοῖς διαλεκτικοῖς τὰ κατὰ δόξαν.

Κεφάλαιο 17

Τὸ δὲ μὴ παρὰ τοῦτο συμβαίνειν τὸ ψεῦδος, ὃ πολλάκις ἐν τοῖς λόγοις εἰώθαμεν λέγειν, πρῶτον μέν ἐστιν ἐν τοῖς εἰς τὸ ἀδύνατον συλλογισμοῖς, ὅταν πρὸς ἀντίφασιν ᾖ [65b] τούτου ὃ ἐδείκνυτο τῇ εἰς τὸ ἀδύνατον. οὔτε γὰρ μὴ ἀντιφήσας ἐρεῖ τὸ οὐ παρὰ τοῦτο, ἀλλ’ ὅτι ψεῦδός τι ἐτέθη τῶν πρότερον, οὔτ’ ἐν τῇ δεικνυούσῃ· οὐ γὰρ τίθησι ὃ ἀντίφησιν. ἔτι δ’ ὅταν ἀναιρεθῇ τι δεικτικῶς διὰ τῶν Α Β Γ, οὐκ ἔστιν εἰπεῖν ὡς οὐ παρὰ τὸ κείμενον γεγένηται ὁ συλλογισμός. τὸ γὰρ μὴ παρὰ τοῦτο γίνεσθαι τότε λέγομεν, ὅταν ἀναιρεθέντος τούτου μηδὲν ἧττον περαίνηται ὁ συλλογισμός, ὅπερ οὐκ ἔστιν ἐν τοῖς δεικτικοῖς· ἀναιρεθείσης γὰρ τῆς θέσεως οὐδ’ ὁ πρὸς ταύτην ἔσται συλλογισμός. φανερὸν οὖν ὅτι ἐν τοῖς εἰς τὸ ἀδύνατον λέγεται τὸ μὴ παρὰ τοῦτο, καὶ ὅταν οὕτως ἔχῃ πρὸς τὸ ἀδύνατον ἡ ἐξ ἀρχῆς ὑπόθεσις ὥστε καὶ οὔσης καὶ μὴ οὔσης ταύτης οὐδὲν ἧττον συμβαίνειν τὸ ἀδύνατον.

Ὁ μὲν οὖν φανερώτατος τρόπος ἐστὶ τοῦ μὴ παρὰ τὴν θέσιν εἶναι τὸ ψεῦδος, ὅταν ἀπὸ τῆς ὑποθέσεως ἀσύναπτος ᾖ ἀπὸ τῶν μέσων πρὸς τὸ ἀδύνατον ὁ συλλογισμός, ὅπερ εἴρηται καὶ ἐν τοῖς Τοπικοῖς. τὸ γὰρ τὸ ἀναίτιον ὡς αἴτιον τιθέναι τοῦτό ἐστιν, οἷον εἰ βουλόμενος δεῖξαι ὅτι ἀσύμμετρος ἡ διάμετρος, ἐπιχειροίη τὸν Ζήνωνος λόγον, ὡς οὐκ ἔστι κινεῖσθαι, καὶ εἰς τοῦτο ἀπάγοι τὸ ἀδύνατον· οὐδαμῶς γὰρ οὐδαμῇ συνεχές ἐστι τὸ ψεῦδος τῇ φάσει τῇ ἐξ ἀρχῆς. ἄλλος δὲ τρόπος, εἰ συνεχὲς μὲν εἴη τὸ ἀδύνατον τῇ ὑποθέσει, μὴ μέντοι δι’ ἐκείνην συμβαίνοι. τοῦτο γὰρ ἐγχωρεῖ γενέσθαι καὶ ἐπὶ τὸ ἄνω καὶ ἐπὶ τὸ κάτω λαμβάνοντι τὸ συνεχές, οἷον εἰ τὸ Α τῷ Β κεῖται ὑπάρχον, τὸ δὲ Β τῷ Γ, τὸ δὲ Γ τῷ Δ, τοῦτο δ’ εἴη ψεῦδος, τὸ τὸ Β τῷ Δ ὑπάρχειν. εἰ γὰρ ἀφαιρεθέντος τοῦ Α μηδὲν ἧττον ὑπάρχοι τὸ Β τῷ Γ καὶ τὸ Γ τῷ Δ, οὐκ ἂν εἴη τὸ ψεῦδος διὰ τὴν ἐξ ἀρχῆς ὑπόθεσιν. ἢ πάλιν εἴ τις ἐπὶ τὸ ἄνω λαμβάνοι τὸ συνεχές, οἷον εἰ τὸ μὲν Α τῷ Β, τῷ δὲ Α τὸ Ε καὶ τῷ Ε τὸ Ζ, ψεῦδος δ’ εἴη τὸ ὑπάρχειν τῷ (30)Α τὸ Ζ· καὶ γὰρ οὕτως οὐδὲν ἂν ἧττον εἴη τὸ ἀδύνατον ἀναιρεθείσης τῆς ἐξ ἀρχῆς ὑποθέσεως. ἀλλὰ δεῖ πρὸς τοὺς ἐξ ἀρχῆς ὅρους συνάπτειν τὸ ἀδύνατον· οὕτω γὰρ ἔσται διὰ τὴν ὑπόθεσιν, οἷον ἐπὶ μὲν τὸ κάτω λαμβάνοντι τὸ συνεχὲς πρὸς τὸν κατηγορούμενον τῶν ὅρων (εἰ γὰρ ἀδύνατον τὸ Α τῷ Δ ὑπάρχειν, ἀφαιρεθέντος τοῦ Α οὐκέτι ἔσται τὸ ψεῦδος)· ἐπὶ δὲ τὸ ἄνω, καθ’ οὗ κατηγορεῖται (εἰ γὰρ τῷ Β μὴ ἐγχωρεῖ τὸ Ζ ὑπάρχειν, ἀφαιρεθέντος τοῦ

Β οὐκέτι ἔσται τὸ ἀδύνατον). ὁμοίως δὲ καὶ στερητικῶν τῶν συλλογισμῶν ὄντων. [66a]

Φανερὸν οὖν ὅτι τοῦ ἀδυνάτου μὴ πρὸς τοὺς ἐξ ἀρχῆς ὅρους ὄντος οὐ παρὰ τὴν θέσιν συμβαίνει τὸ ψεῦδος. ἢ οὐδ' οὕτως ἀεὶ διὰ τὴν ὑπόθεσιν ἔσται τὸ ψεῦδος; καὶ γὰρ εἰ μὴ τῷ Β ἀλλὰ τῷ Κ ἐτέθη τὸ Α ὑπάρχειν, τὸ δὲ Κ τῷ Γ καὶ τοῦτο τῷ Δ, καὶ οὕτω μένει τὸ ἀδύνατον (ὁμοίως δὲ καὶ ἐπὶ τὸ ἄνω λαμβάνοντι τοὺς ὅρους), ὥστ' ἐπεὶ καὶ ὄντος καὶ μὴ ὄντος τούτου συμβαίνει τὸ ἀδύνατον, οὐκ ἂν εἴη παρὰ τὴν θέσιν. ἢ τὸ μὴ ὄντος τούτου μηδὲν ἧττον γίνεσθαι τὸ ψεῦδος οὐχ οὕτω ληπτέον ὥστ' ἄλλου τιθεμένου συμβαίνειν τὸ ἀδύνατον, ἀλλ' ὅταν ἀφαιρεθέντος τούτου διὰ τῶν λοιπῶν προτάσεων ταὐτὸ περαίνηται ἀδύνατον, ἐπεὶ ταὐτό γε ψεῦδος συμβαίνειν διὰ πλειόνων ὑποθέσεων οὐδὲν ἴσως ἄτοπον, οἷον τὰς παραλλήλους συμπίπτειν καὶ εἰ μείζων ἐστὶν ἡ ἐντὸς τῆς ἐκτὸς καὶ εἰ τὸ τρίγωνον ἔχει πλείους ὀρθὰς δυεῖν;

Κεφάλαιο 18

Ὁ δὲ ψευδὴς λόγος γίνεται παρὰ τὸ πρῶτον ψεῦδος. ἢ γὰρ ἐκ τῶν δύο προτάσεων ἢ ἐκ πλειόνων πᾶς ἐστι συλλογισμός. εἰ μὲν οὖν ἐκ τῶν δύο, τούτων ἀνάγκη τὴν ἑτέραν ἢ καὶ ἀμφοτέρας εἶναι ψευδεῖς· ἐξ ἀληθῶν γὰρ οὐκ ἦν ψευδὴς συλλογισμός. εἰ δ’ ἐκ πλειόνων, οἷον τὸ μὲν Γ διὰ τῶν (20)Α Β, ταῦτα δὲ διὰ τῶν Δ Ε Ζ Η, τούτων τι ἔσται τῶν ἐπάνω ψεῦδος, καὶ παρὰ τοῦτο ὁ λόγος· τὸ γὰρ Α καὶ Β δι’ ἐκείνων περαίνονται. ὥστε παρ’ ἐκείνων τι συμβαίνει τὸ συμπέρασμα καὶ τὸ ψεῦδος.

Κεφάλαιο 19

Πρὸς δὲ τὸ μὴ κατασυλλογίζεσθαι παρατηρητέον, ὅταν ἄνευ τῶν συμπερασμάτων ἐρωτᾷ τὸν λόγον, ὅπως μὴ δοθῇ δὶς ταὐτὸν ἐν ταῖς προτάσεσιν, ἐπειδήπερ ἴσμεν ὅτι ἄνευ μέσου συλλογισμὸς οὐ γίνεται, μέσον δ’ ἐστὶ τὸ πλεονάκις λεγόμενον. ὡς δὲ δεῖ πρὸς ἕκαστον συμπέρασμα τηρεῖν τὸ μέσον, φανερὸν ἐκ τοῦ εἰδέναι ποῖον ἐν ἑκάστῳ σχήματι δείκνυται. τοῦτο δ’ ἡμᾶς οὐ λήσεται διὰ τὸ εἰδέναι πῶς ὑπέχομεν τὸν λόγον.

Χρὴ δ’ ὅπερ φυλάττεσθαι παραγγέλλομεν ἀποκρινομένους, αὐτοὺς ἐπιχειροῦντας πειρᾶσθαι λανθάνειν. τοῦτο δ’ ἔσται πρῶτον, ἐὰν τὰ συμπεράσματα μὴ προσυλλογίζωνται ἀλλ’ εἰλημμένων τῶν ἀναγκαίων ἄδηλα ᾖ, ἔτι δὲ ἂν μὴ τὰ σύνεγγυς ἐρωτᾷ, ἀλλ’ ὅτι μάλιστα ἄμεσα. οἷον ἔστω δέον συμπεραίνεσθαι τὸ Α κατὰ τοῦ Ζ· μέσα Β Γ Δ Ε. δεῖ οὖν ἐρωτᾶν εἰ τὸ Α τῷ Β, καὶ πάλιν μὴ εἰ τὸ Β τῷ Γ, ἀλλ’ εἰ τὸ Δ τῷ Ε, κἄπειτα εἰ τὸ Β τῷ Γ, καὶ οὕτω [66b] τὰ λοιπά. κἂν δι’ ἑνὸς μέσου γίνηται ὁ συλλογισμός, ἀπὸ τοῦ μέσου ἄρχεσθαι· μάλιστα γὰρ ἂν οὕτω λανθάνοι τὸν ἀποκρινόμενον.

Κεφάλαιο 20

Ἐπεὶ δ’ ἔχομεν πότε καὶ πῶς ἐχόντων τῶν ὅρων γίνεται συλλογισμός, φανερὸν καὶ πότ’ ἔσται καὶ πότ’ οὐκ ἔσται ἔλεγχος. πάντων μὲν γὰρ συγχωρουμένων, ἢ ἐναλλὰξ τιθεμένων τῶν ἀποκρίσεων, οἷον τῆς μὲν ἀποφατικῆς τῆς δὲ καταφατικῆς, ἐγχωρεῖ γίνεσθαι ἔλεγχον. ἦν γὰρ συλλογισμὸς καὶ οὕτω καὶ ἐκείνως ἐχόντων τῶν ὅρων, ὥστ’ εἰ τὸ κείμενον ἐναντίον τῷ συμπεράσματι, ἀνάγκη γίνεσθαι ἔλεγχον· ὁ γὰρ ἔλεγχος ἀντιφάσεως συλλογισμός. εἰ δὲ μηδὲν συγχωροῖτο, ἀδύνατον γενέσθαι ἔλεγχον· οὐ γὰρ ἦν συλλογισμὸς πάντων τῶν ὅρων στερητικῶν ὄντων, ὥστ’ οὐδ’ ἔλεγχος· εἰ μὲν γὰρ ἔλεγχος, ἀνάγκη συλλογισμὸν εἶναι, συλλογισμοῦ δ’ ὄντος οὐκ ἀνάγκη ἔλεγχον. ὡσαύτως δὲ καὶ εἰ μηδὲν τεθείη κατὰ τὴν ἀπόκρισιν ἐν ὅλῳ· ὁ γὰρ αὐτὸς ἔσται διορισμὸς ἐλέγχου καὶ συλλογισμοῦ.

Κεφάλαιο 21

Συμβαίνει δ’ ἐνίοτε, καθάπερ ἐν τῇ θέσει τῶν ὅρων ἀπατώμεθα, καὶ κατὰ τὴν ὑπόληψιν γίνεσθαι τὴν ἀπάτην, οἷον εἰ ἐνδέχεται τὸ αὐτὸ πλείοσι πρώτοις ὑπάρχειν, καὶ τὸ μὲν λεληθέναι τινὰ καὶ οἴεσθαι μηδενὶ ὑπάρχειν, τὸ δὲ εἰδέναι. ἔστω τὸ Α τῷ Β καὶ τῷ Γ καθ’ αὑτὰ ὑπάρχον, καὶ ταῦτα παντὶ τῷ Δ ὡσαύτως. εἰ δὴ τῷ μὲν Β τὸ Α παντὶ οἴεται ὑπάρχειν, καὶ τοῦτο τῷ Δ, τῷ δὲ Γ τὸ Α μηδενί, καὶ τοῦτο τῷ Δ παντί, τοῦ αὐτοῦ κατὰ ταὐτὸν ἕξει ἐπιστήμην καὶ ἄγνοιαν. πάλιν εἴ τις ἀπατηθείη περὶ τὰ ἐκ τῆς αὐτῆς συστοιχίας, οἷον εἰ τὸ Α ὑπάρχει τῷ Β, τοῦτο δὲ τῷ Γ καὶ τὸ Γ τῷ Δ, ὑπολαμβάνοι δὲ τὸ Α παντὶ τῷ Β ὑπάρχειν καὶ πάλιν μηδενὶ τῷ Γ· ἅμα γὰρ εἴσεταί τε καὶ οὐχ ὑπολήψεται ὑπάρχειν. ἆρ’ οὖν οὐδὲν ἄλλο ἀξιοῖ ἐκ τούτων ἢ ὃ ἐπίσταται, τοῦτο μὴ ὑπολαμβάνειν; ἐπίσταται γάρ πως ὅτι τὸ Α τῷ Γ ὑπάρχει διὰ τοῦ Β, ὡς τῇ καθόλου τὸ κατὰ μέρος, ὥστε ὅ πως ἐπίσταται, τοῦτο ὅλως ἀξιοῖ μὴ ὑπολαμβάνειν· ὅπερ ἀδύνατον.

Ἐπὶ δὲ τοῦ πρότερον λεχθέντος, εἰ μὴ ἐκ τῆς αὐτῆς συστοιχίας τὸ μέσον, καθ’ ἑκάτερον μὲν τῶν μέσων ἀμφοτέρας τὰς προτάσεις οὐκ ἐγχωρεῖ ὑπολαμβάνειν, οἷον τὸ Α τῷ μὲν Β παντί, τῷ δὲ Γ μηδενί, ταῦτα δ’ ἀμφότερα παντὶ τῷ Δ. συμβαίνει γὰρ ἢ ἁπλῶς ἢ ἐπί τι ἐναντίαν λαμβάνεσθαι τὴν πρώτην πρότασιν. εἰ γὰρ ᾧ τὸ Β ὑπάρχει, παντὶ τὸ Α ὑπολαμβάνει [67a] ὑπάρχειν, τὸ δὲ Β τῷ Δ οἶδε, καὶ ὅτι τῷ Δ τὸ Α οἶδεν. ὥστ’ εἰ πάλιν, ᾧ τὸ Γ, μηδενὶ οἴεται τὸ Α ὑπάρχειν, ᾧ τὸ Β τινὶ ὑπάρχει, τούτῳ οὐκ οἴεται τὸ Α ὑπάρχειν. τὸ δὲ παντὶ οἰόμενον ᾧ τὸ Β, πάλιν τινὶ μὴ οἴεσθαι ᾧ τὸ Β, ἢ ἁπλῶς ἢ ἐπί τι ἐναντίον ἐστίν.

Οὕτω μὲν οὖν οὐκ ἐνδέχεται ὑπολαβεῖν, καθ’ ἑκάτερον δὲ τὴν μίαν ἢ κατὰ θάτερον ἀμφοτέρας οὐδὲν κωλύει, οἷον τὸ Α παντὶ τῷ Β καὶ τὸ Β τῷ Δ, καὶ πάλιν τὸ Α μηδενὶ τῷ Γ. ὁμοία γὰρ ἡ τοιαύτη ἀπάτη καὶ ὡς ἀπατώμεθα περὶ τὰς ἐν μέρει, οἷον εἰ ᾧ τὸ Β, παντὶ τὸ Α ὑπάρχει, τὸ δὲ Β τῷ Γ παντί, τὸ Α παντὶ τῷ Γ ὑπάρξει. εἰ οὖν τις οἶδεν ὅτι τὸ Α, ᾧ τὸ Β, ὑπάρχει παντί, οἶδε καὶ ὅτι τῷ Γ. ἀλλ’ οὐδὲν κωλύει ἀγνοεῖν τὸ Γ ὅτι ἔστιν, οἷον εἰ τὸ μὲν Α δύο ὀρθαί, τὸ δ’ ἐφ’ ᾧ Β τρίγωνον, τὸ δ’ ἐφ’ ᾧ Γ αἰσθητὸν τρίγωνον. ὑπολάβοι γὰρ ἄν τις μὴ εἶναι τὸ Γ, εἰδὼς ὅτι πᾶν τρίγωνον ἔχει δύο ὀρθάς, ὥσθ’ ἅμα εἴσεται καὶ ἀγνοήσει ταὐτόν. τὸ γὰρ εἰδέναι πᾶν τρίγωνον ὅτι δύο ὀρθαῖς οὐχ ἁπλοῦν ἐστιν, ἀλλὰ τὸ μὲν τῷ τὴν καθόλου ἔχειν ἐπιστήμην, τὸ δὲ τὴν καθ’ ἕκαστον. οὕτω μὲν οὖν ὡς τῇ καθόλου οἶδε τὸ Γ ὅτι δύο ὀρθαί, ὡς δὲ τῇ καθ’ ἕκαστον οὐκ οἶδεν, ὥστ’ οὐχ ἕξει τὰς ἐναντίας. ὁμοίως δὲ καὶ ὁ ἐν τῷ Μένωνι λόγος, ὅτι ἡ μάθησις ἀνάμνησις. οὐδαμοῦ γὰρ συμβαίνει προεπίστασθαι τὸ καθ’ ἕκαστον, ἀλλ’ ἅμα τῇ ἐπαγωγῇ λαμβάνειν τὴν τῶν κατὰ μέρος ἐπιστήμην ὥσπερ ἀναγνωρίζοντας. ἔνια γὰρ εὐθὺς ἴσμεν, οἷον ὅτι δύο ὀρθαῖς, ἐὰν ἴδωμεν ὅτι τρίγωνον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Τῇ μὲν οὖν καθόλου θεωροῦμεν τὰ ἐν μέρει, τῇ δ’ οἰκείᾳ οὐκ ἴσμεν, ὥστ’ ἐνδέχεται καὶ ἀπατᾶσθαι περὶ αὐτά, πλὴν οὐκ ἐναντίως, ἀλλ’ ἔχειν μὲν τὴν καθόλου, ἀπατᾶσθαι δὲ τὴν κατὰ μέρος. ὁμοίως οὖν καὶ ἐπὶ τῶν προειρημένων· οὐ γὰρ ἐναντία ἡ κατὰ τὸ μέσον ἀπάτη τῇ κατὰ τὸν συλλογισμὸν ἐπιστήμῃ, οὐδ’ ἡ καθ’ ἑκάτερον τῶν μέσων ὑπόληψις. οὐδὲν δὲ κωλύει εἰδότα καὶ ὅτι τὸ Α ὅλῳ τῷ Β ὑπάρχει καὶ πάλιν τοῦτο τῷ Γ, οἰηθῆναι μὴ ὑπάρχειν τὸ Α τῷ Γ, οἷον ὅτι πᾶσα ἡμίονος ἄτοκος καὶ αὕτη ἡμίονος οἴεσθαι κύειν ταύτην· οὐ γὰρ ἐπίσταται ὅτι τὸ Α τῷ Γ, μὴ συνθεωρῶν τὸ καθ’ ἑκάτερον. ὥστε δῆλον ὅτι καὶ εἰ τὸ μὲν οἶδε τὸ δὲ μὴ οἶδεν, ἀπατηθήσεται· ὅπερ ἔχουσιν αἱ καθόλου πρὸς τὰς κατὰ μέρος ἐπιστήμας. οὐδὲν γὰρ τῶν [67b] αἰσθητῶν ἔξω τῆς αἰσθήσεως γενόμενον ἴσμεν, οὐδ’ ἂν ᾐσθημένοι τυγχάνωμεν, εἰ μὴ ὡς τῷ καθόλου καὶ τῷ ἔχειν τὴν οἰκείαν ἐπιστήμην, ἀλλ’ οὐχ ὡς τῷ ἐνεργεῖν. τὸ γὰρ ἐπίστασθαι λέγεται τριχῶς, ἢ ὡς τῇ καθόλου ἢ ὡς τῇ οἰκείᾳ ἢ ὡς τῷ ἐνεργεῖν, ὥστε καὶ τὸ ἠπατῆσθαι τοσαυταχῶς. οὐδὲν οὖν κωλύει καὶ εἰδέναι καὶ ἠπατῆσθαι περὶ ταὐτό, πλὴν οὐκ ἐναντίως. ὅπερ συμβαίνει καὶ τῷ καθ’ ἑκατέραν εἰδότι τὴν πρότασιν καὶ μὴ ἐπεσκεμμένῳ πρότερον. ὑπολαμβάνων γὰρ κύειν τὴν ἡμίονον οὐκ ἔχει τὴν κατὰ τὸ ἐνεργεῖν ἐπιστήμην, οὐδ’ αὖ διὰ τὴν ὑπόληψιν ἐναντίαν ἀπάτην τῇ ἐπιστήμῃ· συλλογισμὸς γὰρ ἡ ἐναντία ἀπάτη τῇ καθόλου.

Ὁ δ’ ὑπολαμβάνων τὸ ἀγαθῷ εἶναι κακῷ εἶναι, τὸ αὐτὸ ὑπολήψεται ἀγαθῷ εἶναι καὶ κακῷ. ἔστω γὰρ τὸ μὲν ἀγαθῷ εἶναι ἐφ’ οὗ Α, τὸ δὲ κακῷ εἶναι ἐφ’ οὗ Β, πάλιν δὲ τὸ ἀγαθῷ εἶναι ἐφ’ οὗ Γ. ἐπεὶ οὖν ταὐτὸν ὑπολαμβάνει τὸ Β καὶ τὸ Γ, καὶ εἶναι τὸ Γ τὸ Β ὑπολήψεται, καὶ πάλιν τὸ Β τὸ Α εἶναι ὡσαύτως, ὥστε καὶ τὸ Γ τὸ Α. ὥσπερ γὰρ εἰ ἦν ἀληθές, καθ’ οὗ τὸ Γ, τὸ Β, καὶ καθ’ οὗ τὸ Β, τὸ Α, καὶ κατὰ τοῦ Γ τὸ Α ἀληθὲς ἦν, οὕτω καὶἐπὶ τοῦ ὑπολαμβάνειν. ὁμοίως δὲ καὶ ἐπὶ τοῦ εἶναι· ταὐτοῦ γὰρ ὄντος τοῦ Γ καὶ Β, καὶ πάλιν τοῦ Β καὶ Α, καὶ τὸ Γ τῷ Α ταὐτὸν ἦν· ὥστε καὶ ἐπὶ τοῦ δοξάζειν ὁμοίως. ἆρ’ οὖν τοῦτο μὲν ἀναγκαῖον, εἴ τις δώσει τὸ πρῶτον; ἀλλ’ ἴσως ἐκεῖνο ψεῦδος, τὸ ὑπολαβεῖν τινὰ κακῷ εἶναι τὸ ἀγαθῷ εἶναι, εἰ μὴ κατὰ συμβεβηκός· πολλαχῶς γὰρ ἐγχωρεῖ τοῦθ’ ὑπολαμβάνειν. ἐπισκεπτέον δὲ τοῦτο βέλτιον.

Κεφάλαιο 22

Ὅταν δ’ ἀντιστρέφῃ τὰ ἄκρα, ἀνάγκη καὶ τὸ μέσον ἀντιστρέφειν πρὸς ἄμφω. εἰ γὰρ τὸ Α κατὰ τοῦ Γ διὰ τοῦ Β ὑπάρχει, εἰ ἀντιστρέφει καὶ ὑπάρχει, ᾧ τὸ Α, παντὶ τὸ Γ, καὶ τὸ Β τῷ Α ἀντιστρέψει καὶ ὑπάρξει, ᾧ τὸ Α, παντὶ τὸ Β διὰ μέσου τοῦ Γ· καὶ τὸ Γ τῷ Β ἀντιστρέψει διὰ μέσου τοῦ Α. καὶ ἐπὶ τοῦ μὴ ὑπάρχειν ὡσαύτως, οἷον εἰ τὸ Β τῷ Γ ὑπάρχει, τῷ δὲ Β τὸ Α οὐχ ὑπάρχει, οὐδὲ τὸ Α τῷ Γ οὐχ ὑπάρξει. εἰ δὴ τὸ Β τῷ Α ἀντιστρέφει, καὶ τὸ Γ τῷ Α ἀντιστρέψει. ἔστω γὰρ τὸ Β μὴ ὑπάρχον τῷ Α· οὐδ’ ἄρα τὸ Γ· παντὶ γὰρ τῷ Γ τὸ Β ὑπῆρχεν. καὶ εἰ τῷ Β τὸ Γ ἀντιστρέφει, καὶ τὸ Α ἀντιστρέψει· καθ’ οὗ γὰρ ἅπαντος τὸ Β, καὶ τὸ Γ. καὶ εἰ τὸ Γ <καὶ> πρὸς τὸ Α ἀντιστρέφει, καὶ τὸ Β ἀντιστρέψει. ᾧ γὰρ τὸ Β, [68a] τὸ Γ· ᾧ δὲ τὸ Α, τὸ Γ οὐχ ὑπάρχει. καὶ μόνον τοῦτο ἀπὸ τοῦ συμπεράσματος ἄρχεται, τὰ δ’ ἄλλα οὐχ ὁμοίως καὶ ἐπὶ τοῦ κατηγορικοῦ συλλογισμοῦ. Πάλιν εἰ τὸ Α καὶ τὸ Β ἀντιστρέφει, καὶ τὸ Γ καὶ τὸ Δ ὡσαύτως, ἅπαντι δ’ ἀνάγκη τὸ Α ἢ τὸ Γ ὑπάρχειν, καὶ τὸ Β καὶ Δ οὕτως ἕξει ὥστε παντὶ θάτερον ὑπάρχειν. ἐπεὶ γὰρ ᾧ τὸ Α, τὸ Β, καὶ ᾧ τὸ Γ, τὸ Δ, παντὶ δὲ τὸ Α ἢ τὸ Γ καὶ οὐχ ἅμα, φανερὸν ὅτι καὶ τὸ Β ἢ τὸ Δ παντὶ καὶ οὐχ ἅμα [οἷον ... γεγονέναι]· δύο γὰρ συλλογισμοὶ σύγκεινται. πάλιν εἰ παντὶ (11)μὲν τὸ Α ἢ τὸ Β καὶ τὸ Γ ἢ τὸ Δ, ἅμα δὲ μὴ ὑπάρχει, εἰ ἀντιστρέφει τὸ Α καὶ τὸ Γ, καὶ τὸ Β καὶ τὸ Δ ἀντιστρέφει. εἰ γὰρ τινὶ μὴ ὑπάρχει τὸ Β, ᾧ τὸ Δ, δῆλον ὅτι τὸ Α ὑπάρχει. εἰ δὲ τὸ Α, καὶ τὸ Γ· ἀντιστρέφει γάρ. ὥστε ἅμα τὸ Γ καὶ τὸ Δ. τοῦτο δ’ ἀδύνατον. <οἷον εἰ τὸ ἀγένητον ἄφθαρτον καὶ τὸ ἄφθαρτον ἀγένητον, ἀνάγκη τὸ γενόμενον φθαρτὸν καὶ τὸ φθαρτὸν γεγονέναι>.

Ὅταν δὲ τὸ Α ὅλῳ τῷ Β καὶ τῷ Γ ὑπάρχῃ καὶ μηδενὸς ἄλλου κατηγορῆται, ὑπάρχῃ δὲ καὶ τὸ Β παντὶ τῷ Γ, ἀνάγκη τὸ Α καὶ Β ἀντιστρέφειν· ἐπεὶ γὰρ κατὰ μόνων τῶν Β Γ λέγεται τὸ Α, κατηγορεῖται δὲ τὸ Β καὶ αὐτὸ αὑτοῦ καὶ τοῦ Γ, φανερὸν ὅτι καθ’ ὧν τὸ Α, καὶ τὸ Β λεχθήσεται πάντων πλὴν αὐτοῦ τοῦ Α. πάλιν ὅταν τὸ Α καὶ τὸ Β ὅλῳ τῷ Γ ὑπάρχῃ, ἀντιστρέφῃ δὲ τὸ Γ τῷ Β, ἀνάγκη τὸ Α παντὶ τῷ Β ὑπάρχειν· ἐπεὶ γὰρ παντὶ τῷ Γ τὸ Α, τὸ δὲ Γ τῷ Β διὰ τὸ ἀντιστρέφειν, καὶ τὸ Α παντὶ τῷ Β.

Ὅταν δὲ δυοῖν ὄντοιν τὸ Α τοῦ Β αἱρετώτερον ᾖ, ὄντων ἀντικειμένων, καὶ τὸ Δ τοῦ Γ ὡσαύτως, εἰ αἱρετώτερα τὰ Α Γ τῶν Β Δ, τὸ Α τοῦ Δ αἱρετώτερον. ὁμοίως γὰρ διωκτὸν τὸ Α καὶ φευκτὸν τὸ Β (ἀντικείμενα γάρ), καὶ τὸ Γ τῷ Δ (καὶ γὰρ ταῦτα ἀντίκειται). εἰ οὖν τὸ Α τῷ Δ ὁμοίως αἱρετόν, καὶ τὸ Β τῷ Γ φευκτόν· ἑκάτερον γὰρ ἑκατέρῳ ὁμοίως, φευκτὸν διωκτῷ.

ὥστε καὶ τὰ ἄμφω τὰ Α Γ τοῖς Β Δ. ἐπεὶ δὲ μᾶλλον, οὐχ οἷόν τε ὁμοίως· καὶ γὰρ ἂν τὰ Β Δ ὁμοίως ἦσαν. εἰ δὲ τὸ Δ τοῦ Α αἱρετώτερον, καὶ τὸ Β τοῦ Γ ἧττον φευκτόν· τὸ γὰρ ἔλαττον τῷ ἐλάττονι ἀντίκειται. αἱρετώτερον δὲ τὸ μεῖζον ἀγαθὸν καὶ ἔλαττον κακὸν ἢ τὸ ἔλαττον ἀγαθὸν καὶ μεῖζον κακόν· καὶ τὸ ἅπαν ἄρα, τὸ Β Δ, αἱρετώτερον τοῦ Α Γ.νῦν δ’ οὐκ ἔστιν. τὸ Α ἄρα αἱρετώτερον τοῦ Δ, καὶ τὸ Γ ἄρα τοῦ Β ἧττον φευκτόν. εἰ δὴ ἕλοιτο πᾶς ὁ ἐρῶν κατὰ τὸν ἔρωτα τὸ Α τὸ οὕτως ἔχειν ὥστε χαρίζεσθαι, καὶ τὸ μὴ χαρίζεσθαι τὸ ἐφ’ οὗ Γ, ἢ τὸ χαρίζεσθαι τὸ ἐφ’ οὗ Δ, καὶ [68b] τὸ μὴ τοιοῦτον εἶναι οἷον χαρίζεσθαι τὸ ἐφ’ οὗ Β, δῆλον ὅτι τὸ Α τὸ τοιοῦτον εἶναι αἱρετώτερόν ἐστιν ἢ τὸ χαρίζεσθαι. τὸ ἄρα φιλεῖσθαι τῆς συνουσίας αἱρετώτερον κατὰ τὸν ἔρωτα. μᾶλλον ἄρα ὁ ἔρως ἐστὶ τῆς φιλίας ἢ τοῦ συνεῖναι. εἰ δὲ μάλιστα τούτου, καὶ τέλος τοῦτο. τὸ ἄρα συνεῖναι ἢ οὐκ ἔστιν ὅλως ἢ τοῦ φιλεῖσθαι ἕνεκεν· καὶ γὰρ αἱ ἄλλαι ἐπιθυμίαι καὶ τέχναι οὕτως.

Κεφάλαιο 23

Πῶς μὲν οὖν ἔχουσιν οἱ ὅροι κατὰ τὰς ἀντιστροφὰς καὶ τὸ αἱρετώτεροι ἢ φευκτότεροι εἶναι, φανερόν· ὅτι δ’ οὐ μόνον οἱ διαλεκτικοὶ καὶ ἀποδεικτικοὶ συλλογισμοὶ διὰ τῶν προειρημένων γίνονται σχημάτων, ἀλλὰ καὶ οἱ ῥητορικοὶ καὶ ἁπλῶς ἡτισοῦν πίστις καὶ ἡ καθ’ ὁποιανοῦν μέθοδον, νῦν ἂν εἴη λεκτέον. ἅπαντα γὰρ πιστεύομεν ἢ διὰ συλλογισμοῦ ἢ ἐξ ἐπαγωγῆς.

Ἐπαγωγὴ μὲν οὖν ἐστι καὶ ὁ ἐξ ἐπαγωγῆς συλλογισμὸς τὸ διὰ τοῦ ἑτέρου θάτερον ἄκρον τῷ μέσῳ συλλογίσασθαι, οἷον εἰ τῶν Α Γ μέσον τὸ Β, διὰ τοῦ Γ δεῖξαι τὸ Α τῷ Β ὑπάρχον· οὕτω γὰρ ποιούμεθα τὰς ἐπαγωγάς. οἷον ἔστω τὸ Α μακρόβιον, τὸ δ’ ἐφ’ ᾧ Β τὸ χολὴν μὴ ἔχον, ἐφ’ ᾧ δὲ Γ τὸ καθ’ ἕκαστον μακρόβιον, οἷον ἄνθρωπος καὶ ἵππος καὶ ἡμίονος. τῷ δὴ Γ ὅλῳ ὑπάρχει τὸ Α (πᾶν γὰρ τὸ Γ μακρόβιον)· ἀλλὰ καὶ τὸ Β, τὸ μὴ ἔχειν χολήν, παντὶ ὑπάρχει τῷ Γ. εἰ οὖν ἀντιστρέφει τὸ Γ τῷ Β καὶ μὴ ὑπερτείνει τὸ μέσον, ἀνάγκη τὸ Α τῷ Β ὑπάρχειν. δέδεικται γὰρ πρότερον ὅτι ἂν δύο ἄττα τῷ αὐτῷ ὑπάρχῃ καὶ πρὸς θάτερον αὐτῶν ἀντιστρέφῃ τὸ ἄκρον, ὅτι τῷ ἀντιστρέφοντι καὶ θάτερον ὑπάρξει τῶν κατηγορουμένων. δεῖ δὲ νοεῖν τὸ Γ τὸ ἐξ ἁπάντων τῶν καθ’ ἕκαστον συγκείμενον· ἡ γὰρ ἐπαγωγὴ διὰ πάντων.

Ἔστι δ’ ὁ τοιοῦτος συλλογισμὸς τῆς πρώτης καὶ ἀμέσου προτάσεως· ὧν μὲν γὰρ ἔστι μέσον, διὰ τοῦ μέσου ὁ συλλογισμός, ὧν δὲ μὴ ἔστι, δι’ ἐπαγωγῆς. καὶ τρόπον τινὰ ἀντίκειται ἡ ἐπαγωγὴ τῷ συλλογισμῷ· ὁ μὲν γὰρ διὰ τοῦ μέσου τὸ ἄκρον τῷ τρίτῳ δείκνυσιν, ἡ δὲ διὰ τοῦ τρίτου τὸ ἄκρον τῷ μέσῳ. φύσει μὲν οὖν πρότερος καὶ γνωριμώτερος ὁ διὰ τοῦ μέσου συλλογισμός, ἡμῖν δ’ ἐναργέστερος ὁ διὰ τῆς ἐπαγωγῆς.

Κεφάλαιο 24

Παράδειγμα δ’ ἐστὶν ὅταν τῷ μέσῳ τὸ ἄκρον ὑπάρχον δειχθῇ διὰ τοῦ ὁμοίου τῷ τρίτῳ. δεῖ δὲ καὶ τὸ μέσον τῷ τρίτῳ καὶ τὸ πρῶτον τῷ ὁμοίῳ γνώριμον εἶναι ὑπάρχον. οἷον ἔστω τὸ Α κακόν, τὸ δὲ Β πρὸς ὁμόρους ἀναιρεῖσθαι [69a] πόλεμον, ἐφ’ ᾧ δὲ Γ τὸ Ἀθηναίους πρὸς Θηβαίους, τὸ δ’ ἐφ’ ᾧ Δ Θηβαίους πρὸς Φωκεῖς. ἐὰν οὖν βουλώμεθα δεῖξαι ὅτι τὸ Θηβαίοις πολεμεῖν κακόν ἐστι, ληπτέον ὅτι τὸ πρὸς τοὺς ὁμόρους πολεμεῖν κακόν. τούτου δὲ πίστις ἐκ τῶν ὁμοίων, οἷον ὅτι Θηβαίοις ὁ πρὸς Φωκεῖς. ἐπεὶ οὖν τὸ πρὸς τοὺς ὁμόρους κακόν, τὸ δὲ πρὸς Θηβαίους πρὸς ὁμόρους ἐστί, φανερὸν ὅτι τὸ πρὸς Θηβαίους πολεμεῖν κακόν. ὅτι μὲν οὖν τὸ Β τῷ Γ καὶ τῷ Δ ὑπάρχει, φανερόν (ἄμφω γάρ ἐστι πρὸς τοὺς ὁμόρους ἀναιρεῖσθαι πόλεμον), καὶ ὅτι τὸ Α τῷ Δ (Θηβαίοις γὰρ οὐ συνήνεγκεν ὁ πρὸς Φωκεῖς πόλεμος)· ὅτι δὲ τὸ Α τῷ Β ὑπάρχει, διὰ τοῦ Δ δειχθήσεται. τὸν αὐτὸν δὲ τρόπον κἂν εἰ διὰ πλειόνων τῶν ὁμοίων ἡ πίστις γένοιτο τοῦ μέσου πρὸς τὸ ἄκρον. φανερὸν οὖν ὅτι τὸ παράδειγμά ἐστιν οὔτε ὡς μέρος πρὸς ὅλον οὔτε ὡς ὅλον πρὸς μέρος, ἀλλ’ ὡς μέρος πρὸς μέρος, ὅταν ἄμφω μὲν ᾖ ὑπὸ ταὐτό, γνώριμον δὲ θάτερον. καὶ διαφέρει τῆς ἐπαγωγῆς, ὅτι ἡ μὲν ἐξ ἁπάντων τῶν ἀτόμων τὸ ἄκρον ἐδείκνυεν ὑπάρχειν τῷ μέσῳ καὶ πρὸς τὸ ἄκρον οὐ συνῆπτε τὸν συλλογισμόν, τὸ δὲ καὶ συνάπτει καὶ οὐκ ἐξ ἁπάντων δείκνυσιν.

Κεφάλαιο 25

Ἀπαγωγὴ δ’ ἐστὶν ὅταν τῷ μὲν μέσῳ τὸ πρῶτον δῆλον ᾖ ὑπάρχον, τῷ δ’ ἐσχάτῳ τὸ μέσον ἄδηλον μέν, ὁμοίως δὲ πιστὸν ἢ μᾶλλον τοῦ συμπεράσματος· ἔτι ἂν ὀλίγα ᾖ τὰ μέσα τοῦ ἐσχάτου καὶ τοῦ μέσου· πάντως γὰρ ἐγγύτερον εἶναι συμβαίνει τῆς ἐπιστήμης. οἷον ἔστω τὸ Α τὸ διδακτόν, ἐφ’ οὗ Β ἐπιστήμη, τὸ Γ δικαιοσύνη. ἡ μὲν οὖν ἐπιστήμη ὅτι διδακτόν, φανερόν· ἡ δ’ ἀρετὴ εἰ ἐπιστήμη, ἄδηλον. εἰ οὖν ὁμοίως ἢ μᾶλλον πιστὸν τὸ Β Γ τοῦ Α Γ, ἀπαγωγή ἐστιν· ἐγγύτερον γὰρ τοῦ ἐπίστασθαι διὰ τὸ προσειληφέναι τὴν Α Β ἐπιστήμην, πρότερον οὐκ ἔχοντας. ἢ πάλιν εἰ ὀλίγα τὰ μέσα τῶν Β Γ· καὶ γὰρ οὕτως ἐγγύτερον τοῦ εἰδέναι. οἷον εἰ τὸ Δ εἴη τετραγωνίζεσθαι, τὸ δ’ ἐφ’ ᾧ Ε εὐθύγραμμον, τὸ δ’ ἐφ’ ᾧ Ζ κύκλος· εἰ τοῦ Ε Ζ ἓν μόνον εἴη μέσον, τὸ μετὰ μηνίσκων ἴσον γίνεσθαι εὐθυγράμμῳ τὸν κύκλον, ἐγγὺς ἂν εἴη τοῦ εἰδέναι. ὅταν δὲ μήτε πιστότερον ᾖ τὸ Β Γ τοῦ Α Γ μήτ’ ὀλίγα τὰ μέσα, οὐ λέγω ἀπαγωγήν. οὐδ’ ὅταν ἄμεσον ᾖ τὸ Β Γ· ἐπιστήμη γὰρ τὸ τοιοῦτον.

Κεφάλαιο 26

Ἔνστασις δ’ ἐστὶ πρότασις προτάσει ἐναντία. διαφέρει δὲ τῆς προτάσεως, ὅτι τὴν μὲν ἔνστασιν ἐνδέχεται εἶναι ἐπὶ μέρους, τὴν δὲ πρότασιν ἢ ὅλως οὐκ ἐνδέχεται ἢ οὐκ ἐν τοῖς [69b] καθόλου συλλογισμοῖς. φέρεται δὲ ἡ ἔνστασις διχῶς καὶ διὰ δύο σχημάτων, διχῶς μὲν ὅτι ἢ καθόλου ἢ ἐν μέρει πᾶσα ἔνστασις, ἐκ δύο δὲ σχημάτων ὅτι ἀντικείμεναι φέρονται τῇ προτάσει, τὰ δ’ ἀντικείμενα ἐν τῷ πρώτῳ καὶ τῷ τρίτῳ σχήματι περαίνονται μόνοις. ὅταν γὰρ ἀξιώσῃ παντὶ ὑπάρχειν, ἐνιστάμεθα ἢ ὅτι οὐδενὶ ἢ ὅτι τινὶ οὐχ ὑπάρχει· τούτων δὲ τὸ μὲν μηδενὶ ἐκ τοῦ πρώτου σχήματος, τὸ δὲ τινὶ μὴ ἐκ τοῦ ἐσχάτου. οἷον ἔστω τὸ Α μίαν εἶναι ἐπιστήμην, ἐφ’ ᾧ τὸ Β ἐναντία. προτείναντος δὴ μίαν εἶναι τῶν ἐναντίων ἐπιστήμην, ἢ ὅτι ὅλως οὐχ ἡ αὐτὴ τῶν ἀντικειμένων ἐνίσταται, τὰ δ’ ἐναντία ἀντικείμενα, ὥστε γίνεται τὸ πρῶτον σχῆμα, ἢ ὅτι τοῦ γνωστοῦ καὶ ἀγνώστου οὐ μία· τοῦτο δὲ τὸ τρίτον· κατὰ γὰρ τοῦ Γ, τοῦ γνωστοῦ καὶ ἀγνώστου, τὸ μὲν ἐναντία εἶναι ἀληθές, τὸ δὲ μίαν αὐτῶν ἐπιστήμην εἶναι ψεῦδος. πάλιν ἐπὶ τῆς στερητικῆς προτάσεως ὡσαύτως. ἀξιοῦντος γὰρ μὴ εἶναι μίαν τῶν ἐναντίων, ἢ ὅτι πάντων τῶν ἀντικειμένων ἢ ὅτι τινῶν ἐναντίων ἡ αὐτὴ λέγομεν, οἷον ὑγιεινοῦ καὶ νοσώδους· τὸ μὲν οὖν πάντων ἐκ τοῦ πρώτου, τὸ δὲ τινῶν ἐκ τοῦ τρίτου σχήματος.

Ἁπλῶς γὰρ ἐν πᾶσι καθόλου μὲν ἐνιστάμενον ἀνάγκη πρὸς τὸ καθόλου τῶν προτεινομένων τὴν ἀντίφασιν εἰπεῖν, οἷον εἰ μὴ τὴν αὐτὴν ἀξιοῖ τῶν ἐναντίων, πάντων εἰπόντα τῶν ἀντικειμένων μίαν. οὕτω δ’ ἀνάγκη τὸ πρῶτον εἶναι σχῆμα· μέσον γὰρ γίνεται τὸ καθόλου πρὸς τὸ ἐξ ἀρχῆς. ἐν μέρει δέ, πρὸς ὅ ἐστι καθόλου καθ’ οὗ λέγεται ἡ πρότασις, οἷον γνωστοῦ καὶ ἀγνώστου μὴ τὴν αὐτήν· τὰ γὰρ ἐναντία καθόλου πρὸς ταῦτα. καὶ γίνεται τὸ τρίτον σχῆμα· μέσον γὰρ τὸ ἐν μέρει λαμβανόμενον, οἷον τὸ γνωστὸν καὶ τὸ ἄγνωστον. ἐξ ὧν γὰρ ἔστι συλλογίσασθαι τοὐναντίον, ἐκ τούτων καὶ τὰς ἐνστάσεις ἐπιχειροῦμεν λέγειν. διὸ καὶ ἐκ μόνων τούτων τῶν σχημάτων φέρομεν· ἐν μόνοις γὰρ οἱ ἀντικείμενοι συλλογισμοί· διὰ γὰρ τοῦ μέσου οὐκ ἦν καταφατικῶς. ἔτι δὲ κἂν λόγου δέοιτο πλείονος ἡ διὰ τοῦ μέσου σχήματος, οἷον εἰ μὴ δοίη τὸ Α τῷ Β ὑπάρχειν διὰ τὸ μὴ ἀκολουθεῖν αὐτῷ τὸ Γ. τοῦτο γὰρ δι’ ἄλλων προτάσεων δῆλον· οὐ δεῖ δὲ εἰς ἄλλα ἐκτρέπεσθαι τὴν ἔνστασιν, ἀλλ’ εὐθὺς φανερὰν ἔχειν τὴν ἑτέραν πρότασιν. [διὸ καὶ τὸ σημεῖον ἐκ μόνου τούτου τοῦ σχήματος οὐκ ἔστιν.]

Ἐπισκεπτέον δὲ καὶ περὶ τῶν ἄλλων ἐνστάσεων, οἷον περὶ τῶν ἐκ τοῦ ἐναντίου καὶ τοῦ ὁμοίου καὶ τοῦ κατὰ δόξαν, καὶ [70a] εἰ τὴν ἐν μέρει ἐκ τοῦ πρώτου ἢ τὴν στερητικὴν ἐκ τοῦ μέσου δυνατὸν λαβεῖν.

Κεφάλαιο 27

<Ἐνθύμημα δὲ ἐστὶ συλλογισμὸς ἐξ εἰκότων ἢ σημείων,> εἰκὸς δὲ καὶ σημεῖον οὐ ταὐτόν ἐστιν, ἀλλὰ τὸ μὲν εἰκός ἐστι πρότασις (3) ἔνδοξος· ὃ γὰρ ὡς ἐπὶ τὸ πολὺ ἴσασιν οὕτω γινόμενον ἢ μὴ γινόμενον ἢ ὂν ἢ μὴ ὄν, τοῦτ’ ἐστὶν εἰκός, οἷον τὸ μισεῖν τοὺς φθονοῦντας ἢ τὸ φιλεῖν τοὺς ἐρωμένους. σημεῖον δὲ βούλεται εἶναι πρότασις ἀποδεικτικὴ ἢ ἀναγκαία ἢ ἔνδοξος· οὗ γὰρ ὄντος ἔστιν ἢ οὗ γενομένου πρότερον ἢ ὕστερον γέγονε τὸ πρᾶγμα, τοῦτο σημεῖόν ἐστι τοῦ γεγονέναι ἢ εἶναι. [ἐνθύμημα . . . σημείων] λαμβάνεται δὲ τὸ σημεῖον τριχῶς, ὁσαχῶς (11) καὶ τὸ μέσον ἐν τοῖς σχήμασιν· ἢ γὰρ ὡς ἐν τῷ πρώτῳ ἢ ὡς ἐν τῷ μέσῳ ἢ ὡς ἐν τῷ τρίτῳ, οἷον τὸ μὲν δεῖξαι κύουσαν διὰ τὸ γάλα ἔχειν ἐκ τοῦ πρώτου σχήματος· μέσον γὰρ τὸ γάλα ἔχειν. ἐφ’ ᾧ τὸ Α κύειν, τὸ Β γάλα ἔχειν, γυνὴ ἐφ’ ᾧ Γ. τὸ δ’ ὅτι οἱ σοφοὶ σπουδαῖοι, Πιττακὸς γὰρ σπουδαῖος, διὰ τοῦ ἐσχάτου. ἐφ’ ᾧ Α τὸ σπουδαῖον, ἐφ’ ᾧ Β οἱ σοφοί, ἐφ’ ᾧ Γ Πιττακός. ἀληθὲς δὴ καὶ τὸ Α καὶ τὸ Β τοῦ Γ κατηγορῆσαι· πλὴν τὸ μὲν οὐ λέγουσι διὰ τὸ εἰδέναι, τὸ δὲ λαμβάνουσιν. τὸ δὲ κύειν, ὅτι ὠχρά, διὰ τοῦ μέσου σχήματος βούλεται εἶναι· ἐπεὶ γὰρ ἕπεται ταῖς κυούσαις τὸ ὠχρόν, ἀκολουθεῖ δὲ καὶ ταύτῃ, δεδεῖχθαι οἴονται ὅτι κύει. τὸ ὠχρὸν ἐφ’ οὗ τὸ Α, τὸ κύειν ἐφ’ οὗ Β, γυνὴ ἐφ’ οὗ Γ.

Ἐὰν μὲν οὖν ἡ μία λεχθῇ πρότασις, σημεῖον γίνεται μόνον, ἐὰν δὲ καὶ ἡ ἑτέρα προσληφθῇ, συλλογισμός, οἷον ὅτι Πιττακὸς ἐλευθέριος· οἱ γὰρ φιλότιμοι ἐλευθέριοι, Πιττακὸς δὲ φιλότιμος. ἢ πάλιν ὅτι οἱ σοφοὶ ἀγαθοί· Πιττακὸς γὰρ ἀγαθός, ἀλλὰ καὶ σοφός. οὕτω μὲν οὖν γίνονται συλλογισμοί, πλὴν ὁ μὲν διὰ τοῦ πρώτου σχήματος ἄλυτος, ἂν ἀληθὴς ᾖ (καθόλου γάρ ἐστιν), ὁ δὲ διὰ τοῦ ἐσχάτου λύσιμος, κἂν ἀληθὲς ᾖ τὸ συμπέρασμα, διὰ τὸ μὴ εἶναι καθόλου μηδὲ πρὸς τὸ πρᾶγμα τὸν συλλογισμόν· οὐ γὰρ εἰ Πιττακὸς σπουδαῖος, διὰ τοῦτο καὶ τοὺς ἄλλους ἀνάγκη σοφούς. ὁ δὲ διὰ τοῦ μέσου σχήματος ἀεὶ καὶ πάντως λύσιμος· οὐδέποτε γὰρ γίνεται συλλογισμὸς οὕτως ἐχόντων τῶν ὅρων· οὐ γὰρ εἰ ἡ κύουσα ὠχρά, ὠχρὰ δὲ καὶ ἥδε, κύειν ἀνάγκη ταύτην. ἀληθὲς μὲν οὖν ἐν ἅπασιν ὑπάρξει τοῖς σημείοις, διαφορὰς δ’ ἔχουσι τὰς εἰρημένας. [70b]

Ἢ δὴ οὕτω διαιρετέον τὸ σημεῖον, τούτων δὲ τὸ μέσον τεκμήριον ληπτέον (τὸ γὰρ τεκμήριον τὸ εἰδέναι ποιοῦν φασὶν εἶναι, τοιοῦτο δὲ μάλιστα τὸ μέσον), ἢ τὰ μὲν ἐκ τῶν ἄκρων σημεῖον λεκτέον, τὰ δ’ ἐκ τοῦ μέσου τεκμήριον· ἐνδοξότατον γὰρ καὶ μάλιστα ἀληθὲς τὸ διὰ τοῦ πρώτου σχήματος.

Τὸ δὲ φυσιογνωμονεῖν δυνατόν ἐστιν, εἴ τις δίδωσιν ἅμα μεταβάλλειν τὸ σῶμα καὶ τὴν ψυχὴν ὅσα φυσικά ἐστι παθήματα· μαθὼν γὰρ ἴσως μουσικὴν μεταβέβληκέ τι τὴν ψυχήν, ἀλλ’ οὐ τῶν φύσει ἡμῖν ἐστὶ τοῦτο τὸ πάθος, ἀλλ’ οἷον ὀργαὶ καὶ ἐπιθυμίαι τῶν φύσει κινήσεων. εἰ δὴ τοῦτό τε δοθείη καὶ ἓν ἑνὸς σημεῖον εἶναι, καὶ δυναίμεθα λαμβάνειν τὸ ἴδιον ἑκάστου γένους πάθος καὶ σημεῖον, δυνησόμεθα φυσιογνωμονεῖν. εἰ γάρ ἐστιν ἰδίᾳ τινὶ γένει ὑπάρχον ἀτόμῳ πάθος, οἷον τοῖς λέουσιν ἀνδρεία, ἀνάγκη καὶ σημεῖον εἶναί τι· συμπάσχειν γὰρ ἀλλήλοις ὑπόκειται. καὶ ἔστω τοῦτο τὸ μεγάλα τὰ ἀκρωτήρια ἔχειν· ὃ καὶ ἄλλοις ὑπάρχειν γένεσι μὴ ὅλοις ἐνδέχεται. τὸ γὰρ σημεῖον οὕτως ἴδιόν ἐστιν, ὅτι ὅλου γένους ἴδιόν ἐστι [πάθος], καὶ οὐ μόνου ἴδιον, ὥσπερ εἰώθαμεν λέγειν. ὑπάρξει δὴ καὶ ἐν ἄλλῳ γένει τοῦτο, καὶ ἔσται ἀνδρεῖος [ὁ] ἄνθρωπος καὶ ἄλλο τι ζῷον. ἕξει ἄρα τὸ σημεῖον· ἓν γὰρ ἑνὸς ἦν. εἰ τοίνυν ταῦτ’ ἐστί, καὶ δυνησόμεθα τοιαῦτα σημεῖα συλλέξαι ἐπὶ τούτων τῶν ζῴων ἃ μόνον ἓν πάθος ἔχει τι ἴδιον, ἕκαστον δ’ ἔχει σημεῖον, ἐπείπερ ἓν ἔχειν ἀνάγκη, δυνησόμεθα φυσιογνωμονεῖν. εἰ δὲ δύο ἔχει ἴδια ὅλον τὸ γένος, οἷον ὁ λέων ἀνδρεῖον καὶ μεταδοτικόν, πῶς γνωσόμεθα πότερον ποτέρου σημεῖον τῶν ἰδίᾳ ἀκολουθούντων σημείων; ἢ εἰ ἄλλῳ τινὶ μὴ ὅλῳ ἄμφω, καὶ ἐν οἷς μὴ ὅλοις ἑκάτερον, ὅταν τὸ μὲν ἔχῃ τὸ δὲ μή· εἰ γὰρ ἀνδρεῖος μὲν ἐλευθέριος δὲ μή, ἔχει δὲ τῶν δύο τοδί, δῆλον ὅτι καὶ ἐπὶ τοῦ λέοντος τοῦτο σημεῖον τῆς ἀνδρείας.

Ἔστι δὴ τὸ φυσιογνωμονεῖν τῷ ἐν τῷ πρώτῳ σχήματι τὸ μέσον τῷ μὲν πρώτῳ ἄκρῳ ἀντιστρέφειν, τοῦ δὲ τρίτου ὑπερτείνειν καὶ μὴ ἀντιστρέφειν, οἷον ἀνδρεία τὸ Α, τὰ ἀκρωτήρια μεγάλα ἐφ’ οὗ Β, τὸ δὲ Γ λέων. ᾧ δὴ τὸ Γ, τὸ Β παντί, ἀλλὰ καὶ ἄλλοις. ᾧ δὲ τὸ Β, τὸ Α παντὶ καὶ οὐ πλείοσιν, ἀλλ’ ἀντιστρέφει· εἰ δὲ μή, οὐκ ἔσται ἓν ἑνὸς σημεῖον.

Κεφάλαιο 1

(71a.) Πᾶσα διδασκαλία καὶ πᾶσα μάθησις διανοητικὴ ἐκ προϋπαρχούσης γίνεται γνώσεως. φανερὸν δὲ τοῦτο θεωροῦσιν ἐπὶ πασῶν· αἵ τε γὰρ μαθηματικαὶ τῶν ἐπιστημῶν διὰ τούτου τοῦ τρόπου παραγίνονται καὶ τῶν ἄλλων ἑκάστη τεχνῶν. ὁμοίως δὲ καὶ περὶ τοὺς λόγους οἵ τε διὰ συλλογισμῶν καὶ οἱ δι’ ἐπαγωγῆς· ἀμφότεροι γὰρ διὰ προγινωσκομένων ποιοῦνται τὴν διδασκαλίαν, οἱ μὲν λαμβάνοντες ὡς παρὰ ξυνιέντων, οἱ δὲ δεικνύντες τὸ καθόλου διὰ τοῦ δῆλον εἶναι τὸ καθ’ ἕκαστον. ὡς δ’ αὔτως καὶ οἱ ῥητορικοὶ συμπείθουσιν· ἢ γὰρ διὰ παραδειγμάτων, ὅ ἐστιν ἐπαγωγή, ἢ δι’ ἐνθυμημάτων, ὅπερ ἐστὶ συλλογισμός. διχῶς δ’ ἀναγκαῖον προγινώσκειν· τὰ μὲν γάρ, ὅτι ἔστι, προϋπολαμβάνειν ἀναγκαῖον, τὰ δέ, τί τὸ λεγόμενόν ἐστι, ξυνιέναι δεῖ, τὰ δ’ ἄμφω, οἷον ὅτι μὲν ἅπαν ἢ φῆσαι ἢ ἀποφῆσαι ἀληθές, ὅτι ἔστι, τὸ δὲ τρίγωνον, ὅτι τοδὶ σημαίνει, τὴν δὲ μονάδα ἄμφω, καὶ τί σημαίνει καὶ ὅτι ἔστιν· οὐ γὰρ ὁμοίως τούτων ἕκαστον δῆλον ἡμῖν.

Ἔστι δὲ γνωρίζειν τὰ μὲν πρότερον γνωρίσαντα, τῶν δὲ καὶ ἅμα λαμβάνοντα τὴν γνῶσιν, οἷον ὅσα τυγχάνει ὄντα ὑπὸ τὸ καθόλου οὗ ἔχει τὴν γνῶσιν. ὅτι μὲν γὰρ πᾶν τρίγωνον ἔχει δυσὶν ὀρθαῖς ἴσας, προῄδει· ὅτι δὲ τόδε τὸ ἐν τῷ ἡμικυκλίῳ τρίγωνόν ἐστιν, ἅμα ἐπαγόμενος ἐγνώρισεν. (ἐνίων γὰρ τοῦτον τὸν τρόπον ἡ μάθησίς ἐστι, καὶ οὐ διὰ τοῦ μέσου τὸ ἔσχατον γνωρίζεται, ὅσα ἤδη τῶν καθ’ ἕκαστα τυγχάνει ὄντα καὶ μὴ καθ’ ὑποκειμένου τινός.) πρὶν δ’ ἐπαχθῆναι ἢ λαβεῖν συλλογισμὸν τρόπον μέν τινα ἴσως φατέον ἐπίστασθαι, τρόπον δ’ ἄλλον οὔ. ὃ γὰρ μὴ ᾔδει εἰ ἔστιν ἁπλῶς, τοῦτο πῶς ᾔδει ὅτι δύο ὀρθὰς ἔχει ἁπλῶς; ἀλλὰ δῆλον ὡς ὡδὶ μὲν ἐπίσταται, ὅτι καθόλου ἐπίσταται, ἁπλῶς δ’ οὐκ ἐπίσταται. εἰ δὲ μή, τὸ ἐν τῷ Μένωνι ἀπόρημα συμβήσεται· ἢ γὰρ οὐδὲν μαθήσεται ἢ ἃ οἶδεν. οὐ γὰρ δή, ὥς γέ τινες ἐγχειροῦσι λύειν, λεκτέον. ἆρ’ οἶδας ἅπασαν δυάδα ὅτι ἀρτία ἢ οὔ; φήσαντος δὲ προήνεγκάν τινα δυάδα ἣν οὐκ ᾤετ’ εἶναι, ὥστ’ οὐδ’ ἀρτίαν. λύουσι γὰρ οὐ φάσκοντες εἰδέναι πᾶσαν δυάδα ἀρτίαν οὖσαν, ἀλλ’ ἣν ἴσασιν ὅτι δυάς. καίτοι (71b.) ἴσασι μὲν οὗπερ τὴν ἀπόδειξιν ἔχουσι καὶ οὗ ἔλαβον, ἔλαβον δ’ οὐχὶ παντὸς οὗ ἂν εἰδῶσιν ὅτι τρίγωνον ἢ ὅτι ἀριθμός, ἀλλ’ ἁπλῶς κατὰ παντὸς ἀριθμοῦ καὶ τριγώνου· οὐδεμία γὰρ πρότασις λαμβάνεται τοιαύτη, ὅτι ὃν σὺ οἶδας ἀριθμὸν ἢ ὃ σὺ οἶδας εὐθύγραμμον, ἀλλὰ κατὰ παντός. ἀλλ’ οὐδέν (οἶμαι) κωλύει, ὃ μανθάνει, ἔστιν ὡς ἐπίστασθαι, ἔστι δ’ ὡς ἀγνοεῖν· ἄτοπον γὰρ οὐκ εἰ οἶδέ πως ὃ μανθάνει, ἀλλ’ εἰ ὡδί, οἷον ᾗ μανθάνει καὶ ὥς.

Κεφάλαιο 2

Ἐπίστασθαι δὲ οἰόμεθ’ ἕκαστον ἁπλῶς, ἀλλὰ μὴ τὸν σοφιστικὸν τρόπον τὸν κατὰ συμβεβηκός, ὅταν τήν τ’ αἰτίαν οἰώμεθα γινώσκειν δι’ ἣν τὸ πρᾶγμά ἐστιν, ὅτι ἐκείνου αἰτία ἐστί, καὶ μὴ ἐνδέχεσθαι τοῦτ’ ἄλλως ἔχειν. δῆλον τοίνυν ὅτι τοιοῦτόν τι τὸ ἐπίστασθαί ἐστι· καὶ γὰρ οἱ μὴ ἐπιστάμενοι καὶ οἱ ἐπιστάμενοι οἱ μὲν οἴονται αὐτοὶ οὕτως ἔχειν, οἱ δ’ ἐπιστάμενοι καὶ ἔχουσιν, ὥστε οὗ ἁπλῶς ἔστιν ἐπιστήμη, τοῦτ’ ἀδύνατον ἄλλως ἔχειν.

Εἰ μὲν οὖν καὶ ἕτερος ἔστι τοῦ ἐπίστασθαι τρόπος, ὕστερον ἐροῦμεν, φαμὲν δὲ καὶ δι’ ἀποδείξεως εἰδέναι. ἀπόδειξιν δὲ λέγω συλλογισμὸν ἐπιστημονικόν· ἐπιστημονικὸν δὲ λέγω καθ’ ὃν τῷ ἔχειν αὐτὸν ἐπιστάμεθα. εἰ τοίνυν ἐστὶ τὸ ἐπίστασθαι οἷον ἔθεμεν, ἀνάγκη καὶ τὴν ἀποδεικτικὴν ἐπιστήμην ἐξ ἀληθῶν τ’ εἶναι καὶ πρώτων καὶ ἀμέσων καὶ γνωριμωτέρων καὶ προτέρων καὶ αἰτίων τοῦ συμπεράσματος· οὕτω γὰρ ἔσονται καὶ αἱ ἀρχαὶ οἰκεῖαι τοῦ δεικνυμένου. συλλογισμὸς μὲν γὰρ ἔσται καὶ ἄνευ τούτων, ἀπόδειξις δ’ οὐκ ἔσται· οὐ γὰρ ποιήσει ἐπιστήμην. ἀληθῆ μὲν οὖν δεῖ εἶναι, ὅτι οὐκ ἔστι τὸ μὴ ὂν ἐπίστασθαι, οἷον ὅτι ἡ διάμετρος σύμμετρος. ἐκ πρώτων δ’ ἀναποδείκτων, ὅτι οὐκ ἐπιστήσεται μὴ ἔχων ἀπόδειξιν αὐτῶν· τὸ γὰρ ἐπίστασθαι ὧν ἀπόδειξις ἔστι μὴ κατὰ συμβεβηκός, τὸ ἔχειν ἀπόδειξίν ἐστιν. αἴτιά τε καὶ γνωριμώτερα δεῖ εἶναι καὶ πρότερα, αἴτια μὲν ὅτι τότε ἐπιστάμεθα ὅταν τὴν αἰτίαν εἰδῶμεν, καὶ πρότερα, εἴπερ αἴτια, καὶ προγινωσκόμενα οὐ μόνον τὸν ἕτερον τρόπον τῷ ξυνιέναι, ἀλλὰ καὶ τῷ εἰδέναι ὅτι ἔστιν. πρότερα δ’ ἐστὶ καὶ γνωριμώτερα διχῶς· οὐ γὰρ ταὐτὸν πρότερον τῇ φύσει καὶ πρὸς ἡμᾶς πρότερον, (72a.) οὐδὲ γνωριμώτερον καὶ ἡμῖν γνωριμώτερον. λέγω δὲ πρὸς ἡμᾶς μὲν πρότερα καὶ γνωριμώτερα τὰ ἐγγύτερον τῆς αἰσθήσεως, ἁπλῶς δὲ πρότερα καὶ γνωριμώτερα τὰ πορρώτερον. ἔστι δὲ πορρωτάτω μὲν τὰ καθόλου μάλιστα, ἐγγυτάτω δὲ τὰ καθ’ ἕκαστα· καὶ ἀντίκειται ταῦτ’ ἀλλήλοις. ἐκ πρώτων δ’ ἐστὶ τὸ ἐξ ἀρχῶν οἰκείων· ταὐτὸ γὰρ λέγω πρῶτον καὶ ἀρχήν. ἀρχὴ δ’ ἐστὶν ἀποδείξεως πρότασις ἄμεσος, ἄμεσος δὲ ἧς μὴ ἔστιν ἄλλη προτέρα. πρότασις δ’ ἐστὶν ἀποφάνσεως τὸ ἕτερον μόριον, ἓν καθ’ ἑνός, διαλεκτικὴ μὲν ἡ ὁμοίως λαμβάνουσα ὁποτερονοῦν, ἀποδεικτικὴ δὲ ἡ ὡρισμένως θάτερον, ὅτι ἀληθές. ἀπόφανσις δὲ ἀντιφάσεως ὁποτερονοῦν μόριον, ἀντίφασις δὲ ἀντίθεσις ἧς οὐκ ἔστι μεταξὺ καθ’ αὑτήν, μόριον δ’ ἀντιφάσεως τὸ μὲν τὶ κατὰ τινὸς κατάφασις, τὸ δὲ τὶ ἀπὸ τινὸς ἀπόφασις.

Ἀμέσου δ’ ἀρχῆς συλλογιστικῆς θέσιν μὲν λέγω ἣν μὴ ἔστι δεῖξαι, μηδ’ ἀνάγκη ἔχειν τὸν μαθησόμενόν τι· ἣν δ’ ἀνάγκη ἔχειν τὸν ὁτιοῦν μαθησόμενον, ἀξίωμα· ἔστι γὰρ ἔνια τοιαῦτα· τοῦτο γὰρ μάλιστ’ ἐπὶ τοῖς τοιούτοις εἰώθαμεν ὄνομα λέγειν. θέσεως δ’ ἡ μὲν ὁποτερονοῦν τῶν μορίων τῆς ἀντιφάσεως λαμβάνουσα, οἷον λέγω τὸ εἶναί τι ἢ τὸ μὴ εἶναί τι, ὑπόθεσις, ἡ δ’ ἄνευ τούτου ὁρισμός. ὁ γὰρ ὁρισμὸς θέσις μέν ἐστι· τίθεται γὰρ ὁ ἀριθμητικὸς μονάδα τὸ ἀδιαίρετον εἶναι κατὰ τὸ ποσόν· ὑπόθεσις δ’ οὐκ ἔστι· τὸ γὰρ τί ἐστι μονὰς καὶ τὸ εἶναι μονάδα οὐ ταὐτόν.

Ἐπεὶ δὲ δεῖ πιστεύειν τε καὶ εἰδέναι τὸ πρᾶγμα τῷ τοιοῦτον ἔχειν συλλογισμὸν ὃν καλοῦμεν ἀπόδειξιν, ἔστι δ’ οὗτος τῷ ταδὶ εἶναι ἐξ ὧν ὁ συλλογισμός, ἀνάγκη μὴ μόνον προγινώσκειν τὰ πρῶτα, ἢ πάντα ἢ ἔνια, ἀλλὰ καὶ μᾶλλον· αἰεὶ γὰρ δι’ ὃ ὑπάρχει ἕκαστον, ἐκείνῳ μᾶλλον ὑπάρχει, οἷον δι’ ὃ φιλοῦμεν, ἐκεῖνο φίλον μᾶλλον. ὥστ’ εἴπερ ἴσμεν διὰ τὰ πρῶτα καὶ πιστεύομεν, κἀκεῖνα ἴσμεν τε καὶ πιστεύομεν μᾶλλον, ὅτι δι’ ἐκεῖνα καὶ τὰ ὕστερα. οὐχ οἷόν τε δὲ πιστεύειν μᾶλλον ὧν οἶδεν ἃ μὴ τυγχάνει μήτε εἰδὼς μήτε βέλτιον διακείμενος ἢ εἰ ἐτύγχανεν εἰδώς. συμβήσεταιδὲ τοῦτο, εἰ μή τις προγνώσεται τῶν δι’ ἀπόδειξιν πιστευόντων· μᾶλλον γὰρ ἀνάγκη πιστεύειν ταῖς ἀρχαῖς ἢ πάσαις ἢ τισὶ τοῦ συμπεράσματος. τὸν δὲ μέλλοντα ἕξειν τὴν ἐπιστήμην τὴν δι’ ἀποδείξεως οὐ μόνον δεῖ τὰς ἀρχὰς μᾶλλον γνωρίζειν καὶ μᾶλλον αὐταῖς πιστεύειν ἢ τῷ δεικνυμένῳ, (72b.) ἀλλὰ μηδ’ ἄλλο αὐτῷ πιστότερον εἶναι μηδὲ γνωριμώτερον τῶν ἀντικειμένων ταῖς ἀρχαῖς ἐξ ὧν ἔσται συλλογισμὸς ὁ τῆς ἐναντίας ἀπάτης, εἴπερ δεῖ τὸν ἐπιστάμενον ἁπλῶς ἀμετάπειστον εἶναι.

Κεφάλαιο 3

Ἐνίοις μὲν οὖν διὰ τὸ δεῖν τὰ πρῶτα ἐπίστασθαι οὐ δοκεῖ ἐπιστήμη εἶναι, τοῖς δ' εἶναι μέν, πάντων μέντοι ἀπόδειξις εἶναι· ὧν οὐδέτερον οὔτ' ἀληθὲς οὔτ' ἀναγκαῖον. οἱ μὲν γὰρ ὑποθέμενοι μὴ εἶναι ὅλως ἐπίστασθαι, οὗτοι εἰς ἄπειρον ἀξιοῦσιν ἀνάγεσθαι ὡς οὐκ ἂν ἐπισταμένους τὰ ὕστερα διὰ τὰ πρότερα, ὧν μὴ ἔστι πρῶτα, ὀρθῶς λέγοντες· ἀδύνατον γὰρ τὰ ἄπειρα διελθεῖν. εἴ τε ἵσταται καὶ εἰσὶν ἀρχαί, ταύτας ἀγνώστους εἶναι ἀποδείξεώς γε μὴ οὔσης αὐτῶν, ὅπερ φασὶν εἶναι τὸ ἐπίστασθαι μόνον· εἰ δὲ μὴ ἔστι τὰ πρῶτα εἰδέναι, οὐδὲ τὰ ἐκ τούτων εἶναι ἐπίστασθαι ἁπλῶς οὐδὲ κυρίως, ἀλλ' ἐξ ὑποθέσεως, εἰ ἐκεῖνα ἔστιν. οἱ δὲ περὶ μὲν τοῦ ἐπίστασθαι ὁμολογοῦσι· δι' ἀποδείξεως γὰρ εἶναι μόνον· ἀλλὰ πάντων εἶναι ἀπόδειξιν οὐδὲν κωλύειν· ἐνδέχεσθαι γὰρ κύκλῳ γίνεσθαι τὴν ἀπόδειξιν καὶ ἐξ ἀλλήλων.

Ἡμεῖς δέ φαμεν οὔτε πᾶσαν ἐπιστήμην ἀποδεικτικὴν εἶναι, ἀλλὰ τὴν τῶν ἀμέσων ἀναπόδεικτον (καὶ τοῦθ' ὅτι ἀναγκαῖον, φανερόν· εἰ γὰρ ἀνάγκη μὲν ἐπίστασθαι τὰ πρότερα καὶ ἐξ ὧν ἡ ἀπόδειξις, ἵσταται δέ ποτε τὰ ἄμεσα, ταῦτ' ἀναπόδεικτα ἀνάγκη εἶναι)- ταῦτά τ' οὖν οὕτω λέγομεν, καὶ οὐ μόνον ἐπιστήμην ἀλλὰ καὶ ἀρχὴν ἐπιστήμης εἶναί τινά φαμεν, ᾗ τοὺς ὅρους γνωρίζομεν. κύκλῳ τε ὅτι ἀδύνατον ἀποδείκνυσθαι ἁπλῶς, δῆλον, εἴπερ ἐκ προτέρων δεῖ τὴν ἀπόδειξιν εἶναι καὶ γνωριμωτέρων· ἀδύνατον γάρ ἐστι τὰ αὐτὰ τῶν αὐτῶν ἅμα πρότερα καὶ ὕστερα εἶναι, εἰ μὴ τὸν ἕτερον τρόπον, οἷον τὰ μὲν πρὸς ἡμᾶς τὰ δ' ἁπλῶς, ὅνπερ τρόπον ἡ ἐπαγωγὴ ποιεῖ γνώριμον. εἰ δ' οὕτως, οὐκ ἂν εἴη τὸ ἁπλῶς εἰδέναι καλῶς ὡριμένον, ἀλλὰ διττόν· ἢ οὐχ ἁπλῶς ἡ ἑτέρα ἀπόδειξις, γινομένη γ' ἐκ τῶν ἡμῖν γνωριμωτέρων.

συμβαίνει δὲ τοῖς λέγουσι κύκλῳ τὴν ἀπόδειξιν εἶναι οὐ μόνον τὸ νῦν εἰρημένον, ἀλλ' οὐδὲν ἄλλο λέγειν ἢ ὅτι τοῦτ' ἔστιν εἰ τοῦτ' ἔστιν· οὕτω δὲ πάντα ῥᾴδιον δεῖξαι. δῆλον δ' ὅτι τοῦτο συμβαίνει τριῶν ὅρων τεθέντων. τὸ μὲν γὰρ διὰ πολλῶν ἢ δι' ὀλίγων ἀνακάμπτειν φάναι οὐδὲν διαφέρει, δι' ὀλίγων δ' ἢ δυοῖν. ὅταν γὰρ τοῦ Α ὄντος ἐξ ἀνάγκης ᾖ τὸ Β, τούτου δὲ τὸ Γ, τοῦ Α ὄντος ἔσται τὸ Γ. εἰ δὴ τοῦ Α ὄντος ἀνάγκη τὸ Β εἶναι, τούτου δ' (73a.) ὄντος τὸ Α (τοῦτο γὰρ ἦν τὸ κύκλῳ), κείσθω τὸ Α ἐφ' οὗ τὸ Γ. τὸ οὖν τοῦ Β ὄντος τὸ Α εἶναι λέγειν ἐστὶ τὸ Γ εἶναι λέγειν, τοῦτο δ' ὅτι τοῦ Α ὄντος τὸ Γ ἔστι· τὸ δὲ Γ τῷ Α τὸ αὐτό. ὥστε συμβαίνει λέγειν τοὺς κύκλῳ

φάσκοντας εἶναι τὴν ἀπόδειξιν οὐδὲν ἕτερον πλὴν ὅτι τοῦ Α ὄντος τὸ Α ἔστιν. οὕτω δὲ πάντα δεῖξαι ῥᾴδιον.

Οὐ μὴν ἀλλ' οὐδὲ τοῦτο δυνατόν, πλὴν ἐπὶ τούτων ὅσα ἀλλήλοις ἕπεται, ὥσπερ τὰ ἴδια. ἑνὸς μὲν οὖν κειμένου δέδεικται ὅτι οὐδέποτ' ἀνάγκη τι εἶναι ἕτερον (λέγω δ' ἑνός, ὅτι οὔτε ὅρου ἑνὸς οὔτε θέσεως μιᾶς τεθείσης), ἐκ δύο δὲ θέσεων πρώτων καὶ ἐλαχίστων ἐνδέχεται, εἴπερ καὶ συλλογίσασθαι. ἐὰν μὲν οὖν τό τε Α τῷ Β καὶ τῷ Γ ἕπηται, καὶ ταῦτ' ἀλλήλοις καὶ τῷ Α, οὕτω μὲν ἐνδέχεται ἐξ ἀλλήλων δεικνύναι πάντα τὰ αἰτηθέντα ἐν τῷ πρώτῳ σχήματι, ὡς δέδεικται ἐν τοῖς περὶ συλλογισμοῦ. δέδεικται δὲ καὶ ὅτι ἐν τοῖς ἄλλοις σχήμασιν ἢ οὐ γίνεται συλλογισμὸς ἢ οὐ περὶ τῶν ληφθέντων. τὰ δὲ μὴ ἀντικατηγορούμενα οὐδαμῶς ἔστι δεῖξαι κύκλῳ, ὥστ' ἐπειδὴ ὀλίγα τοιαῦτα ἐν ταῖς ἀποδείξεσι, φανερὸν ὅτι κενόν τε καὶ ἀδύνατον τὸ λέγειν ἐξ ἀλλήλων εἶναι τὴν ἀπόδειξιν καὶ διὰ τοῦτο πάντων ἐνδέχεσθαι εἶναι ἀπόδειξιν.

Κεφάλαιο 4

Ἐπεὶ δ' ἀδύνατον ἄλλως ἔχειν οὗ ἔστιν ἐπιστήμη ἁπλῶς, ἀναγκαῖον ἂν εἴη τὸ ἐπιστητὸν τὸ κατὰ τὴν ἀποδεικτικὴν ἐπιστήμην· ἀποδεικτικὴ δ' ἐστὶν ἣν ἔχομεν τῷ ἔχειν ἀπόδειξιν. ἐξ ἀναγκαίων ἄρα συλλογισμός ἐστιν ἡ ἀπόδειξις. ληπτέον ἄρα ἐκ τίνων καὶ ποίων αἱ ἀποδείξεις εἰσίν. πρῶτον δὲ διορίσωμεν τί λέγομεν τὸ κατὰ παντὸς καὶ τί τὸ καθ' αὑτὸ καὶ τί τὸ καθόλου.

Κατὰ παντὸς μὲν οὖν τοῦτο λέγω ὃ ἂν ᾖ μὴ ἐπὶ τινὸς μὲν τινὸς δὲ μή, μηδὲ ποτὲ μὲν ποτὲ δὲ μή, οἷον εἰ κατὰ παντὸς ἀνθρώπου ζῷον, εἰ ἀληθὲς τόνδ' εἰπεῖν ἄνθρωπον, ἀληθὲς καὶ ζῷον, καὶ εἰ νῦν θάτερον, καὶ θάτερον, καὶ εἰ ἐν πάσῃ γραμμῇ στιγμή, ὡσαύτως. σημεῖον δέ· καὶ γὰρ τὰς ἐνστάσεις οὕτω φέρομεν ὡς κατὰ παντὸς ἐρωτώμενοι, ἢ εἰ ἐπί τινι μή, ἢ εἴ ποτε μή. Καθ' αὑτὰ δ' ὅσα ὑπάρχει τε ἐν τῷ τί ἐστιν, οἷον τριγώνῳ γραμμὴ καὶ γραμμῇ στιγμή (γὰρ οὐσία αὐτῶν ἐκ τούτων ἐστί, καὶ ἐν τῷ λόγῳ τῷ λέγοντι τί ἐστιν ἐνυπάρχει), καὶ ὅσοις τῶν ὑπαρχόντων αὐτοῖς αὐτὰ ἐν τῷ λόγῳ ἐνυπάρχουσι τῷ τί ἐστι δηλοῦντι, οἷον τὸ εὐθὺ ὑπάρχει γραμμῇ καὶ τὸ περιφερές, καὶ τὸ περιττὸν καὶ ἄρτιον ἀριθμῷ, καὶ τὸ πρῶτον καὶ σύνθετον, καὶ ἰσόπλερον (73b.) καὶ ἑτερόμηκες· καὶ πᾶσι τούτοις ἐνυπάρχουσιν ἐν τῷ λόγῳ τῷ τί ἐστι λέγοντι ἔνθα μὲν γραμμὴ ἔνθα δ' ἀριθμός. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τὰ τοιαῦθ' ἑκάστοις καθ'αὑτὰ λέγω, ὅσα δὲ μηδετέρως ὑπάρχει, συμβεβηκότα, οἷον τὸ μουσικὸν ἢ λευκὸν τῷ ζῴῳ.

ἔτι ὃ μὴ καθ' ὑποκειμένου λέγεται ἄλλου τινός, οἷον τὸ βαδίζον ἕτερόν τι ὂν βαδίζον ἐστὶ καὶ τὸ λευκὸν, ἡ δ' οὐσία, καὶ ὅσα τόδε τι σημαίνει, οὐχ ἕτερόν τι ὄντα ἐστὶν ὅπερ ἐστίν. τὰ μὲν δὴ μὴ καθ' ὑποκειμένου καθ' αὑτὰ λέγω, τὰ δὲ καθ' ὑποκειμένου συμβεβηκότα. ἔτι δ' ἄλλον τρόπον τὸ μὲν δι' αὑτὸ ὑπάρχον ἑκάστῳ καθ' αὑτό, τὸ δὲ μὴ δι' αὑτὸ συμβεβηκός, οἷον εἰ βαδίζοντος ἤστραψε, συμβεβηκός· οὐ γὰρ διὰ τὸ βαδίζειν ἤστραψεν, ἀλλὰ συνέβη, φαμέν, τοῦτο. εἰ δὲ δι' αὑτό, καθ' αὑτό, οἷον εἴ τι σφαττόμενον ἀπέθανε, καὶ κατὰ τὴν σφαγήν, ὅτι διὰ τὸ σφάττεσθαι, ἀλλ' οὐ συνέβη σφαττόμενον ἀποθανεῖν.

τὰ ἄρα λεγόμενα ἐπὶ τῶν ἁπλῶς ἐπιστητῶν καθ' αὑτὰ οὕτως ὡς ἐνυπάρχειν τοῖς κατηγορουμένοις ἢ ἐνυπάρχεσθαι δι' αὑτά τέ ἐστι καὶ ἐξ ἀνάγκης. οὐ γὰρ ἐνδέχεται μὴ ὑπάρχειν ἢ ἁπλῶς ἢ τὰ ἀντικείμενα, οἷον γραμμῇ τὸ εὐθὺ ἢ τὸ καμπύλον καὶ ἀριθμῷ τὸ περιττὸν ἢ τὸ ἄρτιον. ἔστι γὰρ τὸ ἐναντίον ἢ στέρησις ἢ ἀντίφασις ἐν τῷ αὐτῷ γένει, οἷον ἄρτιον τὸ μὴ περιττὸν ἐν ἀριθμοῖς ᾗ ἕπεται. ὥστ’ εἰ ἀνάγκη φάναι ἢ ἀποφάναι, ἀνάγκη καὶ τὰ καθ’ αὑτὰ ὑπάρχειν.

Τὸ μὲν οὖν κατὰ παντὸς καὶ καθ’ αὑτὸ διωρίσθω τὸν τρόπον τοῦτον· καθόλου δὲ λέγω ὃ ἂν κατὰ παντός τε ὑπάρχῃ καὶ καθ’ αὑτὸ καὶ ᾗ αὐτό. φανερὸν ἄρα ὅτι ὅσα καθόλου, ἐξ ἀνάγκης ὑπάρχει τοῖς πράγμασιν. τὸ καθ’ αὑτὸ δὲ καὶ ᾗ αὐτὸ ταὐτόν, οἷον καθ’ αὑτὴν τῇ γραμμῇ ὑπάρχει στιγμὴ καὶ τὸ εὐθύ (καὶ γὰρ ᾗ γραμμή), καὶ τῷ τριγώνῳ ᾗ τρίγωνον δύο ὀρθαί (καὶ γὰρ καθ’ αὑτὸ τὸ τρίγωνον δύο ὀρθαῖς ἴσον). τὸ καθόλου δὲ ὑπάρχει τότε, ὅταν ἐπὶ τοῦ τυχόντος καὶ πρώτου δεικνύηται. οἷον τὸ δύο ὀρθὰς ἔχειν οὔτε τῷ σχήματί ἐστι καθόλου (καίτοι ἔστι δεῖξαι κατὰ σχήματος ὅτι δύο ὀρθὰς ἔχει, ἀλλ’ οὐ τοῦ τυχόντος σχήματος, οὐδὲ χρῆται τῷ τυχόντι σχήματι δεικνύς· τὸ γὰρ τετράγωνον σχῆμα μέν, οὐκ ἔχει δὲ δύο ὀρθαῖς ἴσας)- τὸ δ’ ἰσοσκελὲς ἔχει μὲν τὸ τυχὸν δύο ὀρθαῖς ἴσας, ἀλλ’ οὐ πρῶτον, ἀλλὰ τὸ τρίγωνον πρότερον. ὃ τοίνυν τὸ τυχὸν πρῶτον δείκνυται δύο ὀρθὰς ἔχον ἢ ὁτιοῦν ἄλλο, τούτῳ πρώτῳ (74a.) ὑπάρχει καθόλου, καὶ ἡ ἀπόδειξις καθ’ αὑτὸ τούτου καθόλου ἐστί, τῶν δ’ ἄλλων τρόπον τινὰ οὐ καθ’ αὑτό, οὐδὲ τοῦ ἰσοσκελοῦς οὐκ ἔστι καθόλου ἀλλ’ ἐπὶ πλέον.

Κεφάλαιο 5

Δεῖ δὲ μὴ λανθάνειν ὅτι πολλάκις συμβαίνει διαμαρτάνειν καὶ μὴ ὑπάρχειν τὸ δεικνύμενον πρῶτον καθόλου, ᾗ δοκεῖ δείκνυσθαι καθόλου πρῶτον. ἀπατώμεθα δὲ ταύτην τὴν ἀπάτην, ὅταν ἢ μηδὲν ᾖ λαβεῖν ἀνώτερον παρὰ τὸ καθ’ ἕκαστον [ἢ τὰ καθ’ ἕκαστα], ἢ ᾖ μέν, ἀλλ’ ἀνώνυμον ᾖ ἐπὶ διαφόροις εἴδει πράγμασιν, ἢ τυγχάνῃ ὂν ὡς ἐν μέρει ὅλον ἐφ’ ᾧ δείκνυται· τοῖς γὰρ ἐν μέρει ὑπάρξει μὲν ἡ ἀπόδειξις, καὶ ἔσται κατὰ παντός, ἀλλ’ ὅμως οὐκ ἔσται τούτου πρώτου καθόλου ἡ ἀπόδειξις. λέγω δὲ τούτου πρώτου, ᾗ τοῦτο, ἀπόδειξιν, ὅταν ᾖ πρώτου καθόλου. εἰ οὖν τις δείξειεν ὅτι αἱ ὀρθαὶ οὐ συμπίπτουσι, δόξειεν ἂν τούτου εἶναι ἡ ἀπόδειξις διὰ τὸ ἐπὶ πασῶν εἶναι τῶν ὀρθῶν. οὐκ ἔστι δέ, εἴπερ μὴ ὅτι ὡδὶ ἴσαι γίνεται τοῦτο, ἀλλ’ ᾗ ὁπωσοῦν ἴσαι. καὶ εἰ τρίγωνον μὴ ἦν ἄλλο ἢ ἰσοσκελές, ᾗ ἰσοσκελὲς ἂν ἐδόκει ὑπάρχειν. καὶ τὸ ἀνάλογον ὅτι καὶ ἐναλλάξ, ᾗ ἀριθμοὶ καὶ ᾗ γραμμαὶ καὶ ᾗ στερεὰ καὶ ᾗ χρόνοι, ὥσπερ ἐδείκνυτό ποτε χωρίς, ἐνδεχόμενόν γε κατὰ πάντων μιᾷ ἀποδείξει δειχθῆναι· ἀλλὰ διὰ τὸ μὴ εἶναι ὠνομασμένον τι ταῦτα πάντα ἕν, ἀριθμοί μήκη χρόνοι στερεά, καὶ εἴδει διαφέρειν ἀλλήλων, χωρὶς ἐλαμβάνετο. νῦν δὲ καθόλου δείκνυται· οὐ γὰρ ᾗ γραμμαὶἢ ᾗ ἀριθμοὶ ὑπῆρχεν, ἀλλ’ ᾗ τοδί, ὃ καθόλου ὑποτίθενται ὑπάρχειν. διὰ τοῦτο οὐδ’ ἄν τις δείξῃ καθ’ ἕκαστον τὸ τρίγωνον ἀποδείξει ἢ μιᾷ ἢ ἑτέρᾳ ὅτι δύο ὀρθὰς ἔχει ἕκαστον, τὸ ἰσόπλευρον χωρὶς καὶ τὸ σκαληνὲς καὶ τὸ ἰσοσκελές, οὔπω οἶδε τὸ τρίγωνον ὅτι δύο ὀρθαῖς, εἰ μὴ τὸν σοφιστικὸν τρόπον, οὐδὲ καθ’ ὅλου τριγώνου, οὐδ’ εἰ μηδὲν ἔστι παρὰ ταῦτα τρίγωνον ἕτερον. οὐ γὰρ ᾗ τρίγωνον οἶδεν, οὐδὲ πᾶν τρίγωνον, ἀλλ’ ἢ κατ’ ἀριθμόν· κατ’ εἶδος δ’ οὐ πᾶν, καὶ εἰ μηδὲν ἔστιν ὃ οὐκ οἶδεν.

Πότ’ οὖν οὐκ οἶδε καθόλου, καὶ πότ’ οἶδεν ἁπλῶς; δῆλον δὴ ὅτι εἰ ταὐτὸν ἦν τριγώνῳ εἶναι καὶ ἰσοπλεύρῳ ἢ ἑκάστῳ ἢ πᾶσιν. εἰ δὲ μὴ ταὐτὸν ἀλλ’ ἕτερον, ὑπάρχει δ’ ᾗ τρίγωνον, οὐκ οἶδεν. πότερον δ’ ᾗ τρίγωνον ἢ ᾗ ἰσοσκελὲς ὑπάρχει; καὶ πότε κατὰ τοῦθ’ ὑπάρχει πρῶτον; καὶ καθόλου τίνος ἡ ἀπόδειξις; δῆλον ὅτι ὅταν ἀφαιρουμένων ὑπάρχῃ πρώτῳ. οἷον τῷ ἰσοσκελεῖ χαλκῷ τριγώνῳ ὑπάρξουσι δύο ὀρθαί, ἀλλὰ καὶ τοῦ χαλκοῦν εἶναι ἀφαιρεθέντος (74b.) καὶ τοῦ ἰσοσκελές. ἀλλ’ οὐ τοῦ σχήματος ἢ πέρατος. ἀλλ’ οὐ πρώτων. τίνος οὖν πρώτου; εἰ δὴ τριγώνου, κατὰ τοῦτο ὑπάρχει καὶ τοῖς ἄλλοις, καὶ τούτου καθόλου ἐστὶν ἡ ἀπόδειξις. Εἰ οὖν ἐστιν ἡ ἀποδεικτικὴ ἐπιστήμη ἐξ ἀναγκαίων ἀρχῶν (ὃ γὰρ ἐπίσταται, οὐ δυνατὸν ἄλλως ἔχειν), τὰ δὲ καθ’ αὐτὰ ὑπάρχοντα ἀναγκαῖα τοῖς πράγμασιν (τὰ μὲν γὰρ ἐν τῷ τί ἐστιν ὑπάρχει· τοῖς δ’ αὐτὰ ἐν τῷ τί ἐστιν ὑπάρχει κατηγορουμένοις αὐτῶν, ὧν θάτερον τῶν ἀντικειμένων ἀνάγκη ὑπάρχειν), φανερὸν ὅτι ἐκ τοιούτων τινῶν ἂν εἴη ὁ ἀποδεικτικὸς συλλογισμός· ἅπαν γὰρ ἢ οὕτως ὑπάρχει ἢ κατὰ συμβεβηκός, τὰ δὲ συμβεβηκότα οὐκ ἀναγκαῖα.

Κεφάλαιο 6

Ἠ δὴ οὕτω λεκτέον, ἢ ἀρχὴν θεμένοις ὅτι ἡ ἀπόδειξις ἀναγκαίων ἐστί, καὶ εἰ ἀποδέδεικται, οὐχ οἷόν τ' ἄλλως ἔχειν· ἐξ ἀναγκαίων ἄρα δεῖ εἶναι τὸν συλλογισμόν. ἐξ ἀληθῶν μὲν γὰρ ἔστι καὶ μὴ ἀποδεικνύντα συλλογίσασθαι, ἐξ ἀναγκαίων δ' οὐκ ἔστιν ἀλλ' ἢ ἀποδεικνύντα· τοῦτο γὰρ ἤδη ἀποδείξεώς ἐστιν. σημεῖον δ' ὅτι ἡ ἀπόδειξις ἐξ ἀναγκαίων, ὅτι καὶ τὰς ἐνστάσεις οὕτω φέρομεν πρὸς τοὺς οἰομένους ἀποδεικνύναι, ὅτι οὐκ ἀνάγκη, ἂν οἰώμεθα ἢ ὅλως ἐνδέχεσθαι ἄλλως ἢ ἕνεκά γε τοῦ λόγου. δῆλον δ' ἐκ τούτων καὶ ὅτι εὐήθεις οἱ λαμβάνειν οἰόμενοι καλῶς τὰς ἀρχάς, ἐὰν ἔνδοξος ᾖ ἡ πρότασις καὶ ἀληθής, οἷον οἱ σοφισταὶ ὅτι τὸ ἐπίστασθαι τὸ ἐπιστήμην ἔχειν. οὐ γὰρ τὸ ἔνδοξον ἡμῖν ἀρχή ἐστιν, ἀλλὰ τὸ πρῶτον τοῦ γένους περὶ ὃ δείκνυται· καὶ τἀληθὲς οὐ πᾶν οἰκεῖον. ὅτι δ' ἐξ ἀναγκαίων εἶναι δεῖ τὸν συλλογισμόν, φανερὸν καὶ ἐκ τῶνδε. εἰ γὰρ ὁ μὴ ἔχων λόγον τοῦ διὰ τί οὔσης ἀποδείξεως οὐκ ἐπιστήμων, εἴη δ' ἂν ὥστε τὸ Α κατὰ τοῦ Γ ἐξ ἀνάγκης ὑπάρχειν, τὸ δὲ Β τὸ μέσον, δι' οὗ ἀπεδείχθη, μὴ ἐξ ἀνάγκης, οὐκ οἶδε διότι. οὐ γάρ ἐστι τοῦτο διὰ τὸ μέσον· τὸ μὲν γὰρ ἐνδέχεται μὴ εἶναι, τὸ δὲ συμπέρασμα ἀναγκαῖον. ἔτι εἴ τις μὴ οἶδε νῦν ἔχων τὸν λόγον καὶ σῳζόμενος, σῳζομένου τοῦ πράγματος, μὴ ἐπιλελησμένος, οὐδὲ πρότερον ᾔδει. φθαρείη δ' ἂν τὸ μέσον, εἰ μὴ ἀναγκαῖον, ὥστε ἕξει μὲν τὸν λόγον σῳζόμενος σῳζομένου τοῦ πράγματος, οὐκ οἶδε δέ. οὐδ' ἄρα πρότερον ᾔδει. εἰ δὲ μὴ ἔφθαρται, ἐνδέχεται δὲ φθαρῆναι, τὸ συμβαῖνον ἂν εἴη δυνατὸν καὶ ἐνδεχόμενον. ἀλλ' ἔστιν ἀδύνατον οὕτως ἔχοντα εἰδέναι.

(75a.) Ὅταν μὲν οὖν τὸ συμπέρασμα ἐξ ἀνάγκης ᾖ, οὐδὲν κωλύει τὸ μέσον μὴ ἀναγκαῖον εἶναι δι' οὗ ἐδείχθη (ἔστι γὰρ τὸ ἀναγκαῖον καὶ μὴ ἐξ ἀναγκαίων συλλογίσασθαι, ὥσπερ καὶ ἀληθὲς μὴ ἐξ ἀληθῶν)· ὅταν δὲ τὸ μέσον ἐξ ἀνάγκης, καὶ τὸ συμπέρασμα ἐξ ἀνάγκης, ὥσπερ καὶ ἐξ ἀληθῶν ἀληθὲς ἀεί (ἔστω γὰρ τὸ Α κατὰ τοῦ Β ἐξ ἀνάγκης, καὶ τοῦτο κατὰ τοῦ Γ· ἀναγκαῖον τοίνυν καὶ τὸ Α τῷ Γ ὑπάρχειν)· ὅταν δὲ μὴ ἀναγκαῖον ᾖ τὸ συμπέρασμα, οὐδὲ τὸ μέσον ἀναγκαῖον οἷόν τ' εἶναι (ἔστω γὰρ τὸ Α τῷ Γ μὴ ἐξ ἀνάγκης ὑπάρχειν, τῷ δὲ Β, καὶ τοῦτο τῷ Γ ἐξ ἀνάγκης· καὶ τὸ Α ἄρα τῷ Γ ἐξ ἀνάγκης ὑπάρξει· ἀλλ' οὐχ ὑπέκειτο).

Ἐπεὶ τοίνυν εἰ ἐπίσταται ἀποδεικτικῶς, δεῖ ἐξ ἀνάγκης ὑπάρχειν, δῆλον ὅτι καὶ διὰ μέσου ἀναγκαίου δεῖ ἔχειν τὴν ἀπόδειξιν· ἢ οὐκ ἐπιστήσεται οὔτε διότι οὔτε ὅτι ἀνάγκη ἐκεῖνο εἶναι, ἀλλ' ἢ οἰήσεται οὐκ εἰδώς, ἐὰν ὑπολάβῃ ὡς ἀναγκαῖον τὸ μὴ ἀναγκαῖον, ἢ οὐδ’ οἰήσεται, ὁμοίως ἐάν τε τὸ ὅτι εἰδῇ διὰ μέσων ἐάν τε τὸ διότι καὶ δι’ ἀμέσων.

Τῶν δὲ συμβεβηκότων μὴ καθ’ αὑτά, ὃν τρόπον διωρίσθη τὰ καθ’ αὑτά, οὐκ ἔστιν ἐπιστήμη ἀποδεικτική. οὐ γὰρ ἔστιν ἐξ ἀνάγκης δεῖξαι τὸ συμπέρασμα· τὸ συμβεβηκὸς γὰρ ἐνδέχεται μὴ ὑπάρχειν· περὶ τοῦ τοιούτου γὰρ λέγω συμβεβηκότος. καίτοι ἀπορήσειεν ἄν τις ἴσως τίνος ἕνεκα ταῦτα δεῖ ἐρωτᾶν περὶ τούτων, εἰ μὴ ἀνάγκη τὸ συμπέρασμα εἶναι· οὐδὲν γὰρ διαφέρει εἴ τις ἐρόμενος τὰ τυχόντα εἶτα εἴπειεν τὸ συμπέρασμα. δεῖ δ’ ἐρωτᾶν οὐχ ὡς ἀναγκαῖον εἶναι διὰ τὰ ἠρωτημένα, ἀλλ’ ὅτι λέγειν ἀνάγκη τῷ ἐκεῖνα λέγοντι, καὶ ἀληθῶς λέγειν, ἐὰν ἀληθῶς ᾖ ὑπάρχοντα.

Ἐπεὶ δ’ ἐξ ἀνάγκης ὑπάρχει περὶ ἕκαστον γένος ὅσα καθ’ αὑτὰ ὑπάρχει καὶ ᾗ ἕκαστον, φανερὸν ὅτι περὶ τῶν καθ’ αὑτὰ ὑπαρχόντων αἱ ἐπιστημονικαὶ ἀποδείξεις καὶ ἐκ τῶν τοιούτων εἰσίν. τὰ μὲν γὰρ συμβεβηκότα οὐκ ἀναγκαῖα, ὥστ’ οὐκ ἀνάγκη τὸ συμπέρασμα εἰδέναι διότι ὑπάρχει, οὐδ’ εἰ ἀεὶ εἴη, μὴ καθ’ αὑτὸ δέ, οἷον οἱ διὰ σημείων συλλογισμοί. τὸ γὰρ καθ’ αὑτὸ οὐ καθ’ αὑτὸ ἐπιστήσεται, οὐδὲ διότι (τὸ δὲ διότι ἐπίστασθαί ἐστι τὸ διὰ τοῦ αἰτίου ἐπίστασθαι), δι’ αὑτὸ ἄρα δεῖ καὶ τὸ μέσον τῷ τρίτῳ καὶ τὸ πρῶτον τῷ μέσῳ ὑπάρχειν.

Κεφάλαιο 7

Οὐκ ἄρα ἔστιν ἐξ ἄλλου γένους μεταβάντα δεῖξαι, οἷον τὸ γεωμετρικὸν ἀριθμητικῇ. τρία γάρ ἐστι τὰ ἐν ταῖς ἀποδείξεσιν, ἓν μὲν τὸ ἀποδεικνύμενον, τὸ συμπέρασμα (τοῦτο δ’ ἐστὶ τὸ ὑπάρχον γένει τινὶ καθ’ αὑτό), ἓν δὲ τὰ ἐξιώματα (ἀξιώματα δ’ ἐστὶν ἐξ ὧν)· τρίτον τὸ γένος τὸ ὑποκείμενον, (75b.) οὗ τὰ πάθη καὶ τὰ καθ’ αὑτὰ συμβεβηκότα δηλοῖ ἡ ἀπόδειξις. ἐξ ὧν μὲν οὖν ἡ ἀπόδειξις, ἐνδέχεται τὰ αὐτὰ εἶναι· ὧν δὲ τὸ γένος ἕτερον, ὥσπερ ἀριθμητικῆς καὶ γεωμετρίας, οὐκ ἔστι τὴν ἀριθμητικὴν ἀπόδειξιν ἐφαρμόσαι ἐπὶ τὰ τοῖς μεγέθεσι συμβεβηκότα, εἰ μὴ τὰ μεγέθη ἀριθμοί εἰσι· τοῦτο δ’ ὡς ἐνδέχεται ἐπί τινων, ὕστερον λεχθήσεται. ἡ δ’ ἀριθμητικὴ ἀπόδειξις ἀεὶ ἔχει τὸ γένος περὶ ὃ ἡ ἀπόδειξις, καὶ αἱ ἄλλαι ὁμοίως. ὥστ’ ἢ ἁπλῶς ἀνάγκη τὸ αὐτὸ εἶναι γένος ἢ πῇ, εἰ μέλλει ἡ ἀπόδειξις μεταβαίνειν. ἄλλως δ’ ὅτι ἀδύνατον, δῆλον· ἐκ γὰρ τοῦ αὐτοῦ γένους ἀνάγκη τὰ ἄκρα καὶ τὰ μέσα εἶναι. εἰ γὰρ μὴ καθ’ αὑτά, συμβεβηκότα ἔσται. διὰ τοῦτο τῇ γεωμετρίᾳ οὐκ ἔστι δεῖξαι ὅτι τῶν ἐναντίων μία ἐπιστήμη, ἀλλ’ οὐδ’ ὅτι οἱ δύο κύβοι κύβος· οὐδ’ ἄλλῃ ἐπιστήμῃ τὸ ἑτέρας, ἀλλ’ ἢ ὅσα οὕτως ἔχει πρὸς ἄλληλα ὥστ’ εἶναι θάτερον ὑπὸ θάτερον, οἷον τὰ ὀπτικὰ πρὸς γεωμετρίαν καὶ τὰ ἁρμονικὰ πρὸς ἀριθμητικήν. οὐδ’ εἴ τι ὑπάρχει ταῖς γραμμαῖς μὴ ᾗ γραμμαὶ καὶ ᾗ ἐκ τῶν ἀρχῶν τῶν ἰδίων, οἷον εἰ καλλίστη τῶν γραμμῶν ἡ εὐθεῖα ἢ εἰ ἐναντίως ἔχει τῇ περιφερεῖ· οὐ γὰρ ᾗ τὸ ἴδιον γένος αὐτῶν, ὑπάρχει, ἀλλ’ ᾗ κοινόν τι.

Κεφάλαιο 8

Φανερὸν δὲ καὶ ἐὰν ὦσιν αἱ προτάσεις καθόλου ἐξ ὧν ὁ συλλογισμός, ὅτι ἀνάγκη καὶ τὸ συμπέρασμα ἀΐδιον εἶναι τῆς τοιαύτης ἀποδείξεως καὶ τῆς ἁπλῶς εἰπεῖν ἀποδείξεως. οὐκ ἔστιν ἄρα ἀπόδειξις τῶν φθαρτῶν οὐδ’ ἐπιστήμη ἁπλῶς, ἀλλ’ οὕτως ὥσπερ κατὰ συμβεβηκός, ὅτι οὐ καθ’ ὅλου αὐτοῦ ἐστιν ἀλλὰ ποτὲ καὶ πώς. ὅταν δ’ ᾖ, ἀνάγκη τὴν ἑτέραν μὴ καθόλου εἶναι πρότασιν καὶ φθαρτήν-φθαρτὴν μὲν ὅτι ἔσται καὶ τὸ συμπέρασμα οὔσης, μὴ καθόλου δὲ ὅτι τῷ μὲν ἔσται τῷ δ’ οὐκ ἔσται ἐφ’ ὧν-ὥστ’ οὐκ ἔστι συλλογίσασθαι καθόλου, ἀλλ’ ὅτι νῦν. ὁμοίως δ’ ἔχει καὶ περὶ ὁρισμούς, ἐπείπερ ἐστὶν ὁ ὁρισμὸς ἢ ἀρχὴ ἀποδείξεως ἢ ἀπόδειξις θέσει διαφέρουσα ἢ συμπέρασμά τι ἀποδείξεως. αἱ δὲ τῶν πολλάκις γινομένων ἀποδείξεις καὶ ἐπιστῆμαι, οἷον σελήνης ἐκλείψεως, δῆλον ὅτι ᾗ μὲν τοιοῦδ’ εἰσίν, ἀεὶ εἰσίν, ᾗ δ’ οὐκ ἀεί, κατὰ μέρος εἰσίν. ὥσπερ δ’ ἡ ἔκλειψις, ὡσαύτως τοῖς ἄλλοις.

Κεφάλαιο 9

Ἐπεὶ δὲ φανερὸν ὅτι ἕκαστον ἀποδεῖξαι οὐκ ἔστιν ἀλλ’ ἢ ἐκ τῶν ἑκάστου ἀρχῶν, ἂν τὸ δεικνύμενον ὑπάρχῃ ᾗ ἐκεῖνο, οὐκ ἔστι τὸ ἐπίστασθαι τοῦτο, ἂν ἐξ ἀληθῶν καὶ ἀναποδείκτων δειχθῇ καὶ ἀμέσων. ἔστι γὰρ οὕτω δεῖξαι, ὥσπερ Βρύσων τὸν τετραγωνισμόν. κατὰ κοινόν τε γὰρ δεικνύουσιν οἱ τοιοῦτοι λόγοι, ὃ καὶ ἑτέρῳ ὑπάρξει· διὸ καὶ ἐπ’ ἄλλων ἐφαρμόττουσιν (76a.)οἱ λόγοι οὐ συγγενῶν. οὐκοῦν οὐχ ᾗ ἐκεῖνο ἐπίσταται, ἀλλὰ κατὰ συμβεβηκός· οὐ γὰρ ἂν ἐφήρμοττεν ἡ ἀπόδειξις καὶ ἐπ’ ἄλλο γένος.

Ἕκαστον δ’ ἐπιστάμεθα μὴ κατὰ συμβεβηκός, ὅταν κατ’ ἐκεῖνο γινώσκωμεν καθ’ ὃ ὑπάρχει, ἐκ τῶν ἀρχῶν τῶν ἐκείνου ᾗ ἐκεῖνο, οἷον τὸ δυσὶν ὀρθαῖς ἴσας ἔχειν, ᾧ ὑπάρχει καθ’ αὑτὸ τὸ εἰρημένον, ἐκ τῶν ἀρχῶν τῶν τούτου. ὥστ’ εἰ καθ’ αὑτὸ κἀκεῖνο ὑπάρχει ᾧ ὑπάρχει, ἀνάγκη τὸ μέσον ἐν τῇ αὐτῇ συγγενείᾳ εἶναι. εἰ δὲ μή, ἀλλ’ ὡς τὰ ἁρμονικὰ δι’ ἀριθμητικῆς. τὰ δὲ τοιαῦτα δείκνυται μὲν ὡσαύτως, διαφέρει δέ· τὸ μὲν γὰρ ὅτι ἑτέρας ἐπιστήμης (τὸ γὰρ ὑποκείμενον γένος ἕτερον), τὸ δὲ διότι τῆς ἄνω, ἧς καθ’ αὑτὰ τὰ πάθη ἐστίν. ὥστε καὶ ἐκ τούτων φανερὸν ὅτι οὐκ ἔστιν ἀποδεῖξαι ἕκαστον ἁπλῶς ἀλλ’ ἢ ἐκ τῶν ἑκάστου ἀρχῶν. ἀλλὰ τούτων αἱ ἀρχαὶ ἔχουσι τὸ κοινόν.

Εἰ δὲ φανερὸν τοῦτο, φανερὸν καὶ ὅτι οὐκ ἔστι τὰς ἑκάστου ἰδίας ἀρχὰς ἀποδεῖξαι· ἔσονται γὰρ ἐκεῖναι ἁπάντων ἀρχαί, καὶ ἐπιστήμη ἡ ἐκείνων κυρία πάντων. καὶ γὰρ ἐπίσταται μᾶλλον ὁ ἐκ τῶν ἀνώτερον αἰτίων εἰδώς· ἐκ τῶν προτέρων γὰρ οἶδεν, ὅταν ἐκ μὴ αἰτιατῶν εἰδῇ αἰτίων. ὥστ’ εἰ μᾶλλον οἶδε καὶ μάλιστα, κἂν ἐπιστήμη ἐκείνη εἴη καὶ μᾶλλον καὶ μάλιστα. ἡ δ’ ἀπόδειξις οὐκ ἐφαρμόττει ἐπ’ ἄλλο γένος, ἀλλ’ ἢ ὡς εἴρηται αἱ γεωμετρικαὶ ἐπὶ τὰς μηχανικὰς ἢ ὀπτικὰς καὶ αἱ ἀριθμητικαὶ ἐπὶ τὰς ἁρμονικάς.

Χαλεπὸν δ’ ἐστὶ τὸ γνῶναι εἰ οἶδεν ἢ μή. χαλεπὸν γὰρ τὸ γνῶναι εἰ ἐκ τῶν ἑκάστου ἀρχῶν ἴσμεν ἢ μή· ὅπερ ἐστὶ τὸ εἰδέναι. οἰόμεθα δ’, ἂν ἔχωμεν ἐξ ἀληθινῶν τινῶν συλλογισμὸν καὶ πρώτων, ἐπίστασθαι. τὸ δ’ οὐκ ἔστιν, ἀλλὰ συγγενῆ δεῖ εἶναι τοῖς πρώτοις.

Κεφάλαιο 10

Λέγω δ’ ἀρχὰς ἐν ἑκάστῳ γένει ταύτας ἃς ὅτι ἔστι μὴ ἐνδέχεται δεῖξαι. τί μὲν οὖν σημαίνει καὶ τὰ πρῶτα καὶ τὰ ἐκ τούτων, λαμβάνεται, ὅτι δ’ ἔστι, τὰς μὲν ἀρχὰς ἀνάγκη λαμβάνειν, τὰ δ’ ἄλλα δεικνύναι· οἷον τί μονὰς ἢ τί τὸ εὐθὺ καὶ τρίγωνον, εἶναι δὲ τὴν μονάδα λαβεῖν καὶ μέγεθος, τὰ δ’ ἕτερα δεικνύναι.

Ἔστι δ’ ὧν χρῶνται ἐν ταῖς ἀποδεικτικαῖς ἐπιστήμαις τὰ μὲν ἴδια ἑκάστης ἐπιστήμης τὰ δὲ κοινά, κοινὰ δὲ κατ’ ἀναλογίαν, ἐπεὶ χρήσιμόν γε ὅσον ἐν τῷ ὑπὸ τὴν ἐπιστήμην γένει· ἴδια μὲν οἷον γραμμὴν εἶναι τοιανδὶ καὶ τὸ εὐθύ, κοινὰ δὲ οἷον τὸ ἴσα ἀπὸ ἴσων ἂν ἀφέλῃ, ὅτι ἴσα τὰ λοιπά. ἱκανὸν δ’ ἕκαστον τούτων ὅσον ἐν τῷ γένει· ταὐτὸ γὰρ ποιήσει, (76b.) κἂν μὴ κατὰ πάντων λάβῃ ἀλλ’ ἐπὶ μεγεθῶν μόνον, τῷ δ’ ἀριθμητικῷ ἐπ’ ἀριθμῶν.

Ἔστι δ’ ἴδια μὲν καὶ ἃ λαμβάνεται εἶναι, περὶ ἃ ἡ ἐπιστήμη θεωρεῖ τὰ ὑπάρχοντα καθ’ αὑτά, οἷον μονάδας ἡ ἀριθμητική, ἡ δὲ γεωμετρία σημεῖα καὶ γραμμάς. ταῦτα γὰρ λαμβάνουσι τὸ εἶναι καὶ τοδὶ εἶναι. τὰ δὲ τούτων πάθη καθ’ αὑτά, τί μὲν σημαίνει ἕκαστον, λαμβάνουσιν, οἷον ἡ μὲν ἀριθμητικὴ τί περιττὸν ἢ ἄρτιον ἢ τετράγωνον ἢ κύβος, ἡ δὲ γεωμετρία τί τὸ ἄλογον ἢ τὸ κεκλάσθαι ἢ νεύειν, ὅτι δ’ ἔστι, δεικνύουσι διά τε τῶν κοινῶν καὶ ἐκ τῶν ἀποδεδειγμένων. καὶ ἡ ἀστρολογία ὡσαύτως. πᾶσα γὰρ ἀποδεικτικὴ ἐπιστήμη περὶ τρία ἐστίν, ὅσα τε εἶναι τίθεται (ταῦτα δ’ ἐστὶ τὸ γένος, οὗ τῶν καθ’ αὑτὰ παθημάτων ἐστὶ θεωρητική), καὶ τὰ κοινὰ λεγόμενα ἀξιώματα, ἐξ ὧν πρώτων ἀποδείκνυσι, καὶ τρίτον τὰ πάθη, ὧν τί σημαίνει ἕκαστον λαμβάνει. ἐνίας μέντοι ἐπιστήμας οὐδὲν κωλύει ἔνια τούτων παρορᾶν, οἷον τὸ γένος μὴ ὑποτίθεσθαι εἶναι, ἂν ᾖ φανερὸν ὅτι ἔστιν (οὐ γὰρ ὁμοίως δῆλον ὅτι ἀριθμὸς ἔστι καὶ ὅτι ψυχρὸν καὶ θερμόν), καὶ τὰ πάθη μὴ λαμβάνειν τί σημαίνει, ἂν ᾖ δῆλα· ὥσπερ οὐδὲ τὰ κοινὰ οὐ λαμβάνει τί σημαίνει τὸ ἴσα ἀπὸ ἴσων ἀφελεῖν, ὅτι γνώριμον. ἀλλ’ οὐδὲν ἧττον τῇ γε φύσει τρία ταῦτά ἐστι, περὶ ὅ τε δείκνυσι καὶ ἃ δείκνυσι καὶ ἐξ ὧν.

Οὐκ ἔστι δ’ ὑπόθεσις οὐδ’ αἴτημα, ὃ ἀνάγκη εἶναι δι’ αὑτὸ καὶ δοκεῖν ἀνάγκη. οὐ γὰρ πρὸς τὸν ἔξω λόγον ἡ ἀπόδειξις, ἀλλὰ πρὸς τὸν ἐν τῇ ψυχῇ, ἐπεὶ οὐδὲ συλλογισμός. ἀεὶ γὰρ ἔστιν ἐνστῆναι πρὸς τὸν ἔξω λόγον, ἀλλὰ πρὸς τὸν ἔσω λόγον οὐκ ἀεί. ὅσα μὲν οὖν δεικτὰ ὄντα λαμβάνει αὐτὸς μὴ δείξας, ταῦτ’, ἐὰν μὲν δοκοῦντα λαμβάνῃ τῷ μανθάνοντι, ὑποτίθεται, καὶ ἔστιν οὐχ ἁπλῶς ὑπόθεσις ἀλλὰ πρὸς ἐκεῖνον μόνον, ἂν δὲ ἢ μηδεμιᾶς ἐνούσης δόξης ἢ καὶ ἐναντίας ἐνούσης λαμβάνῃ τὸ αὐτό, αἰτεῖται. καὶ τούτῳ διαφέρει ὑπόθεσις καὶ αἴτημα· ἔστι γὰρ αἴτημα τὸ ὑπεναντίον τοῦ μανθάνοντος τῇ δόξῃ, ἢ ὃ ἄν τις ἀποδεικτὸν ὂν λαμβάνῃ καὶ χρῆται μὴ δείξας.

Οἱ μὲν οὖν ὅροι οὐκ εἰσὶν ὑποθέσεις (οὐδὲν γὰρ εἶναι ἢ μὴ λέγεται), ἀλλ’ ἐν ταῖς προτάσεσιν αἱ ὑποθέσεις, τοὺς δ’ ὅρους μόνον ξυνίεσθαι δεῖ· τοῦτο δ’ οὐχ ὑπόθεσις (εἰ μὴ καὶ τὸ ἀκούειν ὑπόθεσίν τις εἶναι φήσει), ἀλλ’ ὅσων ὄντων τῷ ἐκεῖνα εἶναι γίνεται τὸ συμπέρασμα. (οὐδ’ ὁ γεωμέτρης ψευδῆ ὑποτίθεται, ὥσπερ τινὲς ἔφασαν, λέγοντες ὡς οὐ δεῖ τῷ ψεύδει χρῆσθαι, τὸν δὲ γεωμέτρην ψεύδεσθαι λέγοντα ποδιαίαν τὴν οὐ ποδιαίαν ἢ εὐθεῖαν τὴν γεγραμμένην οὐκ εὐθεῖαν (77a.) οὖσαν. ὁ δὲ γεωμέτρης οὐδὲν συμπεραίνεται τῷ τήνδε εἶναι γραμμὴν ἣν αὐτὸς ἔφθεγκται, ἀλλὰ τὰ διὰ τούτων δηλούμενα.) ἔτι τὸ αἴτημα καὶ ὑπόθεσις πᾶσα ἢ ὡς ὅλον ἢ ὡς ἐν μέρει, οἱ δ’ ὅροι οὐδέτερον τούτων.

Κεφάλαιο 11

Εἴδη μὲν οὖν εἶναι ἢ ἕν τι παρὰ τὰ πολλὰ οὐκ ἀνάγκη, εἰ ἀπόδειξις ἔσται, εἶναι μέντοι ἓν κατὰ πολλῶν ἀληθὲς εἰπεῖν ἀνάγκη - οὐ γὰρ ἔσται τὸ καθόλου, ἂν μὴ τοῦτο ᾖ - ἐὰν δὲ τὸ καθόλου μὴ ᾖ, τὸ μέσον οὐκ ἔσται, ὥστ’ οὐδ’ ἀπόδειξις. δεῖ ἄρα τι ἓν καὶ τὸ αὐτὸ ἐπὶ πλειόνων εἶναι μὴ ὁμώνυμον. τὸ δὲ μὴ ἐνδέχεσθαι ἅμα φάναι καὶ ἀποφάναι οὐδεμία λαμβάνει ἀπόδειξις, ἀλλ’ ἢ ἐὰν δέῃ δεῖξαι καὶ τὸ συμπέρασμα οὕτως. δείκνυται δὲ λαβοῦσι τὸ πρῶτον κατὰ τοῦ μέσου, ὅτι ἀληθές, ἀποφάναι δ’ οὐκ ἀληθές. τὸ δὲ μέσον οὐδὲν διαφέρει εἶναι καὶ μὴ εἶναι λαβεῖν, ὡς δ’ αὔτως καὶ τὸ τρίτον. εἰ γὰρ ἐδόθη, καθ’ οὗ ἄνθρωπον ἀληθὲς εἰπεῖν, εἰ καὶ μὴ ἄνθρωπον ἀληθές, ἀλλ’ εἰ μόνον ἄνθρωπον ζῷον εἶναι, μὴ ζῷον δὲ μή, ἔσται [γὰρ] ἀληθὲς εἰπεῖν Καλλίαν, εἰ καὶ μὴ Καλλίαν, ὅμως ζῷον, μὴ ζῷον δ’ οὔ. αἴτιον δ’ ὅτι τὸ πρῶτον οὐ μόνον κατὰ τοῦ μέσου λέγεται ἀλλὰ καὶ κατ’ ἄλλου διὰ τὸ εἶναι ἐπὶ πλειόνων, ὥστ’ οὐδ’ εἰ τὸ μέσον καὶ αὐτό ἐστι καὶ μὴ αὐτό, πρὸς τὸ συμπέρασμα οὐδὲν διαφέρει. τὸ δ’ ἅπαν φάναι ἢ ἀποφάναι ἡ εἰς τὸ ἀδύνατον ἀπόδειξις λαμβάνει, καὶ ταῦτα οὐδ’ ἀεὶ καθόλου, ἀλλ’ ὅσον ἱκανόν, ἱκανὸν δ’ ἐπὶ τοῦ γένους. λέγω δ’ ἐπὶ τοῦ γένους οἷον περὶ ὃ γένος τὰς ἀποδείξεις φέρει, ὥσπερ εἴρηται καὶ πρότερον.

Ἐπικοινωνοῦσι δὲ πᾶσαι αἱ ἐπιστῆμαι ἀλλήλαις κατὰ τὰ κοινά (κοινὰ δὲ λέγω οἷς χρῶνται ὡς ἐκ τούτων ἀποδεικνύντες, ἀλλ’ οὐ περὶ ὧν δεικνύουσιν οὐδ’ ὃ δεικνύουσιν), καὶ ἡ διαλεκτικὴ πάσαις, καὶ εἴ τις καθόλου πειρῷτο δεικνύναι τὰ κοινά, οἷον ὅτι ἅπαν φάναι ἢ ἀποφάναι, ἢ ὅτι ἴσα ἀπὸ ἴσων, ἢ τῶν τοιούτων ἄττα. ἡ δὲ διαλεκτικὴ οὐκ ἔστιν οὕτως ὡρισμένων τινῶν, οὐδὲ γένους τινὸς ἑνός. οὐ γὰρ ἂν ἠρώταο ἀποδεικνύντα γὰρ οὐκ ἔστιν ἐρωτᾶν διὰ τὸ τῶν ἀντικειμένων ὄντων μὴ δείκνυσθαι τὸ αὐτό. δέδεικται δὲ τοῦτο ἐν τοῖς περὶ συλλογισμοῦ.

Κεφάλαιο 12

Εἰ δὲ τὸ αὐτό ἐστιν ἐρώτημα συλλογιστικὸν καὶ πρότασις ἀντιφάσεως, προτάσεις δὲ καθ’ ἑκάστην ἐπιστήμην ἐξ ὧν ὁ συλλογισμὸς ὁ καθ’ ἑκάστην, εἴη ἄν τι ἐρώτημα ἐπιστημονικόν, ἐξ ὧν ὁ καθ’ ἑκάστην οἰκεῖος γίνεται συλλογισμός. δῆλον ἄρα ὅτι οὐ πᾶν ἐρώτημα γεωμετρικὸν ἂν εἴη οὐδ’ ἰατρικόν, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἀλλ’ ἐξ (77b.) ὧν δείκνυταί τι περὶ ὧν ἡ γεωμετρία ἐστίν, ἢ ἃ ἐκ τῶν αὐτῶν δείκνυται τῇ γεωμετρίᾳ, ὥσπερ τὰ ὀπτικά. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. καὶ περὶ μὲν τούτων καὶ λόγον ὑφεκτέον ἐκ τῶν γεωμετρικῶν ἀρχῶν καὶ συμπερασμάτων, περὶ δὲ τῶν ἀρχῶν λόγον οὐχ ὑφεκτέον τῷ γεωμέτρῃ ᾗ γεωμέτρης· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ἐπιστημῶν. οὔτε πᾶν ἄρα ἕκαστον ἐπιστήμονα ἐρώτημα ἐρωτητέον, οὔθ’ ἅπαν τὸ ἐρωτώμενον ἀποκριτέον περὶ ἑκάστου, ἀλλὰ τὰ κατὰ τὴν ἐπιστήμην διορισθέντα. εἰ δὲ διαλέξεται γεωμέτρῃ ᾗ γεωμέτρης οὕτως, φανερὸν ὅτι καὶ καλῶς, ἐὰν ἐκ τούτων τι δεικνύῃ· εἰ δὲ μή, οὐ καλῶς. δῆλον δ’ ὅτι οὐδ’ ἐλέγχει γεωμέτρην ἀλλ’ ἢ κατὰ συμβεβηκός· ὥστ’ οὐκ ἂν εἴη ἐν ἀγεωμετρήτοις περὶ γεωμετρίας διαλεκτέον· λήσει γὰρ ὁ φαύλως διαλεγόμενος. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ἔχει ἐπιστημῶν.

Ἐπεὶ δ’ ἔστι γεωμετρικὰ ἐρωτήματα, ἆρ’ ἔστι καὶ ἀγεωμέτρητα; καὶ παρ’ ἑκάστην ἐπιστήμην τὰ κατὰ τὴν ἄγνοιαν τὴν ποίαν γεωμετρικά ἐστιν; καὶ πότερον ὁ κατὰ τὴν ἄγνοιαν συλλογισμὸς ὁ ἐκ τῶν ἀντικειμένων συλλογισμός, ἢ ὁ παραλογισμός, κατὰ γεωμετρίαν δέ, ἢ <ὁ> ἐξ ἄλλης τέχνης, οἷον τὸ μουσικόν ἐστιν ἐρώτημα ἀγεωμέτρητον περὶ γεωμετρίας, τὸ δὲ τὰς παραλλήλους συμπίπτειν οἴεσθαι γεωμετρικόν πως καὶ ἀγεωμέτρητον ἄλλον τρόπον; διττὸν γὰρ τοῦτο, ὥσπερ τὸ ἄρρυθμον, καὶ τὸ μὲν ἕτερον ἀγεωμέτρητον τῷ μὴ ἔχειν [ὥσπερ τὸ ἄρρυθμον], τὸ δ’ ἕτερον τῷ φαύλως ἔχειν· καὶ ἡ ἄγνοια αὕτη καὶ ἡ ἐκ τῶν τοιούτων ἀρχῶν ἐναντία. ἐν δὲ τοῖς μαθήμασιν οὐκ ἔστιν ὁμοίως ὁ παραλογισμός, ὅτι τὸ μέσον ἐστὶν ἀεὶ τὸ διττόν· κατά τε γὰρ τούτου παντός, καὶ τοῦτο πάλιν κατ’ ἄλλου λέγεται παντός (τὸ δὲ κατηγορούμενον οὐ λέγεται πᾶν), ταῦτα δ’ ἔστιν οἷον ὁρᾶν τῇ νοήσει, ἐν δὲ τοῖς λόγοις λανθάνει. ἆρα πᾶς κύκλος σχῆμα; ἂν δὲ γράψῃ, δῆλον. τί δέ; τὰ ἔπη κύκλος; φανερὸν ὅτι οὐκ ἔστιν.

Οὐ δεῖ δ’ ἔνστασιν εἰς αὐτὸ φέρειν, ἂν ᾖ ἡ πρότασις ἐπακτική. ὥσπερ γὰρ οὐδὲ πρότασίς ἐστιν ἣ μὴ ἔστιν ἐπὶ πλειόνων (οὐ γὰρ ἔσται ἐπὶ πάντων, ἐκ τῶν καθόλου δ’ ὁ συλλογισμός), δῆλον ὅτι οὐδ’ ἔνστασις. αἱ αὐταὶ γὰρ προτάσεις καὶ ἐνστάσεις· ἣν γὰρ φέρει ἔνστασιν, αὕτη γένοιτ’ ἂν πρότασις ἢ ἀποδεικτικὴ ἢ διαλεκτική.

Συμβαίνει δ’ ἐνίους ἀσυλλογίστως λέγειν διὰ τὸ λαμβάνειν ἀμφοτέροις τὰ ἑπόμενα, οἷον καὶ ὁ Καινεὺς ποιεῖ, (78a.) ὅτι τὸ πῦρ ἐν τῇ πολλαπλασίᾳ ἀναλογίᾳ· καὶ γὰρ τὸ πῦρ ταχὺ γεννᾶται, ὥς φησι, καὶ αὕτη ἡ ἀναλογία. οὕτω δ’ οὐκ ἔστι συλλογισμός· ἀλλ’ εἰ τῇ ταχίστῃ ἀναλογίᾳ ἕπεται ἡ πολλαπλάσιος καὶ τῷ πυρὶ ἡ ταχίστη ἐν τῇ κινήσει ἀναλογία. ἐνίοτε μὲν οὖν οὐκ ἐνδέχεται συλλογίσασθαι ἐκ τῶν εἰλημμένων, ὁτὲ δ’ ἐνδέχεται, ἀλλ’ οὐχ ὁρᾶται.

Εἰ δ’ ἦν ἀδύνατον ἐκ ψεύδους ἀληθὲς δεῖξαι, ῥᾴδιον ἂν ἦν τὸ ἀναλύειν· ἀντέστρεφε γὰρ ἂν ἐξ ἀνάγκης. ἔστω γὰρ τὸ Α ὄν· τούτου δ’ ὄντος ταδὶ ἔστιν, ἃ οἶδα ὅτι ἔστιν, οἷον τὸ Β. ἐκ τούτων ἄρα δείξω ὅτι ἔστιν ἐκεῖνο. ἀντιστρέφει δὲ μᾶλλον τὰ ἐν τοῖς μαθήμασιν, ὅτι οὐδὲν συμβεβηκὸς λαμβάνουσιν (ἀλλὰ καὶ τούτῳ διαφέρουσι τῶν ἐν τοῖς διαλόγοις) ἀλλ’ ὁρισμούς. Αὔξεται δ’ οὐ διὰ τῶν μέσων, ἀλλὰ τῷ προσλαμβάνειν, οἷον τὸ Α τοῦ Β, τοῦτο δὲ τοῦ Γ, πάλιν τοῦτο τοῦ Δ, καὶ τοῦτ’ εἰς ἄπειρον· καὶ εἰς τὸ πλάγιον, οἷον τὸ Α καὶ κατὰ τοῦ Γ καὶ κατὰ τοῦ Ε, οἷον ἔστιν ἀριθμὸς ποσὸς ἢ καὶ ἄπειρος τοῦτο ἐφ’ ᾧ Α, ὁ περιττὸς ἀριθμὸς ποσὸς ἐφ’ οὗ Β, ἀριθμὸς περιττὸς ἐφ’ οὗ Γ· ἔστιν ἄρα τὸ Α κατὰ τοῦ Γ. καὶ ἔστιν ὁ ἄρτιος ποσὸς ἀριθμὸς ἐφ’ οὗ Δ, ὁ ἄρτιος ἀριθμὸς ἐφ’ οὗ Ε· ἔστιν ἄρα τὸ Α κατὰ τοῦ Ε.

Κεφάλαιο 13

Τὸ δ’ ὅτι διαφέρει καὶ τὸ διότι ἐπίστασθαι, πρῶτον μὲν ἐν τῇ αὐτῇ ἐπιστήμῃ, καὶ ἐν ταύτῃ διχῶς, ἕνα μὲν τρόπον ἐὰν μὴ δι’ ἀμέσων γίνηται ὁ συλλογισμός (οὐ γὰρ λαμβάνεται τὸ πρῶτον αἴτιον, ἡ δὲ τοῦ διότι ἐπιστήμη κατὰ τὸ πρῶτον αἴτιον), ἄλλον δὲ εἰ δι’ ἀμέσων μέν, ἀλλὰ μὴ διὰ τοῦ αἰτίου ἀλλὰ τῶν ἀντιστρεφόντων διὰ τοῦ γνωριμωτέρου. κωλύει γὰρ οὐδὲν τῶν ἀντικατηγορουμένων γνωριμώτερον εἶναι ἐνίοτε τὸ μὴ αἴτιον, ὥστ’ ἔσται διὰ τούτου ἡ ἀπόδειξις, οἷον ὅτι ἐγγὺς οἱ πλάνητες διὰ τοῦ μὴ στίλβειν. ἔστω ἐφ’ ᾧ Γ πλάνητες, ἐφ’ ᾧ Β τὸ μὴ στίλβειν, ἐφ’ ᾧ Α τὸ ἐγγὺς εἶναι. ἀληθὲς δὴ τὸ Β κατὰ τοῦ Γ εἰπεῖν· οἱ γὰρ πλάνητες οὐ στίλβουσιν. ἀλλὰ καὶ τὸ Α κατὰ τοῦ Β· τὸ γὰρ μὴ στίλβον ἐγγύς ἐστι· τοῦτο δ’ εἰλήφθω δι’ ἐπαγωγῆς ἢ δι’ αἰσθήσεως. ἀνάγκη οὖν τὸ Α τῷ Γ ὑπάρχειν, ὥστ’ ἀποδέδεικται ὅτι οἱ πλάνητες ἐγγύς εἰσιν. οὗτος οὖν ὁ συλλογισμὸς οὐ τοῦ διότι ἀλλὰ τοῦ ὅτι ἐστίν· οὐ γὰρ διὰ τὸ μὴ στίλβειν ἐγγύς εἰσιν, ἀλλὰ διὰ τὸ ἐγγὺς εἶναι οὐ στίλβουσιν. ἐγχωρεῖ δὲ καὶ διὰ θατέρου θάτερον δειχθῆναι, καὶ ἔσται τοῦ διότι ἡ ἀπόδειξις, οἷον ἔστω τὸ Γ πλάνητες, ἐφ’ ᾧ Β (78b.) τὸ ἐγγὺς εἶναι, τὸ Α τὸ μὴ στίλβειν· ὑπάρχει δὴ καὶ τὸ Β τῷ Γ καὶ τὸ Α τῷ Β, ὥστε καὶ τῷ Γ τὸ Α [τὸ μὴ στίλβειν]. καὶ ἔστι τοῦ διότι ὁ συλλογισμός· εἴληπται γὰρ τὸ πρῶτον αἴτιον. πάλιν ὡς τὴν σελήνην δεικνύουσιν ὅτι σφαιροειδής, διὰ τῶν αὐξήσεων-εἰ γὰρ τὸ αὐξανόμενον οὕτω σφαιροειδές, αὐξάνει δ’ ἡ σελήνη, φανερὸν ὅτι σφαιροειδής-οὕτω μὲν οὖν τοῦ ὅτι γέγονεν ὁ συλλογισμός, ἀνάπαλιν δὲ τεθέντος τοῦ μέσου τοῦ διότι· οὐ γὰρ διὰ τὰς αὐξήσεις σφαιροειδής ἐστιν, ἀλλὰ διὰ τὸ σφαιροειδὴς εἶναι λαμβάνει τὰς αὐξήσεις τοιαύτας. σελήνη ἐφ’ ᾧ Γ, σφαιροειδὴς ἐφ’ ᾧ Β, αὔξησις ἐφ’ ᾧ Α. ἐφ’ ὧν δὲ τὰ μέσα μὴ ἀντιστρέφει καὶ ἔστι γνωριμώτερον τὸ ἀναίτιον, τὸ ὅτι μὲν δείκνυται, τὸ διότι δ’ οὔ.

Ἔτι ἐφ’ ὧν τὸ μέσον ἔξω τίθεται. καὶ γὰρ ἐν τούτοις τοῦ ὅτι καὶ οὐ τοῦ διότι ἡ ἀπόδειξις· οὐ γὰρ λέγεται τὸ αἴτιον. οἷον διὰ τί οὐκ ἀναπνεῖ ὁ τοῖχος; ὅτι οὐ ζῷον. εἰ γὰρ τοῦτο τοῦ μὴ ἀναπνεῖν αἴτιον, ἔδει τὸ ζῷον εἶναι αἴτιον τοῦ ἀναπνεῖν, οἷον εἰ ἡ ἀπόφασις αἰτία τοῦ μὴ ὑπάρχειν, ἡ κατάφασις τοῦ ὑπάρχειν, ὥσπερ εἰ τὸ ἀσύμμετρα εἶναι τὰ θερμὰ καὶ τὰ ψυχρὰ τοῦ μὴ ὑγιαίνειν, τὸ σύμμετρα εἶναι τοῦ ὑγιαίνειν, -ὁμοίως δὲ καὶ εἰ ἡ κατάφασις τοῦ ὑπάρχειν, ἡ ἀπόφασις τοῦ μὴ ὑπάρχειν. ἐπὶ δὲ τῶν οὕτως ἀποδεδομένων οὐ συμβαίνει τὸ λεχθέν· οὐ γὰρ ἅπαν ἀναπνεῖ ζῷον. ὁ δὲ συλλογισμὸς γίνεται τῆς τοιαύτης αἰτίας ἐν τῷ μέσῳ σχήματι. οἷον ἔστω τὸ

Α ζῷον, ἐφ’ ᾧ Β τὸ ἀναπνεῖν, ἐφ’ ᾧ Γ τοῖχος. τῷ μὲν οὖν Β παντὶ ὑπάρχει τὸ Α (πᾶν γὰρ τὸ ἀναπνέον ζῷον), τῷ δὲ Γ οὐθενί, ὥστε οὐδὲ τὸ Β τῷ Γ οὐθενί· οὐκ ἄρα ἀναπνεῖ ὁ τοῖχος. ἐοίκασι δ’ αἱ τοιαῦται τῶν αἰτιῶν τοῖς καθ’ ὑπερβολὴν εἰρημένοις· τοῦτο δ’ ἔστι τὸ πλέον ἀποστήσαντα τὸ μέσον εἰπεῖν, οἷον τὸ τοῦ Ἀναχάρσιος, ὅτι ἐν Σκύθαις οὐκ εἰσὶν αὐλητρίδες, οὐδὲ γὰρ ἄμπελοι.

Κατὰ μὲν δὴ τὴν αὐτὴν ἐπιστήμην καὶ κατὰ τὴν τῶν μέσων θέσιν αὗται διαφοραί εἰσι τοῦ ὅτι πρὸς τὸν τοῦ διότι συλλογισμόν· ἄλλον δὲ τρόπον διαφέρει τὸ διότι τοῦ ὅτι τῷ δι’ ἄλλης ἐπιστήμης ἑκάτερον θεωρεῖν. τοιαῦτα δ’ ἐστὶν ὅσα οὕτως ἔχει πρὸς ἄλληλα ὥστ’ εἶναι θάτερον ὑπὸ θάτερον, οἷον τὰ ὀπτικὰ πρὸς γεωμετρίαν καὶ τὰ μηχανικὰ πρὸς στερεομετρίαν καὶ τὰ ἁρμονικὰ πρὸς ἀριθμητικὴν καὶ τὰ φαινόμενα πρὸς ἀστρολογικήν. σχεδὸν δὲ συνώνυμοί εἰσιν ἔνιαι τούτων τῶν ἐπιστημῶν, οἷον ἀστρολογία ἥ τε μαθηματικὴ (79a.) καὶ ἡ ναυτική, καὶ ἁρμονικὴ ἥ τε μαθηματικὴ καὶ ἡ κατὰ τὴν ἀκοήν. ἐνταῦθα γὰρ τὸ μὲν ὅτι τῶν αἰσθητικῶν εἰδέναι, τὸ δὲ διότι τῶν μαθηματικῶν· οὗτοι γὰρ ἔχουσι τῶν αἰτίων τὰς ἀποδείξεις, καὶ πολλάκις οὐκ ἴσασι τὸ ὅτι, καθάπερ οἱ τὸ καθόλου θεωροῦντες πολλάκις ἔνια τῶν καθ’ ἕκαστον οὐκ ἴσασι δι’ ἀνεπισκεψίαν. ἔστι δὲ ταῦτα ὅσα ἕτερόν τι ὄντα τὴν οὐσίαν κέχρηται τοῖς εἴδεσιν. τὰ γὰρ μαθήματα περὶ εἴδη ἐστίν· οὐ γὰρ καθ’ ὑποκειμένου τινός· εἰ γὰρ καὶ καθ’ ὑποκειμένου τινὸς τὰ γεωμετρικά ἐστιν, ἀλλ’ οὐχ ᾗ γε καθ’ ὑποκειμένου. ἔχει δὲ καὶ πρὸς τὴν ὀπτικήν, ὡς αὕτη πρὸς τὴν γεωμετρίαν, ἄλλη πρὸς ταύτην, οἷον τὸ περὶ τῆς ἴριδος· τὸ μὲν γὰρ ὅτι φυσικοῦ εἰδέναι, τὸ δὲ διότι ὀπτικοῦ, ἢ ἁπλῶς ἢ τοῦ κατὰ τὸ μάθημα. πολλαὶ δὲ καὶ τῶν μὴ ὑπ’ ἀλλήλας ἐπιστημῶν ἔχουσιν οὕτως, οἷον ἰατρικὴ πρὸς γεωμετρίαν· ὅτι μὲν γὰρ τὰ ἕλκη τὰ περιφερῆ βραδύτερον ὑγιάζεται, τοῦ ἰατροῦ εἰδέναι, διότι δὲ τοῦ γεωμέτρου.

Κεφάλαιο 14

Τῶν δὲ σχημάτων ἐπιστημονικὸν μάλιστα τὸ πρῶτόν ἐστιν. αἵ τε γὰρ μαθηματικαὶ τῶν ἐπιστημῶν διὰ τούτου φέρουσι τὰς ἀποδείξεις, οἷον ἀριθμητικὴ καὶ γεωμετρία καὶ ὀπτική, καὶ σχεδὸν ὡς εἰπεῖν ὅσαι τοῦ διότι ποιοῦνται τὴν σκέψιν· ἢ γὰρ ὅλως ἢ ὡς ἐπὶ τὸ πολὺ καὶ ἐν τοῖς πλείστοις διὰ τούτου τοῦ σχήματος ὁ τοῦ διότι συλλογισμός. ὥστε κἂν διὰ τοῦτ’ εἴη μάλιστα ἐπιστημονικόν· κυριώτατον γὰρ τοῦ εἰδέναι τὸ διότι θεωρεῖν. εἶτα τὴν τοῦ τί ἐστιν ἐπιστήμην διὰ μόνου τούτου θηρεῦσαι δυνατόν. ἐν μὲν γὰρ τῷ μέσῳ σχήματι οὐ γίνεται κατηγορικὸς συλλογισμός, ἡ δὲ τοῦ τί ἐστιν ἐπιστήμη καταφάσεως· ἐν δὲ τῷ ἐσχάτῳ γίνεται μὲν ἀλλ’ οὐ καθόλου, τὸ δὲ τί ἐστι τῶν καθόλου ἐστίν· οὐ γὰρ πῇ ἐστι ζῷον δίπουν ὁ ἄνθρωπος. ἔτι τοῦτο μὲν ἐκείνων οὐδὲν προσδεῖται, ἐκεῖνα δὲ διὰ τούτου καταπυκνοῦται καὶ αὔξεται, ἕως ἂν εἰς τὰ ἄμεσα ἔλθῃ. φανερὸν οὖν ὅτι κυριώτατον τοῦ ἐπίστασθαι τὸ πρῶτον σχῆμα.

Κεφάλαιο 15

Ὥσπερ δὲ ὑπάρχειν τὸ Α τῷ Β ἐνεδέχετο ἀτόμως, οὕτω καὶ μὴ ὑπάρχειν ἐγχωρεῖ. λέγω δὲ τὸ ἀτόμως ὑπάρχειν ἢ μὴ ὑπάρχειν τὸ μὴ εἶναι αὐτῶν μέσον· οὕτω γὰρ οὐκέτι ἔσται κατ’ ἄλλο τὸ ὑπάρχειν ἢ μὴ ὑπάρχειν. ὅταν μὲν οὖν ἢ τὸ Α ἢ τὸ Β ἐν ὅλῳ τινὶ ᾖ, ἢ καὶ ἄμφω, οὐκ ἐνδέχεται τὸ Α τῷ Β πρώτως μὴ ὑπάρχειν. ἔστω γὰρ τὸ Α ἐν ὅλῳ τῷ Γ. οὐκοῦν εἰ τὸ Β μὴ ἔστιν ἐν ὅλῳ τῷ Γ (ἐγχωρεῖ γὰρ τὸ μὲν Α εἶναι ἔν τινι ὅλῳ, τὸ δὲ Β μὴ εἶναι ἐν τούτῳ), συλλογισμὸς ἔσται τοῦ μὴ ὑπάρχειν τὸ Α τῷ Β· εἰ γὰρ τῷ μὲν (79b.) Α παντὶ τὸ Γ, τῷ δὲ Β μηδενί, οὐδενὶ τῷ Β τὸ Α. ὁμοίως δὲ καὶ εἰ τὸ Β ἐν ὅλῳ τινί ἐστιν, οἷον ἐν τῷ Δ· τὸ μὲν γὰρ Δ παντὶ τῷ Β ὑπάρχει, τὸ δὲ Α οὐδενὶ τῷ Δ, ὥστε τὸ Α οὐδενὶ τῷ Β ὑπάρξει διὰ συλλογισμοῦ. τὸν αὐτὸν δὲ τρόπον δειχθήσεται καὶ εἰ ἄμφω ἐν ὅλῳ τινί ἐστιν. ὅτι δ’ ἐνδέχεται τὸ Β μὴ εἶναι ἐν ᾧ ὅλῳ ἐστὶ τὸ Α, ἢ πάλιν τὸ Α ἐν ᾧ τὸ Β, φανερὸν ἐκ τῶν συστοιχιῶν, ὅσαι μὴ ἐπαλλάττουσιν ἀλλήλαις. εἰ γὰρ μηδὲν τῶν ἐν τῇ Α Γ Δ συστοιχίᾳ κατὰ μηδενὸς κατηγορεῖται τῶν ἐν τῇ Β Ε Ζ, τὸ δ’ Α ἐν ὅλῳ ἐστὶ τῷ Θ συστοίχῳ ὄντι, φανερὸν ὅτι τὸ Β οὐκ ἔσται ἐν τῷ Θ· ἐπαλλάξουσι γὰρ αἱ συστοιχίαι. ὁμοίως δὲ καὶ εἰ τὸ Β ἐν ὅλῳ τινί ἐστιν. ἐὰν δὲ μηδέτερον ᾖ ἐν ὅλῳ μηδενί, μὴ ὑπάρχῃ δὲ τὸ Α τῷ Β, ἀνάγκη ἀτόμως μὴ ὑπάρχειν. εἰ γὰρ ἔσται τι μέσον, ἀνάγκη θάτερον αὐτῶν ἐν ὅλῳ τινὶ εἶναι. ἢ γὰρ ἐν τῷ πρώτῳ σχήματι ἢ ἐν τῷ μέσῳ ἔσται ὁ συλλογισμός. εἰ μὲν οὖν ἐν τῷ πρώτῳ, τὸ Β ἔσται ἐν ὅλῳ τινί (καταφατικὴν γὰρ δεῖ τὴν πρὸς τοῦτο γενέσθαι πρότασιν), εἰ δ’ ἐν τῷ μέσῳ, ὁπότερον ἔτυχεν (πρὸς ἀμφοτέροις γὰρ ληφθέντος τοῦ στερητικοῦ γίνεται συλλογισμός· ἀμφοτέρων δ’ ἀποφατικῶν οὐσῶν οὐκ ἔσται).

Φανερὸν οὖν ὅτι ἐνδέχεταί τε ἄλλο ἄλλῳ μὴ ὑπάρχειν ἀτόμως, καὶ πότ’ ἐνδέχεται καὶ πῶς, εἰρήκαμεν.

Κεφάλαιο 16

Ἄγνοια δ’ ἡ μὴ κατ’ ἀπόφασιν ἀλλὰ κατὰ διάθεσιν λεγομένη ἔστι μὲν ἡ διὰ συλλογισμοῦ γινομένη ἀπάτη, αὕτη δ’ ἐν μὲν τοῖς πρώτως ὑπάρχουσιν ἢ μὴ ὑπάρχουσι συμβαίνει διχῶς· ἢ γὰρ ὅταν ἁπλῶς ὑπολάβῃ ὑπάρχειν ἢ μὴ ὑπάρχειν, ἢ ὅταν διὰ συλλογισμοῦ λάβῃ τὴν ὑπόληψιν. τῆς μὲν οὖν ἁπλῆς ὑπολήψεως ἁπλῆ ἡ ἀπάτη, τῆς δὲ διὰ συλλογισμοῦ πλείους. μὴ ὑπαρχέτω γὰρ τὸ Α μηδενὶ τῷ Β ἀτόμως· οὐκοῦν ἐὰν συλλογίζηται ὑπάρχειν τὸ Α τῷ Β, μέσον λαβὼν τὸ Γ, ἠπατημένος ἔσται διὰ συλλογισμοῦ. ἐνδέχεται μὲν οὖν ἀμφοτέρας τὰς προτάσεις εἶναι ψευδεῖς, ἐνδέχεται δὲ τὴν ἑτέραν μόνον. εἰ γὰρ μήτε τὸ Α μηδενὶ τῶν Γ ὑπάρχει μήτε τὸ Γ μηδενὶ τῶν Β, εἴληπται δ’ ἑκατέρα ἀνάπαλιν, ἄμφω ψευδεῖς ἔσονται. ἐγχωρεῖ δ’ οὕτως ἔχειν τὸ Γ πρὸς τὸ Α καὶ Β ὥστε μήτε ὑπὸ τὸ Α εἶναι μήτε καθόλου τῷ Β. τὸ μὲν γὰρ Β ἀδύνατον εἶναι ἐν ὅλῳ τινί (πρώτως γὰρ ἐλέγετο αὐτῷ τὸ Α μὴ ὑπάρχειν), τὸ δὲ Α οὐκ ἀνάγκη πᾶσι τοῖς οὖσιν εἶναι καθόλου, ὥστ’ ἀμφότεραι ψευδεῖς. ἀλλὰ καὶ τὴν ἑτέραν ἐνδέχεται ἀληθῆ λαμβάνειν, οὐ μέντοι ὁποτέραν ἔτυχεν, ἀλλὰ τὴν (80a.) Α Γ· ἡ γὰρ Γ Β πρότασις ἀεὶ ψευδὴς ἔσται διὰ τὸ ἐν μηδενὶ εἶναι τὸ Β, τὴν δὲ Α Γ ἐγχωρεῖ, οἷον εἰ τὸ Α καὶ τῷ Γ καὶ τῷ Β ὑπάρχει ἀτόμως (ὅταν γὰρ πρώτως κατηγορῆται ταὐτὸ πλειόνων, οὐδέτερον ἐν οὐδετέρῳ ἔσται). διαφέρει δ’ οὐδέν, οὐδ’ εἰ μὴ ἀτόμως ὑπάρχει.

Ἡ μὲν οὖν τοῦ ὑπάρχειν ἀπάτη διὰ τούτων τε καὶ οὕτω γίνεται μόνως (οὐ γὰρ ἦν ἐν ἄλλῳ σχήματι τοῦ ὑπάρχειν συλλογισμός), ἡ δὲ τοῦ μὴ ὑπάρχειν ἔν τε τῷ πρώτῳ καὶ ἐν τῷ μέσῳ σχήματι. πρῶτον οὖν εἴπωμεν ποσαχῶς ἐν τῷ πρώτῳ γίνεται, καὶ πῶς ἐχουσῶν τῶν προτάσεων. ἐνδέχεται μὲν οὖν ἀμφοτέρων ψευδῶν οὐσῶν, οἷον εἰ τὸ Α καὶ τῷ Γ καὶ τῷ Β ὑπάρχει ἀτόμως· ἐὰν γὰρ ληφθῇ τὸ μὲν Α τῷ Γ μηδενί, τὸ δὲ Γ παντὶ τῷ Β, ψευδεῖς αἱ προτάσεις. ἐνδέχεται δὲ καὶ τῆς ἑτέρας ψευδοῦς οὔσης, καὶ ταύτης ὁποτέρας ἔτυχεν. ἐγχωρεῖ γὰρ τὴν μὲν Α Γ ἀληθῆ εἶναι, τὴν δὲ Γ Β ψευδῆ, τὴν μὲν Α Γ ἀληθῆ ὅτι οὐ πᾶσι τοῖς οὖσιν ὑπάρχει τὸ Α, τὴν δὲ Γ Β ψευδῆ ὅτι ἀδύνατον ὑπάρχειν τῷ Β τὸ Γ, ᾧ μηδενὶ ὑπάρχει τὸ Α· οὐ γὰρ ἔτι ἀληθὴς ἔσται ἡ Α Γ πρότασις· ἅμα δέ, εἰ καὶ εἰσὶν ἀμφότεραι ἀληθεῖς, καὶ τὸ συμπέρασμα ἔσται ἀληθές. ἀλλὰ καὶ τὴν Γ Β ἐνδέχεται ἀληθῆ εἶναι τῆς ἑτέρας οὔσης ψευδοῦς, οἷον εἰ τὸ Β καὶ ἐν τῷ Γ καὶ ἐν τῷ Α ἐστίν· ἀνάγκη γὰρ θάτερον ὑπὸ θάτερον εἶναι, ὥστ’ ἂν λάβῃ τὸ Α μηδενὶ τῷ Γ ὑπάρχειν, ψευδὴς ἔσται ἡ πρότασις. φανερὸν οὖν ὅτι καὶ τῆς ἑτέρας ψευδοῦς οὔσης καὶ ἀμφοῖν ἔσται ψευδὴς ὁ συλλογισμός.

Ἐν δὲ τῷ μέσῳ σχήματι ὅλας μὲν εἶναι τὰς προτάσεις ἀμφοτέρας ψευδεῖς οὐκ ἐνδέχεται· ὅταν γὰρ τὸ Α παντὶ τῷ Β ὑπάρχῃ, οὐδὲν ἔσται λαβεῖν ὃ τῷ μὲν ἑτέρῳ παντὶ θατέρῳ δ᾽ οὐδενὶ ὑπάρξει· δεῖ δ᾽ οὕτω λαμβάνειν τὰς προτάσεις ὥστε τῷ μὲν ὑπάρχειν τῷ δὲ μὴ ὑπάρχειν, εἴπερ ἔσται συλλογισμός. εἰ οὖν οὕτω λαμβανόμεναι ψευδεῖς, δῆλον ὡς ἐναντίως ἀνάπαλιν ἕξουσι· τοῦτο δ᾽ ἀδύνατον. ἐπί τι δ᾽ ἑκατέραν οὐδὲν κωλύει ψευδῆ εἶναι, οἷον εἰ τὸ Γ καὶ τῷ Α καὶ τῷ Β τινὶ ὑπάρχοι· ἂν γὰρ τῷ μὲν Α παντὶ ληφθῇ ὑπάρχον, τῷ δὲ Β μηδενί, ψευδεῖς μὲν ἀμφότεραι αἱ προτάσεις, οὐ μέντοι ὅλαι ἀλλ᾽ ἐπί τι. καὶ ἀνάπαλιν δὲ τεθέντος τοῦ στερητικοῦ ὡσαύτως. τὴν δ᾽ ἑτέραν εἶναι ψευδῆ καὶ ὁποτερανοῦν ἐνδέχεται. ὃ γὰρ ὑπάρχει τῷ Α παντί, καὶ τῷ Β ὑπάρχει· ἐὰν οὖν ληφθῇ τῷ μὲν Α ὅλῳ ὑπάρχειν (80b.) τὸ Γ, τῷ δὲ Β ὅλῳ μὴ ὑπάρχειν, ἡ μὲν Γ Α ἀληθὴς ἔσται, ἡ δὲ Γ Β ψευδής. πάλιν ὃ τῷ Β μηδενὶ ὑπάρχει, οὐδὲ τῷ Α παντὶ ὑπάρξει· εἰ γὰρ τῷ Α, καὶ τῷ Β· ἀλλ᾽ οὐχ ὑπῆρχεν. ἐὰν οὖν ληφθῇ τὸ Γ τῷ μὲν Α ὅλῳ ὑπάρχειν, τῷ δὲ Β μηδενί, ἡ μὲν Γ Β πρότασις ἀληθής, ἡ δ᾽ ἑτέρα ψευδής. ὁμοίως δὲ καὶ μετατεθέντος τοῦ στερητικοῦ. ὃ γὰρ μηδενὶ ὑπάρχει τῷ Α, οὐδὲ τῷ Β οὐδενὶ ὑπάρξει· ἐὰν οὖν ληφθῇ τὸ Γ τῷ μὲν Α ὅλῳ μὴ ὑπάρχειν, τῷ δὲ Β ὅλῳ ὑπάρχειν, ἡ μὲν Γ Α πρότασις ἀληθὴς ἔσται, ἡ ἑτέρα δὲ ψευδής. καὶ πάλιν, ὃ παντὶ τῷ Β ὑπάρχει, μηδενὶ λαβεῖν τῷ Α ὑπάρχον ψεῦδος. ἀνάγκη γάρ, εἰ τῷ Β παντί, καὶ τῷ Α τινὶ ὑπάρχειν· ἐὰν οὖν ληφθῇ τῷ μὲν Β παντὶ ὑπάρχειν τὸ Γ, τῷ δὲ Α μηδενί, ἡ μὲν Γ Β ἀληθὴς ἔσται, ἡ δὲ Γ Α ψευδής. φανερὸν οὖν ὅτι καὶ ἀμφοτέρων οὐσῶν ψευδῶν καὶ τῆς ἑτέρας μόνον ἔσται συλλογισμὸς ἀπατητικὸς ἐν τοῖς ἀτόμοις.

Κεφάλαιο 17

Ἐν δὲ τοῖς μὴ ἀτόμως ὑπάρχουσιν [ἢ μὴ ὑπάρχουσιν], ὅταν μὲν διὰ τοῦ οἰκείου μέσου γίνηται τοῦ ψεύδους ὁ συλλογισμός, οὐχ οἷόν τε ἀμφοτέρας ψευδεῖς εἶναι τὰς προτάσεις, ἀλλὰ μόνον τὴν πρὸς τῷ μείζονι ἄκρῳ. (λέγω δ' οἰκεῖον μέσον δι' οὗ γίνεται τῆς ἀντιφάσεως ὁ συλλογισμός.) ὑπαρχέτω γὰρ τὸ Α τῷ Β διὰ μέσου τοῦ Γ. ἐπεὶ οὖν ἀνάγκη τὴν Γ Β καταφατικὴν λαμβάνεσθαι συλλογισμοῦ γινομένου, δῆλον ὅτι ἀεὶ αὕτη ἔσται ἀληθής· οὐ γὰρ ἀντιστρέφεται. ἡ δὲ Α Γ ψευδής· ταύτης γὰρ ἀντιστρεφομένης ἐναντίος γίνεται ὁ συλλογισμός. ὁμοίως δὲ καὶ εἰ ἐξ ἄλλης συστοιχίας ληφθείη τὸ μέσον, οἷον τὸ Δ εἰ καὶ ἐν τῷ Α ὅλῳ ἐστι καὶ κατὰ τοῦ Β κατηγορεῖται παντός· ἀνάγκη γὰρ τὴν μὲν Δ Β πρότασιν μένειν, τὴν δ' ἑτέραν ἀντιστρέφεσθαι, ὥσθ' ἡ μὲν ἀεὶ ἀληθής, ἡ δ' ἀεὶ ψευδής. καὶ σχεδὸν ἥ γε τοιαύτη ἀπάτη ἡ αὐτή ἐστι τῇ διὰ τοῦ οἰκείου μέσου. ἐὰν δὲ μὴ διὰ τοῦ οἰκείου μέσου γίνηται ὁ συλλογισμός, ὅταν μὲν ὑπὸ τὸ Α ᾖ τὸ μέσον, τῷ δὲ Β μηδενὶ ὑπάρχῃ, ἀνάγκη ψευδεῖς εἶναι ἀμφοτέρας. ληπτέαι γὰρ ἐναντίως ἢ ὡς ἔχουσιν αἱ προτάσεις, εἰ μέλλει συλλογισμὸς ἔσεσθαι· οὕτω δὲ λαμβανομένων ἀμφότεραι γίνονται ψευδεῖς. οἷον εἰ τὸ μὲν Α ὅλῳ τῷ Δ ὑπάρχει, τὸ δὲ Δ μηδενὶ τῶν Β· ἀντιστραφέντων γὰρ τούτων συλλογισμός τ' ἔσται καὶ αἱ προτάσεις ἀμφότεραι ψευδεῖς. ὅταν δὲ μὴ ᾖ ὑπὸ τὸ Α τὸ μέσον, οἷον τὸ Δ, ἡ (81a.) μὲν Α Δ ἀληθὴς ἔσται, ἡ δὲ Δ Β ψευδής. ἡ μὲν γὰρ Α Δ ἀληθής, ὅτι οὐκ ἦν ἐν τῷ Α τὸ Δ, ἡ δὲ Δ Β ψευδής, ὅτι εἰ ἦν ἀληθής, κἂν τὸ συμπέρασμα ἦν ἀληθές· ἀλλ' ἦν ψεῦδος.

Διὰ δὲ τοῦ μέσου σχήματος γινομένης τῆς ἀπάτης, ἀμφοτέρας μὲν οὐκ ἐνδέχεται ψευδεῖς εἶναι τὰς προτάσεις ὅλας (ὅταν γὰρ ᾖ τὸ Β ὑπὸ τὸ Α, οὐδὲν ἐνδέχεται τῷ μὲν παντὶ τῷ δὲ μηδενὶ ὑπάρχειν, καθάπερ ἐλέχθη καὶ πρότερον), τὴν ἑτέραν δ' ἐγχωρεῖ, καὶ ὁποτέραν ἔτυχεν. εἰ γὰρ τὸ Γ καὶ τῷ Α καὶ τῷ Β ὑπάρχει, ἐὰν ληφθῇ τῷ μὲν Α ὑπάρχειν τῷ δὲ Β μὴ ὑπάρχειν, ἡ μὲν Γ Α ἀληθὴς ἔσται, ἡ δ' ἑτέρα ψευδής. πάλιν δ' εἰ τῷ μὲν Β ληφθείη τὸ Γ ὑπάρχον, τῷ δὲ Α μηδενί, ἡ μὲν Γ Β ἀληθὴς ἔσται, ἡ δ' ἑτέρα ψευδής.

Ἐὰν μὲν οὖν στερητικὸς ᾖ τῆς ἀπάτης ὁ συλλογισμός, εἴρηται πότε καὶ διὰ τίνων ἔσται ἡ ἀπάτη· ἐὰν δὲ καταφατικός, ὅταν μὲν διὰ τοῦ οἰκείου μέσου, ἀδύνατον ἀμφοτέρας εἶναι ψευδεῖς· ἀνάγκη γὰρ τὴν Γ Β μένειν, εἴπερ ἔσται συλλογισμός, καθάπερ ἐλέχθη καὶ πρότερον. ὥστε ἡ Α Γ ἀεὶ ἔσται ψευδής· αὕτη γάρ ἐστιν ἡ ἀντιστρεφομένη. ὁμοίως δὲ καὶ εἰ ἐξ ἄλλης συστοιχίας λαμβάνοιτο τὸ μέσον, ὥσπερ ἐλέχθη καὶ ἐπὶ τῆς στερητικῆς ἀπάτης· ἀνάγκη γὰρ τὴν μὲν Δ Β μένειν, τὴν δ’ Α Δ ἀντιστρέφεσθαι, καὶ ἡ ἀπάτη ἡ αὐτὴ τῇ πρότερον. ὅταν δὲ μὴ διὰ τοῦ οἰκείου, ἐὰν μὲν ᾖ τὸ Δ ὑπὸ τὸ Α, αὕτη μὲν ἔσται ἀληθής, ἡ ἑτέρα δὲ ψευδής· ἐγχωρεῖ γὰρ τὸ Α πλείοσιν ὑπάρχειν ἃ οὐκ ἔστιν ὑπ’ ἄλληλα. ἐὰν δὲ μὴ ᾖ τὸ Δ ὑπὸ τὸ Α, αὕτη μὲν ἀεὶ δῆλον ὅτι ἔσται ψευδής (καταφατικὴ γὰρ λαμβάνεται), τὴν δὲ Δ Β ἐνδέχεται καὶ ἀληθῆ εἶναι καὶ ψευδῆ· οὐδὲν γὰρ κωλύει τὸ μὲν Α τῷ Δ μηδενὶ ὑπάρχειν, τὸ δὲ Δ τῷ Β παντί, οἷον ζῷον ἐπιστήμῃ, ἐπιστήμη δὲ μουσικῇ. οὐδ’ αὖ μήτε τὸ Α μηδενὶ τῶν Δ μήτε τὸ Δ μηδενὶ τῶν Β. [φανερὸν οὖν ὅτι μὴ ὄντος τοῦ μέσου ὑπὸ τὸ Α καὶ ἀμφοτέρας ἐγχωρεῖ ψευδεῖς εἶναι καὶ ὁποτέραν ἔτυχεν.]

Ποσαχῶς μὲν οὖν καὶ διὰ τίνων ἐγχωρεῖ γίνεσθαι τὰς κατὰ συλλογισμὸν ἀπάτας ἔν τε τοῖς ἀμέσοις καὶ ἐν τοῖς δι’ ἀποδείξεως, φανερόν.

Κεφάλαιο 18

Φανερὸν δὲ καὶ ὅτι, εἴ τις αἴσθησις ἐκλέλοιπεν, ἀνάγκη καὶ ἐπιστήμην τινὰ ἐκλελοιπέναι, ἣν ἀδύνατον λαβεῖν, εἴπερ μανθάνομεν ἢ ἐπαγωγῇ ἢ ἀποδείξει, ἔστι δ' ἥ μὲν ἀπόδειξις (81b.) ἐκ τῶν καθόλου, ἥ δ' ἐπαγωγὴ ἐκ τῶν κατὰ μέρος, ἀδύνατον δὲ τὰ καθόλου θεωρῆσαι μὴ δι' ἐπαγωγῆς (ἐπεὶ καὶ τὰ ἐξ ἀφαιρέσεως λεγόμενα ἔσται δι' ἐπαγωγῆς γνώριμα ποιεῖν, ὅτι ὑπάρχει ἑκάστῳ γένει ἔνια, καὶ εἰ μὴ χωριστά ἐστιν, ᾗ τοιονδὶ ἕκαστον), ἐπαχθῆναι δὲ μὴ ἔχοντας αἴσθησιν ἀδύνατον. τῶν γὰρ καθ' ἕκαστον ἥ αἴσθησις· οὐ γὰρ ἐνδέχεται λαβεῖν αὐτῶν τὴν ἐπιστήμην· οὔτε γὰρ ἐκ τῶν καθόλου ἄνευ ἐπαγωγῆς, οὔτε δι' ἐπαγωγῆς ἄνευ τῆς αἰσθήσεως.

Κεφάλαιο 19

Ἔστι δὲ πᾶς συλλογισμὸς διὰ τριῶν ὅρων, καὶ ὁ μὲν δεικνύναι δυνάμενος ὅτι ὑπάρχει τὸ Α τῷ Γ διὰ τὸ ὑπάρχειν τῷ Β καὶ τοῦτο τῷ Γ, ὁ δὲ στερητικός, τὴν μὲν ἑτέραν πρότασιν ἔχων ὅτι ὑπάρχει τι ἄλλο ἄλλῳ, τὴν δ’ ἑτέραν ὅτι οὐχ ὑπάρχει. φανερὸν οὖν ὅτι αἱ μὲν ἀρχαὶ καὶ αἱ λεγόμεναι ὑποθέσεις αὗταί εἰσι· λαβόντα γὰρ ταῦτα οὕτως ἀνάγκη δεικνύναι, οἷον ὅτι τὸ Α τῷ Γ ὑπάρχει διὰ τοῦ Β, πάλιν δ’ ὅτι τὸ Α τῷ Β δι’ ἄλλου μέσου, καὶ ὅτι τὸ Β τῷ Γ ὡσαύτως. κατὰ μὲν οὖν δόξαν συλλογιζομένοις καὶ μόνον διαλεκτικῶς δῆλον ὅτι τοῦτο μόνον σκεπτέον, εἰ ἐξ ὧν ἐνδέχεται ἐνδοξοτάτων γίνεται ὁ συλλογισμός, ὥστ’ εἰ καὶ μὴ ἔστι τι τῇ ἀληθείᾳ τῶν Α Β μέσον, δοκεῖ δὲ εἶναι, ὁ διὰ τούτου συλλογιζόμενος συλλελόγισται διαλεκτικῶς· πρὸς δ’ ἀλήθειαν ἐκ τῶν ὑπαρχόντων δεῖ σκοπεῖν. ἔχει δ’ οὕτως· ἐπειδὴ ἔστιν ὃ αὐτὸ μὲν κατ’ ἄλλου κατηγορεῖται μὴ κατὰ συμβεβηκός-λέγω δὲ τὸ κατὰ συμβεβηκός, οἷον τὸ λευκόν ποτ’ ἐκεῖνό φαμεν εἶναι ἄνθρωπον, οὐχ ὁμοίως λέγοντες καὶ τὸν ἄνθρωπον λευκόν· ὁ μὲν γὰρ οὐχ ἕτερόν τι ὢν λευκός ἐστι, τὸ δὲ λευκόν, ὅτι συμβέβηκε τῷ ἀνθρώπῳ εἶναι λευκῷ-ἔστιν οὖν ἔνια τοιαῦτα ὥστε καθ’ αὑτὰ κατηγορεῖσθαι.

Ἔστω δὴ τὸ Γ τοιοῦτον ὃ αὐτὸ μὲν μηκέτι ὑπάρχει ἄλλῳ, τούτῳ δὲ τὸ Β πρώτῳ, καὶ οὐκ ἔστιν ἄλλο μεταξύ. καὶ πάλιν τὸ Ε τῷ Ζ ὡσαύτως, καὶ τοῦτο τῷ Β. ἆρ’ οὖν τοῦτο ἀνάγκη στῆναι, ἢ ἐνδέχεται εἰς ἄπειρον ἰέναι; καὶ πάλιν εἰ τοῦ μὲν Α μηδὲν κατηγορεῖται καθ’ αὑτό, τὸ δὲ Α τῷ Θ ὑπάρχει πρώτῳ, μεταξὺ δὲ μηδενὶ προτέρῳ, καὶ τὸ Θ τῷ Η, καὶ τοῦτο τῷ Β, ἆρα καὶ τοῦτο ἵστασθαι ἀνάγκη, ἢ καὶ τοῦτ’ ἐνδέχεται εἰς ἄπειρον ἰέναι; διαφέρει δὲ τοῦτο τοῦ πρότερον τοσοῦτον, ὅτι τὸ μέν ἐστιν, ἆρα ἐνδέχεται ἀρξαμένῳ ἀπὸ τοιούτου ὃ μηδενὶ ὑπάρχει ἑτέρῳ ἀλλ’ ἄλλο ἐκείνῳ, ἐπὶ τὸ ἄνω εἰς ἄπειρον ἰέναι, θάτερον δὲ ἀρξάμενον ἀπὸ τοιούτου (82a.) ὃ αὐτὸ μὲν ἄλλου, ἐκείνου δὲ μηδὲν κατηγορεῖται, ἐπὶ τὸ κάτω σκοπεῖν εἰ ἐνδέχεται εἰς ἄπειρον ἰέναι. Ἔτι τὰ μεταξὺ ἆρ’ ἐνδέχεται ἄπειρα εἶναι ὡρισμένων τῶν ἄκρων; λέγω δ’ οἷον εἰ τὸ Α τῷ Γ ὑπάρχει, μέσον δ’ αὐτῶν τὸ Β, τοῦ δὲ Β καὶ τοῦ Α ἕτερα, τούτων δ’ ἄλλα, ἆρα καὶ ταῦτα εἰς ἄπειρον ἐνδέχεται ἰέναι, ἢ ἀδύνατον; ἔστι δὲ τοῦτο σκοπεῖν ταὐτὸ καὶ εἰ αἱ ἀποδείξεις εἰς ἄπειρον ἔρχονται, καὶ εἰ ἔστιν ἀπόδειξις ἅπαντος, ἢ πρὸς ἄλληλα περαίνεται.

Ὁμοίως δὲ λέγω καὶ ἐπὶ τῶν στερητικῶν συλλογισμῶν καὶ προτάσεων, οἷον εἰ τὸ Α μὴ ὑπάρχει τῷ Β μηδενί, ἤτοι πρώτῳ, ἢ ἔσται τι μεταξὺ ᾧ προτέρῳ οὐχ ὑπάρχει (οἷον εἰ τῷ Η, ὃ τῷ Β ὑπάρχει παντί), καὶ πάλιν τούτου ἔτι ἄλλῳ προτέρῳ, οἷον εἰ τῷ Θ, ὃ τῷ Η παντὶ ὑπάρχει. καὶ γὰρ ἐπὶ τούτων ἢ ἄπειρα οἷς ὑπάρχει προτέροις, ἢ ἵσταται.

Ἐπὶ δὲ τῶν ἀντιστρεφόντων οὐχ ὁμοίως ἔχει. οὐ γὰρ ἔστιν ἐν τοῖς ἀντικατηγορουμένοις οὗ πρώτου κατηγορεῖται ἢ τελευταίου πάντα γὰρ πρὸς πάντα ταύτῃ γε ὁμοίως ἔχει, εἴτ' ἐστὶν ἄπειρα τὰ κατ' αὐτοῦ κατηγορούμενα, εἴτ' ἀμφότερά ἐστι τὰ ἀπορηθέντα ἄπειρα· πλὴν εἰ μὴ ὁμοίως ἐνδέχεται ἀντιστρέφειν, ἀλλὰ τὸ μὲν ὡς συμβεβηκός, τὸ δ' ὡς κατηγορίαν.

Κεφάλαιο 20

Ὅτι μὲν οὖν τὰ μεταξὺ οὐκ ἐνδέχεται ἄπειρα εἶναι, εἰ ἐπὶ τὸ κάτω καὶ τὸ ἄνω ἵστανται αἱ κατηγορίαι, δῆλον. λέγω δ’ ἄνω μὲν τὴν ἐπὶ τὸ καθόλου μᾶλλον, κάτω δὲ τὴν ἐπὶ τὸ κατὰ μέρος. εἰ γὰρ τοῦ Α κατηγορουμένου κατὰ τοῦ Ζ ἄπειρα τὰ μεταξύ, ἐφ’ ὧν Β, δῆλον ὅτι ἐνδέχοιτ’ ἂν ὥστε καὶ ἀπὸ τοῦ Α ἐπὶ τὸ κάτω ἕτερον ἑτέρου κατηγορεῖσθαι εἰς ἄπειρον (πρὶν γὰρ ἐπὶ τὸ Ζ ἐλθεῖν, ἄπειρα τὰ μεταξύ) καὶ ἀπὸ τοῦ Ζ ἐπὶ τὸ ἄνω ἄπειρα, πρὶν ἐπὶ τὸ Α ἐλθεῖν. ὥστ’ εἰ ταῦτα ἀδύνατα, καὶ τοῦ Α καὶ Ζ ἀδύνατονἄπειρα εἶναι μεταξύ. οὐδὲ γὰρ εἴ τις λέγοι ὅτι τὰ μέν ἐστι τῶν Α Β Ζ ἐχόμενα ἀλλήλων ὥστε μὴ εἶναι μεταξύ, τὰ δ’ οὐκ ἔστι λαβεῖν, οὐδὲν διαφέρει. ὃ γὰρ ἂν λάβω τῶν Β, ἔσται πρὸς τὸ Α ἢ πρὸς τὸ Ζ ἢ ἄπειρα τὰ μεταξὺ ἢ οὔ. ἀφ’ οὗ δὴ πρῶτον ἄπειρα, εἴτ’ εὐθὺς εἴτε μὴ εὐθύς, οὐδὲν διαφέρει· τὰ γὰρ μετὰ ταῦτα ἄπειρά ἐστιν.

Κεφάλαιο 21

Φανερὸν δὲ καὶ ἐπὶ τῆς στερητικῆς ἀποδείξεως ὅτι στήσεται, εἴπερ ἐπὶ τῆς κατηγορικῆς ἵσταται ἐπ’ ἀμφότερα. ἔστω γὰρ μὴ ἐνδεχόμενον μήτε ἐπὶ τὸ ἄνω ἀπὸ τοῦ ὑστάτου εἰς ἄπειρον ἰέναι (λέγω δ’ ὕστατον ὃ αὐτὸ μὲν ἄλλῳ (82b.) μηδενὶ ὑπάρχει, ἐκείνῳ δὲ ἄλλο, οἷον τὸ Ζ) μήτε ἀπὸ τοῦ πρώτου ἐπὶ τὸ ὕστατον (λέγω δὲ πρῶτον ὃ αὐτὸ μὲν κατ’ ἄλλου, κατ’ ἐκείνου δὲ μηδὲν ἄλλο). εἰ δὴ ταῦτ’ ἔστι, καὶ ἐπὶ τῆς ἀποφάσεως στήσεται. τριχῶς γὰρ δείκνυται μὴ ὑπάρχον. ἢ γὰρ ᾧ μὲν τὸ Γ, τὸ Β ὑπάρχει παντί, ᾧ δὲ τὸ Β, οὐδενὶ τὸ Α. τοῦ μὲν τοίνυν Β Γ, καὶ ἀεὶ τοῦ ἑτέρου διαστήματος, ἀνάγκη βαδίζειν εἰς ἄμεσα· κατηγορικὸν γὰρ τοῦτο τὸ διάστημα. τὸ δ’ ἕτερον δῆλον ὅτι εἰ ἄλλῳ οὐχ ὑπάρχει προτέρῳ, οἷον τῷ Δ, τοῦτο δεήσει τῷ Β παντὶ ὑπάρχειν. καὶ εἰ πάλιν ἄλλῳ τοῦ Δ προτέρῳ οὐχ ὑπάρχει, ἐκεῖνο δεήσει τῷ Δ παντὶ ὑπάρχειν. ὥστ’ ἐπεὶ ἡ ἐπὶ τὸ ἄνω ἵσταται ὁδός, καὶ ἡ ἐπὶ τὸ Α στήσεται, καὶ ἔσται τι πρῶτον ᾧ οὐχ ὑπάρχει.

Πάλιν εἰ τὸ μὲν Β παντὶ τῷ Α, τῷ δὲ Γ μηδενί, τὸ Α τῶν Γ οὐδενὶ ὑπάρχει. πάλιν τοῦτο εἰ δεῖ δεῖξαι, δῆλον ὅτι ἢ διὰ τοῦ ἄνω τρόπου δειχθήσεται ἢ διὰ τούτου ἢ τοῦ τρίτου. ὁ μὲν οὖν πρῶτος εἴρηται, ὁ δὲ δεύτερος δειχθήσεται. οὕτω δ’ ἂν δεικνύοι, οἷον τὸ Δ τῷ μὲν Β παντὶ ὑπάρχει, τῷ δὲ Γ οὐδενί, εἰ ἀνάγκη ὑπάρχειν τι τῷ Β. καὶ πάλιν εἰ τοῦτο τῷ Γ μὴ ὑπάρξει, ἄλλο τῷ Δ ὑπάρχει, ὃ τῷ Γ οὐχ ὑπάρχει. οὐκοῦν ἐπεὶ τὸ ὑπάρχειν ἀεὶ τῷ ἀνωτέρω ἵσταται, στήσεται καὶ τὸ μὴ ὑπάρχειν.

Ὁ δὲ τρίτος τρόπος ἦν· εἰ τὸ μὲν Α τῷ Β παντὶ ὑπάρχει, τὸ δὲ Γ μὴ ὑπάρχει, οὐ παντὶ ὑπάρχει τὸ Γ ᾧ τὸ Α. πάλιν δὲ τοῦτο ἢ διὰ τῶν ἄνω εἰρημένων ἢ ὁμοίως δειχθήσεται. ἐκείνως μὲν δὴ ἵσταται, εἰ δ’ οὕτω, πάλιν λήψεται τὸ Β τῷ Ε ὑπάρχειν, ᾧ τὸ Γ μὴ παντὶ ὑπάρχει. καὶ τοῦτο πάλιν ὁμοίως. ἐπεὶ δ’ ὑπόκειται ἵστασθαι καὶ ἐπὶ τὸ κάτω, δῆλον ὅτι στήσεται καὶ τὸ Γ οὐχ ὑπάρχον.

Φανερὸν δ’ ὅτι καὶ ἐὰν μὴ μιᾷ ὁδῷ δεικνύηται ἀλλὰ πάσαις, ὁτὲ μὲν ἐκ τοῦ πρώτου σχήματος, ὁτὲ δὲ ἐκ τοῦ δευτέρου ἢ τρίτου, ὅτι καὶ οὕτω στήσεται· πεπερασμέναι γάρ εἰσιν αἱ ὁδοί, τὰ δὲ πεπερασμένα πεπερασμενάκις ἀνάγκη πεπεράνθαι πάντα.

Ὅτι μὲν οὖν ἐπὶ τῆς στερήσεως, εἴπερ καὶ ἐπὶ τοῦ ὑπάρχειν, ἵσταται, δῆλον. ὅτι δ’ ἐπ’ ἐκείνων, λογικῶς μὲν θεωροῦσιν ὧδε φανερόν. Ἐπὶ μὲν οὖν τῶν ἐν τῷ τί ἐστι κατηγορουμένων δῆλον· εἰ γὰρ ἔστιν ὁρίσασθαι ἢ εἰ γνωστὸν τὸ τί ἦν εἶναι, τὰ δ’ ἄπειρα μὴ ἔστι διελθεῖν, ἀνάγκη πεπεράνθαι τὰ ἐν τῷ τί (83a.) ἐστι κατηγορούμενα. καθόλου δὲ ὧδε λέγομεν. ἔστι γὰρ εἰπεῖν ἀληθῶς τὸ λευκὸν βαδίζειν καὶ τὸ μέγα ἐκεῖνο ξύλον εἶναι, καὶ πάλιν τὸ ξύλον μέγα εἶναι καὶ τὸν ἄνθρωπον βαδίζειν. ἕτερον δή ἐστι τὸ οὕτως εἰπεῖν καὶ τὸ ἐκείνως. ὅταν μὲν γὰρ τὸ λευκὸν εἶναι φῶ ξύλον, τότε λέγω ὅτι ᾧ συμβέβηκε λευκῷ εἶναι ξύλον ἐστίν, ἀλλ' οὐχ ὡς τὸ ὑποκείμενον τῷ ξύλῳ τὸ λευκόν ἐστι· καὶ γὰρ οὔτε λευκὸν ὂν οὔθ' ὅπερ λευκόν τι ἐγένετο ξύλον, ὥστ' οὐκ ἔστιν ἀλλ' ἢ κατὰ συμβεβηκός. ὅταν δὲ τὸ ξύλον λευκὸν εἶναι φῶ, οὐχ ὅτι ἕτερόν τί ἐστι λευκόν, ἐκείνῳ δὲ συμβέβηκε ξύλῳ εἶναι, οἷον ὅταν τὸ μουσικὸν λευκὸν εἶναι φῶ (τότε γὰρ ὅτι ὁ ἄνθρωπος λευκός ἐστιν, ᾧ συμβέβηκεν εἶναι μουσικῷ, λέγω), ἀλλὰ τὸ ξύλον ἐστὶ τὸ ὑποκείμενον, ὅπερ καὶ ἐγένετο, οὐχ ἕτερόν τι ὂν ἢ ὅπερ ξύλον ἢ ξύλον τί. εἰ δὴ δεῖ νομοθετῆσαι, ἔστω τὸ οὕτω λέγειν κατηγορεῖν, τὸ δ' ἐκείνως ἤτοι μηδαμῶς κατηγορεῖν, ἢ κατηγορεῖν μὲν μὴ ἁπλῶς, κατὰ συμβεβηκὸς δὲ κατηγορεῖν. ἔστι δ' ὡς μὲν τὸ λευκὸν τὸ κατηγορούμενον, ὡς δὲ τὸ ξύλον τὸ οὗ κατηγορεῖται. ὑποκείσθω δὴ τὸ κατηγορούμενον κατηγορεῖσθαι ἀεί, οὗ κατηγορεῖται, ἁπλῶς, ἀλλὰ μὴ κατὰ συμβεβηκός· οὕτω γὰρ αἱ ἀποδείξεις ἀποδεικνύουσιν. ὥστε ἢ ἐν τῷ τί ἐστιν ἢ ὅτι ποιὸν ἢ ποσὸν ἢ πρός τι ἢ ποιοῦν τι ἢ πάσχον ἢ ποὺ ἢ ποτέ, ὅταν ἓν καθ' ἑνὸς κατηγορηθῇ.

Κεφάλαιο 22

Ἔτι τὰ μὲν οὐσίαν σημαίνοντα ὅπερ ἐκεῖνο ἢ ὅπερ ἐκεῖνό τι σημαίνει καθ’ οὗ κατηγορεῖται· ὅσα δὲ μὴ οὐσίαν σημαίνει, ἀλλὰ κατ’ ἄλλου ὑποκειμένου λέγεται ὃ μὴ ἔστι μήτε ὅπερ ἐκεῖνο μήτε ὅπερ ἐκεῖνό τι, συμβεβηκότα, οἷον κατὰ τοῦ ἀνθρώπου τὸ λευκόν. οὐ γάρ ἐστιν ὁ ἄνθρωπος οὔτε ὅπερ λευκὸν οὔτε ὅπερ λευκόν τι, ἀλλὰ ζῷον ἴσως· ὅπερ γὰρ ζῷόν ἐστιν ὁ ἄνθρωπος. ὅσα δὲ μὴ οὐσίαν σημαίνει, δεῖ κατά τινος ὑποκειμένου κατηγορεῖσθαι, καὶ μὴ εἶναί τι λευκὸν ὃ οὐχ ἕτερόν τι ὂν λευκόν ἐστιν. τὰ γὰρ εἴδη χαιρέτω· τερετίσματά τε γάρ ἐστι, καὶ εἰ ἔστιν, οὐδὲν πρὸς τὸν λόγον ἐστίν· αἱ γὰρ ἀποδείξεις περὶ τῶν τοιούτων εἰσίν.

Ἔτι εἰ μὴ ἔστι τόδε τοῦδε ποιότης κἀκεῖνο τούτου, μηδὲ ποιότητος ποιότης, ἀδύνατον ἀντικατηγορεῖσθαι ἀλλήλων οὕτως, ἀλλ’ ἀληθὲς μὲν ἐνδέχεται εἰπεῖν, ἀντικατηγορῆσαι δ’ ἀληθῶς οὐκ ἐνδέχεται. ἢ γάρ τοι ὡς οὐσία κατηγορηθήσεται, (83b.) οἷον ἢ γένος ὂν ἢ διαφορὰ τοῦ κατηγορουμένου. ταῦτα δὲ δέδεικται ὅτι οὐκ ἔσται ἄπειρα, οὔτ’ ἐπὶ τὸ κάτω οὔτ’ ἐπὶ τὸ ἄνω (οἷον ἄνθρωπος δίπουν, τοῦτο ζῷον, τοῦτο δ’ ἕτερον· οὐδὲ τὸ ζῷον κατ’ ἀνθρώπου, τοῦτο δὲ κατὰ Καλλίου, τοῦτο δὲ κατ’ ἄλλου ἐν τῷ τί ἐστιν), τὴν μὲν γὰρ οὐσίαν ἅπασαν ἔστιν ὁρίσασθαι τὴν τοιαύτην, τὰ δ’ ἄπειρα οὐκ ἔστι διεξελθεῖν νοοῦντα. ὥστ’ οὔτ’ ἐπὶ τὸ ἄνω οὔτ’ ἐπὶ τὸ κάτω ἄπειρα· ἐκείνην γὰρ οὐκ ἔστιν ὁρίσασθαι ἧς τὰ ἄπειρα κατηγορεῖται. ὡς μὲν δὴ γένη ἀλλήλων οὐκ ἀντικατηγορηθήσεται· ἔσται γὰρ αὐτὸ ὅπερ αὐτό τι. οὐδὲ μὴν τοῦ ποιοῦ ἢ τῶν ἄλλων οὐδέν, ἂν μὴ κατὰ συμβεβηκὸς κατηγορηθῇ· πάντα γὰρ ταῦτα συμβέβηκε καὶ κατὰ τῶν οὐσιῶν κατηγορεῖται. ἀλλὰ δὴ ὅτι οὐδ’ εἰς τὸ ἄνω ἄπειρα ἔσται· ἑκάστου γὰρ κατηγορεῖται ὃ ἂν σημαίνῃ ἢ ποιόν τι ἢ ποσόν τι ἤ τι τῶν τοιούτων ἢ τὰ ἐν τῇ οὐσίᾳ· ταῦτα δὲ πεπέρανται, καὶ τὰ γένη τῶν κατηγοριῶν πεπέρανται· ἢ γὰρ ποιὸν ἢ ποσὸν ἢ πρός τι ἢ ποιοῦν ἢ πάσχον ἢ ποὺ ἢ ποτέ. Ὑπόκειται δὴ ἓν καθ’ ἑνὸς κατηγορεῖσθαι, αὐτὰ δὲ αὑτῶν, ὅσα μὴ τί ἐστι, μὴ κατηγορεῖσθαι. συμβεβηκότα γάρ ἐστι πάντα, ἀλλὰ τὰ μὲν καθ’ αὑτά, τὰ δὲ καθ’ ἕτερον τρόπον· ταῦτα δὲ πάντα καθ’ ὑποκειμένου τινὸς κατηγορεῖσθαί φαμεν, τὸ δὲ συμβεβηκὸς οὐκ εἶναι ὑποκείμενόν τι· οὐδὲν γὰρ τῶν τοιούτων τίθεμεν εἶναι ὃ οὐχ ἕτερόν τι ὂν λέγεται ὃ λέγεται, ἀλλ’ αὐτὸ ἄλλου καὶ τοῦτο καθ’ ἑτέρου. οὔτ’ εἰς τὸ ἄνω ἄρα ἓν καθ’ ἑνὸς οὔτ’ εἰς τὸ κάτω ὑπάρχειν λεχθήσεται. καθ’ ὧν μὲν γὰρ λέγεται τὰ συμβεβηκότα, ὅσα ἐν τῇ οὐσίᾳ ἑκάστου, ταῦτα δὲ οὐκ ἄπειρα· ἄνω δὲ ταῦτά τε καὶ τὰ συμβεβηκότα, ἀμφότερα οὐκ ἄπειρα. ἀνάγκη ἄρα εἶναί τι οὗ πρῶτόν τι κατηγορεῖται καὶ τούτου ἄλλο, καὶ τοῦτο ἵστασθαι καὶ εἶναί τι ὃ οὐκέτι οὔτε κατ’ ἄλλου προτέρου οὔτε κατ’ ἐκείνου ἄλλο πρότερον κατηγορεῖται.

Εἷς μὲν οὖν τρόπος λέγεται ἀποδείξεως οὗτος, ἔτι δ’ ἄλλος, εἰ ὧν πρότερα ἄττα κατηγορεῖται, ἔστι τούτων ἀπόδειξις, ὧν δ’ ἔστιν ἀπόδειξις, οὔτε βέλτιον ἔχειν ἐγχωρεῖ πρὸς αὐτὰ τοῦ εἰδέναι, οὔτ’ εἰδέναι ἄνευ ἀποδείξεως, εἰ δὲ τόδε διὰ τῶνδε γνώριμον, τάδε δὲ μὴ ἴσμεν μηδὲ βέλτιον ἔχομεν πρὸς αὐτὰ τοῦ εἰδέναι, οὐδὲ τὸ διὰ τούτων γνώριμον ἐπιστησόμεθα. εἰ οὖν ἔστι τι εἰδέναι δι’ ἀποδείξεως ἁπλῶς καὶ μὴ ἔκ τινῶν μηδ’ ἐξ ὑποθέσεως, ἀνάγκη ἵστασθαι τὰς (84a.) κατηγορίας τὰς μεταξύ. εἰ γὰρ μὴ ἵστανται, ἀλλ’ ἔστιν ἀεὶ τοῦ ληφθέντος ἐπάνω, ἁπάντων ἔσται ἀπόδειξις· ὥστ’ εἰ τὰ ἄπειρα μὴ ἐγχωρεῖ διελθεῖν, ὧν ἔστιν ἀπόδειξις, ταῦτ’ οὐκ εἰσόμεθα δι’ ἀποδείξεως. εἰ οὖν μηδὲ βέλτιον ἔχομεν πρὸς αὐτὰ τοῦ εἰδέναι, οὐκ ἔσται οὐδὲν ἐπίστασθαι δι’ ἀποδείξεως ἁπλῶς, ἀλλ’ ἐξ ὑποθέσεως.

Λογικῶς μὲν οὖν ἐκ τούτων ἄν τις πιστεύσειε περὶ τοῦ λεχθέντος, ἀναλυτικῶς δὲ διὰ τῶνδε φανερὸν συντομώτερον, ὅτι οὔτ’ ἐπὶ τὸ ἄνω οὔτ’ ἐπὶ τὸ κάτω ἄπειρα τὰ κατηγορούμενα ἐνδέχεται εἶναι ἐν ταῖς ἀποδεικτικαῖς ἐπιστήμαις, περὶ ὧν ἡ σκέψις ἐστίν. ἡ μὲν γὰρ ἀπόδειξίς ἐστι τῶν ὅσα ὑπάρχει καθ’ αὑτὰ τοῖς πράγμασιν. καθ’ αὑτὰ δὲ διττῶς· ὅσα τε γὰρ [ἐν] ἐκείνοις ἐνυπάρχει ἐν τῷ τί ἐστι, καὶ οἷς αὐτὰ ἐν τῷ τί ἐστιν ὑπάρχουσιν αὐτοῖς· οἷον τῷ ἀριθμῷ τὸ περιττόν, ὃ ὑπάρχει μὲν ἀριθμῷ, ἐνυπάρχει δ’ αὐτὸς ὁ ἀριθμὸς ἐν τῷ λόγῳ αὐτοῦ, καὶ πάλιν πλῆθος ἢ τὸ διαιρετὸν ἐν τῷ λόγῳ τῷ τοῦ ἀριθμοῦ ἐνυπάρχει. τούτων δ’ οὐδέτερα ἐνδέχεται ἄπειρα εἶναι, οὔθ’ ὡς τὸ περιττὸν τοῦ ἀριθμοῦ (πάλιν γὰρ ἂν τῷ περιττῷ ἄλλο εἴη ᾧ ἐνυπῆρχεν ὑπάρχοντι· τοῦτο δ’ εἰ ἔστι, πρῶτον ὁ ἀριθμὸς ἐνυπάρξει ὑπάρχουσιν αὐτῷ· εἰ οὖν μὴ ἐνδέχεται ἄπειρα τοιαῦτα ὑπάρχειν ἐν τῷ ἑνί, οὐδ’ ἐπὶ τὸ ἄνω ἔσται ἄπειρα· ἀλλὰ μὴν ἀνάγκη γε πάντα ὑπάρχειν τῷ πρώτῳ, οἷον τῷ ἀριθμῷ, κἀκείνοις τὸν ἀριθμόν, ὥστ’ ἀντιστρέφοντα ἔσται, ἀλλ’ οὐχ ὑπερτείνοντα)· οὐδὲ μὴν ὅσα ἐν τῷ τί ἐστιν ἐνυπάρχει, οὐδὲ ταῦτα ἄπειρα· οὐδὲ γὰρ ἂν εἴη ὁρίσασθαι. ὥστ’ εἰ τὰ μὲν κατηγορούμενα καθ’ αὑτὰ πάντα λέγεται, ταῦτα δὲ μὴ ἄπειρα, ἵσταιτο ἂν τὰ ἐπὶ τὸ ἄνω, ὥστε καὶ ἐπὶ τὸ κάτω.

Εἰ δ’ οὕτω, καὶ τὰ ἐν τῷ μεταξὺ δύο ὅρων ἀεὶ πεπερασμένα. εἰ δὲ τοῦτο, δῆλον ἤδη καὶ τῶν ἀποδείξεων ὅτι ἀνάγκη ἀρχάς τε εἶναι, καὶ μὴ πάντων εἶναι ἀπόδειξιν, ὅπερ ἔφαμέν τινας λέγειν κατ’ ἀρχάς. εἰ γὰρ εἰσὶν ἀρχαί, οὔτε πάντ’ ἀποδεικτὰ οὔτ’ εἰς ἄπειρον οἷόν τε βαδίζειν· τὸ γὰρ εἶναι τούτων ὁποτερονοῦν οὐδὲν ἄλλο ἐστὶν ἢ τὸ εἶναι μηδὲν διάστημα ἄμεσον καὶ ἀδιαίρετον, ἀλλὰ πάντα διαιρετά. τῷ γὰρ ἐντὸς ἐμβάλλεσθαι ὅρον, ἀλλ' οὐ τῷ προσλαμβάνεσθαι ἀποδείκνυται τὸ ἀποδεικνύμενον, ὥστ' εἰ τοῦτ' εἰς ἄπειρον ἐνδέχεται ἰέναι, ἐνδέχοιτ' ἂν δύο ὅρων ἄπειρα μεταξὺ εἶναι μέσα. ἀλλὰ τοῦτ' ἀδύνατον, εἰ ἵστανται αἱ κατηγορίαι (84b.) ἐπὶ τὸ ἄνω καὶ τὸ κάτω. ὅτι δὲ ἵστανται, δέδεικται λογικῶς μὲν πρότερον, ἀναλυτικῶς δὲ νῦν.

Κεφάλαιο 23

Δεδειγμένων δὲ τούτων φανερὸν ὅτι, ἐάν τι τὸ αὐτὸ δυσὶν ὑπάρχῃ, οἷον τὸ Α τῷ τε Γ καὶ τῷ Δ, μὴ κατηγορουμένου θατέρου κατὰ θατέρου, ἢ μηδαμῶς ἢ μὴ κατὰ παντός, ὅτι οὐκ ἀεὶ κατὰ κοινόν τι ὑπάρξει. οἷον τῷ ἰσοσκελεῖ καὶ τῷ σκαληνεῖ τὸ δυσὶν ὀρθαῖς ἴσας ἔχειν κατὰ κοινόν τι ὑπάρχει (ᾗ γὰρ σχῆμά τι, ὑπάρχει, καὶ οὐχ ᾗ ἕτερον), τοῦτο δ’ οὐκ ἀεὶ οὕτως ἔχει. ἔστω γὰρ τὸ Β καθ’ ὃ τὸ Α τῷ Γ Δ ὑπάρχει. δῆλον τοίνυν ὅτι καὶ τὸ Β τῷ Γ καὶ Δ κατ’ ἄλλο κοινόν, κἀκεῖνο καθ’ ἕτερον, ὥστε δύο ὅρων μεταξὺ ἄπειροι ἂν ἐμπίπτοιεν ὅροι. ἀλλ’ ἀδύνατον. κατὰ μὲν τοίνυν κοινόν τι ὑπάρχειν οὐκ ἀνάγκη ἀεὶ τὸ αὐτὸ πλείοσιν, εἴπερ ἔσται ἄμεσα διαστήματα. ἐν μέντοι τῷ αὐτῷ γένει καὶ ἐκ τῶν αὐτῶν ἀτόμων ἀνάγκη τοὺς ὅρους εἶναι, εἴπερ τῶν καθ’ αὑτὸ ὑπαρχόντων ἔσται τὸ κοινόν· οὐ γὰρ ἦν ἐξ ἄλλου γένους εἰς ἄλλο διαβῆναι τὰ δεικνύμενα.

Φανερὸν δὲ καὶ ὅτι, ὅταν τὸ Α τῷ Β ὑπάρχῃ, εἰ μὲν ἔστι τι μέσον, ἔστι δεῖξαι ὅτι τὸ Α τῷ Β ὑπάρχει, καὶ στοιχεῖα τούτου ἔστι ταὐτὰ καὶ τοσαῦθ’ ὅσα μέσα ἐστίν· αἱ γὰρ ἄμεσοι προτάσεις στοιχεῖα, ἢ πᾶσαι ἢ αἱ καθόλου. εἰ δὲ μὴ ἔστιν, οὐκέτι ἔστιν ἀπόδειξις, ἀλλ’ ἡ ἐπὶ τὰς ἀρχὰς ὁδὸς αὕτη ἐστίν. ὁμοίως δὲ καὶ εἰ τὸ Α τῷ Β μὴ ὑπάρχει, εἰ μὲν ἔστιν ἢ μέσον ἢ πρότερον ᾧ οὐχ ὑπάρχει, ἔστιν ἀπόδειξις, εἰ δὲ μή, οὐκ ἔστιν, ἀλλ’ ἀρχή, καὶ στοιχεῖα τοσαῦτ’ ἔστιν ὅσοι ὅροι· αἱ γὰρ τούτων προτάσεις ἀρχαὶ τῆς ἀποδείξεώς εἰσιν. καὶ ὥσπερ ἔνιαι ἀρχαί εἰσιν ἀναπόδεικτοι, ὅτι ἐστὶ τόδε τοδὶ καὶ ὑπάρχει τόδε τῳδί, οὕτω καὶ ὅτι οὐκ ἔστι τόδε τοδὶ οὐδ’ ὑπάρχει τόδε τῳδί, ὥσθ’ αἱ μὲν εἶναί τι, αἱ δὲ μὴ εἶναί τι ἔσονται ἀρχαί.

Ὅταν δὲ δέῃ δεῖξαι, ληπτέον ὃ τοῦ Β πρῶτον κατηγορεῖται. ἔστω τὸ Γ, καὶ τούτου ὁμοίως τὸ Δ. καὶ οὕτως ἀεὶ βαδίζοντι οὐδέποτ’ ἐξωτέρω πρότασις οὐδ’ ὑπάρχον λαμβάνεται τοῦ Α ἐν τῷ δεικνύναι, ἀλλ’ ἀεὶ τὸ μέσον πυκνοῦται, ἕως ἀδιαίρετα γένηται καὶ ἕν. ἔστι δ’ ἓν ὅταν ἄμεσον γένηται, καὶ μία πρότασις ἁπλῶς ἡ ἄμεσος. καὶ ὥσπερ ἐν τοῖς ἄλλοις ἡ ἀρχὴ ἁπλοῦν, τοῦτο δ’ οὐ ταὐτὸ πανταχοῦ, ἀλλ’ ἐν βάρει μὲν μνᾶ, ἐν δὲ μέλει δίεσις, ἄλλο δ’ ἐν ἄλλῳ, οὕτως ἐν συλλογισμῷ τὸ ἓν (85a.) πρότασις ἄμεσος, ἐν δ’ ἀποδείξει καὶ ἐπιστήμῃ ὁ νοῦς. ἐν μὲν οὖν τοῖς δεικτικοῖς συλλογισμοῖς τοῦ ὑπάρχοντος οὐδὲν ἔξω πίπτει, ἐν δὲ τοῖς στερητικοῖς, ἔνθα μὲν ὃ δεῖ ὑπάρχειν, οὐδὲν τούτου ἔξω πίπτει, οἷον εἰ τὸ Α τῷ Β διὰ τοῦ Γ μή (εἰ γὰρ τῷ μὲν Β παντὶ τὸ Γ, τῷ δὲ Γ μηδενὶ τὸ Α)· πάλιν ἂν δέῃ ὅτι τῷ Γ τὸ Α οὐδενὶ ὑπάρχει, μέσον ληπτέον τοῦ Α καὶ Γ, καὶ οὕτως ἀεὶ πορεύσεται. ἐὰν δὲ δέῃ δεῖξαι ὅτι τὸ Δ τῷ Ε οὐχ ὑπάρχει τῷ τὸ Γ τῷ μὲν Δ παντὶ ὑπάρχειν, τῷ δὲ Ε μηδενί [ἢ μὴ παντί], τοῦ Ε οὐδέποτ’ ἔξω πεσεῖται· τοῦτο δ’ ἐστὶν ᾧ δεῖ ὑπάρχειν. ἐπὶ δὲ τοῦ τρίτου τρόπου, οὔτε ἀφ’ οὗ δεῖ οὔτε ὃ δεῖ στερῆσαι οὐδέποτ’ ἔξω βαδιεῖται.

Οὔσης δ’ ἀποδείξεως τῆς μὲν καθόλου τῆς δὲ κατὰ μέρος, καὶ τῆς μὲν κατηγορικῆς τῆς δὲ στερητικῆς, ἀμφισβητεῖται ποτέρα βελτίων· ὡς δ’ αὔτως καὶ περὶ τῆς ἀποδεικνύναι λεγομένης καὶ τῆς εἰς τὸ ἀδύνατον ἀγούσης ἀποδείξεως. πρῶτον μὲν οὖν ἐπισκεψώμεθα περὶ τῆς καθόλου καὶ τῆς κατὰ μέρος· δηλώσαντες δὲ τοῦτο, καὶ περὶ τῆς δεικνύναι λεγομένης καὶ τῆς εἰς τὸ ἀδύνατον εἴπωμεν. Δόξειε μὲν οὖν τάχ’ ἄν τισιν ὡδὶ σκοποῦσιν ἡ κατὰ μέρος εἶναι βελτίων. εἰ γὰρ καθ’ ἣν μᾶλλον ἐπιστάμεθα ἀπόδειξιν βελτίων ἀπόδειξις (αὕτη γὰρ ἀρετὴ ἀποδείξεως), μᾶλλον δ’ ἐπιστάμεθα ἕκαστον ὅταν αὐτὸ εἰδῶμεν καθ’ αὑτὸ ἢ ὅταν κατ’ ἄλλο (οἶον τὸν μουσικὸν Κορίσκον ὅταν ὅτι ὁ Κορίσκος μουσικὸς ἢ ὅταν ὅτι ἄνθρωπος μουσικός· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων), ἡ δὲ καθόλου ὅτι ἄλλο, οὐχ ὅτι αὐτὸ τετύχηκεν ἐπιδείκνυσιν (οἷον ὅτι τὸ ἰσοσκελὲς οὐχ ὅτι ἰσοσκελὲς ἀλλ’ ὅτι τρίγωνον), ἡ δὲ κατὰ μέρος ὅτι αὐτό· -εἰ δὴ βελτίων μὲν ἡ καθ’ αὑτό, τοιαύτη δ’ ἡ κατὰ μέρος τῆς καθόλου μᾶλλον, καὶ βελτίων ἂν ἡ κατὰ μέρος ἀπόδειξις εἴη. ἔτι εἰ τὸ μὲν καθόλου μὴ ἔστι τι παρὰ τὰ καθ’ ἕκαστα, ἡ δ’ ἀπόδειξις δόξαν ἐμποιεῖ εἶναί τι τοῦτο καθ’ ὃ ἀποδείκνυσι, καί τινα φύσιν ὑπάρχειν ἐν τοῖς οὖσι ταύτην, οἷον τριγώνου παρὰ τὰ τινὰ καὶ σχήματος παρὰ τὰ τινὰ καὶ ἀριθμοῦ παρὰ τοὺς τινὰς ἀριθμούς, βελτίων δ’ ἡ περὶ ὄντος ἢ μὴ ὄντος καὶ δι’ ἣν μὴ ἀπατηθήσεται ἢ δι’ ἥν, ἔστι δ’ ἡ μὲν καθόλου τοιαύτη (προϊόντες γὰρ δεικνύουσιν ὥσπερ περὶ τοῦ ἀνὰ λόγον, οἷον ὅτι ὃ ἂν ᾖ τι τοιοῦτον ἔσται ἀνὰ λόγον ὃ οὔτε γραμμὴ οὔτ’ ἀριθμὸς οὔτε στερεὸν οὔτ’ ἐπίπεδον, (85b.) ἀλλὰ παρὰ ταῦτά τι)· -εἰ οὖν καθόλου μὲν μᾶλλον αὕτη, περὶ ὄντος δ’ ἧττον τῆς κατὰ μέρος καὶ ἐμποιεῖ δόξαν ψευδῆ, χείρων ἂν εἴη ἡ καθόλου τῆς κατὰ μέρος.

Ἢ πρῶτον μὲν οὐδὲν μᾶλλον ἐπὶ τοῦ καθόλου ἢ τοῦ κατὰ μέρος ἅτερος λόγος ἐστίν; εἰ γὰρ τὸ δυσὶν ὀρθαῖς ὑπάρχει μὴ ᾗ ἰσοσκελὲς ἀλλ’ ᾗ τρίγωνον, ὁ εἰδὼς ὅτι ἰσοσκελὲς ἧττον οἶδεν ᾗ αὐτὸ ἢ ὁ εἰδὼς ὅτι τρίγωνον. ὅλως τε, εἰ μὲν μὴ ὄντος ᾗ τρίγωνον εἶτα δείκνυσιν, οὐκ ἂν εἴη ἀπόδειξις, εἰ δὲ ὄντος, ὁ εἰδὼς ἕκαστον ᾗ ἕκαστον ὑπάρχει μᾶλλον οἶδεν. εἰ δὴ τὸ τρίγωνον ἐπὶ πλέον ἐστί, καὶ ὁ αὐτὸς λόγος, καὶ μὴ καθ’ ὁμωνυμίαν τὸ τρίγωνον, καὶ ὑπάρχει παντὶ τριγώνῳ τὸ δύο, οὐκ ἂν τὸ τρίγωνον ᾗ ἰσοσκελές, ἀλλὰ τὸ ἰσοσκελὲς ᾗ τρίγωνον, ἔχοι τοιαύτας τὰς γωνίας. ὥστε ὁ καθόλου εἰδὼς μᾶλλον οἶδεν ᾗ ὑπάρχει ἢ ὁ κατὰ μέρος. βελτίων ἄρα ἡ καθόλου τῆς κατὰ μέρος. ἔτι εἰ μὲν εἴη τις λόγος εἷς καὶ μὴ ὁμωνυμία τὸ καθόλου, εἴη τ' ἂν οὐδὲν ἧττον ἐνίων τῶν κατὰ μέρος, ἀλλὰ καὶ μᾶλλον, ὅσῳ τὰ ἄφθαρτα ἐν ἐκείνοις ἐστί, τὰ δὲ κατὰ μέρος φθαρτὰ μᾶλλον, ἔτι τε οὐδεμία ἀνάγκη ὑπολαμβάνειν τι εἶναι τοῦτο παρὰ ταῦτα, ὅτι ἓν δηλοῖ, οὐδὲν μᾶλλον ἢ ἐπὶ τῶν ἄλλων ὅσα μὴ τὶ σημαίνει ἀλλ' ἢ ποιὸν ἢ πρός τι ἢ ποιεῖν. εἰ δὲ ἄρα, οὐχ ἡ ἀπόδειξις αἰτία ἀλλ' ὁ ἀκούων.

Ἔτι εἰ ἡ ἀπόδειξις μέν ἐστι συλλογισμὸς δεικτικὸς αἰτίας καὶ τοῦ διὰ τί, τὸ καθόλου δ' αἰτιώτερον (ᾧ γὰρ καθ' αὑτὸ ὑπάρχει τι, τοῦτο αὐτὸ αὑτῷ αἴτιον· τὸ δὲ καθόλου πρῶτον· αἴτιον ἄρα τὸ καθόλου)· ὥστε καὶ ἡ ἀπόδειξις βελτίων· μᾶλλον γὰρ τοῦ αἰτίου καὶ τοῦ διὰ τί ἐστιν.

Ἔτι μέχρι τούτου ζητοῦμεν τὸ διὰ τί, καὶ τότε οἰόμεθα εἰδέναι, ὅταν μὴ ᾖ ὅτι τι ἄλλο τοῦτο ἢ γινόμενον ἢ ὄν· τέλος γὰρ καὶ πέρας τὸ ἔσχατον ἤδη οὕτως ἐστίν. οἷον τίνος ἕνεκα ἦλθεν; ὅπως λάβῃ τἀργύριον, τοῦτο δ' ὅπως ἀποδῷ ὃ ὤφειλε, τοῦτο δ' ὅπως μὴ ἀδικήσῃ· καὶ οὕτως ἰόντες, ὅταν μηκέτι δι' ἄλλο μηδ' ἄλλου ἕνεκα, διὰ τοῦτο ὡς τέλος φαμὲν ἐλθεῖν καὶ εἶναι καὶ γίνεσθαι, καὶ τότε εἰδέναι μάλιστα διὰ τί ἦλθεν. εἰ δὴ ὁμοίως ἔχει ἐπὶ πασῶν τῶν αἰτιῶν καὶ τῶν διὰ τί, ἐπὶ δὲ τῶν ὅσα αἴτια οὕτως ὡς οὗ ἕνεκα οὕτως ἴσμεν μάλιστα, καὶ ἐπὶ τῶν ἄλλων ἄρα τότε μάλιστα ἴσμεν, ὅταν μηκέτι ὑπάρχῃ τοῦτο ὅτι ἄλλο. ὅταν μὲν οὖν γινώσκωμεν ὅτι τέτταρσιν αἱ ἔξω ἴσαι ὅτι ἰσοσκελές, ἔτι λείπεται διὰ (86a.) τί τὸ ἰσοσκελές-ὅτι τρίγωνον, καὶ τοῦτο, ὅτι σχῆμα εὐθύγραμμον. εἰ δὲ τοῦτο μηκέτι διότι ἄλλο, τότε μάλιστα ἴσμεν. καὶ καθόλου δὲ τότε· ἡ καθόλου ἄρα βελτίων.

Ἔτι ὅσῳ ἂν μᾶλλον κατὰ μέρος ᾖ, εἰς τὰ ἄπειρα ἐμπίπτει, ἡ δὲ καθόλου εἰς τὸ ἁπλοῦν καὶ τὸ πέρας. ἔστι δ', ᾗ μὲν ἄπειρα, οὐκ ἐπιστητά, ᾗ δὲ πεπέρανται, ἐπιστητά. ᾗ ἄρα καθόλου, μᾶλλον ἐπιστητὰ ἢ ᾗ κατὰ μέρος. ἀποδεικτὰ ἄρα μᾶλλον τὰ καθόλου. τῶν δ' ἀποδεικτῶν μᾶλλον μᾶλλον ἀπόδειξις· ἅμα γὰρ μᾶλλον τὰ πρός τι. βελτίων ἄρα ἡ καθόλου, ἐπείπερ καὶ μᾶλλον ἀπόδειξις. Ἔτι εἰ αἱρετωτέρα καθ' ἣν τοῦτο καὶ ἄλλο ἢ καθ' ἣν τοῦτο μόνον οἶδεν· ὁ δὲ τὴν καθόλου ἔχων οἶδε καὶ τὸ κατὰ μέρος, οὗτος δὲ τὴν καθόλου οὐκ οἶδεν· ὥστε κἂν οὕτως αἱρετωτέρα εἴη. Ἔτι δὲ ὧδε. τὸ γὰρ καθόλου μᾶλλον δεικνύναι ἐστὶ τὸ διὰ μέσου δεικνύναι ἐγγυτέρω ὄντος τῆς ἀρχῆς. ἐγγυτάτω δὲ τὸ ἄμεσον· τοῦτο δ' ἀρχή. εἰ οὖν ἡ ἐξ ἀρχῆς τῆς μὴ ἐξ ἀρχῆς, ἡ μᾶλλον ἐξ ἀρχῆς τῆς ἧττον ἀκριβεστέρα ἀπόδειξις. ἔστι δὲ τοιαύτη ἡ καθόλου μᾶλλον· κρείττων <ἄρ' > ἂν εἴη ἡ καθόλου. οἷον εἰ ἔδει ἀποδεῖξαι τὸ Α κατὰ τοῦ Δ· μέσα τὰ ἐφ' ὧν Β Γ· ἀνωτέρω δὴ τὸ Β, ὥστε ἡ διὰ τούτου καθόλου μᾶλλον.

Ἀλλὰ τῶν μὲν εἰρημένων ἔνια λογικά ἐστι· μάλιστα δὲ δῆλον ὅτι ἡ καθόλου κυριωτέρα, ὅτι τῶν προτάσεων τὴν μὲν προτέραν ἔχοντες ἴσμεν πως καὶ τὴν ὑστέραν καὶ ἔχομεν δυνάμει, οἷον εἴ τις οἶδεν ὅτι πᾶν τρίγωνον δυσὶν ὀρθαῖς, οἶδέ πως καὶ τὸ ἰσοσκελὲς ὅτι δύο ὀρθαῖς, δυνάμει, καὶ εἰ μὴ οἶδε τὸ ἰσοσκελὲς ὅτι τρίγωνον· ὁ δὲ ταύτην ἔχων τὴν πρότασιν τὸ καθόλου οὐδαμῶς οἶδεν, οὔτε δυνάμει οὔτ’ ἐνεργείᾳ. καὶ ἡ μὲν καθόλου νοητή, ἡ δὲ κατὰ μέρος εἰς αἴσθησιν τελευτᾷ.

Ὅτι μὲν οὖν ἡ καθόλου βελτίων τῆς κατὰ μέρος, τοσαῦθ’ ἡμῖν εἰρήσθω· ὅτι δ’ ἡ δεικτικὴ τῆς στερητικῆς, ἐντεῦθεν δῆλον. ἔστω γὰρ αὕτη ἡ ἀπόδειξις βελτίων τῶν ἄλλων τῶν αὐτῶν ὑπαρχόντων, ἡ ἐξ ἐλαττόνων αἰτημάτων ἢ ὑποθέσεων ἢ προτάσεων. εἰ γὰρ γνώριμοι ὁμοίως, τὸ θᾶττον γνῶναι διὰ τούτων ὑπάρξει· τοῦτο δ’ αἱρετώτερον. λόγος δὲ τῆς προτάσεως, ὅτι βελτίων ἡ ἐξ ἐλαττόνων, καθόλου ὅδε· εἰ γὰρ ὁμοίως εἴη τὸ γνώριμα εἶναι τὰ μέσα, τὰ δὲ πρότερα γνωριμώτερα, ἔστω ἡ μὲν διὰ μέσων ἀπόδειξις τῶν (86b.) Β Γ Δ ὅτι τὸ Α τῷ Ε ὑπάρχει, ἡ δὲ διὰ τῶν Ζ Η ὅτι τὸ Α τῷ Ε. ὁμοίως δὴ ἔχει τὸ ὅτι τὸ Α τῷ Δ ὑπάρχει καὶ τὸ Α τῷ Ε. τὸ δ’ ὅτι τὸ Α τῷ Δ πρότερον καὶ γνωριμώτερον ἢ ὅτι τὸ Α τῷ Ε· διὰ γὰρ τούτου ἐκεῖνο ἀποδείκνυται, πιστότερον δὲ τὸ δι’ οὗ. καὶ ἡ διὰ τῶν ἐλαττόνων ἄρα ἀπόδειξις βελτίων τῶν ἄλλων τῶν αὐτῶν ὑπαρχόντων. ἀμφότεραι μὲν οὖν διά τε ὅρων τριῶν καὶ προτάσεων δύο δείκνυνται, ἀλλ’ ἡ μὲν εἶναί τι λαμβάνει, ἡ δὲ καὶ εἶναι καὶ μὴ εἶναί τι· διὰ πλειόνων ἄρα, ὥστε χείρων.

Ἔτι ἐπειδὴ δέδεικται ὅτι ἀδύνατον ἀμφοτέρων οὐσῶν στερητικῶν τῶν προτάσεων γενέσθαι συλλογισμόν, ἀλλὰ τὴν μὲν δεῖ τοιαύτην εἶναι, τὴν δ’ ὅτι ὑπάρχει, ἔτι πρὸς τούτῳ δεῖ τόδε λαβεῖν. τὰς μὲν γὰρ κατηγορικὰς αὐξανομένης τῆς ἀποδείξεως ἀναγκαῖον γίνεσθαι πλείους, τὰς δὲ στερητικὰς ἀδύνατον πλείους εἶναι μιᾶς ἐν ἅπαντι συλλογισμῷ. ἔστω γὰρ μηδενὶ ὑπάρχον τὸ Α ἐφ’ ὅσων τὸ Β, τῷ δὲ Γ ὑπάρχον παντὶ τὸ Β. ἂν δὴ δέῃ πάλιν αὔξειν ἀμφοτέρας τὰς προτάσεις, μέσον ἐμβλητέον. τοῦ μὲν Α Β ἔστω τὸ Δ, τοῦ δὲ Β Γ τὸ Ε. τὸ μὲν δὴ Ε φανερὸν ὅτι κατηγορικόν, τὸ δὲ Δ τοῦ μὲν Β κατηγορικόν, πρὸς δὲ τὸ Α στερητικὸν κεῖται. τὸ μὲν γὰρ Δ παντὸς τοῦ Β, τὸ δὲ Α οὐδενὶ δεῖ τῶν Δ ὑπάρχειν. γίνεται οὖν μία στερητικὴ πρότασις ἡ τὸ Α Δ. ὁ δ’ αὐτὸς τρόπος καὶ ἐπὶ τῶν ἑτέρων συλλογισμῶν. ἀεὶ γὰρ τὸ μέσον τῶν κατηγορικῶν ὅρων κατηγορικὸν ἐπ’ ἀμφότερα· τοῦ δὲ στερητικοῦ ἐπὶ θάτερα στερητικὸν ἀναγκαῖον εἶναι, ὥστε αὕτη μία τοιαύτη γίνεται πρότασις, αἱ δ’ ἄλλαι κατηγορικαί. εἰ δὴ γνωριμώτερον δι’ οὗ δείκνυται καὶ πιστότερον, δείκνυται δ’ ἡ μὲν στερητικὴ διὰ τῆς κατηγορικῆς, αὕτη δὲ δι’ ἐκείνης οὐ δείκνυται, προτέρα καὶ γνωριμωτέρα οὖσα καὶ πιστοτέρα βελτίων ἂν εἴη. ἔτι εἰ ἀρχὴ συλλογισμοῦ ἡ καθόλου πρότασις ἄμεσος, ἔστι δ’ ἐν μὲν τῇ δεικτικῇ καταφατικὴ ἐν δὲ τῇ στερητικῇ ἀποφατικὴ ἡ καθόλου πρότασις, ἡ δὲ καταφατικὴ τῆς ἀποφατικῆς προτέρα καὶ γνωριμωτέρα (διὰ γὰρ τὴν κατάφασιν ἡ ἀπόφασις γνώριμος, καὶ προτέρα ἡ κατάφασις, ὥσπερ καὶ τὸ εἶναι τοῦ μὴ εἶναι)· ὥστε βελτίων ἡ ἀρχὴ τῆς δεικτικῆς ἢ τῆς στερητικῆς· ἡ δὲ βελτίοσιν ἀρχαῖς χρωμένη βελτίων. ἔτι ἀρχοειδεστέρα· ἄνευ γὰρ τῆς δεικνυούσης οὐκ ἔστιν ἡ στερητική.

Κεφάλαιο 28

Μία δ’ ἐπιστήμη ἐστὶν ἡ ἑνὸς γένους, ὅσα ἐκ τῶν πρώτων σύγκειται καὶ μέρη ἐστὶν ἢ πάθη τούτων καθ’ αὑτά. ἑτέρα δ’ ἐπιστήμη ἐστὶν ἑτέρας, ὅσων αἱ ἀρχαὶ μήτ’ ἐκ τῶν αὐτῶν (87b.) μήθ’ ἅτεραι ἐκ τῶν ἑτέρων. τούτου δὲ σημεῖον, ὅταν εἰς τὰ ἀναπόδεικτα ἔλθῃ· δεῖ γὰρ αὐτὰ ἐν τῷ αὐτῷ γένει εἶναι τοῖς ἀποδεδειγμένοις. σημεῖον δὲ καὶ τούτου, ὅταν τὰ δεικνύμενα δι’ αὐτῶν ἐν ταὐτῷ γένει ὦσι καὶ συγγενῆ.

Κεφάλαιο 29

Πλείους δ’ ἀποδείξεις εἶναι τοῦ αὐτοῦ ἐγχωρεῖ οὐ μόνον ἐκ τῆς αὐτῆς συστοιχίας λαμβάνοντι μὴ τὸ συνεχὲς μέσον, οἷον τῶν Α Β τὸ Γ καὶ Δ καὶ Ζ, ἀλλὰ καὶ ἐξ ἑτέρας. οἷον ἔστω τὸ Α μεταβάλλειν, τὸ δ’ ἐφ’ ᾧ Δ κινεῖσθαι, τὸ δὲ Β ἥδεσθαι, καὶ πάλιν τὸ Η ἠρεμίζεσθαι. ἀληθὲς οὖν καὶ τὸ Δ τοῦ Β καὶ τὸ Α τοῦ Δ κατηγορεῖν· ὁ γὰρ ἡδόμενος κινεῖται καὶ τὸ κινούμενον μεταβάλλει. πάλιν τὸ Α τοῦ Η καὶ τὸ Η τοῦ Β ἀληθὲς κατηγορεῖν· πᾶς γὰρ ὁ ἡδόμενος ἠρεμίζεται καὶ ὁ ἠρεμιζόμενος μεταβάλλει. ὥστε δι’ ἑτέρων μέσων καὶ οὐκ ἐκ τῆς αὐτῆς συστοιχίας ὁ συλλογισμός. οὐ μὴν ὥστε μηδέτερον κατὰ μηδετέρου λέγεσθαι τῶν μέσων· ἀνάγκη γὰρ τῷ αὐτῷ τινι ἄμφω ὑπάρχειν. ἐπισκέψασθαι δὲ καὶ διὰ τῶν ἄλλων σχημάτων ὁσαχῶς ἐνδέχεται τοῦ αὐτοῦ γενέσθαι συλλογισμόν.

Κεφάλαιο 30

Τοῦ δ’ ἀπὸ τύχης οὐκ ἔστιν ἐπιστήμη δι’ ἀποδείξεως. οὔτε γὰρ ὡς ἀναγκαῖον οὔθ’ ὡς ἐπὶ τὸ πολὺ τὸ ἀπὸ τύχης ἐστίν, ἀλλὰ τὸ παρὰ ταῦτα γινόμενον· ἡ δ’ ἀπόδειξις θατέρου τούτων. πᾶς γὰρ συλλογισμὸς ἢ δι’ ἀναγκαίων ἢ διὰ τῶν ὡς ἐπὶ τὸ πολὺ προτάσεων· καὶ εἰ μὲν αἱ προτάσεις ἀναγκαῖαι, καὶ τὸ συμπέρασμα ἀναγκαῖον, εἰ δ’ ὡς ἐπὶ τὸ πολύ, καὶ τὸ συμπέρασμα τοιοῦτον. ὥστ’ εἰ τὸ ἀπὸ τύχης μήθ’ ὡς ἐπὶ τὸ πολὺ μήτ’ ἀναγκαῖον, οὐκ ἂν εἴη αὐτοῦ ἀπόδειξις.

Κεφάλαιο 31

Οὐδὲ δι’ αἰσθήσεως ἔστιν ἐπίστασθαι. εἰ γὰρ καὶ ἔστιν ἡ αἴσθησις τοῦ τοιοῦδε καὶ μὴ τοῦδέ τινος, ἀλλ’ αἰσθάνεσθαί γε ἀναγκαῖον τόδε τι καὶ ποὺ καὶ νῦν. τὸ δὲ καθόλου καὶ ἐπὶ πᾶσιν ἀδύνατον αἰσθάνεσθαι· οὐ γὰρ τόδε οὐδὲ νῦν· οὐ γὰρ ἂν ἦν καθόλου· τὸ γὰρ ἀεὶ καὶ πανταχοῦ καθόλου φαμὲν εἶναι. ἐπεὶ οὖν αἱ μὲν ἀποδείξεις καθόλου, ταῦτα δ’ οὐκ ἔστιν αἰσθάνεσθαι, φανερὸν ὅτι οὐδ’ ἐπίστασθαι δι’ αἰσθήσεως ἔστιν, ἀλλὰ δῆλον ὅτι καὶ εἰ ἦν αἰσθάνεσθαι τὸ τρίγωνον ὅτι δυσὶν ὀρθαῖς ἴσας ἔχει τὰς γωνίας, ἐζητοῦμεν ἂν ἀπόδειξιν καὶ οὐχ ὥσπερ φασί τινες ἠπιστάμεθα· αἰσθάνεσθαι μὲν γὰρ ἀνάγκη καθ’ ἕκαστον, ἡ δ’ ἐπιστήμη τὸ τὸ καθόλου γνωρίζειν ἐστίν. διὸ καὶ εἰ ἐπὶ τῆς σελήνης ὄντες ἑωρῶμεν ἀντιφράττουσαν τὴν γῆν, οὐκ ἂν ᾔδειμεν τὴν αἰτίαν (88a.) τῆς ἐκλείψεως. ᾐσθανόμεθα γὰρ ἂν ὅτι νῦν ἐκλείπει, καὶ οὐ διότι ὅλως· οὐ γὰρ ἦν τοῦ καθόλου αἴσθησις. οὐ μὴν ἀλλ’ ἐκ τοῦ θεωρεῖν τοῦτο πολλάκις συμβαῖνον τὸ καθόλου ἂν θηρεύσαντες ἀπόδειξιν εἴχομεν· ἐκ γὰρ τῶν καθ’ ἕκαστα πλειόνων τὸ καθόλου δῆλον. τὸ δὲ καθόλου τίμιον, ὅτι δηλοῖ τὸ αἴτιον· ὥστε περὶ τῶν τοιούτων ἡ καθόλου τιμιωτέρα τῶν αἰσθήσεων καὶ τῆς νοήσεως, ὅσων ἕτερον τὸ αἴτιον· περὶ δὲ τῶν πρώτων ἄλλος λόγος.

Φανερὸν οὖν ὅτι ἀδύνατον τῷ αἰσθάνεσθαι ἐπίστασθαί τι τῶν ἀποδεικτῶν, εἰ μή τις τὸ αἰσθάνεσθαι τοῦτο λέγει, τὸ ἐπιστήμην ἔχειν δι’ ἀποδείξεως. ἔστι μέντοι ἔνια ἀναγόμενα εἰς αἰσθήσεως ἔκλειψιν ἐν τοῖς προβλήμασιν. ἔνια γὰρ εἰ ἑωρῶμεν οὐκ ἂν ἐζητοῦμεν, οὐχ ὡς εἰδότες τῷ ὁρᾶν, ἀλλ’ ὡς ἔχοντες τὸ καθόλου ἐκ τοῦ ὁρᾶν. οἷον εἰ τὴν ὕαλον τετρυπημένην ἑωρῶμεν καὶ τὸ φῶς διιόν, δῆλον ἂν ἦν καὶ διὰ τί καίει, τῷ ὁρᾶν μὲν χωρὶς ἐφ’ ἑκάστης, νοῆσαι δ’ ἅμα ὅτι ἐπὶ πασῶν οὕτως.

Κεφάλαιο 32

Τὰς δ’ αὐτὰς ἀρχὰς ἁπάντων εἶναι τῶν συλλογισμῶν ἀδύνατον, πρῶτον μὲν λογικῶς θεωροῦσιν. οἱ μὲν γὰρ ἀληθεῖς εἰσι τῶν συλλογισμῶν, οἱ δὲ ψευδεῖς. καὶ γὰρ εἰ ἔστιν ἀληθὲς ἐκ ψευδῶν συλλογίσασθαι, ἀλλ’ ἅπαξ τοῦτο γίνεται, οἷον εἰ τὸ Α κατὰ τοῦ Γ ἀληθές, τὸ δὲ μέσον τὸ Β ψεῦδος· οὔτε γὰρ τὸ Α τῷ Β ὑπάρχει οὔτε τὸ Β τῷ Γ. ἀλλ’ ἐὰν τούτων μέσα λαμβάνηται τῶν προτάσεων, ψευδεῖς ἔσονται διὰ τὸ πᾶν συμπέρασμα ψεῦδος ἐκ ψευδῶν εἶναι, τὰ δ’ ἀληθῆ ἐξ ἀληθῶν, ἕτερα δὲ τὰ ψευδῆ καὶ τἀληθῆ. εἶτα οὐδὲ τὰ ψευδῆ ἐκ τῶν αὐτῶν ἑαυτοῖς· ἔστι γὰρ ψευδῆ ἀλλήλοις καὶ ἐναντία καὶ ἀδύνατα ἅμα εἶναι, οἷον τὸ τὴν δικαιοσύνην εἶναι ἀδικίαν ἢ δειλίαν, καὶ τὸν ἄνθρωπον ἵππον ἢ βοῦν, ἢ τὸ ἴσον μεῖζον ἢ ἔλαττον.

Ἐκ δὲ τῶν κειμένων ὧδε· οὐδὲ γὰρ τῶν ἀληθῶν αἱ αὐταὶ ἀρχαὶ πάντων. ἕτεραι γὰρ πολλῶν τῷ γένει αἱ ἀρχαί, καὶ οὐδ’ ἐφαρμόττουσαι, οἷον αἱ μονάδες ταῖς στιγμαῖς οὐκ ἐφαρμόττουσιν· αἱ μὲν γὰρ οὐκ ἔχουσι θέσιν, αἱ δὲ ἔχουσιν. ἀνάγκη δέ γε ἢ εἰς μέσα ἁρμόττειν ἢ ἄνωθεν ἢ κάτωθεν, ἢ τοὺς μὲν εἴσω ἔχειν τοὺς δ’ ἔξω τῶν ὅρων. ἀλλ’ οὐδὲ τῶν κοινῶν ἀρχῶν οἷόν τ’ εἶναί τινας ἐξ ὧν ἅπαντα δειχθήσεται· λέγω δὲ κοινὰς (88b.) οἷον τὸ πᾶν φάναι ἢ ἀποφάναι. τὰ γὰρ γένη τῶν ὄντων ἕτερα, καὶ τὰ μὲν τοῖς ποσοῖς τὰ δὲ τοῖς ποιοῖς ὑπάρχει μόνοις, μεθ’ ὧν δείκνυται διὰ τῶν κοινῶν. ἔτι αἱ ἀρχαὶ οὐ πολλῷ ἐλάττους τῶν συμπερασμάτων· ἀρχαὶ μὲν γὰρ αἱ προτάσεις, αἱ δὲ προτάσεις ἢ προσλαμβανομένου ὅρου ἢ ἐμβαλλομένου εἰσίν. ἔτι τὰ συμπεράσματα ἄπειρα, οἱ δ’ ὅροι πεπερασμένοι. ἔτι αἱ ἀρχαὶ αἱ μὲν ἐξ ἀνάγκης, αἱ δ’ ἐνδεχόμεναι.

Οὕτω μὲν οὖν σκοπουμένοις ἀδύνατον τὰς αὐτὰς εἶναι πεπερασμένας, ἀπείρων ὄντων τῶν συμπερασμάτων. εἰ δ’ ἄλλως πως λέγοι τις, οἷον ὅτι αἱδὶ μὲν γεωμετρίας αἱδὶ δὲ λογισμῶν αἱδὶ δὲ ἰατρικῆς, τί ἂν εἴη τὸ λεγόμενον ἄλλο πλὴν ὅτι εἰσὶν ἀρχαὶ τῶν ἐπιστημῶν; τὸ δὲ τὰς αὐτὰς φάναι γελοῖον, ὅτι αὐταὶ αὑταῖς αἱ αὐταί· πάντα γὰρ οὕτω γίγνεται ταὐτά. ἀλλὰ μὴν οὐδὲ τὸ ἐξ ἁπάντων δείκνυσθαι ὁτιοῦν, τοῦτ’ ἐστὶ τὸ ζητεῖν ἁπάντων εἶναι τὰς αὐτὰς ἀρχάς· λίαν γὰρ εὔηθες. οὔτε γὰρ ἐν τοῖς φανεροῖς μαθήμασι τοῦτο γίνεται, οὔτ’ ἐν τῇ ἀναλύσει δυνατόν· αἱ γὰρ ἄμεσοι προτάσεις ἀρχαί, ἕτερον δὲ συμπέρασμα προσληφθείσης γίνεται προτάσεως ἀμέσου. εἰ δὲ λέγοι τις τὰς πρώτας ἀμέσους προτάσεις, ταύτας εἶναι ἀρχάς, μία ἐν ἑκάστῳ γένει ἐστίν. εἰ δὲ μήτ’ ἐξ ἁπασῶν ὡς δέον δείκνυσθαι ὁτιοῦν μήθ’ οὕτως ἑτέρας ὥσθ’ ἑκάστης ἐπιστήμης εἶναι ἑτέρας, λείπεται εἰ συγγενεῖς αἱ ἀρχαὶ πάντων, ἀλλ’ ἐκ τωνδὶ μὲν ταδί, ἐκ δὲ τωνδὶ ταδί. φανερὸν δὲ καὶ τοῦθ’ ὅτι οὐκ ἐνδέχεται· δέδεικται γὰρ ὅτι ἄλλαι ἀρχαὶ τῷ γένει εἰσὶν αἱ τῶν διαφόρων τῷ γένει. αἱ γὰρ ἀρχαὶ διτταί, ἐξ ὧν τε καὶ περὶ ὅ· αἱ μὲν οὖν ἐξ ὧν κοιναί, αἱ δὲ περὶ ὃ ἴδιαι, οἷον ἀριθμός, μέγεθος.

Κεφάλαιο 33

Τὸ δ’ ἐπιστητὸν καὶ ἐπιστήμη διαφέρει τοῦ δοξαστοῦ καὶ δόξης, ὅτι ἡ μὲν ἐπιστήμη καθόλου καὶ δι’ ἀναγκαίων, τὸ δ’ ἀναγκαῖον οὐκ ἐνδέχεται ἄλλως ἔχειν. ἔστι δέ τινα ἀληθῆ μὲν καὶ ὄντα, ἐνδεχόμενα δὲ καὶ ἄλλως ἔχειν. δῆλον οὖν ὅτι περὶ μὲν ταῦτα ἐπιστήμη οὐκ ἔστιν· εἴη γὰρ ἂν ἀδύνατα ἄλλως ἔχειν τὰ δυνατὰ ἄλλως ἔχειν. ἀλλὰ μὴν οὐδὲ νοῦς (λέγω γὰρ νοῦν ἀρχὴν ἐπιστήμης) οὐδ’ ἐπιστήμη ἀναπόδεικτος· τοῦτο δ’ ἐστὶν ὑπόληψις τῆς ἀμέσου προτάσεως. ἀληθὴς δ’ (89a.) ἐστὶ νοῦς καὶ ἐπιστήμη καὶ δόξα καὶ τὸ διὰ τούτων λεγόμενον· ὥστε λείπεται δόξαν εἶναι περὶ τὸ ἀληθὲς μὲν ἢ ψεῦδος, ἐνδεχόμενον δὲ καὶ ἄλλως ἔχειν. τοῦτο δ’ ἐστὶν ὑπόληψις τῆς ἀμέσου προτάσεως καὶ μὴ ἀναγκαίας. καὶ ὁμολογούμενον δ’ οὕτω τοῖς φαινομένοις· ἥ τε γὰρ δόξα ἀβέβαιον, καὶ ἡ φύσις ἡ τοιαύτη. πρὸς δὲ τούτοις οὐδεὶς οἴεται δοξάζειν, ὅταν οἴηται ἀδύνατον ἄλλως ἔχειν, ἀλλ’ ἐπίστασθαι· ἀλλ’ ὅταν εἶναι μὲν οὕτως, οὐ μὴν ἀλλὰ καὶ ἄλλως οὐδὲν κωλύειν, τότε δοξάζειν, ὡς τοῦ μὲν τοιούτου δόξαν οὖσαν, τοῦ δ’ ἀναγκαίου ἐπιστήμην.

Πῶς οὖν ἔστι τὸ αὐτὸ δοξάσαι καὶ ἐπίστασθαι, καὶ διὰ τί οὐκ ἔσται ἡ δόξα ἐπιστήμη, εἴ τις θήσει ἅπαν ὃ οἶδεν ἐνδέχεσθαι δοξάζειν; ἀκολουθήσει γὰρ ὁ μὲν εἰδὼς ὁ δὲ δοξάζων διὰ τῶν μέσων, ἕως εἰς τὰ ἄμεσα ἔλθῃ, ὥστ’ εἴπερ ἐκεῖνος οἶδε, καὶ ὁ δοξάζων οἶδεν. ὥσπερ γὰρ καὶ τὸ ὅτι δοξάζειν ἔστι, καὶ τὸ διότι· τοῦτο δὲ τὸ μέσον. ἢ εἰ μὲν οὕτως ὑπολήψεται τὰ μὴ ἐνδεχόμενα ἄλλως ἔχειν ὥσπερ [ἔχει] τοὺς ὁρισμοὺς δι’ ὧν αἱ ἀποδείξεις, οὐ δοξάσει ἀλλ’ ἐπιστήσεται· εἰ δ’ ἀληθῆ μὲν εἶναι, οὐ μέντοι ταῦτά γε αὐτοῖς ὑπάρχειν κατ’ οὐσίαν καὶ κατὰ τὸ εἶδος, δοξάσει καὶ οὐκ ἐπιστήσεται ἀληθῶς, καὶ τὸ ὅτι καὶ τὸ διότι, ἐὰν μὲν διὰ τῶν ἀμέσων δοξάσῃ· ἐὰν δὲ μὴ διὰ τῶν ἀμέσων, τὸ ὅτι μόνον δοξάσει; τοῦ δ’ αὐτοῦ δόξα καὶ ἐπιστήμη οὐ πάντως ἐστίν, ἀλλ’ ὥσπερ καὶ ψευδὴς καὶ ἀληθὴς τοῦ αὐτοῦ τρόπον τινά, οὕτω καὶ ἐπιστήμη καὶ δόξα τοῦ αὐτοῦ. καὶ γὰρ δόξαν ἀληθῆ καὶ ψευδῆ ὡς μέν τινες λέγουσι τοῦ αὐτοῦ εἶναι, ἄτοπα συμβαίνει αἱρεῖσθαι ἄλλα τε καὶ μὴ δοξάζειν ὃ δοξάζει ψευδῶς· ἐπεὶ δὲ τὸ αὐτὸ πλεοναχῶς λέγεται, ἔστιν ὡς ἐνδέχεται, ἔστι δ’ ὡς οὔ. τὸ μὲν γὰρ σύμμετρον εἶναι τὴν διάμετρον ἀληθῶς δοξάζειν ἄτοπον· ἀλλ’ ὅτι ἡ διάμετρος, περὶ ἣν αἱ δόξαι, τὸ αὐτό, οὕτω τοῦ αὐτοῦ, τὸ δὲ τί ἦν εἶναι ἑκατέρῳ κατὰ τὸν λόγον οὐ τὸ αὐτό. ὁμοίως δὲ καὶ ἐπιστήμη καὶ δόξα τοῦ αὐτοῦ. ἡ μὲν γὰρ οὕτως τοῦ ζῴου ὥστε μὴ ἐνδέχεσθαι μὴ εἶναι ζῷον, ἡ δ’ ὥστ’ ἐνδέχεσθαι, οἷον εἰ ἡ μὲν ὅπερ ἀνθρώπου ἐστίν, ἡ δ’ ἀνθρώπου μέν, μὴ ὅπερ δ’ ἀνθρώπου. τὸ αὐτὸ γὰρ ὅτι ἄνθρωπος, τὸ δ’ ὡς οὐ τὸ αὐτό.

Φανερὸν δ’ ἐκ τούτων ὅτι οὐδὲ δοξάζειν ἅμα τὸ αὐτὸ καὶ ἐπίστασθαι ἐνδέχεται. ἅμα γὰρ ἂν ἔχοι ὑπόληψιν τοῦ (89b.) ἄλλως ἔχειν καὶ μὴ ἄλλως τὸ αὐτό· ὅπερ οὐκ ἐνδέχεται. ἐν ἄλλῳ μὲν γὰρ ἑκάτερον εἶναι ἐνδέχεται τοῦ αὐτοῦ ὡς εἴρηται, ἐν δὲ τῷ αὐτῷ οὐδ’ οὕτως οἷόν τε· ἕξει γὰρ ὑπόληψιν ἅμα, οἷον ὅτι ὁ ἄνθρωπος ὅπερ ζῷον (τοῦτο γὰρ ἦν τὸ μὴ ἐνδέχεσθαι εἶναι μὴ ζῷον) καὶ μὴ ὅπερ ζῷον· τοῦτο γὰρ ἔστω τὸ ἐνδέχεσθαι.

Τὰ δὲ λοιπὰ πῶς δεῖ διανεῖμαι ἐπί τε διανοίας καὶ νοῦ καὶ ἐπιστήμης καὶ τέχνης καὶ φρονήσεως καὶ σοφίας, τὰ μὲν φυσικῆς τὰ δὲ ἠθικῆς θεωρίας μᾶλλόν ἐστιν.

Κεφάλαιο 34

Ἡ δ’ ἀγχίνοιά ἐστιν εὐστοχία τις ἐν ἀσκέπτῳ χρόνῳ τοῦ μέσου, οἷον εἴ τις ἰδὼν ὅτι ἡ σελήνη τὸ λαμπρὸν ἀεὶ ἔχει πρὸς τὸν ἥλιον, ταχὺ ἐνενόησε διὰ τί τοῦτο, ὅτι διὰ τὸ λάμπειν ἀπὸ τοῦ ἡλίου· ἢ διαλεγόμενον πλουσίῳ ἔγνω διότι δανείζεται· ἢ διότι φίλοι, ὅτι ἐχθροὶ τοῦ αὐτοῦ. πάντα γὰρ τὰ αἴτια τὰ μέσα [ὁ] ἰδὼν τὰ ἄκρα ἐγνώρισεν. τὸ λαμπρὸν εἶναι τὸ πρὸς τὸν ἥλιον ἐφ’ οὗ Α, τὸ λάμπειν ἀπὸ τοῦ ἡλίου Β, σελήνη τὸ Γ. ὑπάρχει δὴ τῇ μὲν σελήνῃ τῷ Γ τὸ Β, τὸ λάμπειν ἀπὸ τοῦ ἡλίου· τῷ δὲ Β τὸ Α, τὸ πρὸς τοῦτ’ εἶναι τὸ λαμπρόν, ἀφ’ οὗ λάμπει· ὥστε καὶ τῷ Γ τὸ Α διὰ τοῦ Β.

Βιβλίο 2

Κεφάλαιο 1

Τὰ ζητούμενά ἐστιν ἴσα τὸν ἀριθμὸν ὅσαπερ ἐπιστάμεθα. ζητοῦμεν δὲ τέτταρα, τὸ ὅτι, τὸ διότι, εἰ ἔστι, τί ἐστιν. ὅταν μὲν γὰρ πότερον τόδε ἢ τόδε ζητῶμεν, εἰς ἀριθμὸν θέντες, οἷον πότερον ἐκλείπει ὁ ἥλιος ἢ οὔ, τὸ ὅτι ζητοῦμεν. σημεῖον δὲ τούτου· εὑρόντες γὰρ ὅτι ἐκλείπει πεπαύμεθα· καὶ ἐὰν ἐξ ἀρχῆς εἰδῶμεν ὅτι ἐκλείπει, οὐ ζητοῦμεν πότερον. ὅταν δὲ εἰδῶμεν τὸ ὅτι, τὸ διότι ζητοῦμεν, οἷον εἰδότες ὅτι ἐκλείπει καὶ ὅτι κινεῖται ἡ γῆ, τὸ διότι ἐκλείπει ἢ διότι κινεῖται ζητοῦμεν. ταῦτα μὲν οὖν οὕτως, ἔνια δ’ ἄλλον τρόπον ζητοῦμεν, οἷον εἰ ἔστιν ἢ μὴ ἔστι κένταυρος ἢ θεός· τὸ δ’ εἰ ἔστιν ἢ μὴ ἁπλῶς λέγω, ἀλλ’ οὐκ εἰ λευκὸς ἢ μή. γνόντες δὲ ὅτι ἔστι, τί ἐστι ζητοῦμεν, οἷον τί οὖν ἐστι θεός, ἢ τί ἐστιν ἄνθρωπος;

Κεφάλαιο 2

Ἃ μὲν οὖν ζητοῦμεν καὶ ἃ εὑρόντες ἴσμεν, ταῦτα καὶ τοσαῦτά ἐστιν. ζητοῦμεν δέ, ὅταν μὲν ζητῶμεν τὸ ὅτι ἢ τὸ εἰ ἔστιν ἁπλῶς, ἆρ' ἔστι μέσον αὐτοῦ ἢ οὐκ ἔστιν· ὅταν δὲ γνόντες ἢ τὸ ὅτι ἢ εἰ ἔστιν, ἢ τὸ ἐπὶ μέρους ἢ τὸ ἁπλῶς, πάλιν [90a] τὸ διὰ τί ζητῶμεν ἢ τὸ τί ἐστι, τότε ζητοῦμεν τί τὸ μέσον. λέγω δὲ τὸ ὅτι ἔστιν ἐπὶ μέρους καὶ ἁπλῶς, ἐπὶ μέρους μέν, ἆρ' ἐκλείπει ἡ σελήνη ἢ αὔξεται; εἰ γάρ ἐστι τὶ ἢ μὴ ἔστι τί, ἐν τοῖς τοιούτοις ζητοῦμεν· ἁπλῶς δ', εἰ ἔστιν ἢ μὴ σελήνη ἢ νύξ. συμβαίνει ἄρα ἐν ἁπάσαις ταῖς ζητήσεσι ζητεῖν ἢ εἰ ἔστι μέσον ἢ τί ἐστι τὸ μέσον. τὸ μὲν γὰρ αἴτιον τὸ μέσον, ἐν ἅπασι δὲ τοῦτο ζητεῖται. ἆρ' ἐκλείπει; ἆρ' ἔστι τι αἴτιον ἢ οὔ; μετὰ ταῦτα γνόντες ὅτι ἔστι τι, τί οὖν τοῦτ' ἔστι ζητοῦμεν. τὸ γὰρ αἴτιον τοῦ εἶναι μὴ τοδὶ ἢ τοδὶ ἀλλ' ἁπλῶς τὴν οὐσίαν, ἢ τοῦ μὴ ἁπλῶς ἀλλά τι τῶν καθ' αὑτὸ ἢ κατὰ συμβεβηκός, τὸ μέσον ἐστίν. λέγω δὲ τὸ μὲν ἁπλῶς τὸ ὑποκείμενον, οἷον σελήνην ἢ γῆν ἢ ἥλιον ἢ τρίγωνον, τὸ δὲ τὶ ἔκλειψιν, ἰσότητα ἀνισότητα, εἰ ἐν μέσῳ ἢ μή. ἐν ἅπασι γὰρ τούτοις φανερόν ἐστιν ὅτι τὸ αὐτό ἐστι τὸ τί ἐστι καὶ διὰ τί ἔστιν. τί ἐστιν ἔκλειψις; στέρησις φωτὸς ἀπὸ σελήνης ὑπὸ γῆς ἀντιφράξεως. διὰ τί ἔστιν ἔκλειψις, ἢ διὰ τί ἐκλείπει ἡ σελήνη; διὰ τὸ ἀπολείπειν τὸ φῶς ἀντιφραττούσης τῆς γῆς. τί ἐστι συμφωνία; λόγος ἀριθμῶν ἐν ὀξεῖ καὶ βαρεῖ. διὰ τί συμφωνεῖ τὸ ὀξὺ τῷ βαρεῖ; διὰ τὸ λόγον ἔχειν ἀριθμῶν τὸ ὀξὺ καὶ τὸ βαρύ. ἆρ' ἔστι συμφωνεῖν τὸ ὀξὺ καὶ τὸ βαρύ; ἆρ' ἐστὶν ἐν ἀριθμοῖς ὁ λόγος αὐτῶν; λαβόντες δ' ὅτι ἔστι, τίς οὖν ἐστιν ὁ λόγος;

Κεφάλαιο 3

Ὅτι δ’ ἐστὶ τοῦ μέσου ἡ ζήτησις, δηλοῖ ὅσων τὸ μέσον αἰσθητόν. ζητοῦμεν γὰρ μὴ ᾐσθημένοι, οἷον τῆς ἐκλείψεως, εἰ ἔστιν ἢ μή. εἰ δ’ ἦμεν ἐπὶ τῆς σελήνης, οὐκ ἂν ἐζητοῦμεν οὔτ’ εἰ γίνεται οὔτε διὰ τί, ἀλλ’ ἅμα δῆλον ἂν ἦν. ἐκ γὰρ τοῦ αἰσθέσθαι καὶ τὸ καθόλου ἐγένετο ἂν ἡμῖν εἰδέναι. ἡ μὲν γὰρ αἴσθησις ὅτι νῦν ἀντιφράττει (καὶ γὰρ δῆλον ὅτι νῦν ἐκλείπει)· ἐκ δὲ τούτου τὸ καθόλου ἂν ἐγένετο.

Ὥσπερ οὖν λέγομεν, τὸ τί ἐστιν εἰδέναι ταὐτό ἐστι καὶ διὰ τί ἔστιν, τοῦτο δ’ ἢ ἁπλῶς καὶ μὴ τῶν ὑπαρχόντων τι, ἢ τῶν ὑπαρχόντων, οἷον ὅτι δύο ὀρθαί, ἢ ὅτι μεῖζον ἢ ἔλαττον.

Ὅτι μὲν οὖν πάντα τὰ ζητούμενα μέσου ζήτησίς ἐστι, δῆλον· πῶς δὲ τὸ τί ἐστι δείκνυται, καὶ τίς ὁ τρόπος τῆς ἀναγωγῆς, καὶ τί ἐστιν ὁρισμὸς καὶ τίνων, εἴπωμεν, διαπορήσαντες πρῶτον περὶ αὐτῶν. ἀρχὴ δ’ ἔστω τῶν μελλόντων [90b] ἥπερ ἐστὶν οἰκειοτάτη τῶν ἐχομένων λόγων. ἀπορήσειε γὰρ ἄν τις, ἆρ’ ἔστι τὸ αὐτὸ καὶ κατὰ τὸ αὐτὸ ὁρισμῷ εἰδέναι καὶ ἀποδείξει, ἢ ἀδύνατον; ὁ μὲν γὰρ ὁρισμὸς τοῦ τί ἐστιν εἶναι δοκεῖ, τὸ δὲ τί ἐστιν ἅπαν καθόλου καὶ κατηγορικόν· συλλογισμοὶ δ’ εἰσὶν οἱ μὲν στερητικοί, οἱ δ’ οὐ καθόλου, οἷον οἱ μὲν ἐν τῷ δευτέρῳ σχήματι στερητικοὶ πάντες, οἱ δ’ ἐν τῷ τρίτῳ οὐ καθόλου. εἶτα οὐδὲ τῶν ἐν τῷ πρώτῳ σχήματι κατηγορικῶν ἁπάντων ἔστιν ὁρισμός, οἷον ὅτι πᾶν τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει. τούτου δὲ λόγος, ὅτι τὸ ἐπίστασθαί ἐστι τὸ ἀποδεικτὸν τὸ ἀπόδειξιν ἔχειν, ὥστ’ ἐπεὶ τῶν τοιούτων ἀπόδειξις ἔστι, δῆλον ὅτι οὐκ ἂν εἴη αὐτῶν καὶ ὁρισμός· ἐπίσταιτο γὰρ ἄν τις καὶ κατὰ τὸν ὁρισμόν, οὐκ ἔχων τὴν ἀπόδειξιν· οὐδὲν γὰρ κωλύει μὴ ἅμα ἔχειν. ἱκανὴ δὲ πίστις καὶ ἐκ τῆς ἐπαγωγῆς· οὐδὲν γὰρ πώποτε ὁρισάμενοι ἔγνωμεν, οὔτε τῶν καθ’ αὐτὸ ὑπαρχόντων οὔτε τῶν συμβεβηκότων. ἔτι εἰ ὁ ὁρισμὸς οὐσίας τινὸς γνωρισμός, τά γε τοιαῦτα φανερὸν ὅτι οὐκ οὐσίαι.

Ὅτι μὲν οὖν οὐκ ἔστιν ὁρισμὸς ἅπαντος οὗπερ καὶ ἀπόδειξις, δῆλον. τί δαί, οὗ ὁρισμός, ἆρα παντὸς ἀπόδειξις ἔστιν ἢ οὔ; εἷς μὲν δὴ λόγος καὶ περὶ τούτου ὁ αὐτός. τοῦ γὰρ ἑνός, ᾗ ἕν, μία ἐπιστήμη. ὥστ’ εἴπερ τὸ ἐπίστασθαι τὸ ἀποδεικτόν ἐστι τὸ τὴν ἀπόδειξιν ἔχειν, συμβήσεταί τι ἀδύνατον· ὁ γὰρ τὸν ὁρισμὸν ἔχων ἄνευ τῆς ἀποδείξεως ἐπιστήσεται. ἔτι αἱ ἀρχαὶ τῶν ἀποδείξεων ὁρισμοί, ὧν ὅτι οὐκ ἔσονται ἀποδείξεις δέδεικται πρότερον-ἢ ἔσονται αἱ ἀρχαὶ ἀποδεικταὶ καὶ τῶν ἀρχῶν ἀρχαί, καὶ τοῦτ’ εἰς ἄπειρον βαδιεῖται, ἢ τὰ πρῶτα ὁρισμοὶ ἔσονται ἀναπόδεικτοι.

Ἀλλ’ ἆρα, εἰ μὴ παντὸς τοῦ αὐτοῦ, ἀλλὰ τινὸς τοῦ αὐτοῦ ἔστιν ὁρισμὸς καὶ ἀπόδειξις; ἢ ἀδύνατον; οὐ γὰρ ἔστιν ἀπόδειξις οὗ ὁρισμός. ὁρισμὸς μὲν γὰρ τοῦ τί ἐστι καὶ οὐσίας· αἱ δ’ ἀποδείξεις φαίνονται πᾶσαι ὑποτιθέμεναι καὶ λαμβάνουσαι τὸ τί ἐστιν, οἷον αἱ μαθηματικαὶ τί μονὰς καὶ τί τὸ περιττόν, καὶ αἱ ἄλλαι ὁμοίως. ἔτι πᾶσα ἀπόδειξις τὶ κατὰ τινὸς δείκνυσιν, οἷον ὅτι ἔστιν ἢ οὐκ ἔστιν· ἐν δὲ τῷ ὁρισμῷ οὐδὲν ἕτερον ἑτέρου κατηγορεῖται, οἷον οὔτε τὸ ζῷον κατὰ τοῦ δίποδος οὔτε τοῦτο κατὰ τοῦ ζῴου, οὐδὲ δὴ κατὰ τοῦ ἐπιπέδου τὸ σχῆμα· οὐ γάρ ἐστι τὸ ἐπίπεδον σχῆμα, οὐδὲ τὸ σχῆμα ἐπίπεδον. ἔτι ἕτερον τὸ τί ἐστι καὶ ὅτι ἔστι δεῖξαι. [91a] ὁ μὲν οὖν ὁρισμὸς τί ἐστι δηλοῖ, ἡ δὲ ἀπόδειξις ὅτι ἔστι τόδε κατὰ τοῦδε ἢ οὐκ ἔστιν. ἑτέρου δὲ ἑτέρα ἀπόδειξις, ἐὰν μὴ ὡς μέρος ᾖ τι τῆς ὅλης. τοῦτο δὲ λέγω, ὅτι δέδεικται τὸ ἰσοσκελὲς δύο ὀρθαί, εἰ πᾶν τρίγωνον δέδεικται· μέρος γάρ, τὸ δ’ ὅλον. ταῦτα δὲ πρὸς ἄλληλα οὐκ ἔχει οὕτως, τὸ ὅτι ἔστι καὶ τί ἐστιν· οὐ γάρ ἐστι θατέρου θάτερον μέρος.

Φανερὸν ἄρα ὅτι οὔτε οὗ ὁρισμός, τούτου παντὸς ἀπόδειξις, οὔτε οὗ ἀπόδειξις, τούτου παντὸς ὁρισμός, οὔτε ὅλως τοῦ αὐτοῦ οὐδενὸς ἐνδέχεται ἄμφω ἔχειν. ὥστε δῆλον ὡς οὐδὲ ὁρισμὸς καὶ ἀπόδειξις οὔτε τὸ αὐτὸ ἂν εἴη οὔτε θάτερον ἐν θατέρῳ· καὶ γὰρ ἂν τὰ ὑποκείμενα ὁμοίως εἶχεν.

Κεφάλαιο 4

Ταῦτα μὲν οὖν μέχρι τούτου διηπορήσθω· τοῦ δὲ τί ἐστι πότερον ἔστι συλλογισμὸς καὶ ἀπόδειξις ἢ οὐκ ἔστι, καθάπερ νῦν ὁ λόγος ὑπέθετο; ὁ μὲν γὰρ συλλογισμὸς τὶ κατὰ τινὸς δείκνυσι διὰ τοῦ μέσου· τὸ δὲ τί ἐστιν ἴδιόν τε, καὶ ἐν τῷ τί ἐστι κατηγορεῖται. ταῦτα δ᾽ ἀνάγκη ἀντιστρέφειν. εἰ γὰρ τὸ Α τοῦ Γ ἴδιον, δῆλον ὅτι καὶ τοῦ Β καὶ τοῦτο τοῦ Γ, ὥστε πάντα ἀλλήλων. ἀλλὰ μὴν καὶ εἰ τὸ Α ἐν τῷ τί ἐστιν ὑπάρχει παντὶ τῷ Β, καὶ καθόλου τὸ Β παντὸς τοῦ Γ ἐν τῷ τί ἐστι λέγεται, ἀνάγκη καὶ τὸ Α ἐν τῷ τί ἐστι τοῦ Γ λέγεσθαι. εἰ δὲ μὴ οὕτω τις λήψεται διπλώσας, οὐκ ἀνάγκη ἔσται τὸ Α τοῦ Γ κατηγορεῖσθαι ἐν τῷ τί ἐστιν, εἰ τὸ μὲν Α τοῦ Β ἐν τῷ τί ἐστι, μὴ καθ᾽ ὅσων δὲ τὸ Β, ἐν τῷ τί ἐστιν. τὸ δὲ τί ἐστιν ἄμφω ταῦτα ἕξει· ἔσται ἄρα καὶ τὸ Β κατὰ τοῦ Γ τὸ τί ἐστιν. εἰ δὴ τὸ τί ἐστι καὶ τὸ τί ἦν εἶναι ἄμφω ἔχει, ἐπὶ τοῦ μέσου ἔσται πρότερον τὸ τί ἦν εἶναι. ὅλως τε, εἰ ἔστι δεῖξαι τί ἐστιν ἄνθρωπος, ἔστω τὸ Γ ἄνθρωπος, τὸ δὲ Α τὸ τί ἐστιν, εἴτε ζῷον δίπουν εἴτ᾽ ἄλλο τι. εἰ τοίνυν συλλογιεῖται, ἀνάγκη κατὰ τοῦ Β τὸ Α παντὸς κατηγορεῖσθαι. τοῦτο δ᾽ ἔσται ἄλλος λόγος μέσος, ὥστε καὶ τοῦτο ἔσται τί ἐστιν ἄνθρωπος. λαμβάνει οὖν ὃ δεῖ δεῖξαι· καὶ γὰρ τὸ Β ἔσται τί ἐστιν ἄνθρωπος.

Δεῖ δ᾽ ἐν ταῖς δυσὶ προτάσεσι καὶ τοῖς πρώτοις καὶ ἀμέσοις σκοπεῖν· μάλιστα γὰρ φανερὸν τὸ λεγόμενον γίνεται. οἱ μὲν οὖν διὰ τοῦ ἀντιστρέφειν δεικνύντες τί ἐστι ψυχή, ἢ τί ἐστιν ἄνθρωπος ἢ ἄλλο ὁτιοῦν τῶν ὄντων, τὸ ἐξ ἀρχῆς αἰτοῦνται, οἷον εἴ τις ἀξιώσειε ψυχὴν εἶναι τὸ αὐτὸ αὑτῷ αἴτιον τοῦ ζῆν, τοῦτο δ᾽ ἀριθμὸν αὐτὸν αὑτὸν κινοῦντα· ἀνάγκη γὰρ αἰτῆσαι τὴν ψυχὴν ὅπερ ἀριθμὸν εἶναι αὐτὸν αὑτὸν κινοῦντα, οὕτως ὡς τὸ αὐτὸ ὄν. οὐ γὰρ εἰ ἀκολουθεῖ τὸ Α τῷ Β καὶ τοῦτο τῷ Γ, ἔσται τῷ Γ τὸ Α τὸ τί ἦν εἶναι, ἀλλ᾽ ἀληθὲς εἰπεῖν ἔσται μόνον· οὐδ᾽ εἰ ἔστι τὸ Α ὅπερ τι καὶ κατὰ τοῦ Β κατηγορεῖται παντός. καὶ γὰρ τὸ ζῴῳ εἶναι κατηγορεῖται κατὰ τοῦ ἀνθρώπῳ εἶναι (ἀληθὲς γὰρ πᾶν τὸ ἀνθρώπῳ εἶναι ζῴῳ εἶναι, ὥσπερ καὶ πάντα ἄνθρωπον ζῷον), ἀλλ᾽ οὐχ οὕτως ὥστε ἓν εἶναι. ἐὰν μὲν οὖν μὴ οὕτω λάβῃ, οὐ συλλογιεῖται ὅτι τὸ Α ἐστὶ τῷ Γ τὸ τί ἦν εἶναι καὶ ἡ οὐσία· ἐὰν δὲ οὕτω λάβῃ, πρότερον ἔσται εἰληφὼς τῷ Γ τί ἐστι τὸ τί ἦν εἶναι [τὸ Β]. ὥστ᾽ οὐκ ἀποδέδεικται· τὸ γὰρ ἐν ἀρχῇ εἴληφεν.

Κεφάλαιο 5

Ἀλλὰ μὴν οὐδ’ ἡ διὰ τῶν διαιρέσεων ὁδὸς συλλογίζεται, καθάπερ ἐν τῇ ἀναλύσει τῇ περὶ τὰ σχήματα εἴρηται. οὐδαμοῦ γὰρ ἀνάγκη γίνεται τὸ πρᾶγμα ἐκεῖνο εἶναι τωνδὶ ὄντων, ἀλλ’ ὥσπερ οὐδ’ ὁ ἐπάγων ἀποδείκνυσιν. οὐ γὰρ δεῖ τὸ συμπέρασμα ἐρωτᾶν, οὐδὲ τῷ δοῦναι εἶναι, ἀλλ’ ἀνάγκη εἶναι ἐκείνων ὄντων, κἂν μὴ φῇ ὁ ἀποκρινόμενος. ἆρ’ ὁ ἄνθρωπος ζῷον ἢ ἄψυχον; εἶτ’ ἔλαβε ζῷον, οὐ συλλελόγισται. πάλιν ἅπαν ζῷον ἢ πεζὸν ἢ ἔνυδρον· ἔλαβε πεζόν. καὶ τὸ εἶναι τὸν ἄνθρωπον τὸ ὅλον, ζῷον πεζόν, οὐκ ἀνάγκη ἐκ τῶν εἰρημένων, ἀλλὰ λαμβάνει καὶ τοῦτο. διαφέρει δ’ οὐδὲν ἐπὶ πολλῶν ἢ ὀλίγων οὕτω ποιεῖν· τὸ αὐτὸ γάρ ἐστιν. (ἀσυλλόγιστος μὲν οὖν καὶ ἡ χρῆσις γίνεται τοῖς οὕτω μετιοῦσι καὶ τῶν ἐνδεχομένων συλλογισθῆναι.) τί γὰρ κωλύει τοῦτο ἀληθὲς μὲν τὸ πᾶν εἶναι κατὰ τοῦ ἀνθρώπου, μὴ μέντοι τὸ τί ἐστι μηδὲ τὸ τί ἦν εἶναι δηλοῦν; ἔτι τί κωλύει ἢ προσθεῖναί τι ἢ ἀφελεῖν ἢ ὑπερβεβηκέναι τῆς οὐσίας; Ταῦτα μὲν οὖν παρίεται μέν, ἐνδέχεται δὲ λῦσαι τῷ λαμβάνειν ἐν τῷ τί ἐστι πάντα, καὶ τὸ ἐφεξῆς τῇ διαιρέσει ποιεῖν, αἰτούμενον τὸ πρῶτον, καὶ μηδὲν παραλείπειν. τοῦτο δ’ ἀναγκαῖον, εἰ ἅπαν εἰς τὴν διαίρεσιν ἐμπίπτει καὶ μηδὲν ἐλλείπει· [τοῦτο δ’ ἀναγκαῖον,] ἄτομον γὰρ ἤδη δεῖ εἶναι. ἀλλὰ συλλογισμὸς ὅμως οὐκ ἔστι, ἀλλ’ εἴπερ, ἄλλον τρόπον γνωρίζειν ποιεῖ. καὶ τοῦτο μὲν οὐδὲν ἄτοπον· οὐδὲ γὰρ ὁ ἐπάγων ἴσως ἀποδείκνυσιν, ἀλλ’ ὅμως δηλοῖ τι. συλλογισμὸν δ’ οὐ λέγει ὁ ἐκ τῆς διαιρέσεως λέγων τὸν ὁρισμόν. ὥσπερ γὰρ ἐν τοῖς συμπεράσμασι τοῖς ἄνευ τῶν μέσων, ἐάν τις εἴπῃ ὅτι τούτων ὄντων ἀνάγκη τοδὶ εἶναι, ἐνδέχεται ἐρωτῆσαι διὰ τί, οὕτως καὶ ἐν τοῖς διαιρετικοῖς ὅροις. τί ἐστιν [92a] ἄνθρωπος; ζῷον θνητόν, ὑπόπουν, δίπουν, ἄπτερον. διὰ τί, παρ’ ἑκάστην πρόσθεσιν; ἐρεῖ γάρ, καὶ δείξει τῇ διαιρέσει, ὡς οἴεται, ὅτι πᾶν ἢ θνητὸν ἢ ἀθάνατον. ὁ δὲ τοιοῦτος λόγος ἅπας οὐκ ἔστιν ὁρισμός, ὥστ’ εἰ καὶ ἀπεδείκνυτο τῇ διαιρέσει, ἀλλ’ ὅ γ’ ὁρισμὸς οὐ συλλογισμὸς γίνεται.

Κεφάλαιο 6

Ἀλλ’ ἆρα ἔστι καὶ ἀποδεῖξαι τὸ τί ἐστι κατ’ οὐσίαν, ἐξ ὑποθέσεως δέ, λαβόντα τὸ μὲν τί ἦν εἶναι τὸ ἐκ τῶν ἐν τῷ τί ἐστιν ἴδιον, ταδὶ δὲ ἐν τῷ τί ἐστι μόνα, καὶ ἴδιον τὸ πᾶν; τοῦτο γάρ ἐστι τὸ εἶναι ἐκείνῳ. ἢ πάλιν εἴληφε τὸ τί ἦν εἶναι καὶ ἐν τούτῳ; ἀνάγκη γὰρ διὰ τοῦ μέσου δεῖξαι. ἔτι ὥσπερ οὐδ’ ἐν συλλογισμῷ λαμβάνεται τί ἐστι τὸ συλλελογίσθαι (ἀεὶ γὰρ ὅλη ἢ μέρος ἡ πρότασις, ἐξ ὧν ὁ συλλογισμός), οὕτως οὐδὲ τὸ τί ἦν εἶναι δεῖ ἐνεῖναι ἐν τῷ συλλογισμῷ, ἀλλὰ χωρὶς τοῦτο τῶν κειμένων εἶναι, καὶ πρὸς τὸν ἀμφισβητοῦντα εἰ συλλελόγισται ἢ μή, τοῦτο ἀπαντᾶν ὅτι “τοῦτο γὰρ ἦν συλλογισμός”, καὶ πρὸς τὸν ὅτι οὐ τὸ τί ἦν εἶναι συλλελόγισται, ὅτι “ναί· τοῦτο γὰρ ἔκειτο ἡμῖν τὸ τί ἦν εἶναι”. ὥστε ἀνάγκη καὶ ἄνευ τοῦ τί συλλογισμὸς ἢ τὸ τί ἦν εἶναι συλλελογίσθαι τι.

Κἂν ἐξ ὑποθέσεως δὲ δεικνύῃ, οἷον εἰ τὸ κακῷ ἐστὶ τὸ διαιρετῷ εἶναι, τὸ δ’ ἐναντίῳ τὸ τῷ ἐναντίῳ <ἐναντίῳ > εἶναι, ὅσοις ἔστι τι ἐναντίον· τὸ δ’ ἀγαθὸν τῷ κακῷ ἐναντίον καὶ τὸ ἀδιαίρετον τῷ διαιρετῷ· ἔστιν ἄρα τὸ ἀγαθῷ εἶναι τὸ ἀδιαιρέτῳ εἶναι. καὶ γὰρ ἐνταῦθα λαβὼν τὸ τί ἦν εἶναι δείκνυσι· λαμβάνει δ’ εἰς τὸ δεῖξαι τὸ τί ἦν εἶναι. “ἕτερον μέντοι”. ἔστω· καὶ γὰρ ἐν ταῖς ἀποδείξεσιν, ὅτι ἐστὶ τόδε κατὰ τοῦδε· ἀλλὰ μὴ αὐτό, μηδὲ οὗ ὁ αὐτὸς λόγος, καὶ ἀντιστρέφει. πρὸς ἀμφοτέρους δέ, τόν τε κατὰ διαίρεσιν δεικνύντα καὶ πρὸς τὸν οὕτω συλλογισμόν, τὸ αὐτὸ ἀπόρημα· διὰ τί ἔσται ὁ ἄνθρωπος ζῷον πεζὸν δίπουν, ἀλλ’ οὐ ζῷον καὶ πεζόν <καὶ δίπουν >; ἐκ γὰρ τῶν λαμβανομένων οὐδεμία ἀνάγκη ἐστὶν ἓν γίνεσθαι τὸ κατηγορούμενον, ἀλλ’ ὥσπερ ἂν ἄνθρωπος ὁ αὐτὸς εἴη μουσικὸς καὶ γραμματικός.

Κεφάλαιο 7

>Πῶς οὖν δὴ ὁ ὁριζόμενος δείξει τὴν οὐσίαν ἢ τὸ τί ἐστιν; οὔτε γὰρ ὡς ἀποδεικνὺς ἐξ ὁμολογουμένων εἶναι δῆλον ποιήσει ὅτι ἀνάγκη ἐκείνων ὄντων ἕτερόν τι εἶναι (ἀπόδειξις γὰρ τοῦτο), οὔθ’ ὡς ὁ ἐπάγων διὰ τῶν καθ’ ἕκαστα δήλων ὄντων, ὅτι πᾶν οὕτως τῷ μηδὲν ἄλλως· οὐ γὰρ τί [92b] ἐστι δείκνυσιν, ἀλλ’ ὅτι ἢ ἔστιν ἢ οὐκ ἔστιν. τίς οὖν ἄλλος τρόπος λοιπός; οὐ γὰρ δὴ δείξει γε τῇ αἰσθήσει ἢ τῷ δακτύλῳ.

Ἔτι πῶς δείξει τὸ τί ἐστιν; ἀνάγκη γὰρ τὸν εἰδότα τὸ τί ἐστιν ἄνθρωπος ἢ ἄλλο ὁτιοῦν, εἰδέναι καὶ ὅτι ἔστιν (τὸ γὰρ μὴ ὂν οὐδεὶς οἶδεν ὅ τι ἐστίν, ἀλλὰ τί μὲν σημαίνει ὁ λόγος ἢ τὸ ὄνομα, ὅταν εἴπω τραγέλαφος, τί δ’ ἐστὶ τραγέλαφος ἀδύνατον εἰδέναι). ἀλλὰ μὴν εἰ δείξει τί ἐστι καὶ ὅτι ἔστι, πῶς τῷ αὐτῷ λόγῳ δείξει; ὅ τε γὰρ ὁρισμὸς ἕν τι δηλοῖ καὶ ἡ ἀπόδειξις· τὸ δὲ τί ἐστιν ἄνθρωπος καὶ τὸ εἶναι ἄνθρωπον ἄλλο.

Εἶτα καὶ δι’ ἀποδείξεώς φαμεν ἀναγκαῖον εἶναι δείκνυσθαι ἅπαν ὅ τι ἐστίν, εἰ μὴ οὐσία εἴη. τὸ δ’ εἶναι οὐκ οὐσία οὐδενί· οὐ γὰρ γένος τὸ ὄν. ἀπόδειξις ἄρ’ ἔσται ὅτι ἔστιν. ὅπερ καὶ νῦν ποιοῦσιν αἱ ἐπιστῆμαι. τί μὲν γὰρ σημαίνει τὸ τρίγωνον, ἔλαβεν ὁ γεωμέτρης, ὅτι δ’ ἔστι, δείκνυσιν. τί οὖν δείξει ὁ ὁριζόμενος ἢ τί ἐστι τὸ τρίγωνον; εἰδὼς ἄρα τις ὁρισμῷ τί ἐστιν, εἰ ἔστιν οὐκ εἴσεται. ἀλλ’ ἀδύνατον.

Φανερὸν δὲ καὶ κατὰ τοὺς νῦν τρόπους τῶν ὅρων ὡς οὐ δεικνύουσιν οἱ ὁριζόμενοι ὅτι ἔστιν. εἰ γὰρ καὶ ἔστιν ἐκ τοῦ μέσου τι ἴσον, ἀλλὰ διὰ τί ἔστι τὸ ὁρισθέν; καὶ διὰ τί τοῦτ’ ἔστι κύκλος; εἴη γὰρ ἂν καὶ ὀρειχάλκου φάναι εἶναι αὐτόν. οὔτε γὰρ ὅτι δυνατὸν εἶναι τὸ λεγόμενον προσδηλοῦσιν οἱ ὅροι, οὔτε ὅτι ἐκεῖνο οὗ φασὶν εἶναι ὁρισμοί, ἀλλ’ ἀεὶ ἔξεστι λέγειν τὸ διὰ τί.

Εἰ ἄρα ὁ ὁριζόμενος δείκνυσιν ἢ τί ἐστιν ἢ τί σημαίνει τοὔνομα, εἰ μὴ ἔστι μηδαμῶς τοῦ τί ἐστιν, εἴη ἂν ὁ ὁρισμὸς λόγος ὀνόματι τὸ αὐτὸ σημαίνων. ἀλλ’ ἄτοπον. πρῶτον μὲν γὰρ καὶ μὴ οὐσιῶν ἂν εἴη καὶ τῶν μὴ ὄντων· σημαίνειν γὰρ ἔστι καὶ τὰ μὴ ὄντα. ἔτι πάντες οἱ λόγοι ὁρισμοὶ ἂν εἶεν· εἴη γὰρ ἂν ὄνομα θέσθαι ὁποιῳοῦν λόγῳ, ὥστε ὅρους ἂν διαλεγοίμεθα πάντες καὶ ἡ Ἰλιὰς ὁρισμὸς ἂν εἴη. ἔτι οὐδεμία ἀπόδειξις ἀποδείξειεν ἂν ὅτι τοῦτο τοὔνομα τουτὶ δηλοῖ· οὐδ’ οἱ ὁρισμοὶ τοίνυν τοῦτο προσδηλοῦσιν.

Ἐκ μὲν τοίνυν τούτων οὔτε ὁρισμὸς καὶ συλλογισμὸς φαίνεται ταὐτὸν ὄν, οὔτε ταὐτοῦ συλλογισμὸς καὶ ὁρισμός· πρὸς δὲ τούτοις, ὅτι οὔτε ὁ ὁρισμὸς οὐδὲν οὔτε ἀποδείκνυσιν οὔτε δείκνυσιν, οὔτε τὸ τί ἐστιν οὔθ’ ὁρισμῷ οὔτ’ ἀποδείξει ἔστι γνῶναι.

Κεφάλαιο 8

[93a] Πάλιν δὲ σκεπτέον τί τούτων λέγεται καλῶς καὶ τί οὐ καλῶς, καὶ τί ἐστιν ὁ ὁρισμός, καὶ τοῦ τί ἐστιν ἆρά πως ἔστιν ἀπόδειξις καὶ ὁρισμὸς ἢ οὐδαμῶς. ἐπεὶ δ’ ἐστίν, ὡς ἔφαμεν, ταὐτὸν τὸ εἰδέναι τί ἐστι καὶ τὸ εἰδέναι τὸ αἴτιον τοῦ εἰ ἔστι (λόγος δὲ τούτου, ὅτι ἔστι τι τὸ αἴτιον, καὶ τοῦτο ἢ τὸ αὐτὸ ἢ ἄλλο, κἂν ᾖ ἄλλο, ἢ ἀποδεικτὸν ἢ ἀναπόδεικτον)-εἰ τοίνυν ἐστὶν ἄλλο καὶ ἐνδέχεται ἀποδεῖξαι, ἀνάγκη μέσον εἶναι τὸ αἴτιον καὶ ἐν τῷ σχήματι τῷ πρώτῳ δείκνυσθαι· καθόλου τε γὰρ καὶ κατηγορικὸν τὸ δεικνύμενον. εἷς μὲν δὴ τρόπος ἂν εἴη ὁ νῦν ἐξητασμένος, τὸ δι’ ἄλλου του τί ἐστι δείκνυσθαι. τῶν τε γὰρ τί ἐστιν ἀνάγκη τὸ μέσον εἶναι τί ἐστι, καὶ τῶν ἰδίων ἴδιον. ὥστε τὸ μὲν δείξει, τὸ δ’ οὐ δείξει τῶν τί ἦν εἶναι τῷ αὐτῷ πράγματι.

Οὗτος μὲν οὖν ὁ τρόπος ὅτι οὐκ ἂν εἴη ἀπόδειξις, εἴρηται πρότερον· ἀλλ’ ἔστι λογικὸς συλλογισμὸς τοῦ τί ἐστιν. ὃν δὲ τρόπον ἐνδέχεται, λέγωμεν, εἰπόντες πάλιν ἐξ ἀρχῆς. ὥσπερ γὰρ τὸ διότι ζητοῦμεν ἔχοντες τὸ ὅτι, ἐνίοτε δὲ καὶ ἅμα δῆλα γίνεται, ἀλλ’ οὔτι πρότερόν γε τὸ διότι δυνατὸν γνωρίσαι τοῦ ὅτι, δῆλον ὅτι ὁμοίως καὶ τὸ τί ἦν εἶναι οὐκ ἄνευ τοῦ ὅτι ἔστιν· ἀδύνατον γὰρ εἰδέναι τί ἐστιν, ἀγνοοῦντας εἰ ἔστιν. τὸ δ’ εἰ ἔστιν ὁτὲ μὲν κατὰ συμβεβηκὸς ἔχομεν, ὁτὲ δ’ ἔχοντές τι αὐτοῦ τοῦ πράγματος, οἷον βροντήν, ὅτι ψόφος τις νεφῶν, καὶ ἔκλειψιν, ὅτι στέρησίς τις φωτός, καὶ ἄνθρωπον, ὅτι ζῷόν τι, καὶ ψυχήν, ὅτι αὐτὸ αὑτὸ κινοῦν. ὅσα μὲν οὖν κατὰ συμβεβηκὸς οἴδαμεν ὅτι ἔστιν, ἀναγκαῖον μηδαμῶς ἔχειν πρὸς τὸ τί ἐστιν· οὐδὲ γὰρ ὅτι ἔστιν ἴσμεν· τὸ δὲ ζητεῖν τί ἐστι μὴ ἔχοντας ὅτι ἔστι, μηδὲν ζητεῖν ἐστιν. καθ’ ὅσων δ’ ἔχομέν τι, ῥᾷον. ὥστε ὡς ἔχομεν ὅτι ἔστιν, οὕτως ἔχομεν καὶ πρὸς τὸ τί ἐστιν. ὧν οὖν ἔχομέν τι τοῦ τί ἐστιν, ἔστω πρῶτον μὲν ὧδε· ἔκλειψις ἐφ’ οὗ τὸ Α, σελήνη ἐφ’ οὗ Γ, ἀντίφραξις γῆς ἐφ’ οὗ Β. τὸ μὲν οὖν πότερον ἐκλείπει ἢ οὔ, τὸ Β ζητεῖν ἔστιν, ἆρ’ ἔστιν ἢ οὔ. τοῦτο δ’ οὐδὲν διαφέρει ζητεῖν ἢ εἰ ἔστι λόγος αὐτοῦ· καὶ ἐὰν ᾖ τοῦτο, κἀκεῖνό φαμεν εἶναι. ἢ ποτέρας τῆς ἀντιφάσεώς ἐστιν ὁ λόγος, πότερον τοῦ ἔχειν δύο ὀρθὰς ἢ τοῦ μὴ ἔχειν. ὅταν δ’ εὕρωμεν, ἅμα τὸ ὅτι καὶ τὸ διότι ἴσμεν, ἂν δι’ ἀμέσων ᾖ· εἰ δὲ μή, τὸ ὅτι, τὸ διότι δ’ οὔ. σελήνη Γ, ἔκλειψις Α, τὸ πανσελήνου σκιὰν μὴ δύνασθαι ποιεῖν μηδενὸς ἡμῶν μεταξὺ ὄντος φανεροῦ, ἐφ’ οὗ Β. εἰ τοίνυν τῷ Γ ὑπάρχει τὸ Β τὸ μὴ δύνασθαι ποιεῖν [93b] σκιὰν μηδενὸς μεταξὺ ἡμῶν ὄντος, τούτῳ δὲ τὸ Α τὸ ἐκλελοιπέναι, ὅτι μὲν ἐκλείπει δῆλον, διότι δ’ οὔπω, καὶ ὅτι μὲν ἔστιν ἔκλειψις ἴσμεν, τί δ’ ἐστὶν οὐκ ἴσμεν. δήλου δ’ ὄντος ὅτι τὸ Α τῷ Γ ὑπάρχει, ἀλλὰ διὰ τί ὑπάρχει, τὸ ζητεῖν τὸ Β τί ἐστι, πότερον ἀντίφραξις ἢ στροφὴ τῆς σελήνης ἢ ἀπόσβεσις. τοῦτο δ’ ἐστὶν ὁ λόγος τοῦ ἑτέρου ἄκρου, οἷον ἐν τούτοις τοῦ Α· ἔστι γὰρ ἡ ἔκλειψις ἀντίφραξις ὑπὸ γῆς. τί ἐστι βροντή; πυρὸς ἀπόσβεσις ἐν νέφει. διὰ τί βροντᾷ; διὰ τὸ ἀποσβέννυσθαι τὸ πῦρ ἐν τῷ νέφει. νέφος Γ, βροντὴ Α, ἀπόσβεσις πυρὸς τὸ Β. τῷ δὴ Γ τῷ νέφει ὑπάρχει τὸ Β (ἀποσβέννυται γὰρ ἐν αὐτῷ τὸ πῦρ), τούτῳ δὲ τὸ Α, ψόφος· καὶ ἔστι γε λόγος τὸ Β τοῦ Α τοῦ πρώτου ἄκρου. ἂν δὲ πάλιν τούτου ἄλλο μέσον ᾖ, ἐκ τῶν παραλοίπων ἔσται λόγων.

Ὡς μὲν τοίνυν λαμβάνεται τὸ τί ἐστι καὶ γίνεται γνώριμον, εἴρηται, ὥστε συλλογισμὸς μὲν τοῦ τί ἐστιν οὐ γίνεται οὐδ’ ἀπόδειξις, δῆλον μέντοι διὰ συλλογισμοῦ καὶ δι’ ἀποδείξεως· ὥστ’ οὔτ’ ἄνευ ἀποδείξεως ἔστι γνῶναι τὸ τί ἐστιν, οὗ ἔστιν αἴτιον ἄλλο, οὔτ’ ἔστιν ἀπόδειξις αὐτοῦ, ὥσπερ καὶ ἐν τοῖς διαπορήμασιν εἴπομεν.

Κεφάλαιο 9

Ἔστι δὲ τῶν μὲν ἕτερόν τι αἴτιον, τῶν δ’ οὐκ ἔστιν. ὥστε δῆλον ὅτι καὶ τῶν τί ἐστι τὰ μὲν ἄμεσα καὶ ἀρχαί εἰσιν, ἃ καὶ εἶναι καὶ τί ἐστιν ὑποθέσθαι δεῖ ἢ ἄλλον τρόπον φανερὰ ποιῆσαι (ὅπερ ὁ ἀριθμητικὸς ποιεῖ· καὶ γὰρ τί ἐστι τὴν μονάδα ὑποτίθεται, καὶ ὅτι ἔστιν)· τῶν δ’ ἐχόντων μέσον, καὶ ὧν ἔστι τι ἕτερον αἴτιον τῆς οὐσίας, ἔστι δι’ ἀποδείξεως, ὥσπερ εἴπομεν, δηλῶσαι, μὴ τὸ τί ἐστιν ἀποδεικνύντας.

Κεφάλαιο 10

Ὁρισμὸς δ’ ἐπειδὴ λέγεται εἶναι λόγος τοῦ τί ἐστι, φανερὸν ὅτι ὁ μέν τις ἔσται λόγος τοῦ τί σημαίνει τὸ ὄνομα ἢ λόγος ἕτερος ὀνοματώδης, οἷον τί σημαίνει [τί ἐστι] τρίγωνον. ὅπερ ἔχοντες ὅτι ἔστι, ζητοῦμεν διὰ τί ἔστιν· χαλεπὸν δ’ οὕτως ἐστὶ λαβεῖν ἃ μὴ ἴσμεν ὅτι ἔστιν. ἡ δ’ αἰτία εἴρηται πρότερον τῆς χαλεπότητος, ὅτι οὐδ’ εἰ ἔστιν ἢ μὴ ἴσμεν, ἀλλ’ ἢ κατὰ συμβεβηκός. (λόγος δ’ εἷς ἐστι διχῶς, ὁ μὲν συνδέσμῳ, ὥσπερ ἡ Ἰλιάς, ὁ δὲ τῷ ἓν καθ’ ἑνὸς δηλοῦν μὴ κατὰ συμβεβηκός.)

Εἷς μὲν δὴ ὅρος ἐστὶν ὅρου ὁ εἰρημένος, ἄλλος δ’ ἐστὶν ὅρος λόγος ὁ δηλῶν διὰ τί ἔστιν. ὥστε ὁ μὲν πρότερος σημαί[94a] νει μέν, δείκνυσι δ’ οὔ, ὁ δ’ ὕστερος φανερὸν ὅτι ἔσται οἷον ἀπόδειξις τοῦ τί ἐστι, τῇ θέσει διαφέρων τῆς ἀποδείξεως. διαφέρει γὰρ εἰπεῖν διὰ τί βροντᾷ καὶ τί ἐστι βροντή· ἐρεῖ γὰρ οὕτω μὲν “διότι ἀποσβέννυται τὸ πῦρ ἐν τοῖς νέφεσι”· τί δ’ ἐστὶ βροντή; ψόφος ἀποσβεννυμένου πυρὸς ἐν νέφεσιν. ὥστε ὁ αὐτὸς λόγος ἄλλον τρόπον λέγεται, καὶ ὡδὶ μὲν ἀπόδειξις συνεχής, ὡδὶ δὲ ὁρισμός. (ἔτι ἐστὶν ὅρος βροντῆς ψόφος ἐν νέφεσι· τοῦτο δ’ ἐστὶ τῆς τοῦ τί ἐστιν ἀποδείξεως συμπέρασμα.) ὁ δὲ τῶν ἀμέσων ὁρισμὸς θέσις ἐστὶ τοῦ τί ἐστιν ἀναπόδεικτος.

Ἔστιν ἄρα ὁρισμὸς εἷς μὲν λόγος τοῦ τί ἐστιν ἀναπόδεικτος, εἷς δὲ συλλογισμὸς τοῦ τί ἐστι, πτώσει διαφέρων τῆς ἀποδείξεως, τρίτος δὲ τῆς τοῦ τί ἐστιν ἀποδείξεως συμπέρασμα. φανερὸν οὖν ἐκ τῶν εἰρημένων καὶ πῶς ἔστι τοῦ τί ἐστιν ἀπόδειξις καὶ πῶς οὐκ ἔστι, καὶ τίνων ἔστι καὶ τίνων οὐκ ἔστιν, ἔτι δ’ ὁρισμὸς ποσαχῶς τε λέγεται καὶ πῶς τὸ τί ἐστι δείκνυσι καὶ πῶς οὔ, καὶ τίνων ἔστι καὶ τίνων οὔ, ἔτι δὲ πρὸς ἀπόδειξιν πῶς ἔχει, καὶ πῶς ἐνδέχεται τοῦ αὐτοῦ εἶναι καὶ πῶς οὐκ ἐνδέχεται.

Κεφάλαιο 11

Ἐπεὶ δὲ ἐπίστασθαι οἰόμεθα ὅταν εἰδῶμεν τὴν αἰτίαν, αἰτίαι δὲ τέτταρες, μία μὲν τὸ τί ἦν εἶναι, μία δὲ τὸ τίνων ὄντων ἀνάγκη τοῦτ’ εἶναι, ἑτέρα δὲ ἡ τί πρῶτον ἐκίνησε, τετάρτη δὲ τὸ τίνος ἕνεκα, πᾶσαι αὗται διὰ τοῦ μέσου δείκνυνται. τό τε γὰρ οὗ ὄντος τοδὶ ἀνάγκη εἶναι μιᾶς μὲν προτάσεως ληφθείσης οὐκ ἔστι, δυοῖν δὲ τοὐλάχιστον· τοῦτο δ’ ἐστίν, ὅταν ἓν μέσον ἔχωσιν. τούτου οὖν ἑνὸς ληφθέντος τὸ συμπέρασμα ἀνάγκη εἶναι. δῆλον δὲ καὶ ὧδε. διὰ τί ὀρθὴ ἡ ἐν ἡμικυκλίῳ; τίνος ὄντος ὀρθή; ἔστω δὴ ὀρθὴ ἐφ’ ἧς Α, ἡμίσεια δυοῖν ὀρθαῖν ἐφ’ ἧς Β, ἡ ἐν ἡμικυκλίῳ ἐφ’ ἧς Γ. τοῦ δὴ τὸ Α τὴν ὀρθὴν ὑπάρχειν τῷ Γ τῇ ἐν τῷ ἡμικυκλίῳ αἴτιον τὸ Β. αὕτη μὲν γὰρ τῇ Α ἴση, ἡ δὲ τὸ Γ τῇ Β· δύο γὰρ ὀρθῶν ἡμίσεια. τοῦ Β οὖν ὄντος ἡμίσεος δύο ὀρθῶν τὸ Α τῷ Γ ὑπάρχει (τοῦτο δ’ ἦν τὸ ἐν ἡμικυκλίῳ ὀρθὴν εἶναι). τοῦτο δὲ ταὐτόν ἐστι τῷ τί ἦν εἶναι, τῷ τοῦτο σημαίνειν τὸν λόγον. ἀλλὰ μὴν καὶ τὸ τί ἦν εἶναι αἴτιον δέδεικται τὸ μέσον <ὄν>.

Τὸ δὲ διὰ τί ὁ Μηδικὸς πόλεμος ἐγένετο Ἀθηναίοις; τίς αἰτία τοῦ πολεμεῖσθαι Ἀθηναίους; ὅτι [94b] εἰς Σάρδεις μετ’ Ἐρετριέων ἐνέβαλον· τοῦτο γὰρ ἐκίνησε πρῶτον. πόλεμος ἐφ’ οὗ Α, προτέρους εἰσβαλεῖν Β, Ἀθηναῖοι τὸ Γ. ὑπάρχει δὴ τὸ Β τῷ Γ, τὸ προτέροις ἐμβαλεῖν τοῖς Ἀθηναίοις, τὸ δὲ Α τῷ Β· πολεμοῦσι γὰρ τοῖς πρότερον ἀδικήσασιν. ὑπάρχει ἄρα τῷ μὲν Β τὸ Α, τὸ πολεμεῖσθαι τοῖς προτέροις ἄρξασι· τοῦτο δὲ τὸ Β τοῖς Ἀθηναίοις· πρότεροι γὰρ ἦρξαν. μέσον ἄρα καὶ ἐνταῦθα τὸ αἴτιον, τὸ πρῶτον κινῆσαν.

Ὅσων δ’ αἴτιον τὸ ἕνεκα τίνος - οἷον διὰ τί περιπατεῖ; ὅπως ὑγιαίνῃ· διὰ τί οἰκία ἔστιν; ὅπως σῴζηται τὰ σκεύη-τὸ μὲν ἕνεκα τοῦ ὑγιαίνειν, τὸ δ’ ἕνεκα τοῦ σῴζεσθαι. διὰ τί δὲ ἀπὸ δείπνου δεῖ περιπατεῖν, καὶ ἕνεκα τίνος δεῖ, οὐδὲν διαφέρει. περίπατος ἀπὸ δείπνου Γ, τὸ μὴ ἐπιπολάζειν τὰ σιτία ἐφ’ οὗ Β, τὸ ὑγιαίνειν ἐφ’ οὗ Α. ἔστω δὴ τῷ ἀπὸ δείπνου περιπατεῖν ὑπάρχον τὸ ποιεῖν μὴ ἐπιπολάζειν τὰ σιτία πρὸς τῷ στόματι τῆς κοιλίας, καὶ τοῦτο ὑγιεινόν. δοκεῖ γὰρ ὑπάρχειν τῷ περιπατεῖν τῷ Γ τὸ Β τὸ μὴ ἐπιπολάζειν τὰ σιτία, τούτῳ δὲ τὸ Α τὸ ὑγιεινόν. τί οὖν αἴτιον τῷ Γ τοῦ τὸ Α ὑπάρχειν τὸ οὗ ἕνεκα; τὸ Β τὸ μὴ ἐπιπολάζειν. τοῦτο δ’ ἐστὶν ὥσπερ ἐκείνου λόγος· τὸ γὰρ Α οὕτως ἀποδοθήσεται. διὰ τί δὲ τὸ Β τῷ Γ ἔστιν; ὅτι τοῦτ’ ἔστι τὸ ὑγιαίνειν, τὸ οὕτως ἔχειν. δεῖ δὲ μεταλαμβάνειν τοὺς λόγους, καὶ οὕτως μᾶλλον ἕκαστα φανεῖται. αἱ δὲ γενέσεις ἀνάπαλιν ἐνταῦθα καὶ ἐπὶ τῶν κατὰ κίνησιν αἰτίων· ἐκεῖ μὲν γὰρ τὸ μέσον δεῖ γενέσθαι πρῶτον, ἐνταῦθα δὲ τὸ Γ, τὸ ἔσχατον, τελευταῖον δὲ τὸ οὗ ἕνεκα.

Ἐνδέχεται δὲ τὸ αὐτὸ καὶ ἕνεκά τινος εἶναι καὶ ἐξ ἀνάγκης, οἷον διὰ τοῦ λαμπτῆρος τὸ φῶς· καὶ γὰρ ἐξ ἀνάγκης διέρχεται τὸ μικρομερέστερον διὰ τῶν μειζόνων πόρων, εἴπερ φῶς γίνεται τῷ διιέναι, καὶ ἕνεκά τινος, ὅπως μὴ πταίωμεν. ἆρ’ οὖν εἰ εἶναι ἐνδέχεται, καὶ γίνεσθαι ἐνδέχεται· ὥσπερ εἰ βροντᾷ <ὅτι> ἀποσβεννυμένου τε τοῦ πυρὸς ἀνάγκη σίζειν καὶ ψοφεῖν καί, εἰ ὡς οἱ Πυθαγόρειοί φασιν, ἀπειλῆς ἕνεκα τοῖς ἐν τῷ ταρτάρῳ, ὅπως φοβῶνται; πλεῖστα δὲ τοιαῦτ’ ἔστι, καὶ μάλιστα ἐν τοῖς κατὰ φύσιν συνισταμένοις καὶ συνεστῶσιν· ἡ μὲν γὰρ ἕνεκά του ποιεῖ φύσις, ἡ δ’ ἐξ ἀνάγκης. ἡ δ’ ἀνάγκη διττή· ἡ μὲν γὰρ κατὰ φύσιν [95a] καὶ τὴν ὁρμήν, ἡ δὲ βίᾳ ἡ παρὰ τὴν ὁρμήν, ὥσπερ λίθος ἐξ ἀνάγκης καὶ ἄνω καὶ κάτω φέρεται, ἀλλ’ οὐ διὰ τὴν αὐτὴν ἀνάγκην. ἐν δὲ τοῖς ἀπὸ διανοίας τὰ μὲν οὐδέποτε ἀπὸ τοῦ αὐτομάτου ὑπάρχει, οἷον οἰκία ἢ ἀνδριάς, οὐδ’ ἐξ ἀνάγκης, ἀλλ’ ἕνεκά του, τὰ δὲ καὶ ἀπὸ τύχης, οἷον ὑγίεια καὶ σωτηρία. μάλιστα δὲ ἐν ὅσοις ἐνδέχεται καὶ ὧδε καὶ ἄλλως, ὅταν, μὴ ἀπὸ τύχης, ἡ γένεσις ᾖ ὥστε τὸ τέλος ἀγαθόν, ἕνεκά του γίνεται, καὶ ἢ φύσει ἢ τέχνῃ. ἀπὸ τύχης δ’ οὐδὲν ἕνεκά του γίνεται.

Κεφάλαιο 12

Τὸ δ’ αὐτὸ αἴτιόν ἐστι τοῖς γινομένοις καὶ τοῖς γεγενημένοις καὶ τοῖς ἐσομένοις ὅπερ καὶ τοῖς οὖσι (τὸ γὰρ μέσον αἴτιον), πλὴν τοῖς μὲν οὖσιν ὄν, τοῖς δὲ γινομένοις γινόμενον, τοῖς δὲ γεγενημένοις γεγενημένον καὶ ἐσομένοις ἐσόμενον. οἷον διὰ τί γέγονεν ἔκλειψις; διότι ἐν μέσῳ γέγονεν ἡ γῆ· γίνεται δὲ διότι γίνεται, ἔσται δὲ διότι ἔσται ἐν μέσῳ, καὶ ἔστι διότι ἔστιν. τί ἐστι κρύσταλλος; εἰλήφθω δὴ ὅτι ὕδωρ πεπηγός. ὕδωρ ἐφ’ οὗ Γ, πεπηγὸς ἐφ’ οὗ Α, αἴτιον τὸ μέσον ἐφ’ οὗ Β, ἔκλειψις θερμοῦ παντελής. ὑπάρχει δὴ τῷ Γ τὸ Β, τούτῳ δὲ τὸ πεπηγέναι τὸ ἐφ’ οὗ Α. γίνεται δὲ κρύσταλλος γινομένου τοῦ Β, γεγένηται δὲ γεγενημένου, ἔσται δ’ ἐσομένου.

Τὸ μὲν οὖν οὕτως αἴτιον καὶ οὗ αἴτιον ἅμα γίνεται, ὅταν γίνηται, καὶ ἔστιν, ὅταν ᾖ· καὶ ἐπὶ τοῦ γεγονέναι καὶ ἔσεσθαι ὡσαύτως. ἐπὶ δὲ τῶν μὴ ἅμα ἆρ’ ἔστιν ἐν τῷ συνεχεῖ χρόνῳ, ὥσπερ δοκεῖ ἡμῖν, ἄλλα ἄλλων αἴτια εἶναι, τοῦ τόδε γενέσθαι ἕτερον γενόμενον, καὶ τοῦ ἔσεσθαι ἕτερον ἐσόμενον, καὶ τοῦ γίνεσθαι δέ, εἴ τι ἔμπροσθεν ἐγένετο; ἔστι δὴ ἀπὸ τοῦ ὕστερον γεγονότος ὁ συλλογισμός (ἀρχὴ δὲ καὶ τούτων τὰ γεγονότα)· διὸ καὶ ἐπὶ τῶν γινομένων ὡσαύτως. ἀπὸ δὲ τοῦ προτέρου οὐκ ἔστιν, οἷον ἐπεὶ τόδε γέγονεν, ὅτι τόδ’ ὕστερον γέγονεν· καὶ ἐπὶ τοῦ ἔσεσθαι ὡσαύτως. οὔτε γὰρ ἀορίστου οὔθ’ ὁρισθέντος ἔσται τοῦ χρόνου ὥστ’ ἐπεὶ τοῦτ’ ἀληθὲς εἰπεῖν γεγονέναι, τόδ’ ἀληθὲς εἰπεῖν γεγονέναι τὸ ὕστερον. ἐν γὰρ τῷ μεταξὺ ψεῦδος ἔσται τὸ εἰπεῖν τουτο, ἤδη θατέρου γεγονότος. ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ τοῦ ἐσομένου, οὐδ’ ἐπεὶ τόδε γέγονε, τόδ’ ἔσται. τὸ γὰρ μέσον ὁμόγονον δεῖ εἶναι, τῶν γενομένων γενόμενον, τῶν ἐσομένων ἐσόμενον, τῶν γινομένων γινόμενον, τῶν ὄντων ὄν· τοῦ δὲ γέγονε καὶ τοῦ ἔσται οὐκ ἐνδέχεται εἶναι ὁμόγονον. ἔτι οὔτε ἀόριστον ἐνδέχεται εἶναι τὸν χρόνον τὸν μεταξὺ οὔθ’ ὡρισμένον· [95b] ψεῦδος γὰρ ἔσται τὸ εἰπεῖν ἐν τῷ μεταξύ. ἐπισκεπτέον δὲ τί τὸ συνέχον ὥστε μετὰ τὸ γεγονέναι τὸ γίνεσθαι ὑπάρχειν ἐν τοῖς πράγμασιν. ἢ δῆλον ὅτι οὐκ ἔστιν ἐχόμενον γεγονότος γινόμενον; οὐδὲ γὰρ γενόμενον γενομένου· πέρατα γὰρ καὶ ἄτομα· ὥσπερ οὖν οὐδὲ στιγμαί εἰσιν ἀλλήλων ἐχόμεναι, οὐδὲ γενόμενα· ἄμφω γὰρ ἀδιαίρετα. οὐδὲ δὴ γινόμενον γεγενημένου διὰ τὸ αὐτό· τὸ μὲν γὰρ γινόμενον διαιρετόν, τὸ δὲ γεγονὸς ἀδιαίρετον. ὥσπερ οὖν γραμμὴ πρὸς στιγμὴν ἔχει, οὕτω τὸ γινόμενον πρὸς τὸ γεγονός· ἐνυπάρχει γὰρ ἄπειρα γεγονότα ἐν τῷ γινομένῳ. μᾶλλον δὲ φανερῶς ἐν τοῖς καθόλου περὶ κινήσεως δεῖ λεχθῆναι περὶ τούτων.

Περὶ μὲν οὖν τοῦ πῶς ἂν ἐφεξῆς γινομένης τῆς γενέσεως ἔχοι τὸ μέσον τὸ αἴτιον ἐπὶ τοσοῦτον εἰλήφθω. ἀνάγκη γὰρ καὶ ἐν τούτοις τὸ μέσον καὶ τὸ πρῶτον ἄμεσα εἶναι. οἷον τὸ Α γέγονεν, ἐπεὶ τὸ Γ γέγονεν (ὕστερον δὲ τὸ Γ γέγονεν, ἔμπροσθεν δὲ τὸ Α· ἀρχὴ δὲ τὸ Γ διὰ τὸ ἐγγύτερον τοῦ νῦν εἶναι, ὅ ἐστιν ἀρχὴ τοῦ χρόνου). τὸ δὲ Γ γέγονεν, εἰ τὸ Δ γέγονεν. τοῦ δὴ Δ γενομένου ἀνάγκη τὸ Α γεγονέναι. αἴτιον δὲ τὸ Γ· τοῦ γὰρ Δ γενομένου τὸ Γ ἀνάγκη γεγονέναι, τοῦ δὲ Γ γεγονότος ἀνάγκη πρότερον τὸ Α γεγονέναι. οὕτω δὲ λαμβάνοντι τὸ μέσον στήσεταί που εἰς ἄμεσον, ἢ ἀεὶ παρεμπεσεῖται διὰ τὸ ἄπειρον; οὐ γάρ ἐστιν ἐχόμενον γεγονὸς γεγονότος, ὥσπερ ἐλέχθη. ἀλλ' ἄρξασθαί γε ὅμως ἀνάγκη ἀπ' ἀμέσου καὶ ἀπὸ τοῦ νῦν πρώτου. ὁμοίως δὲ (25)καὶ ἐπὶ τοῦ ἔσται. εἰ γὰρ ἀληθὲς εἰπεῖν ὅτι ἔσται τὸ Δ, ἀνάγκη πρότερον ἀληθὲς εἰπεῖν ὅτι τὸ Α ἔσται. τούτου δ' αἴτιον τὸ Γ· εἰ μὲν γὰρ τὸ Δ ἔσται, πρότερον τὸ Γ ἔσται· εἰ δὲ τὸ Γ ἔσται, πρότερον τὸ Α ἔσται. ὁμοίως δ' ἄπειρος ἡ τομὴ καὶ ἐν τούτοις· οὐ γὰρ ἔστιν ἐσόμενα ἐχόμενα ἀλλήλων. ἀρχὴ δὲ καὶ ἐν τούτοις ἄμεσος ληπτέα. ἔχει δὲ οὕτως ἐπὶ τῶν ἔργων· εἰ γέγονεν οἰκία, ἀνάγκη τετμῆσθαι λίθους καὶ γεγονέναι. τοῦτο διὰ τί; ὅτι ἀνάγκη θεμέλιον γεγονέναι, εἴπερ καὶ οἰκία γέγονεν· εἰ δὲ θεμέλιον, πρότερον λίθους γεγονέναι ἀνάγκη. πάλιν εἰ ἔσται οἰκία, ὡσαύτως πρότερον ἔσονται λίθοι. δείκνυται δὲ διὰ τοῦ μέσου ὁμοίως· ἔσται γὰρ θεμέλιος πρότερον.

Ἐπεὶ δ' ὁρῶμεν ἐν τοῖς γινομένοις κύκλῳ τινὰ γένεσιν οὖσαν, ἐνδέχεται τοῦτο εἶναι, εἴπερ ἕποιντο ἀλλήλοις τὸ μέσον καὶ οἱ ἄκροι· ἐν γὰρ τούτοις τὸ ἀντιστρέφειν ἐστίν.

Δέδεικται [96a] δὲ τοῦτο ἐν τοῖς πρώτοις, ὅτι ἀντιστρέφει τὰ συμπεράσματα· τὸ δὲ κύκλῳ τουτό ἐστιν. ἐπὶ δὲ τῶν ἔργων φαίνεται ὧδε· βεβρεγμένης τῆς γῆς ἀνάγκη ἀτμίδα γενέσθαι, τούτου δὲ γενομένου νέφος, τούτου δὲ γενομένου ὕδωρ· τούτου δὲ γενομένου ἀνάγκη βεβρέχθαι τὴν γῆν· τοῦτο δ' ἦν τὸ ἐξ ἀρχῆς, ὥστε κύκλῳ περιελήλυθεν· ἑνὸς γὰρ αὐτῶν ὁτουοῦν ὄντος ἕτερον ἔστι, κἀκείνου ἄλλο, καὶ τούτου τὸ πρῶτον.

Ἔστι δ' ἔνια μὲν γινόμενα καθόλου (ἀεί τε γὰρ καὶ ἐπὶ παντὸς οὕτως ἢ ἔχει ἢ γίνεται), τὰ δὲ ἀεὶ μὲν οὔ, ὡς ἐπὶ τὸ πολὺ δέ, οἷον οὐ πᾶς ἄνθρωπος ἄρρην τὸ γένειον τριχοῦται, ἀλλ' ὡς ἐπὶ τὸ πολύ. τῶν δὴ τοιούτων ἀνάγκη καὶ τὸ μέσον ὡς ἐπὶ τὸ πολὺ εἶναι. εἰ γὰρ τὸ Α κατὰ τοῦ Β καθόλου κατηγορεῖται, καὶ τοῦτο κατὰ τοῦ Γ καθόλου, ἀνάγκη καὶ τὸ Α κατὰ τοῦ Γ ἀεὶ καὶ ἐπὶ παντὸς κατηγορεῖσθαι· τοῦτο γάρ ἐστι τὸ καθόλου, τὸ ἐπὶ παντὶ καὶ ἀεί. ἀλλ' ὑπέκειτο ὡς ἐπὶ τὸ πολύ· ἀνάγκη ἄρα καὶ τὸ μέσον ὡς ἐπὶ τὸ πολὺ εἶναι τὸ ἐφ’ οὗ τὸ Β. ἔσονται τοίνυν καὶ τῶν ὡς ἐπὶ τὸ πολὺ ἀρχαὶ ἄμεσοι, ὅσα ὡς ἐπὶ τὸ πολὺ οὕτως ἔστιν ἢ γίνεται.

Κεφάλαιο 13

Πῶς μὲν οὖν τὸ τί ἐστιν εἰς τοὺς ὅρους ἀποδίδοται, καὶ τίνα τρόπον ἀπόδειξις ἢ ὁρισμὸς ἔστιν αὐτοῦ ἢ οὐκ ἔστιν, εἴρηται πρότερον· πῶς δὲ δεῖ θηρεύειν τὰ ἐν τῷ τί ἐστι κατηγορούμενα, νῦν λέγωμεν. Τῶν δὴ ὑπαρχόντων ἀεὶ ἑκάστῳ ἔνια ἐπεκτείνει ἐπὶ πλέον, οὐ μέντοι ἔξω τοῦ γένους. λέγω δὲ ἐπὶ πλέον ὑπάρχειν ὅσα ὑπάρχει μὲν ἑκάστῳ καθόλου, οὐ μὴν ἀλλὰ καὶ ἄλλῳ. οἷον ἔστι τι ὃ πάσῃ τριάδι ὑπάρχει, ἀλλὰ καὶ μὴ τριάδι, ὥσπερ τὸ ὂν ὑπάρχει τῇ τριάδι, ἀλλὰ καὶ μὴ ἀριθμῷ, ἀλλὰ καὶ τὸ περιττὸν ὑπάρχει τε πάσῃ τριάδι καὶ ἐπὶ πλέον ὑπάρχει (καὶ γὰρ τῇ πεντάδι ὑπάρχει), ἀλλ’ οὐκ ἔξω τοῦ γένους· ἡ μὲν γὰρ πεντὰς ἀριθμός, οὐδὲν δὲ ἔξω ἀριθμοῦ περιττόν. τὰ δὴ τοιαῦτα ληπτέον μέχρι τούτου, ἕως τοσαῦτα ληφθῇ πρῶτον ὧν ἕκαστον μὲν ἐπὶ πλέον ὑπάρξει, ἅπαντα δὲ μὴ ἐπὶ πλέον· ταύτην γὰρ ἀνάγκη οὐσίαν εἶναι τοῦ πράγματος. οἷον τριάδι ὑπάρχει πάσῃ ἀριθμός, τὸ περιττόν, τὸ πρῶτον ἀμφοτέρως, καὶ ὡς μὴ μετρεῖσθαι ἀριθμῷ καὶ ὡς μὴ συγκεῖσθαι ἐξ ἀριθμῶν. τοῦτο τοίνυν ἤδη ἐστὶν ἡ τριάς, ἀριθμὸς περιττὸς πρῶτος καὶ ὡδὶ πρῶτος. τούτων γὰρ ἕκαστον, τὰ μὲν καὶ τοῖς περιττοῖς πᾶσιν ὑπάρχει, [96b] τὸ δὲ τελευταῖον καὶ τῇ δυάδι, πάντα δὲ οὐδενί. ἐπεὶ δὲ δεδήλωται ἡμῖν ἐν τοῖς ἄνω ὅτι καθόλου μέν ἐστι τὰ ἐν τῷ τί ἐστι κατηγορούμενα (τὰ καθόλου δὲ ἀναγκαῖα), τῇ δὲ τριάδι, καὶ ἐφ’ οὗ ἄλλου οὕτω λαμβάνεται, ἐν τῷ τί ἐστι τὰ λαμβανόμενα, οὕτως ἐξ ἀνάγκης μὲν ἂν εἴη τριὰς ταῦτα. ὅτι δ’ οὐσία, ἐκ τῶνδε δῆλον. ἀνάγκη γάρ, εἰ μὴ τοῦτο ἦν τριάδι εἶναι, οἷον γένος τι εἶναι τοῦτο, ἢ ὠνομασμένον ἢ ἀνώνυμον. ἔσται τοίνυν ἐπὶ πλέον ἢ τῇ τριάδι ὑπάρχον. ὑποκείσθω γὰρ τοιοῦτον εἶναι τὸ γένος ὥστε ὑπάρχειν κατὰ δύναμιν ἐπὶ πλέον. εἰ τοίνυν μηδενὶ ὑπάρχει ἄλλῳ ἢ ταῖς ἀτόμοις τριάσι, τοῦτ’ ἂν εἴη τὸ τριάδι εἶναι (ὑποκείσθω γὰρ καὶ τοῦτο, ἡ οὐσία ἡ ἑκάστου εἶναι ἡ ἐπὶ τοῖς ἀτόμοις ἔσχατος τοιαύτη κατηγορία)· ὥστε ὁμοίως καὶ ἄλλῳ ὁτῳοῦν τῶν οὕτω δειχθέντων τὸ αὐτῷ εἶναι ἔσται.

Χρὴ δέ, ὅταν ὅλον τι πραγματεύηταί τις, διελεῖν τὸ γένος εἰς τὰ ἄτομα τῷ εἴδει τὰ πρῶτα, οἷον ἀριθμὸν εἰς τριάδα καὶ δυάδα, εἶθ’ οὕτως ἐκείνων ὁρισμοὺς πειρᾶσθαι λαμβάνειν, οἷον εὐθείας γραμμῆς καὶ κύκλου, καὶ ὀρθῆς γωνίας, μετὰ δὲ τοῦτο λαβόντα τί τὸ γένος, οἷον πότερον τῶν ποσῶν ἢ τῶν ποιῶν, τὰ ἴδια πάθη θεωρεῖν διὰ τῶν κοινῶν πρώτων. τοῖς γὰρ συντιθεμένοις ἐκ τῶν ἀτόμων τὰ συμβαίνοντα ἐκ τῶν ὁρισμῶν ἔσται δῆλα, διὰ τὸ ἀρχὴν εἶναι πάντων τὸν ὁρισμὸν καὶ τὸ ἁπλοῦν καὶ τοῖς ἁπλοῖς καθ’ αὐτὰ ὑπάρχειν τὰ συμβαίνοντα μόνοις, τοῖς δ’ ἄλλοις κατ’ ἐκεῖνα. αἱ δὲ διαιρέσεις αἱ κατὰ τὰς διαφορὰς χρήσιμοί εἰσιν εἰς τὸ οὕτω μετιέναι· ὡς μέντοι δεικνύουσιν, εἴρηται ἐν τοῖς πρότερον. χρήσιμοι δ’ ἂν εἶεν ὧδε μόνον πρὸς τὸ συλλογίζεσθαι τὸ τί ἐστιν. καίτοι δόξειέν γ’ ἂν οὐδέν, ἀλλ’ εὐθὺς λαμβάνειν ἅπαντα, ὥσπερ ἂν εἰ ἐξ ἀρχῆς ἐλάμβανέ τις ἄνευ τῆς διαιρέσεως. διαφέρει δέ τι τὸ πρῶτον καὶ ὕστερον τῶν κατηγορουμένων κατηγορεῖσθαι, οἷον εἰπεῖν ζῷον ἥμερον δίπουν ἢ δίπουν ζῷον ἥμερον. εἰ γὰρ ἅπαν ἐκ δύο ἐστί, καὶ ἕν τι τὸ ζῷον ἥμερον, καὶ πάλιν ἐκ τούτου καὶ τῆς διαφορᾶς ὁ ἄνθρωπος ἢ ὅ τι δήποτ’ ἐστὶ τὸ ἓν γινόμενον, ἀναγκαῖον διελόμενον αἰτεῖσθαι.

Ἔτι πρὸς τὸ μηδὲν παραλιπεῖν ἐν τῷ τί ἐστιν οὕτω μόνως ἐνδέχεται. ὅταν γὰρ τὸ πρῶτον ληφθῇ γένος, ἂν μὲν τῶν κάτωθέν τινα διαιρέσεων λαμβάνῃ, οὐκ ἐμπεσεῖται ἅπαν εἰς τοῦτο, οἷον οὐ πᾶν ζῷον ἢ ὁλόπτερον ἢ σχιζόπτερον, ἀλλὰ πτηνὸν ζῷον ἅπαν· τούτου [97a] γὰρ διαφορὰ αὕτη. πρώτη δὲ διαφορά ἐστι ζῴου εἰς ἣν ἅπαν ζῷον ἐμπίπτει. ὁμοίως δὲ καὶ τῶν ἄλλων ἑκάστου, καὶ τῶν ἔξω γενῶν καὶ τῶν ὑπ’ αὐτό, οἷον ὄρνιθος, εἰς ἣν ἅπας ὄρνις, καὶ ἰχθύος, εἰς ἣν ἅπας ἰχθύς. οὕτω μὲν οὖν βαδίζοντι ἔστιν εἰδέναι ὅτι οὐδὲν παραλέλειπται· ἄλλως δὲ καὶ παραλιπεῖν ἀναγκαῖον καὶ μὴ εἰδέναι. οὐδὲν δὲ δεῖ τὸν ὁριζόμενον καὶ διαιρούμενον ἅπαντα εἰδέναι τὰ ὄντα. καίτοι ἀδύνατόν φασί τινες εἶναι τὰς διαφορὰς εἰδέναι τὰς πρὸς ἕκαστον μὴ εἰδότα ἕκαστον· ἄνευ δὲ τῶν διαφορῶν οὐκ εἶναι ἕκαστον εἰδέναι· οὗ γὰρ μὴ διαφέρει, ταὐτὸν εἶναι τούτῳ, οὗ δὲ διαφέρει, ἕτερον τούτου. πρῶτον μὲν οὖν τοῦτο ψεῦδος· οὐ γὰρ κατὰ πᾶσαν διαφορὰν ἕτερον· πολλαὶ γὰρ διαφοραὶ ὑπάρχουσι τοῖς αὐτοῖς τῷ εἴδει, ἀλλ’ οὐ κατ’ οὐσίαν οὐδὲ καθ’ αὑτά. εἶτα ὅταν λάβῃ τἀντικείμενα καὶ τὴν διαφορὰν καὶ ὅτι πᾶν ἐμπίπτει ἐνταῦθα ἢ ἐνταῦθα, καὶ λάβῃ ἐν θατέρῳ τὸ ζητούμενον εἶναι, καὶ τοῦτο γινώσκῃ, οὐδὲν διαφέρει εἰδέναι ἢ μὴ εἰδέναι ἐφ’ ὅσων κατηγοροῦνται ἄλλων αἱ διαφοραί. φανερὸν γὰρ ὅτι ἂν οὕτω βαδίζων ἔλθῃ εἰς ταῦτα ὧν μηκέτι ἔστι διαφορά, ἕξει τὸν λόγον τῆς οὐσίας. τὸ δ’ ἅπαν ἐμπίπτειν εἰς τὴν διαίρεσιν, ἂν ᾖ ἀντικείμενα ὧν μὴ ἔστι μεταξύ, οὐκ αἴτημα· ἀνάγκη γὰρ ἅπαν ἐν θατέρῳ αὐτῶν εἶναι, εἴπερ ἐκείνου διαφορά ἐστι.

Εἰς δὲ τὸ κατασκευάζειν ὅρον διὰ τῶν διαιρέσεων τριῶν δεῖ στοχάζεσθαι, τοῦ λαβεῖν τὰ κατηγορούμενα ἐν τῷ τί ἐστι, καὶ ταῦτα τάξαι τί πρῶτον ἢ δεύτερον, καὶ ὅτι ταῦτα πάντα. ἔστι δὲ τούτων ἓν πρῶτον διὰ τοῦ δύνασθαι, ὥσπερ πρὸς συμβεβηκὸς συλλογίσασθαι ὅτι ὑπάρχει, καὶ διὰ τοῦ γένους κατασκευάσαι. τὸ δὲ τάξαι ὡς δεῖ ἔσται, ἐὰν τὸ πρῶτον λάβῃ. τοῦτο δ’ ἔσται, ἐὰν ληφθῇ ὃ πᾶσιν ἀκολουθεῖ, ἐκείνῳ δὲ μὴ πάντα· ἀνάγκη γὰρ εἶναί τι τοιοῦτον. ληφθέντος δὲ τούτου ἤδη ἐπὶ τῶν κάτω ὁ αὐτὸς τρόπος· δεύτερον γὰρ τὸ τῶν ἄλλων πρῶτον ἔσται, καὶ τρίτον τὸ τῶν ἐχομένων· ἀφαιρεθέντος γὰρ τοῦ ἄνωθεν τὸ ἐχόμενον τῶν ἄλλων πρῶτον ἔσται. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὅτι δ’ ἅπαντα ταῦτα, φανερὸν ἐκ τοῦ λαβεῖν τό τε πρῶτον κατὰ διαίρεσιν, ὅτι ἅπαν ἢ τόδε ἢ τόδε ζῷον, ὑπάρχει δὲ τόδε, καὶ πάλιν τούτου ὅλου τὴν διαφοράν, τοῦ δὲ τελευταίου μηκέτι εἶναι διαφοράν, ἢ καὶ εὐθὺς μετὰ τῆς τελευταίας διαφορᾶς τοῦ συνόλου μὴ διαφέρειν εἴδει ἔτι τοῦτο. [97b] δῆλον γὰρ ὅτι οὔτε πλεῖον πρόσκειται (πάντα γὰρ ἐν τῷ τί ἐστιν εἴληπται τούτων) οὔτε ἀπολείπει οὐδέν· ἢ γὰρ γένος ἢ διαφορὰ ἂν εἴη. γένος μὲν οὖν τό τε πρῶτον, καὶ μετὰ τῶν διαφορῶν τοῦτο προσλαμβανόμενον· αἱ διαφοραὶ δὲ πᾶσαι ἔχονται· οὐ γὰρ ἔτι ἔστιν ὑστέρα· εἴδει γὰρ ἂν διέφερε τὸ τελευταῖον, τοῦτο δ’ εἴρηται μὴ διαφέρειν.

Ζητεῖν δὲ δεῖ ἐπιβλέποντα ἐπὶ τὰ ὅμοια καὶ ἀδιάφορα, πρῶτον τί ἅπαντα ταὐτὸν ἔχουσιν, εἶτα πάλιν ἐφ’ ἑτέροις, ἃ ἐν ταὐτῷ μὲν γένει ἐκείνοις, εἰσὶ δὲ αὑτοῖς μὲν ταὐτὰ τῷ εἴδει, ἐκείνων δ’ ἕτερα. ὅταν δ’ ἐπὶ τούτων ληφθῇ τί πάντα ταὐτόν, καὶ ἐπὶ τῶν ἄλλων ὁμοίως, ἐπὶ τῶν εἰλημμένων πάλιν σκοπεῖν εἰ ταὐτόν, ἕως ἂν εἰς ἕνα ἔλθῃ λόγον· οὗτος γὰρ ἔσται τοῦ πράγματος ὁρισμός. ἐὰν δὲ μὴ βαδίζῃ εἰς ἕνα ἀλλ’ εἰς δύο ἢ πλείους, δῆλον ὅτι οὐκ ἂν εἴη ἕν τι εἶναι τὸ ζητούμενον, ἀλλὰ πλείω. οἷον λέγω, εἰ τί ἐστι μεγαλοψυχία ζητοῖμεν, σκεπτέον ἐπί τινων μεγαλοψύχων, οὓς ἴσμεν, τί ἔχουσιν ἓν πάντες ᾗ τοιοῦτοι. οἷον εἰ Ἀλκιβιάδης μεγαλόψυχος ἢ ὁ Ἀχιλλεὺς καὶ ὁ Αἴας, τί ἓν ἅπαντες; τὸ μὴ ἀνέχεσθαι ὑβριζόμενοι· ὁ μὲν γὰρ ἐπολέμησεν, ὁ δ’ ἐμήνισεν, ὁ δ’ ἀπέκτεινεν ἑαυτόν. πάλιν ἐφ’ ἑτέρων, οἷον Λυσάνδρου ἢ Σωκράτους. εἰ δὴ τὸ ἀδιάφοροι εἶναι εὐτυχοῦντες καὶ ἀτυχοῦντες, ταῦτα δύο λαβὼν σκοπῶ τί τὸ αὐτὸ ἔχουσιν ἥ τε ἀπάθεια ἡ περὶ τὰς τύχας καὶ ἡ μὴ ὑπομονὴ ἀτιμαζομένων. εἰ δὲ μηδέν, δύο εἴδη ἂν εἴη τῆς μεγαλοψυχίας. αἰεὶ δ’ ἐστὶ πᾶς ὅρος καθόλου· οὐ γάρ τινι ὀφθαλμῷ λέγει τὸ ὑγιεινὸν ὁ ἰατρός, ἀλλ’ ἢ παντὶ ἢ εἴδει ἀφορίσας. ῥᾷόν τε τὸ καθ’ ἕκαστον ὁρίσασθαι ἢ τὸ καθόλου, διὸ δεῖ ἀπὸ τῶν καθ’ ἕκαστα ἐπὶ τὰ καθόλου μεταβαίνειν· καὶ γὰρ αἱ ὁμωνυμίαι λανθάνουσι μᾶλλον ἐν τοῖς καθόλου ἢ ἐν τοῖς ἀδιαφόροις. ὥσπερ δὲ ἐν ταῖς ἀποδείξεσι δεῖ τό γε συλλελογίσθαι ὑπάρχειν, οὕτω καὶ ἐν τοῖς ὅροις τὸ σαφές. τοῦτο δ’ ἔσται, ἐὰν διὰ τῶν καθ’ ἕκαστον εἰλημμένων ᾖ τὸ ἐν ἑκάστῳ γένει ὁρίζεσθαι χωρίς, οἷον τὸ ὅμοιον μὴ πᾶν ἀλλὰ τὸ ἐν χρώμασι καὶ σχήμασι, καὶ ὀξὺ τὸ ἐν φωνῇ, καὶ οὕτως ἐπὶ τὸ κοινὸν βαδίζειν, εὐλαβούμενον μὴ ὁμωνυμίᾳ ἐντύχῃ. εἰ δὲ μὴ διαλέγεσθαι δεῖ μεταφοραῖς, δῆλον ὅτι οὐδ’ ὁρίζεσθαι οὔτε μεταφοραῖς οὔτε ὅσα λέγεται μεταφοραῖς· διαλέγεσθαι γὰρ ἀνάγκη ἔσται μεταφοραῖς.

Κεφάλαιο 14

[98a] Πρὸς δὲ τὸ ἔχειν τὰ προβλήματα ἐκλέγειν δεῖ τάς τε ἀνατομὰς καὶ τὰς διαιρέσεις, οὕτω δὲ ἐκλέγειν, ὑποθέμενον τὸ γένος τὸ κοινὸν ἁπάντων, οἷον εἰ ζῷα εἴη τὰ τεθεωρημένα, ποῖα παντὶ ζῴῳ ὑπάρχει, ληφθέντων δὲ τούτων, πάλιν τῶν λοιπῶν τῷ πρώτῳ ποῖα παντὶ ἕπεται, οἷον εἰ τοῦτο ὄρνις, ποῖα παντὶ ἕπεται ὄρνιθι, καὶ οὕτως αἰεὶ τῷ ἐγγύτατα· δῆλον γὰρ ὅτι ἕξομεν ἤδη λέγειν τὸ διὰ τί ὑπάρχει τὰ ἑπόμενα τοῖς ὑπὸ τὸ κοινόν, οἷον διὰ τί ἀνθρώπῳ ἢ ἵππῳ ὑπάρχει. ἔστω δὲ ζῷον ἐφ᾽ οὗ Α, τὸ δὲ Β τὰ ἑπόμενα παντὶ ζῴῳ, ἐφ᾽ ὧν δὲ Γ Δ Ε τὰ τινὰ ζῷα. δῆλον δὴ διὰ τί τὸ Β ὑπάρχει τῷ Δ· διὰ γὰρ τὸ Α. ὁμοίως δὲ καὶ τοῖς ἄλλοις· καὶ ἀεὶ ἐπὶ τῶν κάτω ὁ αὐτὸς λόγος.

Νῦν μὲν οὖν κατὰ τὰ παραδεδομένα κοινὰ ὀνόματα λέγομεν, δεῖ δὲ μὴ μόνον ἐπὶ τούτων σκοπεῖν, ἀλλὰ καὶ ἂν ἄλλο τι ὀφθῇ ὑπάρχον κοινόν, ἐκλαμβάνοντα, εἶτα τίσι τοῦτ᾽ ἀκολουθεῖ καὶ ποῖα τούτῳ ἕπεται, οἷον τοῖς κέρατα ἔχουσι τὸ ἔχειν ἐχῖνον, τὸ μὴ ἀμφώδοντ᾽ εἶναι· πάλιν τὸ κέρατ᾽ ἔχειν τίσιν ἕπεται. δῆλον γὰρ διὰ τί ἐκείνοις ὑπάρξει τὸ εἰρημένον· διὰ γὰρ τὸ κέρατ᾽ ἔχειν ὑπάρξει.

Ἔτι δ᾽ ἄλλος τρόπος ἐστὶ κατὰ τὸ ἀνάλογον ἐκλέγειν. ἓν γὰρ λαβεῖν οὐκ ἔστι τὸ αὐτό, ὃ δεῖ καλέσαι σήπιον καὶ ἄκανθαν καὶ ὀστοῦν· ἔσται δ᾽ ἑπόμενα καὶ τούτοις ὥσπερ μιᾶς τινος φύσεως τῆς τοιαύτης οὔσης.

Τὰ δ’ αὐτὰ προβλήματά ἐστι τὰ μὲν τῷ τὸ αὐτὸ μέσον ἔχειν, οἷον ὅτι πάντα ἀντιπερίστασις. τούτων δ’ ἔνια τῷ γένει ταὐτά, ὅσα ἔχει διαφορὰς τῷ ἄλλων ἢ ἄλλως εἶναι, οἷον διὰ τί ἠχεῖ, ἢ διὰ τί ἐμφαίνεται, καὶ διὰ τί ἶρις· ἅπαντα γὰρ ταῦτα τὸ αὐτὸ πρόβλημά ἐστι γένει (πάντα γὰρ ἀνάκλασις), ἀλλ’ εἴδει ἕτερα. τὰ δὲ τῷ τὸ μέσον ὑπὸ τὸ ἕτερον μέσον εἶναι διαφέρει τῶν προβλημάτων, οἷον διὰ τί ὁ Νεῖλος φθίνοντος τοῦ μηνὸς μᾶλλον ῥεῖ; διότι χειμεριώτερος φθίνων ὁ μείς. διὰ τί δὲ χειμεριώτερος φθίνων; διότι ἡ σελήνη ἀπολείπει. ταῦτα γὰρ οὕτως ἔχει πρὸς ἄλληλα.

Περὶ δ’ αἰτίου καὶ οὗ αἴτιον ἀπορήσειε μὲν ἄν τις, ἆρα ὅτε ὑπάρχει τὸ αἰτιατόν, καὶ τὸ αἴτιον ὑπάρχει (ὥσπερ εἰ φυλλορροεῖ ἢ ἐκλείπει, καὶ τὸ αἴτιον τοῦ ἐκλείπειν ἢ φυλλορροεῖν ἔσται· οἷον εἰ τοῦτ’ ἔστι τὸ πλατέα ἔχειν τὰ [98b] φύλλα, τοῦ δ’ ἐκλείπειν τὸ τὴν γῆν ἐν μέσῳ εἶναι· εἰ γὰρ μὴ ὑπάρχει, ἄλλο τι ἔσται τὸ αἴτιον αὐτῶν), εἴ τε τὸ αἴτιον ὑπάρχει, ἅμα καὶ τὸ αἰτιατόν (οἷον εἰ ἐν μέσῳ ἡ γῆ, ἐκλείπει, ἢ εἰ πλατύφυλλον, φυλλορροεῖ). εἰ δ’ οὕτως, ἅμ’ ἂν εἴη καὶ δεικνύοιτο δι’ ἀλλήλων. ἔστω γὰρ τὸ φυλλορροεῖν ἐφ’ οὗ Α, τὸ δὲ πλατύφυλλον ἐφ’ οὗ Β, ἄμπελος δὲ ἐφ’ οὗ Γ. εἰ δὴ τῷ Β ὑπάρχει τὸ Α (πᾶν γὰρ πλατύφυλλον φυλλορροεῖ), τῷ δὲ Γ ὑπάρχει τὸ Β (πᾶσα γὰρ ἄμπελος πλατύφυλλος), τῷ Γ ὑπάρχει τὸ Α, καὶ πᾶσα ἄμπελος φυλλορροεῖ. αἴτιον δὲ τὸ Β τὸ μέσον. ἀλλὰ καὶ ὅτι πλατύφυλλον ἡ ἄμπελος, ἔστι διὰ τοῦ φυλλορροεῖν ἀποδεῖξαι. ἔστω γὰρ τὸ μὲν Δ πλατύφυλλον, τὸ δὲ Ε τὸ φυλλορροεῖν, ἄμπελος δὲ ἐφ’ οὗ Ζ. τῷ δὴ Ζ ὑπάρχει τὸ Ε (φυλλορροεῖ γὰρ πᾶσα ἄμπελος), τῷ δὲ Ε τὸ Δ (ἅπαν γὰρ τὸ φυλλορροοῦν πλατύφυλλον)· πᾶσα ἄρα ἄμπελος πλατύφυλλον. αἴτιον δὲ τὸ φυλλορροεῖν. εἰ δὲ μὴ ἐνδέχεται αἴτια εἶναι ἀλλήλων (τὸ γὰρ αἴτιον πρότερον οὗ αἴτιον, καὶ τοῦ μὲν ἐκλείπειν αἴτιον τὸ ἐν μέσῳ τὴν γῆν εἶναι, τοῦ δ’ ἐν μέσῳ τὴν γῆν εἶναι οὐκ αἴτιον τὸ ἐκλείπειν)-εἰ οὖν ἡ μὲν διὰ τοῦ αἰτίου ἀπόδειξις τοῦ διὰ τί, ἡ δὲ μὴ διὰ τοῦ αἰτίου τοῦ ὅτι, ὅτι μὲν ἐν μέσῳ, οἶδε, διότι δ’ οὔ. ὅτι δ’ οὐ τὸ ἐκλείπειν αἴτιον τοῦ ἐν μέσῳ, ἀλλὰ τοῦτο τοῦ ἐκλείπειν, φανερόν· ἐν γὰρ τῷ λόγῳ τῷ τοῦ ἐκλείπειν ἐνυπάρχει τὸ ἐν μέσῳ, ὥστε δῆλον ὅτι διὰ τούτου ἐκεῖνο γνωρίζεται, ἀλλ’ οὐ τοῦτο δι’ ἐκείνου.

Ἢ ἐνδέχεται ἑνὸς πλείω αἴτια εἶναι; καὶ γὰρ εἰ ἔστι τὸ αὐτὸ πλειόνων πρώτων κατηγορεῖσθαι, ἔστω τὸ Α τῷ Β πρώτῳ ὑπάρχον, καὶ τῷ Γ ἄλλῳ πρώτῳ, καὶ ταῦτα τοῖς Δ Ε. ὑπάρξει ἄρα τὸ Α τοῖς Δ Ε· αἴτιον δὲ τῷ μὲν Δ τὸ Β, τῷ δὲ Ε τὸ Γ· ὥστε τοῦ μὲν αἰτίου ὑπάρχοντος ἀνάγκη τὸ πρᾶγμα ὑπάρχειν, τοῦ δὲ πράγματος ὑπάρχοντος οὐκ ἀνάγκη πᾶν ὃ ἂν ᾖ αἴτιον, ἀλλ’ αἴτιον μέν, οὐ μέντοι πᾶν. ἢ εἰ ἀεὶ καθόλου τὸ πρόβλημά ἐστι, καὶ τὸ αἴτιον ὅλον τι, καὶ οὗ αἴτιον, καθόλου; οἷον τὸ φυλλορροεῖν ὅλῳ τινὶ ἀφωρισμένον, κἂν εἴδη αὐτοῦ ᾖ, καὶ τοισδὶ καθόλου, ἢ φυτοῖς ἢ τοιοισδὶ φυτοῖς· ὥστε καὶ τὸ μέσον ἴσον δεῖ εἶναι ἐπὶ τούτων καὶ οὗ αἴτιον, καὶ ἀντιστρέφειν. οἷον διὰ τί τὰ δένδρα φυλλορροεῖ; εἰ δὴ διὰ πῆξιν τοῦ ὑγροῦ, εἴτε φυλλορροεῖ δένδρον, δεῖ ὑπάρχειν πῆξιν, εἴτε πῆξις ὑπάρχει, μὴ ὁτῳοῦν ἀλλὰ δένδρῳ, φυλλορροεῖν.

[99a] Πότερον δ’ ἐνδέχεται μὴ τὸ αὐτὸ αἴτιον εἶναι τοῦ αὐτοῦ πᾶσιν ἀλλ’ ἕτερον, ἢ οὔ; ἢ εἰ μὲν καθ’ αὑτὸ ἀποδέδεικται καὶ μὴ κατὰ σημεῖον ἢ συμβεβηκός, οὐχ οἷόν τε· ὁ γὰρ λόγος τοῦ ἄκρου τὸ μέσον ἐστίν· εἰ δὲ μὴ οὕτως, ἐνδέχεται. ἔστι δὲ καὶ οὗ αἴτιον καὶ ᾧ σκοπεῖν κατὰ συμβεβηκός· οὐ μὴν δοκεῖ προβλήματα εἶναι. εἰ δὲ μή, ὁμοίως ἕξει τὸ μέσον· εἰ μὲν ὁμώνυμα, ὁμώνυμον τὸ μέσον, εἰ δ’ ὡς ἐν γένει, ὁμοίως ἕξει. οἷον διὰ τί καὶ ἐναλλὰξ ἀνάλογον; ἄλλο γὰρ αἴτιον ἐν γραμμαῖς καὶ ἀριθμοῖς καὶ τὸ αὐτό γε, ᾗ μὲν γραμμή, ἄλλο, ᾗ δ’ ἔχον αὔξησιν τοιανδί, τὸ αὐτό. οὕτως ἐπὶ πάντων. τοῦ δ’ ὅμοιον εἶναι χρῶμα χρώματι καὶ σχῆμα σχήματι ἄλλο ἄλλῳ. ὁμώνυμον γὰρ τὸ ὅμοιον ἐπὶ τούτων· ἔνθα μὲν γὰρ ἴσως τὸ ἀνάλογον ἔχειν τὰς πλευρὰς καὶ ἴσας τὰς γωνίας, ἐπὶ δὲ χρωμάτων τὸ τὴν αἴσθησιν μίαν εἶναι ἤ τι ἄλλο τοιοῦτον. τὰ δὲ κατ’ ἀναλογίαν τὰ αὐτὰ καὶ τὸ μέσον ἕξει κατ’ ἀναλογίαν. Ἔχει δ’ οὕτω τὸ παρακολουθεῖν τὸ αἴτιον ἀλλήλοις καὶ οὗ αἴτιον καὶ ᾧ αἴτιον· καθ’ ἕκαστον μὲν λαμβάνοντι τὸ οὗ αἴτιον ἐπὶ πλέον, οἷον τὸ τέτταρσιν ἴσας τὰς ἔξω ἐπὶ πλέον ἢ τρίγωνον ἢ τετράγωνον, ἅπασι δὲ ἐπ’ ἴσον (ὅσα γὰρ τέτταρσιν ὀρθαῖς ἴσας τὰς ἔξω)· καὶ τὸ μέσον ὁμοίως. ἔστι δὲ τὸ μέσον λόγος τοῦ πρώτου ἄκρου, διὸ πᾶσαι αἱ ἐπιστῆμαι δι’ ὁρισμοῦ γίγνονται. οἷον τὸ φυλλορροεῖν ἅμα ἀκολουθεῖ τῇ ἀμπέλῳ καὶ ὑπερέχει, καὶ συκῇ, καὶ ὑπερέχει· ἀλλ’ οὐ πάντων, ἀλλ’ ἴσον. εἰ δὴ λάβοις τὸ πρῶτον μέσον, λόγος τοῦ φυλλορροεῖν ἐστιν. ἔσται γὰρ πρῶτον μὲν ἐπὶ θάτερα μέσον, ὅτι τοιαδὶ ἅπαντα· εἶτα τούτου μέσον, ὅτι ὀπὸς πήγνυται ἤ τι ἄλλο τοιοῦτον. τί δ’ ἐστὶ τὸ φυλλορροεῖν; τὸ πήγνυσθαι τὸν ἐν τῇ συνάψει τοῦ σπέρματος ὀπόν.

Ἐπὶ δὲ τῶν σχημάτων ὧδε ἀποδώσει ζητοῦσι τὴν παρακολούθησιν τοῦ αἰτίου καὶ οὗ αἴτιον. ἔστω τὸ Α τῷ Β ὑπάρχειν παντί, τὸ δὲ Β ἑκάστῳ τῶν Δ, ἐπὶ πλέον δέ. τὸ μὲν δὴ Β καθόλου ἂν εἴη τοῖς Δ· τοῦτο γὰρ λέγω καθόλου ᾧ μὴ ἀντιστρέφει, πρῶτον δὲ καθόλου ᾧ ἕκαστον μὲν μὴ ἀντιστρέφει, ἅπαντα δὲ ἀντιστρέφει καὶ παρεκτείνει. τοῖς δὴ Δ αἴτιον τοῦ Α τὸ Β. δεῖ ἄρα τὸ Α ἐπὶ πλέον τοῦ Β ἐπεκτείνειν· εἰ δὲ μή, τί μᾶλλον αἴτιον ἔσται τοῦτο ἐκείνου; εἰ δὴ πᾶσιν ὑπάρχει τοῖς Ε τὸ Α, ἔσται τι ἐκεῖνα ἓν ἅπαντα ἄλλο τοῦ Β. εἰ γὰρ μή, πῶς ἔσται εἰπεῖν ὅτι ᾧ τὸ Ε, τὸ [99b] Α παντί, ᾧ δὲ τὸ Α, οὐ παντὶ τὸ Ε; διὰ τί γὰρ οὐκ ἔσται τι αἴτιον οἷον [τὸ Α] ὑπάρχει πᾶσι τοῖς Δ; ἀλλ’ ἆρα καὶ τὰ Ε ἔσται τι ἕν; ἐπισκέψασθαι δεῖ τοῦτο, καὶ ἔστω τὸ Γ. ἐνδέχεται δὴ τοῦ αὐτοῦ πλείω αἴτια εἶναι, ἀλλ’ οὐ τοῖς αὐτοῖς τῷ εἴδει, οἷον τοῦ μακρόβια εἶναι τὰ μὲν τετράποδα τὸ μὴ ἔχειν χολήν, τὰ δὲ πτηνὰ τὸ ξηρὰ εἶναι ἢ ἕτερόν τι.

Περὶ μὲν οὖν συλλογισμοῦ καὶ ἀποδείξεως, τί τε ἑκάτερόν ἐστι καὶ πῶς γίνεται, φανερόν, ἅμα δὲ καὶ περὶ ἐπιστήμης ἀποδεικτικῆς· ταὐτὸν γάρ ἐστιν. περὶ δὲ τῶν ἀρχῶν, πῶς τε γίνονται γνώριμοι καὶ τίς ἡ γνωρίζουσα ἕξις, ἐντεῦθεν ἔσται δῆλον προαπορήσασι πρῶτον.

Ὅτι μὲν οὖν οὐκ ἐνδέχεται ἐπίστασθαι δι’ ἀποδείξεως μὴ γιγνώσκοντι τὰς πρώτας ἀρχὰς τὰς ἀμέσους, εἴρηται πρότερον. τῶν δ’ ἀμέσων τὴν γνῶσιν, καὶ πότερον ἡ αὐτή ἐστιν ἢ οὐχ ἡ αὐτή, διαπορήσειεν ἄν τις, καὶ πότερον ἐπιστήμη ἑκατέρου ἢ οὔ, ἢ τοῦ μὲν ἐπιστήμη τοῦ δ’ ἕτερόν τι γένος, καὶ πότερον οὐκ ἐνοῦσαι αἱ ἕξεις ἐγγίνονται ἢ ἐνοῦσαι λελήθασιν. εἰ μὲν δὴ ἔχομεν αὐτάς, ἄτοπον· συμβαίνει γὰρ ἀκριβεστέρας ἔχοντας γνώσεις ἀποδείξεως λανθάνειν. εἰ δὲ λαμβάνομεν μὴ ἔχοντες πρότερον, πῶς ἂν γνωρίζοιμεν καὶ μανθάνοιμεν ἐκ μὴ προϋπαρχούσης γνώσεως; ἀδύνατον γάρ, ὥσπερ καὶ ἐπὶ τῆς ἀποδείξεως ἐλέγομεν. φανερὸν τοίνυν ὅτι οὔτ’ ἔχειν οἷόν τε, οὔτ’ ἀγνοοῦσι καὶ μηδεμίαν ἔχουσιν ἕξιν ἐγγίγνεσθαι. ἀνάγκη ἄρα ἔχειν μέν τινα δύναμιν, μὴ τοιαύτην δ’ ἔχειν ἢ ἔσται τούτων τιμιωτέρα κατ’ ἀκρίβειαν. φαίνεται δὲ τοῦτό γε πᾶσιν ὑπάρχον τοῖς ζῴοις. ἔχει γὰρ δύναμιν σύμφυτον κριτικήν, ἣν καλοῦσιν αἴσθησιν· ἐνούσης δ’ αἰσθήσεως τοῖς μὲν τῶν ζῴων ἐγγίγνεται μονὴ τοῦ αἰσθήματος, τοῖς δ’ οὐκ ἐγγίγνεται. ὅσοις μὲν οὖν μὴ ἐγγίγνεται, ἢ ὅλως ἢ περὶ ἃ μὴ ἐγγίγνεται, οὐκ ἔστι τούτοις γνῶσις ἔξω τοῦ αἰσθάνεσθαι· ἐν οἷς δ’ ἔνεστιν αἰσθομένοις ἔχειν [100a] ἔτι ἐν τῇ ψυχῇ. πολλῶν δὲ τοιούτων γινομένων ἤδη διαφορά τις γίνεται, ὥστε τοῖς μὲν γίνεσθαι λόγον ἐκ τῆς τῶν τοιούτων μονῆς, τοῖς δὲ μή.

Ἐκ μὲν οὖν αἰσθήσεως γίνεται μνήμη, ὥσπερ λέγομεν, ἐκ δὲ μνήμης πολλάκις τοῦ αὐτοῦ γινομένης ἐμπειρία· αἱ γὰρ πολλαὶ μνῆμαι τῷ ἀριθμῷ ἐμπειρία μία ἐστίν. ἐκ δ’ ἐμπειρίας ἢ ἐκ παντὸς ἠρεμήσαντος τοῦ καθόλου ἐν τῇ ψυχῇ, τοῦ ἑνὸς παρὰ τὰ πολλά, ὃ ἂν ἐν ἅπασιν ἓν ἐνῇ ἐκείνοις τὸ αὐτό, τέχνης ἀρχὴ καὶ ἐπιστήμης, ἐὰν μὲν περὶ γένεσιν, τέχνης, ἐὰν δὲ περὶ τὸ ὄν, ἐπιστήμης. οὔτε δὴ ἐνυπάρχουσιν ἀφωρισμέναι αἱ ἕξεις, οὔτ’ ἀπ’ ἄλλων ἕξεων γίνονται γνωστικωτέρων, ἀλλ’ ἀπὸ αἰσθήσεως, οἷον ἐν μάχῃ τροπῆς γενομένης ἑνὸς στάντος ἕτερος ἔστη, εἶθ’ ἕτερος, ἕως ἐπὶ ἀρχὴν ἦλθεν. ἡ δὲ ψυχὴ ὑπάρχει τοιαύτη οὖσα οἵα δύνασθαι πάσχειν τοῦτο. ὃ δ’ ἐλέχθη μὲν πάλαι, οὐ σαφῶς δὲ ἐλέχθη, πάλιν εἴπωμεν. στάντος γὰρ τῶν ἀδιαφόρων ἑνός, πρῶτον μὲν ἐν τῇ ψυχῇ καθόλου (καὶ γὰρ αἰσθάνεται μὲν τὸ καθ’ ἕκαστον, ἡ δ’ αἴσθησις τοῦ καθόλου [100b] ἐστίν, οἷον ἀνθρώπου, ἀλλ’ οὐ Καλλίου ἀνθρώπου)· πάλιν ἐν τούτοις ἵσταται, ἕως ἂν τὰ ἀμερῆ στῇ καὶ τὰ καθόλου, οἷον τοιονδὶ ζῷον, ἕως ζῷον, καὶ ἐν τούτῳ ὡσαύτως. δῆλον δὴ ὅτι ἡμῖν τὰ πρῶτα ἐπαγωγῇ γνωρίζειν ἀναγκαῖον· καὶ γὰρ ἡ αἴσθησις οὕτω τὸ καθόλου ἐμποιεῖ.

Ἐπεὶ δὲ τῶν περὶ τὴν διάνοιαν ἕξεων αἷς ἀληθεύομεν αἱ μὲν ἀεὶ ἀληθεῖς εἰσιν, αἱ δὲ ἐπιδέχονται τὸ ψεῦδος, οἷον δόξα καὶ λογισμός, ἀληθῆ δ’ ἀεὶ ἐπιστήμη καὶ νοῦς, καὶ οὐδὲν ἐπιστήμης ἀκριβέστερον ἄλλο γένος ἢ νοῦς, αἱ δ’ ἀρχαὶ τῶν ἀποδείξεων γνωριμώτεραι, ἐπιστήμη δ’ ἅπασα μετὰ λόγου ἐστί, τῶν ἀρχῶν ἐπιστήμη μὲν οὐκ ἂν εἴη, ἐπεὶ δ’ οὐδὲν ἀληθέστερον ἐνδέχεται εἶναι ἐπιστήμης ἢ νοῦν, νοῦς ἂν εἴη τῶν ἀρχῶν, ἔκ τε τούτων σκοποῦσι καὶ ὅτι ἀποδείξεως ἀρχὴ οὐκ ἀπόδειξις, ὥστ’ οὐδ’ ἐπιστήμης ἐπιστήμη. εἰ οὖν μηδὲν ἄλλο παρ’ ἐπιστήμην γένος ἔχομεν ἀληθές, νοῦς ἂν εἴη ἐπιστήμης ἀρχή. καὶ ἡ μὲν ἀρχὴ τῆς ἀρχῆς εἴη ἄν, ἡ δὲ πᾶσα ὁμοίως ἔχει πρὸς τὸ πᾶν πρᾶγμα.

[100a] Ἡ μὲν πρόθεσις τῆς πραγματείας μέθοδον εὑρεῖν ἀφ’ ἧς δυνησόμεθα συλλογίζεσθαι περὶ παντὸς τοῦ προτεθέντος προβλήματος ἐξ ἐνδόξων, καὶ αὐτοὶ λόγον ὑπέχοντες μηθὲν ἐροῦμεν ὑπεναντίον. πρῶτον οὖν ῥητέον τί ἐστι συλλογισμὸς καὶ τίνες αὐτοῦ διαφοραί, ὅπως ληφθῇ ὁ διαλεκτικὸς συλλογισμός· τοῦτον γὰρ ζητοῦμεν κατὰ τὴν προκειμένην πραγματείαν.

Ἔστι δὴ συλλογισμὸς λόγος ἐν ᾧ τεθέντων τινῶν ἕτερόν τι τῶν κειμένων ἐξ ἀνάγκης συμβαίνει διὰ τῶν κειμένων. ἀπόδειξις μὲν οὖν ἐστιν, ὅταν ἐξ ἀληθῶν καὶ πρώτων ὁ συλλογισμὸς ᾖ, ἢ ἐκ τοιούτων ἃ διά τινων πρώτων καὶ ἀληθῶν τῆς περὶ αὐτὰ γνώσεως τὴν ἀρχὴν εἴληφεν, διαλεκτικὸς δὲ συλλογισμὸς ὁ ἐξ ἐνδόξων συλλογιζόμενος. ἔστι [100b] δὲ ἀληθῆ μὲν καὶ πρῶτα τὰ μὴ δι’ ἑτέρων ἀλλὰ δι’ αὑτῶν ἔχοντα τὴν πίστιν (οὐ δεῖ γὰρ ἐν ταῖς ἐπιστημονικαῖς ἀρχαῖς ἐπιζητεῖσθαι τὸ διὰ τί, ἀλλ’ ἑκάστην τῶν ἀρχῶν αὐτὴν καθ’ ἑαυτὴν εἶναι πιστήν), ἔνδοξα δὲ τὰ δοκοῦντα πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς σοφοῖς, καὶ τούτοις ἢ πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς μάλιστα γνωρίμοις καὶ ἐνδόξοις. ἐριστικὸς δ’ ἐστὶ συλλογισμὸς ὁ ἐκ φαινομένων ἐνδόξων μὴ ὄντων δέ, καὶ ὁ ἐξ ἐνδόξων ἢ φαινομένων ἐνδόξων φαινόμενος· οὐ γὰρ πᾶν τὸ φαινόμενον ἔνδοξον καὶ ἔστιν ἔνδοξον. οὐθὲν γὰρ τῶν λεγομένων ἐνδόξων ἐπιπόλαιον ἔχει παντελῶς τὴν φαντασίαν, καθάπερ περὶ τὰς τῶν ἐριστικῶν λόγων ἀρχὰς συμβέβηκεν ἔχειν· παραχρῆμα γὰρ καὶ ὡς ἐπὶ τὸ πολὺ τοῖς καὶ μικρὰ συνορᾶν δυναμένοις κατάδηλος ἐν αὐτοῖς ἡ τοῦ [101a] ψεύδους ἐστὶ φύσις. ὁ μὲν οὖν πρότερος τῶν ῥηθέντων ἐριστικῶν συλλογισμῶν καὶ συλλογισμὸς λεγέσθω, ὁ δὲ λοιπὸς ἐριστικὸς μὲν συλλογισμός, συλλογισμὸς δ’ οὔ, ἐπειδὴ φαίνεται μὲν συλλογίζεσθαι, συλλογίζεται δ’ οὔ.

Ἔτι δὲ παρὰ τοὺς εἰρημένους ἅπαντας συλλογισμοὺς οἱ ἐκ τῶν περί τινας ἐπιστήμας οἰκείων γινόμενοι παραλογισμοί, καθάπερ ἐπὶ τῆς γεωμετρίας καὶ τῶν ταύτῃ συγγενῶν συμβέβηκεν ἔχειν. ἔοικε γὰρ ὁ τρόπος οὗτος διαφέρειν τῶν εἰρημένων συλλογισμῶν· οὔτε γὰρ ἐξ ἀληθῶν καὶ πρώτων συλλογίζεται ὁ ψευδογραφῶν οὔτ’ ἐξ ἐνδόξων. εἰς γὰρ τὸν ὅρον οὐκ ἐμπίπτει· οὔτε γὰρ τὰ πᾶσι δοκοῦντα λαμβάνει οὔτε τὰ τοῖς πλείστοις οὔτε τὰ τοῖς σοφοῖς, καὶ τούτοις οὔτε πᾶσιν οὔτε τοῖς πλείστοις οὔτε τοῖς ἐνδοξοτάτοις, ἀλλ’ ἐκ τῶν οἰκείων μὲν τῇ ἐπιστήμῃ λημμάτων οὐκ ἀληθῶν δὲ τὸν συλλογισμὸν ποιεῖται. τῷ γὰρ ἢ τὰ ἡμικύκλια περιγράφειν μὴ ὡς δεῖ ἢ γραμμάς τινας ἄγειν μὴ ὡς ἂν ἀχθείησαν τὸν παραλογισμὸν ποιεῖται.

Εἴδη μὲν οὖν τῶν συλλογισμῶν ὡς τύπῳ περιλαβεῖν ἔστω τὰ εἰρημένα. καθόλου δ’ εἰπεῖν περὶ πάντων τῶν εἰρημένων καὶ τῶν μετὰ ταῦτα ῥηθησομένων ἐπὶ τοσοῦτον ἡμῖν διωρίσθω, διότι περὶ οὐδενὸς αὐτῶν τὸν ἀκριβῆ λόγον ἀποδοῦναι προαιρούμεθα, ἀλλ’ ὅσον τύπῳ περὶ αὐτῶν βουλόμεθα διελθεῖν, παντελῶς ἱκανὸν ἡγούμενοι κατὰ τὴν προκειμένην μέθοδον τὸ δύνασθαι γνωρίζειν ὁπωσοῦν ἕκαστον αὐτῶν.

Ἑπόμενον δ’ ἂν εἴη τοῖς εἰρημένοις εἰπεῖν πρὸς πόσα τε καὶ τίνα χρήσιμος ἡ πραγματεία. ἔστι δὴ πρὸς τρία, πρὸς γυμνασίαν, πρὸς τὰς ἐντεύξεις, πρὸς τὰς κατὰ φιλοσοφίαν ἐπιστήμας. ὅτι μὲν οὖν πρὸς γυμνασίαν χρήσιμος, ἐξ αὐτῶν καταφανές ἐστι· μέθοδον γὰρ ἔχοντες ῥᾷον περὶ τοῦ προτεθέντος ἐπιχειρεῖν δυνησόμεθα· πρὸς δὲ τὰς ἐντεύξεις, διότι τὰς τῶν πολλῶν κατηριθμημένοι δόξας οὐκ ἐκ τῶν ἀλλοτρίων ἀλλ’ ἐκ τῶν οἰκείων δογμάτων ὁμιλήσομεν πρὸς αὐτούς, μεταβιβάζοντες ὅ τι ἂν μὴ καλῶς φαίνωνται λέγειν ἡμῖν· πρὸς δὲ τὰς κατὰ φιλοσοφίαν ἐπιστήμας, ὅτι δυνάμενοι πρὸς ἀμφότερα διαπορῆσαι ῥᾷον ἐν ἑκάστοις κατοψόμεθα τἀληθές τε καὶ τὸ ψεῦδος· ἔτι δὲ πρὸς τὰ πρῶτα τῶν περὶ ἑκάστην ἐπιστήμην. ἐκ μὲν γὰρ τῶν οἰκείων τῶν κατὰ τὴν προτεθεῖσαν ἐπιστήμην ἀρχῶν ἀδύνατον εἰπεῖν τι περὶ αὐτῶν, ἐπειδὴ πρῶται αἱ ἀρχαὶ ἁπάντων [101b] εἰσί, διὰ δὲ τῶν περὶ ἕκαστα ἐνδόξων ἀνάγκη περὶ αὐτῶν διελθεῖν. τοῦτο δ’ ἴδιον ἢ μάλιστα οἰκεῖον τῆς διαλεκτικῆς ἐστιν· ἐξεταστικὴ γὰρ οὖσα πρὸς τὰς ἁπασῶν τῶν μεθόδων ἀρχὰς ὁδὸν ἔχει.

Ἕξομεν δὲ τελέως τὴν μέθοδον ὅταν ὁμοίως ἔχωμεν ὥσπερ ἐπὶ ῥητορικῆς καὶ ἰατρικῆς καὶ τῶν τοιούτων δυνάμεων· τοῦτο δ’ ἐστὶ τὸ ἐκ τῶν ἐνδεχομένων ποιεῖν ἃ προαιρούμεθα. οὔτε γὰρ ὁ ῥητορικὸς ἐκ παντὸς τρόπου πείσει οὔθ’ ὁ ἰατρικὸς ὑγιάσει, ἀλλ’ ἐὰν τῶν ἐνδεχομένων μηδὲν παραλίπῃ, ἱκανῶς αὐτὸν ἔχειν τὴν ἐπιστήμην φήσομεν.

Πρῶτον οὖν θεωρητέον ἐκ τίνων ἡ μέθοδος. εἰ δὴ λάβοιμεν πρὸς πόσα καὶ ποῖα καὶ ἐκ τίνων οἱ λόγοι, καὶ πῶς τούτων εὐπορήσομεν, ἔχοιμεν ἂν ἱκανῶς τὸ προκείμενον. ἔστι δ’ ἀριθμῷ ἴσα καὶ τὰ αὐτὰ ἐξ ὧν τε οἱ λόγοι καὶ περὶ ὧν οἱ συλλογισμοί. γίνονται μὲν γὰρ οἱ λόγοι ἐκ τῶν προτάσεων· περὶ ὧν δὲ οἱ συλλογισμοί, τὰ προβλήματά ἐστι. πᾶσα δὲ πρότασις καὶ πᾶν πρόβλημα ἢ ἴδιον ἢ γένος ἢ συμβεβηκὸς δηλοῖ· καὶ γὰρ τὴν διαφορὰν ὡς οὖσαν γενικὴν ὁμοῦ τῷ γένει τακτέον. ἐπεὶ δὲ τοῦ ἰδίου τὸ μὲν τὸ τί ἦν εἶναι σημαίνει, τὸ δ’ οὐ σημαίνει, διῃρήσθω τὸ ἴδιον εἰς ἄμφω τὰ προειρημένα μέρη, καὶ καλείσθω τὸ μὲν τὸ τί ἦν εἶναι σημαῖνον ὅρος, τὸ δὲ λοιπὸν κατὰ τὴν κοινὴν περὶ αὐτῶν ἀποδοθεῖσαν ὀνομασίαν προσαγορευέσθω ἴδιον. δῆλον οὖν ἐκ τῶν εἰρημένων ὅτι κατὰ τὴν νῦν διαίρεσιν τέτταρα τὰ πάντα συμβαίνει γίνεσθαι, ἢ ὅρον ἢ ἴδιον ἢ γένος ἢ συμβεβηκός. μηδεὶς δ’ ἡμᾶς ὑπολάβῃ λέγειν ὡς ἕκαστον τούτων καθ’ αὑτὸ λεγόμενον πρότασις ἢ πρόβλημά ἐστιν, ἀλλ’ ὅτι ἀπὸ τούτων καὶ τὰ προβλήματα καὶ αἱ προτάσεις γίνονται. διαφέρει δὲ τὸ πρόβλημα καὶ ἡ πρότασις τῷ τρόπῳ. οὕτω μὲν γὰρ ῥηθέντος, “ἆρά γε τὸ ζῷον πεζὸν δίπουν ὁρισμός ἐστιν ἀνθρώπου;” καὶ “ἆρά γε τὸ ζῷον γένος τοῦ ἀνθρώπου;”, πρότασις γίνεται· ἐὰν δὲ “πότερον τὸ ζῷον πεζὸν δίπουν ὁρισμός ἐστιν ἀνθρώπου ἢ οὔ;”, πρόβλημα γίνεται· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὥστ’ εἰκότως ἴσα τῷ ἀριθμῷ τὰ προβλήματα καὶ αἱ προτάσεις εἰσίν· ἀπὸ πάσης γὰρ προτάσεως πρόβλημα ποιήσεις μεταβάλλων τῷ τρόπῳ.

Λεκτέον δὲ τί ὅρος, τί ἴδιον, τί γένος, τί συμβεβηκός. ἔστι δ’ ὅρος μὲν λόγος ὁ τὸ τί ἦν εἶναι σημαίνων, ἀποδίδοται [102a] δὲ ἢ λόγος ἀντ’ ὀνόματος ἢ λόγος ἀντὶ λόγου· δυνατὸν γὰρ καὶ τῶν ὑπὸ λόγου τινὰ σημαινομένων ὁρίσασθαι. ὅσοι δ’ ὁπωσοῦν ὀνόματι τὴν ἀπόδοσιν ποιοῦνται, δῆλον ὡς οὐκ ἀποδιδόασιν οὗτοι τὸν τοῦ πράγματος ὁρισμόν, ἐπειδὴ πᾶς ὁρισμὸς λόγος τίς ἐστιν. ὁρικὸν μέντοι καὶ τὸ τοιοῦτον θετέον, οἷον ὅτι ‹τὸ› καλόν ἐστι τὸ πρέπον. ὁμοίως δὲ καὶ τὸ πότερον ταὐτὸν αἴσθησις καὶ ἐπιστήμη ἢ ἕτερον· καὶ γὰρ περὶ τοὺς ὁρισμοὺς πότερον ταὐτὸν ἢ ἕτερον ἡ πλείστη γίνεται διατριβή. ἁπλῶς δὲ ὁρικὰ πάντα λεγέσθω τὰ ὑπὸ τὴν αὐτὴν ὄντα μέθοδον τοῖς ὁρισμοῖς. ὅτι δὲ πάντα τὰ νῦν ῥηθέντα τοιαῦτ’ ἐστί, δῆλον ἐξ αὐτῶν. δυνάμενοι γὰρ ὅτι ταὐτὸν καὶ ὅτι ἕτερον διαλέγεσθαι, τῷ αὐτῷ τρόπῳ καὶ πρὸς τοὺς ὁρισμοὺς ἐπιχειρεῖν εὐπορήσομεν· δείξαντες γὰρ ὅτι οὐ ταὐτόν ἐστιν ἀνῃρηκότες ἐσόμεθα τὸν ὁρισμόν. οὐ μὴν ἀντιστρέφει γε τὸ νῦν ῥηθέν· οὐ γὰρ ἱκανὸν πρὸς τὸ κατασκευάσαι τὸν ὁρισμὸν τὸ δεῖξαι ταὐτὸν ὄν. πρὸς μέντοι τὸ ἀνασκευάσαι αὔταρκες τὸ δεῖξαι ὅτι οὐ ταὐτόν.

Ἴδιον δ’ ἐστὶν ὃ μὴ δηλοῖ μὲν τὸ τί ἦν εἶναι, μόνῳ δ’ ὑπάρχει καὶ ἀντικατηγορεῖται τοῦ πράγματος. οἷον ἴδιον ἀνθρώπου τὸ γραμματικῆς εἶναι δεκτικόν· εἰ γὰρ ἄνθρωπός ἐστι, γραμματικῆς δεκτικός ἐστι, καὶ εἰ γραμματικῆς δεκτικός ἐστιν, ἄνθρωπός ἐστιν. οὐθεὶς γὰρ ἴδιον λέγει τὸ ἐνδεχόμενον ἄλλῳ ὑπάρχειν, οἷον τὸ καθεύδειν ἀνθρώπῳ, οὐδ’ ἂν τύχῃ κατά τινα χρόνον μόνῳ ὑπάρχον. εἰ δ’ ἄρα τι καὶ λέγοιτο τῶν τοιούτων ἴδιον, οὐχ ἁπλῶς ἀλλὰ ποτὲ ἢ πρός τι ἴδιον ῥηθήσεται· τὸ μὲν γὰρ ἐκ δεξιῶν εἶναι ποτὲ ἴδιόν ἐστι, τὸ δὲ δίπουν πρός τι ἴδιον τυγχάνει λεγόμενον, οἷον τῷ ἀνθρώπῳ πρὸς ἵππον καὶ κύνα. ὅτι δὲ τῶν ἐνδεχομένων ἄλλῳ ὑπάρχειν οὐθὲν ἀντικατηγορεῖται, δῆλον· οὐ γὰρ ἀναγκαῖον, εἴ τι καθεύδει, ἄνθρωπον εἶναι.

Γένος δ’ ἐστὶ τὸ κατὰ πλειόνων καὶ διαφερόντων τῷ εἴδει ἐν τῷ τί ἐστι κατηγορούμενον. ἐν τῷ τί ἐστι δὲ κατηγορεῖσθαι τὰ τοιαῦτα λεγέσθω ὅσα ἁρμόττει ἀποδοῦναι ἐρωτηθέντα τί ἐστι τὸ προκείμενον· καθάπερ ἐπὶ τοῦ ἀνθρώπου ἁρμόττει, ἐρωτηθέντα τί ἐστιν, εἰπεῖν ὅτι ζῷον. γενικὸν δὲ καὶ τὸ πότερον ἐν τῷ αὐτῷ γένει ἄλλο ἄλλῳ ἢ ἐν ἑτέρῳ· καὶ γὰρ τὸ τοιοῦτον ὑπὸ τὴν αὐτὴν μέθοδον πίπτει τῷ γένει. διαλεχθέντες γὰρ ὅτι τὸ ζῷον γένος τοῦ ἀνθρώπου, ὁμοίως δὲ καὶ τοῦ βοός, διειλεγμένοι ἐσόμεθα ὅτι ἐν τῷ αὐτῷ [102b] γένει· ἐὰν δὲ τοῦ μὲν ἑτέρου δείξωμεν ὅτι γένος ἐστί, τοῦ δὲ ἑτέρου ὅτι οὐκ ἔστι, διειλεγμένοι ἐσόμεθα ὅτι οὐκ ἐν τῷ αὐτῷ γένει ταῦτ’ ἐστίν.

Συμβεβηκὸς δέ ἐστιν ὃ μηδὲν μὲν τούτων ἐστί, μήτε ὅρος μήτε ἴδιον μήτε γένος, ὑπάρχει δὲ τῷ πράγματι, καὶ ὃ ἐνδέχεται ὑπάρχειν ὁτῳοῦν ἑνὶ καὶ τῷ αὐτῷ καὶ μὴ ὑπάρχειν· οἷον τὸ καθῆσθαι ἐνδέχεται ὑπάρχειν τινὶ τῷ αὐτῷ καὶ μὴ ὑπάρχειν· ὁμοίως δὲ καὶ τὸ λευκόν· τὸ γὰρ αὐτὸ οὐθὲν κωλύει ὁτὲ μὲν λευκὸν ὁτὲ δὲ μὴ λευκὸν εἶναι. ἔστι δὲ τῶν τοῦ συμβεβηκότος ὁρισμῶν ὁ δεύτερος βελτίων· τοῦ μὲν γὰρ πρώτου ῥηθέντος ἀναγκαῖον, εἰ μέλλει τις συνήσειν, προειδέναι τί ἐστιν ὅρος καὶ ἴδιον καὶ γένος· ὁ δὲ δεύτερος αὐτοτελής ἐστι πρὸς τὸ γνωρίζειν τί ποτ’ ἐστὶ τὸ λεγόμενον καθ’ αὑτό. προσκείθωσαν δὲ τῷ συμβεβηκότι καὶ αἱ πρὸς ἄλληλα συγκρίσεις ὁπωσοῦν ἀπὸ τοῦ συμβεβηκότος λεγόμεναι, οἷον πότερον τὸ καλὸν ἢ τὸ συμφέρον αἱρετώτερον, καὶ πότερον ὁ κατ’ ἀρετὴν ἢ ὁ κατ’ ἀπόλαυσιν ἡδίων βίος, καὶ εἴ τι ἄλλο παραπλησίως τυγχάνει τούτοις λεγόμενον· ἐπὶ πάντων γὰρ τῶν τοιούτων ποτέρῳ μᾶλλον τὸ κατηγορούμενον συμβέβηκεν ἡ ζήτησις γίνεται. δῆλον δ’ ἐξ αὐτῶν ὅτι τὸ συμβεβηκὸς οὐθὲν κωλύει ποτὲ καὶ πρός τι ἴδιον γίνεσθαι· οἷον τὸ καθῆσθαι, συμβεβηκὸς ὄν, ὅταν τις μόνος καθῆται, τότε ἴδιον ἔσται, μὴ μόνου δὲ καθημένου πρὸς τοὺς μὴ καθημένους ἴδιον. ὥστε καὶ πρός τι καὶ ποτὲ οὐθὲν κωλύει τὸ συμβεβηκὸς ἴδιον γίνεσθαι. ἁπλῶς δ’ ἴδιον οὐκ ἔσται.

Μὴ λανθανέτω δ’ ἡμᾶς ὅτι τὰ πρὸς τὸ ἴδιον καὶ τὸ γένος καὶ τὸ συμβεβηκὸς πάντα καὶ πρὸς τοὺς ὁρισμοὺς ἁρμόσει λέγεσθαι. δείξαντες γὰρ ὅτι οὐ μόνῳ ὑπάρχει τῷ ὑπὸ τὸν ὁρισμόν, ὥσπερ καὶ ἐπὶ τοῦ ἰδίου, ἢ ὅτι οὐ γένος τὸ ἀποδοθὲν ἐν τῷ ὁρισμῷ, ἢ ὅτι οὐχ ὑπάρχει τι τῶν ἐν τῷ λόγῳ ῥηθέντων, ὅπερ καὶ ἐπὶ τοῦ συμβεβηκότος ἂν ῥηθείη, ἀνῃρηκότες ἐσόμεθα τὸν ὁρισμόν· ὥστε κατὰ τὸν ἔμπροσθεν ἀποδοθέντα λόγον ἅπαντ’ ἂν εἴη τρόπον τινὰ ὁρικὰ τὰ κατηριθμημένα. ἀλλ’ οὐ διὰ τοῦτο μίαν ἐπὶ πάντων καθόλου μέθοδον ζητητέον· οὔτε γὰρ ῥᾴδιον εὑρεῖν τοῦτ’ ἐστίν, εἴ θ’ εὑρεθείη, παντελῶς ἀσαφὴς καὶ δύσχρηστος ἂν εἴη πρὸς τὴν προκειμένην πραγματείαν. ἰδίας δὲ καθ’ ἕκαστον τῶν διορισθέντων γενῶν ἀποδοθείσης μεθόδου ῥᾷον ἐκ τῶν περὶ ἕκαστον [103a] οἰκείων ἡ διέξοδος τοῦ προκειμένου γίνοιτ’ ἄν. ὥστε τύπῳ μέν, καθάπερ εἴρηται πρότερον, διαιρετέον, τῶν δὲ λοιπῶν τὰ μάλισθ’ ἑκάστοις οἰκεῖα προσαπτέον, ὁρικά τε καὶ γενικὰ προσαγορεύοντας αὐτά. σχεδὸν δὲ προσῆπται τὰ ῥηθέντα πρὸς ἑκάστοις.

Πρῶτον δὲ πάντων περὶ ταὐτοῦ διοριστέον ποσαχῶς λέγεται. δόξειε δ’ ἂν τὸ ταὐτὸν ὡς τύπῳ λαβεῖν τριχῇ διαιρεῖσθαι. ἢ γὰρ ἀριθμῷ ἢ εἴδει ἢ γένει τὸ ταὐτὸν εἰώθαμεν προσαγορεύειν· ἀριθμῷ μὲν ὧν ὀνόματα πλείω τὸ δὲ πρᾶγμα ἕν, οἷον λώπιον καὶ ἱμάτιον· εἴδει δὲ ὅσα πλείω ὄντα ἀδιάφορα κατὰ τὸ εἶδός ἐστι, καθάπερ ἄνθρωπος ἀνθρώπῳ καὶ ἵππος ἵππῳ· τὰ γὰρ τοιαῦτα τῷ εἴδει λέγεται ταὐτὰ ὅσα ὑπὸ ταὐτὸ εἶδός ἐστιν· ὁμοίως δὲ καὶ γένει ταὐτὰ ὅσα ὑπὸ ταὐτὸ γένος ἐστίν, οἷον ἵππος ἀνθρώπῳ. δόξειε δ’ ἂν τὸ ἀπὸ τῆς αὐτῆς κρήνης ὕδωρ ταὐτὸν λεγόμενον ἔχειν τινὰ διαφορὰν παρὰ τοὺς εἰρημένους τρόπους. οὐ μὴν ἀλλὰ καὶ τὸ τοιοῦτόν γε ἐν τῷ αὐτῷ τετάχθω τοῖς καθ’ ἓν εἶδος ὁπωσοῦν λεγομένοις· ἅπαντα γὰρ τὰ τοιαῦτα συγγενῆ καὶ παραπλήσια ἀλλήλοις ἔοικεν εἶναι. πᾶν μὲν γὰρ ὕδωρ παντὶ ταὐτὸν τῷ εἴδει λέγεται διὰ τὸ ἔχειν τινὰ ὁμοιότητα· τὸ δ’ ἀπὸ τῆς αὐτῆς κρήνης ὕδωρ οὐδενὶ ἄλλῳ διαφέρει ἀλλ’ ἢ τῷ σφοδροτέραν εἶναι τὴν ὁμοιότητα, διὸ οὐ χωρίζομεν αὐτὸ τῶν καθ’ ἓν εἶδος ὁπωσοῦν λεγομένων. μάλιστα δ’ ὁμολογουμένως τὸ ἓν ἀριθμῷ ταὐτὸν παρὰ πᾶσι δοκεῖ λέγεσθαι. εἴωθε δὲ καὶ τοῦτο ἀποδίδοσθαι πλεοναχῶς· κυριώτατα μὲν καὶ πρώτως ὅταν ὀνόματι ἢ ὅρῳ τὸ ταὐτὸν ἀποδοθῇ, καθάπερ ἱμάτιον λωπίῳ καὶ ζῷον πεζὸν δίπουν ἀνθρώπῳ· δεύτερον δ’ ὅταν τῷ ἰδίῳ, καθάπερ τὸ ἐπιστήμης δεκτικὸν ἀνθρώπῳ καὶ τὸ τῇ φύσει ἄνω φερόμενον πυρί· τρίτον δ’ ὅταν ἀπὸ τοῦ συμβεβηκότος, οἷον τὸ καθήμενον ἢ τὸ μουσικὸν Σωκράτει· πάντα γὰρ ταῦτα τὸ ἓν ἀριθμῷ βούλεται σημαίνειν. ὅτι δ’ ἀληθὲς τὸ νῦν ῥηθέν ἐστιν, ἐκ τῶν μεταβαλλόντων τὰς προσηγορίας μάλιστ’ ἄν τις καταμάθοι· πολλάκις γάρ, ἐπιτάσσοντες ὀνόματι καλέσαι τινὰ τῶν καθημένων, μεταβάλλομεν ὅταν τύχῃ μὴ συνιεὶς ᾧ τὴν πρόσταξιν ποιούμεθα, ὡς ἀπὸ τοῦ συμβεβηκότος αὐτοῦ μᾶλλον συνήσοντος, καὶ κελεύομεν τὸν καθήμενον ἢ διαλεγόμενον καλέσαι πρὸς ἡμᾶς, δῆλον ὡς ταὐτὸν ὑπολαμβάνοντες κατά τε τοὔνομα καὶ κατὰ τὸ συμβεβηκὸς σημαίνειν.

[103b] Τὸ μὲν οὖν ταὐτόν, καθάπερ εἴρηται, τριχῇ διῃρήσθω. ὅτι δ’ ἐκ τῶν πρότερον εἰρημένων οἱ λόγοι καὶ διὰ τούτων καὶ πρὸς ταῦτα, μία μὲν πίστις ἡ διὰ τῆς ἐπαγωγῆς· εἰ γάρ τις ἐπισκοποίη ἑκάστην τῶν προτάσεων καὶ τῶν προβλημάτων, φαίνοιτ’ ἂν ἢ ἀπὸ τοῦ ὅρου ἢ ἀπὸ τοῦ ἰδίου ἢ ἀπὸ

τοῦ γένους ἢ ἀπὸ τοῦ συμβεβηκότος γεγενημένη. ἄλλη δὲ πίστις ἡ διὰ συλλογισμοῦ. ἀνάγκη γὰρ πᾶν τὶ περί τινος κατηγορούμενον ἤτοι ἀντικατηγορεῖσθαι τοῦ πράγματος ἢ μή. καὶ εἰ μὲν ἀντικατηγορεῖται, ὅρος ἢ ἴδιον ἂν εἴη (εἰ μὲν γὰρ σημαίνει τὸ τί ἦν εἶναι, ὅρος, εἰ δὲ μὴ σημαίνει, ἴδιον· τοῦτο γὰρ ἦν ἴδιον, τὸ ἀντικατηγορούμενον μὲν μὴ σημαῖνον δὲ τὸ τί ἦν εἶναι). εἰ δὲ μὴ ἀντικατηγορεῖται τοῦ πράγματος, ἤτοι τῶν ἐν τῷ ὁρισμῷ τοῦ ὑποκειμένου λεγομένων ἐστὶν ἢ οὔ. καὶ εἰ μὲν τῶν ἐν τῷ ὁρισμῷ λεγομένων, γένος ἢ διαφορὰ ἂν εἴη, ἐπειδὴ ὁ ὁρισμὸς ἐκ γένους καὶ διαφορῶν ἐστιν· εἰ δὲ μὴ τῶν ἐν τῷ ὁρισμῷ λεγομένων ἐστί, δῆλον ὅτι συμβεβηκὸς ἂν εἴη· τὸ γὰρ συμβεβηκὸς ἐλέγετο ὃ μήτε ὅρος μήτε ἴδιον μήτε γένος ἐστίν, ὑπάρχει δὲ τῷ πράγματι.

Μετὰ τοίνυν ταῦτα δεῖ διορίσασθαι τὰ γένη τῶν κατηγοριῶν, ἐν οἷς ὑπάρχουσιν αἱ ῥηθεῖσαι τέτταρες. ἔστι δὲ ταῦτα τὸν ἀριθμὸν δέκα, τί ἐστι, ποσόν, ποιόν, πρός τι, ποῦ, ποτέ, κεῖσθαι, ἔχειν, ποιεῖν, πάσχειν. ἀεὶ γὰρ τὸ συμβεβηκὸς καὶ τὸ γένος καὶ τὸ ἴδιον καὶ ὁ ὁρισμὸς ἐν μιᾷ τούτων τῶν κατηγοριῶν ἔσται· πᾶσαι γὰρ αἱ διὰ τούτων προτάσεις ἢ τί ἐστιν ἢ ποσὸν ἢ ποιὸν ἢ τῶν ἄλλων τινὰ κατηγοριῶν σημαίνουσιν. δῆλον δ’ ἐξ αὐτῶν ὅτι ὁ τὸ τί ἐστι σημαίνων ὁτὲ μὲν οὐσίαν σημαίνει, ὁτὲ δὲ ποσόν, ὁτὲ δὲ ποιόν, ὁτὲ δὲ τῶν ἄλλων τινὰ κατηγοριῶν. ὅταν μὲν γὰρ ἐκκειμένου ἀνθρώπου φῇ τὸ ἐκκείμενον ἄνθρωπον εἶναι ἢ ζῷον, τί ἐστι λέγει καὶ οὐσίαν σημαίνει· ὅταν δὲ χρώματος λευκοῦ ἐκκειμένου φῇ τὸ ἐκκείμενον λευκὸν εἶναι ἢ χρῶμα, τί ἐστι λέγει καὶ ποιὸν σημαίνει. ὁμοίως δὲ καὶ ἐὰν πηχυαίου μεγέθους ἐκκειμένου φῇ τὸ ἐκκείμενον πηχυαῖον εἶναι μέγεθος, τί ἐστι λέγει καὶ ποσὸν σημαίνει. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἕκαστον γὰρ τῶν τοιούτων, ἐάν τε αὐτὸ περὶ αὑτοῦ λέγηται ἐάν τε τὸ γένος περὶ τούτου, τί ἐστι σημαίνει· ὅταν δὲ περὶ ἑτέρου, οὐ τί ἐστι σημαίνει ἀλλὰ ποσὸν ἢ ποιὸν ἤ τινα τῶν ἄλλων κατηγοριῶν. ὥστε περὶ ὧν μὲν οἱ λόγοι καὶ ἐξ ὧν, [104a] ταῦτα καὶ τοσαῦτά ἐστι· πῶς δὲ ληψόμεθα καὶ δι’ ὧν εὐπορήσομεν, μετὰ ταῦτα λεκτέον.

Πρῶτον τοίνυν διωρίσθω τί ἐστι πρότασις διαλεκτικὴ καὶ τί πρόβλημα διαλεκτικόν. οὐ γὰρ πᾶσαν πρότασιν οὐδὲ πᾶν πρόβλημα διαλεκτικὸν θετέον· οὐδεὶς γὰρ ἂν προτείνειε νοῦν ἔχων τὸ μηδενὶ δοκοῦν οὐδὲ προβάλοι τὸ πᾶσι φανερὸν ἢ τοῖς πλείστοις· τὰ μὲν γὰρ οὐκ ἔχει ἀπορίαν, τὰ δ’ οὐδεὶς ἂν θείη. ἔστι δὲ πρότασις διαλεκτικὴ ἐρώτησις ἔνδοξος ἢ πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς σοφοῖς, καὶ τούτοις ἢ πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς μάλιστα γνωρίμοις, μὴ παράδοξος· θείη γὰρ ἄν τις τὸ δοκοῦν τοῖς σοφοῖς, ἐὰν μὴ ἐναντίον ταῖς τῶν πολλῶν δόξαις ᾖ. εἰσὶ δὲ προτάσεις διαλεκτικαὶ καὶ τὰ τοῖς ἐνδόξοις ὅμοια, καὶ τἀναντία τοῖς δοκοῦσιν ἐνδόξοις εἶναι, κατ’ ἀντίφασιν προτεινόμενα, καὶ ὅσαι δόξαι κατὰ τέχνας εἰσὶ τὰς εὑρημένας. εἰ γὰρ ἔνδοξον τὸ τὴν αὐτὴν εἶναι τῶν ἐναντίων ἐπιστήμην, καὶ τὸ αἴσθησιν τὴν αὐτὴν εἶναι τῶν ἐναντίων ἔνδοξον ἂν φανείη· καὶ εἰ μίαν ἀριθμῷ γραμματικὴν εἶναι, καὶ αὐλητικὴν μίαν, εἰ δὲ πλείους γραμματικάς, καὶ αὐλητικὰς πλείους· πάντα γὰρ ὅμοια καὶ συγγενῆ ταῦτ’ ἔοικεν εἶναι. ὁμοίως δὲ καὶ τὰ τοῖς ἐνδόξοις ἐναντία, κατ’ ἀντίφασιν προτεινόμενα, ἔνδοξα φανεῖται· εἰ γὰρ ἔνδοξον ὅτι δεῖ τοὺς φίλους εὖ ποιεῖν, καὶ ὅτι οὐ δεῖ κακῶς ποιεῖν ἔνδοξον. ἔστι δ’ ἐναντίον μὲν ὅτι δεῖ κακῶς ποιεῖν τοὺς φίλους, κατ’ ἀντίφασιν δὲ ὅτι οὐ δεῖ κακῶς ποιεῖν. ὁμοίως δὲ καὶ εἰ δεῖ τοὺς φίλους εὖ ποιεῖν, τοὺς ἐχθροὺς οὐ δεῖ. ἔστι δὲ καὶ τοῦτο κατ’ ἀντίφασιν τῶν ἐναντίων· τὸ γὰρ ἐναντίον ἐστὶν ὅτι δεῖ τοὺς ἐχθροὺς εὖ ποιεῖν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων. ἔνδοξον δὲ ἐν παραβολῇ φανεῖται καὶ τὸ ἐναντίον περὶ τοῦ ἐναντίου· οἷον εἰ τοὺς φίλους δεῖ εὖ ποιεῖν, καὶ τοὺς ἐχθροὺς δεῖ κακῶς. φανείη δ’ ἂν καὶ ἐναντίον τὸ τοὺς φίλους εὖ ποιεῖν τῷ τοὺς ἐχθροὺς κακῶς· πότερον δὲ καὶ κατ’ ἀλήθειαν οὕτως ἔχει ἢ οὔ, ἐν τοῖς ὑπὲρ τῶν ἐναντίων λεγομένοις ῥηθήσεται. δῆλον δ’ ὅτι καὶ ὅσαι δόξαι κατὰ τέχνας εἰσί, διαλεκτικαὶ προτάσεις εἰσί· θείη γὰρ ἄν τις τὰ δοκοῦντα τοῖς ὑπὲρ τούτων ἐπεσκεμμένοις, οἷον περὶ μὲν τῶν ἐν ἰατρικῇ ὡς ὁ ἰατρός, περὶ δὲ τῶν ἐν γεωμετρίᾳ ὡς ὁ γεωμετρικός· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

[104b] Πρόβλημα δ’ ἐστὶ διαλεκτικὸν θεώρημα τὸ συντεῖνον ἢ πρὸς αἵρεσιν καὶ φυγὴν ἢ πρὸς ἀλήθειαν καὶ γνῶσιν, ἢ αὐτὸ ἢ ὡς συνεργὸν πρός τι ἕτερον τῶν τοιούτων, περὶ οὗ ἢ οὐδετέρως δοξάζουσιν ἢ ἐναντίως [οἱ πολλοὶ τοῖς σοφοῖς ἢ] οἱ σοφοὶ τοῖς πολλοῖς ἢ ἑκάτεροι αὐτοὶ ἑαυτοῖς. ἔνια μὲν γὰρ τῶν προβλημάτων χρήσιμον εἰδέναι πρὸς τὸ ἑλέσθαι ἢ φυγεῖν, οἷον πότερον ἡ ἡδονὴ αἱρετὸν ἢ οὔ· ἔνια δὲ πρὸς τὸ εἰδέναι μόνον, οἷον πότερον ὁ κόσμος ἀίδιος ἢ οὔ. ἔνια δὲ αὐτὰ μὲν καθ’ αὐτὰ πρὸς οὐδέτερον τούτων, συνεργὰ δέ ἐστι πρός τινα τῶν τοιούτων· πολλὰ γὰρ αὐτὰ μὲν καθ’ αὐτὰ οὐ βουλόμεθα γνωρίζειν, ἑτέρων δ’ ἕνεκα, ὅπως διὰ τούτων ἄλλο τι γνωρίσωμεν. ἔστι δὲ προβλήματα καὶ ὧν ἐναντίοι εἰσὶ συλλογισμοί (ἀπορίαν γὰρ ἔχει πότερον οὕτως ἔχει ἢ οὐχ οὕτως, διὰ τὸ περὶ ἀμφοτέρων εἶναι λόγους πιθανούς), καὶ περὶ ὧν λόγον μὴ ἔχομεν, ὄντων μεγάλων, χαλεπὸν οἰόμενοι εἶναι τὸ διὰ τί ἀποδοῦναι, οἷον πότερον ὁ κόσμος ἀίδιος ἢ οὔ· καὶ γὰρ τὰ τοιαῦτα ζητήσειεν ἄν τις.

Τὰ μὲν οὖν προβλήματα καὶ αἱ προτάσεις καθάπερ εἴρηται διωρίσθω. θέσις δέ ἐστιν ὑπόληψις παράδοξος τῶν γνωρίμων τινὸς κατὰ φιλοσοφίαν, οἷον ὅτι οὐκ ἔστιν ἀντιλέγειν, καθάπερ ἔφη Ἀντισθένης, ἢ ὅτι πάντα κινεῖται, καθ' Ἡράκλειτον, ἢ ὅτι ἓν τὸ ὄν, καθάπερ Μέλισσός φησιν (τὸ γὰρ τοῦ τυχόντος ἐναντία ταῖς δόξαις ἀποφηναμένου φροντίζειν εὔηθες)· ἢ περὶ ὧν λόγον ἔχομεν ἐναντίον ταῖς δόξαις, οἷον ὅτι οὐ πᾶν τὸ ὂν ἤτοι γενόμενόν ἐστιν ἢ αἴδιον, καθάπερ οἱ σοφισταί φασιν· μουσικὸν γὰρ ὄντα γραμματικὸν εἶναι οὔτε γενόμενον οὔτε αἴδιον ὄντα· τοῦτο γάρ, εἰ καί τινι μὴ δοκεῖ, δόξειεν ἂν διὰ τὸ λόγον ἔχειν.

Ἔστι μὲν οὖν καὶ ἡ θέσις πρόβλημα· οὐ πᾶν δὲ πρόβλημα θέσις, ἐπειδὴ ἔνια τῶν προβλημάτων τοιαῦτ' ἐστὶ περὶ ὧν οὐδετέρως δοξάζομεν. ὅτι δέ ἐστι καὶ ἡ θέσις πρόβλημα, δῆλον· ἀνάγκη γὰρ ἐκ τῶν εἰρημένων ἢ τοὺς πολλοὺς τοῖς σοφοῖς περὶ τὴν θέσιν ἀμφισβητεῖν ἢ ὁποτερουσοῦν ἑαυτοῖς, ἐπειδὴ ὑπόληψίς τις παράδοξος ἡ θέσις ἐστίν. σχεδὸν δὲ νῦν πάντα τὰ διαλεκτικὰ προβλήματα θέσεις καλοῦνται. διαφερέτω δὲ μηδὲν ὁπωσοῦν λεγόμενον· οὐ γὰρ ὀνοματοποιῆσαι βουλόμενοι διείλομεν οὕτως αὐτά, ἀλλ' ἵνα [105a] μὴ λανθάνωσιν ἡμᾶς τίνες αὐτῶν τυγχάνουσιν οὖσαι διαφοραί.

Οὐ δεῖ δὲ πᾶν πρόβλημα οὐδὲ πᾶσαν θέσιν ἐπισκοπεῖν, ἀλλ' ἣν ἀπορήσειεν ἄν τις τῶν λόγου δεομένων καὶ μὴ κολάσεως ἢ αἰσθήσεως· οἱ μὲν γὰρ ἀποροῦντες "πότερον δεῖ τοὺς θεοὺς τιμᾶν καὶ τοὺς γονεῖς ἀγαπᾶν ἢ οὔ" κολάσεως δέονται, οἱ δὲ "πότερον ἡ χιὼν λευκὴ ἢ οὔ" αἰσθήσεως. οὐδὲ δὴ ὧν σύνεγγυς ἡ ἀπόδειξις, οὐδ' ὧν λίαν πόρρω· τὰ μὲν γὰρ οὐκ ἔχει ἀπορίαν, τὰ δὲ πλείω ἢ κατὰ γυμναστικήν.

Διωρισμένων δὲ τούτων χρὴ διελέσθαι πόσα τῶν λόγων εἴδη τῶν διαλεκτικῶν. ἔστι δὲ τὸ μὲν ἐπαγωγή, τὸ δὲ συλλογισμός. καὶ συλλογισμὸς μὲν τί ἐστιν, εἴρηται πρότερον. ἐπαγωγὴ δὲ ἡ ἀπὸ τῶν καθ' ἕκαστα ἐπὶ τὸ καθόλου ἔφοδος· οἷον εἰ ἔστι κυβερνήτης ὁ ἐπιστάμενος κράτιστος, καὶ ἡνίοχος, καὶ ὅλως ἐστὶν ὁ ἐπιστάμενος περὶ ἕκαστον ἄριστος. ἔστι δ' ἡ μὲν ἐπαγωγὴ πιθανώτερον καὶ σαφέστερον καὶ κατὰ τὴν αἴσθησιν γνωριμώτερον καὶ τοῖς πολλοῖς κοινόν, ὁ δὲ συλλογισμὸς βιαστικώτερον καὶ πρὸς τοὺς ἀντιλογικοὺς ἐνεργέστερον.

Τὰ μὲν οὖν γένη περὶ ὧν τε οἱ λόγοι καὶ ἐξ ὧν καθάπερ ἔμπροσθεν εἴρηται διωρίσθω. τὰ δ' ὄργανα δι' ὧν εὐπορήσομεν τῶν συλλογισμῶν ἐστὶ τέτταρα, ἓν μὲν τὸ προτάσεις λαβεῖν, δεύτερον δὲ τὸ ποσαχῶς ἕκαστον λέγεται δύνασθαι διελεῖν, τρίτον ‹δὲ› τὸ τὰς διαφορὰς εὑρεῖν, τέταρτον δὲ ἡ τοῦ ὁμοίου σκέψις. ἔστι δὲ τρόπον τινὰ καὶ τὰ τρία τούτων προτάσεις· ἔστι γὰρ καθ' ἕκαστον αὐτῶν ποιῆσαι πρότασιν, οἷον ὅτι αἱρετόν ἐστι τὸ καλὸν ἢ τὸ ἡδὺ ἢ τὸ συμφέρον, καὶ ὅτι διαφέρει αἴσθησις ἐπιστήμης τῷ τὴν μὲν ἀποβαλόντα δυνατὸν εἶναι πάλιν λαβεῖν, τὴν δ' ἀδύνατον, καὶ ὅτι ὁμοίως ἔχει τὸ ὑγιεινὸν πρὸς ὑγίειαν καὶ τὸ εὐεκτικὸν πρὸς εὐεξίαν. ἔστι δ’ ἡ μὲν πρώτη πρότασις ἀπὸ τοῦ πολλαχῶς λεγομένου, ἡ δὲ δευτέρα ἀπὸ τῶν διαφορῶν, ἡ δὲ τρίτη ἀπὸ τῶν ὁμοίων.

Τὰς μὲν οὖν προτάσεις ἐκλεκτέον ὁσαχῶς διωρίσθη περὶ προτάσεως, ἢ τὰς πάντων δόξας προχειριζόμενον ἢ τὰς τῶν πλείστων ἢ τὰς τῶν σοφῶν, καὶ τούτων ἢ πάντων ἢ τῶν πλείστων ἢ τῶν γνωριμωτάτων, ἢ τὰς ‹μὴ› ἐναντίας ταῖς [105b] φαινομέναις, καὶ ὅσαι δόξαι κατὰ τέχνας εἰσίν. δεῖ δὲ προτείνειν καὶ τὰς ἐναντίας ταῖς φαινομέναις ἐνδόξοις κατ’ ἀντίφασιν, καθάπερ εἴρηται πρότερον. χρήσιμον δὲ καὶ τὸ ποιεῖν αὐτὰς ἐν τῷ ἐκλέγειν μὴ μόνον τὰς οὔσας ἐνδόξους ἀλλὰ καὶ τὰς ὁμοίας ταύταις, οἷον ὅτι τῶν ἐναντίων ἡ αὐτὴ αἴσθησις (καὶ γὰρ ἡ ἐπιστήμη), καὶ ὅτι ὁρῶμεν εἰσδεχόμενοί τι, οὐκ ἐκπέμποντες· καὶ γὰρ ἐπὶ τῶν ἄλλων αἰσθήσεων οὕτως· ἀκούομέν τε γὰρ εἰσδεχόμενοί τι, οὐκ ἐκπέμποντες, καὶ γευόμεθα ὡσαύτως· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἔτι ὅσα ἐπὶ πάντων ἢ τῶν πλείστων φαίνεται, ληπτέον ὡς ἀρχὴν καὶ δοκοῦσαν θέσιν· τιθέασι γὰρ οἱ μὴ συνορῶντες ἐπὶ τίνος οὐχ οὕτως. ἐκλέγειν δὲ χρὴ καὶ ἐκ τῶν γεγραμμένων λόγων, τὰς δὲ διαγραφὰς ποιεῖσθαι περὶ ἑκάστου γένους ὑποτιθέντας χωρίς, οἷον περὶ ἀγαθοῦ ἢ περὶ ζῴου, καὶ περὶ ἀγαθοῦ παντός, ἀρξάμενον ἀπὸ τοῦ τί ἐστιν. παρασημαίνεσθαι δὲ καὶ τὰς ἑκάστων δόξας, οἷον ὅτι Ἐμπεδοκλῆς τέτταρα ἔφησε τῶν σωμάτων στοιχεῖα εἶναι· θείη γὰρ ἄν τις τὸ ὑπό τινος εἰρημένον ἐνδόξου.

Ἔστι δ’ ὡς τύπῳ περιλαβεῖν τῶν προτάσεων καὶ τῶν προβλημάτων μέρη τρία· αἱ μὲν γὰρ ἠθικαὶ προτάσεις εἰσίν, αἱ δὲ φυσικαί, αἱ δὲ λογικαί. ἠθικαὶ μὲν οὖν αἱ τοιαῦται, οἷον πότερον δεῖ τοῖς γονεῦσι μᾶλλον ἢ τοῖς νόμοις πειθαρχεῖν, ἐὰν διαφωνῶσιν· λογικαὶ δὲ οἷον πότερον τῶν ἐναντίων ἡ αὐτὴ ἐπιστήμη ἢ οὔ· φυσικαὶ δὲ οἷον πότερον ὁ κόσμος ἀίδιος ἢ οὔ. ὁμοίως δὲ καὶ τὰ προβλήματα. ποῖαι δ’ ἕκασται τῶν προειρημένων, ὁρισμῷ μὲν οὐκ εὐπετὲς ἀποδοῦναι περὶ αὐτῶν· τῇ δὲ διὰ τῆς ἐπαγωγῆς συνηθείᾳ πειρατέον γνωρίζειν ἑκάστην αὐτῶν, κατὰ τὰ προειρημένα παραδείγματα ἐπισκοποῦντα.

Πρὸς μὲν οὖν φιλοσοφίαν κατ’ ἀλήθειαν περὶ αὐτῶν πραγματευτέον, διαλεκτικῶς δὲ πρὸς δόξαν. ληπτέον δ’ ὅτι μάλιστα καθόλου πάσας τὰς προτάσεις, καὶ τὴν μίαν πολλὰς ποιητέον, οἷον ὅτι τῶν ἀντικειμένων ἡ αὐτὴ ἐπιστήμη, εἶθ’ ὅτι τῶν ἐναντίων καὶ ὅτι τῶν πρός τι. τὸν αὐτὸν δὲ τρόπον καὶ ταύτας πάλιν διαιρετέον, ἕως ἂν ἐνδέχηται διαιρεῖν, οἷον ὅτι ἀγαθοῦ καὶ κακοῦ, καὶ λευκοῦ καὶ μέλανος, καὶ ψυχροῦ καὶ θερμοῦ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

[106a] Περὶ μὲν οὖν προτάσεως ἱκανὰ τὰ προειρημένα. τὸ δὲ ποσαχῶς, πραγματευτέον μὴ μόνον ὅσα λέγεται καθ’ ἕτερον τρόπον, ἀλλὰ καὶ τοὺς λόγους αὐτῶν πειρατέον ἀποδιδόναι, οἷον μὴ μόνον ὅτι ἀγαθὸν καθ’ ἕτερον μὲν τρόπον λέγεται δικαιοσύνη καὶ ἀνδρεία, εὐεκτικὸν δὲ καὶ ὑγιεινὸν καθ’ ἕτερον, ἀλλ’ ὅτι καὶ τὰ μὲν τῷ αὐτὰ ποιά τινα εἶναι, τὰ δὲ τῷ ποιητικά τινος καὶ οὐ τῷ αὐτὰ ποιά τινα εἶναι. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων.

Πότερον δὲ πολλαχῶς ἢ μοναχῶς τῷ εἴδει λέγεται, διὰ τῶνδε θεωρητέον. πρῶτον μὲν ἐπὶ τοῦ ἐναντίου σκοπεῖν εἰ πολλαχῶς λέγεται, ἐάν τε τῷ εἴδει ἐάν τε τῷ ὀνόματι διαφωνῇ. ἔνια γὰρ εὐθὺς καὶ τοῖς ὀνόμασιν ἕτερά ἐστιν· οἷον τῷ ὀξεῖ ἐν φωνῇ μὲν ἐναντίον τὸ βαρύ, ἐν ὄγκῳ δὲ τὸ ἀμβλύ. δῆλον οὖν ὅτι τὸ ἐναντίον τῷ ὀξεῖ πολλαχῶς λέγεται. εἰ δὲ τοῦτο, καὶ τὸ ὀξύ· καθ’ ἑκάτερον γὰρ ἐκείνων ἕτερον ἔσται τὸ ἐναντίον. οὐ γὰρ τὸ αὐτὸ ὀξὺ τῷ ἀμβλεῖ καὶ τῷ βαρεῖ ἔσται ἐναντίον· ἑκατέρῳ δὲ τὸ ὀξὺ ἐναντίον. πάλιν τῷ βαρεῖ ἐν φωνῇ μὲν τὸ ὀξὺ ἐναντίον, ἐν ὄγκῳ δὲ τὸ κοῦφον· ὥστε πολλαχῶς τὸ βαρὺ λέγεται, ἐπειδὴ καὶ τὸ ἐναντίον. ὁμοίως δὲ καὶ τῷ καλῷ τῷ μὲν ἐπὶ τοῦ ζῴου τὸ αἰσχρόν, τῷ δ’ ἐπὶ τῆς οἰκίας τὸ μοχθηρόν, ὥστε ὁμώνυμον τὸ καλόν.

Ἐπ’ ἐνίων δὲ τοῖς μὲν ὀνόμασιν οὐδαμῶς διαφωνεῖ, τῷ δ’ εἴδει κατάδηλος ἐν αὐτοῖς εὐθέως ἡ διαφορά ἐστιν, οἷον ἐπὶ τοῦ λευκοῦ καὶ μέλανος. φωνὴ γὰρ λευκὴ καὶ μέλαινα λέγεται, ὁμοίως δὲ καὶ χρῶμα. τοῖς μὲν οὖν ὀνόμασιν οὐδὲν διαφωνεῖ· τῷ δ’ εἴδει κατάδηλος ἐν αὐτοῖς εὐθέως ἡ διαφορά· οὐ γὰρ ὁμοίως τό τε χρῶμα λευκὸν λέγεται καὶ ἡ φωνή. δῆλον δὲ τοῦτο καὶ διὰ τῆς αἰσθήσεως· τῶν γὰρ αὐτῶν τῷ εἴδει ἡ αὐτὴ αἴσθησις· τὸ δὲ λευκὸν τὸ ἐπὶ τῆς φωνῆς καὶ τοῦ χρώματος οὐ τῇ αὐτῇ αἰσθήσει κρίνομεν, ἀλλὰ τὸ μὲν ὄψει τὸ δ’ ἀκοῇ. ὁμοίως δὲ καὶ τὸ ὀξὺ καὶ τὸ ἀμβλὺ ἐν χυμοῖς καὶ ἐν ὄγκοις, ἀλλὰ τὸ μὲν ἁφῇ, τὸ δὲ γεύσει. οὐδὲ γὰρ ταῦτα διαφωνεῖ τοῖς ὀνόμασιν, οὔτ’ ἐπ’ αὐτῶν οὔτ’ ἐπὶ τῶν ἐναντίων· ἀμβλὺ γὰρ καὶ τὸ ἐναντίον ἑκατέρῳ.

Ἔτι εἰ τῷ μὲν ἔστι τι ἐναντίον τῷ δ’ ἁπλῶς μηδέν· οἷον τῇ μὲν ἀπὸ τοῦ πίνειν ἡδονῇ ἡ ἀπὸ τοῦ διψῆν λύπη ἐναντίον, τῇ δ’ ἀπὸ τοῦ θεωρεῖν ὅτι ἡ διάμετρος τῇ πλευρᾷ [106b] ἀσύμμετρος οὐδέν, ὥστε πλεοναχῶς ἡ ἡδονὴ λέγεται. καὶ τῷ μὲν κατὰ τὴν διάνοιαν φιλεῖν τὸ μισεῖν ἐναντίον, τῷ δὲ κατὰ τὴν σωματικὴν ἐνέργειαν οὐδέν· δῆλον οὖν ὅτι τὸ φιλεῖν ὁμώνυμον. ἔτι ἐπὶ τῶν ἀνὰ μέσον, εἰ τῶν μὲν ἔστι τι ἀνὰ μέσον τῶν δὲ μηδέν, ἢ εἰ ἀμφοῖν μὲν ἔστι ‹τι›, μὴ ταὐτὸν δέ· οἷον λευκοῦ καὶ μέλανος ἐν χρώμασι μὲν τὸ φαιόν, ἐν φωνῇ δ’ οὐδέν, ἢ εἰ ἄρα, τὸ σομφόν, καθάπερ τινές φασι σομφὴν φωνὴν ἀνὰ μέσον εἶναι· ὥσθ’ ὁμώνυμον τὸ λευκόν, ὁμοίως δὲ καὶ τὸ μέλαν. ἔτι εἰ τῶν μὲν πλείω τὰ ἀνὰ μέσον, τῶν δὲ ἕν, καθάπερ ἐπὶ τοῦ λευκοῦ καὶ μέλανος· ἐπὶ μὲν γὰρ τῶν χρωμάτων πολλὰ τὰ ἀνὰ μέσον, ἐπὶ δὲ τῆς φωνῆς ἕν, τὸ σομφόν.

Πάλιν ἐπὶ τοῦ κατ’ ἀντίφασιν ἀντικειμένου σκοπεῖν εἰ πλεοναχῶς λέγεται· εἰ γὰρ τοῦτο πλεοναχῶς λέγεται, καὶ τὸ τούτῳ ἀντικείμενον πλεοναχῶς ῥηθήσεται. οἷον τὸ μὴ βλέπειν πλεοναχῶς λέγεται, ἓν μὲν τὸ μὴ ἔχειν ὄψιν, ἓν δὲ τὸ μὴ ἐνεργεῖν τῇ ὄψει· εἰ δὲ τοῦτο πλεοναχῶς, ἀναγκαῖον καὶ τὸ βλέπειν πλεοναχῶς λέγεσθαι· ἑκατέρῳ γὰρ τῷ μὴ βλέπειν ἀντικείσεταί τι, οἷον τῷ μὲν μὴ ἔχειν ὄψιν τὸ ἔχειν, τῷ δὲ μὴ ἐνεργεῖν τῇ ὄψει τὸ ἐνεργεῖν.

Ἔτι ἐπὶ τῶν κατὰ στέρησιν καὶ ἕξιν λεγομένων ἐπισκοπεῖν· εἰ γὰρ θάτερον πλεοναχῶς λέγεται, καὶ τὸ λοιπόν. οἷον εἰ τὸ αἰσθάνεσθαι πλεοναχῶς λέγεται, κατά τε τὴν ψυχὴν καὶ τὸ σῶμα, καὶ τὸ ἀναίσθητον εἶναι πλεοναχῶς ῥηθήσεται, κατά τε τὴν ψυχὴν καὶ τὸ σῶμα. ὅτι δὲ κατὰ στέρησιν καὶ ἕξιν ἀντίκειται τὰ νῦν λεγόμενα, δῆλον, ἐπειδὴ πέφυκεν ἑκατέραν τῶν αἰσθήσεων ἔχειν τὰ ζῷα, καὶ κατὰ τὴν ψυχὴν καὶ κατὰ τὸ σῶμα.

Ἔτι δ’ ἐπὶ τῶν πτώσεων ἐπισκεπτέον. εἰ γὰρ τὸ δικαίως πλεοναχῶς λέγεται, καὶ τὸ δίκαιον πλεοναχῶς ῥηθήσεται· καθ’ ἑκάτερον γὰρ τῶν δικαίως ἔστι δίκαιον· οἷον εἰ τὸ δικαίως λέγεται τό τε κατὰ τὴν ἑαυτοῦ γνώμην κρῖναι καὶ τὸ ὡς δεῖ, ὁμοίως καὶ τὸ δίκαιον. ὡσαύτως δὲ καὶ εἰ τὸ ὑγιεινὸν πλεοναχῶς, καὶ τὸ ὑγιεινῶς πλεοναχῶς ῥηθήσεται· οἷον εἰ ὑγιεινὸν τὸ μὲν ὑγιείας ποιητικὸν τὸ δὲ φυλακτικὸν τὸ δὲ σημαντικόν, καὶ τὸ ὑγιεινῶς ἢ ποιητικῶς ἢ φυλακτικῶς ἢ σημαντικῶς ῥηθήσεται. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, ὅταν αὐτὸ πλεοναχῶς λέγηται, καὶ [107a] ἡ πτῶσις ἡ ἀπ’ αὐτοῦ πλεοναχῶς ῥηθήσεται, καὶ εἰ ἡ πτῶσις, καὶ αὐτό.

Σκοπεῖν δὲ καὶ τὰ γένη τῶν κατὰ τοὔνομα κατηγοριῶν, εἰ ταὐτά ἐστιν ἐπὶ πάντων· εἰ γὰρ μὴ ταὐτά, δῆλον ὅτι ὁμώνυμον τὸ λεγόμενον. οἷον τὸ ἀγαθὸν ἐν ἐδέσματι μὲν τὸ ποιητικὸν ἡδονῆς, ἐν ἰατρικῇ δὲ τὸ ποιητικὸν ὑγιείας, ἐπὶ δὲ ψυχῆς τὸ ποιὰν εἶναι, οἷον σώφρονα ἢ ἀνδρείαν ἢ δικαίαν· ὁμοίως δὲ καὶ ἐπὶ ἀνθρώπου. ἐνιαχοῦ δὲ τὸ ποτέ, οἷον τὸ ἐν τῷ καιρῷ ἀγαθόν· ἀγαθὸν γὰρ λέγεται τὸ ἐν τῷ καιρῷ. πολλάκις δὲ τὸ ποσόν, οἷον ἐπὶ τοῦ μετρίου· λέγεται γὰρ καὶ τὸ μέτριον ἀγαθόν. ὥστε ὁμώνυμον τὸ ἀγαθόν. ὡσαύτως δὲ καὶ τὸ λευκὸν ἐπὶ σώματος μὲν χρῶμα, ἐπὶ δὲ φωνῆς τὸ εὐήκοον. παραπλησίως δὲ καὶ τὸ ὀξύ· οὐ γὰρ ὡσαύτως ἐπὶ πάντων τὸ αὐτὸ λέγεται· φωνὴ μὲν γὰρ ὀξεῖα ἡ ταχεῖα, καθάπερ φασὶν οἱ κατὰ τοὺς ἀριθμοὺς ἁρμονικοί, γωνία δ’ ὀξεῖα ἡ ἐλάσσων ὀρθῆς, μάχαιρα δὲ ἡ ὀξυγώνιος.

Σκοπεῖν δὲ καὶ τὰ γένη τῶν ὑπὸ τὸ αὐτὸ ὄνομα, εἰ ἕτερα καὶ μὴ ὑπ’ ἄλληλα. οἷον ὄνος τό τε ζῷον καὶ τὸ σκεῦος· ἕτερος γὰρ ὁ κατὰ τοὔνομα λόγος αὐτῶν· τὸ μὲν γὰρ ζῷον ποιόν τι ῥηθήσεται, τὸ δὲ σκεῦος ποιόν τι. ἐὰν δὲ ὑπ’ ἄλληλα τὰ γένη ᾖ, οὐκ ἀναγκαῖον ἑτέρους τοὺς λόγους εἶναι. οἷον τοῦ κόρακος τὸ ζῷον καὶ τὸ ὄρνεον γένος ἐστίν· ὅταν οὖν λέγωμεν τὸν κόρακα ὄρνεον εἶναι, καὶ ζῷον ποιόν τί φαμεν αὐτὸν εἶναι, ὥστ’ ἀμφότερα τὰ γένη περὶ αὐτοῦ κατηγορεῖται. ὁμοίως δὲ καὶ ὅταν ζῷον πτηνὸν δίπουν τὸν κόρακα λέγωμεν, ὄρνεόν φαμεν αὐτὸν εἶναι· καὶ οὕτως οὖν ἀμφότερα τὰ γένη κατηγορεῖται κατὰ τοῦ κόρακος, καὶ ὁ λόγος αὐτῶν. ἐπὶ δὲ τῶν μὴ ὑπ’ ἄλληλα γενῶν οὐ συμβαίνει τοῦτο· οὔτε γὰρ ὅταν σκεῦος λέγωμεν, ζῷον λέγομεν, οὔθ’ ὅταν ζῷον, σκεῦος.

Σκοπεῖν δὲ μὴ μόνον ἐπὶ τοῦ προκειμένου εἰ ἕτερα τὰ γένη καὶ μὴ ὑπ’ ἄλληλα, ἀλλὰ καὶ ἐπὶ τοῦ ἐναντίου· εἰ γὰρ τὸ ἐναντίον πολλαχῶς λέγεται, δῆλον ὅτι καὶ τὸ προκείμενον.

Χρήσιμον δὲ καὶ τὸ ἐπὶ τὸν ὁρισμὸν ἐπιβλέπειν τὸν τοῦ συντιθεμένου γιγνόμενον, οἷον λευκοῦ σώματος καὶ λευκῆς φωνῆς· ἀφαιρουμένου γὰρ τοῦ ἰδίου τὸν αὐτὸν λόγον δεῖ λείπεσθαι. τοῦτο δ’ οὐ συμβαίνει ἐπὶ τῶν ὁμωνύμων, οἷον [107b] ἐπὶ τῶν νῦν εἰρημένων· τὸ μὲν γὰρ ἔσται σῶμα τοιόνδε χρῶμα ἔχον, τὸ δὲ φωνὴ εὐήκοος. ἀφαιρεθέντος οὖν τοῦ σώματος καὶ τῆς φωνῆς οὐ ταὐτὸν ἐν ἑκατέρῳ τὸ λειπόμενον· ἔδει δέ γε, εἴπερ συνώνυμον ἦν τὸ λευκὸν τὸ ἐφ’ ἑκατέρου λεγόμενον.

Πολλάκις δὲ καὶ ἐν αὐτοῖς τοῖς λόγοις λανθάνει παρακολουθοῦν τὸ ὁμώνυμον· διὸ καὶ ἐπὶ τῶν λόγων σκεπτέον. οἷον ἐάν τις τὸ σημαντικὸν καὶ τὸ ποιητικὸν ὑγιείας τὸ συμμέτρως ἔχον πρὸς ὑγίειαν φῇ εἶναι, οὐκ ἀποστατέον ἀλλ’ ἐπισκεπτέον τί τὸ συμμέτρως καθ’ ἑκατέρου εἴρηκεν, οἷον εἰ τὸ μὲν τὸ τοιοῦτον εἶναι ὥστε ποιεῖν ὑγίειαν, τὸ δὲ τὸ τοιοῦτον οἷον σημαίνειν ποία τις ἡ ἕξις.

Ἔτι εἰ μὴ συμβλητὰ κατὰ τὸ μᾶλλον ἢ ὁμοίως, οἷον λευκὴ φωνὴ καὶ λευκὸν ἱμάτιον, καὶ ὀξὺς χυμὸς καὶ ὀξεῖα φωνή· ταῦτα γὰρ οὔθ’ ὁμοίως λέγεται λευκὰ ἢ ὀξέα, οὔτε μᾶλλον θάτερον. ὥσθ’ ὁμώνυμον τὸ λευκὸν καὶ τὸ ὀξύ. τὸ γὰρ συνώνυμον πᾶν συμβλητόν· ἢ γὰρ ὁμοίως ῥηθήσεται ἢ μᾶλλον θάτερον.

Ἐπεὶ δὲ τῶν ἑτέρων γενῶν καὶ μὴ ὑπ’ ἄλληλα ἕτεραι τῷ εἴδει καὶ αἱ διαφοραί, οἷον ζῴου καὶ ἐπιστήμης (ἕτεραι γὰρ τούτων αἱ διαφοραί), σκοπεῖν εἰ τὰ ὑπὸ τὸ αὐτὸ ὄνομα ἑτέρων γενῶν καὶ μὴ ὑπ’ ἄλληλα διαφοραί εἰσιν, οἷον τὸ ὀξὺ φωνῆς καὶ ὄγκου· διαφέρει γὰρ φωνὴ φωνῆς τῷ ὀξεῖα εἶναι, ὁμοίως δὲ καὶ ὄγκος ὄγκου. ὥστε ὁμώνυμον τὸ ὀξύ· ἑτέρων γὰρ γενῶν καὶ οὐχ ὑπ’ ἄλληλα διαφοραί εἰσιν.

Πάλιν εἰ αὐτῶν τῶν ὑπὸ τὸ αὐτὸ ὄνομα ἕτεραι αἱ διαφοραί, οἷον χρώματος τοῦ τε ἐπὶ τῶν σωμάτων καὶ τοῦ ἐν τοῖς μέλεσιν· τοῦ μὲν γὰρ ἐπὶ τῶν σωμάτων διακριτικὸν καὶ συγκριτικὸν ὄψεως, τοῦ δ’ ἐπὶ τῶν μελῶν οὐχ αἱ αὐταὶ διαφοραί. ὥστε ὁμώνυμον τὸ χρῶμα· τῶν γὰρ αὐτῶν αἱ αὐταὶ διαφοραί.

Ἔτι ἐπεὶ τὸ εἶδος οὐδενός ἐστι διαφορά, σκοπεῖν τῶν ὑπὸ τὸ αὐτὸ ὄνομα εἰ τὸ μὲν εἶδός ἐστι τὸ δὲ διαφορά· οἷον τὸ λευκὸν τὸ μὲν ἐπὶ τοῦ σώματος εἶδος χρώματος, τὸ δ’ ἐπὶ τῆς φωνῆς διαφορά· διαφέρει γὰρ φωνὴ φωνῆς τῷ λευκὴ εἶναι.

Περὶ μὲν οὖν τοῦ πολλαχῶς διὰ τούτων καὶ τῶν τοιούτων σκεπτέον. τὰς δὲ διαφορὰς ἐν αὐτοῖς τε τοῖς γένεσι [108a] πρὸς ἄλληλα θεωρητέον, οἷον τίνι διαφέρει δικαιοσύνη ἀνδρείας καὶ φρόνησις σωφροσύνης (ταῦτα γὰρ ἅπαντα ἐκ τοῦ αὐτοῦ γένους ἐστίν), καὶ ἐξ ἄλλου πρὸς ἄλλο τῶν μὴ πολὺ λίαν διεστηκότων, οἷον τίνι αἴσθησις ἐπιστήμης· ἐπὶ μὲν γὰρ τῶν πολὺ διεστηκότων κατάδηλοι παντελῶς αἱ διαφοραί.

Τὴν δὲ ὁμοιότητα σκεπτέον ἐπί τε τῶν ἐν ἑτέροις γένεσιν, ὡς ἕτερον πρὸς ἕτερόν τι, οὕτως ἄλλο πρὸς ἄλλο (οἷον ὡς ἐπιστήμη πρὸς ἐπιστητόν, οὕτως αἴσθησις πρὸς αἰσθητόν), καὶ ὡς ἕτερον ἐν ἑτέρῳ τινί, οὕτως ἄλλο ἐν ἄλλῳ (οἷον ὡς ὄψις ἐν ὀφθαλμῷ, νοῦς ἐν ψυχῇ, καὶ ὡς γαλήνη ἐν θαλάσσῃ, νηνεμία ἐν ἀέρι). μάλιστα δ’ ἐν τοῖς πολὺ διεστῶσι γυμνάζεσθαι δεῖ· ῥᾷον γὰρ ἐπὶ τῶν λοιπῶν δυνησόμεθα τὰ ὅμοια συνορᾶν. σκεπτέον δὲ καὶ τὰ ἐν τῷ αὐτῷ γένει ὄντα, εἴ τι ἅπασιν ὑπάρχει ταὐτόν, οἷον ἀνθρώπῳ καὶ ἵππῳ καὶ κυνί· ᾗ γὰρ ὑπάρχει τι αὐτοῖς ταὐτόν, ταύτῃ ὅμοιά ἐστιν.

Χρήσιμον δὲ τὸ μὲν ποσαχῶς λέγεται ἐπεσκέφθαι πρός τε τὸ σαφές (μᾶλλον γὰρ ἄν τις εἰδείη τί τίθησιν, ἐμφανισθέντος ποσαχῶς λέγεται) καὶ πρὸς τὸ γίνεσθαι κατ’ αὐτὸ τὸ πρᾶγμα καὶ μὴ πρὸς τὸ ὄνομα τοὺς συλλογισμούς· ἀδήλου γὰρ ὄντος ποσαχῶς λέγεται, ἐνδέχεται μὴ ἐπὶ ταὐτὸν τόν τε ἀποκρινόμενον καὶ τὸν ἐρωτῶντα φέρειν τὴν διάνοιαν· ἐμφανισθέντος δὲ ποσαχῶς λέγεται καὶ ἐπὶ τί φέρων τίθησι, γελοῖος ἂν φαίνοιτο ὁ ἐρωτῶν, εἰ μὴ πρὸς τοῦτο τὸν λόγον ποιοῖτο. χρήσιμον δὲ καὶ πρὸς τὸ μὴ παραλογισθῆναι καὶ πρὸς τὸ παραλογίσασθαι. εἰδότες γὰρ ποσαχῶς λέγεται οὐ μὴ παραλογισθῶμεν, ἀλλ’ εἰδήσομεν ἐὰν μὴ πρὸς τὸ αὐτὸ τὸν λόγον ποιῆται ὁ ἐρωτῶν· αὐτοί τε ἐρωτῶντες δυνησόμεθα παραλογίσασθαι, ἐὰν μὴ τυγχάνῃ εἰδὼς ὁ ἀποκρινόμενος ποσαχῶς λέγεται.

τοῦτο δ’ οὐκ ἐπὶ πάντων δυνατόν, ἀλλ’ ὅταν ᾖ τῶν πολλαχῶς λεγομένων τὰ μὲν ἀληθῆ τὰ δὲ ψευδῆ. ἔστι δὲ οὐκ οἰκεῖος ὁ τρόπος οὗτος τῆς διαλεκτικῆς· διὸ παντελῶς εὐλαβητέον τοῖς διαλεκτικοῖς τὸ τοιοῦτον, τὸ πρὸς τοὔνομα διαλέγεσθαι, ἐὰν μή τις ἄλλως ἐξαδυνατῇ περὶ τοῦ προκειμένου διαλέγεσθαι.

Τὸ δὲ τὰς διαφορὰς εὑρεῖν χρήσιμον πρός τε τοὺς συλλογισμοὺς τοὺς περὶ ταὐτοῦ καὶ ἑτέρου καὶ πρὸς τὸ γνωρίζειν τί ἕκαστόν ἐστιν. ὅτι μὲν οὖν πρὸς τοὺς συλλογισμοὺς τοὺς περὶ ταὐτοῦ καὶ ἑτέρου χρήσιμον, δῆλον (εὑρόντες γὰρ διαφορὰν τῶν προκειμένων ὁποιανοῦν δεδειχότες ἐσόμεθα ὅτι οὐ ταὐτόν)· πρὸς δὲ τὸ γνωρίζειν τί ἐστι, διότι τὸν ἴδιον τῆς οὐσίας ἑκάστου λόγον ταῖς περὶ ἕκαστον οἰκείαις διαφοραῖς χωρίζειν εἰώθαμεν.

Ἡ δὲ τοῦ ὁμοίου θεωρία χρήσιμος πρός τε τοὺς ἐπακτικοὺς λόγους καὶ πρὸς τοὺς ἐξ ὑποθέσεως συλλογισμοὺς καὶ πρὸς τὴν ἀπόδοσιν τῶν ὁρισμῶν. πρὸς μὲν οὖν τοὺς ἐπακτικοὺς λόγους, διότι τῇ καθ’ ἕκαστα ἐπὶ τῶν ὁμοίων ἐπαγωγῇ τὸ καθόλου ἀξιοῦμεν ἐπάγειν· οὐ γὰρ ῥᾴδιόν ἐστιν ἐπάγειν μὴ εἰδότας τὰ ὅμοια. πρὸς δὲ τοὺς ἐξ ὑποθέσεως συλλογισμούς, διότι ἔνδοξόν ἐστιν, ὥς ποτε ἐφ’ ἑνὸς τῶν ὁμοίων ἔχει, οὕτως καὶ ἐπὶ τῶν λοιπῶν. ὥστε πρὸς ὅ τι ἂν αὐτῶν εὐπορῶμεν διαλέγεσθαι, προδιομολογησόμεθα, ὥς ποτε ἐπὶ τούτων ἔχει, οὕτω καὶ ἐπὶ τοῦ προκειμένου ἔχειν, δείξαντες δὲ ἐκεῖνο καὶ τὸ προκείμενον ἐξ ὑποθέσεως δεδειχότες ἐσόμεθα· ὑποθέμενοι γάρ, ὥς ποτε ἐπὶ τούτων ἔχει, οὕτω καὶ ἐπὶ τοῦ προκειμένου ἔχειν, τὴν ἀπόδειξιν πεποιήμεθα. πρὸς δὲ τὴν τῶν ὁρισμῶν ἀπόδοσιν, διότι δυνάμενοι συνορᾶν τί ἐν ἑκάστῳ ταὐτόν οὐκ ἀπορήσομεν εἰς τί δεῖ γένος ὁριζομένους τὸ προκείμενον τιθέναι· τῶν γὰρ κοινῶν τὸ μάλιστα ἐν τῷ τί ἐστι κατηγορούμενον γένος ἂν εἴη. ὁμοίως δὲ καὶ ἐν τοῖς πολὺ διεστῶσι χρήσιμος πρὸς τοὺς ὁρισμοὺς ἡ τοῦ ὁμοίου θεωρία, οἷον ὅτι ταὐτὸν γαλήνη μὲν ἐν θαλάσσῃ, νηνεμία δ’ ἐν ἀέρι (ἑκάτερον γὰρ ἡσυχία), καὶ στιγμὴ ἐν γραμμῇ καὶ μονὰς ἐν ἀριθμῷ (ἑκάτερον γὰρ ἀρχή). ὥστε τὸ κοινὸν ἐπὶ πάντων γένος ἀποδιδόντες δόξομεν οὐκ ἀλλοτρίως ὁρίζεσθαι. σχεδὸν δὲ καὶ οἱ ὁριζόμενοι οὕτως εἰώθασιν ἀποδιδόναι· τήν τε γὰρ μονάδα ἀρχὴν ἀριθμοῦ φασιν εἶναι καὶ τὴν στιγμὴν ἀρχὴν γραμμῆς. δῆλον οὖν ὅτι εἰς τὸ κοινὸν ἀμφοτέρων γένος τιθέασιν.

Τὰ μὲν οὖν ὄργανα δι’ ὧν οἱ συλλογισμοὶ ταῦτ’ ἐστίν· οἱ δὲ τόποι πρὸς οὓς χρήσιμα τὰ λεχθέντα οἵδε εἰσίν.

B

Ἔστι δὲ τῶν προβλημάτων τὰ μὲν καθόλου τὰ δ’ ἐπὶ μέρους. καθόλου μὲν οὖν οἷον ὅτι πᾶσα ἡδονὴ ἀγαθὸν καὶ ὅτι οὐδεμία ἡδονὴ ἀγαθόν· ἐπὶ μέρους δὲ οἷον ὅτι ἔστι τις ἡδονὴ [109a] ἀγαθὸν καὶ ὅτι ἔστι τις ἡδονὴ οὐκ ἀγαθόν. ἔστι δὲ πρὸς ἀμφότερα τὰ γένη τῶν προβλημάτων κοινὰ τὰ καθόλου κατασκευαστικὰ καὶ ἀνασκευαστικά· δείξαντες γὰρ ὅτι παντὶ ὑπάρχει, καὶ ὅτι τινὶ ὑπάρχει δεδειχότες ἐσόμεθα· ὁμοίως δὲ κἂν ὅτι οὐδενὶ ὑπάρχει δείξωμεν, καὶ ὅτι οὐ παντὶ ὑπάρχει δεδειχότες ἐσόμεθα. πρῶτον οὖν περὶ τῶν καθόλου ἀνασκευαστικῶν ῥητέον διά τε τὸ κοινὰ εἶναι τὰ τοιαῦτα πρὸς τὰ καθόλου καὶ τὰ ἐπὶ μέρους, καὶ διὰ τὸ μᾶλλον τὰς θέσεις κομίζειν ἐν τῷ ὑπάρχειν ἢ μή, τοὺς δὲ διαλεγομένους ἀνασκευάζειν. ἔστι δὲ χαλεπώτατον τὸ ἀντιστρέφειν τὴν ἀπὸ τοῦ συμβεβηκότος οἰκείαν ὀνομασίαν· τὸ γὰρ πῇ καὶ μὴ καθόλου ἐπὶ μόνων ἐνδέχεται τῶν συμβεβηκότων. ἀπὸ μὲν γὰρ τοῦ ὅρου καὶ τοῦ ἰδίου καὶ τοῦ γένους ἀναγκαῖον ἀντιστρέφειν. οἷον εἰ ὑπάρχει τινὶ ζῴῳ πεζῷ δίποδι εἶναι, ἀντιστρέψαντι ἀληθὲς ἔσται λέγειν ὅτι ζῷον πεζὸν δίπουν ἐστίν. ὁμοίως δὲ καὶ ἀπὸ τοῦ γένους· εἰ γὰρ ζῴῳ ὑπάρχει τινὶ εἶναι, ζῷόν ἐστιν. τὰ δ’ αὐτὰ καὶ ἐπὶ τοῦ ἰδίου· εἰ γὰρ ὑπάρχει τινὶ γραμματικῆς δεκτικῷ εἶναι, γραμματικῆς δεκτικὸν ἔσται. οὐδὲν γὰρ τούτων ἐνδέχεται κατά τι ὑπάρχειν ἢ μὴ ὑπάρχειν, ἀλλ’ ἁπλῶς ὑπάρχειν ἢ μὴ ὑπάρχειν. ἐπὶ δὲ τῶν συμβεβηκότων οὐδὲν κωλύει κατά τι ὑπάρχειν, οἷον λευκότητα ἢ δικαιοσύνην, ὥστε οὐκ ἀπόχρη τὸ δεῖξαι ὅτι ὑπάρχει λευκότης ἢ δικαιοσύνη πρὸς τὸ δεῖξαι ὅτι λευκὸς ἢ δίκαιός ἐστιν· ἔχει γὰρ ἀμφισβήτησιν ὅτι κατά τι λευκὸς ἢ δίκαιός ἐστιν. ὥστ’ οὐκ ἀναγκαῖον ἐπὶ τῶν συμβεβηκότων τὸ ἀντιστρέφειν.

Διορίσασθαι δὲ δεῖ καὶ τὰς ἁμαρτίας τὰς ἐν τοῖς προβλήμασιν, ὅτι εἰσὶ διτταί, ἢ τῷ ψεύδεσθαι ἢ τῷ παραβαίνειν τὴν κειμένην λέξιν· οἵ τε γὰρ ψευδόμενοι καὶ τὸ μὴ ὑπάρχον ὑπάρχειν τινὶ λέγοντες ἁμαρτάνουσι, καὶ οἵ, τοῖς ἀλλοτρίοις ὀνόμασι τὰ πράγματα προσαγορεύοντες, οἷον τὴν πλάτανον ἄνθρωπον, παραβαίνουσι τὴν κειμένην ὀνομασίαν.

Εἷς μὲν δὴ τόπος τὸ ἐπιβλέπειν εἰ τὸ κατ’ ἄλλον τινὰ τρόπον ὑπάρχον ὡς συμβεβηκὸς ἀποδέδωκεν. ἁμαρτάνεται δὲ μάλιστα τοῦτο περὶ τὰ γένη, οἷον εἴ τις τῷ λευκῷ φαίη συμβεβηκέναι χρώματι εἶναι· οὐ γὰρ συμβέβηκε τῷ λευκῷ χρώματι εἶναι, ἀλλὰ γένος αὐτοῦ τὸ χρῶμά ἐστιν. ἐνδέχεται μὲν οὖν καὶ κατὰ τὴν ὀνομασίαν διορίσαι τὸν τιθέμενον, [109b] οἷον ὅτι συμβέβηκε τῇ δικαιοσύνῃ ἀρετῇ εἶναι· πολλάκις δὲ καὶ μὴ διορίσαντος κατάδηλον ὅτι τὸ γένος ὡς συμβεβηκὸς ἀποδέδωκεν, οἷον εἴ τις τὴν λευκότητα κεχρῶσθαι φήσειεν ἢ τὴν βάδισιν κινεῖσθαι. ἀπ’ οὐδενὸς γὰρ γένους παρωνύμως ἡ κατηγορία κατὰ τοῦ εἴδους λέγεται, ἀλλὰ πάντα συνωνύμως τὰ γένη τῶν εἰδῶν κατηγορεῖται· καὶ γὰρ τοὔνομα καὶ τὸν λόγον ἐπιδέχεται τὸν τῶν γενῶν τὰ εἴδη. ὁ οὖν κεχρωσμένον εἴπας τὸ λευκὸν οὔτε ὡς γένος ἀποδέδωκεν, ἐπειδὴ παρωνύμως εἴρηκεν, οὔθ’ ὡς ἴδιον ἢ ὡς ὁρισμόν· ὁ γὰρ ὁρισμὸς καὶ τὸ ἴδιον οὐδενὶ ἄλλῳ ὑπάρχει, κέχρωσται δὲ πολλὰ καὶ τῶν ἄλλων, οἷον ξύλον λίθος ἄνθρωπος ἵππος. δῆλον οὖν ὅτι ὡς συμβεβηκὸς ἀποδέδωκεν.

Ἄλλος τὸ ἐπιβλέπειν οἷς ὑπάρχειν ἢ πᾶσιν ἢ μηδενὶ εἴρηται. σκοπεῖν δὲ κατ’ εἴδη καὶ μὴ ἐν τοῖς ἀπείροις· ὁδῷ γὰρ μᾶλλον καὶ ἐν ἐλάττοσιν ἡ σκέψις. δεῖ δὲ σκοπεῖν καὶ ἄρχεσθαι ἀπὸ τῶν πρώτων, εἶτ’ ἐφεξῆς ἕως τῶν ἀτόμων. οἷον εἰ τῶν ἀντικειμένων τὴν αὐτὴν ἐπιστήμην ἔφησεν εἶναι, σκεπτέον εἰ τῶν πρός τι καὶ τῶν ἐναντίων καὶ τῶν κατὰ στέρησιν καὶ ἕξιν καὶ τῶν κατ’ ἀντίφασιν λεγομένων ἡ αὐτὴ ἐπιστήμη. κἂν ἐπὶ τούτων μήπω φανερὸν ᾖ, πάλιν ταῦτα διαιρετέον μέχρι τῶν ἀτόμων· οἷον εἰ τῶν δικαίων καὶ ἀδίκων, ἢ τοῦ διπλασίου καὶ ἡμίσεος, ἢ τυφλότητος καὶ ὄψεως, ἢ τοῦ εἶναι καὶ μὴ εἶναι. ἐὰν γὰρ ἐπί τινὸς δειχθῇ ὅτι οὐχ ἡ αὐτή, ἀνῃρηκότες ἐσόμεθα τὸ πρόβλημα· ὁμοίως δὲ καὶ ἐὰν μηδενὶ ὑπάρχῃ. οὗτος δ’ ὁ τόπος ἀντιστρέφει πρὸς τὸ κατασκευάζειν καὶ ἀνασκευάζειν. ἐὰν γὰρ ἐπὶ πάντων φαίνηται διαίρεσιν προενέγκασιν ἢ ἐπὶ πολλῶν, ἀξιωτέον καὶ καθόλου τιθέναι ἢ ἔνστασιν φέρειν ἐπὶ τίνος οὐχ οὕτως· ἐὰν γὰρ μηδέτερον τούτων ποιῇ, ἄτοπος φανεῖται μὴ τιθείς.

Ἄλλος τὸ λόγους ποιεῖν τοῦ τε συμβεβηκότος καὶ ᾧ συμβέβηκεν, ἢ ἀμφοτέρων καθ’ ἑκάτερον ἢ τοῦ ἑτέρου, εἶτα σκοπεῖν εἴ τι μὴ ἀληθὲς ἐν τοῖς λόγοις ὡς ἀληθὲς εἴληπται. οἷον εἰ ἔστι θεὸν ἀδικεῖν, τί τὸ ἀδικεῖν; εἰ γὰρ τὸ βλάπτειν ἑκουσίως, δῆλον ὡς οὐκ ἔστι θεὸν ἀδικεῖσθαι· οὐ γὰρ ἐνδέχεται βλάπτεσθαι τὸν θεόν. καὶ εἰ φθονερὸς ὁ σπουδαῖος, τίς ὁ φθονερὸς καὶ τί ὁ φθόνος; εἰ γὰρ ὁ φθόνος ἐστὶ λύπη ἐπὶ φαινομένῃ εὐπραγίᾳ τῶν ἐπιεικῶν τινος, δῆλον ὅτι ὁ σπουδαῖος οὐ φθονερός· φαῦλος γὰρ ἂν εἴη. καὶ εἰ ὁ νεμεσητικὸς φθονερός, τίς ἑκάτερος αὐτῶν; οὕτω γὰρ καταφανὲς [110a] ἔσται πότερον ἀληθὲς ἢ ψεῦδος τὸ ῥηθέν· οἷον εἰ φθονερὸς μὲν ὁ λυπούμενος ἐπὶ ταῖς τῶν ἀγαθῶν εὐπραγίαις, νεμεσητικὸς δ’ ὁ λυπούμενος ἐπὶ ταῖς τῶν κακῶν εὐπραγίαις, δῆλον ὅτι οὐκ ἂν εἴη φθονερὸς ὁ νεμεσητικός. λαμβάνειν δὲ καὶ ἀντὶ τῶν ἐν τοῖς λόγοις ὀνομάτων λόγους, καὶ μὴ προαφίστασθαι ἕως ἂν εἴς τι γνώριμον ἔλθῃ·

πολλάκις γὰρ ὅλου μὲν τοῦ λόγου ἀποδοθέντος οὔπω δῆλον τὸ ζητούμενον, ἀντὶ δέ τινος τῶν ἐν τῷ λόγῳ ὀνομάτων λόγου ῥηθέντος κατάδηλον γίνεται.

Ἔτι τὸ πρόβλημα πρότασιν ἑαυτῷ ποιούμενον ἐνίστασθαι· ἡ γὰρ ἔνστασις ἔσται ἐπιχείρημα πρὸς τὴν θέσιν. ἔστι δ᾿ ὁ τόπος οὗτος σχεδὸν ὁ αὐτὸς τῷ ἐπιβλέπειν οἷς ὑπάρχειν ἢ πᾶσιν ἢ μηδενὶ εἴρηται· διαφέρει δὲ τῷ τρόπῳ.

Ἔτι διορίζεσθαι ποῖα δεῖ καλεῖν ὡς οἱ πολλοὶ καὶ ποῖα οὔ· χρήσιμον γὰρ καὶ πρὸς τὸ κατασκευάζειν καὶ πρὸς τὸ ἀνασκευάζειν· οἷον ὅτι ταῖς μὲν ὀνομασίαις τὰ πράγματα προσαγορευτέον καθάπερ οἱ πολλοί, ποῖα δὲ τῶν πραγμάτων ἐστὶ τοιαῦτα ἢ οὐ τοιαῦτα, οὐκέτι προσεκτέον τοῖς πολλοῖς. οἷον ὑγιεινὸν μὲν ῥητέον τὸ ποιητικὸν ὑγιείας, ὡς οἱ πολλοὶ λέγουσιν· πότερον δὲ τὸ προκείμενον ποιητικὸν ὑγιείας ἢ οὔ, οὐκέτι ὡς οἱ πολλοὶ κλητέον ἀλλ᾿ ὡς ὁ ἰατρός.

Ἔτι ἐὰν πολλαχῶς λέγηται, κείμενον δὲ ᾖ ὡς ὑπάρχει ἢ ὡς οὐχ ὑπάρχει, θάτερον δεικνύναι τῶν πλεοναχῶς λεγομένων, ἐὰν μὴ ἄμφω ἐνδέχηται. χρηστέον δ᾿ ἐπὶ τῶν λανθανόντων· ἐὰν γὰρ μὴ λανθάνῃ πολλαχῶς λεγόμενον, ἐνστήσεται ὅτι οὐ διείλεκται ὅπερ αὐτὸς ἠπόρει ἀλλὰ θάτερον. οὗτος δ᾿ ὁ τόπος ἀντιστρέφει καὶ πρὸς τὸ κατασκευάσαι καὶ πρὸς τὸ ἀνασκευάσαι. κατασκευάζειν μὲν γὰρ βουλόμενοι δείξομεν ὅτι θάτερον ὑπάρχει, ἐὰν μὴ ἄμφω δυνώμεθα· ἀνασκευάζοντες δὲ ὅτι οὐχ ὑπάρχει θάτερον δείξομεν, ἐὰν μὴ ἄμφω δυνώμεθα. πλὴν ἀνασκευάζοντι μὲν οὐδὲν δεῖ ἐξ ὁμολογίας διαλέγεσθαι, οὔτ᾿ εἰ παντὶ οὔτ᾿ εἰ μηδενὶ ὑπάρχειν εἴρηται· ἐὰν γὰρ δείξωμεν ὅτι οὐχ ὑπάρχει ὁτῳοῦν, ἀνῃρηκότες ἐσόμεθα τὸ παντὶ ὑπάρχειν· ὁμοίως δὲ κἂν ἑνὶ δείξωμεν ὑπάρχον, ἀναιρήσομεν τὸ μηδενὶ ὑπάρχειν. κατασκευάζουσι δὲ προδιομολογητέον ὅτι, εἰ ὁτῳοῦν ὑπάρχει, παντὶ ὑπάρχει, ἂν πιθανὸν ᾖ τὸ ἀξίωμα. οὐ γὰρ [110b] ἀπόχρη πρὸς τὸ δεῖξαι ὅτι παντὶ ὑπάρχει τὸ ἐφ᾿ ἑνὸς διαλεχθῆναι, οἷον εἰ ἡ τοῦ ἀνθρώπου ψυχὴ ἀθάνατος, ὅτι ψυχὴ πᾶσα ἀθάνατος· ὥστε προομολογητέον ὅτι, εἰ ἡτισοῦν ψυχὴ ἀθάνατος, πᾶσα ἀθάνατος. τοῦτο δ᾿ οὐκ ἀεὶ ποιητέον, ἀλλ᾿ ὅταν μὴ εὐπορῶμεν κοινὸν ἐπὶ πάντων ἕνα λόγον εἰπεῖν, καθάπερ ὁ γεωμέτρης ὅτι τὸ τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει.

Ἐὰν δὲ μὴ λανθάνῃ πολλαχῶς λεγόμενον, διελόμενον ὁσαχῶς λέγεται καὶ ἀναιρεῖν καὶ κατασκευάζειν. οἷον εἰ τὸ δέον ἐστὶ τὸ συμφέρον ἢ τὸ καλόν, πειρατέον ἄμφω κατασκευάζειν ἢ ἀναιρεῖν περὶ τοῦ προκειμένου, οἷον ὅτι καλὸν καὶ συμφέρον, ἢ ὅτι οὔτε καλὸν οὔτε συμφέρον. ἐὰν δὲ μὴ ἐνδέχηται ἀμφότερα, θάτερον δεικτέον, ἐπισημαινόμενον ὅτι τὸ μὲν τὸ δ᾿ οὔ. ὁ δ᾿ αὐτὸς λόγος κἂν πλείω ᾖ εἰς ἃ διαιρεῖται.

Πάλιν ὅσα μὴ καθ' ὁμωνυμίαν λέγεται πολλαχῶς ἀλλὰ κατ' ἄλλον τρόπον, οἷον ἐπιστήμη μία πλειόνων ἢ ὡς τοῦ τέλους καὶ τῶν πρὸς τὸ τέλος, οἷον ἰατρικὴ τοῦ ὑγίειαν ποιῆσαι καὶ τοῦ διαιτῆσαι, ἢ ὡς ἀμφοτέρων τελῶν, καθάπερ τῶν ἐναντίων ἡ αὐτὴ λέγεται ἐπιστήμη (οὐδὲν γὰρ μᾶλλον τέλος τὸ ἕτερον τοῦ ἑτέρου), ἢ ὡς τοῦ καθ' αὑτὸ καὶ τοῦ κατὰ συμβεβηκός, οἷον καθ' αὑτὸ μὲν ὅτι τὸ τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει, κατὰ συμβεβηκὸς δὲ ὅτι τὸ ἰσόπλευρον· ὅτι γὰρ συμβέβηκε τῷ ἰσοπλεύρῳ τριγώνῳ εἶναι, κατὰ τοῦτο γνωρίζομεν ὅτι δυσὶν ὀρθαῖς ἴσας ἔχει. εἰ οὖν μηδαμῶς ἐνδέχεται τὴν αὐτὴν εἶναι πλειόνων ἐπιστήμην, δῆλον ὅτι ὅλως οὐκ ἐνδέχεται εἶναι, ἢ εἰ πὼς ἐνδέχεται, δῆλον ὅτι ἐνδέχεται. διαιρεῖσθαι δὲ ὁσαχῶς χρήσιμον. οἷον ἐὰν βουλώμεθα κατασκευάσαι, τὰ τοιαῦτα προοιστέον ὅσα ἐνδέχεται, καὶ διαιρετέον εἰς ταῦτα μόνον ὅσα καὶ χρήσιμα πρὸς τὸ κατασκευάσαι· ἂν δ' ἀνασκευάσαι, ὅσα μὴ ἐνδέχεται, τὰ δὲ λοιπὰ παραλειπτέον. ποιητέον δὲ καὶ ἐπὶ τούτων, ὅταν λανθάνῃ ποσαχῶς λέγεται. καὶ εἶναι δὲ τόδε τοῦδε ἢ μὴ εἶναι ἐκ τῶν αὐτῶν τόπων κατασκευαστέον, οἷον ἐπιστήμην τήνδε τοῦδε ἢ ὡς τέλους ἢ ὡς τῶν πρὸς τὸ τέλος ἢ ὡς τῶν κατὰ συμβεβηκός, ἢ πάλιν μὴ εἶναι κατὰ μηδένα τῶν ῥηθέντων τρόπων. ὁ δ' αὐτὸς λόγος καὶ περὶ ἐπιθυμίας καὶ ὅσα ἄλλα λέγεται πλειόνων· ἔστι γὰρ ἡ [111a] ἐπιθυμία τούτου ἢ ὡς τέλους, οἷον ὑγιείας, ἢ ὡς τῶν πρὸς τὸ τέλος, οἷον τοῦ φαρμακευθῆναι, ἢ ὡς τοῦ κατὰ συμβεβηκός, καθάπερ ἐπὶ τοῦ οἴνου ὁ φιλόγλυκυς, οὐχ ὅτι οἶνος ἀλλ' ὅτι γλυκύς ἐστιν. καθ' αὑτὸ μὲν γὰρ τοῦ γλυκέος ἐπιθυμεῖ, τοῦ δ' οἴνου κατὰ συμβεβηκός· ἐὰν γὰρ αὐστηρὸς ᾖ, οὐκέτι ἐπιθυμεῖ. κατὰ συμβεβηκὸς οὖν ἐπιθυμεῖ. χρήσιμος δ' ὁ τόπος οὗτος ἐν τοῖς πρός τι· σχεδὸν γὰρ τὰ τοιαῦτα τῶν πρός τί ἐστιν.

Ἔτι τὸ μεταλαμβάνειν εἰς τὸ γνωριμώτερον ὄνομα, οἷον ἀντὶ τοῦ ἀκριβοῦς ἐν ὑπολήψει τὸ σαφὲς καὶ ἀντὶ τῆς πολυπραγμοσύνης τὴν φιλοπραγμοσύνην· γνωριμωτέρου γὰρ γενομένου τοῦ ῥηθέντος εὐεπιχειρητοτέρα ἡ θέσις. ἔστι δὲ καὶ οὗτος ὁ τόπος πρὸς ἄμφω κοινός, καὶ πρὸς τὸ κατασκευάζειν καὶ πρὸς τὸ ἀνασκευάζειν.

Πρὸς δὲ τὸ δεῖξαι τὰ ἐναντία τῷ αὐτῷ ὑπάρχοντα σκοπεῖν ἐπὶ τοῦ γένους, οἷον, ἐὰν βουλώμεθα δεῖξαι ὅτι ἔστι περὶ αἴσθησιν ὀρθότης καὶ ἁμαρτία, "ἐπεὶ τὸ αἰσθάνεσθαι κρίνειν ἐστί, κρίνειν δ' ἔστιν ὀρθῶς καὶ μὴ ὀρθῶς, καὶ περὶ αἴσθησιν ἂν εἴη ὀρθότης καὶ ἁμαρτία". νῦν μὲν οὖν ἐκ τοῦ γένους περὶ τὸ εἶδος ἡ ἀπόδειξις· τὸ γὰρ κρίνειν γένος τοῦ αἰσθάνεσθαι· ὁ γὰρ αἰσθανόμενος κρίνει πως. πάλιν δ' ἐκ τοῦ εἴδους τῷ γένει· ὅσα γὰρ τῷ εἴδει ὑπάρχει, καὶ τῷ γένει· οἷον εἰ ἔστιν ἐπιστήμη φαύλη καὶ σπουδαία, καὶ διάθεσις φαύλη καὶ σπουδαία· ἡ γὰρ διάθεσις τῆς ἐπιστήμης γένος. ὁ μὲν οὖν πρότερος τόπος ψευδής ἐστι πρὸς τὸ κατασκευάσαι, ὁ δὲ δεύτερος ἀληθής. οὐ γὰρ ἀναγκαῖον, ὅσα τῷ γένει ὑπάρχει, καὶ τῷ εἴδει ὑπάρχειν· ζῷον μὲν γὰρ ἔστι πτηνὸν καὶ τετράπουν, ἄνθρωπος δ' οὔ. ὅσα δὲ τῷ εἴδει ὑπάρχει, ἀναγκαῖον καὶ τῷ γένει· εἰ γὰρ ἔστιν ἄνθρωπος σπουδαῖος, καὶ ζῷον ἔστι σπουδαῖον. πρὸς δὲ τὸ ἀνασκευάζειν ὁ μὲν πρότερος ἀληθής, ὁ δὲ ὕστερος ψευδής· ὅσα γὰρ τῷ γένει οὐχ ὑπάρχει, οὐδὲ τῷ εἴδει· ὅσα δὲ τῷ εἴδει μὴ ὑπάρχει, οὐκ ἀνάγκη τῷ γένει μὴ ὑπάρχειν.

Ἐπεὶ δ' ἀναγκαῖον, ὧν τὸ γένος κατηγορεῖται, καὶ τῶν εἰδῶν τι κατηγορεῖσθαι, καὶ ὅσα ἔχει τὸ γένος ἢ παρωνύμως ἀπὸ τοῦ γένους λέγεται, καὶ τῶν εἰδῶν τι ἀναγκαῖον ἔχειν ἢ παρωνύμως ἀπό τινος τῶν εἰδῶν λέγεσθαι (οἷον εἴ τινος ἐπιστήμη κατηγορεῖται, καὶ γραμματικὴ ἢ μουσικὴ ἢ τῶν ἄλλων τις ἐπιστημῶν κατηγορηθήσεται, καὶ εἴ τις ἔχει [111b] ἐπιστήμην ἢ παρωνύμως ἀπὸ τῆς ἐπιστήμης λέγεται, καὶ γραμματικὴν ἕξει ἢ μουσικὴν ἤ τινα τῶν ἄλλων ἐπιστημῶν ἢ παρωνύμως ἀπό τινος αὐτῶν ῥηθήσεται, οἷον γραμματικὸς ἢ μουσικός)· ἐὰν οὖν τι τεθῇ λεγόμενον ἀπὸ τοῦ γένους ὁπωσοῦν, οἷον τὴν ψυχὴν κινεῖσθαι, σκοπεῖν εἰ κατά τι τῶν εἰδῶν τῶν τῆς κινήσεως ἐνδέχεται τὴν ψυχὴν κινεῖσθαι, οἷον αὔξεσθαι ἢ φθείρεσθαι ἢ γίγνεσθαι ἢ ὅσα ἄλλα κινήσεως εἴδη· εἰ γὰρ κατὰ μηδέν, δῆλον ὅτι οὐ κινεῖται. οὗτος δ' ὁ τόπος κοινὸς πρὸς ἄμφω, πρός τε τὸ ἀνασκευάζειν καὶ κατασκευάζειν· εἰ γὰρ κατά τι τῶν εἰδῶν κινεῖται, δῆλον ὅτι κινεῖται, καὶ εἰ κατὰ μηδὲν τῶν εἰδῶν κινεῖται, δῆλον ὅτι οὐ κινεῖται.
Μὴ εὐποροῦντι δὲ ἐπιχειρήματος πρὸς τὴν θέσιν σκοπεῖν ἐκ τῶν ὁρισμῶν, ἢ τῶν ὄντων τοῦ προκειμένου πράγματος ἢ τῶν δοκούντων, καὶ εἰ μὴ ἀφ' ἑνός, ἀλλ' ἀπὸ πλειόνων. ῥᾷον γὰρ ὁρισαμένοις ἐπιχειρεῖν ἔσται· πρὸς γὰρ τοὺς ὁρισμοὺς ῥᾴων ἡ ἐπιχείρησις.

Σκοπεῖν δὲ ἐπὶ τοῦ προκειμένου, τίνος ὄντος τὸ προκείμενον ἔστιν, ἢ τί ἔστιν ἐξ ἀνάγκης εἰ τὸ προκείμενον ἔστι - κατασκευάζειν μὲν βουλομένῳ, τίνος ὄντος τὸ προκείμενον ἔσται (ἐὰν γὰρ ἐκεῖνο δειχθῇ ὑπάρχον, καὶ τὸ προκείμενον δεδειγμένον ἔσται), ἀνασκευάζειν δὲ βουλομένῳ, τί ἔστιν εἰ τὸ προκείμενον ἔστιν· ἐὰν γὰρ δείξωμεν τὸ ἀκόλουθον τῷ προκειμένῳ μὴ ὄν, ἀνῃρηκότες ἐσόμεθα τὸ προκείμενον.

Ἔτι ἐπὶ τὸν χρόνον ἐπιβλέπειν, εἴ που διαφωνεῖ, οἷον εἰ τὸ τρεφόμενον ἔφησεν ἐξ ἀνάγκης αὔξεσθαι· τρέφεται μὲν γὰρ ἀεὶ τὰ ζῷα, αὔξεται δ' οὐκ ἀεί. ὁμοίως δὲ καὶ εἰ τὸ ἐπίστασθαι ἔφησε μεμνῆσθαι· τὸ μὲν γὰρ τοῦ παρεληλυθότος χρόνου ἐστί, τὸ δὲ καὶ τοῦ παρόντος καὶ τοῦ μέλλοντος. ἐπίστασθαι μὲν γὰρ λεγόμεθα τὰ παρόντα καὶ τὰ μέλλοντα, οἷον ὅτι ἔσται ἔκλειψις· μνημονεύειν δ' οὐκ ἐνδέχεται ἄλλο ἢ τὸ παρεληλυθός.

Ἔτι ὁ σοφιστικὸς τρόπος, τὸ ἄγειν εἰς τοιοῦτον πρὸς ὃ εὐπορήσομεν ἐπιχειρημάτων· τοῦτο δ’ ἔσται ὁτὲ μὲν ἀναγκαῖον, ὁτὲ δὲ φαινόμενον ἀναγκαῖον, ὁτὲ δ’ οὔτε φαινόμενον οὔτ’ ἀναγκαῖον. ἀναγκαῖον μὲν οὖν ὅταν, ἀρνησαμένου τοῦ ἀποκρινομένου τῶν πρὸς τὴν θέσιν τι χρησίμων, πρὸς τοῦτο τοὺς λόγους ποιῆται, τυγχάνῃ δὲ τοῦτο τῶν τοιούτων ὂν πρὸς ἃ εὐπορεῖν ἐστιν ἐπιχειρημάτων. ὁμοίως δὲ καὶ ὅταν, ἐπαγωγὴν [112a] πρός τι διὰ τοῦ κειμένου ποιησαμένου, ἀναιρεῖν ἐπιχειρῇ· τούτου γὰρ ἀναιρεθέντος καὶ τὸ προκείμενον ἀναιρεῖται. φαινόμενον δ’ ἀναγκαῖον, ὅταν φαίνηται μὲν χρήσιμον καὶ οἰκεῖον τῆς θέσεως, μὴ ᾖ δέ, πρὸς ὃ γίγνονται οἱ λόγοι, εἴτε ἀρνησαμένου τοῦ τὸν λόγον ὑπέχοντος, εἴτε ἐπαγωγῆς ἐνδόξου διὰ τῆς θέσεως πρὸς αὐτὸ γενομένης, ἀναιρεῖν ἐπιχειροίη αὐτό. τὸ δὲ λοιπόν, ὅταν μήτ’ ἀναγκαῖον ᾖ μήτε φαινόμενον πρὸς ὃ γίγνονται οἱ λόγοι, ἄλλως δὲ παρεξελέγχεσθαι συμβαίνῃ τῷ ἀποκρινομένῳ. δεῖ δ’ εὐλαβεῖσθαι τὸν ἔσχατον τῶν ῥηθέντων τρόπων· παντελῶς γὰρ ἀπηρτημένος καὶ ἀλλότριος ἔοικεν εἶναι τῆς διαλεκτικῆς. διὸ δεῖ καὶ τὸν ἀποκρινόμενον μὴ δυσκολαίνειν, ἀλλὰ τιθέναι τὰ μὴ χρήσιμα πρὸς τὴν θέσιν, ἐπισημαινόμενον ὅσα μὴ δοκεῖ μὲν τίθησι δέ. μᾶλλον γὰρ ἀπορεῖν ὡς ἐπὶ τὸ πολὺ συμβαίνει τοῖς ἐρωτῶσι πάντων τιθεμένων αὐτοῖς τῶν τοιούτων, ἐὰν μὴ περαίνωσιν.

Ἔτι πᾶς ὁ εἰρηκὼς ὁτιοῦν τρόπον τινὰ πολλὰ εἴρηκεν, ἐπειδὴ πλείω ἑκάστῳ ἐξ ἀνάγκης ἀκόλουθά ἐστιν· οἷον ὁ εἰρηκὼς ἄνθρωπον εἶναι καὶ ὅτι ζῷόν ἐστιν εἴρηκε καὶ ὅτι ἔμψυχον καὶ ὅτι δίπουν καὶ ὅτι νοῦ καὶ ἐπιστήμης δεκτικόν, ὥστε ὁποιουοῦν ἑνὸς τῶν ἀκολούθων ἀναιρεθέντος ἀναιρεῖται καὶ τὸ ἐν ἀρχῇ. εὐλαβεῖσθαι δὲ χρὴ εἰς τὸ χαλεπώτερον τὴν μετάληψιν ποιεῖσθαι· ἐνίοτε μὲν γὰρ ῥᾷον τὸ ἀκόλουθον ἀνελεῖν, ἐνίοτε δ’ αὐτὸ τὸ προκείμενον.

Ὅσοις δ’ ἀνάγκη θάτερον μόνον ὑπάρχειν, οἷον τῷ ἀνθρώπῳ τὴν νόσον ἢ τὴν ὑγίειαν, ἐὰν πρὸς θάτερον εὐπορῶμεν διαλέγεσθαι ὅτι ὑπάρχει ἢ οὐχ ὑπάρχει, καὶ πρὸς τὸ λοιπὸν εὐπορήσομεν. τοῦτο δ’ ἀντιστρέφει πρὸς ἄμφω· δείξαντες μὲν γὰρ ὅτι ὑπάρχει θάτερον, ὅτι οὐχ ὑπάρχει τὸ λοιπὸν δεδειχότες ἐσόμεθα· ἐὰν δ’ ὅτι οὐχ ὑπάρχει δείξωμεν, τὸ λοιπὸν ὅτι ὑπάρχει δεδειχότες ἐσόμεθα. δῆλον οὖν ὅτι πρὸς ἄμφω χρήσιμος ὁ τόπος.

Ἔτι τὸ ἐπιχειρεῖν, μεταφέροντα τοὔνομα κατὰ τὸν λόγον, ὡς μᾶλλον προσῆκον ἐκλαμβάνειν ἢ ὡς κεῖται τοὔνομα, οἷον εὔψυχον μὴ τὸν ἀνδρεῖον, καθάπερ νῦν κεῖται, ἀλλὰ τὸν εὖ τὴν ψυχὴν ἔχοντα, καθάπερ καὶ εὔελπιν τὸν ἀγαθὰ ἐλπίζοντα· ὁμοίως δὲ καὶ εὐδαίμονα οὗ ἂν ὁ δαίμων ᾖ σπουδαῖος, καθάπερ Ξενοκράτης φησὶν εὐδαίμονα εἶναι τὸν τὴν ψυχὴν ἔχοντα σπουδαίαν· ταύτην γὰρ ἑκάστου εἶναι δαίμονα.

[112b] Ἐπεὶ δὲ τῶν πραγμάτων τὰ μὲν ἐξ ἀνάγκης ἐστί, τὰ δ’ ὡς ἐπὶ τὸ πολύ, τὰ δ’ ὁπότερ’ ἔτυχεν, ἐὰν τὸ ἐξ ἀνάγκης ὡς ἐπὶ τὸ πολὺ τεθῇ ἢ τὸ ὡς ἐπὶ τὸ πολὺ ἐξ ἀνάγκης (ἢ αὐτὸ ἢ τὸ ἐναντίον τῷ ὡς ἐπὶ τὸ πολύ), ἀεὶ δίδωσι τόπον ἐπιχειρήματος. ἐὰν γὰρ τὸ ἐξ ἀνάγκης ὡς ἐπὶ τὸ πολὺ τεθῇ, δῆλον ὅτι οὐ παντί φησιν ὑπάρχειν, ὑπάρχοντος παντί, ὥστε ἡμάρτηκεν· εἴ τε τὸ ὡς ἐπὶ τὸ πολὺ λεγόμενον ἐξ ἀνάγκης ἔφησε· παντὶ γάρ φησιν ὑπάρχειν, οὐχ ὑπάρχοντος παντί. ὁμοίως δὲ καὶ εἰ τὸ ἐναντίον τῷ ὡς ἐπὶ τὸ πολὺ ἐξ ἀνάγκης εἴρηκεν· ἀεὶ γὰρ ἐπ’ ἔλαττον λέγεται τὸ ἐναντίον τῷ ὡς ἐπὶ τὸ πολύ· οἷον εἰ ὡς ἐπὶ τὸ πολὺ φαῦλοι οἱ ἄνθρωποι, ἀγαθοὶ ἐπ’ ἔλαττον, ὥστ’ ἔτι μᾶλλον ἡμάρτηκεν, εἰ ἀγαθοὺς ἐξ ἀνάγκης εἴρηκεν. ὡσαύτως δὲ καὶ εἰ τὸ ὁπότερ’ ἔτυχεν ἐξ ἀνάγκης ἔφησεν ἢ ὡς ἐπὶ τὸ πολύ· οὔτε γὰρ ἐξ ἀνάγκης τὸ ὁπότερ’ ἔτυχεν οὔθ’ ὡς ἐπὶ τὸ πολύ. ἐνδέχεται δέ, κἂν μὴ διορίσας εἴπῃ πότερον ὡς ἐπὶ τὸ πολὺ ἢ ἐξ ἀνάγκης εἴρηκεν, ᾖ δὲ τὸ πρᾶγμα ὡς ἐπὶ τὸ πολύ, διαλέγεσθαι ὡς ἐξ ἀνάγκης εἰρηκότος αὐτοῦ, οἷον, εἰ φαύλους τοὺς ἀποκλήρους ἔφησεν εἶναι μὴ διορίσας, ὡς ἐξ ἀνάγκης εἰρηκότος αὐτοῦ διαλέγεσθαι.

Ἔτι καὶ εἰ αὐτὸ αὐτῷ συμβεβηκὸς ἔθηκεν ὡς ἕτερον διὰ τὸ ἕτερον εἶναι ὄνομα, καθάπερ Πρόδικος διῃρεῖτο τὰς ἡδονὰς εἰς χαρὰν καὶ τέρψιν καὶ εὐφροσύνην· ταῦτα γὰρ πάντα τοῦ αὐτοῦ, τῆς ἡδονῆς, ὀνόματά ἐστιν. εἰ οὖν τις τὸ χαίρειν τῷ εὐφραίνεσθαι φήσει συμβεβηκέναι, αὐτὸ ἂν αὐτῷ φαίη συμβεβηκέναι.

Ἐπεὶ δὲ τὰ ἐναντία συμπλέκεται μὲν ἀλλήλοις ἑξαχῶς, ἐναντίωσιν δὲ ποιεῖ τετραχῶς συμπλεκόμενα, δεῖ λαμβάνειν τὰ ἐναντία ὅπως ἂν χρήσιμον ᾖ καὶ ἀναιροῦντι καὶ κατασκευάζοντι. ὅτι μὲν οὖν ἑξαχῶς συμπλέκεται, δῆλον. ἢ γὰρ ἑκάτερον τῶν ἐναντίων ἑκατέρῳ τῶν ἐναντίων συμπλακήσεται (τοῦτο δὲ διχῶς, οἷον τὸ τοὺς φίλους εὖ ποιεῖν καὶ τὸ τοὺς ἐχθροὺς κακῶς, ἢ ἀνάπαλιν τὸ τοὺς φίλους κακῶς καὶ τὸ τοὺς ἐχθροὺς εὖ), ἢ ἀμφότερα περὶ τοῦ ἑνός (διχῶς δὲ καὶ τοῦτο, οἷον τὸ τοὺς φίλους εὖ καὶ τὸ τοὺς φίλους κακῶς, ἢ τὸ τοὺς ἐχθροὺς εὖ καὶ τὸ τοὺς ἐχθροὺς κακῶς), ἢ τὸ ἓν περὶ ἀμφοτέρων (διχῶς δὲ καὶ τοῦτο, οἷον τὸ τοὺς φίλους εὖ καὶ τὸ τοὺς ἐχθροὺς εὖ, ἢ τοὺς φίλους κακῶς καὶ τοὺς ἐχθροὺς κακῶς).

[113a] Αἱ μὲν οὖν πρῶται δύο ῥηθεῖσαι συμπλοκαὶ οὐ ποιοῦσιν ἐναντίωσιν. τὸ γὰρ τοὺς φίλους εὖ ποιεῖν τῷ τοὺς ἐχθροὺς κακῶς οὐκ ἔστιν ἐναντίον· ἀμφότερα γὰρ αἱρετὰ καὶ τοῦ αὐτοῦ ἤθους· οὐδὲ τὸ τοὺς φίλους κακῶς τῷ τοὺς ἐχθροὺς εὖ· καὶ γὰρ ταῦτα ἀμφότερα φευκτὰ καὶ τοῦ αὐτοῦ

ἤθους. οὐ δοκεῖ δὲ φευκτὸν φευκτῷ ἐναντίον εἶναι, ἐὰν μὴ ᾖ τὸ μὲν καθ' ὑπερβολὴν τὸ δὲ κατ' ἔνδειαν λεγόμενον· ἥ τε γὰρ ὑπερβολὴ τῶν φευκτῶν δοκεῖ εἶναι, ὁμοίως δὲ καὶ ἡ ἔνδεια. τὰ δὲ λοιπὰ πάντα τέτταρα ποιεῖ ἐναντίωσιν. τὸ γὰρ τοὺς φίλους εὖ ποιεῖν τῷ τοὺς φίλους κακῶς ἐναντίον· ἀπό τε γὰρ ἐναντίου ἤθους ἐστί, καὶ τὸ μὲν αἱρετὸν τὸ δὲ φευκτόν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων· καθ' ἑκάστην γὰρ συζυγίαν τὸ μὲν αἱρετὸν τὸ δὲ φευκτόν, καὶ τὸ μὲν ἐπιεικοῦς ἤθους τὸ δὲ φαύλου. δῆλον οὖν ἐκ τῶν εἰρημένων ὅτι τῷ αὐτῷ πλείονα ἐναντία συμβαίνει γίνεσθαι· τῷ γὰρ τοὺς φίλους εὖ ποιεῖν καὶ τὸ τοὺς ἐχθροὺς εὖ ποιεῖν ἐναντίον καὶ τὸ τοὺς φίλους κακῶς, ὁμοίως δὲ καὶ τῶν ἄλλων ἑκάστῳ τὸν αὐτὸν τρόπον ἐπισκοποῦσι δύο τὰ ἐναντία φανήσεται. λαμβάνειν οὖν τῶν ἐναντίων ὁπότερον ἂν ᾖ πρὸς τὴν θέσιν χρήσιμον.

Ἔτι εἰ ἔστι τι ἐναντίον τῷ συμβεβηκότι, σκοπεῖν εἰ ὑπάρχει ᾧπερ τὸ συμβεβηκὸς εἴρηται ὑπάρχειν· εἰ γὰρ τοῦτο ὑπάρχει, ἐκεῖνο οὐκ ἂν ὑπάρχοι· ἀδύνατον γὰρ τὰ ἐναντία ἅμα τῷ αὐτῷ ὑπάρχειν.

Ἢ εἴ τι τοιοῦτον εἴρηται κατά τινος, οὗ ὄντος ἀνάγκη τὰ ἐναντία ὑπάρχειν· οἷον εἰ τὰς ἰδέας ἐν ἡμῖν ἔφησεν εἶναι· κινεῖσθαί τε γὰρ καὶ ἠρεμεῖν αὐτὰς συμβήσεται, ἔτι δὲ αἰσθητὰς καὶ νοητὰς εἶναι. δοκοῦσι γὰρ αἱ ἰδέαι ἠρεμεῖν καὶ νοηταὶ εἶναι τοῖς τιθεμένοις ἰδέας εἶναι· ἐν ἡμῖν δὲ οὔσας ἀδύνατον ἀκινήτους εἶναι· κινουμένων γὰρ ἡμῶν ἀναγκαῖον καὶ τὰ ἐν ἡμῖν πάντα συγκινεῖσθαι. δῆλον δ' ὅτι καὶ αἰσθηταί, εἴπερ ἐν ἡμῖν εἰσι· διὰ γὰρ τῆς περὶ τὴν ὄψιν αἰσθήσεως τὴν ἐν ἑκάστῳ μορφὴν γνωρίζομεν.

Πάλιν εἰ κεῖται συμβεβηκὸς ᾧ ἔστι τι ἐναντίον, σκοπεῖν εἰ καὶ τοῦ ἐναντίου δεκτικὸν ὅπερ καὶ τοῦ συμβεβηκότος· τὸ γὰρ αὐτὸ τῶν ἐναντίων δεκτικόν. οἷον εἰ τὸ μῖσος ἕπεσθαι ὀργῇ ἔφησεν, εἴη ἂν τὸ μῖσος ἐν τῷ θυμοειδεῖ· ἐκεῖ γὰρ [113b] ἡ ὀργή. σκεπτέον οὖν εἰ καὶ τὸ ἐναντίον ἐν τῷ θυμοειδεῖ· εἰ γὰρ μή, ἀλλ' ἐν τῷ ἐπιθυμητικῷ ἐστιν ἡ φιλία, οὐκ ἂν ἕποιτο τὸ μῖσος ὀργῇ. ὁμοίως δὲ καὶ εἰ τὸ ἐπιθυμητικὸν ἀγνοεῖν ἔφησεν· εἴη γὰρ ἂν καὶ ἐπιστήμης δεκτικόν, εἴπερ καὶ ἀγνοίας· ὅπερ οὐ δοκεῖ, τὸ ἐπιθυμητικὸν δεκτικὸν εἶναι ἐπιστήμης. ἀνασκευάζοντι μὲν οὖν καθάπερ εἴρηται χρηστέον. κατασκευάζοντι δέ, ὅτι μὲν ὑπάρχει τὸ συμβεβηκός, οὐ χρήσιμος ὁ τόπος· ὅτι δ' ἐνδέχεται ὑπάρχειν, χρήσιμος. δείξαντες μὲν γὰρ ὅτι οὐ δεκτικὸν τοῦ ἐναντίου, δεδειχότες ἐσόμεθα ὅτι οὔτε ὑπάρχει τὸ συμβεβηκὸς οὔτ' ἐνδέχεται ὑπάρξαι· ἐὰν δὲ δείξωμεν ὅτι ὑπάρχει τὸ ἐναντίον ἢ ὅτι δεκτικὸν τοῦ ἐναντίου ἐστίν, οὐδέπω δεδειχότες ἐσόμεθα ὅτι καὶ τὸ συμβεβηκὸς ὑπάρχει, ἀλλ' ὅτι ἐνδέχεται ὑπάρχειν, ἐπὶ τοσοῦτον μόνον δεδειγμένον ἔσται.

Ἐπεὶ δ’ αἱ ἀντιθέσεις τέτταρες, σκοπεῖν ἐπὶ μὲν τῶν ἀντιφάσεων ἀνάπαλιν ἐκ τῆς ἀκολουθήσεως, καὶ ἀναιροῦντα καὶ κατασκευάζοντα, λαμβάνειν δ’ ἐξ ἐπαγωγῆς. οἷον εἰ ὁ ἄνθρωπος ζῷον, τὸ μὴ ζῷον οὐκ ἄνθρωπος· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἐνταῦθα γὰρ ἀνάπαλιν ἡ ἀκολούθησις· τῷ μὲν γὰρ ἀνθρώπῳ τὸ ζῷον ἕπεται, τῷ δὲ μὴ ἀνθρώπῳ τὸ μὴ ζῷον οὔ, ἀλλ’ ἀνάπαλιν τῷ μὴ ζῴῳ τὸ οὐκ ἄνθρωπος. ἐπὶ πάντων οὖν τὸ τοιοῦτον ἀξιωτέον· οἷον εἰ τὸ καλὸν ἡδύ, καὶ τὸ μὴ ἡδὺ οὐ καλόν· εἰ δὲ τοῦτο μή, οὐδ’ ἐκεῖνο· ὁμοίως δὲ καὶ εἰ τὸ μὴ ἡδὺ οὐ καλόν, τὸ καλὸν ἡδύ. δῆλον οὖν ὅτι πρὸς ἄμφω ἀντιστρέφει ἡ κατὰ τὴν ἀντίφασιν ἀκολούθησις ἀνάπαλιν γινομένη.

Ἐπὶ δὲ τῶν ἐναντίων σκοπεῖν εἰ τῷ ἐναντίῳ τὸ ἐναντίον ἕπεται, ἢ ἐπὶ ταὐτὰ ἢ ἀνάπαλιν, καὶ ἀναιροῦντι καὶ κατασκευάζοντι· λαμβάνειν δὲ καὶ τὰ τοιαῦτα ἐξ ἐπαγωγῆς ἐφ’ ὅσον χρήσιμον. ἐπὶ ταὐτὰ μὲν οὖν ἡ ἀκολούθησις, οἷον τῇ ἀνδρείᾳ καὶ τῇ δειλίᾳ· τῇ μὲν γὰρ ἀρετὴ ἀκολουθεῖ, τῇ δὲ κακία, καὶ τῇ μὲν ἀκολουθεῖ τὸ αἱρετόν, τῇ δὲ τὸ φευκτόν. ἐπὶ ταὐτὰ οὖν καὶ ἡ τούτων ἀκολούθησις· ἐναντίον γὰρ τὸ αἱρετὸν τῷ φευκτῷ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἀνάπαλιν δὲ ἡ ἀκολούθησις, οἷον εὐεξίᾳ μὲν ὑγίεια ἀκολουθεῖ, καχεξίᾳ δὲ νόσος οὔ, ἀλλὰ νόσῳ καχεξία. δῆλον οὖν ὅτι [114a] ἀνάπαλιν ἐπὶ τούτων ἡ ἀκολούθησις. σπάνιον δὲ τὸ ἀνάπαλιν ἐπὶ τῶν ἐναντίων συμβαίνει, ἀλλὰ τοῖς πλείστοις ἐπὶ ταὐτὰ ἡ ἀκολούθησις. εἰ οὖν μήτ’ ἐπὶ ταὐτὰ τῷ ἐναντίῳ τὸ ἐναντίον ἀκολουθεῖ μήτε ἀνάπαλιν, δῆλον ὅτι οὐδ’ ἐπὶ τῶν ῥηθέντων ἀκολουθεῖ τὸ ἕτερον τῷ ἑτέρῳ. εἰ δ’ ἐπὶ τῶν ἐναντίων, καὶ ἐπὶ τῶν ῥηθέντων ἀναγκαῖον τὸ ἕτερον τῷ ἑτέρῳ ἀκολουθεῖν.

Ὁμοίως δὲ τοῖς ἐναντίοις καὶ ἐπὶ τῶν στερήσεων καὶ ἕξεων σκεπτέον· πλὴν οὐκ ἔστιν ἐπὶ τῶν στερήσεων τὸ ἀνάπαλιν, ἀλλ’ ἐπὶ ταὐτὰ τὴν ἀκολούθησιν ἀναγκαῖον ἀεὶ γίγνεσθαι, καθάπερ ὄψει μὲν αἴσθησιν, τυφλότητι δ’ ἀναισθησίαν. ἀντίκειται γὰρ ἡ αἴσθησις τῇ ἀναισθησίᾳ ὡς ἕξις καὶ στέρησις· τὸ μὲν γὰρ ἕξις αὐτῶν, τὸ δὲ στέρησίς ἐστιν.

Ὁμοίως δὲ τῇ ἕξει καὶ τῇ στερήσει καὶ ἐπὶ τῶν πρός τι χρηστέον· ἐπὶ ταὐτὰ γὰρ καὶ τούτων ἡ ἀκολούθησις. οἷον εἰ τὸ τριπλάσιον πολλαπλάσιον, καὶ τὸ τριτημόριον πολλοστημόριον· λέγεται γὰρ τὸ μὲν τριπλάσιον πρὸς τὸ τριτημόριον, τὸ δὲ πολλαπλάσιον πρὸς τὸ πολλοστημόριον. πάλιν εἰ ἡ ἐπιστήμη ὑπόληψις, καὶ τὸ ἐπιστητὸν ὑποληπτόν· καὶ εἰ ἡ ὅρασις αἴσθησις, καὶ τὸ ὁρατὸν αἰσθητόν. (ἔνστασις ὅτι οὐκ ἀνάγκη ἐπὶ τῶν πρός τι τὴν ἀκολούθησιν γίνεσθαι καθάπερ εἴρηται· τὸ γὰρ αἰσθητὸν ἐπιστητόν ἐστιν, ἡ δ’ αἴσθησις οὐκ ἐπιστήμη. οὐ μὴν ἀληθής γε ἡ ἔνστασις δοκεῖ εἶναι· πολλοὶ γὰρ οὔ φασι τῶν αἰσθητῶν ἐπιστήμην εἶναι.) ἔτι πρὸς τοὐναντίον οὐχ ἧττον χρήσιμον τὸ ῥηθέν, οἷον ὅτι τὸ αἰσθητὸν οὐκ ἔστιν ἐπιστητόν· οὐδὲ γὰρ ἡ αἴσθησις ἐπιστήμη.

Πάλιν ἐπὶ τῶν συστοίχων καὶ ἐπὶ τῶν πτώσεων, καὶ ἀναιροῦντα καὶ κατασκευάζοντα. λέγεται δὲ σύστοιχα μὲν τὰ τοιάδε οἷον τὰ δίκαια καὶ ὁ δίκαιος τῇ δικαιοσύνῃ, καὶ τὰ ἀνδρεῖα καὶ ὁ ἀνδρεῖος τῇ ἀνδρείᾳ. ὁμοίως δὲ καὶ τὰ ποιητικὰ ἢ φυλακτικὰ σύστοιχα ἐκείνῳ οὗ ἐστι ποιητικὰ ἢ φυλακτικά, οἷον τὰ ὑγιεινὰ ὑγιείας καὶ τὰ εὐεκτικὰ εὐεξίας· τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων. σύστοιχα μὲν οὖν τὰ τοιαῦτα εἴωθε λέγεσθαι, πτώσεις δὲ οἷον τὸ δικαίως καὶ ἀνδρείως καὶ ὑγιεινῶς καὶ ὅσα τοῦτον τὸν τρόπον λέγεται. δοκεῖ δὲ καὶ τὰ κατὰ τὰς πτώσεις σύστοιχα εἶναι, οἷον τὸ μὲν δικαίως τῇ δικαιοσύνῃ, τὸ δὲ ἀνδρείως τῇ ἀνδρείᾳ. σύστοιχα δὴ λέγεται τὰ κατὰ τὴν αὐτὴν συστοιχίαν ἅπαντα, οἷον δικαιοσύνη, δίκαιος, δίκαιον, δικαίως. δῆλον οὖν ὅτι ἑνὸς ὁποιουοῦν δειχθέντος τῶν κατὰ τὴν αὐτὴν συστοιχίαν ἀγαθοῦ ἢ [114b] ἐπαινετοῦ καὶ τὰ λοιπὰ πάντα δεδειγμένα γίνεται· οἷον εἰ ἡ δικαιοσύνη τῶν ἐπαινετῶν, καὶ ὁ δίκαιος καὶ τὸ δίκαιον καὶ τὸ δικαίως τῶν ἐπαινετῶν. ῥηθήσεται δὲ τὸ [δικαίως καὶ] ἐπαινετῶς κατὰ τὴν αὐτὴν πτῶσιν ἀπὸ τοῦ ἐπαινετοῦ καθάπερ τὸ δικαίως ἀπὸ τῆς δικαιοσύνης.

Σκοπεῖν δὲ μὴ μόνον ἐπ’ αὐτοῦ τοῦ εἰρημένου, ἀλλὰ καὶ ἐπὶ τοῦ ἐναντίου τὸ ἐναντίον, οἷον ὅτι τὸ ἀγαθὸν οὐκ ἐξ ἀνάγκης ἡδύ· οὐδὲ γὰρ τὸ κακὸν λυπηρόν· ἢ εἰ τοῦτο, κἀκεῖνο. καὶ εἰ ἡ δικαιοσύνη ἐπιστήμη, καὶ ἡ ἀδικία ἄγνοια· καὶ εἰ τὸ δικαίως ἐπιστημονικῶς καὶ ἐμπείρως, τὸ ἀδίκως ἀγνοούντως καὶ ἀπείρως. εἰ δὲ ταῦτα μή, οὐδ’ ἐκεῖνα, καθάπερ ἐπὶ τοῦ νῦν ῥηθέντος· μᾶλλον γὰρ ἂν φανείη τὸ ἀδίκως ἐμπείρως ἢ ἀπείρως. οὗτος δ’ ὁ τόπος εἴρηται πρότερον ἐν ταῖς τῶν ἐναντίων ἀκολουθήσεσιν· οὐδὲν γὰρ ἄλλο νῦν ἀξιοῦμεν ἢ τὸ ἐναντίον τῷ ἐναντίῳ ἀκολουθεῖν.

Ἔτι ἐπὶ τῶν γενέσεων καὶ φθορῶν καὶ ποιητικῶν καὶ φθαρτικῶν, καὶ ἀναιροῦντι καὶ κατασκευάζοντι. ὧν γὰρ αἱ γενέσεις τῶν ἀγαθῶν, καὶ αὐτὰ ἀγαθά, καὶ εἰ αὐτὰ ἀγαθά, καὶ αἱ γενέσεις· εἰ δὲ αἱ γενέσεις τῶν κακῶν, καὶ αὐτὰ τῶν κακῶν, ‹καὶ εἰ αὐτὰ τῶν κακῶν, καὶ αἱ γενέσεις τῶν κακῶν›. ἐπὶ δὲ τῶν φθορῶν ἀνάπαλιν· εἰ γὰρ αἱ φθοραὶ τῶν ἀγαθῶν, αὐτὰ τῶν κακῶν, εἰ δ’ αἱ φθοραὶ τῶν κακῶν, αὐτὰ τῶν ἀγαθῶν. ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ ποιητικῶν καὶ φθαρτικῶν· ὧν μὲν γὰρ τὰ ποιητικὰ ἀγαθά, καὶ αὐτὰ τῶν ἀγαθῶν, ὧν δὲ τὰ φθαρτικὰ ἀγαθά, αὐτὰ τῶν κακῶν.

Πάλιν ἐπὶ τῶν ὁμοίων εἰ ὁμοίως ἔχει· οἷον εἰ ἐπιστήμη μία πλειόνων, καὶ δόξα, καὶ εἰ τὸ ὄψιν ἔχειν ὁρᾶν, καὶ τὸ ἀκοὴν ἔχειν ἀκούειν. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, καὶ τῶν ὄντων καὶ τῶν δοκούντων. χρήσιμος δ’ ὁ τόπος πρὸς ἄμφω· εἰ μὲν γὰρ ἐπί τινος τῶν ὁμοίων οὕτως ἔχει, καὶ ἐπὶ τῶν ἄλλων τῶν ὁμοίων, εἰ δὲ ἐπί τινος μή, οὐδ' ἐπὶ τῶν ἄλλων. σκοπεῖν δὲ καὶ εἰ ἐφ' ἑνὸς καὶ ἐπὶ πολλῶν ὁμοίως ἔχει· ἐνιαχοῦ γὰρ διαφωνεῖ. οἷον εἰ τὸ ἐπίστασθαι διανοεῖσθαι, καὶ τὸ πολλὰ ἐπίστασθαι πολλὰ διανοεῖσθαι· τοῦτο δ' οὐκ ἀληθές· ἐπίστασθαι μὲν γὰρ ἐνδέχεται πολλά, διανοεῖσθαι δ' οὔ. εἰ οὖν τοῦτο μή, οὐδ' ἐκεῖνο τὸ ἐφ' ἑνός, ὅτι τὸ ἐπίστασθαι διανοεῖσθαί ἐστιν.

Ἔτι ἐκ τοῦ μᾶλλον καὶ ἧττον. εἰσὶ δὲ τόποι τοῦ μᾶλλον καὶ ἧττον τέσσαρες· εἷς μὲν εἰ ἀκολουθεῖ τὸ μᾶλλον τῷ μᾶλλον, οἷον εἰ ἡδονὴ ἀγαθόν, καὶ ἡ μᾶλλον ἡδονὴ μᾶλλον [115a] ἀγαθόν, καὶ εἰ τὸ ἀδικεῖν κακόν, καὶ τὸ μᾶλλον ἀδικεῖν μᾶλλον κακόν. χρήσιμος δὲ πρὸς ἄμφω ὁ τόπος· εἰ μὲν γὰρ ἀκολουθεῖ τῇ τοῦ ὑποκειμένου ἐπιδόσει ἡ τοῦ συμβεβηκότος ἐπίδοσις, καθάπερ εἴρηται, δῆλον ὅτι συμβέβηκεν· εἰ δὲ μὴ ἀκολουθεῖ, οὐ συμβέβηκεν. τοῦτο δ' ἐπαγωγῇ ληπτέον. ἄλλος ἑνὸς περὶ δύο λεγομένου, εἰ ᾧ μᾶλλον εἰκὸς ὑπάρχειν μὴ ὑπάρχει, οὐδ' ᾧ ἧττον, καὶ εἰ ᾧ ἧττον εἰκὸς ὑπάρχειν ὑπάρχει, καὶ ᾧ μᾶλλον. πάλιν δυοῖν περὶ ἑνὸς λεγομένων, εἰ τὸ μᾶλλον ὑπάρχειν δοκοῦν μὴ ὑπάρχει, οὐδὲ τὸ ἧττον, εἰ δὲ τὸ ἧττον δοκοῦν ὑπάρχειν ὑπάρχει, καὶ τὸ μᾶλλον. ἔτι δυοῖν περὶ δύο λεγομένων, εἰ τὸ θατέρῳ μᾶλλον ὑπάρχειν δοκοῦν μὴ ὑπάρχει, οὐδὲ τὸ λοιπὸν τῷ λοιπῷ, εἰ δὲ τὸ ἧττον δοκοῦν τῷ ἑτέρῳ ὑπάρχειν ὑπάρχει, καὶ τὸ λοιπὸν τῷ λοιπῷ.

Ἔτι ἐκ τοῦ ὁμοίως ὑπάρχειν ἢ δοκεῖν ὑπάρχειν τριχῶς, καθάπερ ἐκ τοῦ μᾶλλον ἐπὶ τῶν ὕστερον ῥηθέντων τριῶν τόπων ἐλέγετο. εἴτε γὰρ ἕν τι δυσὶν ὁμοίως ὑπάρχει ἢ δοκεῖ ὑπάρχειν, εἰ τῷ ἑτέρῳ μὴ ὑπάρχει, οὐδὲ τῷ ἑτέρῳ, εἰ δὲ θατέρῳ ὑπάρχει, καὶ τῷ λοιπῷ· εἴτε δύο τῷ αὐτῷ ὁμοίως, εἰ τὸ ἕτερον μὴ ὑπάρχει, οὐδὲ τὸ λοιπόν, εἰ δὲ θάτερον, καὶ τὸ λοιπόν. τὸν αὐτὸν δὲ τρόπον καὶ εἰ δύο δυσὶν ὁμοίως ὑπάρχει· εἰ γὰρ τὸ ἕτερον τῷ ἑτέρῳ μὴ ὑπάρχει, οὐδὲ τὸ λοιπὸν τῷ λοιπῷ· εἰ δὲ ὑπάρχει τὸ ἕτερον τῷ ἑτέρῳ, καὶ τὸ λοιπὸν τῷ λοιπῷ.

Ἐκ μὲν οὖν τοῦ μᾶλλον καὶ ἧττον καὶ τοῦ ὁμοίως τοσαυταχῶς ἐνδέχεται ἐπιχειρεῖν. ἔτι δ' ἐκ τῆς προσθέσεως, ἐὰν ἕτερον πρὸς ἕτερον προστεθὲν ποιῇ ἀγαθὸν ἢ λευκὸν μὴ ὂν πρότερον ἀγαθὸν ἢ λευκόν, τὸ προστεθὲν ἔσται ἀγαθὸν ἢ λευκόν, οἷόνπερ καὶ τὸ ὅλον ποιεῖ. ἔτι εἰ πρὸς τὸ ὑπάρχον προστεθέν τι μᾶλλον ποιεῖ τοιοῦτον οἷον ὑπῆρχε, καὶ αὐτὸ ἔσται τοιοῦτον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. χρήσιμος δὲ οὐκ ἐν ἅπασιν ὁ τόπος, ἀλλ' ἐν οἷς τὴν τοῦ μᾶλλον ὑπεροχὴν συμβαίνει γίνεσθαι. οὗτος δὲ ὁ τόπος οὐκ ἀντιστρέφει πρὸς τὸ ἀνασκευάζειν. εἰ γὰρ μὴ ποιεῖ τὸ προστιθέμενον ἀγαθόν, οὐδέπω δῆλον εἰ αὐτὸ μὴ ἀγαθόν· τὸ γὰρ [115b] ἀγαθὸν κακῷ προστιθέμενον οὐκ ἐξ ἀνάγκης ἀγαθὸν τὸ ὅλον ποιεῖ, οὐδὲ λευκὸν τὸ λευκὸν μέλανι.

Πάλιν εἴ τι μᾶλλον καὶ ἧττον λέγεται, καὶ ἁπλῶς ὑπάρχει· τὸ γὰρ μὴ ὂν ἀγαθὸν ἢ λευκὸν οὐδὲ μᾶλλον ἢ ἧττον ἀγαθὸν ἢ λευκὸν ῥηθήσεται· τὸ γὰρ κακὸν οὐδενὸς μᾶλλον ἢ ἧττον ἀγαθὸν ἀλλὰ μᾶλλον κακὸν ἢ ἧττον ῥηθήσεται. οὐκ ἀντιστρέφει δ’ οὐδ’ οὗτος ὁ τόπος πρὸς τὸ ἀνασκευάσαι· πολλὰ γὰρ τῶν μὴ λεγομένων μᾶλλον καὶ ἧττον ἁπλῶς ὑπάρχει· ἄνθρωπος γὰρ οὐ λέγεται μᾶλλον καὶ ἧττον, ἀλλ’ οὐ διὰ τοῦτο οὐκ ἔστιν ἄνθρωπος.

Τὸν αὐτὸν δὲ τρόπον σκεπτέον καὶ ἐπὶ τοῦ κατά τι καὶ ποτὲ καὶ πού· εἰ γὰρ κατά τι ἐνδέχεται, καὶ ἁπλῶς ἐνδέχεται· ὁμοίως δὲ καὶ τὸ ποτὲ ἢ πού· τὸ γὰρ ἁπλῶς ἀδύνατον οὔτε κατά τι οὔτε ποτὲ οὔτε πού ἐνδέχεται. (ἔνστασις ὅτι κατά τι μέν εἰσι φύσει σπουδαῖοι, οἷον ἐλευθέριοι ἢ σωφρονικοί, ἁπλῶς δὲ οὐκ εἰσὶ φύσει σπουδαῖοι. ὁμοίως δὲ καὶ ποτὲ μὲν ἐνδέχεται τῶν φθαρτῶν τι μὴ φθαρῆναι, ἁπλῶς δ’ οὐκ ἐνδέχεται μὴ φθαρῆναι. τὸν αὐτὸν δὲ τρόπον καὶ πού μὲν συμφέρει τοιαύτῃ διαίτῃ χρῆσθαι, οἷον ἐν τοῖς νοσώδεσι τόποις, ἁπλῶς δ’ οὐ συμφέρει. ἔτι δὲ πού μὲν ἕνα μόνον δυνατὸν εἶναι, ἁπλῶς δὲ οὐ δυνατὸν ἕνα μόνον εἶναι. τὸν αὐτὸν δὲ τρόπον καὶ πού μὲν καλὸν τὸν πατέρα θύειν, οἷον ἐν Τριβαλλοῖς, ἁπλῶς δ’ οὐ καλόν. ἢ τοῦτο μὲν οὐ πού σημαίνει ἀλλὰ τισίν· οὐδὲν γὰρ διαφέρει ὅπου ἂν ὦσιν· πανταχοῦ γὰρ αὐτοῖς ἔσται καλόν, οὖσι Τριβαλλοῖς. πάλιν ποτὲ μὲν συμφέρει φαρμακεύεσθαι, οἷον ὅταν νοσῇ, ἁπλῶς δ’ οὔ. ἢ οὐδὲ τοῦτο ποτὲ σημαίνει ἀλλὰ τῷ διακειμένῳ πως· οὐδὲν γὰρ διαφέρει ὁποτεοῦν, ἐὰν οὕτω μόνον διακείμενος ᾖ.) τὸ δ’ ἁπλῶς ἐστιν ὃ μηδενὸς προστεθέντος ἐρεῖς ὅτι καλόν ἐστιν ἢ τὸ ἐναντίον· οἷον τὸ τὸν πατέρα θύειν οὐκ ἐρεῖς καλὸν εἶναι ἀλλὰ τισὶ καλὸν εἶναι· οὐκ ἄρα ἁπλῶς καλόν· ἀλλὰ τὸ τοὺς θεοὺς τιμᾶν ἐρεῖς καλὸν οὐδὲν προσθείς· ἁπλῶς γὰρ καλόν ἐστιν. ὥστε ὃ ἂν μηδενὸς προστιθεμένου δοκῇ εἶναι καλὸν ἢ αἰσχρὸν ἢ ἄλλο τι τῶν τοιούτων, ἁπλῶς ῥηθήσεται.

Γ

[116a] Πότερον δ’ αἱρετώτερον ἢ βέλτιον δυεῖν ἢ πλειόνων, ἐκ τῶνδε σκεπτέον. πρῶτον δὲ διωρίσθω ὅτι τὴν σκέψιν ποιούμεθα οὐχ ὑπὲρ τῶν πολὺ διεστώτων καὶ μεγάλην πρὸς ἄλληλα διαφορὰν ἐχόντων (οὐδεὶς γὰρ ἀπορεῖ πότερον ἡ εὐδαιμονία ἢ ὁ πλοῦτος αἱρετώτερον), ἀλλ’ ὑπὲρ τῶν σύνεγγυς, καὶ περὶ ὧν ἀμφισβητοῦμεν ποτέρῳ δεῖ προσθέσθαι μᾶλλον, διὰ τὸ μηδεμίαν ὁρᾶν τοῦ ἑτέρου πρὸς τὸ ἕτερον ὑπεροχήν. δῆλον οὖν ἐπὶ τῶν τοιούτων ὅτι δειχθείσης ὑπεροχῆς ἢ μιᾶς ἢ πλειόνων συγκαταθήσεται ἡ διάνοια ὅτι τοῦτ’ ἐστὶν αἱρετώτερον, ὁπότερον τυγχάνει αὐτῶν ὑπερέχον.

Πρῶτον μὲν οὖν τὸ πολυχρονιώτερον ἢ βεβαιότερον αἱρετώτερον τοῦ ἧττον τοιούτου. καὶ ὃ μᾶλλον ἂν ἕλοιτο ὁ φρόνιμος ἢ ὁ ἀγαθὸς ἀνὴρ ἢ ὁ νόμος ὁ ὀρθὸς ἢ οἱ σπουδαῖοι περὶ ἕκαστα αἱρούμενοι ᾗ τοιοῦτοί εἰσιν ἢ οἱ ἐν ἑκάστῳ γένει ἐπιστήμονες, ἢ οἱ πλείους ἢ πάντες, οἷον ἐν ἰατρικῇ ἢ τεκτονικῇ ἃ οἱ πλείους τῶν ἰατρῶν ἢ πάντες, ἢ ὅσα ὅλως οἱ πλείους ἢ πάντες ἢ πάντα, οἷον τἀγαθόν· πάντα γὰρ τἀγαθοῦ ἐφίεται. δεῖ δ’ ἄγειν πρὸς ὅ τι ἂν ᾖ χρήσιμον τὸ ῥηθησόμενον. ἔστι δ’ ἁπλῶς μὲν βέλτιον καὶ αἱρετώτερον τὸ κατὰ τὴν βελτίω ἐπιστήμην, τινὶ δὲ τὸ κατὰ τὴν οἰκείαν.

Ἔπειτα δὲ τὸ ὅπερ τόδε τι τοῦ μὴ ἐν γένει, οἷον ἡ δικαιοσύνη τοῦ δικαίου· τὸ μὲν γὰρ ἐν γένει τῷ ἀγαθῷ, τὸ δ’ οὔ, καὶ τὸ μὲν ὅπερ ἀγαθόν, τὸ δ’ οὔ. οὐδὲν γὰρ λέγεται ὅπερ τὸ γένος ὃ μὴ τυγχάνει ἐν τῷ γένει ὄν· οἷον ὁ λευκὸς ἄνθρωπος οὐκ ἔστιν ὅπερ χρῶμα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Καὶ τὸ δι’ αὑτὸ αἱρετὸν τοῦ δι’ ἕτερον αἱρετοῦ αἱρετώτερον, οἷον τὸ ὑγιαίνειν τοῦ γυμνάζεσθαι· τὸ μὲν γὰρ δι’ αὑτὸ αἱρετόν, τὸ δὲ δι’ ἕτερον. καὶ τὸ καθ’ αὑτὸ τοῦ κατὰ συμβεβηκός, οἷον τὸ τοὺς φίλους δικαίους εἶναι τοῦ τοὺς ἐχθρούς. τὸ μὲν γὰρ καθ’ αὑτὸ αἱρετόν, τὸ δὲ κατὰ συμβεβηκός· τὸ γὰρ τοὺς ἐχθροὺς δικαίους εἶναι κατὰ συμβεβηκὸς αἱρούμεθα, ὅπως μηδὲν ἡμᾶς βλάπτωσιν. ἔστι δὲ τοῦτο ταὐτὸ τῷ πρὸ αὐτοῦ, διαφέρει δὲ τῷ τρόπῳ· τὸ μὲν γὰρ τοὺς φίλους δικαίους εἶναι δι’ αὑτὸ αἱρούμεθα, καὶ εἰ μηδὲν ἡμῖν μέλλει ἔσεσθαι, κἂν ἐν Ἰνδοῖς ὦσιν· τὸ δὲ τοὺς ἐχθροὺς δι’ ἕτερον, ὅπως μηθὲν ἡμᾶς βλάπτωσιν.

[116b] Καὶ τὸ αἴτιον ἀγαθοῦ καθ’ αὑτὸ τοῦ κατὰ συμβεβηκὸς αἰτίου, καθάπερ ἡ ἀρετὴ τῆς τύχης (ἡ μὲν γὰρ καθ’ αὑτήν, ἡ δὲ κατὰ συμβεβηκός, αἰτία τῶν ἀγαθῶν) καὶ εἴ τι ἄλλο τοιοῦτον. ὁμοίως δὲ καὶ ἐπὶ τοῦ ἐναντίου· τὸ γὰρ καθ’ αὑτὸ κακοῦ αἴτιον φευκτότερον τοῦ κατὰ συμβεβηκός, οἷον ἡ κακία καὶ ἡ τύχη· τὸ μὲν γὰρ καθ’ αὑτὸ κακόν, ἡ δὲ τύχη κατὰ συμβεβηκός.

Καὶ τὸ ἁπλῶς ἀγαθὸν τοῦ τινὶ αἱρετώτερον, οἷον τὸ ὑγιάζεσθαι τοῦ τέμνεσθαι· τὸ μὲν γὰρ ἁπλῶς ἀγαθόν, τὸ δὲ τινί, τῷ δεομένῳ τομῆς. καὶ τὸ φύσει τοῦ μὴ φύσει, οἷον ἡ δικαιοσύνη τοῦ δικαίου· τὸ μὲν γὰρ φύσει, τὸ δ’ ἐπίκτητον. καὶ τὸ τῷ βελτίονι καὶ τιμιωτέρῳ ὑπάρχον αἱρετώτερον, οἷον θεῷ ἢ ἀνθρώπῳ, καὶ ψυχῇ ἢ σώματι. καὶ τὸ τοῦ βελτίονος ἴδιον βέλτιον ἢ τὸ τοῦ χείρονος, οἷον τὸ τοῦ θεοῦ ἢ τὸ τοῦ ἀνθρώπου· κατὰ μὲν γὰρ τὰ κοινὰ ἐν ἀμφοτέροις οὐδὲν διαφέρει ἀλλήλων, τοῖς δ’ ἰδίοις τὸ ἕτερον τοῦ ἑτέρου ὑπερέχει. καὶ τὸ ἐν βελτίοσιν ἢ προτέροις ἢ τιμιωτέροις βέλτιον, οἷον ὑγίεια ἰσχύος καὶ κάλλους· ἡ μὲν γὰρ ἐν ὑγροῖς καὶ ξηροῖς καὶ θερμοῖς καὶ ψυχροῖς, ἁπλῶς δ’ εἰπεῖν ἐξ ὧν πρώτων συνέστηκε τὸ ζῷον, τὰ δ’ ἐν τοῖς ὑστέροις. ἡ μὲν γὰρ ἰσχὺς ἐν τοῖς νεύροις καὶ ὀστοῖς, τὸ δὲ κάλλος τῶν μελῶν τις συμμετρία δοκεῖ εἶναι. καὶ τὸ τέλος τῶν πρὸς τὸ τέλος αἱρετώτερον δοκεῖ εἶναι, καὶ δυοῖν τὸ ἔγγιον τοῦ τέλους. καὶ ὅλως τὸ πρὸς τὸ τοῦ βίου τέλος αἱρετώτερον μᾶλλον ἢ τὸ πρὸς ἄλλο τι, οἷον τὸ πρὸς εὐδαιμονίαν συντεῖνον ἢ τὸ πρὸς φρόνησιν. καὶ τὸ δυνατὸν τοῦ ἀδυνάτου. ἔτι δύο ποιητικῶν οὗ τὸ τέλος βέλτιον· ποιητικοῦ δὲ καὶ τέλους ἐκ τοῦ ἀνάλογον, ὅταν πλείονι ὑπερέχῃ τὸ τέλος τοῦ τέλους ἢ ἐκεῖνο τοῦ οἰκείου ποιητικοῦ, οἷον εἰ ἡ εὐδαιμονία πλείονι ὑπερέχει ὑγιείας ἢ ὑγίεια ὑγιεινοῦ, τὸ ποιητικὸν εὐδαιμονίας βέλτιον ὑγιείας. ὅσῳ γὰρ ἡ εὐδαιμονία ὑγιείας ὑπερέχει, τοσούτῳ καὶ τὸ ποιητικὸν τὸ τῆς εὐδαιμονίας τοῦ ὑγιεινοῦ ὑπερέχει· ἡ δὲ ὑγίεια τοῦ ὑγιεινοῦ ἐλάττονι ὑπερεῖχεν· ὥστε πλείονι ὑπερέχει τὸ ποιητικὸν εὐδαιμονίας τοῦ ὑγιεινοῦ ἢ ἡ ὑγίεια τοῦ ὑγιεινοῦ. δῆλον ἄρα ὅτι αἱρετώτερον τὸ ποιητικὸν εὐδαιμονίας τῆς ὑγιείας· τοῦ γὰρ αὐτοῦ πλείονι ὑπερέχει.

Ἔτι τὸ κάλλιον καθ’ αὑτὸ καὶ τιμιώτερον καὶ ἐπαινετώτερον, οἷον φιλία πλούτου καὶ δικαιοσύνη ἰσχύος· τὰ μὲν γὰρ καθ’ αὑτὰ τῶν τιμίων καὶ ἐπαινετῶν, τὰ δ’ [117a] οὐ καθ’ αὑτὰ ἀλλὰ δι’ ἕτερον. οὐδεὶς γὰρ τιμᾷ τὸν πλοῦτον δι’ ἑαυτόν, ἀλλὰ δι’ ἕτερον· τὴν δὲ φιλίαν καθ’ αὑτό, καὶ εἰ μηδὲν μέλλει ἡμῖν ἕτερον ἀπ’ αὐτῆς ἔσεσθαι.

Ἔτι ὅταν δύο τινὰ ᾖ σφόδρα αὐτοῖς παραπλήσια καὶ μὴ δυνώμεθα ὑπεροχὴν μηδεμίαν συνιδεῖν τοῦ ἑτέρου πρὸς τὸ ἕτερον, ὁρᾶν ἀπὸ τῶν παρεπομένων. ᾧ γὰρ ἕπεται μεῖζον ἀγαθόν, τοῦθ’ αἱρετώτερον· ἂν δ’ ᾖ τὰ ἑπόμενα κακά, ᾧ τὸ ἔλαττον ἀκολουθεῖ κακόν, τοῦθ’ αἱρετώτερον· ὄντων γὰρ ἀμφοτέρων αἱρετῶν οὐδὲν κωλύει δυσχερές τι παρέπεσθαι. διχῶς δ’ ἀπὸ τοῦ ἕπεσθαι ἡ σκέψις· καὶ γὰρ πρότερον καὶ ὕστερον ἕπεται, οἷον τῷ μανθάνοντι τὸ μὲν ἀγνοεῖν πρότερον, τὸ δ’ ἐπίστασθαι ὕστερον. βέλτιον δ’ ὡς ἐπὶ πολὺ τὸ ὕστερον ἑπόμενον. λαμβάνειν οὖν τῶν ἑπομένων ὁπότερον ἂν ᾖ χρήσιμον.

Ἔτι τὰ πλείω ἀγαθὰ τῶν ἐλαττόνων, ἢ ἁπλῶς ἢ ὅταν τὰ ἕτερα ἐν τοῖς ἑτέροις ἐνυπάρχῃ, τὰ ἐλάττω ἐν τοῖς πλείοσιν. (ἔνστασις, εἴ που θάτερον θατέρου χάριν· οὐδὲν γὰρ αἱρετώτερα τὰ ἄμφω τοῦ ἑνός, οἷον τὸ ὑγιάζεσθαι καὶ ἡ ὑγίεια τῆς ὑγιείας, ἐπειδὴ τὸ ὑγιάζεσθαι τῆς ὑγιείας ἕνεκεν αἱρούμεθα.) καὶ μὴ ἀγαθὰ δὲ ἀγαθῶν οὐδὲν κωλύει εἶναι αἱρετώτερα, οἷον εὐδαιμονίαν καὶ ἄλλο τι ὃ μὴ ἔστιν ἀγαθὸν δικαιοσύνης καὶ ἀνδρείας. καὶ ταὐτὰ μεθ’ ἡδονῆς μᾶλλον ἢ ἄνευ ἡδονῆς. καὶ ταὐτὰ μετ’ ἀλυπίας ἢ μετὰ λύπης.

Καὶ ἕκαστον ἐν ᾧ καιρῷ μεῖζον δύναται, ἐν τούτῳ καὶ αἱρετώτερον, οἷον τὸ ἀλύπως ἐν τῷ γήρᾳ μᾶλλον ἢ ἐν τῇ νεότητι· μεῖζον γὰρ ἐν τῷ γήρᾳ δύναται. κατὰ ταῦτα δὲ καὶ ἡ φρόνησις ἐν τῷ γήρᾳ αἱρετώτερον· οὐδεὶς γὰρ τοὺς νέους αἱρεῖται ἡγεμόνας, διὰ τὸ μὴ ἀξιοῦν φρονίμους εἶναι. ἡ δ’ ἀνδρεία ἀνάπαλιν· ἐν τῇ νεότητι γὰρ ἀναγκαιοτέρα ἡ κατὰ τὴν ἀνδρείαν ἐνέργεια. ὁμοίως δὲ καὶ ἡ σωφροσύνη· μᾶλλον γὰρ οἱ νέοι τῶν πρεσβυτέρων ὑπὸ τῶν ἐπιθυμιῶν ἐνοχλοῦνται.

Καὶ ὃ ἐν παντὶ καιρῷ ἢ ἐν τοῖς πλείστοις χρησιμώτερον, οἷον δικαιοσύνη καὶ σωφροσύνη ἀνδρείας· αἱ μὲν γὰρ ἀεί, ἡ δὲ ποτὲ χρησίμη. καὶ ὃ πάντων ἐχόντων μηδὲν θατέρου δεόμεθα ἢ ὃ ἐχόντων προσδεόμεθα τοῦ λοιποῦ, καθάπερ ἐπὶ δικαιοσύνης καὶ ἀνδρείας· δικαίων μὲν γὰρ πάντων [117b] ὄντων οὐδὲν χρήσιμος ἡ ἀνδρεία, ἀνδρείων δὲ πάντων ὄντων χρήσιμος ἡ δικαιοσύνη.

Ἔτι ἐκ τῶν φθορῶν καὶ τῶν ἀποβολῶν, καὶ τῶν γενέσεων καὶ τῶν λήψεων, καὶ τῶν ἐναντίων. ὧν γὰρ αἱ φθοραὶ φευκτότεραι, αὐτὰ αἱρετώτερα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἀποβολῶν καὶ τῶν ἐναντίων· εἰ γὰρ ἡ ἀποβολὴ ἢ τὸ ἐναντίον φευκτότερον, αὐτὸ αἱρετώτερον. ἐπὶ δὲ τῶν γενέσεων καὶ τῶν λήψεων ἀνάπαλιν· ὧν γὰρ αἱ λήψεις καὶ αἱ γενέσεις αἱρετώτεραι, καὶ αὐτὰ αἱρετώτερα.

Ἄλλος τόπος, τὸ ἐγγύτερον τἀγαθοῦ βέλτιον καὶ αἱρετώτερον, καὶ τὸ ὁμοιότερον τἀγαθῷ, οἷον ἡ δικαιοσύνη δικαίου. καὶ τὸ τῷ βελτίονι αὑτοῦ ὁμοιότερον, καθάπερ τὸν Αἴαντα τοῦ Ὀδυσσέως φασὶ βελτίω τινὲς εἶναι, διότι ὁμοιότερος τῷ Ἀχιλλεῖ. (ἔνστασις τούτου ὅτι οὐκ ἀληθές· οὐδὲν γὰρ κωλύει μὴ ᾗ βέλτιστος ὁ Ἀχιλλεύς, ταύτῃ ὁμοιότερον εἶναι τὸν Αἴαντα, τοῦ ἑτέρου ὄντος μὲν ἀγαθοῦ μὴ ὁμοίου δέ.) σκοπεῖν δὲ καὶ εἰ ἐπὶ τὰ γελοιότερα εἴη ὅμοιον, καθάπερ ὁ πίθηκος τῷ ἀνθρώπῳ, τοῦ ἵππου μὴ ὄντος ὁμοίου· οὐ γὰρ κάλλιον ὁ πίθηκος, ὁμοιότερον δὲ τῷ ἀνθρώπῳ. πάλιν ἐπὶ δυοῖν, εἰ τὸ μὲν τῷ βελτίονι τὸ δὲ τῷ χείρονι ὁμοιότερον, εἴη ἂν βέλτιον τὸ τῷ βελτίονι ὁμοιότερον. (ἔχει δὲ καὶ τοῦτο ἔνστασιν· οὐδὲν γὰρ κωλύει τὸ μὲν τῷ βελτίονι ἠρέμα ὅμοιον εἶναι, τὸ δὲ τῷ χείρονι σφόδρα, οἷον εἰ ὁ μὲν Αἴας τῷ Ἀχιλλεῖ ἠρέμα, ὁ δ' Ὀδυσσεὺς τῷ Νέστορι σφόδρα. καὶ εἰ τὸ μὲν τῷ βελτίονι ἐπὶ τὰ χείρω ὅμοιον εἴη, τὸ δὲ τῷ χείρονι ἐπὶ τὰ βελτίω, καθάπερ ἵππος ὄνῳ καὶ πίθηκος ἀνθρώπῳ.)

Ἄλλος, τὸ ἐπιφανέστερον τοῦ ἧττον τοιούτου, καὶ τὸ χαλεπώτερον· μᾶλλον γὰρ ἀγαπῶμεν ἔχοντες ἃ μὴ ἔστι ῥᾳδίως λαβεῖν. καὶ τὸ ἰδιαίτερον τοῦ κοινοτέρου. καὶ τὸ τοῖς κακοῖς ἀκοινωνητότερον· αἱρετώτερον γὰρ ᾧ μηδεμία δυσχέρεια ἀκολουθεῖ ἢ ᾧ ἀκολουθεῖ.

Ἔτι εἰ ἁπλῶς τοῦτο τούτου βέλτιον, καὶ τὸ βέλτιστον τῶν ἐν τούτῳ βέλτιον τοῦ ἐν τῷ ἑτέρῳ βελτίστου· οἷον εἰ βέλτιον ἄνθρωπος ἵππου, καὶ ὁ βέλτιστος ἄνθρωπος τοῦ βελτίστου ἵππου βελτίων. καὶ εἰ τὸ βέλτιστον τοῦ βελτίστου βέλτιον, καὶ ἁπλῶς τοῦτο τούτου βέλτιον· οἷον εἰ ὁ βέλτιστος ἄνθρωπος τοῦ βελτίστου ἵππου βελτίων, καὶ ἁπλῶς ἄνθρωπος ἵππου βελτίων.

[118a] Ἔτι ὧν ἔστι τοὺς φίλους μετασχεῖν, αἱρετώτερα ἢ ὧν μή. καὶ ἃ πρὸς τὸν φίλον πρᾶξαι μᾶλλον βουλόμεθα ἢ ἃ πρὸς τὸν τυχόντα, ταῦτα αἱρετώτερα, οἷον τὸ δικαιοπραγεῖν καὶ εὖ ποιεῖν μᾶλλον ἢ τὸ δοκεῖν· τοὺς γὰρ φίλους εὖ ποιεῖν βουλόμεθα μᾶλλον ἢ δοκεῖν, τοὺς δὲ τυχόντας ἀνάπαλιν.

Καὶ τὰ ἐκ περιουσίας τῶν ἀναγκαίων βελτίω, ἐνίοτε δὲ καὶ αἱρετώτερα· βέλτιον γὰρ τοῦ ζῆν τὸ εὖ ζῆν, τὸ δὲ εὖ ζῆν ἐστιν ἐκ περιουσίας, αὐτὸ δὲ τὸ ζῆν ἀναγκαῖον. ἐνίοτε δὲ τὰ βελτίω οὐχὶ καὶ αἱρετώτερα· οὐ γὰρ εἰ βελτίω, ἀναγκαῖον καὶ αἱρετώτερα· τὸ γοῦν φιλοσοφεῖν βέλτιον τοῦ χρηματίζεσθαι, ἀλλ' οὐχ αἱρετώτερον τῷ ἐνδεεῖ τῶν ἀναγκαίων. τὸ δ' ἐκ περιουσίας ἐστὶν ὅταν ὑπαρχόντων τῶν ἀναγκαίων ἄλλα τινὰ προσκατασκευάζηταί τις τῶν καλῶν. σχεδὸν δὲ ἴσως αἱρετώτερόν ἐστι τὸ ἀναγκαῖον, βέλτιον δὲ τὸ ἐκ περιουσίας.

Καὶ ὃ μὴ ἔστι παρ' ἄλλου πορίσασθαι ἢ ὃ ἔστι καὶ παρ' ἄλλου, οἷον πέπονθεν ἡ δικαιοσύνη πρὸς τὴν ἀνδρείαν. καὶ εἰ τόδε μὲν ἄνευ τοῦδε αἱρετόν, τόδε δὲ ἄνευ τοῦδε μή· οἷον δύναμις ἄνευ φρονήσεως οὐχ αἱρετόν, φρόνησις δ' ἄνευ δυνάμεως αἱρετόν. καὶ δυοῖν εἰ θάτερον ἀρνούμεθα, ἵνα τὸ λοιπὸν δόξῃ ἡμῖν ὑπάρχειν, ἐκεῖνο αἱρετώτερον ὃ βουλόμεθα δοκεῖν ὑπάρχειν· οἷον φιλοπονεῖν ἀρνούμεθα, ἵν' εὐφυεῖς εἶναι δόξωμεν.

Ἔτι οὗ τῇ ἀπουσίᾳ ἧττον ἐπιτιμητέον δυσφοροῦσι, τοῦτο αἱρετώτερον. καὶ οὗ τῇ ἀπουσίᾳ μὴ δυσφοροῦσι μᾶλλον ἐπιτιμητέον, τοῦτο αἱρετώτερον.

Ἔτι τῶν ὑπὸ τὸ εἶδος τὸ ἔχον τὴν οἰκείαν ἀρετὴν τοῦ μὴ ἔχοντος· ἄμφω δ’ ἐχόντων τὸ μᾶλλον ἔχον.

Ἔτι εἰ τὸ μὲν ποιεῖ ἀγαθὸν ἐκεῖνο ᾧ ἂν παρῇ, τὸ δὲ μὴ ποιεῖ, τὸ ποιοῦν αἱρετώτερον, καθάπερ καὶ θερμότερον τὸ θερμαῖνον τοῦ μή. εἰ δ’ ἄμφω ποιεῖ, τὸ μᾶλλον ποιοῦν· ἢ εἰ τὸ βέλτιον καὶ κυριώτερον ποιεῖ ἀγαθόν, οἷον εἰ τὸ μὲν τὴν ψυχὴν τὸ δὲ τὸ σῶμα.

Ἔτι ἀπὸ τῶν πτώσεων καὶ τῶν χρήσεων καὶ τῶν πράξεων καὶ τῶν ἔργων. καὶ ταῦτα δὲ ἀπ’ ἐκείνων· ἀκολουθεῖ γὰρ ἀλλήλοις. οἷον εἰ τὸ δικαίως αἱρετώτερον τοῦ ἀνδρείως, καὶ ἡ δικαιοσύνη τῆς ἀνδρείας αἱρετώτερον· καὶ εἰ ἡ δικαιοσύνη τῆς ἀνδρείας αἱρετώτερον, καὶ τὸ δικαίως τοῦ ἀνδρείως. παραπλησίως δὲ καὶ ἐπὶ τῶν ἄλλων.

[118b] Ἔτι εἴ τινος τοῦ αὐτοῦ τὸ μὲν μεῖζον ἀγαθόν ἐστι τὸ δὲ ἔλαττον, αἱρετώτερον τὸ μεῖζον. ἢ εἰ μείζονος μεῖζον θάτερον. ἀλλὰ καὶ εἰ δύο τινὰ ἑνός τινος εἴη αἱρετώτερα, τὸ μᾶλλον αἱρετώτερον τοῦ ἧττον αἱρετωτέρου αἱρετώτερον. ἔτι οὗ ἡ ὑπερβολὴ τῆς ὑπερβολῆς αἱρετωτέρα, καὶ αὐτὸ αἱρετώτερον· οἷον φιλία χρημάτων· αἱρετωτέρα γὰρ ἡ τῆς φιλίας ὑπερβολὴ τῆς τῶν χρημάτων. καὶ οὗ μᾶλλον ἂν ἕλοιτο αὐτὸς αὑτῷ αἴτιος εἶναι ἢ οὗ ἕτερον, οἷον τοὺς φίλους τῶν χρημάτων.

Ἔτι ἐκ τῆς προσθέσεως, εἰ τῷ αὐτῷ προστιθέμενόν τι τὸ ὅλον αἱρετώτερον ποιεῖ. εὐλαβεῖσθαι δὲ δεῖ προτείνειν ἐφ’ ὧν τῷ μὲν ἑτέρῳ τῶν προστιθεμένων χρῆται τὸ κοινὸν ἢ ἄλλως πως συνεργόν ἐστι, τῷ δὲ λοιπῷ μὴ χρῆται μηδὲ συνεργόν ἐστιν, οἷον πρίονα καὶ δρέπανον μετὰ τεκτονικῆς· αἱρετώτερον γὰρ ὁ πρίων συνδυαζομένοιν, ἁπλῶς δὲ οὐχ αἱρετώτερον. πάλιν εἰ ἐλάττονι προστεθέν τι τὸ ὅλον μεῖζον ποιεῖ. ὁμοίως δὲ καὶ ἐκ τῆς ἀφαιρέσεως· οὗ γὰρ ἀφαιρεθέντος ἀπὸ τοῦ αὐτοῦ τὸ λειπόμενον ἔλαττον, ἐκεῖνο μεῖζον ἂν εἴη, ὅ ποτε ἀφαιρεθὲν τὸ λειπόμενον ἔλαττον ποιεῖ.

Καὶ εἰ τὸ μὲν δι’ αὑτὸ τὸ δὲ διὰ τὴν δόξαν αἱρετόν, οἷον ὑγίεια κάλλους. ὅρος δὲ τοῦ πρὸς δόξαν τὸ μηδενὸς συνειδότος μὴ ἂν σπουδάσαι ὑπάρχειν. καὶ εἰ τὸ μὲν δι’ αὑτὸ καὶ διὰ τὴν δόξαν αἱρετόν, τὸ δὲ διὰ θάτερον μόνον. καὶ ὁπότερον μᾶλλον δι’ αὑτὸ τίμιον, τοῦτο καὶ βέλτιον καὶ αἱρετώτερον. τιμιώτερον δ’ ἂν εἴη καθ’ αὑτὸ ὃ μηδενὸς ἄλλου μέλλοντος ὑπάρξειν δι’ αὑτὸ αἱρούμεθα μᾶλλον.

Ἔτι διελέσθαι ποσαχῶς τὸ αἱρετὸν λέγεται καὶ τίνων χάριν, οἷον τοῦ συμφέροντος ἢ τοῦ καλοῦ ἢ τοῦ ἡδέος· τὸ γὰρ πρὸς ἅπαντα ἢ πρὸς τὰ πλείω χρήσιμον αἱρετώτερον ἂν ὑπάρχοι τοῦ μὴ ὁμοίως. τῶν δ’ αὐτῶν ἀμφοτέροις ὑπαρχόντων, ὁποτέρῳ μᾶλλον ὑπάρχει σκεπτέον, οἷον πότερον ἥδιον ἢ κάλλιον ἢ συμφορώτερον. πάλιν τὸ τοῦ βελτίονος ἕνεκεν αἱρετώτερον, οἷον τὸ ἀρετῆς ἕνεκεν ἢ ἡδονῆς. ὁμοίως δὲ καὶ ἐπὶ τῶν φευκτῶν· φευκτότερον γὰρ τὸ μᾶλλον ἐμποδιστικὸν τῶν αἱρετῶν, οἷον νόσος αἴσχους· καὶ γὰρ ἡδονῆς καὶ τοῦ σπουδαῖον εἶναι κωλυτικώτερον ἡ νόσος.

Ἔτι ἐκ τοῦ ὁμοίως δεικνύναι φευκτὸν καὶ αἱρετὸν τὸ προκείμενον· ἧττον γὰρ αἱρετὸν τὸ τοιοῦτον ὃ καὶ ἕλοιτ’ ἄν τις ὁμοίως καὶ φύγοι, τοῦ ἑτέρου ὄντος αἱρετοῦ μόνον.

[119a] Τὰς μὲν οὖν πρὸς ἄλληλα συγκρίσεις καθάπερ εἴρηται ποιητέον. οἱ αὐτοὶ δὲ τόποι χρήσιμοι καὶ πρὸς τὸ δεικνύναι ὁτιοῦν αἱρετὸν ἢ φευκτόν· ἀφαιρεῖν γὰρ μόνον δεῖ τὴν πρὸς ἕτερον ὑπεροχήν. εἰ γὰρ τὸ τιμιώτερον αἱρετώτερον, καὶ τὸ τίμιον αἱρετόν, καὶ εἰ τὸ χρησιμώτερον αἱρετώτερον, καὶ τὸ χρήσιμον αἱρετόν. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, ὅσα τοιαύτην ἔχει τὴν σύγκρισιν. ἐπ’ ἐνίων γὰρ εὐθέως κατὰ τὴν πρὸς ἕτερον σύγκρισιν καὶ ὅτι αἱρετὸν ἑκάτερον ἢ τὸ ἕτερον λέγομεν, οἷον ὅταν τὸ μὲν φύσει ἀγαθὸν τὸ δὲ μὴ φύσει λέγωμεν· τὸ γὰρ φύσει ἀγαθὸν δῆλον ὅτι αἱρετόν ἐστιν.

Ληπτέον δ’ ὅτι μάλιστα καθόλου τοὺς τόπους περὶ τοῦ μᾶλλον καὶ τοῦ μείζονος· ληφθέντες γὰρ οὕτως πρὸς πλείω χρήσιμοι ἂν εἴησαν. ἔστι δ’ αὐτῶν τῶν εἰρημένων ἐνίους καθόλου μᾶλλον ποιεῖν μικρὸν παραλλάσσοντα τῇ προσηγορίᾳ, οἷον τὸ φύσει τοιοῦτο τοῦ μὴ φύσει τοιούτου μᾶλλον τοιοῦτο. καὶ εἰ τὸ μὲν ποιεῖ τὸ δὲ μὴ ποιεῖ τὸ ἔχον τοιόνδε ᾧ ἂν ὑπάρχῃ, μᾶλλον τοιοῦτο ὅ ποτε ποιεῖ ἢ ὃ μὴ ποιεῖ, εἰ δ’ ἄμφω ποιεῖ, τὸ μᾶλλον ποιοῦν τοιοῦτο.

Ἔτι εἰ τοῦ αὐτοῦ τινος τὸ μὲν μᾶλλον τὸ δὲ ἧττον τοιοῦτο· καὶ εἰ τὸ μὲν τοιούτου μᾶλλον τοιοῦτο, τὸ δὲ μὴ τοιούτου, δῆλον ὅτι τὸ πρῶτον μᾶλλον τοιοῦτο. ἔτι ἐκ τῆς προσθέσεως, εἰ τῷ αὐτῷ προστιθέμενον τὸ ὅλον μᾶλλον ποιεῖ τοιοῦτο, ἢ εἰ τῷ ἧττον τοιούτῳ προστιθέμενον τὸ ὅλον μᾶλλον ποιεῖ τοιοῦτο. ὁμοίως δὲ καὶ ἐκ τῆς ἀφαιρέσεως· οὗ γὰρ ἀφαιρεθέντος τὸ λειπόμενον ἧττον τοιοῦτο, αὐτὸ μᾶλλον τοιοῦτο. καὶ τὰ τοῖς ἐναντίοις ἀμιγέστερα μᾶλλον τοιαῦτα, οἷον λευκότερον τὸ τῷ μέλανι ἀμιγέστερον. ἔτι παρὰ τὰ εἰρημένα πρότερον τὸ μᾶλλον ἐπιδεχόμενον τὸν οἰκεῖον τοῦ προκειμένου λόγον· οἷον εἰ τοῦ λευκοῦ ἐστι λόγος χρῶμα διακριτικὸν ὄψεως, λευκότερον ὅ ἐστι μᾶλλον χρῶμα διακριτικὸν ὄψεως.

Ἂν δ’ ἐπὶ μέρους καὶ μὴ καθόλου τὸ πρόβλημα τεθῇ, πρῶτον μὲν οἱ εἰρημένοι καθόλου κατασκευαστικοὶ ἢ ἀνασκευαστικοὶ τόποι πάντες χρήσιμοι. καθόλου γὰρ ἀναιροῦντες ἢ κατασκευάζοντες καὶ ἐπὶ μέρους δείκνυμεν· εἰ γὰρ παντὶ ὑπάρχει, καὶ τινί, καὶ εἰ μηδενί, οὐδὲ τινί. μάλιστα δ’ ἐπίκαιροι καὶ κοινοὶ τῶν τόπων οἵ τ’ ἐκ τῶν ἀντικειμένων καὶ τῶν συστοίχων καὶ τῶν πτώσεων. ὁμοίως γὰρ ἔνδοξον τὸ ἀξιῶσαι, εἰ πᾶσα ἡδονὴ ἀγαθόν, καὶ λύπην πᾶσαν εἶναι κακόν, [119b] τῷ εἴ τις ἡδονὴ ἀγαθόν, καὶ λύπην εἶναί τινα κακόν. ἔτι εἴ τις αἴσθησις μὴ ἔστι δύναμις, καὶ ἀναισθησία τις οὐκ ἔστιν ἀδυναμία. καὶ εἴ τι ὑποληπτὸν ἐπιστητόν, καὶ ὑπόληψίς τις ἐπιστήμη. πάλιν εἴ τι τῶν ἀδίκων ἀγαθόν, καὶ τῶν δικαίων τι κακόν· πάλιν εἴ τι τῶν δικαίως κακόν, καὶ τῶν ἀδίκως τι ἀγαθόν. καὶ εἴ τι τῶν ἡδέων φευκτόν, ἡδονή τις φευκτόν. κατὰ ταὐτὰ δὲ καὶ εἴ τι τῶν ἡδέων ὠφέλιμον, ἡδονή τις ὠφέλιμον. καὶ ἐπὶ τῶν φθαρτικῶν δὲ καὶ τῶν γενέσεων καὶ φθορῶν ὡσαύτως. εἰ γάρ τι φθαρτικὸν ἡδονῆς ἢ ἐπιστήμης ὂν ἀγαθόν ἐστιν, εἴη ἄν τις ἡδονὴ ἢ ἐπιστήμη τῶν κακῶν. ὁμοίως δὲ καὶ εἰ φθορά τις ἐπιστήμης τῶν ἀγαθῶν ἢ γένεσις τῶν κακῶν, ἔσται τις ἐπιστήμη τῶν κακῶν· οἷον εἰ τὸ ἐπιλανθάνεσθαι ἅ τις αἰσχρὰ ἔπραξε τῶν ἀγαθῶν, ἢ τὸ ἀναμιμνήσκεσθαι τῶν κακῶν, εἴη ἂν τὸ ἐπίστασθαι ἅ τις αἰσχρὰ ἔπραξε τῶν κακῶν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων· ἐν ἅπασι γὰρ ὁμοίως τὸ ἔνδοξον.

Ἔτι ἐκ τοῦ μᾶλλον καὶ ἧττον καὶ ὁμοίως. εἰ γὰρ μᾶλλον μὲν τῶν ἐξ ἄλλου γένους τι τοιοῦτο, ἐκείνων δὲ μηδέν ἐστιν, οὐδ’ ἂν τὸ εἰρημένον εἴη τοιοῦτον· οἷον εἰ μᾶλλον μὲν ἐπιστήμη τις ἀγαθὸν ἢ ἡδονή, μηδεμία δ’ ἐπιστήμη ἀγαθόν, οὐδ’ ἂν ἡδονὴ εἴη. καὶ ἐκ τοῦ ὁμοίως δὲ καὶ ἧττον ὡσαύτως· ἔσται γὰρ καὶ ἀναιρεῖν καὶ κατασκευάζειν, πλὴν ἐκ μὲν τοῦ ὁμοίως ἀμφότερα, ἐκ δὲ τοῦ ἧττον κατασκευάζειν μόνον, ἀνασκευάζειν δὲ οὔ. εἰ γὰρ ὁμοίως δύναμίς τις ἀγαθὸν καὶ ἐπιστήμη, ἔστι δέ τις δύναμις ἀγαθόν, καὶ ἐπιστήμη ἐστίν· εἰ δὲ μηδεμία δύναμις, οὐδ’ ἐπιστήμη. εἰ δ’ ἧττον δύναμίς τις ἀγαθὸν ἢ ἐπιστήμη, ἔστι δέ τις δύναμις ἀγαθόν, καὶ ἐπιστήμη. εἰ δὲ μηδεμία δύναμις ἀγαθόν, οὐκ ἀνάγκη καὶ ἐπιστήμην μηδεμίαν εἶναι ἀγαθόν. δῆλον οὖν ὅτι κατασκευάζειν μόνον ἐκ τοῦ ἧττον ἔστιν.

Οὐ μόνον δ’ ἐξ ἄλλου γένους ἔστιν ἀνασκευάζειν, ἀλλὰ καὶ ἐκ τοῦ αὐτοῦ, λαμβάνοντα τὸ μάλιστα τοιοῦτον· οἷον εἰ κεῖται ἐπιστήμη τις ἀγαθόν, δειχθείη δ’ ὅτι φρόνησις οὐκ ἀγαθόν, οὐδ’ ἄλλη οὐδεμία ἔσται, ἐπεὶ οὐδ’ ἡ μάλιστα δοκοῦσα. ἔτι ἐξ ὑποθέσεως, ὁμοίως ἀξιώσαντα, εἰ ἑνί, καὶ πᾶσιν ὑπάρχειν ἢ μὴ ὑπάρχειν, οἷον εἰ ἡ τοῦ ἀνθρώπου ψυχὴ ἀθάνατος, καὶ τὰς ἄλλας, εἰ δ’ αὕτη μή, μηδὲ τὰς ἄλλας. εἰ μὲν οὖν ὑπάρχειν τινὶ κεῖται, δεικτέον ὅτι οὐχ ὑπάρχει τινί· ἀκολουθήσει γὰρ διὰ τὴν ὑπόθεσιν τὸ μηδενὶ ὑπάρχειν. εἰ δὲ [120a] τινὶ μὴ ὑπάρχειν κεῖται, δεικτέον ὅτι ὑπάρχει τινί· καὶ γὰρ οὕτως ἀκολουθήσει τὸ πᾶσιν ὑπάρχειν. δῆλον δ’ ἐστὶν ὅτι ὁ ὑποτιθέμενος ποιεῖ τὸ πρόβλημα καθόλου, ἐπὶ μέρους τεθέντος· τὸν γὰρ ἐπὶ μέρους ὁμολογοῦντα καθόλου ἀξιοῖ ὁμολογεῖν, ἐπειδή, εἰ ἑνί, καὶ πᾶσιν ὁμοίως ἀξιοῖ ὑπάρχειν.

Ἀδιορίστου μὲν οὖν ὄντος τοῦ προβλήματος μοναχῶς ἀνασκευάζειν ἐνδέχεται, οἷον εἰ ἔφησεν ἡδονὴν ἀγαθὸν εἶναι ἢ μὴ ἀγαθὸν καὶ μηδὲν ἄλλο προσδιώρισεν. εἰ μὲν γὰρ τινὰ ἔφησεν ἡδονὴν ἀγαθὸν εἶναι, δεικτέον καθόλου ὅτι οὐδεμία, εἰ μέλλει ἀναιρεῖσθαι τὸ προκείμενον· ὁμοίως δὲ καὶ εἰ τινὰ ἔφησεν ἡδονὴν μὴ εἶναι ἀγαθόν, δεικτέον καθόλου ὅτι πᾶσα. ἄλλως δ' οὐκ ἐνδέχεται ἀναιρεῖν· ἐὰν γὰρ δείξωμεν ὅτι ἐστὶ τὶς ἡδονὴ οὐκ ἀγαθὸν ἢ ἀγαθόν, οὔπω ἀναιρεῖται τὸ προκείμενον. δῆλον οὖν ὅτι ἀναιρεῖν μὲν μοναχῶς ἐνδέχεται, κατασκευάζειν δὲ διχῶς· ἄν τε γὰρ καθόλου δείξωμεν ὅτι πᾶσα ἡδονὴ ἀγαθόν, ἄν τε ὅτι ἐστὶ τὶς ἡδονὴ ἀγαθόν, δεδειγμένον ἔσται τὸ προκείμενον. ὁμοίως δὲ κἂν δέῃ διαλεχθῆναι ὅτι ἐστὶ τὶς ἡδονὴ οὐκ ἀγαθόν, ἐὰν δείξωμεν ὅτι οὐδεμία ἀγαθὸν ἢ ὅτι τὶς οὐκ ἀγαθόν, διειλεγμένοι ἐσόμεθα ἀμφοτέρως, καὶ καθόλου καὶ ἐπὶ μέρους, ὅτι ἐστὶ τὶς ἡδονὴ οὐκ ἀγαθόν. διωρισμένης δὲ τῆς θέσεως οὔσης, διχῶς ἀναιρεῖν ἔσται, οἷον εἰ τεθείη τινὶ μὲν ὑπάρχειν ἡδονῇ ἀγαθῷ εἶναι, τινὶ δ' οὐχ ὑπάρχειν· εἴτε γὰρ πᾶσα δειχθείη ἡδονὴ ἀγαθὸν εἴτε μηδεμία, ἀνῃρημένον ἔσται τὸ προκείμενον. εἰ δὲ μίαν ἡδονὴν μόνην ἀγαθὸν ἔθηκεν εἶναι, τριχῶς ἐνδέχεται ἀναιρεῖν· δείξαντες γὰρ ὅτι πᾶσα ἢ ὅτι οὐδεμία ἢ ὅτι πλείους μιᾶς ἀγαθόν, ἀνῃρηκότες ἐσόμεθα τὸ προκείμενον. ἐπὶ πλεῖον δὲ τῆς θέσεως διορισθείσης, οἷον ὅτι ἡ φρόνησις μόνη τῶν ἀρετῶν ἐπιστήμη, τετραχῶς ἔστιν ἀναιρεῖν· δειχθέντος γὰρ ὅτι πᾶσα ἀρετὴ ἐπιστήμη ἢ ὅτι οὐδεμία ἢ ὅτι καὶ ἄλλη τις, οἷον ἡ δικαιοσύνη, ἢ ὅτι αὐτὴ ἡ φρόνησις οὐκ ἐπιστήμη, ἀνῃρημένον ἔσται τὸ προκείμενον.

Χρήσιμον δὲ καὶ τὸ ἐπιβλέπειν ἐπὶ τὰ καθ' ἕκαστα, ἐν οἷς ὑπάρχειν τι ἢ μὴ εἴρηται, καθάπερ ἐν τοῖς καθόλου προβλήμασιν. ἔτι δ' ἐν τοῖς γένεσιν ἐπιβλεπτέον διαιροῦντα κατ' εἴδη μέχρι τῶν ἀτόμων, καθάπερ εἴρηται πρότερον· ἄν τε γὰρ παντὶ φαίνηται ὑπάρχον ἄν τε μηδενί, πολλὰ προενέγκαντι ἀξιωτέον καθόλου ὁμολογεῖν ἢ φέρειν ἔνστασιν ἐπὶ τίνος οὐχ οὕτως. ἔτι ἐφ' ὧν ἔστιν ἢ εἴδει ἢ ἀριθμῷ διορίσαι τὸ συμβεβηκός, σκεπτέον εἰ μηδὲν τούτων ὑπάρχει, οἷον ὅτι ὁ χρόνος [120b] οὐ κινεῖται οὐδ' ἐστὶ κίνησις, καταριθμησάμενον πόσα εἴδη κινήσεως· εἰ γὰρ μηδὲν τούτων ὑπάρχει τῷ χρόνῳ, δῆλον ὅτι οὐ κινεῖται οὐδ' ἐστὶ κίνησις. ὁμοίως δὲ καὶ ὅτι ἡ ψυχὴ οὐκ ἀριθμός, διελόμενον ὅτι πᾶς ἀριθμὸς ἢ περιττὸς ἢ ἄρτιος· εἰ γὰρ ἡ ψυχὴ μήτε περιττὸν μήτε ἄρτιον, δῆλον ὅτι οὐκ ἀριθμός.

Πρὸς μὲν οὖν τὸ συμβεβηκὸς διὰ τῶν τοιούτων καὶ οὕτως ἐπιχειρητέον.

Δ

Μετὰ δὲ ταῦτα περὶ τῶν πρὸς τὸ γένος καὶ τὸ ἴδιον ἐπισκεπτέον. ἔστι δὲ ταῦτα στοιχεῖα τῶν πρὸς τοὺς ὅρους· περὶ αὐτῶν δὲ τούτων ὀλιγάκις αἱ σκέψεις γίνονται τοῖς διαλεγομένοις. ἂν δὴ τεθῇ γένος τινὸς τῶν ὄντων, πρῶτον μὲν ἐπιβλέπειν ἐπὶ πάντα τὰ συγγενῆ τῷ λεχθέντι, εἴ τινος μὴ κατηγορεῖται, καθάπερ ἐπὶ τοῦ συμβεβηκότος, οἷον, εἰ τῆς ἡδονῆς τἀγαθὸν γένος κεῖται, εἴ τις ἡδονὴ μὴ ἀγαθόν· εἰ γὰρ τοῦτο, δῆλον ὅτι οὐ γένος τἀγαθὸν τῆς ἡδονῆς· τὸ γὰρ γένος κατὰ πάντων τῶν ὑπὸ τὸ αὐτὸ εἶδος κατηγορεῖται. εἶτα εἰ μὴ ἐν τῷ τί ἐστι κατηγορεῖται ἀλλ’ ὡς συμβεβηκός, καθάπερ τὸ λευκὸν τῆς χιόνος, ἢ ψυχῆς τὸ κινούμενον ὑφ’ αὑτοῦ· οὔτε γὰρ ἡ χιὼν ὅπερ λευκόν, διόπερ οὐ γένος τὸ λευκὸν τῆς χιόνος, οὔθ’ ἡ ψυχὴ ὅπερ κινούμενον, συμβέβηκε δ’ αὐτῇ κινεῖσθαι, καθάπερ καὶ τῷ ζῴῳ πολλάκις βαδίζειν τε καὶ βαδίζοντι εἶναι. ἔτι τὸ κινούμενον οὐ τί ἐστιν ἀλλά τι ποιοῦν ἢ πάσχον σημαίνειν ἔοικεν. ὁμοίως δὲ καὶ τὸ λευκόν· οὐ γὰρ τί ἐστιν ἡ χιών, ἀλλὰ ποῖόν τι, δηλοῖ. ὥστ’ οὐδέτερον αὐτῶν ἐν τῷ τί ἐστι κατηγορεῖται, τὸ δὲ γένος ἐν τῷ τί ἐστι κατηγορεῖται.

Μάλιστα δ’ ἐπὶ τὸν τοῦ συμβεβηκότος ὁρισμὸν ἐπιβλέπειν, εἰ ἐφαρμόττει ἐπὶ τὸ ῥηθὲν γένος, οἷον καὶ τὰ νῦν εἰρημένα· ἐνδέχεται γὰρ κινεῖν τι αὐτὸ ἑαυτὸ καὶ μή, ὁμοίως δὲ καὶ λευκὸν εἶναι καὶ μή, ὥστ’ οὐδέτερον αὐτῶν γένος ἀλλὰ συμβεβηκός, ἐπειδὴ συμβεβηκὸς ἐλέγομεν ὃ ἐνδέχεται ὑπάρχειν τινὶ καὶ μή.

Ἔτι εἰ μὴ ἐν τῇ αὐτῇ διαιρέσει τὸ γένος καὶ τὸ εἶδος, ἀλλὰ τὸ μὲν οὐσία τὸ δὲ ποιόν, ἢ τὸ μὲν πρός τι τὸ δὲ ποιόν· οἷον ἡ μὲν χιὼν καὶ ὁ κύκνος οὐσία, τὸ δὲ λευκὸν οὐκ οὐσία ἀλλὰ ποιόν, ὥστ’ οὐ γένος τὸ λευκὸν τῆς χιόνος οὐδὲ τοῦ κύκνου.

[121a] πάλιν ἡ μὲν ἐπιστήμη τῶν πρός τι, τὸ δ’ ἀγαθὸν καὶ τὸ καλὸν ποιόν, ὥστ’ οὐ γένος τὸ ἀγαθὸν ἢ τὸ καλὸν τῆς ἐπιστήμης· τὰ γὰρ τῶν πρός τι γένη καὶ αὐτὰ τῶν πρός τι δεῖ εἶναι, καθάπερ ἐπὶ τοῦ διπλασίου· καὶ γὰρ τὸ πολλαπλάσιον, γένος ὂν τοῦ διπλασίου, καὶ αὐτὸ τῶν πρὸς τί ἐστιν. καθόλου δ’ εἰπεῖν ὑπὸ τὴν αὐτὴν διαίρεσιν δεῖ τὸ γένος τῷ εἴδει εἶναι· εἰ γὰρ τὸ εἶδος οὐσία, καὶ τὸ γένος, καὶ εἰ ποιόν τι τὸ εἶδος, καὶ τὸ γένος ποιόν τι· οἷον εἰ τὸ λευκὸν ποιόν τι, καὶ τὸ χρῶμα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Πάλιν εἰ ἀνάγκη ἢ ἐνδέχεται τοῦ τεθέντος ἐν τῷ γένει μετέχειν τὸ γένος. ὅρος δὲ τοῦ μετέχειν τὸ ἐπιδέχεσθαι τὸν τοῦ μετεχομένου λόγον. δῆλον οὖν ὅτι τὰ μὲν εἴδη μετέχει τῶν γενῶν, τὰ δὲ γένη τῶν εἰδῶν οὔ· τὸ μὲν γὰρ εἶδος ἐπιδέχεται τὸν τοῦ γένους λόγον, τὸ δὲ γένος τὸν τοῦ εἴδους οὔ. σκεπτέον οὖν εἰ μετέχει ἢ ἐνδέχεται μετέχειν τοῦ εἴδους τὸ ἀποδοθὲν γένος, οἷον εἴ τις τοῦ ὄντος ἢ τοῦ ἑνὸς γένος τι ἀποδοίη· συμβήσεται γὰρ μετέχειν τὸ γένος τοῦ εἴδους· κατὰ πάντων γὰρ τῶν ὄντων τὸ ὂν καὶ τὸ ἓν κατηγορεῖται, ὥστε καὶ ὁ λόγος αὐτῶν.

Ἔτι εἰ κατά τινος τὸ ἀποδοθὲν εἶδος ἀληθεύεται, τὸ δὲ γένος μή, οἷον εἰ τὸ ὂν ἢ τὸ ἐπιστητὸν τοῦ δοξαστοῦ γένος τεθείη. κατὰ γὰρ τοῦ μὴ ὄντος τὸ δοξαστὸν κατηγορηθήσεται (πολλὰ γὰρ τῶν μὴ ὄντων δοξαστά), ὅτι δὲ τὸ ὂν ἢ τὸ ἐπιστητὸν οὐ κατηγορεῖται κατὰ τοῦ μὴ ὄντος, δῆλον. ὥστ’ οὐ γένος τὸ ὂν οὐδὲ τὸ ἐπιστητὸν τοῦ δοξαστοῦ· καθ’ ὧν γὰρ τὸ εἶδος κατηγορεῖται, καὶ τὸ γένος δεῖ κατηγορεῖσθαι.

Πάλιν εἰ μηδενὸς τῶν εἰδῶν ἐνδέχεται μετέχειν τὸ τεθὲν ἐν τῷ γένει· ἀδύνατον γὰρ τοῦ γένους μετέχειν μηδενὸς τῶν εἰδῶν μετέχον, ἂν μή τι τῶν κατὰ τὴν πρώτην διαίρεσιν εἰδῶν ᾖ· ταῦτα δὲ τοῦ γένους μόνον μετέχει. ἂν οὖν ἡ κίνησις γένος τῆς ἡδονῆς τεθῇ, σκεπτέον εἰ μήτε φορὰ μήτ’ ἀλλοίωσις ἡ ἡδονὴ μήτε τῶν λοιπῶν τῶν ἀποδοθεισῶν κινήσεων μηδεμία. δῆλον γὰρ ὅτι οὐδενὸς ἂν τῶν εἰδῶν μετέχοι· ὥστ’ οὐδὲ τοῦ γένους, ἐπειδὴ ἀναγκαῖόν ἐστι τὸ τοῦ γένους μετέχον καὶ τῶν εἰδῶν τινος μετέχειν. ὥστ’ οὐκ ἂν εἴη εἶδος ἡ ἡδονὴ τῆς κινήσεως, οὐδὲ τῶν ἀτόμων οὐδὲν τῶν ὑπό τι εἶδος τῆς κινήσεως ὄντων· καὶ γὰρ τὰ ἄτομα μετέχει τοῦ γένους καὶ τοῦ εἴδους, οἷον ὁ τὶς ἄνθρωπος καὶ ἀνθρώπου μετέχει καὶ ζῴου.

[121b] Ἔτι εἰ ἐπὶ πλέον λέγεται τοῦ γένους τὸ ἐν τῷ γένει τεθέν, οἷον τὸ δοξαστὸν τοῦ ὄντος· καὶ γὰρ τὸ ὂν καὶ τὸ μὴ ὂν δοξαστόν, ὥστ’ οὐκ ἂν εἴη τὸ δοξαστὸν εἶδος τοῦ ὄντος· ἐπὶ πλέον γὰρ ἀεὶ τὸ γένος τοῦ εἴδους λέγεται. πάλιν εἰ ἐπ’ ἴσων τὸ εἶδος καὶ τὸ γένος λέγεται, οἷον εἰ τῶν πᾶσιν ἑπομένων τὸ μὲν εἶδος τὸ δὲ γένος τεθείη, καθάπερ τὸ ὂν καὶ τὸ ἕν· παντὶ γὰρ τὸ ὂν καὶ τὸ ἕν· ὥστ’ οὐδέτερον οὐδετέρου γένος, ἐπειδὴ ἐπ’ ἴσων λέγεται. ὁμοίως δὲ καὶ εἰ τὸ πρῶτον καὶ ἡ ἀρχὴ εἰς ἄλληλα τεθείη· ἥ τε γὰρ ἀρχὴ πρῶτον καὶ τὸ πρῶτον ἀρχή, ὥστ’ ἢ ἀμφότερα τὰ εἰρημένα ταὐτόν ἐστιν ἢ οὐδέτερον οὐδετέρου γένος. στοιχεῖον δὲ πρὸς ἅπαντα τὰ τοιαῦτα τὸ ἐπὶ πλέον τὸ γένος ἢ τὸ εἶδος καὶ τὴν διαφορὰν λέγεσθαι· ἐπ’ ἔλαττον γὰρ καὶ ἡ διαφορὰ τοῦ γένους λέγεται.

Ὁρᾶν δὲ καὶ εἴ τινος τῶν ἀδιαφόρων εἴδει μὴ ἔστι τὸ εἰρημένον γένος ἢ μὴ δόξαι ἄν, κατασκευάζοντι δέ, εἰ ἔστι τινός. ταὐτὸν γὰρ πάντων τῶν ἀδιαφόρων εἴδει γένος· ἂν οὖν ἑνὸς δειχθῇ, δῆλον ὅτι πάντων, κἂν ἑνὸς μή, δῆλον ὅτι οὐδενός. οἷον εἴ τις ἀτόμους τιθέμενος γραμμὰς τὸ ἀδιαίρετον γένος αὐτῶν φήσειεν εἶναι· τῶν γὰρ διαίρεσιν ἐχουσῶν γραμμῶν οὐκ ἔστι τὸ εἰρημένον γένος, ἀδιαφόρων οὐσῶν κατὰ τὸ εἶδος· ἀδιάφοροι γὰρ ἀλλήλαις κατὰ τὸ εἶδος αἱ εὐθεῖαι γραμμαὶ πᾶσαι.

Σκοπεῖν δὲ καὶ εἴ τι ἄλλο γένος ἐστὶ τοῦ ἀποδοθέντος εἴδους, ὃ μήτε περιέχει τὸ ἀποδοθὲν γένος μήθ' ὑπ' ἐκεῖνό ἐστιν. οἷον εἴ τις τῆς δικαιοσύνης τὴν ἐπιστήμην θείη γένος· ἔστι γὰρ καὶ ἡ ἀρετὴ γένος, καὶ οὐδέτερον τῶν γενῶν τὸ λοιπὸν περιέχει. ὥστ' οὐκ ἂν εἴη ἡ ἐπιστήμη γένος τῆς δικαιοσύνης· δοκεῖ γάρ, ὅταν ἓν εἶδος ὑπὸ δύο γένη ᾖ, τὸ ἕτερον ὑπὸ τοῦ ἑτέρου περιέχεσθαι. ἔχει δ' ἀπορίαν ἐπ' ἐνίων τὸ τοιοῦτο· δοκεῖ γὰρ ἐνίοις ἡ φρόνησις ἀρετή τε καὶ ἐπιστήμη εἶναι καὶ οὐδέτερον τῶν γενῶν ὑπ' οὐδετέρου περιέχεσθαι. οὐ μὴν ὑπὸ πάντων γε συγχωρεῖται τὴν φρόνησιν ἐπιστήμην εἶναι. εἰ δ' οὖν τις συγχωροίη τὸ λεγόμενον ἀληθὲς εἶναι, ἀλλὰ τό γε ὑπ' ἄλληλα ἢ ὑπὸ ταὐτὸ ἄμφω γίγνεσθαι τὰ τοῦ αὐτοῦ γένη τῶν ἀναγκαίων δόξειεν ἂν εἶναι, καθάπερ καὶ ἐπὶ τῆς ἀρετῆς καὶ τῆς ἐπιστήμης συμβαίνει· ἄμφω γὰρ ὑπὸ τὸ αὐτὸ γένος ἐστίν· ἑκάτερον γὰρ αὐτῶν ἕξις καὶ διάθεσίς ἐστιν. σκεπτέον οὖν εἰ μηδέτερον ὑπάρχει τῷ ἀποδοθέντι γένει. εἰ [122a] γὰρ μήθ' ὑπ' ἄλληλά ἐστι τὰ γένη μήθ' ὑπὸ ταὐτὸν ἄμφω, οὐκ ἂν εἴη τὸ ἀποδοθὲν γένος.

Σκοπεῖν δὲ καὶ τὸ γένος τοῦ ἀποδοθέντος γένους καὶ οὕτως ἀεὶ τὸ ἐπάνω γένος, εἰ πάντα κατηγορεῖται τοῦ εἴδους, καὶ εἰ ἐν τῷ τί ἐστι κατηγορεῖται· πάντα γὰρ τὰ ἐπάνω γένη κατηγορεῖσθαι δεῖ τοῦ εἴδους ἐν τῷ τί ἐστιν. εἰ οὖν που διαφωνεῖ, δῆλον ὅτι οὐ γένος τὸ ἀποδοθέν. πάλιν εἰ μετέχει τὸ γένος τοῦ εἴδους, ἢ αὐτὸ ἢ τῶν ἐπάνω τι γενῶν· οὐδενὸς γὰρ τῶν ὑποκάτω τὸ ἐπάνω μετέχει. ἀνασκευάζοντι μὲν οὖν καθάπερ εἴρηται χρηστέον. κατασκευάζοντι δέ, ὁμολογουμένου μὲν ὑπάρχειν τῷ εἴδει τοῦ ῥηθέντος γένους, ὅτι δ' ὡς γένος ὑπάρχει ἀμφισβητουμένου, ἀπόχρη τὸ δεῖξαί τι τῶν ἐπάνω γενῶν ἐν τῷ τί ἐστι τοῦ εἴδους κατηγορούμενον. ἑνὸς γὰρ ἐν τῷ τί ἐστι κατηγορουμένου πάντα καὶ τὰ ἐπάνω τούτου καὶ τὰ ὑποκάτω, ἄνπερ κατηγορῆται τοῦ εἴδους, ἐν τῷ τί ἐστι κατηγορηθήσεται· ὥστε καὶ τὸ ἀποδοθὲν γένος ἐν τῷ τί ἐστι κατηγορεῖται. ὅτι δ' ἑνὸς ἐν τῷ τί ἐστι κατηγορουμένου πάντα τὰ λοιπά, ἄνπερ κατηγορῆται, ἐν τῷ τί ἐστι κατηγορηθήσεται, δι' ἐπαγωγῆς ληπτέον. εἰ δ' ἁπλῶς ὑπάρχειν ἀμφισβητεῖται τὸ ἀποδοθὲν γένος, οὐκ ἀπόχρη τὸ δεῖξαι τῶν ἐπάνω τι γενῶν ἐν τῷ τί ἐστι τοῦ εἴδους κατηγορούμενον. οἷον εἴ τις τῆς βαδίσεως γένος ἀποδέδωκε τὴν φοράν, οὐκ ἀπόχρη τὸ δεῖξαι ὅτι κίνησίς ἐστιν ἡ βάδισις πρὸς τὸ δεῖξαι ὅτι φορά ἐστιν, ἐπειδὴ καὶ ἄλλαι κινήσεις εἰσίν, ἀλλὰ προσδεικτέον ὅτι οὐδενὸς μετέχει ἡ βάδισις τῶν κατὰ τὴν αὐτὴν διαίρεσιν εἰ μὴ τῆς φορᾶς· ἀνάγκη γὰρ τὸ τοῦ γένους μετέχον καὶ τῶν εἰδῶν τινος μετέχειν τῶν κατὰ τὴν πρώτην διαίρεσιν. εἰ οὖν ἡ βάδισις μήτ’ αὐξήσεως μήτε μειώσεως μήτε τῶν ἄλλων κινήσεων μετέχει, δῆλον ὅτι τῆς φορᾶς ἂν μετέχοι· ὥστ’ εἴη ἂν γένος ἡ φορὰ τῆς βαδίσεως.

Πάλιν ἐφ’ ὧν τὸ εἶδος τὸ τεθὲν ὡς γένος κατηγορεῖται, σκοπεῖν εἰ καὶ τὸ ἀποδοθὲν γένος ἐν τῷ τί ἐστιν αὐτῶν τούτων κατηγορεῖται ὧνπερ καὶ τὸ εἶδος, ὁμοίως δὲ καὶ εἰ τὰ ἐπάνω τοῦ γένους πάντα. εἰ γάρ που διαφωνεῖ, δῆλον ὅτι οὐ γένος τὸ ἀποδοθέν· εἰ γὰρ ἦν γένος, ἅπαντ’ ἂν καὶ τὰ ἐπάνω τούτου καὶ αὐτὸ ἐν τῷ τί ἐστι κατηγορεῖτο, ὧνπερ καὶ τὸ εἶδος ἐν τῷ τί ἐστι κατηγορεῖται. ἀνασκευάζοντι μὲν οὖν χρήσιμον, εἰ μὴ κατηγορεῖται τὸ γένος ἐν τῷ τί ἐστιν ὧνπερ καὶ τὸ εἶδος κατηγορεῖται· κατασκευάζοντι δ’, εἰ [122b] κατηγορεῖται ἐν τῷ τί ἐστι, χρήσιμον. συμβήσεται γὰρ τὸ γένος καὶ τὸ εἶδος τοῦ αὐτοῦ ἐν τῷ τί ἐστι κατηγορεῖσθαι, ὥστε τὸ αὐτὸ ὑπὸ δύο γένη γίνεται. ἀναγκαῖον οὖν ὑπ’ ἄλληλα τὰ γένη εἶναι. ἂν οὖν δειχθῇ ὃ βουλόμεθα ὡς γένος κατασκευάσαι μὴ ὂν ὑπὸ τὸ εἶδος, δῆλον ὅτι τὸ εἶδος ὑπὸ τοῦτ’ ἂν εἴη, ὥστε δεδειγμένον ἂν εἴη ὅτι γένος τοῦτο.

Σκοπεῖν δὲ καὶ τοὺς λόγους τῶν γενῶν, εἰ ἐφαρμόττουσιν ἐπί τε τὸ ἀποδοθὲν εἶδος καὶ ἐπὶ τὰ μετέχοντα τοῦ εἴδους· ἀνάγκη γὰρ τοὺς τῶν γενῶν λόγους κατηγορεῖσθαι τοῦ εἴδους καὶ τῶν μετεχόντων τοῦ εἴδους. εἰ οὖν που διαφωνεῖ, δῆλον ὅτι οὐ γένος τὸ ἀποδοθέν.

Πάλιν εἰ τὴν διαφορὰν ὡς γένος ἀποδέδωκεν, οἷον εἰ τὸ ἀθάνατον γένος θεοῦ· διαφορὰ γάρ ἐστι ζῴου τὸ ἀθάνατον, ἐπειδὴ τῶν ζῴων τὰ μὲν θνητὰ τὰ δ’ ἀθάνατα. δῆλον οὖν ὅτι διημάρτηται· οὐδενὸς γὰρ ἡ διαφορὰ γένος ἐστίν. ὅτι δὲ τοῦτ’ ἀληθές, δῆλον· οὐδεμία γὰρ διαφορὰ σημαίνει τί ἐστιν ἀλλὰ μᾶλλον ποιόν τι, καθάπερ τὸ πεζὸν καὶ τὸ δίπουν.

Καὶ εἰ τὴν διαφορὰν ὡς εἶδος εἰς τὸ γένος ἔθηκεν, οἷον τὸ περιττὸν ὅπερ ἀριθμόν· διαφορὰ γὰρ ἀριθμοῦ τὸ περιττόν, οὐκ εἶδός ἐστιν. οὐ δοκεῖ δὲ μετέχειν ἡ διαφορὰ τοῦ γένους· πᾶν γὰρ τὸ μετέχον τοῦ γένους ἢ εἶδος ἢ ἄτομόν ἐστιν, ἡ δὲ διαφορὰ οὔτε εἶδος οὔτε ἄτομόν ἐστιν. δῆλον οὖν ὅτι οὐ μετέχει τοῦ γένους ἡ διαφορά· ὥστ’ οὐδὲ τὸ περιττὸν εἶδος ἂν εἴη ἀλλὰ διαφορά, ἐπειδὴ οὐ μετέχει τοῦ γένους.

Ἔτι εἰ τὸ γένος εἰς τὸ εἶδος ἔθηκεν, οἷον τὴν ἅψιν ὅπερ συνοχὴν ἢ τὴν μεῖξιν ὅπερ κρᾶσιν, ἢ ὡς Πλάτων ὁρίζεται φορὰν τὴν κατὰ τόπον κίνησιν. οὐ γὰρ ἀναγκαῖον τὴν ἅψιν συνοχὴν εἶναι, ἀλλ’ ἀνάπαλιν τὴν συνοχὴν ἅψιν· οὐ γὰρ πᾶν τὸ ἁπτόμενον συνέχεται, ἀλλὰ τὸ συνεχόμενον ἅπτεται. ὁμοίως δὲ καὶ ἐπὶ τῶν λοιπῶν· οὔτε γὰρ ἡ μεῖξις ἅπασα κρᾶσις (ἡ γὰρ τῶν ξηρῶν μεῖξις οὐκ ἔστι κρᾶσις) οὔθ’ ἡ κατὰ τόπον μεταβολὴ πᾶσα φορά· ἡ γὰρ βάδισις οὐ δοκεῖ φορὰ εἶναι· σχεδὸν γὰρ ἡ φορὰ ἐπὶ τῶν ἀκουσίως τόπον ἐκ τόπου μεταβαλλόντων λέγεται, καθάπερ ἐπὶ τῶν ἀψύχων συμβαίνει. δῆλον δ’ ὅτι καὶ ἐπὶ πλέον λέγεται τὸ εἶδος τοῦ γένους ἐν τοῖς ἀποδοθεῖσι, δέον ἀνάπαλιν γίνεσθαι.

Πάλιν εἰ τὴν διαφορὰν εἰς τὸ εἶδος ἔθηκεν, οἷον τὸ ἀθάνατον ὅπερ θεόν. συμβήσεται γὰρ ἐπ’ ἴσης ἢ ἐπὶ πλεῖον τὸ εἶδος λέγεσθαι· ἀεὶ δ’ ἡ διαφορὰ ἐπ’ ἴσης ἢ ἐπὶ [123a] πλεῖον τοῦ εἴδους λέγεται. ἔτι εἰ τὸ γένος εἰς τὴν διαφοράν, οἷον τὸ χρῶμα ὅπερ συγκριτικὸν ἢ τὸν ἀριθμὸν ὅπερ περιττόν. καὶ εἰ τὸ γένος ὡς διαφορὰν εἶπεν· ἐγχωρεῖ γάρ τινα καὶ τοιαύτην κομίσαι θέσιν, οἷον κράσεως τὴν μεῖξιν διαφορὰν ἢ φορᾶς τὴν κατὰ τόπον μεταβολήν. σκεπτέον δὲ πάντα τὰ τοιαῦτα διὰ τῶν αὐτῶν· ἐπικοινωνοῦσι γὰρ οἱ τόποι· ἐπὶ πλέον τε γὰρ τὸ γένος τῆς διαφορᾶς δεῖ λέγεσθαι καὶ μὴ μετέχειν τῆς διαφορᾶς, οὕτω δ’ ἀποδοθέντος οὐδέτερον τῶν εἰρημένων δυνατὸν συμβαίνειν· ἐπ’ ἔλαττόν τε γὰρ ῥηθήσεται καὶ μεθέξει τὸ γένος τῆς διαφορᾶς.

Πάλιν εἰ μηδεμία διαφορὰ κατηγορεῖται τῶν τοῦ γένους κατὰ τοῦ ἀποδοθέντος εἴδους, οὐδὲ τὸ γένος κατηγορηθήσεται· οἷον ψυχῆς οὔτε τὸ περιττὸν οὔτε τὸ ἄρτιον κατηγορεῖται, ὥστ’ οὐδ’ ἀριθμός. ἔτι εἰ πρότερον φύσει τὸ εἶδος καὶ συναναιρεῖ τὸ γένος· δοκεῖ γὰρ τὸ ἐναντίον. ἔτι εἰ ἐνδέχεται ἀπολιπεῖν τὸ εἰρημένον γένος ἢ τὴν διαφοράν, οἷον ψυχὴν τὸ κινεῖσθαι ἢ δόξαν τὸ ἀληθὲς καὶ ψεῦδος, οὐκ ἂν εἴη τῶν εἰρημένων οὐδέτερον γένος οὐδὲ διαφορά· δοκεῖ γὰρ τὸ γένος καὶ ἡ διαφορὰ παρακολουθεῖν, ἕως ἂν ᾖ τὸ εἶδος.

Σκοπεῖν δὲ καὶ εἰ τὸ ἐν τῷ γένει κείμενον μετέχει τινὸς ἐναντίου τῷ γένει ἢ ἐνδέχεται μετέχειν· τὸ γὰρ αὐτὸ τῶν ἐναντίων ἅμα μεθέξει, ἐπειδὴ τὸ μὲν γένος οὐδέποτ’ ἀπολείπει, μετέχει δὲ καὶ τοῦ ἐναντίου ἢ ἐνδέχεται μετέχειν. ἔτι εἴ τινος κοινωνεῖ τὸ εἶδος ὃ ἀδύνατον ὅλως ὑπάρχειν τοῖς ὑπὸ τὸ γένος· οἷον εἰ ἡ ψυχὴ τῆς ζωῆς κοινωνεῖ, τῶν δ’ ἀριθμῶν μηδένα δυνατὸν ζῆν, οὐκ ἂν εἴη εἶδος ἀριθμοῦ ἡ ψυχή.

Σκεπτέον δὲ καὶ εἰ ὁμώνυμον τὸ εἶδος τῷ γένει, στοιχείοις χρώμενον τοῖς εἰρημένοις πρὸς τὸ ὁμώνυμον· συνώνυμον γὰρ τὸ γένος καὶ τὸ εἶδος.

Ἐπεὶ δὲ παντὸς γένους εἴδη πλείω, σκοπεῖν εἰ μὴ ἐνδέχεται ἕτερον εἶδος εἶναι τοῦ εἰρημένου γένους· εἰ γὰρ μὴ ἔστι, δῆλον ὅτι οὐκ ἂν εἴη ὅλως γένος τὸ εἰρημένον.

Σκοπεῖν δὲ καὶ εἰ τὸ μεταφορᾷ λεγόμενον ὡς γένος ἀποδέδωκεν, οἷον τὴν σωφροσύνην συμφωνίαν· πᾶν γὰρ γένος κυρίως κατὰ τῶν εἰδῶν κατηγορεῖται, ἡ δὲ συμφωνία κατὰ τῆς σωφροσύνης οὐ κυρίως ἀλλὰ μεταφορᾷ· πᾶσα γὰρ συμφωνία ἐν φθόγγοις.

[123b] Ἔτι ἂν ᾖ ἐναντίον τι τῷ εἴδει, σκοπεῖν. ἔστι δὲ πλεοναχῶς ἡ σκέψις· πρῶτον μὲν εἰ ἐν τῷ αὐτῷ γένει καὶ τὸ ἐναντίον, μὴ ὄντος ἐναντίου τῷ γένει· δεῖ γὰρ τὰ ἐναντία ἐν τῷ αὐτῷ γένει εἶναι, ἂν μηδὲν ἐναντίον τῷ γένει ᾖ. ὄντος δ' ἐναντίου τῷ γένει, σκοπεῖν εἰ τὸ ἐναντίον ἐν τῷ ἐναντίῳ· ἀνάγκη γὰρ τὸ ἐναντίον ἐν τῷ ἐναντίῳ εἶναι, ἄνπερ ᾖ ἐναντίον τι τῷ γένει. φανερὸν δὲ τούτων ἕκαστον διὰ τῆς ἐπαγωγῆς. πάλιν εἰ ὅλως ἐν μηδενὶ γένει τὸ τῷ εἴδει ἐναντίον ἀλλ' αὐτὸ γένος, οἷον τἀγαθόν· εἰ γὰρ τοῦτο μὴ ἐν γένει, οὐδὲ τὸ ἐναντίον τούτου ἐν γένει ἔσται ἀλλ' αὐτὸ γένος, καθάπερ ἐπὶ τοῦ ἀγαθοῦ καὶ τοῦ κακοῦ συμβαίνει· οὐδέτερον γὰρ τούτων ἐν γένει, ἀλλ' ἑκάτερον αὐτὸ γένος. ἔτι εἰ ἐναντίον τινὶ καὶ τὸ γένος καὶ τὸ εἶδος, καὶ τῶν μὲν ἔστι τι μεταξύ, τῶν δὲ μή. εἰ γὰρ τῶν γενῶν ἔστι τι μεταξύ, καὶ τῶν εἰδῶν, καὶ εἰ τῶν εἰδῶν, καὶ τῶν γενῶν, καθάπερ ἐπ' ἀρετῆς καὶ κακίας καὶ δικαιοσύνης καὶ ἀδικίας· ἑκατέρων γὰρ ἔστι τι μεταξύ. (ἔνστασις τούτου ὅτι ὑγιείας καὶ νόσου οὐδὲν μεταξύ, κακοῦ δὲ καὶ ἀγαθοῦ.) ἢ εἰ ἔστι μέν τι ἀμφοῖν ἀνὰ μέσον, καὶ τῶν εἰδῶν καὶ τῶν γενῶν, μὴ ὁμοίως δέ, ἀλλὰ τῶν μὲν κατὰ ἀπόφασιν τῶν δ' ὡς ὑποκείμενον. ἔνδοξον γὰρ τὸ ὁμοίως ἀμφοῖν, καθάπερ ἐπ' ἀρετῆς καὶ κακίας, καὶ δικαιοσύνης καὶ ἀδικίας· ἀμφοῖν γὰρ κατὰ ἀπόφασιν τὰ ἀνὰ μέσον. ἔτι ὅταν μὴ ᾖ ἐναντίον τῷ γένει, σκοπεῖν μὴ μόνον εἰ τὸ ἐναντίον ἐν τῷ αὐτῷ γένει, ἀλλὰ καὶ τὸ ἀνὰ μέσον· ἐν ᾧ γὰρ τὰ ἄκρα, καὶ τὸ ἀνὰ μέσον, οἷον ἐπὶ λευκοῦ καὶ μέλανος· τὸ γὰρ χρῶμα γένος τούτων τε καὶ τῶν ἀνὰ μέσον χρωμάτων ἁπάντων. (ἔνστασις ὅτι ἡ μὲν ἔνδεια καὶ ἡ ὑπερβολὴ ἐν τῷ αὐτῷ γένει - ἐν τῷ κακῷ γὰρ ἄμφω - τὸ δὲ μέτριον ἀνὰ μέσον ὂν τούτων οὐκ ἐν τῷ κακῷ ἀλλ' ἐν τῷ ἀγαθῷ.) σκοπεῖν δὲ καὶ εἰ τὸ μὲν γένος ἐναντίον τινί, τὸ δὲ εἶδος μηδενί. εἰ γὰρ τὸ γένος ἐναντίον τινί, καὶ τὸ εἶδος, καθάπερ ἀρετὴ κακίᾳ καὶ δικαιοσύνη ἀδικίᾳ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων σκοποῦντι φανερὸν ἂν δόξειεν εἶναι τὸ τοιοῦτον. (ἔνστασις ἐπὶ τῆς ὑγιείας καὶ νόσου· ἁπλῶς μὲν γὰρ ὑγίεια νόσῳ ἐναντίον, ἡ δὲ τὶς νόσος εἶδος οὖσα νόσου οὐδενὶ ἐναντίον, οἷον ὁ πυρετὸς καὶ ἡ ὀφθαλμία καὶ τῶν ἄλλων ἕκαστον.)

[124a] Ἀναιροῦντι μὲν οὖν τοσαυταχῶς ἐπισκεπτέον· εἰ γὰρ μὴ ὑπάρχει τὰ εἰρημένα, δῆλον ὅτι οὐ γένος τὸ ἀποδοθέν. κατασκευάζοντι δὲ τριχῶς· πρῶτον μὲν εἰ τὸ ἐναντίον τῷ εἴδει ἐν τῷ εἰρημένῳ γένει, μὴ ὄντος ἐναντίου τῷ γένει· εἰ γὰρ τὸ ἐναντίον ἐν τούτῳ, δῆλον ὅτι καὶ τὸ προκείμενον. ἔτι εἰ τὸ ἀνὰ μέσον ἐν τῷ εἰρημένῳ γένει· ἐν ᾧ γὰρ τὸ ἀνὰ μέσον, καὶ τὰ ἄκρα. πάλιν ἂν ᾖ ἐναντίον τι τῷ γένει, σκοπεῖν εἰ καὶ τὸ ἐναντίον ἐν τῷ ἐναντίῳ· ἂν γὰρ ᾖ, δῆλον ὅτι καὶ τὸ προκείμενον ἐν τῷ προκειμένῳ.

Πάλιν ἐπὶ τῶν πτώσεων καὶ ἐπὶ τῶν συστοίχων, εἰ ὁμοίως ἀκολουθοῦσι, καὶ ἀναιροῦντι καὶ κατασκευάζοντι· ἅμα γὰρ ἑνὶ καὶ πᾶσιν ὑπάρχει ἢ οὐχ ὑπάρχει. οἷον εἰ ἡ δικαιοσύνη ἐπιστήμη τις, καὶ τὸ δικαίως ἐπιστημόνως καὶ ὁ δίκαιος ἐπιστήμων· εἰ δὲ τούτων τι μή, οὐδὲ τῶν λοιπῶν οὐδέν.

Πάλιν ἐπὶ τῶν ὁμοίως ἐχόντων πρὸς ἄλληλα· οἷον τὸ ἡδὺ ὁμοίως ἔχει πρὸς τὴν ἡδονὴν καὶ τὸ ὠφέλιμον πρὸς τὸ ἀγαθόν· ἑκάτερον γὰρ ἑκατέρου ποιητικόν. εἰ οὖν ἐστιν ἡ ἡδονὴ ὅπερ ἀγαθόν, καὶ τὸ ἡδὺ ὅπερ ὠφέλιμον ἔσται· δῆλον γὰρ ὅτι ἀγαθοῦ ἂν εἴη ποιητικόν, ἐπειδὴ ἡ ἡδονὴ ἀγαθόν. ὡσαύτως δὲ καὶ ἐπὶ τῶν γενέσεων καὶ φθορῶν· οἷον εἰ τὸ οἰκοδομεῖν ἐνεργεῖν, τὸ ᾠκοδομηκέναι ἐνηργηκέναι, καὶ εἰ τὸ μανθάνειν ἀναμιμνήσκεσθαι, καὶ τὸ μεμαθηκέναι ἀναμεμνῆσθαι, καὶ εἰ τὸ διαλύεσθαι φθείρεσθαι, καὶ τὸ διαλελύσθαι ἐφθάρθαι καὶ ἡ διάλυσις φθορά τις. καὶ ἐπὶ τῶν γεννητικῶν δὲ καὶ φθαρτικῶν ὡσαύτως, καὶ ἐπὶ τῶν δυνάμεων καὶ χρήσεων, καὶ ὅλως καθ’ ὁποιανοῦν ὁμοιότητα καὶ ἀναιροῦντι καὶ κατασκευάζοντι σκεπτέον καθάπερ ἐπὶ τῆς γενέσεως καὶ φθορᾶς ἐλέγομεν. εἰ γὰρ τὸ φθαρτικὸν διαλυτικόν, καὶ τὸ φθείρεσθαι διαλύεσθαι· καὶ εἰ τὸ γεννητικὸν ποιητικόν, καὶ τὸ γίγνεσθαι ποιεῖσθαι καὶ ἡ γένεσις ποίησις. ὁμοίως δὲ καὶ ἐπὶ τῶν δυνάμεων καὶ χρήσεων· εἰ γὰρ ἡ δύναμις διάθεσις, καὶ τὸ δύνασθαι διακεῖσθαι, καὶ εἴ τινος ἡ χρῆσις ἐνέργεια, τὸ χρῆσθαι ἐνεργεῖν καὶ τὸ κεχρῆσθαι ἐνηργηκέναι.

Ἂν δὲ στέρησις ᾖ τὸ ἀντικείμενον τῷ εἴδει, διχῶς ἔστιν ἀνελεῖν. πρῶτον μέν, εἰ ἐν τῷ ἀποδοθέντι γένει τὸ ἀντικείμενον· ἢ γὰρ ἁπλῶς ἐν οὐδενὶ γένει τῷ αὐτῷ ἡ στέρησις ἢ οὐκ ἐν τῷ ἐσχάτῳ· οἷον εἰ ἡ ὄψις ἐν ἐσχάτῳ γένει τῇ αἰσθήσει, ἡ τυφλότης οὐκ ἔσται αἴσθησις. δεύτερον δ’, εἰ καὶ τῷ γένει [124b] καὶ τῷ εἴδει ἀντίκειται στέρησις, μὴ ἔστι δὲ τὸ ἀντικείμενον ἐν τῷ ἀντικειμένῳ, οὐδ’ ἂν τὸ ἀποδοθὲν ἐν τῷ ἀποδοθέντι εἴη. ἀναιροῦντι μὲν οὖν καθάπερ εἴρηται χρηστέον, κατασκευάζοντι δὲ μοναχῶς· εἰ γὰρ τὸ ἀντικείμενον ἐν τῷ ἀντικειμένῳ, καὶ τὸ προκείμενον ἐν τῷ προκειμένῳ ἂν εἴη· οἷον εἰ ἡ τυφλότης ἀναισθησία τις, ἡ ὄψις αἴσθησίς τις.

Πάλιν ἐπὶ τῶν ἀποφάσεων σκοπεῖν ἀνάπαλιν, καθάπερ ἐπὶ τοῦ συμβεβηκότος ἐλέγετο· οἷον εἰ τὸ ἡδὺ ὅπερ ἀγαθόν, τὸ μὴ ἀγαθὸν οὐχ ἡδύ. εἰ γὰρ μὴ οὕτως ἔχοι, εἴη ἄν τι καὶ οὐκ ἀγαθὸν ἡδύ, ἀδύνατον δέ, εἴπερ τὸ ἀγαθὸν γένος τοῦ ἡδέος, εἶναί τι μὴ ἀγαθὸν ἡδύ· ὧν γὰρ τὸ γένος μὴ κατηγορεῖται, οὐδὲ τῶν εἰδῶν οὐδέν. καὶ κατασκευάζοντι δὲ ὡσαύτως σκεπτέον· εἰ γὰρ τὸ μὴ ἀγαθὸν οὐχ ἡδύ, τὸ ἡδὺ ἀγαθόν, ὥστε γένος τὸ ἀγαθὸν τοῦ ἡδέος.

Ἐὰν δ' ᾖ πρός τι τὸ εἶδος, σκοπεῖν εἰ καὶ τὸ γένος πρός τι· εἰ γὰρ τὸ εἶδος τῶν πρός τι, καὶ τὸ γένος, καθάπερ ἐπὶ τοῦ διπλασίου καὶ πολλαπλασίου· ἑκάτερον γὰρ τῶν πρός τι. εἰ δὲ τὸ γένος τῶν πρός τι, οὐκ ἀνάγκη καὶ τὸ εἶδος· ἡ μὲν γὰρ ἐπιστήμη τῶν πρός τι, ἡ δὲ γραμματικὴ οὔ. (ἢ οὐδὲ τὸ πρότερον ῥηθὲν ἀληθὲς ἂν δόξειεν εἶναι· ἡ γὰρ ἀρετὴ ὅπερ καλὸν καὶ ὅπερ ἀγαθόν, καὶ ἡ μὲν ἀρετὴ τῶν πρός τι, τὸ δ' ἀγαθὸν καὶ τὸ καλὸν οὐ τῶν πρός τι ἀλλὰ ποιά.)

Πάλιν εἰ μὴ πρὸς ταὐτὸ λέγεται τὸ εἶδος καθ' αὑτό τε καὶ κατὰ τὸ γένος· οἷον εἰ τὸ διπλάσιον ἡμίσεος λέγεται διπλάσιον, καὶ τὸ πολλαπλάσιον ἡμίσεος δεῖ λέγεσθαι. εἰ δὲ μή, οὐκ ἂν εἴη τὸ πολλαπλάσιον γένος τοῦ διπλασίου.

Ἔτι εἰ μὴ πρὸς τὸ αὐτὸ κατά τε τὸ γένος λέγεται καὶ κατὰ πάντα τὰ τοῦ γένους γένη. εἰ γὰρ τὸ διπλάσιον ἡμίσεος πολλαπλάσιόν ἐστι, καὶ ὑπερέχον ἡμίσεος ῥηθήσεται, καὶ ἁπλῶς κατὰ πάντα τὰ ἐπάνω γένη πρὸς τὸ ἥμισυ ῥηθήσεται. (ἔνστασις ὅτι οὐκ ἀνάγκη καθ' αὑτὸ καὶ κατὰ τὸ γένος πρὸς ταὐτὸ λέγεσθαι· ἡ γὰρ ἐπιστήμη ἐπιστητοῦ λέγεται, ἕξις δὲ καὶ διάθεσις οὐκ ἐπιστητοῦ ἀλλὰ ψυχῆς.)

Πάλιν εἰ ὡσαύτως λέγεται τὸ γένος καὶ τὸ εἶδος κατὰ τὰς πτώσεις, οἷον εἰ τινὶ ἢ τινὸς ἢ ὁσαχῶς ἄλλως. ὡς γὰρ τὸ εἶδος, καὶ τὸ γένος, καθάπερ ἐπὶ τοῦ διπλασίου καὶ τῶν ἐπάνω· τινὸς γὰρ καὶ τὸ διπλάσιον καὶ τὸ πολλαπλάσιον. ὁμοίως δὲ καὶ ἐπὶ τῆς ἐπιστήμης· τινὸς γὰρ [125a] καὶ αὐτὴ καὶ τὰ γένη, οἷον ἥ τε διάθεσις καὶ ἡ ἕξις. (ἔνστασις ὅτι ἐνιαχοῦ οὐχ οὕτως· τὸ μὲν γὰρ διάφορον καὶ τὸ ἐναντίον τινί, τὸ δ' ἕτερον, γένος ὂν τούτων, οὐ τινὶ ἀλλὰ τινός· ἕτερον γάρ τινος λέγεται.)

Πάλιν εἰ ὁμοίως τὰ πρός τι κατὰ τὰς πτώσεις λεγόμενα μὴ ὁμοίως ἀντιστρέφει, καθάπερ ἐπὶ τοῦ διπλασίου καὶ τοῦ πολλαπλασίου. ἑκάτερον γὰρ τούτων τινὸς καὶ αὐτὸ καὶ κατὰ τὴν ἀντιστροφὴν λέγεται· τινὸς γὰρ καὶ τὸ ἥμισυ καὶ τὸ πολλοστημόριον. ὡσαύτως δὲ καὶ ἐπὶ τῆς ἐπιστήμης καὶ τῆς ὑπολήψεως· αὐταί τε γὰρ τινὸς καὶ ἀντιστρέφει ὁμοίως τό τε ἐπιστητὸν καὶ τὸ ὑποληπτὸν τινί. εἰ οὖν ἐπί τινων μὴ ὁμοίως ἀντιστρέφει, δῆλον ὅτι οὐ γένος θάτερον θατέρου.

Πάλιν εἰ μὴ πρὸς ἴσα τὸ εἶδος καὶ τὸ γένος λέγεται. ὁμοίως γὰρ καὶ ἰσαχῶς ἑκάτερον δοκεῖ λέγεσθαι, καθάπερ ἐπὶ τῆς δωρεᾶς καὶ τῆς δόσεως· ἥ τε γὰρ δωρεὰ τινὸς καὶ τινὶ λέγεται, καὶ ἡ δόσις τινὸς καὶ τινί. ἔστι δὲ ἡ δόσις γένος τῆς δωρεᾶς· ἡ γὰρ δωρεὰ δόσις ἐστὶν ἀναπόδοτος. ἐπ' ἐνίων δ' οὐ συμβαίνει πρὸς ἴσα λέγεσθαι· τὸ μὲν γὰρ διπλάσιον τινὸς διπλάσιον, τὸ δ’ ὑπερέχον καὶ τὸ μεῖζον τινὸς καὶ τινί· πᾶν γὰρ τὸ ὑπερέχον καὶ τὸ μεῖζον τινὶ ὑπερέχει καὶ τινὸς ὑπερέχει. ὥστ’ οὐ γένη τὰ εἰρημένα τοῦ διπλασίου, ἐπειδὴ οὐ πρὸς ἴσα τῷ εἴδει λέγεται. (ἢ οὐ καθόλου ἀληθὲς τὸ πρὸς ἴσα τὸ εἶδος καὶ τὸ γένος λέγεσθαι.)

Ὁρᾶν δὲ καὶ εἰ τοῦ ἀντικειμένου τὸ ἀντικείμενον γένος· οἷον εἰ τοῦ διπλασίου τὸ πολλαπλάσιον, καὶ τοῦ ἡμίσεος τὸ πολλοστημόριον· δεῖ γὰρ τὸ ἀντικείμενον τοῦ ἀντικειμένου γένος εἶναι. εἰ οὖν τις θείη τὴν ἐπιστήμην ὅπερ αἴσθησιν, δεήσει καὶ τὸ ἐπιστητὸν ὅπερ αἰσθητὸν εἶναι. οὐκ ἔστι δέ· οὐ γὰρ πᾶν τὸ ἐπιστητὸν αἰσθητόν· καὶ γὰρ τῶν νοητῶν ἔνια ἐπιστητά. ὥστ’ οὐ γένος τὸ αἰσθητὸν τοῦ ἐπιστητοῦ. εἰ δὲ τοῦτο μή, οὐδ’ αἴσθησις ἐπιστήμης.

Ἐπεὶ δὲ τῶν πρός τι λεγομένων τὰ μὲν ἐξ ἀνάγκης ἐν ἐκείνοις ἢ περὶ ἐκεῖνά ἐστι πρὸς ἅ ποτε τυγχάνει λεγόμενα (οἷον ἡ διάθεσις καὶ ἡ ἕξις καὶ ἡ συμμετρία· ἐν ἄλλῳ γὰρ οὐδενὶ δυνατὸν ὑπάρχειν τὰ εἰρημένα ἢ ἐν ἐκείνοις πρὸς ἃ λέγεται), τὰ δ’ οὐκ ἀνάγκη μὲν ἐν ἐκείνοις ὑπάρχειν πρὸς ἅ ποτε λέγεται, ἐνδέχεται δέ (οἷον εἰ ἐπιστητὸν ἡ ψυχή· οὐδὲν γὰρ κωλύει τὴν αὑτῆς ἐπιστήμην ἔχειν τὴν ψυχήν, οὐκ ἀναγκαῖον δέ· δυνατὸν γὰρ καὶ ἐν ἄλλῳ [125b] ὑπάρχειν τὴν αὐτὴν ταύτην), τὰ δ’ ἁπλῶς οὐκ ἐνδέχεται ἐν ἐκείνοις ὑπάρχειν πρὸς ἅ ποτε τυγχάνει λεγόμενα (οἷον τὸ ἐναντίον ἐν τῷ ἐναντίῳ οὐδὲ τὴν ἐπιστήμην ἐν τῷ ἐπιστητῷ, ἐὰν μὴ τυγχάνῃ τὸ ἐπιστητὸν ψυχὴ ἢ ἄνθρωπος ὄν), σκοπεῖν οὖν χρὴ ἐάν τις εἰς γένος θῇ τὸ τοιοῦτον εἰς τὸ μὴ τοιοῦτον. οἷον εἰ τὴν μνήμην μονὴν ἐπιστήμης εἶπεν· πᾶσα γὰρ μονὴ ἐν τῷ μένοντι καὶ περὶ ἐκεῖνο, ὥστε καὶ ἡ τῆς ἐπιστήμης μονὴ ἐν τῇ ἐπιστήμῃ. ἡ μνήμη ἄρα ἐν τῇ ἐπιστήμῃ, ἐπειδὴ μονὴ τῆς ἐπιστήμης ἐστίν. τοῦτο δ’ οὐκ ἐνδέχεται· μνήμη γὰρ πᾶσα ἐν ψυχῇ. ἔστι δ’ ὁ εἰρημένος τόπος καὶ πρὸς τὸ συμβεβηκὸς κοινός· οὐδὲν γὰρ διαφέρει τῆς μνήμης γένος τὴν μονὴν εἰπεῖν ἢ συμβεβηκέναι φάσκειν αὐτῇ τοῦτο· εἰ γὰρ ὁπωσοῦν ἐστιν ἡ μνήμη μονὴ ἐπιστήμης, ὁ αὐτὸς ἁρμόσει περὶ αὐτῆς λόγος.

Πάλιν εἰ τὴν ἕξιν εἰς τὴν ἐνέργειαν ἔθηκεν ἢ τὴν ἐνέργειαν εἰς τὴν ἕξιν, οἷον τὴν αἴσθησιν κίνησιν διὰ σώματος· ἡ μὲν γὰρ αἴσθησις ἕξις, ἡ δὲ κίνησις ἐνέργεια. ὁμοίως δὲ καὶ εἰ τὴν μνήμην ἕξιν καθεκτικὴν ὑπολήψεως εἶπεν· οὐδεμία γὰρ μνήμη ἕξις, ἀλλὰ μᾶλλον ἐνέργεια.

Διαμαρτάνουσι δὲ καὶ οἱ τὴν ἕξιν εἰς τὴν ἀκολουθοῦσαν δύναμιν τάττοντες, οἷον τὴν πραότητα ἐγκράτειαν ὀργῆς καὶ τὴν ἀνδρείαν καὶ τὴν δικαιοσύνην φόβων καὶ κερδῶν· ἀνδρεῖος μὲν γὰρ καὶ πρᾶος ὁ ἀπαθὴς λέγεται, ἐγκρατὴς δ’ ὁ πάσχων καὶ μὴ ἀγόμενος. ἴσως μὲν οὖν ἀκολουθεῖ δύναμις ἑκατέρῳ τοιαύτη ὥστ’, εἰ πάθοι, μὴ ἄγεσθαι ἀλλὰ κρατεῖν· οὐ μὴν τοῦτό γ’ ἐστὶ τῷ μὲν ‹τὸ› ἀνδρείῳ τῷ δὲ ‹τὸ› πράῳ εἶναι, ἀλλὰ τὸ ὅλως μὴ πάσχειν ὑπὸ τῶν τοιούτων μηδέν.

Ἐνίοτε δὲ καὶ τὸ παρακολουθοῦν ὁπωσοῦν ὡς γένος τιθέασιν, οἷον τὴν λύπην τῆς ὀργῆς καὶ τὴν ὑπόληψιν τῆς πίστεως· ἄμφω γὰρ τὰ εἰρημένα παρακολουθεῖ μὲν τρόπον τινὰ τοῖς ἀποδοθεῖσιν εἴδεσιν, οὐδέτερον δ’ αὐτῶν γένος ἐστίν. ὁ μὲν γὰρ ὀργιζόμενος λυπεῖται προτέρας ἐν αὐτῷ τῆς λύπης γενομένης· οὐ γὰρ ἡ ὀργὴ τῆς λύπης ἀλλ’ ἡ λύπη τῆς ὀργῆς αἰτία, ὥσθ’ ἁπλῶς ἡ ὀργὴ οὐκ ἔστι λύπη. κατὰ ταὐτὰ δ’ οὐδ’ ἡ πίστις ὑπόληψις· ἐνδέχεται γὰρ τὴν αὐτὴν ὑπόληψιν καὶ μὴ πιστεύοντα ἔχειν, οὐκ ἐνδέχεται δ’, εἴπερ εἶδος ἡ πίστις ὑπολήψεως· οὐ γὰρ ἐνδέχεται τὸ αὐτὸ ἔτι διαμένειν, ἄνπερ ἐκ τοῦ εἴδους ὅλως μεταβάλῃ, καθάπερ οὐδὲ τὸ αὐτὸ ζῷον ὁτὲ μὲν ἄνθρωπον εἶναι ὁτὲ δὲ μή. ἂν δέ τις φῇ ἐξ ἀνάγκης τὸν ὑπολαμβάνοντα καὶ πιστεύειν, [126a] ἐπ’ ἴσον ἡ ὑπόληψις καὶ ἡ πίστις ῥηθήσεται, ὥστ’ οὐδ’ ἂν οὕτως εἴη γένος· ἐπὶ πλέον γὰρ δεῖ λέγεσθαι τὸ γένος.

Ὁρᾶν δὲ καὶ εἰ ἔν τινι τῷ αὐτῷ πέφυκεν ἄμφω γίνεσθαι· ἐν ᾧ γὰρ τὸ εἶδος, καὶ τὸ γένος, οἷον ἐν ᾧ τὸ λευκόν, καὶ τὸ χρῶμα, καὶ ἐν ᾧ γραμματική, καὶ ἐπιστήμη. ἐὰν οὖν τις τὴν αἰσχύνην φόβον εἴπῃ ἢ τὴν ὀργὴν λύπην, οὐ συμβήσεται ἐν τῷ αὐτῷ τὸ εἶδος καὶ τὸ γένος ὑπάρχειν· ἡ μὲν γὰρ αἰσχύνη ἐν τῷ λογιστικῷ, ὁ δὲ φόβος ἐν τῷ θυμοειδεῖ· καὶ ἡ μὲν λύπη ἐν τῷ ἐπιθυμητικῷ (ἐν τούτῳ γὰρ καὶ ἡ ἡδονή), ἡ δὲ ὀργὴ ἐν τῷ θυμοειδεῖ. ὥστ’ οὐ γένη τὰ ἀποδοθέντα, ἐπειδὴ οὐκ ἐν τῷ αὐτῷ τοῖς εἴδεσι πέφυκε γίνεσθαι. ὁμοίως δὲ καὶ εἰ ἡ φιλία ἐν τῷ ἐπιθυμητικῷ, οὐκ ἂν εἴη βούλησίς τις· πᾶσα γὰρ βούλησις ἐν τῷ λογιστικῷ. χρήσιμος δ’ ὁ τόπος καὶ πρὸς τὸ συμβεβηκός· ἐν τῷ αὐτῷ γὰρ τὸ συμβεβηκὸς καὶ ᾧ συμβέβηκεν, ὥστ’ ἂν μὴ ἐν τῷ αὐτῷ φαίνηται, δῆλον ὅτι οὐ συμβέβηκεν.

Πάλιν εἰ κατά τι τὸ εἶδος τοῦ εἰρημένου γένους μετέχει· οὐ δοκεῖ γὰρ κατά τι μετέχεσθαι τὸ γένος. οὐ γάρ ἐστιν ὁ ἄνθρωπος κατά τι ζῷον, οὐδ’ ἡ γραμματικὴ κατά τι ἐπιστήμη· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. σκοπεῖν οὖν εἰ ἐπί τινων κατά τι μετέχεται τὸ γένος, οἷον εἰ τὸ ζῷον ὅπερ αἰσθητὸν ἢ ὁρατὸν εἴρηται. κατά τι γὰρ αἰσθητὸν ἢ ὁρατὸν τὸ ζῷον· κατὰ τὸ σῶμα γὰρ αἰσθητὸν καὶ ὁρατόν, κατὰ δὲ τὴν ψυχὴν οὔ. ὥστ’ οὐκ ἂν εἴη γένος τὸ ὁρατὸν καὶ τὸ αἰσθητὸν τοῦ ζῴου.

Λανθάνουσι δ’ ἐνίοτε καὶ τὸ ὅλον εἰς τὸ μέρος τιθέντες, οἷον τὸ ζῷον σῶμα ἔμψυχον. οὐδαμῶς δὲ τὸ μέρος τοῦ ὅλου κατηγορεῖται· ὥστ’ οὐκ ἂν εἴη τὸ σῶμα γένος τοῦ ζῴου, ἐπειδὴ μέρος ἐστίν.

Ὁρᾶν δὲ καὶ εἴ τι τῶν ψεκτῶν ἢ φευκτῶν εἰς δύναμιν ἢ τὸ δυνατὸν ἔθηκεν, οἷον τὸν σοφιστὴν ἢ διάβολον ἢ κλέπτην τὸν δυνάμενον λάθρᾳ τὰ ἀλλότρια κλέπτειν· οὐδεὶς γὰρ τῶν εἰρημένων τῷ δυνατὸς εἶναί τι τούτων τοιοῦτος λέγεται. δύναται μὲν γὰρ καὶ ὁ θεὸς καὶ ὁ σπουδαῖος τὰ φαῦλα δρᾶν, ἀλλ’ οὐκ εἰσὶ τοιοῦτοι· πάντες γὰρ οἱ φαῦλοι κατὰ προαίρεσιν λέγονται. ἔτι πᾶσα δύναμις τῶν αἱρετῶν· καὶ γὰρ αἱ τῶν φαύλων δυνάμεις αἱρεταί, διὸ καὶ τὸν θεὸν καὶ τὸν σπουδαῖον ἔχειν φαμὲν αὐτάς· δυνατοὺς γάρ φαμεν εἶναι [126b] τὰ φαῦλα πράσσειν. ὥστ’ οὐδενὸς ἂν εἴη ψεκτοῦ γένος ἡ δύναμις. εἰ δὲ μή, συμβήσεται τῶν ψεκτῶν τι αἱρετὸν εἶναι· ἔσται γάρ τις δύναμις ψεκτή.

Καὶ εἴ τι τῶν δι’ αὑτὰ τιμίων ἢ αἱρετῶν εἰς δύναμιν ἢ τὸ δυνατὸν ἢ τὸ ποιητικὸν ἔθηκεν· πᾶσα γὰρ δύναμις καὶ πᾶν τὸ δυνατὸν ἢ τὸ ποιητικὸν δι’ ἄλλο αἱρετόν.

Ἢ εἴ τι τῶν ἐν δύο γένεσιν ἢ πλείοσιν εἰς θάτερον ἔθηκεν. ἔνια γὰρ οὐκ ἔστιν εἰς ἓν γένος θεῖναι, οἷον τὸν φένακα καὶ τὸν διάβολον· οὔτε γὰρ ὁ προαιρούμενος ἀδυνατῶν δέ, οὔθ’ ὁ δυνάμενος μὴ προαιρούμενος δέ, διάβολος ἢ φέναξ, ἀλλ’ ὁ ἄμφω ταῦτα ἔχων. ὥστ’ οὐ θετέον εἰς ἓν γένος ἀλλ’ εἰς ἀμφότερα τὰ εἰρημένα.

Ἔτι ἐνίοτε ἀνάπαλιν τὸ μὲν γένος ὡς διαφορὰν τὴν δὲ διαφορὰν ὡς γένος ἀποδιδόασιν, οἷον τὴν ἔκπληξιν ὑπερβολὴν θαυμασιότητος καὶ τὴν πίστιν σφοδρότητα ὑπολήψεως. οὔτε γὰρ ἡ ὑπερβολὴ οὔθ’ ἡ σφοδρότης γένος, ἀλλὰ διαφορά· δοκεῖ γὰρ ἡ ἔκπληξις θαυμασιότης εἶναι ὑπερβάλλουσα καὶ ἡ πίστις ὑπόληψις σφοδρά, ὥστε γένος ἡ θαυμασιότης καὶ ἡ ὑπόληψις, ἡ δ’ ὑπερβολὴ καὶ ἡ σφοδρότης διαφορά. ἔτι εἴ τις τὴν ὑπερβολὴν καὶ τὴν σφοδρότητα ὡς γένη ἀποδώσει, τὰ ἄψυχα πιστεύσει καὶ ἐκπλαγήσεται. ἡ γὰρ ἑκάστου σφοδρότης καὶ ὑπερβολὴ πάρεστιν ἐκείνῳ οὗ ἐστι σφοδρότης καὶ ὑπερβολή. εἰ οὖν ἡ ἔκπληξις ὑπερβολή ἐστι θαυμασιότητος, παρέσται τῇ θαυμασιότητι ἡ ἔκπληξις, ὥσθ’ ἡ θαυμασιότης ἐκπλαγήσεται. ὁμοίως δὲ καὶ ἡ πίστις παρέσται τῇ ὑπολήψει, εἴπερ σφοδρότης ὑπολήψεώς ἐστιν, ὥστε ἡ ὑπόληψις πιστεύσει. ἔτι συμβήσεται τῷ οὕτως ἀποδιδόντι σφοδρότητα σφοδρὰν λέγειν καὶ ὑπερβολὴν ὑπερβάλλουσαν. ἔστι γὰρ πίστις σφοδρά [καὶ ἔκπληξις ὑπερβάλλουσα]· εἰ οὖν ἡ πίστις σφοδρότης ἐστί, σφοδρότης ἂν εἴη σφοδρά. ὁμοίως δὲ καὶ ἔκπληξις ἔστιν ὑπερβάλλουσα· εἰ οὖν ἡ ἔκπληξις ὑπερβολή ἐστιν, ὑπερβολὴ ἂν εἴη ὑπερβάλλουσα. οὐ δοκεῖ δ’ οὐδέτερον τούτων, ὥσπερ οὐδὲ ἡ ἐπιστήμη ἐπιστῆμον οὐδ’ ἡ κίνησις κινούμενον.

Ἐνίοτε δὲ διαμαρτάνουσι καὶ τὸ πάθος εἰς γένος τὸ πεπονθὸς τιθέντες, οἷον ὅσοι τὴν ἀθανασίαν ζωὴν ἀίδιόν φασιν εἶναι· πάθος γάρ τι ζωῆς ἢ σύμπτωμα ἡ ἀθανασία ἔοικεν εἶναι. ὅτι δ’ ἀληθὲς τὸ λεγόμενον, δῆλον ἂν γένοιτο εἴ τις συγχωρήσειεν ἐκ θνητοῦ τινα ἀθάνατον γίνεσθαι· οὐδεὶς γὰρ φήσει ἑτέραν αὐτὸν ζωὴν λαμβάνειν, ἀλλὰ σύμπτωμά τι [127a] ἢ πάθος αὐτῇ ταύτῃ παραγίνεσθαι. ὥστ’ οὐ γένος ἡ ζωὴ τῆς ἀθανασίας.

Πάλιν εἰ τοῦ πάθους, οὗ ἐστι πάθος, ἐκεῖνο γένος φασὶν εἶναι, οἷον τὸ πνεῦμα ἀέρα κινούμενον. μᾶλλον γὰρ κίνησις ἀέρος τὸ πνεῦμα· ὁ γὰρ αὐτὸς ἀὴρ διαμένει, ὅταν τε κινῆται καὶ ὅταν μένῃ. ὥστ’ οὐκ ἔστιν ὅλως ἀὴρ τὸ πνεῦμα· ἦν γὰρ ἂν καὶ μὴ κινουμένου τοῦ ἀέρος πνεῦμα, εἴπερ ὁ αὐτὸς ἀὴρ διαμένει ὅσπερ ἦν πνεῦμα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων. εἰ δ’ ἄρα καὶ ἐπὶ τούτου δεῖ συγχωρῆσαι ὅτι ἀήρ ἐστι κινούμενος τὸ πνεῦμα, ἀλλ’ οὔτε γε ἐπὶ πάντων τὸ τοιοῦτον ἀποδεκτέον καθ’ ὧν μὴ ἀληθεύεται τὸ γένος, ἀλλ’ ἐφ’ ὅσων ἀληθῶς κατηγορεῖται τὸ ἀποδοθὲν γένος. ἐπ’ ἐνίων γὰρ οὐ δοκεῖ ἀληθεύεσθαι, οἷον ἐπὶ τοῦ πηλοῦ καὶ τῆς χιόνος. τὴν μὲν γὰρ χιόνα φασὶν ὕδωρ εἶναι πεπηγός, τὸν δὲ πηλὸν γῆν ὑγρῷ πεφυραμένην· ἔστι δ’ οὔθ’ ἡ χιὼν ὕδωρ οὔθ’ ὁ πηλὸς γῆ. ὥστ’ οὐκ ἂν εἴη γένος οὐδέτερον τῶν ἀποδοθέντων· δεῖ γὰρ τὸ γένος ἀληθεύεσθαι ἀεὶ κατὰ τῶν εἰδῶν. ὁμοίως δ’ οὐδ’ ὁ οἶνός ἐστιν ὕδωρ σεσηπός, καθάπερ Ἐμπεδοκλῆς φησι “σαπὲν ἐν ξύλῳ ὕδωρ”· ἁπλῶς γὰρ οὐκ ἔστιν ὕδωρ.

Ἔτι εἰ ὅλως τὸ ἀποδοθὲν μηδενός ἐστι γένος· δῆλον γὰρ ὡς οὐδὲ τοῦ λεχθέντος. σκοπεῖν δ’ ἐκ τοῦ μηδὲν διαφέρειν εἴδει τὰ μετέχοντα τοῦ ἀποδοθέντος γένους, οἷον τὰ λευκά· οὐδὲν γὰρ διαφέρει τῷ εἴδει ταῦτ’ ἀλλήλων, παντὸς δὲ γένους ἔστιν εἴδη διάφορα· ὥστ’ οὐκ ἂν εἴη τὸ λευκὸν γένος οὐδενός.

Πάλιν εἰ τὸ πᾶσιν ἀκολουθοῦν γένος ἢ διαφορὰν εἶπεν· πλείω γὰρ τὰ πᾶσιν ἑπόμενα, οἷον τὸ ὂν καὶ τὸ ἓν τῶν πᾶσιν ἑπομένων ἐστίν. εἰ οὖν τὸ ὂν γένος ἀποδέδωκε, δῆλον ὅτι πάντων ἂν εἴη γένος, ἐπειδὴ κατηγορεῖται αὐτῶν· κατ’ οὐδενὸς γὰρ τὸ γένος ἀλλ’ ἢ κατὰ τῶν εἰδῶν κατηγορεῖται. ὥστε καὶ τὸ ἓν εἶδος ἂν εἴη τοῦ ὄντος. συμβαίνει οὖν κατὰ πάντων ὧν τὸ γένος κατηγορεῖται καὶ τὸ εἶδος κατηγορεῖσθαι, ἐπειδὴ τὸ ὂν καὶ τὸ ἓν κατὰ πάντων ἁπλῶς κατηγορεῖται, δέον ἐπ’ ἔλαττον τὸ εἶδος κατηγορεῖσθαι. εἰ δὲ τὸ πᾶσιν ἑπόμενον διαφορὰν εἶπε, δῆλον ὅτι ἐπ’ ἴσον ἢ ἐπὶ πλέον ἡ διαφορὰ τοῦ γένους ῥηθήσεται· εἰ μὲν γὰρ καὶ τὸ γένος τῶν πᾶσιν ἑπομένων, ἐπ’ ἴσον· εἰ δὲ μὴ πᾶσιν ἕπεται τὸ γένος, ἐπὶ πλέον ἡ διαφορὰ λέγοιτ’ ἂν αὐτοῦ.

[127b] Ἔτι εἰ ἐν ὑποκειμένῳ τῷ εἴδει τὸ ἀποδοθὲν γένος λέγεται, καθάπερ τὸ λευκὸν ἐπὶ τῆς χιόνος, ὥστε δῆλον ὅτι οὐκ ἂν εἴη γένος· καθ’

ὑποκειμένου γὰρ τοῦ εἴδους μόνον τὸ γένος λέγεται.

Σκοπεῖν δὲ καὶ εἰ μὴ συνώνυμον τὸ γένος τῷ εἴδει· κατὰ πάντων γὰρ τῶν εἰδῶν συνωνύμως τὸ γένος κατηγορεῖται.

Ἔτι ὅταν ὄντος καὶ τῷ εἴδει καὶ τῷ γένει ἐναντίου τὸ βέλτιον τῶν ἐναντίων εἰς τὸ χεῖρον γένος θῇ· συμβήσεται γὰρ τὸ λοιπὸν ἐν τῷ λοιπῷ εἶναι, ἐπειδὴ τὰ ἐναντία ἐν τοῖς ἐναντίοις γένεσιν, ὥστε τὸ βέλτιον ἐν τῷ χείρονι ἔσται καὶ τὸ χεῖρον ἐν τῷ βελτίονι· δοκεῖ δὲ τοῦ βελτίονος καὶ τὸ γένος βέλτιον εἶναι. καὶ εἰ τοῦ αὐτοῦ εἴδους ὁμοίως πρὸς ἄμφω ἔχοντος εἰς τὸ χεῖρον καὶ μὴ εἰς τὸ βέλτιον γένος ἔθηκεν, οἷον τὴν ψυχὴν ὅπερ κίνησιν ἢ κινούμενον. ὁμοίως γὰρ αὕτη στατικὴ καὶ κινητικὴ δοκεῖ εἶναι· ὥστ' εἰ βέλτιον ἡ στάσις, εἰς τοῦτο ἔδει τὸ γένος θεῖναι.

Ἔτι ἐκ τοῦ μᾶλλον καὶ ἧττον, ἀνασκευάζοντι μέν, εἰ τὸ γένος δέχεται τὸ μᾶλλον, τὸ δ' εἶδος μὴ δέχεται, μήτ' αὐτὸ μήτε τὸ κατ' ἐκεῖνο λεγόμενον. οἷον εἰ ἡ ἀρετὴ δέχεται τὸ μᾶλλον, καὶ ἡ δικαιοσύνη καὶ ὁ δίκαιος· λέγεται γὰρ δικαιότερος ἕτερος ἑτέρου. εἰ οὖν τὸ μὲν ἀποδοθὲν γένος τὸ μᾶλλον δέχεται, τὸ δ' εἶδος μὴ δέχεται, μήτ' αὐτὸ μήτε τὸ κατ' ἐκεῖνο λεγόμενον, οὐκ ἂν εἴη γένος τὸ ἀποδοθέν.

Πάλιν εἰ τὸ μᾶλλον δοκοῦν ἢ ὁμοίως μὴ ἔστι γένος, δῆλον ὅτι οὐδὲ τὸ ἀποδοθέν. χρήσιμος δ' ὁ τόπος ἐπὶ τῶν τοιούτων μάλιστα, ἐφ' ὧν πλείω φαίνεται τοῦ εἴδους ἐν τῷ τί ἐστι κατηγορούμενα καὶ μὴ διώρισται μηδ' ἔχομεν εἰπεῖν ποῖον αὐτῶν γένος. οἷον τῆς ὀργῆς καὶ ἡ λύπη καὶ ἡ ὑπόληψις ὀλιγωρίας ἐν τῷ τί ἐστι κατηγορεῖσθαι δοκεῖ· λυπεῖταί τε γὰρ ὁ ὀργιζόμενος καὶ ὑπολαμβάνει ὀλιγωρεῖσθαι. ἡ αὐτὴ δὲ σκέψις καὶ ἐπὶ τοῦ εἴδους πρὸς ἄλλο τι συγκρίνοντι· εἰ γὰρ τὸ μᾶλλον ἢ τὸ ὁμοίως δοκοῦν εἶναι ἐν τῷ ἀποδοθέντι γένει μὴ ἔστιν ἐν τῷ γένει, δῆλον ὅτι οὐδὲ τὸ ἀποδοθὲν εἶδος εἴη ἂν ἐν τῷ γένει.

Ἀναιροῦντι μὲν οὖν καθάπερ εἴρηται χρηστέον. κατασκευάζοντι δέ, εἰ μὲν ἐπιδέχεται τὸ μᾶλλον τό τε ἀποδοθὲν [128a] γένος καὶ τὸ εἶδος, οὐ χρήσιμος ὁ τόπος· οὐδὲν γὰρ κωλύει ἀμφοτέρων ἐπιδεχομένων μὴ εἶναι θάτερον θατέρου γένος· τό τε γὰρ καλὸν καὶ τὸ λευκὸν ἐπιδέχεται τὸ μᾶλλον, καὶ οὐδέτερον οὐδετέρου γένος. ἡ δὲ τῶν γενῶν καὶ τῶν εἰδῶν πρὸς ἄλληλα σύγκρισις χρήσιμος· οἷον εἰ ὁμοίως τόδε καὶ τόδε γένος, εἰ θάτερον γένος, καὶ θάτερον. ὁμοίως δὲ καὶ εἰ τὸ ἧττον, καὶ τὸ μᾶλλον· οἷον εἰ τῆς ἐγκρατείας μᾶλλον ἡ δύναμις ἢ ἡ ἀρετὴ γένος, ἡ δ' ἀρετὴ γένος, καὶ ἡ δύναμις. τὰ δ' αὐτὰ καὶ ἐπὶ τοῦ εἴδους ἁρμόσει λέγεσθαι· εἰ γὰρ ὁμοίως τόδε καὶ τόδε τοῦ προκειμένου εἶδος, εἰ θάτερον εἶδος, καὶ τὸ λοιπόν· καὶ εἰ τὸ ἧττον δοκοῦν εἶδός ἐστι, καὶ τὸ μᾶλλον.

Ἔτι πρὸς τὸ κατασκευάζειν σκεπτέον εἰ καθ’ ὧν ἀπεδόθη τὸ γένος, ἐν τῷ τί ἐστι κατηγορεῖται, μὴ ὄντος ἑνὸς τοῦ ἀποδοθέντος εἴδους ἀλλὰ πλειόνων καὶ διαφόρων· δῆλον γὰρ ὅτι γένος ἔσται. εἰ δ’ ἓν τὸ ἀποδοθὲν εἶδός ἐστι, σκοπεῖν εἰ καὶ κατ’ ἄλλων εἰδῶν τὸ γένος ἐν τῷ τί ἐστι κατηγορεῖται· πάλιν γὰρ συμβήσεται κατὰ πλειόνων καὶ διαφόρων αὐτὸ κατηγορεῖσθαι.

Ἐπεὶ δὲ δοκεῖ τισι καὶ ἡ διαφορὰ ἐν τῷ τί ἐστι τῶν εἰδῶν κατηγορεῖσθαι, χωριστέον τὸ γένος ἀπὸ τῆς διαφορᾶς χρώμενον τοῖς εἰρημένοις στοιχείοις, πρῶτον μὲν ὅτι τὸ γένος ἐπὶ πλέον λέγεται τῆς διαφορᾶς, εἶθ’ ὅτι κατὰ τὴν τοῦ τί ἐστιν ἀπόδοσιν μᾶλλον ἁρμόττει τὸ γένος ἢ τὴν διαφορὰν εἰπεῖν (ὁ γὰρ ζῷον εἴπας τὸν ἄνθρωπον μᾶλλον δηλοῖ τί ἐστιν ὁ ἄνθρωπος ἢ ὁ πεζόν), καὶ ὅτι ἡ μὲν διαφορὰ ποιότητα τοῦ γένους ἀεὶ σημαίνει, τὸ δὲ γένος τῆς διαφορᾶς οὔ· ὁ μὲν γὰρ εἴπας πεζὸν ποιόν τι ζῷον λέγει, ὁ δὲ ζῷον εἴπας οὐ λέγει ποιόν τι πεζόν.

Τὴν μὲν οὖν διαφορὰν ἀπὸ τοῦ γένους οὕτω χωριστέον. ἐπεὶ δὲ δοκεῖ, ‹εἰ› τὸ μουσικόν, ᾗ μουσικόν ἐστιν, ἐπιστῆμόν τί ἐστι, καὶ ἡ μουσικὴ ἐπιστήμη τις εἶναι, καὶ εἰ τὸ βαδίζον τῷ βαδίζειν κινεῖται, ἡ βάδισις κίνησίς τις εἶναι, σκοπεῖν, ἐν ᾧ ἂν γένει βούλῃ τι κατασκευάσαι, τὸν εἰρημένον τρόπον, οἷον εἰ τὴν ἐπιστήμην ὅπερ πίστιν, εἰ ὁ ἐπιστάμενος ᾗ ἐπίσταται πιστεύει· δῆλον γὰρ ὅτι ἡ ἐπιστήμη πίστις ἄν τις εἴη. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων.

Ἔτι ἐπεὶ τὸ παρεπόμενόν τινι ἀεὶ καὶ μὴ ἀντιστρέφον χαλεπὸν χωρίσαι τοῦ μὴ γένος εἶναι, ἂν τόδε μὲν τῷδ’ ἕπηται [128b] παντί, τόδε δὲ τῷδε μὴ παντί, οἷον τῇ νηνεμίᾳ ἡ ἠρεμία καὶ τῷ ἀριθμῷ τὸ διαιρετόν, ἀνάπαλιν δ’ οὔ (τὸ γὰρ διαιρετὸν οὐ πᾶν ἀριθμός, οὐδ’ ἡ ἠρεμία νηνεμία), αὐτὸν μὲν χρῆσθαι ὡς γένους ὄντος τοῦ ἀεὶ ἀκολουθοῦντος, ὅταν μὴ ἀντιστρέφῃ θάτερον, ἄλλου δὲ προτείνοντος μὴ ἐπὶ πάντων ὑπακούειν. ἔνστασις δ’ αὐτοῦ ὅτι τὸ μὴ ὂν ἕπεται παντὶ τῷ γινομένῳ (τὸ γὰρ γινόμενον οὐκ ἔστι) καὶ οὐκ ἀντιστρέφει (οὐ γὰρ πᾶν τὸ μὴ ὂν γίνεται), ἀλλ’ ὅμως οὐκ ἔστι γένος τὸ μὴ ὂν τοῦ γινομένου· ἁπλῶς γὰρ οὐκ ἔστι τοῦ μὴ ὄντος εἴδη.

Περὶ μὲν οὖν τοῦ γένους καθάπερ εἴρηται μετιτέον.

E

Πότερον δ’ ἴδιον ἢ οὐκ ἴδιόν ἐστι τὸ εἰρημένον, διὰ τῶνδε σκεπτέον.

Ἀποδίδοται [δὲ] τὸ ἴδιον ἢ καθ’ αὑτὸ καὶ ἀεί, ἢ πρὸς ἕτερον καὶ ποτέ, οἷον καθ’ αὑτὸ μὲν ἀνθρώπου τὸ ζῷον ἥμερον φύσει, πρὸς ἕτερον δὲ οἷον ψυχῆς πρὸς σῶμα, ὅτι τὸ μὲν προστακτικὸν τὸ δ’ ὑπηρετικόν ἐστιν, ἀεὶ δὲ οἷον θεοῦ τὸ ζῷον ἀθάνατον, ποτὲ δ’ οἷον τοῦ τινὸς ἀνθρώπου τὸ περιπατεῖν ἐν τῷ γυμνασίῳ.

Ἔστι δὲ τοῦ πρὸς ἕτερον ἰδίου ἀποδιδομένου ἢ δύο προβλήματα ἢ τέτταρα. ἐὰν μὲν γὰρ τοῦ μὲν ἀποδῷ τοῦ δ’ ἀρνήσηται ταὐτὸ τοῦτο, δύο μόνον προβλήματα γίνονται, καθάπερ τὸ ἀνθρώπου πρὸς ἵππον ἴδιον ὅτι δίπουν ἐστίν. καὶ γὰρ ὅτι ἄνθρωπος οὐ δίπουν ἐστὶν ἐπιχειροίη τις ἄν, καὶ ὅτι ὁ ἵππος δίπουν· ἀμφοτέρως δ’ ἂν κινοῖτο τὸ ἴδιον. ἐὰν δ’ ἑκατέρου ἑκάτερον ἀποδῷ καὶ ἑκατέρου ἀπαρνηθῇ, τέτταρα προβλήματα ἔσται, καθάπερ τὸ ἀνθρώπου ἴδιον πρὸς ἵππον, ὅτι τὸ μὲν δίπουν τὸ δὲ τετράπουν ἐστίν. καὶ γὰρ ὅτι ἄνθρωπος οὐ δίπουν καὶ ὅτι τετράπουν πέφυκεν ἔστιν ἐπιχειρεῖν, καὶ ὅτι ὁ ἵππος δίπουν καὶ ὅτι οὐ τετράπουν οἷόν τ’ ἐπιχειρεῖν. ὅπως δ’ οὖν δειχθέντος ἀναιρεῖται τὸ κείμενον.

Ἔστι δὲ τὸ μὲν καθ’ αὑτὸ ἴδιον ὃ πρὸς ἅπαντα ἀποδίδοται καὶ παντὸς χωρίζει, καθάπερ ἀνθρώπου τὸ ζῷον θνητὸν ἐπιστήμης δεκτικόν· τὸ δὲ πρὸς ἕτερον ὃ μὴ ἀπὸ παντὸς ἀλλ’ ἀπό τινος τακτοῦ διορίζει, καθάπερ ἀρετῆς πρὸς ἐπιστήμην, ὅτι τὸ μὲν ἐν πλείοσι, τὸ δ’ ἐν λογιστικῷ μόνον καὶ τοῖς ἔχουσι λογιστικὸν πέφυκε γίνεσθαι. τὸ δ’ ἀεὶ ὃ [129a] κατὰ πάντα χρόνον ἀληθεύεται καὶ μηδέποτ’ ἀπολείπεται, καθάπερ τοῦ ζῴου τὸ ἐκ ψυχῆς καὶ σώματος συγκείμενον, τὸ δὲ ποτὲ ὃ κατά τινα χρόνον ἀληθεύεται καὶ μὴ ἐξ ἀνάγκης ἀεὶ παρέπεται, καθάπερ τοῦ τινὸς ἀνθρώπου τὸ περιπατεῖν ἐν ἀγορᾷ.

Ἔστι δὲ τὸ πρὸς ἄλλο ἴδιον ἀποδοῦναι τὸ διαφορὰν εἰπεῖν ἢ ἐν ἅπασι καὶ ἀεί, ἢ ὡς ἐπὶ τὸ πολὺ καὶ ἐν τοῖς πλείστοις. οἷον ἐν ἅπασι μὲν καὶ ἀεὶ καθάπερ τὸ ἀνθρώπου ἴδιον πρὸς ἵππον ὅτι δίπουν· ἄνθρωπος μὲν γὰρ καὶ ἀεὶ καὶ πᾶς ἐστι δίπους, ἵππος δ’ οὐδείς ἐστι δίπους οὐδέποτε. ὡς ἐπὶ τὸ πολὺ δὲ καὶ ἐν τοῖς πλείστοις καθάπερ τὸ λογιστικοῦ ἴδιον πρὸς ἐπιθυμητικὸν καὶ θυμικὸν τὸ τὸ μὲν προστάττειν τὸ δ’ ὑπηρετεῖν· οὔτε γὰρ τὸ λογιστικὸν πάντοτε προστάττει, ἀλλ’ ἐνίοτε καὶ προστάττεται, οὔτε τὸ ἐπιθυμητικὸν καὶ θυμικὸν ἀεὶ προστάττεται, ἀλλὰ καὶ προστάττει ποτέ, ὅταν ᾖ μοχθηρὰ ἡ ψυχὴ τοῦ ἀνθρώπου.

Τῶν δ’ ἰδίων ἐστὶ λογικὰ μάλιστα τά τε καθ’ αὑτὰ καὶ ἀεὶ καὶ τὰ πρὸς ἕτερον. τοῦ μὲν γὰρ πρὸς ἕτερον ἰδίου πλείω προβλήματά ἐστι, καθάπερ εἴπομεν καὶ πρότερον· ἢ γὰρ δύο ἢ τέτταρα ἐξ ἀνάγκης γίνονται τὰ προβλήματα. πλείους οὖν οἱ λόγοι γίνονται πρὸς ταῦτα. τὸ δὲ καθ’ αὑτὸ καὶ τὸ ἀεὶ πρὸς πολλὰ ἔστιν ἐπιχειρεῖν ἢ πρὸς πλείους χρόνους παρατηρεῖν, τὸ μὲν καθ’ αὑτὸ πρὸς πολλά (πρὸς ἕκαστον γὰρ τῶν ὄντων δεῖ ὑπάρχειν αὐτῷ τὸ ἴδιον, ὥστ’ εἰ μὴ πρὸς ἅπαντα χωρίζεται, οὐκ ἂν εἴη καλῶς ἀποδεδομένον τὸ ἴδιον), τὸ δ’ ἀεὶ πρὸς πολλοὺς χρόνους παρατηρεῖν· κἂν εἰ γὰρ μὴ ὑπάρχει κἂν εἰ μὴ ὑπῆρξε κἂν εἰ μὴ ὑπάρξει, οὐκ ἔσται ἴδιον. τὸ δὲ ποτὲ πρὸς τὸν νῦν μόνον χρόνον ἐπισκοποῦμεν· οὔκουν εἰσὶ λόγοι πρὸς αὐτὸ πολλοί· λογικὸν δὲ τοῦτ’ ἔστι πρόβλημα πρὸς ὃ λόγοι γένοιντ’ ἂν καὶ συχνοὶ καὶ καλοί.

Τὸ μὲν οὖν πρὸς ἕτερον ἴδιον ῥηθὲν ἐκ τῶν περὶ τὸ συμβεβηκὸς τόπων ἐπισκεπτέον ἐστίν, εἰ τῷ μὲν συμβέβηκε τῷ δὲ μὴ συμβέβηκεν. περὶ δὲ τῶν ἀεὶ καὶ τῶν καθ’ αὑτὸ διὰ τῶνδε θεωρητέον.

[129b] Πρῶτον μὲν εἰ μὴ καλῶς ἀποδέδοται τὸ ἴδιον ἢ καλῶς. τοῦ δὲ μὴ καλῶς ἢ καλῶς ἐστιν ἓν μέν, εἰ μὴ διὰ γνωριμωτέρων ἢ διὰ γνωριμωτέρων κεῖται τὸ ἴδιον, ἀνασκευάζοντα μὲν εἰ μὴ διὰ γνωριμωτέρων, κατασκευάζοντα δὲ εἰ διὰ γνωριμωτέρων. τοῦ δὲ μὴ διὰ γνωριμωτέρων ἐστὶ τὸ μὲν εἰ ὅλως ἀγνωστότερόν ἐστι τὸ ἴδιον ὃ ἀποδίδωσι τούτου οὗ τὸ ἴδιον εἴρηκεν· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον. γνώσεως γὰρ ἕνεκα τὸ ἴδιον ποιούμεθα· διὰ γνωριμωτέρων οὖν ἀποδοτέον· οὕτω γὰρ ἔσται κατανοεῖν ἱκανῶς μᾶλλον. οἷον ἐπεὶ ὁ θεὶς πυρὸς ἴδιον εἶναι τὸ ὁμοιότατον ψυχῇ ἀγνωστοτέρῳ κέχρηται τοῦ πυρὸς τῇ ψυχῇ (μᾶλλον γὰρ ἴσμεν τί ἐστι πῦρ ἢ ψυχή), οὐκ ἂν εἴη καλῶς κείμενον ἴδιον πυρὸς τὸ ὁμοιότατον ψυχῇ. τὸ δ’ εἰ μὴ γνωριμώτερόν ἐστι τόδε τῷδ’ ὑπάρχον. δεῖ γὰρ μὴ μόνον εἶναι γνωριμώτερον τοῦ πράγματος, ἀλλὰ καὶ ὅτι τῷδ’ ὑπάρχει γνωριμώτερον· ὁ μὴ γὰρ εἰδὼς εἰ τῷδ’ ὑπάρχει οὐδ’ εἰ τῷδε ὑπάρχει μόνῳ γνωριεῖ, ὥσθ’ ὁποτέρου τούτων συμβάντος ἀσαφὲς γίνεται τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὶς πυρὸς ἴδιον τὸ ἐν ᾧ πρώτῳ ψυχὴ πέφυκεν εἶναι ἀγνωστοτέρῳ κέχρηται τοῦ πυρὸς τῷ εἰ ἐν τούτῳ ὑπάρχει ψυχὴ καὶ εἰ ἐν πρώτῳ ὑπάρχει, οὐκ ἂν εἴη καλῶς κείμενον ἴδιον πυρὸς τὸ ἐν ᾧ πρώτῳ ψυχὴ πέφυκεν εἶναι. κατασκευάζοντα δὲ εἰ διὰ γνωριμωτέρων κεῖται τὸ ἴδιον, καὶ εἰ διὰ γνωριμωτέρων καθ’ ἑκάτερον τῶν τρόπων. ἔσται γὰρ καλῶς κατὰ τοῦτο κείμενον τὸ ἴδιον· τῶν γὰρ κατασκευαστικῶν τόπων τοῦ καλῶς οἱ μὲν κατὰ τοῦτο μόνον, οἱ δ’ ἁπλῶς δείξουσιν ὅτι καλῶς. οἷον ἐπεὶ ὁ εἴπας ζῴου ἴδιον τὸ αἴσθησιν ἔχειν διὰ γνωριμωτέρων καὶ γνωριμώτερον ἀποδέδωκε τὸ ἴδιον καθ’ ἑκάτερον

τῶν τρόπων, εἴη ἂν καλῶς ἀποδεδομένον κατὰ τοῦτο τοῦ ζῴου ἴδιον τὸ αἴσθησιν ἔχειν.

Ἔπειτ᾽ ἀνασκευάζοντα μὲν εἴ τι τῶν ὀνομάτων τῶν ἐν τῷ ἰδίῳ ἀποδεδομένων πλεοναχῶς λέγεται, ἢ καὶ ὅλος ὁ λόγος πλείω σημαίνει· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ τὸ αἰσθάνεσθαι πλείω σημαίνει, ἓν μὲν τὸ αἴσθησιν ἔχειν ἓν δὲ τὸ αἰσθήσει χρῆσθαι, οὐκ ἂν εἴη τοῦ ζῴου ἴδιον καλῶς κείμενον τὸ αἰσθάνεσθαι πεφυκός. διὰ τοῦτο [130a] δ᾽ οὐ χρηστέον ἐστὶν οὔτ᾽ ὀνόματι πλεοναχῶς λεγομένῳ οὔτε λόγῳ τῷ τὸ ἴδιον σημαίνοντι, διότι τὸ πλεοναχῶς λεγόμενον ἀσαφὲς ποιεῖ τὸ ῥηθέν, ἀποροῦντος τοῦ μέλλοντος ἐπιχειρεῖν πότερον λέγει τῶν πλεοναχῶς λεγομένων· τὸ γὰρ ἴδιον τοῦ μαθεῖν χάριν ἀποδίδοται. ἔτι δὲ πρὸς τούτοις ἀναγκαῖόν ἐστιν ἔλεγχόν τινα γίνεσθαι τοῖς οὕτως ἀποδιδοῦσι τὸ ἴδιον, ὅταν ἐπὶ τοῦ διαφωνοῦντός τις ποιῇ τὸν συλλογισμὸν τοῦ πλεοναχῶς λεγομένου. κατασκευάζοντα δὲ εἰ μὴ πλείω σημαίνει μήτε τῶν ὀνομάτων μηδὲν μήθ᾽ ὅλος ὁ λόγος· ἔσται γὰρ καλῶς κατὰ τοῦτο κείμενον τὸ ἴδιον. οἷον ἐπεὶ οὔτε τὸ σῶμα πολλὰ δηλοῖ οὔτε τὸ εὐκινητότατον εἰς τὸν ἄνω τόπον οὔτε τὸ σύνολον τὸ ἐκ τούτων συντιθέμενον, εἴη ἂν καλῶς κείμενον κατὰ τοῦτο πυρὸς ἴδιον σῶμα τὸ εὐκινητότατον εἰς τὸν ἄνω τόπον.

Ἔπειτ᾽ ἀνασκευάζοντα μὲν εἰ πλεοναχῶς λέγεται τοῦτο οὗ τὸ ἴδιον ἀποδίδωσι, μὴ διώρισται δὲ τὸ τίνος αὐτῶν ἴδιον τίθησιν· οὐ γὰρ ἔσται καλῶς ἀποδεδομένον τὸ ἴδιον. δι᾽ ἃς δ᾽ αἰτίας, οὐκ ἄδηλόν ἐστιν ἐκ τῶν πρότερον εἰρημένων· τὰ γὰρ αὐτὰ συμβαίνειν ἀναγκαῖόν ἐστιν. οἷον ἐπεὶ τὸ ἐπίστασθαι τοῦτο πολλὰ σημαίνει (τὸ μὲν γὰρ ἐπιστήμην ἔχειν αὐτό, τὸ δ᾽ ἐπιστήμῃ χρῆσθαι αὐτό, τὸ δ᾽ ἐπιστήμην ἔχειν αὐτοῦ, τὸ δ᾽ ἐπιστήμῃ χρῆσθαι αὐτοῦ), οὐκ ἂν εἴη τοῦ ἐπίστασθαι τοῦτο καλῶς ἴδιον ἀποδεδομένον, μὴ διορισθέντος τοῦ τίνος τίθησιν αὐτῶν τὸ ἴδιον. κατασκευάζοντα δὲ εἰ μὴ λέγεται πολλαχῶς τοῦτο οὗ τὸ ἴδιον τίθησιν, ἀλλ᾽ ἔστιν ἓν καὶ ἁπλοῦν· ἔσται γὰρ καλῶς κατὰ τοῦτο κείμενον τὸ ἴδιον. οἷον ἐπεὶ ὁ ἄνθρωπος μοναχῶς λέγεται ἕν, εἴη ἂν καλῶς κείμενον κατὰ τοῦτο ἀνθρώπου ἴδιον τὸ ζῷον ἥμερον φύσει.

Ἔπειτ᾽ ἀνασκευάζοντα μὲν εἰ πλεονάκις εἴρηται τὸ αὐτὸ ἐν τῷ ἰδίῳ· πολλάκις γὰρ λανθάνουσι τοῦτο ποιοῦντες καὶ ἐν τοῖς ἰδίοις, καθάπερ καὶ ἐν τοῖς ὅροις. οὐκ ἔσται δὲ καλῶς κείμενον τὸ τοῦτο πεπονθὸς ἴδιον· ταράττει γὰρ τὸν ἀκούοντα πλεονάκις λεχθέν. ἀσαφὲς οὖν ἀναγκαῖόν ἐστι γίνεσθαι, καὶ πρὸς τούτοις ἀδολεσχεῖν δοκοῦσιν. ἔσται δὲ συμπῖπτον τὸ πλεονάκις εἰπεῖν τὸ αὐτὸ κατὰ δύο τρόπους· καθ᾽ ἕνα μέν, ὅταν ὀνομάσῃ πλεονάκις τὸ αὐτό, καθάπερ εἴ τις ἴδιον ἀποδοίη πυρὸς σῶμα τὸ λεπτότατον τῶν σωμάτων (οὗτος γὰρ πλεονάκις εἴρηκε τὸ “σῶμα”)· δεύτερον δ’, ἄν τις μεταλαμβάνῃ τοὺς λόγους ἀντὶ τῶν ὀνομάτων, καθάπερ εἴ [130b] τις ἀποδοίη γῆς ἴδιον “οὐσία ἡ μάλιστα κατὰ φύσιν φερομένη τῶν σωμάτων εἰς τὸν κάτω τόπον”, ἔπειτα μεταλάβοι ἀντὶ τῶν “σωμάτων” τὸ “οὐσιῶν τοιωνδί”· ἓν γὰρ καὶ ταὐτόν ἐστι σῶμα καὶ οὐσία τοιαδί· ἔσται γὰρ οὗτος τὸ “οὐσία” πλεονάκις εἰρηκώς. ὥστ’ οὐδέτερον ἂν εἴη καλῶς κείμενον τῶν ἰδίων. κατασκευάζοντα δὲ εἰ μηδενὶ χρῆται πλεονάκις ὀνόματι τῷ αὐτῷ· ἔσται γὰρ κατὰ τοῦτο καλῶς ἀποδεδομένον τὸ ἴδιον. οἷον ἐπεὶ ὁ εἴπας ἀνθρώπου ἴδιον ζῷον ἐπιστήμης δεκτικὸν οὐ κέχρηται τῷ αὐτῷ πλεονάκις ὀνόματι, εἴη ἂν κατὰ τοῦτο καλῶς ἀποδεδομένον τοῦ ἀνθρώπου τὸ ἴδιον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τοιοῦτόν τι ἀποδέδωκεν ἐν τῷ ἰδίῳ ὃ πᾶσιν ὑπάρχει. ἀχρεῖον γὰρ ἔσται τὸ μὴ χωρίζον ἀπό τινων· τὸ δ’ ἐν τοῖς ἰδίοις λεγόμενον χωρίζειν δεῖ, καθάπερ καὶ τὸ ἐν τοῖς ὅροις. οὔκουν ἔσται καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὶς ἐπιστήμης ἴδιον ὑπόληψιν ἀμετάπειστον ὑπὸ λόγου ἓν οὖσαν τοιούτῳ τινὶ κέχρηται ἐν τῷ ἰδίῳ, τῷ ἑνί, ὃ πᾶσιν ὑπάρχει, οὐκ ἂν εἴη καλῶς κείμενον τὸ τῆς ἐπιστήμης ἴδιον. κατασκευάζοντα δὲ εἰ μηδενὶ κέχρηται κοινῷ ἀλλ’ ἀπό τινος χωρίζοντι· ἔσται γὰρ καλῶς κείμενον κατὰ τοῦτο τὸ ἴδιον. οἷον ἐπεὶ ὁ εἴπας ζῴου ἴδιον τὸ ψυχὴν ἔχειν οὐδενὶ κέχρηται κοινῷ, εἴη ἂν κατὰ τοῦτο καλῶς κείμενον ζῴου ἴδιον τὸ ψυχὴν ἔχειν.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ πλείω ἴδια ἀποδίδωσι τοῦ αὐτοῦ, μὴ διορίσας ὅτι πλείω τίθησιν· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον. καθάπερ γὰρ οὐδ’ ἐν τοῖς ὅροις δεῖ παρὰ τὸν δηλοῦντα λόγον τὴν οὐσίαν προσκεῖσθαί τι πλέον, οὕτως οὐδ’ ἐν τοῖς ἰδίοις παρὰ τὸν ποιοῦντα λόγον ἴδιον τὸ ῥηθὲν οὐδὲν προσαποδοτέον· ἀχρεῖον γὰρ γίνεται τὸ τοιοῦτον. οἷον ἐπεὶ ὁ εἴπας ἴδιον πυρὸς σῶμα τὸ λεπτότατον καὶ κουφότατον πλείω ἀποδέδωκεν ἴδια (ἑκάτερον γὰρ κατὰ μόνου τοῦ πυρὸς ἀληθές ἐστιν εἰπεῖν), οὐκ ἂν εἴη καλῶς κείμενον ἴδιον πυρὸς σῶμα τὸ λεπτότατον καὶ κουφότατον. κατασκευάζοντα δ’ εἰ μὴ πλείω τοῦ αὐτοῦ τὰ ἴδια ἀποδέδωκεν ἀλλ’ ἕν· ἔσται γὰρ κατὰ τοῦτο καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ ὁ εἴπας ὑγροῦ ἴδιον σῶμα τὸ εἰς ἅπαν σχῆμα ἀγόμενον ἓν ἀποδέδωκε τὸ ἴδιον ἀλλ’ οὐ πλείω, εἴη ἂν κατὰ τοῦτο καλῶς κείμενον τὸ τοῦ ὑγροῦ ἴδιον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ μὴ τὸ ἀεὶ παρεπόμενον ἴδιον ἀποδέδωκεν, ἀλλὰ τοῦτο ὃ γίνεταί ποτε μὴ ἴδιον· οὐ γὰρ ἔσται καλῶς εἰρημένον τὸ ἴδιον. οὔτε γὰρ ἐφ’ ᾧ καταλαμβάνομεν ὑπάρχον αὐτό, κατὰ τούτου καὶ τοὔνομα ἐξ ἀνάγκης ἀληθεύεται, οὔτ’ ἐφ’ ᾧ καταλαμβάνεται μὴ ὑπάρχον, κατὰ τούτου ἐξ ἀνάγκης οὐ ῥηθήσεται τοὔνομα, ὥστ’ οὐκ ἂν εἴη καλῶς κείμενον τὸ ἴδιον. ἔτι δὲ πρὸς τούτοις οὐδ’ ὅτε ἀποδέδωκε τὸ ἴδιον ἔσται φανερὸν εἰ ὑπάρχει, εἴπερ τοιοῦτόν ἐστιν οἷον ἀπολείπειν. οὔκουν ἔσται σαφὲς τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὶς ζῴου ἴδιον τὸ κινεῖσθαί ποτε καὶ ἑστάναι τοιοῦτον ἀποδέδωκε τὸ ἴδιον ὃ οὐ γίνεταί ποτε ἴδιον, οὐκ ἂν εἴη καλῶς κείμενον τὸ ἴδιον. κατασκευάζοντα δὲ εἰ τὸ ἐξ ἀνάγκης ἀεὶ ὂν ἴδιον ἀποδέδωκεν· ἔσται γὰρ [131b] καλῶς κείμενον κατὰ τοῦτο τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὶς ἀρετῆς ἴδιον “ὃ τὸν ἔχοντα ποιεῖ σπουδαῖον” τὸ ἀεὶ παρεπόμενον ἴδιον ἀποδέδωκεν, εἴη ἂν κατὰ τοῦτο καλῶς ἀποδεδομένον τὸ τῆς ἀρετῆς ἴδιον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τὸ νῦν ἴδιον ἀποδιδοὺς μὴ διωρίσατο ὅτι τὸ νῦν ἴδιον ἀποδίδωσιν· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον. πρῶτον μὲν γὰρ τὸ παρὰ τὸ ἔθος γινόμενον ἅπαν διορισμοῦ προσδεῖται· εἰώθασι δ’ ὡς ἐπὶ τὸ πολὺ πάντες τὸ ἀεὶ παρακολουθοῦν ἴδιον ἀποδιδόναι. δεύτερον δὲ ἄδηλός ἐστιν ὁ μὴ διορισάμενος εἰ τὸ νῦν ἴδιον ἐβούλετο θεῖναι· οὔκουν δοτέον ἐστὶν ἐπιτιμήσεως σκῆψιν. οἷον ἐπεὶ ὁ θέμενος τοῦ τινὸς ἀνθρώπου ἴδιον τὸ καθῆσθαι μετά τινος τὸ νῦν ἴδιον τίθησιν, οὐκ ἂν εἴη καλῶς τὸ ἴδιον ἀποδεδωκώς, εἴπερ μὴ διορισάμενος εἶπεν. κατασκευάζοντα δ’ εἰ τὸ νῦν ἴδιον ἀποδιδοὺς διορισάμενος ἔθηκεν ὅτι τὸ νῦν ἴδιον τίθησιν· ἔσται γὰρ καλῶς κείμενον κατὰ τοῦτο τὸ ἴδιον. οἷον ἐπεὶ ὁ εἴπας τοῦ τινὸς ἀνθρώπου ἴδιον τὸ περιπατεῖν νῦν διαστειλάμενος ἔθηκε τοῦτο, καλῶς ἂν εἴη κείμενον τὸ ἴδιον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τοιοῦτο ἀποδέδωκε τὸ ἴδιον, ὃ φανερὸν μὴ ἔστιν ἄλλως ὑπάρχον ἢ αἰσθήσει· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον. ἅπαν γὰρ τὸ αἰσθητὸν ἔξω γινόμενον τῆς αἰσθήσεως ἄδηλον γίνεται· ἀφανὲς γάρ ἐστιν εἰ ἔτι ὑπάρχει, διὰ τὸ τῇ αἰσθήσει μόνον γνωρίζεσθαι. ἔσται δ’ ἀληθὲς τοῦτο ἐπὶ τῶν μὴ ἐξ ἀνάγκης ἀεὶ παρακολουθούντων. οἷον ἐπεὶ ὁ θέμενος ἡλίου ἴδιον ἄστρον φερόμενον ὑπὲρ γῆς τὸ λαμπρότατον τοιούτῳ κέχρηται ἐν τῷ ἰδίῳ, τῷ ὑπὲρ γῆς φέρεσθαι, ὃ τῇ αἰσθήσει γνωρίζεται, οὐκ ἂν εἴη καλῶς τὸ τοῦ ἡλίου ἀποδεδομένον ἴδιον· ἄδηλον γὰρ ἔσται, ὅταν δύῃ ὁ ἥλιος, εἰ φέρεται ὑπὲρ γῆς, διὰ τὸ τὴν αἴσθησιν τότε ἀπολείπειν ἡμᾶς. κατασκευάζοντα δ’ εἰ τοιοῦτον ἀποδέδωκε τὸ ἴδιον ὃ μὴ τῇ αἰσθήσει φανερόν ἐστιν ἢ ὃ αἰσθητὸν ὂν ἐξ ἀνάγκης ὑπάρχον δῆλόν ἐστιν· ἔσται γὰρ κατὰ τοῦτο καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ ὁ θέμενος ἐπιφανείας ἴδιον “ὃ πρῶτον κέχρωσται” αἰσθητῷ μέν τινι προσκέχρηται τῷ κεχρῶσθαι, τοιούτῳ δ’ ὃ φανερόν ἐστιν ὑπάρχον ἀεί, εἴη ἂν κατὰ τοῦτο καλῶς ἀποδεδομένον τὸ τῆς ἐπιφανείας ἴδιον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τὸν ὅρον ὡς ἴδιον ἀποδέδωκεν· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον· οὐ γὰρ δεῖ [132a] δηλοῦν τὸ τί ἦν εἶναι τὸ ἴδιον. οἷον ἐπεὶ ὁ εἴπας ἀνθρώπου ἴδιον ζῷον πεζὸν δίπουν τὸ τί ἦν εἶναι σημαῖνον ἀποδέδωκε τοῦ ἀνθρώπου ἴδιον, οὐκ ἂν εἴη τὸ τοῦ ἀνθρώπου ἴδιον καλῶς ἀποδεδομένον. κατασκευάζοντα δὲ εἰ ἀντικατηγορούμενον μὲν ἀποδέδωκε τὸ ἴδιον, μὴ τὸ τί ἦν εἶναι δὲ δηλοῦν· ἔσται γὰρ κατὰ τοῦτο καλῶς ἀποδεδομένον τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὶς ἀνθρώπου ἴδιον ζῷον ἥμερον φύσει ἀντικατηγορούμενον μὲν ἀποδέδωκε τὸ ἴδιον, οὐ τὸ τί ἦν εἶναι δὲ δηλοῦν, εἴη ἂν κατὰ τοῦτο καλῶς ἀποδεδομένον τὸ ἴδιον τοῦ ἀνθρώπου.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ μὴ εἰς τὸ τί ἐστιν θεὶς ἀποδέδωκε τὸ ἴδιον. δεῖ γὰρ τῶν ἰδίων, καθάπερ καὶ τῶν ὅρων, τὸ πρῶτον ἀποδίδοσθαι γένος, ἔπειθ’ οὕτως ἤδη προσάπτεσθαι τὰ λοιπὰ καὶ χωρίζειν. ὥστε τὸ μὴ τοῦτον τὸν τρόπον κείμενον ἴδιον οὐκ ἂν εἴη καλῶς ἀποδεδομένον. οἷον ἐπεὶ ὁ εἴπας ζῴου ἴδιον τὸ ψυχὴν ἔχειν οὐκ ἔθηκεν εἰς τὸ τί ἐστι τὸ ζῷον, οὐκ ἂν εἴη καλῶς κείμενον τὸ τοῦ ζῴου ἴδιον. κατασκευάζοντα δὲ εἴ τις εἰς τὸ τί ἐστι θεὶς οὗ τὸ ἴδιον ἀποδίδωσι τὰ λοιπὰ προσάπτει· ἔσται γὰρ κατὰ τοῦτο καλῶς ἀποδεδομένον τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὶς ἀνθρώπου ἴδιον ζῷον ἐπιστήμης δεκτικὸν εἰς τὸ τί ἐστι θεὶς ἀποδέδωκε τὸ ἴδιον, εἴη ἂν κατὰ τοῦτο καλῶς κείμενον τὸ ἴδιον τοῦ ἀνθρώπου.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ μὴ καθ’ οὗ τοὔνομα, καὶ ὁ λόγος, καὶ εἰ μὴ καθ’ οὗ ὁ λόγος, καὶ τοὔνομα λέγεται· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον ἴδιον εἶναι. οἷον ἐπεὶ τὸ μὲν ζῷον ἐπιστήμης μετέχον ἀληθεύεται κατὰ τοῦ θεοῦ, ὁ δ’ ἄνθρωπος οὐ κατηγορεῖται, οὐκ ἂν εἴη τοῦ ἀνθρώπου ἴδιον ζῷον ἐπιστήμης μετέχον. κατασκευάζοντα δὲ εἰ καθ’ οὗ ὁ λόγος, καὶ τοὔνομα κατηγορεῖται, καὶ καθ’ οὗ τοὔνομα, καὶ ὁ λόγος κατηγορεῖται· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ καθ’ οὗ τὸ ψυχὴν ἔχειν, τὸ ζῷον ἀληθεύεται, καὶ καθ’ οὗ τὸ ζῷον, τὸ ψυχὴν ἔχειν, εἴη ἂν τὸ ψυχὴν ἔχειν τοῦ ζῴου ἴδιον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τὸ ὑποκείμενον ἴδιον ἀποδέδωκε τοῦ ἐν τῷ ὑποκειμένῳ λεγομένου· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον ἴδιον. οἷον ἐπεὶ ὁ ἀποδοὺς ἴδιον τοῦ λεπτομερεστάτου σώματος τὸ πῦρ τὸ ὑποκείμενον ἀποδέδωκε τοῦ κατηγορουμένου ἴδιον, οὐκ ἂν εἴη τὸ πῦρ σώματος τοῦ λεπτομερεστάτου ἴδιον. διὰ τοῦτο δ’ οὐκ ἔσται τὸ ὑποκείμενον τοῦ ἐν τῷ ὑποκειμένῳ ἴδιον, ὅτι τὸ αὐτὸ πλειόνων ἔσται καὶ διαφόρων τῷ εἴδει ἴδιον. τῷ γὰρ αὐτῷ πλείω τινὰ διάφορα τῷ εἴδει ὑπάρχει κατὰ μόνου λεγόμενα, ὧν ἔσται πάντων ἴδιον τὸ ὑποκείμενον, ἐάν τις οὕτω τιθῆται τὸ ἴδιον. κατασκευάζοντα δ’ εἰ τὸ τῷ ὑποκειμένῳ ἀποδέδωκεν ἴδιον τοῦ ὑποκειμένου· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον, ἐάνπερ κατὰ μόνων κατηγορῆται ὧν εἴρηται [τὸ] ἴδιον. οἷον ἐπεὶ ὁ εἴπας γῆς ἴδιον σῶμα τὸ βαρύτατον τῷ εἴδει τοῦ ὑποκειμένου ἀπέδωκε τὸ ἴδιον κατὰ μόνου λεγόμενον τοῦ πράγματος καὶ ὡς τὸ ἴδιον κατηγορεῖται, εἴη ἂν τὸ τῆς γῆς ἴδιον ὀρθῶς κείμενον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ κατὰ μέθεξιν ἀποδέδωκε τὸ ἴδιον· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. τὸ γὰρ [133a] κατὰ μέθεξιν ὑπάρχον εἰς τὸ τί ἦν εἶναι συμβάλλεται· εἴη δ’ ἂν τὸ τοιοῦτο διαφορά τις κατά τινος ἑνὸς εἴδους λεγομένη. οἷον ἐπεὶ ὁ εἴπας ἀνθρώπου ἴδιον τὸ πεζὸν δίπουν κατὰ μέθεξιν ἀποδέδωκε τὸ ἴδιον, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ πεζὸν δίπουν. κατασκευάζοντα δὲ εἰ μὴ κατὰ μέθεξιν ἀποδέδωκε τὸ ἴδιον μηδὲ τὸ τί ἦν εἶναι δηλοῦν, ἀντικατηγορουμένου τοῦ πράγματος· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὁ θεὶς ζῴου ἴδιον τὸ αἰσθάνεσθαι πεφυκὸς οὔτε κατὰ μέθεξιν ἀποδέδωκεν ἴδιον οὔτε τὸ τί ἦν εἶναι δηλοῦν, ἀντικατηγορουμένου τοῦ πράγματος, εἴη ἂν ζῴου ἴδιον τὸ αἰσθάνεσθαι πεφυκός.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τῶν αὐτῶν τῷ εἴδει μὴ ταὐτὸν ἀεὶ τῷ εἴδει [τὸ] ἴδιόν ἐστιν· οὐδὲ γὰρ τοῦ εἰρημένου ἔσται [133b] ἴδιον τὸ κείμενον εἶναι ἴδιον. οἷον ἐπεὶ ταὐτόν ἐστι τῷ εἴδει ἄνθρωπος καὶ ἵππος, οὐκ ἀεὶ δὲ τοῦ ἵππου ἐστὶν ἴδιον τὸ ἑστάναι ὑφ’ αὑτοῦ, οὐκ ἂν εἴη τοῦ ἀνθρώπου ἴδιον τὸ κινεῖσθαι ὑφ’ αὑτοῦ· ταὐτὸν γάρ ἐστι τῷ εἴδει τὸ κινεῖσθαι καὶ τὸ ἑστάναι ὑφ’ αὑτοῦ, ᾗ ζῴον ‹δ’› ἐστὶν ἑκατέρῳ αὐτῶν συμβέβηκεν. κατασκευάζοντα δ’ εἰ τῶν αὐτῶν τῷ εἴδει ταὐτὸν ἀεὶ τῷ εἴδει τὸ ἴδιον· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ἀνθρώπου ἐστὶν ἴδιον τὸ εἶναι πεζὸν δίπουν, καὶ ὄρνιθος ἂν εἴη ἴδιον τὸ εἶναι πτηνὸν δίπουν· ἑκάτερον γὰρ τούτων ἐστὶ ταὐτὸν τῷ εἴδει, ᾗ τὰ μὲν ὡς ὑπὸ τὸ αὐτὸ γένος ἐστὶν εἴδη, ὑπὸ τὸ ζῷον ὄντα, τὰ δὲ ὡς γένους διαφοραί, τοῦ ζῴου. οὗτος δ’ ὁ τόπος ψευδής ἐστιν ὅταν τὸ μὲν ἕτερον τῶν λεχθέντων ἑνί τινι μόνῳ ὑπάρχῃ εἴδει, τὸ δ’ ἕτερον πολλοῖς, καθάπερ τὸ πεζὸν τετράπουν.

Ἐπεὶ δὲ τὸ ταὐτὸν καὶ τὸ ἕτερον πολλαχῶς λέγεται, ἔργον ἐστὶ σοφιστικῶς λαμβάνοντι ἑνὸς ἀποδοῦναι καὶ μόνου τινὸς τὸ ἴδιον· τὸ γὰρ ὑπάρχον τινὶ ᾧ συμβέβηκέ τι καὶ τῷ συμβεβηκότι ὑπάρξει λαμβανομένῳ μετὰ τοῦ ᾧ συμβέβηκεν. οἷον τὸ ὑπάρχον ἀνθρώπῳ καὶ λευκῷ ἀνθρώπῳ ὑπάρξει, ἂν ᾖ λευκὸς ἄνθρωπος· καὶ τὸ λευκῷ δὲ ἀνθρώπῳ ὑπάρχον καὶ ἀνθρώπῳ ὑπάρξει. διαβάλλοι δ’ ἄν τις τὰ πολλὰ τῶν ἰδίων τὸ ὑποκείμενον ἄλλο μὲν καθ’ αὑτὸ ποιῶν ἄλλο δὲ μετὰ τοῦ συμβεβηκότος, οἷον ἄλλο μὲν ἄνθρωπον εἶναι λέγων ἄλλο δὲ λευκὸν ἄνθρωπον, ἔτι δὲ ἕτερον ποιῶν τὴν ἕξιν καὶ τὸ κατὰ τὴν ἕξιν λεγόμενον. τὸ γὰρ τῇ ἕξει ὑπάρχον καὶ τῷ κατὰ τὴν ἕξιν λεγομένῳ ὑπάρξει, καὶ τὸ τῷ κατὰ τὴν ἕξιν λεγομένῳ ὑπάρχον καὶ τῇ ἕξει ὑπάρξει. οἷον ἐπεὶ ὁ ἐπιστήμων κατὰ τὴν ἐπιστήμην λέγεται διακεῖσθαι, οὐκ ἂν εἴη τῆς ἐπιστήμης ἴδιον τὸ ἀμετάπειστον ὑπὸ λόγου· καὶ γὰρ ὁ ἐπιστήμων ἔσται ἀμετάπειστος ὑπὸ λόγου. κατασκευάζοντα δὲ ῥητέον ὅτι οὐκ ἔστιν ἕτερον ἁπλῶς τὸ ᾧ συμβέβηκε καὶ τὸ συμβεβηκὸς μετὰ τοῦ ᾧ συμβέβηκε λαμβανόμενον, ἀλλ’ ἄλλο λέγεται τῷ ἕτερον εἶναι αὐτοῖς τὸ εἶναι· οὐ ταὐτὸν γάρ ἐστιν ἀνθρώπῳ τε τὸ εἶναι ἀνθρώπῳ καὶ λευκῷ ἀνθρώπῳ τὸ εἶναι ἀνθρώπῳ λευκῷ. ἔτι δὲ θεωρητέον ἐστὶ παρὰ τὰς πτώσεις, λέγοντα ὅτι [134a] οὔθ’ ὁ ἐπιστήμων ἐστὶ τὸ ἀμετάπειστον ὑπὸ λόγου ἀλλ’ ὁ ἀμετάπειστος ὑπὸ λόγου, οὔθ’ ἡ ἐπιστήμη τὸ ἀμετάπειστον ὑπὸ λόγου ἀλλ’ ἡ ἀμετάπειστος ὑπὸ λόγου· πρὸς γὰρ τὸν πάντα ἐνιστάμενον πάντως ἀντιτακτέον ἐστίν.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τὸ φύσει ὑπάρχον βουλόμενος ἀποδοῦναι τοῦτον τὸν τρόπον τίθησι τῇ λέξει ὥστε τὸ ἀεὶ ὑπάρχον σημαίνειν· δόξειε γὰρ ἂν κινεῖσθαι τὸ κείμενον εἶναι ἴδιον. οἷον ἐπεὶ ὁ εἴπας ἀνθρώπου ἴδιον τὸ δίπουν βούλεται μὲν τὸ φύσει ὑπάρχον ἀποδιδόναι, σημαίνει δὲ τῇ λέξει τὸ ἀεὶ ὑπάρχον, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ δίπουν· οὐ γὰρ πᾶς ἄνθρωπός ἐστι δύο πόδας ἔχων. κατασκευάζοντα δ’ εἰ βούλεται τὸ φύσει ὑπάρχον ἴδιον ἀποδιδόναι καὶ τῇ λέξει τοῦτον τὸν τρόπον σημαίνει· οὐ γὰρ κινήσεται κατὰ τοῦτο τὸ ἴδιον. οἷον ἐπεὶ ὁ ἀνθρώπου ἴδιον ἀποδιδοὺς τὸ ζῷον ἐπιστήμης δεκτικὸν καὶ βούλεται καὶ τῇ λέξει σημαίνει τὸ φύσει ὑπάρχον ἴδιον, οὐκ ἂν κινοῖτο κατὰ τοῦτο ὡς οὐκ ὂν ἀνθρώπου ἴδιον τὸ ζῷον ἐπιστήμης δεκτικόν.

Ἔτι ὅσα λέγεται ὡς κατ’ ἄλλο τι πρῶτον ἢ ὡς πρῶτον αὐτό, ἔργον ἐστὶν ἀποδοῦναι τῶν τοιούτων τὸ ἴδιον· ἐὰν μὲν γὰρ τοῦ κατ’ ἄλλο τι ἴδιον ἀποδῷς, καὶ κατὰ τοῦ πρώτου ἀληθεύσεται· ἐὰν δὲ τοῦ πρώτου θῇς, καὶ τοῦ κατ’ ἄλλο κατηγορηθήσεται. οἷον ἐὰν μέν τις ἐπιφανείας ἴδιον ἀποδῷ τὸ κεχρῶσθαι, καὶ κατὰ σώματος ἀληθεύσεται τὸ κεχρῶσθαι· ἐὰν δὲ σώματος, καὶ κατ’ ἐπιφανείας κατηγορηθήσεται. ὥστε οὐ καθ’ οὗ ὁ λόγος, καὶ τοὔνομα ἀληθεύσεται.

Συμβαίνει δ’ ἐν ἐνίοις τῶν ἰδίων ὡς ἐπὶ τὸ πολὺ γίνεσθαί τινα ἁμαρτίαν παρὰ τὸ μὴ διορίζεσθαι πῶς καὶ τίνων τίθησι τὸ ἴδιον. ἅπνατες γὰρ ἐπιχειροῦσιν ἀποδιδόναι [τὸ] ἴδιον ἢ τὸ φύσει ὑπάρχον, καθάπερ ἀνθρώπου τὸ δίπουν, ἢ τὸ ὑπάρχον, καθάπερ ἀνθρώπου τινὸς τὸ τέτταρας δακτύλους ἔχειν, ἢ εἴδει, καθάπερ πυρὸς τὸ λεπτομερέστατον, ἢ ἁπλῶς, καθάπερ ζῴου τὸ ζῆν, ἢ κατ’ ἄλλο, καθάπερ ψυχῆς τὸ φρόνιμον, ἢ ὡς τὸ πρῶτον, καθάπερ λογιστικοῦ τὸ φρόνιμον, ἢ ὡς τῷ ἔχειν, καθάπερ ἐπιστήμονος τὸ ἀμετάπειστον ὑπὸ λόγου (οὐδὲν γὰρ ἕτερον ἢ τῷ ἔχειν τι ἔσται ἀμετάπειστος ὑπὸ λόγου), ἢ τῷ ἔχεσθαι, [134b] καθάπερ ἐπιστήμης τὸ ἀμετάπειστον ὑπὸ λόγου, ἢ τῷ μετέχεσθαι, καθάπερ ζῴου τὸ αἰσθάνεσθαι (αἰσθάνεται μὲν γὰρ καὶ ἄλλο τι, οἷον ἄνθρωπος, ἀλλ’ ‹ὡς› μετέχον ἤδη τοῦτο αἰσθάνεται), ἢ τῷ μετέχειν, καθάπερ τοῦ τινὸς ζῴου τὸ ζῆν. μὴ προσθεὶς μὲν οὖν τὸ φύσει ἁμαρτάνει, διότι ἐνδέχεται τὸ φύσει ὑπάρχον μὴ ὑπάρχειν ἐκείνῳ ᾧ φύσει ὑπάρχει, καθάπερ ἀνθρώπῳ τὸ δύο πόδας ἔχειν. μὴ διορίσας δ’ ὅτι τὸ ὑπάρχον ἀποδίδωσιν, διότι οὐκ ἔστι τοιοῦτον οἷον ὑπάρχειν ἐκείνῳ, καθάπερ τὸ τέτταρας δακτύλους ἔχειν τὸν ἄνθρωπον. μὴ δηλώσας δὲ ὅτι ὡς πρῶτον ἢ ὡς κατ’ ἄλλο τίθησιν, διότι οὐ καθ’ οὗ ὁ λόγος, καὶ τοὔνομα ἀληθεύσεται, καθάπερ τὸ κεχρῶσθαι, εἴτε τῆς ἐπιφανείας εἴτε τοῦ σώματος ἀποδοθὲν ἴδιον. μὴ προείπας δὲ ὅτι ἢ τῷ ἔχειν ἢ τῷ ἔχεσθαι τὸ ἴδιον ἀποδέδωκε, διότι οὐκ ἔστιν ἴδιον· ὑπάρξει γάρ, ἐὰν μὲν τῷ ἔχεσθαι ἀποδιδῷ τὸ ἴδιον, τῷ ἔχοντι, ἐὰν δὲ τῷ ἔχειν, τῷ ἐχομένῳ, καθάπερ τὸ ἀμετάπειστον ὑπὸ λόγου τῆς ἐπιστήμης ἢ τοῦ ἐπιστήμονος τεθὲν ἴδιον. μὴ προσσημήνας δὲ τῷ μετέχειν ἢ τῷ μετέχεσθαι, διότι καὶ ἄλλοις τισὶν ὑπάρξει τὸ ἴδιον· ἐὰν μὲν γὰρ τῷ μετέχεσθαι ἀποδῷ, τοῖς μετέχουσιν, ἐὰν δὲ τῷ μετέχειν, τοῖς μετεχομένοις, καθάπερ εἰ τοῦ τινὸς ζῴου ἢ τοῦ ζῴου τιθείη τὸ ζῆν ἴδιον. μὴ διαστείλας δὲ τὸ τῷ εἴδει, διότι ἑνὶ μόνῳ ὑπάρξει τῶν ὑπὸ τοῦτο ὄντων οὗ τὸ ἴδιον τίθησι· τὸ γὰρ καθ’ ὑπερβολὴν ἑνὶ μόνῳ ὑπάρχει, καθάπερ τοῦ πυρὸς τὸ κουφότατον. ἐνίοτε δὲ καὶ τὸ τῷ εἴδει προσθεὶς διήμαρτεν. δεήσει γὰρ ἓν εἶδος εἶναι τῶν λεχθέντων, ὅταν τὸ τῷ εἴδει προστεθῇ· τοῦτο δ’ ἐπ’ ἐνίων οὐ συμπίπτει, καθάπερ οὐδ’ ἐπὶ τοῦ πυρός. οὐ γὰρ ἔστιν ἓν εἶδος τοῦ πυρός· ἕτερον γάρ ἐστι τῷ εἴδει ἄνθραξ καὶ φλὸξ καὶ φῶς, ἕκαστον αὐτῶν πῦρ ὄν. διὰ τοῦτο δ’ οὐ δεῖ, ὅταν τὸ τῷ εἴδει προστεθῇ, ἕτερον εἶναι εἶδος τοῦ λεχθέντος, ὅτι τοῖς μὲν μᾶλλον τοῖς δ’ ἧττον ὑπάρξει τὸ λεχθὲν ἴδιον, καθάπερ ἐπὶ τοῦ πυρὸς τὸ λεπτομερέστατον· λεπτομερέστερον γάρ ἐστι τὸ φῶς τοῦ ἄνθρακος καὶ τῆς φλογός. τοῦτο δ’ οὐ δεῖ γίνεσθαι ὅταν μὴ καὶ τὸ ὄνομα μᾶλλον κατηγορῆται καθ’ οὗ ὁ λόγος μᾶλλον ἀληθεύεται· εἰ δὲ μή, οὐκ ἔσται, καθ’ οὗ ὁ λόγος μᾶλλον, καὶ [135a] τοὔνομα μᾶλλον. ἔτι δὲ πρὸς τούτοις ταὐτὸν εἶναι συμβήσεται τὸ ἴδιον τοῦ τε ἁπλῶς καὶ τοῦ μάλιστα ὄντος ἐν τῷ ἁπλῶς τοιούτῳ, καθάπερ ἐπὶ τοῦ πυρὸς ἔχει τὸ λεπτομερέστατον· καὶ γὰρ τοῦ φωτὸς ἔσται ταὐτὸ τοῦτο ἴδιον· λεπτομερέστατον γάρ ἐστι τὸ φῶς. ἄλλου μὲν οὖν οὕτως ἀποδιδόντος τὸ ἴδιον ἐπιχειρητέον· αὐτῷ δ’ οὐ δοτέον ἐστὶ ταύτην τὴν ἔνστασιν, ἀλλ’ εὐθὺς τιθεμένῳ τὸ ἴδιον διοριστέον ὃν τρόπον τίθησι τὸ ἴδιον.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ αὐτὸ αὑτοῦ ἴδιον ἔθηκεν· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. αὐτὸ γὰρ αὑτῷ πᾶν τὸ εἶναι δηλοῖ· τὸ δὲ τὸ εἶναι δηλοῦν οὐκ ἴδιον ἀλλ’ ὅρος ἐστίν. οἷον ἐπεὶ ὁ εἴπας καλοῦ τὸ πρέπον ἴδιον εἶναι αὐτὸ ἑαυτοῦ ἴδιον ἀποδέδωκε (ταὐτὸν γάρ ἐστι τὸ καλὸν καὶ τὸ πρέπον), οὐκ ἂν εἴη τὸ πρέπον τοῦ καλοῦ ἴδιον. κατασκευάζοντα δὲ εἰ μὴ αὐτὸ μὲν αὑτοῦ ἴδιον ἀποδέδωκεν, ἀντικατηγορούμενον δ’ ἔθηκεν· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὁ θεὶς ζῴου ἴδιον τὸ οὐσία ἔμψυχος οὐκ αὐτὸ μὲν αὑτοῦ ἴδιον ἔθηκεν, ἀντικατηγορούμενον δ’ ἀποδέδωκεν, εἴη ἂν ἴδιον τοῦ ζῴου τὸ οὐσία ἔμψυχος.

Ἔπειτ’ ἐπὶ τῶν ὁμοιομερῶν σκεπτέον ἐστίν, ἀνασκευάζοντα μὲν εἰ τὸ τοῦ συνόλου ἴδιον μὴ ἀληθεύεται κατὰ τοῦ μέρους, ἢ εἰ τὸ τοῦ μέρους μὴ λέγεται κατὰ τοῦ σύμπαντος· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον ἴδιον εἶναι.

συμβαίνει δ’ ἐπ’ ἐνίων τοῦτο γίνεσθαι· ἀποδοίη γὰρ ἄν τις ἐπὶ τῶν ὁμοιομερῶν ἴδιον ἐνίοτε μὲν ἐπὶ τὸ σύμπαν βλέψας, ἐνίοτε δ’ ἐπὶ τὸ κατὰ μέρος λεγόμενον αὐτὸς αὑτὸν ἐπιστήσας. ἔσται δ’ οὐδέτερον ὀρθῶς ἀποδεδομένον. οἷον ἐπὶ μὲν τοῦ σύμπαντος, ἐπεὶ ὁ εἴπας θαλάττης ἴδιον τὸ πλεῖστον ὕδωρ ἁλμυρὸν ὁμοιομεροῦς μέν τινος ἔθηκε τὸ ἴδιον, τοιοῦτον δ’ ἀποδέδωκε ὃ οὐκ ἀληθεύεται κατὰ τοῦ μέρους (οὐ γάρ ἐστιν ἡ τὶς θάλαττα τὸ πλεῖστον ὕδωρ ἁλμυρόν), οὐκ ἂν εἴη τῆς θαλάττης ἴδιον τὸ πλεῖστον ὕδωρ ἁλμυρόν. ἐπὶ δὲ τοῦ μέρους, οἷον ἐπεὶ ὁ θεὶς ἀέρος ἴδιον τὸ ἀναπνευστὸν ὁμοιομεροῦς μέν τινος εἴρηκε τὸ ἴδιον, τοιοῦτον δ’ ἀποδέδωκεν ὃ κατὰ τοῦ τινὸς ἀέρος ἀληθεύεται, κατὰ δὲ τοῦ σύμπαντος οὐ λέγεται (οὐ γάρ ἐστιν ὁ σύμπας ἀναπνευστός), οὐκ ἂν εἴη τοῦ ἀέρος ἴδιον τὸ ἀναπνευστόν.

[135b] κατασκευάζοντα δὲ εἰ ἀληθεύεται μὲν καθ’ ἑκάστου τῶν ὁμοιομερῶν, ἔστι δ’ ἴδιον αὐτῶν κατὰ τὸ σύμπαν· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ἀληθεύεται κατὰ πάσης γῆς τὸ κάτω φέρεσθαι κατὰ φύσιν, ἔστι δὲ τοῦτο ἴδιον καὶ τῆς τινὸς γῆς κατὰ τὸ γῆν εἶναι, εἴη ἂν τῆς γῆς ἴδιον τὸ κάτω φέρεσθαι κατὰ φύσιν.

Ἔπειτ’ ἐκ τῶν ἀντικειμένων σκεπτέον ἐστί, πρῶτον μὲν ἐκ τῶν ἐναντίων, ἀνασκευάζοντα μὲν εἰ τοῦ ἐναντίου μὴ ἔστι τὸ ἐναντίον ἴδιον· οὐδὲ γὰρ τοῦ ἐναντίου ἔσται τὸ ἐναντίον ἴδιον. οἷον ἐπεὶ ἐναντίον ἐστὶ δικαιοσύνῃ μὲν ἀδικία, τῷ βελτίστῳ δὲ τὸ χείριστον, οὐκ ἔστι δὲ τῆς δικαιοσύνης ἴδιον τὸ βέλτιστον, οὐκ ἂν εἴη τῆς ἀδικίας ἴδιον τὸ χείριστον. κατασκευάζοντα δὲ εἰ τοῦ ἐναντίου τὸ ἐναντίον ἴδιόν ἐστιν· καὶ γὰρ τοῦ ἐναντίου τὸ ἐναντίον ἴδιον ἔσται. οἷον ἐπεὶ ἐναντίον ἐστὶν ἀγαθῷ μὲν κακόν, αἱρετῷ δὲ φευκτόν, ἔστι δὲ τοῦ ἀγαθοῦ ἴδιον τὸ αἱρετόν, εἴη ἂν κακοῦ ἴδιον τὸ φευκτόν.

Δεύτερον δ’ ἐκ τῶν πρός τι, ἀνασκευάζοντα μὲν εἰ τὸ πρός τι τοῦ πρός τι μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ πρός τι τοῦ πρός τι ἔσται ἴδιον. οἷον ἐπεὶ λέγεται διπλάσιον μὲν πρὸς ἥμισυ, ὑπερέχον δὲ πρὸς ὑπερεχόμενον, οὐκ ἔστι δὲ τοῦ διπλασίου τὸ ὑπερέχον ἴδιον, οὐκ ἂν εἴη τοῦ ἡμίσεος τὸ ὑπερεχόμενον ἴδιον. κατασκευάζοντα δὲ εἰ τοῦ πρός τι τὸ πρὸς τί ἐστιν ἴδιον· καὶ γὰρ τοῦ πρός τι τὸ πρός τι ἔσται ἴδιον. οἷον ἐπεὶ λέγεται τὸ μὲν διπλάσιον πρὸς τὸ ἥμισυ, τὸ δὲ δύο πρὸς ἓν πρὸς τὸ ἓν πρὸς δύο, ἔστι δὲ τοῦ διπλασίου ἴδιον τὸ ὡς δύο πρὸς ἕν, εἴη ἂν τοῦ ἡμίσεος ἴδιον τὸ ὡς ἓν πρὸς δύο.

Τρίτον δ’ ἀνασκευάζοντα μὲν εἰ τῆς ἕξεως τὸ καθ’ ἕξιν λεγόμενον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τῆς στερήσεως τὸ κατὰ στέρησιν λεγόμενον ἔσται ἴδιον. κἂν εἰ δὲ τῆς στερήσεως τὸ κατὰ στέρησιν λεγόμενον μὴ ἔστιν ἴδιον, οὐδὲ τῆς ἕξεως τὸ κατὰ τὴν ἕξιν λεγόμενον ἴδιον ἔσται· οἷον ἐπεὶ οὐ λέγεται τῆς κωφότητος ἴδιον τὸ ἀναισθησίαν εἶναι, οὐδ’ ἂν τῆς ἀκούσεως εἴη ἴδιον τὸ αἴσθησιν εἶναι. κατασκευάζοντα δὲ εἰ τὸ καθ’ ἕξιν λεγόμενόν ἐστι τῆς ἕξεως ἴδιον· καὶ γὰρ τῆς στερήσεως τὸ κατὰ στέρησιν λεγόμενον ἔσται ἴδιον. κἂν εἰ τῆς στερήσεως τὸ κατὰ στέρησιν λεγόμενόν ἐστιν ἴδιον, καὶ τῆς ἕξεως [136a] τὸ καθ’ ἕξιν λεγόμενον ἔσται ἴδιον. οἷον ἐπεὶ τῆς ὄψεώς ἐστιν ἴδιον τὸ βλέπειν, καθὸ ἔχομεν ὄψιν, εἴη ἂν τῆς τυφλότητος ἴδιον τὸ μὴ βλέπειν, καθὸ οὐκ ἔχομεν ὄψιν πεφυκότες ἔχειν.

Ἔπειτα ἐκ τῶν φάσεων καὶ τῶν ἀποφάσεων, πρῶτον μὲν ἐξ αὐτῶν τῶν κατηγορουμένων. ἔστι δ’ ὁ τόπος οὗτος χρήσιμος ἀνασκευάζοντι μόνον. οἷον εἰ ἡ φάσις ἢ τὸ κατὰ τὴν φάσιν λεγόμενον αὐτοῦ ἴδιόν ἐστιν· οὐ γὰρ ἔσται αὐτοῦ ἡ ἀπόφασις οὐδὲ τὸ κατὰ τὴν ἀπόφασιν λεγόμενον ἴδιον. κἂν εἰ δ’ ἡ ἀπόφασις ἢ τὸ κατὰ τὴν ἀπόφασιν λεγόμενόν ἐστιν αὐτοῦ ἴδιον, οὐκ ἔσται ἡ φάσις οὐδὲ τὸ κατὰ τὴν φάσιν λεγόμενον ἴδιον. οἷον ἐπεὶ τοῦ ζῴου ἐστὶν ἴδιον τὸ ἔμψυχον, οὐκ ἂν εἴη τοῦ ζῴου ἴδιον τὸ οὐκ ἔμψυχον.

Δεύτερον δ’ ἐκ τῶν κατηγορουμένων ἢ μὴ κατηγορουμένων καὶ ἐξ ὧν κατηγορεῖται ἢ μὴ κατηγορεῖται, ἀνασκευάζοντα μὲν εἰ ἡ φάσις τῆς φάσεως μὴ ἔστιν ἴδιον· οὐδὲ γὰρ ἡ ἀπόφασις τῆς ἀποφάσεως ἔσται ἴδιον. κἂν εἰ δ’ ἡ ἀπόφασις τῆς ἀποφάσεως μὴ ἔστιν ἴδιον, οὐδ’ ἡ φάσις τῆς φάσεως ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστι τοῦ ἀνθρώπου ἴδιον τὸ ζῷον, οὐδ’ ἂν τοῦ μὴ ἀνθρώπου εἴη ἴδιον τὸ μὴ ζῷον· κἂν εἰ δὲ τοῦ μὴ ἀνθρώπου φαίνεται μὴ ἴδιον τὸ μὴ ζῷον, οὐδὲ τοῦ ἀνθρώπου ἔσται ἴδιον τὸ ζῷον. κατασκευάζοντα δ’ εἰ τῆς φάσεως ἡ φάσις ἐστὶν ἴδιον· καὶ γὰρ τῆς ἀποφάσεως ἡ ἀπόφασις ἔσται ἴδιον. κἂν εἰ δὲ τῆς ἀποφάσεως ἡ ἀπόφασίς ἐστιν ἴδιον, καὶ ἡ φάσις τῆς φάσεως ἔσται ἴδιον. οἷον ἐπεὶ τοῦ μὴ ζῴου ἴδιόν ἐστι τὸ μὴ ζῆν, εἴη ἂν τοῦ ζῴου ἴδιον τὸ ζῆν· κἂν εἰ δὲ τοῦ ζῴου φαίνεται ἴδιον τὸ ζῆν, καὶ τοῦ μὴ ζῴου φανεῖται ἴδιον τὸ μὴ ζῆν.

Τρίτον δὲ ἐξ αὐτῶν τῶν ὑποκειμένων, ἀνασκευάζοντα μὲν εἰ τὸ ἀποδεδομένον ἴδιον τῆς φάσεώς ἐστιν ἴδιον· οὐ γὰρ ἔσται τὸ αὐτὸ καὶ τῆς ἀποφάσεως ἴδιον. κἂν εἰ δὲ τῆς ἀποφάσεώς ἐστιν ἴδιον τὸ ἀποδοθέν, οὐκ ἔσται τῆς φάσεως ἴδιον. οἷον ἐπεὶ τοῦ ζῴου ἴδιον τὸ ἔμψυχον, οὐκ ἂν εἴη τοῦ μὴ ζῴου ἴδιον τὸ ἔμψυχον. κατασκευάζοντα δέ, εἰ τὸ ἀποδοθὲν μὴ ἔστι τῆς φάσεως ἴδιον, εἴη ἂν τῆς ἀποφάσεως. οὗτος δ’ ὁ τόπος ψευδής ἐστιν· φάσις γὰρ ἀποφάσεως καὶ ἀπόφασις φάσεως οὐκ ἔστιν ἴδιον. φάσις μὲν γὰρ ἀποφάσει οὐδ’ ὅλως ὑπάρχει, [136b] ἀπόφασις δὲ φάσει ὑπάρχει μέν, οὐχ ὡς ἴδιον δὲ ὑπάρχει.

Ἔπειτα δ’ ἐκ τῶν ἀντιδιῃρημένων, ἀνασκευάζοντα μὲν εἰ τῶν ἀντιδιῃρημένων μηδὲν μηδενὸς τῶν λοιπῶν ἀντιδιῃρημένων ἐστὶν ἴδιον· οὐδὲ γὰρ τὸ κείμενον ἔσται ἴδιον τούτου οὗ κεῖται ἴδιον. οἷον ἐπεὶ ζῷον αἰσθητὸν οὐδενὸς τῶν ἄλλων ζῴων ἐστὶν ἴδιον, οὐκ ἂν εἴη τὸ ζῷον νοητὸν τοῦ θεοῦ ἴδιον. κατασκευάζοντα δ’ εἰ τῶν λοιπῶν τῶν ἀντιδιῃρημένων ὁτιοῦν ἐστιν ἴδιον τούτων ἑκάστου τῶν ἀντιδιῃρημένων· καὶ γὰρ τὸ λοιπὸν ἔσται τούτου ἴδιον οὗ κεῖται μὴ εἶναι ἴδιον. οἷον ἐπεὶ φρονήσεώς ἐστιν ἴδιον τὸ καθ’ αὑτὸ πεφυκέναι λογιστικοῦ ἀρετὴν εἶναι, καὶ τῶν ἄλλων ἀρετῶν οὕτως ἑκάστης λαμβανομένης, εἴη ἂν σωφροσύνης ἴδιον τὸ καθ’ αὑτὸ πεφυκέναι ἐπιθυμητικοῦ ἀρετὴν εἶναι.

Ἔπειτ’ ἐκ τῶν πτώσεων, ἀνασκευάζοντα μὲν εἰ ἡ πτῶσις τῆς πτώσεως μὴ ἔστιν ἴδιον· οὐδὲ γὰρ ἡ πτῶσις τῆς πτώσεως ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστι τοῦ δικαίως ἴδιον τὸ καλῶς, οὐδ’ ἂν τοῦ δικαίου εἴη ἴδιον τὸ καλόν. κατασκευάζοντα δὲ εἰ ἡ πτῶσις τῆς πτώσεώς ἐστιν ἴδιον· καὶ γὰρ ἡ πτῶσις τῆς πτώσεως ἔσται ἴδιον. οἷον ἐπεὶ τοῦ ἀνθρώπου ἐστὶν ἴδιον τὸ πεζὸν δίπουν, καὶ τοῦ ἀνθρώπῳ εἴη ἂν ἴδιον τὸ πεζῷ δίποδι λέγεσθαι. οὐ μόνον δ’ ἐπ’ αὐτοῦ τοῦ εἰρημένου κατὰ τὰς πτώσεις ἐστὶ σκεπτέον ἀλλὰ καὶ ἐπὶ τῶν ἀντικειμένων, καθάπερ καὶ ἐπὶ τῶν προτέρων τόπων εἴρηται, ἀνασκευάζοντα μὲν εἰ ἡ τοῦ ἀντικειμένου πτῶσις μὴ ἔστιν ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως· οὐδὲ γὰρ ἡ τοῦ ἀντικειμένου πτῶσις ἔσται ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως. οἷον ἐπεὶ οὐκ ἔστι τοῦ δικαίως ἴδιον τὸ ἀγαθῶς, οὐδ’ ἂν τοῦ ἀδίκως εἴη ἴδιον τὸ κακῶς. κατασκευάζοντα δὲ εἰ ἡ τοῦ ἀντικειμένου πτῶσίς ἐστιν ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως· καὶ γὰρ ἡ τοῦ ἀντικειμένου πτῶσις ἔσται ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως. οἷον ἐπεὶ τοῦ ἀγαθοῦ ἐστιν ἴδιον τὸ βέλτιστον, καὶ τοῦ κακοῦ ἂν εἴη ἴδιον τὸ χείριστον.

Ἔπειτ’ ἐκ τῶν ὁμοίως ἐχόντων, ἀνασκευάζοντα μὲν εἰ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντος μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντος ἔσται ἴδιον. οἷον ἐπεὶ ὁμοίως ἔχει ὁ οἰκοδόμος πρὸς τὸ ποιεῖν οἰκίαν καὶ ὁ ἰατρὸς πρὸς τὸ ποιεῖν ὑγίειαν, οὐκ ἔστι δὲ ἰατροῦ ἴδιον τὸ ποιεῖν ὑγίειαν, [137a] οὐκ ἂν εἴη οἰκοδόμου ἴδιον τὸ ποιεῖν οἰκίαν. κατασκευάζοντα δὲ εἰ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντός ἐστιν ἴδιον· καὶ γὰρ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντος ἔσται ἴδιον. οἷον ἐπεὶ ὁμοίως ἔχει ἰατρός τε πρὸς τὸ ποιητικὸς ὑγιείας εἶναι καὶ γυμναστὴς πρὸς τὸ ποιητικὸς εὐεξίας, ἔστι δ’ ἴδιον γυμναστοῦ τὸ ποιητικὸν εἶναι εὐεξίας, εἴη ἂν ἴδιον ἰατροῦ τὸ ποιητικὸν εἶναι ὑγιείας.

Ἔπειτ’ ἐκ τῶν ὡσαύτως ἐχόντων, ἀνασκευάζοντα μὲν εἰ τὸ ὡσαύτως ἔχον τοῦ ὡσαύτως ἔχοντος μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ὡσαύτως ἔχον τοῦ ὡσαύτως ἔχοντος ἔσται ἴδιον. εἰ δ’ ἐστὶ τοῦ ὡσαύτως ἔχοντος τὸ ὡσαύτως ἔχον ἴδιον, τούτου οὐκ ἔσται ἴδιον οὗ κεῖται εἶναι ἴδιον. οἷον ἐπεὶ ὡσαύτως ἔχει φρόνησις πρὸς τὸ καλὸν καὶ τὸ αἰσχρόν, τῷ ἐπιστήμη ἑκατέρου αὐτῶν εἶναι, οὐκ ἔστι δ’ ἴδιον φρονήσεως τὸ ἐπιστήμην εἶναι καλοῦ, οὐκ ἂν εἴη ἴδιον φρονήσεως τὸ ἐπιστήμην εἶναι αἰσχροῦ. [εἰ δ’ ἐστὶν ἴδιον φρονήσεως τὸ ἐπιστήμην εἶναι καλοῦ, οὐκ ἂν εἴη ἴδιον αὐτῆς τὸ ἐπιστήμην εἶναι αἰσχροῦ· ἀδύνατον γὰρ εἶναι τὸ αὐτὸ πλειόνων ἴδιον.] κατασκευάζοντι δὲ οὐδὲν οὗτος ὁ τόπος ἐστὶ χρήσιμος· τὸ γὰρ ὡσαύτως ἔχον ἓν πρὸς πλείω συγκρίνεται.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ τὸ κατὰ τὸ εἶναι λεγόμενον μὴ ἔστι τοῦ κατὰ τὸ εἶναι λεγομένου ἴδιον· οὐδὲ γὰρ τὸ φθείρεσθαι τοῦ κατὰ τὸ φθείρεσθαι, οὐδὲ τὸ γίνεσθαι τοῦ κατὰ τὸ γίνεσθαι λεγομένου, ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστιν ἀνθρώπου ἴδιον τὸ εἶναι ζῷον, οὐδ’ ἂν τοῦ ἄνθρωπον γίνεσθαι εἴη ἴδιον τὸ γίνεσθαι ζῷον, οὐδ’ ἂν τοῦ ἄνθρωπον φθείρεσθαι εἴη ἴδιον τὸ φθείρεσθαι ζῷον. τὸν αὐτὸν δὲ τρόπον ληπτέον ἐστὶ καὶ ἐκ τοῦ γίνεσθαι πρὸς τὸ εἶναι καὶ φθείρεσθαι, καὶ ἐκ τοῦ φθείρεσθαι πρὸς τὸ εἶναι καὶ πρὸς τὸ γίνεσθαι, καθάπερ εἴρηται νῦν ἐκ τοῦ εἶναι πρὸς τὸ γίνεσθαι καὶ φθείρεσθαι. κατασκευάζοντα δὲ εἰ τοῦ κατὰ τὸ εἶναι τεταγμένου ἐστὶ τὸ κατ’ αὐτὸ τεταγμένον ἴδιον· καὶ γὰρ τοῦ κατὰ τὸ γίνεσθαι λεγομένου ἔσται τὸ κατὰ τὸ γίνεσθαι λεγόμενον ἴδιον, καὶ τοῦ κατὰ τὸ φθείρεσθαι τὸ κατὰ τοῦτο ἀποδιδόμενον. οἷον ἐπεὶ τοῦ ἀνθρώπου ἐστὶν ἴδιον τὸ εἶναι βροτόν, καὶ τοῦ γίνεσθαι ἄνθρωπον εἴη ἂν ἴδιον τὸ γίνεσθαι βροτόν, καὶ τοῦ φθείρεσθαι ἄνθρωπον τὸ φθείρεσθαι βροτόν. τὸν αὐτὸν δὲ τρόπον ληπτέον [137b] ἐστὶ καὶ ἐκ τοῦ γίνεσθαι καὶ φθείρεσθαι πρὸς τὸ εἶναι καὶ πρὸς τὰ ἐξ αὐτῶν, καθάπερ καὶ ἀνασκευάζοντι εἴρηται.

Ἔπειτ’ ἐπιβλέπειν ἐπὶ τὴν ἰδέαν τοῦ κειμένου, ἀνασκευάζοντα μὲν εἰ τῇ ἰδέᾳ μὴ ὑπάρχει, ἢ εἰ μὴ κατὰ τοῦτο καθ’ ὃ λέγεται τοῦτο οὗ τὸ ἴδιον ἀπεδόθη· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον· οἷον ἐπεὶ αὐτοανθρώπῳ οὐχ ὑπάρχει τὸ ἠρεμεῖν ᾗ ἄνθρωπός ἐστιν, ἀλλ’ ᾗ ἰδέα, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ ἠρεμεῖν. κατασκευάζοντα δὲ εἰ τῇ ἰδέᾳ ὑπάρχει καὶ κατὰ τοῦτο ὑπάρχει ᾗ λέγεται κατ’ αὐτοῦ ἐκεῖνο οὗ κεῖται μὴ εἶναι ἴδιον· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὑπάρχει τῷ αὐτοζῴῳ τὸ ἐκ ψυχῆς καὶ σώματος συγκεῖσθαι, καὶ ᾗ ζῷον αὐτῷ ὑπάρχει τοῦτο, εἴη ἂν ζῴου ἴδιον τὸ ἐκ ψυχῆς καὶ σώματος συγκεῖσθαι.

Ἔπειτα ἐκ τοῦ μᾶλλον καὶ ἧττον, πρῶτον μὲν ἀνασκευάζοντα εἰ τὸ μᾶλλον τοῦ μᾶλλον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ἧττον τοῦ ἧττον ἔσται ἴδιον, οὐδὲ τὸ ἥκιστα τοῦ ἥκιστα, οὐδὲ τὸ μάλιστα τοῦ μάλιστα, οὐδὲ τὸ ἁπλῶς τοῦ ἁπλῶς. οἷον ἐπεὶ οὐκ ἔστι τὸ μᾶλλον κεχρῶσθαι τοῦ μᾶλλον σώματος ἴδιον, οὐδὲ τὸ ἧττον κεχρῶσθαι τοῦ ἧττον σώματος εἴη ἂν ἴδιον, οὐδὲ τὸ κεχρῶσθαι σώματος ὅλως. κατασκευάζοντα δὲ εἰ τὸ μᾶλλον τοῦ μᾶλλόν ἐστιν ἴδιον· καὶ γὰρ τὸ ἧττον τοῦ ἧττον ἔσται ἴδιον, καὶ τὸ ἥκιστα τοῦ ἥκιστα, καὶ τὸ μάλιστα τοῦ μάλιστα, καὶ τὸ ἁπλῶς τοῦ ἁπλῶς. οἷον ἐπεὶ τοῦ μᾶλλον ζῶντος τὸ μᾶλλον αἰσθάνεσθαί ἐστιν ἴδιον, καὶ τοῦ ἧττον ζῶντος τὸ ἧττον αἰσθάνεσθαι εἴη ἂν ἴδιον, καὶ τοῦ μάλιστα δὴ τὸ μάλιστα, καὶ τοῦ ἥκιστα τὸ ἥκιστα, καὶ τοῦ ἁπλῶς τὸ ἁπλῶς.

Καὶ ἐκ τοῦ ἁπλῶς δὲ πρὸς ταῦτα σκεπτέον ἐστίν, ἀνασκευάζοντα μὲν εἰ τὸ ἁπλῶς τοῦ ἁπλῶς μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ μᾶλλον τοῦ μᾶλλον, οὐδὲ τὸ ἧττον τοῦ ἧττον, οὐδὲ τὸ μάλιστα τοῦ μάλιστα, οὐδὲ τὸ ἥκιστα τοῦ ἥκιστα ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστι τοῦ ἀνθρώπου τὸ σπουδαῖον ἴδιον, οὐδ’ ἂν τοῦ μᾶλλον ἀνθρώπου τὸ μᾶλλον σπουδαῖον ἴδιον εἴη. κατασκευάζοντα δὲ εἰ τὸ ἁπλῶς τοῦ ἁπλῶς ἐστιν ἴδιον· καὶ γὰρ τὸ μᾶλλον τοῦ μᾶλλον καὶ τὸ ἧττον τοῦ ἧττον καὶ τὸ ἥκιστα τοῦ ἥκιστα καὶ τὸ μάλιστα τοῦ μάλιστα ἔσται ἴδιον. οἷον ἐπεὶ τοῦ πυρός ἐστιν ἴδιον τὸ ἄνω φέρεσθαι κατὰ φύσιν, καὶ τοῦ μᾶλλον [138a] πυρὸς εἴη ἂν ἴδιον τὸ μᾶλλον ἄνω φέρεσθαι κατὰ φύσιν. τὸν αὐτὸν δὲ τρόπον σκεπτέον ἐστὶ καὶ ἐκ τῶν ἄλλων πρὸς ἅπαντα ταῦτα.

Δεύτερον δ’ ἀνασκευάζοντα μὲν εἰ τὸ μᾶλλον οὗ μᾶλλον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ἧττον οὗ ἧττον ἔσται ἴδιον. οἷον ἐπεὶ μᾶλλόν ἐστιν ἴδιον ζῴου τὸ αἰσθάνεσθαι ἢ ἀνθρώπου τὸ ἐπίστασθαι, οὐκ ἔστι δὲ ζῴου ἴδιον τὸ αἰσθάνεσθαι, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ ἐπίστασθαι. κατασκευάζοντα δ’ εἰ τὸ ἧττον οὗ ἧττόν ἐστιν ἴδιον· καὶ γὰρ τὸ μᾶλλον οὗ μᾶλλον ἔσται ἴδιον. οἷον ἐπεὶ ἧττόν ἐστιν ἴδιον ἀνθρώπου τὸ ἥμερον φύσει ἢ ζῴου τὸ ζῆν, ἔστι δ’ ἀνθρώπου ἴδιον τὸ ἥμερον φύσει, εἴη ἂν ζῴου ἴδιον τὸ ζῆν.

Τρίτον δ’ ἀνασκευάζοντα μὲν εἰ οὗ μᾶλλόν ἐστιν ἴδιον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ οὗ ἧττόν ἐστιν ἴδιον, ἔσται τούτου ἴδιον. εἰ δ’ ἐκείνου ἐστὶν ἴδιον, οὐκ ἔσται τούτου ἴδιον. οἷον ἐπεὶ τὸ κεχρῶσθαι μᾶλλον τῆς ἐπιφανείας ἢ τοῦ σώματός ἐστιν ἴδιον, οὐκ ἔστι δὲ τῆς ἐπιφανείας ἴδιον, οὐκ ἂν εἴη τοῦ σώματος ἴδιον τὸ κεχρῶσθαι. εἰ δ’ ἐστὶ τῆς ἐπιφανείας ἴδιον, οὐκ ἂν εἴη τοῦ σώματος ἴδιον. κατασκευάζοντι δὲ ὁ τόπος οὗτος οὐκ ἔστι χρήσιμος· ἀδύνατον γάρ ἐστι ταὐτὸ πλειόνων ἴδιον εἶναι.

Τέταρτον δ’ ἀνασκευάζοντα μὲν εἰ τὸ μᾶλλον αὐτοῦ ἴδιον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ἧττον αὐτοῦ ἴδιον ἔσται ἴδιον. οἷον ἐπεὶ μᾶλλόν ἐστι τοῦ ζῴου ἴδιον τὸ αἰσθητὸν ἢ τὸ μεριστόν, οὐκ ἔστι δὲ τοῦ ζῴου τὸ αἰσθητὸν ἴδιον, οὐκ ἂν εἴη τοῦ ζῴου τὸ μεριστὸν ἴδιον. κατασκευάζοντα δὲ εἰ τὸ ἧττον αὐτοῦ ὂν ἴδιόν ἐστιν ἴδιον· καὶ γὰρ τὸ μᾶλλον αὐτοῦ ὂν ἴδιον ἔσται ἴδιον. οἷον ἐπεὶ ἧττόν ἐστιν ἴδιον ζῴου τὸ αἰσθάνεσθαι ἢ τὸ ζῆν, ἔστι δὲ τοῦ ζῴου τὸ αἰσθάνεσθαι ἴδιον, εἴη ἂν τοῦ ζῴου τὸ ζῆν ἴδιον.

Ἔπειτ’ ἐκ τῶν ὁμοίως ὑπαρχόντων, πρῶτον μὲν ἀνασκευάζοντα εἰ τὸ ὁμοίως ὂν ἴδιον μὴ ἔστιν ἴδιον τούτου οὗ ὁμοίως ἐστὶν ἴδιον· οὐδὲ γὰρ τὸ ὁμοίως ὂν ἴδιον ἔσται ἴδιον τούτου οὗ ὁμοίως ἐστὶν ἴδιον. οἷον ἐπεὶ ὁμοίως ἐστὶν ἴδιον ἐπιθυμητικοῦ τὸ ἐπιθυμεῖν καὶ λογιστικοῦ τὸ λογίζεσθαι, οὐκ ἔστι δ’ ἴδιον ἐπιθυμητικοῦ τὸ ἐπιθυμεῖν, οὐκ ἂν εἴη ἴδιον λογιστικοῦ τὸ λογίζεσθαι. κατασκευάζοντα δὲ εἰ τὸ ὁμοίως ὂν ἴδιόν ἐστι τούτου ἴδιον οὗ ὁμοίως ἐστὶν ἴδιον· ἔσται γὰρ καὶ τὸ ὁμοίως ὂν [138b] ἴδιον τούτου ἴδιον οὗ ὁμοίως ἐστὶν ἴδιον. οἷον ἐπεὶ ὁμοίως ἐστὶν ἴδιον λογιστικοῦ τὸ πρῶτον φρόνιμον καὶ ἐπιθυμητικοῦ τὸ πρῶτον σῶφρον, ἔστι δὲ [τοῦ] λογιστικοῦ ἴδιον τὸ πρῶτον φρόνιμον, εἴη ἂν ἐπιθυμητικοῦ ἴδιον τὸ πρῶτον σῶφρον.

Δεύτερον δ’ ἀνασκευάζοντα μὲν εἰ τὸ ὁμοίως ὂν ἴδιον μὴ ἔστιν ἴδιον αὐτοῦ· οὐδὲ γὰρ τὸ ὁμοίως ὂν ἴδιον ἔσται ἴδιον αὐτοῦ. οἷον ἐπεὶ ὁμοίως ἐστὶν ἴδιον ἀνθρώπου τὸ ὁρᾶν καὶ τὸ ἀκούειν, οὐκ ἔστι δ’ ἀνθρώπου ἴδιον τὸ ὁρᾶν, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ ἀκούειν. κατασκευάζοντα δὲ εἰ τὸ ὁμοίως αὐτοῦ ὂν ἴδιόν ἐστιν ἴδιον· καὶ γὰρ τὸ ὁμοίως αὐτοῦ ὂν ἴδιον ἔσται ἴδιον. οἷον ἐπεὶ ὁμοίως ἐστὶν ἴδιον ψυχῆς τὸ μέρος αὐτῆς ἐπιθυμητικὸν εἶναι πρῶτον καὶ λογιστικὸν πρῶτον, ἔστι δὲ ψυχῆς ἴδιον τὸ μέρος αὐτῆς εἶναι ἐπιθυμητικὸν πρῶτον, εἴη ἂν ἴδιον ψυχῆς τὸ μέρος αὐτῆς εἶναι λογιστικὸν πρῶτον.

Τρίτον δ’ ἀνασκευάζοντα μὲν εἰ οὗ ὁμοίως ἐστὶν ἴδιον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ οὗ ὁμοίως ἐστὶν ἴδιον ἔσται ἴδιον. εἰ δ’ ἐκείνου ἐστὶν ἴδιον, οὐκ ἔσται θατέρου ἴδιον. οἷον ἐπεὶ ὁμοίως ἐστὶν ἴδιον τὸ καίειν φλογὸς καὶ ἄνθρακος, οὐκ ἔστι δ’ ἴδιον φλογὸς τὸ καίειν, οὐκ ἂν εἴη ἴδιον ἄνθρακος τὸ καίειν. εἰ δ’ ἐστὶ φλογὸς ἴδιον, οὐκ ἂν εἴη ἄνθρακος ἴδιον. κατασκευάζοντι δὲ οὐδὲν οὗτος ὁ τόπος ἐστὶ χρήσιμος.

Διαφέρει δ’ ὁ ἐκ τῶν ὁμοίως ἐχόντων τοῦ ἐκ τῶν ὁμοίως ὑπαρχόντων, ὅτι τὸ μὲν κατ’ ἀναλογίαν λαμβάνεται, οὐκ ἐπὶ τοῦ ὑπάρχειν τι θεωρούμενον, τὸ δ’ ἐκ τοῦ ὑπάρχειν τι συγκρίνεται.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ, δυνάμει τὸ ἴδιον ἀποδιδούς, καὶ πρὸς μὴ ὂν ἀποδέδωκε τὸ ἴδιον τῇ δυνάμει, μὴ ἐνδεχομένης τῆς δυνάμεως ὑπάρχειν τῷ μὴ ὄντι· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. οἷον ἐπεὶ ὁ εἴπας ἀέρος ἴδιον τὸ ἀναπνευστὸν τῇ δυνάμει μὲν ἀποδέδωκε τὸ ἴδιον (τὸ γὰρ τοιοῦτον οἷον ἀναπνεῖσθαι ἀναπνευστόν ἐστιν), ἀποδέδωκε δὲ καὶ πρὸς τὸ μὴ ὂν τὸ ἴδιον (καὶ γὰρ μὴ ὄντος ζῴου οἷον ἀναπνεῖν πέφυκε τὸν ἀέρα ἐνδέχεται ἀέρα εἶναι· οὐ μέντοι μὴ ὄντος ζῴου δυνατόν ἐστιν ἀναπνεῖν· ὥστ’ οὐδ’ ἀέρος ἔσται ἴδιον τὸ τοιοῦτον οἷον ἀναπνεῖσθαι τότε ὅτε ζῷον οὐκ ἔσται τοιοῦτον οἷον ἀναπνεῖν), οὐκ ἂν οὖν εἴη ἀέρος ἴδιον τὸ ἀναπνευστόν.

[139a] κατασκευάζοντα δὲ εἰ τῇ δυνάμει ἀποδιδοὺς τὸ ἴδιον ἢ πρὸς ὂν ἀποδίδωσι τὸ ἴδιον ἢ πρὸς μὴ ὄν, ἐνδεχομένης τῆς δυνάμεως τῷ μὴ ὄντι ὑπάρχειν· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὁ ἀποδιδοὺς ἴδιον τοῦ ὄντος τὸ δυνατὸν παθεῖν ἢ ποιῆσαι, δυνάμει ἀποδιδοὺς τὸ ἴδιον, πρὸς ὂν ἀποδέδωκε τὸ ἴδιον (ὅτε γὰρ ὄν ἐστι, καὶ δυνατὸν παθεῖν τι ἢ ποιῆσαι ἔσται) - ὥστε εἴη ἂν ἴδιον τοῦ ὄντος τὸ δυνατὸν παθεῖν ἢ ποιῆσαι.

Ἔπειτ’ ἀνασκευάζοντα μὲν εἰ ὑπερβολὴν τέθεικε τὸ ἴδιον· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. συμβαίνει γὰρ τοῖς οὕτως ἀποδιδοῦσι τὸ ἴδιον μή, καθ’ οὗ ὁ λόγος, τοὔνομα ἀληθεύεσθαι· φθαρέντος γὰρ τοῦ πράγματος οὐδὲν ἧττον ἔσται ὁ λόγος· τῶν γὰρ ὄντων τινὶ μάλιστα ὑπάρξει. οἷον εἴ τις ἀποδοίη τοῦ πυρὸς ἴδιον σῶμα τὸ κουφότατον· φθαρέντος γὰρ τοῦ πυρὸς ἔσται τι τῶν σωμάτων ὃ κουφότατον ἔσται. ὥστ’ οὐκ ἂν εἴη τοῦ πυρὸς ἴδιον σῶμα τὸ κουφότατον. κατασκευάζοντα δὲ εἰ μὴ ὑπερβολὴν τέθεικε τὸ ἴδιον· ἔσται γὰρ κατὰ τοῦτο καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὶς ἀνθρώπου ἴδιον ζῷον ἥμερον φύσει οὐχ ὑπερβολῇ ἀποδέδωκε τὸ ἴδιον, εἴη ἂν κατὰ τοῦτο καλῶς κείμενον τὸ ἴδιον.

Z

Τῆς δὲ περὶ τοὺς ὅρους πραγματείας μέρη πέντε ἔστιν· ἢ γὰρ ὅτι ὅλως οὐκ ἀληθὲς εἰπεῖν, καθ’ οὗ τοὔνομα, καὶ τὸν λόγον (δεῖ γὰρ τὸν τοῦ ἀνθρώπου ὁρισμὸν κατὰ παντὸς ἀνθρώπου ἀληθεύεσθαι), ἢ ὅτι ὄντος γένους οὐκ ἔθηκεν εἰς τὸ γένος, ἢ οὐκ εἰς τὸ οἰκεῖον γένος ἔθηκεν (δεῖ γὰρ τὸν ὁριζόμενον εἰς τὸ γένος θέντα τὰς διαφορὰς προσάπτειν· μάλιστα γὰρ τῶν ἐν τῷ ὁρισμῷ τὸ γένος δοκεῖ τὴν τοῦ ὁριζομένου οὐσίαν σημαίνειν), ἢ ὅτι οὐκ ἴδιος ὁ λόγος (δεῖ γὰρ τὸν ὁρισμὸν ἴδιον εἶναι, καθάπερ καὶ πρότερον εἴρηται), ἢ εἰ πάντα τὰ εἰρημένα πεποιηκὼς μὴ ὥρισται μηδ’ εἴρηκε τὸ τί ἦν εἶναι τῷ ὁριζομένῳ. λοιπὸν δὲ παρὰ τὰ εἰρημένα, εἰ ὥρισται μέν, μὴ καλῶς δ’ ὥρισται.

Εἰ μὲν οὖν μὴ ἀληθεύεται, καθ’ οὗ τοὔνομα, καὶ ὁ λόγος, ἐκ τῶν πρὸς τὸ συμβεβηκὸς τόπων ἐπισκεπτέον· καὶ γὰρ ἐκεῖ· πότερον ἀληθὲς ἢ οὐκ ἀληθὲς πᾶσα ἡ σκέψις [139b] γίνεται. ὅταν μὲν γὰρ ὅτι ὑπάρχει τὸ συμβεβηκὸς διαλεγώμεθα, ὅτι ἀληθὲς λέγομεν· ὅταν δ’ ὅτι οὐχ ὑπάρχει, ὅτι οὐκ ἀληθές. εἰ δὲ μὴ ἐν τῷ οἰκείῳ γένει ἔθηκεν, ἢ εἰ μὴ ἴδιος ὁ ἀποδοθεὶς λόγος, ἐκ τῶν πρὸς τὸ γένος καὶ τὸ ἴδιον ῥηθέντων τόπων ἐπισκεπτέον.

Λοιπὸν δ’, εἰ μὴ ὥρισται ἢ εἰ μὴ καλῶς ὥρισται, πῶς μετιτέον εἰπεῖν. πρῶτον μὲν οὖν ἐπισκεπτέον εἰ μὴ καλῶς ὥρισται. ῥᾶον γὰρ ὁτιοῦν ποιῆσαι ἢ καλῶς ποιῆσαι· δῆλον οὖν ὅτι ἡ ἁμαρτία περὶ τοῦτο πλείων, ἐπειδὴ ἐργωδέστερον· ὥσθ’ ἡ ἐπιχείρησις ῥάων ἡ περὶ τοῦτο ἢ ἡ περὶ ἐκεῖνο γίνεται.

Ἔστι δὲ τοῦ μὴ καλῶς μέρη δύο· ἓν μὲν τὸ ἀσαφεῖ τῇ ἑρμηνείᾳ κεχρῆσθαι (δεῖ γὰρ τὸν ὁριζόμενον ὡς ἐνδέχεται σαφεστάτῃ τῇ ἑρμηνείᾳ κεχρῆσθαι, ἐπειδὴ τοῦ γνωρίσαι χάριν ἀποδίδοται ὁ ὁρισμός), δεύτερον δ’ εἰ ἐπὶ πλεῖον εἴρηκε τὸν λόγον τοῦ δέοντος· πᾶν γὰρ τὸ προσκείμενον ἐν τῷ ὁρισμῷ περίεργον. πάλιν δ’ ἑκάτερον τῶν εἰρημένων εἰς πλείω μέρη διείληπται.

Εἷς μὲν οὖν τόπος τοῦ ἀσαφῶς, εἰ ὁμώνυμόν ἐστί τινι τὸ εἰρημένον, οἷον ὅτι ἡ γένεσις ἀγωγὴ εἰς οὐσίαν καὶ ὅτι ἡ ὑγίεια συμμετρία θερμῶν καὶ ψυχρῶν· ὁμώνυμος γὰρ ἡ ἀγωγὴ καὶ ἡ συμμετρία. ἄδηλον οὖν ὁπότερον βούλεται λέγειν τῶν δηλουμένων ὑπὸ τοῦ πλεοναχῶς λεγομένου. ὁμοίως δὲ καὶ εἰ τοῦ ὁριζομένου πλεοναχῶς λεγομένου μὴ διελὼν εἶπεν· ἄδηλον γὰρ ὁποτέρου τὸν ὅρον ἀποδέδωκεν, ἐνδέχεταί τε συκοφαντεῖν ὡς οὐκ ἐφαρμόττοντος τοῦ λόγου ἐπὶ πάντα ὧν τὸν ὁρισμὸν ἀποδέδωκεν. μάλιστα δ’ ἐνδέχεται τὸ τοιοῦτον ποιεῖν λανθανούσης τῆς ὁμωνυμίας. ἐνδέχεται δὲ καί, διελόμενον αὐτὸν ποσαχῶς λέγεται τὸ ἐν τῷ ὁρισμῷ ἀποδοθέν, συλλογισμὸν ποιῆσαι· εἰ γὰρ κατὰ μηδένα τῶν τρόπων ἱκανῶς εἴρηται, δῆλον ὅτι οὐκ ἂν ὡρισμένος εἴη κατὰ τρόπον.

Ἄλλος, εἰ κατὰ μεταφορὰν εἴρηκεν, οἷον εἰ τὴν ἐπιστήμην ἀμετάπτωτον ἢ τὴν γῆν τιθήνην ἢ τὴν σωφροσύνην συμφωνίαν· πᾶν γὰρ ἀσαφὲς τὸ κατὰ μεταφορὰν λεγόμενον. ἐνδέχεται δὲ καὶ τὸν μεταφορὰν εἰπόντα συκοφαντεῖν ὡς κυρίως εἰρηκότα· οὐ γὰρ ἐφαρμόσει ὁ λεχθεὶς ὅρος, οἷον ἐπὶ σωφροσύνης· πᾶσα γὰρ συμφωνία ἐν φθόγγοις. ἔτι εἰ γένος ἡ συμφωνία τῆς σωφροσύνης, ἐν δύο γένεσιν [140a] ἔσται ταὐτὸν οὐ περιέχουσιν ἄλληλα· οὔτε γὰρ ἡ συμφωνία τὴν ἀρετὴν οὔθ’ ἡ ἀρετὴ τὴν συμφωνίαν περιέχει.

Ἔτι εἰ μὴ κειμένοις ὀνόμασι χρῆται, οἷον Πλάτων ὀφρυόσκιον τὸν ὀφθαλμόν, ἢ τὸ φαλάγγιον σηψιδακές, ἢ τὸν μυελὸν ὀστεογενές· πᾶν γὰρ ἀσαφὲς τὸ μὴ εἰωθός.

Ἔνια δ’ οὔτε καθ’ ὁμωνυμίαν οὔτε κατὰ μεταφορὰν οὔτε κυρίως εἴρηται, οἷον ὁ νόμος μέτρον ἢ εἰκὼν τῶν φύσει δικαίων. ἔστι δὲ τὰ τοιαῦτα χείρω τῆς μεταφορᾶς. ἡ μὲν γὰρ μεταφορὰ ποιεῖ πως γνώριμον τὸ σημαινόμενον διὰ τὴν ὁμοιότητα (πάντες γὰρ οἱ μεταφέροντες κατά τινα ὁμοιότητα μεταφέρουσιν), τὸ δὲ τοιοῦτον οὐ ποιεῖ γνώριμον· οὔτε γὰρ ὁμοιότης ὑπάρχει καθ’ ἣν μέτρον ἢ εἰκὼν ὁ νόμος ἐστίν, οὔτε εἴωθε λέγεσθαι. ὥστε εἰ μὲν κυρίως μέτρον ἢ εἰκόνα τὸν νόμον φησὶν εἶναι, ψεύδεται (εἰκὼν γάρ ἐστιν οὗ ἡ γένεσις διὰ μιμήσεως· τοῦτο δ’ οὐχ ὑπάρχει τῷ νόμῳ)· εἰ δὲ μὴ κυρίως, δῆλον ὅτι ἀσαφῶς εἴρηκε καὶ χεῖρον ὁτουοῦν τῶν κατὰ μεταφορὰν λεγομένων.

Ἔτι εἰ μὴ δῆλος ὁ τοῦ ἐναντίου λόγος ἐκ τοῦ λεχθέντος· οἱ γὰρ καλῶς ἀποδιδόμενοι καὶ τοὺς ἐναντίους προσσημαίνουσιν. ἢ εἰ καθ’ αὑτὸν λεχθεὶς μὴ φανερὸς εἴη τίνος ἐστὶν ὁρισμός, ἀλλὰ καθάπερ τὰ τῶν ἀρχαίων γραφέων, εἰ μή τις ἐπέγραψεν, οὐκ ἐγνωρίζετο τί ἐστιν ἕκαστον.

Εἰ μὲν οὖν μὴ σαφῶς, ἐκ τῶν τοιούτων ἐστὶν ἐπισκεπτέον. εἰ δ’ ἐπὶ πλεῖον εἴρηκε τὸν ὅρον, πρῶτον μὲν σκοπεῖν εἴ τινι κέχρηται ὃ πᾶσιν ὑπάρχει, ἢ ὅλως τοῖς οὖσιν ἢ τοῖς ὑπὸ ταὐτὸ γένος τῷ ὁριζομένῳ· ἐπὶ πλεῖον γὰρ εἰρῆσθαι ἀναγκαῖον τοῦτο. δεῖ γὰρ τὸ μὲν γένος ἀπὸ τῶν ἄλλων χωρίζειν, τὴν δὲ διαφορὰν ἀπὸ τῶν ἐν τῷ αὐτῷ γένει. τὸ μὲν οὖν πᾶσιν ὑπάρχον ἁπλῶς ἀπ’ οὐδενὸς χωρίζει· τὸ δὲ τοῖς ὑπὸ ταὐτὸ γένος πᾶσιν ὑπάρχον οὐ χωρίζει ἀπὸ τῶν ἐν ταὐτῷ γένει, ὥστε μάταιον τὸ τοιοῦτον προσκείμενον.

Ἢ εἰ ἔστι μὲν ἴδιον τὸ προσκείμενον, ἀφαιρεθέντος δὲ τούτου καὶ ὁ λοιπὸς λόγος ἴδιός ἐστι καὶ δηλοῖ τὴν οὐσίαν. οἷον ἐν τῷ τοῦ ἀνθρώπου λόγῳ τὸ ἐπιστήμης δεκτικὸν προστεθὲν περίεργον· καὶ γὰρ ἀφαιρεθέντος τούτου ὁ λοιπὸς λόγος ἴδιος καὶ δηλοῖ τὴν οὐσίαν. ἁπλῶς δ’ εἰπεῖν ἅπαν [140b] περίεργον οὗ ἀφαιρεθέντος τὸ λοιπὸν δῆλον ποιεῖ τὸ ὁριζόμενον. τοιοῦτος δὲ καὶ ὁ τῆς ψυχῆς ὅρος, εἴπερ “ἀριθμὸς αὐτὸς αὑτὸν κινῶν” ἐστιν· καὶ γὰρ τὸ αὐτὸ αὑτὸ κινοῦν ψυχή, καθάπερ Πλάτων ὥρισται. ἢ ἴδιον μέν ἐστι τὸ εἰρημένον, οὐ δηλοῖ δὲ τὴν οὐσίαν ἀφαιρεθέντος τοῦ ἀριθμοῦ. ποτέρως μὲν οὖν ἔχει, χαλεπὸν διασαφῆσαι· χρηστέον δ’ ἐπὶ πάντων τῶν τοιούτων πρὸς τὸ συμφέρον· οἷον ὅτι ὁ τοῦ φλέγματος ὅρος “ὑγρὸν πρῶτον ἀπὸ τροφῆς ἄπεπτον”. ἓν γὰρ τὸ πρῶτον, οὐ πολλά, ὥστε περίεργον τὸ ἄπεπτον προσκείμενον· καὶ γὰρ τούτου ἀφαιρεθέντος ὁ λοιπὸς ἔσται ἴδιος λόγος· οὐ γὰρ ἐνδέχεται ἀπὸ τῆς τροφῆς καὶ τοῦτο καὶ ἄλλο τι πρῶτον εἶναι. ἢ οὐχ ἁπλῶς πρῶτον ἀπὸ τροφῆς τὸ φλέγμα ἀλλὰ τῶν ἀπέπτων πρῶτον, ὥστε προσθετέον τὸ “ἄπεπτον” (ἐκείνως μὲν γὰρ ῥηθέντος οὐκ ἀληθὴς ὁ λόγος, εἴπερ μὴ πάντων πρῶτόν ἐστιν);

Ἔτι εἴ τι τῶν ἐν τῷ λόγῳ μὴ πᾶσιν ὑπάρχει τοῖς ὑπὸ ταὐτὸ εἶδος· ὁ γὰρ τοιοῦτος χεῖρον ὥρισται τῶν χρωμένων ὃ πᾶσιν ὑπάρχει τοῖς οὖσιν. ἐκείνως μὲν γάρ, ἂν ὁ λοιπὸς ἴδιος ᾖ λόγος, καὶ ὁ πᾶς ἴδιος ἔσται· ἁπλῶς γὰρ πρὸς τὸ ἴδιον ὁτουοῦν προστεθέντος ἀληθοῦς ὅλος ὁ λόγος ἴδιος γίνεται. εἰ δέ τι τῶν ἐν τῷ λόγῳ μὴ πᾶσιν ὑπάρχει τοῖς ὑπὸ ταὐτὸ εἶδος, ἀδύνατον ὅλον τὸν λόγον ἴδιον εἶναι· οὐ γὰρ ἀντικατηγορηθήσεται τοῦ πράγματος. οἷον “ζῷον πεζὸν δίπουν τετράπηχυ”· ὁ γὰρ τοιοῦτος λόγος οὐκ ἀντικατηγορεῖται τοῦ πράγματος διὰ τὸ μὴ πᾶσιν ὑπάρχειν τοῖς ὑπὸ ταὐτὸν εἶδος τὸ τετράπηχυ.

Πάλιν εἰ ταὐτὸν πλεονάκις εἴρηκεν, οἷον τὴν ἐπιθυμίαν ὄρεξιν ἡδέος εἰπών· πᾶσα γὰρ ἐπιθυμία ἡδέος ἐστίν, ὥστε καὶ τὸ ταὐτὸν τῇ ἐπιθυμίᾳ ἡδέος ἔσται. γίνεται οὖν ὅρος τῆς ἐπιθυμίας ὄρεξις ἡδέος ἡδέος· οὐδὲν γὰρ διαφέρει ἐπιθυμίαν εἰπεῖν ἢ ὄρεξιν ἡδέος, ὥσθ’ ἑκάτερον αὐτῶν ἡδέος ἔσται. ἢ τοῦτο μὲν οὐδὲν ἄτοπον· καὶ γὰρ ὁ ἄνθρωπος δίπουν ἐστίν, ὥστε καὶ τὸ ταὐτὸν τῷ ἀνθρώπῳ δίπουν ἔσται, ἔστι δὲ ταὐτὸν τῷ ἀνθρώπῳ ζῷον πεζὸν δίπουν, ὥστε ζῷον πεζὸν δίπουν δίπουν ἔσται, ἀλλ’ οὐ διὰ τοῦτο ἄτοπόν τι συμβαίνει· οὐ γὰρ κατὰ ζῴου πεζοῦ τὸ δίπουν κατηγορεῖται (οὕτω μὲν γὰρ δὶς ἂν περὶ τοῦ αὐτοῦ τὸ δίπουν κατηγοροῖτο), ἀλλὰ περὶ ζῴου πεζοῦ δίποδος [141a] τὸ δίπουν λέγεται, ὥστε ἅπαξ μόνον τὸ δίπουν κατηγορεῖται. ὁμοίως δὲ καὶ ἐπὶ τῆς ἐπιθυμίας· οὐ γὰρ κατὰ τῆς ὀρέξεως τὸ ἡδέος εἶναι κατηγορεῖται ἀλλὰ κατὰ τοῦ σύμπαντος, ὥστε ἅπαξ καὶ ἐνταῦθα ἡ κατηγορία γίνεται. οὐκ ἔστι δὲ τὸ δὶς φθέγξασθαι ταὐτὸν ὄνομα τῶν ἀτόπων, ἀλλὰ τὸ πλεονάκις περί τινος τὸ αὐτὸ κατηγορῆσαι, ὡς Ξενοκράτης τὴν φρόνησιν ὁριστικὴν καὶ θεωρητικὴν τῶν ὄντων φησὶν εἶναι· ἡ γὰρ ὁριστικὴ θεωρητική τίς ἐστιν, ὥστε δὶς τὸ αὐτὸ λέγει, προσθεὶς πάλιν καὶ θεωρητικήν. ὁμοίως δὲ καὶ ὅσοι τὴν κατάψυξιν στέρησιν τοῦ κατὰ φύσιν θερμοῦ φασιν εἶναι· πᾶσα γὰρ στέρησίς ἐστι τοῦ κατὰ φύσιν ὑπάρχοντος, ὥστε περίεργον τὸ προσθεῖναι τοῦ κατὰ φύσιν, ἀλλ’ ἱκανὸν ἦν εἰπεῖν στέρησιν θερμοῦ, ἐπειδὴ αὐτὴ ἡ στέρησις γνώριμον ποιεῖ ὅτι τοῦ κατὰ φύσιν λέγεται.

Πάλιν εἰ τοῦ καθόλου εἰρημένου προσθείη καὶ ἐπὶ μέρους, οἷον εἰ τὴν ἐπιείκειαν ἐλάττωσιν τῶν συμφερόντων καὶ δικαίων· τὸ γὰρ δίκαιον συμφέρον τι, ὥστε περιέχεται ἐν τῷ συμφέροντι. περιττὸν οὖν τὸ δίκαιον· καθόλου γὰρ εἴπας ἐπὶ μέρους προσέθηκεν. καὶ εἰ τὴν ἰατρικὴν ἐπιστήμην τῶν ὑγιεινῶν ζῴῳ καὶ ἀνθρώπῳ, ἢ τὸν νόμον εἰκόνα τῶν φύσει καλῶν καὶ δικαίων· τὸ γὰρ δίκαιον καλόν τι, ὥστε πλεονάκις τὸ αὐτὸ λέγει.

Πότερον μὲν οὖν καλῶς ἢ οὐ καλῶς, διὰ τούτων καὶ τῶν τοιούτων ἐπισκεπτέον· πότερον δ’ ὥρισται καὶ εἴρηκε τὸ τί ἦν εἶναι ἢ οὐχί, ἐκ τῶνδε.

Πρῶτον μὲν εἰ μὴ διὰ προτέρων καὶ γνωριμωτέρων πεποίηται τὸν ὁρισμόν. ἐπεὶ γὰρ ὁ ὅρος ἀποδίδοται τοῦ γνωρίσαι χάριν τὸ λεχθέν, γνωρίζομεν δ’ οὐκ ἐκ τῶν τυχόντων ἀλλ’ ἐκ τῶν προτέρων καὶ γνωριμωτέρων, καθάπερ ἐν ταῖς ἀποδείξεσιν (οὕτω γὰρ πᾶσα διδασκαλία καὶ μάθησις ἔχει), φανερὸν ὅτι ὁ μὴ διὰ τοιούτων ὁριζόμενος οὐχ ὥρισται. εἰ δὲ μή, πλείους ἔσονται τοῦ αὐτοῦ ὁρισμοί· δῆλον γὰρ ὅτι καὶ ὁ διὰ προτέρων καὶ γνωριμωτέρων βέλτιον ὥρισται, ὥστε ἀμφότεροι ἂν εἴησαν ὅροι τοῦ αὐτοῦ. τὸ δὲ τοιοῦτον οὐ δοκεῖ· ἑκάστῳ γὰρ τῶν ὄντων ἕν ἐστι τὸ εἶναι ὅπερ ἐστίν. ὥστ’ εἰ πλείους ἔσονται τοῦ αὐτοῦ ὁρισμοί, ταὐτὸν ἔσται τῷ ὁριζομένῳ τὸ εἶναι ὅπερ καθ’ ἑκάτερον τῶν ὁρισμῶν δηλοῦται. ταῦτα δ’ [141b] οὐ ταὐτά ἐστιν, ἐπειδὴ οἱ ὁρισμοὶ ἕτεροι. δῆλον οὖν ὅτι οὐχ ὥρισται ὁ μὴ διὰ προτέρων καὶ γνωριμωτέρων ὁρισάμενος.

Τὸ μὲν οὖν μὴ διὰ γνωριμωτέρων εἰρῆσθαι τὸν ὅρον διχῶς ἔστιν ἐκλαβεῖν· ἢ γὰρ εἰ ἁπλῶς ἐξ ἀγνωστοτέρων ἢ ἡμῖν ἀγνωστοτέρων· ἐνδέχεται γὰρ ἀμφοτέρως. ἁπλῶς μὲν οὖν γνωριμώτερον τὸ πρότερον τοῦ ὑστέρου, οἷον στιγμὴ γραμμῆς καὶ γραμμὴ ἐπιπέδου καὶ ἐπίπεδον στερεοῦ, καθάπερ καὶ μονὰς ἀριθμοῦ· πρότερον γὰρ καὶ ἀρχὴ παντὸς ἀριθμοῦ. ὁμοίως δὲ καὶ στοιχεῖον συλλαβῆς. ἡμῖν δ’ ἀνάπαλιν ἐνίοτε συμβαίνει· μάλιστα γὰρ τὸ στερεὸν ὑπὸ τὴν αἴσθησιν πίπτει, τὸ δ’ ἐπίπεδον μᾶλλον τῆς γραμμῆς, γραμμὴ δὲ σημείου μᾶλλον. οἱ πολλοὶ γὰρ τὰ τοιαῦτα προγνωρίζουσιν· τὰ μὲν γὰρ τῆς τυχούσης, τὰ δ’ ἀκριβοῦς καὶ περιττῆς διανοίας καταμαθεῖν ἐστιν.

Ἁπλῶς μὲν οὖν βέλτιον τὸ διὰ τῶν προτέρων τὰ ὕστερα πειρᾶσθαι γνωρίζειν· ἐπιστημονικώτερον γὰρ τὸ τοιοῦτόν ἐστιν. οὐ μὴν ἀλλὰ πρὸς τοὺς ἀδυνατοῦντας γνωρίζειν διὰ τῶν τοιούτων ἀναγκαῖον ἴσως διὰ τῶν ἐκείνοις γνωρίμων ποιεῖσθαι τὸν λόγον. εἰσὶ δὲ τῶν τοιούτων ὁρισμῶν ὅ τε τῆς στιγμῆς καὶ ὁ τῆς γραμμῆς καὶ ὁ τοῦ ἐπιπέδου· πάντες γὰρ διὰ τῶν ὑστέρων τὰ πρότερα δηλοῦσιν· τὸ μὲν γὰρ γραμμῆς, τὸ δ’ ἐπιπέδου, τὸ δὲ στερεοῦ φασι πέρας εἶναι. οὐ δεῖ δὲ λανθάνειν ὅτι τοὺς οὕτως ὁριζομένους οὐκ ἐνδέχεται τὸ τί ἦν εἶναι τῷ ὁριζομένῳ δηλοῦν, ἐὰν μὴ τυγχάνῃ ταὐτὸν ἡμῖν τε γνωριμώτερον ὂν καὶ ἁπλῶς γνωριμώτερον, εἴπερ δεῖ μὲν διὰ τοῦ γένους καὶ τῶν διαφορῶν ὁρίζεσθαι τὸν καλῶς ὁριζόμενον, ταῦτα δὲ τῶν ἁπλῶς γνωριμωτέρων καὶ προτέρων τοῦ εἴδους ἐστίν. συναναιρεῖ γὰρ τὸ γένος καὶ ἡ διαφορὰ τὸ εἶδος, ὥστε πρότερα ταῦτα τοῦ εἴδους. ἔστι δὲ καὶ γνωριμώτερα· τοῦ μὲν γὰρ εἴδους γνωριζομένου ἀνάγκη καὶ τὸ γένος καὶ τὴν διαφορὰν γνωρίζεσθαι (ὁ γὰρ ἄνθρωπον γνωρίζων καὶ ζῷον καὶ πεζὸν γνωρίζει), τοῦ δὲ γένους ἢ τῆς διαφορᾶς γνωριζομένης οὐκ ἀνάγκη καὶ τὸ εἶδος γνωρίζεσθαι, ὥστε ἀγνωστότερον τὸ εἶδος. ἔτι τοῖς κατ’ ἀλήθειαν τοὺς τοιούτους ὁρισμοὺς φάσκουσιν εἶναι, τοὺς ἐκ τῶν ἑκάστῳ γνωρίμων, πολλοὺς τοῦ αὐτοῦ συμβήσεται λέγειν ὁρισμοὺς εἶναι· ἕτερα γὰρ ἑτέροις καὶ οὐ ταὐτὰ πᾶσι τυγχάνει γνωριμώτερα ὄντα, ὥστε πρὸς ἕκαστον [142a] ἕτερος ἂν εἴη ὁρισμὸς ἀποδοτέος, εἴπερ ἐκ τῶν ἑκάστῳ γνωριμωτέρων τὸν ὁρισμὸν ποιεῖσθαι χρή. ἔτι τοῖς αὐτοῖς ἄλλοτ’ ἄλλα μᾶλλον γνώριμα, ἐξ ἀρχῆς μὲν τὰ αἰσθητά, ἀκριβεστέροις δὲ γενομένοις ἀνάπαλιν, ὥστ’ οὐδὲ πρὸς τὸν αὐτὸν ἀεὶ ὁ αὐτὸς ὁρισμὸς ἀποδοτέος τοῖς διὰ τῶν ἑκάστοις γνωριμωτέρων τὸν ὁρισμὸν φάσκουσιν ἀποδοτέον εἶναι. δῆλον οὖν ὅτι οὐχ ὁριστέον διὰ τῶν τοιούτων ἀλλὰ διὰ τῶν ἁπλῶς γνωριμωτέρων· μόνως γὰρ ἂν οὕτως εἷς καὶ ὁ αὐτὸς ὁρισμὸς ἀεὶ γίνοιτο. ἴσως δὲ καὶ τὸ ἁπλῶς γνώριμον οὐ τὸ πᾶσι γνώριμόν ἐστιν ἀλλὰ τὸ τοῖς εὖ διακειμένοις τὴν διάνοιαν, καθάπερ καὶ τὸ ἁπλῶς ὑγιεινὸν τὸ τοῖς εὖ ἔχουσι τὸ σῶμα. δεῖ μὲν οὖν ἕκαστα τῶν τοιούτων ἐξακριβοῦν, χρῆσθαι δὲ διαλεγομένους πρὸς τὸ συμφέρον. μάλιστα δ’ ὁμολογουμένως ἀναιρεῖν ἐνδέχεται τὸν ὁρισμόν, ἐὰν μήτ’ ἐκ τῶν ἁπλῶς γνωριμωτέρων μήτ’ ἐκ τῶν ἡμῖν τυγχάνῃ τὸν λόγον πεποιημένος.

Εἷς μὲν οὖν τρόπος τοῦ μὴ διὰ γνωριμωτέρων ἐστὶ τὸ διὰ τῶν ὑστέρων τὰ πρότερα δηλοῦν, καθάπερ πρότερον εἴπαμεν· ἄλλος δὲ εἰ τοῦ ἐν ἠρεμίᾳ καὶ τοῦ ὡρισμένου διὰ τοῦ ἀορίστου καὶ τοῦ ἐν κινήσει ἀποδέδοται ὁ λόγος ἡμῖν· πρότερον γὰρ τὸ μένον καὶ τὸ ὡρισμένον τοῦ ἀορίστου καὶ ἐν κινήσει ὄντος.

Τοῦ δὲ μὴ ἐκ προτέρων τρεῖς εἰσι τρόποι· πρῶτος μέν, εἰ διὰ τοῦ ἀντικειμένου τὸ ἀντικείμενον ὥρισται, οἷον διὰ τοῦ κακοῦ τὸ ἀγαθόν· ἅμα γὰρ τῇ φύσει τὰ ἀντικείμενα. ἐνίοις δὲ καὶ ἡ αὐτὴ ἐπιστήμη ἀμφοτέρων δοκεῖ εἶναι, ὥστ’ οὐδὲ γνωριμώτερον τὸ ἕτερον τοῦ ἑτέρου. δεῖ δὲ μὴ λανθάνειν ὅτι ἔνια ἴσως οὐκ ἔστιν ὁρίσασθαι ἄλλως, οἷον τὸ διπλάσιον ἄνευ τοῦ ἡμίσεος, καὶ ὅσα καθ’ αὑτὰ πρός τι λέγεται. πᾶσι γὰρ τοῖς τοιούτοις ταὐτὸν τὸ εἶναι τῷ πρός τί πως ἔχειν, ὥστ’ ἀδύνατον ἄνευ θατέρου θάτερον γνωρίζειν· διόπερ ἀναγκαῖον ἐν τῷ τοῦ ἑτέρου λόγῳ συμπεριειλῆφθαι καὶ θάτερον. γνωρίζειν μὲν οὖν δεῖ τὰ τοιαῦτα πάντα, χρῆσθαι δ’ αὐτοῖς ὡς ἂν δοκῇ συμφέρειν.

Ἄλλος, εἰ αὐτῷ κέχρηται τῷ ὁριζομένῳ. λανθάνει δ’ ὅταν μὴ αὐτῷ τῷ τοῦ ὁριζομένου ὀνόματι χρήσηται, οἷον εἰ [142b] τὸν ἥλιον ἄστρον ἡμεροφανὲς ὡρίσατο· ὁ γὰρ ἡμέρᾳ χρώμενος ἡλίῳ χρῆται. δεῖ δ’, ὅπως φωραθῇ τὰ τοιαῦτα, μεταλαμβάνειν ἀντὶ τοῦ ὀνόματος τὸν λόγον, οἷον ὅτι ἡμέρα ἡλίου φορὰ ὑπὲρ γῆς ἐστιν· δῆλον γὰρ ὅτι ὁ τὴν φορὰν ἡλίου ὑπὲρ γῆς εἰρηκὼς τὸν ἥλιον εἴρηκεν, ὥστε χρῆται τῷ ἡλίῳ ὁ τῇ ἡμέρᾳ χρησάμενος.

Πάλιν εἰ τῷ ἀντιδιῃρημένῳ τὸ ἀντιδιῃρημένον ὥρισται, οἷον περιττὸν τὸ μονάδι μεῖζον ἀρτίου. ἅμα γὰρ τῇ φύσει τὰ ἐκ τοῦ αὐτοῦ γένους ἀντιδιῃρημένα· τὸ δὲ περιττὸν καὶ τὸ ἄρτιον ἀντιδιῄρηται· ἄμφω γὰρ ἀριθμοῦ διαφοραί.

Ὁμοίως δὲ καὶ εἰ διὰ τῶν ὑποκάτω τὸ ἐπάνω ὥρισται, οἷον ἄρτιον ἀριθμὸν τὸν δίχα διαιρούμενον ἢ τὸ ἀγαθὸν ἕξιν ἀρετῆς· τό τε γὰρ δίχα ἀπὸ τῶν δύο εἴληπται, ἀρτίων ὄντων, καὶ ἡ ἀρετὴ ἀγαθόν τί ἐστιν, ὥσθ’ ὑποκάτω ταῦτα ἐκείνων ἐστίν. ἔτι δ’ ἀνάγκη τὸν τῷ ὑποκάτω χρώμενον καὶ αὐτῷ χρῆσθαι. ὅ τε γὰρ τῇ ἀρετῇ χρώμενος χρῆται τῷ ἀγαθῷ, ἐπειδὴ ἀγαθόν τι ἡ ἀρετή, ὁμοίως δὲ καὶ ὁ τῷ δίχα χρώμενος τῷ ἀρτίῳ χρῆται, ἐπειδὴ εἰς δύο διῃρῆσθαι σημαίνει τὸ δίχα διῃρῆσθαι, τὰ δὲ δύο ἄρτιά ἐστιν.

Καθόλου μὲν οὖν εἰπεῖν εἷς ἐστι τόπος τὸ μὴ διὰ προτέρων καὶ γνωριμωτέρων πεποιῆσθαι τὸν λόγον, μέρη δ’ αὐτοῦ τὰ εἰρημένα. δεύτερος δὲ εἰ ἐν γένει τοῦ πράγματος ὄντος μὴ κεῖται ἐν γένει. ἐν ἅπασι δὲ τὸ τοιοῦτον ἁμάρτημα ἔστιν ἐν οἷς οὐ πρόκειται τοῦ λόγου τὸ τί ἐστιν, οἷον ὁ τοῦ σώματος ὁρισμὸς “τὸ ἔχον τρεῖς διαστάσεις”, ἢ εἴ τις τὸν ἄνθρωπον ὁρίσαιτο τὸ ἐπιστάμενον ἀριθμεῖν. οὐ γὰρ εἴρηται τί ὂν τρεῖς ἔχει διαστάσεις, ἢ τί ὂν ἐπίσταται ἀριθμεῖν· τὸ δὲ γένος βούλεται τὸ τί ἐστι σημαίνειν, καὶ πρῶτον ὑποτίθεται τῶν ἐν τῷ ὁρισμῷ λεγομένων.

Ἔτι εἰ πρὸς πλείω λεγομένου τοῦ ὁριζομένου μὴ πρὸς πάντα ἀποδέδωκεν, οἷον εἰ τὴν γραμματικὴν ἐπιστήμην τοῦ γράψαι τὸ ὑπαγορευθέν· προσδεῖται γὰρ ὅτι καὶ τοῦ ἀναγνῶναι. οὐδὲν γὰρ μᾶλλον ‹ὁ› τοῦ γράψαι ἢ ‹ὁ› τοῦ ἀναγνῶναι ἀποδοὺς ὥρισται, ὥστ' οὐδέτερος, ἀλλ' ὁ ἄμφω ταῦτ' εἰπών, ἐπειδὴ πλείους οὐκ ἐνδέχεται ταὐτοῦ ὁρισμοὺς εἶναι. ἐπ' ἐνίων [143a] μὲν οὖν κατ' ἀλήθειαν ἔχει καθάπερ εἴρηται, ἐπ' ἐνίων δ' οὔ, οἷον ἐφ' ὅσων μὴ καθ' αὑτὸ πρὸς ἄμφω λέγεται, καθάπερ ἡ ἰατρικὴ τοῦ ὑγίειαν καὶ νόσον ποιῆσαι· τοῦ μὲν γὰρ καθ' αὑτὴν λέγεται, τοῦ δὲ κατὰ συμβεβηκός· ἁπλῶς γὰρ ἀλλότριον τῆς ἰατρικῆς τὸ νόσον ποιεῖν. ὥστ' οὐδὲν μᾶλλον ὥρισται ὁ πρὸς ἄμφω ἀποδοὺς τοῦ πρὸς θάτερον, ἀλλ' ἴσως καὶ χεῖρον, ἐπειδὴ καὶ τῶν λοιπῶν ὁστισοῦν δυνατός ἐστι νόσον ποιῆσαι.

Ἔτι εἰ μὴ πρὸς τὸ βέλτιον ἀλλὰ πρὸς τὸ χεῖρον ἀποδέδωκε, πλειόνων ὄντων πρὸς ἃ λέγεται τὸ ὁριζόμενον· πᾶσα γὰρ ἐπιστήμη καὶ δύναμις τοῦ βελτίστου δοκεῖ εἶναι.

Πάλιν εἰ μὴ κεῖται ἐν τῷ οἰκείῳ γένει τὸ λεχθέν, σκοπεῖν ἐκ τῶν περὶ τὰ γένη στοιχείων, καθάπερ πρότερον εἴρηται.

Ἔτι εἰ ὑπερβαίνων λέγει τὰ γένη, οἷον τὴν δικαιοσύνην ἕξιν ἰσότητος ποιητικὴν ἢ διανεμητικὴν τοῦ ἴσου· ὑπερβαίνει γὰρ ὁ οὕτως ὁριζόμενος τὴν ἀρετήν. ἀπολιπὼν οὖν τὸ τῆς δικαιοσύνης γένος οὐ λέγει τὸ τί ἦν εἶναι· ἡ γὰρ οὐσία ἑκάστῳ μετὰ τοῦ γένους. ἔστι δὲ τοῦτο ταὐτὸν τῷ μὴ εἰς τὸ ἐγγυτάτω γένος θεῖναι· ὁ γὰρ εἰς τὸ ἐγγυτάτω θεὶς πάντα τὰ ἐπάνω εἴρηκεν, ἐπειδὴ πάντα τὰ ἐπάνω γένη τῶν ὑποκάτω κατηγορεῖται. ὥστ' ἢ εἰς τὸ ἐγγυτάτω γένος θετέον, ἢ πάσας τὰς διαφορὰς τῷ ἐπάνω γένει προσαπτέον δι' ὧν ὁρίζεται τὸ ἐγγυτάτω γένος· οὕτω γὰρ οὐδὲν ἂν εἴη παραλελοιπώς, ἀλλ' ἀντ' ὀνόματος λόγῳ εἰρηκὼς ἂν εἴη τὸ ὑποκάτω γένος. ὁ δ' αὐτὸ μόνον τὸ ἐπάνω γένος εἴπας οὐ λέγει καὶ τὸ ὑποκάτω γένος· ὁ γὰρ φυτὸν εἴπας οὐ λέγει δένδρον.

Πάλιν ἐπὶ τῶν διαφορῶν ὁμοίως σκεπτέον εἰ καὶ τὰς διαφορὰς εἶπε τὰς τοῦ γένους. εἰ γὰρ μὴ ταῖς τοῦ πράγματος ἰδίαις ὥρισται διαφοραῖς, ἢ καὶ παντελῶς τι τοιοῦτον εἴρηκεν ὃ μηδενὸς ἐνδέχεται διαφορὰν εἶναι, οἷον τὸ ζῷον ἢ τὴν οὐσίαν, δῆλον ὅτι οὐχ ὥρισται· οὐδενὸς γὰρ διαφοραὶ τὰ εἰρημένα. ὁρᾶν δὲ καὶ εἰ ἔστιν ἀντιδιῃρημένον τι τῇ εἰρημένῃ διαφορᾷ. εἰ γὰρ μὴ ἔστι, δῆλον ὅτι οὐκ ἂν εἴη ἡ εἰρημένη τοῦ γένους διαφορά· πᾶν γὰρ γένος ταῖς ἀντιδιῃρημέναις διαφοραῖς [143b] διαιρεῖται, καθάπερ τὸ ζῷον τῷ πεζῷ καὶ τῷ πτηνῷ καὶ ‹τῷ› ἐνύδρῳ [καὶ τῷ δίποδι]. ἢ εἰ ἔστι μὲν ἀντιδιῃρημένη διαφορά, μὴ ἀληθεύεται δὲ κατὰ τοῦ γένους. δῆλον γὰρ ὅτι οὐδετέρα ἂν εἴη τοῦ γένους διαφορά· πᾶσαι γὰρ αἱ ἀντιδιῃρημέναι διαφοραὶ ἀληθεύονται κατὰ τοῦ οἰκείου γένους. ὁμοίως δὲ καὶ εἰ ἀληθεύεται μέν, μὴ ποιεῖ δὲ προστιθεμένη τῷ γένει εἶδος. δῆλον γὰρ ὅτι οὐκ ἂν εἴη αὕτη εἰδοποιὸς διαφορὰ τοῦ γένους· πᾶσα γὰρ εἰδοποιὸς διαφορὰ μετὰ τοῦ γένους εἶδος ποιεῖ. εἰ δ’ αὕτη μὴ ἔστι διαφορά, οὐδ’ ἡ λεχθεῖσα, ἐπεὶ ταύτῃ ἀντιδιῄρηται.

Ἔτι ἐὰν ἀποφάσει διαιρῇ τὸ γένος, καθάπερ οἱ τὴν γραμμὴν ὁριζόμενοι μῆκος ἀπλατὲς εἶναι· οὐδὲν γὰρ ἄλλο σημαίνει ἢ ὅτι οὐκ ἔχει πλάτος. συμβήσεται οὖν τὸ γένος μετέχειν τοῦ εἴδους· πᾶν γὰρ μῆκος ἢ ἀπλατὲς ἢ πλάτος ἔχον ἐστίν, ἐπεὶ κατὰ παντὸς ἢ ἡ κατάφασις ἢ ἡ ἀπόφασις ἀληθεύεται, ὥστε καὶ τὸ γένος τῆς γραμμῆς, μῆκος ὄν, ἢ ἀπλατὲς ἢ πλάτος ἔχον ἔσται. μῆκος δ’ ἀπλατὲς εἴδους ἐστὶ λόγος· ὁμοίως δὲ καὶ μῆκος πλάτος ἔχον. τὸ γὰρ ἀπλατὲς καὶ τὸ πλάτος ἔχον διαφοραί εἰσιν· ἐκ δὲ τῆς διαφορᾶς καὶ τοῦ γένους ὁ τοῦ εἴδους ἐστὶ λόγος, ὥστε τὸ γένος ἐπιδέχοιτ’ ἂν τὸν τοῦ εἴδους λόγον. ὁμοίως δὲ καὶ τὸν τῆς διαφορᾶς, ἐπειδὴ ἡ ἑτέρα τῶν εἰρημένων διαφορῶν ἐξ ἀνάγκης κατηγορεῖται τοῦ γένους. ἔστι δ’ ὁ εἰρημένος τόπος χρήσιμος πρὸς τοὺς τιθεμένους ἰδέας εἶναι. εἰ γὰρ ἔστιν αὐτὸ μῆκος, πῶς κατηγορηθήσεται κατὰ τοῦ γένους ὅτι πλάτος ἔχον ἐστὶν ἢ ἀπλατές ἐστιν; δεῖ γὰρ κατὰ παντὸς μήκους τὸ ἕτερον αὐτῶν ἀληθεύεσθαι, εἴπερ κατὰ τοῦ γένους ἀληθεύεσθαι μέλλει. τοῦτο δ’ οὐ συμβαίνει· ἔστι γὰρ καὶ ἀπλατῆ καὶ πλάτος ἔχοντα μήκη. ὥστε πρὸς ἐκείνους μόνους χρήσιμος ὁ τόπος οἳ πᾶν γένος ἓν ἀριθμῷ φασιν εἶναι. τοῦτο δὲ ποιοῦσιν οἱ τὰς ἰδέας τιθέμενοι· αὐτὸ γὰρ μῆκος καὶ αὐτὸ ζῷον γένος φασὶν εἶναι.

Ἴσως δ’ ἐπ’ ἐνίων ἀναγκαῖον καὶ ἀποφάσει χρῆσθαι τὸν ὁριζόμενον, οἷον ἐπὶ τῶν στερήσεων· τυφλὸν γάρ ἐστι τὸ μὴ ἔχον ὄψιν, ὅτε πέφυκεν ἔχειν. διαφέρει δ’ οὐδὲν ἀποφάσει διελεῖν τὸ γένος ἢ τοιαύτῃ καταφάσει ᾗ ἀπόφασιν [144a] ἀναγκαῖον ἀντιδιαιρεῖσθαι, οἷον εἰ μῆκος πλάτος ἔχον ὥρισται· τῷ γὰρ πλάτος ἔχοντι τὸ μὴ ἔχον πλάτος ἀντιδιῄρηται, ἄλλο δ’ οὐδέν, ὥστε ἀποφάσει πάλιν διαιρεῖται τὸ γένος.

Πάλιν εἰ τὸ εἶδος ὡς διαφορὰν ἀποδέδωκε, καθάπερ οἱ τὸν προπηλακισμὸν ὕβριν μετὰ χλευασίας ὁριζόμενοι· ἡ γὰρ χλευασία ὕβρις τις, ὥστ’ οὐ διαφορὰ ἀλλ’ εἶδος ἡ χλευασία.

Ἔτι εἰ τὸ γένος ὡς διαφορὰν εἴρηκεν, οἷον τὴν ἀρετὴν ἕξιν ἀγαθὴν ἢ σπουδαίαν· γένος γὰρ τἀγαθὸν τῆς ἀρετῆς ἐστιν. ἢ οὐ γένος τἀγαθὸν ἀλλὰ διαφορά, εἴπερ ἀληθὲς ὅτι οὐκ ἐνδέχεται ταὐτὸν ἐν δύο γένεσιν εἶναι μὴ περιέχουσιν ἄλληλα. οὔτε γὰρ τἀγαθὸν τὴν ἕξιν περιέχει οὔθ’ ἡ ἕξις τἀγαθόν· οὐ γὰρ πᾶσα ἕξις ἀγαθόν, οὐδὲ πᾶν ἀγαθὸν ἕξις, ὥστ’ οὐκ ἂν εἴη γένη ἀμφότερα. εἰ οὖν ἡ ἕξις τῆς ἀρετῆς γένος, δῆλον ὅτι τἀγαθὸν οὐ γένος ἀλλὰ μᾶλλον διαφορά. ἔτι ἡ μὲν ἕξις τί ἐστι σημαίνει ἡ ἀρετή, τὸ δ’ ἀγαθὸν οὐ τί ἐστιν ἀλλὰ ποῖον· δοκεῖ δ’ ἡ διαφορὰ ποιόν τι σημαίνειν.

Ὁρᾶν δὲ καὶ εἰ μὴ ποιόν τι ἀλλὰ τόδε τι σημαίνει ἡ ἀποδοθεῖσα διαφορά· δοκεῖ γὰρ ποιόν τι πᾶσα διαφορὰ δηλοῦν.

Σκοπεῖν δὲ καὶ εἰ κατὰ συμβεβηκὸς ὑπάρχει τῷ ὁριζομένῳ ἡ διαφορά. οὐδεμία γὰρ διαφορὰ τῶν κατὰ συμβεβηκὸς ὑπαρχόντων ἐστί, καθάπερ οὐδὲ τὸ γένος· οὐ γὰρ ἐνδέχεται τὴν διαφορὰν ὑπάρχειν τινὶ καὶ μὴ ὑπάρχειν.

Ἔτι εἰ κατηγορεῖται τοῦ γένους ἡ διαφορὰ ἢ τὸ εἶδος ἢ τῶν κάτωθέν τι τοῦ εἴδους, οὐκ ἂν εἴη ὡρισμένος· οὐδὲν γὰρ τῶν εἰρημένων ἐνδέχεται τοῦ γένους κατηγορεῖσθαι, ἐπειδὴ τὸ γένος ἐπὶ πλεῖστον πάντων λέγεται. πάλιν εἰ κατηγορεῖται τὸ γένος τῆς διαφορᾶς· οὐ γὰρ κατὰ τῆς διαφορᾶς, ἀλλὰ καθ’ ὧν ἡ διαφορά, τὸ γένος δοκεῖ κατηγορεῖσθαι, οἷον τὸ ζῷον κατὰ τοῦ ἀνθρώπου καὶ τοῦ βοὸς καὶ τῶν ἄλλων πεζῶν ζῴων, οὐ κατ’ αὐτῆς τῆς διαφορᾶς τῆς κατὰ τοῦ εἴδους λεγομένης. εἰ γὰρ καθ’ ἑκάστης τῶν διαφορῶν τὸ ζῷον κατηγορηθήσεται, πολλὰ ζῷα τοῦ εἴδους ἂν κατηγοροῖτο· αἱ [144b] γὰρ διαφοραὶ τοῦ εἴδους κατηγοροῦνται. ἔτι αἱ διαφοραὶ πᾶσαι ἢ εἴδη ἢ ἄτομα ἔσονται, εἴπερ ζῷα· ἕκαστον γὰρ τῶν ζῴων ἢ εἶδός ἐστιν ἢ ἄτομον.

Ὁμοίως δὲ σκεπτέον καὶ εἰ τὸ εἶδος ἢ τῶν ὑποκάτω τι τοῦ εἴδους τῆς διαφορᾶς κατηγορεῖται· ἀδύνατον γάρ, ἐπειδὴ ἐπὶ πλέον ἡ διαφορὰ τῶν εἰδῶν λέγεται. ἔτι συμβήσεται τὴν διαφορὰν εἶδος εἶναι, εἴπερ κατηγορεῖταί τι αὐτῆς τῶν εἰδῶν· εἰ γὰρ κατηγορηθήσεται ἄνθρωπος, δῆλον ὅτι ἡ διαφορὰ ἄνθρωπός ἐστιν. πάλιν εἰ μὴ πρότερον ἡ διαφορὰ τοῦ εἴδους· τοῦ μὲν γὰρ γένους ὕστερον, τοῦ δ’ εἴδους πρότερον τὴν διαφορὰν δεῖ εἶναι.

Σκοπεῖν δὲ καὶ εἰ ἑτέρου γένους ἡ ῥηθεῖσα διαφορὰ μὴ περιεχομένου μηδὲ περιέχοντος· οὐ δοκεῖ γὰρ ἡ αὐτὴ διαφορὰ δύο γενῶν εἶναι μὴ περιεχόντων ἄλληλα. εἰ δὲ μή, συμβήσεται καὶ εἶδος τὸ αὐτὸ ἐν δύο γένεσιν εἶναι μὴ περιέχουσιν ἄλληλα. ἐπιφέρει γὰρ ἑκάστη τῶν διαφορῶν τὸ οἰκεῖον γένος, καθάπερ τὸ πεζὸν καὶ τὸ δίπουν τὸ ζῷον συνεπιφέρει. ὥστε καθ’ οὗ ἡ διαφορά, καὶ τῶν γενῶν ἑκάτερον· δῆλον οὖν ὅτι τὸ εἶδος ἐν δύο γένεσιν οὐ περιέχουσιν ἄλληλα. ἢ οὐκ ἀδύνατον τὴν αὐτὴν διαφορὰν δύο γενῶν εἶναι μὴ περιεχόντων ἄλληλα, ἀλλὰ προσθετέον “μηδ’ ἄμφω ὑπὸ ταὐτὸν ὄντων”. τὸ γὰρ πεζὸν ζῷον καὶ τὸ πτηνὸν ζῷον γένη ἐστὶν οὐ περιέχοντα ἄλληλα, καὶ ἀμφοτέρων αὐτῶν ἐστι τὸ δίπουν διαφορά. ὥστε προσθετέον ὅτι μηδ’ ὑπὸ ταὐτὸν ὄντων ἄμφω· ταῦτα γὰρ ἄμφω ὑπὸ τὸ ζῷόν ἐστιν. δῆλον δὲ καὶ ὅτι οὐκ ἀνάγκη τὴν διαφορὰν πᾶν οἰκεῖον ἐπιφέρειν γένος, ἐπειδὴ ἐνδέχεται τὴν αὐτὴν δύο γενῶν εἶναι μὴ περιεχόντων ἄλληλα, ἀλλὰ τὸ ἕτερον μόνον ἀνάγκη συνεπιφέρειν καὶ τὰ ἐπάνω τούτου πάντα, καθάπερ τὸ δίπουν τὸ πτηνὸν ἢ τὸ πεζὸν συνεπιφέρει ζῷον.

Ὁρᾶν δὲ καὶ εἰ τὸ ἔν τινι διαφορὰν ἀποδέδωκεν οὐσίας· οὐ δοκεῖ γὰρ διαφέρειν οὐσία οὐσίας τῷ πού εἶναι. διὸ καὶ τοῖς τῷ πεζῷ καὶ τῷ ἐνύδρῳ διαιροῦσι τὸ ζῷον ἐπιτιμῶσιν ὡς τὸ πεζὸν καὶ τὸ ἔνυδρον ποὺ σημαῖνον. ἢ ἐπὶ μὲν τούτων οὐκ ὀρθῶς ἐπιτιμῶσιν· οὐ γὰρ ἔν τινι οὐδὲ ποὺ σημαίνει τὸ ἔνυδρον, ἀλλὰ ποιόν τι. καὶ γὰρ ἂν ᾖ ἐν τῷ ξηρῷ, ὁμοίως ἔνυδρον· ὁμοίως δὲ τὸ χερσαῖον, κἂν ἐν ὑγρῷ, χερσαῖον [145a] ἀλλ’ οὐκ ἔνυδρον ἔσται. ἀλλ’ ὅμως ἐάν ποτε σημαίνῃ τὸ ἔν τινι ἡ διαφορά, δῆλον ὅτι διημαρτηκὼς ἔσται.

Πάλιν εἰ τὸ πάθος διαφορὰν ἀποδέδωκεν· πᾶν γὰρ πάθος μᾶλλον γινόμενον ἐξίστησι τῆς οὐσίας, ἡ δὲ διαφορὰ οὐ τοιοῦτον· μᾶλλον γὰρ σῴζειν δοκεῖ ἡ διαφορὰ οὗ ἐστι διαφορά, καὶ ἁπλῶς ἀδύνατον εἶναι ἄνευ τῆς οἰκείας διαφορᾶς ἕκαστον· πεζοῦ γὰρ μὴ ὄντος οὐκ ἔσται ἄνθρωπος. ἁπλῶς δ’ εἰπεῖν, καθ’ ὅσα ἀλλοιοῦται τὸ ἔχον, οὐδὲν τούτων διαφορὰ ἐκείνου· ἅπαντα γὰρ τὰ τοιαῦτα μᾶλλον γινόμενα ἐξίστησι τῆς οὐσίας. ὥστ’ εἴ τινα τοιαύτην διαφορὰν ἀποδέδωκεν, ἡμάρτηκεν· ἁπλῶς γὰρ οὐκ ἀλλοιούμεθα κατὰ τὰς διαφοράς.

Καὶ εἴ τινος τῶν πρός τι μὴ πρὸς ἄλλο τὴν διαφορὰν ἀποδέδωκεν· τῶν γὰρ πρός τι καὶ αἱ διαφοραὶ πρός τι, καθάπερ καὶ τῆς ἐπιστήμης. θεωρητικὴ γὰρ καὶ πρακτικὴ καὶ ποιητικὴ λέγεται· ἕκαστον δὲ τούτων πρός τι σημαίνει· θεωρητικὴ γὰρ τινὸς καὶ ποιητικὴ τινὸς καὶ πρακτικὴ τινός.

Σκοπεῖν δὲ καὶ εἰ πρὸς ὃ πέφυκεν ἕκαστον τῶν πρός τι ἀποδίδωσιν ὁ ὁριζόμενος. ἐνίοις μὲν γὰρ πρὸς ὃ πέφυκεν [ἕκαστον τῶν πρός τι] μόνον ἔστι χρῆσθαι, πρὸς ἄλλο δ’ οὐδέν, ἐνίοις δὲ καὶ πρὸς ἄλλο, οἷον τῇ ὄψει πρὸς τὸ ἰδεῖν μόνον, τῇ δὲ στλεγγίδι κἂν ἀρύσειέ τις. ἀλλ’ ὅμως εἴ τις ὁρίσαιτο τὴν στλεγγίδα ὄργανον πρὸς τὸ ἀρύειν, ἡμάρτηκεν· οὐ γὰρ πρὸς τοῦτο πέφυκεν. ὅρος δὲ τοῦ πρὸς ὃ πέφυκεν “ἐφ’ ὃ ἂν χρήσαιτο ὁ φρόνιμος ᾗ φρόνιμος καὶ ἡ περὶ ἕκαστον οἰκεία ἐπιστήμη”.

Ἢ εἰ μὴ τοῦ πρώτου ἀποδέδωκεν, ὅταν τυγχάνῃ πρὸς πλείω λεγόμενον, οἷον τὴν φρόνησιν ἀρετὴν ἀνθρώπου ἢ ψυχῆς καὶ μὴ τοῦ λογιστικοῦ. πρώτου γὰρ τοῦ λογιστικοῦ ἀρετὴ ἡ φρόνησις· κατὰ γὰρ τοῦτο καὶ ἡ ψυχὴ καὶ ὁ ἄνθρωπος φρονεῖν λέγεται.

Ἔτι εἰ μὴ δεκτικόν ἐστιν οὗ εἴρηται τὸ ὡρισμένον πάθος ἢ [ἡ] διάθεσις ἢ ὁτιοῦν ἄλλο, ἡμάρτηκεν· πᾶσα γὰρ διάθεσις καὶ πᾶν πάθος ἐν ἐκείνῳ πέφυκε γίνεσθαι οὗ ἐστι διάθεσις ἢ πάθος, καθάπερ καὶ ἡ ἐπιστήμη ἐν ψυχῇ, διάθεσις οὖσα ψυχῆς. ἐνίοτε δὲ διαμαρτάνουσιν ἐν τοῖς τοιούτοις, οἷον ὅσοι [145b] λέγουσιν ὅτι ὁ ὕπνος ἐστὶν ἀδυναμία αἰσθήσεως, καὶ ἡ ἀπορία ἰσότης ἐναντίων λογισμῶν, καὶ ἡ ἀλγηδὼν διάστασις τῶν συμφύτων μερῶν μετὰ βίας. οὔτε γὰρ ὁ ὕπνος ὑπάρχει τῇ αἰσθήσει (ἔδει δ', εἴπερ ἀδυναμία αἰσθήσεώς ἐστιν)· ὁμοίως δ' οὐδ' ἡ ἀπορία ὑπάρχει τοῖς ἐναντίοις λογισμοῖς, οὐδ' ἡ ἀλγηδὼν τοῖς συμφύτοις μέρεσιν· ἀλγήσει γὰρ τὰ ἄψυχα, εἴπερ ἀλγηδὼν αὐτοῖς παρέσται. τοιοῦτος δὲ καὶ ὁ τῆς ὑγιείας ὁρισμός, εἴπερ "συμμετρία θερμῶν καὶ ψυχρῶν" ἐστιν· ἀνάγκη γὰρ ὑγιαίνειν τὰ θερμὰ καὶ ψυχρά. ἡ γὰρ ἑκάστου συμμετρία ἐν ἐκείνοις ὑπάρχει ὧν ἐστι συμμετρία, ὥσθ' ἡ ὑγίεια ὑπάρχοι ἂν αὐτοῖς. ἔτι τὸ ποιούμενον εἰς τὸ ποιητικὸν ἢ ἀνάπαλιν συμβαίνει τιθέναι τοῖς οὕτως ὁριζομένοις. οὐ γάρ ἐστιν ἀλγηδὼν ἡ διάστασις τῶν συμφύτων μερῶν, ἀλλὰ ποιητικὸν ἀλγηδόνος· οὐδ' ἡ ἀδυναμία τῆς αἰσθήσεως ὕπνος, ἀλλὰ ποιητικὸν θάτερον θατέρου· ἤτοι γὰρ διὰ τὴν ἀδυναμίαν ὑπνώσσομεν ἢ διὰ τὸν ὕπνον ἀδυνατοῦμεν. ὁμοίως δὲ καὶ τῆς ἀπορίας δόξειεν ἂν ποιητικὸν εἶναι ἡ τῶν ἐναντίων ἰσότης λογισμῶν· ὅταν γὰρ ἐπ' ἀμφότερα λογιζομένοις ἡμῖν ὁμοίως ἅπαντα φαίνηται καθ' ἑκάτερον γίνεσθαι, ἀποροῦμεν ὁπότερον πράξωμεν.

Ἔτι κατὰ τοὺς χρόνους πάντας ἐπισκοπεῖν εἴ που διαφωνεῖ, οἷον εἰ τὸ ἀθάνατον ὡρίσατο ζῷον ἄφθαρτον νῦν εἶναι· τὸ γὰρ νῦν ἄφθαρτον ζῷον νῦν ἀθάνατον ἔσται. ἢ ἐπὶ μὲν τούτου οὐ συμβαίνει· ἀμφίβολον γὰρ τὸ νῦν ἄφθαρτον εἶναι· ἢ γὰρ ὅτι οὐκ ἔφθαρται νῦν σημαίνει, ἢ ὅτι οὐ δύναται φθαρῆναι νῦν, ἢ ὅτι τοιοῦτόν ἐστι νῦν οἷον μηδέποτε φθαρῆναι. ὅταν οὖν λέγωμεν ὅτι ἄφθαρτον νῦν ἐστι ζῷον, τοῦτο λέγομεν, ὅτι νῦν τοιοῦτόν ἐστι ζῷον οἷον μηδέποτε φθαρῆναι· τοῦτο δὲ τῷ ἀθανάτῳ τὸ αὐτὸ ἦν, ὥστ' οὐ συμβαίνει νῦν αὐτὸ ἀθάνατον εἶναι. ἀλλ' ὅμως, ἂν συμβαίνῃ τὸ μὲν κατὰ τὸν λόγον ἀποδοθὲν ὑπάρχειν νῦν ἢ πρότερον, τὸ δὲ κατὰ τοὔνομα μὴ ὑπάρχειν, οὐκ ἂν εἴη ταὐτόν. χρηστέον οὖν τῷ τόπῳ καθάπερ εἴρηται.

Σκεπτέον δὲ καὶ εἰ καθ' ἕτερόν τι μᾶλλον λέγεται τὸ ὁρισθὲν ἢ κατὰ τὸν ἀποδοθέντα λόγον, οἷον εἰ ἡ δικαιοσύνη δύναμις τοῦ ἴσου διανεμητική. δίκαιος γὰρ μᾶλλον ὁ προαιρούμενος τὸ ἴσον διανεῖμαι τοῦ δυναμένου, ὥστ' οὐκ ἂν εἴη [146a] ἡ δικαιοσύνη δύναμις τοῦ ἴσου διανεμητική· καὶ γὰρ δίκαιος εἴη ἂν μάλιστα ὁ δυνάμενος μάλιστα τὸ ἴσον διανεῖμαι.

Ἔτι εἰ τὸ μὲν πρᾶγμα δέχεται τὸ μᾶλλον, τὸ δὲ κατὰ τὸν λόγον ἀποδοθὲν μὴ δέχεται, ἢ ἀνάπαλιν τὸ μὲν κατὰ τὸν λόγον ἀποδοθὲν δέχεται, τὸ δὲ πρᾶγμα μή· δεῖ γὰρ ἢ ἀμφότερα δέχεσθαι ἢ μηδέτερον, εἴπερ δὴ ταὐτόν ἐστι τὸ κατὰ τὸν λόγον ἀποδοθὲν τῷ πράγματι. ἔτι εἰ δέχεται μὲν ἀμφότερα τὸ μᾶλλον, μὴ ἅμα δὲ τὴν ἐπίδοσιν ἀμφότερα λαμβάνει, οἷον εἰ ὁ ἔρως ἐπιθυμία συνουσίας ἐστίν· ὁ γὰρ μᾶλλον ἐρῶν οὐ μᾶλλον ἐπιθυμεῖ τῆς συνουσίας, ὥστ' οὐχ ἅμα ἀμφότερα τὸ μᾶλλον ἐπιδέχεται· ἔδει δέ γε, εἴπερ ταὐτὸν ἦν.

Ἔτι εἰ, δύο τινῶν προτεθέντων, καθ' οὗ τὸ πρᾶγμα μᾶλλον λέγεται τὸ κατὰ τὸν λόγον ἧττον λέγεται, οἷον εἰ τὸ πῦρ ἐστι σῶμα τὸ λεπτομερέστατον. πῦρ μὲν γὰρ μᾶλλον ἡ φλόξ ἐστι τοῦ φωτός, σῶμα δὲ τὸ λεπτομερέστατον ἧττον ἡ φλὸξ τοῦ φωτός· ἔδει δ' ἀμφότερα μᾶλλον τῷ αὐτῷ ὑπάρχειν, εἴπερ ταὐτὰ ἦν. πάλιν εἰ τὸ μὲν ὁμοίως ἀμφοτέροις ὑπάρχει τοῖς προτεθεῖσι, τὸ δ' ἕτερον μὴ ὁμοίως ἀμφοτέροις ἀλλὰ τῷ ἑτέρῳ μᾶλλον.

Ἔτι ἐὰν πρὸς δύο τὸν ὁρισμὸν ἀποδῷ καθ' ἑκάτερον, οἷον τὸ καλὸν τὸ δι' ὄψεως ἢ δι' ἀκοῆς ἡδύ, καὶ τὸ ὂν τὸ δυνατὸν παθεῖν ἢ ποιῆσαι· ἅμα γὰρ ταὐτὸν καλόν τε καὶ οὐ καλὸν ἔσται, ὁμοίως δὲ καὶ ὄν τε καὶ οὐκ ὄν. τὸ γὰρ δι' ἀκοῆς ἡδὺ ταὐτὸν τῷ καλῷ ἔσται, ὥστε τὸ μὴ ἡδὺ δι' ἀκοῆς τῷ μὴ καλῷ ταὐτόν· τοῖς γὰρ αὐτοῖς καὶ τὰ ἀντικείμενα τὰ αὐτά· ἀντίκειται δὲ τῷ μὲν καλῷ τὸ οὐ καλόν, τῷ δὲ δι' ἀκοῆς ἡδεῖ τὸ δι' ἀκοῆς οὐχ ἡδύ. δῆλον οὖν ὅτι ταὐτὸν τὸ οὐχ ἡδὺ δι' ἀκοῆς τῷ οὐ καλῷ. εἰ οὖν τί ἐστι δι' ὄψεως μὲν ἡδὺ δι' ἀκοῆς δὲ μή, καλόν τε καὶ οὐ καλὸν ἔσται. ὁμοίως δὲ δείξομεν καὶ ὅτι ταὐτὸν ὄν τε καὶ οὐκ ὄν ἐστιν.

Ἔτι τῶν γενῶν καὶ τῶν διαφορῶν καὶ τῶν ἄλλων ἁπάντων τῶν ἐν τοῖς ὁρισμοῖς ἀποδιδομένων λόγους ἀντὶ τῶν ὀνομάτων ποιοῦντα σκοπεῖν εἴ τι διαφωνεῖ.

Ἐὰν δ' ᾖ πρός τι τὸ ὁριζόμενον ἢ καθ' αὑτὸ ἢ κατὰ τὸ γένος, σκοπεῖν εἰ μὴ εἴρηται ἐν τῷ ὁρισμῷ πρὸς ὃ λέγεται [146b] ἢ αὐτὸ ἢ κατὰ τὸ γένος, οἷον εἰ τὴν ἐπιστήμην ὡρίσατο ὑπόληψιν ἀμετάπειστον, ἢ τὴν βούλησιν ὄρεξιν ἄλυπον· παντὸς γὰρ τοῦ πρός τι ἡ οὐσία πρὸς ἕτερον, ἐπειδὴ ταὐτὸν ἦν ἑκάστῳ τῶν πρός τι τὸ εἶναι ὅπερ τὸ πρός τί πως ἔχειν. ἔδει οὖν τὴν ἐπιστήμην εἰπεῖν ὑπόληψιν ἐπιστητοῦ καὶ τὴν βούλησιν ὄρεξιν ἀγαθοῦ. ὁμοίως δὲ καὶ εἰ τὴν γραμματικὴν ὡρίσατο ἐπιστήμην γραμμάτων· ἔδει γὰρ ἢ πρὸς ὃ αὐτὸ λέγεται, ἢ πρὸς ὃ τὸ γένος, ἐν τῷ ὁρισμῷ ἀποδίδοσθαι. ἢ εἰ πρός τι εἰρημένον μὴ πρὸς τὸ τέλος ἀποδέδοται· τέλος δ' ἐν ἑκάστῳ τὸ βέλτιστον ἢ οὗ χάριν τἆλλα. ῥητέον δὴ ἢ τὸ βέλτιστον ἢ τὸ ἔσχατον, οἷον τὴν ἐπιθυμίαν οὐχ ἡδέος ἀλλ’ ἡδονῆς· ταύτης γὰρ χάριν καὶ τὸ ἡδὺ αἱρούμεθα.

Σκοπεῖν δὲ καὶ εἰ γένεσίς ἐστι πρὸς ὃ ἀποδέδωκεν, ἢ ἐνέργεια· οὐδὲν γὰρ τῶν τοιούτων τέλος· μᾶλλον γὰρ τὸ ἐνηργηκέναι καὶ γεγενῆσθαι τέλος ἢ τὸ γίνεσθαι καὶ ἐνεργεῖν. (ἢ οὐκ ἐπὶ πάντων ἀληθὲς τὸ τοιοῦτον· σχεδὸν γὰρ οἱ πλεῖστοι ἥδεσθαι μᾶλλον βούλονται ἢ πεπαῦσθαι ἡδόμενοι, ὥστε τὸ ἐνεργεῖν μᾶλλον τέλος ἂν ποιοῖντο τοῦ ἐνηργηκέναι.)

Πάλιν ἐπ’ ἐνίων εἰ μὴ διώρικε τὸ πόσου ἢ ποίου ἢ ποῦ ἢ κατὰ τὰς ἄλλας διαφοράς, οἷον φιλότιμος ὁ ποίας καὶ ὁ πόσης ὀρεγόμενος τιμῆς· πάντες γὰρ ὀρέγονται τιμῆς, ὥστ’ οὐκ ἀπόχρη φιλότιμον εἰπεῖν τὸν ὀρεγόμενον τιμῆς, ἀλλὰ προσθετέον τὰς εἰρημένας διαφοράς. ὁμοίως δὲ καὶ φιλοχρήματος ὁ πόσων ὀρεγόμενος χρημάτων, ἢ ἀκρατὴς ὁ περὶ ποίας ἡδονάς· οὐ γὰρ ὁ ὑφ’ οἱασποτοῦν ἡδονῆς κρατούμενος ἀκρατὴς λέγεται, ἀλλ’ ὁ ὑπὸ τινός. ἢ πάλιν, ὡς ὁρίζονται τὴν νύκτα σκιὰν γῆς, ἢ τὸν σεισμὸν κίνησιν γῆς, ἢ τὸ νέφος πύκνωσιν ἀέρος, ἢ τὸ πνεῦμα κίνησιν ἀέρος· προσθετέον γὰρ πόσου καὶ ποίου καὶ ποῦ καὶ ὑπὸ τίνος. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων· ἀπολείπων γὰρ διαφορὰν ἡντινοῦν οὐ λέγει τὸ τί ἦν εἶναι. δεῖ δ’ ἀεὶ πρὸς τὸ ἐνδεὲς ἐπιχειρεῖν· οὐ γὰρ ὁπωσοῦν γῆς κινηθείσης οὐδ’ ὁποσησοῦν σεισμὸς ἔσται, ὁμοίως δ’ οὐδ’ ἀέρος ὁπωσοῦν οὐδ’ ὁποσουοῦν κινηθέντος πνεῦμα.

Ἔτι ἐπὶ τῶν ὀρέξεων εἰ μὴ πρόσκειται τὸ φαινόμενον, καὶ ἐφ’ ὅσων ἄλλων ἁρμόττει, οἷον ὅτι ἡ βούλησις [147a] ὄρεξις ἀγαθοῦ, ἡ δ’ ἐπιθυμία ὄρεξις ἡδέος, ἀλλὰ μὴ φαινομένου ἀγαθοῦ ἢ ἡδέος. πολλάκις γὰρ λανθάνει τοὺς ὀρεγομένους ὅ τι ἀγαθὸν ἢ ἡδύ ἐστιν, ὥστ’ οὐκ ἀναγκαῖον ἀγαθὸν ἢ ἡδὺ εἶναι ἀλλὰ φαινόμενον μόνον. ἔδει οὖν οὕτω καὶ τὴν ἀπόδοσιν ποιήσασθαι. ἐὰν δὲ καὶ προσαποδῷ τὸ εἰρημένον, ἐπὶ τὰ εἴδη ἀκτέον τὸν τιθέμενον ἰδέας εἶναι. οὐ γὰρ ἔστιν ἰδέα φαινομένου οὐδενός, τὸ δ’ εἶδος πρὸς τὸ εἶδος δοκεῖ λέγεσθαι, οἷον αὐτὴ ἐπιθυμία αὐτοῦ ἡδέος καὶ αὐτὴ βούλησις αὐτοῦ ἀγαθοῦ. οὐκ ἔσται οὖν φαινομένου ἀγαθοῦ οὐδὲ φαινομένου ἡδέος· ἄτοπον γὰρ τὸ εἶναι αὐτὸ φαινόμενον ἀγαθὸν ἢ ἡδύ.

Ἔτι ἐὰν μὲν ᾖ τῆς ἕξεως ὁ ὁρισμός, σκοπεῖν ἐπὶ τοῦ ἔχοντος, ἐὰν δὲ τοῦ ἔχοντος, ἐπὶ τῆς ἕξεως· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων· οἷον εἰ τὸ ἡδὺ ὅπερ ὠφέλιμον, καὶ ὁ ἡδόμενος ὠφελούμενος. καθόλου δ’ εἰπεῖν ἐν τοῖς τοιούτοις ὁρισμοῖς τρόπον τινὰ πλείω ἑνὸς συμβαίνει τὸν ὁριζόμενον ὁρίζεσθαι. ὁ γὰρ τὴν ἐπιστήμην ὁριζόμενος τρόπον τινὰ καὶ τὴν ἄγνοιαν ὁρίζεται, ὁμοίως δὲ καὶ τὸ ἐπιστῆμον καὶ τὸ ἀνεπιστῆμον, καὶ τὸ ἐπίστασθαι καὶ τὸ ἀγνοεῖν· τοῦ γὰρ πρώτου δήλου γενομένου τρόπον τινὰ καὶ τὰ λοιπὰ δῆλα γίνεται. σκεπτέον οὖν ἐπὶ πάντων τῶν τοιούτων μή τι διαφωνῇ, στοιχείοις χρώμενον τοῖς ἐκ τῶν ἐναντίων καὶ τῶν συστοίχων.

Ἔτι ἐπὶ τῶν πρός τι σκοπεῖν εἰ πρὸς ὃ τὸ γένος ἀποδίδοται, τὸ εἶδος πρὸς ἐκεῖνό τι ἀποδίδοται. οἷον εἰ ἡ ὑπόληψις πρὸς τὸ ὑποληπτόν, ἡ τὶς ὑπόληψις πρὸς τὸ τὶ ὑποληπτόν, καὶ εἰ τὸ πολλαπλάσιον πρὸς τὸ πολλοστημόριον, τὸ τὶ πολλαπλάσιον πρὸς τὸ τὶ πολλοστημόριον· εἰ γὰρ μὴ οὕτως ἀποδέδοται, δῆλον ὅτι ἡμάρτηται.

Ὁρᾶν δὲ καὶ εἰ τοῦ ἀντικειμένου ὁ ἀντικείμενος λόγος, οἷον τοῦ ἡμίσεος ὁ ἀντικείμενος τῷ τοῦ διπλασίου· εἰ γὰρ διπλάσιον τὸ ἴσῳ ὑπερέχον, ἥμισυ τὸ ἴσῳ ὑπερεχόμενον. καὶ ἐπὶ τῶν ἐναντίων δ’ ὡσαύτως· ὁ γὰρ ἐναντίος τοῦ ἐναντίου λόγος ἔσται κατὰ μίαν τινὰ συμπλοκὴν τῶν ἐναντίων. οἷον εἰ ὠφέλιμον τὸ ποιητικὸν ἀγαθοῦ, βλαβερὸν τὸ ποιητικὸν κακοῦ ἢ τὸ φθαρτικὸν ἀγαθοῦ· θάτερον γὰρ τούτων ἀναγκαῖον ἐναντίον [147b] εἶναι τῷ ἐξ ἀρχῆς ῥηθέντι. εἰ οὖν μηδέτερον ἐναντίον τῷ ἐξ ἀρχῆς ῥηθέντι, δῆλον ὅτι οὐδέτερος ἂν εἴη τῶν ὕστερον ἀποδοθέντων τοῦ ἐναντίου λόγος, ὥστ’ οὐδ’ ὁ ἐξ ἀρχῆς ἀποδοθεὶς ὀρθῶς ἀποδέδοται. ἐπεὶ δ’ ἔνια τῶν ἐναντίων στερήσει θατέρου λέγεται, οἷον ἡ ἀνισότης στέρησις ἰσότητος δοκεῖ εἶναι (ἄνισα γὰρ τὰ μὴ ἴσα λέγεται), δῆλον οὖν ὅτι τὸ μὲν κατὰ στέρησιν λεγόμενον ἐναντίον ἀναγκαῖον ὁρίζεσθαι διὰ θατέρου, τὸ δὲ λοιπὸν οὐκέτι διὰ τοῦ κατὰ στέρησιν λεγομένου· συμβαίνοι γὰρ ἂν ἑκάτερον δι’ ἑκατέρου γνωρίζεσθαι. ἐπισκεπτέον οὖν ἐν τοῖς ἐναντίοις τὴν τοιαύτην ἁμαρτίαν, οἷον εἴ τις ὁρίσαιτο τὴν ἰσότητα τὸ ἐναντίον ἀνισότητι· διὰ γὰρ τοῦ κατὰ στέρησιν λεγομένου ὁρίζεται. ἔτι τὸν οὕτως ὁριζόμενον ἀναγκαῖον αὐτῷ τῷ ὁριζομένῳ χρῆσθαι. δῆλον δὲ τοῦτο, ἐὰν μεταληφθῇ ἀντὶ τοῦ ὀνόματος ὁ λόγος· εἰπεῖν γὰρ ἢ ἀνισότητα οὐδὲν διαφέρει ἢ στέρησιν ἰσότητος. ἔσται οὖν ἡ ἰσότης τὸ ἐναντίον στερήσει ἰσότητος, ὥστ’ αὐτῷ ἂν εἴη κεχρημένος. ἂν δὲ μηδέτερον τῶν ἐναντίων κατὰ στέρησιν λέγηται, ἀποδοθῇ δ’ ὁ λόγος ὁμοίως, οἷον ἀγαθὸν τὸ ἐναντίον κακῷ, δῆλον ὅτι κακὸν τὸ ἐναντίον ἀγαθῷ ἔσται· τῶν γὰρ οὕτως ἐναντίων ὁμοίως ὁ λόγος ἀποδοτέος. ὥστε πάλιν αὐτῷ τῷ ὁριζομένῳ συμβαίνει χρῆσθαι· ἐνυπάρχει γὰρ ἐν τῷ τοῦ κακοῦ λόγῳ τὸ ἀγαθόν. ὥστ’ εἰ ἀγαθόν ἐστι τὸ κακῷ ἐναντίον, τὸ δὲ κακὸν οὐδὲν διαφέρει ἢ τὸ τῷ ἀγαθῷ ἐναντίον, ἔσται ἀγαθὸν τὸ ἐναντίον τῷ τοῦ ἀγαθοῦ ἐναντίῳ. δῆλον οὖν ὅτι αὐτῷ κέχρηται.

Ἔτι εἰ τὸ κατὰ στέρησιν λεγόμενον ἀποδιδοὺς μὴ ἀποδέδωκεν οὗ ἐστι στέρησις, οἷον τῆς ἕξεως ἢ τοῦ ἐναντίου ἢ ὁτουοῦν ἐστιν ἡ στέρησις. καὶ εἰ μὴ ἐν ᾧ πέφυκε γίνεσθαι προσέθηκεν, ἢ ἁπλῶς ἢ ἐν ᾧ πρώτῳ πέφυκε γίνεσθαι. οἷον εἰ τὴν ἄγνοιαν εἰπὼν στέρησιν μὴ ἐπιστήμης στέρησιν εἶπεν, ἢ μὴ προσέθηκεν ἐν ᾧ πέφυκε γίνεσθαι, ἢ προσθεὶς μὴ ἐν ᾧ πρώτῳ ἀπέδωκεν, οἷον ὅτι οὐκ ἐν τῷ λογιστικῷ ἀλλ' ἐν ἀνθρώπῳ ἢ ψυχῇ· ἐὰν γὰρ ὁτιοῦν τούτων μὴ ποιήσῃ, ἡμάρτηκεν. ὁμοίως δὲ καὶ εἰ τὴν τυφλότητα μὴ ὄψεως στέρησιν ἐν ὀφθαλμῷ εἶπεν· δεῖ γὰρ τὸν καλῶς ἀποδιδόντα τὸ [148a] τί ἐστι καὶ τίνος ἐστὶν ἡ στέρησις ἀποδιδόναι καὶ τί ἐστι τὸ ἐστερημένον.

Ὁρᾶν δὲ καὶ εἰ μὴ λεγομένου κατὰ στέρησιν στερήσει ὡρίσατο, οἷον καὶ ἐπὶ τῆς ἀγνοίας δόξειεν ἂν ὑπάρχειν ἡ τοιαύτη ἁμαρτία τοῖς μὴ κατ' ἀπόφασιν τὴν ἄγνοιαν λέγουσιν. τὸ γὰρ μὴ ἔχον ἐπιστήμην οὐ δοκεῖ ἀγνοεῖν, ἀλλὰ μᾶλλον τὸ διηπατημένον· διὸ οὔτε τὰ ἄψυχα οὔτε τὰ παιδία φαμὲν ἀγνοεῖν. ὥστ' οὐ κατὰ στέρησιν ἐπιστήμης ἡ ἄγνοια λέγεται.

Ἔτι ἐπὶ τῶν ὁμοίων τοῦ ὀνόματος πτώσεων αἱ ὅμοιαι τοῦ λόγου πτώσεις ἐφαρμόττουσιν· οἷον εἰ ὠφέλιμον τὸ ποιητικὸν ὑγιείας, ὠφελίμως τὸ ποιητικῶς ὑγιείας καὶ ὠφεληκὸς τὸ πεποιηκὸς ὑγίειαν.

Σκοπεῖν δὲ καὶ ἐπὶ τὴν ἰδέαν εἰ ἐφαρμόσει ὁ λεχθεὶς ὅρος. ἐπ' ἐνίων γὰρ οὐ συμβαίνει, οἷον ὡς Πλάτων ὁρίζεται, τὸ θνητὸν προσάπτων ἐν τοῖς τῶν ζῴων ὁρισμοῖς· ἡ γὰρ ἰδέα οὐκ ἔσται θνητή, οἷον αὐτοάνθρωπος, ὥστ' οὐκ ἐφαρμόσει ὁ λόγος ἐπὶ τὴν ἰδέαν. ἁπλῶς δ' ἐν οἷς πρόσκειται τὸ ποιητικὸν ἢ παθητικόν, ἀνάγκη διαφωνεῖν ἐπὶ τῆς ἰδέας τὸν ὅρον· ἀπαθεῖς γὰρ καὶ ἀκίνητοι δοκοῦσιν εἶναι αἱ ἰδέαι τοῖς λέγουσιν ἰδέας εἶναι, πρὸς δὲ τούτους καὶ οἱ τοιοῦτοι λόγοι χρήσιμοι.

Ἔτι εἰ τῶν καθ' ὁμωνυμίαν λεγομένων ἕνα λόγον ἁπάντων κοινὸν ἀποδέδωκεν· συνώνυμα γὰρ ὧν εἷς ὁ κατὰ τοὔνομα λόγος· ὥστ' οὐδενὸς τῶν ὑπὸ τοὔνομα ὁ ἀποδοθεὶς ὅρος, εἰ δὴ ὁμοίως ἐπὶ πᾶν τὸ ὁμώνυμον ἐφαρμόττει. πέπονθε δὲ τοῦτο καὶ ὁ Διονυσίου τῆς ζωῆς ὅρος, εἴπερ ἐστὶ "κίνησις γένους θρεπτοῦ σύμφυτος παρακολουθοῦσα"· οὐδὲν γὰρ μᾶλλον τοῦτο τοῖς ζῴοις ἢ τοῖς φυτοῖς ὑπάρχει. ἡ δὲ ζωὴ οὐ καθ' ἓν εἶδος δοκεῖ λέγεσθαι, ἀλλ' ἑτέρα μὲν τοῖς ζῴοις ἑτέρα δὲ τοῖς φυτοῖς ὑπάρχειν. ἐνδέχεται μὲν οὖν καὶ κατὰ προαίρεσιν οὕτως ἀποδοῦναι τὸν ὅρον ὡς συνωνύμου καὶ καθ' ἓν εἶδος πάσης τῆς ζωῆς λεγομένης. οὐδὲν δὲ κωλύει καὶ συνορῶντα τὴν ὁμωνυμίαν καὶ θατέρου βουλόμενον τὸν ὁρισμὸν ἀποδοῦναι λαθεῖν μὴ ἴδιον ἀλλὰ κοινὸν ἀμφοῖν λόγον ἀποδόντα. ἀλλ' οὐδὲν ἧττον, εἰ ὁποτερωσοῦν πεποίηκεν, ἡμάρτηκεν. ἐπεὶ δ' ἔνια λανθάνει τῶν ὁμωνύμων, ἐρωτῶντι [148b] μὲν ὡς συνωνύμοις χρηστέον (οὐ γὰρ ἐφαρμόσει ὁ θατέρου ὅρος ἐπὶ θάτερον, ὥστε δόξει οὐχ ὡρίσθαι κατὰ τρόπον· δεῖ γὰρ ἐπὶ πᾶν τὸ συνώνυμον ἐφαρμόττειν), αὐτῷ δ' ἀποκρινομένῳ διαιρετέον. ἐπεὶ δ' ἔνιοι τῶν ἀποκρινομένων τὸ μὲν συνώνυμον ὁμώνυμόν φασιν εἶναι ὅταν μὴ ἐφαρμόττῃ ἐπὶ πᾶν ὁ ἀποδοθεὶς λόγος, τὸ δ' ὁμώνυμον συνώνυμον ἐὰν ἐπ' ἄμφω ἐφαρμόττῃ, προδιομολογητέον ὑπὲρ τῶν τοιούτων ἢ προσυλλογιστέον ὅτι ὁμώνυμον ἢ συνώνυμον, ὁπότερον ἂν ᾖ· μᾶλλον γὰρ συγχωροῦσιν οὐ προορῶντες τὸ συμβησόμενον. ἂν δὲ μὴ γενομένης ὁμολογίας φῇ τις τὸ συνώνυμον ὁμώνυμον εἶναι διὰ τὸ μὴ ἐφαρμόττειν καὶ ἐπὶ τοῦτο τὸν ἀποδοθέντα λόγον, σκοπεῖν εἰ ὁ τούτου λόγος ἐφαρμόττει καὶ ἐπὶ τὰ λοιπά· δῆλον γὰρ ὅτι συνώνυμον ἂν εἴη τοῖς λοιποῖς. εἰ δὲ μή, πλείους ἔσονται ὁρισμοὶ τῶν λοιπῶν· δύο γὰρ [οἱ] κατὰ τοὔνομα λόγοι ἐφαρμόττουσιν ἐπ' αὐτά, ὅ τε πρότερον ἀποδοθεὶς καὶ ὁ ὕστερον. πάλιν εἴ τις, ὁρισάμενός τι τῶν πολλαχῶς λεγομένων, καὶ τοῦ λόγου μὴ ἐφαρμόττοντος ἐπὶ πάντα, ὅτι μὲν ὁμώνυμον μὴ λέγοι, τὸ δ' ὄνομα μὴ φαίη ἐπὶ πάντα ἐφαρμόττειν, ὅτι οὐδ' ὁ λόγος, ῥητέον πρὸς τὸν τοιοῦτον ὅτι τῇ μὲν ὀνομασίᾳ δεῖ χρῆσθαι τῇ παραδεδομένῃ καὶ παρεπομένῃ καὶ μὴ κινεῖν τὰ τοιαῦτα, ἔνια δ' οὐ λεκτέον ὁμοίως τοῖς πολλοῖς.

Ἐὰν δὲ τῶν συμπεπλεγμένων τινὸς ἀποδοθῇ ὅρος, σκοπεῖν, ἀφαιροῦντα τὸν θατέρου τῶν συμπεπλεγμένων λόγον, εἰ καὶ ὁ λοιπὸς τοῦ λοιποῦ· εἰ γὰρ μή, δῆλον ὅτι οὐδ' ὁ ὅλος τοῦ ὅλου. οἷον εἰ ὁρίσαιτο γραμμὴν πεπερασμένην εὐθεῖαν "πέρας ἐπιπέδου ἔχοντος πέρατα, οὗ τὸ μέσον ἐπιπροσθεῖ τοῖς πέρασιν", εἰ τῆς πεπερασμένης γραμμῆς ὁ λόγος ἐστὶ "πέρας ἐπιπέδου ἔχοντος πέρατα", τοῦ εὐθέος δεῖ εἶναι τὸ λοιπόν, "οὗ τὸ μέσον ἐπιπροσθεῖ τοῖς πέρασιν". ἀλλ' ἡ ἄπειρος οὔτε μέσον οὔτε πέρατα ἔχει, εὐθεῖα δ' ἐστίν, ὥστ' οὐκ ἔστιν ὁ λοιπὸς τοῦ λοιποῦ λόγος.

Ἔτι εἰ συνθέτου ὄντος τοῦ ὁριζομένου ἰσόκωλος ὁ λόγος ἀπεδόθη τῷ ὁριζομένῳ. ἰσόκωλος δὲ λέγεται ὁ λόγος εἶναι, ὅταν ὅσαπερ ἂν ᾖ τὰ συγκείμενα, τοσαῦτα καὶ ἐν τῷ λόγῳ ὀνόματα καὶ ῥήματα ᾖ. ἀνάγκη γὰρ αὐτῶν τῶν ὀνομάτων ἐν τοῖς τοιούτοις μεταλλαγὴν γίνεσθαι, ἢ πάντων ἢ τινῶν, ἐπειδὴ [149a] οὐδὲν πλείω νῦν ἢ πρότερον ὀνόματα εἴρηται. δεῖ δὲ τὸν ὁριζόμενον λόγον ἀντὶ τῶν ὀνομάτων ἀποδοῦναι, μάλιστα μὲν πάντων, εἰ δὲ μή, τῶν πλείστων. οὕτω γὰρ καὶ ἐπὶ τῶν ἁπλῶν ὁ τοὔνομα μεταλαβὼν ὡρισμένος ἂν εἴη, οἷον ἀντὶ λωπίου ἱμάτιον.

Ἔτι δὲ μείζων ἁμαρτία, εἰ καὶ ἀγνωστοτέρων ὀνομάτων τὴν μετάληψιν ἐποιήσατο, οἷον ἀντὶ ἀνθρώπου λευκοῦ βροτὸν ἀργόν· οὔτε γὰρ ὥρισται ἧττόν τε σαφὲς οὕτω ῥηθέν.

Σκοπεῖν δὲ καὶ ἐν τῇ μεταλλαγῇ τῶν ὀνομάτων εἰ οὐ ταὐτὸν ἔτι σημαίνει, οἷον ὁ τὴν θεωρητικὴν ἐπιστήμην ὑπόληψιν θεωρητικὴν εἰπών. ἡ γὰρ ὑπόληψις τῇ ἐπιστήμῃ οὐ ταὐτόν· ἔδει δέ γε, εἴπερ μέλλει καὶ τὸ ὅλον ταὐτὸν εἶναι. τὸ μὲν γὰρ θεωρητικὸν κοινὸν ἐν ἀμφοτέροις τοῖς λόγοις ἐστί, τὸ δὲ λοιπὸν διάφορον.

Ἔτι εἰ θατέρου τῶν ὀνομάτων τὴν μετάληψιν ποιούμενος μὴ τῆς διαφορᾶς ἀλλὰ τοῦ γένους τὴν μεταλλαγὴν ἐποιήσατο, καθάπερ ἐπὶ τοῦ ἀρτίως ῥηθέντος. ἀγνωστότερον γὰρ ἡ θεωρητικὴ τῆς ἐπιστήμης· τὸ μὲν γὰρ γένος, τὸ δὲ διαφορά, πάντων δὲ γνωριμώτατον τὸ γένος. ὥστ' οὐ τοῦ γένους ἀλλὰ τῆς διαφορᾶς ἔδει τὴν μετάληψιν ποιήσασθαι, ἐπειδὴ ἀγνωστότερόν ἐστιν. (ἢ τοῦτο μὲν γελοῖον τὸ ἐπιτίμημα· οὐδὲν γὰρ κωλύει τὴν μὲν διαφορὰν τῷ γνωριμωτάτῳ ὀνόματι εἰρῆσθαι, τὸ δὲ γένος μή. οὕτω δ' ἐχόντων δῆλον ὅτι τοῦ γένους καὶ οὐ τῆς διαφορᾶς κατὰ τοὔνομα τὴν μετάληψιν ποιητέον.) εἰ δὲ μὴ ὄνομα ἀντ' ὀνόματος ἀλλὰ λόγον ἀντ' ὀνόματος μεταλαμβάνει, δῆλον ὅτι τῆς διαφορᾶς μᾶλλον ἢ τοῦ γένους ὁρισμὸν ἀποδοτέον, ἐπειδὴ τοῦ γνωρίσαι χάριν ὁ ὁρισμὸς ἀποδίδοται· ἧττον γὰρ ἡ διαφορὰ τοῦ γένους γνώριμον.

Εἰ δὲ τῆς διαφορᾶς τὸν ὅρον ἀποδέδωκε, σκοπεῖν εἰ καὶ ἄλλου τινὸς κοινὸς ὁ ἀποδοθεὶς ὁρισμός. οἷον ὅταν τὸν περιττὸν ἀριθμὸν ἀριθμὸν μέσον ἔχοντα εἴπῃ, ἐπιδιοριστέον τὸ πῶς μέσον ἔχοντα. ὁ μὲν γὰρ ἀριθμὸς κοινὸς ἐν ἀμφοτέροις τοῖς λόγοις ὑπάρχει, τοῦ δὲ περιττοῦ μετείληπται ὁ λόγος· ἔχει δὲ καὶ γραμμὴ καὶ σῶμα μέσον, οὐ περιττὰ ὄντα. ὥστ' οὐκ ἂν εἴη ὁρισμὸς οὗτος τοῦ περιττοῦ. εἰ δὲ πολλαχῶς λέγεται τὸ μέσον ἔχον, διοριστέον τὸ πῶς μέσον ἔχον. ὥστ' ἢ ἐπιτίμησις ἔσται, ἢ συλλογισμὸς ὅτι οὐχ ὥρισται.

Πάλιν εἰ οὗ μὲν τὸν λόγον ἀποδίδωσι τῶν ὄντων ἐστί, τὸ δ' ὑπὸ τὸν λόγον μὴ τῶν ὄντων, οἷον εἰ τὸ λευκὸν ὡρίσατο [149b] χρῶμα πυρὶ μεμειγμένον· ἀδύνατον γὰρ τὸ ἀσώματον σώματι μεμεῖχθαι, ὥστ' οὐκ ἂν εἴη χρῶμα πυρὶ μεμειγμένον· λευκὸν δ' ἔστιν.

Ἔτι ὅσοι μὴ διαιροῦσιν ἐν τοῖς πρός τι πρὸς ὃ λέγεται, ἀλλ' ἐν πλείοσι περιλαβόντες εἶπαν, ἢ ὅλως ἢ ἐπί τι ψεύδονται, οἷον εἴ τις ἰατρικὴν ἐπιστήμην ὄντος εἶπεν. εἰ μὲν γὰρ μηδενὸς τῶν ὄντων ἡ ἰατρικὴ ἐπιστήμη, δῆλον ὅτι ὅλως ἔψευσται, εἰ δὲ τινὸς μὲν τινὸς δὲ μή, ἐπί τι ἔψευσται· δεῖ γὰρ παντός, εἴπερ καθ' αὑτὸ καὶ μὴ κατὰ συμβεβηκὸς ὄντος εἶναι λέγεται, καθάπερ ἐπὶ τῶν ἄλλων ἔχει τῶν πρός τι· πᾶν γὰρ ἐπιστητὸν πρὸς ἐπιστήμην λέγεται. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, ἐπειδὴ ἀντιστρέφει πάντα τὰ πρός τι. ἔτι εἴπερ ὁ μὴ καθ' αὑτὸ ἀλλὰ κατὰ συμβεβηκὸς τὴν ἀπόδοσιν ποιούμενος ὀρθῶς ἀποδίδωσιν, οὐ πρὸς ἓν ἀλλὰ πρὸς πλείω ἕκαστον ἂν τῶν πρός τι λέγοιτο. οὐδὲν γὰρ κωλύει τὸ αὐτὸ καὶ ὂν καὶ λευκὸν καὶ ἀγαθὸν εἶναι, ὥστε πρὸς ὁποιονοῦν τούτων ἀποδοὺς ὀρθῶς ἂν εἴη ἀποδούς,

εἴπερ ὁ κατὰ συμβεβηκὸς ἀποδιδοὺς ὀρθῶς ἀποδίδωσιν. ἔτι δ’ ἀδύνατον τὸν τοιοῦτον λόγον ἴδιον τοῦ ἀποδοθέντος εἶναι· οὐ γὰρ μόνον ἡ ἰατρικὴ ἀλλὰ καὶ τῶν ἄλλων ἐπιστημῶν αἱ πολλαὶ πρὸς ὂν λέγονται, ὥσθ’ ἑκάστη ὄντος ἐπιστήμη ἔσται. δῆλον οὖν ὅτι ὁ τοιοῦτος οὐδεμιᾶς ἐστιν ἐπιστήμης ὁρισμός· ἴδιον γὰρ καὶ οὐ κοινὸν δεῖ τὸν ὁρισμὸν εἶναι.

Ἐνίοτε δ’ ὁρίζονται οὐ τὸ πρᾶγμα ἀλλὰ τὸ πρᾶγμα εὖ ἔχον ἢ τετελεσμένον. τοιοῦτος δ’ ὁ τοῦ ῥήτορος καὶ ὁ τοῦ κλέπτου ὅρος, εἴπερ ἐστὶ ῥήτωρ μὲν ὁ δυνάμενος τὸ ἐν ἑκάστῳ πιθανὸν θεωρεῖν καὶ μηδὲν παραλείπων, κλέπτης δ’ ὁ λάθρᾳ λαμβάνων· δῆλον γὰρ ὅτι τοιοῦτος ὢν ἑκάτερος ὁ μὲν ἀγαθὸς ῥήτωρ ὁ δ’ ἀγαθὸς κλέπτης ἔσται. οὐ γὰρ ὁ λάθρᾳ λαμβάνων ἀλλ’ ὁ βουλόμενος λάθρᾳ λαμβάνειν κλέπτης ἐστίν.

Πάλιν εἰ τὸ δι’ αὑτὸ αἱρετὸν ὡς ποιητικὸν ἢ πρακτικὸν ἢ ὁπωσοῦν δι’ ἄλλο αἱρετὸν ἀποδέδωκεν, οἷον τὴν δικαιοσύνην νόμων σῳστικὴν εἰπὼν ἢ τὴν σοφίαν ποιητικὴν εὐδαιμονίας· τὸ γὰρ ποιητικὸν ἢ σῳστικὸν τῶν δι’ ἄλλο αἱρετῶν. ἢ οὐδὲν μὲν κωλύει τὸ δι’ αὑτὸ αἱρετὸν καὶ δι’ ἄλλο εἶναι αἱρετόν, οὐ μὴν ἀλλ’ οὐδὲν ἧττον ἡμάρτηκεν ὁ οὕτως ὁρισάμενος τὸ δι’ αὑτὸ αἱρετόν· ἑκάστου γὰρ τὸ βέλτιστον ἐν τῇ οὐσίᾳ μάλιστα, βέλτιον δὲ τὸ δι’ αὑτὸ αἱρετὸν εἶναι τοῦ δι’ ἕτερον, ὥστε τοῦτο καὶ τὸν ὁρισμὸν ἔδει μᾶλλον σημαίνειν.

[150a] Σκοπεῖν δὲ καὶ εἴ τινος ὁρισμὸν ἀποδιδοὺς τάδε ἢ τὸ ἐκ τούτων ἢ τόδε μετὰ τοῦδε ὡρίσατο. εἰ μὲν γὰρ τάδε, συμβήσεται ἀμφοῖν καὶ μηδετέρῳ ὑπάρχειν, οἷον εἰ τὴν δικαιοσύνην σωφροσύνην καὶ ἀνδρείαν ὡρίσατο· δύο γὰρ ὄντων ἐὰν ἑκάτερος θάτερον ἔχῃ, ἀμφότεροι δίκαιοι ἔσονται καὶ οὐδέτερος, ἐπεὶ ἀμφότεροι μὲν ἔχουσι δικαιοσύνην, ἑκάτερος δ’ οὐκ ἔχει. εἰ δὲ μήπω τὸ εἰρημένον σφόδρα ἄτοπον διὰ τὸ καὶ ἐπ’ ἄλλων συμβαίνειν τὸ τοιοῦτον (οὐδὲν γὰρ κωλύει ἀμφοτέρους ἔχειν μνᾶν μηδετέρου ἔχοντος), ἀλλ’ οὖν τό γε τἀναντία ὑπάρχειν αὐτοῖς παντελῶς ἄτοπον ἂν δόξειεν εἶναι. συμβήσεται δὲ τοῦτο, ἐὰν ὁ μὲν αὐτῶν σωφροσύνην καὶ δειλίαν ἔχῃ, ὁ δὲ ἀνδρείαν καὶ ἀκολασίαν· ἄμφω γὰρ δικαιοσύνην καὶ ἀδικίαν ἕξουσιν· εἰ γὰρ ἡ δικαιοσύνη σωφροσύνη καὶ ἀνδρεία ἐστίν, ἡ ἀδικία δειλία καὶ ἀκολασία ἔσται. ὅλως τε ὅσα ἔστιν ἐπιχειρεῖν ὅτι οὐ ταὐτόν ἐστι τὰ μέρη καὶ τὸ ὅλον, πάντα χρήσιμα πρὸς τὸ νῦν εἰρημένον· ἔοικε γὰρ ὁ οὕτως ὁριζόμενος τὰ μέρη τῷ ὅλῳ ταὐτὰ φάσκειν εἶναι. μάλιστα δ’ οἰκεῖοι γίνονται οἱ λόγοι ἐφ’ ὅσων κατάδηλός ἐστιν ἡ τῶν μερῶν σύνθεσις, καθάπερ ἐπ’ οἰκίας καὶ τῶν ἄλλων τῶν τοιούτων· δῆλον γὰρ ὅτι τῶν μερῶν ὄντων οὐδὲν κωλύει τὸ ὅλον μὴ εἶναι, ὥστ’ οὐ ταὐτὸν τὰ μέρη τῷ ὅλῳ.

Εἰ δὲ μὴ ταῦτα ἀλλὰ τὸ ἐκ τούτων ἔφησεν εἶναι τὸ ὁριζόμενον, πρῶτον μὲν ἐπισκοπεῖν εἰ μὴ πέφυκεν ἓν γίνεσθαι ἐκ τῶν εἰρημένων· ἔνια γὰρ οὕτως ἔχει πρὸς ἄλληλα ὥστε μηδὲν ἓν ἐξ αὐτῶν γίνεσθαι, οἷον γραμμὴ καὶ ἀριθμός. ἔτι εἰ τὸ μὲν ὡρισμένον ἐν ἑνί τινι πέφυκε τῷ πρώτῳ γίνεσθαι, ἐξ ὧν δ’ ἔφησεν αὐτὸ εἶναι μὴ ἐν ἑνὶ τῷ πρώτῳ ἀλλ’ ἑκάτερον ἐν ἑκατέρῳ. δῆλον γὰρ ὅτι οὐκ ἂν εἴη ἐκ τούτων ἐκεῖνο· ἐν οἷς γὰρ τὰ μέρη, καὶ τὸ ὅλον ἀνάγκη ὑπάρχειν, ὥστ’ οὐκ ἐν ἑνὶ τὸ ὅλον πρώτῳ ἀλλ’ ἐν πλείοσιν. εἰ δὲ καὶ τὰ μέρη καὶ τὸ ὅλον ἐν ἑνί τινι πρώτῳ, σκοπεῖν εἰ μὴ ἐν τῷ αὐτῷ, ἀλλ’ ἐν ἑτέρῳ τὸ ὅλον καὶ ἐν ἑτέρῳ τὰ μέρη. πάλιν εἰ τῷ ὅλῳ συμφθείρεται τὰ μέρη· ἀνάπαλιν γὰρ δεῖ συμβαίνειν, τῶν μερῶν φθαρέντων φθείρεσθαι τὸ ὅλον, τοῦ δ’ ὅλου φθαρέντος οὐκ ἀναγκαῖον καὶ τὰ μέρη ἐφθάρθαι. ἢ εἰ τὸ μὲν ὅλον ἀγαθὸν ἢ καλόν, τὰ δὲ μηδέτερα, ἢ ἀνάπαλιν τὰ μὲν ἀγαθὰ ἢ κακά, τὸ δ’ ὅλον μηδέτερον· οὔτε γὰρ ἐκ μηδετέρων δυνατὸν ἢ ἀγαθόν τι ἢ κακὸν [150b] γενέσθαι, οὔτ’ ἐκ κακῶν ἢ ἀγαθῶν μηδέτερον. ἢ εἰ μᾶλλον μὲν θάτερον ἀγαθὸν ἢ θάτερον κακόν, τὸ δ’ ἐκ τούτων μὴ μᾶλλον ἀγαθὸν ἢ κακόν, οἷον εἰ ἡ ἀναίδεια ἐξ ἀνδρείας καὶ ψευδοῦς δόξης· μᾶλλον γὰρ ἀγαθὸν ἡ ἀνδρεία ἢ κακὸν ἡ ψευδὴς δόξα. ἔδει οὖν καὶ τὸ ἐκ τούτων ἀκολουθεῖν τῷ μᾶλλον, καὶ εἶναι ἢ ἁπλῶς ἀγαθόν, ἢ μᾶλλον ἀγαθὸν ἢ κακόν. ἢ τοῦτο μὲν οὐκ ἀναγκαῖον, ἐὰν μὴ ἑκάτερον ᾖ καθ’ αὑτὸ ἀγαθὸν ἢ κακόν· πολλὰ γὰρ τῶν ποιητικῶν καθ’ αὑτὰ μὲν οὐκ ἔστιν ἀγαθά, μειχθέντα δέ, ἢ ἀνάπαλιν ἑκάτερον μὲν ἀγαθόν, μειχθέντα δὲ κακὸν ἢ οὐδέτερον. μάλιστα δὲ καταφανὲς τὸ νῦν ῥηθὲν ἐπὶ τῶν ὑγιεινῶν καὶ νοσωδῶν· ἔνια γὰρ τῶν φαρμάκων οὕτως ἔχει ὥσθ’ ἑκάτερον μὲν εἶναι ἀγαθόν, ἐὰν δ’ ἄμφω δοθῇ μειχθέντα, κακόν.

Πάλιν εἰ ἐκ βελτίονος καὶ χείρονος ὂν μὴ ἔστι τὸ ὅλον τοῦ μὲν βελτίονος χεῖρον, τοῦ δὲ χείρονος βέλτιον. (ἢ οὐδὲ τοῦτ’ ἀναγκαῖον, ἐὰν μὴ καθ’ αὑτὰ ᾖ τὰ ἐξ ὧν σύγκειται ἀγαθά, ἀλλ’ οὐδὲν κωλύει τὸ ὅλον μὴ γίνεσθαι ἀγαθόν, καθάπερ ἐπὶ τῶν ἀρτίως ῥηθέντων.)

Ἔτι εἰ συνώνυμον τὸ ὅλον θατέρῳ· οὐ δεῖ γάρ, καθάπερ οὐδ’ ἐπὶ τῶν συλλαβῶν· οὐδενὶ γὰρ τῶν στοιχείων ἐξ ὧν σύγκειται ἡ συλλαβὴ συνώνυμός ἐστιν.

Ἔτι εἰ μὴ εἴρηκε τὸν τρόπον τῆς συνθέσεως· οὐ γὰρ αὔταρκες πρὸς τὸ γνωρίσαι τὸ εἰπεῖν ἐκ τούτων. οὐ γὰρ τὸ ἐκ τούτων ἀλλὰ τὸ οὕτως ἐκ τούτων ἑκάστου τῶν συνθέτων ἡ οὐσία, καθάπερ ἐπ’ οἰκίας· οὐ γάρ, ἂν ὁπωσοῦν συντεθῇ ταῦτα, οἰκία ἐστίν.

Εἰ δὲ τόδε μετὰ τοῦδε ἀποδέδωκε, πρῶτον μὲν ῥητέον ὅτι τόδε μετὰ τοῦδε ἢ τοῖσδε ταὐτὸν ἢ τῷ ἐκ τῶνδε· ὁ γὰρ λέγων μέλι μεθ’ ὕδατος ἤτοι μέλι καὶ ὕδωρ λέγει ἢ τὸ ἐκ μέλιτος καὶ ὕδατος. ὥστ' ἐὰν ὁποτερῳοῦν τῶν εἰρημένων ταὐτὸν ὁμολογήσῃ εἶναι τὸ τόδε μετὰ τοῦδε, ταὐτὰ ἁρμόσει λέγειν ἅπερ πρὸς ἑκάτερον τούτων ἔμπροσθεν εἴρηται. ἔτι διελόμενον ὁσαχῶς λέγεται ἕτερον μεθ' ἑτέρου σκοπεῖν εἰ μηδαμῶς τόδε μετὰ τοῦδε. οἷον εἰ λέγεται ἕτερον μεθ' ἑτέρου ἢ ὡς ἔν τινι ταὐτῷ δεκτικῷ, καθάπερ ἡ δικαιοσύνη καὶ ἡ ἀνδρεία ἐν ψυχῇ, ἢ ἐν τόπῳ τῷ αὐτῷ ἢ ἐν χρόνῳ τῷ αὐτῷ, μηδαμῶς δ' ἀληθὲς τὸ εἰρημένον ἐπὶ τούτων, δῆλον ὅτι οὐδενὸς ἂν εἴη ὁ ἀποδοθεὶς ὁρισμός, ἐπειδὴ οὐδαμῶς τόδε μετὰ [151a] τοῦδέ ἐστιν. εἰ δὲ τῶν διαιρεθέντων ἀληθὲς τὸ ἐν ταὐτῷ χρόνῳ ἑκάτερον ὑπάρχειν, σκοπεῖν εἰ ἐνδέχεται μὴ πρὸς ταὐτὸν λέγεσθαι ἑκάτερον. οἷον εἰ τὴν ἀνδρείαν ὡρίσατο τόλμαν μετὰ διανοίας ὀρθῆς· ἐνδέχεται γὰρ τόλμαν μὲν ἔχειν τοῦ ἀποστερεῖν, ὀρθὴν δὲ διάνοιαν περὶ τὰ ὑγιεινά, ἀλλ' οὔπω ἀνδρεῖος ὁ ἐν τῷ αὐτῷ χρόνῳ τόδε μετὰ τοῦδε ἔχων. ἔτι εἰ καὶ πρὸς ταὐτὸν ἄμφω λέγεται, οἷον πρὸς τὰ ἰατρικά· οὐδὲν γὰρ κωλύει καὶ τόλμαν καὶ ὀρθὴν διάνοιαν ἔχειν πρὸς τὰ ἰατρικά· ἀλλ' ὅμως οὐδ' οὕτως ἀνδρεῖος ὁ τόδε μετὰ τοῦδε ἔχων. οὔτε γὰρ πρὸς ἕτερον αὐτῶν ἑκάτερον δεῖ λέγεσθαι οὔτε πρὸς ταὐτὸν τὸ τυχόν, ἀλλὰ πρὸς τὸ τῆς ἀνδρείας τέλος, οἷον πρὸς τοὺς πολεμικοὺς κινδύνους ἢ εἴ τι μᾶλλον τούτου τέλος.

Ἔνια δὲ τῶν οὕτως ἀποδιδομένων οὐδαμῶς ὑπὸ τὴν εἰρημένην πίπτει διαίρεσιν, οἷον εἰ ἡ ὀργὴ λύπη μεθ' ὑπολήψεως τοῦ ὀλιγωρεῖσθαι. ὅτι γὰρ διὰ τὴν ὑπόληψιν τὴν τοιαύτην ἡ λύπη γίνεται, τοῦτο βούλεται δηλοῦν· τὸ δὲ διὰ τόδε γίνεσθαί τι οὐκ ἔστι ταὐτὸ τῷ μετὰ τούτου τόδ' εἶναι κατ' οὐδένα τῶν εἰρημένων τρόπων.

Πάλιν εἰ τὴν τούτων σύνθεσιν εἴρηκε τὸ ὅλον, οἷον τῆς ψυχῆς καὶ τοῦ σώματος σύνθεσιν ζῷον, πρῶτον μὲν σκοπεῖν εἰ μὴ εἴρηκε ποία σύνθεσις, καθάπερ εἰ σάρκα ὁριζόμενος ἢ ὀστοῦν τὴν πυρὸς καὶ γῆς καὶ ἀέρος εἶπε σύνθεσιν. οὐ γὰρ ἀπόχρη τὸ σύνθεσιν εἰπεῖν, ἀλλὰ καὶ ποία τις προσδιοριστέον· οὐ γὰρ ὁπωσοῦν συντεθέντων τούτων σὰρξ γίνεται, ἀλλ' οὑτωσὶ μὲν συντεθέντων σάρξ, οὑτωσὶ δ' ὀστοῦν. ἔοικε δ' οὐδ' εἶναι τὸ παράπαν συνθέσει ταὐτὸν οὐδέτερον τῶν εἰρημένων· συνθέσει μὲν γὰρ πάσῃ διάλυσις ἐναντίον, τῶν δ' εἰρημένων οὐδετέρῳ οὐδέν. ἔτι εἰ ὁμοίως πιθανὸν πᾶν τὸ σύνθετον σύνθεσιν εἶναι ἢ μηδέν, τῶν δὲ ζῴων ἕκαστον σύνθετον ὂν μὴ ἔστι σύνθεσις, οὐδὲ τῶν ἄλλων οὐδὲν τῶν συνθέτων σύνθεσις ἂν εἴη.

Πάλιν εἰ ὁμοίως ἔν τινι πέφυκεν ὑπάρχειν τἀναντία, ὥρισται δὲ διὰ θατέρου, δῆλον ὅτι οὐχ ὥρισται. εἰ δὲ μή, πλείους τοῦ αὐτοῦ συμβήσεται ὁρισμοὺς εἶναι· τί γὰρ μᾶλλον ὁ διὰ τούτου ἢ ὁ διὰ τοῦ ἑτέρου ὁρισάμενος εἴρηκεν, ἐπεὶ ὁμοίως ἀμφότερα πέφυκε γίνεσθαι ἐν αὐτῷ; τοιοῦτος δ’ ὁ [151b] τῆς ψυχῆς ὅρος, εἰ ἔστιν “οὐσία ἐπιστήμης δεκτική”· ὁμοίως γὰρ καὶ ἀγνοίας ἐστὶ δεκτική.

Δεῖ δὲ καὶ ἐὰν μὴ πρὸς ὅλον ἔχῃ τις ἐπιχειρεῖν τὸν ὁρισμὸν διὰ τὸ μὴ γνώριμον εἶναι τὸ ὅλον, πρὸς τῶν μερῶν τι ἐπιχειρεῖν, ἐὰν ᾖ γνώριμον καὶ μὴ καλῶς ἀποδεδομένον φαίνηται· τοῦ γὰρ μέρους ἀναιρεθέντος καὶ ὁ πᾶς ὁρισμὸς ἀναιρεῖται. ὅσοι τ’ ἀσαφεῖς τῶν ὁρισμῶν, συνδιορθώσαντα καὶ συσχηματίσαντα πρὸς τὸ δηλοῦν τι καὶ ἔχειν ἐπιχείρημα οὕτως ἐπισκοπεῖν· ἀναγκαῖον γὰρ τῷ ἀποκρινομένῳ ἢ δέχεσθαι τὸ ἐκλαμβανόμενον ὑπὸ τοῦ ἐρωτῶντος ἢ αὐτὸν διασαφῆσαι τί ποτε τυγχάνει τὸ δηλούμενον ὑπὸ τοῦ λόγου. ἔτι καθάπερ ἐν ταῖς ἐκκλησίαις νόμον εἰώθασιν ἐπεισφέρειν, κἂν ᾖ βελτίων ὁ ἐπεισφερόμενος, ἀναιροῦσι τὸν ἔμπροσθεν, οὕτω καὶ ἐπὶ τῶν ὁρισμῶν ποιητέον καὶ αὐτὸν ὁρισμὸν ἕτερον οἰστέον· ἐὰν γὰρ φαίνηται βελτίων καὶ μᾶλλον δηλῶν τὸ ὁριζόμενον, δῆλον ὅτι ἀνῃρημένος ἔσται ὁ κείμενος, ἐπειδὴ οὐκ εἰσὶ πλείους τοῦ αὐτοῦ ὁρισμοί.

Πρὸς ἅπαντας δὲ τοὺς ὁρισμοὺς οὐκ ἐλάχιστον στοιχεῖον τὸ πρὸς ἑαυτὸν εὐστόχως ὁρίσασθαι τὸ προκείμενον ἢ καλῶς εἰρημένον ὅρον ἀναλαβεῖν· ἀνάγκη γὰρ ὥσπερ πρὸς παράδειγμα θεώμενον τό τ’ ἐλλεῖπον ὧν προσῆκεν ἔχειν τὸν ὁρισμὸν καὶ τὸ προσκείμενον περιέργως καθορᾶν ὥστε μᾶλλον ἐπιχειρημάτων εὐπορεῖν.

Τὰ μὲν οὖν περὶ τοὺς ὁρισμοὺς ἐπὶ τοσοῦτον εἰρήσθω.

Πότερον δὲ ταὐτὸν ἢ ἕτερον κατὰ τὸν κυριώτατον τῶν ῥηθέντων περὶ ταὐτοῦ τρόπων (ἐλέγετο δὲ κυριώτατα ταὐτὸν τὸ τῷ ἀριθμῷ ἕν) σκοπεῖν ἔκ τε τῶν πτώσεων καὶ τῶν συστοίχων καὶ τῶν ἀντικειμένων. εἰ γὰρ ἡ δικαιοσύνη ταὐτὸν τῇ ἀνδρείᾳ, καὶ ὁ δίκαιος τῷ ἀνδρείῳ καὶ τὸ δικαίως τῷ ἀνδρείως. ὁμοίως δὲ καὶ ἐπὶ τῶν ἀντικειμένων· εἰ γὰρ τάδε ταὐτά, καὶ τὰ ἀντικείμενα τούτοις ταὐτὰ καθ’ ὁποιανοῦν τῶν λεγομένων ἀντιθέσεων· οὐδὲν γὰρ διαφέρει τὸ τούτῳ ἢ τούτῳ ἀντικείμενον λαβεῖν, ἐπειδὴ ταὐτόν ἐστιν. πάλιν ἐκ τῶν ποιητικῶν [152a] καὶ φθαρτικῶν καὶ γενέσεων καὶ φθορῶν καὶ ὅλως τῶν ὁμοίως ἐχόντων πρὸς ἑκάτερον· ὅσα γὰρ ἁπλῶς ταὐτά, καὶ αἱ γενέσεις αὐτῶν καὶ αἱ φθοραὶ αἱ αὐταὶ καὶ τὰ ποιητικὰ καὶ τὰ φθαρτικά.

Σκοπεῖν δὲ καὶ ὧν θάτερον μάλιστα λέγεται ὁτιοῦν, εἰ καὶ θάτερον τῶν αὐτῶν τούτων κατὰ τὸ αὐτὸ μάλιστα λέγεται, καθάπερ Ξενοκράτης τὸν εὐδαίμονα βίον καὶ τὸν σπουδαῖον ἀποδείκνυσι τὸν αὐτόν, ἐπειδὴ πάντων τῶν βίων αἱρετώτατος ὁ σπουδαῖος καὶ ὁ εὐδαίμων· ἓν γὰρ τὸ αἱρετώτατον καὶ μέγιστον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων. δεῖ δ’ ἑκάτερον ἓν ἀριθμῷ εἶναι τὸ λεγόμενον μέγιστον ἢ αἱρετώτατον· εἰ δὲ μή, οὐκ ἔσται δεδειγμένον ὅτι ταὐτόν. οὐ γὰρ ἀναγκαῖον, εἰ ἀνδρειότατοι τῶν Ἑλλήνων Πελοποννήσιοι καὶ Λακεδαιμόνιοι, τοὺς αὐτοὺς εἶναι Πελοποννησίους Λακεδαιμονίοις, ἐπειδὴ οὐχ εἷς ἀριθμῷ Πελοποννήσιος καὶ Λακεδαιμόνιος, ἀλλὰ περιέχεσθαι μὲν τὸν ἕτερον ὑπὸ τοῦ ἑτέρου ἀναγκαῖον, καθάπερ οἱ Λακεδαιμόνιοι ὑπὸ τῶν Πελοποννησίων, εἰ δὲ μή, συμβήσεται ἀλλήλων εἶναι βελτίους, ἐὰν μὴ περιέχωνται οἱ ἕτεροι ὑπὸ τῶν ἑτέρων. ἀναγκαῖον γὰρ τοὺς Πελοποννησίους βελτίους εἶναι τῶν Λακεδαιμονίων, εἴπερ μὴ περιέχονται οἱ ἕτεροι ὑπὸ τῶν ἑτέρων· πάντων γὰρ τῶν λοιπῶν εἰσι βελτίους. ὁμοίως δὲ καὶ τοὺς Λακεδαιμονίους ἀνάγκη βελτίους εἶναι τῶν Πελοποννησίων· καὶ γὰρ οὗτοι πάντων τῶν λοιπῶν εἰσι βελτίους. ὥστε ἀλλήλων βελτίους γίνονται. δῆλον οὖν ὅτι ἓν ἀριθμῷ δεῖ εἶναι τὸ βέλτιστον καὶ μέγιστον λεγόμενον, εἰ μέλλει ὅτι ταὐτὸν ἀποδείκνυσθαι. διὸ καὶ Ξενοκράτης οὐκ ἀποδείκνυσιν· οὐ γὰρ εἷς ἀριθμῷ ὁ εὐδαίμων καὶ ὁ σπουδαῖος βίος, ὥστ’ οὐκ ἀναγκαῖον τὸν αὐτὸν εἶναι, διότι ἄμφω αἱρετώτατοι, ἀλλὰ τὸν ἕτερον ὑπὸ τὸν ἕτερον.

Πάλιν σκοπεῖν εἰ ᾧ θάτερον ταὐτόν, καὶ θάτερον· εἰ γὰρ μὴ ἀμφότερα τῷ αὐτῷ ταὐτά, δῆλον ὅτι οὐδ’ ἀλλήλοις.

Ἔτι ἐκ τῶν τούτοις συμβεβηκότων καὶ οἷς ταῦτα συμβέβηκεν ἐπισκοπεῖν· ὅσα γὰρ θατέρῳ συμβέβηκε, καὶ θατέρῳ δεῖ συμβεβηκέναι, καὶ οἷς θάτερον αὐτῶν συμβέβηκε, καὶ θάτερον δεῖ συμβεβηκέναι. εἰ δέ τι τούτων διαφωνεῖ, δῆλον ὅτι οὐ ταὐτά.

Ὁρᾶν δὲ καὶ εἰ μὴ ἐν ἑνὶ γένει κατηγορίας ἀμφότερα, ἀλλὰ τὸ μὲν ποιὸν τὸ δὲ ποσὸν ἢ πρός τι δηλοῖ. πάλιν εἰ [152b] τὸ γένος ἑκατέρου μὴ ταὐτόν, ἀλλὰ τὸ μὲν ἀγαθὸν τὸ δὲ κακόν, ἢ τὸ μὲν ἀρετὴ τὸ δ’ ἐπιστήμη. ἢ εἰ τὸ μὲν γένος ταὐτόν, αἱ δὲ διαφοραὶ μὴ αἱ αὐταὶ ἑκατέρου κατηγοροῦνται, ἀλλὰ τοῦ μὲν ὅτι θεωρητικὴ ἐπιστήμη, τοῦ δ’ ὅτι πρακτική. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Ἔτι ἐκ τοῦ μᾶλλον, εἰ τὸ μὲν δέχεται τὸ μᾶλλον τὸ δὲ μή, ἢ εἰ ἄμφω μὲν δέχεται μὴ ἅμα δέ· καθάπερ ὁ μᾶλλον ἐρῶν οὐ μᾶλλον ἐπιθυμεῖ τῆς συνουσίας, ὥστ’ οὐ ταὐτὸν ἔρως καὶ ἐπιθυμία συνουσίας.

Ἔτι ἐκ τῆς προσθέσεως, εἰ τῷ αὐτῷ ἑκάτερον προστιθέμενον μὴ ποιεῖ τὸ ὅλον ταὐτόν. ἢ εἰ τοῦ αὐτοῦ ἀφ’ ἑκατέρου ἀφαιρεθέντος τὸ λοιπὸν ἕτερον, οἷον εἰ διπλάσιον ἡμίσεος καὶ πολλαπλάσιον ἡμίσεος ταὐτὸν ἔφησεν εἶναι. ἀφαιρεθέντος γὰρ ἀφ’ ἑκατέρου τοῦ ἡμίσεος τὰ λοιπὰ ταὐτὸν ἔδει δηλοῦν· οὐ δηλοῖ δέ· τὸ γὰρ διπλάσιον καὶ πολλαπλάσιον οὐ ταὐτὸν δηλοῖ.

Σκοπεῖν δὲ μὴ μόνον εἰ ἤδη τι συμβαίνει ἀδύνατον διὰ τῆς θέσεως, ἀλλὰ καὶ εἰ δυνατὸν ἐξ ὑποθέσεως ὑπάρξαι, καθάπερ τοῖς τὸ κενὸν καὶ τὸ πλῆρες ἀέρος ταὐτὸν φάσκουσιν· δῆλον γὰρ ὅτι ἐὰν ἐξέλθῃ ὁ ἀήρ, κενὸν μὲν οὐχ ἧττον ἀλλὰ μᾶλλον ἔσται, πλῆρες δ’ ἀέρος οὐκέτι ἔσται. ὥστε ὑποτεθέντος τινὸς εἴτε ψευδοῦς εἴτ’ ἀληθοῦς (οὐδὲν γὰρ διαφέρει) τὸ μὲν ἕτερον ἀναιρεῖται αὐτῶν, τὸ δ’ ἕτερον οὔ. ὥστ’ οὐ ταὐτόν.

Καθόλου δ’ εἰπεῖν ἐκ τῶν ὁπωσοῦν ἑκατέρου κατηγορουμένων καὶ ὧν ταῦτα κατηγορεῖται σκοπεῖν εἴ που διαφωνεῖ· ὅσα γὰρ θατέρου κατηγορεῖται, καὶ θατέρου κατηγορεῖσθαι δεῖ, καὶ ὧν θάτερον κατηγορεῖται, καὶ θάτερον κατηγορεῖσθαι δεῖ.

Ἔτι ἐπεὶ πολλαχῶς τὸ ταὐτὸν λέγεται, σκοπεῖν εἰ καθ’ ἕτερόν τινα τρόπον ταὐτά ἐστιν· τὰ γὰρ εἴδει ἢ γένει ταὐτὰ ἢ οὐκ ἀνάγκη ἢ οὐκ ἐνδέχεται ἀριθμῷ ταὐτὰ εἶναι· ἐπισκοποῦμεν δὲ πότερον οὕτω ταὐτὰ ἢ οὐχ οὕτως.

Ἔτι εἰ δυνατὸν θάτερον ἄνευ θατέρου εἶναι· οὐ γὰρ ἂν εἴη ταὐτόν.

Οἱ μὲν οὖν πρὸς τὸ ταὐτὸν τόποι τοσοῦτοι λέγονται. δῆλον δ’ ἐκ τῶν εἰρημένων ὅτι ἅπαντες οἱ πρὸς τὸ ταὐτὸν ἀνασκευαστικοὶ τόποι καὶ πρὸς ὅρον χρήσιμοι, καθάπερ ἔμπροσθεν εἴρηται· εἰ γὰρ μὴ ταὐτὸν δηλοῖ τό τ’ ὄνομα καὶ ὁ λόγος, [153a] δῆλον ὅτι οὐκ ἂν εἴη ὁρισμὸς ὁ ἀποδοθεὶς λόγος. τῶν δὲ κατασκευαστικῶν τόπων οὐδεὶς χρήσιμος πρὸς ὅρον· οὐ γὰρ ἀπόχρη δεῖξαι ταὐτὸν τὸ ὑπὸ τὸν λόγον καὶ τοὔνομα πρὸς τὸ κατασκευάσαι ὅτι ὁρισμός, ἀλλὰ καὶ τὰ ἄλλα πάντα δεῖ ἔχειν τὰ παρηγγελμένα τὸν ὁρισμόν.

Ἀναιρεῖν μὲν οὖν ὅρον οὕτως καὶ διὰ τούτων ἀεὶ πειρατέον. ἐὰν δὲ κατασκευάζειν βουλώμεθα, πρῶτον μὲν εἰδέναι δεῖ ὅτι οὐδεὶς ἢ ὀλίγοι τῶν διαλεγομένων ὅρον συλλογίζονται, ἀλλὰ πάντες ἀρχὴν τὸ τοιοῦτον λαμβάνουσιν, οἷον οἵ τε περὶ γεωμετρίαν καὶ ἀριθμοὺς καὶ τὰς ἄλλας τὰς τοιαύτας μαθήσεις. εἶθ’ ὅτι δι’ ἀκριβείας μὲν ἄλλης ἐστὶ πραγματείας ἀποδοῦναι καὶ τί ἐστιν ὅρος καὶ πῶς ὁρίζεσθαι δεῖ, νῦν δ’ ὅσον ἱκανὸν πρὸς τὴν παροῦσαν χρείαν, ὥστε τοσοῦτον μόνον λεκτέον ὅτι δυνατὸν γενέσθαι ὁρισμοῦ καὶ τοῦ τί ἦν εἶναι συλλογισμόν. εἰ γάρ ἐστιν ὅρος λόγος ὁ τὸ τί ἦν εἶναι τῷ πράγματι δηλῶν, καὶ δεῖ τὰ ἐν τῷ ὅρῳ κατηγορούμενα ἐν τῷ τί ἐστι τοῦ πράγματος μόνα κατηγορεῖσθαι, κατηγορεῖται δ’ ἐν τῷ τί ἐστι τὰ γένη καὶ αἱ διαφοραί, φανερὸν ὡς εἴ τις λάβοι ταῦτα ἃ μόνα ἐν τῷ τί ἐστι τοῦ πράγματος κατηγορεῖται, ὅτι ὁ ταῦτα ἔχων λόγος ὅρος ἐξ ἀνάγκης ἂν εἴη· οὐ γὰρ ἐνδέχεται ἕτερον εἶναι ὅρον, ἐπειδὴ οὐδὲν ἕτερον ἐν τῷ τί ἐστι τοῦ πράγματος κατηγορεῖται.

Ὅτι μὲν οὖν ἐγχωρεῖ συλλογισμὸν ὅρου γενέσθαι, φανερόν. ἐκ τίνων δὲ δεῖ κατασκευάζειν, διώρισται μὲν ἐν ἑτέροις ἀκριβέστερον, πρὸς δὲ τὴν προκειμένην μέθοδον οἱ αὐτοὶ τόποι χρήσιμοι. σκεπτέον γὰρ ἐπὶ τῶν ἐναντίων καὶ τῶν ἄλλων τῶν ἀντικειμένων, καὶ ὅλους τοὺς λόγους καὶ κατὰ μέρος ἐπισκοποῦντα· εἰ γὰρ ὁ ἀντικείμενος τοῦ ἀντικειμένου, καὶ τὸν εἰρημένον τοῦ προκειμένου ἀνάγκη εἶναι. ἐπεὶ δὲ τῶν ἐναντίων πλείους συμπλοκαί, ληπτέον τῶν ἐναντίων ὁποίου ἂν μάλιστα φανερὸς ᾖ ὁ ἐναντίος ὁρισμός. ὅλους μὲν οὖν τοὺς λόγους καθάπερ εἴρηται σκεπτέον, κατὰ μέρος δ’ ὧδε. πρῶτον μὲν οὖν ὅτι τὸ ἀποδοθὲν γένος ὀρθῶς ἀποδέδοται. εἰ γὰρ τὸ ἐναντίον ἐν τῷ ἐναντίῳ, τὸ δὲ προκείμενον μὴ ἔστιν ἐν τῷ αὐτῷ, δῆλον ὅτι ἐν τῷ ἐναντίῳ ἂν εἴη, ἐπειδὴ ἀνάγκη τὰ ἐναντία ἐν τῷ αὐτῷ ἢ ἐν τοῖς ἐναντίοις γένεσιν εἶναι. καὶ τὰς διαφορὰς δὲ τὰς ἐναντίας τῶν ἐναντίων ἀξιοῦμεν κατηγορεῖσθαι, καθάπερ λευκοῦ καὶ μέλανος· τὸ μὲν γὰρ διακριτικὸν τὸ [153b] δὲ συγκριτικὸν ὄψεως. ὥστ’ εἰ τοῦ ἐναντίου αἱ ἐναντίαι κατηγοροῦνται, τοῦ προκειμένου αἱ ἀποδοθεῖσαι κατηγοροῖντ’ ἄν, ὥστ’ ἐπεὶ καὶ τὸ γένος καὶ αἱ διαφοραὶ ὀρθῶς ἀποδέδονται, δῆλον ὅτι ὁρισμὸς ἂν εἴη ὁ ἀποδοθείς. ἢ οὐκ ἀναγκαῖον τῶν ἐναντίων τὰς ἐναντίας διαφορὰς κατηγορεῖσθαι, ἂν μὴ ἐν τῷ αὐτῷ γένει ᾖ τὰ ἐναντία, ὧν δὲ τὰ γένη ἐναντία, οὐδὲν κωλύει τὴν αὐτὴν διαφορὰν κατ’ ἀμφοῖν λέγεσθαι, οἷον κατὰ δικαιοσύνης καὶ ἀδικίας· τὸ μὲν γὰρ ἀρετὴ τὸ δὲ κακία ψυχῆς, ὥστε τὸ ψυχῆς διαφορὰ ἐν ἀμφοῖν λέγεται, ἐπειδὴ καὶ σώματος ἔστιν ἀρετὴ καὶ κακία. ἀλλ’ οὖν τοῦτό γ’ ἀληθές, ὅτι τῶν ἐναντίων ἢ ἐναντίαι ἢ αἱ αὐταὶ διαφοραί εἰσιν. εἰ οὖν τοῦ ἐναντίου ἡ ἐναντία κατηγορεῖται, τούτου δὲ μή, δῆλον ὅτι ἡ εἰρημένη τούτου ἂν κατηγοροῖτο. καθόλου δ’ εἰπεῖν, ἐπεὶ ὁ ὁρισμός ἐστιν ἐκ γένους καὶ διαφορῶν, ἂν ὁ τοῦ ἐναντίου ὁρισμὸς φανερὸς ᾖ, καὶ ὁ τοῦ προκειμένου ὁρισμὸς φανερὸς ἔσται. ἐπεὶ γὰρ τὸ ἐναντίον ἢ ἐν τῷ αὐτῷ γένει ἢ ἐν τῷ ἐναντίῳ, ὁμοίως δὲ καὶ αἱ διαφοραὶ ἢ αἱ ἐναντίαι τῶν ἐναντίων ἢ αἱ αὐταὶ κατηγοροῦνται, δῆλον ὅτι τοῦ προκειμένου ἤτοι τὸ αὐτὸ γένος ἂν κατηγοροῖτο ὅπερ καὶ τοῦ ἐναντίου, αἱ δὲ διαφοραὶ ἐναντίαι, ἢ ἅπασαι ἢ τινές, αἱ δὲ λοιπαὶ αἱ αὐταί· ἢ ἀνάπαλιν αἱ μὲν διαφοραὶ αἱ αὐταὶ τὰ δὲ γένη ἐναντία· ἢ ἄμφω ἐναντία, καὶ τὰ γένη καὶ αἱ διαφοραί. ἀμφότερα γὰρ ταὐτὰ εἶναι οὐκ ἐνδέχεται· εἰ δὲ μή, ὁ αὐτὸς ὁρισμὸς τῶν ἐναντίων ἔσται.

Ἔτι ἐκ τῶν πτώσεων καὶ τῶν συστοίχων· ἀνάγκη γὰρ ἀκολουθεῖν τὰ γένη τοῖς γένεσι καὶ τοὺς ὅρους τοῖς ὅροις. οἷον εἰ ἡ λήθη ἐστὶν ἀποβολὴ ἐπιστήμης, καὶ τὸ ἐπιλανθάνεσθαι ἀποβάλλειν ἐπιστήμην ἔσται καὶ τὸ ἐπιλελῆσθαι ἀποβεβληκέναι ἐπιστήμην. ἑνὸς οὖν ὁποιουοῦν τῶν εἰρημένων ὁμολογηθέντος ἀνάγκη καὶ τὰ λοιπὰ ὁμολογεῖσθαι. ὁμοίως δὲ καὶ εἰ ἡ φθορὰ διάλυσις οὐσίας, καὶ τὸ φθείρεσθαι διαλύεσθαι οὐσίαν καὶ τὸ φθαρτικῶς διαλυτικῶς, εἴ τε τὸ φθαρτικὸν διαλυτικὸν οὐσίας, καὶ ἡ φθορὰ διάλυσις οὐσίας. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὥσθ’ ἑνὸς ὁποιουοῦν ληφθέντος καὶ τὰ λοιπὰ πάντα ὁμολογεῖται.

Καὶ ἐκ τῶν ὁμοίως δ’ ἐχόντων πρὸς ἄλληλα. εἰ γὰρ τὸ ὑγιεινὸν ποιητικὸν ὑγιείας, καὶ τὸ εὐεκτικὸν ποιητικὸν εὐεξίας ἔσται καὶ τὸ ὠφέλιμον ποιητικὸν ἀγαθοῦ. ὁμοίως [154a] γὰρ ἕκαστον τῶν εἰρημένων πρὸς τὸ οἰκεῖον τέλος ἔχει, ὥστ’ εἰ ἑνὸς αὐτῶν ὁρισμός ἐστι τὸ ποιητικὸν εἶναι τοῦ τέλους, καὶ τῶν λοιπῶν ἑκάστου οὗτος ἂν εἴη ὁρισμός.

Ἔτι ἐκ τοῦ μᾶλλον καὶ τοῦ ὁμοίως, ὁσαχῶς ἐνδέχεται κατασκευάσαι δύο πρὸς δύο συγκρίνοντα. οἷον εἰ μᾶλλον ὅδε τοῦδε ἢ ὅδε τοῦδε ὁρισμός, ὁ δὲ ἧττον ὁρισμός, καὶ ὁ μᾶλλον. καὶ εἰ ὁμοίως ὅδε τοῦδε καὶ ὅδε τοῦδε, εἰ ὁ ἕτερος τοῦ ἑτέρου, καὶ ὁ λοιπὸς τοῦ λοιποῦ. ἑνὸς δ’ ὁρισμοῦ πρὸς δύο συγκρινομένου ἢ δύο ὁρισμῶν πρὸς ἕν, οὐδὲν χρήσιμος ἡ ἐκ τοῦ μᾶλλον ἐπίσκεψις· οὔτε γὰρ ἕνα δυοῖν οὔτε δύο τοῦ αὐτοῦ ὅρους δυνατόν ἐστιν εἶναι.

Εἰσὶ δὲ [καὶ] ἐπικαιρότατοι τῶν τόπων οἵ τε νῦν εἰρημένοι καὶ οἱ ἐκ τῶν συστοίχων καὶ τῶν πτώσεων. διὸ καὶ δεῖ μάλιστα κατέχειν καὶ προχείρους ἔχειν τούτους· χρησιμώτατοι γὰρ πρὸς πλεῖστα. καὶ τῶν ἄλλων δὲ τοὺς μάλιστα κοινούς· οὗτοι γὰρ ἐνεργότατοι τῶν λοιπῶν, οἷον τό τ' ἐπιβλέπειν ἐπὶ τὰ καθ' ἕκαστα καὶ τὸ ἐπὶ τῶν εἰδῶν σκοπεῖν εἰ ἐφαρμόττει ὁ λόγος, ἐπειδὴ συνώνυμον τὸ εἶδός ἐστιν. ἔστι δὲ χρήσιμον τὸ τοιοῦτον πρὸς τοὺς τιθεμένους ἰδέας εἶναι, καθάπερ πρότερον εἴρηται. ἔτι εἰ μεταφέρων εἴρηκε τοὔνομα ἢ αὐτὸ αὑτοῦ κατηγόρηκεν ὡς ἕτερον. καὶ εἴ τις ἄλλος κοινὸς καὶ ἐνεργὸς τῶν τόπων ἐστί, τούτῳ χρηστέον.

Ὅτι δὲ χαλεπώτερον κατασκευάζειν ἢ ἀνασκευάζειν ὅρον, ἐκ τῶν μετὰ ταῦτα ῥηθησομένων φανερόν. καὶ γὰρ ἰδεῖν αὐτὸν καὶ λαβεῖν παρὰ τῶν ἐρωτωμένων τὰς τοιαύτας προτάσεις οὐκ εὐπετές, οἷον ὅτι τῶν ἐν τῷ ἀποδοθέντι λόγῳ τὸ μὲν γένος τὸ δὲ διαφορά, καὶ ὅτι ἐν τῷ τί ἐστι τὸ γένος καὶ αἱ διαφοραὶ κατηγοροῦνται· ἄνευ δὲ τούτων ἀδύνατον ὁρισμοῦ γενέσθαι συλλογισμόν. εἰ γάρ τινα καὶ ἄλλα ἐν τῷ τί ἐστι τοῦ πράγματος κατηγορεῖται, ἄδηλον πότερον ὁ ῥηθεὶς ἢ ἕτερος αὐτοῦ ὁρισμός ἐστιν, ἐπειδὴ ὁρισμός ἐστι λόγος ὁ τὸ τί ἦν εἶναι σημαίνων. δῆλον δὲ καὶ ἐκ τῶνδε. ῥᾷον γὰρ ἓν συμπεράνασθαι ἢ πολλά. ἀναιροῦντι μὲν οὖν ἀπόχρη πρὸς ἓν διαλεγῆναι· ἓν γὰρ ὁποιονοῦν ἀνασκευάσαντες ἀνῃρηκότες ἐσόμεθα τὸν ὅρον· κατασκευάζοντι δὲ πάντα ἀνάγκη συμβιβάζειν ὅτι ὑπάρχει τὰ ἐν τῷ ὅρῳ. ἔτι κατασκευάζοντι μὲν καθόλου οἰστέον συλλογισμόν· δεῖ γὰρ κατὰ [154b] παντὸς οὗ τοὔνομα ‹κατηγορεῖται› κατηγορεῖσθαι τὸν ὅρον, καὶ ἔτι πρὸς τούτοις ἀντιστρέφειν, εἰ μέλλει ἴδιος εἶναι ὁ ἀποδοθεὶς ὅρος. ἀνασκευάζοντα δ' οὐκέτι ἀνάγκη δεῖξαι τὸ καθόλου· ἀπόχρη γὰρ τὸ δεῖξαι ὅτι οὐκ ἀληθεύεται περί τινος τῶν ὑπὸ τοὔνομα ὁ λόγος. εἴ τε καὶ καθόλου δέοι ἀνασκευάσαι, οὐδ' ὧς τὸ ἀντιστρέφειν ἀναγκαῖον ἐπὶ τοῦ ἀνασκευάζειν· ἀπόχρη γὰρ ἀνασκευάζοντι καθόλου τὸ δεῖξαι ὅτι κατ' οὐδενὸς ὧν τοὔνομα κατηγορεῖται καὶ ὁ λόγος κατηγορεῖται. τὸ δ' ἀνάπαλιν οὐκ ἀναγκαῖον προσδεῖξαι, ὅτι καθ' ὧν ὁ λόγος μὴ κατηγορεῖται τοὔνομα κατηγορεῖται. ἔτι εἰ καὶ παντὶ ὑπάρχει τῷ ὑπὸ τοὔνομα μὴ μόνῳ δέ, ἀνῃρημένος γίνεται ὁ ὁρισμός.

Ὁμοίως δὲ καὶ περὶ τὸ ἴδιον καὶ τὸ γένος ἔχει· ἐν ἀμφοτέροις γὰρ ἀνασκευάζειν ἢ κατασκευάζειν ῥᾷον. περὶ μὲν οὖν τοῦ ἰδίου φανερὸν ἐκ τῶν εἰρημένων· ὡς γὰρ ἐπὶ τὸ πολὺ ἐν συμπλοκῇ τὸ ἴδιον ἀποδίδοται, ὥστ' ἀνασκευάζειν μὲν ἔστιν ἓν ἀνελόντα, κατασκευάζοντι δὲ ἀνάγκη πάντα συλλογίζεσθαι, σχεδὸν δὲ καὶ τὰ λοιπὰ πάντα, ὅσα πρὸς τὸν ὁρισμόν, καὶ πρὸς τὸ ἴδιον ἁρμόσει λέγεσθαι (παντί τε γὰρ δεῖ τῷ ὑπὸ τοὔνομα τὸν κατασκευάζοντα δεικνύναι ὅτι ὑπάρχει, ἀνασκευάζοντι δ’ ἀπόχρη ἑνὶ δεῖξαι μὴ ὑπάρχον· εἴ τε καὶ παντὶ ὑπάρχει μὴ μόνῳ δέ, καὶ οὕτως ἀνεσκευασμένον γίνεται, καθάπερ ἐπὶ τοῦ ὁρισμοῦ ἐλέγετο)· περὶ δὲ τοῦ γένους, ὅτι κατασκευάζειν μὲν ἀνάγκη μοναχῶς παντὶ δείξαντα ὑπάρχον, ἀνασκευάζεται δὲ διχῶς· καὶ γὰρ εἰ μηδενὶ καὶ εἰ τινὶ δέδεικται μὴ ὑπάρχον, ἀνῄρηται τὸ ἐν ἀρχῇ. ἔτι κατασκευάζοντι μὲν οὐκ ἀπόχρη ὅτι ὑπάρχει δεῖξαι, ἀλλὰ καὶ ὅτι ὡς γένος ὑπάρχει δεικτέον· ἀνασκευάζοντι δ’ ἱκανὸν τὸ δεῖξαι μὴ ὑπάρχον ἢ τινὶ ἢ παντί. ἔοικε δ’, ὥσπερ καὶ ἐν τοῖς ἄλλοις τὸ διαφθεῖραι τοῦ ποιῆσαι ῥᾷον, οὕτω καὶ ἐπὶ τούτων τὸ ἀνασκευάσαι τοῦ κατασκευάσαι.

Ἐπὶ δὲ τοῦ συμβεβηκότος τὸ μὲν καθόλου ῥᾷον ἀνασκευάζειν ἢ κατασκευάζειν· κατασκευάζοντι μὲν γὰρ δεικτέον ὅτι παντί, ἀνασκευάζοντι δ’ ἀπόχρη ἑνὶ δεῖξαι μὴ ὑπάρχον. τὸ δ’ ἐπὶ μέρους ἀνάπαλιν ῥᾷον κατασκευάσαι ἢ ἀνασκευάσαι· κατασκευάζοντι μὲν γὰρ ἀπόχρη δεῖξαι [155a] τινὶ ὑπάρχον, ἀνασκευάζοντι δὲ δεικτέον ὅτι οὐδενὶ ὑπάρχει.

Φανερὸν δὲ καὶ ὅτι πάντων ῥᾷστον ὅρον ἀνασκευάσαι· πλεῖστα γὰρ ἐν αὐτῷ τὰ δεδομένα πολλῶν εἰρημένων, ἐκ δὲ τῶν πλειόνων θᾶττον γίνεται συλλογισμός· εἰκὸς γὰρ ἐν τοῖς πολλοῖς μᾶλλον ἢ ἐν τοῖς ὀλίγοις ἁμάρτημα γίνεσθαι. ἔτι πρὸς μὲν ὅρον ἐνδέχεται καὶ διὰ τῶν ἄλλων ἐπιχειρεῖν· εἴτε γὰρ μὴ ἴδιος ὁ λόγος, εἴτε μὴ γένος τὸ ἀποδοθέν, εἴτε μὴ ὑπάρχει τι τῶν ἐν τῷ λόγῳ, ἀνῃρημένος γίνεται ὁ ὁρισμός. πρὸς δὲ τὰ ἄλλα οὔτε τὰ ἐκ τῶν ὅρων οὔτε τἆλλα ἐνδέχεται πάντ’ ἐπιχειρεῖν· μόνα γὰρ τὰ πρὸς τὸ συμβεβηκὸς κοινὰ πάντων τῶν εἰρημένων ἐστίν. ὑπάρχειν μὲν γὰρ δεῖ ἕκαστον τῶν εἰρημένων· εἰ δὲ μὴ ὡς ἴδιον ὑπάρχει τὸ γένος, οὐδέπω ἀνῄρηται τὸ γένος· ὁμοίως δὲ καὶ τὸ ἴδιον οὐκ ἀναγκαῖον ὡς γένος, οὐδὲ τὸ συμβεβηκὸς ὡς γένος ἢ ἴδιον, ἀλλ’ ὑπάρχειν μόνον. ὥστ’ οὐ δυνατὸν ἐκ τῶν ἑτέρων πρὸς τὰ ἕτερα ἐπιχειρεῖν ἀλλ’ ἢ ἐπὶ τοῦ ὁρισμοῦ. δῆλον οὖν ὅτι ῥᾷστον πάντων ὅρον ἀναιρεῖν, κατασκευάζειν δὲ χαλεπώτατον· ἐκεῖνά τε γὰρ δεῖ πάντα συλλογίσασθαι (καὶ γὰρ ὅτι ὑπάρχει τὰ εἰρημένα καὶ ὅτι γένος τὸ ἀποδοθὲν καὶ ὅτι ἴδιος ὁ λόγος), καὶ ἔτι παρὰ ταῦτα ὅτι δηλοῖ τὸ τί ἦν εἶναι ὁ λόγος, καὶ τοῦτο καλῶς δεῖ πεποιηκέναι.

Τῶν δ’ ἄλλων τὸ ἴδιον μάλιστα τοιοῦτον· ἀναιρεῖν μὲν γὰρ ῥᾷον διὰ τὸ ἐκ πολλῶν ὡς ἐπὶ τὸ πολύ· κατασκευάζειν δὲ χαλεπώτατον, ὅτι τε πολλὰ δεῖ συμβιβάσαι, καὶ πρὸς τούτῳ ὅτι μόνῳ ὑπάρχει καὶ ἀντικατηγορεῖται τοῦ πράγματος.

Ῥᾷστον δὲ πάντων κατασκευάσαι τὸ συμβεβηκός· ἐν μὲν γὰρ τοῖς ἄλλοις οὐ μόνον ὑπάρχον, ἀλλὰ καὶ ὅτι οὕτως ὑπάρχει, δεικτέον· ἐπὶ δὲ τοῦ συμβεβηκότος ὅτι ὑπάρχει μόνον ἱκανὸν δεῖξαι. ἀνασκευάζειν δὲ χαλεπώτατον τὸ συμβεβηκός, ὅτι ἐλάχιστα ἐν αὐτῷ δέδοται· οὐ γὰρ προσσημαίνεται ἐν τῷ συμβεβηκότι πῶς ὑπάρχει. ὥστ’ ἐπὶ μὲν τῶν ἄλλων διχῶς ἔστιν ἀνελεῖν, ἢ δείξαντα ὅτι οὐχ ὑπάρχει ἢ ὅτι οὐχ οὕτως ὑπάρχει· ἐπὶ δὲ τοῦ συμβεβηκότος οὐκ ἔστιν ἀνελεῖν ἀλλ’ ἢ δείξαντα ὅτι οὐχ ὑπάρχει.

Οἱ μὲν οὖν τόποι δι’ ὧν εὐπορήσομεν πρὸς ἕκαστα τῶν προβλημάτων ἐπιχειρεῖν σχεδὸν ἱκανῶς ἐξηρίθμηνται.

Θ

[155b] Μετὰ δὲ ταῦτα περὶ τάξεως καὶ πῶς δεῖ ἐρωτᾶν λεκτέον. δεῖ δὲ πρῶτον μὲν ἐρωτηματίζειν μέλλοντα τὸν τόπον εὑρεῖν ὅθεν ἐπιχειρητέον, δεύτερον δὲ ἐρωτηματίσαι καὶ τάξαι καθ’ ἕκαστα πρὸς ἑαυτόν, τὸ δὲ λοιπὸν καὶ τρίτον εἰπεῖν ἤδη ταῦτα πρὸς ἕτερον. μέχρι μὲν οὖν τοῦ εὑρεῖν τὸν τόπον ὁμοίως τοῦ φιλοσόφου καὶ τοῦ διαλεκτικοῦ ἡ σκέψις, τὸ δ’ ἤδη ταῦτα τάττειν καὶ ἐρωτηματίζειν ἴδιον τοῦ διαλεκτικοῦ· πρὸς ἕτερον γὰρ πᾶν τὸ τοιοῦτον. τῷ δὲ φιλοσόφῳ καὶ ζητοῦντι καθ’ ἑαυτὸν οὐδὲν μέλει, ἐὰν ἀληθῆ μὲν ᾖ καὶ γνώριμα δι’ ὧν ὁ συλλογισμός, μὴ θῇ δ’ αὐτὰ ὁ ἀποκρινόμενος διὰ τὸ σύνεγγυς εἶναι τοῦ ἐξ ἀρχῆς καὶ προορᾶν τὸ συμβησόμενον, ἀλλ’ ἴσως κἂν σπουδάσειεν ὅτι μάλιστα γνώριμα καὶ σύνεγγυς εἶναι τὰ ἀξιώματα· ἐκ τούτων γὰρ οἱ ἐπιστημονικοὶ συλλογισμοί.

Τοὺς μὲν οὖν τόπους ὅθεν δεῖ λαμβάνειν, εἴρηται πρότερον. περὶ τάξεως δὲ καὶ τοῦ ἐρωτηματίσαι λεκτέον διελόμενον τὰς προτάσεις, ὅσαι ληπτέαι παρὰ τὰς ἀναγκαίας· ἀναγκαῖαι δὲ λέγονται δι’ ὧν ὁ συλλογισμὸς γίνεται. αἱ δὲ παρὰ ταύτας λαμβανόμεναι τέτταρές εἰσιν· ἢ γὰρ ἐπαγωγῆς χάριν ‹καὶ› τοῦ δοθῆναι τὸ καθόλου, ἢ εἰς ὄγκον τοῦ λόγου, ἢ πρὸς κρύψιν τοῦ συμπεράσματος, ἢ πρὸς τὸ σαφέστερον εἶναι τὸν λόγον. παρὰ δὲ ταύτας οὐδεμίαν ληπτέον πρότασιν, ἀλλὰ διὰ τούτων αὔξειν καὶ ἐρωτηματίζειν πειρατέον. εἰσὶ δ’ αἱ πρὸς κρύψιν ἀγῶνος χάριν· ἀλλ’ ἐπειδὴ πᾶσα ἡ τοιαύτη πραγματεία πρὸς ἕτερόν ἐστιν, ἀνάγκη καὶ ταύταις χρῆσθαι.

Τὰς μὲν οὖν ἀναγκαίας, δι’ ὧν ὁ συλλογισμός, οὐκ εὐθὺς αὐτὰς προτατέον, ἀλλ’ ἀποστατέον ὅτι ἀνωτάτω, οἷον μὴ τῶν ἐναντίων ἀξιοῦντα τὴν αὐτὴν ἐπιστήμην, ἂν τοῦτο βούληται λαβεῖν, ἀλλὰ τῶν ἀντικειμένων· τεθέντος γὰρ τούτου καὶ ὅτι τῶν ἐναντίων ἡ αὐτὴ συλλογιεῖται, ἐπειδὴ ἀντικείμενα τὰ ἐναντία. ἂν δὲ μὴ τιθῇ, δι’ ἐπαγωγῆς ληπτέον προτείνοντα ἐπὶ τῶν κατὰ μέρος ἐναντίων. ἢ γὰρ διὰ συλλογισμοῦ ἢ δι’ ἐπαγωγῆς τὰς ἀναγκαίας ληπτέον, ἢ τὰς μὲν ἐπαγωγῇ τὰς δὲ συλλογισμῷ, ὅσαι δὲ λίαν προφανεῖς εἰσι, καὶ αὐτὰς προτείνοντα· ἀδηλότερόν τε γὰρ ἀεὶ ἐν τῇ ἀποστάσει [156a] καὶ τῇ ἐπαγωγῇ τὸ συμβησόμενον, καὶ ἅμα τὸ αὐτὰς τὰς χρησίμους προτεῖναι μὴ δυνάμενον ἐκείνως λαβεῖν ἕτοιμον. τὰς δὲ παρὰ ταύτας εἰρημένας ληπτέον μὲν τούτων χάριν, ἑκάστῃ δ’ ὧδε χρηστέον, ἐπάγοντα μὲν ἀπὸ τῶν καθ’ ἕκαστον ἐπὶ τὸ καθόλου καὶ ἀπὸ τῶν γνωρίμων ἐπὶ τὰ ἄγνωστα· γνώριμα δὲ μᾶλλον τὰ κατὰ τὴν αἴσθησιν, ἢ ἁπλῶς ἢ τοῖς πολλοῖς. κρύπτοντα δὲ προσυλλογίζεσθαι δι’ ὧν ὁ συλλογισμὸς τοῦ ἐξ ἀρχῆς μέλλει γίνεσθαι, καὶ ταῦτα ὡς πλεῖστα. εἴη δ’ ἂν τοῦτο, εἴ τις μὴ μόνον τὰς ἀναγκαίας ἀλλὰ καὶ τῶν πρὸς ταύτας χρησίμων τινὰ συλλογίζοιτο. ἔτι τὰ συμπεράσματα μὴ λέγειν ἀλλ’ ὕστερον ἀθρόα συλλογίζεσθαι· οὕτω γὰρ ἂν πορρωτάτω ἀποστήσειε τῆς ἐξ ἀρχῆς θέσεως. καθόλου δ’ εἰπεῖν οὕτω δεῖ ἐρωτᾶν τὸν κρυπτικῶς πυνθανόμενον, ὥστ’ ἠρωτημένου τοῦ παντὸς λόγου καὶ εἰπόντος τὸ συμπέρασμα ζητεῖσθαι τὸ διὰ τί. τοῦτο δ’ ἔσται μάλιστα διὰ τοῦ λεχθέντος ἔμπροσθεν τρόπου· μόνου γὰρ τοῦ ἐσχάτου ῥηθέντος συμπεράσματος ἄδηλον πῶς συμβαίνει, διὰ τὸ μὴ προορᾶν τὸν ἀποκρινόμενον ἐκ τίνων συμβαίνει, μὴ διαρθρωθέντων τῶν προτέρων συλλογισμῶν. ἥκιστα δ’ ἂν διαρθροῖτο ὁ συλλογισμὸς τοῦ συμπεράσματος μὴ τὰ τούτου λήμματα ἡμῶν τιθέντων, ἀλλ’ ἐκεῖνα ὑφ’ ὧν ὁ συλλογισμὸς γίνεται.

Χρήσιμον δὲ καὶ τὸ μὴ συνεχῆ τὰ ἀξιώματα λαμβάνειν ἐξ ὧν οἱ συλλογισμοί, ἀλλ’ ἐναλλὰξ τὸ πρὸς ἕτερον καὶ ἕτερον συμπέρασμα· τιθεμένων γὰρ τῶν οἰκείων παρ’ ἄλληλα μᾶλλον τὸ συμβησόμενον ἐξ αὐτῶν προφανές.

Χρὴ δὲ καὶ ὁρισμῷ λαμβάνειν, ἐφ’ ὧν ἐνδέχεται, τὴν καθόλου πρότασιν μὴ ἐπ’ αὐτῶν ἀλλ’ ἐπὶ τῶν συστοίχων. παραλογίζονται γὰρ ἑαυτούς, ὅταν ἐπὶ τοῦ συστοίχου ληφθῇ ὁ ὁρισμός, ὡς οὐ τὸ καθόλου συγχωροῦντες, οἷον εἰ δέοι λαβεῖν ὅτι ὁ ὀργιζόμενος ὀρέγεται τιμωρίας διὰ φαινομένην ὀλιγωρίαν, ληφθείη δ’ ἡ ὀργὴ ὄρεξις εἶναι τιμωρίας διὰ φαινομένην ὀλιγωρίαν· δῆλον γὰρ ὅτι τούτου ληφθέντος ἔχοιμεν ἂν καθόλου ὃ προαιρούμεθα. τοῖς δ’ ἐπ’ αὐτῶν προτείνουσι πολλάκις ἀνανεύειν συμβαίνει τὸν ἀποκρινόμενον διὰ τὸ μᾶλλον ἔχειν ἐπ’ αὐτοῦ τὴν ἔνστασιν, οἷον ὅτι ὁ ὀργιζόμενος οὐκ ὀρέγεται τιμωρίας· τοῖς γὰρ γονεῦσιν ὀργιζόμεθα μέν, οὐκ ὀρεγόμεθα δὲ τιμωρίας. ἴσως μὲν οὖν οὐκ ἀληθὴς ἡ ἔνστασις· παρ’ ἐνίων γὰρ ἱκανὴ τιμωρία τὸ λυπῆσαι μόνον καὶ [156b] ποιῆσαι μεταμέλεσθαι· οὐ μὴν ἀλλ’ ἔχει τι πιθανὸν πρὸς τὸ μὴ δοκεῖν ἀλόγως ἀρνεῖσθαι τὸ προτεινόμενον. ἐπὶ δὲ τοῦ τῆς ὀργῆς ὁρισμοῦ οὐχ ὁμοίως ῥᾴδιόν ἐστιν εὑρεῖν ἔνστασιν.

Ἔτι τὸ προτείνειν μὴ ὡς δι’ αὐτὸ ἀλλ’ ἄλλου χάριν προτείνοντα· εὐλαβοῦνται γὰρ τὰ πρὸς τὴν θέσιν χρήσιμα. ἁπλῶς δ’ εἰπεῖν ὅτι μάλιστα ποιεῖν ἄδηλον πότερον τὸ προτεινόμενον ἢ τὸ ἀντικείμενον βούλεται λαβεῖν· ἀδήλου γὰρ ὄντος τοῦ πρὸς τὸν λόγον χρησίμου μᾶλλον τὸ δοκοῦν αὑτοῖς τιθέασιν.

Ἔτι διὰ τῆς ὁμοιότητος πυνθάνεσθαι· καὶ γὰρ πιθανὸν καὶ λανθάνει μᾶλλον τὸ καθόλου. οἷον ὅτι ὥσπερ ἐπιστήμη καὶ ἄγνοια τῶν ἐναντίων ἡ αὐτή, οὕτω καὶ αἴσθησις τῶν ἐναντίων ἡ αὐτή· ἢ ἀνάπαλιν, ἐπειδὴ αἴσθησις ἡ αὐτή, καὶ ἐπιστήμη. τοῦτο δ’ ἐστὶν ὅμοιον ἐπαγωγῇ, οὐ μὴν ταὐτόν γε· ἐκεῖ μὲν γὰρ ἀπὸ τῶν καθ’ ἕκαστα τὸ καθόλου λαμβάνεται, ἐπὶ δὲ τῶν ὁμοίων οὐκ ἔστι τὸ λαμβανόμενον τὸ καθόλου ὑφ’ ὃ πάντα τὰ ὅμοιά ἐστιν.

Δεῖ δὲ καὶ αὐτόν ποτε ἑαυτῷ ἔνστασιν φέρειν· ἀνυπόπτως γὰρ ἔχουσιν οἱ ἀποκρινόμενοι πρὸς τοὺς δοκοῦντας δικαίως ἐπιχειρεῖν. χρήσιμον δὲ καὶ τὸ ἐπιλέγειν ὅτι σύνηθες καὶ λεγόμενον τὸ τοιοῦτον· ὀκνοῦσι γὰρ κινεῖν τὸ εἰωθὸς ἔνστασιν μὴ ἔχοντες, ἅμα δὲ καὶ διὰ τὸ χρῆσθαι καὶ αὐτοὶ τοῖς τοιούτοις φυλάττονται κινεῖν αὐτά. ἔτι τὸ μὴ σπουδάζειν, κἂν ὅλως χρήσιμον ᾖ· πρὸς γὰρ τοὺς σπουδάζοντας μᾶλλον ἀντιτείνουσιν. καὶ τὸ ὡς ἐν παραβολῇ προτείνειν· τὸ γὰρ δι’ ἄλλο προτεινόμενον καὶ μὴ δι’ αὐτὸ χρήσιμον τιθέασι μᾶλλον. ἔτι μὴ αὐτὸ προτείνειν ὃ δεῖ ληφθῆναι, ἀλλ’ ᾧ τοῦτο ἕπεται ἐξ ἀνάγκης· μᾶλλόν τε γὰρ συγχωροῦσι διὰ τὸ μὴ ὁμοίως ἐκ τούτου φανερὸν εἶναι τὸ συμβησόμενον, καὶ ληφθέντος τούτου εἴληπται κἀκεῖνο. καὶ τὸ ἐπ’ ἐσχάτῳ ἐρωτᾶν ὃ μάλιστα βούλεται λαβεῖν· μάλιστα γὰρ τὰ πρῶτα ἀνανεύουσι διὰ τὸ τοὺς πλείστους τῶν ἐρωτώντων πρῶτα λέγειν περὶ ἃ μάλιστα σπουδάζουσιν. πρὸς ἐνίους δὲ πρῶτα τὰ τοιαῦτα προτείνειν· οἱ γὰρ δύσκολοι τὰ πρῶτα μάλιστα συγχωροῦσιν, ἂν μὴ παντελῶς φανερὸν ᾖ τὸ συμβησόμενον, ἐπὶ τελευτῆς δὲ δυσκολαίνουσιν. ὁμοίως δὲ καὶ ὅσοι οἴονται δριμεῖς εἶναι ἐν τῷ ἀποκρίνεσθαι· θέντες γὰρ τὰ πρῶτα ἐπὶ τέλους τερθρεύονται ὡς οὐ συμβαίνοντος ἐκ τῶν κειμένων· τιθέασι δὲ προχείρως, πιστεύοντες τῇ ἕξει καὶ ὑπολαμβάνοντες [157a] οὐδὲν πείσεσθαι. ἔτι τὸ μηκύνειν καὶ παρεμβάλλειν τὰ μηδὲν χρήσιμα πρὸς τὸν λόγον, καθάπερ οἱ ψευδογραφοῦντες· πολλῶν γὰρ ὄντων ἄδηλον ἐν ὁποίῳ τὸ ψεῦδος. διὸ καὶ λανθάνουσιν ἐνίοτε οἱ ἐρωτῶντες ἐν παραβύστῳ προστιθέντες ἃ καθ’ αὑτὰ προτεινόμενα οὐκ ἂν τεθείη.

Εἰς μὲν οὖν κρύψιν τοῖς εἰρημένοις χρηστέον, εἰς δὲ κόσμον ἐπαγωγῇ καὶ διαιρέσει τῶν συγγενῶν. ἡ μὲν οὖν ἐπαγωγὴ ὁποῖόν τί ἐστι, δῆλον. τὸ δὲ διαιρεῖσθαι τοιοῦτον, οἷον ὅτι ἐπιστήμη ἐπιστήμης βελτίων ἢ τῷ ἀκριβεστέρα εἶναι ἢ τῷ βελτιόνων, καὶ ὅτι τῶν ἐπιστημῶν αἱ μὲν θεωρητικαὶ αἱ δὲ πρακτικαὶ αἱ δὲ ποιητικαί. τῶν γὰρ τοιούτων ἕκαστον συνεπικοσμεῖ μὲν τὸν λόγον, οὐκ ἀναγκαῖα δὲ ῥηθῆναι πρὸς τὸ συμπέρασμα.

Εἰς δὲ σαφήνειαν παραδείγματα καὶ παραβολὰς οἰστέον, παραδείγματα δὲ οἰκεῖα καὶ ἐξ ὧν ἴσμεν, οἷα Ὅμηρος, μὴ οἷα Χοιρίλος· οὕτω γὰρ ἂν σαφέστερον εἴη τὸ προτεινόμενον.

Χρηστέον δ’ ἐν τῷ διαλέγεσθαι τῷ μὲν συλλογισμῷ πρὸς τοὺς διαλεκτικοὺς μᾶλλον ἢ πρὸς τοὺς πολλούς, τῇ δ’ ἐπαγωγῇ τοὐναντίον πρὸς τοὺς πολλοὺς μᾶλλον· εἴρηται δ’ ὑπὲρ τούτου καὶ πρότερον. ἔστι δὲ ἐπ’ ἐνίων μὲν ἐπάγοντα δυνατὸν ἐρωτῆσαι τὸ καθόλου, ἐπ’ ἐνίων δ’ οὐ ῥᾴδιον διὰ τὸ μὴ κεῖσθαι ταῖς ὁμοιότησιν ὄνομα πάσαις κοινόν, ἀλλ’ ὅταν δέῃ τὸ καθόλου λαβεῖν, “οὕτως ἐπὶ πάντων τῶν τοιούτων” φασίν· τοῦτο δὲ διορίσαι τῶν χαλεπωτάτων ἐστίν, ὁποῖα τῶν προφερομένων τοιαῦτα καὶ ὁποῖα οὔ. καὶ παρὰ τοῦτο πολλάκις ἀλλήλους παρακρούονται κατὰ τοὺς λόγους, οἱ μὲν φάσκοντες ὅμοια εἶναι τὰ μὴ ὄντα ὅμοια, οἱ δ’ ἀμφισβητοῦντες τὰ ὅμοια μὴ εἶναι ὅμοια. διὸ πειρατέον ἐπὶ πάντων τῶν τοιούτων ὀνοματοποιεῖν αὐτόν, ὅπως μήτε τῷ ἀποκρινομένῳ ἐξῇ ἀμφισβητεῖν ὡς οὐχ ὁμοίως τὸ ἐπιφερόμενον λέγεται, μήτε τῷ ἐρωτῶντι συκοφαντεῖν ὡς ὁμοίως λεγομένου, ἐπειδὴ πολλὰ τῶν οὐχ ὁμοίως λεγομένων ὁμοίως φαίνεται λέγεσθαι.

Ὅταν δ’ ἐπάγοντος ἐπὶ πολλῶν μὴ διδῷ τὸ καθόλου, τότε δίκαιον ἀπαιτεῖν ἔνστασιν. μὴ εἰπόντα δ’ αὐτὸν ἐπὶ τίνων οὕτως, οὐ δίκαιον ἀπαιτεῖν ἐπὶ τίνων οὐχ οὕτως· δεῖ γὰρ ἐπαγαγόντα πρότερον οὕτω τὴν ἔνστασιν ἀπαιτεῖν. ἀξιωτέον τε τὰς ἐνστάσεις μὴ ἐπ’ αὐτοῦ τοῦ προτεινομένου φέρειν, ἐὰν μὴ ἓν μόνον ᾖ τὸ τοιοῦτον, καθάπερ ἡ δυὰς τῶν ἀρτίων μόνος [157b] ἀριθμὸς πρῶτος· δεῖ γὰρ τὸν ἐνιστάμενον ἐφ’ ἑτέρου τὴν ἔνστασιν φέρειν, ἢ λέγειν ὅτι τοῦτο μόνον τοιοῦτο. πρὸς δὲ τοὺς ἐνισταμένους τῷ καθόλου, μὴ ἐν αὐτῷ δὲ τὴν ἔνστασιν φέροντας ἀλλ’ ἐν τῷ ὁμωνύμῳ, οἷον ὅτι ἔχοι ἄν τις τὸ μὴ αὑτοῦ χρῶμα ἢ πόδα ἢ χεῖρα (ἔχοι γὰρ ἂν ὁ ζωγράφος χρῶμα καὶ ὁ μάγειρος πόδα τὸν μὴ αὑτοῦ) - διελόμενον οὖν ἐπὶ τῶν τοιούτων ἐρωτητέον· λανθανούσης γὰρ τῆς ὁμωνυμίας εὖ δόξει ἐνστῆναι τῇ προτάσει. ἐὰν δὲ μὴ ἐν τῷ ὁμωνύμῳ ἀλλ’ ἐν αὐτῷ ἐνιστάμενος κωλύῃ τὴν ἐρώτησιν, ἀφαιροῦντα δεῖ ἐν ᾧ ἡ ἔνστασις προτείνειν τὸ λοιπὸν καθόλου ποιοῦντα, ἕως ἂν λάβῃ τὸ χρήσιμον. οἷον ἐπὶ τῆς λήθης καὶ τοῦ ἐπιλελῆσθαι· οὐ γὰρ συγχωροῦσι τὸν ἀποβεβληκότα ἐπιστήμην ἐπιλελῆσθαι, διότι μεταπεσόντος τοῦ πράγματος ἀποβέβληκε μὲν τὴν ἐπιστήμην, ἐπιλέλησται δ’ οὔ. ῥητέον οὖν, ἀφελόντα ἐν ᾧ ἡ ἔνστασις, τὸ λοιπόν, οἷον εἰ διαμένοντος τοῦ πράγματος ἀποβέβληκε τὴν ἐπιστήμην, ὅτι ἐπιλέλησται. ὁμοίως δὲ καὶ πρὸς τοὺς ἐνισταμένους ὅτι τῷ μείζονι ἀγαθῷ ‹οὐ› μεῖζον ἀντίκειται κακόν· προφέρουσι γὰρ ὅτι τῇ ὑγιείᾳ ἐλάττονι ὄντι ἀγαθῷ τῆς εὐεξίας μεῖζον κακὸν ἀντίκειται· τὴν γὰρ νόσον μεῖζον κακὸν εἶναι τῆς καχεξίας. ἀφαιρετέον οὖν καὶ ἐπὶ τούτου ἐν ᾧ ἡ ἔνστασις· ἀφαιρεθέντος γὰρ μᾶλλον ἂν θείη, οἷον ὅτι τῷ μείζονι ἀγαθῷ μεῖζον κακὸν ἀντίκειται, ἐὰν μὴ συνεπιφέρῃ θάτερον θάτερον, καθάπερ ἡ εὐεξία τὴν ὑγίειαν. οὐ μόνον δ’ ἐνισταμένου τοῦτο ποιητέον, ἀλλὰ κἂν ἄνευ ἐνστάσεως ἀρνῆται διὰ τὸ προορᾶν τι τῶν τοιούτων. ἀφαιρεθέντος γὰρ ἐν ᾧ ἡ ἔνστασις, ἀναγκασθήσεται τιθέναι διὰ τὸ μὴ προορᾶν ἐν τῷ λοιπῷ ἐπὶ τίνος οὐχ οὕτως· ἐὰν δὲ μὴ τιθῇ, ἀπαιτούμενος ἔνστασιν οὐ μὴ ἔχῃ ἀποδοῦναι. εἰσὶ δὲ τοιαῦται τῶν προτάσεων αἱ ἐπὶ τὶ μὲν ψευδεῖς ἐπὶ τὶ δ’ ἀληθεῖς· ἐπὶ τούτων γὰρ ἔστι ‹τι› ἀφελόντα τὸ λοιπὸν ἀληθὲς καταλιπεῖν. ἐὰν δ’ ἐπὶ πολλῶν προτείνοντος μὴ φέρῃ ἔνστασιν, ἀξιωτέον τιθέναι· διαλεκτικὴ γάρ ἐστι πρότασις πρὸς ἣν οὕτως ἐπὶ πολλῶν ἔχουσαν μὴ ἔστιν ἔνστασις.

Ὅταν δ’ ἐνδέχηται τὸ αὐτὸ ἄνευ τε τοῦ ἀδυνάτου καὶ διὰ τοῦ ἀδυνάτου συλλογίσασθαι, ἀποδεικνύντι μὲν καὶ μὴ διαλεγομένῳ οὐδὲν διαφέρει οὕτως ἢ ἐκείνως συλλογίσασθαι, διαλεγομένῳ δὲ πρὸς ἄλλον οὐ χρηστέον τῷ διὰ τοῦ ἀδυνάτου συλλογισμῷ. ἄνευ μὲν γὰρ τοῦ ἀδυνάτου συλλογισαμένῳ οὐκ ἔστιν ἀμφισβητεῖν· ὅταν δὲ τὸ ἀδύνατον συλλογίσηται, [158a] ἂν μὴ λίαν ᾖ περιφανὲς ψεῦδος ὄν, οὐκ ἀδύνατόν φασιν εἶναι, ὥστ’ οὐ γίνεται τοῖς ἐρωτῶσιν ὃ βούλονται.

Δεῖ δὲ προτείνειν ὅσα ἐπὶ πολλῶν μὲν οὕτως ἔχει, ἔνστασις δὲ ἢ ὅλως μὴ ἔστιν ἢ μὴ ἐπιπολῆς τὸ συνιδεῖν· μὴ δυνάμενοι γὰρ συνορᾶν ἐφ’ ὧν οὐχ οὕτως, ὡς ἀληθὲς ὂν τιθέασιν.

Οὐ δεῖ δὲ τὸ συμπέρασμα ἐρώτημα ποιεῖν· εἰ δὲ μή, ἀνανεύσαντος οὐ δοκεῖ γεγονέναι συλλογισμός. πολλάκις γὰρ καὶ μὴ ἐρωτῶντος ἀλλ’ ὡς συμβαῖνον ἐπιφέροντος ἀρνοῦνται, καὶ τοῦτο ποιοῦντες οὐ δοκοῦσιν ἐλέγχεσθαι τοῖς μὴ συνορῶσιν ὅ τι συμβαίνει ἐκ τῶν τεθέντων. ὅταν οὖν μηδὲ φήσας συμβαίνειν ἐρωτήσῃ, ὁ δ’ ἀρνηθῇ, παντελῶς οὐ δοκεῖ γεγονέναι συλλογισμός.

Οὐ δοκεῖ δὲ πᾶν τὸ καθόλου διαλεκτικὴ πρότασις εἶναι, οἷον “τί ἐστιν ἄνθρωπος;” ἢ “ποσαχῶς λέγεται τἀγαθόν;” ἔστι γὰρ πρότασις διαλεκτικὴ πρὸς ἣν ἔστιν ἀποκρίνασθαι “ναί” ἢ “οὔ”· πρὸς δὲ τὰς εἰρημένας οὐκ ἔστιν. διὸ οὐ διαλεκτικά ἐστι τὰ τοιαῦτα τῶν ἐρωτημάτων, ἂν μὴ αὐτὸς διορίσας ἢ διελόμενος εἴπῃ, οἷον “ἆρά γε τὸ ἀγαθὸν οὕτως ἢ οὕτως λέγεται;” πρὸς γὰρ τὰ τοιαῦτα ῥᾳδία ἡ ἀπόκρισις ἢ καταφήσαντι ἢ ἀποφήσαντι. διὸ πειρατέον οὕτω προτείνειν τὰς τοιαύτας τῶν προτάσεων. ἅμα δὲ καὶ δίκαιον ἴσως παρ’ ἐκείνου ζητεῖν ποσαχῶς λέγεται τὸ ἀγαθόν, ὅταν αὐτοῦ διαιρουμένου καὶ προτείνοντος μηδαμῶς συγχωρῇ.

Ὅστις δ’ ἕνα λόγον πολὺν χρόνον ἐρωτᾷ, κακῶς πυνθάνεται. εἰ μὲν γὰρ ἀποκρινομένου τοῦ ἐρωτωμένου τὸ ἐρωτώμενον, δῆλον ὅτι πολλὰ ἐρωτήματα ἐρωτᾷ ἢ πολλάκις ταὐτά, ὥστε ἢ ἀδολεσχεῖ ἢ οὐκ ἔχει συλλογισμόν (ἐξ ὀλίγων γὰρ πᾶς συλλογισμός)· εἰ δὲ μὴ ἀποκρινομένου, ὅτι οὐκ ἐπιτιμᾷ, ἢ ἀφίσταται.

Ἔστι δ’ ἐπιχειρεῖν τε χαλεπὸν καὶ ὑπέχειν ῥᾴδιον τὰς αὐτὰς ὑποθέσεις. ἔστι δὲ τοιαῦτα τά τε φύσει πρῶτα καὶ τὰ ἔσχατα. τὰ μὲν γὰρ πρῶτα ὅρου δεῖται, τὰ δ’ ἔσχατα διὰ πολλῶν περαίνεται βουλομένῳ τὸ συνεχὲς λαμβάνειν ἀπὸ τῶν πρώτων, ἢ σοφισματώδη φαίνεται τὰ ἐπιχειρήματα· ἀδύνατον γὰρ ἀποδεῖξαί τι μὴ ἀρξάμενον ἀπὸ τῶν οἰκείων ἀρχῶν καὶ συνείραντα μέχρι τῶν ἐσχάτων. ὁρίζεσθαι μὲν οὖν οὔτ’ ἀξιοῦσιν οἱ ἀποκρινόμενοι οὔτ’, ἂν ὁ ἐρωτῶν ὁρίζηται, προσέχουσιν· μὴ γενομένου δὲ φανεροῦ τί ποτ’ ἐστὶ τὸ [158b] προκείμενον, οὐ ῥᾴδιον ἐπιχειρεῖν. μάλιστα δὲ τὸ τοιοῦτον περὶ τὰς ἀρχὰς συμβαίνει· τὰ μὲν γὰρ ἄλλα διὰ τούτων δείκνυται, ταῦτα δ’ οὐκ ἐνδέχεται δι’ ἑτέρων, ἀλλ’ ἀναγκαῖον ὁρισμῷ τῶν τοιούτων ἕκαστον γνωρίζειν.

Ἔστι δὲ δυσεπιχείρητα καὶ τὰ λίαν ἐγγὺς τῆς ἀρχῆς· οὐ γὰρ ἐνδέχεται πολλοὺς πρὸς αὐτὰ λόγους πορίσασθαι, ὀλίγων ὄντων τῶν ἀνὰ μέσον αὐτῶν τε καὶ τῆς ἀρχῆς, δι’ ὧν ἀνάγκη δείκνυσθαι τὰ μετὰ ταῦτα. τῶν δὲ ὅρων δυσεπιχειρητότατοι πάντων εἰσὶν ὅσοι κέχρηνται τοιούτοις ὀνόμασιν ἃ πρῶτον μὲν ἄδηλά ἐστιν εἴτε ἁπλῶς εἴτε πολλαχῶς λέγεται, πρὸς δὲ τούτοις μηδὲ γνώριμα πότερον κυρίως ἢ κατὰ μεταφορὰν ὑπὸ τοῦ ὁρισαμένου λέγεται. διὰ μὲν γὰρ τὸ ἀσαφῆ εἶναι οὐκ ἔχει ἐπιχειρήματα· διὰ δὲ τὸ ἀγνοεῖσθαι εἰ παρὰ τὸ κατὰ μεταφορὰν λέγεσθαι τοιαῦτ’ ἐστίν, οὐκ ἔχει ἐπιτίμησιν.

Ὅλως δὲ πᾶν πρόβλημα, ὅταν ᾖ δυσεπιχείρητον, ἢ ὅρου δεῖσθαι ὑποληπτέον ἢ τῶν πολλαχῶς ἢ τῶν κατὰ μεταφορὰν εἶναι λεγομένων ἢ οὐ πόρρω τῶν ἀρχῶν, διὰ τὸ μὴ φανερὸν εἶναι πρῶτον ἡμῖν τοῦτ’ αὐτό, κατὰ τίνα ποτὲ τῶν εἰρημένων τρόπων ἐστὶν ὃ τὴν ἀπορίαν παρέχεται· φανεροῦ γὰρ ὄντος τοῦ τρόπου δῆλον ὅτι ἢ ὁρίζεσθαι ἂν δέοι ἢ διαιρεῖσθαι ἢ τὰς ἀνὰ μέσον προτάσεις πορίζεσθαι· διὰ τούτων γὰρ δείκνυται τὰ ἔσχατα.

Πολλαῖς τε τῶν θέσεων μὴ καλῶς ἀποδιδομένου τοῦ ὁρισμοῦ οὐ ῥᾴδιον διαλέγεσθαι καὶ ἐπιχειρεῖν, οἷον πότερον ἓν ἑνὶ ἐναντίον ἢ πλείω· ὁρισθέντων δὲ τῶν ἐναντίων κατὰ τρόπον ῥᾴδιον συμβιβάσαι πότερον ἐνδέχεται πλείω τῷ αὐτῷ εἶναι ἐναντία ἢ οὔ. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων τῶν ὁρισμοῦ δεομένων. ἔοικε δὲ καὶ ἐν τοῖς μαθήμασιν ἔνια δι’ ὁρισμοῦ ἔλλειψιν οὐ ῥᾳδίως γράφεσθαι, οἷον ὅτι ἡ παρὰ τὴν πλευρὰν τέμνουσα τὸ ἐπίπεδον ὁμοίως διαιρεῖ τήν τε γραμμὴν καὶ τὸ χωρίον. τοῦ δὲ ὁρισμοῦ ῥηθέντος εὐθέως φανερὸν τὸ λεγόμενον· τὴν γὰρ αὐτὴν ἀνταναίρεσιν ἔχει τὰ χωρία καὶ αἱ γραμμαί· ἔστι δ’ ὁρισμὸς τοῦ αὐτοῦ λόγου οὗτος. ἁπλῶς δὲ τὰ πρῶτα τῶν στοιχείων τιθεμένων μὲν τῶν ὁρισμῶν, οἷον τί γραμμὴ καὶ τί κύκλος, ῥᾷστα δεῖξαι (πλὴν οὐ πολλά γε πρὸς ἕκαστον ἔστι τούτων ἐπιχειρεῖν διὰ τὸ μὴ πολλὰ τὰ ἀνὰ μέσον εἶναι)· ἂν δὲ μὴ τιθῶνται οἱ τῶν ἀρχῶν ὁρισμοί, χαλεπόν, τάχα δ’ ὅλως [159a] ἀδύνατον. ὁμοίως δὲ τούτοις καὶ ἐπὶ τῶν κατὰ τοὺς λόγους ἔχει.

Οὔκουν δεῖ λανθάνειν, ὅταν δυσεπιχείρητος ᾖ ἡ θέσις, ὅτι πέπονθέ τι τῶν εἰρημένων. ὅταν δ’ ᾖ πρὸς τὸ ἀξίωμα καὶ τὴν πρότασιν μεῖζον ἔργον διαλεγῆναι ἢ τὴν θέσιν, διαπορήσειεν ἄν τις πότερον θετέον τὰ τοιαῦτα ἢ οὔ. εἰ γὰρ μὴ θήσει ἀλλ’ ἀξιώσει καὶ πρὸς τοῦτο διαλέγεσθαι, μεῖζον προστάξει τοῦ ἐν ἀρχῇ κειμένου· εἰ δὲ θήσει, πιστεύσει ἐξ ἧττον πιστῶν. εἰ μὲν οὖν δεῖ μὴ χαλεπώτερον τὸ πρόβλημα ποιεῖν, θετέον· εἰ δὲ διὰ γνωριμωτέρων συλλογίζεσθαι, οὐ θετέον. ἢ τῷ μὲν μανθάνοντι οὐ θετέον, ἂν μὴ γνωριμώτερον ᾖ· τῷ δὲ γυμναζομένῳ θετέον, ἂν ἀληθὲς μόνον φαίνηται. ὥστε φανερὸν ὅτι οὐχ ὁμοίως ἐρωτῶντί τε καὶ διδάσκοντι ἀξιωτέον τιθέναι.

Πῶς μὲν οὖν ἐρωτηματίζειν καὶ τάττειν δεῖ, σχεδὸν ἱκανὰ τὰ εἰρημένα. περὶ δ’ ἀποκρίσεως πρῶτον μὲν διοριστέον τί ἐστιν ἔργον τοῦ καλῶς ἀποκρινομένου, καθάπερ τοῦ καλῶς ἐρωτῶντος. ἔστι δὲ τοῦ μὲν ἐρωτῶντος τὸ οὕτως ἐπαγαγεῖν τὸν λόγον ὥστε ποιῆσαι τὸν ἀποκρινόμενον τὰ ἀδοξότατα λέγειν τῶν διὰ τὴν θέσιν ἀναγκαίων, τοῦ δ’ ἀποκρινομένου τὸ μὴ δι’ αὐτὸν φαίνεσθαι συμβαίνειν τὸ ἀδύνατον ἢ τὸ παράδοξον, ἀλλὰ διὰ τὴν θέσιν· ἑτέρα γὰρ ἴσως ἁμαρτία τὸ θέσθαι πρῶτον ὃ μὴ δεῖ καὶ τὸ θέμενον μὴ φυλάξαι κατὰ τρόπον.

Ἐπεὶ δ’ ἔστιν ἀδιόριστα τοῖς γυμνασίας καὶ πείρας ἕνεκα τοὺς λόγους ποιουμένοις (οὐ γὰρ οἱ αὐτοὶ σκοποὶ τοῖς διδάσκουσιν ἢ μανθάνουσι καὶ τοῖς ἀγωνιζομένοις, οὐδὲ τούτοις τε καὶ τοῖς διατρίβουσι μετ’ ἀλλήλων σκέψεως χάριν· τῷ μὲν γὰρ μανθάνοντι θετέον ἀεὶ τὰ δοκοῦντα· καὶ γὰρ οὐδ’ ἐπιχειρεῖ ψεῦδος οὐδεὶς διδάσκειν· τῶν δ’ ἀγωνιζομένων τὸν μὲν ἐρωτῶντα φαίνεσθαί τι δεῖ ποιεῖν πάντως, τὸν δ’ ἀποκρινόμενον μηδὲν φαίνεσθαι πάσχειν· ἐν δὲ ταῖς διαλεκτικαῖς συνόδοις τοῖς μὴ ἀγῶνος χάριν ἀλλὰ πείρας καὶ σκέψεως τοὺς λόγους ποιουμένοις οὐ διήρθρωταί πω τίνος δεῖ στοχάζεσθαι τὸν ἀποκρινόμενον καὶ ποῖα διδόναι καὶ ποῖα μή, πρὸς τὸ καλῶς ἢ μὴ καλῶς φυλάττειν τὴν θέσιν)· ἐπεὶ οὖν οὐδὲν ἔχομεν παραδεδομένον ὑπ’ ἄλλων, αὐτοί τι πειραθῶμεν εἰπεῖν.

Ἀνάγκη δὴ τὸν ἀποκρινόμενον ὑπέχειν λόγον θέμενον ἤτοι ἔνδοξον ἢ ἄδοξον θέσιν ἢ μηδέτερον, καὶ ἤτοι ἁπλῶς [159b] ἔνδοξον ἢ ἄδοξον ἢ ὡρισμένως, οἷον τῳδί τινι, ἢ αὐτῷ ἢ ἄλλῳ. διαφέρει δ’ οὐδὲν ὁπωσοῦν ἐνδόξου ἢ ἀδόξου οὔσης· ὁ γὰρ αὐτὸς τρόπος ἔσται τοῦ καλῶς ἀποκρίνασθαι καὶ δοῦναι ἢ μὴ δοῦναι τὸ ἐρωτηθέν. ἀδόξου μὲν οὖν οὔσης τῆς θέσεως ἔνδοξον ἀνάγκη τὸ συμπέρασμα γίνεσθαι, ἐνδόξου δ’ ἄδοξον· τὸ γὰρ ἀντικείμενον ἀεὶ τῇ θέσει ὁ ἐρωτῶν συμπεραίνεται. εἰ δὲ μήτ’ ἄδοξον μήτ’ ἔνδοξον τὸ κείμενον, καὶ τὸ συμπέρασμα ἔσται τοιοῦτον. ἐπεὶ δ’ ὁ καλῶς συλλογιζόμενος ἐξ ἐνδοξοτέρων καὶ γνωριμωτέρων τὸ προβληθὲν ἀποδείκνυσι, φανερὸν ὡς ἀδόξου μὲν ὄντος ἁπλῶς τοῦ κειμένου οὐ δοτέον τῷ ἀποκρινομένῳ οὔθ’ ὃ μὴ δοκεῖ ἁπλῶς, οὔθ’ ὃ δοκεῖ μὲν ἧττον δὲ τοῦ συμπεράσματος δοκεῖ. ἀδόξου γὰρ οὔσης τῆς θέσεως ἔνδοξον τὸ συμπέρασμα, ὥστε δεῖ τὰ λαμβανόμενα ἔνδοξα πάντ’ εἶναι καὶ μᾶλλον ἔνδοξα τοῦ προκειμένου, εἰ μέλλει διὰ τῶν γνωριμωτέρων τὸ ἧττον γνώριμον περαίνεσθαι. ὥστ’ εἴ τι μὴ τοιοῦτόν ἐστι τῶν ἐρωτωμένων, οὐ θετέον τῷ ἀποκρινομένῳ. εἰ δ’ ἔνδοξος ἁπλῶς ἡ θέσις, δῆλον ὅτι τὸ συμπέρασμα ἁπλῶς ἄδοξον. θετέον οὖν τά τε δοκοῦντα πάντα καὶ τῶν μὴ δοκούντων ὅσα ἧττόν ἐστιν ἄδοξα τοῦ συμπεράσματος· ἱκανῶς γὰρ ἂν δόξειε διειλέχθαι. ὁμοίως δέ, εἰ μήτ’ ἄδοξος μήτ’ ἔνδοξός ἐστιν ἡ θέσις· καὶ γὰρ οὕτως τά τε φαινόμενα πάντα δοτέον καὶ τῶν μὴ δοκούντων ὅσα μᾶλλον ἔνδοξα τοῦ συμπεράσματος· οὕτω γὰρ ἐνδοξοτέρους συμβήσεται τοὺς λόγους γίνεσθαι. εἰ μὲν οὖν ἁπλῶς ἔνδοξον ἢ ἄδοξον τὸ κείμενον, πρὸς τὰ δοκοῦντα ἁπλῶς τὴν σύγκρισιν ποιητέον. εἰ δὲ μὴ ἁπλῶς ἔνδοξον ἢ ἄδοξον τὸ κείμενον ἀλλὰ τῷ ἀποκρινομένῳ, πρὸς αὐτὸν τὸ δοκοῦν καὶ τὸ μὴ δοκοῦν κρίνοντα θετέον ἢ οὐ θετέον. ἂν δ’ ἑτέρου δόξαν διαφυλάττῃ ὁ ἀποκρινόμενος, δῆλον ὅτι πρὸς τὴν ἐκείνου διάνοιαν ἀποβλέποντα θετέον ἕκαστα καὶ ἀρνητέον. διὸ καὶ οἱ κομίζοντες ἀλλοτρίας δόξας, οἷον ἀγαθὸν καὶ κακὸν εἶναι ταὐτόν, καθάπερ Ἡράκλειτός φησιν, οὐ διδόασι μὴ παρεῖναι ἅμα τῷ αὐτῷ τἀναντία, οὐχ ὡς οὐ δοκοῦν αὐτοῖς τοῦτο, ἀλλ’ ὅτι καθ’ Ἡράκλειτον οὕτω λεκτέον. ποιοῦσι δὲ τοῦτο καὶ οἱ παρ’ ἀλλήλων δεχόμενοι τὰς θέσεις· στοχάζονται γὰρ ὡς ἂν εἴπειεν ὁ θέμενος.

Φανερὸν οὖν τίνων στοχαστέον τῷ ἀποκρινομένῳ, εἴτε ἁπλῶς ἔνδοξον εἴτε τινὶ τὸ κείμενόν ἐστιν. ἐπεὶ δ’ ἀνάγκη πᾶν τὸ ἐρωτώμενον ἢ ἔνδοξον εἶναι ἢ ἄδοξον ἢ μηδέτερον, καὶ ἢ πρὸς τὸν λόγον ἢ μὴ πρὸς τὸν λόγον εἶναι τὸ ἐρωτώμενον, [160a] ἐὰν μὲν ᾖ δοκοῦν καὶ μὴ πρὸς τὸν λόγον, δοτέον φήσαντα δοκεῖν, ἐὰν δὲ μὴ δοκοῦν καὶ μὴ πρὸς τὸν λόγον, δοτέον μέν, ἐπισημαντέον δὲ τὸ μὴ δοκεῖν, πρὸς εὐλάβειαν εὐηθείας. ὄντος δὲ πρὸς τὸν λόγον καὶ δοκοῦντος λεκτέον ὅτι δοκεῖ μέν, ἀλλὰ λίαν σύνεγγυς τοῦ ἐν ἀρχῇ ἐστι καὶ ἀναιρεῖται τούτου τεθέντος τὸ κείμενον. εἰ δὲ πρὸς τὸν λόγον, λίαν δ’ ἄδοξον τὸ ἀξίωμα, συμβαίνειν μὲν φατέον τούτου τεθέντος, ἀλλὰ λίαν εὔηθες εἶναι τὸ προτεινόμενον. εἰ δὲ μήτ’ ἄδοξον μήτ’ ἔνδοξον, εἰ μὲν μηδὲν πρὸς τὸν λόγον, δοτέον μηδὲν διορίσαντι, εἰ δὲ πρὸς τὸν λόγον, ἐπισημαντέον ὅτι ἀναιρεῖται τεθέντος τὸ ἐν ἀρχῇ. οὕτω γὰρ ὅ τ’ ἀποκρινόμενος οὐδὲν δόξει δι’ αὑτὸν πάσχειν, ἐὰν προορῶν ἕκαστα τιθῇ, ὅ τ’ ἐρωτῶν τεύξεται συλλογισμοῦ τιθεμένων αὐτῷ πάντων τῶν ἐνδοξοτέρων τοῦ συμπεράσματος. ὅσοι δ’ ἐξ ἀδοξοτέρων τοῦ συμπεράσματος ἐπιχειροῦσι συλλογίζεσθαι, δῆλον ὡς οὐ καλῶς συλλογίζονται· διὸ τοῖς ἐρωτῶσιν οὐ θετέον.

Ὁμοίως δὲ καὶ ἐπὶ τῶν ἀσαφῶς καὶ πλεοναχῶς λεγομένων ἀπαντητέον. ἐπεὶ γὰρ δέδοται τῷ ἀποκρινομένῳ μὴ μανθάνοντι εἰπεῖν ὅτι “οὐ μανθάνω”, καὶ πλεοναχῶς λεγομένου μὴ ἐξ ἀνάγκης ὁμολογῆσαι ἢ ἀρνήσασθαι, δῆλον ὡς πρῶτον μέν, ἂν μὴ σαφὲς ᾖ τὸ ῥηθέν, οὐκ ἀποκνητέον τὸ φάναι μὴ συνιέναι· πολλάκις γὰρ ἐκ τοῦ μὴ σαφῶς ἐρωτηθέντας διδόναι ἀπαντᾷ τι δυσχερές. ἂν δὲ γνώριμον μὲν ᾖ πλεοναχῶς δὲ λεγόμενον, ἐὰν μὲν ἐπὶ πάντων ἀληθὲς ἢ ψεῦδος ᾖ τὸ λεγόμενον, δοτέον ἁπλῶς ἢ ἀρνητέον, ἐὰν δ’ ἐπὶ τὶ μὲν ψεῦδος ᾖ ἐπὶ τὶ δ’ ἀληθές, ἐπισημαντέον ὅτι πλεοναχῶς λέγεται καὶ ὅτι τὸ μὲν ψεῦδος τὸ δ’ ἀληθές· ὕστερον γὰρ διαιρουμένου ἄδηλον εἰ καὶ ἐν ἀρχῇ συνεώρα τὸ ἀμφίβολον. ἐὰν δὲ μὴ προΐδῃ τὸ ἀμφίβολον ἀλλ’ εἰς θάτερον βλέψας θῇ, ῥητέον πρὸς τὸν ἐπὶ θάτερον ἄγοντα ὅτι “οὐκ εἰς τοῦτο βλέπων ἔδωκα ἀλλ’ εἰς θάτερον αὐτῶν”· πλειόνων γὰρ ὄντων τῶν ὑπὸ ταὐτὸν ὄνομα ἢ λόγον ῥᾳδία ἡ ἀμφισβήτησις. ἐὰν δὲ καὶ σαφὲς ᾖ καὶ ἁπλοῦν τὸ ἐρωτώμενον, ἢ “ναί” ἢ “οὔ” ἀποκριτέον.

Ἐπεὶ δὲ πᾶσα πρότασις συλλογιστικὴ ἢ τούτων τίς ἐστιν ἐξ ὧν ὁ συλλογισμὸς ἤ τινος τούτων ἕνεκα (δῆλον δ’ ὅταν ἑτέρου χάριν λαμβάνηται τῷ πλείω τὰ ὅμοια ἐρωτᾶν· ἢ γὰρ δι’ ἐπαγωγῆς ἢ δι’ ὁμοιότητος ὡς ἐπὶ τὸ πολὺ τὸ καθόλου λαμβάνουσιν), τὰ μὲν οὖν καθ’ ἕκαστα πάντα θετέον, ἂν [160b] ᾖ ἀληθῆ καὶ ἔνδοξα, πρὸς δὲ τὸ καθόλου πειρατέον ἔνστασιν φέρειν· τὸ γὰρ ἄνευ ἐνστάσεως ἢ οὔσης ἢ δοκούσης κωλύειν τὸν λόγον δυσκολαίνειν ἐστίν. εἰ οὖν ἐπὶ πολλῶν φαινομένου μὴ δίδωσι τὸ καθόλου, μὴ ἔχων ἔνστασιν, φανερὸν ὅτι δυσκολαίνει. ἔτι εἰ μηδ’ ἀντεπιχειρεῖν ἔχει ὅτι οὐκ ἀληθές, πολλῷ μᾶλλον ἂν δόξειε δυσκολαίνειν. (καίτοι οὐδὲ τοῦθ’ ἱκανόν· πολλοὺς γὰρ λόγους ἔχομεν ἐναντίους ταῖς δόξαις, οὓς χαλεπὸν λύειν, καθάπερ τὸν Ζήνωνος ὅτι οὐκ ἐνδέχεται κινεῖσθαι οὐδὲ τὸ στάδιον διελθεῖν, ἀλλ' οὐ διὰ τοῦτο τἀντικείμενα τούτοις οὐ θετέον.) εἰ οὖν μήτ' ἀντεπιχειρεῖν ἔχων μήτ' ἐνίστασθαι μὴ τίθησι, δῆλον ὅτι δυσκολαίνει· ἔστι γὰρ ἡ ἐν λόγοις δυσκολία ἀπόκρισις παρὰ τοὺς εἰρημένους τρόπους, συλλογισμοῦ φθαρτική.

Ὑπέχειν δὲ καὶ θέσιν καὶ ὁρισμὸν αὐτὸν αὑτῷ δεῖ προεπιχειρήσαντα· ἐξ ὧν γὰρ ἀναιροῦσιν οἱ πυνθανόμενοι τὸ κείμενον, δῆλον ὅτι τούτοις ἐναντιωτέον.

Ἄδοξον δ' ὑπόθεσιν εὐλαβητέον ὑπέχειν. εἴη δ' ἂν ἄδοξος διχῶς· καὶ γὰρ ἐξ ἧς ἄτοπα συμβαίνει λέγειν, οἷον εἰ πάντα φαίη τις κινεῖσθαι ἢ μηδέν, καὶ ὅσα χείρονος ἤθους ἑλέσθαι καὶ ὑπεναντία ταῖς βουλήσεσιν, οἷον ὅτι ἡδονὴ τἀγαθόν, καὶ τὸ ἀδικεῖν βέλτιον τοῦ ἀδικεῖσθαι· οὐ γὰρ ὡς λόγου χάριν ὑπέχοντα ἀλλ' ὡς τὰ δοκοῦντα λέγοντα μισοῦσιν.

Ὅσοι δὲ τῶν λόγων ψεῦδος συλλογίζονται, λυτέον ἀναιροῦντα παρ' ὃ γίνεται τὸ ψεῦδος· οὐ γὰρ ὁ ὁτιοῦν ἀνελὼν λέλυκεν, οὐδ' εἰ ψεῦδός ἐστι τὸ ἀναιρούμενον. ἔχοι γὰρ ἂν πλείω ψεύδη ὁ λόγος, οἷον ἐάν τις λάβῃ τὸν καθήμενον γράφειν, Σωκράτη δὲ καθῆσθαι· συμβαίνει γὰρ ἐκ τούτων Σωκράτη γράφειν. ἀναιρεθέντος οὖν τοῦ Σωκράτη καθῆσθαι οὐδὲν μᾶλλον λέλυται ὁ λόγος· καίτοι ψεῦδος τὸ ἀξίωμα. ἀλλ' οὐ παρὰ τοῦτο ὁ λόγος ψευδής· ἂν γάρ τις τύχῃ καθήμενος μὲν μὴ γράφων δέ, οὐκέτι ἐπὶ τοῦ τοιούτου ἡ αὐτὴ λύσις ἁρμόσει. ὥστε οὐ τοῦτο ἀναιρετέον, ἀλλὰ τὸ τὸν καθήμενον γράφειν· οὐ γὰρ πᾶς ὁ καθήμενος γράφει. λέλυκε μὲν οὖν πάντως ὁ ἀνελὼν παρ' ὃ γίνεται τὸ ψεῦδος, οἶδε δὲ τὴν λύσιν ὁ εἰδὼς ὅτι παρὰ τοῦτο ὁ λόγος, καθάπερ ἐπὶ τῶν ψευδογραφουμένων. οὐ γὰρ ἀπόχρη τὸ ἐνστῆναι, οὐδ' ἂν ψεῦδος ᾖ τὸ ἀναιρούμενον, ἀλλὰ καὶ διότι ψεῦδος ἀποδεικτέον· οὕτω γὰρ ἂν εἴη φανερὸν πότερον προορῶν τι ἢ οὒ ποιεῖται τὴν ἔνστασιν.

[161a] Ἔστι δὲ λόγον κωλῦσαι συμπεράνασθαι τετραχῶς. ἢ γὰρ ἀνελόντα παρ' ὃ γίνεται τὸ ψεῦδος, ἢ πρὸς τὸν ἐρωτῶντα ἔνστασιν εἰπόντα· πολλάκις γὰρ οὐ λέλυκε μέν, ὁ μέντοι πυνθανόμενος οὐ δύναται πορρωτέρω προαγαγεῖν. τρίτον δὲ πρὸς τὰ ἠρωτημένα· συμβαίη γὰρ ἂν ἐκ μὲν τῶν ἠρωτημένων μὴ γίνεσθαι ὃ βούλεται διὰ τὸ κακῶς ἠρωτῆσθαι, προστεθέντος δέ τινος γίνεσθαι τὸ συμπέρασμα. εἰ μὲν οὖν μηκέτι δύναται προάγειν ὁ ἐρωτῶν, πρὸς τὸν ἐρωτῶντα εἴη ἂν ἡ ἔνστασις, εἰ δὲ δύναται, πρὸς τὰ ἠρωτημένα. τετάρτη δὲ καὶ χειρίστη τῶν ἐνστάσεων ἡ πρὸς τὸν

χρόνον· ἔνιοι γὰρ τοιαῦτα ἐνίστανται πρὸς ἃ διαλεχθῆναι πλείονός ἐστι χρόνου [ἢ] τῆς παρούσης διατριβῆς.

Αἱ μὲν οὖν ἐνστάσεις, καθάπερ εἴπαμεν, τετραχῶς γίνονται· λύσις δ' ἐστὶ τῶν εἰρημένων ἡ πρώτη μόνον, αἱ δὲ λοιπαὶ κωλύσεις τινὲς καὶ ἐμποδισμοὶ τῶν συμπερασμάτων.

Ἐπιτίμησις δὲ λόγου κατ' αὐτόν τε τὸν λόγον καὶ ὅταν ἐρωτᾶται οὐχ ἡ αὐτή. πολλάκις γὰρ τοῦ μὴ καλῶς διειλέχθαι τὸν λόγον ὁ ἐρωτώμενος αἴτιος διὰ τὸ μὴ συγχωρεῖν ἐξ ὧν ἦν διαλεχθῆναι καλῶς πρὸς τὴν θέσιν· οὐ γὰρ ἔστιν ἐπὶ θατέρῳ μόνον τὸ καλῶς ἐπιτελεσθῆναι τὸ κοινὸν ἔργον. ἀναγκαῖον οὖν ἐνίοτε πρὸς τὸν λέγοντα καὶ μὴ πρὸς τὴν θέσιν ἐπιχειρεῖν, ὅταν ὁ ἀποκρινόμενος τἀναντία τῷ ἐρωτῶντι παρατηρῇ προσεπηρεάζων. δυσκολαίνοντες οὖν ἀγωνιστικὰς καὶ οὐ διαλεκτικὰς ποιοῦνται τὰς διατριβάς. ἔτι δ' ἐπεὶ γυμνασίας καὶ πείρας χάριν ἀλλ' οὐ διδασκαλίας οἱ τοιοῦτοι τῶν λόγων, δῆλον ὡς οὐ μόνον τἀληθῆ συλλογιστέον ἀλλὰ καὶ ψεῦδος, οὐδὲ δι' ἀληθῶν ἀεὶ ἀλλ' ἐνίοτε καὶ ψευδῶν· πολλάκις γὰρ ἀληθοῦς τεθέντος ἀναιρεῖν ἀνάγκη τὸν διαλεγόμενον, ὥστε προτατέον τὰ ψευδῆ. ἐνίοτε δὲ καὶ ψεύδους τεθέντος ἀναιρετέον διὰ ψευδῶν· οὐδὲν γὰρ κωλύει τινὶ δοκεῖν τὰ μὴ ὄντα μᾶλλον τῶν ἀληθῶν, ὥστ' ἐκ τῶν ἐκείνῳ δοκούντων τοῦ λόγου γινομένου μᾶλλον ἔσται πεπεισμένος ἢ ὠφελημένος. δεῖ δὲ τὸν καλῶς μεταβιβάζοντα διαλεκτικῶς καὶ μὴ ἐριστικῶς μεταβιβάζειν, καθάπερ τὸν γεωμέτρην γεωμετρικῶς, ἄν τε ψεῦδος ἄν τ' ἀληθὲς ᾖ τὸ συμπεραινόμενον· ποῖοι δὲ διαλεκτικοὶ συλλογισμοί, πρότερον εἴρηται. ἐπεὶ δὲ φαῦλος κοινωνὸς ὁ ἐμποδίζων τὸ κοινὸν ἔργον, δῆλον ὅτι καὶ ἐν λόγῳ. κοινὸν γάρ τι καὶ ἐν τούτοις προκείμενόν ἐστι, πλὴν τῶν ἀγωνιζομένων. τούτοις δ' οὐκ ἔστιν ἀμφοτέροις τυχεῖν τοῦ αὐτοῦ τέλους· πλείους γὰρ ἑνὸς ἀδύνατον [161b] νικᾶν. διαφέρει δ' οὐδέν, ἄν τε διὰ τοῦ ἀποκρίνεσθαι ἄν τε διὰ τοῦ ἐρωτᾶν ποιῇ τοῦτο· ὅ τε γὰρ ἐριστικῶς ἐρωτῶν φαύλως διαλέγεται, ὅ τ' ἐν τῷ ἀποκρίνεσθαι μὴ διδοὺς τὸ φαινόμενον μηδ' ἐκδεχόμενος ὅ τί ποτε βούλεται ὁ ἐρωτῶν πυθέσθαι. δῆλον οὖν ἐκ τῶν εἰρημένων ὅτι οὐχ ὁμοίως ἐπιτιμητέον καθ' αὑτόν τε τῷ λόγῳ καὶ τῷ ἐρωτῶντι· οὐδὲν γὰρ κωλύει τὸν μὲν λόγον φαῦλον εἶναι, τὸν δ' ἐρωτῶντα ὡς ἐνδέχεται βέλτιστα πρὸς τὸν ἀποκρινόμενον διειλέχθαι. πρὸς γὰρ τοὺς δυσκολαίνοντας οὐ δυνατὸν ἴσως εὐθὺς οἵους τις βούλεται ἀλλ' οἵους ἐνδέχεται ποιεῖσθαι τοὺς συλλογισμούς.

Ἐπεὶ δ' ἐστὶν ἀδιόριστον πότε τἀναντία καὶ πότε τὰ ἐν ἀρχῇ λαμβάνουσιν οἱ ἄνθρωποι (πολλάκις γὰρ καθ' αὑτοὺς λέγοντες τὰ ἐναντία λέγουσι, καὶ ἀνανεύσαντες πρότερον διδόασιν ὕστερον· διόπερ ἐρωτώμενοι τἀναντία καὶ τὸ ἐν ἀρχῇ πολλάκις ὑπακούουσιν), ἀνάγκη φαύλους γίνεσθαι τοὺς λόγους. αἴτιος δ’ ὁ ἀποκρινόμενος, τὰ μὲν οὐ διδούς, τὰ δὲ τοιαῦτα διδούς. φανερὸν οὖν ὡς οὐχ ὁμοίως ἐπιτιμητέον τοῖς ἐρωτῶσι καὶ τοῖς λόγοις.

Καθ’ αὑτὸν δὲ τῷ λόγῳ πέντ’ εἰσὶν ἐπιτιμήσεις· πρώτη μὲν ὅταν ἐκ τῶν ἐρωτωμένων μὴ συμπεραίνηται μήτε τὸ προτεθὲν μήτε ὅλως μηδέν, ὄντων ψευδῶν ἢ ἀδόξων, ἢ ἁπάντων ἢ τῶν πλείστων, ἐν οἷς τὸ συμπέρασμα, καὶ μήτ’ ἀφαιρεθέντων τινῶν μήτε προστεθέντων μήτε τῶν μὲν ἀφαιρεθέντων τῶν δὲ προστεθέντων γίνηται τὸ συμπέρασμα. δευτέρα δὲ εἰ πρὸς τὴν θέσιν μὴ γίνοιτο ὁ συλλογισμὸς ἐκ τοιούτων τε καὶ οὕτως ὡς εἴρηται πρότερον. τρίτη δ’ εἰ προστεθέντων τινῶν γίνοιτο συλλογισμός, ταῦτα δ’ εἴη χείρω τῶν ἐρωτηθέντων καὶ ἧττον ἔνδοξα τοῦ συμπεράσματος. πάλιν εἰ ἀφαιρεθέντων τινῶν· ἐνίοτε γὰρ πλείω λαμβάνουσι τῶν ἀναγκαίων, ὥστε οὐ τῷ ταῦτ’ εἶναι γίνεται ὁ συλλογισμός. ἔτι εἰ ἐξ ἀδοξοτέρων καὶ ἧττον πιστῶν τοῦ συμπεράσματος, ἢ εἰ ἐξ ἀληθῶν ἀλλὰ πλείονος ἔργου δεομένων ἀποδεῖξαι τοῦ προβλήματος.

Οὐ δεῖ δὲ πάντων τῶν προβλημάτων ὁμοίως ἀξιοῦν τοὺς συλλογισμοὺς ἐνδόξους εἶναι καὶ πιθανούς· φύσει γὰρ εὐθὺς ὑπάρχει τὰ μὲν ῥᾴω τὰ δὲ χαλεπώτερα τῶν ζητουμένων, ὥστ’ ἐὰν ἐξ ὧν ἐνδέχεται μάλιστα ἐνδόξων συμβιβάσῃ, διείλεκται καλῶς. φανερὸν οὖν ὅτι οὐδὲ λόγῳ ἡ αὐτὴ ἐπιτίμησις πρός τε τὸ προβληθὲν καὶ καθ’ αὑτόν· οὐδὲν γὰρ κωλύει καθ’ αὑτὸν μὲν εἶναι τὸν λόγον ψεκτόν, πρὸς δὲ τὸ [162a] πρόβλημα ἐπαινετόν, καὶ πάλιν ἀντεστραμμένως καθ’ αὑτὸν μὲν ἐπαινετόν, πρὸς δὲ τὸ πρόβλημα ψεκτόν, ὅταν ἐκ πολλῶν ᾖ ῥᾴδιον ἐνδόξων συμπεράνασθαι καὶ ἀληθῶν. εἴη δ’ ἄν ποτε λόγος καὶ συμπεπερασμένος μὴ συμπεπερασμένου χείρων, ὅταν ὁ μὲν ἐξ εὐήθων συμπεραίνηται μὴ τοιούτου τοῦ προβλήματος ὄντος, ὁ δὲ προσδέηται τοιούτων ἅ ἐστιν ἔνδοξα καὶ ἀληθῆ, καὶ μὴ ἐν τοῖς προσλαμβανομένοις ᾖ ὁ λόγος. τοῖς δὲ διὰ ψευδῶν ἀληθὲς συμπεραινομένοις οὐ δίκαιον ἐπιτιμᾶν· ψεῦδος μὲν γὰρ ἀεὶ ἀνάγκη διὰ ψευδῶν συλλογίζεσθαι, τὸ δ’ ἀληθὲς ἔστι καὶ διὰ ψευδῶν ποτε συλλογίζεσθαι. φανερὸν δ’ ἐκ τῶν Ἀναλυτικῶν.

Ὅταν δ’ ἀπόδειξις ᾖ τινος ὁ εἰρημένος λόγος, εἴ τί ἐστιν ἄλλο πρὸς τὸ συμπέρασμα μηδαμῶς ἔχον, οὐκ ἔσται περὶ ἐκείνου συλλογισμός· ἂν δὲ φαίνηται, σόφισμα ἔσται, οὐκ ἀπόδειξις. ἔστι δὲ φιλοσόφημα μὲν συλλογισμὸς ἀποδεικτικός, ἐπιχείρημα δὲ συλλογισμὸς διαλεκτικός, σόφισμα δὲ συλλογισμὸς ἐριστικός, ἀπόρημα δὲ συλλογισμὸς διαλεκτικὸς ἀντιφάσεως.

Εἰ δ’ ἐξ ἀμφοτέρων τι δοκούντων δειχθείη, μὴ ὁμοίως δὲ δοκούντων, οὐδὲν κωλύει τὸ δειχθὲν μᾶλλον ἑκατέρου δοκεῖν. ἀλλ’ εἰ τὸ μὲν δοκοίη τὸ δὲ μηδετέρως, ἢ εἰ τὸ μὲν δοκοίη τὸ δὲ μὴ δοκοίη, εἰ μὲν ὁμοίως, ὁμοίως ἂν εἴη καὶ ‹δοκοῦν καὶ› μή, εἰ δὲ μᾶλλον θάτερον, ἀκολουθήσει τῷ μᾶλλον.

Ἔστι δέ τις ἁμαρτία καὶ αὕτη περὶ τοὺς συλλογισμούς, ὅταν δείξῃ διὰ μακροτέρων, ἐνὸν δι’ ἐλαττόνων καὶ ἐν τῷ λόγῳ ὑπαρχόντων, οἷον ὅτι ἔστι δόξα μᾶλλον ἑτέρα ἑτέρας, εἴ τις αἰτήσαιτο αὐτοέκαστον μάλιστ’ εἶναι, εἶναι δὲ δοξαστὸν ἀληθῶς αὐτό, ὥστε τῶν τινῶν μᾶλλον εἶναι αὐτό· πρὸς δὲ τὸ μᾶλλον μᾶλλον τὸ λεγόμενον εἶναι· εἶναι δὲ καὶ αὐτοδόξαν ἀληθῆ, ἣ ἔσται μᾶλλον ἀκριβὴς τῶν τινῶν· ᾔτηται δὲ καὶ αὐτοδόξαν ἀληθῆ εἶναι καὶ αὐτοέκαστον μάλιστ’ εἶναι· ὥστε αὕτη δόξα ἀκριβεστέρα ἐστίν. τίς δὲ ἡ μοχθηρία; ἦ ὅτι ποιεῖ, παρ’ ὃ ὁ λόγος, λανθάνειν τὸ αἴτιον;

Λόγος δ’ ἐστὶ δῆλος ἕνα μὲν τρόπον καὶ δημοσιώτατον, ἐὰν ᾖ συμπεπερασμένος οὕτως ὥστε μηδὲν δεῖν ἐπερωτῆσαι· ἕνα δὲ καὶ ὃς μάλιστα λέγεται, ὅταν εἰλημμένα [162b] μὲν ᾖ ἐξ ὧν ἀναγκαῖον εἶναι, ᾖ δὲ διὰ συμπερασμάτων συμπεραινόμενος· ἔτι εἰ ἐλλείπει τι σφόδρα ἔνδοξον.

Ψευδὴς δὲ λόγος καλεῖται τετραχῶς· ἕνα μὲν τρόπον ὅταν φαίνηται συμπεραίνεσθαι μὴ συμπεραινόμενος, ὃ καλεῖται ἐριστικὸς συλλογισμός. ἄλλον δὲ ὅταν συμπεραίνηται μέν, μὴ μέντοι πρὸς τὸ προκείμενον (ὅπερ συμβαίνει μάλιστα τοῖς εἰς ἀδύνατον ἄγουσιν), ἢ πρὸς τὸ προκείμενον μὲν συμπεραίνηται, μὴ μέντοι κατὰ τὴν οἰκείαν μέθοδον. τοῦτο δ’ ἐστίν, ὅταν μὴ ὢν ἰατρικὸς δοκῇ ἰατρικὸς εἶναι, ἢ γεωμετρικὸς μὴ ὢν γεωμετρικός, ἢ διαλεκτικὸς μὴ ὢν διαλεκτικός, ἄν τε ψεῦδος ἄν τ’ ἀληθὲς ᾖ τὸ συμβαῖνον. ἄλλον δὲ τρόπον ἐὰν διὰ ψευδῶν συμπεραίνηται. τούτου δ’ ἔσται ποτὲ μὲν τὸ συμπέρασμα ψεῦδος, ποτὲ δ’ ἀληθές· τὸ μὲν γὰρ ψεῦδος ἀεὶ διὰ ψευδῶν περαίνεται, τὸ δ’ ἀληθὲς ἐγχωρεῖ καὶ μὴ ἐξ ἀληθῶν, ὥσπερ εἴρηται καὶ πρότερον.

Τὸ μὲν οὖν ψευδῆ τὸν λόγον εἶναι τοῦ λέγοντος ἁμάρτημα μᾶλλον ἢ τοῦ λόγου, καὶ οὐδὲ τοῦ λέγοντος ἀεί, ἀλλ’ ὅταν λανθάνῃ αὐτόν· ἐπεὶ καθ’ αὑτόν γε πολλῶν ἀληθῶν ἀποδεχόμεθα μᾶλλον, ἂν ἐξ ὅτι μάλιστα δοκούντων ἀναιρῇ τι τῶν ἀληθῶν. τοιοῦτος γὰρ ὢν ἑτέρων ἀληθῶν ἀπόδειξίς ἐστιν· δεῖ γὰρ τῶν κειμένων τι μὴ εἶναι παντελῶς, ὥστ’ ἔσται τούτου ἀπόδειξις. εἰ δ’ ἀληθὲς συμπεραίνοιτο διὰ ψευδῶν καὶ λίαν εὐήθων, πολλῶν ἂν εἴη χείρων ψεῦδος συλλογιζομένων· εἴη δ’ ἂν τοιοῦτος καὶ ψεῦδος συμπεραινόμενος· ὥστε δῆλον ὅτι πρώτη μὲν ἐπίσκεψις λόγου καθ’ αὑτὸν εἰ συμπεραίνεται, δευτέρα δὲ πότερον ἀληθὲς ἢ ψεῦδος, τρίτη δ’ ἐκ ποίων τινῶν. εἰ μὲν γὰρ ἐκ ψευδῶν ἐνδόξων δέ, λογικός· εἰ δ’ ἐξ ὄντων μὲν ἀδόξων δέ, φαῦλος· εἰ δὲ καὶ ψευδῆ καὶ λίαν ἄδοξα, δῆλον ὅτι φαῦλος ἢ ἁπλῶς ἢ τοῦ πράγματος.

Τὸ δὲ ἐν ἀρχῇ καὶ τὰ ἐναντία πῶς αἰτεῖται ὁ ἐρωτῶν, κατ' ἀλήθειαν μὲν ἐν τοῖς Ἀναλυτικοῖς εἴρηται, κατὰ δόξαν δὲ νῦν λεκτέον.

Αἰτεῖσθαι δὲ φαίνονται τὸ ἐν ἀρχῇ πενταχῶς. φανερώτατα μὲν καὶ πρῶτον, εἴ τις αὐτὸ τὸ δείκνυσθαι δέον αἰτήσειεν. τοῦτο δ' ἐπ' αὐτοῦ μὲν οὐ ῥᾴδιον λανθάνειν, ἐν δὲ τοῖς συνωνύμοις καὶ ἐν ὅσοις τὸ ὄνομα καὶ ὁ λόγος τὸ αὐτὸ [163a] σημαίνει, μᾶλλον. δεύτερον δέ, ὅταν κατὰ μέρος δέον ἀποδεῖξαι καθόλου τις αἰτήσῃ, οἷον ‹εἰ›, ἐπιχειρῶν ὅτι τῶν ἐναντίων μία ἐπιστήμη, ὅλως τῶν ἀντικειμένων ἀξιώσειε μίαν εἶναι· δοκεῖ γὰρ ὃ ἔδει καθ' αὑτὸ δεῖξαι μετ' ἄλλων αἰτεῖσθαι πλειόνων. τρίτον εἴ τις καθόλου δεῖξαι προκειμένου κατὰ μέρος αἰτήσειεν, οἷον εἰ πάντων τῶν ἐναντίων προκειμένου τῶνδέ τινων ἀξιώσειε· δοκεῖ γὰρ καὶ οὗτος, ὃ μετὰ πλειόνων ἔδει δεῖξαι, καθ' αὑτὸ χωρὶς αἰτεῖσθαι. πάλιν εἴ τις διελὼν αἰτεῖται τὸ πρόβλημα, οἷον εἰ, δέον δεῖξαι τὴν ἰατρικὴν ὑγιεινοῦ καὶ νοσώδους, χωρὶς ἑκάτερον ἀξιώσειεν, ἢ εἴ τις τῶν ἑπομένων ἀλλήλοις ἐξ ἀνάγκης θάτερον αἰτήσειεν, οἷον τὴν πλευρὰν ἀσύμμετρον εἶναι τῇ διαμέτρῳ, δέον ἀποδεῖξαι ὅτι ἡ διάμετρος τῇ πλευρᾷ.

Ἰσαχῶς δὲ καὶ τἀναντία αἰτοῦνται τῷ ἐξ ἀρχῆς. πρῶτον μὲν γὰρ εἴ τις τὰ ἀντικείμενα αἰτήσαιτο, φάσιν καὶ ἀπόφασιν, δεύτερον δὲ τἀναντία κατὰ τὴν ἀντίθεσιν, οἷον ἀγαθὸν καὶ κακὸν ταὐτόν. τρίτον εἴ τις τὸ καθόλου ἀξιώσας ἐπὶ μέρους αἰτοῖτο τὴν ἀντίφασιν, οἷον εἰ, λαβὼν τῶν ἐναντίων μίαν ἐπιστήμην, ὑγιεινοῦ καὶ νοσώδους ἑτέραν ἀξιώσειεν, ἤ, τοῦτο αἰτησάμενος, ἐπὶ τοῦ καθόλου τὴν ἀντίφασιν πειρῷτο λαμβάνειν. πάλιν ἐάν τις αἰτήσῃ τὸ ἐναντίον τῷ ἐξ ἀνάγκης συμβαίνοντι διὰ τῶν κειμένων, κἂν εἴ τις αὐτὰ μὲν μὴ λάβοι τὰ ἀντικείμενα, τοιαῦτα δ' αἰτήσαιτο δύο ἐξ ὧν ἔσται ἡ ἀντικειμένη ἀντίφασις. διαφέρει δὲ τὸ τἀναντία λαμβάνειν τοῦ ‹τὸ› ἐν ἀρχῇ, ὅτι τοῦ μέν ἐστιν ἡ ἁμαρτία πρὸς τὸ συμπέρασμα (πρὸς γὰρ ἐκεῖνο βλέποντες τὸ ἐν ἀρχῇ λέγομεν αἰτεῖσθαι), τὰ δ' ἐναντία ἐστὶν ἐν ταῖς προτάσεσι τῷ ἔχειν πως ταύτας πρὸς ἀλλήλας.

Πρὸς δὲ γυμνασίαν καὶ μελέτην τῶν τοιούτων λόγων πρῶτον μὲν ἀντιστρέφειν ἐθίζεσθαι χρὴ τοὺς λόγους· οὕτως γὰρ πρός τε τὸ λεγόμενον εὐπορώτερον ἕξομεν καὶ ἐν ὀλίγοις πολλοὺς ἐξεπιστησόμεθα λόγους. τὸ γὰρ ἀντιστρέφειν ἐστὶ τὸ μεταλαβόντα τὸ συμπέρασμα μετὰ τῶν λοιπῶν ἐρωτημάτων ἀνελεῖν ἓν τῶν δοθέντων· ἀνάγκη γάρ, εἰ τὸ συμπέρασμα μὴ ἔστι, μίαν τινὰ ἀναιρεῖσθαι τῶν προτάσεων, εἴπερ πασῶν τεθεισῶν ἀνάγκη ἦν τὸ συμπέρασμα εἶναι. πρὸς ἅπασάν τε θέσιν, καὶ ὅτι οὕτως καὶ ὅτι οὐχ οὕτως, τὸ ἐπιχείρημα [163b] σκεπτέον, καὶ εὑρόντα τὴν λύσιν εὐθὺς ζητητέον· οὕτω γὰρ ἅμα συμβήσεται πρός τε τὸ ἐρωτᾶν καὶ πρὸς τὸ ἀποκρίνεσθαι γεγυμνάσθαι, κἂν πρὸς μηδένα ἄλλον ἔχωμεν, πρὸς αὑτούς. παράλληλά τε παραβάλλειν ἐκλέγοντα πρὸς τὴν αὐτὴν θέσιν ἐπιχειρήματα· τοῦτο γὰρ πρός τε τὸ βιάζεσθαι πολλὴν εὐπορίαν ποιεῖ καὶ πρὸς τὸ ἐλέγχειν μεγάλην ἔχει βοήθειαν, ὅταν εὐπορῇ τις καὶ ὅτι οὕτως καὶ ὅτι οὐχ οὕτως (πρὸς τὰ ἐναντία γὰρ συμβαίνει ποιεῖσθαι τὴν φυλακήν)· πρός τε γνῶσιν καὶ τὴν κατὰ φιλοσοφίαν φρόνησιν τὸ δύνασθαι συνορᾶν καὶ συνεωρακέναι τὰ ἀφ’ ἑκατέρας συμβαίνοντα τῆς ὑποθέσεως οὐ μικρὸν ὄργανον· λοιπὸν γὰρ τούτων ὀρθῶς ἑλέσθαι θάτερον. δεῖ δὲ πρὸς τὸ τοιοῦτον ὑπάρχειν εὐφυᾶ, καὶ τοῦτ’ ἔστιν ἡ κατ’ ἀλήθειαν εὐφυΐα, τὸ δύνασθαι καλῶς ἑλέσθαι τἀληθὲς καὶ φυγεῖν τὸ ψεῦδος· ὅπερ οἱ πεφυκότες εὖ δύνανται ποιεῖν· εὖ γὰρ φιλοῦντες καὶ μισοῦντες τὸ προσφερόμενον εὖ κρίνουσι τὸ βέλτιστον.

Πρός τε τὰ πλειστάκις ἐμπίπτοντα τῶν προβλημάτων ἐξεπίστασθαι δεῖ λόγους, καὶ μάλιστα περὶ τῶν πρώτων θέσεων· ἐν τούτοις γὰρ ἀποδυσπετοῦσιν οἱ ἀποκρινόμενοι πολλάκις. ἔτι τε ὅρων εὐπορεῖν δεῖ καὶ τῶν ἐνδόξων τε καὶ τῶν πρώτων ἔχειν προχείρους· διὰ γὰρ τούτων οἱ συλλογισμοὶ γίνονται. πειρατέον δὲ καὶ εἰς ἃ πλειστάκις ἐμπίπτουσιν οἱ λόγοι κατέχειν. ὥσπερ γὰρ ἐν γεωμετρίᾳ πρὸ ἔργου τὸ περὶ τὰ στοιχεῖα γεγυμνάσθαι, καὶ ἐν ἀριθμοῖς τὸ περὶ τοὺς κεφαλισμοὺς προχείρως ἔχειν μέγα διαφέρει πρὸς τὸ καὶ τὸν ἄλλον ἀριθμὸν γινώσκειν πολλαπλασιούμενον, ὁμοίως καὶ ἐν τοῖς λόγοις τὸ πρόχειρον εἶναι περὶ τὰς ἀρχάς, καὶ τὰς προτάσεις ἀπὸ στόματος ἐξεπίστασθαι. καθάπερ γὰρ ἐν τῷ μνημονικῷ μόνον οἱ τόποι τεθέντες εὐθὺς ποιοῦσιν αὐτὰ μνημονεύειν, καὶ ταῦτα ποιήσει συλλογιστικώτερον διὰ τὸ πρὸς ὡρισμένας αὐτὰς βλέπειν κατ’ ἀριθμόν. πρότασίν τε κοινὴν μᾶλλον ἢ λόγον εἰς μνήμην θετέον· ἀρχῆς γὰρ καὶ ὑποθέσεως εὐπορῆσαι μετρίως χαλεπόν.

Ἔτι τὸν ἕνα λόγον πολλοὺς ποιεῖν ἐθιστέον, ὡς ἀδηλότατα κρύπτοντας. εἴη δ’ ἂν τὸ τοιοῦτον εἴ τις ὅτι πλεῖστον ἀφισταίη τῆς συγγενείας περὶ ὧν ὁ λόγος. ἔσονται δὲ δυνατοὶ τῶν λόγων οἱ μάλιστα καθόλου τοῦτο πάσχειν, οἷον ὅτι [164a] οὐκ ἔστι μία πλειόνων ἐπιστήμη· οὕτω γὰρ καὶ ἐπὶ τῶν πρός τι καὶ ἐπὶ τῶν ἐναντίων καὶ συστοίχων ἐστίν.

Δεῖ δὲ καὶ τὰς ἀπομνημονεύσεις καθόλου ποιεῖσθαι τῶν λόγων, κἂν ᾖ διειλεγμένος ἐπὶ μέρους· οὕτω γὰρ καὶ πολλοὺς ἐξέσται τὸν ἕνα ποιεῖν. ὁμοίως δὲ καὶ ἐν ῥητορικοῖς ἐπὶ τῶν ἐνθυμημάτων. αὐτὸν δ’ ὅτι μάλιστα φεύγειν ἐπὶ τὸ καθόλου φέρειν τοὺς συλλογισμούς. ἀεί τε δεῖ σκοπεῖν τοὺς λόγους, εἰ ἐπὶ κοινῶν διαλέγονται· πάντες γὰρ οἱ ἐν μέρει καὶ καθόλου διειλεγμένοι εἰσί, καὶ ἔνεστιν ἐν τῇ κατὰ μέρος ἡ τοῦ καθόλου ἀπόδειξις διὰ τὸ μὴ εἶναι συλλογίσασθαι μηδὲν ἄνευ τῶν καθόλου.

Τὴν δὲ γυμνασίαν ἀποδοτέον τῶν μὲν ἐπακτικῶν πρὸς νέον, τῶν δὲ συλλογιστικῶν πρὸς ἔμπειρον. πειρατέον δὲ λαμβάνειν παρὰ μὲν τῶν συλλογιστικῶν τὰς προτάσεις, παρὰ δὲ τῶν ἐπακτικῶν τὰς παραβολάς· ἐν τούτῳ γὰρ ἑκάτεροι γεγυμνασμένοι εἰσίν. ὅλως δ’ ἐκ τοῦ γυμνάζεσθαι διαλεγόμενον πειρατέον ἀποφέρεσθαι ἢ συλλογισμὸν περί τινος ἢ λύσιν ἢ πρότασιν ἢ ἔνστασιν, ἢ εἰ ὀρθῶς τις ἤρετο ἢ εἰ μὴ ὀρθῶς, ἢ αὐτὸς ἢ ἕτερος, καὶ παρὰ τί ἑκάτερον.

[164b] ἐκ τούτων γὰρ ἡ δύναμις, τὸ δὲ γυμνάζεσθαι δυνάμεως χάριν, καὶ μάλιστα περὶ τὰς προτάσεις καὶ ἐνστάσεις· ἔστι γὰρ ὡς ἁπλῶς εἰπεῖν διαλεκτικὸς ὁ προτατικὸς καὶ ἐνστατικός. ἔστι δὲ τὸ μὲν προτείνεσθαι ἓν ποιεῖν τὰ πλείω (δεῖ γὰρ ἓν ὅλως ληφθῆναι πρὸς ὃ ὁ λόγος), τὸ δ’ ἐνίστασθαι τὸ ἓν πολλά· ἢ γὰρ διαιρεῖ ἢ ἀναιρεῖ, τὸ μὲν διδοὺς τὸ δ’ οὒ τῶν προτεινομένων.

Οὐχ ἅπαντι δὲ διαλεκτέον, οὐδὲ πρὸς τὸν τυχόντα γυμναστέον. ἀνάγκη γὰρ πρὸς ἐνίους φαύλους γίνεσθαι τοὺς λόγους· πρὸς γὰρ τὸν πάντως πειρώμενον φαίνεσθαι διαφεύγειν δίκαιον μὲν πάντως πειρᾶσθαι συλλογίσασθαι, οὐκ εὔσχημον δέ. διόπερ οὐ δεῖ συνεστάναι εὐχερῶς πρὸς τοὺς τυχόντας· ἀνάγκη γὰρ πονηρολογίαν συμβαίνειν· καὶ γὰρ οἱ γυμναζόμενοι ἀδυνατοῦσιν ἀπέχεσθαι τοῦ διαλέγεσθαι ἀγωνιστικῶς.

Δεῖ δὲ καὶ πεποιημένους ἔχειν λόγους πρὸς τὰ τοιαῦτα τῶν προβλημάτων ἐν οἷς ἐλαχίστων εὐπορήσαντες πρὸς πλεῖστα χρησίμους ἕξομεν· οὗτοι δ’ εἰσὶν οἱ καθόλου καὶ οὓς προσπορίζεσθαι χαλεπώτερον ἐκ τῶν παρὰ πόδας.

Περι των Σοφιστικων Ελεγχων (164a) Sophistical Refutations

Περὶ δὲ τῶν σοφιστικῶν ἐλέγχων καὶ τῶν φαινομένων μὲν ἐλέγχων, ὄντων δὲ παραλογισμῶν ἀλλ’ οὐκ ἐλέγχων, λέγωμεν ἀρξάμενοι κατὰ φύσιν ἀπὸ τῶν πρώτων.

Ὅτι μὲν οὖν οἱ μὲν εἰσὶ συλλογισμοί, οἱ δ’ οὐκ ὄντες δοκοῦσι, φανερόν. ὥσπερ γὰρ καὶ ἐπὶ τῶν ἄλλων τοῦτο γίνεται διά τινος ὁμοιότητος, καὶ ἐπὶ τῶν λόγων ὡσαύτως ἔχει. καὶ γὰρ τὴν ἕξιν οἱ μὲν ἔχουσιν εὖ, οἱ δὲ φαίνονται, φυλετικῶς φυσήσαντες καὶ ἐπισκευάσαντες αὑτούς, καὶ καλοὶ οἱ μὲν διὰ κάλλος, οἱ δὲ φαίνονται, κομμώσαντες αὑτούς. ἐπί τε τῶν ἀψύχων ὡσαύτως· καὶ γὰρ τούτων τὰ μὲν ἄργυρος τὰ δὲ χρυσός ἐστιν ἀληθῶς, τὰ δ’ ἔστι μὲν οὔ, φαίνεται δὲ κατὰ τὴν αἴσθησιν, οἷον τὰ μὲν λιθαργύρινα καὶ τὰ καττιτέρινα ἀργυρᾶ, τὰ δὲ χολοβάφινα χρυσᾶ. τὸν αὐτὸν δὲ τρόπον καὶ συλλογισμὸς καὶ ἔλεγχος ὁ μὲν ἔστιν, ὁ δ’ οὐκ ἔστι μέν, φαίνεται δὲ διὰ τὴν ἀπειρίαν· οἱ γὰρ ἄπειροι ὥσπερ ἂν ἀπέχοντες πόρρωθεν θεωροῦσιν. ὁ μὲν γὰρ συλλογισμὸς ἐκ τινῶν ἐστι τεθέντων ὥστε λέγειν ἕτερον ἐξ ἀνάγκης τι τῶν κειμένων διὰ τῶν κειμένων, ἔλεγχος δὲ συλλογισμὸς μετ’ ἀντιφάσεως τοῦ συμπεράσματος. οἱ δὲ τοῦτο ποιοῦσι μὲν οὔ, δοκοῦσι δὲ διὰ πολλὰς αἰτίας· ὧν εἷς τόπος εὐφυέστατός ἐστι καὶ δημοσιώτατος, ὁ διὰ τῶν ὀνομάτων. ἐπεὶ γὰρ οὐκ ἔστιν αὐτὰ τὰ πράγματα διαλέγεσθαι φέροντας, ἀλλὰ τοῖς ὀνόμασιν ἀντὶ τῶν πραγμάτων χρώμεθα ὡς συμβόλοις, τὸ συμβαῖνον ἐπὶ τῶν ὀνομάτων καὶ ἐπὶ τῶν πραγμάτων ἡγούμεθα συμβαίνειν, καθάπερ ἐπὶ τῶν ψήφων τοῖς λογιζομένοις. τὸ δ’ οὐκ ἔστιν ὅμοιον· τὰ μὲν γὰρ ὀνόματα πεπέρανται καὶ τὸ τῶν λόγων πλῆθος, τὰ δὲ πράγματα τὸν ἀριθμὸν ἄπειρά ἐστιν. ἀναγκαῖον οὖν πλείω τὸν αὐτὸν λόγον καὶ τοὔνομα τὸ ἓν σημαίνειν. ὥσπερ οὖν κἀκεῖ οἱ μὴ δεινοὶ τὰς ψήφους φέρειν ὑπὸ τῶν ἐπιστημόνων παρακρούονται, τὸν αὐτὸν τρόπον καὶ ἐπὶ τῶν λόγων οἱ τῶν ὀνομάτων τῆς δυνάμεως ἄπειροι παραλογίζονται καὶ αὐτοὶ διαλεγόμενοι καὶ ἄλλων ἀκούοντες. διὰ μὲν οὖν ταύτην τὴν αἰτίαν καὶ τὰς λεχθησομένας ἔστι καὶ συλλογισμὸς καὶ ἔλεγχος φαινόμενος οὐκ ὢν δέ. ἐπεὶ δ’ ἐστί τισι μᾶλλον πρὸ ἔργου τὸ δοκεῖν εἶναι σοφοῖς ἢ τὸ εἶναι καὶ μὴ δοκεῖν (ἔστι γὰρ ἡ σοφιστικὴ φαινομένη σοφία οὖσα δ’ οὔ, καὶ ὁ σοφιστὴς χρηματιστὴς ἀπὸ φαινομένης σοφίας ἀλλ’ οὐκ οὔσης), δῆλον ὅτι ἀναγκαῖον τούτοις καὶ τοῦ σοφοῦ ἔργον δοκεῖν ποιεῖν, μᾶλλον ἢ ποιεῖν καὶ μὴ δοκεῖν. ἔστι δ’ ὡς ἓν πρὸς ἓν εἰπεῖν ἔργον περὶ ἕκαστον τοῦ εἰδότος ἀψευδεῖν μὲν αὐτὸν περὶ ὧν οἶδε, τὸν δὲ ψευδόμενον ἐμφανίζειν δύνασθαι. ταῦτα δ’ ἐστὶ τὸ μὲν ἐν τῷ δύνασθαι δοῦναι λόγον, τὸ δ’ ἐν τῷ λαβεῖν. ἀνάγκη οὖν τοὺς βουλομένους σοφιστεύειν τὸ τῶν εἰρημένων λόγων γένος ζητεῖν· πρὸ ἔργου γάρ ἐστιν· ἡ γὰρ τοιαύτη δύναμις ποιήσει φαίνεσθαι σοφόν, οὗ τυγχάνουσι τὴν προαίρεσιν ἔχοντες.

Ὅτι μὲν οὖν ἔστι τι τοιοῦτον λόγων γένος, καὶ ὅτι τοιαύτης ἐφίενται δυνάμεως οὓς καλοῦμεν σοφιστάς, δῆλον. πόσα δ’ ἔστιν εἴδη τῶν λόγων τῶν σοφιστικῶν, καὶ ἐκ πόσων τὸν ἀριθμὸν ἡ δύναμις αὕτη συνέστηκε, καὶ πόσα μέρη τυγχάνει τῆς πραγματείας ὄντα, καὶ περὶ τῶν ἄλλων τῶν συντελούντων εἰς τὴν τέχνην ταύτην ἤδη λέγωμεν.

Ἔστι δὴ τῶν ἐν τῷ διαλέγεσθαι λόγων τέτταρα γένη, διδασκαλικοὶ καὶ διαλεκτικοὶ καὶ πειραστικοὶ καὶ ἐριστικοί· διδασκαλικοὶ μὲν οἱ ἐκ τῶν οἰκείων ἀρχῶν ἑκάστου μαθήματος καὶ οὐκ ἐκ τῶν τοῦ ἀποκρινομένου δοξῶν συλλογιζόμενοι (δεῖ γὰρ πιστεύειν τὸν μανθάνοντα), διαλεκτικοὶ δ’ οἱ ἐκ τῶν ἐνδόξων συλλογιστικοὶ ἀντιφάσεως, πειραστικοὶ δ’ οἱ ἐκ τῶν δοκούντων τῷ ἀποκρινομένῳ καὶ ἀναγκαίων εἰδέναι τῷ προσποιουμένῳ ἔχειν τὴν ἐπιστήμην (ὃν τρόπον δέ, διώρισται ἐν ἑτέροις), ἐριστικοὶ δ’ οἱ ἐκ τῶν φαινομένων ἐνδόξων, μὴ ὄντων δέ, συλλογιστικοὶ ἢ φαινόμενοι συλλογιστικοί. περὶ μὲν οὖν τῶν ἀποδεικτικῶν ἐν τοῖς Ἀναλυτικοῖς εἴρηται, περὶ δὲ τῶν διαλεκτικῶν καὶ πειραστικῶν ἐν ἄλλοις· περὶ δὲ τῶν ἀγωνιστικῶν καὶ ἐριστικῶν νῦν λέγωμεν.

Πρῶτον δὴ ληπτέον πόσων στοχάζονται οἱ ἐν τοῖς λόγοις ἀγωνιζόμενοι καὶ διαφιλονεικοῦντες. ἔστι δὲ πέντε ταῦτα τὸν ἀριθμόν, ἔλεγχος καὶ ψεῦδος καὶ παράδοξον καὶ σολοικισμὸς καὶ πέμπτον τὸ ποιῆσαι ἀδολεσχῆσαι τὸν προσδιαλεγόμενον (τοῦτο δ’ ἐστὶ τὸ πολλάκις ἀναγκάζεσθαι ταὐτὸ λέγειν), ἢ τὸ μὴ ὂν ἀλλὰ [τὸ] φαινόμενον ἕκαστον εἶναι τούτων. μάλιστα μὲν γὰρ προαιροῦνται φαίνεσθαι ἐλέγχοντες, δεύτερον δὲ ψευδόμενόν τι δεικνύναι, τρίτον εἰς παράδοξον ἄγειν, τέταρτον δὲ σολοικίζειν ποιεῖν (τοῦτο δ’ ἐστὶ τὸ ποιῆσαι τῇ λέξει βαρβαρίζειν ἐκ τοῦ λόγου τὸν ἀποκρινόμενον)· τελευταῖον δὲ τὸ πλεονάκις ταὐτὸ λέγειν.

Τρόποι δ’ εἰσὶ τοῦ μὲν ἐλέγχειν δύο· οἱ μὲν γάρ εἰσι παρὰ τὴν λέξιν, οἱ δ’ ἔξω τῆς λέξεως. ἔστι δὲ τὰ μὲν παρὰ τὴν λέξιν ἐμποιοῦντα τὴν φαντασίαν ἓξ τὸν ἀριθμόν· ταῦτα δ’ ἐστὶν ὁμωνυμία, ἀμφιβολία, σύνθεσις, διαίρεσις, προσῳδία, σχῆμα λέξεως. τούτου δὲ πίστις ἥ τε διὰ τῆς ἐπαγωγῆς καὶ συλλογισμός, ἄν τε ληφθῇ τις ἄλλος καὶ ὅτι τοσαυταχῶς ἂν τοῖς αὐτοῖς ὀνόμασι καὶ λόγοις μὴ ταὐτὸ δηλώσαιμεν. εἰσὶ δὲ παρὰ μὲν τὴν ὁμωνυμίαν οἱ τοιοίδε τῶν λόγων, οἷον ὅτι μανθάνουσιν οἱ ἐπιστάμενοι, τὰ γὰρ ἀποστοματιζόμενα μανθάνουσιν οἱ γραμματικοί· τὸ γὰρ μανθάνειν ὁμώνυμον, τό τε ξυνιέναι χρώμενον τῇ ἐπιστήμῃ καὶ τὸ λαμβάνειν ἐπιστήμην. καὶ πάλιν ὅτι τὰ κακὰ ἀγαθά· τὰ γὰρ δέοντα ἀγαθά, τὰ δὲ κακὰ δέοντα· διττὸν γὰρ τὸ δέον, τό τ’ ἀναγκαῖον, ὃ συμβαίνει πολλάκις καὶ ἐπὶ τῶν κακῶν (ἔστι γὰρ κακόν τι ἀναγκαῖον) - καὶ τἀγαθὰ δὲ δέοντά φαμεν εἶναι. ἔτι ‹τὸ› τὸν αὐτὸν καθῆσθαι καὶ ἑστάναι, καὶ κάμνειν καὶ ὑγιαίνειν. ὅσπερ γὰρ ἀνίστατο, ἕστηκεν, καὶ ὅσπερ ὑγιάζετο, ὑγιαίνει· ἀνίστατο δ’ ὁ καθήμενος καὶ ὑγιάζετο ὁ κάμνων. τὸ γὰρ τὸν κάμνοντα ὁτιοῦν ποιεῖν ἢ πάσχειν οὐχ ἓν σημαίνει, ἀλλ’ ὁτὲ μὲν ὅτι ὁ νῦν κάμνων [ἢ καθήμενος], ὁτὲ δ’ ὃς ἔκαμνε πρότερον. πλὴν ὑγιάζετο μὲν καὶ κάμνων καὶ ὁ κάμνων· ὑγιαίνει δ’ οὐ κάμνων ἀλλ’ ὁ κάμνων, οὐ νῦν, ἀλλ’ ὁ πρότερον. παρὰ δὲ τὴν ἀμφιβολίαν οἱ τοιοίδε· τὸ βούλεσθαι λαβεῖν με τοὺς πολεμίους. καὶ “ἆρ’ ὅ τις γινώσκει, τοῦτο γινώσκει;” καὶ γὰρ τὸν γινώσκοντα καὶ τὸ γινωσκόμενον ἐνδέχεται ὡς γινώσκοντα σημῆναι τούτῳ τῷ λόγῳ. καὶ “ἆρα ὃ ὁρᾷ τις, τοῦτο ὁρᾷ; ὁρᾷ δὲ τὸν κίονα, ὥστε ὁρᾷ ὁ κίων”. καὶ “ἆρα ὃ σὺ φῄς εἶναι, τοῦτο σὺ φῄς εἶναι; φῄς δὲ λίθον εἶναι· σὺ ἄρα φῄς λίθος εἶναι”. καὶ “ἆρ’ ἔστι σιγῶντα λέγειν;” διττὸν γὰρ καὶ τὸ σιγῶντα λέγειν, τό τε τὸν λέγοντα σιγᾶν καὶ τὸ τὰ λεγόμενα. εἰσὶ δὲ τρεῖς τρόποι τῶν παρὰ τὴν ὁμωνυμίαν καὶ τὴν ἀμφιβολίαν· εἷς μὲν ὅταν ἢ ὁ λόγος ἢ τοὔνομα κυρίως σημαίνῃ πλείω, οἷον ἀετὸς καὶ κύων· εἷς δὲ ὅταν εἰωθότες ὦμεν οὕτω λέγειν· τρίτος δὲ ὅταν τὸ συντεθὲν πλείω σημαίνῃ, κεχωρισμένον δὲ ἁπλῶς. οἷον τὸ “ἐπίσταται γράμματα”· ἑκάτερον μὲν γάρ, εἰ ἔτυχεν, ἕν τι σημαίνει, τὸ “ἐπίσταται” καὶ τὸ “γράμματα”· ἄμφω δὲ πλείω, ἢ τὸ τὰ γράμματα αὐτὰ ἐπιστήμην ἔχειν ἢ τῶν γραμμάτων ἄλλον.

Ἡ μὲν οὖν ἀμφιβολία καὶ ὁμωνυμία παρὰ τούτους τοὺς τρόπους ἐστίν. παρὰ δὲ τὴν σύνθεσιν τὰ τοιάδε, οἷον τὸ δύνασθαι καθήμενον βαδίζειν καὶ μὴ γράφοντα γράφειν (οὐ γὰρ ταὐτὸ σημαίνει ἂν διελών τις εἴπῃ καὶ συνθεὶς ὡς δυνατὸν τὸ “καθήμενον βαδίζειν” [καὶ “μὴ γράφοντα γράφειν”]· καὶ τοῦθ’ ὡσαύτως, ἄν τις συνθῇ τὸ “μὴ γράφοντα γράφειν”· σημαίνει γὰρ ὡς ἔχει δύναμιν τοῦ μὴ γράφων γράφειν· ἐὰν δὲ μὴ συνθῇ, ὅτι ἔχει δύναμιν, ὅτε οὐ γράφει, τοῦ γράφειν), καὶ “μανθάνει νῦν γράμματα, εἴπερ μανθάνει ἃ ἐπίσταται”. ἔτι τὸ ἓν μόνον δυνάμενον φέρειν πολλὰ δύνασθαι φέρειν.

Παρὰ δὲ τὴν διαίρεσιν ὅτι τὰ πέντ’ ἐστὶ δύο καὶ τρία, καὶ περιττὰ καὶ ἄρτια, καὶ τὸ μεῖζον ἴσον· τοσοῦτον γὰρ καὶ ἔτι πρός. ὁ γὰρ αὐτὸς λόγος διῃρημένος καὶ συγκείμενος οὐκ ἀεὶ ταὐτὸ σημαίνειν ἂν δόξειεν, οἷον “ἐγώ σ’ ἔθηκα δοῦλον ὄντ’ ἐλεύθερον” καὶ τὸ “πεντήκοντ’ ἀνδρῶν ἑκατὸν λίπε δῖος Ἀχιλλεύς”.

Παρὰ δὲ τὴν προσῳδίαν ἐν μὲν τοῖς ἄνευ γραφῆς διαλεκτικοῖς οὐ ῥᾴδιον ποιῆσαι λόγον, ἐν δὲ τοῖς γεγραμμένοις καὶ ποιήμασι μᾶλλον. οἷον καὶ τὸν Ὅμηρον ἔνιοι διορθοῦνται πρὸς τοὺς ἐλέγχοντας ὡς ἄτοπον εἰρηκότα “τὸ μὲν οὐ καταπύθεται ὄμβρῳ”· λύουσι γὰρ αὐτὸ τῇ προσῳδίᾳ, λέγοντες τὸ “ου” ὀξύτερον. καὶ τὸ περὶ τὸ ἐνύπνιον τοῦ Ἀγαμέμνονος, ὅτι οὐκ αὐτὸς ὁ Ζεὺς εἶπεν “δίδομεν δέ οἱ εὖχος ἀρέσθαι”, ἀλλὰ τῷ ἐνυπνίῳ ἐνετέλλετο διδόναι. τὰ μὲν οὖν τοιαῦτα παρὰ τὴν προσῳδίαν ἐστίν.

Οἱ δὲ παρὰ τὸ σχῆμα τῆς λέξεως συμβαίνουσιν ὅταν τὸ μὴ ταὐτὸ ὡσαύτως ἑρμηνεύηται, οἷον τὸ ἄρρεν θῆλυ ἢ τὸ θῆλυ ἄρρεν ἢ τὸ μεταξὺ θάτερον τούτων, ἢ πάλιν τὸ ποιὸν ποσὸν ἢ τὸ ποσὸν ποιόν, ἢ τὸ ποιοῦν πάσχον ἢ τὸ διακείμενον ποιοῦν, καὶ τἆλλα δ’ ὡς διῄρηται πρότερον· ἔστι γὰρ τὸ μὴ τῶν ποιεῖν ὂν ὡς τῶν ποιεῖν τι τῇ λέξει σημαίνειν. οἷον τὸ ὑγιαίνειν ὁμοίως τῷ σχήματι τῆς λέξεως λέγεται τῷ τέμνειν ἢ οἰκοδομεῖν· καίτοι τὸ μὲν ποιόν τι καὶ διακείμενόν πως δηλοῖ, τὸ δὲ ποιεῖν τι. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων.

Οἱ μὲν οὖν παρὰ τὴν λέξιν ἔλεγχοι ἐκ τούτων τῶν τόπων εἰσίν. τῶν δ’ ἔξω τῆς λέξεως παραλογισμῶν εἴδη ἔστιν ἑπτά, ἓν μὲν παρὰ τὸ συμβεβηκός, δεύτερον δὲ τὸ ἁπλῶς ἢ μὴ ἁπλῶς ἀλλὰ πῂ ἢ ποὺ ἢ ποτὲ ἢ πρός τι λέγεσθαι, τρίτον δὲ τὸ παρὰ τὴν τοῦ ἐλέγχου ἄγνοιαν, τέταρτον δὲ τὸ παρὰ τὸ ἑπόμενον, πέμπτον δὲ τὸ παρὰ τὸ ‹τὸ› ἐν ἀρχῇ λαμβάνειν, ἕκτον δὲ τὸ ‹τὸ› μὴ αἴτιον ὡς αἴτιον τιθέναι, ἕβδομον δὲ τὸ τὰ πλείω ἐρωτήματα ἓν ποιεῖν.

Οἱ μὲν οὖν παρὰ τὸ συμβεβηκὸς παραλογισμοί εἰσιν ὅταν ὁμοίως ὁτιοῦν ἀξιωθῇ τῷ πράγματι καὶ τῷ συμβεβηκότι ὑπάρχειν. ἐπεὶ γὰρ τῷ αὐτῷ πολλὰ συμβέβηκεν, οὐκ ἀνάγκη πᾶσι τοῖς κατηγορουμένοις καὶ καθ’ οὗ κατηγορεῖται ταὐτὰ πάντα ὑπάρχειν. οἷον “εἰ ὁ Κορίσκος ἕτερον ἀνθρώπου, αὐτὸς αὑτοῦ ἕτερος· ἔστι γὰρ ἄνθρωπος”. ἢ εἰ Σωκράτους ἕτερος, ὁ δὲ Σωκράτης ἄνθρωπος, ἕτερον ἀνθρώπου φασὶν ὡμολογηκέναι διὰ τὸ συμβεβηκέναι οὗ ἔφησεν ἕτερον εἶναι, τοῦτον εἶναι ἄνθρωπον.

Οἱ δὲ παρὰ τὸ ἁπλῶς τόδε ἢ πῇ λέγεσθαι καὶ μὴ κυρίως, ὅταν τὸ ἐν μέρει λεγόμενον ὡς ἁπλῶς εἰρημένον ληφθῇ, οἷον, εἰ τὸ μὴ ὄν ἐστι δοξαστόν, ὅτι τὸ μὴ ὂν ἔστιν· οὐ γὰρ ταὐτὸ τὸ εἶναί τέ τι καὶ εἶναι ἁπλῶς. ἢ πάλιν ὅτι τὸ ὂν οὐκ ἔστιν ὄν, εἰ τῶν ὄντων τι μὴ ἔστιν, οἷον εἰ μὴ ἄνθρωπος· οὐ γὰρ ταὐτὸ τὸ μὴ εἶναί τι καὶ ἁπλῶς μὴ εἶναι. φαίνεται δὲ διὰ τὸ πάρεγγυς τῆς λέξεως καὶ μικρὸν διαφέρειν τὸ εἶναί τι τοῦ εἶναι, καὶ τὸ μὴ εἶναί τι τοῦ μὴ εἶναι. ὁμοίως δὲ καὶ τὸ παρὰ τὸ πῇ καὶ τὸ ἁπλῶς· οἷον ὁ Ἰνδός, ὅλος μέλας ὤν, λευκός ἐστι τοὺς ὀδόντας· λευκὸς ἄρα καὶ οὐ λευκός ἐστιν. ἢ εἰ ἄμφω πῄ, ὅτι ἅμα τὰ ἐναντία ὑπάρχει. τὸ δὲ τοιοῦτον ἐπ’ ἐνίων μὲν παντὶ θεωρῆσαι ῥᾴδιον, οἷον εἰ, λαβὼν τὸν Αἰθίοπα εἶναι μέλανα, τοὺς ὀδόντας ἔροιτ’ εἰ λευκός· εἰ οὖν ταύτῃ λευκός, ὅτι μέλας καὶ οὐ μέλας οἴοιτ’ ‹ἂν› διειλέχθαι, συλλογιστικῶς τελειώσας τὴν ἐρώτησιν. ἐπ’ ἐνίων δὲ λανθάνει πολλάκις, ἐφ’ ὅσων, ὅταν πῇ λέγηται, κἂν τὸ ἁπλῶς δόξειεν ἀκολουθεῖν, καὶ ἐν ὅσοις μὴ ῥᾴδιον θεωρῆσαι πότερον αὐτῶν κυρίως ἀποδοτέον. γίνεται δὲ τὸ τοιοῦτον ἐν οἷς ὁμοίως ὑπάρχει τὰ ἀντικείμενα· δοκεῖ γὰρ ἢ ἄμφω ἢ μηδέτερον δοτέον ἁπλῶς εἶναι [κατηγορεῖν]· οἷον, εἰ τὸ μὲν ἥμισυ λευκὸν τὸ δ’ ἥμισυ μέλαν, πότερον λευκὸν ἢ μέλαν;

Οἱ δὲ παρὰ τὸ μὴ διωρίσθαι τί ἐστι συλλογισμὸς ἢ τί ἔλεγχος ἄλλως παρὰ τὴν ἔλλειψιν γίνονται τοῦ λόγου· ἔλεγχος μὲν γάρ ἐστιν ἀντίφασις τοῦ αὐτοῦ καὶ ἑνός, μὴ ὀνόματος ἀλλὰ πράγματος, καὶ ὀνόματος μὴ συνωνύμου ἀλλὰ τοῦ αὐτοῦ, ἐκ τῶν δοθέντων ἐξ ἀνάγκης (μὴ συναριθμουμένου τοῦ ἐν ἀρχῇ), κατὰ ταὐτὸ καὶ πρὸς ταὐτὸ καὶ ὡσαύτως καὶ ἐν τῷ αὐτῷ χρόνῳ. τὸν αὐτὸν δὲ τρόπον καὶ τὸ ψεύσασθαι περί τινος. ἔνιοι δὲ ἀπολιπόντες τι τῶν λεχθέντων φαίνονται ἐλέγχειν, οἷον ὅτι ταὐτὸ διπλάσιον καὶ οὐ διπλάσιον· τὰ γὰρ δύο τοῦ μὲν ἑνὸς διπλάσια, τῶν δὲ τριῶν οὐ διπλάσια. ἢ εἰ τὸ αὐτὸ τοῦ αὐτοῦ διπλάσιον καὶ οὐ διπλάσιον, ἀλλ’ οὐ κατὰ ταὐτό· κατὰ μὲν γὰρ τὸ μῆκος διπλάσιον, κατὰ δὲ τὸ πλάτος οὐ διπλάσιον. ἢ εἰ τοῦ αὐτοῦ καὶ κατὰ ταὐτὸ καὶ ὡσαύτως, ἀλλ’ οὐχ ἅμα· διόπερ ἐστὶ φαινόμενος ἔλεγχος. ἕλκοι δ’ ἄν τις τοῦτον καὶ εἰς τοὺς παρὰ τὴν λέξιν.

Οἱ δὲ παρὰ τὸ τὸ ἐν ἀρχῇ λαμβάνειν γίνονται μὲν οὕτως καὶ τοσαυταχῶς ὁσαχῶς ἐνδέχεται τὸ ἐξ ἀρχῆς αἰτεῖσθαι, φαίνονται δ’ ἐλέγχειν διὰ τὸ μὴ δύνασθαι συνορᾶν τὸ ταὐτὸν καὶ τὸ ἕτερον.

Ὁ δὲ παρὰ τὸ ἑπόμενον ἔλεγχος διὰ τὸ οἴεσθαι ἀντιστρέφειν τὴν ἀκολούθησιν· ὅταν γὰρ τοῦδε ὄντος ἐξ ἀνάγκης τόδε ᾖ, καὶ τοῦδε ὄντος οἴονται καὶ θάτερον εἶναι ἐξ ἀνάγκης. ὅθεν καὶ αἱ περὶ τὴν δόξαν ἐκ τῆς αἰσθήσεως ἀπάται γίνονται· πολλάκις γὰρ τὴν χολὴν μέλι ὑπέλαβον διὰ τὸ ἕπεσθαι τὸ ξανθὸν χρῶμα τῷ μέλιτι· καὶ ἐπεὶ συμβαίνει τὴν γῆν ὕσαντος γίνεσθαι διάβροχον, κἂν ᾖ διάβροχος, ὑπολαμβάνομεν ὗσαι. τὸ δ’ οὐκ ἀναγκαῖον. ἔν τε τοῖς ῥητορικοῖς αἱ κατὰ τὸ σημεῖον ἀποδείξεις ἐκ τῶν ἑπομένων εἰσίν· βουλόμενοι γὰρ δεῖξαι ὅτι μοιχός, τὸ ἑπόμενον ἔλαβον, ὅτι καλλωπιστὴς ἢ ὅτι νύκτωρ ὁρᾶται πλανώμενος. πολλοῖς δὲ ταῦτα μὲν ὑπάρχει, τὸ δὲ κατηγορούμενον οὐχ ὑπάρχει. ὁμοίως δὲ καὶ ἐν τοῖς συλλογιστικοῖς, οἷον ὁ Μελίσσου λόγος ὅτι ἄπειρον τὸ ἅπαν, λαβὼν τὸ μὲν ἅπαν ἀγένητον (ἐκ γὰρ μὴ ὄντος οὐδὲν ἂν γενέσθαι), τὸ δὲ γενόμενον ἐξ ἀρχῆς γενέσθαι· εἰ μὴ οὖν γέγονεν, ἀρχὴν οὐκ ἔχειν τὸ πᾶν, ὥστ' ἄπειρον. οὐκ ἀνάγκη δὲ τοῦτο συμβαίνειν· οὐ γὰρ εἰ τὸ γενόμενον ἅπαν ἀρχὴν ἔχει, καὶ εἴ τι ἀρχὴν ἔχει, γέγονεν, ὥσπερ οὐδ' εἰ ὁ πυρέττων θερμός, καὶ τὸν θερμὸν ἀνάγκη πυρέττειν.

Ὁ δὲ παρὰ τὸ ‹τὸ› μὴ αἴτιον ὡς αἴτιον, ὅταν προσληφθῇ τὸ ἀναίτιον ὡς παρ' ἐκεῖνο γινομένου τοῦ ἐλέγχου. συμβαίνει δὲ τὸ τοιοῦτον ἐν τοῖς εἰς τὸ ἀδύνατον συλλογισμοῖς· ἐν τούτοις γὰρ ἀναγκαῖον ἀναιρεῖν τι τῶν κειμένων. ἐὰν οὖν ἐγκαταριθμηθῇ ‹τι› ἐν τοῖς ἀναγκαίοις ἐρωτήμασι πρὸς τὸ συμβαῖνον ἀδύνατον, δόξει παρὰ τοῦτο γίνεσθαι πολλάκις ὁ ἔλεγχος, οἷον ὅτι οὐκ ἔστι ψυχὴ καὶ ζωὴ ταὐτόν. εἰ γὰρ φθορᾷ γένεσις ἐναντίον, καὶ τῇ τινὶ φθορᾷ ἔσται τὶς γένεσις· ὁ δὲ θάνατος φθορά τις καὶ ἐναντίον ζωῇ, ὥστε γένεσις ἡ ζωὴ καὶ τὸ ζῆν γίνεσθαι· τοῦτο δ' ἀδύνατον· οὐκ ἄρα ταὐτὸν ἡ ψυχὴ καὶ ἡ ζωή. οὐ δὴ συλλελόγισται· συμβαίνει γάρ, κἂν μή τις ταὐτὸ φῇ τὴν ζωὴν τῇ ψυχῇ, τὸ ἀδύνατον, ἀλλὰ μόνον ἐναντίον ζωὴν μὲν θανάτῳ, ὄντι φθορᾷ, φθορᾷ δὲ γένεσιν. ἀσυλλόγιστοι μὲν οὖν ἁπλῶς οὐκ εἰσὶν οἱ τοιοῦτοι λόγοι, πρὸς δὲ τὸ προκείμενον ἀσυλλόγιστοι. καὶ λανθάνει πολλάκις οὐχ ἧττον αὐτοὺς τοὺς ἐρωτῶντας τὸ τοιοῦτον.

Οἱ μὲν οὖν παρὰ τὸ ἑπόμενον καὶ παρὰ τὸ μὴ αἴτιον λόγοι τοιοῦτοί εἰσιν· οἱ δὲ παρὰ τὸ τὰ δύο ἐρωτήματα ἓν ποιεῖν, ὅταν λανθάνῃ πλείω ὄντα καὶ ὡς ἑνὸς ὄντος ἀποδοθῇ ἀπόκρισις μία. ἐπ' ἐνίων μὲν οὖν ῥᾴδιον ἰδεῖν ὅτι πλείω καὶ ὅτι οὐ δοτέον μίαν ἀπόκρισιν, οἷον "πότερον ἡ γῆ θάλαττά ἐστιν ἢ ὁ οὐρανός;" ἐπ' ἐνίων δ' ἧττον, καὶ ὡς ἑνὸς ὄντος ἢ ὁμολογοῦσι τῷ μὴ ἀποκρίνεσθαι τὸ ἐρωτώμενον ἢ ἐλέγχεσθαι φαίνονται. οἷον ἆρ' οὗτος καὶ οὗτός ἐστιν ἄνθρωπος; ὥστ' ἄν τις τύπτῃ τοῦτον καὶ τοῦτον, ἄνθρωπον ἀλλ' οὐκ ἀνθρώπους τυπτήσει. ἢ πάλιν, ὧν τὰ μέν ἐστιν ἀγαθὰ τὰ δ' οὐκ ἀγαθά, πάντα ἀγαθὰ ἢ οὐκ ἀγαθά; ὁπότερον γὰρ ἂν φῇ, ἔστι μὲν ὡς ἔλεγχον ἢ ψεῦδος φαινόμενον δόξειεν ἂν ποιεῖν· τὸ γὰρ φάναι τῶν μὴ ἀγαθῶν τι εἶναι ἀγαθὸν ἢ τῶν ἀγαθῶν μὴ ἀγαθὸν ψεῦδος. ὁτὲ δὲ προσληφθέντων τινῶν κἂν ἔλεγχος γίνοιτο ἀληθινός, οἷον εἴ τις δοίη ὁμοίως ἓν καὶ πολλὰ λέγεσθαι λευκὰ καὶ γυμνὰ καὶ τυφλά. εἰ γὰρ τυφλὸν τὸ μὴ ἔχον ὄψιν πεφυκὸς δ' ἔχειν, καὶ τυφλὰ ἔσται τὰ μὴ ἔχοντα ὄψιν πεφυκότα δ' ἔχειν. ὅταν οὖν τὸ μὲν ἔχῃ τὸ δὲ μὴ ἔχῃ, τὰ ἄμφω ἔσται ἢ ὁρῶντα ἢ τυφλά· ὅπερ ἀδύνατον.

Ἢ δὴ οὕτως διαιρετέον τοὺς φαινομένους συλλογισμοὺς καὶ ἐλέγχους, ἢ πάντας ἀνακτέον εἰς τὴν τοῦ ἐλέγχου ἄγνοιαν, ἀρχὴν ταύτην ποιησαμένους· ἔστι γὰρ ἅπαντας ἀναλῦσαι τοὺς λεχθέντας τρόπους εἰς τὸν τοῦ ἐλέγχου διορισμόν. πρῶτον μὲν εἰ ἀσυλλόγιστοι· δεῖ γὰρ ἐκ τῶν κειμένων συμβαίνειν τὸ συμπέρασμα ὥστε λέγειν ἐξ ἀνάγκης ἀλλὰ μὴ φαίνεσθαι. ἔπειτα καὶ κατὰ τὰ μέρη τοῦ διορισμοῦ. τῶν μὲν γὰρ ἐν τῇ λέξει οἱ μέν εἰσι παρὰ τὸ διττόν, οἷον ἥ τε ὁμωνυμία καὶ ὁ λόγος καὶ ἡ ὁμοιοσχημοσύνη (σύνηθες γὰρ τὸ πάντα ὡς τόδε τι σημαίνειν), ἡ δὲ σύνθεσις καὶ διαίρεσις καὶ προσῳδία τῷ μὴ τὸν αὐτὸν εἶναι τὸν λόγον ἢ τὸ ὄνομα τὸ διαφέρον. ἔδει δὲ καὶ τοῦτο, καθάπερ καὶ τὸ πρᾶγμα ταὐτόν, εἰ μέλλει ἔλεγχος ἢ συλλογισμὸς ἔσεσθαι, οἷον εἰ λώπιον, μὴ ἱμάτιον συλλογίσασθαι ἀλλὰ λώπιον. ἀληθὲς μὲν γὰρ κἀκεῖνο, ἀλλ’ οὐ συλλελόγισται, ἀλλ’ ἔτι ἐρωτήματος δεῖ εἰ ταὐτὸν σημαίνει, πρὸς τὸν ζητοῦντα τὸ διὰ τί.

Οἱ δὲ παρὰ τὸ συμβεβηκὸς ὁρισθέντος τοῦ συλλογισμοῦ φανεροὶ γίνονται. τὸν αὐτὸν γὰρ ὁρισμὸν δεῖ καὶ τοῦ ἐλέγχου γίνεσθαι, πλὴν προσκεῖσθαι τὴν ἀντίφασιν· ὁ γὰρ ἔλεγχος συλλογισμὸς ἀντιφάσεως. εἰ οὖν μὴ ἔστι συλλογισμὸς τοῦ συμβεβηκότος, οὐ γίνεται ἔλεγχος. οὐ γὰρ εἰ τούτων ὄντων ἀνάγκη τόδ’ εἶναι (τοῦτο δ’ ἐστὶ λευκόν), ἀνάγκη λευκὸν εἶναι διὰ τὸν συλλογισμόν. οὐδ’ εἰ τὸ τρίγωνον δυοῖν ὀρθαῖν ἴσας ἔχει, συμβέβηκε δ’ αὐτῷ σχήματι εἶναι ἢ πρώτῳ ἢ ἀρχῇ, ὅτι σχῆμα ἢ ἀρχὴ ἢ πρῶτον τοῦτό ἐστιν· οὐ γὰρ ᾗ σχῆμα οὐδ’ ᾗ πρῶτον ἀλλ’ ᾗ τρίγωνον ἡ ἀπόδειξις. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὥστ’ εἰ ὁ ἔλεγχος συλλογισμός τις, οὐκ ἂν εἴη ὁ κατὰ συμβεβηκὸς ἔλεγχος. ἀλλὰ παρὰ τοῦτο καὶ οἱ τεχνῖται καὶ ὅλως οἱ ἐπιστήμονες ὑπὸ τῶν ἀνεπιστημόνων ἐλέγχονται· κατὰ συμβεβηκὸς γὰρ ποιοῦνται τοὺς συλλογισμοὺς πρὸς τοὺς εἰδότας· οἱ δ’ οὐ δυνάμενοι διαιρεῖν ἢ ἐρωτώμενοι διδόασιν ἢ οὐ δόντες οἴονται δεδωκέναι.

Οἱ δὲ παρὰ τὸ πῇ καὶ ἁπλῶς, ὅτι οὐ τοῦ αὐτοῦ ἡ κατάφασις καὶ ἡ ἀπόφασις. τοῦ γὰρ πῇ λευκοῦ τὸ πῇ οὐ λευκόν, τοῦ δ’ ἁπλῶς λευκοῦ τὸ ἁπλῶς οὐ λευκὸν ἀπόφασις· εἰ οὖν δόντος πῇ εἶναι λευκὸν ὡς ἁπλῶς εἰρημένου λαμβάνει, οὐ ποιεῖ ἔλεγχον, φαίνεται δὲ διὰ τὴν ἄγνοιαν τοῦ τί ἐστιν ἔλεγχος.

Φανερώτατοι δὲ πάντων οἱ πρότερον λεχθέντες παρὰ τὸν τοῦ ἐλέγχου διορισμόν· διὸ καὶ προσηγορεύθησαν οὕτως· παρὰ γὰρ τοῦ λόγου τὴν ἔλλειψιν ἡ φαντασία γίνεται, καὶ διαιρουμένοις οὕτως κοινὸν ἐπὶ πᾶσι τούτοις θετέον τὴν τοῦ λόγου ἔλλειψιν.

Οἱ δὲ παρὰ τὸ λαμβάνειν τὸ ἐν ἀρχῇ καὶ τὸ ἀναίτιον ὡς αἴτιον τιθέναι δῆλοι διὰ τοῦ ὁρισμοῦ. δεῖ γὰρ τὸ συμπέρασμα “τῷ ταῦτ’ εἶναι” συμβαίνειν, ὅπερ οὐκ ἦν ἐν τοῖς ἀναιτίοις· καὶ πάλιν “μὴ ἐναριθμουμένου τοῦ ἐξ ἀρχῆς”, ὅπερ οὐκ ἔχουσιν οἱ παρὰ τὴν αἴτησιν τοῦ ἐν ἀρχῇ.

Οἱ δὲ παρὰ τὸ ἑπόμενον μέρος εἰσὶ τοῦ συμβεβηκότος· τὸ γὰρ ἑπόμενον συμβέβηκε. διαφέρει δὲ τοῦ συμβεβηκότος, ὅτι τὸ μὲν συμβεβηκὸς ἔστιν ἐφ’ ἑνὸς μόνου λαβεῖν, οἷον ταὐτὸ εἶναι τὸ ξανθὸν καὶ μέλι, καὶ τὸ λευκὸν καὶ κύκνον, τὸ δὲ παρὰ τὸ ἑπόμενον ἀεὶ ἐν πλείοσιν· τὰ γὰρ ἑνὶ καὶ ταὐτῷ ταὐτὰ καὶ ἀλλήλοις ἀξιοῦμεν εἶναι ταὐτά· διὸ γίνεται παρὰ τὸ ἑπόμενον ἔλεγχος. ἔστι δ’ οὐ πάντως ἀληθές, οἷον ἂν ᾖ κατὰ συμβεβηκός· καὶ γὰρ ἡ χιὼν καὶ ὁ κύκνος τῷ λευκῷ ταὐτόν. ἢ πάλιν, ὡς ἐν τῷ Μελίσσου λόγῳ, τὸ αὐτὸ εἶναι λαμβάνει τὸ γεγονέναι καὶ ἀρχὴν ἔχειν, ἢ τὸ ἴσοις γίνεσθαι καὶ ταὐτὸ μέγεθος λαμβάνειν. ὅτι γὰρ τὸ γεγονὸς ἔχει ἀρχήν, καὶ τὸ ἔχον ἀρχὴν γεγονέναι ἀξιοῖ, ὡς ἄμφω ταὐτὰ ὄντα τῷ ἀρχὴν ἔχειν, τό τε γεγονὸς καὶ τὸ πεπερασμένον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἴσων γινομένων, εἰ τὰ τὸ αὐτὸ μέγεθος καὶ ἓν λαμβάνοντα ἴσα γίνεται, καὶ τὰ ἴσα γινόμενα ἓν μέγεθος λαμβάνειν. ὥστε τὸ ἑπόμενον λαμβάνει. ἐπεὶ οὖν ὁ παρὰ τὸ συμβεβηκὸς ἔλεγχος ἐν τῇ ἀγνοίᾳ τοῦ ἐλέγχου, φανερὸν ὅτι καὶ ὁ παρὰ τὸ ἑπόμενον. ἐπισκεπτέον δὲ τοῦτο καὶ ἄλλως.

Οἱ δὲ παρὰ τὸ τὰ πλείω ἐρωτήματα ἓν ποιεῖν ἐν τῷ μὴ διαρθροῦν ἡμᾶς τὸν τῆς προτάσεως λόγον. ἡ γὰρ πρότασίς ἐστιν ἓν καθ’ ἑνός· ὁ γὰρ αὐτὸς ὅρος ἑνὸς μόνου καὶ ἁπλῶς τοῦ πράγματος, οἷον ἀνθρώπου καὶ ἑνὸς μόνου ἀνθρώπου· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. εἰ οὖν μία πρότασις ἡ ἓν καθ’ ἑνὸς ἀξιοῦσα, καὶ ἁπλῶς ἔσται πρότασις ἡ τοιαύτη ἐρώτησις. ἐπεὶ δ’ ὁ συλλογισμὸς ἐκ προτάσεων, ὁ δ’ ἔλεγχος συλλογισμός, καὶ ὁ ἔλεγχος ἔσται ἐκ προτάσεων. εἰ οὖν ἡ πρότασις ἓν καθ’ ἑνός, φανερὸν ὅτι καὶ οὗτος ἐν τῇ τοῦ ἐλέγχου ἀγνοίᾳ· φαίνεται γὰρ εἶναι πρότασις ἡ οὐκ οὖσα πρότασις. εἰ μὲν οὖν δέδωκεν ἀπόκρισιν ὡς πρὸς μίαν ἐρώτησιν, ἔσται ἔλεγχος· εἰ δὲ μὴ δέδωκεν ἀλλὰ φαίνεται, φαινόμενος ἔλεγχος. ὥστε πάντες οἱ τόποι πίπτουσιν εἰς τὴν τοῦ ἐλέγχου ἄγνοιαν, οἱ μὲν οὖν παρὰ τὴν λέξιν, ὅτι φαινομένη ‹ἡ› ἀντίφασις, ὅπερ ἦν ἴδιον τοῦ ἐλέγχου, οἱ δ’ ἄλλοι παρὰ τὸν τοῦ συλλογισμοῦ ὅρον.

Ἡ δ’ ἀπάτη γίνεται τῶν μὲν παρὰ τὴν ὁμωνυμίαν καὶ τὸν λόγον τῷ μὴ δύνασθαι διαιρεῖν τὸ πολλαχῶς λεγόμενον (ἔνια γὰρ οὐκ εὔπορον διελεῖν, οἷον τὸ ἓν καὶ τὸ ὂν καὶ τὸ ταὐτόν), τῶν δὲ παρὰ σύνθεσιν καὶ διαίρεσιν τῷ μηδὲν οἴεσθαι διαφέρειν συντιθέμενον ἢ διαιρούμενον τὸν λόγον, καθάπερ ἐπὶ τῶν πλείστων. ὁμοίως δὲ καὶ τῶν παρὰ τὴν προσῳδίαν· οὐ γὰρ ἄλλο δοκεῖ σημαίνειν ἀνιέμενος καὶ ἐπιτεινόμενος ὁ λόγος, ἐπ’ οὐδενὸς ἢ οὐκ ἐπὶ πολλῶν. τῶν δὲ παρὰ τὸ σχῆμα διὰ τὴν ὁμοιότητα τῆς λέξεως. χαλεπὸν γὰρ διελεῖν ποῖα ὡσαύτως καὶ ποῖα ὡς ἑτέρως λέγεται (σχεδὸν γὰρ ὁ τοῦτο δυνάμενος ποιεῖν ἐγγύς ἐστι τοῦ θεωρεῖν τἀληθές, μάλιστα δ’ ἐπίσταται συνεπινεύειν), ὅτι πᾶν τὸ κατηγορούμενόν τινος ὑπολαμβάνομεν τόδε τι, καὶ ὡς ἓν ὑπακούομεν· τῷ γὰρ ἑνὶ καὶ τῇ οὐσίᾳ μάλιστα δοκεῖ παρέπεσθαι τὸ τόδε τι καὶ τὸ ὄν. διὸ καὶ τῶν παρὰ τὴν λέξιν οὗτος ὁ τρόπος θετέος, πρῶτον μὲν ὅτι μᾶλλον ἡ ἀπάτη γίνεται μετ’ ἄλλων σκοπουμένοις ἢ καθ’ αὐτούς (ἡ μὲν γὰρ μετ’ ἄλλου σκέψις διὰ λόγων, ἡ δὲ καθ’ αὐτὸν οὐχ ἧττον δι’ αὐτοῦ τοῦ πράγματος)· εἶτα καὶ καθ’ αὐτὸν ἀπατᾶσθαι συμβαίνει, ὅταν ἐπὶ τοῦ λόγου ποιῆται τὴν σκέψιν· ἔτι ἡ μὲν ἀπάτη ἐκ τῆς ὁμοιότητος, ἡ δ’ ὁμοιότης ἐκ τῆς λέξεως. τῶν δὲ παρὰ τὸ συμβεβηκὸς διὰ τὸ μὴ δύνασθαι διακρίνειν τὸ ταὐτὸν καὶ τὸ ἕτερον, καὶ ἓν καὶ πολλά, μηδὲ τοῖς ποίοις τῶν κατηγορημάτων πάντα ταὐτὰ καὶ τῷ πράγματι συμβέβηκεν. ὁμοίως δὲ καὶ τῶν παρὰ τὸ ἑπόμενον· μέρος γάρ τι τοῦ συμβεβηκότος τὸ ἑπόμενον. ἔτι καὶ ἐπὶ πολλῶν φαίνεται καὶ ἀξιοῦται οὕτως, εἰ τόδε ἀπὸ τοῦδε μὴ χωρίζεται, μηδ’ ἀπὸ θατέρου χωρίζεσθαι θάτερον. τῶν δὲ παρὰ τὴν ἔλλειψιν τοῦ λόγου καὶ τῶν παρὰ τὸ πῇ καὶ ἁπλῶς ἐν τῷ παρὰ μικρὸν ἡ ἀπάτη· ὡς γὰρ οὐδὲν προσσημαῖνον τὸ τὶ ἢ πῇ ἢ τὸ πὼς ἢ τὸ νῦν καθόλου συγχωροῦμεν. ὁμοίως δὲ καὶ ἐπὶ τῶν τὸ ἐν ἀρχῇ λαμβανόντων καὶ τῶν ἀναιτίων καὶ ὅσοι τὰ πλείω ἐρωτήματα ὡς ἓν ποιοῦσιν· ἐν ἅπασι γὰρ ἡ ἀπάτη διὰ τὸ παρὰ μικρόν· οὐ γὰρ διακριβοῦμεν οὔτε τῆς προτάσεως οὔτε τοῦ συλλογισμοῦ τὸν ὅρον διὰ τὴν εἰρημένην αἰτίαν.

Ἐπεὶ δ’ ἔχομεν παρ’ ὁπόσα γίνονται οἱ φαινόμενοι συλλογισμοί, ἔχομεν καὶ παρ’ ὁπόσα οἱ σοφιστικοὶ γένοιντ’ ἂν συλλογισμοὶ καὶ ἔλεγχοι. λέγω δὲ σοφιστικὸν ἔλεγχον καὶ συλλογισμὸν οὐ μόνον τὸν φαινόμενον συλλογισμὸν ἢ ἔλεγχον μὴ ὄντα δέ, ἀλλὰ καὶ τὸν ὄντα μὲν φαινόμενον δὲ οἰκεῖον τοῦ πράγματος. εἰσὶ δ’ οὗτοι οἱ μὴ κατὰ τὸ πρᾶγμα ἐλέγχοντες καὶ δεικνύντες ἀγνοοῦντας, ὅπερ ἦν τῆς πειραστικῆς. ἔστι δ’ ἡ πειραστικὴ μέρος τῆς διαλεκτικῆς· αὕτη δὲ δύναται συλλογίζεσθαι ψεῦδος δι’ ἄγνοιαν τοῦ διδόντος τὸν λόγον. οἱ δὲ σοφιστικοὶ ἔλεγχοι, ἂν καὶ συλλογίζωνται τὴν ἀντίφασιν, οὐ ποιοῦσι δῆλον εἰ ἀγνοεῖ· καὶ γὰρ τὸν εἰδότα ἐμποδίζουσι τούτοις τοῖς λόγοις.

Ὅτι δ’ ἔχομεν αὐτοὺς τῇ αὐτῇ μεθόδῳ, δῆλον· παρ’ ὅσα γὰρ φαίνεται τοῖς ἀκούουσιν ὡς ἠρωτημένα συλλελογίσθαι, παρὰ τοσαῦτα κἂν τῷ ἀποκρινομένῳ δόξειεν, ὥστ’ ἔσονται συλλογισμοὶ ψευδεῖς διὰ τούτων ἢ πάντων ἢ ἐνίων· ὃ γὰρ μὴ ἐρωτηθεὶς οἴεται δεδωκέναι, κἂν ἐρωτηθεὶς θείη.

πλὴν ἐπί γέ τινων ἅμα συμβαίνει προσερωτᾶν τὸ ἐνδεὲς καὶ τὸ ψεῦδος ἐμφανίζειν, οἷον ἐν τοῖς παρὰ τὴν λέξιν καὶ τὸν σολοικισμόν. εἰ οὖν οἱ παραλογισμοὶ τῆς ἀντιφάσεως παρὰ τὸν φαινόμενον ἔλεγχόν εἰσι, δῆλον ὅτι παρὰ τοσαῦτα ἂν καὶ τῶν ψευδῶν εἴησαν συλλογισμοὶ παρ’ ὅσα καὶ ὁ φαινόμενος ἔλεγχος. ὁ δὲ φαινόμενος παρὰ τὰ μόρια τοῦ ἀληθινοῦ· ἑκάστου γὰρ ἐκλείποντος φανείη ἂν ἔλεγχος, οἷον ὁ παρὰ τὸ μὴ συμβαῖνον διὰ τὸν λόγον (ὁ εἰς τὸ ἀδύνατον), καὶ ὁ τὰς δύο ἐρωτήσεις μίαν ποιῶν παρὰ τὴν πρότασιν, καὶ ἀντὶ τοῦ καθ’ αὑτὸ ὁ παρὰ τὸ συμβεβηκός, καὶ τὸ τούτου μόριον, ὁ παρὰ τὸ ἑπόμενον· ἔτι τὸ μὴ ἐπὶ τοῦ πράγματος ἀλλ’ ἐπὶ τοῦ λόγου συμβαίνειν· εἶτ’, ἀντὶ τοῦ καθόλου τὴν ἀντίφασιν καὶ κατὰ ταὐτὸ καὶ πρὸς ταὐτὸ καὶ ὡσαύτως, παρὰ τὸ ἐπί τι, ἢ παρ’ ἕκαστον τούτων· ἔτι παρὰ τὸ “μὴ ἐναριθμουμένου τοῦ ἐν ἀρχῇ” ‹τὸ› τὸ ἐν ἀρχῇ λαμβάνειν. ὥστ’ ἔχοιμεν ἂν παρ’ ὅσα γίνονται οἱ παραλογισμοί· παρὰ πλείω μὲν γὰρ οὐκ ἂν εἶεν, παρὰ δὲ τὰ εἰρημένα ἔσονται πάντες.

Ἔστι δ’ ὁ σοφιστικὸς ἔλεγχος οὐχ ἁπλῶς ἔλεγχος ἀλλὰ πρός τινα· καὶ ὁ συλλογισμὸς ὡσαύτως. ἂν μὲν γὰρ μὴ λάβῃ ὅ τε παρὰ τὸ ὁμώνυμον ἓν σημαίνειν καὶ ὁ παρὰ τὴν ὁμοιοσχημοσύνην τὸ μόνον τόδε, καὶ οἱ ἄλλοι ὡσαύτως, οὔτ’ ἔλεγχοι οὔτε συλλογισμοὶ ἔσονται, οὔθ’ ἁπλῶς οὔτε πρὸς τὸν ἐρωτώμενον. ἐὰν δὲ λάβωσι, πρὸς μὲν τὸν ἐρωτώμενον ἔσονται, ἁπλῶς δ’ οὐκ ἔσονται· οὐ γὰρ ἓν σημαῖνον εἰλήφασιν ἀλλὰ φαινόμενον, καὶ παρὰ τοῦδε.

Παρὰ πόσα δ’ ἐλέγχονται οἱ ἐλεγχόμενοι, οὐ δεῖ πειρᾶσθαι λαμβάνειν ἄνευ τῆς τῶν ὄντων ἐπιστήμης ἁπάντων. τοῦτο δ’ οὐ μιᾶς ἔστι τέχνης· ἄπειροι γὰρ ἴσως αἱ ἐπιστῆμαι, ὥστε δῆλον ὅτι καὶ αἱ ἀποδείξεις. ἔλεγχοι δ’ εἰσὶ καὶ ἀληθεῖς· ὅσα γὰρ ἔστιν ἀποδεῖξαι, ἔστι καὶ ἐλέγξαι τὸν θέμενον τὴν ἀντίφασιν τοῦ ἀληθοῦς· οἷον εἰ σύμμετρον τὴν διάμετρον ἔθηκεν, ἐλέγξειεν ἄν τις τῇ ἀποδείξει ὅτι ἀσύμμετρος. ὥστε πάντων δεήσει ἐπιστήμονας εἶναι· οἱ μὲν γὰρ ἔσονται παρὰ τὰς ἐν γεωμετρίᾳ ἀρχὰς καὶ τὰ τούτων συμπεράσματα, οἱ δὲ παρὰ τὰς ἐν ἰατρικῇ, οἱ δὲ παρὰ τὰς τῶν ἄλλων ἐπιστημῶν. ἀλλὰ μὴν καὶ οἱ ψευδεῖς ἔλεγχοι ὁμοίως ἂν εἶεν ἐν ἀπείροις· καθ’ ἑκάστην γὰρ τέχνην ἔστι ψευδὴς συλλογισμός, οἷον κατὰ γεωμετρίαν ὁ γεωμετρικὸς καὶ κατὰ ἰατρικὴν ὁ ἰατρικός· λέγω δὲ τὸ κατὰ τὴν τέχνην τὸ κατὰ τὰς ἐκείνης ἀρχάς. δῆλον οὖν ὅτι οὐ πάντων τῶν ἐλέγχων ἀλλὰ τῶν παρὰ τὴν διαλεκτικὴν ληπτέον τοὺς τόπους· οὗτοι γὰρ κοινοὶ πρὸς ἅπασαν τέχνην καὶ δύναμιν. καὶ τὸν μὲν καθ’ ἑκάστην ἐπιστήμην ἔλεγχον τοῦ ἐπιστήμονός ἐστι θεωρεῖν, εἴ τε μὴ ὢν φαίνεται, εἴ τ’ ἔστι, διὰ τί ἔστι· τὸν δ’ ἐκ τῶν κοινῶν καὶ ὑπὸ μηδεμίαν τέχνην τῶν διαλεκτικῶν. εἰ γὰρ ἔχομεν ἐξ ὧν οἱ ἔνδοξοι συλλογισμοὶ περὶ ὁτιοῦν, ἔχομεν ἐξ ὧν οἱ ἔλεγχοι· ὁ γὰρ ἔλεγχός ἐστιν ἀντιφάσεως συλλογισμός, ὥστ’ ἢ εἷς ἢ δύο συλλογισμοὶ ἀντιφάσεως ἔλεγχός ἐστιν. ἔχομεν ἄρα παρ’ ὁπόσα πάντες εἰσὶν οἱ τοιοῦτοι. εἰ δὲ τοῦτ’ ἔχομεν, καὶ τὰς λύσεις ἔχομεν· αἱ γὰρ τούτων ἐνστάσεις λύσεις εἰσίν. ἔχομεν δέ, παρ’ ὁπόσα γίνονται, καὶ τοὺς φαινομένους, φαινομένους δὲ οὐχ ὁτῳοῦν ἀλλὰ τοῖς τοιοῖσδε· ἀόριστα γάρ ἐστιν ἐάν τις σκοπῇ παρ’ ὁπόσα φαίνονται τοῖς τυχοῦσιν. ὥστε φανερὸν ὅτι τοῦ διαλεκτικοῦ ἐστι τὸ δύνασθαι λαβεῖν παρ’ ὅσα γίνεται διὰ τῶν κοινῶν ἢ ὢν ἔλεγχος ἢ φαινόμενος ἔλεγχος, καὶ ἢ διαλεκτικὸς ἢ φαινόμενος διαλεκτικὸς ἢ πειραστικός.

Οὐκ ἔστι δὲ διαφορὰ τῶν λόγων ἣν λέγουσί τινες, τὸ εἶναι τοὺς μὲν πρὸς τοὔνομα λόγους, ἑτέρους δὲ πρὸς τὴν διάνοιαν· ἄτοπον γὰρ τὸ ὑπολαμβάνειν ἄλλους μὲν εἶναι πρὸς τοὔνομα λόγους, ἑτέρους δὲ πρὸς τὴν διάνοιαν, ἀλλ’ οὐ τοὺς αὐτούς. τί γάρ ἐστι τὸ μὴ πρὸς τὴν διάνοιαν ἀλλ’ ἢ ὅταν μὴ χρῆται τῷ ὀνόματι ἐφ’ ᾧ οἰόμενος ἐρωτᾶσθαι ὁ ἐρωτώμενος ἔδωκεν; τὸ δ’ αὐτὸ τοῦτό ἐστι καὶ πρὸς τοὔνομα· τὸ δὲ πρὸς τὴν διάνοιαν, ὅταν ἐφ’ ᾧ ἔδωκεν διανοηθείς. εἰ δή τινες πλείω σημαίνοντος τοῦ ὀνόματος οἴοιντο ἓν σημαίνειν - καὶ ὁ ἐρωτῶν καὶ ὁ ἐρωτώμενος (οἷον ἴσως τὸ ὂν ἢ τὸ ἓν πολλὰ σημαίνει, ἀλλὰ καὶ ὁ ἀποκρινόμενος καὶ ὁ ἐρωτῶν [Ζήνων] ἓν οἰόμενοι εἶναι εἰρήκασι, καὶ ἔστιν ὁ λόγος ὅτι ἓν πάντα), ‹ἆρ’› οὗτος πρὸς τοὔνομα ἔσται ἢ πρὸς τὴν διάνοιαν τοῦ ἐρωτωμένου διειλεγμένος; εἰ δέ γέ τις πολλὰ οἴεται σημαίνειν, δῆλον ὅτι οὐ πρὸς τὴν διάνοιαν. πρῶτον μὲν γὰρ περὶ τοὺς τοιούτους ἐστὶ λόγους τὸ πρὸς τοὔνομα καὶ πρὸς τὴν διάνοιαν ὅσοι πλείω σημαίνουσιν, εἶτα περὶ ὁντινοῦν ἐστιν· οὐ γὰρ ἐν τῷ λόγῳ ἐστὶ τὸ πρὸς τὴν διάνοιαν εἶναι, ἀλλ’ ἐν τῷ τὸν ἀποκρινόμενον ἔχειν πως πρὸς τὰ δεδομένα. εἶτα πρὸς τοὔνομα πάντας ἐνδέχεται αὐτοὺς εἶναι· τὸ γὰρ πρὸς τοὔνομα τὸ μὴ πρὸς τὴν διάνοιαν εἶναί ἐστιν ἐνταῦθα. εἰ γὰρ μὴ πάντες, ἔσονταί τινες ἕτεροι οὔτε πρὸς τοὔνομα οὔτε πρὸς τὴν διάνοιαν· οἱ δέ φασι πάντας, καὶ διαιροῦνται ἢ πρὸς τοὔνομα ἢ πρὸς τὴν διάνοιαν εἶναι πάντας, ἄλλους δ’ οὔ. ἀλλὰ μὴν ὅσοι συλλογισμοί εἰσι παρὰ τὸ πλεοναχῶς, τούτων εἰσί τινες οἱ παρὰ τοὔνομα. ἀτόπως μὲν γὰρ καὶ εἴρηται τὸ παρὰ τοὔνομα φάναι πάντας τοὺς παρὰ τὴν λέξιν· ἀλλ’ οὖν εἰσί τινες παραλογισμοὶ οὐ τῷ τὸν ἀποκρινόμενον πρὸς τούτους ἔχειν πως, ἀλλὰ τῷ τοιονδὶ ἐρώτημα τὸν λόγον αὐτὸν ἔχειν ὃ πλείω σημαίνει.

Ὅλως τε ἄτοπον τὸ περὶ ἐλέγχου διαλέγεσθαι ἀλλὰ μὴ πρότερον περὶ συλλογισμοῦ· ὁ γὰρ ἔλεγχος συλλογισμός ἐστιν, ὥστε χρὴ καὶ περὶ συλλογισμοῦ πρότερον ἢ περὶ ψευδοῦς ἐλέγχου· ἔστι γὰρ ὁ τοιοῦτος ἔλεγχος φαινόμενος συλλογισμὸς ἀντιφάσεως. διὸ ἢ ἐν τῷ συλλογισμῷ ἔσται τὸ αἴτιον ἢ ἐν τῇ ἀντιφάσει (προσκεῖσθαι γὰρ δεῖ τὴν ἀντίφασιν), ὁτὲ δ’ ἐν ἀμφοῖν, ἂν ᾖ φαινόμενος ἔλεγχος. ἔστι δὲ ὁ μὲν τοῦ “σιγῶντα λέγειν” ἐν τῇ ἀντιφάσει, οὐκ ἐν τῷ συλλογισμῷ, ὁ δὲ “ἃ μὴ ἔχοι τις, δοίη ἄν” ἐν ἀμφοῖν, ὁ δὲ ὅτι ἡ Ὁμήρου ποίησις σχῆμα διὰ τοῦ “κύκλος” ἐν τῷ συλλογισμῷ. ὁ δ’ ἐν μηδετέρῳ ἀληθὴς συλλογισμός.

Ἀλλὰ δή, ὅθεν ὁ λόγος ἦλθε, πότερον οἱ ἐν τοῖς μαθήμασι λόγοι πρὸς τὴν διάνοιάν εἰσιν ἢ οὔ; καὶ εἴ τινι δοκεῖ πολλὰ σημαίνειν τὸ τρίγωνον, καὶ ἔδωκε μὴ ὡς τοῦτο τὸ σχῆμα ἐφ’ οὗ συνεπεράνατο ὅτι δύο ὀρθαί, πότερον πρὸς τὴν διάνοιαν οὗτος διείλεκται τὴν ἐκείνου ἢ οὔ;

Ἔτι εἰ πολλὰ μὲν σημαίνει τοὔνομα, ὁ δὲ μὴ νοεῖ μηδ’ οἴεται, πῶς οὗτος οὐ πρὸς τὴν διάνοιαν διείλεκται; ἢ πῶς δεῖ ἐρωτᾶν πλὴν διδόντα διαίρεσιν, εἴ τ’ ἐρωτήσειέ τις εἰ ἔστι σιγῶντα λέγειν ἢ οὔ, ἢ ἔστι μὲν ὡς οὔ, ἔστι δ’ ὡς ναί, εἰ δή τις δοίη μηδαμῶς, ὁ δὲ διαλεχθείη, ἆρ’ οὐ πρὸς τὴν διάνοιαν διείλεκται; καίτοι ὁ λόγος δοκεῖ τῶν παρὰ τὸ ὄνομα εἶναι. οὐκ ἄρα ἐστὶ γένος τι λόγων τὸ πρὸς τὴν διάνοιαν. ἀλλ’ οἱ μὲν πρὸς τοὔνομά εἰσι· καίτοι οὗτοι οὐ πάντες, οὐχ ὅτι οἱ ἔλεγχοι ἀλλ’ οὐδ’ οἱ φαινόμενοι ἔλεγχοι. εἰσὶ γὰρ καὶ μὴ παρὰ τὴν λέξιν φαινόμενοι ἔλεγχοι, οἷον οἱ παρὰ τὸ συμβεβηκὸς καὶ ἕτεροι.

Εἰ δέ τις ἀξιοῖ διαιρεῖν, ὅτι “λέγω δὲ σιγῶντα λέγειν τὰ μὲν ὡδὶ τὰ δ’ ὡδί”, ἀλλὰ τοῦτό γ’ ἐστὶ πρῶτον μὲν ἄτοπον, τὸ ἀξιοῦν· ἐνίοτε γὰρ οὐ δοκεῖ τὸ ἐρωτώμενον πολλαχῶς ἔχειν, ἀδύνατον δὲ διαιρεῖν ὃ μὴ οἴεται. ἔπειτα τὸ διδάσκειν τί ἄλλο ἔσται; φανερὸν γὰρ ποιήσει ὡς ἔχει τῷ μήτ’ ἐσκεμμένῳ μήτ’ εἰδότι μήθ’ ὑπολαμβάνοντι ὅτι ἄλλως λέγεται· ἐπεὶ καὶ ἐν τοῖς διπλοῖς τί κωλύει τοῦτο παθεῖν; “ἆρα ἴσαι αἱ μονάδες ταῖς δυάσιν ἐν τοῖς τέτταρσιν; εἰσὶ δὲ [δυάδες] αἱ μὲν ὡδὶ ἐνοῦσαι αἱ δὲ ὡδί.” καὶ “ἆρα τῶν ἐναντίων μία ἐπιστήμη ἢ οὔ; ἔστι δ’ ἐναντία τὰ μὲν γνωστὰ τὰ δ’ ἄγνωστα”. ὥστ’ ἔοικεν ἀγνοεῖν ὁ τοῦτο ἀξιῶν ὅτι ἕτερον τὸ διδάσκειν τοῦ διαλέγεσθαι, καὶ ὅτι δεῖ τὸν μὲν διδάσκοντα μὴ ἐρωτᾶν ἀλλ’ αὐτὸν δῆλα ποιεῖν, τὸν δ’ ἐρωτᾶν.

Ἔτι τὸ φάναι ἢ ἀποφάναι ἀξιοῦν οὐ δεικνύντος ἐστὶν ἀλλὰ πεῖραν λαμβάνοντος· ἡ γὰρ πειραστική ἐστι διαλεκτική τις καὶ θεωρεῖ οὐ τὸν εἰδότα ἀλλὰ τὸν ἀγνοοῦντα καὶ προσποιούμενον. ὁ μὲν οὖν κατὰ τὸ πρᾶγμα θεωρῶν τὰ κοινὰ διαλεκτικός, ὁ δὲ τοῦτο φαινομένως ποιῶν σοφιστικός, καὶ συλλογισμὸς ἐριστικὸς καὶ σοφιστικός ἐστιν εἷς μὲν ὁ φαινόμενος συλλογιστικὸς περὶ ὧν ἡ διαλεκτικὴ πειραστική ἐστι, κἂν ἀληθὲς τὸ συμπέρασμα ᾖ (τοῦ γὰρ διὰ τί ἀπατητικός ἐστι), καὶ ὅσοι μὴ ὄντες κατὰ τὴν ἑκάστου μέθοδον παραλογισμοὶ δοκοῦσιν εἶναι κατὰ τὴν τέχνην. τὰ γὰρ ψευδογραφήματα οὐκ ἐριστικά (κατὰ γὰρ τὰ ὑπὸ τὴν τέχνην οἱ παραλογισμοί), οὐδέ γ’ εἴ τί ἐστι ψευδογράφημα περὶ ἀληθές, οἷον τὸ Ἱπποκράτους ἢ ὁ τετραγωνισμὸς ὁ διὰ τῶν μηνίσκων. ἀλλ’ ὡς Βρύσων ἐτετραγώνιζε τὸν κύκλον, εἰ καὶ τετραγωνίζεται ὁ κύκλος, ἀλλ’ ὅτι οὐ κατὰ τὸ πρᾶγμα, διὰ τοῦτο σοφιστικός. ὥστε ὅ τε περὶ τῶνδε φαινόμενος συλλογισμὸς ἐριστικὸς λόγος, καὶ ὁ κατὰ τὸ πρᾶγμα φαινόμενος συλλογισμός, κἂν ᾖ συλλογισμός, ἐριστικὸς λόγος· φαινόμενος γάρ ἐστι κατὰ τὸ πρᾶγμα, ὥστ’ ἀπατητικὸς καὶ ἄδικος. ὥσπερ γὰρ ἡ ἐν ἀγῶνι ἀδικία εἶδός τι ἔχει καὶ ἔστιν ἀδικομαχία τις, οὕτως ἐν ἀντιλογίᾳ ἀδικομαχία ἡ ἐριστική ἐστιν· ἐκεῖ τε γὰρ οἱ πάντως νικᾶν προαιρούμενοι πάντων ἅπτονται, καὶ ἐνταῦθα οἱ ἐριστικοί. οἱ μὲν οὖν τῆς νίκης αὐτῆς χάριν τοιοῦτοι ἐριστικοὶ ἄνθρωποι καὶ φιλέριδες δοκοῦσιν εἶναι, οἱ δὲ δόξης χάριν τῆς εἰς χρηματισμὸν σοφιστικοί· ἡ γὰρ σοφιστική ἐστιν, ὥσπερ εἴπομεν, χρηματιστική τις ἀπὸ σοφίας φαινομένης· διὸ φαινομένης ἀποδείξεως ἐφίενται, καὶ τῶν λόγων τῶν αὐτῶν μὲν [εἴσιν] οἱ φιλέριδες καὶ οἱ σοφισταί, ἀλλ’ οὐ τῶν αὐτῶν ἕνεκεν, καὶ λόγος ὁ αὐτὸς μὲν ἔσται σοφιστικὸς καὶ ἐριστικός, ἀλλ’ οὐ κατὰ ταὐτόν, ἀλλ’ ᾗ μὲν νίκης φαινομένης ‹ἕνεκα›, ἐριστικός, ᾗ δὲ σοφίας, σοφιστικός· καὶ γὰρ ἡ σοφιστική ἐστι φαινομένη σοφία τις ἀλλ’ οὐκ οὖσα. ὁ δ’ ἐριστικός ἐστί πως οὕτως ἔχων πρὸς τὸν διαλεκτικὸν ὡς ὁ ψευδογράφος πρὸς τὸν γεωμετρικόν· ἐκ γὰρ τῶν αὐτῶν τῷ διαλεκτικῷ παραλογίζεται, καὶ ὁ ψευδογράφος τῷ γεωμέτρῃ. ἀλλ’ ὁ μὲν οὐκ ἐριστικός, ὅτι ἐκ τῶν ἀρχῶν καὶ συμπερασμάτων τῶν ὑπὸ τὴν τέχνην ψευδογραφεῖ· ὁ δ’ ὑπὸ τὴν διαλεκτικὴν περὶ τἆλλα ὅτι ἐριστικὸς ἔσται δῆλον. οἷον ὁ τετραγωνισμὸς ὁ μὲν διὰ τῶν μηνίσκων οὐκ ἐριστικός, ὁ δὲ Βρύσωνος ἐριστικός· καὶ τὸν μὲν οὐκ ἔστι μετενεγκεῖν ἀλλ’ ἢ πρὸς γεωμετρίαν μόνον, διὰ τὸ ἐκ τῶν ἰδίων εἶναι ἀρχῶν, τὸν δὲ πρὸς πολλούς, ὅσοι μὴ ἴσασι τὸ δυνατὸν ἐν ἑκάστῳ καὶ τὸ ἀδύνατον· ἁρμόσει γάρ. ἢ ὡς Ἀντιφῶν ἐτετραγώνιζεν. ἢ εἴ τις μὴ φαίη βέλτιον εἶναι ἀπὸ δείπνου περιπατεῖν διὰ τὸν Ζήνωνος λόγον, οὐκ ἰατρικός· κοινὸς γάρ. εἰ μὲν οὖν πάντῃ ὁμοίως εἶχεν ὁ ἐριστικὸς πρὸς τὸν διαλεκτικὸν τῷ ψευδογράφῳ πρὸς τὸν γεωμέτρην, οὐκ ἂν ἦν περὶ ἐκείνων ἐριστικός· νῦν δ’ οὐκ ἔστιν ὁ διαλεκτικὸς περὶ γένος τι ὡρισμένον, οὐδὲ δεικτικὸς οὐδενός, οὐδὲ τοιοῦτος οἷος ὁ καθόλου. οὔτε γάρ ἐστιν ἅπαντα ἐν ἑνί τινι γένει, οὔτε, εἰ εἴη, οἷόν τε ὑπὸ τὰς αὐτὰς ἀρχὰς εἶναι τὰ ὄντα. ὥστ’ οὐδεμία τέχνη τῶν δεικνυουσῶν τινα φύσιν ἐρωτητική ἐστιν· οὐ γὰρ ἔξεστιν ὁποτερονοῦν τῶν μορίων δοῦναι· συλλογισμὸς γὰρ οὐ γίνεται ἐξ ἀμφοῖν. ἡ δὲ διαλεκτικὴ ἐρωτητική ἐστιν, εἰ δ’ ἐδείκνυεν, εἰ καὶ μὴ πάντα, ἀλλὰ τά γε πρῶτα καὶ τὰς οἰκείας ἀρχὰς οὐκ ἂν ἠρώτα· μὴ διδόντος γὰρ οὐκ ἂν ἔτι εἶχεν ἐξ ὧν ἔτι διαλέξεται πρὸς τὴν ἔνστασιν. ἡ δ’ αὐτὴ καὶ πειραστική· οὐδὲ γὰρ ἡ πειραστικὴ τοιαύτη ἐστὶν οἵα ἡ γεωμετρία, ἀλλ’ ἣν ἂν ἔχοι καὶ μὴ εἰδώς τις. ἔξεστι γὰρ πεῖραν λαβεῖν καὶ τὸν μὴ εἰδότα τὸ πρᾶγμα τοῦ μὴ εἰδότος, εἴπερ καὶ δίδωσιν, οὐκ ἐξ ὧν οἶδεν οὐδ’ ἐκ τῶν ἰδίων ἀλλ’ ἐκ τῶν ἑπομένων, ὅσα τοιαῦτά ἐστιν ἃ εἰδότα μὲν οὐδὲν κωλύει μὴ εἰδέναι τὴν τέχνην, μὴ εἰδότα δ’ ἀνάγκη ἀγνοεῖν. (ὥστε φανερὸν ὅτι οὐδενὸς ὡρισμένου ἡ πειραστικὴ ἐπιστήμη ἐστίν. διὸ καὶ περὶ πάντων ἐστί· πᾶσαι γὰρ αἱ τέχναι χρῶνται καὶ κοινοῖς τισιν. διὸ πάντες καὶ οἱ ἰδιῶται τρόπον τινὰ χρῶνται τῇ διαλεκτικῇ καὶ πειραστικῇ· πάντες γὰρ μέχρι τινὸς ἐπιχειροῦσιν ἀνακρίνειν τοὺς ἐπαγγελλομένους.) ταῦτα δ’ ἐστὶ τὰ κοινά· ταῦτα γὰρ οὐδὲν ἧττον ἴσασιν αὐτοί, κἂν δοκῶσι λίαν ἔξω λέγειν. ἐλέγχουσιν οὖν ἅπαντες· ἀτέχνως γὰρ μετέχουσι τούτου οὗ ἐντέχνως ἡ διαλεκτική ἐστι, καὶ ὁ τέχνῃ συλλογιστικῇ πειραστικὸς διαλεκτικός. ἐπεὶ δ’ ἐστὶ πολλὰ μὲν ταὐτὰ κατὰ πάντων, οὐ τοιαῦτα δ’ ὥστε φύσιν τινὰ εἶναι καὶ γένος ἀλλ’ οἷα αἱ ἀποφάσεις, τὰ δ’ οὐ τοιαῦτα ἀλλὰ ἴδια, ἔστιν ἐκ τούτων περὶ ἁπάντων πεῖραν λαμβάνειν καὶ εἶναι τέχνην τινά, καὶ μὴ τοιαύτην εἶναι οἷαι αἱ δεικνύουσαι. διόπερ ὁ ἐριστικὸς οὐκ ἔστιν οὕτως ἔχων πάντῃ ὡς ὁ ψευδογράφος· οὐ γὰρ ἔσται παραλογιστικὸς ἐξ ὡρισμένου τινὸς γένους ἀρχῶν, ἀλλὰ περὶ πᾶν γένος ἔσται ὁ ἐριστικός.

Τρόποι μὲν οὖν εἰσιν οὗτοι τῶν σοφιστικῶν ἐλέγχων. ὅτι δ’ ἐστὶ τοῦ διαλεκτικοῦ τὸ θεωρῆσαι περὶ τούτων καὶ δύνασθαι ταῦτα ποιεῖν, οὐ χαλεπὸν ἰδεῖν· ἡ γὰρ περὶ τὰς προτάσεις μέθοδος ἅπασαν ἔχει ταύτην τὴν θεωρίαν.

Καὶ περὶ μὲν τῶν ἐλέγχων εἴρηται τῶν φαινομένων. περὶ δὲ τοῦ ψευδόμενόν τι δεῖξαι καὶ τὸν λόγον εἰς ἄδοξόν τι ἀγαγεῖν (τοῦτο γὰρ ἦν δεύτερον τῆς σοφιστικῆς προαιρέσεως) - πρῶτον μὲν οὖν ἐκ τοῦ πυνθάνεσθαί πως καὶ διὰ τῆς ἐρωτήσεως συμβαίνει μάλιστα. τὸ γὰρ [πρὸς] μηδὲν ὁρίσαντα κείμενον ἐρωτᾶν θηρευτικόν ἐστι τούτων· εἰκῇ γὰρ λέγοντες ἁμαρτάνουσι μᾶλλον· εἰκῇ δὲ λέγουσιν ὅταν μηδὲν ἔχωσι προκείμενον. τό τε ἐρωτᾶν πολλά, κἂν ὡρισμένον ᾖ πρὸς ὃ διαλέγεται, καὶ τὸ τὰ δοκοῦντα λέγειν ἀξιοῦν, ποιεῖ τιν’ εὐπορίαν τοῦ εἰς ἄδοξον ἀγαγεῖν ἢ ψεῦδος, ἐάν τε ἐρωτώμενος φῇ ἢ ἀποφῇ τούτων τι, ἄγει πρὸς ἃ ἐπιχειρήματος εὐπορεῖ. δύνανται δὲ νῦν ἧττον κακουργεῖν διὰ τούτων ἢ πρότερον· ἀπαιτοῦνται γὰρ τί τοῦτο πρὸς τὸ ἐν ἀρχῇ. στοιχεῖον δὲ τοῦ τυχεῖν ἢ ψεύδους τινὸς ἢ ἀδόξου τὸ μηδεμίαν εὐθὺς ἐρωτᾶν θέσιν, ἀλλὰ φάσκειν ἐρωτᾶν μαθεῖν βουλόμενον· χώραν γὰρ ἐπιχειρήματος ἡ σκῆψις ποιεῖ.

Πρὸς δὲ τὸ ψευδόμενον δεῖξαι ἴδιος τόπος ὁ σοφιστικός, τὸ ἄγειν πρὸς τοιαῦτα πρὸς ἃ εὐπορεῖ λόγων. ἔστι δὲ καὶ καλῶς καὶ μὴ καλῶς τοῦτο ποιεῖν, καθάπερ ἐλέχθη πρότερον.

Πάλιν πρὸς τὸ παράδοξα λέγειν σκοπεῖν ἐκ τίνος γένους ὁ διαλεγόμενος, εἶτ᾽ ἐπερωτᾶν ὃ τοῖς πολλοῖς οὗτοι λέγουσι παράδοξον· ἔστι γὰρ ἑκάστοις τι τοιοῦτον. στοιχεῖον δὲ τούτων τὸ τὰς ἑκάστων εἰληφέναι θέσεις ἐν ταῖς προτάσεσιν. λύσις δὲ καὶ τούτων ἡ προσήκουσα φέρεται τῷ ἐμφανίζειν ὅτι οὐ διὰ τὸν λόγον συμβαίνει τὸ ἄδοξον· ἀεὶ δὲ τοῦτο καὶ βούλεται ὁ ἀγωνιζόμενος.

Ἔτι δ᾽ ἐκ τῶν βουλήσεων καὶ τῶν φανερῶν δοξῶν. οὐ γὰρ ταὐτὰ βούλονταί τε καὶ φασίν, ἀλλὰ λέγουσι μὲν τοὺς εὐσχημονεστάτους τῶν λόγων, βούλονται δὲ τὰ φαινόμενα λυσιτελεῖν· οἷον τεθνάναι καλῶς μᾶλλον ἢ ζῆν ἡδέως φασὶ δεῖν, καὶ πένεσθαι δικαίως μᾶλλον ἢ πλουτεῖν αἰσχρῶς, βούλονται δὲ τἀναντία. τὸν μὲν οὖν λέγοντα κατὰ τὰς βουλήσεις εἰς τὰς φανερὰς δόξας ἀκτέον, τὸν δὲ κατὰ ταύτας εἰς τὰς ἀποκεκρυμμένας· ἀμφοτέρως γὰρ ἀναγκαῖον παράδοξα λέγειν· ἢ γὰρ πρὸς τὰς φανερὰς ἢ πρὸς τὰς ἀφανεῖς δόξας ἐροῦσιν ἐναντία.

Πλεῖστος δὲ τόπος ἐστὶ τοῦ ποιεῖν παράδοξα λέγειν, ὥσπερ καὶ ὁ Καλλικλῆς ἐν τῷ Γοργίᾳ γέγραπται λέγων, καὶ οἱ ἀρχαῖοι δὲ πάντες ᾤοντο συμβαίνειν, παρὰ τὸ κατὰ φύσιν καὶ κατὰ τὸν νόμον· ἐναντία γὰρ εἶναι φύσιν καὶ νόμον, καὶ τὴν δικαιοσύνην κατὰ νόμον μὲν εἶναι καλόν, κατὰ φύσιν δ᾽ οὐ καλόν. δεῖ οὖν πρὸς μὲν τὸν εἰπόντα κατὰ φύσιν κατὰ νόμον ἀπαντᾶν, πρὸς δὲ τὸν κατὰ νόμον ἐπὶ τὴν φύσιν ἄγειν· ἀμφοτέρως γὰρ συμβαίνει λέγειν παράδοξα. ἦν δὲ τὸ μὲν κατὰ φύσιν αὐτοῖς τὸ ἀληθές, τὸ δὲ κατὰ νόμον τὸ τοῖς πολλοῖς δοκοῦν. ὥστε δῆλον ὅτι κἀκεῖνοι, καθάπερ καὶ οἱ νῦν, ἢ ἐλέγξαι ἢ παράδοξα λέγειν τὸν ἀποκρινόμενον ἐπεχείρουν ποιεῖν.

Ἔνια δὲ τῶν ἐρωτημάτων ἔχει τὸ ἀμφοτέρως ἄδοξον εἶναι τὴν ἀπόκρισιν, οἷον πότερον τοῖς σοφοῖς ἢ τῷ πατρὶ δεῖ πείθεσθαι, καὶ τὰ συμφέροντα πράττειν ἢ τὰ δίκαια, καὶ ἀδικεῖσθαι αἱρετώτερον ἢ βλάπτειν. δεῖ δ᾽ ἄγειν εἰς τὰ τοῖς πολλοῖς καὶ ‹τὰ› τοῖς σοφοῖς ἐναντία - ἐὰν μὲν λέγῃ τις ὡς οἱ περὶ τοὺς λόγους, εἰς τὰ τοῖς πολλοῖς, ἐὰν δ᾽ ὡς οἱ πολλοί, ἐπὶ τὰ τοῖς σοφοῖς. φασὶ γὰρ οἱ μὲν ἐξ ἀνάγκης τὸν εὐδαίμονα δίκαιον εἶναι· τοῖς δὲ πολλοῖς ἄδοξον τὸ βασιλέα μὴ εὐδαιμονεῖν. ἔστι δὲ τὸ εἰς τὰ οὕτως ἄδοξα ἄγειν τὸ αὐτὸ τῷ εἰς τὴν κατὰ φύσιν καὶ κατὰ νόμον ὑπεναντίωσιν ἄγειν· ὁ μὲν γὰρ νόμος δόξα τῶν πολλῶν, οἱ δὲ σοφοὶ κατὰ φύσιν καὶ κατ’ ἀλήθειαν λέγουσιν.

Καὶ τὰ μὲν παράδοξα ἐκ τούτων δεῖ ζητεῖν τῶν τόπων· περὶ δὲ τοῦ ποιῆσαι ἀδολεσχεῖν, ὃ μὲν λέγομεν τὸ ἀδολεσχεῖν εἰρήκαμεν ἤδη· πάντες δὲ οἱ τοιοίδε λόγοι τοῦτο βούλονται ποιεῖν· εἰ μηδὲν διαφέρει τὸ ὄνομα ἢ τὸν λόγον εἰπεῖν, διπλάσιον δὴ καὶ διπλάσιον ἡμίσεος ταὐτό· εἰ ἄρα ἐστὶ διπλάσιον ἡμίσεος διπλάσιον, ἔσται ἡμίσεος ἡμίσεος διπλάσιον. καὶ πάλιν ἂν ἀντὶ τοῦ “διπλάσιον” “διπλάσιον ἡμίσεος” τεθῇ, τρὶς ἔσται εἰρημένον, ἡμίσεος ἡμίσεος ἡμίσεος διπλάσιον. καὶ ἆρά ἐστιν ἡ ἐπιθυμία ἡδέος; τοῦτο δ’ ἐστὶν ὄρεξις ἡδέος· ἔστιν ἄρα ἡ ἐπιθυμία ὄρεξις ἡδέος ἡδέος.

Εἰσὶ δὲ πάντες οἱ τοιοῦτοι τῶν λόγων ἔν τε τοῖς πρός τι, ὅσα μὴ μόνον τὰ γένη ἀλλὰ καὶ αὐτὰ πρός τι λέγεται καὶ πρὸς τὸ αὐτὸ καὶ ἓν ἀποδίδοται (οἷον ἥ τε ὄρεξις τινὸς ὄρεξις καὶ ἡ ἐπιθυμία τινὸς ἐπιθυμία, καὶ τὸ διπλάσιον τινὸς διπλάσιον, καὶ διπλάσιον ἡμίσεος), καὶ ὅσων ἡ οὐσία, οὐκ ὄντων πρός τι ὅλως ὧν εἰσιν ἕξεις ἢ πάθη ἤ τι τοιοῦτον ἐν τῷ λόγῳ αὐτῶν προσδηλοῦται, κατηγορουμένων † ἐπὶ τούτοις. οἷον τὸ περιττὸν ἀριθμὸς μέσον ἔχων· ἔστι δ’ ἀριθμὸς περιττός· ἔστιν ἄρα ἀριθμὸς ἀριθμὸς μέσον ἔχων. καὶ εἰ τὸ σιμὸν κοιλότης ῥινός ἐστιν, ἔστι δὲ ῥὶς σιμή, ἔστιν ἄρα ῥὶς ῥὶς κοίλη.

Φαίνονται δὲ ποιεῖν οὐ ποιοῦντες ἐνίοτε διὰ τὸ μὴ προσπυνθάνεσθαι εἰ σημαίνει τι καθ’ αὑτὸ λεχθὲν τὸ διπλάσιον ἢ οὐδέν, καὶ εἴ τι σημαίνει, πότερον τὸ αὐτὸ ἢ ἕτερον, ἀλλὰ τὸ συμπέρασμα λέγειν εὐθύς. ἀλλὰ φαίνεται, διὰ τὸ τὸ ὄνομα ταὐτὸ εἶναι, ταὐτὸ καὶ σημαίνειν.

Σολοικισμὸς δ’ οἷον μέν ἐστιν εἴρηται πρότερον· ἔστι δὲ τοῦτο καὶ ποιεῖν καὶ μὴ ποιοῦντα φαίνεσθαι καὶ ποιοῦντα μὴ δοκεῖν, καθάπερ, ὃ Πρωταγόρας ἔλεγεν, εἰ “ὁ μῆνις” καὶ “ὁ πήληξ” ἄρρενά ἐστιν· ὁ μὲν γὰρ λέγων “οὐλομένην” σολοικίζει μὲν κατ’ ἐκεῖνον, οὐ φαίνεται δὲ τοῖς ἄλλοις, ὁ δὲ “οὐλόμενον” φαίνεται μέν, ἀλλ’ οὐ σολοικίζει. δῆλον οὖν ὅτι κἂν τέχνῃ τις τοῦτο δύναιτο ποιεῖν· διὸ πολλοὶ τῶν λόγων οὐ συλλογιζόμενοι σολοικισμὸν φαίνονται συλλογίζεσθαι, καθάπερ ἐν τοῖς ἐλέγχοις.

Εἰσὶ δὲ πάντες σχεδὸν οἱ φαινόμενοι σολοικισμοὶ παρὰ τόδε, [καὶ] ὅταν ἡ πτῶσις μήτε ἄρρεν μήτε θῆλυ δηλοῖ ἀλλὰ τὸ μεταξύ. τὸ μὲν γὰρ “οὗτος” ἄρρεν σημαίνει, τὸ δ’ “αὕτη” θῆλυ· τὸ δὲ “τοῦτο” θέλει μὲν τὸ μεταξὺ σημαίνειν, πολλάκις δὲ σημαίνει κἀκείνων ἑκάτερον, οἷον “τί τοῦτο;” “Καλλιόπη, ξύλον, Κορίσκος”. τοῦ μὲν οὖν ἄρρενος καὶ τοῦ θήλεος διαφέρουσιν αἱ πτώσεις ἅπασαι, τοῦ δὲ μεταξὺ αἱ μὲν αἱ δ’ οὔ. δοθέντος δὴ πολλάκις “τοῦτο”, συλλογίζονται ὡς εἰρημένου “τοῦτον”· ὁμοίως δὲ καὶ ἄλλην πτῶσιν ἀντ’ ἄλλης. ὁ δὲ παραλογισμὸς γίνεται διὰ τὸ κοινὸν εἶναι τὸ “τοῦτο” πλειόνων πτώσεων· τὸ γὰρ “τοῦτο” σημαίνει ὁτὲ μὲν “οὗτος” ὁτὲ δὲ “τοῦτον”. δεῖ δ’ ἐναλλὰξ σημαίνειν μετὰ μὲν τοῦ “ἔστι” τὸ “οὗτος”, μετὰ δὲ τοῦ “εἶναι” τὸ “τοῦτον”, οἷον “ἔστι Κορίσκος”, “εἶναι Κορίσκον”. καὶ ἐπὶ τῶν θήλεων ὀνομάτων ὡσαύτως, καὶ ἐπὶ τῶν λεγομένων μὲν σκευῶν, ἐχόντων δὲ θηλείας ἢ ἄρρενος κλῆσιν. ὅσα γὰρ εἰς τὸ ο καὶ τὸ ν τελευτᾷ, ταῦτα μόνα σκεύους ἔχει κλῆσιν, οἷον ξύλον, σχοινίον· τὰ δὲ μὴ οὕτως ἄρρενος ἢ θήλεος, ὧν ἔνια φέρομεν ἐπὶ τὰ σκεύη, οἷον ἀσκὸς μὲν ἄρρεν τοὔνομα, κλίνη δὲ θῆλυ. διόπερ καὶ ἐπὶ τῶν τοιούτων ὡσαύτως τὸ “ἔστι” καὶ τὸ “εἶναι” διοίσει. καὶ τρόπον τινὰ ὅμοιός ἐστιν ὁ σολοικισμὸς τοῖς “παρὰ τὸ τὰ μὴ ὅμοια ὁμοίως” λεγομένοις ἐλέγχοις. ὥσπερ γὰρ ἐκείνοις ἐπὶ τῶν πραγμάτων, τούτοις ἐπὶ τῶν ὀνομάτων συμπίπτει σολοικίζειν· ἄνθρωπος γὰρ καὶ λευκὸν καὶ πρᾶγμα καὶ ὄνομά ἐστιν.

Φανερὸν οὖν ὅτι τὸν σολοικισμὸν πειρατέον ἐκ τῶν εἰρημένων πτώσεων συλλογίζεσθαι.

Εἴδη μὲν οὖν ταῦτα τῶν ἀγωνιστικῶν λόγων καὶ μέρη τῶν εἰδῶν καὶ τρόποι οἱ εἰρημένοι· διαφέρει δ’ οὐ μικρὸν ἐὰν ταχθῇ πως τὰ περὶ τὴν ἐρώτησιν πρὸς τὸ λανθάνειν, ὥσπερ ἐν τοῖς διαλεκτικοῖς. ἐφεξῆς οὖν τοῖς εἰρημένοις ταῦτα πρῶτον λεκτέον.

Ἔστι δὴ πρὸς τὸ ἐλέγχειν ἓν μὲν μῆκος· χαλεπὸν γὰρ ἅμα πολλὰ συνορᾶν· εἰς δὲ τὸ μῆκος τοῖς προειρημένοις στοιχείοις χρηστέον. ἓν δὲ τάχος· ὑστερίζοντες γὰρ ἧττον προορῶσιν. ἔτι δ’ ὀργὴ καὶ φιλονεικία· ταραττόμενοι γὰρ ἧττον δύνανται φυλάττεσθαι πάντες· στοιχεῖα δὲ τῆς ὀργῆς τό τε φανερὸν ἑαυτὸν ποιεῖν βουλόμενον ἀδικεῖν καὶ τὸ παράπαν ἀναισχυντεῖν. ἔτι τὸ ἐναλλὰξ τὰ ἐρωτήματα τιθέναι, ἐάν τε πρὸς ταὐτὸ πλείους τις ἔχῃ λόγους, ἐάν τε καὶ ὅτι οὕτως καὶ ὅτι οὐχ οὕτως· ἅμα γὰρ συμβαίνει ἢ πρὸς πλείω ἢ πρὸς τὰ ἐναντία ποιεῖσθαι τὴν φυλακήν. ὅλως δὲ πάντα τὰ πρὸς τὴν κρύψιν λεχθέντα πρότερον χρήσιμα καὶ πρὸς τοὺς ἀγωνιστικοὺς λόγους· ἡ γὰρ κρύψις ἐστὶ τοῦ λαθεῖν χάριν, τὸ δὲ λαθεῖν τῆς ἀπάτης.

Πρὸς δὲ τοὺς ἀνανεύοντας ἅττ’ ἂν οἰηθῶσιν εἶναι πρὸς τὸν λόγον, ἐξ ἀποφάσεως ἐρωτητέον ὡς τοὐναντίον βουλόμενον, ἢ καὶ ἐξ ἴσου ποιοῦντα τὴν ἐρώτησιν· ἀδήλου γὰρ ὄντος τοῦ τί βούλεται λαβεῖν ἧττον δυσκολαίνουσιν. ὅταν τ’ ἐπὶ τῶν μερῶν διδῷ τις τὸ καθ’ ἕκαστον, ἐπάγοντα τὸ καθόλου πολλάκις οὐκ ἐρωτητέον ἀλλ’ ὡς δεδομένῳ χρηστέον· ἐνίοτε γὰρ καὶ αὐτοὶ οἴονται δεδωκέναι καὶ τοῖς ἀκούουσι φαίνονται διὰ τὴν τῆς ἐπαγωγῆς μνείαν, ὡς οὐκ ἂν ἠρωτημένα μάτην. ἐν οἷς τε μὴ ὀνόματι σημαίνεται τὸ καθόλου ἀλλὰ τῇ ὁμοιότητι, χρηστέον πρὸς τὸ συμφέρον· λανθάνει γὰρ ἡ ὁμοιότης πολλάκις. πρός τε τὸ λαβεῖν τὴν πρότασιν τοὐναντίον παραβάλλοντα χρὴ πυνθάνεσθαι· οἷον, εἰ δέοι λαβεῖν ὅτι δεῖ πάντα τῷ πατρὶ πείθεσθαι, "πότερον ἅπαντα δεῖ πείθεσθαι τοῖς γονεῦσιν ἢ πάντ' ἀπειθεῖν;" καὶ "τὸ πολλάκις πολλά, πότερον πολλὰ συγχωρητέον ἢ ὀλίγα;" μᾶλλον γάρ, εἴπερ ἀνάγκη, δόξειεν ἂν εἶναι πολλά· παρατιθεμένων γὰρ ἐγγὺς τῶν ἐναντίων καὶ μείω καὶ μείζω φαίνεται καὶ χείρω καὶ βελτίω τοῖς ἀνθρώποις.

Σφόδρα δὲ καὶ πολλάκις ποιεῖ δοκεῖν ἐληλέγχθαι τὸ μάλιστα σοφιστικὸν συκοφάντημα τῶν ἐρωτώντων, τὸ μηδὲν συλλογισαμένους μὴ ἐρώτημα ποιεῖν τὸ τελευταῖον ἀλλὰ συμπεραντικῶς εἰπεῖν, ὡς συλλελογισμένους, "οὐκ ἄρα τὸ καὶ τό".

Σοφιστικὸν δὲ καὶ τὸ κειμένου παραδόξου τὸ φαινόμενον ἀξιοῦν ἀποκρίνεσθαι, προκειμένου τοῦ δοκοῦντος ἐξ ἀρχῆς, καὶ τὴν ἐρώτησιν τῶν τοιούτων οὕτω ποιεῖσθαι, "πότερόν σοι δοκεῖ;" ἀνάγκη γάρ, ἂν ᾖ τὸ ἐρώτημα ἐξ ὧν ὁ συλλογισμός, ἢ ἔλεγχον ἢ παράδοξον γίνεσθαι, δόντος μὲν ἔλεγχον, μὴ δόντος δὲ μηδὲ δοκεῖν φάσκοντος ἄδοξον, μὴ δόντος δέ, δοκεῖν δ' ὁμολογοῦντος, ἐλεγχοειδές.

Ἔτι καθάπερ καὶ ἐν τοῖς ῥητορικοῖς, καὶ ἐν τοῖς ἐλεγκτικοῖς ὁμοίως τὰ ἐναντιώματα θεωρητέον ἢ πρὸς τὰ ὑφ' ἑαυτοῦ λεγόμενα ἢ πρὸς οὓς ὁμολογεῖ καλῶς λέγειν ἢ πράττειν, ἔτι πρὸς τοὺς δοκοῦντας τοιούτους ἢ πρὸς τοὺς ὁμοίους, ἢ πρὸς τοὺς πλείστους ἢ πρὸς πάντας. ὥσπερ τε καὶ ἀποκρινόμενοι πολλάκις, ὅταν ἐλέγχωνται, ποιοῦσι διττόν, ἂν μέλλῃ συμβαίνειν ἐλεγχθήσεσθαι, καὶ ἐρωτῶντας χρηστέον ποτὲ τούτῳ πρὸς τοὺς ἐνισταμένους - ἂν ὡδὶ μὲν συμβαίνῃ ὡδὶ δὲ μή, ὅτι οὕτως εἴληφεν, οἷον ὁ Κλεοφῶν ποιεῖ ἐν τῷ Μανδροβούλῳ. δεῖ δὲ καὶ ἀφισταμένους τοῦ λόγου τὰ λοιπὰ τῶν ἐπιχειρημάτων ἐπιτέμνειν, καὶ ἀποκρινόμενον, ἂν προαισθάνηται, προενίστασθαι καὶ προαγορεύειν. ἐπιχειρητέον δ' ἐνίοτε καὶ πρὸς ἄλλα τοῦ εἰρημένου, ἐκεῖνο ἐκλαβόντας, ἐὰν μὴ πρὸς τὸ κείμενον ἔχῃ τις ἐπιχειρεῖν· ὅπερ ὁ Λυκόφρων ἐποίησε προβληθέντος λύραν ἐγκωμιάζειν. πρὸς δὲ τοὺς ἀπαιτοῦντας πρὸς τί ἐπιχειρεῖ, ἐπειδὴ δοκεῖ δεῖν ἀποδιδόναι τὴν αἰτίαν, λεχθέντων δ' ἐνίων εὐφυλακτότερον (τὸ καθόλου συμβαῖνον ἐν τοῖς ἐλέγχοις), λέγειν τὴν ἀντίφασιν, ὅτι ὃ ἔφησεν ἀπόφησι, ἢ ὃ ἀπέφησε φησί, ἀλλὰ μὴ ὅτι τῶν ἐναντίων ἡ αὐτὴ ἐπιστήμη ἢ οὐχ ἡ αὐτή. οὐ δεῖ δὲ τὸ συμπέρασμα προτατικῶς ἐρωτᾶν. ἔνια δ' οὐδ' ἐρωτητέον ἀλλ' ὡς ὁμολογουμένοις χρηστέον.

Ἐξ ὧν μὲν οὖν αἱ ἐρωτήσεις καὶ πῶς ἐρωτητέον ἐν ταῖς ἀγωνιστικαῖς διατριβαῖς, εἴρηται. περὶ δὲ ἀποκρίσεως καὶ πῶς χρὴ λύειν καὶ τί, καὶ πρὸς τίνα χρῆσιν οἱ τοιοῦτοι τῶν λόγων ὠφέλιμοι, μετὰ ταῦτα λεκτέον.

Χρήσιμοι μὲν οὖν εἰσι πρὸς μὲν φιλοσοφίαν διὰ δύο. πρῶτον μὲν γὰρ ὡς ἐπὶ τὸ πολὺ γινόμενοι παρὰ τὴν λέξιν ἄμεινον ἔχειν ποιοῦσι πρὸς τὸ ποσαχῶς ἕκαστον λέγεται καὶ ποῖα ὁμοίως καὶ ποῖα ἑτέρως ἐπί τε τῶν πραγμάτων συμβαίνει καὶ ἐπὶ τῶν ὀνομάτων. δεύτερον δὲ πρὸς τὰς καθ’ αὑτὸν ζητήσεις· ὁ γὰρ ὑφ’ ἑτέρου ῥᾳδίως παραλογιζόμενος καὶ τοῦτο μὴ διαισθανόμενος κἂν αὐτὸς ὑφ’ αὑτοῦ τοῦτο πάθοι πολλάκις. τρίτον δὲ καὶ τὸ λοιπὸν ἔτι πρὸς δόξαν, τὸ περὶ πάντα γεγυμνάσθαι δοκεῖν καὶ μηδενὸς ἀπείρως ἔχειν· τὸ γὰρ κοινωνοῦντα λόγων ψέγειν λόγους, μηδὲν ἔχοντα διορίζειν περὶ τῆς φαυλότητος αὐτῶν, ὑποψίαν δίδωσι τοῦ δοκεῖν δυσχεραίνειν οὐ διὰ τἀληθὲς ἀλλὰ δι’ ἀπειρίαν.

Ἀποκρινομένοις δὲ πῶς ἀπαντητέον πρὸς τοὺς τοιούτους λόγους, φανερόν, εἴπερ ὀρθῶς εἰρήκαμεν πρότερον ἐξ ὧν εἰσιν οἱ παραλογισμοί, καὶ τὰς ἐν τῷ πυνθάνεσθαι πλεονεξίας ἱκανῶς διείλομεν. οὐ ταὐτὸ δ’ ἐστὶ λαβόντα τε τὸν λόγον ἰδεῖν καὶ λῦσαι τὴν μοχθηρίαν, καὶ ἐρωτώμενον ἀπαντᾶν δύνασθαι ταχέως· ὃ γὰρ ἴσμεν, πολλάκις μετατιθέμενον ἀγνοοῦμεν. ἔτι δ’, ὥσπερ ἐν τοῖς ἄλλοις τὸ θᾶττον καὶ τὸ βραδύτερον ἐκ τοῦ γεγυμνάσθαι γίνεται μᾶλλον, οὕτω καὶ ἐπὶ τῶν λόγων ἔχει, ὥστε, ἂν δῆλον μὲν ἡμῖν ᾖ, ἀμελέτητοι δ’ ὦμεν, ὑστεροῦμεν τῶν καιρῶν πολλάκις. συμβαίνει δέ ποτε καθάπερ ἐν τοῖς διαγράμμασιν· καὶ γὰρ ἐκεῖ ἀναλύσαντες ἐνίοτε συνθεῖναι πάλιν ἀδυνατοῦμεν· οὕτω καὶ ἐν τοῖς ἐλέγχοις, εἰδότες παρ’ ὃ ὁ λόγος συμβαίνει συνεῖραι, διαλῦσαι τὸν λόγον ἀποροῦμεν.

Πρῶτον μὲν οὖν, ὥσπερ συλλογίζεσθαί φαμεν ἐνδόξως ποτὲ μᾶλλον ἢ ἀληθῶς προαιρεῖσθαι δεῖν, οὕτω καὶ λυτέον ποτὲ μᾶλλον ἐνδόξως ἢ κατὰ τἀληθές. ὅλως γὰρ πρὸς τοὺς ἐριστικοὺς μαχετέον οὐχ ὡς ἐλέγχοντας ἀλλ’ ὡς φαινομένους· οὐ γάρ φαμεν συλλογίζεσθαί γε αὐτούς, ὥστε πρὸς τὸ μὴ δοκεῖν διορθωτέον. εἰ γάρ ἐστιν ὁ ἔλεγχος ἀντίφασις μὴ ὁμώνυμος ἔκ τινων, οὐδὲν ἂν δέοι διαιρεῖσθαι πρὸς ἀμφίβολα καὶ τὴν ὁμωνυμίαν (οὐ γὰρ ποιεῖ συλλογισμόν), ἀλλ’ οὐδενὸς ἄλλου χάριν προσδιαιρετέον ἀλλ’ ἢ ὅτι τὸ συμπέρασμα φαίνεται ἐλεγχοειδές. οὔκουν τὸ ἐλεγχθῆναι ἀλλὰ τὸ δοκεῖν εὐλαβητέον, ἐπεὶ τό γ’ ἐρωτᾶν ἀμφίβολα καὶ τὰ παρὰ τὴν ὁμωνυμίαν ὅσαι τ’ ἄλλαι τοιαῦται παρακρούσεις καὶ τὸν ἀληθινὸν ἔλεγχον ἀφανίζει καὶ τὸν ἐλεγχόμενον καὶ μὴ ἐλεγχόμενον ἄδηλον ποιεῖ. ἐπεὶ γὰρ ἔξεστιν ἐπὶ τέλει συμπεραναμένου μὴ ὅπερ ἔφησεν ἀποφῆσαι λέγειν, ἀλλ’ ‹ἢ› ὁμωνύμως, εἰ καὶ ὅτι μάλιστ’ ἔτυχεν ἐπὶ ταὐτὸ φέρων, ἄδηλον εἰ ἐλήλεγκται· ἄδηλον γὰρ εἰ ἀληθῆ λέγει νῦν. εἰ δὲ διελὼν ἤρετο τὸ ὁμώνυμον ἢ τὸ ἀμφίβολον, οὐκ ἂν ἄδηλος ἦν ὁ ἔλεγχος, ὅ τ’ ἐπιζητοῦσι νῦν μὲν ἧττον πρότερον δὲ μᾶλλον οἱ ἐριστικοί, τὸ ἢ “ναί” ἢ “οὔ” ἀποκρίνεσθαι τὸν ἐρωτώμενον, ἐγίνετ’ ἄν. νῦν δὲ διὰ τὸ μὴ καλῶς ἐρωτᾶν τοὺς πυνθανομένους ἀνάγκη προσαποκρίνεσθαί τι τὸν ἐρωτώμενον, διορθοῦντα τὴν μοχθηρίαν τῆς προτάσεως· ἐπεὶ διελομένου γε ἱκανῶς ἢ “ναί” ἢ “οὔ” ἀνάγκη λέγειν τὸν ἀποκρινόμενον.

Εἰ δέ τις ὑπολήψεται τὸν κατὰ ὁμωνυμίαν ἔλεγχον ‹ἔλεγχον› εἶναι, τρόπον τινὰ οὐκ ἔσται διαφυγεῖν τὸ ἐλέγχεσθαι τὸν ἀποκρινόμενον· ἐπὶ γὰρ τῶν ὁρατῶν ἀναγκαῖον ὃ ἔφησεν ἀποφῆσαι ὄνομα καὶ ὃ ἀπέφησε φῆσαι. ὡς γὰρ διορθοῦνταί τινες, οὐδὲν ὄφελος. οὐ γὰρ Κορίσκον φασὶν εἶναι μουσικὸν καὶ ἄμουσον, ἀλλὰ τοῦτον τὸν Κορίσκον μουσικὸν καὶ τοῦτον τὸν Κορίσκον ἄμουσον. ὁ γὰρ αὐτὸς ἔσται λόγος τὸ τοῦτον τὸν Κορίσκον τῷ τοῦτον τὸν Κορίσκον ἄμουσον εἶναι (ἢ μουσικόν), ὅπερ ἅμα φησί τε καὶ ἀπόφησιν. ἀλλ’ ἴσως οὐ ταὐτὸ σημαίνει (οὐδὲ γὰρ ἐκεῖ τοὔνομα), ὥστε τί διαφέρει; εἰ δὲ τῷ μὲν τὸ ἁπλῶς λέγειν Κορίσκον ἀποδώσει, τῷ δὲ προσθήσει τὸ τινὰ ἢ τόνδε, ἄτοπον· οὐδὲν γὰρ μᾶλλον θατέρῳ· ὁποτέρῳ γὰρ ἂν οὐδὲν διαφέρει.

Οὐ μὴν ἀλλ’ ἐπειδὴ ἄδηλος μέν ἐστιν ὁ μὴ διορισάμενος τὴν ἀμφιβολίαν πότερον ἐλήλεγκται ἢ οὐκ ἐλήλεγκται, δέδοται δ’ ἐν τοῖς λόγοις τὸ διελεῖν, φανερὸν ὅτι τὸ μὴ διορίσαντα δοῦναι τὴν ἐρώτησιν, ἀλλ’ ἁπλῶς, ἁμάρτημά ἐστιν, ὥστε κἂν εἰ μὴ αὐτός, ἀλλ’ ὅ γε λόγος ἐληλεγμένῳ ὅμοιός ἐστιν. συμβαίνει μέντοι πολλάκις ὁρῶντας τὴν ἀμφιβολίαν ὀκνεῖν διαιρεῖσθαι διὰ τὴν πυκνότητα τῶν τὰ τοιαῦτα προτεινόντων, ὅπως μὴ πρὸς ἅπαν δοκῶσι δυσκολαίνειν· εἶτ’ οὐκ ἂν οἰηθέντων παρὰ τοῦτο γενέσθαι τὸν λόγον, πολλάκις ἀπήντησε παράδοξον. ὥστ’ ἐπειδὴ δέδοται διαιρεῖν, οὐκ ὀκνητέον, καθάπερ ἐλέχθη πρότερον.

Εἰ δὲ τὰ δύο ἐρωτήματα μὴ ἓν ἐποίει τις ἐρώτημα, οὐδ’ ἂν ὁ παρὰ τὴν ὁμωνυμίαν καὶ τὴν ἀμφιβολίαν ἐγίνετο παραλογισμός, ἀλλ’ ἢ ἔλεγχος ἢ οὔ. τί γὰρ διαφέρει ἐρωτῆσαι εἰ Καλλίας καὶ Θεμιστοκλῆς μουσικοί εἰσιν ἢ εἰ ἀμφοτέροις ἓν ὄνομα ἦν ἑτέροις οὖσιν; εἰ γὰρ πλείω δηλοῖ ἑνός, πλείω ἠρώτησεν. εἰ οὖν μὴ ὀρθὸν πρὸς δύο ἐρωτήσεις μίαν ἀπόκρισιν ἀξιοῦν λαμβάνειν ἁπλῶς, φανερὸν ὅτι οὐδενὶ προσήκει τῶν ὁμωνύμων ἀποκρίνεσθαι ἁπλῶς, οὐδ’ εἰ κατὰ πάντων ἀληθές, ὥσπερ ἀξιοῦσί τινες. οὐδὲν γὰρ τοῦτο διαφέρει ἢ εἰ ἤρετο, Κορίσκος καὶ Καλλίας πότερον οἴκοι εἰσὶν ἢ οὐκ οἴκοι, εἴτε παρόντων ἀμφοῖν εἴτε μὴ παρόντων· ἀμφοτέρως γὰρ πλείους αἱ προτάσεις· οὐ γὰρ εἰ ἀληθὲς εἰπεῖν, διὰ τοῦτο μία ἡ ἐρώτησις. ἐγχωρεῖ γὰρ καὶ μυρία ἕτερα ἐρωτηθέντα ἐρωτήματα ἁπλῶς ἢ "ναί" ἢ "οὔ" ἀληθὲς εἶναι λέγειν· ἀλλ' ὅμως οὐκ ἀποκριτέον μιᾷ ἀποκρίσει· ἀναιρεῖται γὰρ τὸ διαλέγεσθαι. τοῦτο δ' ὅμοιον ὡς εἰ καὶ τὸ αὐτὸ ὄνομα τεθείη τοῖς ἑτέροις. εἰ οὖν μὴ δεῖ πρὸς δύο ἐρωτήσεις μίαν ἀπόκρισιν διδόναι, φανερὸν ὅτι οὐδ' ἐπὶ τῶν ὁμωνύμων τὸ "ναί" ἢ "οὔ" λεκτέον· οὐδὲ γὰρ ὁ εἰπὼν ἀποκέκριται, ἀλλ' εἴρηκεν. ἀλλ' ἀξιοῦταί πως ἐν τοῖς διαλεγομένοις διὰ τὸ λανθάνειν τὸ συμβαῖνον.

Ὥσπερ οὖν εἴπομεν, ἐπειδήπερ οὐδ' ἔλεγχοί τινες ὄντες δοκοῦσιν εἶναι, κατὰ τὸν αὐτὸν τρόπον καὶ λύσεις δόξουσιν εἶναί τινες οὐκ οὖσαι λύσεις· ἃς δή φαμεν ἐνίοτε μᾶλλον δεῖν φέρειν ἢ τὰς ἀληθεῖς ἐν τοῖς ἀγωνιστικοῖς λόγοις καὶ τῇ πρὸς τὸ διττὸν ἀπαντήσει. ἀποκριτέον δ' ἐπὶ μὲν τῶν δοκούντων τὸ "ἔστω" λέγοντα· καὶ γὰρ οὕτως ἥκιστα γίνοιτ' ἂν παρεξέλεγχος. ἂν δέ τι παράδοξον ἀναγκάζηται λέγειν, ἐνταῦθα μάλιστα προσθετέον τὸ δοκεῖν· οὕτω γὰρ ἂν οὔτ' ἔλεγχος οὔτε παράδοξον γίνεσθαι δόξειεν. ἐπεὶ δὲ πῶς αἰτεῖται τὸ ἐν ἀρχῇ δῆλον, οἴονται δὲ πάντως ἂν ᾖ σύνεγγυς ἀναιρετέον, καὶ μὴ συγχωρητέον εἶναι ἔνια, ὡς τὸ ἐν ἀρχῇ αἰτοῦντος, ὅταν τι τοιοῦτον ἀξιοῖ τις ὃ ἀναγκαῖον μὲν συμβαίνειν ἐκ τῆς θέσεως, ᾖ δὲ ψεῦδος ἢ ἄδοξον, ταὐτὸ λεκτέον· τὰ γὰρ ἐξ ἀνάγκης συμβαίνοντα τῆς αὐτῆς εἶναι δοκεῖ θέσεως. ἔτι ὅταν τὸ καθόλου μὴ ὀνόματι ληφθῇ ἀλλὰ παραβολῇ, λεκτέον ὅτι οὐχ ὡς ἐδόθη οὐδ' ὡς προὔτεινε λαμβάνει· καὶ γὰρ παρὰ τοῦτο γίνεται πολλάκις ἔλεγχος.

Ἐξειργόμενον δὲ τούτων ἐπὶ τὸ μὴ καλῶς δεδεῖχθαι πορευτέον, ἀπαντῶντα κατὰ τὸν εἰρημένον διορισμόν.

Ἐν μὲν οὖν τοῖς κυρίως λεγομένοις ὀνόμασιν ἀνάγκη ἀποκρίνεσθαι ἢ ἁπλῶς ἢ διαιρούμενον. ἃ δὲ συνυπονοοῦντες τίθεμεν, οἷον ὅσα μὴ σαφῶς ἀλλὰ κολοβῶς ἐρωτᾶται, παρὰ τοῦτο συμβαίνει ὁ ἔλεγχος. οἷον "ἆρ' ὃ ἂν ᾖ Ἀθηναίων κτῆμά ἐστιν Ἀθηναίων;" "ναί." "ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἀλλὰ μὴν ὁ ἄνθρωπός ἐστι τῶν ζῴων;" "ναί." "κτῆμα ἄρα ὁ ἄνθρωπος τῶν ζῴων." τὸν γὰρ ἄνθρωπον τῶν ζῴων λέγομεν ὅτι ζῷόν ἐστι, καὶ Λύσανδρον τῶν Λακώνων ὅτι Λάκων. δῆλον οὖν ὡς ἐν οἷς ἀσαφὲς τὸ προτεινόμενον οὐ συγχωρητέον ἁπλῶς.

Ὅταν δὲ δυοῖν ὄντοιν θατέρου μὲν ὄντος ἐξ ἀνάγκης θάτερον εἶναι δοκῇ, θατέρου δὲ τοῦτο μὴ ἐξ ἀνάγκης, ἐρωτώμενον πότερον, δεῖ τὸ ἔλαττον διδόναι (χαλεπώτερον γὰρ συλλογίσασθαι ἐκ πλειόνων)· ἐὰν δ' ἐπιχειρῇ ὅτι τῷ μὲν ἔστιν ἐναντίον τῷ δ' οὐκ ἔστιν, ἂν ὁ λόγος ἀληθὴς ᾖ, ἐναντίον ‹εἶναι› φάναι, ὄνομα δὲ μὴ κεῖσθαι τοῦ ἑτέρου.

Ἐπεὶ δ’ ἔνια μὲν ὧν λέγουσιν οἱ πολλοὶ τὸν μὴ συγχωροῦντα ψεύδεσθαι ἂν φαῖεν ἔνια δ’ οὔ, οἷον ὅσα ἀμφιδοξοῦσιν (πότερον γὰρ φθαρτὴ ἢ ἀθάνατος ἡ ψυχὴ τῶν ζῴων, οὐ διώρισται τοῖς πολλοῖς) - ἐν οἷς οὖν ἄδηλον ποτέρως εἴωθε λέγεσθαι τὸ προτεινόμενον, πότερον ὡς αἱ γνῶμαι (καλοῦσι γὰρ γνώμας καὶ τὰς ἀληθεῖς δόξας καὶ τὰς ὅλας ἀποφάνσεις) ἢ ὡς “ἡ διάμετρος ἀσύμμετρός ἐστι”, οὗ τὸ ἀληθὲς ἀμφιδοξεῖται, μάλιστα μεταφέρων ἄν τις λανθάνοι τὰ ὀνόματα περὶ τούτων. διὰ μὲν γὰρ τὸ ἄδηλον εἶναι ποτέρως ἔχει τἀληθές, οὐ δόξει σοφίζεσθαι, διὰ δὲ τὸ ἀμφιδοξεῖν οὐ δόξει ψεύδεσθαι· ἡ γὰρ μεταφορὰ ποιήσει τὸν λόγον ἀνεξέλεγκτον.

Ἔτι ὅσα ἄν τις προαισθάνηται τῶν ἐρωτημάτων, προενστατέον καὶ προαγορευτέον· οὕτω γὰρ ἂν μάλιστα τὸν πυνθανόμενον κωλύσειεν.

Ἐπεὶ δ’ ἐστὶν ἡ μὲν ὀρθὴ λύσις ἐμφάνισις ψευδοῦς συλλογισμοῦ, παρ’ ὁποίαν ἐρώτησιν συμβαίνει τὸ ψεῦδος, ὁ δὲ ψευδὴς συλλογισμὸς λέγεται διχῶς (ἢ γὰρ εἰ συλλελόγισται ψεῦδος, ἢ εἰ μὴ ὢν συλλογισμὸς δοκεῖ εἶναι συλλογισμός), εἴη ἂν ἥ τε εἰρημένη νῦν λύσις καὶ ἡ τοῦ φαινομένου συλλογισμοῦ παρ’ ὅ τι φαίνεται τῶν ἐρωτημάτων διόρθωσις, ὥστε συμβαίνει τῶν λόγων τοὺς μὲν συλλελογισμένους ἀνελόντα, τοὺς δὲ φαινομένους διελόντα λύειν. πάλιν δ’ ἐπεὶ τῶν συλλελογισμένων λόγων οἱ μὲν ἀληθὲς οἱ δὲ ψεῦδος ἔχουσι τὸ συμπέρασμα, τοὺς μὲν κατὰ τὸ συμπέρασμα ψευδεῖς διχῶς ἐνδέχεται λύειν· καὶ γὰρ τῷ ἀνελεῖν τι τῶν ἠρωτημένων καὶ τῷ δεῖξαι τὸ συμπέρασμα ἔχον οὐχ οὕτως· τοὺς δὲ κατὰ τὰς προτάσεις τῷ ἀνελεῖν τι μόνον· τὸ γὰρ συμπέρασμα ἀληθές. ὥστε τοῖς βουλομένοις λύειν λόγον πρῶτον μὲν σκεπτέον εἰ συλλελόγισται ἢ ἀσυλλόγιστος, εἶτα πότερον ἀληθὲς τὸ συμπέρασμα ἢ ψεῦδος, ὅπως ἢ διαιροῦντες ἢ ἀναιροῦντες λύωμεν, καὶ ἀναιροῦντες ἢ ὧδε ἢ ὧδε, καθάπερ ἐλέχθη πρότερον. διαφέρει δὲ πλεῖστον ἐρωτώμενόν τε καὶ μὴ λύειν λόγον· τὸ μὲν γὰρ προϊδεῖν χαλεπόν, τὸ δὲ κατὰ σχολὴν ἰδεῖν ῥᾷον.

Τῶν μὲν οὖν παρὰ τὴν ὁμωνυμίαν καὶ τὴν ἀμφιβολίαν ἐλέγχων οἱ μὲν ἔχουσι τῶν ἐρωτημάτων τι πλείω σημαῖνον, οἱ δὲ τὸ συμπέρασμα πολλαχῶς λεγόμενον· οἷον ἐν μὲν τῷ “σιγῶντα λέγειν” τὸ συμπέρασμα διττόν, ἐν δὲ τῷ “μὴ συνεπίστασθαι τὸν ἐπιστάμενον” ἓν τῶν ἐρωτημάτων ἀμφίβολον. καὶ τὸ διττὸν ὁτὲ μὲν ἔστιν ὁτὲ δ’ οὐκ ἔστιν, ἀλλὰ σημαίνει τὸ διττὸν τὸ μὲν ὂν τὸ δ’ οὐκ ὄν.

Ὅσοις μὲν οὖν ἐν τῷ τέλει τὸ πολλαχῶς, ἂν μὴ προσλάβῃ τὴν ἀντίφασιν οὐ γίνεται ἔλεγχος, οἷον ἐν τῷ τὸν τυφλὸν ὁρᾶν· ἄνευ γὰρ ἀντιφάσεως οὐκ ἦν ἔλεγχος. ὅσοις δ’ ἐν τοῖς ἐρωτήμασιν, οὐκ ἀνάγκη προαποφῆσαι τὸ διττόν· οὐ γὰρ πρὸς τοῦτο ἀλλὰ διὰ τοῦτο ὁ λόγος. ἐν ἀρχῇ μὲν οὖν πρὸς τὸ διπλοῦν καὶ ὄνομα καὶ λόγον οὕτως ἀποκριτέον, ὅτι ἔστιν ὡς, ἔστι δ’ ὡς οὔ, ὥσπερ τῷ “σιγῶντα λέγειν” ὅτι ἔστιν ὡς, ἔστι δ’ ὡς οὔ, καὶ τὰ δέοντα πρακτέον ἔστιν ἅ, ἔστι δ’ ἃ οὔ· τὰ γὰρ δέοντα λέγεται πολλαχῶς· ἐὰν δὲ λάθῃ, ἐπὶ τέλει προστιθέντα τῇ ἐρωτήσει διορθωτέον· “ἆρ’ ἔστι σιγῶντα λέγειν;”, “οὔ, ἀλλὰ τόνδε σιγῶντα”. καὶ ἐν τοῖς ἔχουσι δὲ τὸ πλεοναχῶς ἐν ταῖς προτάσεσιν ὁμοίως· “οὐκ ἄρα συνεπίστανται ὅ τι ἐπίστανται;”, “ναί, ἀλλ’ οὐχ οἱ οὕτως ἐπιστάμενοι”. οὐ γὰρ ταὐτόν ἐστιν ὅτι οὐκ ἔστι συνεπίστασθαι καὶ ὅτι τοὺς ὡδὶ ἐπισταμένους οὐκ ἔστιν. ὅλως τε μαχετέον, ἂν καὶ ἁπλῶς συλλογίζηται, ὅτι οὐχ ὃ ἔφησεν ἀπέφησε πρᾶγμα ἀλλ’ ὄνομα, ὥστ’ οὐκ ἔλεγχος.

Φανερὸν δὲ καὶ τοὺς παρὰ τὴν διαίρεσιν καὶ σύνθεσιν πῶς λυτέον· ἂν γὰρ διαιρούμενος καὶ συντιθέμενος ὁ λόγος ἕτερον σημαίνῃ, συμπεραινομένου τοὐναντίον λεκτέον. εἰσὶ δὲ πάντες οἱ τοιοῦτοι λόγοι παρὰ τὴν σύνθεσιν ἢ διαίρεσιν· “ἆρ’ ᾧ εἶδες σὺ τοῦτον τυπτόμενον, τούτῳ ἐτύπτετο οὗτος; καὶ ᾧ ἐτύπτετο, τούτῳ σὺ εἶδες;”. ἔχει μὲν οὖν τι κἀκ τῶν ἀμφιβόλων ἐρωτημάτων, ἀλλ’ ἔστι παρὰ σύνθεσιν. οὐ γάρ ἐστι διττὸν τὸ παρὰ τὴν διαίρεσιν· οὐ γὰρ ὁ αὐτὸς λόγος γίνεται, διαιρούμενος, εἴπερ μὴ ‹ὡς› καὶ τὸ “ὄρος”, [καὶ] “ὅρος” τῇ προσῳδίᾳ λεχθέν, σημαίνει ἕτερον. ἀλλ’ ἐν μὲν τοῖς γεγραμμένοις τὸ αὐτὸ ‹τὸ› ὄνομα, ὅταν ἐκ τῶν αὐτῶν στοιχείων γεγραμμένον ᾖ καὶ ὡσαύτως (κἀκεῖ δ’ ἤδη παράσημα ποιοῦνται), τὰ δὲ φθεγγόμενα οὐ ταὐτά. ὥστ’ οὐ διττὸν τὸ παρὰ διαίρεσιν. φανερὸν δὲ καὶ ὅτι οὐ πάντες οἱ ἔλεγχοι παρὰ τὸ διττόν, καθάπερ τινές φασιν.

Διαιρετέον οὖν τῷ ἀποκρινομένῳ· οὐ γὰρ ταὐτὸ ‹τὸ› ἰδεῖν “τοῖς ὀφθαλμοῖς τυπτόμενον” καὶ τὸ φάναι “ἰδεῖν τοῖς ὀφθαλμοῖς” τυπτόμενον. καὶ ὁ Εὐθυδήμου δὲ λόγος “ἆρ’ οἶδας σὺ νῦν οὔσας ἐν Πειραιεῖ τριήρεις ἐν Σικελίᾳ ὤν;” καὶ πάλιν “ἆρ’ ἔστιν ἀγαθὸν ὄντα σκυτέα μοχθηρὸν εἶναι; εἴη δ’ ἄν τις ἀγαθὸς ὢν σκυτεὺς μοχθηρός· ὥστ’ ἔσται ἀγαθὸς σκυτεὺς μοχθηρός”. “ἆρ’ ὧν αἱ ἐπιστῆμαι σπουδαῖαι, σπουδαῖα τὰ μαθήματα; τοῦ δὲ κακοῦ σπουδαία ἡ ἐπιστήμη· σπουδαῖον ἄρα μάθημα τὸ κακόν. ἀλλὰ μὴν καὶ κακὸν καὶ μάθημα τὸ κακόν, ὥστε κακὸν μάθημα τὸ κακόν. ἀλλ’ ἔστι κακῶν σπουδαία ἡ ἐπιστήμη.” “ἆρ’ ἀληθὲς εἰπεῖν νῦν ὅτι σὺ γέγονας; γέγονας ἄρα νῦν.” ἢ ἄλλο σημαίνει διαιρεθέν; ἀληθὲς γὰρ εἰπεῖν νῦν ὅτι σὺ γέγονας, ἀλλ’ οὐ “νῦν γέγονας”. “ἆρ’ ὡς δύνασαι καὶ ἃ δύνασαι, οὕτως καὶ ταῦτα ποιήσαις ἄν; οὐ κιθαρίζων δ’ ἔχεις δύναμιν τοῦ κιθαρίζειν· κιθαρίσαις ἂν ἄρα οὐ κιθαρίζων.” ἢ οὐ τούτου ἔχει τὴν δύναμιν, τοῦ οὐ κιθαρίζων κιθαρίζειν, ἀλλ’, ὅτε οὐ ποιεῖ, τοῦ ποιεῖν.

Λύουσι δέ τινες τοῦτον καὶ ἄλλως. εἰ γὰρ ἔδωκεν ὡς δύναται ποιεῖν, οὔ φασι συμβαίνειν μὴ κιθαρίζοντα κιθαρίζειν· οὐ γὰρ πάντως ὡς δύναται ποιεῖν δεδόσθαι ποιήσειν· οὐ ταὐτὸ δ’ εἶναι ὡς δύναται καὶ πάντως ὡς δύναται ποιεῖν. ἀλλὰ φανερὸν ὅτι οὐ καλῶς λύουσιν· τῶν γὰρ παρὰ ταὐτὸν λόγων ἡ αὐτὴ λύσις, αὕτη δ’ οὐχ ἁρμόσει ἐπὶ πάντας οὐδὲ πάντως ἐρωτωμένοις, ἀλλ’ ἔστι πρὸς τὸν ἐρωτῶντα, οὐ πρὸς τὸν λόγον. Παρὰ δὲ τὴν προσῳδίαν λόγοι μὲν οὐκ εἰσίν, οὔτε τῶν γεγραμμένων οὔτε τῶν λεγομένων, πλὴν εἴ τινες ὀλίγοι γένοιντ’ ἄν, οἷον οὗτος ὁ λόγος· “ἆρά γ’ ἐστὶ τὸ οὗ καταλύεις οἰκία;” “ναί.” “οὐκοῦν τὸ ‘οὐ καταλύεις’ τοῦ ‘καταλύεις’ ἀπόφασις;” “ναί.” “ἔφησας δ’ εἶναι τὸ οὗ καταλύεις οἰκίαν· ἡ οἰκία ἄρα ἀπόφασις.” ὡς δὴ λυτέον, δῆλον· οὐ γὰρ τὸ αὐτὸ σημαίνει ὀξύτερον τὸ δὲ βαρύτερον ῥηθέν.

Δῆλον δὲ καὶ τοῖς παρὰ τὸ ὡσαύτως λέγεσθαι τὰ μὴ ταὐτὰ πῶς ἀπαντητέον, ἐπείπερ ἔχομεν τὰ γένη τῶν κατηγοριῶν. ὁ μὲν γὰρ ἔδωκεν ἐρωτηθεὶς μὴ ὑπάρχειν τι τούτων ὅσα τί ἐστι σημαίνει· ὁ δ’ ἔδειξεν ὑπάρχον τι τῶν πρός τι ἢ ποσῶν, δοκούντων δὲ τί ἐστι σημαίνειν διὰ τὴν λέξιν· οἷον ἐν τῷδε τῷ λόγῳ· “ἆρ’ ἐνδέχεται τὸ αὐτὸ ἅμα ποιεῖν τε καὶ πεποιηκέναι;” “οὔ.” “ἀλλὰ μὴν ὁρᾶν γέ τι ἅμα καὶ ἑωρακέναι τὸ αὐτὸ καὶ κατὰ ταὐτὸ ἐνδέχεται.” “ἆρ’ ἔστι τι τῶν πάσχειν ποιεῖν τι;” “οὔ.” “οὐκοῦν τὸ τέμνεται καίεται αἰσθάνεται ὁμοίως λέγεται καὶ πάντα πάσχειν τι σημαίνει; πάλιν δὲ τὸ λέγειν τρέχειν ὁρᾶν ὁμοίως ἀλλήλοις λέγεται· ἀλλὰ μὴν τό γ’ ὁρᾶν αἰσθάνεσθαί τί ἐστιν, ὥστε καὶ πάσχειν τι ἅμα καὶ ποιεῖν.” εἰ δή τις ἐκεῖ, δοὺς μὴ ἐνδέχεσθαι ἅμα ταὐτὸ ποιεῖν καὶ πεποιηκέναι, τὸ ὁρᾶν καὶ ἑωρακέναι φαίη ἐγχωρεῖν, οὔπω ἐλήλεγκται, εἰ μὴ λέγοι τὸ ὁρᾶν ποιεῖν τι ἀλλὰ πάσχειν· προσδεῖται γὰρ τούτου τοῦ ἐρωτήματος. ἀλλ’ ὑπὸ τοῦ ἀκούοντος ὑπολαμβάνεται δεδωκέναι, ὅτε τὸ τέμνειν ποιεῖν τι καὶ τὸ τετμηκέναι πεποιηκέναι ἔδωκε καὶ ὅσα ἄλλα ὁμοίως λέγεται· τὸ γὰρ λοιπὸν αὐτὸς προστίθησιν ὁ ἀκούων ὡς ὁμοίως λεγόμενον. τὸ δὲ λέγεται μὲν οὐχ ὁμοίως, φαίνεται δὲ διὰ τὴν λέξιν. τὸ αὐτὸ δὲ συμβαίνει ὅπερ ἐν ταῖς ὁμωνυμίαις· οἴεται γὰρ ἐν τοῖς ὁμωνύμοις ὁ ἀγνὼς τῶν λόγων ὃ ἔφησεν ἀποφῆσαι πρᾶγμα, οὐκ ὄνομα. τῷ δὲ ἔτι προσδεῖ ἐρωτήματος εἰ ἐφ’ ἓν βλέπων λέγει τὸ ὁμώνυμον· οὕτως γὰρ δόντος ἔσται ἔλεγχος.

Ὅμοιοι δὲ καὶ οἵδε οἱ λόγοι τούτοις, “εἰ ὅ τις ἔχων ὕστερον μὴ ἔχει, ἀπέβαλεν· ὁ γὰρ ἕνα μόνον ἀποβαλὼν ἀστράγαλον οὐχ ἕξει δέκα ἀστραγάλους”. ἢ ὃ μὲν μὴ ἔχει πρότερον ἔχων, ἀποβέβληκεν, ὅσα δὲ μὴ ἔχει ἢ ὅσα, οὐκ ἀνάγκη τοσαῦτα ἀποβαλεῖν; ἐρωτήσας οὖν ὃ ἔχει, συνάγει ἐπὶ τοῦ ὅσα· τὰ γὰρ δέκα ποσά. εἰ οὖν ἤρετο ἐξ ἀρχῆς, [εἰ] “ὅσα τις μὴ ἔχει πρότερον ἔχων, ἆρά γε ἀποβέβληκε τοσαῦτα;”, οὐδεὶς ἂν ἔδωκεν, ἀλλ’ ἢ τοσαῦτα ἢ τούτων τι. καὶ ὅτι δοίη ἄν τις ὃ μὴ ἔχει· οὐ γὰρ ἔχει ἕνα μόνον ἀστράγαλον. ἢ οὐ δέδωκεν ὃ οὐκ εἶχεν, ἀλλ’ ὡς οὐκ εἶχε, τὸν ἕνα· τὸ γὰρ μόνον οὐ τόδε σημαίνει οὐδὲ τοιόνδε οὐδὲ τοσόνδε, ἀλλ’ ὡς ἔχει πρός τι, οἷον ὅτι οὐ μετ’ ἄλλου, ὥσπερ ἂν εἰ ἤρετο “ἆρ’ ὃ μή τις ἔχει δοίη ἄν;”, μὴ φάντος δὲ ἔροιτο εἰ δοίη ἄν τίς τι ταχέως μὴ ἔχων ταχέως, φήσαντος δὲ συλλογίζοιτο ὅτι δοίη ἄν τις ὃ μὴ ἔχει. καὶ φανερὸν ὅτι οὐ συλλελόγισται· τὸ γὰρ ταχέως οὐ τόδε διδόναι ἀλλ’ ὧδε διδόναι ἐστίν· ὡς δὲ μὴ ἔχει τις, δοίη ἄν, οἷον ἡδέως ἔχων δοίη ἂν λυπηρῶς.

Ὅμοιοι δὲ καὶ οἱ τοιοίδε πάντες· “ἆρ’ ᾗ μὴ ἔχει χειρὶ τύπτοι ἄν”, ἢ “ᾧ μὴ ἔχει ὀφθαλμῷ ἴδοι ἄν;” οὐ γὰρ ἔχει ἕνα μόνον. λύουσι μὲν οὖν τινες λέγοντες ὡς καὶ ἔχει ἕνα μόνον καὶ ὀφθαλμὸν καὶ ἄλλ’ ὁτιοῦν ὁ πλείω ἔχων· οἱ δὲ ὡς καὶ ὃ ἔχει ἔλαβεν· ἐδίδου γὰρ μίαν μόνον οὗτος ψῆφον· “καὶ οὗτός γ’ ἔχει”, φασί, “μίαν μόνον παρὰ τούτου ψῆφον”· οἱ δέ, εὐθὺς τὴν ἐρώτησιν ἀναιροῦντες, ὅτι ἐνδέχεται ὃ μὴ ἔλαβεν ἔχειν, οἷον οἶνον λαβόντα ἡδύν, διαφθαρέντος ἐν τῇ λήψει ἔχειν ὀξύν. ἀλλ’ ὅπερ ἐλέχθη καὶ πρότερον, οὗτοι πάντες οὐ πρὸς τὸν λόγον ἀλλὰ πρὸς τὸν ἄνθρωπον λύουσιν. εἰ γὰρ ἦν αὕτη λύσις, δόντα τὸ ἀντικείμενον οὐχ οἷόν τε λύειν, καθάπερ ἐπὶ τῶν ἄλλων. οἷον εἰ “ἔστι μὲν ὅ, ἔστι δ’ ὃ οὔ” ἡ λύσις, ἂν ἁπλῶς δῷ λέγεσθαι, συμπεραίνεται· ἐὰν δὲ μὴ συμπεραίνηται, οὐκ ἂν εἴη ‹ἡ› λύσις. ἐν δὲ τοῖς προειρημένοις οὐδὲ πάντων διδομένων φαμὲν γίνεσθαι συλλογισμόν.

Ἔτι δὲ καὶ οἵδ’ εἰσὶ τούτων τῶν λόγων· “ἆρ’ ὃ γέγραπται, γέγραφέ τις; γέγραπται δὲ νῦν ὅτι σὺ κάθησαι, ψευδὴς λόγος· ἦν δ’ ἀληθής, ὅτ’ ἐγράφετο· ἅμα ἄρα ἐγράφετο ψευδὴς καὶ ἀληθής.” τὸ γὰρ ψευδῆ ἢ ἀληθῆ λόγον ἢ δόξαν εἶναι οὐ τόδε ἀλλὰ τοιόνδε σημαίνει· ὁ γὰρ αὐτὸς λόγος καὶ ἐπὶ τῆς δόξης. καὶ “ἆρ’ ὃ μανθάνει ὁ μανθάνων, τοῦτ’ ἔστιν ὃ μανθάνει; μανθάνει δέ τις τὸ βραδὺ ταχύ.” οὐ τοίνυν ὃ μανθάνει ἀλλ’ ὡς μανθάνει εἴρηκεν. καὶ “ἆρ’ ὃ βαδίζει τις πατεῖ; βαδίζει δὲ τὴν ἡμέραν ὅλην.” ἢ οὐχ ὃ βαδίζει ἀλλ’ ὅτε βαδίζει εἴρηκεν, οὐδὲ τὸ τὴν κύλικα πίνειν ὃ πίνει ἀλλ’ ἐξ οὗ. καὶ “ἆρ’ ὅ τις οἶδεν, ἢ μαθὼν ἢ εὑρὼν οἶδεν; ὧν δὲ τὸ μὲν εὗρε τὸ δ’ ἔμαθε, τὰ ἄμφω οὐδέτερον.” ἢ ὃ μὲν ἅπαν, ἃ δ’ οὐχ ἅπαντα; καὶ ὅτι ἔστι τις τρίτος ἄνθρωπος παρ’ αὐτὸν καὶ τοὺς καθ’ ἕκαστον· τὸ γὰρ ἄνθρωπος καὶ ἅπαν τὸ κοινὸν οὐ τόδε τι ἀλλὰ τοιόνδε τι ἢ ποσὸν ἢ πρός τι ἢ τῶν τοιούτων τι σημαίνει. ὁμοίως δὲ καὶ ἐπὶ τοῦ Κορίσκος καὶ Κορίσκος μουσικός, πότερον ταὐτὸν ἢ ἕτερον; τὸ μὲν γὰρ τόδε τι, τὸ δὲ τοιόνδε σημαίνει, ὥστ’ οὐκ ἔστιν αὐτὸ ἐκθέσθαι. οὐ τὸ ἐκτίθεσθαι δὲ ποιεῖ τὸν τρίτον ἄνθρωπον, ἀλλὰ τὸ ὅπερ τόδε τι εἶναι συγχωρεῖν· οὐ γὰρ ἔστι τόδε τι εἶναι, ὥσπερ

Καλλίας, καὶ ὅπερ ἄνθρωπός ἐστιν. οὐδ’ εἴ τις τὸ ἐκτιθέμενον μὴ ὅπερ τόδε τι εἶναι λέγοι ἀλλ’ ὅπερ ποιόν, οὐδὲν διοίσει· ἔσται γὰρ τὸ παρὰ τοὺς πολλοὺς ἕν τι, οἷον τὸ ἄνθρωπος. φανερὸν οὖν ὅτι οὐ δοτέον τόδε τι εἶναι τὸ κοινῇ κατηγορούμενον ἐπὶ πᾶσιν, ἀλλ’ ἤτοι ποιὸν ἢ πρός τι ἢ ποσὸν ἢ τῶν τοιούτων τι σημαίνειν.

Ὅλως δ’ ἐν τοῖς παρὰ τὴν λέξιν λόγοις ἀεὶ κατὰ τὸ ἀντικείμενον ἔσται ἡ λύσις ἢ παρ’ ὅ ἐστιν ὁ λόγος. οἷον εἰ παρὰ σύνθεσιν ὁ λόγος, ἡ λύσις διελόντι, εἰ δὲ παρὰ διαίρεσιν, συνθέντι. πάλιν εἰ παρὰ προσῳδίαν ὀξεῖαν, ἡ βαρεῖα προσῳδία λύσις, εἰ δὲ παρὰ βαρεῖαν, ἡ ὀξεῖα. εἰ δὲ παρ’ ὁμωνυμίαν, ἔστι τὸ ἀντικείμενον ὄνομα εἰπόντα λύειν· οἷον, εἰ ἄψυχον συμβαίνει λέγειν, ἀποφήσαντα μὴ εἶναι δηλοῦν ὡς ἔστιν ἔμψυχον· εἰ δ’ ἄψυχον ἔφησεν, ὁ δ’ ἔμψυχον συνελογίσατο, [λέγειν] ὡς ἔστιν ἄψυχον. ὁμοίως δὲ καὶ ἐπὶ τῆς ἀμφιβολίας. εἰ δὲ παρ’ ὁμοιότητα λέξεως, τὸ ἀντικείμενον ἔσται λύσις. “ἆρ’ ὃ μὴ ἔχει, δοίη ἄν τις;” ἢ οὐχ ὃ μὴ ἔχει, ἀλλ’ ὡς οὐκ ἔχει, οἷον ἕνα μόνον ἀστράγαλον. “ἆρ’ ὃ ἐπίσταται, μαθὼν ἢ εὑρὼν ἐπίσταται;” ἀλλ’ οὐχ ἃ ἐπίσταται. καὶ εἰ ὃ βαδίζει πατεῖ, ἀλλ’ οὐχ ὅτε. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Πρὸς δὲ τοὺς παρὰ τὸ συμβεβηκὸς μία μὲν ἡ αὐτὴ λύσις πρὸς ἅπαντας. ἐπεὶ γὰρ ἀδιόριστόν ἐστι τὸ πότε λεκτέον ἐπὶ τοῦ πράγματος ὅταν ἐπὶ τοῦ συμβεβηκότος ὑπάρχῃ, καὶ ἐπ’ ἐνίων μὲν δοκεῖ καὶ φασίν, ἐπ’ ἐνίων δ’ οὔ φασιν ἀναγκαῖον εἶναι, ῥητέον οὖν συμβιβασθέντος ὁμοίως πρὸς ἅπαντας ὅτι οὐκ ἀναγκαῖον, ἔχειν δὲ δεῖ προφέρειν τὸ “οἷον”. εἰσὶ δὲ πάντες οἱ τοιοίδε τῶν λόγων παρὰ τὸ συμβεβηκός· “ἆρ’ οἶδας ὃ μέλλω σε ἐρωτᾶν;” “ἆρ’ οἶδας τὸν προσιόντα, ἢ τὸν ἐγκεκαλυμμένον;” “ἆρ’ ὁ ἀνδριὰς σόν ἐστιν ἔργον, ἢ σὸς ὁ κύων πατήρ;” “ἆρα τὰ ὀλιγάκις ὀλίγα ὀλίγα;” φανερὸν γὰρ ἐν ἅπασι τούτοις ὅτι οὐκ ἀνάγκη τὸ κατὰ τοῦ συμβεβηκότος καὶ κατὰ τοῦ πράγματος ἀληθεύεσθαι· μόνοις γὰρ τοῖς κατὰ τὴν οὐσίαν ἀδιαφόροις καὶ ἓν οὖσιν ἅπαντα δοκεῖ ταὐτὰ ὑπάρχειν. τῷ δ’ ἀγαθῷ οὐ ταὐτόν ἐστιν ἀγαθῷ τ’ εἶναι καὶ μέλλοντι ἐρωτᾶσθαι, οὐδὲ τῷ προσιόντι ἢ ἐγκεκαλυμμένῳ προσιόντι τε εἶναι καὶ Κορίσκῳ· ὥστ’ οὐκ εἰ οἶδα τὸν Κορίσκον, ἀγνοῶ δὲ τὸν προσιόντα, τὸν αὐτὸν οἶδα καὶ ἀγνοῶ· οὐδ’ εἰ τοῦτ’ ἔστιν ἐμόν, ἔστι δ’ ἔργον, ἐμόν ἐστιν ἔργον, ἀλλ’ ἢ κτῆμα ἢ πρᾶγμα ἢ ἄλλο τι. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων.

Λύουσι δέ τινες διαιροῦντες τὴν ἐρώτησιν. φασὶ γὰρ ἐνδέχεσθαι ταὐτὸ πρᾶγμα εἰδέναι καὶ ἀγνοεῖν, ἀλλὰ μὴ κατὰ ταὐτό· τὸν οὖν προσιόντα οὐκ εἰδότες, τὸν δὲ Κορίσκον εἰδότες, ταὐτὸ μὲν εἰδέναι καὶ ἀγνοεῖν φασιν, ἀλλ’ οὐ κατὰ ταὐτό. καίτοι πρῶτον μέν, καθάπερ ἤδη εἴπομεν, δεῖ τῶν παρὰ ταὐτὸ λόγων τὴν αὐτὴν εἶναι διόρθωσιν. αὕτη δ’ οὐκ ἔσται, ἄν τις μὴ ἐπὶ τοῦ εἰδέναι ἀλλ’ ἐπὶ τοῦ εἶναι ἤ πως ἔχειν τὸ αὐτὸ ἀξίωμα λαμβάνῃ, οἷον “εἰ ὅδε ἐστὶ πατήρ, ἔστι δὲ σός”· εἰ γὰρ ἐπ’ ἐνίων τοῦτ’ ἔστιν ἀληθὲς καὶ ἐνδέχεται τὸ αὐτὸ εἰδέναι καὶ ἀγνοεῖν, ἀλλ’ ἐνταῦθα οὐδὲν κοινωνεῖ τὸ λεχθέν. οὐδὲν δὲ κωλύει τὸν αὐτὸν λόγον πλείους μοχθηρίας ἔχειν, ἀλλ’ οὐχ ἡ πάσης μοχθηρίας ἐμφάνισις λύσις ἐστίν· ἐγχωρεῖ γὰρ ὅτι μὲν ψεῦδος συλλελόγισται δεῖξαί τινα, παρ’ ὃ δὲ μὴ δεῖξαι, οἷον τὸν Ζήνωνος λόγον, ὅτι οὐκ ἔστι κινηθῆναι. ὥστε καὶ εἴ τις ἐπιχειρεῖ συνάγειν ὡς δυνατόν, ἁμαρτάνει, κἂν [εἰ] μυριάκις ᾖ συλλελογισμένος· οὐ γάρ ἐστιν αὕτη λύσις· ἦν γὰρ ἡ λύσις ἐμφάνισις ψευδοῦς συλλογισμοῦ παρ’ ὃ ψευδής. εἰ οὖν μὴ συλλελόγισται, εἰ καὶ ἀληθὲς ἢ ψεῦδος † ἐπιχειρεῖ συνάγειν, ἡ ἐκείνου δήλωσις λύσις ἐστίν. ἴσως δὲ καὶ τοῦτ’ ἐπ’ ἐνίων οὐδὲν κωλύει συμβαίνειν· πλὴν ἐπί γε τούτων οὐδὲ τοῦτο δόξειεν ἄν· καὶ γὰρ τὸν Κορίσκον ὅτι Κορίσκος οἶδε καὶ τὸ προσιὸν ὅτι προσιόν. ἐνδέχεσθαι δὲ δοκεῖ τὸ αὐτὸ εἰδέναι καὶ μή, οἷον ὅτι μὲν λευκὸν εἰδέναι, ὅτι δὲ μουσικὸν μὴ γνωρίζειν· οὕτω γὰρ τὸ αὐτὸ οἶδε καὶ οὐκ οἶδεν, ἀλλ’ οὐ κατὰ ταὐτόν. τὸ δὲ προσιὸν καὶ Κορίσκον ‹ὄν›, καὶ ὅτι προσιὸν καὶ ὅτι Κορίσκος, οἶδεν.

Ὁμοίως δ’ ἁμαρτάνουσι καὶ οἱ λύοντες ὅτι ἅπας ἀριθμὸς ὀλίγος, ὥσπερ οὓς εἴπομεν· εἰ γάρ, μὴ συμπεραινομένου, τοῦτο παραλιπόντες ἀληθὲς συμπεπεράνθαι φασί (πάντα γὰρ εἶναι καὶ πολὺν καὶ ὀλίγον), ἁμαρτάνουσιν.

Ἔνιοι δὲ καὶ τῷ διττῷ λύουσι τοὺς συλλογισμούς, οἷον ὅτι σός ἐστι πατὴρ ἢ υἱὸς ἢ δοῦλος. καίτοι φανερὸν ὡς εἰ παρὰ τὸ πολλαχῶς λέγεσθαι φαίνεται ὁ ἔλεγχος, δεῖ τοὔνομα ἢ τὸν λόγον κυρίως εἶναι πλειόνων. τὸ δὲ τόνδ’ εἶναι τοῦδε τέκνον οὐδεὶς λέγει κυρίως, εἰ δεσπότης ἐστὶ τέκνου, ἀλλὰ παρὰ τὸ συμβεβηκὸς ἡ σύνθεσίς ἐστιν· “ἆρ’ ἐστὶ τοῦτο σόν;” “ναί.” “ἔστι δὲ τοῦτο τέκνον· σὸν ἄρα τοῦτο τέκνον.” ἀλλ’ οὐ σὸν τέκνον ὅτι συμβέβηκεν εἶναι καὶ σὸν καὶ τέκνον.

Καὶ τὸ εἶναι τῶν κακῶν τι ἀγαθόν· “ἡ γὰρ φρόνησίς ἐστιν ἐπιστήμη τῶν κακῶν”. τὸ δὲ τοῦτο τούτων εἶναι οὐ λέγεται πολλαχῶς, ἀλλὰ κτῆμα. εἰ δ’ ἄρα πολλαχῶς (καὶ γὰρ τὸν ἄνθρωπον τῶν ζῴων φαμὲν εἶναι, ἀλλ’ οὔ τι κτῆμα· καὶ ἐάν τι πρὸς τὰ κακὰ λέγηται ὡς τινός, διὰ τοῦτο τῶν κακῶν ἐστιν, ἀλλ’ οὐ τοῦτο τῶν κακῶν), παρὰ τὸ πῇ οὖν καὶ ἁπλῶς φαίνεται. καίτοι ἐνδέχεται ἴσως ἀγαθὸν εἶναί τι τῶν κακῶν διττῶς, ἀλλ’ οὐκ ἐπὶ τοῦ λόγου τούτου, ἀλλ’ εἴ τι δοῦλον εἴη ἀγαθὸν μοχθηροῦ, μᾶλλον. ἴσως δ’ οὐδ’ οὕτως· οὐ γὰρ εἰ ἀγαθὸν καὶ τούτου, ἀγαθὸν τούτου ἅμα. οὐδὲ τὸ τὸν ἄνθρωπον φάναι τῶν ζῴων εἶναι [οὐ] λέγεται πολλαχῶς· οὐ γὰρ εἴ ποτέ τι

σημαίνομεν ἀφελόντες, τοῦτο λέγεται πολλαχῶς· καὶ γὰρ τὸ ἥμισυ εἰπόντες τοῦ ἔπους "δός μοι Ἰλιάδα" σημαίνομεν, οἷον τὸ "μῆνιν ἄειδε, θεά".

Τοὺς δὲ παρὰ τὸ κυρίως τόδε ἢ πῂ ἢ ποὺ ἢ πὼς ἢ πρός τι λέγεσθαι, καὶ μὴ ἁπλῶς, λυτέον σκοποῦντι τὸ συμπέρασμα πρὸς τὴν ἀντίφασιν, εἰ ἐνδέχεται τούτων τι πεπονθέναι. τὰ γὰρ ἐναντία καὶ τὰ ἀντικείμενα καὶ φάσιν καὶ ἀπόφασιν ἁπλῶς μὲν ἀδύνατον ὑπάρχειν τῷ αὐτῷ, πῂ μέντοι ἑκάτερον ἢ πρός τι ἢ πώς, ἢ τὸ μὲν πῂ τὸ δ' ἁπλῶς, οὐδὲν κωλύει. ὥστ' εἰ τόδε μὲν ἁπλῶς τόδε δὲ πῄ, οὔπω ἔλεγχος, τοῦτο δ' ἐν τῷ συμπεράσματι θεωρητέον πρὸς τὴν ἀντίφασιν.

Εἰσὶ δὲ πάντες οἱ τοιοῦτοι λόγοι τοῦτ' ἔχοντες· "ἆρ' ἐνδέχεται τὸ μὴ ὂν εἶναι; ἀλλὰ μὴν ἔστι γέ τι μὴ ὄν." ὁμοίως δὲ καὶ τὸ ὂν οὐκ ἔσται· οὐ γὰρ ἔσται τι τῶν ὄντων. "ἆρ' ἐνδέχεται τὸν αὐτὸν ἅμα εὐορκεῖν καὶ ἐπιορκεῖν;" "ἆρ' ἐγχωρεῖ τὸν αὐτὸν ἅμα τῷ αὐτῷ πείθεσθαι καὶ ἀπειθεῖν;" ἢ οὔτε τὸ εἶναί τι καὶ εἶναι ταὐτόν (τὸ γὰρ μὴ ὂν οὐκ εἰ ἔστι τι, καὶ ἔστιν ἁπλῶς), οὔτ' εἰ εὐορκεῖ τόδε ἢ τῇδε, ἀνάγκη καὶ εὐορκεῖν (ὁ γὰρ ὀμόσας ἐπιορκήσειν εὐορκεῖ ἐπιορκῶν τοῦτο μόνον, εὐορκεῖ δὲ οὔ)· οὐδ' ὁ ἀπειθῶν πείθεται, ἀλλὰ τὶ πείθεται. ὅμοιος δ' ὁ λόγος καὶ περὶ τοῦ ψεύδεσθαι τὸν αὐτὸν ἅμα καὶ ἀληθεύειν, ἀλλὰ διὰ τὸ μὴ εἶναι εὐθεώρητον πότερον ἄν τις ἀποδοίη, τὸ ἁπλῶς ἀληθεύειν ἢ ψεύδεσθαι, δύσκολον φαίνεται. κωλύει δ' αὐτὸν οὐδὲν ἁπλῶς μὲν εἶναι ψευδῆ πῂ δ' ἀληθῆ ἤ τινος, καὶ εἶναι ἀληθῆ τινά, ἀληθῆ δὲ αὐτὸν μή. ὁμοίως δὲ καὶ ἐπὶ τῶν πρός τι καὶ ποὺ καὶ ποτέ· πάντες γὰρ οἱ τοιοῦτοι λόγοι παρὰ τοῦτο συμβαίνουσιν. "ἆρ' ἡ ὑγίεια ἢ ὁ πλοῦτος ἀγαθόν; ἀλλὰ τῷ ἄφρονι καὶ μὴ ὀρθῶς χρωμένῳ οὐκ ἀγαθόν· ἀγαθὸν ἄρα καὶ οὐκ ἀγαθόν." "ἆρα τὸ ὑγιαίνειν ἢ δύνασθαι ἐν πόλει βέλτιον; ἀλλ' ἔστιν ὅτε οὐ βέλτιον· ταὐτὸν ἄρα τῷ αὐτῷ ἀγαθὸν καὶ οὐκ ἀγαθόν." ἢ οὐδὲν κωλύει ἁπλῶς ὂν ἀγαθὸν τῷδε μὴ εἶναι ἀγαθόν, ἢ τῷδε μὲν ἀγαθόν, ἀλλ' οὐ νῦν ἢ οὐκ ἐνταῦθ' ἀγαθόν; "ἆρ' ὃ μὴ βούλοιτ' ἂν ὁ φρόνιμος, κακόν; ἀποβαλεῖν δ' οὐ βούλεται τἀγαθόν· κακὸν ἄρα τἀγαθόν." οὐ γὰρ ταὐτὸν εἰπεῖν τἀγαθὸν εἶναι κακὸν καὶ τὸ ἀποβαλεῖν τἀγαθόν. ὁμοίως δὲ καὶ ὁ τοῦ κλέπτου λόγος· οὐ γάρ, εἰ κακόν ἐστιν ὁ κλέπτης, καὶ τὸ λαβεῖν ἐστι κακόν. οὔκουν τὸ κακὸν βούλεται, ἀλλὰ τἀγαθόν· τὸ γὰρ λαβεῖν ἀγαθόν. καὶ ἡ νόσος κακόν ἐστιν, ἀλλ' οὐ τὸ ἀποβαλεῖν νόσον. "ἆρα τὸ δίκαιον τοῦ ἀδίκου καὶ τὸ δικαίως τοῦ ἀδίκως αἱρετώτερον; ἀλλ' ἀποθανεῖν ἀδίκως αἱρετώτερον." "ἆρα δίκαιόν ἐστι τὰ αὑτοῦ ἔχειν ἕκαστον; ἃ δ' ἄν τις κρίνῃ κατὰ δόξαν τὴν αὑτοῦ, κἂν ᾖ ψευδής, κύριά ἐστιν ἐκ τοῦ νόμου· τὸ αὐτὸ ἄρα δίκαιον καὶ οὐ δίκαιον"· καὶ "πότερον δεῖ κρίνειν, τὸν τὰ δίκαια λέγοντα ἢ τὸν τὰ ἄδικα; ἀλλὰ μὴν καὶ τὸν ἀδικούμενον δίκαιόν ἐστιν

ἱκανῶς λέγειν ἃ ἔπαθεν· ταῦτα δ’ ἦν ἄδικα.” οὐ γάρ, εἰ παθεῖν τι ἀδίκως αἱρετόν, τὸ ἀδίκως αἱρετώτερον τοῦ δικαίως, ἀλλ’ ἁπλῶς μὲν τὸ δικαίως, τοδὶ μέντοι οὐδὲν κωλύει ἀδίκως ἢ δικαίως. καὶ τὸ ἔχειν τὰ αὑτοῦ δίκαιον, τὸ δὲ τἀλλότρια οὐ δίκαιον· κρίσιν μέντοι ταύτην δικαίαν εἶναι οὐδὲν κωλύει, οἷον ἂν ᾖ κατὰ δόξαν τοῦ κρίναντος· οὐ γάρ, εἰ δίκαιον τῳδὶ ἢ ὡδί, καὶ ἁπλῶς δίκαιον. ὁμοίως δὲ καὶ ἄδικα ὄντα οὐδὲν κωλύει λέγειν γε αὐτὰ δίκαιον εἶναι· οὐ γάρ, εἰ λέγειν δίκαιον, ἀνάγκη δίκαια εἶναι, ὥσπερ οὐδ’ εἰ ὠφέλιμον λέγειν, ὠφέλιμα. ὁμοίως δὲ καὶ ἐπὶ τῶν δικαίων. ὥστ’ οὐκ εἰ τὰ λεγόμενα ἄδικα, ὁ λέγων ἄδικα νικᾶται· λέγει γὰρ ἃ λέγειν ἐστὶ δίκαια, ἁπλῶς δὲ καὶ παθεῖν ἄδικα.

Τοῖς δὲ παρὰ τὸν ὁρισμὸν γινομένοις τοῦ ἐλέγχου, καθάπερ ὑπεγράφη πρότερον, ἀπαντητέον σκοποῦσι τὸ συμπέρασμα πρὸς τὴν ἀντίφασιν, ὅπως ἔσται τὸ αὐτὸ καὶ κατὰ τὸ αὐτὸ καὶ πρὸς τὸ αὐτὸ καὶ ὡσαύτως καὶ ἐν τῷ αὐτῷ χρόνῳ. ἐὰν δ’ ἐν ἀρχῇ προσέρηται, οὐχ ὁμολογητέον ὡς ἀδύνατον τὸ αὐτὸ εἶναι διπλάσιον καὶ μὴ διπλάσιον, ἀλλὰ φατέον, μὴ μέντοι ὡδὶ ὥς ποτ’ ἦν τὸ ἐλέγχεσθαι διωμολογημένον. εἰσὶ δὲ πάντες οἵδ’ οἱ λόγοι παρὰ τὸ τοιοῦτο. “ἆρ’ ὁ εἰδὼς ἕκαστον ὅτι ἕκαστον οἶδε τὸ πρᾶγμα; καὶ ὁ ἀγνοῶν ὡσαύτως; εἰδὼς δέ τις τὸν Κορίσκον ὅτι Κορίσκος ἀγνοοίη ἂν ὅτι μουσικός, ὥστε ταὐτὸ ἐπίσταται καὶ ἀγνοεῖ.” “ἆρα τὸ τετράπηχυ τοῦ τριπήχεος μεῖζον; γένοιτο δ’ ἂν ἐκ τριπήχεος τετράπηχυ κατὰ τὸ μῆκος· τὸ δὲ μεῖζον ἐλάττονος μεῖζον· αὐτὸ ἄρα αὑτοῦ κατὰ ταὐτὸ μεῖζον καὶ ἔλαττον.”

Τοὺς δὲ παρὰ τὸ αἰτεῖσθαι καὶ λαμβάνειν τὸ ἐν ἀρχῇ πυνθανομένῳ, ἂν ᾖ δῆλον, οὐ δοτέον, οὐδ’ ἂν ἔνδοξον ᾖ λέγοντι τἀληθές. ἂν δὲ λάθῃ, τὴν ἄγνοιαν διὰ τὴν μοχθηρίαν τῶν τοιούτων λόγων εἰς τὸν ἐρωτῶντα μεταστρεπτέον ὡς οὐ διειλεγμένον· ὁ γὰρ ἔλεγχος ἄνευ τοῦ ἐξ ἀρχῆς. εἶθ’ ὅτι ἐδόθη οὐχ ὡς τούτῳ χρησομένου, ἀλλ’ ὡς πρὸς τοῦτο συλλογιουμένου, τοὐναντίον ἢ ἐπὶ τῶν παρεξελέγχων.

Καὶ τοὺς διὰ τοῦ παρεπομένου συμβιβάζοντας ἐπ’ αὐτοῦ τοῦ λόγου δεικτέον. ἔστι δὲ διττὴ ἡ τῶν ἑπομένων ἀκολούθησις· ἢ γὰρ ὡς τῷ ἐν μέρει τὸ καθόλου, οἷον ἀνθρώπῳ ζῷον (ἀξιοῦται γάρ, εἰ τόδε μετὰ τοῦδε, καὶ τόδ’ εἶναι μετὰ τοῦδε), ἢ κατὰ τὰς ἀντιθέσεις (εἰ γὰρ τόδε τῷδε ἀκολουθεῖ, τῷ ἀντικειμένῳ τὸ ἀντικείμενον)· παρ’ ὃ καὶ ὁ τοῦ Μελίσσου λόγος· εἰ γὰρ τὸ γεγονὸς ἔχει ἀρχήν, τὸ ἀγένητον ἀξιοῖ μὴ ἔχειν, ὥστ’ εἰ ἀγένητος ὁ οὐρανός, καὶ ἄπειρος. τὸ δ’ οὐκ ἔστιν· ἀνάπαλιν γὰρ ἡ ἀκολούθησις.

Ὅσοι τε παρὰ τὸ προστιθέναι τι συλλογίζονται, σκοπεῖν εἰ ἀφαιρουμένου συμβαίνει μηδὲν ἧττον τὸ ἀδύνατον. κἄπειτα τοῦτο ἐμφανιστέον, καὶ λεκτέον ὡς ἔδωκεν οὐχ ὡς δοκοῦν ἀλλ’ ὡς πρὸς τὸν λόγον, ὁ δὲ κέχρηται οὐδὲν πρὸς τὸν λόγον.

Πρὸς δὲ τοὺς τὰ πλείω ἐρωτήματα ἓν ποιοῦντας εὐθὺς ἐν ἀρχῇ διοριστέον· ἐρώτησις γὰρ μία πρὸς ἣν μία ἀπόκρισις ἔστιν, ὥστ’ οὔτε πλείω καθ’ ἑνὸς οὔτε ἓν κατὰ πολλῶν, ἀλλ’ ἓν καθ’ ἑνὸς φατέον ἢ ἀποφατέον. ὥσπερ δὲ ἐπὶ τῶν ὁμωνύμων ὁτὲ μὲν ἀμφοῖν ὁτὲ δ’ οὐδετέρῳ ὑπάρχει, ὥστε μὴ ἁπλοῦ ὄντος τοῦ ἐρωτήματος ἁπλῶς ἀποκρινομένοις οὐδὲν συμβαίνει πάσχειν, ὁμοίως καὶ ἐπὶ τούτων. ὅταν μὲν οὖν τὰ πλείω τῷ ἑνὶ ἢ τὸ ἓν τοῖς πολλοῖς ὑπάρχῃ, τῷ ἁπλῶς δόντι καὶ ἁμαρτόντι ταύτην τὴν ἁμαρτίαν οὐδὲν ὑπεναντίωμα συμβαίνει, ὅταν δὲ τῷ μὲν τῷ δὲ μή, ἢ πλείω κατὰ πλειόνων. καὶ ἔστιν ὡς ὑπάρχει ἀμφότερα ἀμφοτέροις, ἔστι δ’ ὡς οὐχ ὑπάρχει πάλιν, ὥστε τοῦτ’ εὐλαβητέον· οἷον ἐν τοῖσδε τοῖς λόγοις· “εἰ τὸ μέν ἐστιν ἀγαθὸν τὸ δὲ κακόν, ὅτι ταῦτα ἀληθὲς εἰπεῖν ἀγαθὸν καὶ κακόν, καὶ πάλιν μήτ’ ἀγαθὸν μήτε κακόν (οὐκ ἔστι γὰρ ἑκάτερον ἑκάτερον), ὥστε ταὐτὸ ἀγαθὸν καὶ κακὸν καὶ οὔτ’ ἀγαθὸν οὔτε κακόν”, καὶ “εἰ ἕκαστον αὐτὸ αὑτῷ ταὐτὸ καὶ ἄλλου ἕτερον, ἐπειδὴ οὐκ ἄλλοις ταὐτὰ ἀλλ’ αὑτοῖς καὶ ἕτερα αὑτῶν, τὰ αὐτὰ ἑαυτοῖς ἕτερα καὶ τὰ αὐτά”. ἔτι “εἰ τὸ μὲν ἀγαθὸν κακὸν γίνεται, τὸ δὲ κακὸν ἀγαθόν, δύο γένοιντ’ ἄν· δυοῖν δὲ καὶ ἀνίσων ἑκάτερον αὐτὸ αὑτῷ ἴσον· ὥστε ἴσα καὶ ἄνισα αὐτὰ αὑτοῖς”.

Ἐμπίπτουσι μὲν οὖν οὗτοι καὶ εἰς ἄλλας λύσεις· καὶ γὰρ τὸ ἄμφω καὶ τὸ ἅπαντα πλείω σημαίνει· οὔκουν ταὐτόν, πλὴν ὄνομα, συμβαίνει φῆσαι καὶ ἀποφῆσαι. τοῦτο δ’ οὐκ ἦν ἔλεγχος, ἀλλὰ φανερὸν ὅτι μὴ μιᾶς ἐρωτήσεως τῶν πλειόνων γινομένης, ἀλλ’ ἓν καθ’ ἑνὸς φάντος ἢ ἀποφάντος, οὐκ ἔσται τὸ ἀδύνατον.

Περὶ δὲ τῶν ἀπαγόντων εἰς ‹τὸ› τὸ αὐτὸ πολλάκις εἰπεῖν φανερὸν ὡς οὐ δοτέον τῶν πρός τι λεγομένων σημαίνειν τι χωριζομένας καθ’ αὑτὰς τὰς κατηγορίας, οἷον “διπλάσιον” ἀντὶ τοῦ “διπλάσιον ἡμίσεος”, ὅτι ἐμφαίνεται. καὶ γὰρ τὸ δέκα ἐν τοῖς ἑνὸς δέουσι δέκα καὶ τὸ ποιῆσαι ἐν τῷ μὴ ποιῆσαι καὶ ὅλως ἐν τῇ ἀποφάσει ἡ φάσις· ἀλλ’ ὅμως οὐκ εἴ τις λέγει τοδὶ μὴ εἶναι λευκόν, λέγει αὐτὸ λευκὸν εἶναι. τὸ δὲ “διπλάσιον” οὐδὲ σημαίνει οὐδὲν ἴσως, ὥσπερ οὐδὲ τὸ “ἥμισυ”· εἰ δ’ ἄρα καὶ σημαίνει, ἀλλ’ οὐ ταὐτὸ καὶ συνῃρημένον. οὐδ’ ἡ ἐπιστήμη ἐν τῷ εἴδει (οἷον εἰ ἔστιν ἡ ἰατρικὴ ἐπιστήμη), ὅπερ τὸ κοινόν· ἐκεῖνο δ’ ἦν ἐπιστήμη ἐπιστητοῦ. ἐν δὲ τοῖς ‹τούτων› δι’ ὧν δηλοῦται κατηγορουμένοις τοῦτο λεκτέον, ὡς οὐ τὸ αὐτὸ χωρὶς καὶ ἐν τῷ λόγῳ τὸ δηλούμενον. τὸ γὰρ κοῖλον κοινῇ μὲν τὸ αὐτὸ δηλοῖ ἐπὶ τοῦ σιμοῦ καὶ τοῦ ῥοικοῦ, προστιθέμενον δὲ οὐδὲν κωλύει ἄλλα, τὸ μὲν τῇ ῥινὶ τὸ δὲ τῷ σκέλει, σημαίνειν· ἔνθα μὲν γὰρ τὸ σιμόν, ἔνθα δὲ τὸ ῥοικὸν σημαίνει, καὶ οὐδὲν διαφέρει εἰπεῖν ῥὶς σιμὴ ἢ ῥὶς κοίλη. ἔτι οὐ δοτέον τὴν λέξιν κατ’ εὐθύ· ψεῦδος γάρ ἐστιν. οὐ γάρ ἐστι τὸ σιμὸν ῥὶς κοίλη ἀλλὰ ῥινὸς τοδί, οἷον πάθος, ὥστ’ οὐδὲν ἄτοπον εἰ ἡ ῥὶς ἡ σιμὴ ῥίς ἐστιν ἔχουσα κοιλότητα ῥινός.

Περὶ δὲ τῶν σολοικισμῶν, παρ’ ὅ τι μὲν φαίνονται συμβαίνειν εἴπομεν πρότερον. ὡς δὲ λυτέον, ἐπ’ αὐτῶν τῶν λόγων ἔσται φανερόν· ἅπαντες γὰρ οἱ τοιοίδε τοῦτο βούλονται κατασκευάζειν. “ἆρ’ ὃ λέγεις ἀληθῶς, καὶ ἔστι τοῦτο ἀληθῶς; φῂς δ’ εἶναί τι λίθον· ἔστιν ἄρα τι λίθον.” ἢ τὸ λέγειν λίθον οὐκ ἔστι λέγειν ὃ ἀλλ’ ὅν, οὐδὲ τοῦτο ἀλλὰ τοῦτον. εἰ οὖν ἔροιτό τις, “ἆρ’ ὃν ἀληθῶς λέγεις, ἔστι τοῦτον;”, οὐκ ἂν δοκοίη ἑλληνίζειν, ὥσπερ οὐδ’ εἰ ἔροιτο, “ἆρ’ ἣν λέγεις εἶναι, ἔστιν οὗτος;”. ξύλον δ’ εἰπεῖν οὗτος, ἢ ὅσα μήτε θῆλυ μήτ’ ἄρρεν σημαίνει, οὐδὲν διαφέρει· διὸ καὶ οὐ γίνεται σολοικισμός· “εἰ ὃ λέγεις εἶναι, ἔστι τοῦτο, ξύλον δὲ λέγεις εἶναι, ἔστιν ἄρα ξύλον”. τὸ δὲ “λίθος” καὶ τὸ “οὗτος” ἄρρενος ἔχει κλίσιν. εἰ δή τις ἔροιτο “ἆρ’ οὗτός ἐστιν αὕτη;”, εἶτα πάλιν “τί δ’; οὐχ οὗτός ἐστι Κορίσκος;”, εἶτ’ εἴπειεν “ἔστιν ἄρα οὗτος αὕτη”, οὐ συλλελόγισται τὸν σολοικισμόν, οὐδ’ εἰ τὸ “Κορίσκος” σημαίνει ὅπερ αὕτη, μὴ δίδωσι δὲ ὁ ἀποκρινόμενος, ἀλλὰ δεῖ τοῦτο προσερωτηθῆναι. εἰ δὲ μήτ’ ἔστιν μήτε δίδωσιν, οὐ συλλελόγισται οὔτε τῷ ὄντι οὔτε πρὸς τὸν ἠρωτημένον. ὁμοίως οὖν δεῖ κἀκεῖ τὸν λίθον σημαίνειν “οὗτος”. εἰ δὲ μήτε ἔστι μήτε δέδοται, οὐ λεκτέον τὸ συμπέρασμα· φαίνεται δὲ παρὰ τὸ τὴν ἀνόμοιον πτῶσιν τοῦ ὀνόματος ὁμοίαν φαίνεσθαι. “ἆρ’ ἀληθές ἐστιν εἰπεῖν ὅτι ἔστιν αὕτη ὅπερ εἶναι φῂς αὐτήν; εἶναι δὲ φῂς ἀσπίδα· ἔστιν ἄρα αὕτη ἀσπίδα.” ἢ οὐκ ἀνάγκη, εἰ μὴ τὸ “αὕτη” ἀσπίδα σημαίνει ἀλλ’ ἀσπίς, τὸ δὲ “ταύτην” ἀσπίδα. οὐδ’ εἰ ὃ φῂς εἶναι τοῦτον, ἔστιν οὗτος, φῂς δ’ εἶναι Κλέωνα, ἔστιν ἄρα οὗτος Κλέωνα· οὐ γὰρ ἔστιν οὗτος Κλέωνα· εἴρηται γὰρ ὅτι ὅ φημι εἶναι τοῦτον, ἔστιν οὗτος, οὐ τοῦτον· οὐδὲ γὰρ ἂν ἑλληνίζοι οὕτως τὸ ἐρώτημα λεχθέν, “ἆρ’ ἐπίστασαι τοῦτο; τοῦτο δ’ ἐστὶ λίθος· ἐπίστασαι ἄρα λίθος”. ἢ οὐ ταὐτὸ σημαίνει τὸ “τοῦτο” ἐν τῷ “ἆρ’ ἐπίστασαι τοῦτο;” καὶ ἐν τῷ “τοῦτο δὲ λίθος”, ἀλλ’ ἐν μὲν τῷ πρώτῳ τοῦτον, ἐν δὲ τῷ ὑστέρῳ οὗτος. “ἆρ’ οὗ ἐπιστήμην ἔχεις, ἐπίστασαι τοῦτο; ἐπιστήμην δ’ ἔχεις λίθου· ἐπίστασαι ἄρα λίθου.” ἢ τὸ μὲν “οὗ” λίθου λέγει, τὸ δὲ “τοῦτο” λίθον· ἐδόθη δ’, οὗ ἐπιστήμην ἔχεις, ἐπίστασθαι οὐ τούτου ἀλλὰ τοῦτο, ὥστ’ οὐ τοῦ λίθου ἀλλὰ τὸν λίθον.

Ὅτι μὲν οὖν οἱ τοιοῦτοι τῶν λόγων οὐ συλλογίζονται σολοικισμὸν ἀλλὰ φαίνονται, καὶ διὰ τί τε φαίνονται καὶ πῶς ἀπαντητέον πρὸς αὐτούς, φανερὸν ἐκ τῶν εἰρημένων.

Δεῖ δὲ καὶ κατανοεῖν ὅτι πάντων τῶν λόγων οἱ μέν εἰσι ῥᾴους κατιδεῖν, οἱ δὲ χαλεπώτεροι, παρὰ τί καὶ ἐν τίνι παραλογίζονται τὸν ἀκούοντα, πολλάκις οἱ αὐτοὶ ἐκείνοις ὄντες· τὸν αὐτὸν γὰρ λόγον δεῖ καλεῖν τὸν παρὰ ταὐτὸ γινόμενον. ὁ αὐτὸς δὲ λόγος τοῖς μὲν παρὰ τὴν λέξιν τοῖς δὲ παρὰ τὸ συμβεβηκὸς τοῖς δὲ παρ’ ἕτερον δόξειεν ἂν εἶναι διὰ τὸ μεταφερόμενον ἕκαστον μὴ ὁμοίως εἶναι δῆλον. ὥσπερ οὖν ἐν τοῖς παρὰ τὴν ὁμωνυμίαν, ὅσπερ δοκεῖ τρόπος εὐηθέστατος εἶναι τῶν παραλογισμῶν, τὰ μὲν καὶ τοῖς τυχοῦσίν ἐστι δῆλα (καὶ γὰρ οἱ λόγοι σχεδὸν οἱ γελοῖοι πάντες εἰσὶ παρὰ τὴν λέξιν, οἷον “ἀνὴρ ἐφέρετο κατὰ κλίμακος δίφρον”, καὶ “ποῖ στέλλεσθε;” “πρὸς τὴν κεραίαν”, καὶ “ποτέρα τῶν βοῶν ἔμπροσθεν τέξεται;” “οὐδετέρα, ἀλλ’ ὄπισθεν ἄμφω”, καὶ “καθαρὸς ὁ βορέας;” “οὐ δῆτα· ἀπεκτόνηκε γὰρ τὸν πτωχὸν κατῳνωμένον”. “ἆρ’ Εὔαρχος;” “οὐ δῆτα, ἀλλ’ Ἀπολλωνίδης”· τὸν αὐτὸν δὲ τρόπον καὶ τῶν ἄλλων σχεδὸν οἱ πλεῖστοι)· τὰ δὲ καὶ τοὺς ἐμπειροτάτους φαίνεται λανθάνειν (σημεῖον δὲ τούτου ὅτι μάχονται πολλάκις περὶ τῶν ὀνομάτων, οἷον πότερον ταὐτὸ σημαίνει κατὰ πάντων τὸ ὂν καὶ τὸ ἕν, ἢ ἕτερον· τοῖς μὲν γὰρ δοκεῖ ταὐτὸ σημαίνειν τὸ ὂν καὶ τὸ ἕν, οἱ δὲ τὸν Ζήνωνος λόγον καὶ Παρμενίδου λύουσι διὰ τὸ πολλαχῶς φάναι τὸ ἓν λέγεσθαι καὶ τὸ ὄν). ὁμοίως δὲ καὶ ‹τῶν› παρὰ τὸ συμβεβηκὸς καὶ παρὰ τῶν ἄλλων ἕκαστον οἱ μὲν ἔσονται ῥᾴους ἰδεῖν οἱ δὲ χαλεπώτεροι τῶν λόγων, καὶ λαβεῖν ἐν τίνι γένει, καὶ πότερον ἔλεγχος ἢ οὐκ ἔλεγχος, οὐ ῥᾴδιον ὁμοίως περὶ πάντων.

Ἔστι δὲ δριμὺς λόγος ὅστις ἀπορεῖν ποιεῖ μάλιστα· δάκνει γὰρ οὗτος μάλιστα. ἀπορία δ’ ἐστὶ διττή, ἡ μὲν ἐν τοῖς συλλελογισμένοις, ὅ τι ἀνέλῃ τις τῶν ἐρωτημάτων, ἡ δ’ ἐν τοῖς ἐριστικοῖς, πῶς εἴπῃ τις τὸ προταθέν. διόπερ ἐν τοῖς συλλογιστικοῖς οἱ δριμύτεροι λόγοι ζητεῖν μᾶλλον ποιοῦσιν. ἔστι δὲ συλλογιστικὸς μὲν λόγος δριμύτατος ἂν ἐξ ὅτι μάλιστα δοκούντων ὅτι μάλιστα ἔνδοξον ἀναιρῇ. εἷς γὰρ ὢν ὁ λόγος μετατιθεμένης τῆς ἀντιφάσεως ἅπαντας ὁμοίους ἕξει τοὺς συλλογισμούς· ἀεὶ γὰρ ἐξ ἐνδόξων ὁμοίως ἔνδοξον ἀναιρήσει [ἢ κατασκευάσει], διόπερ ἀπορεῖν ἀναγκαῖον. μάλιστα μὲν οὖν ὁ τοιοῦτος δριμύς, ὁ ἐξ ἴσου τὸ συμπέρασμα ποιῶν τοῖς ἐρωτήμασι, δεύτερος δ’ ὁ ἐξ ἁπάντων ὁμοίων· οὗτος γὰρ ὁμοίως ποιήσει ἀπορεῖν ὁποῖον τῶν ἐρωτημάτων ἀναιρετέον. τοῦτο δὲ χαλεπόν· ἀναιρετέον μὲν γάρ, ὅ τι δ’ ἀναιρετέον ἄδηλον. τῶν δ’ ἐριστικῶν δριμύτατος μὲν ὁ πρῶτον εὐθὺς ἄδηλος πότερον συλλελόγισται ἢ οὔ, καὶ πότερον παρὰ ψεῦδος ἢ διαίρεσίν ἐστιν ἡ λύσις· δεύτερος δὲ τῶν ἄλλων ὁ δῆλος μὲν ὅτι παρὰ διαίρεσιν ἢ ἀναίρεσίν ἐστι, μὴ φανερὸς δ’ ὢν διὰ τίνος τῶν ἠρωτημένων ἀναίρεσιν ἢ διαίρεσιν λυτέος ἐστίν, ἢ πότερον αὕτη παρὰ τὸ συμπέρασμα ἢ παρά τι τῶν ἐρωτημάτων ἐστίν.

Ἐνίοτε μὲν οὖν ὁ μὴ συλλογισθεὶς λόγος εὐήθης ἐστίν, ἐὰν ᾖ λίαν ἄδοξα ἢ ψευδῆ τὰ λήμματα· ἐνίοτε δ' οὐκ ἄξιος καταφρονεῖσθαι. ὅταν μὲν γὰρ ἐλλείπῃ τι τῶν τοιούτων ἐρωτημάτων περὶ ἃ ὁ λόγος καὶ δι' ἅ, [καὶ] μὴ προσλαβὼν τοῦτο καὶ μὴ συλλογισάμενος εὐήθης ὁ συλλογισμός· ὅταν δὲ τῶν ἔξωθεν, οὐκ εὐκαταφρόνητος οὐδαμῶς, ἀλλ' ὁ μὲν λόγος ἐπιεικής, ὁ δ' ἐρωτῶν ἠρώτηκεν οὐ καλῶς.

Ἔστι δέ, ὥσπερ λύειν ὁτὲ μὲν πρὸς τὸν λόγον ὁτὲ δὲ πρὸς τὸν ἐρωτῶντα καὶ τὴν ἐρώτησιν ὁτὲ δὲ πρὸς οὐδέτερον τούτων - ὁμοίως καὶ ἐρωτᾶν ἔστι καὶ συλλογίζεσθαι καὶ πρὸς τὴν θέσιν καὶ πρὸς τὸν ἀποκρινόμενον καὶ πρὸς τὸν χρόνον, ὅταν ᾖ πλείονος χρόνου δεομένη ἡ λύσις [ἢ] τοῦ παρόντος καιροῦ τοῦ διαλεχθῆναι πρὸς τὴν λύσιν.

Ἐκ πόσων μὲν οὖν καὶ ποίων γίνονται τοῖς διαλεγομένοις οἱ παραλογισμοί, καὶ πῶς δείξομέν τε ψευδόμενον καὶ παράδοξα λέγειν ποιήσομεν, ἔτι δ' ἐκ τίνων συμβαίνει ὁ συλλογισμός, καὶ πῶς ἐρωτητέον καὶ τίς ἡ τάξις τῶν ἐρωτημάτων, ἔτι δὲ πρὸς τί χρήσιμοι πάντες εἰσὶν οἱ τοιοῦτοι λόγοι, καὶ περὶ ἀποκρίσεως ἁπλῶς τε πάσης καὶ πῶς λυτέον τοὺς λόγους καὶ τοὺς συλλογισμούς, εἰρήσθω περὶ ἁπάντων ἡμῖν ταῦτα. λοιπὸν δὲ περὶ τῆς ἐξ ἀρχῆς προθέσεως ἀναμνήσασιν εἰπεῖν τι βραχὺ περὶ αὐτῆς καὶ τέλος ἐπιθεῖναι τοῖς εἰρημένοις.

Προειλόμεθα μὲν οὖν εὑρεῖν δύναμίν τινα συλλογιστικὴν περὶ τοῦ προβληθέντος ἐκ τῶν ὑπαρχόντων ὡς ἐνδοξοτάτων· τοῦτο γὰρ ἔργον ἐστὶ τῆς διαλεκτικῆς καθ' αὑτὴν καὶ τῆς πειραστικῆς. ἐπεὶ δὲ προκατασκευαστέον πρὸς αὐτὴν διὰ τὴν τῆς σοφιστικῆς γειτνίασιν, ὥστ' οὐ μόνον πεῖραν δύνασθαι λαβεῖν διαλεκτικῶς ἀλλὰ καὶ ὡς εἰδώς, διὰ τοῦτο οὐ μόνον τὸ λεχθὲν ἔργον ὑπεθέμεθα τῆς πραγματείας, τὸ λόγον δύνασθαι λαβεῖν, ἀλλὰ καὶ ὅπως λόγον ὑπέχοντες φυλάξομεν τὴν θέσιν ὡς δι' ἐνδοξοτάτων ὁμοτρόπως. τὴν δ' αἰτίαν εἰρήκαμεν τούτου, ἐπεὶ καὶ διὰ τοῦτο Σωκράτης ἠρώτα ἀλλ' οὐκ ἀπεκρίνετο· ὡμολόγει γὰρ οὐκ εἰδέναι. δεδήλωται δ' ἐν τοῖς πρότερον καὶ πρὸς πόσα καὶ ἐκ πόσων τοῦτο ἔσται, καὶ πόθεν εὐπορήσομεν τούτων, ἔτι δὲ πῶς ἐρωτητέον καὶ τακτέον τὴν ἐρώτησιν πᾶσαν, καὶ περί τε ἀποκρίσεων καὶ λύσεων τῶν πρὸς τοὺς συλλογισμούς. δεδήλωται δὲ καὶ περὶ τῶν ἄλλων ὅσα τῆς αὐτῆς μεθόδου τῶν λόγων ἐστίν. πρὸς δὲ τούτοις περὶ τῶν παραλογισμῶν διεληλύθαμεν, ὥσπερ εἰρήκαμεν ἤδη πρότερον. ὅτι μὲν οὖν ἔχει τέλος ἱκανῶς ἃ προειλόμεθα, φανερόν· δεῖ δ' ἡμᾶς μὴ λεληθέναι τὸ συμβεβηκὸς περὶ ταύτην τὴν πραγματείαν. τῶν γὰρ εὑρισκομένων ἁπάντων τὰ μὲν παρ’ ἑτέρων ληφθέντα πρότερον πεπονημένα κατὰ μέρος ἐπιδέδωκεν ὑπὸ τῶν παραλαβόντων ὕστερον, τὰ δ’ ἐξ ὑπαρχῆς εὑρισκόμενα μικρὰν τὸ πρῶτον ἐπίδοσιν λαμβάνειν εἴωθε, χρησιμωτέραν μέντοι πολλῷ τῆς ὕστερον ἐκ τούτων αὐξήσεως· μέγιστον γὰρ ἴσως ἀρχὴ παντός, ὥσπερ λέγεται. διὸ καὶ χαλεπώτατον· ὅσῳ γὰρ κράτιστον τῇ δυνάμει, τοσούτῳ μικρότατον ὂν τῷ μεγέθει χαλεπώτατόν ἐστιν ὀφθῆναι. ταύτης δ’ εὑρημένης ῥᾷον τὸ προστιθέναι καὶ συναύξειν τὸ λοιπόν ἐστιν· ὅπερ καὶ περὶ τοὺς ῥητορικοὺς λόγους συμβέβηκε, σχεδὸν δὲ καὶ περὶ τὰς ἄλλας ἁπάσας τέχνας. οἱ μὲν γὰρ τὰς ἀρχὰς εὑρόντες παντελῶς ἐπὶ μικρόν τι προήγαγον· οἱ δὲ νῦν εὐδοκιμοῦντες, παραλαβόντες παρὰ πολλῶν οἷον ἐκ διαδοχῆς κατὰ μέρος προαγαγόντων, οὕτως ηὐξήκασι, Τεισίας μὲν μετὰ τοὺς πρώτους, Θρασύμαχος δὲ μετὰ Τεισίαν, Θεόδωρος δὲ μετὰ τοῦτον, καὶ πολλοὶ πολλὰ συνενηνόχασι μέρη· διόπερ οὐδὲν θαυμαστὸν ἔχειν τι πλῆθος τὴν τέχνην. ταύτης δὲ τῆς πραγματείας οὐ τὸ μὲν ἦν τὸ δ’ οὐκ ἦν προεξειργασμένον, ἀλλ’ οὐδὲν παντελῶς ὑπῆρχεν. καὶ γὰρ τῶν περὶ τοὺς ἐριστικοὺς λόγους μισθαρνούντων ὁμοία τις ἦν ἡ παίδευσις τῇ Γοργίου πραγματείᾳ· λόγους γὰρ οἱ μὲν ῥητορικοὺς οἱ δὲ ἐρωτητικοὺς ἐδίδοσαν ἐκμανθάνειν, εἰς οὓς πλειστάκις ἐμπίπτειν ᾠήθησαν ἑκάτεροι τοὺς ἀλλήλων λόγους. διόπερ ταχεῖα μὲν ἄτεχνος δ’ ἦν ἡ διδασκαλία τοῖς μανθάνουσι παρ’ αὐτῶν· οὐ γὰρ τέχνην ἀλλὰ τὰ ἀπὸ τῆς τέχνης διδόντες παιδεύειν ὑπελάμβανον, ὥσπερ ἂν εἴ τις, ἐπιστήμην φάσκων παραδώσειν ἐπὶ τὸ μηδὲν πονεῖν τοὺς πόδας, εἶτα σκυτοτομικὴν μὲν μὴ διδάσκοι μηδ’ ὅθεν δυνήσεται πορίζεσθαι τὰ τοιαῦτα, δοίη δὲ πολλὰ γένη παντοδαπῶν ὑποδημάτων· οὗτος γὰρ βεβοήθηκε μὲν πρὸς τὴν χρείαν, τέχνην δ’ οὐ παρέδωκεν. καὶ περὶ μὲν τῶν ῥητορικῶν ὑπῆρχε πολλὰ καὶ παλαιὰ τὰ λεγόμενα, περὶ δὲ τοῦ συλλογίζεσθαι παντελῶς οὐδὲν εἴχομεν πρότερον λέγειν ἢ τριβῇ ζητοῦντες πολὺν χρόνον ἐπονοῦμεν. εἰ δὲ φαίνεται θεασαμένοις ὑμῖν, ὡς ἐκ τοιούτων ἐξ ἀρχῆς ὑπαρχόντων, ἔχειν ἡ μέθοδος ἱκανῶς παρὰ τὰς ἄλλας πραγματείας τὰς ἐκ παραδόσεως ηὐξημένας, λοιπὸν ἂν εἴη πάντων ὑμῶν [ἢ] τῶν ἠκροαμένων ἔργον τοῖς μὲν παραλελειμμένοις τῆς μεθόδου συγγνώμην τοῖς δ’ εὑρημένοις πολλὴν ἔχειν χάριν.

Κεφάλαιο 1

[184a] Ἐπειδὴ τὸ εἰδέναι καὶ τὸ ἐπίστασθαι συμβαίνει περὶ πάσας τὰς μεθόδους, ὧν εἰσὶν ἀρχαὶ ἢ αἴτια ἢ στοιχεῖα, ἐκ τοῦ ταῦτα γνωρίζειν (τότε γὰρ οἰόμεθα γιγνώσκειν ἕκαστον, ὅταν τὰ αἴτια γνωρίσωμεν τὰ πρῶτα καὶ τὰς ἀρχὰς τὰς πρώτας καὶ μέχρι τῶν στοιχείων), δῆλον ὅτι καὶ τῆς περὶ φύσεως ἐπιστήμης πειρατέον διορίσασθαι πρῶτον τὰ περὶ τὰς ἀρχάς.

πέφυκε δὲ ἐκ τῶν γνωριμωτέρων ἡμῖν ἡ ὁδὸς καὶ σαφεστέρων ἐπὶ τὰ σαφέστερα τῇ φύσει καὶ γνωριμώτερα· οὐ γὰρ ταὐτὰ ἡμῖν τε γνώριμα καὶ ἁπλῶς. διόπερ ἀνάγκη τὸν τρόπον τοῦτον προάγειν ἐκ τῶν ἀσαφεστέρων μὲν τῇ φύσει ἡμῖν δὲ σαφεστέρων ἐπὶ τὰ σαφέστερα τῇ φύσει καὶ γνωριμώτερα.

ἔστι δ’ ἡμῖν τὸ πρῶτον δῆλα καὶ σαφῆ τὰ συγκεχυμένα μᾶλλον· ὕστερον δ’ ἐκ τούτων γίγνεται γνώριμα τὰ στοιχεῖα καὶ αἱ ἀρχαὶ διαιροῦσι ταῦτα. διὸ ἐκ τῶν καθόλου ἐπὶ τὰ καθ’ ἕκαστα δεῖ προϊέναι· τὸ γὰρ ὅλον κατὰ τὴν αἴσθησιν γνωριμώτερον, τὸ δὲ καθόλου ὅλον τί ἐστι· πολλὰ γὰρ περιλαμβάνει ὡς μέρη τὸ καθόλου. πέπονθε δὲ [184b] ταὐτὸ τοῦτο τρόπον τινὰ καὶ τὰ ὀνόματα πρὸς τὸν λόγον· ὅλον γάρ τι καὶ ἀδιορίστως σημαίνει, οἷον ὁ κύκλος, ὁ δὲ ὁρισμὸς αὐτοῦ διαιρεῖ εἰς τὰ καθ’ ἕκαστα. καὶ τὰ παιδία τὸ μὲν πρῶτον προσαγορεύει πάντας τοὺς ἄνδρας πατέρας καὶ μητέρας τὰς γυναῖκας, ὕστερον δὲ διορίζει τούτων ἑκάτερον.

Κεφάλαιο 2

Ἀνάγκη δ’ ἤτοι μίαν εἶναι τὴν ἀρχὴν ἢ πλείους, καὶ εἰ μίαν, ἤτοι ἀκίνητον, ὥς φησι Παρμενίδης καὶ Μέλισσος, ἢ κινουμένην, ὥσπερ οἱ φυσικοί, οἱ μὲν ἀέρα φάσκοντες εἶναι οἱ δ’ ὕδωρ τὴν πρώτην ἀρχήν· εἰ δὲ πλείους, ἢ πεπερασμένας ἢ ἀπείρους, καὶ εἰ πεπερασμένας πλείους δὲ μιᾶς, ἢ δύο ἢ τρεῖς ἢ τέτταρας ἢ ἄλλον τινὰ ἀριθμόν, καὶ εἰ ἀπείρους, ἢ οὕτως ὥσπερ Δημόκριτος, τὸ γένος ἕν, σχήματι δὲ <διαφερούσας>, ἢ εἴδει διαφερούσας ἢ καὶ ἐναντίας.

ὁμοίως δὲ ζητοῦσι καὶ οἱ τὰ ὄντα ζητοῦντες πόσα· ἐξ ὧν γὰρ τὰ ὄντα ἐστὶ πρώτων, ζητοῦσι ταῦτα πότερον ἓν ἢ πολλά, καὶ εἰ πολλά, πεπερασμένα ἢ ἄπειρα, ὥστε τὴν ἀρχὴν καὶ τὸ στοιχεῖον ζητοῦσι πότερον ἓν ἢ πολλά. τὸ μὲν οὖν εἰ ἓν καὶ ἀκίνητον τὸ ὂν σκοπεῖν οὐ περὶ φύσεώς ἐστι σκο[185a] πεῖν· ὥσπερ γὰρ καὶ τῷ γεωμέτρῃ οὐκέτι λόγος ἔστι πρὸς τὸν ἀνελόντα τὰς ἀρχάς, ἀλλ’ ἤτοι ἑτέρας ἐπιστήμης ἢ πασῶν κοινῆς, οὕτως οὐδὲ τῷ περὶ ἀρχῶν· οὐ γὰρ ἔτι ἀρχὴ ἔστιν, εἰ ἓν μόνον καὶ οὕτως ἓν ἔστιν. ἡ γὰρ ἀρχὴ τινὸς ἢ τινῶν.

ὅμοιον δὴ τὸ σκοπεῖν εἰ οὕτως ἓν καὶ πρὸς ἄλλην θέσιν ὁποιανοῦν διαλέγεσθαι τῶν λόγου ἕνεκα λεγομένων (οἷον τὴν Ἡρακλείτειον, ἢ εἴ τις φαίη ἄνθρωπον ἕνα τὸ ὂν εἶναι), ἢ λύειν λόγον ἐριστικόν, ὅπερ ἀμφότεροι μὲν ἔχουσιν οἱ λόγοι, καὶ ὁ Μελίσσου καὶ ὁ Παρμενίδου· καὶ γὰρ ψευδῆ λαμβάνουσι καὶ ἀσυλλόγιστοί εἰσιν· μᾶλλον δ’ ὁ Μελίσσου φορτικὸς καὶ οὐκ ἔχων ἀπορίαν, ἀλλ’ ἑνὸς ἀτόπου δοθέντος τὰ ἄλλα συμβαίνει· τοῦτο δὲ οὐδὲν χαλεπόν.

ἡμῖν δ’ ὑποκείσθω τὰ φύσει ἢ πάντα ἢ ἔνια κινούμενα εἶναι· δῆλον δ’ ἐκ τῆς ἐπαγωγῆς. ἅμα δ’ οὐδὲ λύειν ἅπαντα προσήκει, ἀλλ’ ἢ ὅσα ἐκ τῶν ἀρχῶν τις ἐπιδεικνὺς ψεύδεται, ὅσα δὲ μή, οὔ, οἷον τὸν τετραγωνισμὸν τὸν μὲν διὰ τῶν τμημάτων γεωμετρικοῦ διαλῦσαι, τὸν δὲ Ἀντιφῶντος οὐ γεωμετρικοῦ· οὐ μὴν ἀλλ’ ἐπειδὴ περὶ φύσεως μὲν οὔ, φυσικὰς δὲ ἀπορίας συμβαίνει λέγειν αὐτοῖς, ἴσως ἔχει καλῶς ἐπὶ μικρὸν διαλεχθῆναι περὶ αὐτῶν· ἔχει γὰρ φιλοσοφίαν ἡ σκέψις.

ἀρχὴ δὲ οἰκειοτάτη πασῶν, ἐπειδὴ πολλαχῶς λέγεται τὸ ὄν, πῶς λέγουσιν οἱ λέγοντες εἶναι ἓν τὰ πάντα, πότερον οὐσίαν τὰ πάντα ἢ ποσὰ ἢ ποιά, καὶ πάλιν πότερον οὐσίαν μίαν τὰ πάντα, οἷον ἄνθρωπον ἕνα ἢ ἵππον ἕνα ἢ ψυχὴν μίαν, ἢ ποιὸν ἓν δὲ τοῦτο, οἷον λευκὸν ἢ θερμὸν ἢ τῶν ἄλλων τι τῶν τοιούτων. ταῦτα γὰρ πάντα διαφέρει τε πολὺ καὶ ἀδύνατα λέγειν.

εἰ μὲν γὰρ ἔσται καὶ οὐσία καὶ ποιὸν καὶ ποσόν, καὶ ταῦτα εἴτ’ ἀπολελυμένα ἀπ’ ἀλλήλων εἴτε μή, πολλὰ τὰ ὄντα·

εἰ δὲ πάντα ποιὸν ἢ ποσόν, εἴτ’ οὔσης οὐσίας εἴτε μὴ οὔσης, ἄτοπον, εἰ δεῖ ἄτοπον λέγειν τὸ ἀδύνατον. οὐθὲν γὰρ τῶν ἄλλων χωριστόν ἐστι παρὰ τὴν οὐσίαν· πάντα γὰρ καθ’ ὑποκειμένου λέγεται τῆς οὐσίας.

Μέλισσος δὲ τὸ ὂν ἄπειρον εἶναί φησιν. ποσὸν ἄρα τι τὸ ὄν· τὸ γὰρ ἄπειρον ἐν τῷ ποσῷ, οὐσίαν δὲ ἄπειρον εἶναι ἢ ποιότητα ἢ [185b] πάθος οὐκ ἐνδέχεται εἰ μὴ κατὰ συμβεβηκός, εἰ ἅμα καὶ ποσὰ ἄττα εἶεν· ὁ γὰρ τοῦ ἀπείρου λόγος τῷ ποσῷ προσχρῆται, ἀλλ’ οὐκ οὐσίᾳ οὐδὲ τῷ ποιῷ. εἰ μὲν τοίνυν καὶ οὐσία ἔστι καὶ ποσόν, δύο καὶ οὐχ ἓν τὸ ὄν· εἰ δ’ οὐσία μόνον, οὐκ ἄπειρον, οὐδὲ μέγεθος ἕξει οὐδέν· ποσὸν γάρ τι ἔσται.

ἔτι ἐπεὶ καὶ αὐτὸ τὸ ἓν πολλαχῶς λέγεται ὥσπερ καὶ τὸ ὄν, σκεπτέον τίνα τρόπον λέγουσιν εἶναι ἓν τὸ πᾶν. λέγεται δ’ ἓν ἢ τὸ συνεχὲς ἢ τὸ ἀδιαίρετον ἢ ὧν ὁ λόγος ὁ αὐτὸς καὶ εἷς ὁ τοῦ τί ἦν εἶναι, ὥσπερ μέθυ καὶ οἶνος.

εἰ μὲν τοίνυν συνεχές, πολλὰ τὸ ἕν· εἰς ἄπειρον γὰρ διαιρετὸν τὸ συνεχές.

(ἔχει δ’ ἀπορίαν περὶ τοῦ μέρους καὶ τοῦ ὅλου, ἴσως δὲ οὐ πρὸς τὸν λόγον ἀλλ’ αὐτὴν καθ’ αὑτήν, πότερον ἓν ἢ πλείω τὸ μέρος καὶ τὸ ὅλον, καὶ πῶς ἓν ἢ πλείω, καὶ εἰ πλείω, πῶς πλείω, καὶ περὶ τῶν μερῶν τῶν μὴ συνεχῶν· καὶ εἰ τῷ ὅλῳ ἓν ἑκάτερον ὡς ἀδιαίρετον, ὅτι καὶ αὐτὰ αὑτοῖς.)

ἀλλὰ μὴν εἰ ὡς ἀδιαίρετον, οὐθὲν ἔσται ποσὸν οὐδὲ ποιόν, οὐδὲ δὴ ἄπειρον τὸ ὄν, ὥσπερ Μέλισσός φησιν, οὐδὲ πεπερασμένον, ὥσπερ Παρμενίδης· τὸ γὰρ πέρας ἀδιαίρετον, οὐ τὸ πεπερασμένον.

ἀλλὰ μὴν εἰ τῷ λόγῳ ἓν τὰ ὄντα πάντα ὡς λώπιον καὶ ἱμάτιον, τὸν Ἡρακλείτου λόγον συμβαίνει λέγειν αὐτοῖς· ταὐτὸν γὰρ ἔσται ἀγαθῷ καὶ κακῷ εἶναι, καὶ ἀγαθῷ καὶ μὴ ἀγαθῷ εἶναι-ὥστε ταὐτὸν ἔσται ἀγαθὸν καὶ οὐκ ἀγαθόν, καὶ ἄνθρωπος καὶ ἵππος, καὶ οὐ περὶ τοῦ ἓν εἶναι τὰ ὄντα ὁ λόγος ἔσται ἀλλὰ περὶ τοῦ μηδέν-καὶ τὸ τοιῳδὶ εἶναι καὶ τοσῳδὶ ταὐτόν.

ἐθορυβοῦντο δὲ καὶ οἱ ὕστεροι τῶν ἀρχαίων ὅπως μὴ ἅμα γένηται αὐτοῖς τὸ αὐτὸ ἓν καὶ πολλά. διὸ οἱ μὲν τὸ ἐστὶν ἀφεῖλον, ὥσπερ Λυκόφρων, οἱ δὲ τὴν λέξιν μετερρύθμιζον, ὅτι ὁ ἄνθρωπος οὐ λευκός ἐστιν ἀλλὰ λελεύκωται, οὐδὲ βαδίζων ἐστὶν ἀλλὰ βαδίζει, ἵνα μή ποτε τὸ ἐστὶ προσάπτοντες πολλὰ εἶναι ποιῶσι τὸ ἕν, ὡς μοναχῶς λεγομένου τοῦ ἑνὸς ἢ τοῦ ὄντος. πολλὰ δὲ τὰ ὄντα ἢ λόγῳ (οἷον ἄλλο τὸ λευκῷ εἶναι καὶ μουσικῷ, τὸ δ’ αὐτὸ ἄμφω· πολλὰ ἄρα τὸ ἕν) ἢ διαιρέσει, ὥσπερ τὸ ὅλον καὶ τὰ μέρη. ἐνταῦθα [186a] δὲ ἤδη ἠπόρουν, καὶ ὡμολόγουν τὸ ἓν πολλὰ εἶναι-ὥσπερ οὐκ ἐνδεχόμενον ταὐτὸν ἕν τε καὶ πολλὰ εἶναι, μὴ τἀντικείμενα δέ· ἔστι γὰρ τὸ ἓν καὶ δυνάμει καὶ ἐντελεχείᾳ.

Κεφάλαιο 3

Τόν τε δὴ τρόπον τοῦτον ἐπιοῦσιν ἀδύνατον φαίνεται τὰ ὄντα ἓν εἶναι, καὶ ἐξ ὧν ἐπιδεικνύουσι, λύειν οὐ χαλεπόν. ἀμφότεροι γὰρ ἐριστικῶς συλλογίζονται, καὶ Μέλισσος καὶ Παρμενίδης [καὶ γὰρ ψευδῆ λαμβάνουσι καὶ ἀσυλλόγιστοί εἰσιν αὐτῶν οἱ λόγοι· μᾶλλον δ' ὁ Μελίσσου φορτικὸς καὶ οὐκ ἔχων ἀπορίαν, ἀλλ' ἑνὸς ἀτόπου δοθέντος τἆλλα συμβαίνει· τοῦτο δ' οὐθὲν χαλεπόν]. ὅτι μὲν οὖν πα ραλογίζεται Μέλισσος, δῆλον· οἴεται γὰρ εἰληφέναι, εἰ τὸ γενόμενον ἔχει ἀρχὴν ἅπαν, ὅτι καὶ τὸ μὴ γενόμενον οὐκ ἔχει. εἶτα καὶ τοῦτο ἄτοπον, τὸ παντὸς εἶναι ἀρχήντοῦ πράγματος καὶ μὴ τοῦ χρόνου, καὶ γενέσεως μὴ τῆς ἁπλῆς ἀλλὰ καὶ ἀλλοιώσεως, ὥσπερ οὐκ ἀθρόας γιγνομένης μεταβολῆς. ἔπειτα διὰ τί ἀκίνητον, εἰ ἕν; ὥσπερ γὰρ καὶ τὸ μέρος ἓν ὄν, τοδὶ τὸ ὕδωρ, κινεῖται ἐν ἑαυτῷ, διὰ τί οὐ καὶ τὸ πᾶν; ἔπειτα ἀλλοίωσις διὰ τί οὐκ ἂν εἴη; ἀλλὰ μὴν οὐδὲ τῷ εἴδει οἷόν τε ἓν εἶναι, πλὴν τῷ ἐξ οὗ (οὕτως δὲ ἓν καὶ τῶν φυσικῶν τινες λέγουσιν, ἐκείνως δ' οὔ)· ἄνθρωπος γὰρ ἵππου ἕτερον τῷ εἴδει καὶ τἀναντία ἀλλήλων.

καὶ πρὸς Παρμενίδην δὲ ὁ αὐτὸς τρόπος τῶν λόγων, καὶ εἴ τινες ἄλλοι εἰσὶν ἴδιοι· καὶ ἡ λύσις τῇ μὲν ὅτι ψευδὴς τῇ δὲ ὅτι οὐ συμπεραίνεται, ψευδὴς μὲν ᾗ ἁπλῶς λαμβάνει τὸ ὂν λέγεσθαι, λεγομένου πολλαχῶς, ἀσυμπέραντος δὲ ὅτι, εἰ μόνα τὰ λευκὰ ληφθείη, σημαίνοντος ἓν τοῦ λευκοῦ, οὐθὲν ἧττον πολλὰ τὰ λευκὰ καὶ οὐχ ἕν· οὔτε γὰρ τῇ συνεχείᾳ ἓν ἔσται τὸ λευκὸν οὔτε τῷ λόγῳ. ἄλλο γὰρ ἔσται τὸ εἶναι λευκῷ καὶ τῷ δεδεγμένῳ. καὶ οὐκ ἔσται παρὰ τὸ λευκὸν οὐθὲν χωριστόν· οὐ γὰρ ᾗ χωριστὸν ἀλλὰ τῷ εἶναι ἕτερον τὸ λευκὸν καὶ ᾧ ὑπάρχει. ἀλλὰ τοῦτο Παρμενίδης οὔπω συνεώρα.

ἀνάγκη δὴ λαβεῖν μὴ μόνον ἓν σημαίνειν τὸ ὄν, καθ' οὗ ἂν κατηγορηθῇ, ἀλλὰ καὶ ὅπερ ὂν καὶ ὅπερ ἕν. τὸ γὰρ συμβεβηκὸς καθ' ὑποκειμένου τινὸς λέγεται, ὥστε ᾧ συμβέβηκε τὸ ὄν, οὐκ ἔσται (ἕτερον γὰρ [186b] τοῦ ὄντος)· ἔσται τι ἄρα οὐκ ὄν. οὐ δὴ ἔσται ἄλλῳ ὑπάρχον τὸ ὅπερ ὄν. οὐ γὰρ ἔσται ὄν τι αὐτὸ εἶναι, εἰ μὴ πολλὰ τὸ ὂν σημαίνει οὕτως ὥστε εἶναί τι ἕκαστον. ἀλλ' ὑπόκειται τὸ ὂν σημαίνειν ἕν.

εἰ οὖν τὸ ὅπερ ὂν μηδενὶ συμ βέβηκεν ἀλλὰ <τὰ ἄλλα> ἐκείνῳ, τί μᾶλλον τὸ ὅπερ ὂν σημαίνει τὸ ὂν ἢ μὴ ὄν; εἰ γὰρ ἔσται τὸ ὅπερ ὂν [ταὐτὸ] καὶ λευκόν, τὸ λευκῷ δ' εἶναι μὴ ἔστιν ὅπερ ὄν (οὐδὲ γὰρ συμβεβηκέναι αὐτῷ οἷόν τε τὸ ὄν· οὐδὲν γὰρ ὂν ὃ οὐχ ὅπερ ὄν), οὐκ ἄρα ὂν τὸ λευκόν· οὐχ οὕτω δὲ ὥσπερ τι μὴ ὄν, ἀλλ' ὅλως μὴ ὄν. τὸ ἄρα ὅπερ ὂν οὐκ ὄν·

ἀληθὲς γὰρ εἰπεῖν ὅτι λευκόν, τοῦτο δὲ οὐκ ὂν ἐσήμαινεν. ὥστε καὶ τὸ λευκὸν σημαίνει ὅπερ ὄν· πλείω ἄρα σημαίνει τὸ ὄν.

οὐ τοίνυν οὐδὲ μέγεθος ἕξει τὸ ὄν, εἴπερ ὅπερ ὂν τὸ ὄν· ἑκατέρῳ γὰρ ἕτερον τὸ εἶναι τῶν μορίων.

ὅτι δὲ διαιρεῖται τὸ ὅπερ ὂν εἰς ὅπερ ὄν τι ἄλλο, καὶ τῷ λόγῳ φανερόν, οἷον ὁ ἄνθρωπος εἰ ἔστιν ὅπερ ὄν τι, ἀνάγκη καὶ τὸ ζῷον ὅπερ ὄν τι εἶναι καὶ τὸ δίπουν. εἰ γὰρ μὴ ὅπερ ὄν τι, συμβεβηκότα ἔσται. ἢ οὖν τῷ ἀνθρώπῳ ἢ ἄλλῳ τινὶ ὑποκειμένῳ. ἀλλ’ ἀδύνατον·

συμβεβηκός τε γὰρ λέγεται τοῦτο, ἢ ὃ ἐνδέχεται ὑπάρχειν καὶ μὴ ὑπάρχειν, ἢ οὗ ἐν τῷ λόγῳ ὑπάρχει τὸ ᾧ συμβέβηκεν [ἢ ἐν ᾧ ὁ λόγος ὑπάρχει ᾧ συμβέβηκεν] (οἷον τὸ μὲν καθῆσθαι ὡς χωριζόμενον, ἐν δὲ τῷ σιμῷ ὑπάρχει ὁ λόγος ὁ τῆς ῥινὸς ᾗ φαμὲν συμβεβηκέναι τὸ σιμόν)· ἔτι ὅσα ἐν τῷ ὁριστικῷ λόγῳ ἔνεστιν ἢ ἐξ ὧν ἐστιν, ἐν τῷ λόγῳ τῷ τούτων οὐκ ἐνυπάρχει ὁ λόγος ὁ τοῦ ὅλου, οἷον ἐν τῷ δίποδι ὁ τοῦ ἀνθρώ που ἢ ἐν τῷ λευκῷ ὁ τοῦ λευκοῦ ἀνθρώπου. εἰ τοίνυν ταῦτα τοῦτον ἔχει τὸν τρόπον καὶ τῷ ἀνθρώπῳ συμβέβηκε τὸ δίπουν, ἀνάγκη χωριστὸν εἶναι αὐτό, ὥστε ἐνδέχοιτο ἂν μὴ δίπουν εἶναι τὸν ἄνθρωπον, ἢ ἐν τῷ λόγῳ τῷ τοῦ δίποδος ἐνέσται ὁ τοῦ ἀνθρώπου λόγος. ἀλλ’ ἀδύνατον· ἐκεῖνο γὰρ ἐν τῷ ἐκείνου λόγῳ ἔνεστιν.

εἰ δ’ ἄλλῳ συμβέβηκε τὸ δίπουν καὶ τὸ ζῷον, καὶ μὴ ἔστιν ἑκάτερον ὅπερ ὄν τι, καὶ ὁ ἄνθρωπος ἂν εἴη τῶν συμβεβηκότων ἑτέρῳ. ἀλλὰ τὸ ὅπερ ὂν ἔστω μηδενὶ συμβεβηκός, καὶ καθ’ οὗ ἄμφω [καὶ ἑκατέρον], καὶ τὸ ἐκ τούτων λεγέσθω·

ἐξ ἀδιαιρέτων ἄρα τὸ πᾶν; [187a] ἔνιοι δ’ ἐνέδοσαν τοῖς λόγοις ἀμφοτέροις, τῷ μὲν ὅτι πάντα ἕν, εἰ τὸ ὂν ἓν σημαίνει, ὅτι ἔστι τὸ μὴ ὄν, τῷ δὲ ἐκ τῆς διχοτομίας, ἄτομα ποιήσαντες μεγέθη. φανερὸν δὲ καὶ ὅτι οὐκ ἀληθὲς ὡς, εἰ ἓν σημαίνει τὸ ὂν καὶ μὴ οἷόν τε ἅμα τὴν ἀντίφασιν, οὐκ ἔσται οὐθὲν μὴ ὄν· οὐθὲν γὰρ κωλύει, μὴ ἁπλῶς εἶναι, ἀλλὰ μὴ ὄν τι εἶναι τὸ μὴ ὄν. τὸ δὲ δὴ φάναι, παρ’ αὐτὸ τὸ ὂν εἰ μή τι ἔσται ἄλλο, ἓν πάντα ἔσεσθαι, ἄτοπον. τίς γὰρ μανθάνει αὐτὸ τὸ ὂν εἰ μὴ τὸ ὅπερ ὄν τι εἶναι; εἰ δὲ τοῦτο, οὐδὲν ὅμως κωλύει πολλὰ εἶναι τὰ ὄντα, ὥσπερ εἴρηται.

ὅτι μὲν οὖν οὕτως ἓν εἶναι τὸ ὂν ἀδύνα τον, δῆλον.

Κεφάλαιο 4

Ὡς δ’ οἱ φυσικοὶ λέγουσι, δύο τρόποι εἰσίν.

οἱ μὲν γὰρ ἓν ποιήσαντες τὸ [ὂν] σῶμα τὸ ὑποκείμενον, ἢ τῶν τριῶν τι ἢ ἄλλο ὅ ἐστι πυρὸς μὲν πυκνότερον ἀέρος δὲ λεπτότερον, τἆλλα γεννῶσι πυκνότητι καὶ μανότητι πολλὰ ποιοῦντες (ταῦτα δ’ ἐστὶν ἐναντία, καθόλου δ’ ὑπεροχὴ καὶ ἔλλειψις, ὥσπερ τὸ μέγα φησὶ Πλάτων καὶ τὸ μικρόν, πλὴν ὅτι ὁ μὲν ταῦτα ποιεῖ ὕλην τὸ δὲ ἓν τὸ εἶδος, οἱ δὲ τὸ μὲν ἓν τὸ ὑποκείμενον ὕλην, τὰ δ’ ἐναντία διαφορὰς καὶ εἴδη)·

οἱ δ’ ἐκ τοῦ ἑνὸς ἐνούσας τὰς ἐναντιότητας ἐκ κρίνεσθαι, ὥσπερ Ἀναξίμανδρός φησι, καὶ ὅσοι δ’ ἓν καὶ πολλά φασιν εἶναι, ὥσπερ Ἐμπεδοκλῆς καὶ Ἀναξαγόρας· ἐκ τοῦ μίγματος γὰρ καὶ οὗτοι ἐκκρίνουσι τἆλλα. διαφέρουσι δὲ ἀλλήλων τῷ τὸν μὲν περίοδον ποιεῖν τούτων, τὸν δ’ ἅπαξ, καὶ τὸν μὲν ἄπειρα, τά τε ὁμοιομερῆ καὶ τἀναντία, τὸν δὲ τὰ καλούμενα στοιχεῖα μόνον.

ἔοικε δὲ Ἀναξαγόρας ἄπειρα οὕτως οἰηθῆναι διὰ τὸ ὑπολαμβάνειν τὴν κοινὴν δόξαν τῶν φυσικῶν εἶναι ἀληθῆ, ὡς οὐ γιγνομένου οὐδε νὸς ἐκ τοῦ μὴ ὄντος (διὰ τοῦτο γὰρ οὕτω λέγουσιν, ἦν ὁμοῦ πάντα, καὶ τὸ γίγνεσθαι τοιόνδε καθέστηκεν ἀλλοιοῦσθαι, οἱ δὲ σύγκρισιν καὶ διάκρισιν)· ἔτι δ’ ἐκ τοῦ γίγνεσθαι ἐξ ἀλλήλων τἀναντία· ἐνυπῆρχεν ἄρα· εἰ γὰρ πᾶν μὲν τὸ γιγνόμενον ἀνάγκη γίγνεσθαι ἢ ἐξ ὄντων ἢ ἐκ μὴ ὄντων, τούτων δὲ τὸ μὲν ἐκ μὴ ὄντων γίγνεσθαι ἀδύνατον (περὶ γὰρ ταύτης ὁμογνωμονοῦσι τῆς δόξης ἅπαντες οἱ περὶ φύσεως), τὸ λοιπὸν ἤδη συμβαίνειν ἐξ ἀνάγκης ἐνόμισαν, ἐξ ὄντων μὲν καὶ ἐνυπαρχόντων γίγνεσθαι, διὰ μικρότητα δὲ τῶν ὄγκων ἐξ [187b] ἀναισθήτων ἡμῖν. διό φασι πᾶν ἐν παντὶ μεμῖχθαι, διότι πᾶν ἐκ παντὸς ἑώρων γιγνόμενον· φαίνεσθαι δὲ διαφέροντα καὶ προσαγορεύεσθαι ἕτερα ἀλλήλων ἐκ τοῦ μάλισθ’ ὑπερέχοντος διὰ πλῆθος ἐν τῇ μίξει τῶν ἀπείρων· εἰλικρινῶς μὲν γὰρ ὅλον λευκὸν ἢ μέλαν ἢ γλυκὺ ἢ σάρκα ἢ ὀστοῦν οὐκ εἶναι, ὅτου δὲ πλεῖστον ἕκαστον ἔχει, τοῦτο δοκεῖν εἶναι τὴν φύσιν τοῦ πράγματος.

εἰ δὴ τὸ μὲν ἄπειρον ᾗ ἄπειρον ἄγνωστον, τὸ μὲν κατὰ πλῆθος ἢ κατὰ μέγεθος ἄπειρον ἄγνωστον πόσον τι, τὸ δὲ κατ’ εἶδος ἄπειρον ἄγνωστον ποῖόν τι. τῶν δ’ ἀρχῶν ἀπείρων οὐσῶν καὶ κατὰ πλῆθος καὶ κατ’ εἶ δος, ἀδύνατον εἰδέναι τὰ ἐκ τούτων. οὕτω γὰρ εἰδέναι τὸ σύνθετον ὑπολαμβάνομεν, ὅταν εἰδῶμεν ἐκ τίνων καὶ πόσων ἐστίν. ἔτι δ’ εἰ ἀνάγκη, οὗ τὸ μόριον ἐνδέχεται ὁπηλικονοῦν εἶναι κατὰ μέγεθος καὶ μικρότητα, καὶ αὐτὸ ἐνδέχεσθαι (λέγω δὲ τῶν τοιούτων τι μορίων, εἰς ὃ ἐνυπάρχον διαιρεῖται τὸ ὅλον), εἰ δὴ ἀδύνατον ζῷον ἢ φυτὸν ὁπηλικονοῦν εἶναι κατὰ μέγεθος καὶ μικρότητα, φανερὸν ὅτι οὐδὲ τῶν μορίων ὁτιοῦν· ἔσται γὰρ καὶ τὸ ὅλον ὁμοίως. σὰρξ δὲ καὶ ὀστοῦν καὶ τὰ τοιαῦτα μόρια ζῴου, καὶ οἱ καρποὶ τῶν φυτῶν. δῆλον τοίνυν ὅτι ἀδύνατον σάρκα ἢ ὀστοῦν ἢ ἄλλο τι ὁπηλι κονοῦν εἶναι τὸ μέγεθος ἢ ἐπὶ τὸ μεῖζον ἢ ἐπὶ τὸ ἔλαττον.

ἔτι εἰ πάντα μὲν ἐνυπάρχει τὰ τοιαῦτα ἐν ἀλλήλοις, καὶ μὴ γίγνεται ἀλλ' ἐκκρίνεται ἐνόντα, λέγεται δὲ ἀπὸ τοῦ πλείονος, γίγνεται δὲ ἐξ ὁτουοῦν ὁτιοῦν (οἷον ἐκ σαρκὸς ὕδωρ ἐκκρινόμενον καὶ σὰρξ ἐξ ὕδατος), ἅπαν δὲ σῶμα πεπερασμένον ἀναιρεῖται ὑπὸ σώματος πεπερασμένου, φανερὸν ὅτι οὐκ ἐνδέχεται ἐν ἑκάστῳ ἕκαστον ὑπάρχειν. ἀφαιρεθείσης γὰρ ἐκ τοῦ ὕδατος σαρκός, καὶ πάλιν ἄλλης γενομένης ἐκ τοῦ λοιποῦ ἀποκρίσει, εἰ καὶ ἀεὶ ἐλάττων ἔσται ἡ ἐκκρινομένη, ἀλλ' ὅμως οὐχ ὑπερβαλεῖ μέγεθός τι τῇ μικρότητι. ὥστ' εἰ μὲν στήσεται ἡ ἔκκρισις, οὐχ ἅπαν ἐν παντὶ ἐνέσται (ἐν γὰρ τῷ λοιπῷ ὕδατι οὐκ ἐνυπάρξει σάρξ), εἰ δὲ μὴ στήσεται ἀλλ' ἀεὶ ἕξει ἀφαίρεσιν, ἐν πεπερασμένῳ μεγέθει ἴσα πεπερασμένα ἐνέσται ἄπειρα τὸ πλῆθος· τοῦτο δ' ἀδύνατον. πρὸς δὲ τούτοις, εἰ ἅπαν μὲν σῶμα ἀφαιρεθέντος τινὸς ἔλαττον ἀνάγκη γίγνεσθαι, τῆς δὲ σαρκὸς ὥρισται τὸ ποσὸν καὶ μεγέθει καὶ μικρότητι, φανερὸν ὅτι ἐκ τῆς ἐλαχίστης [188a] σαρκὸς οὐθὲν ἐκκριθήσεται σῶμα· ἔσται γὰρ ἐλάττων τῆς ἐλαχίστης.

ἔτι δ' ἐν τοῖς ἀπείροις σώμασιν ἐνυπάρχοι ἂν ἤδη σὰρξ ἄπειρος καὶ αἷμα καὶ ἐγκέφαλος, κεχωρισμένα μέντοι ἀπ' ἀλλήλων <οὔ>, οὐθὲν δ' ἧττον ὄντα, καὶ ἄπειρον ἕκαστον· τοῦτο δ' ἄλογον.

τὸ δὲ μηδέποτε διακριθήσεσθαι οὐκ εἰδότως μὲν λέγεται, ὀρθῶς δὲ λέγεται· τὰ γὰρ πάθη ἀχώριστα· εἰ οὖν μέμικται τὰ χρώματα καὶ αἱ ἕξεις, ἐὰν διακριθῶσιν, ἔσται τι λευκὸν καὶ ὑγιεινὸν οὐχ ἕτερόν τι ὂν οὐδὲ καθ' ὑποκειμένου. ὥστε ἄτοπος τὰ ἀδύνατα ζητῶν ὁ νοῦς, εἴπερ βούλεται μὲν διακρῖναι, τοῦτο δὲ ποιῆσαι ἀδύνατον καὶ κατὰ τὸ ποσὸν καὶ κατὰ τὸ ποιόν, κατὰ μὲν τὸ ποσὸν ὅτι οὐκ ἔστιν ἐλάχιστον μέγεθος, κατὰ δὲ τὸ ποιὸν ὅτι ἀχώριστα τὰ πάθη.

οὐκ ὀρθῶς δὲ οὐδὲ τὴν γένεσιν λαμβάνει τῶν ὁμοειδῶν. ἔστι μὲν γὰρ ὡς ὁ πηλὸς εἰς πηλοὺς διαιρεῖται, ἔστι δ' ὡς οὔ. καὶ οὐχ ὁ αὐτὸς τρόπος, ὡς πλίνθοι ἐξ οἰκίας καὶ οἰκία ἐκ πλίνθων, οὕτω [δὲ] καὶ ὕδωρ καὶ ἀὴρ ἐξ ἀλλήλων καὶ εἰσὶ καὶ γίγνονται. βέλτιόν τε ἐλάττω καὶ πεπερασμένα λαβεῖν, ὅπερ ποιεῖ Ἐμπεδοκλῆς.

Κεφάλαιο 5

Πάντες δὴ τἀναντία ἀρχὰς ποιοῦσιν οἵ τε λέγοντες ὅτι ἓν τὸ πᾶν καὶ μὴ κινούμενον (καὶ γὰρ Παρμενίδης θερμὸν καὶ ψυχρὸν ἀρχὰς ποιεῖ, ταῦτα δὲ προσαγορεύει πῦρ καὶ γῆν) καὶ οἱ μανὸν καὶ πυκνόν, καὶ Δημόκριτος τὸ πλῆρες καὶ κενόν, ὧν τὸ μὲν ὡς ὂν τὸ δὲ ὡς οὐκ ὂν εἶναί φησιν· ἔτι θέσει, σχήματι, τάξει. ταῦτα δὲ γένη ἐναντίων· θέσεως ἄνω κάτω, πρόσθεν ὄπισθεν, σχήματος γεγωνιωμένον ἀγώνιον, εὐθὺ περιφερές.

ὅτι μὲν οὖν τἀναντία πως πάντες ποιοῦσι τὰς ἀρχάς, δῆλον. καὶ τοῦτο εὐλόγως· δεῖ γὰρ τὰς ἀρχὰς μήτε ἐξ ἀλλήλων εἶναι μήτε ἐξ ἄλλων, καὶ ἐκ τούτων πάντα· τοῖς δὲ ἐναντίοις τοῖς πρώτοις ὑπάρχει ταῦτα, διὰ μὲν τὸ πρῶτα εἶναι μὴ ἐξ ἄλλων, διὰ δὲ τὸ ἐναντία μὴ ἐξ ἀλλήλων.

ἀλλὰ δεῖ τοῦτο καὶ ἐπὶ τοῦ λόγου σκέψασθαι πῶς συμβαίνει.

ληπτέον δὴ πρῶτον ὅτι πάντων τῶν ὄντων οὐθὲν οὔτε ποιεῖν πέφυκεν οὔτε πάσχειν τὸ τυχὸν ὑπὸ τοῦ τυχόντος, οὐδὲ γίγνεται ὁτιοῦν ἐξ ὁτουοῦν, ἂν μή τις λαμβάνῃ κατὰ συμβεβηκός· πῶς γὰρ ἂν γένοιτο λευκὸν ἐκ μουσικοῦ, πλὴν εἰ μὴ συμβεβηκὸς εἴη τῷ μὴ λευκῷ ἢ τῷ μέλανι τὸ μουσικόν; ἀλλὰ λευκὸν μὲν γίγνεται ἐξ οὐ λευκοῦ, καὶ τούτου οὐκ ἐκ παντὸς [188b] ἀλλ’ ἐκ μέλανος ἢ τῶν μεταξύ, καὶ μουσικὸν οὐκ ἐκ μουσικοῦ, πλὴν οὐκ ἐκ παντὸς ἀλλ’ ἐξ ἀμούσου ἢ εἴ τι αὐτῶν ἐστι μεταξύ.

οὐδὲ δὴ φθείρεται εἰς τὸ τυχὸν πρῶτον, οἷον τὸ λευκὸν οὐκ εἰς τὸ μουσικόν, πλὴν εἰ μή ποτε κατὰ συμβεβηκός, ἀλλ’ εἰς τὸ μὴ λευκόν, καὶ οὐκ εἰς τὸ τυχὸν ἀλλ’ εἰς τὸ μέλαν ἢ τὸ μεταξύ· ὡς δ’ αὔτως καὶ τὸ μουσικὸν εἰς τὸ μὴ μουσικόν, καὶ τοῦτο οὐκ εἰς τὸ τυχὸν ἀλλ’ εἰς τὸ ἄμουσον ἢ εἴ τι αὐτῶν ἐστι μεταξύ.

ὁμοίως δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων, ἐπεὶ καὶ τὰ μὴ ἁπλᾶ τῶν ὄντων ἀλλὰ σύνθετα κατὰ τὸν αὐτὸν ἔχει λόγον· ἀλλὰ διὰ τὸ μὴ τὰς ἀντικειμένας διαθέσεις ὠνομάσθαι λανθάνει τοῦτο συμβαῖνον. ἀνάγκη γὰρ πᾶν τὸ ἡρμοσμένον ἐξ ἀναρμόστου γίγνεσθαι καὶ τὸ ἀνάρμοστον ἐξ ἡρμοσμένου, καὶ φθείρεσθαι τὸ ἡρμοσμένον εἰς ἀναρμοστίαν, καὶ ταύτην οὐ τὴν τυχοῦσαν ἀλλὰ τὴν ἀντικειμένην. διαφέρει δ’ οὐθὲν ἐπὶ ἁρμονίας εἰπεῖν ἢ τάξεως ἢ συνθέσεως· φανερὸν γὰρ ὅτι ὁ αὐτὸς λόγος. ἀλλὰ μὴν καὶ οἰκία καὶ ἀνδριὰς καὶ ὁτιοῦν ἄλλο γίγνεται ὁμοίως· ἥ τε γὰρ οἰκία γίγνεται ἐκ τοῦ μὴ συγκεῖσθαι ἀλλὰ διῃρῆσθαι ταδὶ ὡδί, καὶ ὁ ἀνδριὰς καὶ τῶν ἐσχηματισμένων τι ἐξ ἀσχημοσύνης· καὶ ἕκαστον τούτων τὰ μὲν τάξις, τὰ δὲ σύνθεσίς τίς ἐστιν.

εἰ τοίνυν τοῦτ’ ἔστιν ἀληθές, ἅπαν ἂν γίγνοιτο τὸ γιγνόμενον καὶ φθείροιτο τὸ φθειρόμενον ἢ ἐξ ἐναντίων ἢ εἰς ἐναντία καὶ τὰ τούτων μεταξύ. τὰ δὲ μεταξὺ ἐκ τῶν ἐναντίων ἐστίν, οἷον χρώματα ἐκ λευκοῦ καὶ μέλανος· ὥστε πάντ’ ἂν εἴη τὰ φύσει γιγνόμενα ἢ ἐναντία ἢ ἐξ ἐναντίων.

μέχρι μὲν οὖν ἐπὶ τοσοῦτον σχεδὸν συνηκολουθήκασι καὶ τῶν ἄλλων οἱ πλεῖστοι, καθάπερ εἴπομεν πρότερον· πάντες γὰρ τὰ στοιχεῖα καὶ τὰς ὑπ’ αὐτῶν καλουμένας ἀρχάς, καίπερ ἄνευ λόγου τιθέντες, ὅμως τἀναντία λέγουσιν, ὥσπερ ὑπ’ αὐτῆς τῆς ἀληθείας ἀναγκασθέντες. διαφέρουσι δ’ ἀλλήλων τῷ τοὺς μὲν πρότερα τοὺς δ’ ὕστερα λαμβάνειν, καὶ τοὺς μὲν γνωριμώτερα κατὰ τὸν λόγον τοὺς δὲ κατὰ τὴν αἴσθησιν (οἱ μὲν γὰρ θερμὸν καὶ ψυχρόν, οἱ δ’ ὑγρὸν καὶ ξηρόν, ἕτεροι δὲ περιττὸν καὶ ἄρτιον ἢ νεῖκος καὶ φιλίαν αἰ τίας τίθενται τῆς γενέσεως· ταῦτα δ’ ἀλλήλων διαφέρει κατὰ τὸν εἰρημένον τρόπον),

ὥστε ταὐτὰ λέγειν πως καὶ ἕτερα ἀλλήλων, ἕτερα μὲν ὥσπερ καὶ δοκεῖ τοῖς πλείστοις, ταὐτὰ [189a] δὲ ᾗ ἀνάλογον· λαμβάνουσι γὰρ ἐκ τῆς αὐτῆς συστοιχίας· τὰ μὲν γὰρ περιέχει, τὰ δὲ περιέχεται τῶν ἐναντίων. ταύτῃ τε δὴ ὡσαύτως λέγουσι καὶ ἑτέρως, καὶ χεῖρον καὶ βέλτιον, καὶ οἱ μὲν γνωριμώτερα κατὰ τὸν λόγον, ὥσπερ εἴρηται πρότερον, οἱ δὲ κατὰ τὴν αἴσθησιν (τὸ μὲν γὰρ καθόλου κατὰ τὸν λόγον γνώριμον, τὸ δὲ καθ’ ἕκαστον κατὰ τὴν αἴσθησιν· ὁ μὲν γὰρ λόγος τοῦ καθόλου, ἡ δ’ αἴσθησις τοῦ κατὰ μέρος), οἷον τὸ μὲν μέγα καὶ τὸ μικρὸν κατὰ τὸν λόγον, τὸ δὲ μανὸν καὶ τὸ πυκνὸν κατὰ τὴν αἴσθησιν.

ὅτι μὲν οὖν ἐναντίας δεῖ τὰς ἀρχὰς εἶναι, φανερόν.

Κεφάλαιο 6

Ἐχόμενον δ’ ἂν εἴη λέγειν πότερον δύο ἢ τρεῖς ἢ πλείους εἰσίν.

μίαν μὲν γὰρ οὐχ οἷόν τε, ὅτι οὐχ ἓν τὰ ἐναντία, ἀπείρους δ’, ὅτι οὐκ ἐπιστητὸν τὸ ὂν ἔσται, μία τε ἐναντίωσις ἐν παντὶ γένει ἑνί, ἡ δ’ οὐσία ἕν τι γένος, καὶ ὅτι ἐνδέχεται ἐκ πεπερασμένων, βέλτιον δ’ ἐκ πεπερασμένων, ὥσπερ Ἐμπεδοκλῆς, ἢ ἐξ ἀπείρων· πάντα γὰρ ἀποδιδόναι οἴεται ὅσαπερ Ἀναξαγόρας ἐκ τῶν ἀπείρων. ἔτι δὲ ἔστιν ἄλλα ἄλλων πρότερα ἐναντία, καὶ γίγνεται ἕτερα ἐξ ἀλλήλων, οἷον γλυκὺ καὶ πικρὸν καὶ λευκὸν καὶ μέλαν, τὰς δὲ ἀρχὰς ἀεὶ δεῖ μένειν.

ὅτι μὲν οὖν οὔτε μία οὔτε ἄπειροι, δῆλον ἐκ τούτων·

ἐπεὶ δὲ πεπερασμέναι, τὸ μὴ ποιεῖν δύο μόνον ἔχει τινὰ λόγον· ἀπορήσειε γὰρ ἄν τις πῶς ἢ ἡ πυκνότης τὴν μανότητα ποιεῖν τι πέφυκεν ἢ αὕτη τὴν πυκνότητα. ὁμοίως δὲ καὶ ἄλλη ὁποιαοῦν ἐναντιότης· οὐ γὰρ ἡ φιλία τὸ νεῖκος συνάγει καὶ ποιεῖ τι ἐξ αὐτοῦ, οὐδὲ τὸ νεῖκος ἐξ ἐκείνης, ἀλλ’ ἄμφω ἕτερόν τι τρίτον. ἔνιοι δὲ καὶ πλείω λαμβάνουσιν ἐξ ὧν κατα σκευάζουσι τὴν τῶν ὄντων φύσιν.

πρὸς δὲ τούτοις ἔτι κἂν τόδε τις ἀπορήσειεν, εἰ μή τις ἑτέραν ὑποθήσει τοῖς ἐναντίοις φύσιν· οὐθενὸς γὰρ ὁρῶμεν τῶν ὄντων οὐσίαν τἀναντία, τὴν δ’ ἀρχὴν οὐ καθ’ ὑποκειμένου δεῖ λέγεσθαί τινος. ἔσται γὰρ ἀρχὴ τῆς ἀρχῆς· τὸ γὰρ ὑποκείμενον ἀρχή, καὶ πρότερον δοκεῖ τοῦ κατηγορουμένου εἶναι. ἔτι οὐκ εἶναί φαμεν οὐσίαν ἐναντίαν οὐσίᾳ· πῶς οὖν ἐκ μὴ οὐσιῶν οὐσία ἂν εἴη; ἢ πῶς ἂν πρότερον μὴ οὐσία οὐσίας εἴη;

διόπερ εἴ τις τόν τε πρότερον ἀληθῆ νομίσειεν εἶναι λόγον καὶ τοῦτον, ἀναγκαῖον, [189b] εἰ μέλλει διασώσειν ἀμφοτέρους αὐτούς, ὑποτιθέναι τι τρίτον, ὥσπερ φασὶν οἱ μίαν τινὰ φύσιν εἶναι λέγοντες τὸ πᾶν, οἷον ὕδωρ ἢ πῦρ ἢ τὸ μεταξὺ τούτων. δοκεῖ δὲ τὸ μεταξὺ μᾶλλον· πῦρ γὰρ ἤδη καὶ γῆ καὶ ἀὴρ καὶ ὕδωρ μετ’ ἐναντιοτήτων συμπεπλεγμένα ἐστίν. διὸ καὶ οὐκ ἀλόγως ποιοῦσιν οἱ τὸ ὑποκείμενον ἕτερον τούτων ποιοῦντες, τῶν δ’ ἄλλων οἱ ἀέρα· καὶ γὰρ ὁ ἀὴρ ἥκιστα ἔχει τῶν ἄλλων διαφορὰς αἰσθητάς· ἐχόμενον δὲ τὸ ὕδωρ. ἀλλὰ πάντες γε τὸ ἓν τοῦτο τοῖς ἐναντίοις σχηματίζουσιν, πυκνότητι καὶ μανότητι καὶ τῷ μᾶλλον καὶ ἧττον. ταῦτα δ’ ἐστὶν ὅλως ὑπεροχὴ δηλονότι καὶ ἔλλειψις, ὥσπερ εἴρηται πρότερον. καὶ ἔοικε παλαιὰ εἶναι καὶ αὕτη ἡ δόξα, ὅτι τὸ ἓν καὶ ὑπεροχὴ καὶ ἔλλειψις ἀρχαὶ τῶν ὄντων εἰσί, πλὴν οὐ τὸν αὐτὸν τρόπον, ἀλλ’ οἱ μὲν ἀρχαῖοι τὰ δύο μὲν ποιεῖν τὸ δὲ ἓν πάσχειν, τῶν δ’ ὑστέρων τινὲς τοὐναντίον τὸ μὲν ἓν ποιεῖν τὰ δὲ δύο πάσχειν φασὶ μᾶλλον.

τὸ μὲν οὖν τρία φάσκειν τὰ στοιχεῖα εἶναι ἔκ τε τούτων καὶ ἐκ τοιούτων ἄλλων ἐπισκοποῦσι δόξειεν ἂν ἔχειν τινὰ λόγον, ὥσπερ εἴπομεν, τὸ δὲ πλείω τριῶν οὐκέτι·

πρὸς μὲν γὰρ τὸ πάσχειν ἱκανὸν τὸ ἕν, εἰ δὲ τεττάρων ὄντων δύο ἔσονται ἐναντιώσεις, δεήσει χωρὶς ἑκατέρᾳ ὑπάρχειν ἑτέραν τινὰ μεταξὺ φύσιν· εἰ δ’ ἐξ ἀλλήλων δύνανται γεννᾶν δύο οὖσαι, περίεργος ἂν ἡ ἑτέρα τῶν ἐναντιώσεων εἴη. ἅμα δὲ καὶ ἀδύνατον πλείους εἶναι ἐναντιώσεις τὰς πρώτας. ἡ γὰρ οὐσία ἕν τι γένος ἐστὶ τοῦ ὄντος, ὥστε τῷ πρότερον καὶ ὕστερον διοίσουσιν ἀλλήλων αἱ ἀρχαὶ μόνον, ἀλλ’ οὐ τῷ γένει· ἀεὶ γὰρ ἐν ἑνὶ γένει μία ἐναντίωσις ἔστιν, πᾶσαί τε αἱ ἐναντιώσεις ἀνάγεσθαι δοκοῦσιν εἰς μίαν.

ὅτι μὲν οὖν οὔτε ἓν τὸ στοιχεῖον οὔτε πλείω δυοῖν ἢ τριῶν, φανερόν· τούτων δὲ πότερον, καθάπερ εἴπομεν, ἀπορίαν ἔχει πολλήν.

Κεφάλαιο 7

Ὧδ’ οὖν ἡμεῖς λέγωμεν πρῶτον περὶ πάσης γενέσεως ἐπελθόντες· ἔστι γὰρ κατὰ φύσιν τὰ κοινὰ πρῶτον εἰπόντας οὕτω τὰ περὶ ἕκαστον ἴδια θεωρεῖν.

φαμὲν γὰρ γίγνεσθαι ἐξ ἄλλου ἄλλο καὶ ἐξ ἑτέρου ἕτερον ἢ τὰ ἁπλᾶ λέγοντες ἢ τὰ συγκείμενα. λέγω δὲ τοῦτο ὡδί. ἔστι γὰρ γίγνεσθαι ἄνθρωπον μουσικόν, ἔστι δὲ τὸ μὴ μουσικὸν γίγνεσθαι μουσικὸν ἢ τὸν [190a] μὴ μουσικὸν ἄνθρωπον ἄνθρωπον μουσικόν. ἁπλοῦν μὲν οὖν λέγω τὸ γιγνόμενον τὸν ἄνθρωπον καὶ τὸ μὴ μουσικόν, καὶ ὃ γίγνεται ἁπλοῦν, τὸ μουσικόν· συγκείμενον δὲ καὶ ὃ γίγνεται καὶ τὸ γιγνόμενον, ὅταν τὸν μὴ μουσικὸν ἄνθρωπον φῶμεν γίγνεσθαι μουσικὸν ἄνθρωπον.

τούτων δὲ τὸ μὲν οὐ μόνον λέγεται τόδε γίγνεσθαι ἀλλὰ καὶ ἐκ τοῦδε, οἷον ἐκ μὴ μουσικοῦ μουσικός, τὸ δ’ οὐ λέγεται ἐπὶ πάντων· οὐ γὰρ ἐξ ἀνθρώπου ἐγένετο μουσικός, ἀλλ’ ἄνθρωπος ἐγένετο μουσικός.

τῶν δὲ γιγνομένων ὡς τὰ ἁπλᾶ λέγομεν γίγνεσθαι, τὸ μὲν ὑπομένον γίγνεται τὸ δ’ οὐχ ὑπομένον· ὁ μὲν γὰρ ἄνθρωπος ὑπομένει μουσικὸς γιγνόμενος ἄνθρωπος καὶ ἔστι, τὸ δὲ μὴ μουσικὸν καὶ τὸ ἄμουσον οὔτε ἁπλῶς οὔτε συντεθειμένον ὑπομένει.

διωρισμένων δὲ τούτων, ἐξ ἁπάντων τῶν γιγνομένων τοῦτο ἔστι λαβεῖν, ἐάν τις ἐπιβλέψῃ ὥσπερ λέγομεν, ὅτι δεῖ τι ἀεὶ ὑποκεῖσθαι τὸ γιγνόμενον, καὶ τοῦτο εἰ καὶ ἀριθμῷ ἐστιν ἕν, ἀλλ’ εἴδει γε οὐχ ἕν· τὸ γὰρ εἴδει λέγω καὶ λόγῳ ταὐτόν· οὐ γὰρ ταὐτὸν τὸ ἀνθρώπῳ καὶ τὸ ἀμούσῳ εἶναι. καὶ τὸ μὲν ὑπομένει, τὸ δ’ οὐχ ὑπομένει· τὸ μὲν μὴ ἀντικείμενον ὑπομένει (ὁ γὰρ ἄνθρωπος ὑπομένει), τὸ μὴ μουσικὸν δὲ καὶ τὸ ἄμουσον οὐχ ὑπομένει, οὐδὲ τὸ ἐξ ἀμφοῖν συγκείμενον, οἷον ὁ ἄμουσος ἄνθρωπος.

τὸ δ’ ἔκ τινος γίγνεσθαί τι, καὶ μὴ τόδε γίγνεσθαί τι, μᾶλλον μὲν λέγεται ἐπὶ τῶν μὴ ὑπομενόντων, οἷον ἐξ ἀμούσου μουσικὸν γίγνεσθαι, ἐξ ἀνθρώπου δὲ οὔ· οὐ μὴν ἀλλὰ καὶ ἐπὶ τῶν ὑπομενόντων ἐνίοτε λέγεται ὡσαύτως· ἐκ γὰρ χαλκοῦ ἀνδριάντα γίγνεσθαί φαμεν, οὐ τὸν χαλκὸν ἀνδριάντα. τὸ μέντοι ἐκ τοῦ ἀντικειμένου καὶ μὴ ὑπομένοντος ἀμφοτέρως λέγεται, καὶ ἐκ τοῦδε τόδε καὶ τόδε τόδε· καὶ γὰρ ἐξ ἀμούσου καὶ ὁ ἄμουσος γίγνεται μουσικός. διὸ καὶ ἐπὶ τοῦ συγκειμένου ὡσαύτως· καὶ γὰρ ἐξ ἀμούσου ἀνθρώπου καὶ ὁ ἄμουσος ἄνθρωπος γίγνεσθαι λέγεται μουσικός.

πολλαχῶς δὲ λεγομένου τοῦ γίγνεσθαι, καὶ τῶν μὲν οὐ γίγνεσθαι ἀλλὰ τόδε τι γίγνεσθαι, ἁπλῶς δὲ γίγνεσθαι τῶν οὐσιῶν μόνον,

κατὰ μὲν τἆλλα φανερὸν ὅτι ἀνάγκη ὑποκεῖσθαί τι τὸ γιγνόμενον (καὶ γὰρ ποσὸν καὶ ποιὸν καὶ πρὸς ἕτερον [καὶ ποτὲ] καὶ ποὺ γίγνεται ὑποκειμένου τινὸς διὰ τὸ μόνην τὴν οὐσίαν μηθενὸς κατ’ ἄλλου λέγεσθαι ὑποκειμένου, [190b] τὰ δ’ ἄλλα πάντα κατὰ τῆς οὐσίας)·

ὅτι δὲ καὶ αἱ οὐσίαι καὶ ὅσα [ἄλλα] ἁπλῶς ὄντα ἐξ ὑποκειμένου τινὸς γίγνεται, ἐπισκοποῦντι γένοιτο ἂν φανερόν. ἀεὶ γὰρ ἔστι ὃ ὑπόκειται, ἐξ οὗ τὸ γιγνόμενον, οἷον τὰ φυτὰ καὶ τὰ ζῷα ἐκ σπέρματος.

γίγνεται δὲ τὰ γιγνόμενα ἁπλῶς τὰ μὲν μετασχηματίσει, οἷον ἀνδριάς, τὰ δὲ προσθέσει, οἷον τὰ αὐξανόμενα, τὰ δ’ ἀφαιρέσει, οἷον ἐκ τοῦ λίθου ὁ Ἑρμῆς, τὰ δὲ συνθέσει, οἷον οἰκία, τὰ δ’ ἀλλοιώσει, οἷον τὰ τρεπόμενα κατὰ τὴν ὕλην.

πάντα δὲ τὰ οὕτω γιγνόμενα φανερὸν ὅτι ἐξ ὑποκειμένων γίγνεται.

ὥστε δῆλον ἐκ τῶν εἰ ρημένων ὅτι τὸ γιγνόμενον ἅπαν ἀεὶ συνθετόν ἐστι, καὶ ἔστι μέν τι γιγνόμενον, ἔστι δέ τι ὃ τοῦτο γίγνεται, καὶ τοῦτο διττόν· ἢ γὰρ τὸ ὑποκείμενον ἢ τὸ ἀντικείμενον. λέγω δὲ ἀντικεῖσθαι μὲν τὸ ἄμουσον, ὑποκεῖσθαι δὲ τὸν ἄνθρωπον, καὶ τὴν μὲν ἀσχημοσύνην καὶ τὴν ἀμορφίαν καὶ τὴν ἀταξίαν τὸ ἀντικείμενον, τὸν δὲ χαλκὸν ἢ τὸν λίθον ἢ τὸν χρυσὸν τὸ ὑποκείμενον.

φανερὸν οὖν ὡς, εἴπερ εἰσὶν αἰτίαι καὶ ἀρχαὶ τῶν φύσει ὄντων, ἐξ ὧν πρώτων εἰσὶ καὶ γεγόνασι μὴ κατὰ συμβεβηκὸς ἀλλ’ ἕκαστον ὃ λέγεται κατὰ τὴν οὐσίαν, ὅτι γίγνεται πᾶν ἔκ τε τοῦ ὑποκειμένου καὶ τῆς μορφῆς· σύγ κειται γὰρ ὁ μουσικὸς ἄνθρωπος ἐξ ἀνθρώπου καὶ μουσικοῦ τρόπον τινά· διαλύσεις γὰρ [τοὺς λόγους] εἰς τοὺς λόγους τοὺς ἐκείνων. δῆλον οὖν ὡς γίγνοιτ’ ἂν τὰ γιγνόμενα ἐκ τούτων.

ἔστι δὲ τὸ μὲν ὑποκείμενον ἀριθμῷ μὲν ἕν, εἴδει δὲ δύο (ὁ μὲν γὰρ ἄνθρωπος καὶ ὁ χρυσὸς καὶ ὅλως ἡ ὕλη ἀριθμητή· τόδε γάρ τι μᾶλλον, καὶ οὐ κατὰ συμβεβηκὸς ἐξ αὐτοῦ γίγνεται τὸ γιγνόμενον· ἡ δὲ στέρησις καὶ ἡ ἐναντίωσις συμβεβηκός)· ἓν δὲ τὸ εἶδος, οἷον ἡ τάξις ἢ ἡ μουσικὴ ἢ τῶν ἄλλων τι τῶν οὕτω κατηγορουμένων. διὸ ἔστι μὲν ὡς δύο λεκτέον εἶναι τὰς ἀρχάς, ἔστι δ’ ὡς τρεῖς· καὶ ἔστι μὲν ὡς τἀναντία, οἷον εἴ τις λέγοι τὸ μουσικὸν καὶ τὸ ἄμουσον ἢ τὸ θερμὸν καὶ τὸ ψυχρὸν ἢ τὸ ἡρμοσμένον καὶ τὸ ἀνάρμοστον, ἔστι δ’ ὡς οὔ· ὑπ’ ἀλλήλων γὰρ πάσχειν τἀναντία ἀδύνατον. λύεται δὲ καὶ τοῦτο διὰ τὸ ἄλλο εἶναι τὸ ὑποκείμενον· τοῦτο γὰρ οὐκ ἐναντίον. ὥστε οὔτε πλείους τῶν ἐναντίων αἱ ἀρχαὶ τρόπον τινά, ἀλλὰ δύο ὡς εἰπεῖν τῷ ἀριθμῷ, οὔτ’ αὖ παντελῶς δύο διὰ [191a] τὸ ἕτερον ὑπάρχειν τὸ εἶναι αὐτοῖς, ἀλλὰ τρεῖς· ἕτερον γὰρ τὸ ἀνθρώπῳ καὶ τὸ ἀμούσῳ εἶναι, καὶ τὸ ἀσχηματίστῳ καὶ χαλκῷ.

πόσαι μὲν οὖν αἱ ἀρχαὶ τῶν περὶ γένεσιν φυσικῶν, καὶ πῶς ποσαί, εἴρηται· καὶ δῆλόν ἐστιν ὅτι δεῖ ὑποκεῖσθαί τι τοῖς ἐναντίοις καὶ τἀναντία δύο εἶναι. τρόπον δέ τινα ἄλλον οὐκ ἀναγκαῖον· ἱκανὸν γὰρ ἔσται τὸ ἕτερον τῶν ἐναντίων ποιεῖν τῇ ἀπουσίᾳ καὶ παρουσίᾳ τὴν μεταβολήν.

ἡ δὲ ὑποκειμένη φύσις ἐπιστητὴ κατ’ ἀναλογίαν. ὡς γὰρ πρὸς ἀνδριάντα χαλκὸς ἢ πρὸς κλίνην ξύλον ἢ πρὸς τῶν ἄλλων τι τῶν ἐχόντων μορφὴν [ἡ ὕλη καὶ] τὸ ἄμορφον ἔχει πρὶν λαβεῖν τὴν μορφήν, οὕτως αὕτη πρὸς οὐσίαν ἔχει καὶ τὸ τόδε τι καὶ τὸ ὄν.

μία μὲν οὖν ἀρχὴ αὕτη, οὐχ οὕτω μία οὖσα οὐδὲ οὕτως ὂν ὡς τὸ τόδε τι, μία δὲ ἧς ὁ λόγος, ἔτι δὲ τὸ ἐναντίον τούτῳ, ἡ στέρησις. ταῦτα δὲ πῶς δύο καὶ πῶς πλείω, εἴρηται ἐν τοῖς ἄνω. πρῶτον μὲν οὖν ἐλέχθη ὅτι ἀρ χαὶ τἀναντία μόνον, ὕστερον δ’ ὅτι ἀνάγκη καὶ ἄλλο τι ὑποκεῖσθαι καὶ εἶναι τρία· ἐκ δὲ τῶν νῦν φανερὸν τίς ἡ διαφορὰ τῶν ἐναντίων, καὶ πῶς ἔχουσιν αἱ ἀρχαὶ πρὸς ἀλλήλας, καὶ τί τὸ ὑποκείμενον. πότερον δὲ οὐσία τὸ εἶδος ἢ τὸ ὑποκείμενον, οὔπω δῆλον. ἀλλ’ ὅτι αἱ ἀρχαὶ τρεῖς καὶ πῶς τρεῖς, καὶ τίς ὁ τρόπος αὐτῶν, δῆλον. πόσαι μὲν οὖν καὶ τίνες εἰσὶν αἱ ἀρχαί, ἐκ τούτων θεωρείσθωσαν.

Κεφάλαιο 8

Ὅτι δὲ μοναχῶς οὕτω λύεται καὶ ἡ τῶν ἀρχαίων ἀπορία, λέγωμεν μετὰ ταῦτα.

ζητοῦντες γὰρ οἱ κατὰ φιλοσοφίαν πρῶτοι τὴν ἀλήθειαν καὶ τὴν φύσιν τῶν ὄντων ἐξετράπησαν οἷον ὁδόν τινα ἄλλην ἀπωσθέντες ὑπὸ ἀπειρίας, καί φασιν οὔτε γίγνεσθαι τῶν ὄντων οὐδὲν οὔτε φθείρεσθαι διὰ τὸ ἀναγκαῖον μὲν εἶναι γίγνεσθαι τὸ γιγνόμενον ἢ ἐξ ὄντος ἢ ἐκ μὴ ὄντος, ἐκ δὲ τούτων ἀμφοτέρων ἀδύνατον εἶναι· οὔτε γὰρ τὸ ὂν γίγνεσθαι (εἶναι γὰρ ἤδη) ἔκ τε μὴ ὄντος οὐδὲν ἂν γενέσθαι· ὑποκεῖσθαι γάρ τι δεῖν. καὶ οὕτω δὴ τὸ ἐφεξῆς συμβαῖνον αὔξοντες οὐδ᾽ εἶναι πολλά φασιν ἀλλὰ μόνον αὐτὸ τὸ ὄν. ἐκεῖνοι μὲν οὖν ταύτην ἔλαβον τὴν δόξαν διὰ τὰ εἰρημένα·

ἡμεῖς δὲ λέγομεν ὅτι τὸ ἐξ ὄντος ἢ μὴ ὄντος γίγνεσθαι, ἢ τὸ μὴ ὂν ἢ τὸ ὂν ποιεῖν τι ἢ πάσχειν ἢ ὁτιοῦν τόδε γίγνεσθαι, ἕνα μὲν τρόπον οὐθὲν [191b]διαφέρει ἢ τὸ τὸν ἰατρὸν ποιεῖν τι ἢ πάσχειν ἢ ἐξ ἰατροῦ εἶναί τι ἢ γίγνεσθαι, ὥστ᾽ ἐπειδὴ τοῦτο διχῶς λέγεται, δῆλον ὅτι καὶ τὸ ἐξ ὄντος καὶ τὸ ὂν ἢ ποιεῖν ἢ πάσχειν. οἰκοδομεῖ μὲν οὖν ὁ ἰατρὸς οὐχ ᾗ ἰατρὸς ἀλλ᾽ ᾗ οἰκοδόμος, καὶ λευκὸς γίγνεται οὐχ ᾗ ἰατρὸς ἀλλ᾽ ᾗ μέλας· ἰατρεύει δὲ καὶ ἀνίατρος γίγνεται ᾗ ἰατρός. ἐπεὶ δὲ μάλιστα λέγομεν κυρίως τὸν ἰατρὸν ποιεῖν τι ἢ πάσχειν ἢ γίγνεσθαι ἐξ ἰατροῦ, ἐὰν ᾗ ἰατρὸς ταῦτα πάσχῃ ἢ ποιῇ ἢ γίγνηται, δῆλον ὅτι καὶ τὸ ἐκ μὴ ὄντος γίγνεσθαι τοῦτο σημαίνει, τὸ ᾗ μὴ ὄν.

ὅπερ ἐκεῖνοι μὲν οὐ διελόντες ἀπέστησαν, καὶ διὰ ταύτην τὴν ἄγνοιαν τοσοῦτον προσηγνόησαν, ὥστε μηθὲν οἴεσθαι γίγνεσθαι μηδ᾽ εἶναι τῶν ἄλλων, ἀλλ᾽ ἀνελεῖν πᾶσαν τὴν γένεσιν·

ἡμεῖς δὲ καὶ αὐτοί φαμεν γίγνεσθαι μὲν μηθὲν ἁπλῶς ἐκ μὴ ὄντος, πὼς μέντοι γίγνεσθαι ἐκ μὴ ὄντος, οἷον κατὰ συμβεβηκός (ἐκ γὰρ τῆς στερήσεως, ὅ ἐστι καθ᾽ αὑτὸ μὴ ὄν, οὐκ ἐνυπάρχοντος γίγνεταί τι· θαυμάζεται δὲ τοῦτο καὶ ἀδύνατον οὕτω δοκεῖ γίγνεσθαί τι, ἐκ μὴ ὄντος)·

ὡσαύτως δὲ οὐδ᾽ ἐξ ὄντος οὐδὲ τὸ ὂν γίγνεσθαι, πλὴν κατὰ συμβεβηκός· οὕτω δὲ καὶ τοῦτο γίγνεσθαι, τὸν αὐτὸν τρόπον οἷον εἰ ἐκ ζῴου ζῷον γίγνοιτο καὶ ἐκ τινὸς ζῴου τι ζῷον· οἷον εἰ κύων <ἐκ κυνὸς ἢ ἵππος> ἐξ ἵππου γίγνοιτο. γίγνοιτο μὲν γὰρ ἂν οὐ μόνον ἐκ τινὸς ζῴου ὁ κύων, ἀλλὰ καὶ ἐκ ζῴου, ἀλλ᾽ οὐχ ᾗ ζῷον· ὑπάρχει γὰρ ἤδη τοῦτο· εἰ δέ τι μέλλει γίγνεσθαι ζῷον μὴ κατὰ συμβεβηκός, οὐκ ἐκ ζῴου ἔσται, καὶ εἴ τι ὄν, οὐκ ἐξ ὄντος· οὐδ’ ἐκ μὴ ὄντος· τὸ γὰρ ἐκ μὴ ὄντος εἴρηται ἡμῖν τί σημαίνει, ὅτι ᾗ μὴ ὄν.

ἔτι δὲ καὶ τὸ εἶναι ἅπαν ἢ μὴ εἶναι οὐκ ἀναιροῦμεν.

εἷς μὲν δὴ τρόπος οὗτος, ἄλλος δ’ ὅτι ἐνδέχεται ταὐτὰ λέγειν κατὰ τὴν δύναμιν καὶ τὴν ἐνέργειαν· τοῦτο δ’ ἐν ἄλλοις διώρισται δι’ ἀκριβείας μᾶλλον. ὥσθ’ (ὅπερ ἐλέγομεν) αἱ ἀπορίαι λύονται δι’ ἃς ἀναγκα ζόμενοι ἀναιροῦσι τῶν εἰρημένων ἔνια· διὰ γὰρ τοῦτο τοσοῦτον καὶ οἱ πρότερον ἐξετράπησαν τῆς ὁδοῦ τῆς ἐπὶ τὴν γένεσιν καὶ φθορὰν καὶ ὅλως μεταβολήν· αὕτη γὰρ ἂν ὀφθεῖσα ἡ φύσις ἅπασαν ἔλυσεν αὐτῶν τὴν ἄγνοιαν.

Κεφάλαιο 9

Ἡμμένοι μὲν οὖν καὶ ἕτεροί τινές εἰσιν αὐτῆς, ἀλλ’ οὐχ ἱκανῶς.

πρῶτον μὲν γὰρ ὁμολογοῦσιν ἁπλῶς γίγνεσθαί τι ἐκ μὴ [192a] ὄντος, ᾗ Παρμενίδην ὀρθῶς λέγειν· εἶτα φαίνεται αὐτοῖς, εἴπερ ἐστὶν ἀριθμῷ μία, καὶ δυνάμει μία μόνον εἶναι. τοῦτο δὲ διαφέρει πλεῖστον.

ἡμεῖς μὲν γὰρ ὕλην καὶ στέρησιν ἕτερόν φαμεν εἶναι, καὶ τούτων τὸ μὲν οὐκ ὂν εἶναι κατὰ συμβεβηκός, τὴν ὕλην, τὴν δὲ στέρησιν καθ’ αὑτήν, καὶ τὴν μὲν ἐγγὺς καὶ οὐσίαν πως, τὴν ὕλην, τὴν δὲ οὐδαμῶς· οἱ δὲ τὸ μὴ ὂν τὸ μέγα καὶ τὸ μικρὸν ὁμοίως, ἢ τὸ συναμφότερον ἢ τὸ χωρὶς ἑκάτερον. ὥστε παντελῶς ἕτερος ὁ τρόπος οὗτος τῆς τριάδος κἀκεῖνος. μέχρι μὲν γὰρ δεῦρο προῆλθον, ὅτι δεῖ τινὰ ὑποκεῖσθαι φύσιν, ταύτην μέντοι μίαν ποιοῦσιν· καὶ γὰρ εἴ τις δυάδα ποιεῖ, λέγων μέγα καὶ μικρὸν αὐτήν, οὐθὲν ἧττον ταὐτὸ ποιεῖ· τὴν γὰρ ἑτέραν παρεῖδεν. ἡ μὲν γὰρ ὑπομένουσα συναιτία τῇ μορφῇ τῶν γιγνομένων ἐστίν, ὥσπερ μήτηρ· ἡ δ’ ἑτέρα μοῖρα τῆς ἐναντιώσεως πολλάκις ἂν φαντασθείη τῷ πρὸς τὸ κακοποιὸν αὐτῆς ἀτενίζοντι τὴν διάνοιαν οὐδ’ εἶναι τὸ παράπαν. ὄντος γάρ τινος θείου καὶ ἀγαθοῦ καὶ ἐφετοῦ, τὸ μὲν ἐναντίον αὐτῷ φαμεν εἶναι, τὸ δὲ ὃ πέφυκεν ἐφίεσθαι καὶ ὀρέγεσθαι αὐτοῦ κατὰ τὴν αὑτοῦ φύσιν. τοῖς δὲ συμβαίνει τὸ ἐναντίον ὀρέγεσθαι τῆς αὑτοῦ φθορᾶς. καίτοι οὔτε αὐτὸ αὑτοῦ οἷόν τε ἐφίεσθαι τὸ εἶδος διὰ τὸ μὴ εἶναι ἐνδεές, οὔτε τὸ ἐναντίον (φθαρτικὰ γὰρ ἀλλήλων τὰ ἐναντία), ἀλλὰ τοῦτ’ ἔστιν ἡ ὕλη, ὥσπερ ἂν εἰ θῆλυ ἄρρενος καὶ αἰσχρὸν καλοῦ· πλὴν οὐ καθ’ αὑτὸ αἰσχρόν, ἀλλὰ κατὰ συμβεβηκός, οὐδὲ θῆλυ, ἀλλὰ κατὰ συμβεβηκός.

φθείρεται δὲ καὶ γίγνεται ἔστι μὲν ὥς, ἔστι δ’ ὡς οὔ. ὡς μὲν γὰρ τὸ ἐν ᾧ, καθ’ αὑτὸ φθείρεται (τὸ γὰρ φθειρόμενον ἐν τούτῳ ἐστίν, ἡ στέρησις)· ὡς δὲ κατὰ δύναμιν, οὐ καθ’ αὑτό, ἀλλ’ ἄφθαρτον καὶ ἀγένητον ἀνάγκη αὐτὴν εἶναι. εἴτε γὰρ ἐγίγνετο, ὑποκεῖσθαί τι δεῖ πρῶτον ἐξ οὗ ἐνυπάρχοντος· τοῦτο δ’ ἐστὶν αὐτὴ ἡ φύσις, ὥστ’ ἔσται πρὶν γενέσθαι (λέγω γὰρ ὕλην τὸ πρῶτον ὑποκείμενον ἑκάστῳ, ἐξ οὗ γίγνεταί τι ἐνυπάρχοντος μὴ κατὰ συμβεβηκός)· εἴτε φθείρεται, εἰς τοῦτο ἀφίξεται ἔσχατον, ὥστε ἐφθαρμένη ἔσται πρὶν φθαρῆναι.

περὶ δὲ τῆς κατὰ τὸ εἶδος ἀρχῆς, πότερον μία ἢ πολλαὶ καὶ τίς ἢ τίνες εἰσίν, δι’ ἀκριβείας τῆς πρώτης φιλοσοφίας ἔργον ἐστὶν διορίσαι, ὥστ’ εἰς ἐκεῖνον τὸν και[192b] ρὸν ἀποκείσθω. περὶ δὲ τῶν φυσικῶν καὶ φθαρτῶν εἰδῶν ἐν τοῖς ὕστερον δεικνυμένοις ἐροῦμεν.

ὅτι μὲν οὖν εἰσὶν ἀρχαί, καὶ τίνες, καὶ πόσαι τὸν ἀριθμόν, διωρίσθω ἡμῖν οὕτως· πάλιν δ’ ἄλλην ἀρχὴν ἀρξάμενοι λέγωμεν.

Βιβλίο 2

Κεφάλαιο 1

Τῶν ὄντων τὰ μέν ἐστι φύσει, τὰ δὲ δι’ ἄλλας αἰτίας,

φύσει μὲν τά τε ζῷα καὶ τὰ μέρη αὐτῶν καὶ τὰ φυτὰ καὶ τὰ ἁπλᾶ τῶν σωμάτων, οἷον γῆ καὶ πῦρ καὶ ἀὴρ καὶ ὕδωρ (ταῦτα γὰρ εἶναι καὶ τὰ τοιαῦτα φύσει φαμέν), πάντα δὲ ταῦτα φαίνεται διαφέροντα πρὸς τὰ μὴ φύσει συνεστῶτα. τούτων μὲν γὰρ ἕκαστον ἐν ἑαυτῷ ἀρχὴν ἔχει κινήσεως καὶ στάσεως, τὰ μὲν κατὰ τόπον, τὰ δὲ κατ’ αὔξησιν καὶ φθίσιν, τὰ δὲ κατ’ ἀλλοίωσιν· κλίνη δὲ καὶ ἱμάτιον, καὶ εἴ τι τοιοῦτον ἄλλο γένος ἐστίν, ᾗ μὲν τετύχηκε τῆς κατηγορίας ἑκάστης καὶ καθ’ ὅσον ἐστὶν ἀπὸ τέχνης, οὐδεμίαν ὁρμὴν ἔχει μεταβολῆς ἔμφυτον, ᾗ δὲ συμβέβηκεν αὐτοῖς εἶναι λιθίνοις ἢ γηΐνοις ἢ μικτοῖς ἐκ τούτων, ἔχει, καὶ κατὰ τοσοῦτον, ὡς οὔσης τῆς φύσεως ἀρχῆς τινὸς καὶ αἰτίας τοῦ κινεῖσθαι καὶ ἠρεμεῖν ἐν ᾧ ὑπάρχει πρώτως καθ’ αὑτὸ καὶ μὴ κατὰ συμβεβηκός

(λέγω δὲ τὸ μὴ κατὰ συμβεβηκός, ὅτι γένοιτ’ ἂν αὐτὸς αὑτῷ τις αἴτιος ὑγιείας ὢν ἰατρός· ἀλλ’ ὅμως οὐ καθὸ ὑγιάζεται τὴν ἰατρικὴν ἔχει, ἀλλὰ συμβέβηκεν τὸν αὐτὸν ἰατρὸν εἶναι καὶ ὑγιαζόμενον· διὸ καὶ χωρίζεταί ποτ’ ἀπ’ ἀλλήλων). ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον τῶν ποιουμένων· οὐδὲν γὰρ αὐτῶν ἔχει τὴν ἀρχὴν ἐν ἑαυτῷ τῆς ποιήσεως, ἀλλὰ τὰ μὲν ἐν ἄλλοις καὶ ἔξωθεν, οἷον οἰκία καὶ τῶν ἄλλων τῶν χειροκμήτων ἕκαστον, τὰ δ’ ἐν αὑτοῖς μὲν ἀλλ’ οὐ καθ’ αὑτά, ὅσα κατὰ συμβεβηκὸς αἴτια γένοιτ’ ἂν αὑτοῖς.

φύσις μὲν οὖν ἐστὶ τὸ ῥηθέν· φύσιν δὲ ἔχει ὅσα τοιαύτην ἔχει ἀρχήν. καὶ ἔστιν πάντα ταῦτα οὐσία· ὑποκείμενον γάρ τι, καὶ ἐν ὑποκειμένῳ ἐστὶν ἡ φύσις ἀεί.

κατὰ φύσιν δὲ ταῦτά τε καὶ ὅσα τούτοις ὑπάρχει καθ’ αὑτά, οἷον τῷ πυρὶ φέρεσθαι ἄνω· τοῦτο γὰρ φύσις μὲν οὐκ [193a] ἔστιν οὐδ’ ἔχει φύσιν, φύσει δὲ καὶ κατὰ φύσιν ἐστίν.

τί μὲν οὖν ἐστιν ἡ φύσις, εἴρηται, καὶ τί τὸ φύσει καὶ κατὰ φύσιν. ὡς δ’ ἔστιν ἡ φύσις, πειρᾶσθαι δεικνύναι γελοῖον· φανερὸν γὰρ ὅτι τοιαῦτα τῶν ὄντων ἐστὶν πολλά. τὸ δὲ δεικνύναι τὰ φανερὰ διὰ τῶν ἀφανῶν οὐ δυναμένου κρίνειν ἐστὶ τὸ δι’ αὑτὸ καὶ μὴ δι’ αὑτὸ γνώριμον (ὅτι δ’ ἐνδέχεται τοῦτο πάσχειν, οὐκ ἄδηλον· συλλογίσαιτο γὰρ ἄν τις ἐκ γενετῆς ὢν τυφλὸς περὶ χρωμάτων), ὥστε ἀνάγκη τοῖς τοιούτοις περὶ τῶν ὀνομάτων εἶναι τὸν λόγον, νοεῖν δὲ μηδέν.

δοκεῖ δ’ ἡ φύσις καὶ ἡ οὐσία τῶν φύσει ὄντων ἐνίοις εἶναι τὸ πρῶτον ἐνυπάρχον ἑκάστῳ, ἀρρύθμιστον <ὂν>καθ’ ἑαυτό, οἷον κλίνης φύσις τὸ ξύλον, ἀνδριάντος δ’ ὁ χαλκός.

σημεῖον δέ φησιν Ἀντιφῶν ὅτι, εἴ τις κατορύξειε κλίνην καὶ λάβοι δύναμιν ἡ σηπεδὼν ὥστε ἀνεῖναι βλαστόν, οὐκ ἂν γενέσθαι κλίνην ἀλλὰ ξύλον, ὡς τὸ μὲν κατὰ συμβεβηκὸς ὑπάρχον, τὴν κατὰ νόμον διάθεσιν καὶ τὴν τέχνην, τὴν δ’ οὐσίαν οὖσαν ἐκείνην ἣ καὶ διαμένει ταῦτα πάσχουσα συνεχῶς.

εἰ δὲ καὶ τούτων ἕκαστον πρὸς ἕτερόν τι ταὐτὸ τοῦτο πέπονθεν (οἷον ὁ μὲν χαλκὸς καὶ ὁ χρυσὸς πρὸς ὕδωρ, τὰ δ’ ὀστᾶ καὶ ξύλα πρὸς γῆν, ὁμοίως δὲ καὶ τῶν ἄλλων ὁτιοῦν), ἐκεῖνο τὴν φύσιν εἶναι καὶ τὴν οὐσίαν αὐτῶν. διόπερ οἱ μὲν πῦρ, οἱ δὲ γῆν, οἱ δ’ ἀέρα φασίν, οἱ δὲ ὕδωρ, οἱ δ’ ἔνια τούτων, οἱ δὲ πάντα ταῦτα τὴν φύσιν εἶναι τὴν τῶν ὄντων. ὃ γάρ τις αὐτῶν ὑπέλαβε τοιοῦτον, εἴτε ἓν εἴτε πλείω, τοῦτο καὶ τοσαῦτά φησιν εἶναι τὴν ἅπασαν οὐσίαν, τὰ δὲ ἄλλα πάντα πάθη τούτων καὶ ἕξεις καὶ διαθέσεις, καὶ τούτων μὲν ὁτιοῦν ἀΐδιον (οὐ γὰρ εἶναι μεταβολὴν αὐτοῖς ἐξ αὑτῶν), τὰ δ’ ἄλλα γίγνεσθαι καὶ φθείρεσθαι ἀπειράκις.

ἕνα μὲν οὖν τρόπον οὕτως ἡ φύσις λέγεται, ἡ πρώτη ἑκάστῳ ὑποκειμένη ὕλη τῶν ἐχόντων ἐν αὑτοῖς ἀρχὴν κινήσεως καὶ μεταβολῆς,

ἄλλον δὲ τρόπον ἡ μορφὴ καὶ τὸ εἶδος τὸ κατὰ τὸν λόγον.

ὥσπερ γὰρ τέχνη λέγεται τὸ κατὰ τέχνην καὶ τὸ τεχνικόν, οὕτω καὶ φύσις τὸ κατὰ φύσιν [λέγεται] καὶ τὸ φυσικόν, οὔτε δὲ ἐκεῖ πω φαῖμεν ἂν ἔχειν κατὰ τὴν τέχνην οὐδέν, εἰ δυνάμει μόνον ἐστὶ κλίνη, μή πω δ’ ἔχει τὸ εἶδος τῆς κλίνης, οὐδ’ εἶναι τέχνην, οὔτ’ ἐν τοῖς φύσει συνισταμένοις· τὸ γὰρ δυνάμει σὰρξ ἢ ὀστοῦν οὔτ’ [193b] ἔχει πω τὴν ἑαυτοῦ φύσιν, πρὶν ἂν λάβῃ τὸ εἶδος τὸ κατὰ τὸν λόγον, ᾧ ὁριζόμενοι λέγομεν τί ἐστι σὰρξ ἢ ὀστοῦν, οὔτε φύσει ἐστίν. ὥστε ἄλλον τρόπον ἡ φύσις ἂν εἴη τῶν ἐχόντων ἐν αὑτοῖς κινήσεως ἀρχὴν ἡ μορφὴ καὶ τὸ εἶδος, οὐ χωριστὸν ὂν ἀλλ’ ἢ κατὰ τὸν λόγον. (τὸ δ’ ἐκ τούτων φύσις μὲν οὐκ ἔστιν, φύσει δέ, οἷον ἄνθρωπος.)

καὶ μᾶλλον αὕτη φύσις τῆς ὕλης· ἕκαστον γὰρ τότε λέγεται ὅταν ἐντελεχείᾳ ᾖ, μᾶλλον ἢ ὅταν δυνάμει. ἔτι γίγνεται ἄνθρωπος ἐξ ἀνθρώπου, ἀλλ’ οὐ κλίνη ἐκ κλίνης· διὸ καί φασιν οὐ τὸ σχῆμα εἶναι τὴν φύσιν ἀλλὰ τὸ ξύλον, ὅτι γένοιτ’ ἄν, εἰ βλαστάνοι, οὐ κλίνη ἀλλὰ ξύλον. εἰ δ’ ἄρα τοῦτο φύσις, καὶ ἡ μορφὴ φύσις· γίγνεται γὰρ ἐξ ἀνθρώπου ἄνθρωπος.

ἔτι δ’ ἡ φύσις ἡ λεγομένη ὡς γένεσις ὁδός ἐστιν εἰς φύσιν. οὐ γὰρ ὥσπερ ἡ ἰάτρευσις λέγεται οὐκ εἰς ἰατρικὴν ὁδὸς ἀλλ’ εἰς ὑγίειαν· ἀνάγκη μὲν γὰρ ἀπὸ ἰατρικῆς οὐκ εἰς ἰατρικὴν εἶναι τὴν ἰάτρευσιν, οὐχ οὕτω δ’ ἡ φύσις ἔχει πρὸς τὴν φύσιν, ἀλλὰ τὸ φυόμενον ἐκ τινὸς εἰς τὶ ἔρχεται ᾗ φύεται. τί οὖν φύεται; οὐχὶ ἐξ οὗ, ἀλλ᾽ εἰς ὅ. ἡ ἄρα μορφὴ φύσις.

ἡ δὲ μορφὴ καὶ ἡ φύσις διχῶς λέγεται· καὶ γὰρ ἡ στέρησις εἶδός πώς ἐστιν. εἰ δ᾽ ἔστιν στέρησις καὶ ἐναντίον τι περὶ τὴν ἁπλῆν γένεσιν ἢ μὴ ἔστιν, ὕστερον ἐπισκεπτέον.

Κεφάλαιο 2

Ἐπεὶ δὲ διώρισται ποσαχῶς ἡ φύσις, μετὰ τοῦτο θεωρητέον τίνι διαφέρει ὁ μαθηματικὸς τοῦ φυσικοῦ (καὶ γὰρ ἐπίπεδα καὶ στερεὰ ἔχει τὰ φυσικὰ σώματα καὶ μήκη καὶ στιγμάς, περὶ ὧν σκοπεῖ ὁ μαθηματικός)·

ἔτι εἰ ἡ ἀστρολογία ἑτέρα ἢ μέρος τῆς φυσικῆς· εἰ γὰρ τοῦ φυσικοῦ τὸ τί ἐστιν ἥλιος ἢ σελήνη εἰδέναι, τῶν δὲ συμβεβηκότων καθ' αὑτὰ μηδέν, ἄτοπον, ἄλλως τε καὶ ὅτι φαίνονται λέγοντες οἱ περὶ φύσεως καὶ περὶ σχήματος σελήνης καὶ ἡλίου, καὶ δὴ καὶ πότερον σφαιροειδὴς ἡ γῆ καὶ ὁ κόσμος ἢ οὔ.

περὶ τούτων μὲν οὖν πραγματεύεται καὶ ὁ μαθηματικός, ἀλλ' οὐχ ᾗ φυσικοῦ σώματος πέρας ἕκαστον· οὐδὲ τὰ συμβεβηκότα θεωρεῖ ᾗ τοιούτοις οὖσι συμβέβηκεν· διὸ καὶ χωρίζει· χωριστὰ γὰρ τῇ νοήσει κινήσεώς ἐστι, καὶ οὐδὲν διαφέρει, οὐδὲ γίγνεται ψεῦδος χωριζόντων. λανθάνουσι δὲ τοῦτο ποιοῦντες καὶ οἱ τὰς ἰδέας λέγοντες· τὰ γὰρ φυσικὰ [194a] χωρίζουσιν ἧττον ὄντα χωριστὰ τῶν μαθηματικῶν. γίγνοιτο δ' ἂν τοῦτο δῆλον, εἴ τις ἑκατέρων πειρῷτο λέγειν τοὺς ὅρους, καὶ αὐτῶν καὶ τῶν συμβεβηκότων. τὸ μὲν γὰρ περιττὸν ἔσται καὶ τὸ ἄρτιον καὶ τὸ εὐθὺ καὶ τὸ καμπύλον, ἔτι δὲ ἀριθμὸς καὶ γραμμὴ καὶ σχῆμα, ἄνευ κινήσεως, σὰρξ δὲ καὶ ὀστοῦν καὶ ἄνθρωπος οὐκέτι, ἀλλὰ ταῦτα ὥσπερ ῥὶς σιμὴ ἀλλ' οὐχ ὡς τὸ καμπύλον λέγεται.

δηλοῖ δὲ καὶ τὰ φυσικώτερα τῶν μαθημάτων, οἷον ὀπτικὴ καὶ ἁρμονικὴ καὶ ἀστρολογία· ἀνάπαλιν γὰρ τρόπον τιν' ἔχουσιν τῇ γεωμετρίᾳ. ἡ μὲν γὰρ γεωμετρία περὶ γραμμῆς φυσικῆς σκοπεῖ, ἀλλ' οὐχ ᾗ φυσική, ἡ δ' ὀπτικὴ μαθηματικὴν μὲν γραμμήν, ἀλλ' οὐχ ᾗ μαθηματικὴ ἀλλ' ᾗ φυσική.

ἐπεὶ δ' ἡ φύσις διχῶς, τό τε εἶδος καὶ ἡ ὕλη, ὡς ἂν εἰ περὶ σιμότητος σκοποῖμεν τί ἐστιν, οὕτω θεωρητέον· ὥστ' οὔτ' ἄνευ ὕλης τὰ τοιαῦτα οὔτε κατὰ τὴν ὕλην. καὶ γὰρ δὴ καὶ περὶ τούτου ἀπορήσειεν ἄν τις, ἐπεὶ δύο αἱ φύσεις, περὶ ποτέρας τοῦ φυσικοῦ. ἢ περὶ τοῦ ἐξ ἀμφοῖν; ἀλλ' εἰ περὶ τοῦ ἐξ ἀμφοῖν, καὶ περὶ ἑκατέρας. πότερον οὖν τῆς αὐτῆς ἢ ἄλλης ἑκατέραν γνωρίζειν;

εἰς μὲν γὰρ τοὺς ἀρχαίους ἀποβλέψαντι δόξειεν ἂν εἶναι τῆς ὕλης (ἐπὶ μικρὸν γάρ τι μέρος Ἐμπεδοκλῆς καὶ Δημόκριτος τοῦ εἴδους καὶ τοῦ τί ἦν εἶναι ἥψαντο)·

εἰ δὲ ἡ τέχνη μιμεῖται τὴν φύσιν, τῆς δὲ αὐτῆς ἐπιστήμης εἰδέναι τὸ εἶδος καὶ τὴν ὕλην μέχρι του (οἷον ἰατροῦ ὑγίειαν καὶ χολὴν καὶ φλέγμα, ἐν οἷς ἡ ὑγίεια, ὁμοίως δὲ καὶ οἰκοδόμου τό τε εἶδος τῆς οἰκίας καὶ τὴν ὕλην, ὅτι πλίνθοι καὶ ξύλα· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων), καὶ τῆς φυσικῆς ἂν εἴη τὸ γνωρίζειν ἀμφοτέρας τὰς φύσεις.

ἔτι τὸ οὗ ἕνεκα καὶ τὸ τέλος τῆς αὐτῆς, καὶ ὅσα τούτων ἕνεκα. ἡ δὲ φύσις τέλος καὶ οὗ ἕνεκα (ὧν γὰρ συνεχοῦς τῆς κινήσεως οὔσης ἔστι τι τέλος, τοῦτο <τὸ> ἔσχατον καὶ τὸ οὗ ἕνεκα· διὸ καὶ ὁ ποιητὴς γελοίως προήχθη εἰπεῖν "ἔχει τελευτήν, ἧσπερ οὕνεκ' ἐγένετο"· βούλεται γὰρ οὐ πᾶν εἶναι τὸ ἔσχατον τέλος, ἀλλὰ τὸ βέλτιστον)· ἐπεὶ καὶ ποιοῦσιν αἱ τέχναι τὴν ὕλην αἱ μὲν ἁπλῶς αἱ δὲ εὐεργόν, καὶ χρώμεθα ὡς ἡμῶν ἕνεκα πάντων ὑπαρχόντων (ἐσμὲν γάρ πως καὶ ἡμεῖς τέλος· διχῶς γὰρ τὸ οὗ ἕνεκα· εἴρηται δ' ἐν τοῖς περὶ φιλοσοφίας). δύο [194b] δὲ αἱ ἄρχουσαι τῆς ὕλης καὶ γνωρίζουσαι τέχναι, ἥ τε χρωμένη καὶ τῆς ποιητικῆς ἡ ἀρχιτεκτονική. διὸ καὶ ἡ χρωμένη ἀρχιτεκτονική πως, διαφέρει δὲ ᾗ ἡ μὲν τοῦ εἴδους γνωριστική, ἡ ἀρχιτεκτονική, ἡ δὲ ὡς ποιητική, τῆς ὕλης· ὁ μὲν γὰρ κυβερνήτης ποῖόν τι τὸ εἶδος τοῦ πηδαλίου γνωρίζει καὶ ἐπιτάττει, ὁ δ' ἐκ ποίου ξύλου καὶ ποίων κινήσεων ἔσται. ἐν μὲν οὖν τοῖς κατὰ τέχνην ἡμεῖς ποιοῦμεν τὴν ὕλην τοῦ ἔργου ἕνεκα, ἐν δὲ τοῖς φυσικοῖς ὑπάρχει οὖσα.

ἔτι τῶν πρός τι ἡ ὕλη· ἄλλῳ γὰρ εἴδει ἄλλη ὕλη. μέχρι δὴ πόσου τὸν φυσικὸν δεῖ εἰδέναι τὸ εἶδος καὶ τὸ τί ἐστιν; ἢ ὥσπερ ἰατρὸν νεῦρον ἢ χαλκέα χαλκόν, μέχρι τοῦ τίνος [γὰρ] ἕνεκα ἕκαστον, καὶ περὶ ταῦτα ἅ ἐστι χωριστὰ μὲν εἴδει, ἐν ὕλῃ δέ; ἄνθρωπος γὰρ ἄνθρωπον γεννᾷ καὶ ἥλιος. πῶς δ' ἔχει τὸ χωριστὸν καὶ τί ἐστι, φιλοσοφίας ἔργον διορίσαι τῆς πρώτης.

Κεφάλαιο 3

Διωρισμένων δὲ τούτων ἐπισκεπτέον περὶ τῶν αἰτίων, ποῖά τε καὶ πόσα τὸν ἀριθμόν ἐστιν. ἐπεὶ γὰρ τοῦ εἰδέναι χάριν ἡ πραγματεία, εἰδέναι δὲ οὐ πρότερον οἰόμεθα ἕκαστον πρὶν ἂν λάβωμεν τὸ διὰ τί περὶ ἕκαστον (τοῦτο δ’ ἐστὶ τὸ λαβεῖν τὴν πρώτην αἰτίαν), δῆλον ὅτι καὶ ἡμῖν τοῦτο ποιητέον καὶ περὶ γενέσεως καὶ φθορᾶς καὶ πάσης τῆς φυσικῆς μεταβολῆς, ὅπως εἰδότες αὐτῶν τὰς ἀρχὰς ἀνάγειν εἰς αὐτὰς πειρώμεθα τῶν ζητουμένων ἕκαστον. ἕνα μὲν οὖν τρόπον αἴτιον λέγεται τὸ ἐξ οὗ γίγνεταί τι ἐνυπάρχοντος, οἷον ὁ χαλκὸς τοῦ ἀνδριάντος καὶ ὁ ἄργυρος τῆς φιάλης καὶ τὰ τούτων γένη·

ἄλλον δὲ τὸ εἶδος καὶ τὸ παράδειγμα, τοῦτο δ’ ἐστὶν ὁ λόγος ὁ τοῦ τί ἦν εἶναι καὶ τὰ τούτου γένη (οἷον τοῦ διὰ πασῶν τὰ δύο πρὸς ἕν, καὶ ὅλως ὁ ἀριθμός) καὶ τὰ μέρη τὰ ἐν τῷ λόγῳ.

ἔτι ὅθεν ἡ ἀρχὴ τῆς μεταβολῆς ἡ πρώτη ἢ τῆς ἠρεμήσεως, οἷον ὁ βουλεύσας αἴτιος, καὶ ὁ πα τὴρ τοῦ τέκνου, καὶ ὅλως τὸ ποιοῦν τοῦ ποιουμένου καὶ τὸ μεταβάλλον τοῦ μεταβαλλομένου.

ἔτι ὡς τὸ τέλος· τοῦτο δ’ ἐστὶν τὸ οὗ ἕνεκα, οἷον τοῦ περιπατεῖν ἡ ὑγίεια· διὰ τί γὰρ περιπατεῖ; φαμέν “ἵνα ὑγιαίνῃ”, καὶ εἰπόντες οὕτως οἰόμεθα ἀποδεδωκέναι τὸ αἴτιον. καὶ ὅσα δὴ κινήσαντος ἄλλου μεταξὺ γίγνεται τοῦ τέλους, οἷον τῆς ὑγιείας ἡ ἰσχνασία ἢ ἡ [195a] κάθαρσις ἢ τὰ φάρμακα ἢ τὰ ὄργανα· πάντα γὰρ ταῦτα τοῦ τέλους ἕνεκά ἐστιν, διαφέρει δὲ ἀλλήλων ὡς ὄντα τὰ μὲν ἔργα τὰ δ’ ὄργανα.

τὰ μὲν οὖν αἴτια σχεδὸν τοσαυταχῶς λέγεται,

συμβαίνει δὲ πολλαχῶς λεγομένων τῶν αἰτίων καὶ πολλὰ τοῦ αὐτοῦ αἴτια εἶναι, οὐ κατὰ συμβεβηκός, οἷον τοῦ ἀνδριάντος καὶ ἡ ἀνδριαντοποιικὴ καὶ ὁ χαλκός, οὐ καθ’ ἕτερόν τι ἀλλ’ ᾗ ἀνδριάς, ἀλλ’ οὐ τὸν αὐτὸν τρόπον, ἀλλὰ τὸ μὲν ὡς ὕλη τὸ δ’ ὡς ὅθεν ἡ κίνησις. ἔστιν δέ τινα καὶ ἀλλήλων αἴτια, οἷον τὸ πονεῖν τῆς εὐεξίας καὶ αὕτη τοῦ πονεῖν· ἀλλ’ οὐ τὸν αὐτὸν τρόπον, ἀλλὰ τὸ μὲν ὡς τέλος τὸ δ’ ὡς ἀρχὴ κινήσεως. ἔτι δὲ τὸ αὐτὸ τῶν ἐναντίων ἐστίν· ὃ γὰρ παρὸν αἴτιον τοῦδε, τοῦτο καὶ ἀπὸν αἰτιώμεθα ἐνίοτε τοῦ ἐναντίου, οἷον τὴν ἀπουσίαν τοῦ κυβερνήτου τῆς τοῦ πλοίου ἀνατροπῆς, οὗ ἦν ἡ παρουσία αἰτία τῆς σωτηρίας.

ἅπαντα δὲ τὰ νῦν εἰρημένα αἴτια εἰς τέτταρας πίπτει τρόπους τοὺς φανερωτάτους. τὰ μὲν γὰρ στοιχεῖα τῶν συλλαβῶν καὶ ἡ ὕλη τῶν σκευαστῶν καὶ τὸ πῦρ καὶ τὰ τοιαῦτα τῶν σωμάτων καὶ τὰ μέρη τοῦ ὅλου καὶ αἱ ὑποθέσεις τοῦ συμπεράσματος ὡς τὸ ἐξ οὗ αἴτιά ἐστιν, τούτων δὲ τὰ μὲν ὡς τὸ ὑποκείμενον, οἷον τὰ μέρη, τὰ δὲ ὡς τὸ τί ἦν εἶναι, τό τε ὅλον καὶ ἡ σύνθεσις καὶ τὸ εἶδος· τὸ δὲ σπέρμα καὶ ὁ ἰατρὸς καὶ ὁ βουλεύσας καὶ ὅλως τὸ ποιοῦν, πάντα ὅθεν ἡ ἀρχὴ τῆς μεταβολῆς ἢ στάσεως [ἢ κινήσεως]· τὰ δ’ ὡς τὸ τέλος καὶ τἀγαθὸν τῶν ἄλλων· τὸ γὰρ οὗ ἕνεκα βέλτιστον καὶ τέλος τῶν ἄλλων ἐθέλει εἶναι· διαφερέτω δὲ μηδὲν εἰπεῖν αὐτὸ ἀγαθὸν ἢ φαινόμενον ἀγαθόν.

τὰ μὲν οὖν αἴτια ταῦτα καὶ τοσαῦτά ἐστι τῷ εἴδει·

τρόποι δὲ τῶν αἰτίων ἀριθμῷ μὲν εἰσὶ πολλοί, κεφαλαιούμενοι δὲ καὶ οὗτοι ἐλάττους. λέγεται γὰρ αἴτια πολλαχῶς, καὶ αὐτῶν τῶν ὁμοειδῶν προτέρως καὶ ὑστέρως ἄλλο ἄλλου, οἷον ὑγιείας ἰατρὸς καὶ τεχνίτης, καὶ τοῦ διὰ πασῶν τὸ διπλάσιον καὶ ἀριθμός, καὶ ἀεὶ τὰ περιέχοντα πρὸς τὰ καθ’ ἕκαστον. ἔτι δ’ ὡς τὸ συμβεβηκὸς καὶ τὰ τούτων γένη, οἷον ἀνδριάντος ἄλλως Πολύκλειτος καὶ ἄλλως ἀνδριαντοποιός, ὅτι συμβέβηκε τῷ ἀνδριαντοποιῷ τὸ Πολυκλείτῳ εἶναι. καὶ τὰ περιέχοντα δὲ τὸ συμβεβηκός, οἷον εἰ ὁ ἄνθρωπος αἴτιος εἴη ἀνδριάντος ἢ [195b] ὅλως ζῷον. ἔστι δὲ καὶ τῶν συμβεβηκότων ἄλλα ἄλλων πορρώτερον καὶ ἐγγύτερον, οἷον εἰ ὁ λευκὸς καὶ ὁ μουσικὸς αἴτιος λέγοιτο τοῦ ἀνδριάντος.

πάντα δὲ καὶ τὰ οἰκείως λεγόμενα καὶ τὰ κατὰ συμβεβηκὸς τὰ μὲν ὡς δυνάμενα λέγεται τὰ δ’ ὡς ἐνεργοῦντα, οἷον τοῦ οἰκοδομεῖσθαι οἰκίαν οἰκοδόμος ἢ οἰκοδομῶν οἰκοδόμος.

ὁμοίως δὲ λεχθήσεται καὶ ἐφ’ ὧν αἴτια τὰ αἴτια τοῖς εἰρημένοις, οἷον τουδὶ τοῦ ἀνδριάντος ἢ ἀνδριάντος ἢ ὅλως εἰκόνος, καὶ χαλκοῦ τοῦδε ἢ χαλκοῦ ἢ ὅλως ὕλης· καὶ ἐπὶ τῶν συμβεβηκότων ὡσαύτως. ἔτι δὲ συμπλεκόμενα καὶ ταῦτα κἀκεῖνα λεχθήσεται, οἷον οὐ Πολύκλειτος οὐδὲ ἀνδριαντοποιός, ἀλλὰ Πολύκλειτος ἀνδριαντοποιός. ἀλλ’ ὅμως ἅπαντα ταῦτά ἐστι τὸ μὲν πλῆθος ἕξ, λεγόμενα δὲ διχῶς· ἢ γὰρ ὡς τὸ καθ’ ἕκαστον, ἢ ὡς τὸ γένος, ἢ ὡς τὸ συμβεβηκός, ἢ ὡς τὸ γένος τοῦ συμβεβηκότος, ἢ ὡς συμπλεκόμενα ταῦτα ἢ ὡς ἁπλῶς λεγόμενα· πάντα δὲ ἢ ἐνεργοῦντα ἢ κατὰ δύναμιν. διαφέρει δὲ τοσοῦτον, ὅτι τὰ μὲν ἐνεργοῦντα καὶ τὰ καθ’ ἕκαστον ἅμα ἔστι καὶ οὐκ ἔστι καὶ ὧν αἴτια, οἷον ὅδ’ ὁ ἰατρεύων τῷδε τῷ ὑγιαζομένῳ καὶ ὅδε ὁ οἰκοδομῶν τῷδε τῷ οἰκοδομουμένῳ, τὰ δὲ κατὰ δύναμιν οὐκ ἀεί. φθείρεται γὰρ οὐχ ἅμα ἡ οἰκία καὶ ὁ οἰκοδόμος.

δεῖ δ’ ἀεὶ τὸ αἴτιον ἑκάστου τὸ ἀκρότατον ζητεῖν, ὥσπερ καὶ ἐπὶ τῶν ἄλλων (οἷον ἄνθρωπος οἰκοδομεῖ ὅτι οἰκοδόμος, ὁ δ’ οἰκοδόμος κατὰ τὴν οἰκοδομικήν· τοῦτο τοίνυν πρότερον τὸ αἴτιον, καὶ οὕτως ἐπὶ πάντων)· ἔτι τὰ μὲν γένη τῶν γενῶν, τὰ δὲ καθ’ ἕκαστον τῶν καθ’ ἕκαστον (οἷον ἀνδριαντοποιὸς μὲν ἀνδριάντος, ὁδὶ δὲ τουδί)· καὶ τὰς μὲν δυνάμεις τῶν δυνατῶν, τὰ δ’ ἐνεργοῦντα πρὸς τὰ ἐνεργούμενα.

ὅσα μὲν οὖν τὰ αἴτια καὶ ὃν τρόπον αἴτια, ἔστω ἡμῖν διωρισμένα ἱκανῶς.

Κεφάλαιο 4

Λέγεται δὲ καὶ ἡ τύχη καὶ τὸ αὐτόματον τῶν αἰτίων, καὶ πολλὰ καὶ εἶναι καὶ γίγνεσθαι διὰ τύχην καὶ διὰ τὸ αὐτόματον· τίνα οὖν τρόπον ἐν τούτοις ἐστὶ τοῖς αἰτίοις ἡ τύχη καὶ τὸ αὐτόματον, καὶ πότερον τὸ αὐτὸ ἡ τύχη καὶ τὸ αὐτόματον ἢ ἕτερον, καὶ ὅλως τί ἐστιν ἡ τύχη καὶ τὸ αὐτόματον, ἐπισκεπτέον.

ἔνιοι γὰρ καὶ εἰ ἔστιν ἢ μὴ ἀποροῦσιν· [196a] οὐδὲν γὰρ δὴ γίγνεσθαι ἀπὸ τύχης φασίν, ἀλλὰ πάντων εἶναί τι αἴτιον ὡρισμένον ὅσα λέγομεν ἀπὸ ταὐτομάτου γίγνεσθαι ἢ τύχης, οἷον τοῦ ἐλθεῖν ἀπὸ τύχης εἰς τὴν ἀγοράν, καὶ καταλαβεῖν ὃν ἐβούλετο μὲν οὐκ ᾤετο δέ, αἴτιον τὸ βούλεσθαι ἀγοράσαι ἐλθόντα· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν ἀπὸ τύχης λεγομένων ἀεί τι εἶναι λαβεῖν τὸ αἴτιον, ἀλλ’ οὐ τύχην, ἐπεὶ εἴ γέ τι ἦν ἡ τύχη, ἄτοπον ἂν φανείη ὡς ἀληθῶς, καὶ ἀπορήσειεν ἄν τις διὰ τί ποτ’ οὐδεὶς τῶν ἀρχαίων σοφῶν τὰ αἴτια περὶ γενέσεως καὶ φθορᾶς λέγων περὶ τύχης οὐδὲν διώρισεν, ἀλλ’ ὡς ἔοικεν, οὐδὲν ᾤοντο οὐδ’ ἐκεῖνοι εἶναι ἀπὸ τύχης. ἀλλὰ καὶ τοῦτο θαυμαστόν· πολλὰ γὰρ καὶ γίγνεται καὶ ἔστιν ἀπὸ τύχης καὶ ἀπὸ ταὐτομάτου, ἃ οὐκ ἀγνοοῦντες ὅτι ἔστιν ἐπανενεγκεῖν ἕκαστον ἐπί τι αἴτιον τῶν γιγνομένων, καθάπερ ὁ παλαιὸς λόγος εἶπεν ὁ ἀναιρῶν τὴν τύχην, ὅμως τούτων τὰ μὲν εἶναί φασι πάντες ἀπὸ τύχης τὰ δ’ οὐκ ἀπὸ τύχης· διὸ καὶ ἁμῶς γέ πως ἦν ποιητέον αὐτοῖς μνείαν. ἀλλὰ μὴν οὐδ’ ἐκείνων γέ τι ᾤοντο εἶναι τὴν τύχην, οἷον φιλίαν ἢ νεῖκος ἢ νοῦν ἢ πῦρ ἢ ἄλλο γέ τι τῶν τοιούτων. ἄτοπον οὖν εἴτε μὴ ὑπελάμβανον εἶναι εἴτε οἰόμενοι παρέλειπον, καὶ ταῦτ’ ἐνίοτε χρώμενοι, ὥσπερ Ἐμπεδοκλῆς οὐκ ἀεὶ τὸν ἀέρα ἀνωτάτω ἀποκρίνεσθαί φησιν, ἀλλ’ ὅπως ἂν τύχῃ. λέγει γοῦν ἐν τῇ κοσμοποιίᾳ ὡς “οὕτω συνέκυρσε θέων τοτέ, πολλάκι δ’ ἄλλως”· καὶ τὰ μόρια τῶν ζῴων ἀπὸ τύχης γενέσθαι τὰ πλεῖστά φησιν. εἰσὶ δέ τινες οἳ καὶ τοὐρανοῦ τοῦδε καὶ τῶν κόσμων πάντων αἰτιῶνται τὸ αὐτόματον· ἀπὸ ταὐτομάτου γὰρ γενέσθαι τὴν δίνην καὶ τὴν κίνησιν τὴν διακρίνασαν καὶ καταστήσασαν εἰς ταύτην τὴν τάξιν τὸ πᾶν. καὶ μάλα τοῦτό γε αὐτὸ θαυμάσαι ἄξιον· λέγοντες γὰρ τὰ μὲν ζῷα καὶ τὰ φυτὰ ἀπὸ τύχης μήτε εἶναι μήτε γίγνεσθαι, ἀλλ’ ἤτοι φύσιν ἢ νοῦν ἤ τι τοιοῦτον ἕτερον εἶναι τὸ αἴτιον (οὐ γὰρ ὅ τι ἔτυχεν ἐκ τοῦ σπέρματος ἑκάστου γίγνεται, ἀλλ’ ἐκ μὲν τοῦ τοιουδὶ ἐλαία ἐκ δὲ τοῦ τοιουδὶ ἄνθρωπος), τὸν δ’ οὐρανὸν καὶ τὰ θειότατα τῶν φανερῶν ἀπὸ τοῦ αὐτομάτου γενέσθαι, τοιαύτην δ’ αἰτίαν μηδεμίαν εἶναι οἵαν τῶν ζῴων καὶ τῶν φυτῶν. καίτοι εἰ οὕτως ἔχει, τοῦτ’ αὐτὸ ἄξιον ἐπιστάσεως, καὶ καλῶς ἔχει λεχ[196b] θῆναί τι περὶ αὐτοῦ. πρὸς γὰρ τῷ καὶ ἄλλως ἄτοπον εἶναι τὸ λεγόμενον, ἔτι ἀτοπώτερον τὸ λέγειν ταῦτα ὁρῶντας ἐν μὲν τῷ οὐρανῷ οὐδὲν ἀπὸ ταὐτομάτου γιγνόμενον, ἐν δὲ τοῖς οὐκ ἀπὸ τύχης πολλὰ συμβαίνοντα ἀπὸ τύχης· καίτοι εἰκός γε ἦν τοὐναντίον γίγνεσθαι.

εἰσὶ δέ τινες οἷς δοκεῖ εἶναι μὲν αἰτία ἡ τύχη, ἄδηλος δὲ ἀνθρωπίνῃ διανοίᾳ ὡς θεῖόν τι οὖσα καὶ δαιμονιώτερον.

ὥστε σκεπτέον καὶ τί ἑκάτερον, καὶ εἰ ταὐτὸν ἢ ἕτερον τό τε αὐτόματον καὶ ἡ τύχη, καὶ πῶς εἰς τὰ διωρισμένα αἴτια ἐμπίπτουσιν.

Κεφάλαιο 5

Πρῶτον μὲν οὖν, ἐπειδὴ ὁρῶμεν τὰ μὲν ἀεὶ ὡσαύτως γιγνόμενα τὰ δὲ ὡς ἐπὶ τὸ πολύ, φανερὸν ὅτι οὐδετέρου τούτων αἰτία ἡ τύχη λέγεται οὐδὲ τὸ ἀπὸ τύχης, οὔτε τοῦ ἐξ ἀνάγκης καὶ αἰεὶ οὔτε τοῦ ὡς ἐπὶ τὸ πολύ. ἀλλ’ ἐπειδὴ ἔστιν ἃ γίγνεται καὶ παρὰ ταῦτα, καὶ ταῦτα πάντες φασὶν εἶναι ἀπὸ τύχης, φανερὸν ὅτι ἔστι τι ἡ τύχη καὶ τὸ αὐτόματον· τά τε γὰρ τοιαῦτα ἀπὸ τύχης καὶ τὰ ἀπὸ τύχης τοιαῦτα ὄντα ἴσμεν.

τῶν δὲ γιγνομένων τὰ μὲν ἕνεκά του γίγνεται τὰ δ’ οὔ (τούτων δὲ τὰ μὲν κατὰ προαίρεσιν, τὰ δ’ οὐ κατὰ προαίρεσιν, ἄμφω δ’ ἐν τοῖς ἕνεκά του), ὥστε δῆλον ὅτι καὶ ἐν τοῖς παρὰ τὸ ἀναγκαῖον καὶ τὸ ὡς ἐπὶ τὸ πολὺ ἔστιν ἔνια περὶ ἃ ἐνδέχεται ὑπάρχειν τὸ ἕνεκά του. ἔστι δ’ ἕνεκά του ὅσα τε ἀπὸ διανοίας ἂν πραχθείη καὶ ὅσα ἀπὸ φύσεως. τὰ δὴ τοιαῦτα ὅταν κατὰ συμβεβηκὸς γένηται, ἀπὸ τύχης φαμὲν εἶναι (ὥσπερ γὰρ καὶ ὄν ἐστι τὸ μὲν καθ’ αὑτὸ τὸ δὲ κατὰ συμβεβηκός, οὕτω καὶ αἴτιον ἐνδέχεται εἶναι, οἷον οἰκίας καθ’ αὑτὸ μὲν αἴτιον τὸ οἰκοδομικόν, κατὰ συμβεβηκὸς δὲ τὸ λευκὸν ἢ τὸ μουσικόν· τὸ μὲν οὖν καθ’ αὑτὸ αἴτιον ὡρισμένον, τὸ δὲ κατὰ συμβεβηκὸς ἀόριστον· ἄπειρα γὰρ ἂν τῷ ἑνὶ συμβαίη). καθάπερ οὖν ἐλέχθη, ὅταν ἐν τοῖς ἕνεκά του γιγνομένοις τοῦτο γένηται, τότε λέγεται ἀπὸ ταὐ τομάτου καὶ ἀπὸ τύχης (αὐτῶν δὲ πρὸς ἄλληλα τὴν διαφορὰν τούτων ὕστερον διοριστέον· νῦν δὲ τοῦτο ἔστω φανερόν, ὅτι ἄμφω ἐν τοῖς ἕνεκά τού ἐστιν)·

οἷον ἕνεκα τοῦ ἀπολαβεῖν τὸ ἀργύριον ἦλθεν ἂν κομιζομένου τὸν ἔρανον, εἰ ᾔδει· ἦλθε δ’ οὐ τούτου ἕνεκα, ἀλλὰ συνέβη αὐτῷ ἐλθεῖν, καὶ ποιῆσαι τοῦτο τοῦ κομίσασθαι ἕνεκα· τοῦτο δὲ οὔθ’ ὡς ἐπὶ τὸ πολὺ φοιτῶν εἰς τὸ [197a] χωρίον οὔτ’ ἐξ ἀνάγκης· ἔστι δὲ τὸ τέλος, ἡ κομιδή, οὐ τῶν ἐν αὐτῷ αἰτίων, ἀλλὰ τῶν προαιρετῶν καὶ ἀπὸ διανοίας· καὶ λέγεταί γε τότε ἀπὸ τύχης ἐλθεῖν, εἰ δὲ προελόμενος καὶ τούτου ἕνεκα ἢ ἀεὶ φοιτῶν ἢ ὡς ἐπὶ τὸ πολύ [κομιζόμενος], οὐκ ἀπὸ τύχης.

δῆλον ἄρα ὅτι ἡ τύχη αἰτία κατὰ συμβεβηκὸς ἐν τοῖς κατὰ προαίρεσιν τῶν ἕνεκά του. διὸ περὶ τὸ αὐτὸ διάνοια καὶ τύχη· ἡ γὰρ προαίρεσις οὐκ ἄνευ διανοίας.

ἀόριστα μὲν οὖν τὰ αἴτια ἀνάγκη εἶναι ἀφ’ ὧν ἂν γένοιτο τὸ ἀπὸ τύχης. ὅθεν καὶ ἡ τύχη τοῦ ἀορίστου εἶναι δοκεῖ καὶ ἄδηλος ἀνθρώπῳ, καὶ ἔστιν ὡς οὐδὲν ἀπὸ τύχης δόξειεν ἂν γίγνεσθαι. πάντα γὰρ ταῦτα ὀρθῶς λέγεται, εὐλόγως. ἔστιν μὲν γὰρ ὡς γίγνεται ἀπὸ τύχης· κατὰ συμβεβηκὸς γὰρ γίγνεται, καὶ ἔστιν αἴτιον ὡς συμβεβηκὸς ἡ τύχη· ὡς δ’ ἁπλῶς οὐδενός· οἷον οἰκίας οἰκοδόμος μὲν αἴτιος, κατὰ συμβεβηκὸς δὲ αὐλητής,

καὶ τοῦ ἐλθόντα κομίσασθαι τὸ ἀργύριον, μὴ τούτου ἕνεκα ἐλθόντα, ἄπειρα τὸ πλῆθος· καὶ γὰρ ἰδεῖν τινὰ βουλόμενος καὶ διώκων καὶ φεύγων καὶ θεασόμενος. καὶ τὸ φάναι εἶναί τι παράλογον τὴν τύχην ὀρθῶς· ὁ γὰρ λόγος ἢ τῶν ἀεὶ ὄντων ἢ τῶν ὡς ἐπὶ τὸ πολύ, ἡ δὲ τύχη ἐν τοῖς γιγνομένοις παρὰ ταῦτα. ὥστ’ ἐπεὶ ἀόριστα τὰ οὕτως αἴτια, καὶ ἡ τύχη ἀόριστον. ὅμως δ’ ἐπ’ ἐνίων ἀπορήσειεν ἄν τις, ἆρ’ οὖν τὰ τυχόντα αἴτι’ ἂν γένοιτο τῆς τύχης· οἷον ὑγιείας ἢ πνεῦμα ἢ εἵλησις, ἀλλ’ οὐ τὸ ἀποκεκάρθαι· ἔστιν γὰρ ἄλλα ἄλλων ἐγγύτερα τῶν κατὰ συμβεβηκὸς αἰτίων.

τύχη δὲ ἀγαθὴ μὲν λέγεται ὅταν ἀγαθόν τι ἀποβῇ, φαύλη δὲ ὅταν φαῦλόν τι, εὐτυχία δὲ καὶ δυστυχία ὅταν μέγεθος ἔχοντα ταῦτα· διὸ καὶ τὸ παρὰ μικρὸν κακὸν ἢ ἀγαθὸν λαβεῖν μέγα ἢ εὐτυχεῖν ἢ ἀτυχεῖν ἐστίν, ὅτι ὡς ὑπάρχον λέγει ἡ διάνοια· τὸ γὰρ παρὰ μικρὸν ὥσπερ οὐδὲν ἀπέχειν δοκεῖ. ἔτι ἀβέβαιον ἡ εὐτυχία εὐλόγως· ἡ γὰρ τύχη ἀβέβαιος· οὔτε γὰρ ἀεὶ οὔθ’ ὡς ἐπὶ τὸ πολὺ οἷόν τ’ εἶναι τῶν ἀπὸ τύχης οὐθέν.

ἔστι μὲν οὖν ἄμφω αἴτια, καθάπερ εἴρηται, κατὰ συμβεβηκός-καὶ ἡ τύχη καὶ τὸ αὐτόματον-ἐν τοῖς ἐνδεχομένοις γίγνεσθαι μὴ ἁπλῶς μηδ’ ὡς ἐπὶ τὸ πολύ, καὶ τούτων ὅσ’ ἂν γένοιτο ἕνεκά του.

Κεφάλαιο 6

Διαφέρει δ’ ὅτι τὸ αὐτόματον ἐπὶ πλεῖόν ἐστι· τὸ μὲν γὰρ ἀπὸ τύχης πᾶν ἀπὸ ταὐτομάτου, τοῦτο δ’ οὐ πᾶν [197b] ἀπὸ τύχης.

ἡ μὲν γὰρ τύχη καὶ τὸ ἀπὸ τύχης ἐστὶν ὅσοις καὶ τὸ εὐτυχῆσαι ἂν ὑπάρξειεν καὶ ὅλως πρᾶξις. διὸ καὶ ἀνάγκη περὶ τὰ πρακτὰ εἶναι τὴν τύχην (σημεῖον δ’ ὅτι δοκεῖ ἤτοι ταὐτὸν εἶναι τῇ εὐδαιμονίᾳ ἡ εὐτυχία ἢ ἐγγύς, ἡ δ’ εὐδαιμονία πρᾶξίς τις· εὐπραξία γάρ), ὥσθ’ ὁπόσοις μὴ ἐνδέχεται πρᾶξαι, οὐδὲ τὸ ἀπὸ τύχης τι ποιῆσαι. καὶ διὰ τοῦτο οὔτε ἄψυχον οὐδὲν οὔτε θηρίον οὔτε παιδίον οὐδὲν ποιεῖ ἀπὸ τύχης, ὅτι οὐκ ἔχει προαίρεσιν· οὐδ’ εὐτυχία οὐδ’ ἀτυχία ὑπάρχει τούτοις, εἰ μὴ καθ’ ὁμοιότητα, ὥσπερ ἔφη Πρώταρχος εὐτυχεῖς εἶναι τοὺς λίθους ἐξ ὧν οἱ βωμοί, ὅτι τιμῶνται, οἱ δὲ ὁμόζυγες αὐτῶν καταπατοῦνται. τὸ δὲ πάσχειν ἀπὸ τύχης ὑπάρξει πως καὶ τούτοις, ὅταν ὁ πράττων τι περὶ αὐτὰ πράξῃ ἀπὸ τύχης, ἄλλως δὲ οὐκ ἔστιν·

τὸ δ’ αὐτόματον καὶ τοῖς ἄλλοις ζῴοις καὶ πολλοῖς τῶν ἀψύχων, οἷον ὁ ἵππος αὐτόματος, φαμέν, ἦλθεν, ὅτι ἐσώθη μὲν ἐλθών, οὐ τοῦ σωθῆναι δὲ ἕνεκα ἦλθε· καὶ ὁ τρίπους αὐτόματος κατέπεσεν· ἔστη μὲν γὰρ τοῦ καθῆσθαι ἕνεκα, ἀλλ’ οὐ τοῦ καθῆσθαι ἕνεκα κατέπεσεν.

ὥστε φανερὸν ὅτι ἐν τοῖς ἁπλῶς ἕνεκά του γιγνομένοις, ὅταν μὴ τοῦ συμβάντος ἕνεκα γένηται ὧν ἔξω τὸ αἴτιον, τότε ἀπὸ τοῦ αὐτομάτου λέγομεν· ἀπὸ τύχης δέ, τούτων ὅσα ἀπὸ τοῦ αὐτομάτου γίγνεται τῶν προαιρετῶν τοῖς ἔχουσι προαίρεσιν. σημεῖον δὲ τὸ μάτην, ὅτι λέγεται ὅταν μὴ γένηται τὸ ἕνεκα ἄλλου ἐκείνου ἕνεκα, οἷον εἰ τὸ βαδίσαι λαπάξεως ἕνεκά ἐστιν, εἰ δὲ μὴ ἐγένετο βαδίσαντι, μάτην φαμὲν βαδίσαι καὶ ἡ βάδισις ματαία, ὡς τοῦτο ὂν τὸ μάτην, τὸ πεφυκὸς ἄλλου ἕνεκα, ὅταν μὴ περαίνῃ ἐκεῖνο οὗ ἕνεκα ἦν καὶ ἐπεφύκει, ἐπεὶ εἴ τις λούσασθαι φαίη μάτην ὅτι οὐκ ἐξέλιπεν ὁ ἥλιος, γελοῖος ἂν εἴη· οὐ γὰρ ἦν τοῦτο ἐκείνου ἕνεκα. οὕτω δὴ τὸ αὐτόματον καὶ κατὰ τὸ ὄνομα ὅταν αὐτὸ μάτην γένηται· κατέπεσεν γὰρ οὐ τοῦ πατάξαι ἕνεκεν ὁ λίθος· ἀπὸ τοῦ αὐτομάτου ἄρα κατέπεσεν ὁ λίθος, ὅτι πέσοι ἂν ὑπὸ τινὸς καὶ τοῦ πατάξαι ἕνεκα. μάλιστα δ’ ἐστὶ χωριζόμενον τοῦ ἀπὸ τύχης ἐν τοῖς φύσει γιγνομένοις· ὅταν γὰρ γένηταί τι παρὰ φύσιν, τότε οὐκ ἀπὸ τύχης ἀλλὰ μᾶλλον ἀπὸ ταὐτομάτου γεγονέναι φαμέν. ἔστι δὲ καὶ τοῦτο ἕτερον· τοῦ μὲν γὰρ ἔξω τὸ αἴτιον, τοῦ δ’ ἐντός. [198a]

τί μὲν οὖν ἐστιν τὸ αὐτόματον καὶ τί ἡ τύχη, εἴρηται, καὶ τί διαφέρουσιν ἀλλήλων. τῶν δὲ τρόπων τῆς αἰτίας ἐν τοῖς ὅθεν ἡ ἀρχὴ τῆς κινήσεως ἑκάτερον αὐτῶν· ἢ γὰρ τῶν φύσει τι ἢ τῶν ἀπὸ διανοίας αἰτίων ἀεί ἐστιν· ἀλλὰ τούτων τὸ πλῆθος ἀόριστον.

ἐπεὶ δ’ ἐστὶ τὸ αὐτόματον καὶ ἡ τύχη αἴτια ὧν ἂν ἢ νοῦς γένοιτο αἴτιος ἢ φύσις, ὅταν κατὰ συμβεβηκὸς αἴτιόν τι γένηται τούτων αὐτῶν, οὐδὲν δὲ κατὰ συμβεβηκός ἐστι πρότερον τῶν καθ’ αὑτό, δῆλον ὅτι οὐδὲ τὸ κατὰ συμβεβηκὸς αἴτιον πρότερον τοῦ καθ’ αὑτό. ὕστερον ἄρα τὸ αὐτόματον καὶ ἡ τύχη καὶ νοῦ καὶ φύσεως· ὥστ’ εἰ ὅτι μάλιστα τοῦ οὐρανοῦ αἴτιον τὸ αὐτόματον, ἀνάγκη πρότερον νοῦν αἴτιον καὶ φύσιν εἶναι καὶ ἄλλων πολλῶν καὶ τοῦδε τοῦ παντός.

Κεφάλαιο 7

Ὅτι δὲ ἔστιν αἴτια, καὶ ὅτι τοσαῦτα τὸν ἀριθμὸν ὅσα φαμέν, δῆλον· τοσαῦτα γὰρ τὸν ἀριθμὸν τὸ διὰ τί περιείληφεν· ἢ γὰρ εἰς τὸ τί ἐστιν ἀνάγεται τὸ διὰ τί ἔσχατον, ἐν τοῖς ἀκινήτοις (οἷον ἐν τοῖς μαθήμασιν· εἰς ὁρισμὸν γὰρ τοῦ εὐθέος ἢ συμμέτρου ἢ ἄλλου τινὸς ἀνάγεται ἔσχατον), ἢ εἰς τὸ κινῆσαν πρῶτον (οἷον διὰ τί ἐπολέμησαν; ὅτι ἐσύλησαν), ἢ τίνος ἕνεκα (ἵνα ἄρξωσιν), ἢ ἐν τοῖς γιγνομένοις ἡ ὕλη. ὅτι μὲν οὖν τὰ αἴτια ταῦτα καὶ τοσαῦτα, φανερόν·

ἐπεὶ δ’ αἱ αἰτίαι τέτταρες, περὶ πασῶν τοῦ φυσικοῦ εἰδέναι, καὶ εἰς πάσας ἀνάγων τὸ διὰ τί ἀποδώσει φυσικῶς, τὴν ὕλην, τὸ εἶδος, τὸ κινῆσαν, τὸ οὗ ἕνεκα. ἔρχεται δὲ τὰ τρία εἰς [τὸ] ἓν πολλάκις· τὸ μὲν γὰρ τί ἐστι καὶ τὸ οὗ ἕνεκα ἕν ἐστι, τὸ δ’ ὅθεν ἡ κίνησις πρῶτον τῷ εἴδει ταὐτὸ τούτοις· ἄνθρωπος γὰρ ἄνθρωπον γεννᾷ-καὶ ὅλως ὅσα κινούμενα κινεῖ (ὅσα δὲ μή, οὐκέτι φυσικῆς· οὐ γὰρ ἐν αὑτοῖς ἔχοντα κίνησιν οὐδ’ ἀρχὴν κινήσεως κινεῖ, ἀλλ’ ἀκίνητα ὄντα· διὸ τρεῖς αἱ πραγματεῖαι, ἡ μὲν περὶ ἀκινήτων, ἡ δὲ περὶ κινουμένων μὲν ἀφθάρτων δέ, ἡ δὲ περὶ τὰ φθαρτά).

ὥστε τὸ διὰ τί καὶ εἰς τὴν ὕλην ἀνάγοντι ἀποδίδοται, καὶ εἰς τὸ τί ἐστιν, καὶ εἰς τὸ πρῶτον κινῆσαν. περὶ γενέσεως γὰρ μάλιστα τοῦτον τὸν τρόπον τὰς αἰτίας σκοποῦσι, τί μετὰ τί γίγνεται, καὶ τί πρῶτον ἐποίησεν ἢ τί ἔπαθεν, καὶ οὕτως αἰεὶ τὸ ἐφεξῆς.

διτταὶ δὲ αἱ ἀρχαὶ αἱ κινοῦσαι φυσικῶς, ὧν ἡ ἑτέρα οὐ φυσική· οὐ [198b] γὰρ ἔχει κινήσεως ἀρχὴν ἐν αὑτῇ. τοιοῦτον δ’ ἐστὶν εἴ τι κινεῖ μὴ κινούμενον, ὥσπερ τό τε παντελῶς ἀκίνητον καὶ [τὸ] πάντων πρῶτον καὶ τὸ τί ἐστιν καὶ ἡ μορφή· τέλος γὰρ καὶ οὗ ἕνεκα· ὥστε ἐπεὶ ἡ φύσις ἕνεκά του, καὶ ταύτην εἰδέναι δεῖ, καὶ πάντως ἀποδοτέον τὸ διὰ τί, οἷον ὅτι ἐκ τοῦδε ἀνάγκη τόδε (τὸ δὲ ἐκ τοῦδε ἢ ἁπλῶς ἢ ὡς ἐπὶ τὸ πολύ), καὶ εἰ μέλλει τοδὶ ἔσεσθαι (ὥσπερ ἐκ τῶν προτάσεων τὸ συμπέρασμα), καὶ ὅτι τοῦτ’ ἦν τὸ τί ἦν εἶναι, καὶ διότι βέλτιον οὕτως, οὐχ ἁπλῶς, ἀλλὰ τὸ πρὸς τὴν ἑκάστου οὐσίαν.

Κεφάλαιο 8

Λεκτέον δὴ πρῶτον μὲν διότι ἡ φύσις τῶν ἕνεκά του αἰτίων, ἔπειτα περὶ τοῦ ἀναγκαίου, πῶς ἔχει ἐν τοῖς φυσικοῖς· εἰς γὰρ ταύτην τὴν αἰτίαν ἀνάγουσι πάντες, ὅτι ἐπειδὴ τὸ θερμὸν τοιονδὶ πέφυκεν καὶ τὸ ψυχρὸν καὶ ἕκαστον δὴ τῶν τοιούτων, ταδὶ ἐξ ἀνάγκης ἐστὶ καὶ γίγνεται· καὶ γὰρ ἐὰν ἄλλην αἰτίαν εἴπωσιν, ὅσον ἁψάμενοι χαίρειν ἐῶσιν, ὁ μὲν τὴν φιλίαν καὶ τὸ νεῖκος, ὁ δὲ τὸν νοῦν·

ἔχει δ' ἀπορίαν τί κωλύει τὴν φύσιν μὴ ἕνεκά του ποιεῖν μηδ' ὅτι βέλτιον, ἀλλ' ὥσπερ ὕει ὁ Ζεὺς οὐχ ὅπως τὸν σῖτον αὐξήσῃ, ἀλλ' ἐξ ἀνάγκης (τὸ γὰρ ἀναχθὲν ψυχθῆναι δεῖ, καὶ τὸ ψυχθὲν ὕδωρ γενόμενον κατελθεῖν· τὸ δ' αὐξάνεσθαι τούτου γενομένου τὸν σῖτον συμβαίνει), ὁμοίως δὲ καὶ εἴ τῳ ἀπόλλυται ὁ σῖτος ἐν τῇ ἅλῳ, οὐ τούτου ἕνεκα ὕει ὅπως ἀπόληται, ἀλλὰ τοῦτο συμβέβηκεν-ὥστε τί κωλύει οὕτω καὶ τὰ μέρη ἔχειν ἐν τῇ φύσει, οἷον τοὺς ὀδόντας ἐξ ἀνάγκης ἀνατεῖλαι τοὺς μὲν ἐμπροσθίους ὀξεῖς, ἐπιτηδείους πρὸς τὸ διαιρεῖν, τοὺς δὲ γομφίους πλατεῖς καὶ χρησίμους πρὸς τὸ λεαίνειν τὴν τροφήν, ἐπεὶ οὐ τούτου ἕνεκα γενέσθαι, ἀλλὰ συμπεσεῖν· ὁμοίως δὲ καὶ περὶ τῶν ἄλλων μερῶν, ἐν ὅσοις δοκεῖ ὑπάρχειν τὸ ἕνεκά του. ὅπου μὲν οὖν ἅπαντα συνέβη ὥσπερ κἂν εἰ ἕνεκά του ἐγίγνετο, ταῦτα μὲν ἐσώθη ἀπὸ τοῦ αὐτομάτου συστάντα ἐπιτηδείως· ὅσα δὲ μὴ οὕτως, ἀπώλετο καὶ ἀπόλλυται, καθάπερ Ἐμπεδοκλῆς λέγει τὰ βουγενῆ ἀνδρόπρῳρα.

ὁ μὲν οὖν λόγος, ᾧ ἄν τις ἀπορήσειεν, οὗτος, καὶ εἴ τις ἄλλος τοιοῦτός ἐστιν· ἀδύνατον δὲ τοῦτον ἔχειν τὸν τρόπον. ταῦτα μὲν γὰρ καὶ πάντα τὰ φύσει ἢ αἰεὶ οὕτω γίγνεται ἢ ὡς ἐπὶ τὸ πολύ, τῶν δ' ἀπὸ τύχης καὶ τοῦ αὐτομάτου οὐδέν. οὐ [199a] γὰρ ἀπὸ τύχης οὐδ' ἀπὸ συμπτώματος δοκεῖ ὕειν πολλάκις τοῦ χειμῶνος, ἀλλ' ἐὰν ὑπὸ κύνα· οὐδὲ καύματα ὑπὸ κύνα, ἀλλ' ἂν χειμῶνος. εἰ οὖν ἢ ἀπὸ συμπτώματος δοκεῖ ἢ ἕνεκά του εἶναι, εἰ μὴ οἷόν τε ταῦτ' εἶναι μήτε ἀπὸ συμπτώματος μήτ' ἀπὸ ταὐτομάτου, ἕνεκά του ἂν εἴη. ἀλλὰ μὴν φύσει γ' ἐστὶ τὰ τοιαῦτα πάντα, ὡς κἂν αὐτοὶ φαῖεν οἱ ταῦτα λέγοντες. ἔστιν ἄρα τὸ ἕνεκά του ἐν τοῖς φύσει γιγνομένοις καὶ οὖσιν.

ἔτι ἐν ὅσοις τέλος ἔστι τι, τούτου ἕνεκα πράττεται τὸ πρότερον καὶ τὸ ἐφεξῆς. οὐκοῦν ὡς πράττεται, οὕτω πέφυκε, καὶ ὡς πέφυκεν, οὕτω πράττεται ἕκαστον, ἂν μή τι ἐμποδίζῃ. πράττεται δ' ἕνεκά του· καὶ πέφυκεν ἄρα ἕνεκά του. οἷον εἰ οἰκία τῶν φύσει γιγνομένων ἦν, οὕτως ἂν ἐγίγνετο ὡς νῦν ὑπὸ τῆς τέχνης· εἰ δὲ τὰ φύσει μὴ μόνον φύσει ἀλλὰ καὶ τέχνῃ γίγνοιτο, ὡσαύτως ἂν γίγνοιτο ᾗ πέφυκεν. ἕνεκα ἄρα θατέρου θάτερον. ὅλως δὲ ἡ τέχνη τὰ μὲν ἐπιτελεῖ ἃ ἡ φύσις ἀδυνατεῖ ἀπεργάσασθαι, τὰ δὲ μιμεῖται. εἰ οὖν τὰ κατὰ τέχνην ἕνεκά του, δῆλον ὅτι καὶ τὰ κατὰ φύσιν· ὁμοίως γὰρ ἔχει πρὸς ἄλληλα ἐν τοῖς κατὰ τέχνην καὶ ἐν τοῖς κατὰ φύσιν τὰ ὕστερα πρὸς τὰ πρότερα. μάλιστα δὲ φανερὸν ἐπὶ τῶν ζῴων τῶν ἄλλων, ἃ οὔτε τέχνῃ οὔτε ζητήσαντα οὔτε βουλευσάμενα ποιεῖ· ὅθεν διαποροῦσί τινες πότερον νῷ ἤ τινι ἄλλῳ ἐργάζονται οἵ τ’ ἀράχναι καὶ οἱ μύρμηκες καὶ τὰ τοιαῦτα. κατὰ μικρὸν δ’ οὕτω προϊόντι καὶ ἐν τοῖς φυτοῖς φαίνεται τὰ συμφέροντα γιγνόμενα πρὸς τὸ τέλος, οἷον τὰ φύλλα τῆς τοῦ καρποῦ ἕνεκα σκέπης. ὥστ’ εἰ φύσει τε ποιεῖ καὶ ἕνεκά του ἡ χελιδὼν τὴν νεοττιὰν καὶ ὁ ἀράχνης τὸ ἀράχνιον, καὶ τὰ φυτὰ τὰ φύλλα ἕνεκα τῶν καρπῶν καὶ τὰς ῥίζας οὐκ ἄνω ἀλλὰ κάτω τῆς τροφῆς, φανερὸν ὅτι ἔστιν ἡ αἰτία ἡ τοιαύτη ἐν τοῖς φύσει γιγνομένοις καὶ οὖσιν. καὶ ἐπεὶ ἡ φύσις διττή, ἡ μὲν ὡς ὕλη ἡ δ’ ὡς μορφή, τέλος δ’ αὕτη, τοῦ τέλους δὲ ἕνεκα τἆλλα, αὕτη ἂν εἴη ἡ αἰτία, ἡ οὗ ἕνεκα. ἁμαρτία δὲ γίγνεται καὶ ἐν τοῖς κατὰ τέχνην (ἔγραψε γὰρ οὐκ ὀρθῶς ὁ γραμματικός, καὶ ἐπότισεν [οὐκ ὀρθῶς] ὁ ἰατρὸς τὸ φάρμακον), ὥστε δῆλον ὅτι ἐνδέχεται καὶ ἐν τοῖς κατὰ [199b] φύσιν. εἰ δὴ ἔστιν ἔνια κατὰ τέχνην ἐν οἷς τὸ ὀρθῶς ἕνεκά του, ἐν δὲ τοῖς ἁμαρτανομένοις ἕνεκα μέν τινος ἐπιχειρεῖται ἀλλ’ ἀποτυγχάνεται, ὁμοίως ἂν ἔχοι καὶ ἐν τοῖς φυσικοῖς, καὶ τὰ τέρατα ἁμαρτήματα ἐκείνου τοῦ ἕνεκά του. καὶ ἐν ταῖς ἐξ ἀρχῆς ἄρα συστάσεσι τὰ βουγενῆ, εἰ μὴ πρός τινα ὅρον καὶ τέλος δυνατὰ ἦν ἐλθεῖν, διαφθειρομένης ἂν ἀρχῆς τινὸς ἐγίγνετο, ὥσπερ νῦν τοῦ σπέρματος.

ἔτι ἀνάγκη σπέρμα γενέσθαι πρῶτον, ἀλλὰ μὴ εὐθὺς τὰ ζῷα· καὶ τὸ “οὐλοφυὲς μὲν πρῶτα” σπέρμα ἦν.

ἔτι καὶ ἐν τοῖς φυτοῖς ἔνεστι τὸ ἕνεκά του, ἧττον δὲ διήρθρωται· πότερον οὖν καὶ ἐν τοῖς φυτοῖς ἐγίγνετο, ὥσπερ τὰ βουγενῆ ἀνδρόπρῳρα, οὕτω καὶ ἀμπελογενῆ ἐλαιόπρῳρα, ἢ οὔ; ἄτοπον γάρ· ἀλλὰ μὴν ἔδει γε, εἴπερ καὶ ἐν τοῖς ζῴοις.

ἔτι ἔδει καὶ ἐν τοῖς σπέρμασι γίγνεσθαι ὅπως ἔτυχεν· ὅλως δ’ ἀναιρεῖ ὁ οὕτως λέγων τὰ φύσει τε καὶ φύσιν· φύσει γάρ, ὅσα ἀπό τινος ἐν αὑτοῖς ἀρχῆς συνεχῶς κινούμενα ἀφικνεῖται εἴς τι τέλος· ἀφ’ ἑκάστης δὲ οὐ τὸ αὐτὸ ἑκάστοις οὐδὲ τὸ τυχόν, ἀεὶ μέντοι ἐπὶ τὸ αὐτό, ἂν μή τι ἐμποδίσῃ.

τὸ δὲ οὗ ἕνεκα, καὶ ὃ τούτου ἕνεκα, γένοιτο ἂν καὶ ἀπὸ τύχης, οἷον λέγομεν ὅτι ἀπὸ τύχης ἦλθεν ὁ ξένος καὶ λυ σάμενος ἀπῆλθεν, ὅταν ὥσπερ ἕνεκα τούτου ἐλθὼν πράξῃ, μὴ ἕνεκα δὲ τούτου ἔλθῃ. καὶ τοῦτο κατὰ συμβεβηκός (ἡ γὰρ τύχη τῶν κατὰ συμβεβηκὸς αἰτίων, καθάπερ καὶ πρότερον εἴπομεν), ἀλλ’ ὅταν τοῦτο αἰεὶ ἢ ὡς ἐπὶ τὸ πολὺ γένηται, οὐ συμβεβηκὸς οὐδ’ ἀπὸ τύχης· ἐν δὲ τοῖς φυσι κοῖς ἀεὶ οὕτως, ἂν μή τι ἐμποδίσῃ.

ἄτοπον δὲ τὸ μὴ οἴεσθαι ἕνεκά του γίγνεσθαι, ἐὰν μὴ ἴδωσι τὸ κινοῦν βουλευσάμενον. καίτοι καὶ ἡ τέχνη οὐ βουλεύεται· καὶ εἰ ἐνῆν ἐν τῷ ξύλῳ ἡ ναυπηγική, ὁμοίως ἂν τῇ φύσει ἐποίει· ὥστ’ εἰ ἐν τῇ τέχνῃ ἔνεστι τὸ ἕνεκά του, καὶ ἐν τῇ φύσει. μάλιστα δὲ δῆλον, ὅταν τις ἰατρεύῃ αὐτὸς ἑαυτόν· τούτῳ γὰρ ἔοικεν ἡ φύσις. ὅτι μὲν οὖν αἰτία ἡ φύσις, καὶ οὕτως ὡς ἕνεκά του, φανερόν.

Κεφάλαιο 9

Τὸ δ’ ἐξ ἀνάγκης πότερον ἐξ ὑποθέσεως ὑπάρχει ἢ καὶ ἁπλῶς; νῦν μὲν γὰρ οἴονται τὸ ἐξ ἀνάγκης εἶναι [200a] ἐν τῇ γενέσει ὥσπερ ἂν εἴ τις τὸν τοῖχον ἐξ ἀνάγκης γεγενῆσθαι νομίζοι, ὅτι τὰ μὲν βαρέα κάτω πέφυκε φέρεσθαι τὰ δὲ κοῦφα ἐπιπολῆς, διὸ οἱ λίθοι μὲν κάτω καὶ τὰ θεμέλια, ἡ δὲ γῆ ἄνω διὰ κουφότητα, ἐπιπολῆς δὲ μάλιστα τὰ ξύλα· κουφότατα γάρ. ἀλλ’ ὅμως οὐκ ἄνευ μὲν τούτων γέγονεν, οὐ μέντοι διὰ ταῦτα πλὴν ὡς δι’ ὕλην, ἀλλ’ ἕνεκα τοῦ κρύπτειν ἄττα καὶ σώζειν. ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις πᾶσιν, ἐν ὅσοις τὸ ἕνεκά του ἔστιν, οὐκ ἄνευ μὲν τῶν ἀναγκαίαν ἐχόντων τὴν φύσιν, οὐ μέντοι γε διὰ ταῦτα ἀλλ’ ἢ ὡς ὕλην, ἀλλ’ ἕνεκά του, οἷον διὰ τί ὁ πρίων τοιοσδί; ὅπως τοδὶ καὶ ἕνεκα τουδί. τοῦτο μέντοι τὸ οὗ ἕνεκα ἀδύνατον γενέσθαι, ἂν μὴ σιδηροῦς ᾖ· ἀνάγκη ἄρα σιδηροῦν εἶναι, εἰ πρίων ἔσται καὶ τὸ ἔργον αὐτοῦ. ἐξ ὑποθέσεως δὴ τὸ ἀναγκαῖον, ἀλλ’ οὐχ ὡς τέλος· ἐν γὰρ τῇ ὕλῃ τὸ ἀναγκαῖον, τὸ δ’ οὗ ἕνεκα ἐν τῷ λόγῳ.

ἔστι δὲ τὸ ἀναγκαῖον ἔν τε τοῖς μαθήμασι καὶ ἐν τοῖς κατὰ φύσιν γιγνομένοις τρόπον τινὰ παραπλησίως· ἐπεὶ γὰρ τὸ εὐθὺ τοδί ἐστιν, ἀνάγκη τὸ τρίγωνον δύο ὀρθαῖς ἴσας ἔχειν· ἀλλ’ οὐκ ἐπεὶ τοῦτο, ἐκεῖνο· ἀλλ’ εἴ γε τοῦτο μὴ ἔστιν, οὐδὲ τὸ εὐθὺ ἔστιν. ἐν δὲ τοῖς γιγνομένοις ἕνεκά του ἀνάπαλιν, εἰ τὸ τέλος ἔσται ἢ ἔστι, καὶ τὸ ἔμπροσθεν ἔσται ἢ ἔστιν· εἰ δὲ μή, ὥσπερ ἐκεῖ μὴ ὄντος τοῦ συμπεράσματος ἡ ἀρχὴ οὐκ ἔσται, καὶ ἐνταῦθα τὸ τέλος καὶ τὸ οὗ ἕνεκα. ἀρχὴ γὰρ καὶ αὕτη, οὐ τῆς πράξεως ἀλλὰ τοῦ λογισμοῦ (ἐκεῖ δὲ τοῦ λογισμοῦ· πράξεις γὰρ οὐκ εἰσίν). ὥστ’ εἰ ἔσται οἰκία, ἀνάγκη ταῦτα γενέσθαι ἢ ὑπάρχειν, ἢ εἶναι [ἢ] ὅλως τὴν ὕλην τὴν ἕνεκά του, οἷον πλίνθους καὶ λίθους, εἰ οἰκία· οὐ μέντοι διὰ ταῦτά ἐστι τὸ τέλος ἀλλ’ ἢ ὡς ὕλην, οὐδ’ ἔσται διὰ ταῦτα. ὅλως μέντοι μὴ ὄντων οὐκ ἔσται οὔθ’ ἡ οἰκία οὔθ’ ὁ πρίων, ἡ μὲν εἰ μὴ οἱ λίθοι, ὁ δ’ εἰ μὴ ὁ σίδηρος· οὐδὲ γὰρ ἐκεῖ αἱ ἀρχαί, εἰ μὴ τὸ τρίγωνον δύο ὀρθαί.

φανερὸν δὴ ὅτι τὸ ἀναγκαῖον ἐν τοῖς φυσικοῖς τὸ ὡς ὕλη λεγόμενον καὶ αἱ κινήσεις αἱ ταύτης. καὶ ἄμφω μὲν τῷ φυσικῷ λεκτέαι αἱ αἰτίαι, μᾶλλον δὲ ἡ τίνος ἕνεκα· αἴτιον γὰρ τοῦτο τῆς ὕλης, ἀλλ’ οὐχ αὕτη τοῦ τέλους· καὶ τὸ τέλος τὸ οὗ ἕνεκα, καὶ ἡ ἀρχὴ ἀπὸ τοῦ ὁρισμοῦ καὶ τοῦ λόγου, ὥσπερ ἐν τοῖς κατὰ [200b] τέχνην, ἐπεὶ ἡ οἰκία τοιόνδε, τάδε δεῖ γενέσθαι καὶ ὑπάρχειν ἐξ ἀνάγκης, καὶ ἐπεὶ ἡ ὑγίεια τοδί, τάδε δεῖ γενέσθαι ἐξ ἀνάγκης καὶ ὑπάρχειν-οὕτως καὶ εἰ ἄνθρωπος τοδί, ταδί· εἰ δὲ ταδί, ταδί. ἴσως δὲ καὶ ἐν τῷ λόγῳ ἔστιν τὸ ἀναγκαῖον. ὁρισαμένῳ γὰρ τὸ ἔργον τοῦ πρίειν ὅτι διαίρεσις τοιαδί, αὕτη γ’ οὐκ ἔσται, εἰ μὴ ἕξει ὀδόντας τοιουσδί· οὗτοι δ’ οὔ, εἰ μὴ σιδηροῦς. ἔστι γὰρ καὶ ἐν τῷ λόγῳ ἔνια μόρια ὡς ὕλη τοῦ λόγου.

Βιβλίο 3

Κεφάλαιο 1

Ἐπεὶ δ’ ἡ φύσις μέν ἐστιν ἀρχὴ κινήσεως καὶ μετα βολῆς, ἡ δὲ μέθοδος ἡμῖν περὶ φύσεώς ἐστι, δεῖ μὴ λανθάνειν τί ἐστι κίνησις· ἀναγκαῖον γὰρ ἀγνοουμένης αὐτῆς ἀγνοεῖσθαι καὶ τὴν φύσιν.

διορισαμένοις δὲ περὶ κινήσεως πειρατέον τὸν αὐτὸν ἐπελθεῖν τρόπον περὶ τῶν ἐφεξῆς. δοκεῖ δ’ ἡ κίνησις εἶναι τῶν συνεχῶν, τὸ δ’ ἄπειρον ἐμφαίνεται πρῶτον ἐν τῷ συνεχεῖ· διὸ καὶ τοῖς ὁριζομένοις τὸ συνεχὲς συμβαίνει προσχρήσασθαι πολλάκις τῷ λόγῳ τῷ τοῦ ἀπείρου, ὡς τὸ εἰς ἄπειρον διαιρετὸν συνεχὲς ὄν. πρὸς δὲ τούτοις ἄνευ τόπου καὶ κενοῦ καὶ χρόνου κίνησιν ἀδύνατον εἶναι.

δῆλον οὖν ὡς διά τε ταῦτα, καὶ διὰ τὸ πάντων εἶναι κοινὰ καὶ καθόλου ταῦτα, σκεπτέον προχειρισαμένοις περὶ ἑκάστου τούτων (ὑστέρα γὰρ ἡ περὶ τῶν ἰδίων θεωρία τῆς περὶ τῶν κοινῶν ἐστιν)·

καὶ πρῶτον, καθάπερ εἴπαμεν, περὶ κινήσεως. ἔστι δὴ [τι] τὸ μὲν ἐντελεχείᾳ μόνον, τὸ δὲ δυνάμει καὶ ἐντελεχείᾳ, τὸ μὲν τόδε τι, τὸ δὲ τοσόνδε, τὸ δὲ τοιόνδε, καὶ τῶν ἄλλων τῶν τοῦ ὄντος κατηγοριῶν ὁμοίως. τοῦ δὲ πρός τι τὸ μὲν καθ’ ὑπεροχὴν λέγεται καὶ κατ’ ἔλλειψιν, τὸ δὲ κατὰ τὸ ποιητικὸν καὶ παθητικόν, καὶ ὅλως κινητικόν τε καὶ κινητόν· τὸ γὰρ κινητικὸν κινητικὸν τοῦ κινητοῦ καὶ τὸ κινητὸν κινητὸν ὑπὸ τοῦ κινητικοῦ.

οὐκ ἔστι δὲ κίνησις παρὰ τὰ πράγματα· μεταβάλλει γὰρ ἀεὶ τὸ μεταβάλλον ἢ κατ’ οὐσίαν ἢ κατὰ ποσὸν ἢ κατὰ ποιὸν ἢ κατὰ τόπον, κοινὸν δ’ ἐπὶ τούτων οὐδὲν ἔστι λαβεῖν, ὡς φαμέν, ὃ οὔτε τόδε οὔτε πο [201a] σὸν οὔτε ποιὸν οὔτε τῶν ἄλλων κατηγορημάτων οὐθέν· ὥστ’ οὐδὲ κίνησις οὐδὲ μεταβολὴ οὐθενὸς ἔσται παρὰ τὰ εἰρημένα, μηθενός γε ὄντος παρὰ τὰ εἰρημένα.

ἕκαστον δὲ διχῶς ὑπάρχει πᾶσιν, οἷον τὸ τόδε (τὸ μὲν γὰρ μορφὴ αὐτοῦ, τὸ δὲ στέρησις), καὶ κατὰ τὸ ποιόν (τὸ μὲν γὰρ λευκὸν τὸ δὲ μέλαν), καὶ κατὰ τὸ ποσὸν τὸ μὲν τέλειον τὸ δ’ ἀτελές. ὁμοίως δὲ καὶ κατὰ τὴν φορὰν τὸ μὲν ἄνω τὸ δὲ κάτω, ἢ τὸ μὲν κοῦφον τὸ δὲ βαρύ.

ὥστε κινήσεως καὶ μεταβολῆς ἔστιν εἴδη τοσαῦτα ὅσα τοῦ ὄντος.

διῃρημένου δὲ καθ’ ἕκαστον γένος τοῦ μὲν ἐντελεχείᾳ τοῦ δὲ δυνάμει, ἡ τοῦ δυνάμει ὄντος ἐντελέχεια, ᾗ τοιοῦτον, κίνησίς ἐστιν, οἷον τοῦ μὲν ἀλλοιωτοῦ, ᾗ ἀλλοιωτόν, ἀλλοίωσις, τοῦ δὲ αὐξητοῦ καὶ τοῦ ἀντικειμένου φθιτοῦ (οὐδὲν γὰρ ὄνομα κοινὸν ἐπ’ ἀμφοῖν) αὔξησις καὶ φθίσις, τοῦ δὲ γενητοῦ καὶ φθαρτοῦ γένεσις καὶ φθορά, τοῦ δὲ φορητοῦ φορά.

ὅτι δὲ τοῦτο ἔστιν ἡ κίνησις, ἐντεῦθεν δῆλον. ὅταν γὰρ τὸ οἰκοδομητόν, ᾗ τοιοῦτον αὐτὸ λέγομεν εἶναι, ἐντελεχείᾳ ᾖ, οἰκοδομεῖται, καὶ ἔστιν τοῦτο οἰκοδόμησις· ὁμοίως δὲ καὶ μάθησις καὶ ἰάτρευσις καὶ κύλισις καὶ ἅλσις καὶ ἅδρυνσις καὶ γήρανσις.

ἐπεὶ δ’ ἔνια ταὐτὰ καὶ δυνάμει καὶ ἐντελεχείᾳ ἐστίν, οὐχ ἅμα δὲ ἢ οὐ κατὰ τὸ αὐτό, ἀλλ’ οἷον θερμὸν μὲν ἐντελεχείᾳ ψυχρὸν δὲ δυνάμει, πολλὰ ἤδη ποιήσει καὶ πείσεται ὑπ’ ἀλλήλων· ἅπαν γὰρ ἔσται ἅμα ποιητικὸν καὶ παθητικόν. ὥστε καὶ τὸ κινοῦν φυσικῶς κινητόν· πᾶν γὰρ τὸ τοιοῦτον κινεῖ κινούμενον καὶ αὐτό. δοκεῖ μὲν οὖν τισιν ἅπαν κινεῖσθαι τὸ κινοῦν, οὐ μὴν ἀλλὰ περὶ τούτου μὲν ἐξ ἄλλων ἔσται δῆλον ὅπως ἔχει (ἔστι γάρ τι κινοῦν καὶ ἀκίνητον),

ἡ δὲ τοῦ δυνάμει ὄντος <ἐντελέχεια>, ὅταν ἐντελεχείᾳ ὂν ἐνεργῇ οὐχ ᾗ αὐτὸ ἀλλ’ ᾗ κινητόν, κίνησίς ἐστιν. λέγω δὲ τὸ ᾗ ὡδί. ἔστι γὰρ ὁ χαλκὸς δυνάμει ἀνδριάς, ἀλλ’ ὅμως οὐχ ἡ τοῦ χαλκοῦ ἐντελέχεια, ᾗ χαλκός, κίνησίς ἐστιν·

οὐ γὰρ τὸ αὐτὸ τὸ χαλκῷ εἶναι καὶ δυνάμει τινί [κινητῷ], ἐπεὶ εἰ ταὐτὸν ἦν ἁπλῶς καὶ κατὰ τὸν λόγον, ἦν ἂν ἡ τοῦ χαλκοῦ, ᾗ χαλκός, ἐντελέχεια κίνησις· οὐκ ἔστιν δὲ ταὐτόν, ὡς εἴρηται (δῆλον δ’ ἐπὶ τῶν ἐναντίων· τὸ μὲν γὰρ δύνασθαι ὑγιαίνειν [201b] καὶ δύνασθαι κάμνειν ἕτερον-καὶ γὰρ ἂν τὸ κάμνειν καὶ τὸ ὑγιαίνειν ταὐτὸν ἦν-τὸ δὲ ὑποκείμενον καὶ τὸ ὑγιαῖνον καὶ τὸ νοσοῦν, εἴθ’ ὑγρότης εἴθ’ αἷμα, ταὐτὸν καὶ ἕν).

ἐπεὶ δ’ οὐ ταὐτόν, ὥσπερ οὐδὲ χρῶμα ταὐτὸν καὶ ὁρατόν, ἡ τοῦ δυνατοῦ, ᾗ δυνατόν, ἐντελέχεια φανερὸν ὅτι κίνησίς ἐστιν.

ὅτι μὲν οὖν ἐστιν αὕτη, καὶ ὅτι συμβαίνει τότε κινεῖσθαι ὅταν ἡ ἐντελέχεια ᾖ αὐτή, καὶ οὔτε πρότερον οὔτε ὕστερον, δῆλον· ἐνδέχεται γὰρ ἕκαστον ὁτὲ μὲν ἐνεργεῖν ὁτὲ δὲ μή, οἷον τὸ οἰκοδομητόν, καὶ ἡ τοῦ οἰκοδομητοῦ ἐνέργεια, ᾗ οἰκοδομητόν, οἰκοδόμησίς ἐστιν (ἢ γὰρ οἰκοδόμησις ἡ ἐνέργεια [τοῦ οἰκοδομητοῦ] ἢ ἡ οἰκία· ἀλλ’ ὅταν οἰκία ᾖ, οὐκέτ’ οἰκοδομητὸν ἔστιν· οἰκοδομεῖται δὲ τὸ οἰκοδομητόν· ἀνάγκη οὖν οἰκοδόμησιν τὴν ἐνέργειαν εἶναι)· ἡ δ’ οἰκοδόμησις κίνησίς τις. ἀλλὰ μὴν ὁ αὐτὸς ἐφαρμόσει λόγος καὶ ἐπὶ τῶν ἄλλων κινήσεων.

Κεφάλαιο 2

Ὅτι δὲ καλῶς εἴρηται, δῆλον καὶ ἐξ ὧν οἱ ἄλλοι περὶ αὐτῆς λέγουσιν, καὶ ἐκ τοῦ μὴ ῥᾴδιον εἶναι διορίσαι ἄλλως αὐτήν.

οὔτε γὰρ τὴν κίνησιν καὶ τὴν μεταβολὴν ἐν ἄλλῳ γένει θεῖναι δύναιτ’ ἄν τις, δῆλόν τε σκοποῦσιν ὡς τιθέασιν αὐτὴν ἔνιοι, ἑτερότητα καὶ ἀνισότητα καὶ τὸ μὴ ὂν φάσκοντες εἶναι τὴν κίνησιν· ὧν οὐδὲν ἀναγκαῖον κινεῖσθαι, οὔτ’ ἂν ἕτερα ᾖ οὔτ’ ἂν ἄνισα οὔτ’ ἂν οὐκ ὄντα· ἀλλ’ οὐδ’ ἡ μεταβολὴ οὔτ’ εἰς ταῦτα οὔτ’ ἐκ τούτων μᾶλλόν ἐστιν ἢ ἐκ τῶν ἀντικειμένων.

αἴτιον δὲ τοῦ εἰς ταῦτα τιθέναι ὅτι ἀόριστόν τι δοκεῖ εἶναι ἡ κίνησις, τῆς δὲ ἑτέρας συστοιχίας αἱ ἀρχαὶ διὰ τὸ στερητικαὶ εἶναι ἀόριστοι· οὔτε γὰρ τόδε οὔτε τοιόνδε οὐδεμία αὐτῶν ἐστιν, [ὅτι] οὐδὲ τῶν ἄλλων κατηγοριῶν. τοῦ δὲ δοκεῖν ἀόριστον εἶναι τὴν κίνησιν αἴτιον ὅτι οὔτε εἰς δύναμιν τῶν ὄντων οὔτε εἰς ἐνέργειαν ἔστιν θεῖναι αὐτήν· οὔτε γὰρ τὸ δυνατὸν ποσὸν εἶναι κινεῖται ἐξ ἀνάγκης οὔτε τὸ ἐνεργείᾳ ποσόν, ἥ τε κίνησις ἐνέργεια μὲν εἶναί τις δοκεῖ, ἀτελὴς δέ· αἴτιον δ’ ὅτι ἀτελὲς τὸ δυνατόν, οὗ ἐστιν ἐνέργεια. καὶ διὰ τοῦτο δὴ χαλεπὸν αὐτὴν λαβεῖν τί ἐστιν· ἢ γὰρ εἰς στέρησιν ἀναγκαῖον θεῖναι ἢ εἰς δύναμιν ἢ εἰς ἐνέργειαν ἁπλῆν, τούτων δ’ οὐδὲν φαίνεται ἐνδεχόμενον. λείπεται [202a] τοίνυν ὁ εἰρημένος τρόπος, ἐνέργειαν μέν τινα εἶναι, τοιαύτην δ’ ἐνέργειαν οἵαν εἴπαμεν, χαλεπὴν μὲν ἰδεῖν, ἐνδεχομένην δ’ εἶναι.

κινεῖται δὲ καὶ τὸ κινοῦν ὥσπερ εἴρηται πᾶν, τὸ δυνάμει ὂν κινητόν, καὶ οὗ ἡ ἀκινησία ἠρεμία ἐστίν (ᾧ γὰρ ἡ κίνησις ὑπάρχει, τούτου ἡ ἀκινησία ἠρεμία). τὸ γὰρ πρὸς τοῦτο ἐνεργεῖν, ᾗ τοιοῦτον, αὐτὸ τὸ κινεῖν ἐστι· τοῦτο δὲ ποιεῖ θίξει, ὥστε ἅμα καὶ πάσχει· διὸ ἡ κίνησις ἐντελέχεια τοῦ κινητοῦ, ᾗ κινητόν, συμβαίνει δὲ τοῦτο θίξει τοῦ κινητικοῦ, ὥσθ’ ἅμα καὶ πάσχει. εἶδος δὲ ἀεὶ οἴσεταί τι τὸ κινοῦν, ἤτοι τόδε ἢ τοιόνδε ἢ τοσόνδε, ὃ ἔσται ἀρχὴ καὶ αἴτιον τῆς κινή σεως, ὅταν κινῇ, οἷον ὁ ἐντελεχείᾳ ἄνθρωπος ποιεῖ ἐκ τοῦ δυνάμει ὄντος ἀνθρώπου ἄνθρωπον.

Κεφάλαιο 3

Καὶ τὸ ἀπορούμενον δὲ φανερόν, ὅτι ἐστὶν ἡ κίνησις ἐν τῷ κινητῷ· ἐντελέχεια γάρ ἐστι τούτου [καὶ] ὑπὸ τοῦ κινητικοῦ. καὶ ἡ τοῦ κινητικοῦ δὲ ἐνέργεια οὐκ ἄλλη ἐστίν· δεῖ μὲν γὰρ εἶναι ἐντελέχειαν ἀμφοῖν· κινητικὸν μὲν γάρ ἐστιν τῷ δύνασθαι, κινοῦν δὲ τῷ ἐνεργεῖν, ἀλλ’ ἔστιν ἐνεργητικὸν τοῦ κινητοῦ, ὥστε ὁμοίως μία ἡ ἀμφοῖν ἐνέργεια ὥσπερ τὸ αὐτὸ διάστημα ἓν πρὸς δύο καὶ δύο πρὸς ἕν, καὶ τὸ ἄναντες καὶ τὸ κάταντες· ταῦτα γὰρ ἓν μέν ἐστιν, ὁ μέντοι λόγος οὐχ εἷς· ὁμοίως δὲ καὶ ἐπὶ τοῦ κινοῦντος καὶ κινουμένου.

ἔχει δ’ ἀπορίαν λογικήν· ἀναγκαῖον γὰρ ἴσως εἶναί τινα ἐνέργειαν τοῦ ποιητικοῦ καὶ τοῦ παθητικοῦ· τὸ μὲν δὴ ποίησις, τὸ δὲ πάθησις, ἔργον δὲ καὶ τέλος τοῦ μὲν ποίημα, τοῦ δὲ πάθος. ἐπεὶ οὖν ἄμφω κινήσεις, εἰ μὲν ἕτεραι, ἐν τίνι; ἢ γὰρ ἄμφω ἐν τῷ πάσχοντι καὶ κινουμένῳ, ἢ ἡ μὲν ποίησις ἐν τῷ ποιοῦντι, ἡ δὲ πάθησις ἐν τῷ πάσχοντι (εἰ δὲ δεῖ καὶ ταύτην ποίησιν καλεῖν, ὁμώνυμος ἂν εἴη).

ἀλλὰ μὴν εἰ τοῦτο, ἡ κίνησις ἐν τῷ κινοῦντι ἔσται (ὁ γὰρ αὐτὸς λόγος ἐπὶ κινοῦντος καὶ κινουμένου), ὥστ’ ἢ πᾶν τὸ κινοῦν κινήσεται, ἢ ἔχον κίνησιν οὐ κινήσεται.

εἰ δ’ ἄμφω ἐν τῷ κινουμένῳ καὶ πάσχοντι, καὶ ἡ ποίησις καὶ ἡ πάθησις, καὶ ἡ δίδαξις καὶ ἡ μάθησις δύο οὖσαι ἐν τῷ μανθάνοντι, πρῶτον μὲν ἡ ἐνέργεια ἡ ἑκάστου οὐκ ἐν ἑκάστῳ ὑπάρξει, εἶτα ἄτοπον δύο κινήσεις ἅμα κινεῖσθαι· τίνες γὰρ ἔσονται ἀλλοιώσεις δύο τοῦ ἑνὸς καὶ εἰς ἓν εἶδος; ἀλλ’ ἀδύνατον. ἀλλὰ μία ἔσται ἡ ἐνέργεια.

ἀλλ’ [202b] ἄλογον δύο ἑτέρων τῷ εἴδει τὴν αὐτὴν καὶ μίαν εἶναι ἐνέργειαν· καὶ ἔσται, εἴπερ ἡ δίδαξις καὶ ἡ μάθησις τὸ αὐτὸ καὶ ἡ ποίησις καὶ ἡ πάθησις, καὶ τὸ διδάσκειν τῷ μανθάνειν τὸ αὐτὸ καὶ τὸ ποιεῖν τῷ πάσχειν, ὥστε τὸν διδάσκοντα ἀνάγκη ἔσται πάντα μανθάνειν καὶ τὸν ποιοῦντα πάσχειν.

ἢ οὔτε τὸ τὴν ἄλλου ἐνέργειαν ἐν ἑτέρῳ εἶναι ἄτοπον (ἔστι γὰρ ἡ δίδαξις ἐνέργεια τοῦ διδασκαλικοῦ, ἔν τινι μέντοι, καὶ οὐκ ἀποτετμημένη, ἀλλὰ τοῦδε ἐν τῷδε),

οὔτε μίαν δυοῖν κωλύει οὐθὲν τὴν αὐτὴν εἶναι (μὴ ὡς τῷ εἶναι τὸ αὐτό, ἀλλ’ ὡς ὑπάρχει τὸ δυνάμει ὂν πρὸς τὸ ἐνεργοῦν),

οὔτ’ ἀνάγκη τὸν διδά σκοντα μανθάνειν, οὐδ’ εἰ τὸ ποιεῖν καὶ πάσχειν τὸ αὐτό ἐστιν, μὴ μέντοι ὥστε τὸν λόγον εἶναι ἕνα τὸν <τὸ> τί ἦν εἶναι λέγοντα, οἷον ὡς λώπιον καὶ ἱμάτιον, ἀλλ’ ὡς ἡ ὁδὸς ἡ Θήβηθεν Ἀθήναζε καὶ ἡ Ἀθήνηθεν εἰς Θήβας, ὥσπερ εἴρηται καὶ πρότερον; οὐ γὰρ ταὐτὰ πάντα ὑπάρχει τοῖς ὁπωσοῦν τοῖς αὐτοῖς, ἀλλὰ μόνον οἷς τὸ εἶναι τὸ αὐτό. οὐ μὴν ἀλλ’ οὐδ’ εἰ ἡ δίδαξις τῇ μαθήσει τὸ αὐτό, καὶ τὸ μανθάνειν τῷ διδάσκειν, ὥσπερ οὐδ’ εἰ ἡ διάστασις μία τῶν διεστηκότων, καὶ τὸ διίστασθαι ἐνθένθε ἐκεῖσε κἀκεῖθεν δεῦρο ἓν καὶ τὸ αὐτό. ὅλως δ’ εἰπεῖν οὐδ’ ἡ δίδαξις τῇ μαθήσει οὐδ’ ἡ ποίησις τῇ παθήσει τὸ αὐτὸ κυρίως, ἀλλ’ ᾧ ὑπάρχει ταῦτα, ἡ κίνησις· τὸ γὰρ τοῦδε ἐν τῷδε καὶ τὸ τοῦδε ὑπὸ τοῦδε ἐνέργειαν εἶναι ἕτερον τῷ λόγῳ.

τί μὲν οὖν ἐστιν κίνησις εἴρηται καὶ καθόλου καὶ κατὰ μέρος· οὐ γὰρ ἄδηλον πῶς ὁρισθήσεται τῶν εἰδῶν ἕκαστον αὐτῆς· ἀλλοίωσις μὲν γὰρ ἡ τοῦ ἀλλοιωτοῦ, ᾗ ἀλλοιωτόν, ἐντελέχεια. ἔτι δὲ γνωριμώτερον, ἡ τοῦ δυνάμει ποιητικοῦ καὶ παθητικοῦ, ᾗ τοιοῦτον, ἁπλῶς τε καὶ πάλιν καθ’ ἕκαστον, ἢ οἰκοδόμησις ἢ ἰάτρευσις. τὸν αὐτὸν δὲ λεχθήσεται τρόπον καὶ περὶ τῶν ἄλλων κινήσεων ἑκάστης.

Κεφάλαιο 4

Ἐπεὶ δ’ ἐστὶν ἡ περὶ φύσεως ἐπιστήμη περὶ μεγέθη καὶ κίνησιν καὶ χρόνον, ὧν ἕκαστον ἀναγκαῖον ἢ ἄπειρον ἢ πεπερασμένον εἶναι, εἰ καὶ μὴ πᾶν ἐστιν ἄπειρον ἢ πεπερασμένον, οἷον πάθος ἢ στιγμή (τῶν γὰρ τοιούτων ἴσως οὐδὲν ἀναγκαῖον ἐν θατέρῳ τούτων εἶναι), προσῆκον ἂν εἴη τὸν περὶ φύσεως πραγματευόμενον θεωρῆσαι περὶ ἀπείρου, εἰ ἔστιν ἢ μή, καὶ εἰ ἔστιν, τί ἐστιν.

σημεῖον δ’ ὅτι ταύτης τῆς [203a] ἐπιστήμης οἰκεία ἡ θεωρία ἡ περὶ αὐτοῦ· πάντες γὰρ οἱ δοκοῦντες ἀξιολόγως ἧφθαι τῆς τοιαύτης φιλοσοφίας πεποίηνται λόγον περὶ τοῦ ἀπείρου, καὶ πάντες ὡς ἀρχήν τινα τιθέασι τῶν ὄντων, οἱ μέν, ὥσπερ οἱ Πυθαγόρειοι καὶ Πλάτων, καθ’ αὑτό, οὐχ ὡς συμβεβηκός τινι ἑτέρῳ ἀλλ’ οὐσίαν αὐτὸ ὂν τὸ ἄπει ρον. πλὴν οἱ μὲν Πυθαγόρειοι ἐν τοῖς αἰσθητοῖς (οὐ γὰρ χωριστὸν ποιοῦσιν τὸν ἀριθμόν), καὶ εἶναι τὸ ἔξω τοῦ οὐρανοῦ ἄπειρον, Πλάτων δὲ ἔξω μὲν οὐδὲν εἶναι σῶμα, οὐδὲ τὰς ἰδέας, διὰ τὸ μηδὲ ποὺ εἶναι αὐτάς, τὸ μέντοι ἄπειρον καὶ ἐν τοῖς αἰσθητοῖς καὶ ἐν ἐκείναις εἶναι·

καὶ οἱ μὲν τὸ ἄπειρον εἶναι τὸ ἄρτιον (τοῦτο γὰρ ἐναπολαμβανόμενον καὶ ὑπὸ τοῦ περιττοῦ περαινόμενον παρέχειν τοῖς οὖσι τὴν ἀπειρίαν· σημεῖον δ’ εἶναι τούτου τὸ συμβαῖνον ἐπὶ τῶν ἀριθμῶν· περιτιθεμένων γὰρ τῶν γνωμόνων περὶ τὸ ἓν καὶ χωρὶς ὁτὲ μὲν ἄλλο ἀεὶ γίγνεσθαι τὸ εἶδος, ὁτὲ δὲ ἕν), Πλάτων δὲ δύο τὰ ἄπειρα, τὸ μέγα καὶ τὸ μικρόν.

οἱ δὲ περὶ φύσεως πάντες [ἀεὶ] ὑποτιθέασιν ἑτέραν τινὰ φύσιν τῷ ἀπείρῳ τῶν λεγομένων στοιχείων, οἷον ὕδωρ ἢ ἀέρα ἢ τὸ μεταξὺ τούτων. τῶν δὲ πεπερασμένα ποιούντων στοιχεῖα οὐθεὶς ἄπειρα ποιεῖ· ὅσοι δ’ ἄπειρα ποιοῦσι τὰ στοιχεῖα, καθάπερ Ἀναξαγόρας καὶ Δημόκριτος, ὁ μὲν ἐκ τῶν ὁμοιομερῶν, ὁ δ’ ἐκ τῆς πανσπερμίας τῶν σχημάτων, τῇ ἁφῇ συνεχὲς τὸ ἄπειρον εἶναι φασίν·

καὶ ὁ μὲν ὁτιοῦν τῶν μορίων εἶναι μίγμα ὁμοίως τῷ παντὶ διὰ τὸ ὁρᾶν ὁτιοῦν ἐξ ὁτουοῦν γιγνόμενον· ἐντεῦθεν γὰρ ἔοικε καὶ ὁμοῦ ποτὲ πάντα χρήματα φάναι εἶναι, οἷον ἥδε ἡ σὰρξ καὶ τόδε τὸ ὀστοῦν, καὶ οὕτως ὁτιοῦν· καὶ πάντα ἄρα· καὶ ἅμα τοίνυν· ἀρχὴ γὰρ οὐ μόνον ἐν ἑκάστῳ ἔστι τῆς διακρίσεως, ἀλλὰ καὶ πάντων. ἐπεὶ γὰρ τὸ γιγνόμενον ἐκ τοῦ τοιούτου γίγνεται σώματος, πάντων δ’ ἔστι γένεσις πλὴν οὐχ ἅμα, καί τινα ἀρχὴν δεῖ εἶναι τῆς γενέσεως, αὕτη δ’ ἐστὶν μία, οἷον ἐκεῖνος καλεῖ νοῦν, ὁ δὲ νοῦς ἀπ’ ἀρχῆς τινος ἐργάζεται νοήσας· ὥστε ἀνάγκη ὁμοῦ ποτε πάντα εἶναι καὶ ἄρξασθαί ποτε κινούμενα.

Δημόκριτος δ’ οὐδὲν ἕτερον ἐξ ἑτέρου γίγνεσθαι τῶν πρώτων φησίν· ἀλλ’ ὅμως γε αὐτῷ τὸ κοινὸν [203b] σῶμα πάντων ἐστὶν ἀρχή. μεγέθει κατὰ μόρια καὶ σχήματι διαφέρον.

ὅτι μὲν οὖν προσήκουσα τοῖς φυσικοῖς ἡ θεωρία, δῆλον ἐκ τούτων. εὐλόγως δὲ καὶ ἀρχὴν αὐτὸ τιθέασι πάντες· οὔτε γὰρ μάτην οἷόν τε αὐτὸ εἶναι, οὔτε ἄλλην ὑπάρχειν αὐτῷ δύναμιν πλὴν ὡς ἀρχήν· ἅπαντα γὰρ ἢ ἀρχὴ ἢ ἐξ ἀρχῆς, τοῦ δὲ ἀπείρου οὐκ ἔστιν ἀρχή· εἴη γὰρ ἂν αὐτοῦ πέρας. ἔτι δὲ καὶ ἀγένητον καὶ ἄφθαρτον ὡς ἀρχή τις οὖσα· τό τε γὰρ γενόμενον ἀνάγκη τέλος λαβεῖν, καὶ τελευτὴ πάσης ἔστιν φθορᾶς. διό, καθάπερ λέγομεν, οὐ ταύτης ἀρχή, ἀλλ’ αὕτη τῶν ἄλλων εἶναι δοκεῖ καὶ περιέχειν ἅπαντα καὶ πάντα κυβερνᾶν, ὥς φασιν ὅσοι μὴ ποιοῦσι παρὰ τὸ ἄπειρον ἄλλας αἰτίας, οἷον νοῦν ἢ φιλίαν· καὶ τοῦτ’ εἶναι τὸ θεῖον· ἀθάνατον γὰρ καὶ ἀνώλεθρον, ὥσπερ φησὶν Ἀναξίμανδρος καὶ οἱ πλεῖστοι τῶν φυσιολόγων.

τοῦ δ’ εἶναί τι ἄπειρον ἡ πίστις ἐκ πέντε μάλιστ’ ἂν συμβαίνοι σκοποῦσιν,

1. ἔκ τε τοῦ χρόνου (οὗτος γὰρ ἄπειρος)

2. καὶ ἐκ τῆς ἐν τοῖς μεγέθεσι διαιρέσεως (χρῶνται γὰρ καὶ οἱ μαθηματικοὶ τῷ ἀπείρῳ)·
3. ἔτι τῷ οὕτως ἂν μόνως μὴ ὑπολείπειν γένεσιν καὶ φθοράν, εἰ ἄπειρον εἴη ὅθεν ἀφαιρεῖται τὸ γιγνόμενον·
4. ἔτι τῷ τὸ πεπερασμένον ἀεὶ πρός τι περαίνειν, ὥστε ἀνάγκη μηδὲν εἶναι πέρας, εἰ ἀεὶ περαίνειν ἀνάγκη ἕτερον πρὸς ἕτερον.
5. μάλιστα δὲ καὶ κυριώτατον, ὃ τὴν κοινὴν ποιεῖ ἀπορίαν πᾶσι· διὰ γὰρ τὸ ἐν τῇ νοήσει μὴ ὑπολείπειν καὶ ὁ ἀριθμὸς δοκεῖ ἄπειρος εἶναι καὶ τὰ μαθηματικὰ μεγέθη καὶ τὸ ἔξω τοῦ οὐρανοῦ.

ἀπείρου δ’ ὄντος τοῦ ἔξω, καὶ σῶμα ἄπειρον εἶναι δοκεῖ καὶ κόσμοι· τί γὰρ μᾶλλον τοῦ κενοῦ ἐνταῦθα ἢ ἐνταῦθα; ὥστ’ εἴπερ μοναχοῦ, καὶ πανταχοῦ εἶναι τὸν ὄγκον. ἅμα δ’ εἰ καὶ ἔστι κενὸν καὶ τόπος ἄπειρος, καὶ σῶμα εἶναι ἀναγκαῖον· ἐνδέχεσθαι γὰρ ἢ εἶναι οὐδὲν διαφέρει ἐν τοῖς ἀϊδίοις. ἔχει δ’ ἀπορίαν ἡ περὶ τοῦ ἀπείρου θεωρία· καὶ γὰρ μὴ εἶναι τιθεμένοις πόλλ’ ἀδύνατα συμβαίνει καὶ εἶναι. ἔτι δὲ ποτέρως ἔστιν, πότερον ὡς οὐσία ἢ ὡς συμβεβηκὸς καθ’ αὑτὸ φύσει τινί; ἢ οὐδετέρως, ἀλλ’ οὐδὲν ἧττον ἔστιν ἄπειρον ἢ ἄπειρα [204a] τῷ πλήθει;

> μάλιστα δὲ φυσικοῦ ἐστιν σκέψασθαι εἰ ἔστι μέγεθος αἰσθητὸν ἄπειρον.
> πρῶτον οὖν διοριστέον ποσαχῶς λέγεται τὸ ἄπειρον.

1. ἕνα μὲν δὴ τρόπον τὸ ἀδύνατον διελθεῖν τῷ μὴ πεφυκέναι διιέναι, ὥσπερ ἡ φωνὴ ἀόρατος·

> 2. ἄλλως δὲ τὸ διέξοδον ἔχον ἀτελεύτητον, ἢ ὃ μόγις,
> 3. ἢ ὃ πεφυκὸς ἔχειν μὴ ἔχει διέξοδον ἢ πέρας.

ἔτι ἄπειρον ἅπαν ἢ κατὰ πρόσθεσιν ἢ κατὰ διαίρεσιν ἢ ἀμφοτέρως.

Κεφάλαιο 5

Χωριστὸν μὲν οὖν εἶναι τὸ ἄπειρον τῶν αἰσθητῶν, αὐτό τι ὂν ἄπειρον, οὐχ οἷόν τε. εἰ γὰρ μήτε μέγεθός ἐστιν μήτε πλῆθος, ἀλλ’ οὐσία αὐτό ἐστι τὸ ἄπειρον καὶ μὴ συμβεβη κός, ἀδιαίρετον ἔσται (τὸ γὰρ διαιρετὸν ἢ μέγεθος ἔσται ἢ πλῆθος)· εἰ δὲ τοιοῦτον, οὐκ ἄπειρον, εἰ μὴ ὡς ἡ φωνὴ ἀόρατος. ἀλλ’ οὐχ οὕτως οὔτε φασὶν εἶναι οἱ φάσκοντες εἶναι τὸ ἄπειρον οὔτε ἡμεῖς ζητοῦμεν, ἀλλ’ ὡς ἀδιεξίτητον. εἰ δὲ κατὰ συμβεβηκὸς ἔστιν τὸ ἄπειρον, οὐκ ἂν εἴη στοιχεῖον τῶν ὄντων, ᾗ ἄπειρον, ὥσπερ οὐδὲ τὸ ἀόρατον τῆς διαλέκτου, καίτοι ἡ φωνή ἐστιν ἀόρατος.

ἔτι πῶς ἐνδέχεται εἶναί τι αὐτὸ ἄπειρον, εἴπερ μὴ καὶ ἀριθμὸν καὶ μέγεθος, ὧν ἐστι καθ’ αὑτὸ πάθος τι τὸ ἄπειρον; ἔτι γὰρ ἧττον ἀνάγκη ἢ τὸν ἀριθμὸν ἢ τὸ μέγεθος.

φανερὸν δὲ καὶ ὅτι οὐκ ἐνδέχεται εἶναι τὸ ἄπειρον ὡς ἐνεργείᾳ ὂν καὶ ὡς οὐσίαν καὶ ἀρχήν· ἔσται γὰρ ὁτιοῦν αὐτοῦ ἄπειρον τὸ λαμβανόμενον, εἰ μεριστόν (τὸ γὰρ ἀπείρῳ εἶναι καὶ ἄπειρον τὸ αὐτό, εἴπερ οὐσία τὸ ἄπειρον καὶ μὴ καθ’ ὑποκειμένου), ὥστ’ ἢ ἀδιαίρετον ἢ εἰς ἄπειρα διαιρετόν· πολλὰ δ’ ἄπειρα εἶναι τὸ αὐτὸ ἀδύνατον (ἀλλὰ μὴν ὥσπερ ἀέρος ἀὴρ μέρος, οὕτω καὶ ἄπειρον ἀπείρου, εἴ γε οὐσία ἐστὶ καὶ ἀρχή)· ἀμέριστον ἄρα καὶ ἀδιαίρετον. ἀλλ’ ἀδύνατον τὸ ἐντελεχείᾳ ὂν ἄπειρον· ποσὸν γάρ τι εἶναι ἀναγκαῖον.

κατὰ συμβεβηκὸς ἄρα ὑπάρχει τὸ ἄπειρον. ἀλλ’ εἰ οὕτως, εἴρηται ὅτι οὐκ ἐνδέχεται αὐτὸ λέγειν ἀρχήν, ἀλλ’ ᾧ συμβέβηκε, τὸν ἀέρα ἢ τὸ ἄρτιον.

ὥστε ἀτόπως ἂν ἀποφαίνοιντο οἱ λέγοντες οὕτως ὥσπερ οἱ Πυθαγόρειοί φασιν· ἅμα γὰρ οὐσίαν ποιοῦσι τὸ ἄπειρον καὶ μερίζουσιν.

ἀλλ’ ἴσως αὕτη μὲν [ἐστι] καθόλου ἡ ζήτησις, εἰ ἐνδέχεται ἄπειρον καὶ ἐν τοῖς μαθηματικοῖς [204b] εἶναι καὶ ἐν τοῖς νοητοῖς καὶ μηδὲν ἔχουσι μέγεθος· ἡμεῖς δ’ ἐπισκοποῦμεν περὶ τῶν αἰσθητῶν καὶ περὶ ὧν ποιούμεθα τὴν μέθοδον, ἆρ’ ἔστιν ἐν αὐτοῖς ἢ οὐκ ἔστι σῶμα ἄπειρον ἐπὶ τὴν αὔξησιν.

λογικῶς μὲν οὖν σκοπουμένοις ἐκ τῶν τοιῶνδε δόξειεν ἂν οὐκ εἶναι· εἰ γάρ ἐστι σώματος λόγος τὸ ἐπιπέδῳ ὡρισμένον, οὐκ ἂν εἴη σῶμα ἄπειρον, οὔτε νοητὸν οὔτε αἰσθητόν (ἀλλὰ μὴν οὐδ’ ἀριθμὸς οὕτως ὡς κεχωρισμένος καὶ ἄπειρος· ἀριθμητὸν γὰρ ἀριθμὸς ἢ τὸ ἔχον ἀριθμόν· εἰ οὖν τὸ ἀριθμητὸν ἐνδέχεται ἀριθμῆσαι, καὶ διεξελθεῖν ἂν εἴη δυνατὸν τὸ ἄπειρον)·

φυσικῶς δὲ μᾶλλον θεωροῦσιν ἐκ τῶνδε.

οὔτε γὰρ σύνθετον οἷόν τε εἶναι οὔτε ἁπλοῦν.

σύνθετον μὲν οὖν οὐκ ἔσται τὸ ἄπειρον σῶμα, εἰ πεπερασμένα τῷ πλήθει τὰ στοιχεῖα. ἀνάγκη γὰρ πλείω εἶναι, καὶ ἰσάζειν ἀεὶ τἀναντία, καὶ μὴ εἶναι ἓν αὐτῶν ἄπειρον (εἰ γὰρ ὁποσῳοῦν λείπεται ἡ ἐν ἑνὶ σώματι δύναμις θατέρου, οἷον εἰ τὸ πῦρ πεπέρανται, ὁ δ' ἀὴρ ἄπειρος, ἔστιν δὲ τὸ ἴσον πῦρ τοῦ ἴσου ἀέρος τῇ δυνάμει ὁποσαπλασιονοῦν, μόνον δὲ ἀριθμόν τινα ἔχον, ὅμως φανερὸν ὅτι τὸ ἄπειρον ὑπερβαλεῖ καὶ φθερεῖ τὸ πεπερασμένον)· ἕκαστον δ' ἄπειρον εἶναι ἀδύνατον· σῶμα μὲν γάρ ἐστιν τὸ πάντῃ ἔχον διάστασιν, ἄπειρον δὲ τὸ ἀπεράντως διεστηκός, ὥστε τὸ ἄπειρον σῶμα πανταχῇ ἔσται διεστηκὸς εἰς ἄπειρον.

ἀλλὰ μὴν οὐδὲ ἓν καὶ ἁπλοῦν εἶναι σῶμα ἄπειρον ἐνδέχεται, οὔτε ὡς λέγουσί τινες τὸ παρὰ τὰ στοιχεῖα, ἐξ οὗ ταῦτα γεννῶσιν, οὔθ' ἁπλῶς.

εἰσὶν γάρ τινες οἳ τοῦτο ποιοῦσι τὸ ἄπειρον, ἀλλ' οὐκ ἀέρα ἢ ὕδωρ, ὅπως μὴ τἆλλα φθείρηται ὑπὸ τοῦ ἀπείρου αὐτῶν· ἔχουσι γὰρ πρὸς ἄλληλα ἐναντίωσιν, οἷον ὁ μὲν ἀὴρ ψυχρός, τὸ δ' ὕδωρ ὑγρόν, τὸ δὲ πῦρ θερμόν· ὧν εἰ ἦν ἓν ἄπειρον, ἔφθαρτο ἂν ἤδη τἆλλα· νῦν δ' ἕτερον εἶναί φασιν ἐξ οὗ ταῦτα.

ἀδύνατον δ' εἶναι τοιοῦτον, οὐχ ὅτι ἄπειρον (περὶ τούτου μὲν γὰρ κοινόν τι λεκτέον ἐπὶ παντὸς ὁμοίως, καὶ ἀέρος καὶ ὕδατος καὶ ὁτουοῦν), ἀλλ' ὅτι οὐκ ἔστιν τοιοῦτον σῶμα αἰσθητὸν παρὰ τὰ καλούμενα στοιχεῖα· ἅπαντα γὰρ ἐξ οὗ ἐστι, καὶ διαλύεται εἰς τοῦτο, ὥστε ἦν ἂν ἐνταῦθα παρὰ ἀέρα καὶ πῦρ καὶ γῆν καὶ ὕδωρ· φαίνεται δ' οὐδέν.

οὐδὲ δὴ πῦρ οὐδ' ἄλλο τι [205a] τῶν στοιχείων οὐδὲν ἄπειρον ἐνδέχεται εἶναι. ὅλως γὰρ καὶ χωρὶς τοῦ ἄπειρον εἶναί τι αὐτῶν, ἀδύνατον τὸ πᾶν, κἂν ᾖ πεπερασμένον, ἢ εἶναι ἢ γίγνεσθαι ἕν τι αὐτῶν, ὥσπερ Ἡράκλειτός φησιν ἅπαντα γίγνεσθαί ποτε πῦρ (ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τοῦ ἑνός, οἷον ποιοῦσι παρὰ τὰ στοιχεῖα οἱ φυσικοί)· πάντα γὰρ μεταβάλλει ἐξ ἐναντίου εἰς ἐναντίον, οἷον ἐκ θερμοῦ εἰς ψυχρόν.

δεῖ δὲ κατὰ παντὸς ἐκ τῶνδε σκοπεῖν, εἰ ἐνδέχεται ἢ οὐκ ἐνδέχεται εἶναι [σῶμα ἄπειρον αἰσθητόν]. ὅτι δὲ ὅλως ἀδύνατον εἶναι σῶμα ἄπειρον αἰσθητόν, ἐκ τῶνδε δῆλον.

πέφυκε γὰρ πᾶν τὸ αἰσθητόν που εἶναι, καὶ ἔστιν τόπος τις ἑκάστου, καὶ ὁ αὐτὸς τοῦ μορίου καὶ παντός, οἷον ὅλης τε τῆς γῆς καὶ βώλου μιᾶς, καὶ πυρὸς καὶ σπινθῆρος.

ὥστε εἰ μὲν ὁμοειδές, ἀκίνητον ἔσται ἢ ἀεὶ οἰσθήσεται· καίτοι ἀδύνατον (τί γὰρ μᾶλλον κάτω ἢ ἄνω ἢ ὁπουοῦν; λέγω δὲ οἷον, εἰ βῶλος εἴη, ποῦ αὕτη κινηθήσεται ἢ ποῦ μενεῖ; ὁ γὰρ τόπος ἄπειρος τοῦ συγγενοῦς αὐτῇ σώματος. πότερον οὖν καθέξει τὸν ὅλον τόπον; καὶ πῶς; τίς οὖν ἢ ποῦ ἡ μονὴ καὶ ἡ κίνησις αὐτῆς; ἢ πανταχοῦ μενεῖ; οὐ κινηθήσεται ἄρα. ἢ πανταχοῦ κινηθήσεται; οὐκ ἄρα στήσεται)·

εἰ δ' ἀνόμοιον τὸ πᾶν, ἀνόμοιοι καὶ οἱ τόποι· καὶ πρῶτον μὲν οὐχ ἓν τὸ σῶμα τοῦ παντὸς ἀλλ' ἢ τῷ ἅπτεσθαι· ἔπειτα ἤτοι πεπερασμένα ταῦτ' ἔσται ἢ ἄπειρα τῷ εἴδει. πεπερασμένα μὲν οὖν οὐχ οἷόν τε (ἔσται γὰρ τὰ μὲν ἄπειρα τὰ δ' οὔ, εἰ τὸ πᾶν ἄπειρον, οἷον τὸ πῦρ ἢ τὸ ὕδωρ· φθορὰ δὲ τὸ τοιοῦτον τοῖς ἐναντίοις [καθάπερ εἴρηται πρότερον · (καὶ διὰ τοῦτ' οὐθεὶς τὸ ἓν καὶ ἄπειρον πῦρ ἐποίησεν οὐδὲ γῆν τῶν φυσιολόγων, ἀλλ' ἢ ὕδωρ ἢ ἀέρα ἢ τὸ μέσον αὐτῶν, ὅτι τόπος ἑκατέρου δῆλος ἦν διωρισμένος, ταῦτα δ' ἐπαμφοτερίζει τῷ ἄνω καὶ κάτω.) εἰ δ' ἄπειρα καὶ ἁπλᾶ, καὶ οἱ τόποι ἄπειροι, καὶ ἔσται ἄπειρα τὰ στοιχεῖα· εἰ δὲ τοῦτ' ἀδύνατον καὶ πεπερασμένοι οἱ τόποι, καὶ τὸ ὅλον [πεπεράνθαι ἀναγκαῖον]· ἀδύνατον γὰρ μὴ ἀπαρτίζειν τὸν τόπον καὶ τὸ σῶμα· οὔτε γὰρ ὁ τόπος ὁ πᾶς μείζων ἢ ὅσον ἐνδέχεται τὸ σῶμα εἶναι (ἅμα δ' οὐδ' ἄπειρον ἔσται τὸ σῶμα ἔτι), οὔτε τὸ σῶμα μεῖζον ἢ ὁ τόπος· ἢ γὰρ κενὸν [205b] ἔσται τι ἢ σῶμα οὐδαμοῦ πεφυκὸς εἶναι.

Ἀναξαγόρας δ' ἀτόπως λέγει περὶ τῆς τοῦ ἀπείρου μονῆς· στηρίζειν γὰρ αὐτὸ αὐτό φησιν τὸ ἄπειρον· τοῦτο δέ, ὅτι ἐν αὑτῷ (ἄλλο γὰρ οὐδὲν περιέχειν), ὡς ὅπου ἄν τι ᾖ, πεφυκὸς ἐνταῦθα εἶναι. τοῦτο δ' οὐκ ἀληθές· εἴη γὰρ ἄν τί που βίᾳ καὶ οὐχ οὗ πέφυκεν.

εἰ οὖν ὅτι μάλιστα μὴ κινεῖται τὸ ὅλον (τὸ γὰρ αὑτῷ στηριζόμενον καὶ ἐν αὑτῷ ὂν ἀκίνητον εἶναι ἀνάγκη), ἀλλὰ διὰ τί οὐ πέφυκε κινεῖσθαι, λεκτέον. οὐ γὰρ ἱκανὸν τὸ οὕτως εἰπόντα ἀπηλλάχθαι· εἴη γὰρ ἂν καὶ ὅτι οὐκ ἔχει ἀλλαχῇ κινεῖσθαι οὐ κινούμενον, ἀλλὰ πεφυκέναι οὐδὲν κωλύει· ἐπεὶ καὶ ἡ γῆ οὐ φέρεται, οὐδ' εἰ ἄπειρος ἦν, εἰργμένη μέντοι ὑπὸ τοῦ μέσου· ἀλλ' οὐχ ὅτι οὐκ ἔστιν ἄλλο οὗ ἐνεχθήσεται, μείνειεν ἂν [ἐπὶ τοῦ μέσου], ἀλλ' ὅτι πέφυκεν οὕτω. καίτοι ἐξείη ἂν λέγειν ὅτι στηρίζει αὑτήν. εἰ οὖν μηδ' ἐπὶ τῆς γῆς τοῦτο αἴτιον ἀπείρου οὔσης, ἀλλ' ὅτι βάρος ἔχει, τὸ δὲ βαρὺ μένει ἐπὶ τοῦ μέσου, ἡ δὲ γῆ ἐπὶ τοῦ μέσου, ὁμοίως ἂν καὶ τὸ ἄπειρον μένοι ἐν αὑτῷ διά τιν' ἄλλην αἰτίαν, καὶ οὐχ ὅτι ἄπειρον καὶ στηρίζει αὐτὸ ἑαυτό.

ἅμα δὲ δῆλον ὅτι κἂν ὁτιοῦν μέρος δέοι μένειν· ὡς γὰρ τὸ ἄπειρον ἐν ἑαυτῷ μένει στηρίζον, οὕτως κἂν ὁτιοῦν ληφθῇ μέρος ἐν ἑαυτῷ μενεῖ· τοῦ γὰρ ὅλου καὶ τοῦ μέρους ὁμοειδεῖς οἱ τόποι, οἷον ὅλης γῆς καὶ βώλου κάτω καὶ παντὸς πυρὸς καὶ σπινθῆρος ἄνω. ὥστε εἰ τοῦ ἀπείρου τόπος τὸ ἐν αὑτῷ, καὶ τοῦ μέρους ὁ αὐτός. μενεῖ ἄρα ἐν ἑαυτῷ.

ὅλως δὲ φανερὸν ὅτι ἀδύνατον ἄπειρον ἅμα λέγειν σῶμα καὶ τόπον τινὰ εἶναι τοῖς σώμασιν, εἰ πᾶν σῶμα αἰσθητὸν ἢ βάρος ἔχει ἢ κουφότητα, καὶ εἰ μὲν βαρύ, ἐπὶ τὸ μέσον ἔχει τὴν φορὰν φύσει, εἰ δὲ κοῦφον, ἄνω· ἀνάγκη γὰρ καὶ τὸ ἄπειρον, ἀδύνατον δὲ ἢ ἅπαν ὁποτερονοῦν ἢ τὸ ἥμισυ ἑκάτερον πεπονθέναι· πῶς γὰρ διελεῖς; ἢ πῶς τοῦ ἀπείρου ἔσται τὸ μὲν ἄνω τὸ δὲ κάτω, ἢ ἔσχατον καὶ μέσον;

ἔτι πᾶν σῶμα αἰσθητὸν ἐν τόπῳ, τόπου δὲ εἴδη καὶ διαφοραὶ τἄνω καὶ κάτω καὶ ἔμπροσθεν καὶ ὄπισθεν καὶ δεξιὸν καὶ ἀριστερόν· καὶ ταῦτα οὐ μόνον πρὸς ἡμᾶς καὶ θέσει, ἀλλὰ καὶ ἐν αὐτῷ τῷ ὅλῳ διώρισται. ἀδύνατον δ’ ἐν τῷ ἀπείρῳ εἶναι ταῦτα. ἁπλῶς δ’ εἰ ἀδύνατον [206a] τόπον ἄπειρον εἶναι, ἐν τόπῳ δὲ πᾶν σῶμα, ἀδύνατον ἄπειρον [τι] εἶναι σῶμα.

ἀλλὰ μὴν τό γε ποὺ ἐν τόπῳ, καὶ τὸ ἐν τόπῳ πού. εἰ οὖν μηδὲ ποσὸν οἷόν τ’ εἶναι τὸ ἄπειρον-ποσὸν γὰρ τὶ ἔσται, οἷον δίπηχυ ἢ τρίπηχυ· ταῦτα γὰρ σημαίνει τὸ ποσόν-οὕτω καὶ τὸ ἐν τόπῳ ὅτι πού, τοῦτο δὲ ἢ ἄνω ἢ κάτω ἢ ἐν ἄλλῃ τινὶ διαστάσει τῶν ἕξ, τούτων δ’ ἕκαστον πέρας τί ἐστιν.

ὅτι μὲν οὖν ἐνεργείᾳ οὐκ ἔστι σῶμα ἄπειρον, φανερὸν ἐκ τούτων.

Κεφάλαιο 6

Ὅτι δ’ εἰ μὴ ἔστιν ἄπειρον ἁπλῶς, πολλὰ ἀδύνατα συμβαίνει, δῆλον. τοῦ τε γὰρ χρόνου ἔσται τις ἀρχὴ καὶ τελευτή, καὶ τὰ μεγέθη οὐ διαιρετὰ εἰς μεγέθη, καὶ ἀριθμὸς οὐκ ἔσται ἄπειρος. ὅταν δὲ διωρισμένων οὕτως μηδετέρως φαίνηται ἐνδέχεσθαι, διαιτητοῦ δεῖ, καὶ δῆλον ὅτι πὼς μὲν ἔστιν πὼς δ’ οὔ.

λέγεται δὴ τὸ εἶναι τὸ μὲν δυνάμει τὸ δὲ ἐντελεχείᾳ, καὶ τὸ ἄπειρον ἔστι μὲν προσθέσει ἔστι δὲ καὶ διαι ρέσει.

τὸ δὲ μέγεθος ὅτι μὲν κατ’ ἐνέργειαν οὐκ ἔστιν ἄπειρον, εἴρηται, διαιρέσει δ’ ἐστίν· οὐ γὰρ χαλεπὸν ἀνελεῖν τὰς ἀτόμους γραμμάς· λείπεται οὖν δυνάμει εἶναι τὸ ἄπειρον.

οὐ δεῖ δὲ τὸ δυνάμει ὂν λαμβάνειν, ὥσπερ εἰ δυνατὸν τοῦτ’ ἀνδριάντα εἶναι, ὡς καὶ ἔσται τοῦτ’ ἀνδριάς, οὕτω καὶ ἄπειρον ὃ ἔσται ἐνεργείᾳ· ἀλλ’ ἐπεὶ πολλαχῶς τὸ εἶναι, ὥσπερ ἡ ἡμέρα ἔστι καὶ ὁ ἀγὼν τῷ ἀεὶ ἄλλο καὶ ἄλλο γίγνεσθαι, οὕτω καὶ τὸ ἄπειρον (καὶ γὰρ ἐπὶ τούτων ἔστι καὶ δυνάμει καὶ ἐνεργείᾳ· Ὀλύμπια γὰρ ἔστι καὶ τῷ δύνασθαι τὸν ἀγῶνα γίγνεσθαι καὶ τῷ γίγνεσθαι)·

ἄλλως δ’ ἔν τε τῷ χρόνῳ δῆλον [τὸ ἄπειρον] καὶ ἐπὶ τῶν ἀνθρώπων, καὶ ἐπὶ τῆς διαιρέσεως τῶν μεγεθῶν. ὅλως μὲν γὰρ οὕτως ἔστιν τὸ ἄπειρον, τῷ ἀεὶ ἄλλο καὶ ἄλλο λαμβάνεσθαι, καὶ τὸ λαμβανόμενον μὲν ἀεὶ εἶναι πεπερασμένον, ἀλλ’ ἀεί γε ἕτερον καὶ ἕτερον· [ἔτι τὸ εἶναι πλεοναχῶς λέγεται, ὥστε τὸ ἄπειρον οὐ δεῖ λαμβάνειν ὡς τόδε τι, οἷον ἄνθρωπον ἢ οἰκίαν, ἀλλ’ ὡς ἡ ἡμέρα λέγεται καὶ ὁ ἀγών, οἷς τὸ εἶναι οὐχ ὡς οὐσία τις γέγονεν, ἀλλ’ ἀεὶ ἐν γενέσει ἢ φθορᾷ, πεπερασμένον, ἀλλ’ ἀεί γε ἕτερον καὶ ἕτερον·]

ἀλλ’ ἐν [206b] τοῖς μεγέθεσιν ὑπομένοντος τοῦ ληφθέντος [τοῦτο συμβαίνει], ἐπὶ δὲ τοῦ χρόνου καὶ τῶν ἀνθρώπων φθειρομένων οὕτως ὥστε μὴ ἐπιλείπειν.

τὸ δὲ κατὰ πρόσθεσιν τὸ αὐτό ἐστί πως καὶ τὸ κατὰ διαίρεσιν· ἐν γὰρ τῷ πεπερασμένῳ κατὰ πρόσθεσιν γίγνεται ἀντεστραμμένως· ᾗ γὰρ διαιρούμενον ὁρᾶται εἰς ἄπειρον, ταύτῃ προστιθέμενον φανεῖται πρὸς τὸ ὡρισμένον. ἐν γὰρ τῷ πεπερασμένῳ μεγέθει ἂν λαβών τις ὡρισμένον προσλαμβάνῃ τῷ αὐτῷ λόγῳ, μὴ τὸ αὐτό τι τοῦ ὅλου μέγεθος περιλαμβάνων, οὐ διέξεισι τὸ πεπερασμένον· ἐὰν δ’ οὕτως αὔξῃ τὸν λόγον ὥστε ἀεί τι τὸ αὐτὸ περιλαμβάνειν μέγεθος, διέξεισι, διὰ τὸ πᾶν πεπερασμένον ἀναιρεῖσθαι ὁτῳοῦν ὡρισμένῳ.

ἄλλως μὲν οὖν οὐκ ἔστιν, οὕτως δ’ ἔστι τὸ ἄπειρον, δυνάμει τε καὶ ἐπὶ καθαιρέσει (καὶ ἐντελεχείᾳ δὲ ἔστιν, ὡς τὴν ἡμέραν εἶναι λέγομεν καὶ τὸν ἀγῶνα)· καὶ δυνάμει οὕτως ὡς ἡ ὕλη, καὶ οὐ καθ’ αὑτό, ὡς τὸ πεπερασμένον. καὶ κατὰ πρόσθεσιν δὴ οὕτως ἄπειρον δυνάμει ἔστιν, ὃ ταὐτὸ λέγομεν τρόπον τινὰ εἶναι τῷ κατὰ διαίρεσιν· ἀεὶ μὲν γάρ τι ἔξω ἔσται λαμβάνειν, οὐ μέντοι ὑπερβαλεῖ παντὸς μεγέθους, ὥσπερ ἐπὶ τὴν διαίρεσιν ὑπερβάλλει παντὸς ὡρισμένου καὶ ἀεὶ ἔσται ἔλαττον.

ὥστε δὲ παντὸς ὑπερβάλλειν κατὰ τὴν πρόσθεσιν, οὐδὲ δυνάμει οἷόν τε εἶναι, εἴπερ μὴ ἔστι κατὰ συμβεβηκὸς ἐντελεχείᾳ ἄπειρον, ὥσπερ φασὶν οἱ φυσιολόγοι τὸ ἔξω σῶμα τοῦ κόσμου, οὗ ἡ οὐσία ἢ ἀὴρ ἢ ἄλλο τι τοιοῦτον, ἄπειρον εἶναι. ἀλλ’ εἰ μὴ οἷόν τε εἶναι ἄπειρον ἐντελεχείᾳ σῶμα αἰσθητὸν οὕτω, φανερὸν ὅτι οὐδὲ δυνάμει ἂν εἴη κατὰ πρόσθεσιν, ἀλλ’ ἢ ὥσπερ εἴρηται ἀντεστραμμένως τῇ διαιρέσει, ἐπεὶ καὶ Πλάτων διὰ τοῦτο δύο τὰ ἄπειρα ἐποίησεν, ὅτι καὶ ἐπὶ τὴν αὔξην δοκεῖ ὑπερβάλλειν καὶ εἰς ἄπειρον ἰέναι καὶ ἐπὶ τὴν καθαίρεσιν. ποιήσας μέντοι δύο οὐ χρῆται· οὔτε γὰρ ἐν τοῖς ἀριθμοῖς τὸ ἐπὶ τὴν καθαίρεσιν ἄπειρον ὑπάρχει (ἡ γὰρ μονὰς ἐλάχιστον), οὔτε <τὸ> ἐπὶ τὴν αὔξην (μέχρι γὰρ δεκάδος ποιεῖ τὸν ἀριθμόν).

συμβαίνει δὲ τοὐναντίον εἶναι ἄπειρον ἢ ὡς λέγουσιν. [207a] οὐ γὰρ οὗ μηδὲν ἔξω, ἀλλ’ οὗ ἀεί τι ἔξω ἐστί, τοῦτο ἄπειρόν ἐστιν. σημεῖον δέ· καὶ γὰρ τοὺς δακτυλίους ἀπείρους λέγουσι τοὺς μὴ ἔχοντας σφενδόνην, ὅτι αἰεί τι ἔξω ἔστι λαμβάνειν, καθ’ ὁμοιότητα μέν τινα λέγοντες, οὐ μέντοι κυρίως· δεῖ γὰρ τοῦτό τε ὑπάρχειν καὶ μηδέ ποτε τὸ αὐτὸ λαμβά νεσθαι· ἐν δὲ τῷ κύκλῳ οὐ γίγνεται οὕτως, ἀλλ’ αἰεὶ τὸ ἐφεξῆς μόνον ἕτερον. ἄπειρον μὲν οὖν ἐστιν οὗ κατὰ τὸ ποσὸν λαμβάνουσιν αἰεί τι λαμβάνειν ἔστιν ἔξω. οὗ δὲ μηδὲν ἔξω, τοῦτ’ ἔστι τέλειον καὶ ὅλον· οὕτω γὰρ ὁριζόμεθα τὸ ὅλον, οὗ μηδὲν ἄπεστιν, οἷον ἄνθρωπον ὅλον ἢ κιβώτιον. ὥσπερ δὲ τὸ καθ’ ἕκαστον, οὕτω καὶ τὸ κυρίως, οἷον τὸ ὅλον οὗ μηδέν ἐστιν ἔξω· οὗ δ’ ἔστιν ἀπουσία ἔξω, οὐ πᾶν, ὅ τι ἂν ἀπῇ. ὅλον δὲ καὶ τέλειον ἢ τὸ αὐτὸ πάμπαν ἢ σύνεγγυς τὴν φύσιν. τέλειον δ’ οὐδὲν μὴ ἔχον τέλος· τὸ δὲ τέλος πέρας.

διὸ βέλτιον οἰητέον Παρμενίδην Μελίσσου εἰρηκέναι· ὁ μὲν γὰρ τὸ ἄπειρον ὅλον φησίν, ὁ δὲ τὸ ὅλον πεπεράνθαι, “μεσσόθεν ἰσοπαλές”. οὐ γὰρ λίνον λίνῳ συνάπτειν ἐστὶν τῷ ἅπαντι καὶ ὅλῳ τὸ ἄπειρον, ἐπεὶ ἐντεῦθέν γε λαμβάνουσι τὴν σεμνότητα κατὰ τοῦ ἀπείρου, τὸ πάντα περιέχειν καὶ τὸ πᾶν ἐν ἑαυτῷ ἔχειν, διὰ τὸ ἔχειν τινὰ ὁμοιότητα τῷ ὅλῳ.

ἔστι γὰρ τὸ ἄπειρον τῆς τοῦ μεγέθους τελειότητος ὕλη καὶ τὸ δυνάμει ὅλον, ἐντελεχείᾳ δ’ οὔ, διαιρετὸν δ’ ἐπί τε τὴν καθαίρεσιν καὶ τὴν ἀντεστραμμένην πρόσθεσιν, ὅλον δὲ καὶ πεπερασμένον οὐ καθ’ αὑτὸ ἀλλὰ κατ’ ἄλλο· καὶ οὐ περιέχει ἀλλὰ περιέχεται, ᾗ ἄπειρον. διὸ καὶ ἄγνωστον ᾗ ἄπειρον· εἶδος γὰρ οὐκ ἔχει ἡ ὕλη. ὥστε φανερὸν ὅτι μᾶλλον ἐν μορίου λόγῳ τὸ ἄπειρον ἢ ἐν ὅλου· μόριον γὰρ ἡ ὕλη τοῦ ὅλου ὥσπερ ὁ χαλκὸς τοῦ χαλκοῦ ἀνδριάντος, ἐπεὶ εἴ γε περιέχει ἐν τοῖς αἰσθητοῖς, καὶ ἐν τοῖς νοητοῖς τὸ μέγα καὶ τὸ μικρὸν ἔδει περιέχειν τὰ νοητά. ἄτοπον δὲ καὶ ἀδύνατον τὸ ἄγνωστον καὶ ἀόριστον περιέχειν καὶ ὁρίζειν.

Κεφάλαιο 7

Κατὰ λόγον δὲ συμβαίνει καὶ τὸ κατὰ πρόσθεσιν μὲν μὴ εἶναι δοκεῖν ἄπειρον οὕτως ὥστε παντὸς ὑπερβάλλειν μεγέθους, ἐπὶ τὴν διαίρεσιν δὲ εἶναι (περιέχεται γὰρ ἡ ὕλη [207b] ἐντὸς καὶ τὸ ἄπειρον, περιέχει δὲ τὸ εἶδος)· εὐλόγως δὲ καὶ τὸ ἐν μὲν τῷ ἀριθμῷ εἶναι ἐπὶ μὲν τὸ ἐλάχιστον πέρας ἐπὶ δὲ τὸ πλεῖον ἀεὶ παντὸς ὑπερβάλλειν πλήθους, ἐπὶ δὲ τῶν μεγεθῶν τοὐναντίον ἐπὶ μὲν τὸ ἔλαττον παντὸς ὑπερβάλλειν μεγέθους ἐπὶ δὲ τὸ μεῖζον μὴ εἶναι μέγεθος ἄπειρον. αἴτιον δ’ ὅτι τὸ ἕν ἐστιν ἀδιαίρετον, ὅ τι περ ἂν ἓν ᾖ (οἷον ἄνθρωπος εἷς ἄνθρωπος καὶ οὐ πολλοί), ὁ δ’ ἀριθμός ἐστιν ἕνα πλείω καὶ πόσ’ ἄττα, ὥστ’ ἀνάγκη στῆναι ἐπὶ τὸ ἀδιαίρετον (τὸ γὰρ τρία καὶ δύο παρώνυμα ὀνόματά ἐστιν, ὁμοίως δὲ καὶ τῶν ἄλλων ἀριθμῶν ἕκαστος), ἐπὶ δὲ τὸ πλεῖον ἀεὶ ἔστι νοῆσαι· ἄπειροι γὰρ αἱ διχοτομίαι τοῦ μεγέθους. ὥστε δυνάμει μὲν ἔστιν, ἐνεργείᾳ δ’ οὔ· ἀλλ’ ἀεὶ ὑπερβάλλει τὸ λαμβανόμενον παντὸς ὡρισμένου πλήθους. ἀλλ’ οὐ χωριστὸς ὁ ἀριθμὸς οὗτος [τῆς διχοτομίας], οὐδὲ μένει ἡ ἀπειρία ἀλλὰ γίγνεται, ὥσπερ καὶ ὁ χρόνος καὶ ὁ ἀριθμὸς τοῦ χρόνου.

ἐπὶ δὲ τῶν μεγεθῶν τοὐναντίον ἐστί· διαιρεῖται μὲν γὰρ εἰς ἄπειρα τὸ συνεχές, ἐπὶ δὲ τὸ μεῖζον οὐκ ἔστιν ἄπειρον. ὅσον γὰρ ἐνδέχεται δυνάμει εἶναι, καὶ ἐνεργείᾳ ἐνδέχεται τοσοῦτον εἶναι. ὥστε ἐπεὶ ἄπειρον οὐδέν ἐστι μέγεθος αἰσθητόν, οὐκ ἐνδέχεται παντὸς ὑπερβολὴν εἶναι ὡρισμένου μεγέθους· εἴη γὰρ ἄν τι τοῦ οὐρανοῦ μεῖζον.

τὸ δ’ ἄπειρον οὐ ταὐτὸν ἐν μεγέθει καὶ κινήσει καὶ χρόνῳ, ὡς μία τις φύσις, ἀλλὰ τὸ ὕστερον λέγεται κατὰ τὸ πρότερον, οἷον κίνησις μὲν ὅτι τὸ μέγεθος ἐφ’ οὗ κινεῖται ἢ ἀλλοιοῦται ἢ αὐξάνεται, ὁ χρόνος δὲ διὰ τὴν κίνησιν. νῦν μὲν οὖν χρώμεθα τούτοις, ὕστερον δὲ ἐροῦμεν καὶ τί ἐστιν ἕκαστον, καὶ διότι πᾶν μέγεθος εἰς μεγέθη διαιρετόν.

οὐκ ἀφαιρεῖται δ’ ὁ λόγος οὐδὲ τοὺς μαθηματικοὺς τὴν θεωρίαν, ἀναιρῶν οὕτως εἶναι ἄπειρον ὥστε ἐνεργείᾳ εἶναι ἐπὶ τὴν αὔξησιν ἀδιεξίτητον· οὐδὲ γὰρ νῦν δέονται τοῦ ἀπείρου (οὐ γὰρ χρῶνται), ἀλλὰ μόνον εἶναι ὅσην ἂν βούλωνται πεπερασμένην· τῷ δὲ μεγίστῳ μεγέθει τὸν αὐτὸν ἔστι τετμῆσθαι λόγον ὁπηλικονοῦν μέγεθος ἕτερον. ὥστε πρὸς μὲν τὸ δεῖξαι ἐκείνοις οὐδὲν διοίσει τὸ [δ’] εἶναι ἐν τοῖς οὖσιν μεγέθεσιν.

ἐπεὶ δὲ τὰ αἴτια διῄρηται τετραχῶς, φανερὸν ὅτι ὡς ὕλη τὸ ἄπειρον αἴτιόν ἐστι, καὶ ὅτι [208a] τὸ μὲν εἶναι αὐτῷ στέρησις, τὸ δὲ καθ’ αὑτὸ ὑποκείμενον τὸ συνεχὲς καὶ αἰσθητόν. φαίνονται δὲ πάντες καὶ οἱ ἄλλοι ὡς ὕλῃ χρώμενοι τῷ ἀπείρῳ· διὸ καὶ ἄτοπον τὸ περιέχον ποιεῖν αὐτὸ ἀλλὰ μὴ περιεχόμενον.

Κεφάλαιο 8

Λοιπὸν δ’ ἐπελθεῖν καθ’ οὓς λόγους τὸ ἄπειρον εἶναι δοκεῖ οὐ μόνον δυνάμει ἀλλ’ ὡς ἀφωρισμένον· τὰ μὲν γάρ ἐστιν αὐτῶν οὐκ ἀναγκαῖα, τὰ δ’ ἔχει τινὰς ἑτέρας ἀληθεῖς ἀπαντήσεις.

οὔτε γὰρ ἵνα ἡ γένεσις μὴ ἐπιλείπῃ, ἀναγκαῖον ἐνεργείᾳ ἄπειρον εἶναι σῶμα αἰσθητόν· ἐνδέχεται γὰρ τὴν θατέρου φθορὰν θατέρου εἶναι γένεσιν, πεπερασμένου ὄντος τοῦ παντός.

ἔτι τὸ ἅπτεσθαι καὶ τὸ πεπεράνθαι ἕτερον. τὸ μὲν γὰρ πρός τι καὶ τινός (ἅπτεται γὰρ πᾶν τινός), καὶ τῶν πεπερασμένων τινὶ συμβέβηκεν, τὸ δὲ πεπερασμένον οὐ πρός τι· οὐδ’ ἅψασθαι τῷ τυχόντι τοῦ τυχόντος ἔστιν. τὸ δὲ τῇ νοήσει πιστεύειν ἄτοπον· οὐ γὰρ ἐπὶ τοῦ πράγματος ἡ ὑπεροχὴ καὶ ἡ ἔλλειψις, ἀλλ’ ἐπὶ τῆς νοήσεως. ἕκαστον γὰρ ἡμῶν νοήσειεν ἄν τις πολλαπλάσιον ἑαυτοῦ αὔξων εἰς ἄπειρον· ἀλλ’ οὐ διὰ τοῦτο ἔξω [τοῦ ἄστεός] τίς ἐστιν [ἢ] τοῦ τηλικούτου μεγέθους ὃ ἔχομεν, ὅτι νοεῖ τις, ἀλλ’ ὅτι ἔστι· τοῦτο δὲ συμβέβηκεν. ὁ δὲ χρόνος καὶ ἡ κίνησις ἄπειρά ἐστι καὶ ἡ νόησις οὐχ ὑπομένοντος τοῦ λαμβανομένου.

μέγεθος δὲ οὔτε τῇ καθαιρέσει οὔτε τῇ νοητικῇ αὐξήσει ἔστιν ἄπειρον.

ἀλλὰ περὶ μὲν τοῦ ἀπείρου, πῶς ἔστι καὶ πῶς οὐκ ἔστι καὶ τί ἐστιν, εἴρηται.

Βιβλίο 4

Κεφάλαιο 1

Ὁμοίως δ’ ἀνάγκη καὶ περὶ τόπου τὸν φυσικὸν ὥσπερ καὶ περὶ ἀπείρου γνωρίζειν, εἰ ἔστιν ἢ μή, καὶ πῶς ἔστι, καὶ τί ἐστιν. τά τε γὰρ ὄντα πάντες ὑπολαμβάνουσιν εἶναί που (τὸ γὰρ μὴ ὂν οὐδαμοῦ εἶναι· ποῦ γάρ ἐστι τραγέλαφος ἢ σφίγξ;) καὶ τῆς κινήσεως ἡ κοινὴ μάλιστα καὶ κυριωτάτη κατὰ τόπον ἐστίν, ἣν καλοῦμεν φοράν. ἔχει δὲ πολλὰς ἀπορίας τί ποτ’ ἐστὶν ὁ τόπος· οὐ γὰρ ταὐτὸν φαίνεται θεωροῦσιν ἐξ ἁπάντων τῶν ὑπαρχόντων. ἔτι δ’ οὐδ’ ἔχομεν οὐδὲν παρὰ τῶν ἄλλων οὔτε προηπορημένον οὔτε προηυπορημένον περὶ [208b] αὐτοῦ. ὅτι μὲν οὖν ἔστιν ὁ τόπος, δοκεῖ δῆλον εἶναι ἐκ τῆς ἀντιμεταστάσεως· ὅπου γὰρ ἔστι νῦν ὕδωρ, ἐνταῦθα ἐξελθόντος ὥσπερ ἐξ ἀγγείου πάλιν ἀὴρ ἔνεστιν, ὁτὲ δὲ τὸν αὐτὸν τόπον τοῦτον ἄλλο τι τῶν σωμάτων κατέχει· τοῦτο δὴ τῶν ἐγγιγνομένων καὶ μεταβαλλόντων ἕτερον πάντων εἶναι δοκεῖ· ἐν ᾧ γὰρ ἀὴρ ἔστι νῦν, ὕδωρ ἐν τούτῳ πρότερον ἦν, ὥστε δῆλον ὡς ἦν ὁ τόπος τι καὶ ἡ χώρα ἕτερον ἀμφοῖν, εἰς ἣν καὶ ἐξ ἧς μετέβαλον.

ἔτι δὲ αἱ φοραὶ τῶν φυσικῶν σωμάτων καὶ ἁπλῶν, οἷον πυρὸς καὶ γῆς καὶ τῶν τοιούτων, οὐ μόνον δηλοῦσιν ὅτι ἐστί τι ὁ τόπος, ἀλλ’ ὅτι καὶ ἔχει τινὰ δύναμιν. φέρεται γὰρ ἕκαστον εἰς τὸν αὑτοῦ τόπον μὴ κωλυόμενον, τὸ μὲν ἄνω τὸ δὲ κάτω· ταῦτα δ’ ἐστὶ τόπου μέρη καὶ εἴδη, τό τε ἄνω καὶ τὸ κάτω καὶ αἱ λοιπαὶ τῶν ἓξ διαστάσεων. ἔστι δὲ τὰ τοιαῦτα οὐ μόνον πρὸς ἡμᾶς, τὸ ἄνω καὶ κάτω καὶ δεξιὸν καὶ ἀριστερόν· ἡμῖν μὲν γὰρ οὐκ ἀεὶ τὸ αὐτό, ἀλλὰ κατὰ τὴν θέσιν, ὅπως ἂν στραφῶμεν, γίγνεται (διὸ καὶ ταὐτὸ πολλάκις δεξιὸν καὶ ἀριστερὸν καὶ ἄνω καὶ κάτω καὶ πρόσθεν καὶ ὄπισθεν), ἐν δὲ τῇ φύσει διώρισται χωρὶς ἕκαστον. οὐ γὰρ ὅ τι ἔτυχέν ἐστι τὸ ἄνω, ἀλλ’ ὅπου φέρεται τὸ πῦρ καὶ τὸ κοῦφον· ὁμοίως δὲ καὶ τὸ κάτω οὐχ ὅ τι ἔτυχεν, ἀλλ’ ὅπου τὰ ἔχοντα βάρος καὶ τὰ γεηρά, ὡς οὐ τῇ θέσει διαφέροντα μόνον ἀλλὰ καὶ τῇ δυνάμει. δηλοῖ δὲ καὶ τὰ μαθηματικά· οὐκ ὄντα γὰρ ἐν τόπῳ ὅμως κατὰ τὴν θέσιν τὴν πρὸς ἡμᾶς ἔχει δεξιὰ καὶ ἀριστερὰ ὡς τὰ μόνον λεγόμενα διὰ θέσιν, οὐκ ἔχοντα φύσει τούτων ἕκαστον. ἔτι οἱ τὸ κενὸν φάσκοντες εἶναι τόπον λέγουσιν· τὸ γὰρ κενὸν τόπος ἂν εἴη ἐστερημένος σώματος.

ὅτι μὲν οὖν ἐστί τι ὁ τόπος παρὰ τὰ σώματα, καὶ πᾶν σῶμα αἰσθητὸν ἐν τόπῳ, διὰ τούτων ἄν τις ὑπολάβοι· δόξειε δ’ ἂν καὶ Ἡσίοδος ὀρθῶς λέγειν ποιήσας πρῶτον τὸ χάος. λέγει γοῦν “πάντων μὲν πρώτιστα χάος γένετ’, αὐτὰρ ἔπειτα γαῖ’ εὐρύστερνος,” ὡς δέον πρῶτον ὑπάρξαι χώραν τοῖς οὖσι, διὰ τὸ νομίζειν, ὥσπερ οἱ πολλοί, πάντα εἶναί που καὶ ἐν τόπῳ. εἰ δ’ ἐστὶ τοιοῦτο, θαυμαστή τις ἂν εἴη ἡ τοῦ τόπου δύναμις καὶ προτέρα πάντων· οὗ γὰρ ἄνευ τῶν ἄλλων οὐδὲν ἔστιν, ἐκεῖνο δ’ [209a] ἄνευ τῶν ἄλλων, ἀνάγκη πρῶτον εἶναι· οὐ γὰρ ἀπόλλυται ὁ τόπος τῶν ἐν αὐτῷ φθειρομένων.

οὐ μὴν ἀλλ’ ἔχει γε ἀπορίαν, εἰ ἔστι, τί ἐστι, πότερον ὄγκος τις σώματος ἤ τις ἑτέρα φύσις· ζητητέον γὰρ τὸ γένος αὐτοῦ πρῶτον.

διαστήματα μὲν οὖν ἔχει τρία, μῆκος καὶ πλάτος καὶ βάθος, οἷς ὁρίζεται σῶμα πᾶν. ἀδύνατον δὲ σῶμα εἶναι τὸν τόπον· ἐν ταὐτῷ γὰρ ἂν εἴη δύο σώματα.

ἔτι εἴπερ ἔστι σώματος τόπος καὶ χώρα, δῆλον ὅτι καὶ ἐπιφανείας καὶ τῶν λοιπῶν περάτων· ὁ γὰρ αὐτὸς ἁρμόσει λόγος· ὅπου γὰρ ἦν πρότερον τὰ τοῦ ὕδατος ἐπίπεδα, ἔσται πάλιν τὰ τοῦ ἀέρος. ἀλλὰ μὴν οὐδεμίαν διαφορὰν ἔχομεν στιγμῆς καὶ τόπου στιγμῆς, ὥστ’ εἰ μηδὲ ταύτης ἕτερόν ἐστιν ὁ τόπος, οὐδὲ τῶν ἄλλων οὐδενός, οὐδ’ ἐστί τι παρ’ ἕκαστον τούτων ὁ τόπος.

τί γὰρ ἄν ποτε καὶ θείημεν εἶναι τὸν τόπον; οὔτε γὰρ στοιχεῖον οὔτ’ ἐκ στοιχείων οἷόν τε εἶναι τοιαύτην ἔχοντα φύσιν, οὔτε τῶν σω ματικῶν οὔτε τῶν ἀσωμάτων· μέγεθος μὲν γὰρ ἔχει, σῶμα δ’ οὐδέν· ἔστι δὲ τὰ μὲν τῶν αἰσθητῶν στοιχεῖα σώματα, ἐκ δὲ τῶν νοητῶν οὐδὲν γίγνεται μέγεθος.

ἔτι δὲ καὶ τίνος ἄν τις θείη τοῖς οὖσιν αἴτιον εἶναι τὸν τόπον; οὐδεμία γὰρ αὐτῷ ὑπάρχει αἰτία τῶν τεττάρων· οὔτε γὰρ ὡς ὕλη τῶν ὄντων (οὐδὲν γὰρ ἐξ αὐτοῦ συνέστηκεν) οὔτε ὡς εἶδος καὶ λόγος τῶν πραγμάτων οὔθ’ ὡς τέλος, οὔτε κινεῖ τὰ ὄντα.

ἔτι δὲ καὶ αὐτὸς εἰ ἔστι τι τῶν ὄντων, ποὺ ἔσται. ἡ γὰρ Ζήνωνος ἀπορία ζητεῖ τινὰ λόγον· εἰ γὰρ πᾶν τὸ ὂν ἐν τόπῳ, δῆλον ὅτι καὶ τοῦ τόπου τόπος ἔσται, καὶ τοῦτο εἰς ἄπειρον.

ἔτι ὥσπερ ἅπαν σῶμα ἐν τόπῳ, οὕτω καὶ ἐν τόπῳ ἅπαντι σῶμα· πῶς οὖν ἐροῦμεν περὶ τῶν αὐξανομένων; ἀνάγκη γὰρ ἐκ τούτων συναύξεσθαι αὐτοῖς τὸν τόπον, εἰ μήτ’ ἐλάττων μήτε μείζων ὁ τόπος ἑκάστου.

διὰ μὲν οὖν τούτων οὐ μόνον τί ἐστιν, ἀλλὰ καὶ εἰ ἔστιν, ἀπορεῖν ἀναγκαῖον.

Κεφάλαιο 2

Ἐπεὶ δὲ τὸ μὲν καθ’ αὑτὸ τὸ δὲ κατ’ ἄλλο λέγεται, καὶ τόπος ὁ μὲν κοινός, ἐν ᾧ ἅπαντα τὰ σώματά ἐστιν, ὁ δ’ ἴδιος, ἐν ᾧ πρώτῳ (λέγω δὲ οἷον σὺ νῦν ἐν τῷ οὐρανῷ ὅτι ἐν τῷ ἀέρι οὗτος δ’ ἐν τῷ οὐρανῷ, καὶ ἐν τῷ ἀέρι δὲ ὅτι ἐν τῇ γῇ, ὁμοίως δὲ καὶ ἐν ταύτῃ ὅτι ἐν τῷδε τῷ τόπῳ, [209b] ὃς περιέχει οὐδὲν πλέον ἢ σέ), εἰ δή ἐστιν ὁ τόπος τὸ πρῶτον περιέχον ἕκαστον τῶν σωμάτων, πέρας τι ἂν εἴη, ὥστε δόξειεν ἂν τὸ εἶδος καὶ ἡ μορφὴ ἑκάστου ὁ τόπος εἶναι, ᾧ ὁρίζεται τὸ μέγεθος καὶ ἡ ὕλη ἡ τοῦ μεγέθους· τοῦτο γὰρ ἑκάστου πέρας. οὕτω μὲν οὖν σκοποῦσιν ὁ τόπος τὸ ἑκάστου εἶδός ἐστιν· ᾗ δὲ δοκεῖ ὁ τόπος εἶναι τὸ διάστημα τοῦ μεγέθους, ἡ ὕλη· τοῦτο γὰρ ἕτερον τοῦ μεγέθους, τοῦτο δ’ ἐστὶ τὸ περιεχόμενον ὑπὸ τοῦ εἴδους καὶ ὡρισμένον, οἷον ὑπὸ ἐπιπέδου καὶ πέρατος, ἔστι δὲ τοιοῦτον ἡ ὕλη καὶ τὸ ἀόριστον· ὅταν γὰρ ἀφαιρεθῇ τὸ πέρας καὶ τὰ πάθη τῆς σφαίρας, λείπεται οὐδὲν παρὰ τὴν ὕλην.

διὸ καὶ Πλάτων τὴν ὕλην καὶ τὴν χώραν ταὐτό φησιν εἶναι ἐν τῷ Τιμαίῳ· τὸ γὰρ μεταληπτικὸν καὶ τὴν χώραν ἓν καὶ ταὐτόν. ἄλλον δὲ τρόπον ἐκεῖ τε λέγων τὸ μεταληπτικὸν καὶ ἐν τοῖς λεγομένοις ἀγράφοις δόγμασιν, ὅμως τὸν τόπον καὶ τὴν χώραν τὸ αὐτὸ ἀπεφήνατο. λέγουσι μὲν γὰρ πάντες εἶναί τι τὸν τόπον, τί δ’ ἐστίν, οὗτος μόνος ἐπεχείρησεν εἰπεῖν.

εἰκότως δ’ ἐκ τούτων σκοπουμένοις δόξειεν ἂν εἶναι χαλεπὸν γνωρίσαι τί ἐστιν ὁ τόπος, εἴπερ τούτων ὁποτερονοῦν ἐστίν, εἴτε ἡ ὕλη εἴτε τὸ εἶδος· ἄλλως τε γὰρ τὴν ἀκροτάτην ἔχει θέαν, καὶ χωρὶς ἀλλήλων οὐ ῥᾴδιον γνωρίζειν.

ἀλλὰ μὴν ὅτι γε ἀδύνατον ὁποτερονοῦν τούτων εἶναι τὸν τόπον, οὐ χαλεπὸν ἰδεῖν. τὸ μὲν γὰρ εἶδος καὶ ἡ ὕλη οὐ χωρίζεται τοῦ πράγματος, τὸν δὲ τόπον ἐνδέχεται· ἐν ᾧ γὰρ ἀὴρ ἦν, ἐν τούτῳ πάλιν ὕδωρ, ὥσπερ ἔφαμεν, γίγνεται, ἀντιμεθισταμένων ἀλλήλοις τοῦ τε ὕδατος καὶ τοῦ ἀέρος, καὶ τῶν ἄλλων σωμάτων ὁμοίως, ὥστε οὔτε μόριον οὔθ’ ἕξις ἀλλὰ χωριστὸς ὁ τόπος ἑκάστου ἐστί. καὶ γὰρ δοκεῖ τοιοῦτό τι εἶναι ὁ τόπος οἷον τὸ ἀγγεῖον (ἔστι γὰρ τὸ ἀγγεῖον τόπος μεταφορητός)· τὸ δ’ ἀγγεῖον οὐδὲν τοῦ πράγματός ἐστιν.

ᾗ μὲν οὖν χωριστὸς [ἐστι] τοῦ πράγματος, ταύτῃ μὲν οὐκ ἔστι τὸ εἶδος· ᾗ δὲ περιέχει, ταύτῃ δ’ ἕτερος τῆς ὕλης.

δοκεῖ δὲ ἀεὶ τὸ ὄν που αὐτό τε εἶναί τι καὶ ἕτερόν τι ἐκτὸς αὐτοῦ. (Πλάτωνι μέντοι λεκτέον, εἰ δεῖ παρεκβάντας εἰπεῖν, διὰ τί οὐκ ἐν τόπῳ τὰ εἴδη καὶ οἱ ἀριθμοί, εἴπερ τὸ μεθεκτικὸν ὁ τόπος, εἴτε τοῦ μεγάλου [210a] καὶ τοῦ μικροῦ ὄντος τοῦ μεθεκτικοῦ εἴτε τῆς ὕλης, ὥσπερ ἐν τῷ Τιμαίῳ γέγραφεν.)

ἔτι πῶς ἂν φέροιτο εἰς τὸν αὑτοῦ τόπον, εἰ ὁ τόπος ἡ ὕλη ἢ τὸ εἶδος; ἀδύνατον γὰρ οὗ μὴ κίνησις μηδὲ τὸ ἄνω ἢ κάτω ἐστί, τόπον εἶναι. ὥστε ζητητέος ἐν τοῖς τοιούτοις ὁ τόπος.

εἰ δ' ἐν αὐτῷ ὁ τόπος (δεῖ γάρ, εἴπερ ἢ μορφὴ ἢ ὕλη), ἔσται ὁ τόπος ἐν τόπῳ· μεταβάλλει γὰρ ἅμα τῷ πράγματι καὶ κινεῖται καὶ τὸ εἶδος καὶ τὸ ἀόριστον, οὐκ ἀεὶ ἐν τῷ αὐτῷ ἀλλ' οὗπερ καὶ τὸ πρᾶγμα· ὥστε τοῦ τόπου ἔσται τόπος.

ἔτι ὅταν ἐξ ἀέρος ὕδωρ γένηται, ἀπόλωλεν ὁ τόπος· οὐ γὰρ ἐν τῷ αὐτῷ τόπῳ τὸ γενόμενον σῶμα· τίς οὖν ἡ φθορά; ἐξ ὧν μὲν τοίνυν ἀναγκαῖον εἶναί τι τὸν τόπον, καὶ πάλιν ἐξ ὧν ἀπορήσειεν ἄν τις αὐτοῦ περὶ τῆς οὐσίας, εἴρηται.

Κεφάλαιο 3

Μετὰ δὲ ταῦτα ληπτέον ποσαχῶς ἄλλο ἐν ἄλλῳ λέγεται.

ἕνα μὲν δὴ τρόπον ὡς ὁ δάκτυλος ἐν τῇ χειρὶ καὶ ὅλως τὸ μέρος ἐν τῷ ὅλῳ.

ἄλλον δὲ ὡς τὸ ὅλον ἐν τοῖς μέρεσιν· οὐ γάρ ἐστι παρὰ τὰ μέρη τὸ ὅλον.

ἄλλον δὲ τρόπον ὡς ὁ ἄνθρωπος ἐν ζῴῳ καὶ ὅλως εἶδος ἐν γένει.

ἄλλον δὲ ὡς τὸ γένος ἐν τῷ εἴδει καὶ ὅλως τὸ μέρος τοῦ εἴδους ἐν τῷ λόγῳ.

ἔτι ὡς ἡ ὑγίεια ἐν θερμοῖς καὶ ψυχροῖς καὶ ὅλως τὸ εἶδος ἐν τῇ ὕλῃ.

ἔτι ὡς ἐν βασιλεῖ τὰ τῶν Ἑλλήνων καὶ ὅλως ἐν τῷ πρώτῳ κινητικῷ.

ἔτι ὡς ἐν τῷ ἀγαθῷ καὶ ὅλως ἐν τῷ τέλει· τοῦτο δ’ ἐστὶ τὸ οὗ ἕνεκα.

πάντων δὲ κυριώτατον τὸ ὡς ἐν ἀγγείῳ καὶ ὅλως ἐν τόπῳ.

ἀπορήσειε δ’ ἄν τις, ἆρα καὶ αὐτό τι ἐν ἑαυτῷ ἐνδέχεται εἶναι, ἢ οὐδέν, ἀλλὰ πᾶν ἢ οὐδαμοῦ ἢ ἐν ἄλλῳ. διχῶς δὲ τοῦτ’ ἔστιν, ἤτοι καθ’ αὑτὸ ἢ καθ’ ἕτερον.

ὅταν μὲν γὰρ ᾖ μόρια τοῦ ὅλου τὸ ἐν ᾧ καὶ τὸ ἐν τούτῳ, λεχθήσεται τὸ ὅλον ἐν αὑτῷ· λέγεται γὰρ καὶ κατὰ τὰ μέρη, οἷον λευκὸς ὅτι ἡ ἐπιφάνεια λευκή, καὶ ἐπιστήμων ὅτι τὸ λογιστικόν. ὁ μὲν οὖν ἀμφορεὺς οὐκ ἔσται ἐν αὑτῷ, οὐδ’ ὁ οἶνος· ὁ δὲ τοῦ οἴνου ἀμφορεὺς ἔσται· ὅ τε γὰρ καὶ ἐν ᾧ, ἀμφότερα τοῦ αὐτοῦ μόρια.

οὕτω μὲν οὖν ἐνδέχεται αὐτό τι ἐν αὑτῷ εἶναι, πρώτως δ’ οὐκ ἐνδέχεται.

οἷον τὸ λευκὸν ἐν σώματι (ἡ [210b] ἐπιφάνεια γὰρ ἐν σώματι), ἡ δ’ ἐπιστήμη ἐν ψυχῇ· κατὰ ταῦτα δὲ αἱ προσηγορίαι μέρη ὄντα, ὥς γε ἐν ἀνθρώπῳ (ὁ δὲ ἀμφορεὺς καὶ ὁ οἶνος χωρὶς μὲν ὄντα οὐ μέρη, ἅμα δέ· διὸ ὅταν ᾖ μέρη, ἔσται αὐτὸ ἐν αὑτῷ)· οἷον τὸ λευκὸν ἐν ἀνθρώπῳ ὅτι ἐν σώματι, καὶ ἐν τούτῳ ὅτι ἐν ἐπιφανείᾳ· ἐν δὲ ταύτῃ οὐκέτι κατ’ ἄλλο. καὶ ἕτερά γε τῷ εἴδει ταῦτα, καὶ ἄλλην φύσιν ἔχει ἑκάτερον καὶ δύναμιν, ἥ τ’ ἐπιφάνεια καὶ τὸ λευκόν.

οὔτε δὴ ἐπακτικῶς σκοποῦσιν οὐδὲν ὁρῶμεν ἐν ἑαυτῷ κατ’ οὐδένα τῶν διορισμῶν, τῷ τε λόγῳ δῆλον ὅτι ἀδύνατον· δεήσει γὰρ ἀμφότερα ἑκάτερον ὑπάρ χειν, οἷον τὸν ἀμφορέα ἀγγεῖόν τε καὶ οἶνον εἶναι καὶ τὸν οἶνον οἶνόν τε καὶ ἀμφορέα, εἴπερ ἐνδέχεται αὐτό τι ἐν αὑτῷ εἶναι. ὥστ’ εἰ ὅτι μάλιστα ἐν ἀλλήλοις εἶεν, ὁ μὲν ἀμφορεὺς δέξεται τὸν οἶνον οὐχ ᾗ αὐτὸς οἶνος ἀλλ’ ᾗ ἐκεῖνος, ὁ δ’ οἶνος ἐνέσται ἐν τῷ ἀμφορεῖ οὐχ ᾗ αὐτὸς ἀμφορεὺς ἀλλ’ ᾗ ἐκεῖνος. κατὰ μὲν οὖν τὸ εἶναι ὅτι ἕτερον, δῆλον· ἄλλος γὰρ ὁ λόγος τοῦ ἐν ᾧ καὶ τοῦ ἐν τούτῳ. ἀλλὰ μὴν οὐδὲ κατὰ συμβεβηκὸς ἐνδέχεται· ἅμα γὰρ δύο ἐν ταὐτῷ ἔσται· αὐτός τε γὰρ ἐν αὐτῷ ὁ ἀμφορεὺς ἔσται, εἰ οὗ ἡ φύσις δεκτική, τοῦτ᾽ ἐνδέχεται ἐν αὑτῷ εἶναι, καὶ ἔτι ἐκεῖνο οὗ δεκτικόν, οἷον, εἰ οἴνου, ὁ οἶνος. ὅτι μὲν οὖν ἀδύνατον ἐν αὑτῷ τι εἶναι πρώτως, δῆλον· ὃ δὲ Ζήνων ἠπόρει, ὅτι εἰ ὁ τόπος ἐστί τι, ἔν τινι ἔσται, λύειν οὐ χαλεπόν· οὐδὲ γὰρ κωλύει ἐν ἄλλῳ εἶναι τὸν πρῶτον τόπον, μὴ μέντοι ὡς ἐν τόπῳ ἐκείνῳ, ἀλλ᾽ ὥσπερ ἡ μὲν ὑγίεια ἐν τοῖς θερμοῖς ὡς ἕξις, τὸ δὲ θερμὸν ἐν σώματι ὡς πάθος. ὥστε οὐκ ἀνάγκη εἰς ἄπειρον ἰέναι.

ἐκεῖνο δὲ φανερόν, ὅτι ἐπεὶ οὐδὲν τὸ ἀγγεῖον τοῦ ἐν αὑτῷ (ἕτερον γὰρ τὸ πρώτως ὅ τε καὶ ἐν ᾧ), οὐκ ἂν εἴη οὔτε ἡ ὕλη οὔτε τὸ εἶδος ὁ τόπος, ἀλλ᾽ ἕτερον. ἐκείνου γάρ τι ταῦτα τοῦ ἐνόντος, καὶ ἡ ὕλη καὶ ἡ μορφή. ταῦτα μὲν οὖν ἔστω διηπορημένα.

Κεφάλαιο 4

Τί δέ ποτ᾽ ἐστὶν ὁ τόπος, ὧδ᾽ ἂν γένοιτο φανερόν.
λάβωμεν δὲ περὶ αὐτοῦ ὅσα δοκεῖ ἀληθῶς καθ᾽ αὑτὸ ὑπάρχειν αὐτῷ.
ἀξιοῦμεν δὴ τὸν τόπον εἶναι

1. πρῶτον μὲν [211a] περιέχον ἐκεῖνο οὗ τόπος ἐστί,

2. καὶ μηδὲν τοῦ πράγματος, ἔτι τὸν πρῶτον μήτ᾽ ἐλάττω μήτε μείζω,
3. ἔτι ἀπολείπεσθαι ἑκάστου καὶ χωριστὸν εἶναι,
4. πρὸς δὲ τούτοις πάντα τόπον ἔχειν τὸ ἄνω καὶ κάτω, καὶ φέρεσθαι φύσει καὶ μένειν ἐν τοῖς οἰκείοις τόποις ἕκαστον τῶν σωμάτων, τοῦτο δὲ ποιεῖν ἢ ἄνω ἢ κάτω.

ὑποκειμένων δὲ τούτων τὰ λοιπὰ θεωρητέον. δεῖ δὲ πειρᾶσθαι τὴν σκέψιν οὕτω ποιεῖσθαι ὅπως τὸ τί ἐστιν ἀποδοθήσεται, ὥστε τά τε ἀπορούμενα λύεσθαι, καὶ τὰ δοκοῦντα ὑπάρχειν τῷ τόπῳ ὑπάρχοντα ἔσται, καὶ ἔτι τὸ τῆς δυσκολίας αἴτιον καὶ τῶν περὶ αὐτὸν ἀπορημά των ἔσται φανερόν· οὕτω γὰρ ἂν κάλλιστα δεικνύοιτο ἕκαστον. πρῶτον μὲν οὖν δεῖ κατανοῆσαι ὅτι οὐκ ἂν ἐζητεῖτο ὁ τόπος, εἰ μὴ κίνησις ἦν ἡ κατὰ τόπον· διὰ γὰρ τοῦτο καὶ τὸν οὐρανὸν μάλιστ᾽ οἰόμεθα ἐν τόπῳ, ὅτι ἀεὶ ἐν κινήσει. ταύτης δὲ τὸ μὲν φορά, τὸ δὲ αὔξησις καὶ φθίσις· καὶ γὰρ ἐν τῇ αὐξήσει καὶ φθίσει μεταβάλλει, καὶ ὃ πρότερον ἦν ἐνταῦθα, πάλιν μεθέστηκεν εἰς ἔλαττον ἢ μεῖζον.

ἔστι δὲ κινούμενον τὸ μὲν καθ᾽ αὑτὸ ἐνεργείᾳ, τὸ δὲ κατὰ συμβεβηκός· κατὰ συμβεβηκὸς δὲ τὸ μὲν ἐνδεχόμενον κινεῖσθαι καθ᾽ αὑτό, οἷον τὰ μόρια τοῦ σώματος καὶ ὁ ἐν τῷ πλοίῳ ἧλος, τὰ δ᾽ οὐκ ἐνδεχόμενα ἀλλ᾽ αἰεὶ κατὰ συμβεβηκός, οἷον ἡ λευκότης καὶ ἡ ἐπιστήμη· ταῦτα γὰρ οὕτω μεταβέβληκε τὸν τόπον, ὅτι ἐν ᾧ ὑπάρχουσι μεταβάλλει.

ἐπεὶ δὲ λέγομεν εἶναι ὡς ἐν τόπῳ ἐν τῷ οὐρανῷ, διότι ἐν τῷ ἀέρι οὗτος δὲ ἐν τῷ οὐρανῷ· καὶ ἐν τῷ ἀέρι δὲ οὐκ ἐν παντί, ἀλλὰ διὰ τὸ ἔσχατον αὐτοῦ καὶ περιέχον ἐν τῷ ἀέρι φαμὲν εἶναι (εἰ γὰρ πᾶς ὁ ἀὴρ τόπος, οὐκ ἂν ἴσος εἴη ἑκάστου ὁ τόπος καὶ ἕκαστον, δοκεῖ δέ γε ἴσος εἶναι, τοιοῦτος δ᾽ ὁ πρῶτος ἐν ᾧ ἐστιν)·

ὅταν μὲν οὖν μὴ διῃρημένον ᾖ τὸ περιέχον ἀλλὰ συνεχές, οὐχ ὡς ἐν τόπῳ λέγεται εἶναι ἐν ἐκείνῳ, ἀλλ᾽ ὡς μέρος ἐν ὅλῳ· ὅταν δὲ διῃρημένον ᾖ καὶ ἁπτόμενον, ἐν πρώτῳ ἐστὶ τῷ ἐσχάτῳ τοῦ περιέχοντος, ὃ οὔτε ἐστὶ μέρος τοῦ ἐν αὐτῷ οὔτε μεῖζον τοῦ διαστήματος ἀλλ’ ἴσον· ἐν γὰρ τῷ αὐτῷ τὰ ἔσχατα τῶν ἁπτομένων.

καὶ συνεχὲς μὲν ὂν οὐκ ἐν ἐκείνῳ κινεῖται ἀλλὰ μετ’ ἐκείνου, διῃρημένον δὲ ἐν ἐκείνῳ· καὶ ἐάν τε κινῆται τὸ περιέχον ἐάν τε μή, [211b] οὐδὲν ἧττον.

[ἔτι ὅταν μὴ διῃρημένον ᾖ, ὡς μέρος ἐν ὅλῳ λέγεται, οἷον ἐν τῷ ὀφθαλμῷ ἡ ὄψις ἢ ἐν τῷ σώματι ἡ χείρ, ὅταν δὲ διῃρημένον, οἷον ἐν τῷ κάδῳ τὸ ὕδωρ ἢ ἐν τῷ κεραμίῳ ὁ οἶνος· ἡ μὲν γὰρ χεὶρ μετὰ τοῦ σώματος κινεῖται, τὸ δὲ ὕδωρ ἐν τῷ κάδῳ.]

ἤδη τοίνυν φανερὸν ἐκ τούτων τί ἐστιν ὁ τόπος. σχεδὸν γὰρ τέτταρά ἐστιν ὧν ἀνάγκη τὸν τόπον ἕν τι εἶναι· ἢ γὰρ μορφὴ ἢ ὕλη ἢ διάστημά τι τὸ μεταξὺ τῶν ἐσχάτων, ἢ τὰ ἔσχατα εἰ μὴ ἔστι μηδὲν διάστημα παρὰ τὸ τοῦ ἐγγιγνομένου σώματος μέγεθος.

τούτων δ’ ὅτι οὐκ ἐνδέχεται τὰ τρία εἶναι, φανερόν· ἀλλὰ διὰ μὲν τὸ περιέχειν δοκεῖ ἡ μορφὴ εἶναι· ἐν ταὐτῷ γὰρ τὰ ἔσχατα τοῦ περιέχοντος καὶ τοῦ περιεχομένου. ἔστι μὲν οὖν ἄμφω πέρατα, ἀλλ’ οὐ τοῦ αὐτοῦ, ἀλλὰ τὸ μὲν εἶδος τοῦ πράγματος, ὁ δὲ τόπος τοῦ περιέχοντος σώματος.

διὰ δὲ τὸ μεταβάλλειν πολλάκις μένοντος τοῦ περιέχοντος τὸ περιεχόμενον καὶ διῃρημένον, οἷον ἐξ ἀγγείου ὕδωρ, τὸ μεταξὺ εἶναί τι δοκεῖ διάστημα, ὡς ὄν τι παρὰ τὸ σῶμα τὸ μεθιστάμενον. τὸ δ’ οὐκ ἔστιν, ἀλλὰ τὸ τυχὸν ἐμπίπτει σῶμα τῶν μεθισταμένων καὶ ἅπτεσθαι πεφυκότων.

εἰ δ’ ἦν τι [τὸ] διάστημα <καθ’ αὑ>τὸ πεφυκὸς <εἶναι> καὶ μένον, ἐν τῷ αὐτῷ ἄπειροι ἂν ἦσαν τόποι (μεθισταμένου γὰρ τοῦ ὕδατος καὶ τοῦ ἀέρος ταὐτὸ ποιήσει τὰ μόρια πάντα ἐν τῷ ὅλῳ ὅπερ ἅπαν τὸ ὕδωρ ἐν τῷ ἀγγείῳ)· ἅμα δὲ καὶ ὁ τόπος ἔσται μεταβάλλων· ὥστ’ ἔσται τοῦ τόπου τ’ ἄλλος τόπος, καὶ πολλοὶ τόποι ἅμα ἔσονται. οὐκ ἔστι δὲ ἄλλος ὁ τόπος τοῦ μορίου, ἐν ᾧ κινεῖται, ὅταν ὅλον τὸ ἀγγεῖον μεθίστηται, ἀλλ’ ὁ αὐτός· ἐν ᾧ γὰρ ἔστιν, ἀντιμεθίσταται ὁ ἀὴρ καὶ τὸ ὕδωρ ἢ τὰ μόρια τοῦ ὕδατος, ἀλλ’ οὐκ ἐν ᾧ γίγνονται τόπῳ, ὃς μέρος ἐστὶ τοῦ τόπου ὅς ἐστι τόπος ὅλου τοῦ οὐρανοῦ.

καὶ ἡ ὕλη δὲ δόξειεν ἂν εἶναι τόπος, εἴ γε ἐν ἠρεμοῦντί τις σκοποίη καὶ μὴ κεχωρισμένῳ ἀλλὰ συνεχεῖ. ὥσπερ γὰρ εἰ ἀλλοιοῦται, ἔστι τι ὃ νῦν μὲν λευκὸν πάλαι δὲ μέλαν, καὶ νῦν μὲν σκληρὸν πάλαι δὲ μαλακόν (διό φαμεν εἶναί τι τὴν ὕλην), οὕτω καὶ ὁ τόπος διὰ τοιαύτης τινὸς εἶναι δοκεῖ φαντασίας, πλὴν ἐκεῖνο μὲν διότι ὃ ἦν ἀήρ, τοῦτο νῦν ὕδωρ, ὁ δὲ τόπος ὅτι οὗ ἦν ἀήρ, ἐνταῦθ’ ἔστι νῦν ὕδωρ. ἀλλ’ ἡ μὲν ὕλη, [212a] ὥσπερ ἐλέχθη ἐν τοῖς πρότερον, οὔτε χωριστὴ τοῦ πράγματος οὔτε περιέχει, ὁ δὲ τόπος ἄμφω.

εἰ τοίνυν μηδὲν τῶν τριῶν ὁ τόπος ἐστίν, μήτε τὸ εἶδος μήτε ἡ ὕλη μήτε διάστημά τι ἀεὶ ὑπάρχον ἕτερον παρὰ τὸ τοῦ πράγματος τοῦ μεθισταμένου, ἀνάγκη τὸν τόπον εἶναι τὸ λοιπὸν τῶν τεττά ρων, τὸ πέρας τοῦ περιέχοντος σώματος <καθ’ ὃ συνάπτει τῷ περιεχομένῳ>. λέγω δὲ τὸ περιεχόμενον σῶμα τὸ κινητὸν κατὰ φοράν.

δοκεῖ δὲ μέγα τι εἶναι καὶ χαλεπὸν ληφθῆναι ὁ τόπος διά τε τὸ παρεμφαίνεσθαι τὴν ὕλην καὶ τὴν μορφήν, καὶ διὰ τὸ ἐν ἠρεμοῦντι τῷ περιέχοντι γίγνεσθαι τὴν μετάστασιν τοῦ φερομένου· ἐνδέχεσθαι γὰρ φαίνεται εἶναι διάστημα μεταξὺ ἄλλο τι τῶν κινουμένων μεγεθῶν. συμβάλλεται δέ τι καὶ ὁ ἀὴρ δοκῶν ἀσώματος εἶναι· φαίνεται γὰρ οὐ μόνον τὰ πέρατα τοῦ ἀγγείου εἶναι ὁ τόπος, ἀλλὰ καὶ τὸ μεταξὺ ὡς κενὸν <ὄν>. ἔστι δ’ ὥσπερ τὸ ἀγγεῖον τόπος μεταφορητός, οὕτως καὶ ὁ τόπος ἀγγεῖον ἀμετακί νητον. διὸ ὅταν μὲν ἐν κινουμένῳ κινῆται καὶ μεταβάλλῃ τὸ ἐντός, οἷον ἐν ποταμῷ πλοῖον, ὡς ἀγγείῳ χρῆται μᾶλλον ἢ τόπῳ τῷ περιέχοντι. βούλεται δ’ ἀκίνητος εἶναι ὁ τόπος· διὸ ὁ πᾶς μᾶλλον ποταμὸς τόπος, ὅτι ἀκίνητος ὁ πᾶς.

ὥστε τὸ τοῦ περιέχοντος πέρας ἀκίνητον πρῶτον, τοῦτ’ ἔστιν ὁ τόπος.

καὶ διὰ τοῦτο τὸ μέσον τοῦ οὐρανοῦ καὶ τὸ ἔσχατον τὸ πρὸς ἡμᾶς τῆς κύκλῳ φορᾶς δοκεῖ εἶναι τὸ μὲν ἄνω τὸ δὲ κάτω μάλιστα πᾶσι κυρίως, ὅτι τὸ μὲν αἰεὶ μένει, τοῦ δὲ κύκλῳ τὸ ἔσχατον ὡσαύτως ἔχον μένει. ὥστ’ ἐπεὶ τὸ μὲν κοῦφον τὸ ἄνω φερόμενόν ἐστι φύσει, τὸ δὲ βαρὺ τὸ κάτω, τὸ μὲν πρὸς τὸ μέσον περιέχον πέρας κάτω ἐστίν, καὶ αὐτὸ τὸ μέσον, τὸ δὲ πρὸς τὸ ἔσχατον ἄνω, καὶ αὐτὸ τὸ ἔσχατον·

καὶ διὰ τοῦτο δοκεῖ ἐπίπεδόν τι εἶναι καὶ οἷον ἀγγεῖον ὁ τόπος καὶ περιέχον.

ἔτι ἅμα τῷ πράγματι ὁ τόπος· ἅμα γὰρ τῷ πεπερασμένῳ τὰ πέρατα.

Κεφάλαιο 5

Ὧι μὲν οὖν σώματι ἔστι τι ἐκτὸς σῶμα περιέχον αὐτό, τοῦτο ἔστιν ἐν τόπῳ, ᾧ δὲ μή, οὔ. διὸ κἂν ὕδωρ γένηται τοιοῦτο, τὰ μὲν μόρια κινήσεται αὐτοῦ (περιέχεται γὰρ ὑπ’ ἀλλήλων), τὸ δὲ πᾶν ἔστι μὲν ὡς κινήσεται ἔστι δ’ ὡς οὔ. ὡς μὲν γὰρ ὅλον, ἅμα τὸν τόπον οὐ μεταβάλλει, κύκλῳ [212b] δὲ κινεῖται-τῶν μορίων γὰρ οὗτος ὁ τόπος-καὶ ἄνω μὲν καὶ κάτω οὔ, κύκλῳ δ’ ἔνια· τὰ δὲ καὶ ἄνω καὶ κάτω, ὅσα ἔχει πύκνωσιν καὶ μάνωσιν.

ὥσπερ δ’ ἐλέχθη, τὰ μέν ἐστιν ἐν τόπῳ κατὰ δύναμιν, τὰ δὲ κατ’ ἐνέργειαν. διὸ ὅταν μὲν συνεχὲς ᾖ τὸ ὁμοιομερές, κατὰ δύναμιν ἐν τόπῳ τὰ μέρη, ὅταν δὲ χωρισθῇ μὲν ἅπτηται δ’ ὥσπερ σωρός, κατ’ ἐνέργειαν. καὶ τὰ μὲν καθ’ αὑτά (οἷον πᾶν σῶμα ἢ κατὰ φορὰν ἢ κατ’ αὔξησιν κινητὸν καθ’ αὑτό που, ὁ δ’ οὐρανός, ὥσπερ εἴρηται, οὔ που ὅλος οὐδ’ ἔν τινι τόπῳ ἐστίν, εἴ γε μηδὲν αὐτὸν περιέχει σῶμα· ἐφ’ ᾧ δὲ κινεῖται, ταύτῃ καὶ τόπος ἔστι τοῖς μορίοις· ἕτερον γὰρ ἑτέρου ἐχόμενον τῶν μορίων ἐστίν)·

τὰ δὲ κατὰ συμβεβηκός, οἷον ἡ ψυχὴ καὶ ὁ οὐρανός· τὰ γὰρ μόρια ἐν τόπῳ πως πάντα· ἐπὶ τῷ κύκλῳ γὰρ περιέχει ἄλλο ἄλλο. διὸ κινεῖται μὲν κύκλῳ τὸ ἄνω, τὸ δὲ πᾶν οὔ που. τὸ γάρ που αὐτό τέ ἐστί τι, καὶ ἔτι ἄλλο τι δεῖ εἶναι παρὰ τοῦτο ἐν ᾧ, ὃ περιέχει· παρὰ δὲ τὸ πᾶν καὶ ὅλον οὐδέν ἐστιν ἔξω τοῦ παντός, καὶ διὰ τοῦτο ἐν τῷ οὐρανῷ πάντα· ὁ γὰρ οὐρανὸς τὸ πᾶν ἴσως. ἔστι δ’ ὁ τόπος οὐχ ὁ οὐρανός, ἀλλὰ τοῦ οὐρανοῦ τι τὸ ἔσχατον καὶ ἁπτόμενον τοῦ κινητοῦ σώματος [πέρας ἠρεμοῦν]. καὶ διὰ τοῦτο ἡ μὲν γῆ ἐν τῷ ὕδατι, τοῦτο δ’ ἐν τῷ ἀέρι, οὗτος δ’ ἐν τῷ αἰθέρι, ὁ δ’ αἰθὴρ ἐν τῷ οὐρανῷ, ὁ δ’ οὐρανὸς οὐκέτι ἐν ἄλλῳ.

φανερὸν δ’ ἐκ τούτων ὅτι καὶ αἱ ἀπορίαι πᾶσαι λύοιντ’ ἂν οὕτω λεγομένου τοῦ τόπου.

1. οὔτε γὰρ συναύξεσθαι ἀνάγκη τὸν τόπον,

2. οὔτε στιγμῆς εἶναι τόπον, οὔτε δύο σώματα ἐν τῷ αὐτῷ τόπῳ,
3. οὔτε διάστημά τι εἶναι σωματικόν (σῶμα γὰρ τὸ μεταξὺ τοῦ τόπου τὸ τυχόν, ἀλλ’ οὐ διάστημα σώματος).
4. καὶ ἔστιν ὁ τόπος καὶ πού, οὐχ ὡς ἐν τόπῳ δέ, ἀλλ’ ὡς τὸ πέρας ἐν τῷ πεπερασμένῳ. οὐ γὰρ πᾶν τὸ ὂν ἐν τόπῳ, ἀλλὰ τὸ κινητὸν σῶμα.
5. καὶ φέρεται δὴ εἰς τὸν αὑτοῦ τόπον ἕκαστον εὐλόγως (ὃ γὰρ ἐφεξῆς καὶ ἁπτόμενον μὴ βίᾳ, συγγενές· καὶ συμπεφυκότα μὲν ἀπαθῆ, ἁπτόμενα δὲ

παθητικὰ καὶ ποιητικὰ ἀλλήλων)· καὶ μένει δὴ φύσει πᾶν ἐν τῷ οἰκείῳ τόπῳ οὐκ ἀλόγως· καὶ γὰρ τὸ μέρος, τὸ δὲ ἐν [τῷ] τόπῳ ὡς διαιρετὸν μέρος πρὸς ὅλον ἐστίν, οἷον ὅταν ὕδατος κινήσῃ τις [213a] μόριον ἢ ἀέρος. οὕτω δὲ καὶ ἀὴρ ἔχει πρὸς ὕδωρ· οἷον ὕλη γάρ, τὸ δὲ εἶδος, τὸ μὲν ὕδωρ ὕλη ἀέρος, ὁ δ’ ἀὴρ οἷον ἐνέργειά τις ἐκείνου· τὸ γὰρ ὕδωρ δυνάμει ἀήρ ἐστιν, ὁ δ’ ἀὴρ δυνάμει ὕδωρ ἄλλον τρόπον.

διοριστέον δὲ περὶ τούτων ὕστερον· ἀλλὰ διὰ τὸν καιρὸν ἀνάγκη μὲν εἰπεῖν, ἀσαφῶς δὲ νῦν ῥηθὲν τότ’ ἔσται σαφέστερον. εἰ οὖν τὸ αὐτὸ [ἡ] ὕλη καὶ ἐντελέχεια (ὕδωρ γὰρ ἄμφω, ἀλλὰ τὸ μὲν δυνάμει τὸ δ’ ἐντελεχείᾳ), ἔχοι ἂν ὡς μόριόν πως πρὸς ὅλον. διὸ καὶ τούτοις ἁφὴ ἔστιν· σύμφυσις δέ, ὅταν ἄμφω ἐνεργείᾳ ἓν γένωνται. καὶ περὶ μὲν τόπου, καὶ ὅτι ἔστι καὶ τί ἐστιν, εἴρηται.

Κεφάλαιο 6

Τὸν αὐτὸν δὲ τρόπον ὑποληπτέον εἶναι τοῦ φυσικοῦ θεωρῆσαι καὶ περὶ κενοῦ, εἰ ἔστιν ἢ μή, καὶ πῶς ἔστι, καὶ τί ἐστιν, ὥσπερ καὶ περὶ τόπου· καὶ γὰρ παραπλησίαν ἔχει τήν τε ἀπιστίαν καὶ τὴν πίστιν διὰ τῶν ὑπολαμβανομένων· οἷον γὰρ τόπον τινὰ καὶ ἀγγεῖον τὸ κενὸν τιθέασιν οἱ λέγοντες, δοκεῖ δὲ πλῆρες μὲν εἶναι, ὅταν ἔχῃ τὸν ὄγκον οὗ δεκτικόν ἐστιν, ὅταν δὲ στερηθῇ, κενόν, ὡς τὸ αὐτὸ μὲν ὂν κενὸν καὶ πλῆρες καὶ τόπον, τὸ δ’ εἶναι αὐτοῖς οὐ ταὐτὸ ὄν.

ἄρξασθαι δὲ δεῖ τῆς σκέψεως λαβοῦσιν ἅ τε λέγουσιν οἱ φάσκοντες εἶναι καὶ πάλιν ἃ λέγουσιν οἱ μὴ φάσκοντες, καὶ τρίτον τὰς κοινὰς περὶ αὐτῶν δόξας.

οἱ μὲν οὖν δεικνύναι πειρώμενοι ὅτι οὐκ ἔστιν, οὐχ ὃ βούλονται λέγειν οἱ ἄνθρωποι κενόν, τοῦτ’ ἐξελέγχουσιν, ἀλλ’ <ὃ> ἁμαρτάνοντες λέγουσιν. ὥσπερ Ἀναξαγόρας καὶ οἱ τοῦτον τὸν τρόπον ἐλέγχοντες. ἐπιδεικνύουσι γὰρ ὅτι ἐστίν τι ὁ ἀήρ, στρεβλοῦντες τοὺς ἀσκοὺς καὶ δεικνύντες ὡς ἰσχυρὸς ὁ ἀήρ, καὶ ἐναπολαμβάνοντες ἐν ταῖς κλεψύδραις. οἱ δὲ ἄνθρωποι βούλονται κενὸν εἶναι διάστημα ἐν ᾧ μηδέν ἐστι σῶμα αἰσθητόν· οἰόμενοι δὲ τὸ ὂν ἅπαν εἶναι σῶμα φασίν, ἐν ᾧ ὅλως μηδέν ἐστι, τοῦτ’ εἶναι κενόν, διὸ τὸ πλῆρες ἀέρος κενὸν εἶναι. οὔκουν τοῦτο δεῖ δεικνύναι, ὅτι ἐστί τι ὁ ἀήρ, ἀλλ’ ὅτι οὐκ ἔστι διάστημα ἕτερον τῶν σωμάτων, οὔτε χωριστὸν οὔτε ἐνεργείᾳ ὄν, ὃ διαλαμβάνει τὸ πᾶν σῶμα ὥστε εἶναι μὴ συνεχές, καθάπερ λέγουσιν Δημόκριτος καὶ Λεύκιππος καὶ [213b] ἕτεροι πολλοὶ τῶν φυσιολόγων, ἢ καὶ εἴ τι ἔξω τοῦ παντὸς σώματός ἐστιν ὄντος συνεχοῦς.

οὗτοι μὲν οὖν οὐ κατὰ θύρας πρὸς τὸ πρόβλημα ἀπαντῶσιν, ἀλλ’ οἱ φάσκοντες εἶναι μᾶλλον.

λέγουσιν δ’ ἓν μὲν ὅτι κίνησις ἡ κατὰ τόπον οὐκ ἂν εἴη (αὕτη δ’ ἐστὶ φορὰ καὶ αὔξησις)· οὐ γὰρ ἂν δοκεῖν εἶναι κίνησιν, εἰ μὴ εἴη κενόν· τὸ γὰρ πλῆρες ἀδύνατον εἶναι δέξασθαί τι. εἰ δὲ δέξεται καὶ ἔσται δύο ἐν ταὐτῷ, ἐνδέχοιτ’ ἂν καὶ ὁποσαοῦν εἶναι ἅμα σώματα· τὴν γὰρ διαφοράν, δι’ ἣν οὐκ ἂν εἴη τὸ λεχθέν, οὐκ ἔστιν εἰπεῖν. εἰ δὲ τοῦτο ἐνδέχεται, καὶ τὸ μικρότατον δέξεται τὸ μέγιστον· πολλὰ γὰρ μικρὰ τὸ μέγα ἐστίν· ὥστε εἰ πολλὰ ἴσα ἐνδέχεται ἐν ταὐτῷ εἶναι, καὶ πολλὰ ἄνισα.

Μέλισσος μὲν οὖν καὶ δείκνυσιν ὅτι τὸ πᾶν ἀκίνητον ἐκ τούτων· εἰ γὰρ κινήσεται, ἀνάγκη εἶναι (φησί) κενόν, τὸ δὲ κενὸν οὐ τῶν ὄντων.

ἕνα μὲν οὖν τρόπον ἐκ τούτων δεικνύουσιν ὅτι ἔστιν τι κενόν, ἄλλον δ’ ὅτι φαίνεται ἔνια συνιόντα καὶ πιλούμενα, οἷον καὶ τὸν οἶνόν φασι δέχεσθαι μετὰ τῶν ἀσκῶν τοὺς πίθους, ὡς εἰς τὰ ἐνόντα κενὰ συνιόντος τοῦ πυκνουμένου σώματος.

ἔτι δὲ καὶ ἡ αὔξησις δοκεῖ πᾶσι γίγνεσθαι διὰ κενοῦ· τὴν μὲν γὰρ τροφὴν σῶμα εἶναι, δύο δὲ σώματα ἀδύνατον ἅμα εἶναι. μαρτύριον δὲ καὶ τὸ περὶ τῆς τέφρας ποιοῦνται, ἣ δέχεται ἴσον ὕδωρ ὅσον τὸ ἀγγεῖον τὸ κενόν. εἶναι δ’ ἔφασαν καὶ οἱ Πυθαγόρειοι κενόν, καὶ ἐπεισιέναι αὐτὸ τῷ οὐρανῷ ἐκ τοῦ ἀπείρου πνεύματος ὡς ἀναπνέοντι καὶ τὸ κενόν, ὃ διορίζει τὰς φύσεις, ὡς ὄντος τοῦ κενοῦ χωρισμοῦ τινὸς τῶν ἐφεξῆς καὶ [τῆς] διορίσεως· καὶ τοῦτ’ εἶναι πρῶτον ἐν τοῖς ἀριθμοῖς· τὸ γὰρ κενὸν διορίζειν τὴν φύσιν αὐτῶν.

ἐξ ὧν μὲν οὖν οἱ μέν φασιν εἶναι οἱ δ’ οὔ φασι, σχεδὸν τοιαῦτα καὶ τοσαῦτά ἐστιν.

Κεφάλαιο 7

Πρὸς δὲ τὸ ποτέρως ἔχει δεῖ λαβεῖν τί σημαίνει τοὔνομα.

δοκεῖ δὴ τὸ κενὸν τόπος εἶναι ἐν ᾧ μηδέν ἐστι. τούτου δ’ αἴτιον ὅτι τὸ ὂν σῶμα οἴονται εἶναι, πᾶν δὲ σῶμα ἐν τόπῳ, κενὸν δὲ ἐν ᾧ τόπῳ μηδέν ἐστι σῶμα, ὥστ’ εἴ που μὴ ἔστι σῶμα, οὐδὲν εἶναι ἐνταῦθα.

σῶμα δὲ πάλιν ἅπαν [214a] οἴονται εἶναι ἁπτόν· τοιοῦτο δὲ ὃ ἂν ἔχῃ βάρος ἢ κουφότητα.

συμβαίνει οὖν ἐκ συλλογισμοῦ τοῦτο εἶναι κενόν, ἐν ᾧ μηδέν ἐστι βαρὺ ἢ κοῦφον.

ταῦτα μὲν οὖν, ὥσπερ εἴπομεν καὶ πρότερον, ἐκ συλλογισμοῦ συμβαίνει. ἄτοπον δὲ εἰ ἡ στιγμὴ κενόν· δεῖ γὰρ τόπον εἶναι ἐν ᾧ σώματος ἔστι διά στημα ἁπτοῦ.

ἀλλ’ οὖν φαίνεται λέγεσθαι τὸ κενὸν ἕνα μὲν τρόπον τὸ μὴ πλῆρες αἰσθητοῦ σώματος κατὰ τὴν ἁφήν· αἰσθητὸν δ’ ἐστὶ κατὰ τὴν ἁφὴν τὸ βάρος ἔχον ἢ κουφότητα (διὸ κἂν ἀπορήσειέ τις, τί ἂν φαῖεν, εἰ ἔχοι τὸ διάστημα χρῶμα ἢ ψόφον, πότερον κενὸν ἢ οὔ; ἢ δῆλον ὅτι εἰ μὲν δέχοιτο σῶμα ἁπτόν, κενόν, εἰ δὲ μή, οὔ)·

ἄλλον δὲ τρόπον, ἐν ᾧ μὴ τόδε τι μηδ’ οὐσία τις σωματική. διό φασίν τινες εἶναι τὸ κενὸν τὴν τοῦ σώματος ὕλην (οἵπερ καὶ τὸν τόπον τὸ αὐτὸ τοῦτο), λέγοντες οὐ καλῶς· ἡ μὲν γὰρ ὕλη οὐ χωριστὴ τῶν πραγμάτων, τὸ δὲ κενὸν ζητοῦσιν ὡς χωριστόν.

ἐπεὶ δὲ περὶ τόπου διώρισται, καὶ τὸ κενὸν ἀνάγκη τόπον εἶναι, εἰ ἔστιν, ἐστερημένον σώματος, τόπος δὲ καὶ πῶς ἔστι καὶ πῶς οὐκ ἔστιν εἴρηται, φανερὸν ὅτι οὕτω μὲν κενὸν οὐκ ἔστιν, οὔτε κεχωρισμένον οὔτε ἀχώριστον. τὸ γὰρ κενὸν οὐ σῶμα ἀλλὰ σώματος διάστημα βούλεται εἶναι· διὸ καὶ τὸ κενὸν δοκεῖ τι εἶναι, ὅτι καὶ ὁ τόπος, καὶ διὰ ταὐτά. ἥκει γὰρ δὴ ἡ κίνησις ἡ κατὰ τόπον καὶ τοῖς τὸν τόπον φάσκουσιν εἶναί τι παρὰ τὰ σώματα τὰ ἐμπίπτοντα καὶ τοῖς τὸ κενόν. αἴτιον δὲ κινήσεως οἴονται εἶναι τὸ κενὸν οὕτως ὡς ἐν ᾧ κινεῖται· τοῦτο δ’ ἂν εἴη οἷον τὸν τόπον φασί τινες εἶναι.

οὐδεμία δ’ ἀνάγκη, εἰ κίνησις ἔστιν, εἶναι κενόν. ὅλως μὲν οὖν πάσης κινήσεως οὐδαμῶς, δι’ ὃ καὶ Μέλισσον ἔλαθεν· ἀλλοιοῦσθαι γὰρ τὸ πλῆρες ἐνδέχεται.

ἀλλὰ δὴ οὐδὲ τὴν κατὰ τόπον κίνησιν· ἅμα γὰρ ἐνδέχεται ὑπεξιέναι ἀλλήλοις, οὐδενὸς ὄντος διαστήματος χωριστοῦ παρὰ τὰ σώματα τὰ

κινούμενα. καὶ τοῦτο δῆλον καὶ ἐν ταῖς τῶν συνεχῶν δίναις, ὥσπερ καὶ ἐν ταῖς τῶν ὑγρῶν.

ἐνδέχεται δὲ καὶ πυκνοῦσθαι μὴ εἰς τὸ κενὸν ἀλλὰ διὰ τὸ τὰ ἐνόντα [214b] ἐκπυρηνίζειν (οἷον ὕδατος συνθλιβομένου τὸν ἐνόντα ἀέρα), καὶ αὐξάνεσθαι οὐ μόνον εἰσιόντος τινὸς ἀλλὰ καὶ ἀλλοιώσει, οἷον εἰ ἐξ ὕδατος γίγνοιτο ἀήρ.

ὅλως δὲ ὅ τε περὶ τῆς αὐξήσεως λόγος καὶ τοῦ εἰς τὴν τέφραν ἐγχεομένου ὕδατος αὐτὸς αὑτὸν ἐμποδίζει. ἢ γὰρ οὐκ αὐξάνεται ὁτιοῦν, ἢ οὐ σώματι, ἢ ἐνδέχεται δύο σώματα ἐν ταὐτῷ εἶναι (ἀπορίαν οὖν κοινὴν ἀξιοῦσι λύειν, ἀλλ᾽ οὐ κενὸν δεικνύουσιν ὡς ἔστιν), ἢ πᾶν εἶναι ἀναγκαῖον τὸ σῶμα κενόν, εἰ πάντῃ αὐξάνεται καὶ αὐξάνεται διὰ κενοῦ. ὁ δ᾽ αὐτὸς λόγος καὶ ἐπὶ τῆς τέφρας.

ὅτι μὲν οὖν ἐξ ὧν δεικνύουσιν εἶναι τὸ κενὸν λύειν ῥᾴδιον, φανερόν.

Κεφάλαιο 8

Ὅτι δ’ οὐκ ἔστιν κενὸν οὕτω κεχωρισμένον, ὡς ἔνιοί φασι, λέγωμεν πάλιν. εἰ γὰρ ἔστιν ἑκάστου φορά τις τῶν ἁπλῶν σωμάτων φύσει, οἷον τῷ πυρὶ μὲν ἄνω τῇ δὲ γῇ κάτω καὶ πρὸς τὸ μέσον, δῆλον ὅτι οὐκ ἂν τὸ κενὸν αἴτιον εἴη τῆς φορᾶς. τίνος οὖν αἴτιον ἔσται τὸ κενόν; δοκεῖ γὰρ αἴτιον εἶναι κινήσεως τῆς κατὰ τόπον, ταύτης δ’ οὐκ ἔστιν.

ἔτι εἰ ἔστιν τι οἷον τόπος ἐστερημένος σώματος, ὅταν ᾖ κενόν, ποῦ οἰσθήσεται τὸ εἰστεθὲν εἰς αὐτὸ σῶμα; οὐ γὰρ δὴ εἰς ἅπαν. ὁ δ’ αὐτὸς λόγος καὶ πρὸς τοὺς τὸν τόπον οἰομένους εἶναί τι κεχωρισμένον, εἰς ὃν φέρεται· πῶς γὰρ οἰσθήσεται τὸ ἐντεθὲν ἢ μενεῖ; καὶ περὶ τοῦ ἄνω καὶ κάτω καὶ περὶ τοῦ κενοῦ ὁ αὐτὸς ἁρμόσει λόγος εἰκότως· τὸ γὰρ κενὸν τόπον ποιοῦσιν οἱ εἶναι φάσκοντες·

καὶ πῶς δὴ ἐνέσται ἢ ἐν [τῷ] τόπῳ ἢ ἐν τῷ κενῷ; οὐ γὰρ συμβαίνει, ὅταν ὅλον τεθῇ ὡς ἐν κεχωρισμένῳ τόπῳ καὶ ὑπομένοντι σῶμά τι· τὸ γὰρ μέρος, ἂν μὴ χωρὶς τιθῆται, οὐκ ἔσται ἐν τόπῳ ἀλλ’ ἐν τῷ ὅλῳ. ἔτι εἰ μὴ τόπος, οὐδὲ κενὸν ἔσται.

συμβαίνει δὲ τοῖς λέγουσιν εἶναι κενὸν ὡς ἀναγκαῖον, εἴπερ ἔσται κίνησις, τοὐναντίον μᾶλλον, ἄν τις ἐπισκοπῇ, μὴ ἐνδέχεσθαι μηδὲ ἓν κινεῖσθαι, ἐὰν ᾖ κενόν· ὥσπερ γὰρ οἱ διὰ τὸ ὅμοιον φάμενοι τὴν γῆν ἠρεμεῖν, οὕτω καὶ ἐν τῷ κενῷ ἀνάγκη ἠρεμεῖν· οὐ γὰρ ἔστιν οὗ μᾶλλον ἢ ἧττον κινηθήσεται· ᾗ γὰρ κενόν, οὐκ [215a] ἔχει διαφοράν.

ἔπειθ’ ὅτι πᾶσα κίνησις ἢ βίᾳ ἢ κατὰ φύσιν. ἀνάγκη δὲ ἄν περ ᾖ <ἡ> βίαιος, εἶναι καὶ τὴν κατὰ φύσιν (ἡ μὲν γὰρ βίαιος παρὰ φύσιν, ἡ δὲ παρὰ φύσιν ὑστέρα τῆς κατὰ φύσιν)· ὥστ’ εἰ μὴ κατὰ φύσιν ἔστιν ἑκάστῳ τῶν φυσικῶν σωμάτων κίνησις, οὐδὲ τῶν ἄλλων ἔσται κινήσεων οὐδεμία. ἀλλὰ μὴν φύσει γε πῶς ἔσται μηδεμιᾶς οὔσης διαφορᾶς κατὰ τὸ κενὸν καὶ τὸ ἄπειρον; ᾗ μὲν γὰρ ἄπειρον, οὐδὲν ἔσται ἄνω οὐδὲ κάτω οὐδὲ μέσον, ᾗ δὲ κενόν, οὐδὲν διάφορον τὸ ἄνω τοῦ κάτω (ὥσπερ γὰρ τοῦ μηδενὸς οὐδεμία ἔστι διαφορά, οὕτω καὶ τοῦ κενοῦ· τὸ γὰρ κενὸν μὴ ὄν τι καὶ στέρησις δοκεῖ εἶναι). ἡ δὲ φύσει φορὰ διάφορος, ὥστε ἔσται φύσει διάφορα. ἢ οὖν οὐκ ἔστι φύσει οὐδαμοῦ οὐδενὶ φορά, ἢ εἰ τοῦτ’ ἔστιν, οὐκ ἔστι κενόν.

ἔτι νῦν μὲν κινεῖται τὰ ῥιπτούμενα τοῦ ὤσαντος οὐχ ἁπτομένου, ἢ δι’ ἀντιπερίστασιν, ὥσπερ ἔνιοί φασιν, ἢ διὰ τὸ ὠθεῖν τὸν ὠσθέντα ἀέρα θάττω κίνησιν τῆς τοῦ ὠσθέντος φορᾶς ἣν φέρεται εἰς τὸν οἰκεῖον τόπον· ἐν δὲ τῷ κενῷ οὐδὲν τούτων ὑπάρχει, οὐδ’ ἔσται φέρεσθαι ἀλλ’ ἢ ὡς τὸ ὀχούμενον.

ἔτι οὐδεὶς ἂν ἔχοι εἰπεῖν διὰ τί κινηθὲν στήσεταί που· τί γὰρ μᾶλλον ἐνταῦθα ἢ ἐνταῦθα; ὥστε ἢ ἠρεμήσει ἢ εἰς ἄπειρον ἀνάγκη φέρεσθαι, ἐὰν μή τι ἐμποδίσῃ κρεῖττον.

ἔτι νῦν μὲν εἰς τὸ κενὸν διὰ τὸ ὑπείκειν φέ ρεσθαι δοκεῖ· ἐν δὲ τῷ κενῷ πάντῃ ὁμοίως τὸ τοιοῦτον, ὥστε πάντῃ οἰσθήσεται. ἔτι δὲ καὶ ἐκ τῶνδε φανερὸν τὸ λεγόμενον. ὁρῶμεν γὰρ τὸ αὐτὸ βάρος καὶ σῶμα θᾶττον φερόμενον διὰ δύο αἰτίας, ἢ τῷ διαφέρειν τὸ δι᾽ οὗ, οἷον δι᾽ ὕδατος ἢ γῆς ἢ δι᾽ ὕδατος ἢ ἀέρος, ἢ τῷ διαφέρειν τὸ φερόμενον, ἐὰν τἆλλα ταὐτὰ ὑπάρχῃ, διὰ τὴν ὑπεροχὴν τοῦ βάρους ἢ τῆς κουφότητος.

τὸ μὲν οὖν δι᾽ οὗ φέρεται αἴτιον, ὅτι ἐμποδίζει μάλιστα μὲν ἀντιφερόμενον, ἔπειτα καὶ μένον· μᾶλλον δὲ τὸ μὴ εὐδιαίρετον· τοιοῦτο δὲ τὸ παχύτερον. τὸ δὴ ἐφ᾽ οὗ [215b] A οἰσθήσεται διὰ τοῦ B τὸν ἐφ᾽ ᾧ Γ χρόνον, διὰ δὲ τοῦ Δ λεπτοτέρου ὄντος τὸν ἐφ᾽ ᾧ E, εἰ ἴσον τὸ μῆκος τὸ τοῦ B τῷ Δ, κατὰ τὴν ἀναλογίαν τοῦ ἐμποδίζοντος σώματος. ἔστω γὰρ τὸ μὲν B ὕδωρ, τὸ δὲ Δ ἀήρ· ὅσῳ δὴ λεπτότερον ἀὴρ ὕδατος καὶ ἀσωματώτερον, τοσούτῳ θᾶττον τὸ A διὰ τοῦ Δ οἰσθήσεται ἢ διὰ τοῦ B. ἐχέτω δὴ τὸν αὐτὸν λόγον ὅνπερ διέστηκεν ἀὴρ πρὸς ὕδωρ, τὸ τάχος πρὸς τὸ τάχος. ὥστε εἰ διπλασίως λεπτόν, ἐν διπλασίῳ χρόνῳ τὴν τὸ B δίεισιν ἢ τὴν τὸ Δ, καὶ ἔσται ὁ ἐφ᾽ ᾧ Γ χρόνος διπλάσιος τοῦ ἐφ᾽ ᾧ E. καὶ ἀεὶ δὴ ὅσῳ ἂν ᾖ ἀσωματώτερον καὶ ἧττον ἐμποδιστικὸν καὶ εὐδιαιρετώτερον δι᾽ οὗ φέρεται, θᾶττον οἰσθήσεται.

τὸ δὲ κενὸν οὐδένα ἔχει λόγον ᾧ ὑπερέχεται ὑπὸ τοῦ σώματος, ὥσπερ οὐδὲ τὸ μηδὲν πρὸς ἀριθμόν. εἰ γὰρ τὰ τέτταρα τῶν τριῶν ὑπερέχει ἑνί, πλείονι δὲ τοῖν δυοῖν, καὶ ἔτι πλείονι τοῦ ἑνὸς ἢ τοῖν δυοῖν, τοῦ δὲ μηδενὸς οὐκέτι ἔχει λόγον ᾧ ὑπερέχει· ἀνάγκη γὰρ τὸ ὑπερέχον διαιρεῖσθαι εἴς τε τὴν ὑπεροχὴν καὶ τὸ ὑπερεχόμενον, ὥστε ἔσται τὰ τέτταρα ὅσῳ τε ὑπερέχει καὶ οὐδέν. διὸ οὐδὲ γραμμὴ στιγμῆς ὑπερέχει, εἰ μὴ σύγκειται ἐκ στιγμῶν. ὁμοίως δὲ καὶ τὸ κενὸν πρὸς τὸ πλῆρες οὐδένα οἷόν τε ἔχειν λόγον, ὥστε οὐδὲ τὴν κίνησιν, ἀλλ᾽ εἰ διὰ τοῦ λεπτοτάτου ἐν τοσῳδὶ τὴν τοσήνδε φέρεται, διὰ τοῦ κενοῦ παντὸς ὑπερβάλλει λόγου. ἔστω γὰρ τὸ Z κενόν, ἴσον δὲ [τῷ μεγέθει] τοῖς B καὶ Δ. τὸ δὴ A εἰ δίεισι καὶ κινηθήσεται ἐν τινὶ μὲν χρόνῳ, τῷ ἐφ᾽ οὗ H, ἐν ἐλάττονι δὲ τοῦ ἐφ᾽ οὗ E, τοῦτον ἕξει τὸν λόγον τὸ κενὸν πρὸς τὸ πλῆρες. ἀλλ᾽ ἐν τοσούτῳ χρόνῳ ὅσος ἐφ᾽ οὗ τὸ H, τοῦ Δ τὸ A δίεισι τὴν τὸ Θ. δίεισι δέ γε κἂν ᾖ τι λεπτότητι διαφέρον τοῦ ἀέρος ἐφ᾽ ᾧ τὸ Z ταύτην τὴν ἀναλογίαν ἣν ἔχει ὁ χρόνος ἐφ᾽ ᾧ E πρὸς τὸν ἐφ᾽ ᾧ H. ἂν γὰρ ᾖ τοσούτῳ λεπτότερον τὸ ἐφ᾽ ᾧ Z σῶμα τοῦ Δ, ὅσῳ ὑπερέχει τὸ E τοῦ H, ἀντεστραμμένως δίεισι τῷ [216a] τάχει ἐν τῷ τοσούτῳ ὅσον τὸ H, τὴν τὸ

Ζ τὸ ἐφ’ οὗ Α, ἐὰν φέρηται. ἐὰν τοίνυν μηδὲν ᾖ σῶμα ἐν τῷ Ζ, ἔτι θᾶττον. ἀλλ’ ἦν ἐν τῷ Η. ὥστ’ ἐν ἴσῳ χρόνῳ δίεισι πλῆρές τε ὂν καὶ κενόν. ἀλλ’ ἀδύνατον. φανερὸν τοίνυν ὅτι, εἰ ἔστι χρόνος ἐν ᾧ τοῦ κενοῦ ὁτιοῦν οἰσθήσεται, συμβήσεται τοῦτο τὸ ἀδύνατον· ἐν ἴσῳ γὰρ ληφθήσεται πλῆρές τε ὂν διεξιέναι τι καὶ κενόν· ἔσται γάρ τι ἀνάλογον σῶμα ἕτερον πρὸς ἕτερον ὡς χρόνος πρὸς χρόνον.

ὡς δ’ ἐν κεφαλαίῳ εἰπεῖν, δῆλον τὸ τοῦ συμβαίνοντος αἴτιον, ὅτι κινήσεως μὲν πρὸς κίνησιν πάσης ἔστι λόγος (ἐν χρόνῳ γάρ ἐστι, χρόνου δὲ παντὸς ἔστι πρὸς χρόνον, πεπερασμένων ἀμφοῖν), κενοῦ δὲ πρὸς πλῆρες οὐκ ἔστιν. ᾗ μὲν οὖν διαφέρουσι δι’ ὧν φέρονται, ταῦτα συμβαίνει, κατὰ δὲ τὴν τῶν φερομένων ὑπεροχὴν τάδε· ὁρῶμεν γὰρ τὰ μείζω ῥοπὴν ἔχοντα ἢ βάρους ἢ κουφότητος, ἐὰν τἆλλα ὁμοίως ἔχῃ [τοῖς σχήμασι], θᾶττον φερόμενα τὸ ἴσον χωρίον, καὶ κατὰ λόγον ὃν ἔχουσι τὰ μεγέθη πρὸς ἄλληλα. ὥστε καὶ διὰ τοῦ κενοῦ. ἀλλ’ ἀδύνατον· διὰ τίνα γὰρ αἰτίαν οἰσθήσεται θᾶττον; ἐν μὲν γὰρ τοῖς πλήρεσιν ἐξ ἀνάγκης· θᾶττον γὰρ διαιρεῖ τῇ ἰσχύϊ τὸ μεῖζον· ἢ γὰρ σχήματι διαιρεῖ, ἢ ῥοπῇ ἣν ἔχει τὸ φερόμενον ἢ τὸ ἀφεθέν. ἰσοταχῆ ἄρα πάντ’ ἔσται. ἀλλ’ ἀδύνατον. ὅτι μὲν οὖν εἰ ἔστι κενόν, συμβαίνει τοὐναντίον ἢ δι’ ὃ κατασκευάζουσιν οἱ φάσκοντες εἶναι κενόν, φανερὸν ἐκ τῶν εἰρημένων. οἱ μὲν οὖν οἴονται τὸ κενὸν εἶναι, εἴπερ ἔσται ἡ κατὰ τόπον κίνησις, ἀποκεκριμένον καθ’ αὑτό· τοῦτο δὲ ταὐτόν ἐστι τῷ τὸν τόπον φάναι εἶναί τι κεχωρισμένον· τοῦτο δ’ ὅτι ἀδύνατον, εἴρηται πρότερον. καὶ καθ’ αὑτὸ δὲ σκοποῦσιν φανείη ἂν τὸ λεγόμενον κενὸν ὡς ἀληθῶς κενόν. ὥσπερ γὰρ ἐὰν ἐν ὕδατι τιθῇ τις κύβον, ἐκστήσεται τοσοῦτον ὕδωρ ὅσος ὁ κύβος, οὕτω καὶ ἐν ἀέρι· ἀλλὰ τῇ αἰσθήσει ἄδηλον. καὶ αἰεὶ δὴ ἐν παντὶ σώματι ἔχοντι μετάστασιν, ἐφ’ ὃ πέφυκε μεθίστασθαι, ἀνάγκη, ἂν μὴ συμπιλῆται, μεθίστασθαι ἢ κάτω αἰεί, εἰ κάτω ἡ φορὰ ὥσπερ γῆς, ἢ ἄνω, εἰ πῦρ, ἢ ἐπ’ ἄμφω, [ἢ] ὁποῖον ἄν τι ᾖ τὸ ἐντιθέμενον· ἐν δὲ δὴ τῷ κενῷ τοῦτο μὲν ἀδύνατον (οὐδὲν γὰρ σῶμα), διὰ δὲ τοῦ κύβου τὸ ἴσον διάστημα διεληλυθέναι, ὅπερ ἦν καὶ πρότερον [216b] ἐν τῷ κενῷ, ὥσπερ ἂν εἰ τὸ ὕδωρ μὴ μεθίστατο τῷ ξυλίνῳ κύβῳ μηδ’ ὁ ἀήρ, ἀλλὰ πάντῃ διῄεσαν δι’ αὐτοῦ. ἀλλὰ μὴν καὶ ὁ κύβος γε ἔχει τοσοῦτον μέγεθος, ὅσον κατέχει κενόν· ὃ εἰ καὶ θερμὸν ἢ ψυχρόν ἐστιν ἢ βαρὺ ἢ κοῦφον, οὐδὲν ἧττον ἕτερον τῷ εἶναι πάντων τῶν παθημάτων ἐστί, καὶ εἰ μὴ χωριστόν· λέγω δὲ τὸν ὄγκον τοῦ ξυλίνου κύβου. ὥστ’ εἰ καὶ χωρισθείη τῶν ἄλλων πάντων καὶ μήτε βαρὺ μήτε κοῦφον εἴη, καθέξει τὸ ἴσον κενὸν καὶ ἐν τῷ αὐτῷ ἔσται τῷ τοῦ τόπου καὶ τῷ τοῦ κενοῦ μέρει ἴσῳ ἑαυτῷ. τί οὖν διοίσει τὸ τοῦ κύβου σῶμα τοῦ ἴσου κενοῦ καὶ τόπου; καὶ εἰ δύο τοιαῦτα, διὰ τί οὐ καὶ ὁποσαοῦν ἐν τῷ αὐτῷ ἔσται;

ἓν μὲν δὴ τοῦτο ἄτοπον καὶ ἀδύνατον. ἔτι δὲ φανερὸν ὅτι τοῦτο ὁ κύβος ἕξει καὶ μεθιστάμενος, ὃ καὶ τὰ ἄλλα σώματα πάντ’ ἔχει. ὥστ’ εἰ τοῦ τόπου μηδὲν διαφέρει, τί δεῖ ποιεῖν τόπον τοῖς σώμασιν παρὰ τὸν ἑκάστου ὄγκον, εἰ ἀπαθὲς ὁ ὄγκος; οὐδὲν γὰρ συμ βάλλεται, εἰ ἕτερον περὶ αὐτὸν ἴσον διάστημα τοιοῦτον εἴη. [ἔτι δεῖ δῆλον εἶναι οἷον κενὸν ἐν τοῖς κινουμένοις. νῦν δ’ οὐδαμοῦ ἐντὸς τοῦ κόσμου· ὁ γὰρ ἀὴρ ἔστιν τι, οὐ δοκεῖ δέ γε-οὐδὲ τὸ ὕδωρ, εἰ ἦσαν οἱ ἰχθύες σιδηροῖ· τῇ ἁφῇ γὰρ ἡ κρίσις τοῦ ἁπτοῦ.]

ὅτι μὲν τοίνυν οὐκ ἔστι κεχωρισμένον κενόν, ἐκ τούτων ἐστὶ δῆλον.

Κεφάλαιο 9

Εἰσὶν δέ τινες οἳ διὰ τοῦ μανοῦ καὶ πυκνοῦ οἴονται φανερὸν εἶναι ὅτι ἔστι κενόν. εἰ μὲν γὰρ μὴ ἔστι μανὸν καὶ πυκνόν, οὐδὲ συνιέναι καὶ πιλεῖσθαι οἷόν τε· εἰ δὲ τοῦτο μὴ εἴη, ἢ ὅλως κίνησις οὐκ ἔσται, ἢ κυμανεῖ τὸ ὅλον, ὥσπερ ἔφη Ξοῦθος, ἢ εἰς ἴσον ἀεὶ <δεῖ> μεταβάλλειν ἀέρα καὶ ὕδωρ (λέγω δὲ οἷον εἰ ἐξ ὕδατος κυάθου γέγονεν ἀήρ, ἅμα ἐξ ἴσου ἀέρος ὕδωρ τοσοῦτον γεγενῆσθαι), ἢ κενὸν εἶναι ἐξ ἀνάγκης· συμπιλεῖσθαι γὰρ καὶ ἐπεκτείνεσθαι οὐκ ἐνδέχεται ἄλλως.

εἰ μὲν οὖν τὸ μανὸν λέγουσι τὸ πολλὰ κενὰ κεχωρισμένα ἔχον, φανερὸν ὡς εἰ μηδὲ κενὸν ἐνδέχεται εἶναι χωριστὸν ὥσπερ μηδὲ τόπον ἔχοντα διάστημα αὑτοῦ, οὐδὲ μανὸν οὕτως· εἰ δὲ μὴ χωριστόν, ἀλλ’ ὅμως ἐνεῖναί τι κενόν, ἧττον μὲν ἀδύνατον, συμβαίνει δὲ πρῶτον μὲν οὐ πάσης κινήσεως αἴτιον τὸ κενόν, ἀλλὰ τῆς ἄνω (τὸ γὰρ μανὸν κοῦφον, διὸ [217a] καὶ τὸ πῦρ μανὸν εἶναί φασιν), ἔπειτα κινήσεως αἴτιον οὐχ οὕτω τὸ κενὸν ὡς ἐν ᾧ, ἀλλ’ ὥσπερ οἱ ἀσκοὶ τῷ φέρεσθαι αὐτοὶ ἄνω φέρουσι τὸ συνεχές, οὕτω τὸ κενὸν ἄνω φέρει. καίτοι πῶς οἷόν τε φορὰν εἶναι κενοῦ ἢ τόπον κενοῦ; κενοῦ γὰρ γίγνεται κενόν, εἰς ὃ φέρεται.

ἔτι δὲ πῶς ἐπὶ τοῦ βαρέος ἀποδώσουσιν τὸ φέρεσθαι κάτω; καὶ δῆλον ὅτι εἰ ὅσῳ ἂν μανότερον καὶ κενώτερον ᾖ ἄνω οἰσθήσεται, εἰ ὅλως εἴη κενόν, τάχιστ’ ἂν φέροιτο. ἴσως δὲ καὶ τοῦτ’ ἀδύνατον κινηθῆναι· λόγος δ’ ὁ αὐτός, ὥσπερ ὅτι ἐν τῷ κενῷ ἀκίνητα πάντα, οὕτω καὶ τὸ κενὸν ὅτι ἀκίνητον· ἀσύμβλητα γὰρ τὰ τάχη. ἐπεὶ δὲ κενὸν μὲν οὔ φαμεν εἶναι, τὰ ἄλλα δ’ ἠπόρηται ἀληθῶς, ὅτι ἢ κίνησις οὐκ ἔσται, εἰ μὴ ἔσται πύκνωσις καὶ μάνωσις, ἢ κυμανεῖ ὁ οὐρανός, ἢ αἰεὶ ἴσον ὕδωρ ἐξ ἀέρος ἔσται καὶ ἀὴρ ἐξ ὕδατος (δῆλον γὰρ ὅτι πλείων ἀὴρ ἐξ ὕδατος γίγνεται· ἀνάγκη τοίνυν, εἰ μὴ ἔστι πίλησις, ἢ ἐξωθούμενον τὸ ἐχόμενον τὸ ἔσχατον κυμαίνειν ποιεῖν, ἢ ἄλλοθί που ἴσον μεταβάλλειν ἐξ ἀέρος ὕδωρ, ἵνα ὁ πᾶς ὄγκος τοῦ ὅλου ἴσος ᾖ, ἢ μηδὲν κινεῖσθαι· ἀεὶ γὰρ μεθισταμένου τοῦτο συμβήσεται, ἂν μὴ κύκλῳ περιίστηται· οὐκ ἀεὶ δ’ εἰς τὸ κύκλῳ ἡ φορά, ἀλλὰ καὶ εἰς εὐθύ)·

οἱ μὲν δὴ διὰ ταῦτα κενόν τι φαῖεν ἂν εἶναι, ἡμεῖς δὲ λέγομεν ἐκ τῶν ὑποκειμένων ὅτι ἔστιν ὕλη μία τῶν ἐναντίων, θερμοῦ καὶ ψυχροῦ καὶ τῶν ἄλλων τῶν φυσικῶν ἐναντιώσεων, καὶ ἐκ δυνάμει ὄντος ἐνεργείᾳ ὂν γίγνεται, καὶ οὐ χωριστὴ μὲν ἡ ὕλη, τὸ δ’ εἶναι ἕτερον, καὶ μία τῷ ἀριθμῷ, εἰ ἔτυχε, χροιᾶς καὶ θερμοῦ καὶ ψυχροῦ.

ἔστι δὲ καὶ σώματος ὕλη καὶ μεγάλου καὶ μικροῦ ἡ αὐτή. δῆλον δέ· ὅταν γὰρ ἐξ ὕδατος ἀὴρ γένηται, ἡ αὐτὴ ὕλη οὐ προσλαβοῦσά τι ἄλλο ἐγένετο, ἀλλ᾽ ὃ ἦν δυνάμει, ἐνεργείᾳ ἐγένετο, καὶ πάλιν ὕδωρ ἐξ ἀέρος ὡσαύτως, ὁτὲ μὲν εἰς μέγεθος ἐκ μικρότητος, ὁτὲ δ᾽ εἰς μικρό τητα ἐκ μεγέθους. ὁμοίως τοίνυν κἂν ὁ ἀὴρ πολὺς ὢν ἐν ἐλάττονι γίγνηται ὄγκῳ καὶ ἐξ ἐλάττονος μείζων, ἡ δυνάμει οὖσα ὕλη γίγνεται ἄμφω.

ὥσπερ γὰρ καὶ ἐκ ψυχροῦ θερμὸν καὶ ἐκ θερμοῦ ψυχρὸν ἡ αὐτή, ὅτι ἦν δυνάμει, οὕτω καὶ ἐκ θερμοῦ [217b] μᾶλλον θερμόν, οὐδενὸς γενομένου ἐν τῇ ὕλῃ θερμοῦ ὃ οὐκ ἦν θερμὸν ὅτε ἧττον ἦν θερμόν, ὥσπερ γε οὐδ᾽ ἡ τοῦ μείζονος κύκλου περιφέρεια καὶ κυρτότης ἐὰν γίγνηται ἐλάττονος κύκλου, <ἢ> ἡ αὐτὴ οὖσα ἢ ἄλλη, ἐν οὐθενὶ ἐγγέγονε τὸ κυρτὸν ὃ ἦν οὐ κυρτὸν ἀλλ᾽ εὐθύ (οὐ γὰρ τῷ διαλείπειν τὸ ἧττον ἢ τὸ μᾶλλον ἔστιν)· οὐδ᾽ ἔστι τῆς φλογὸς λαβεῖν τι μέγεθος ἐν ᾧ οὐ καὶ θερμότης καὶ λευκότης ἔνεστιν. οὕτω τοίνυν καὶ ἡ πρότερον θερμότης <πρὸς> τὴν ὕστερον. ὥστε καὶ τὸ μέγεθος καὶ ἡ μικρότης τοῦ αἰσθητοῦ ὄγκου οὐ προσλαβούσης τι τῆς ὕλης ἐπεκτείνεται, ἀλλ᾽ ὅτι δυνάμει ἐστὶν ὕλη ἀμφοῖν· ὥστ᾽ ἐστὶ τὸ αὐτὸ πυκνὸν καὶ μανόν, καὶ μία ὕλη αὐτῶν. ἔστι δὲ τὸ μὲν πυκνὸν βαρύ, τὸ δὲ μανὸν κοῦφον. [ἔτι ὥσπερ ἡ τοῦ κύκλου περιφέρεια συναγομένη εἰς ἔλαττον οὐκ ἄλλο τι λαμβάνει τὸ κοῖλον, ἀλλ᾽ ὃ ἦν συνήχθη, καὶ τοῦ πυρὸς ὅ τι ἄν τις λάβῃ πᾶν ἔσται θερμόν, οὕτω καὶ τὸ πᾶν συναγωγὴ καὶ διαστολὴ τῆς αὐτῆς ὕλης.] δύο γὰρ ἔστιν ἐφ᾽ ἑκατέρου, τοῦ τε πυκνοῦ καὶ τοῦ μανοῦ· τό τε γὰρ βαρὺ καὶ τὸ σκληρὸν πυκνὰ δοκεῖ εἶναι, καὶ τἀναντία μανὰ τό τε κοῦφον καὶ τὸ μαλακόν· διαφωνεῖ δὲ τὸ βαρὺ καὶ τὸ σκληρὸν ἐπὶ μολίβδου καὶ σιδήρου.

ἐκ δὴ τῶν εἰρημένων φανερὸν ὡς οὔτ᾽ ἀποκεκριμένον κενὸν ἔστιν, οὔθ᾽ ἁπλῶς οὔτ᾽ ἐν τῷ μανῷ, οὔτε δυνάμει, εἰ μή τις βούλεται πάντως καλεῖν κενὸν τὸ αἴτιον τοῦ φέρεσθαι. οὕτω δ᾽ ἡ τοῦ βαρέος καὶ κούφου ὕλη, ᾗ τοιαύτη, εἴη ἂν τὸ κενόν· τὸ γὰρ πυκνὸν καὶ τὸ μανὸν κατὰ ταύτην τὴν ἐναντίωσιν φορᾶς ποιητικά, κατὰ δὲ τὸ σκληρὸν καὶ μαλακὸν πάθους καὶ ἀπαθείας, καὶ οὐ φορᾶς ἀλλ᾽ ἑτεροιώσεως μᾶλλον.

καὶ περὶ μὲν κενοῦ, πῶς ἔστι καὶ πῶς οὐκ ἔστι, διωρίσθω τὸν τρόπον τοῦτον.

Κεφάλαιο 10

Ἐχόμενον δὲ τῶν εἰρημένων ἐστὶν ἐπελθεῖν περὶ χρόνου· πρῶτον δὲ καλῶς ἔχει διαπορῆσαι περὶ αὐτοῦ καὶ διὰ τῶν ἐξωτερικῶν λόγων, πότερον τῶν ὄντων ἐστὶν ἢ τῶν μὴ ὄντων, εἶτα τίς ἡ φύσις αὐτοῦ. ὅτι μὲν οὖν ἢ ὅλως οὐκ ἔστιν ἢ μόλις καὶ ἀμυδρῶς, ἐκ τῶνδέ τις ἂν ὑποπτεύσειεν. τὸ μὲν γὰρ αὐτοῦ γέγονε καὶ οὐκ ἔστιν, τὸ δὲ μέλλει καὶ οὔπω ἔστιν. [218a] ἐκ δὲ τούτων καὶ ὁ ἄπειρος καὶ ὁ ἀεὶ λαμβανόμενος χρόνος σύγκειται. τὸ δ’ ἐκ μὴ ὄντων συγκείμενον ἀδύνατον ἂν εἶναι δόξειε μετέχειν οὐσίας.

πρὸς δὲ τούτοις παντὸς μεριστοῦ, ἄνπερ ᾖ, ἀνάγκη, ὅτε ἔστιν, ἤτοι πάντα τὰ μέρη εἶναι ἢ ἔνια· τοῦ δὲ χρόνου τὰ μὲν γέγονε τὰ δὲ μέλλει, ἔστι δ’ οὐδέν, ὄντος μεριστοῦ. τὸ δὲ νῦν οὐ μέρος· μετρεῖ τε γὰρ τὸ μέρος, καὶ συγκεῖσθαι δεῖ τὸ ὅλον ἐκ τῶν μερῶν· ὁ δὲ χρόνος οὐ δοκεῖ συγκεῖσθαι ἐκ τῶν νῦν.

ἔτι δὲ τὸ νῦν, ὃ φαίνεται διορίζειν τὸ παρελθὸν καὶ τὸ μέλλον, πότερον ἓν καὶ ταὐτὸν ἀεὶ διαμένει ἢ ἄλλο καὶ ἄλλο, οὐ ῥᾴδιον ἰδεῖν.

εἰ μὲν γὰρ αἰεὶ ἕτερον καὶ ἕτερον, μηδὲν δ’ ἐστὶ τῶν ἐν τῷ χρόνῳ ἄλλο καὶ ἄλλο μέρος ἅμα (ὃ μὴ περιέχει, τὸ δὲ περιέχεται, ὥσπερ ὁ ἐλάττων χρόνος ὑπὸ τοῦ πλείονος), τὸ δὲ νῦν μὴ ὂν πρότερον δὲ ὂν ἀνάγκη ἐφθάρθαι ποτέ, καὶ τὰ νῦν ἅμα μὲν ἀλλήλοις οὐκ ἔσται, ἐφθάρθαι δὲ ἀνάγκη ἀεὶ τὸ πρότερον. ἐν αὐτῷ μὲν οὖν ἐφθάρθαι οὐχ οἷόν τε διὰ τὸ εἶναι τότε, ἐν ἄλλῳ δὲ νῦν ἐφθάρθαι τὸ πρότερον νῦν οὐκ ἐνδέχεται. ἔστω γὰρ ἀδύνατον ἐχόμενα εἶναι ἀλλήλων τὰ νῦν, ὥσπερ στιγμὴν στιγμῆς. εἴπερ οὖν ἐν τῷ ἐφεξῆς οὐκ ἔφθαρται ἀλλ’ ἐν ἄλλῳ, ἐν τοῖς μεταξὺ [τοῖς] νῦν ἀπείροις οὖσιν ἅμα ἂν εἴη· τοῦτο δὲ ἀδύνατον.

ἀλλὰ μὴν οὐδ’ αἰεὶ τὸ αὐτὸ διαμένειν δυνατόν· οὐδενὸς γὰρ διαιρετοῦ πεπερασμένου ἓν πέρας ἔστιν, οὔτε ἂν ἐφ’ ἓν ᾖ συνεχὲς οὔτε ἂν ἐπὶ πλείω· τὸ δὲ νῦν πέρας ἐστίν, καὶ χρόνον ἔστι λαβεῖν πεπερασμένον. ἔτι εἰ τὸ ἅμα εἶναι κατὰ χρόνον καὶ μήτε πρότερον μήτε ὕστερον τὸ ἐν τῷ αὐτῷ εἶναι καὶ ἑνὶ [τῷ] νῦν ἐστιν, εἰ τά τε πρότερον καὶ τὰ ὕστερον ἐν τῷ νῦν τῳδί ἐστιν, ἅμα ἂν εἴη τὰ ἔτος γενόμενα μυριοστὸν τοῖς γε νομένοις τήμερον, καὶ οὔτε πρότερον οὔτε ὕστερον οὐδὲν ἄλλο ἄλλου.

περὶ μὲν οὖν τῶν ὑπαρχόντων αὐτῷ τοσαῦτ’ ἔστω δια πορημένα·

τί δ’ ἐστὶν ὁ χρόνος καὶ τίς αὐτοῦ ἡ φύσις, ὁμοίως ἔκ τε τῶν παραδεδομένων ἄδηλόν ἐστιν, καὶ περὶ ὧν τυγχάνομεν διεληλυθότες πρότερον.

οἱ μὲν γὰρ τὴν τοῦ ὅλου [218b] κίνησιν εἶναί φασιν, οἱ δὲ τὴν σφαῖραν αὐτήν.

καίτοι τῆς περιφορᾶς καὶ τὸ μέρος χρόνος τίς ἐστι, περιφορὰ δέ γε οὔ· μέρος γὰρ περιφορᾶς τὸ ληφθέν, ἀλλ' οὐ περιφορά. ἔτι δ' εἰ πλείους ἦσαν οἱ οὐρανοί, ὁμοίως ἂν ἦν ὁ χρόνος ἡ ὁτουοῦν αὐτῶν κίνησις, ὥστε πολλοὶ χρόνοι ἅμα.

ἡ δὲ τοῦ ὅλου σφαῖρα ἔδοξε μὲν τοῖς εἰποῦσιν εἶναι ὁ χρόνος, ὅτι ἔν τε τῷ χρόνῳ πάντα ἐστὶν καὶ ἐν τῇ τοῦ ὅλου σφαίρᾳ· ἔστιν δ' εὐηθικώτερον τὸ εἰρημένον ἢ ὥστε περὶ αὐτοῦ τὰ ἀδύνατα ἐπισκοπεῖν.

ἐπεὶ δὲ δοκεῖ μάλιστα κίνησις εἶναι καὶ μεταβολή τις ὁ χρόνος, τοῦτ' ἂν εἴη σκεπτέον.

ἡ μὲν οὖν ἑκάστου μεταβολὴ καὶ κίνησις ἐν αὐτῷ τῷ μεταβάλλοντι μόνον ἐστίν, ἢ οὗ ἂν τύχῃ ὂν αὐτὸ τὸ κινούμενον καὶ μεταβάλλον· ὁ δὲ χρόνος ὁμοίως καὶ πανταχοῦ καὶ παρὰ πᾶσιν.

ἔτι δὲ μεταβολὴ μέν ἐστι θάττων καὶ βραδυτέρα, χρόνος δ' οὐκ ἔστιν· τὸ γὰρ βραδὺ καὶ ταχὺ χρόνῳ ὥρισται, ταχὺ μὲν τὸ ἐν ὀλίγῳ πολὺ κινούμενον, βραδὺ δὲ τὸ ἐν πολλῷ ὀλίγον· ὁ δὲ χρόνος οὐχ ὥρισται χρόνῳ, οὔτε τῷ ποσός τις εἶναι οὔτε τῷ ποιός.

ὅτι μὲν τοίνυν οὐκ ἔστιν κίνησις, φανερόν· μηδὲν δὲ διαφερέτω λέγειν ἡμῖν ἐν τῷ παρόντι κίνησιν ἢ μεταβολήν.

Κεφάλαιο 11

Ἀλλὰ μὴν οὐδ’ ἄνευ γε μεταβολῆς· ὅταν γὰρ μηδὲν αὐτοὶ μεταβάλλωμεν τὴν διάνοιαν ἢ λάθωμεν μεταβάλλοντες, οὐ δοκεῖ ἡμῖν γεγονέναι χρόνος, καθάπερ οὐδὲ τοῖς ἐν Σαρδοῖ μυθολογουμένοις καθεύδειν παρὰ τοῖς ἥρωσιν, ὅταν ἐγερθῶσι· συνάπτουσι γὰρ τῷ πρότερον νῦν τὸ ὕστερον νῦν καὶ ἓν ποιοῦσιν, ἐξαιροῦντες διὰ τὴν ἀναισθησίαν τὸ μεταξύ. ὥσπερ οὖν εἰ μὴ ἦν ἕτερον τὸ νῦν ἀλλὰ ταὐτὸ καὶ ἕν, οὐκ ἂν ἦν χρόνος, οὕτως καὶ ἐπεὶ λανθάνει ἕτερον ὄν, οὐ δοκεῖ εἶναι τὸ μεταξὺ χρόνος. εἰ δὴ τὸ μὴ οἴεσθαι εἶναι χρόνον τότε συμβαίνει ἡμῖν, ὅταν μὴ ὁρίσωμεν μηδεμίαν μεταβολήν, ἀλλ’ ἐν ἑνὶ καὶ ἀδιαιρέτῳ φαίνηται ἡ ψυχὴ μένειν, ὅταν δ’ αἰσθώμεθα καὶ ὁρίσωμεν, τότε φαμὲν γεγονέναι χρόνον, φανερὸν ὅτι οὐκ ἔστιν ἄνευ κινήσεως καὶ μεταβολῆς [219a] χρόνος. ὅτι μὲν οὖν οὔτε κίνησις οὔτ’ ἄνευ κινήσεως ὁ χρόνος ἐστί, φανερόν·

ληπτέον δέ, ἐπεὶ ζητοῦμεν τί ἐστιν ὁ χρόνος, ἐντεῦθεν ἀρχομένοις, τί τῆς κινήσεώς ἐστιν.

ἅμα γὰρ κινήσεως αἰσθανόμεθα καὶ χρόνου· καὶ γὰρ ἐὰν ᾖ σκότος καὶ μηδὲν διὰ τοῦ σώματος πάσχωμεν, κίνησις δέ τις ἐν τῇ ψυχῇ ἐνῇ, εὐθὺς ἅμα δοκεῖ τις γεγονέναι καὶ χρόνος. ἀλλὰ μὴν καὶ ὅταν γε χρόνος δοκῇ γεγονέναι τις, ἅμα καὶ κίνησίς τις δοκεῖ γεγονέναι. ὥστε ἤτοι κίνησις ἢ τῆς κινήσεώς τί ἐστιν ὁ χρόνος. ἐπεὶ οὖν οὐ κίνησις, ἀνάγκη τῆς κινήσεώς τι εἶναι αὐτόν.

ἐπεὶ δὲ τὸ κινούμενον κινεῖται ἔκ τινος εἴς τι καὶ πᾶν μέγεθος συνεχές, ἀκολουθεῖ τῷ μεγέθει ἡ κίνησις· διὰ γὰρ τὸ τὸ μέγεθος εἶναι συνεχὲς καὶ ἡ κίνησίς ἐστιν συνεχής, διὰ δὲ τὴν κίνησιν ὁ χρόνος· ὅση γὰρ ἡ κίνησις, τοσοῦτος καὶ ὁ χρόνος αἰεὶ δοκεῖ γεγονέναι.

τὸ δὴ πρότερον καὶ ὕστερον ἐν τόπῳ πρῶτόν ἐστιν. ἐνταῦθα μὲν δὴ τῇ θέσει· ἐπεὶ δ’ ἐν τῷ μεγέθει ἔστι τὸ πρότερον καὶ ὕστερον, ἀνάγκη καὶ ἐν κινήσει εἶναι τὸ πρότερον καὶ ὕστερον, ἀνάλογον τοῖς ἐκεῖ. ἀλλὰ μὴν καὶ ἐν χρόνῳ ἔστιν τὸ πρότερον καὶ ὕστερον διὰ τὸ ἀκολουθεῖν ἀεὶ θατέρῳ θάτερον αὐτῶν. ἔστι δὲ τὸ πρότερον καὶ ὕστερον ἐν τῇ κινήσει ὃ μέν ποτε ὂν κίνησις [ἐστιν]· τὸ μέντοι εἶναι αὐτῷ ἕτερον καὶ οὐ κίνησις. ἀλλὰ μὴν καὶ τὸν χρόνον γε γνωρίζομεν ὅταν ὁρίσωμεν τὴν κίνησιν, τῷ πρότερον καὶ ὕστερον ὁρίζοντες· καὶ τότε φαμὲν γεγονέναι χρόνον, ὅταν τοῦ προτέρου καὶ ὑστέρου ἐν τῇ κινήσει αἴσθησιν λάβωμεν. ὁρίζομεν δὲ τῷ ἄλλο καὶ ἄλλο ὑπολαβεῖν αὐτά, καὶ μεταξύ τι αὐτῶν ἕτερον· ὅταν γὰρ ἕτερα τὰ ἄκρα τοῦ μέσου νοήσωμεν, καὶ δύο εἴπῃ ἡ ψυχὴ τὰ νῦν, τὸ μὲν πρότερον τὸ δ' ὕστερον, τότε καὶ τοῦτό φαμεν εἶναι χρόνον· τὸ γὰρ ὁριζόμενον τῷ νῦν χρόνος εἶναι δοκεῖ· καὶ ὑποκείσθω.

ὅταν μὲν οὖν ὡς ἓν τὸ νῦν αἰσθανώμεθα, καὶ μὴ ἤτοι ὡς πρότερον καὶ ὕστερον ἐν τῇ κινήσει ἢ ὡς τὸ αὐτὸ μὲν προτέρου δὲ καὶ ὑστέρου τινός, οὐ δοκεῖ χρόνος γεγονέναι οὐδείς, ὅτι οὐδὲ κίνησις. ὅταν δὲ τὸ πρότερον [219b] καὶ ὕστερον, τότε λέγομεν χρόνον· τοῦτο γάρ ἐστιν ὁ χρόνος, ἀριθμὸς κινήσεως κατὰ τὸ πρότερον καὶ ὕστερον.

οὐκ ἄρα κί νησις ὁ χρόνος ἀλλ' ᾗ ἀριθμὸν ἔχει ἡ κίνησις. σημεῖον δέ· τὸ μὲν γὰρ πλεῖον καὶ ἔλαττον κρίνομεν ἀριθμῷ, κίνησιν δὲ πλείω καὶ ἐλάττω χρόνῳ· ἀριθμὸς ἄρα τις ὁ χρόνος. ἐπεὶ δ' ἀριθμός ἐστι διχῶς (καὶ γὰρ τὸ ἀριθμούμενον καὶ τὸ ἀριθμητὸν ἀριθμὸν λέγομεν, καὶ ᾧ ἀριθμοῦμεν), ὁ δὴ χρόνος ἐστὶν τὸ ἀριθμούμενον καὶ οὐχ ᾧ ἀριθμοῦμεν. ἔστι δ' ἕτερον ᾧ ἀριθμοῦμεν καὶ τὸ ἀριθμούμενον. καὶ ὥσπερ ἡ κίνησις αἰεὶ ἄλλη καὶ ἄλλη, καὶ ὁ χρόνος (ὁ δ' ἅμα πᾶς χρόνος ὁ αὐτός· τὸ γὰρ νῦν τὸ αὐτὸ ὅ ποτ' ἦν-τὸ δ' εἶναι αὐτῷ ἕτερον-τὸ δὲ νῦν τὸν χρόνον ὁρίζει, ᾗ πρότερον καὶ ὕστερον).

τὸ δὲ νῦν ἔστι μὲν ὡς τὸ αὐτό, ἔστι δ' ὡς οὐ τὸ αὐτό· ᾗ μὲν γὰρ ἐν ἄλλῳ καὶ ἄλλῳ, ἕτερον (τοῦτο δ' ἦν αὐτῷ τὸ νῦν <εἶναι>, ὃ δέ ποτε ὄν ἐστι τὸ νῦν, τὸ αὐτό. ἀκολουθεῖ γάρ, ὡς ἐλέχθη, τῷ μὲν μεγέθει ἡ κίνησις, ταύτῃ δ' ὁ χρόνος, ὥς φαμεν· καὶ ὁμοίως δὴ τῇ στιγμῇ τὸ φερόμενον, ᾧ τὴν κίνησιν γνωρίζομεν καὶ τὸ πρότερον ἐν αὐτῇ καὶ τὸ ὕστερον. τοῦτο δὲ ὃ μέν ποτε ὂν τὸ αὐτό (ἢ στιγμὴ γὰρ ἢ λίθος ἤ τι ἄλλο τοιοῦτόν ἐστι), τῷ λόγῳ δὲ ἄλλο, ὥσπερ οἱ σοφισταὶ λαμβάνουσιν ἕτερον τὸ Κορίσκον ἐν Λυκείῳ εἶναι καὶ τὸ Κορίσκον ἐν ἀγορᾷ. καὶ τοῦτο δὴ τῷ ἄλλοθι καὶ ἄλλοθι εἶναι ἕτερον· τῷ δὲ φερομένῳ ἀκολουθεῖ τὸ νῦν, ὥσπερ ὁ χρόνος τῇ κινήσει (τῷ γὰρ φερομένῳ γνωρίζομεν τὸ πρότερον καὶ ὕστερον ἐν κινήσει, ᾗ δ' ἀριθμητὸν τὸ πρότερον καὶ ὕστερον, τὸ νῦν ἔστιν)· ὥστε καὶ ἐν τούτοις ὃ μέν ποτε ὂν νῦν ἐστι, τὸ αὐτό (τὸ πρότερον γὰρ καὶ ὕστερόν ἐστι τὸ ἐν κινήσει), τὸ δ' εἶναι ἕτερον (ᾗ ἀριθμητὸν γὰρ τὸ πρότερον καὶ ὕστερον, τὸ νῦν ἔστιν). καὶ γνώριμον δὲ μάλιστα τοῦτ' ἔστιν· καὶ γὰρ ἡ κίνησις διὰ τὸ κινούμενον καὶ ἡ φορὰ διὰ τὸ φερόμενον· τόδε γάρ τι τὸ φερόμενον, ἡ δὲ κίνησις οὔ. ἔστι μὲν οὖν ὡς τὸ αὐτὸ τὸ νῦν αἰεί, ἔστι δ' ὡς οὐ τὸ αὐτό· καὶ γὰρ τὸ φερόμενον. φανερὸν δὲ καὶ ὅτι εἴτε χρόνος μὴ εἴη, τὸ νῦν οὐκ ἂν [220a] εἴη, εἴτε τὸ νῦν μὴ εἴη, χρόνος οὐκ ἂν εἴη· ἅμα γὰρ ὥσπερ τὸ φερόμενον καὶ ἡ φορά, οὕτως καὶ ὁ ἀριθμὸς ὁ τοῦ φερομένου καὶ ὁ τῆς φορᾶς.

χρόνος μὲν γὰρ ὁ τῆς φορᾶς ἀριθμός, τὸ νῦν δὲ ὡς τὸ φερόμενον, οἷον μονὰς ἀριθμοῦ. καὶ συνεχής τε δὴ ὁ χρόνος τῷ νῦν, καὶ διῄρηται κατὰ τὸ νῦν· ἀκολουθεῖ γὰρ καὶ τοῦτο τῇ φορᾷ καὶ τῷ φερομένῳ. καὶ γὰρ ἡ κίνησις καὶ ἡ φορὰ μία τῷ φερομένῳ, ὅτι ἕν (καὶ οὐχ ὅ ποτε ὄν-καὶ γὰρ ἂν διαλίποι-ἀλλὰ τῷ λόγῳ)· καὶ ὁρίζει δὲ τὴν πρότερον καὶ ὕστερον κίνησιν τοῦτο. ἀκολουθεῖ δὲ καὶ τοῦτό πως τῇ στιγμῇ· καὶ γὰρ ἡ στιγμὴ καὶ συνέχει τὸ μῆκος καὶ ὁρίζει· ἔστι γὰρ τοῦ μὲν ἀρχὴ τοῦ δὲ τελευτή. ἀλλ’ ὅταν μὲν οὕτω λαμβάνῃ τις ὡς δυσὶ χρώμενος τῇ μιᾷ, ἀνάγκη ἵστασθαι, εἰ ἔσται ἀρχὴ καὶ τελευτὴ ἡ αὐτὴ στιγμή· τὸ δὲ νῦν διὰ τὸ κινεῖσθαι τὸ φερόμενον αἰεὶ ἕτερον.

ὥσθ’ ὁ χρόνος ἀριθμὸς οὐχ ὡς τῆς αὐτῆς στιγμῆς, ὅτι ἀρχὴ καὶ τελευτή, ἀλλ’ ὡς τὰ ἔσχατα τῆς γραμμῆς μᾶλλον-καὶ οὐχ ὡς τὰ μέρη, διά τε τὸ εἰρημένον (τῇ γὰρ μέσῃ στιγμῇ ὡς δυσὶ χρήσεται, ὥστε ἠρεμεῖν συμβήσεται), καὶ ἔτι φανερὸν ὅτι οὐδὲν μόριον τὸ νῦν τοῦ χρόνου, οὐδ’ ἡ διαίρεσις τῆς κινήσεως, ὥσπερ οὐδ’ ἡ στιγμὴ τῆς γραμμῆς· αἱ δὲ γραμμαὶ αἱ δύο τῆς μιᾶς μόρια.

ᾗ μὲν οὖν πέρας τὸ νῦν, οὐ χρόνος, ἀλλὰ συμβέβηκεν· ᾗ δ’ ἀριθμεῖ, ἀριθμός · τὰ μὲν γὰρ πέρατα ἐκείνου μόνον ἐστὶν οὗ ἐστιν πέρατα, ὁ δ’ ἀριθμὸς ὁ τῶνδε τῶν ἵππων, ἡ δεκάς, καὶ ἄλλοθι.

ὅτι μὲν τοίνυν ὁ χρόνος ἀριθμός ἐστιν κινήσεως κατὰ τὸ πρότερον καὶ ὕστερον, καὶ συνεχής (συνεχοῦς γάρ), φανερόν.

Κεφάλαιο 12

Ἐλάχιστος δὲ ἀριθμὸς ὁ μὲν ἁπλῶς ἐστὶν ἡ δυάς· τὶς δὲ ἀριθμὸς ἔστι μὲν ὡς ἔστιν, ἔστι δ’ ὡς οὐκ ἔστιν, οἷον γραμμῆς ἐλάχιστος πλήθει μέν ἐστιν αἱ δύο ἢ ἡ μία, μεγέθει δ’ οὐκ ἔστιν ἐλάχιστος· ἀεὶ γὰρ διαιρεῖται πᾶσα γραμμή. ὥστε ὁμοίως καὶ χρόνος· ἐλάχιστος γὰρ κατὰ μὲν ἀριθμόν ἐστιν ὁ εἷς ἢ οἱ δύο, κατὰ μέγεθος δ’ οὐκ ἔστιν.

φανερὸν [220b] δὲ καὶ ὅτι ταχὺς μὲν καὶ βραδὺς οὐ λέγεται, πολὺς δὲ καὶ ὀλίγος καὶ μακρὸς καὶ βραχύς. ᾗ μὲν γὰρ συνεχής, μακρὸς καὶ βραχύς, ᾗ δὲ ἀριθμός, πολὺς καὶ ὀλίγος.

ταχὺς δὲ καὶ βραδὺς οὐκ ἔστιν· οὐδὲ γὰρ ἀριθμὸς ᾗ ἀριθμοῦμεν ταχὺς καὶ βραδὺς οὐδείς. καὶ ὁ αὐτὸς δὲ πανταχοῦ ἅμα· πρότερον δὲ καὶ ὕστερον οὐχ ὁ αὐτός, ὅτι καὶ ἡ μεταβολὴ ἡ μὲν παροῦσα μία, ἡ δὲ γεγενημένη καὶ ἡ μέλλουσα ἑτέρα, ὁ δὲ χρόνος ἀριθμός ἐστιν οὐχ ᾧ ἀριθμοῦμεν ἀλλ’ ὁ ἀριθμούμενος, οὗτος δὲ συμβαίνει πρότερον καὶ ὕστερον ἀεὶ ἕτερος· τὰ γὰρ νῦν ἕτερα. ἔστι δὲ ὁ ἀριθμὸς εἷς μὲν καὶ ὁ αὐτὸς ὁ τῶν ἑκατὸν ἵππων καὶ ὁ τῶν ἑκατὸν ἀνθρώπων, ὧν δ’ ἀριθμός, ἕτερα, οἱ ἵπποι τῶν ἀνθρώπων. ἔτι ὡς ἐνδέχεται κίνησιν εἶναι τὴν αὐτὴν καὶ μίαν πάλιν καὶ πάλιν, οὕτω καὶ χρόνον, οἷον ἐνιαυτὸν ἢ ἔαρ ἢ μετόπωρον.

οὐ μόνον δὲ τὴν κίνησιν τῷ χρόνῳ μετροῦμεν, ἀλλὰ καὶ τῇ κινήσει τὸν χρόνον διὰ τὸ ὁρίζεσθαι ὑπ’ ἀλλήλων· ὁ μὲν γὰρ χρόνος ὁρίζει τὴν κίνησιν ἀριθμὸς ὢν αὐτῆς, ἡ δὲ κίνησις τὸν χρόνον. καὶ λέγομεν πολὺν καὶ ὀλίγον χρόνον τῇ κινήσει μετροῦντες, καθάπερ καὶ τῷ ἀριθμητῷ τὸν ἀριθμόν, οἷον τῷ ἑνὶ ἵππῳ τὸν τῶν ἵππων ἀριθμόν. τῷ μὲν γὰρ ἀριθμῷ τὸ τῶν ἵππων πλῆθος γνωρίζομεν, πάλιν δὲ τῷ ἑνὶ ἵππῳ τὸν τῶν ἵππων ἀριθμὸν αὐτόν. ὁμοίως δὲ καὶ ἐπὶ τοῦ χρόνου καὶ τῆς κινήσεως· τῷ μὲν γὰρ χρόνῳ τὴν κίνησιν, τῇ δὲ κινήσει τὸν χρόνον μετροῦμεν. καὶ τοῦτ’ εὐλόγως συμβέβηκεν· ἀκολουθεῖ γὰρ τῷ μὲν μεγέθει ἡ κίνησις, τῇ δὲ κινήσει ὁ χρό νος, τῷ καὶ ποσὰ καὶ συνεχῆ καὶ διαιρετὰ εἶναι· διὰ μὲν γὰρ τὸ τὸ μέγεθος εἶναι τοιοῦτον ἡ κίνησις ταῦτα πέπονθεν, διὰ δὲ τὴν κίνησιν ὁ χρόνος. καὶ μετροῦμεν καὶ τὸ μέγεθος τῇ. κινήσει καὶ τὴν κίνησιν τῷ μεγέθει· πολλὴν γὰρ εἶναί φαμεν τὴν ὁδόν, ἂν ἡ πορεία πολλή, καὶ ταύτην πολλήν, ἂν ἡ ὁδὸς [ᾖ] πολλή· καὶ τὸν χρόνον, ἂν ἡ κίνησις, καὶ τὴν κίνησιν, ἂν ὁ χρόνος.

ἐπεὶ δ’ ἐστὶν ὁ χρόνος μέτρον [221a] κινήσεως καὶ τοῦ κινεῖσθαι, μετρεῖ δ’ οὗτος τὴν κίνησιν τῷ ὁρίσαι τινὰ κίνησιν ἣ καταμετρήσει τὴν ὅλην (ὥσπερ καὶ τὸ μῆκος ὁ πῆχυς τῷ ὁρίσαι τι μέγεθος ὃ ἀναμετρήσει τὸ ὅλον), καὶ ἔστιν τῇ κινήσει τὸ ἐν χρόνῳ εἶναι τὸ μετρεῖσθαι τῷ χρόνῳ καὶ αὐτὴν καὶ τὸ εἶναι αὐτῆς (ἅμα γὰρ τὴν κίνησιν καὶ τὸ εἶναι τῆς κινήσεως μετρεῖ, καὶ τοῦτ᾽ ἔστιν αὐτῇ τὸ ἐν χρόνῳ εἶναι, τὸ μετρεῖσθαι αὐτῆς τὸ εἶναι), δῆλον ὅτι καὶ τοῖς ἄλλοις τοῦτ᾽ ἔστι τὸ ἐν χρόνῳ εἶναι, τὸ μετρεῖσθαι αὐτῶν τὸ εἶναι ὑπὸ τοῦ χρόνου. τὸ γὰρ ἐν χρόνῳ εἶναι δυοῖν ἐστιν θάτερον, ἓν μὲν τὸ εἶναι τότε ὅτε ὁ χρόνος ἔστιν, ἓν δὲ ὥσπερ ἔνια λέγομεν ὅτι ἐν ἀριθμῷ ἐστιν. τοῦτο δὲ σημαίνει ἤτοι ὡς μέρος ἀριθμοῦ καὶ πάθος, καὶ ὅλως ὅτι τοῦ ἀριθμοῦ τι, ἢ ὅτι ἔστιν αὐτοῦ ἀριθμός.

ἐπεὶ δ᾽ ἀριθμὸς ὁ χρόνος, τὸ μὲν νῦν καὶ τὸ πρότερον καὶ ὅσα τοιαῦτα οὕτως ἐν χρόνῳ ὡς ἐν ἀριθμῷ μονὰς καὶ τὸ περιττὸν καὶ ἄρτιον (τὰ μὲν γὰρ τοῦ ἀριθμοῦ τι, τὰ δὲ τοῦ χρόνου τί ἐστιν)· τὰ δὲ πράγματα ὡς ἐν ἀριθμῷ τῷ χρόνῳ ἐστίν. εἰ δὲ τοῦτο, περιέχεται ὑπὸ χρόνου ὥσπερ <καὶ τὰ ἐν ἀριθμῷ ὑπ᾽ ἀριθμοῦ> καὶ τὰ ἐν τόπῳ ὑπὸ τόπου.

φανερὸν δὲ καὶ ὅτι οὐκ ἔστιν τὸ ἐν χρόνῳ εἶναι τὸ εἶναι ὅτε ὁ χρόνος ἔστιν, ὥσπερ οὐδὲ τὸ ἐν κινήσει εἶναι οὐδὲ τὸ ἐν τόπῳ ὅτε ἡ κίνησις καὶ ὁ τόπος ἔστιν. εἰ γὰρ ἔσται τὸ ἔν τινι οὕτω, πάντα τὰ πράγματα ἐν ὁτῳοῦν ἔσται, καὶ ὁ οὐρανὸς ἐν τῇ κέγχρῳ· ὅτε γὰρ ἡ κέγχρος ἔστιν, ἔστι καὶ ὁ οὐρανός. ἀλλὰ τοῦτο μὲν συμβέβηκεν, ἐκεῖνο δ᾽ ἀνάγκη παρακολουθεῖν, καὶ τῷ ὄντι ἐν χρόνῳ εἶναί τινα χρόνον ὅτε κἀκεῖνο ἔστιν, καὶ τῷ ἐν κινήσει ὄντι εἶναι τότε κίνησιν.

ἐπεὶ δέ ἐστιν ὡς ἐν ἀριθμῷ τὸ ἐν χρόνῳ, ληφθήσεταί τις πλείων χρόνος παντὸς τοῦ ἐν χρόνῳ ὄντος· διὸ ἀνάγκη πάντα τὰ ἐν χρόνῳ ὄντα περιέχεσθαι ὑπὸ χρόνου, ὥσπερ καὶ τἆλλα ὅσα ἔν τινί ἐστιν, οἷον τὰ ἐν τόπῳ ὑπὸ τοῦ τόπου.

καὶ πάσχει δή τι ὑπὸ τοῦ χρόνου, καθάπερ καὶ λέγειν εἰώθαμεν ὅτι κατατήκει ὁ χρόνος, καὶ γηράσκει πάνθ᾽ ὑπὸ τοῦ χρόνου, καὶ ἐπιλανθάνεται διὰ τὸν χρόνον, ἀλλ᾽ [221b] οὐ μεμάθηκεν, οὐδὲ νέον γέγονεν οὐδὲ καλόν· φθορᾶς γὰρ αἴτιος καθ᾽ ἑαυτὸν μᾶλλον ὁ χρόνος· ἀριθμὸς γὰρ κινήσεως, ἡ δὲ κίνησις ἐξίστησιν τὸ ὑπάρχον· ὥστε φανερὸν ὅτι τὰ αἰεὶ ὄντα, ᾗ αἰεὶ ὄντα, οὐκ ἔστιν ἐν χρόνῳ· οὐ γὰρ περιέχεται ὑπὸ χρόνου, οὐδὲ μετρεῖται τὸ εἶναι αὐτῶν ὑπὸ τοῦ χρόνου· σημεῖον δὲ τούτου ὅτι οὐδὲ πάσχει οὐδὲν ὑπὸ τοῦ χρόνου ὡς οὐκ ὄντα ἐν χρόνῳ. ἐπεὶ δ᾽ ἐστὶν ὁ χρόνος μέτρον κινήσεως, ἔσται καὶ ἠρεμίας μέτρον [κατὰ συμβεβηκός]· πᾶσα γὰρ ἠρεμία ἐν χρόνῳ. οὐ γὰρ ὥσπερ τὸ ἐν κινήσει ὂν ἀνάγκη κινεῖσθαι, οὕτω καὶ τὸ ἐν χρόνῳ· οὐ γὰρ κίνησις ὁ χρόνος, ἀλλ᾽ ἀριθμὸς κινήσεως, ἐν ἀριθμῷ δὲ κινήσεως ἐνδέχεται εἶναι καὶ τὸ ἠρεμοῦν. οὐ γὰρ πᾶν τὸ ἀκίνητον ἠρεμεῖ, ἀλλὰ τὸ ἐστερημένον κινήσεως πεφυκὸς δὲ κινεῖσθαι, καθάπερ εἴρηται ἐν τοῖς πρότερον.

τὸ δ' εἶναι ἐν ἀριθμῷ ἐστιν τὸ εἶναί τινα ἀριθμὸν τοῦ πράγματος, καὶ μετρεῖσθαι τὸ εἶναι αὐτοῦ τῷ ἀριθμῷ ἐν ᾧ ἐστιν, ὥστ' εἰ ἐν χρόνῳ, ὑπὸ χρόνου. μετρήσει δ' ὁ χρόνος τὸ κινούμενον καὶ τὸ ἠρεμοῦν, ᾗ τὸ μὲν κινούμενον τὸ δὲ ἠρεμοῦν· τὴν γὰρ κίνησιν αὐτῶν μετρήσει καὶ τὴν ἠρεμίαν, πόση τις.

ὥστε τὸ κινούμενον οὐχ ἁπλῶς ἔσται μετρητὸν ὑπὸ χρόνου, ᾗ ποσόν τί ἐστιν, ἀλλ' ᾗ ἡ κίνησις αὐτοῦ ποσή. ὥστε ὅσα μήτε κινεῖται μήτ' ἠρεμεῖ, οὐκ ἔστιν ἐν χρόνῳ· τὸ μὲν γὰρ ἐν χρόνῳ εἶναι τὸ μετρεῖσθαί ἐστι χρόνῳ, ὁ δὲ χρόνος κινήσεως καὶ ἠρεμίας μέτρον.

φανερὸν οὖν ὅτι οὐδὲ τὸ μὴ ὂν ἔσται πᾶν ἐν χρόνῳ, οἷον ὅσα μὴ ἐνδέχεται ἄλλως, ὥσπερ τὸ τὴν διάμετρον εἶναι τῇ πλευρᾷ σύμμετρον.

ὅλως γάρ, εἰ μέτρον μέν ἐστι κινήσεως ὁ χρόνος καθ' αὑτό, τῶν δ' ἄλλων κατὰ συμβεβηκός, δῆλον ὅτι ὧν τὸ εἶναι μετρεῖ, τούτοις ἅπασιν ἔσται τὸ εἶναι ἐν τῷ ἠρεμεῖν ἢ κινεῖσθαι. ὅσα μὲν οὖν φθαρτὰ καὶ γενητὰ καὶ ὅλως ὁτὲ μὲν ὄντα ὁτὲ δὲ μή, ἀνάγκη ἐν χρόνῳ εἶναι (ἔστιν γὰρ χρόνος τις πλείων, ὃς ὑπερέξει τοῦ τε εἶναι αὐτῶν καὶ τοῦ μετροῦντος τὴν οὐσίαν αὐτῶν)· τῶν δὲ μὴ ὄντων ὅσα μὲν περιέχει ὁ χρόνος, τὰ μὲν ἦν, οἷον Ὅμηρός ποτε [222a] ἦν, τὰ δὲ ἔσται, οἷον τῶν μελλόντων τι, ἐφ' ὁπότερα περιέχει· καὶ εἰ ἐπ' ἄμφω, ἀμφότερα [καὶ ἦν καὶ ἔσται]· ὅσα δὲ μὴ περιέχει μηδαμῇ, οὔτε ἦν οὔτε ἔστιν οὔτε ἔσται. ἔστι δὲ τὰ τοιαῦτα τῶν μὴ ὄντων, ὅσων τἀντικείμενα αἰεὶ ἔστιν, οἷον τὸ ἀσύμμετρον εἶναι τὴν διάμετρον ἀεὶ ἔστι, καὶ οὐκ ἔσται τοῦτ' ἐν χρόνῳ. οὐ τοίνυν οὐδὲ τὸ σύμμετρον· διὸ αἰεὶ οὐκ ἔστιν, ὅτι ἐναντίον τῷ αἰεὶ ὄντι. ὅσων δὲ τὸ ἐναντίον μὴ αἰεί, ταῦτα δὲ δύναται καὶ εἶναι καὶ μή, καὶ ἔστιν γένεσις καὶ φθορὰ αὐτῶν.

Κεφάλαιο 13

Τὸ δὲ νῦν ἐστιν συνέχεια χρόνου, ὥσπερ ἐλέχθη· συνέχει γὰρ τὸν χρόνον τὸν παρεληλυθότα καὶ ἐσόμενον, καὶ πέρας χρόνου ἐστίν· ἔστι γὰρ τοῦ μὲν ἀρχή, τοῦ δὲ τελευτή. ἀλλὰ τοῦτ' οὐχ ὥσπερ ἐπὶ τῆς στιγμῆς μενούσης φανερόν. διαιρεῖ δὲ δυνάμει. καὶ ᾗ μὲν τοιοῦτο, αἰεὶ ἕτερον τὸ νῦν, ᾗ δὲ συνδεῖ, αἰεὶ τὸ αὐτό, ὥσπερ ἐπὶ τῶν μαθηματικῶν γραμμῶν (οὐ γὰρ ἡ αὐτὴ αἰεὶ στιγμὴ τῇ νοήσει· διαιρούντων γὰρ ἄλλη καὶ ἄλλη· ᾗ δὲ μία, ἡ αὐτὴ πάντῃ)

-οὕτω καὶ τὸ νῦν τὸ μὲν τοῦ χρόνου διαίρεσις κατὰ δύναμιν, τὸ δὲ πέρας ἀμφοῖν καὶ ἑνότης· ἔστι δὲ ταὐτὸ καὶ κατὰ ταὐτὸ ἡ διαίρεσις καὶ ἡ ἕνωσις, τὸ δ' εἶναι οὐ ταὐτό.

τὸ μὲν οὖν οὕτω λέγεται τῶν νῦν, ἄλλο δ' ὅταν ὁ χρόνος ὁ τούτου ἐγγὺς ᾖ. ἥξει νῦν, ὅτι τήμερον ἥξει· ἥκει νῦν, ὅτι ἦλθε τήμερον. τὰ δ' ἐν Ἰλίῳ γέγονεν οὐ νῦν, οὐδ' ὁ κατακλυσμὸς [γέγονε] νῦν· καίτοι συνεχὴς ὁ χρόνος εἰς αὐτά, ἀλλ' ὅτι οὐκ ἐγγύς.

τὸ δὲ ποτέ χρόνος ὡρισμένος πρὸς τὸ πρότερον νῦν, οἷον ποτὲ ἐλήφθη Τροία, καὶ ποτὲ ἔσται κατακλυσμός· δεῖ γὰρ πεπεράνθαι πρὸς τὸ νῦν. ἔσται ἄρα ποσός τις ἀπὸ τοῦδε χρόνος εἰς ἐκεῖνο, καὶ ἦν εἰς τὸ παρελθόν. εἰ δὲ μηδεὶς χρόνος ὃς οὔ ποτε, πᾶς ἂν εἴη χρόνος πεπερασμένος.

ἆρ' οὖν ὑπολείψει; ἢ οὔ, εἴπερ αἰεὶ ἔστι κίνησις; ἄλλος οὖν ἢ ὁ αὐτὸς πολλάκις; δῆλον ὅτι ὡς ἂν ἡ κίνησις, οὕτω καὶ ὁ χρόνος· εἰ μὲν γὰρ ἡ αὐτὴ καὶ μία γίγνεταί ποτε, ἔσται καὶ χρόνος εἷς καὶ ὁ αὐτός, εἰ δὲ μή, οὐκ ἔσται.

ἐπεὶ δὲ τὸ νῦν τελευτὴ [222b] καὶ ἀρχὴ χρόνου, ἀλλ' οὐ τοῦ αὐτοῦ, ἀλλὰ τοῦ μὲν παρήκοντος τελευτή, ἀρχὴ δὲ τοῦ μέλλοντος, ἔχοι ἂν ὥσπερ ὁ κύκλος ἐν τῷ αὐτῷ πως τὸ κυρτὸν καὶ τὸ κοῖλον, οὕτως καὶ ὁ χρόνος ἀεὶ ἐν ἀρχῇ καὶ τελευτῇ. καὶ διὰ τοῦτο δοκεῖ ἀεὶ ἕτερος· οὐ γὰρ τοῦ αὐτοῦ ἀρχὴ καὶ τελευτὴ τὸ νῦν· ἅμα γὰρ ἂν καὶ κατὰ τὸ αὐτὸ τἀναντία ἂν εἴη. καὶ οὐχ ὑπολείψει δή· αἰεὶ γὰρ ἐν ἀρχῇ.

τὸ δ' ἤδη τὸ ἐγγύς ἐστι τοῦ παρόντος νῦν ἀτόμου μέρος τοῦ μέλλοντος χρόνου (πότε βαδίζεις; ἤδη, ὅτι ἐγγὺς ὁ χρόνος ἐν ᾧ μέλλει), καὶ τοῦ παρεληλυθότος χρόνου τὸ μὴ πόρρω τοῦ νῦν (πότε βαδίζεις; ἤδη βεβάδικα). τὸ δὲ Ἴλιον φάναι ἤδη ἑαλωκέναι οὐ λέγομεν, ὅτι λίαν πόρρω τοῦ νῦν. καὶ τὸ ἄρτι τὸ ἐγγὺς τοῦ παρόντος νῦν [τὸ] μόριον τοῦ παρελθόντος. πότε ἦλθες; ἄρτι, ἐὰν ᾖ ὁ χρόνος ἐγγὺς τοῦ ἐνεστῶτος νῦν. πάλαι δὲ τὸ πόρρω. τὸ δ' ἐξαίφνης τὸ ἐν ἀναισθήτῳ χρόνῳ διὰ μικρότητα ἐκστάν· μεταβολὴ δὲ πᾶσα φύσει ἐκστατικόν. ἐν δὲ τῷ χρόνῳ πάντα γίγνεται καὶ φθείρεται· διὸ καὶ οἱ μὲν σοφώτατον ἔλεγον, ὁ δὲ Πυθαγόρειος Πάρων ἀμαθέστατον, ὅτι καὶ ἐπιλανθάνονται ἐν τούτῳ, λέγων ὀρθότερον. δῆλον οὖν ὅτι φθορᾶς μᾶλλον ἔσται καθ’ αὑτὸν αἴτιος ἢ γενέσεως, καθάπερ ἐλέχθη καὶ πρότερον (ἐκστατικὸν γὰρ ἡ μεταβολὴ καθ’ αὑτήν), γενέσεως δὲ καὶ τοῦ εἶναι κατὰ συμβεβηκός. σημεῖον δὲ ἱκανὸν ὅτι γίγνεται μὲν οὐδὲν ἄνευ τοῦ κινεῖσθαί πως αὐτὸ καὶ πράττειν, φθείρεται δὲ καὶ μηδὲν κινούμενον. καὶ ταύτην μάλιστα λέγειν εἰώθαμεν ὑπὸ τοῦ χρόνου φθοράν. οὐ μὴν ἀλλ’ οὐδὲ ταύτην ὁ χρόνος ποιεῖ, ἀλλὰ συμβαίνει ἐν χρόνῳ γίγνεσθαι καὶ ταύτην τὴν μεταβολήν.

ὅτι μὲν οὖν ἔστιν ὁ χρόνος καὶ τί, καὶ ποσαχῶς λέγεται τὸ νῦν, καὶ τί τὸ ποτὲ καὶ τὸ ἄρτι καὶ τὸ ἤδη καὶ τὸ πάλαι καὶ τὸ ἐξαίφνης, εἴρηται.

Κεφάλαιο 14

Τούτων δ’ ἡμῖν οὕτω διωρισμένων φανερὸν ὅτι πᾶσα μεταβολὴ καὶ ἅπαν τὸ κινούμενον ἐν χρόνῳ. τὸ γὰρ θᾶττον καὶ βραδύτερον κατὰ πᾶσάν ἐστιν μεταβολήν (ἐν πᾶσι γὰρ οὕτω φαίνεται)· λέγω δὲ θᾶττον κινεῖσθαι τὸ πρότερον [223a] μεταβάλλον εἰς τὸ ὑποκείμενον κατὰ τὸ αὐτὸ διάστημα καὶ ὁμαλὴν κίνησιν κινούμενον (οἷον ἐπὶ τῆς φορᾶς, εἰ ἄμφω κατὰ τὴν περιφερῆ κινεῖται ἢ ἄμφω κατὰ τὴν εὐθεῖαν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων). ἀλλὰ μὴν τό γε πρότερον ἐν χρόνῳ ἐστί· πρότερον γὰρ καὶ ὕστερον λέγομεν κατὰ τὴν πρὸς τὸ νῦν ἀπόστασιν, τὸ δὲ νῦν ὅρος τοῦ παρήκοντος καὶ τοῦ μέλλοντος· ὥστ’ ἐπεὶ τὰ νῦν ἐν χρόνῳ, καὶ τὸ πρότερον καὶ ὕστερον ἐν χρόνῳ ἔσται· ἐν ᾧ γὰρ τὸ νῦν, καὶ ἡ τοῦ νῦν ἀπόστασις. (ἐναντίως δὲ λέγεται τὸ πρότερον κατά τε τὸν παρεληλυθότα χρόνον καὶ τὸν μέλλοντα· ἐν μὲν γὰρ τῷ παρεληλυθότι πρότερον λέγομεν τὸ πορρώτερον τοῦ νῦν, ὕστερον δὲ τὸ ἐγγύτερον, ἐν δὲ τῷ μέλλοντι πρότερον μὲν τὸ ἐγγύτερον, ὕστερον δὲ τὸ πορρώτερον.) ὥστε ἐπεὶ τὸ μὲν πρότερον ἐν χρόνῳ, πάσῃ δ’ ἀκολουθεῖ κινήσει τὸ πρότερον, φανερὸν ὅτι πᾶσα μεταβολὴ καὶ πᾶσα κίνησις ἐν χρόνῳ ἐστίν. ἄξιον δ’ ἐπισκέψεως καὶ πῶς ποτε ἔχει ὁ χρόνος πρὸς τὴν ψυχήν, καὶ διὰ τί ἐν παντὶ δοκεῖ εἶναι ὁ χρόνος, καὶ ἐν γῇ καὶ ἐν θαλάττῃ καὶ ἐν οὐρανῷ. ἢ ὅτι κινήσεώς τι πάθος ἢ ἕξις, ἀριθμός γε ὤν, ταῦτα δὲ κινητὰ πάντα (ἐν τόπῳ γὰρ πάντα), ὁ δὲ χρόνος καὶ ἡ κίνησις ἅμα κατά τε δύναμιν καὶ κατ’ ἐνέργειαν;

πότερον δὲ μὴ οὔσης ψυχῆς εἴη ἂν ὁ χρόνος ἢ οὔ, ἀπορήσειεν ἄν τις. ἀδυνάτου γὰρ ὄντος εἶναι τοῦ ἀριθμήσοντος ἀδύνατον καὶ ἀριθμητόν τι εἶναι, ὥστε δῆλον ὅτι οὐδ’ ἀριθμός. ἀριθμὸς γὰρ ἢ τὸ ἠριθμημένον ἢ τὸ ἀριθμητόν. εἰ δὲ μηδὲν ἄλλο πέφυκεν ἀριθμεῖν ἢ ψυχὴ καὶ ψυχῆς νοῦς, ἀδύνατον εἶναι χρόνον ψυχῆς μὴ οὔσης, ἀλλ’ ἢ τοῦτο ὅ ποτε ὂν ἔστιν ὁ χρόνος, οἷον εἰ ἐνδέχεται κίνησιν εἶναι ἄνευ ψυχῆς. τὸ δὲ πρότερον καὶ ὕστερον ἐν κινήσει ἐστίν· χρόνος δὲ ταῦτ’ ἐστὶν ᾗ ἀριθμητά ἐστιν.

ἀπορήσειε δ’ ἄν τις καὶ ποίας κινήσεως ὁ χρόνος ἀριθμός. ἢ ὁποιασοῦν; καὶ γὰρ γίγνεται ἐν χρόνῳ καὶ φθείρεται καὶ αὐξάνεται καὶ ἀλλοιοῦται καὶ φέρεται· ᾗ οὖν κίνησίς ἐστι, ταύτῃ ἐστὶν ἑκάστης κινήσεως ἀριθμός. διὸ κινήσεώς ἐστιν ἁπλῶς ἀριθμὸς [223b] συνεχοῦς, ἀλλ’ οὐ τινός.

ἀλλ’ ἔστι νῦν κεκινῆσθαι καὶ ἄλλο· ὧν ἑκατέρας τῆς κινήσεως εἴη ἂν ἀριθμός. ἕτερος οὖν χρόνος ἔστιν, καὶ ἅμα δύο ἴσοι χρόνοι ἂν εἶεν· ἢ οὔ; ὁ αὐτὸς γὰρ χρόνος καὶ εἷς ὁ ἴσος καὶ ἅμα· εἴδει δὲ καὶ οἱ μὴ ἅμα· εἰ γὰρ εἶεν κύνες, οἱ δ’ ἵπποι, ἑκάτεροι δ’ ἑπτά, ὁ αὐτὸς ἀριθμός. οὕτω δὲ καὶ τῶν κινήσεων τῶν ἅμα περαινομένων ὁ αὐτὸς χρόνος, ἀλλ’ ἡ μὲν ταχεῖα ἴσως ἡ δ’ οὔ, καὶ ἡ μὲν φορὰ ἡ δ’ ἀλλοίωσις· ὁ μέντοι χρόνος ὁ αὐτός, εἴπερ καὶ [ὁ ἀριθμὸς] ἴσος καὶ ἅμα, τῆς τε ἀλλοιώσεως καὶ τῆς φορᾶς. καὶ διὰ τοῦτο αἱ μὲν κινήσεις ἕτεραι καὶ χωρίς, ὁ δὲ χρόνος πανταχοῦ ὁ αὐτός, ὅτι καὶ ὁ ἀριθμὸς εἷς καὶ ὁ αὐτὸς πανταχοῦ ὁ τῶν ἴσων καὶ ἅμα. ἐπεὶ δ’ ἔστι φορὰ καὶ ταύτης ἡ κύκλῳ, ἀριθμεῖται δ’ ἕκαστον ἑνί τινι συγγενεῖ, μονάδες μονάδι, ἵπποι δ’ ἵππῳ, οὕτω <δὲ> καὶ ὁ χρόνος χρόνῳ τινὶ ὡρισμένῳ, μετρεῖται δ’, ὥσπερ εἴπομεν, ὅ τε χρόνος κινήσει καὶ ἡ κίνησις χρόνῳ (τοῦτο δ’ ἐστίν, ὅτι ὑπὸ τῆς ὡρισμένης κινήσεως χρόνῳ μετρεῖται τῆς τε κινήσεως τὸ ποσὸν καὶ τοῦ χρόνου)-εἰ οὖν τὸ πρῶτον μέτρον πάντων τῶν συγγενῶν, ἡ κυκλοφορία ἡ ὁμαλὴς μέτρον μάλιστα, ὅτι ὁ ἀριθμὸς ὁ ταύτης γνωριμώτατος. ἀλλοίωσις μὲν οὖν οὐδὲ αὔξησις οὐδὲ γένεσις οὐκ εἰσὶν ὁμαλεῖς, φορὰ δ’ ἔστιν. διὸ καὶ δοκεῖ ὁ χρόνος εἶναι ἡ τῆς σφαίρας κίνησις, ὅτι ταύτῃ μετροῦνται αἱ ἄλλαι κινήσεις καὶ ὁ χρόνος ταύτῃ τῇ κινήσει.

διὰ δὲ τοῦτο καὶ τὸ εἰωθὸς λέγεσθαι συμβαίνει· φασὶν γὰρ κύκλον εἶναι τὰ ἀνθρώπινα πράγματα, καὶ τῶν ἄλλων τῶν κίνησιν ἐχόντων φυσικὴν καὶ γένεσιν καὶ φθοράν. τοῦτο δέ, ὅτι ταῦτα πάντα τῷ χρόνῳ κρίνεται, καὶ λαμβάνει τελευτὴν καὶ ἀρχὴν ὥσπερ ἂν εἰ κατά τινα περίοδον. καὶ γὰρ ὁ χρόνος αὐτὸς εἶναι δοκεῖ κύκλος τις· τοῦτο δὲ πάλιν δοκεῖ, διότι τοιαύτης ἐστὶ φορᾶς μέτρον καὶ μετρεῖται αὐτὸς ὑπὸ τοιαύτης. ὥστε τὸ λέγειν εἶναι τὰ γιγνόμενα τῶν πραγμάτων κύκλον τὸ λέγειν ἐστὶν τοῦ χρόνου εἶναί τινα κύκλον· τοῦτο δέ, ὅτι μετρεῖται τῇ κυκλοφορίᾳ· παρὰ γὰρ τὸ μέτρον οὐδὲν [224a] ἄλλο παρεμφαίνεται τῷ μετρουμένῳ, ἀλλ’ ἢ πλείω μέτρα τὸ ὅλον.

λέγεται δὲ ὀρθῶς καὶ ὅτι ἀριθμὸς μὲν ὁ αὐτὸς ὁ τῶν προβάτων καὶ τῶν κυνῶν, εἰ ἴσος ἑκάτερος, δεκὰς δὲ οὐχ ἡ αὐτὴ οὐδὲ δέκα τὰ αὐτά, ὥσπερ οὐδὲ τρίγωνα τὰ αὐτὰ τὸ ἰσόπλευρον καὶ τὸ σκαληνές, καίτοι σχῆμά γε ταὐτό, ὅτι τρίγωνα ἄμφω· ταὐτὸ γὰρ λέγεται οὗ μὴ διαφέρει διαφορᾷ, ἀλλ’ οὐχὶ οὗ διαφέρει, οἷον τρίγωνον τριγώνου <τριγώνου> διαφορᾷ διαφέρει· τοιγαροῦν ἕτερα τρίγωνα· σχήματος δὲ οὔ, ἀλλ’ ἐν τῇ αὐτῇ διαιρέσει καὶ μιᾷ. σχῆμα γὰρ τὸ μὲν τοιόνδε κύκλος, τὸ δὲ τοιόνδε τρίγωνον, τούτου δὲ τὸ μὲν τοι όνδε ἰσόπλευρον, τὸ δὲ τοιόνδε σκαληνές. σχῆμα μὲν οὖν τὸ αὐτό, καὶ τοῦτο τρίγωνον, τρίγωνον δ’ οὐ τὸ αὐτό. καὶ ἀριθμὸς δὴ ὁ αὐτός (οὐ γὰρ διαφέρει ἀριθμοῦ διαφορᾷ ὁ ἀριθμὸς αὐτῶν), δεκὰς δ’ οὐχ ἡ αὐτή· ἐφ’ ὧν γὰρ λέγεται, διαφέρει· τὰ μὲν γὰρ κύνες, τὰ δ’ ἵπποι.

καὶ περὶ μὲν χρόνου καὶ αὐτοῦ καὶ τῶν περὶ αὐτὸν οἰκείων τῇ σκέψει εἴρηται.

Κεφάλαιο 1

Μεταβάλλει δὲ τὸ μεταβάλλον πᾶν τὸ μὲν κατὰ συμβεβηκός, οἷον ὅταν λέγωμεν τὸ μουσικὸν βαδίζειν, ὅτι ᾧ συμβέβηκεν μουσικῷ εἶναι, τοῦτο βαδίζει· τὸ δὲ τῷ τούτου τι μεταβάλλειν ἁπλῶς λέγεται μεταβάλλειν, οἷον ὅσα λέγεται κατὰ μέρη (ὑγιάζεται γὰρ τὸ σῶμα, ὅτι ὁ ὀφθαλμὸς ἢ ὁ θώραξ, ταῦτα δὲ μέρη τοῦ ὅλου σώματος)· ἔστι δέ τι ὃ οὔτε κατὰ συμβεβηκὸς κινεῖται οὔτε τῷ ἄλλο τι τῶν αὐτοῦ, ἀλλὰ τῷ αὐτὸ κινεῖσθαι πρῶτον. καὶ τοῦτ' ἔστι τὸ καθ' αὑτὸ κινητόν, κατ' ἄλλην δὲ κίνησιν ἕτερον, οἷον ἀλλοιωτόν, καὶ ἀλλοιώσεως ὑγιαντὸν ἢ θερμαντὸν ἕτερον. ἔστι δὲ καὶ ἐπὶ τοῦ κινοῦντος ὡσαύτως· τὸ μὲν γὰρ κατὰ συμβεβηκὸς κινεῖ, τὸ δὲ κατὰ μέρος τῷ τῶν τούτου τι, τὸ δὲ καθ' αὑτὸ πρῶτον, οἷον ὁ μὲν ἰατρὸς ἰᾶται, ἡ δὲ χεὶρ πλήττει. ἐπεὶ δ' ἔστι μέν τι τὸ κινοῦν πρῶτον, ἔστι δέ τι τὸ κινούμενον, ἔτι ἐν ᾧ, ὁ χρόνος, καὶ παρὰ ταῦτα ἐξ οὗ καὶ εἰς (224b.) ὅ — πᾶσα γὰρ κίνησις ἔκ τινος καὶ εἴς τι· ἕτερον γὰρ τὸ πρῶτον κινούμενον καὶ εἰς ὃ κινεῖται καὶ ἐξ οὗ, οἷον τὸ ξύλον καὶ τὸ θερμὸν καὶ τὸ ψυχρόν· τούτων δὲ τὸ μὲν ὅ, τὸ δ' εἰς ὅ, τὸ δ' ἐξ οὗ — ἡ δὴ κίνησις δῆλον ὅτι ἐν τῷ ξύλῳ, οὐκ ἐν τῷ εἴδει· οὔτε γὰρ κινεῖ οὔτε κινεῖται τὸ εἶδος ἢ ὁ τόπος ἢ τὸ τοσόνδε, ἀλλ' ἔστι κινοῦν καὶ κινούμενον καὶ εἰς ὃ κινεῖται. μᾶλλον γὰρ εἰς ὃ ἢ ἐξ οὗ κινεῖται ὀνομάζεται ἡ μεταβολή. διὸ καὶ ἡ φθορὰ εἰς τὸ μὴ ὂν μεταβολή ἐστιν· καίτοι καὶ ἐξ ὄντος μεταβάλλει τὸ φθειρόμενον· καὶ ἡ γένεσις εἰς ὄν, καίτοι καὶ ἐκ μὴ ὄντος. τί μὲν οὖν ἐστιν ἡ κίνησις, εἴρηται πρότερον· τὰ δὲ εἴδη καὶ τὰ πάθη καὶ ὁ τόπος, εἰς ἃ κινοῦνται τὰ κινούμενα, ἀκίνητά ἐστιν, οἷον ἡ ἐπιστήμη καὶ ἡ θερμότης. καίτοι ἀπορήσειεν ἄν τις, εἰ τὰ πάθη κινήσεις, ἡ δὲ λευκότης πάθος· ἔσται γὰρ εἰς κίνησιν μεταβολή. ἀλλ' ἴσως οὐχ ἡ λευκότης κίνησις, ἀλλ' ἡ λεύκαν σις. ἔστιν δὲ καὶ ἐν ἐκείνοις καὶ τὸ κατὰ συμβεβηκὸς καὶ τὸ κατὰ μέρος καὶ [τὸ] κατ' ἄλλο καὶ τὸ πρώτως καὶ μὴ κατ' ἄλλο, οἷον τὸ λευκαινόμενον εἰς μὲν τὸ νοούμενον μεταβάλλει κατὰ συμβεβηκός (τῷ γὰρ χρώματι συμβέβηκε νοεῖσθαι), εἰς δὲ χρῶμα ὅτι μέρος τὸ λευκὸν τοῦ χρώμα τος (καὶ εἰς τὴν Εὐρώπην ὅτι μέρος αἱ Ἀθῆναι τῆς Εὐρώπης), εἰς δὲ τὸ λευκὸν χρῶμα καθ' αὑτό. πῶς μὲν οὖν καθ' αὑτὸ κινεῖται καὶ πῶς κατὰ συμβεβηκός, καὶ πῶς κατ' ἄλλο τι καὶ πῶς τῷ αὐτὸ πρῶτον, καὶ ἐπὶ κινοῦντος καὶ ἐπὶ κινουμένου, δῆλον, καὶ ὅτι ἡ κίνησις οὐκ ἐν τῷ εἴδει ἀλλ' ἐν τῷ κινουμένῳ καὶ κινητῷ κατ' ἐνέργειαν. ἡ μὲν οὖν κατὰ συμβεβηκὸς μεταβολὴ ἀφείσθω· ἐν ἅπασί τε γάρ ἐστι καὶ αἰεὶ καὶ πάντων· ἡ δὲ μὴ κατὰ συμβεβηκὸς οὐκ ἐν ἅπασιν, ἀλλ' ἐν τοῖς ἐναντίοις καὶ τοῖς μεταξὺ καὶ ἐν ἀντιφάσει· τούτου δὲ πίστις ἐκ τῆς ἐπαγωγῆς. ἐκ δὲ τοῦ μεταξὺ μετα βάλλει· χρῆται γὰρ αὐτῷ ὡς ἐναντίῳ ὄντι πρὸς ἑκάτερον· ἔστι γάρ πως τὸ μεταξὺ τὰ ἄκρα. διὸ καὶ τοῦτο πρὸς ἐκεῖνα κἀκεῖνα πρὸς τοῦτο λέγεταί πως ἐναντία, οἷον ἡ μέση ὀξεῖα πρὸς τὴν ὑπάτην καὶ βαρεῖα πρὸς τὴν νητήν, καὶ τὸ φαιὸν λευκὸν πρὸς τὸ μέλαν καὶ μέλαν πρὸς τὸ λευκόν.

ἐπεὶ δὲ (225a.) πᾶσα μεταβολή ἐστιν ἔκ τινος εἴς τι (δηλοῖ δὲ καὶ τοὔνομα· μετ' ἄλλο γάρ τι καὶ τὸ μὲν πρότερον δηλοῖ, τὸ δ' ὕστερον), μεταβάλλοι ἂν τὸ μεταβάλλον τετραχῶς· ἢ γὰρ ἐξ ὑποκειμένου εἰς ὑποκείμενον, ἢ ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον, ἢ οὐκ ἐξ ὑποκειμένου εἰς ὑποκείμενον, ἢ οὐκ ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον· λέγω δὲ ὑποκείμενον τὸ καταφάσει δηλούμενον. ὥστε ἀνάγκη ἐκ τῶν εἰρημένων τρεῖς εἶναι μεταβολάς, τήν τε ἐξ ὑποκειμένου εἰς ὑποκείμενον, καὶ τὴν ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον, καὶ τὴν ἐκ μὴ ὑποκειμένου εἰς ὑποκείμενον. ἡ γὰρ οὐκ ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον οὐκ ἔστιν μεταβολὴ διὰ τὸ μὴ εἶναι κατ' ἀντίθεσιν· οὔτε γὰρ ἐναντία οὔτε ἀντίφασίς ἐστιν.

ἡ μὲν οὖν οὐκ ἐξ ὑποκειμένου εἰς ὑποκείμενον μεταβολὴ κατ' ἀντίφασιν γένεσίς ἐστιν, ἡ μὲν ἁπλῶς ἁπλῆ, ἡ δὲ τὶς τινός (οἷον ἡ μὲν ἐκ μὴ λευκοῦ εἰς λευκὸν γένεσις τούτου, ἡ δ' ἐκ τοῦ μὴ ὄντος ἁπλῶς εἰς οὐσίαν γένεσις ἁπλῶς, καθ' ἣν ἁπλῶς γίγνεσθαι καὶ οὐ τὶ γίγνεσθαι λέγομεν)· ἡ δ' ἐξ ὑποκειμένου εἰς οὐχ ὑποκεί μενον φθορά, ἁπλῶς μὲν ἡ ἐκ τῆς οὐσίας εἰς τὸ μὴ εἶναι, τὶς δὲ ἡ εἰς τὴν ἀντικειμένην ἀπόφασιν, καθάπερ ἐλέχθη καὶ ἐπὶ τῆς γενέσεως.

εἰ δὴ τὸ μὴ ὂν λέγεται πλεοναχῶς, καὶ μήτε τὸ κατὰ σύνθεσιν ἢ διαίρεσιν ἐνδέχεται κινεῖσθαι μήτε τὸ κατὰ δύναμιν, τὸ τῷ ἁπλῶς κατ' ἐνέργειαν ὄντι ἀντικείμενον (τὸ μὲν γὰρ μὴ λευκὸν ἢ μὴ ἀγαθὸν ὅμως ἐνδέχεται κινεῖσθαι κατὰ συμβεβηκός, εἴη γὰρ <ἂν> ἄνθρωπος τὸ μὴ λευκόν· τὸ δ' ἁπλῶς μὴ τόδε οὐδαμῶς), ἀδύνατον [γὰρ] τὸ μὴ ὂν κινεῖσθαι (εἰ δὲ τοῦτο, καὶ τὴν γένεσιν κίνησιν εἶναι· γίγνεται γὰρ τὸ μὴ ὄν· εἰ γὰρ καὶ ὅτι μάλιστα κατὰ συμβεβηκὸς γίγνεται, ἀλλ' ὅμως ἀληθὲς εἰπεῖν ὅτι ὑπάρχει τὸ μὴ ὂν κατὰ τοῦ γιγνομένου ἁπλῶς)-ὁμοίως δὲ καὶ τὸ ἠρεμεῖν.

ταῦτά τε δὴ συμβαίνει δυσχερῆ [τῷ κινεῖσθαι τὸ μὴ ὄν] καὶ εἰ πᾶν τὸ κινούμενον ἐν τόπῳ, τὸ δὲ μὴ ὂν οὐκ ἔστιν ἐν τόπῳ· εἴη γὰρ ἄν που.

οὐδὲ δὴ ἡ φθορὰ κίνησις· ἐναντίον μὲν γὰρ κινήσει ἢ κίνησις ἢ ἠρεμία, ἡ δὲ φθορὰ γενέσει ἐναντίον. ἐπεὶ δὲ πᾶσα κίνησις μεταβολή τις, μεταβολαὶ δὲ τρεῖς αἱ εἰρημέναι, τούτων δὲ αἱ κατὰ γένεσιν καὶ φθορὰν (225b.) οὐ κινήσεις, αὗται δ’ εἰσὶν αἱ κατ’ ἀντίφασιν, ἀνάγκη τὴν ἐξ ὑποκειμένου εἰς ὑποκείμενον μεταβολὴν κίνησιν εἶναι μόνην. τὰ δ’ ὑποκείμενα ἢ ἐναντία ἢ μεταξύ (καὶ γὰρ ἡ στέρησις κείσθω ἐναντίον), καὶ δηλοῦται καταφάσει, τὸ γυμνὸν καὶ νωδὸν καὶ μέλαν. εἰ οὖν αἱ κατηγορίαι διῄρηνται οὐσίᾳ καὶ ποιότητι καὶ τῷ ποὺ [καὶ τῷ ποτὲ] καὶ τῷ πρός τι καὶ τῷ ποσῷ καὶ τῷ ποιεῖν ἢ πάσχειν, ἀνάγκη τρεῖς εἶναι κινήσεις, τήν τε τοῦ ποιοῦ καὶ τὴν τοῦ ποσοῦ καὶ τὴν κατὰ τόπον.

Κεφάλαιο 2

Κατ’ οὐσίαν δ’ οὐκ ἔστιν κίνησις διὰ τὸ μηδὲν εἶναι οὐσίᾳ τῶν ὄντων ἐναντίον. οὐδὲ δὴ τοῦ πρός τι· ἐνδέχεται γὰρ θατέρου μεταβάλλοντος <ἀληθεύεσθαι καὶ μὴ> ἀληθεύεσθαι θάτερον μηδὲν μεταβάλλον, ὥστε κατὰ συμβεβηκὸς ἡ κίνησις αὐτῶν. οὐδὲ δὴ ποιοῦντος καὶ πάσχοντος, ἢ κινουμένου καὶ κινοῦντος, ὅτι οὐκ ἔστι κινήσεως κίνησις οὐδὲ γενέσεως γένεσις, οὐδ’ ὅλως μεταβολῆς μεταβολή.

πρῶτον μὲν γὰρ διχῶς ἐνδέχεται κινήσεως εἶναι κίνησιν, ἢ ὡς ὑποκειμένου (οἷον ἄνθρωπος κινεῖται ὅτι ἐκ λευκοῦ εἰς μέλαν μεταβάλλει· ἆρά γε οὕτω καὶ ἡ κίνησις ἢ θερμαίνεται ἢ ψύχεται ἢ τόπον ἀλλάττει ἢ αὐξάνεται ἢ φθίνει; τοῦτο δὲ ἀδύνατον· οὐ γὰρ τῶν ὑποκειμένων τι ἡ μεταβολή), ἢ τῷ ἕτερόν τι ὑποκείμενον ἐκ μεταβολῆς μεταβάλλειν εἰς ἕτερον εἶδος [οἷον ἄνθρωπος ἐκ νόσου εἰς ὑγίειαν]. ἀλλ’ οὐδὲ τοῦτο δυνατὸν πλὴν κατὰ συμβεβηκός· αὐτὴ γὰρ ἡ κίνησις ἐξ ἄλλου εἴδους εἰς ἄλλο ἐστὶ μεταβολή <οἷον ἀνθρώπου ἐκ νόσου εἰς ὑγίειαν>· καὶ ἡ γένεσις δὲ καὶ ἡ φθορὰ ὡσαύτως, πλὴν αἱ μὲν εἰς ἀντικείμενα ὡδί, ἡ δὲ ὡδί, ἡ κίνησις. ἅμα οὖν μεταβάλλει ἐξ ὑγιείας εἰς νόσον καὶ ἐξ αὐτῆς ταύτης τῆς μεταβολῆς εἰς ἄλλην. δῆλον δὴ ὅτι ὅταν νοσήσῃ, μεταβεβληκὸς ἔσται εἰς ὁποιανοῦν (ἐνδέχεται γὰρ ἠρεμεῖν), καὶ ἔτι εἰς μὴ τὴν τυχοῦσαν αἰεί, κἀκείνη ἔκ τινος εἴς τι ἕτερον ἔσται, ὥστε καὶ ἡ ἀντι κειμένη ἔσται ὑγίανσις· ἀλλὰ τῷ συμβεβηκέναι, οἷον ἐξ ἀναμνήσεως εἰς λήθην μεταβάλλει, ὅτι ᾧ ὑπάρχει, ἐκεῖνο μεταβάλλει ὁτὲ μὲν εἰς ἐπιστήμην ὁτὲ δ’ εἰς ἄγνοιαν.

ἔτι εἰς ἄπειρον βαδιεῖται, εἰ ἔσται μεταβολῆς μεταβολὴ καὶ γενέσεως γένεσις. ἀνάγκη δὴ καὶ τὴν προτέραν, εἰ ἡ ὑστέρα (226a.) ἔσται, οἷον εἰ ἡ ἁπλῆ γένεσις ἐγίγνετό ποτε, καὶ τὸ γιγνόμενον ἐγίγνετο, ὥστε οὔπω ἦν τὸ γιγνόμενον ἁπλῶς, ἀλλά τι γιγνόμενον γιγνόμενον ἤδη, καὶ πάλιν τοῦτ’ ἐγίγνετό ποτε, ὥστ’ οὐκ ἦν πω τότε γιγνόμενον γιγνόμενον. ἐπεὶ δὲ τῶν ἀπείρων οὐκ ἔστιν τι πρῶτον, οὐκ ἔσται τὸ πρῶτον, ὥστ’ οὐδὲ τὸ ἐχόμενον· οὔτε γί γνεσθαι οὖν οὔτε κινεῖσθαι οἷόν τε οὔτε μεταβάλλειν οὐδέν.

ἔτι τοῦ αὐτοῦ κίνησις ἡ ἐναντία (καὶ ἔτι ἠρέμησις), καὶ γένεσις καὶ φθορά, ὥστε τὸ γιγνόμενον γιγνόμενον ὅταν γένηται γιγνόμενον, τότε φθείρεται· οὔτε γὰρ εὐθὺς γιγνόμενον οὔθ’ ὕστερον· εἶναι γὰρ δεῖ τὸ φθειρόμενον.

ἔτι ὕλην δεῖ ὑπεῖναι καὶ τῷ γιγνομένῳ καὶ τῷ μεταβάλλοντι. τίς οὖν ἔσται — ὥσπερ τὸ ἀλλοιωτὸν σῶμα ἢ ψυχή, οὕτω τί τὸ γιγνόμενον κίνησις ἢ γένεσις; καὶ πάλιν τί εἰς ὃ κινοῦνται; δεῖ γὰρ εἶναι [τι] τὴν τοῦδε ἐκ τοῦδε εἰς τόδε κίνησιν [καὶ μὴ κίνησιν] ἢ γένεσιν. ἅμα δὲ πῶς καὶ ἔσται; οὐ γὰρ ἔσται μάθησις ἡ τῆς μαθήσεως γένεσις, ὥστ' οὐδὲ γενέσεως γένεσις, οὐδέ τις τινός.

ἔτι εἰ τρία εἴδη κινήσεώς ἐστιν, τούτων τινὰ ἀνάγκη εἶναι καὶ τὴν ὑποκειμένην φύσιν καὶ εἰς ἃ κινοῦνται, οἷον τὴν φορὰν ἀλλοιοῦσθαι ἢ φέρεσθαι.

ὅλως δὲ ἐπεὶ κινεῖται [τὸ κινούμενον] πᾶν τριχῶς, ἢ κατὰ συμβεβηκὸς ἢ τῷ μέρος τι ἢ [τῷ] καθ' αὑτό, κατὰ συμβεβηκὸς μόνον ἂν ἐνδέχοιτο μεταβάλλειν τὴν μεταβολήν, οἷον εἰ ὁ ὑγιαζόμενος τρέχοι ἢ μανθάνοι· τὴν δὲ κατὰ συμβεβηκὸς ἀφεῖμεν πάλαι.

ἐπεὶ δὲ οὔτε οὐσίας οὔτε τοῦ πρός τι οὔτε τοῦ ποιεῖν καὶ πάσχειν, λείπεται κατὰ τὸ ποιὸν καὶ τὸ ποσὸν καὶ τὸ ποὺ κίνησιν εἶναι μόνον· ἐν ἑκάστῳ γὰρ ἔστι τούτων ἐναντίωσις. ἡ μὲν οὖν κατὰ τὸ ποιὸν κίνησις ἀλλοίωσις ἔστω· τοῦτο γὰρ ἐπέζευκται κοινὸν ὄνομα. λέγω δὲ τὸ ποιὸν οὐ τὸ ἐν τῇ οὐσίᾳ (καὶ γὰρ ἡ διαφορὰ ποιότης) ἀλλὰ τὸ παθητικόν, καθ' ὃ λέγεται πάσχειν ἢ ἀπαθὲς εἶναι. ἡ δὲ κατὰ τὸ ποσὸν τὸ μὲν κοινὸν ἀνώνυμος, καθ' ἑκάτερον δ' αὔξησις καὶ φθίσις, ἡ μὲν εἰς τὸ τέλειον μέγεθος αὔξησις, ἡ δ' ἐκ τούτου φθίσις. ἡ δὲ κατὰ τόπον καὶ τὸ κοινὸν καὶ τὸ ἴδιον ἀνώνυμος, ἔστω δὲ φορὰ καλουμένη τὸ κοινόν· καίτοι λέγεταί γε ταῦτα φέρεσθαι μόνα κυρίως, ὅταν μὴ ἐφ' αὑτοῖς ᾖ τὸ στῆναι τοῖς μεταβάλλουσι τὸν τόπον, καὶ ὅσα (226b.) μὴ αὐτὰ ἑαυτὰ κινεῖ κατὰ τόπον.

ἡ δ' ἐν τῷ αὐτῷ εἴδει μεταβολὴ ἐπὶ τὸ μᾶλλον καὶ ἧττον ἀλλοίωσίς ἐστιν· ἢ γὰρ ἐξ ἐναντίου ἢ εἰς ἐναντίον κίνησίς ἐστιν, ἢ ἁπλῶς ἢ πῄ· ἐπὶ μὲν γὰρ τὸ ἧττον ἰοῦσα εἰς τοὐναντίον λεχθήσεται μεταβάλλειν, ἐπὶ δὲ τὸ μᾶλλον ὡς ἐκ τοὐναντίου εἰς αὐτό. διαφέρει γὰρ οὐδὲν πῄ μεταβάλλειν ἢ ἁπλῶς, πλὴν πῄ δεήσει τἀναντία ὑπάρχειν· τὸ δὲ μᾶλλον καὶ ἧττόν ἐστι τὸ πλέον ἢ ἔλαττον ἐνυπάρχειν τοῦ ἐναντίου καὶ μή. ὅτι μὲν οὖν αὗται τρεῖς μόναι κινήσεις εἰσίν, ἐκ τούτων δῆλον·

ἀκίνητον δ' ἐστὶ τό τε ὅλως ἀδύνατον κινηθῆναι, ὥσπερ ὁ ψόφος ἀόρατος, καὶ τὸ ἐν πολλῷ χρόνῳ μόλις κινούμενον ἢ τὸ βραδέως ἀρχόμενον, ὃ λέγεται δυσκίνητον, καὶ τὸ πεφυκὸς μὲν κινεῖσθαι καὶ δυνάμενον, μὴ κινούμενον δὲ τότε ὅτε πέφυκε καὶ οὗ καὶ ὥς, ὅπερ ἠρεμεῖν καλῶ τῶν ἀκινήτων μόνον· ἐναντίον γὰρ ἠρεμία κινήσει, ὥστε στέρησις ἂν εἴη τοῦ δεκτικοῦ.

τί μὲν οὖν ἐστι κίνησις καὶ τί ἠρεμία, καὶ πόσαι μεταβολαὶ καὶ ποῖαι κινήσεις, φανερὸν ἐκ τῶν εἰρημένων.

Κεφάλαιο 3

Μετὰ δὲ ταῦτα λέγωμεν τί ἐστιν τὸ ἅμα καὶ χωρίς, καὶ τί τὸ ἅπτεσθαι, καὶ τί τὸ μεταξὺ καὶ τί τὸ ἐφεξῆς καὶ τί τὸ ἐχόμενον καὶ συνεχές, καὶ τοῖς ποίοις ἕκαστον τούτων ὑπάρχειν πέφυκεν.

ἅμα μὲν οὖν λέγω ταῦτ' εἶναι κατὰ τόπον, ὅσα ἐν ἑνὶ τόπῳ ἐστὶ πρώτῳ, χωρὶς δὲ ὅσα ἐν ἑτέρῳ,

ἅπτεσθαι δὲ ὧν τὰ ἄκρα ἅμα.

μεταξὺ δὲ εἰς ὃ πέφυκε πρότερον ἀφικνεῖσθαι τὸ μεταβάλλον ἢ εἰς ὃ ἔσχατον μεταβάλλει κατὰ φύσιν συνεχῶς μεταβάλλον. [ἐν ἐλαχίστοις δ' ἐστι τὸ μεταξὺ τρισίν· ἔσχατον μὲν γάρ ἐστι τῆς μεταβολῆς τὸ εναντιον.] συνεχῶς δὲ κινεῖται τὸ μηθὲν ἢ ὅτι ὀλίγιστον διαλεῖπον τοῦ πράγματος — μὴ τοῦ χρόνου (οὐδὲν γὰρ κωλύει διαλείποντα, καὶ εὐθὺς δὲ μετὰ τὴν ὑπάτην φθέγξασθαι τὴν νεάτην) ἀλλὰ τοῦ πράγματος ἐν ᾧ κινεῖται. [<ἐπεὶ δὲ πᾶσα μεταβολὴ ἐν τοῖς ἀντικειμένοις, τὰ δ' ἀντικείμενα τά τε ἐναντία καὶ τὰ κατὰ ἀντίφασιν, ἀντιφάσεως δ' οὐδὲν ἀνὰ μέσον, φανερὸν ὅτι ἐν τοῖς ἐναντίοις ἔσται τὸ μεταξύ. (226b.) ἐν ἐλαχίστοις δ' ἐστὶ τὸ μεταξὺ τρισίν· ἔσχατον μὲν γάρ ἐστι τῆς μεταβολῆς τὸ ἐναντίον,>] τοῦτο δὲ ἔν τε ταῖς κατὰ τόπον καὶ ἐν ταῖς ἄλλαις μεταβολαῖς φανερόν. ἐναντίον δὲ κατὰ τόπον τὸ κατ' εὐθεῖαν ἀπέχον πλεῖστον· ἡ γὰρ ἐλαχίστη πεπέρανται, μέτρον δὲ τὸ πεπερασμένον.

ἐφεξῆς δὲ οὗ μετὰ τὴν ἀρχὴν ὄντος ἢ θέσει ἢ εἴδει ἢ ἄλλῳ τινὶ οὕτως ἀφορισθέντος (227a.) μηδὲν μεταξύ ἐστι τῶν ἐν ταὐτῷ γένει καὶ οὗ ἐφεξῆς ἐστιν (λέγω δ' οἷον γραμμὴ γραμμῆς ἢ γραμμαί, ἢ μονάδος μονὰς ἢ μονάδες, ἢ οἰκίας οἰκία· ἄλλο δ' οὐδὲν κωλύει μεταξὺ εἶναι). τὸ γὰρ ἐφεξῆς τινὶ ἐφεξῆς καὶ ὕστερόν τι· οὐ γὰρ τὸ ἓν ἐφεξῆς τοῖν δυοῖν, οὐδ' ἡ νουμηνία τῇ δευτέρᾳ ἐφεξῆς, ἀλλὰ ταῦτ' ἐκείνοις.

ἐχόμενον δὲ ὃ ἂν ἐφεξῆς ὂν ἅπτηται. τὸ δὲ συνεχὲς ἔστι μὲν ὅπερ ἐχόμενόν τι, λέγω δ' εἶναι συνεχὲς ὅταν ταὐτὸ γένηται καὶ ἓν τὸ ἑκατέρου πέρας οἷς ἅπτονται, καὶ ὥσπερ σημαίνει τοὔνομα, συνέχηται. τοῦτο δ' οὐχ οἷόν τε δυοῖν ὄντοιν εἶναι τοῖν ἐσχάτοιν. τούτου δὲ διωρισμένου φανερὸν ὅτι ἐν τούτοις ἐστὶ τὸ συνεχές, ἐξ ὧν ἕν τι πέφυκε γίγνεσθαι κατὰ τὴν σύναψιν. καὶ ὥς ποτε γίγνεται τὸ συνέχον ἕν, οὕτω καὶ τὸ ὅλον ἔσται ἕν, οἷον ἢ γόμφῳ ἢ κόλλῃ ἢ ἁφῇ ἢ προσφύσει.

φανερὸν δὲ καὶ ὅτι πρῶτον τὸ ἐφεξῆς ἐστι· τὸ μὲν γὰρ ἁπτόμενον ἐφεξῆς ἀνάγκη εἶναι, τὸ δ' ἐφεξῆς οὐ πᾶν ἅπτεσθαι (διὸ καὶ ἐν προτέροις τῷ λόγῳ τὸ ἐφεξῆς ἔστιν, οἷον ἐν ἀριθμοῖς, ἁφὴ δ’ οὐκ ἔστιν), καὶ εἰ μὲν συνεχές, ἀνάγκη ἅπτεσθαι, εἰ δ’ ἅπτεται, οὔπω συνεχές· οὐ γὰρ ἀνάγκη ἓν εἶναι αὐτῶν τὰ ἄκρα, εἰ ἅμα εἶεν· ἀλλ’ εἰ ἕν, ἀνάγκη καὶ ἅμα. ὥστε ἡ σύμφυσις ὑστάτη κατὰ τὴν γένεσιν· ἀνάγκη γὰρ ἅψασθαι εἰ συμφύσεται τὰ ἄκρα, τὰ δὲ ἁπτόμενα οὐ πάντα συμπέφυκεν· ἐν οἷς δὲ μὴ ἔστιν ἁφή, δῆλον ὅτι οὐκ ἔστιν οὐδὲ σύμφυσις ἐν τούτοις. ὥστ’ εἰ ἔστι στιγμὴ καὶ μονὰς οἵας λέγουσι κεχωρισμένας, οὐχ οἷόν τε εἶναι μονάδα καὶ στιγμὴν τὸ αὐτό· ταῖς μὲν γὰρ ὑπάρχει τὸ ἅπτεσθαι, ταῖς δὲ μονάσιν τὸ ἐφεξῆς, καὶ τῶν μὲν ἐνδέχεται εἶναί τι μεταξύ (πᾶσα γὰρ γραμμὴ μεταξὺ στιγμῶν), τῶν δ’ οὐκ ἀνάγκη· οὐδὲ γὰρ μεταξὺ δυάδος καὶ μονάδος.

τί μὲν οὖν ἐστι τὸ ἅμα καὶ χωρίς, καὶ τί τὸ ἅπτεσθαι, καὶ τί τὸ μεταξὺ (227b.) καὶ τὸ ἐφεξῆς, καὶ τί τὸ ἐχόμενον καὶ τὸ συνεχές, καὶ τοῖς ποίοις ἕκαστον τούτων ὑπάρχει, εἴρηται. Μία δὲ κίνησις λέγεται πολλαχῶς· τὸ γὰρ ἓν πολλαχῶς λέγομεν.

γένει μὲν οὖν μία κατὰ τὰ σχήματα τῆς κατηγορίας ἐστί

(φορὰ μὲν γὰρ πάσῃ φορᾷ τῷ γένει μία, ἀλλοίωσις δὲ φορᾶς ἑτέρα τῷ γένει),

εἴδει δὲ μία, ὅταν τῷ γένει μία οὖσα καὶ ἐν ἀτόμῳ εἴδει ᾖ. οἷον χρώματος μὲν εἰσὶ διαφοραί — τοιγαροῦν ἄλλη τῷ εἴδει μέλανσις καὶ λεύκανσις [πᾶσα οὖν λεύκανσις πάσῃ λευκάνσει ἡ αὐτὴ κατ᾽ εἶδος ἔσται καὶ πᾶσα μέλανσις μελάνσει] — λευκότητος δ᾽ οὐκέτι· διὸ τῷ εἴδει μία λεύκανσις λευκάνσει πάσῃ. εἰ δ᾽ ἔστιν ἄτθ᾽ ἃ καὶ γένη ἅμα καὶ εἴδη ἐστίν, δῆλον ὡς ἔστιν ὡς εἴδει μία ἔσται, ἁπλῶς δὲ μία εἴδει οὔ, οἷον ἡ μάθησις, εἰ ἡ ἐπιστήμη εἶδος μὲν ὑπολήψεως, γένος δὲ τῶν ἐπιστημῶν. ἀπορήσειε δ᾽ ἄν τις εἰ εἴδει μία <ἡ> κίνησις, ὅταν ἐκ τοῦ αὐτοῦ τὸ αὐτὸ εἰς τὸ αὐτὸ μεταβάλλῃ, οἷον ἡ μία στιγμὴ ἐκ τοῦδε τοῦ τόπου εἰς τόνδε τὸν τόπον πάλιν καὶ πάλιν. εἰ δὲ τοῦτ᾽, ἔσται ἡ κυκλοφορία τῇ εὐθυφορίᾳ ἡ αὐτὴ καὶ ἡ κύλισις τῇ βαδίσει. ἢ διώρισται, τὸ ἐν ᾧ ἂν ἕτερον ᾖ τῷ εἴδει, ὅτι ἑτέρα ἡ κίνησις, τὸ δὲ περιφερὲς τοῦ εὐθέος ἕτερον τῷ εἴδει; γένει μὲν οὖν καὶ εἴδει κίνησις μία οὕτως,

ἁπλῶς δὲ μία κίνησις ἡ τῇ οὐσίᾳ μία καὶ τῷ ἀριθμῷ· τίς δ᾽ ἡ τοιαύτη, δῆλον διελομένοις. τρία γάρ ἐστι τὸν ἀριθμὸν περὶ ἃ λέγομεν τὴν κίνησιν, ὃ καὶ ἐν ᾧ καὶ ὅτε. λέγω δ᾽ ὅτι ἀνάγκη εἶναί τι τὸ κινούμενον, οἷον ἄνθρωπον ἢ χρυσόν, καὶ ἔν τινι τοῦτο κινεῖσθαι, οἷον ἐν τόπῳ ἢ ἐν πάθει, καὶ ποτέ· ἐν χρόνῳ γὰρ πᾶν κινεῖται. τούτων δὲ τὸ μὲν εἶναι τῷ γένει ἢ τῷ εἴδει μίαν ἐστὶν ἐν τῷ πράγματι ἐν ᾧ κινεῖται, τὸ δ᾽ ἐχομένην ἐν τῷ χρόνῳ, τὸ δ᾽ ἁπλῶς μίαν ἐν ἅπασι τούτοις· καὶ ἐν ᾧ γὰρ ἓν δεῖ εἶναι καὶ ἄτομον, οἷον τὸ εἶδος, καὶ τὸ ὅτε, οἷον τὸν χρόνον ἕνα καὶ μὴ διαλείπειν, καὶ τὸ κινούμενον ἓν εἶναι μὴ κατὰ συμβεβηκός, ὥσπερ τὸ λευκὸν μελαίνεσθαι καὶ Κορίσκον βαδίζειν (ἓν δὲ Κορίσκος καὶ λευκόν, ἀλλὰ κατὰ συμβεβηκός), (228a.) μηδὲ κοινόν· εἴη γὰρ ἂν ἅμα δύο ἀνθρώπους ὑγιάζεσθαι τὴν αὐτὴν ὑγίανσιν, οἷον ὀφθαλμίας· ἀλλ᾽ οὐ μία αὕτη, ἀλλ᾽ εἴδει μία. τὸ δὲ Σωκράτη τὴν αὐτὴν μὲν ἀλλοίωσιν ἀλλοιοῦσθαι τῷ εἴδει, ἐν ἄλλῳ δὲ χρόνῳ καὶ πάλιν ἐν ἄλλῳ, εἰ μὲν ἐνδέχεται τὸ φθαρὲν πάλιν ἓν γίγνεσθαι τῷ ἀριθμῷ, εἴη ἂν καὶ αὕτη μία, εἰ δὲ μή, ἡ αὐτὴ μέν, μία δ᾽ οὔ. ἔχει δ᾽ ἀπορίαν ταύτῃ παραπλησίαν καὶ πότερον μία ἡ ὑγίεια καὶ ὅλως αἱ ἕξεις καὶ τὰ πάθη τῇ οὐσίᾳ εἰσὶν ἐν τοῖς σώμασιν· κινούμενα γὰρ φαίνεται τὰ ἔχοντα καὶ ῥέοντα. εἰ δὴ ἡ αὐτὴ καὶ μία ἡ ἕωθεν καὶ νῦν ὑγίεια, διὰ τί οὐκ ἂν καὶ ὅταν διαλιπὼν λάβῃ πάλιν τὴν ὑγίειαν, καὶ αὕτη κἀκείνη μία τῷ ἀριθμῷ ἂν εἴη; ὁ γὰρ αὐτὸς λόγος· πλὴν τοσοῦτον διαφέρει, ὅτι εἰ μὲν δύο, δι’ αὐτὸ τοῦτο, ὡς τῷ ἀριθμῷ, καὶ τὰς ἐνεργείας ἀνάγκη (μία γὰρ ἀριθμῷ ἐνέργεια ἑνὸς ἀριθμῷ)· εἰ δ’ ἡ ἕξις μία, ἴσως οὐκ ἄν τῳ δόξειέ πω μία καὶ ἡ ἐνέργεια εἶναι (ὅταν γὰρ παύσηται βαδίζων, οὐκέτι ἔστιν ἡ βάδισις, πάλιν δὲ βαδίζοντος ἔσται). εἰ δ’ οὖν μία καὶ ἡ αὐτή, ἐνδέχοιτ’ ἂν τὸ αὐτὸ καὶ ἓν καὶ φθείρεσθαι καὶ εἶναι πολλάκις. αὗται μὲν οὖν εἰσιν αἱ ἀπορίαι ἔξω τῆς νῦν σκέψεως·

ἐπεὶ δὲ συνεχὴς πᾶσα κίνησις, τήν τε ἁπλῶς μίαν ἀνάγκη καὶ συνεχῆ εἶναι, εἴπερ πᾶσα διαιρετή, καὶ εἰ συνεχής, μίαν. οὐ γὰρ πᾶσα γένοιτ’ ἂν συνεχὴς πάσῃ, ὥσπερ οὐδ’ ἄλλο οὐδὲν τῷ τυχόντι τὸ τυχόν, ἀλλ’ ὅσων ἓν τὰ ἔσχατα. ἔσχατα δὲ τῶν μὲν οὐκ ἔστι, τῶν δ’ ἔστιν ἄλλα τῷ εἴδει καὶ ὁμώνυμα· πῶς γὰρ ἂν ἅψαιτο ἢ ἓν γένοιτο τὸ ἔσχατον γραμμῆς καὶ βαδίσεως; ἐχόμεναι μὲν οὖν εἶεν ἂν καὶ αἱ μὴ αἱ αὐταὶ τῷ εἴδει μηδὲ τῷ γένει (δραμὼν γὰρ ἄν τις πυρέξειεν εὐθύς), καὶ οἷον ἡ λαμπὰς <ἡ> ἐκ διαδοχῆς φορὰ ἐχομένη, συνεχὴς δ’ οὔ. κεῖται γὰρ τὸ συνεχές, ὧν τὰ ἔσχατα ἕν. ὥστ’ ἐχόμεναι καὶ ἐφεξῆς εἰσὶ τῷ τὸν χρό νον εἶναι συνεχῆ, συνεχὴς δὲ τῷ τὰς κινήσεις· τοῦτο δ’, (228b.) ὅταν ἓν τὸ ἔσχατον γένηται ἀμφοῖν. διὸ ἀνάγκη τὴν αὐτὴν εἶναι τῷ εἴδει καὶ ἑνὸς καὶ ἐν ἑνὶ χρόνῳ τὴν ἁπλῶς συνεχῆ κίνησιν καὶ μίαν, τῷ χρόνῳ μέν, ὅπως μὴ ἀκινησία μεταξὺ ᾖ (ἐν τῷ διαλείποντι γὰρ ἠρεμεῖν ἀνάγκη· πολλαὶ οὖν καὶ οὐ μία ἡ κίνησις, ὧν ἐστὶν ἠρεμία μεταξύ, ὥστε εἴ τις κίνησις στάσει διαλαμβάνεται, οὐ μία οὐδὲ συνεχής· διαλαμβάνεται δέ, εἰ μεταξὺ χρόνος)· τῆς δὲ τῷ εἴδει μὴ μιᾶς, καὶ εἰ μὴ διαλείπεται [ὁ χρόνος], ὁ μὲν [γὰρ] χρόνος εἷς, τῷ εἴδει δ’ ἡ κίνησις ἄλλη· τὴν μὲν γὰρ μίαν ἀνάγκη καὶ τῷ εἴδει μίαν εἶναι, ταύτην δ’ ἁπλῶς μίαν οὐκ ἀνάγκη. τίς μὲν οὖν κίνησις ἁπλῶς μία, εἴρηται· ἔτι δὲ λέγεται μία καὶ ἡ τέλειος, ἐάν τε κατὰ γένος ἐάν τε κατ’ εἶδος ᾖ ἐάν τε κατ’ οὐσίαν, ὥσπερ καὶ ἐπὶ τῶν ἄλλων τὸ τέλειον καὶ ὅλον τοῦ ἑνός. ἔστι δ’ ὅτε κἂν ἀτελὴς ᾖ μία λέγεται, ἐὰν μόνον ᾖ συνεχής. ἔτι δ’ ἄλλως παρὰ τὰς εἰρημένας λέγεται μία κίνησις ἡ ὁμαλής. ἡ γὰρ ἀνώμαλος ἔστιν ὡς οὐ δοκεῖ μία, ἀλλὰ μᾶλλον ἡ ὁμαλής, ὥσπερ ἡ εὐθεῖα· ἡ γὰρ ἀνώμαλος διαιρετή. ἔοικε δὲ διαφέρειν ὡς τὸ μᾶλλον καὶ ἧττον. ἔστιν δὲ ἐν ἁπάσῃ κινήσει τὸ ὁμαλῶς ἢ μή· καὶ γὰρ ἂν ἀλλοιοῖτο ὁμαλῶς, καὶ φέροιτο ἐφ’ ὁμαλοῦ οἷον κύκλου ἢ εὐθείας, καὶ περὶ αὔξησιν ὡσαύτως καὶ φθίσιν. ἀνωμαλία δ’ ἐστὶν διαφορὰ ὁτὲ μὲν ἐφ’ ᾧ κινεῖται (ἀδύνατον γὰρ ὁμαλὴν εἶναι τὴν κίνησιν μὴ ἐπὶ ὁμαλῷ μεγέθει, οἷον ἡ τῆς κεκλασμένης κίνησις ἢ ἡ τῆς ἕλικος ἢ ἄλλου μεγέθους, ὧν μὴ ἐφαρμόττει τὸ τυχὸν ἐπὶ τὸ τυχὸν μέρος)· ἡ δὲ οὔτε ἐν τῷ ὃ οὔτ’ ἐν τῷ πότε οὔτε ἐν τῷ εἰς ὅ, ἀλλ’ ἐν τῷ ὥς. ταχυτῆτι γὰρ καὶ βραδυτῆτι ἐνίοτε διώρισται· ἧς μὲν γὰρ τὸ αὐτὸ τάχος, ὁμαλής, ἧς δὲ μή, ἀνώμαλος. διὸ οὐκ εἴδη κινήσεως οὐδὲ διαφοραὶ τάχος καὶ βραδυτής, ὅτι πάσαις ἀκολουθεῖ ταῖς διαφόροις κατ’ εἶδος. ὥστε οὐδὲ βαρύτης καὶ κουφότης ἡ εἰς τὸ αὐτό, οἷον γῆς πρὸς αὐτὴν ἢ πυρὸς πρὸς (229a.) αὐτό. μία μὲν οὖν ἡ ἀνώμαλος τῷ συνεχὴς <εἶναι>, ἧττον δέ, ὅπερ τῇ κεκλασμένῃ συμβαίνει φορᾷ· τὸ δ’ ἧττον μίξις αἰεὶ τοῦ ἐναντίου. εἰ δὲ πᾶσαν τὴν μίαν ἐνδέχεται καὶ ὁμαλὴν εἶναι καὶ μή, οὐκ ἂν εἴησαν αἱ ἐχόμεναι αἱ μὴ κατ’ εἶδος αἱ αὐταὶ μία καὶ συνεχής· πῶς γὰρ ἂν εἴη ὁμαλὴς ἡ ἐξ ἀλλοιώ σεως συγκειμένη καὶ φορᾶς; δέοι γὰρ ἂν ἐφαρμόττειν.

Κεφάλαιο 5

Ἔτι δὲ διοριστέον ποία κίνησις ἐναντία κινήσει, καὶ περὶ μονῆς δὲ τὸν αὐτὸν τρόπον. διαιρετέον δὲ πρῶτον πότερον ἐναντία κίνησις ἡ ἐκ τοῦ αὐτοῦ τῇ εἰς τὸ αὐτό (οἷον ἡ ἐξ ὑγιείας τῇ εἰς ὑγίειαν), οἷον καὶ γένεσις καὶ φθορὰ δοκεῖ, ἢ ἡ ἐξ ἐναντίων (οἷον ἡ ἐξ ὑγιείας τῇ ἐκ νόσου), ἢ ἡ εἰς ἐναντία (οἷον ἡ εἰς ὑγίειαν τῇ εἰς νόσον), ἢ ἡ ἐξ ἐναντίου τῇ εἰς ἐναντίον (οἷον ἡ ἐξ ὑγιείας τῇ εἰς νόσον), ἢ ἡ ἐξ ἐναντίου εἰς ἐναντίον τῇ ἐξ ἐναντίου εἰς ἐναντίον (οἷον ἡ ἐξ ὑγιείας εἰς νόσον τῇ ἐκ νόσου εἰς ὑγίειαν). ἀνάγκη γὰρ ἢ ἕνα τινὰ τούτων εἶναι τῶν τρόπων ἢ πλείους· οὐ γὰρ ἔστιν ἄλλως ἀντιτιθέναι.

ἔστι δ’ ἡ μὲν ἐξ ἐναντίου τῇ εἰς ἐναντίον οὐκ ἐναντία, οἷον ἡ ἐξ ὑγιείας τῇ εἰς νόσον· ἡ αὐτὴ γὰρ καὶ μία. τὸ μέντοι γ’ εἶναι οὐ ταὐτὸ αὐταῖς, ὥσπερ οὐ ταὐτὸ τὸ ἐξ ὑγιείας μεταβάλλειν καὶ τὸ εἰς νόσον. οὐδ’ ἡ ἐξ ἐναντίου τῇ ἐξ ἐναντίου· ἅμα μὲν γὰρ συμβαίνει ἐξ ἐναντίου καὶ εἰς ἐναντίον ἢ μεταξύ — ἀλλὰ περὶ τούτου μὲν ὕστερον ἐροῦμεν, ἀλλὰ μᾶλλον τὸ εἰς ἐναντίον μεταβάλλειν δόξειεν ἂν εἶναι αἴτιον τῆς ἐναντιώσεως ἢ τὸ ἐξ ἐναντίου· ἡ μὲν γὰρ ἀπαλλαγὴ ἐναντιότητος, ἡ δὲ λῆψις. καὶ λέγεται δ’ ἑκάστη εἰς ὃ μεταβάλ λει μᾶλλον ἢ ἐξ οὗ, οἷον ὑγίανσις ἡ εἰς ὑγίειαν, νόσανσις δ’ ἡ εἰς νόσον. λείπεται δὴ ἡ εἰς ἐναντία καὶ ἡ εἰς ἐναντία ἐξ ἐναντίων. τάχα μὲν οὖν συμβαίνει τὰς εἰς ἐναντία καὶ ἐξ ἐναντίων εἶναι, ἀλλὰ τὸ εἶναι ἴσως οὐ ταὐτό, λέγω δὲ τὸ εἰς ὑγίειαν τῷ ἐκ νόσου καὶ τὸ ἐξ ὑγιείας τῷ εἰς νόσον.

ἐπεὶ δὲ διαφέρει μεταβολὴ κινήσεως (ἡ ἔκ τινος γὰρ ὑποκειμένου εἴς τι ὑποκείμενον μεταβολὴ κίνησίς ἐστιν), ἡ ἐξ ἐναντίου (229b.) εἰς ἐναντίον τῇ ἐξ ἐναντίου εἰς ἐναντίον κίνησις ἐναντία, οἷον ἡ ἐξ ὑγιείας εἰς νόσον τῇ ἐκ νόσου εἰς ὑγίειαν. δῆλον δὲ καὶ ἐκ τῆς ἐπαγωγῆς ὁποῖα δοκεῖ τὰ ἐναντία εἶναι· τὸ νοσάζεσθαι γὰρ τῷ ὑγιάζεσθαι καὶ τὸ μανθάνειν τῷ ἀπατᾶσθαι μὴ δι’ αὑτοῦ (εἰς ἐναντία γάρ· ὥσπερ γὰρ ἐπιστήμην, ἔστι καὶ ἀπάτην καὶ δι’ αὑτοῦ κτᾶσθαι καὶ δι’ ἄλλου), καὶ ἡ ἄνω φορὰ τῇ κάτω (ἐναντία γὰρ ταῦτα ἐν μήκει), καὶ ἡ εἰς δεξιὰ τῇ εἰς ἀριστερά (ἐναντία γὰρ ταῦτα ἐν πλάτει), καὶ ἡ εἰς τὸ ἔμπροσθεν τῇ εἰς τὸ ὄπισθεν (ἐναντία γὰρ καὶ ταῦτα). ἡ δ’ εἰς ἐναντίον μόνον οὐ κίνησις ἀλλὰ μεταβολή, οἷον τὸ γίγνεσθαι λευκὸν μὴ ἔκ τινος. καὶ ὅσοις δὲ μὴ ἔστιν ἐναντία, ἡ ἐξ αὑτοῦ τῇ εἰς αὑτὸ μεταβολῇ ἐναντία· διὸ γένεσις φθορᾷ ἐναντία καὶ ἀποβολὴ λήψει· αὗται δὲ μεταβολαὶ μέν, κινήσεις δ’ οὔ. τὰς δ’ εἰς τὸ μεταξὺ κινήσεις, ὅσοις τῶν ἐναντίων ἔστι μεταξύ, ὡς εἰς ἐναντία πως θετέον· ὡς ἐναντίῳ γὰρ χρῆται τῷ μεταξὺ ἡ κίνησις, ἐφ’ ὁπότερα ἂν μεταβάλλῃ, οἷον ἐκ φαιοῦ μὲν εἰς τὸ λευκὸν ὡς ἐκ μέλανος, καὶ ἐκ λευκοῦ εἰς φαιὸν ὡς εἰς μέλαν, ἐκ δὲ μέλανος εἰς φαιὸν ὡς εἰς λευκὸν τὸ φαιόν· τὸ γὰρ μέσον πρὸς ἑκάτερον λέγεταί πως ἑκάτερον τῶν ἄκρων, καθάπερ εἴρηται καὶ πρότερον. κίνησις μὲν δὴ κινήσει ἐναντία οὕτως ἡ ἐξ ἐναντίου εἰς ἐναντίον τῇ ἐξ ἐναντίου εἰς ἐναντίον.

Κεφάλαιο 6

Ἐπεὶ δὲ κινήσει οὐ μόνον δοκεῖ κίνησις εἶναι ἐναντία ἀλλὰ καὶ ἠρεμία, τοῦτο διοριστέον. ἁπλῶς μὲν γὰρ ἐναντίον κίνησις κινήσει, ἀντίκειται δὲ καὶ ἠρεμία (στέρησις γάρ, ἔστι δ’ ὡς καὶ ἡ στέρησις ἐναντία λέγεται), ποιᾷ δὲ ποιά, οἷον τῇ κατὰ τόπον ἡ κατὰ τόπον. ἀλλὰ τοῦτο νῦν λέγεται ἁπλῶς· πότερον γὰρ τῇ ἐνταῦθα μονῇ ἡ ἐκ τούτου ἢ ἡ εἰς τοῦτο κίνησις ἀντίκειται; δῆλον δὴ ὅτι, ἐπεὶ ἐν δυσὶν ἡ κίνησις ὑποκειμένοις, τῇ μὲν ἐκ τούτου εἰς τὸ ἐναντίον ἡ ἐν τούτῳ μονή, τῇ δ’ ἐκ τοῦ ἐναντίου εἰς τοῦτο ἡ ἐν τῷ ἐναντίῳ. ἅμα δὲ καὶ ἀλλήλαις ἐναντίαι αὗται· καὶ γὰρ ἄτοπον, εἰ κινήσεις (230a.) μὲν ἐναντίαι εἰσίν, ἠρεμίαι δ’ ἀντικείμεναι οὐκ εἰσίν. εἰσὶν δὲ αἱ ἐν τοῖς ἐναντίοις, οἷον ἡ ἐν ὑγιείᾳ τῇ ἐν νόσῳ ἠρεμίᾳ (κινήσει δὲ τῇ ἐξ ὑγιείας εἰς νόσον· τῇ γὰρ ἐκ νόσου εἰς ὑγίειαν ἄλογον — ἡ γὰρ εἰς αὐτὸ κίνησις ἐν ᾧ ἕστηκεν, ἠρέμησις μᾶλλόν ἐστιν, ἢ συμβαίνει γε ἅμα γίγνεσθαι τῇ κινήσει ἀνάγκη δὲ ἢ ταύτην ἢ ἐκείνην εἶναι)· οὐ γὰρ ἥ γ’ ἐν λευκότητι ἠρεμία ἐναντία τῇ ἐν ὑγιείᾳ.

ὅσοις δὲ μὴ ἔστιν ἐναντία, τούτων μεταβολὴ μέν ἐστιν ἀντικειμένη ἡ ἐξ αὐτοῦ τῇ εἰς αὐτό, κίνησις δ’ οὐκ ἔστιν, οἷον ἡ ἐξ ὄντος τῇ εἰς ὄν, καὶ μονὴ μὲν τούτων οὐκ ἔστιν, ἀμεταβλησία δέ. καὶ εἰ μέν τι εἴη ὑποκείμενον, ἡ ἐν τῷ ὄντι ἀμεταβλησία τῇ ἐν τῷ μὴ ὄντι ἐναντία. εἰ δὲ μὴ ἔστι τι τὸ μὴ ὄν, ἀπορήσειεν ἄν τις τίνι ἐναντία ἡ ἐν τῷ ὄντι ἀμεταβλησία, καὶ εἰ ἠρεμία ἐστίν. εἰ δὲ τοῦτο, ἢ οὐ πᾶσα ἠρεμία κινήσει ἐναντία, ἢ ἡ γένεσις καὶ φθορὰ κίνησις. δῆλον τοίνυν ὅτι ἠρεμία μὲν οὐ λεκτέα, εἰ μὴ καὶ αὗται κινήσεις, ὅμοιον δέ τι καὶ ἀμεταβλησία· ἐναντία δὲ ἢ οὐδενὶ ἢ τῇ ἐν τῷ μὴ ὄντι ἢ τῇ φθορᾷ· αὕτη γὰρ ἐξ αὐτῆς, ἡ δὲ γένεσις εἰς ἐκείνην.

ἀπορήσειε δ’ ἄν τις διὰ τί ἐν μὲν τῇ κατὰ τόπον μεταβολῇ εἰσὶ καὶ κατὰ φύσιν καὶ παρὰ φύσιν καὶ μοναὶ καὶ κινήσεις, ἐν δὲ ταῖς ἄλλαις οὔ, οἷον ἀλλοίωσις ἡ μὲν κατὰ φύσιν ἡ δὲ παρὰ φύσιν (οὐδὲν γὰρ μᾶλλον ἡ ὑγίανσις ἢ ἡ νόσανσις κατὰ φύσιν ἢ παρὰ φύσιν, οὐδὲ λεύκανσις ἢ μέλανσις)· ὁμοίως δὲ καὶ ἐπ’ αὐξήσεως καὶ φθίσεως (οὔτε γὰρ αὗται ἀλλήλαις ἐναντίαι ὡς φύσει ἡ δὲ παρὰ φύσιν, οὔτ’ αὔξησις αὐξή σει)· καὶ ἐπὶ γενέσεως δὲ καὶ φθορᾶς ὁ αὐτὸς λόγος· οὔτε γὰρ ἡ μὲν γένεσις κατὰ φύσιν ἡ δὲ φθορὰ παρὰ φύσιν (τὸ γὰρ γηρᾶν κατὰ φύσιν), οὔτε γένεσιν ὁρῶμεν τὴν μὲν κατὰ φύσιν τὴν δὲ παρὰ φύσιν. ἢ εἰ ἔστιν τὸ βίᾳ παρὰ φύσιν, καὶ φθορὰ ἂν εἴη φθορᾷ ἐναντία ἡ βίαιος ὡς παρὰ φύσιν οὖσα τῇ κατὰ φύσιν; ἆρ’ οὖν καὶ γενέσεις εἰσὶν ἔνιαι βίαιοι καὶ οὐχ εἱμαρμέναι, αἷς ἐναντίαι αἱ κατὰ φύσιν, (230b.)

καὶ αὐξήσεις βίαιοι καὶ φθίσεις, οἷον αὐξήσεις αἱ τῶν ταχὺ διὰ τρυφὴν ἡβώντων, καὶ οἱ σῖτοι οἱ ταχὺ ἁδρυνόμενοι καὶ μὴ πιληθέντες; ἐπὶ δ’ ἀλλοιώσεως πῶς; ἢ ὡσαύτως; εἶεν γὰρ ἄν τινες βίαιοι, αἱ δὲ φυσικαί, οἷον οἱ ἀφιέμενοι μὴ ἐν κρισίμοις ἡμέραις, οἱ δ’ ἐν κρισίμοις· οἱ μὲν οὖν παρὰ φύσιν ἠλλοίωνται, οἱ δὲ κατὰ φύσιν. ἔσονται δὴ καὶ φθοραὶ ἐναντίαι ἀλλήλαις, οὐ γενέσεσι. καὶ τί γε κωλύει ἔστιν ὡς; καὶ γὰρ εἰ ἡ μὲν ἡδεῖα ἡ δὲ λυπηρὰ εἴη· ὥστε οὐχ ἁπλῶς φθορὰ φθορᾷ ἐναντία, ἀλλ’ ᾗ ἡ μὲν τοιαδὶ ἡ δὲ τοιαδὶ αὐτῶν ἐστιν.

ὅλως μὲν οὖν ἐναντίαι κινήσεις καὶ ἠρεμίαι τὸν εἰρημένον τρόπον εἰσίν, οἷον ἡ ἄνω τῇ κάτω· τόπου γὰρ ἐναντιώσεις αὗται. φέρεται δὲ τὴν μὲν ἄνω φορὰν φύσει τὸ πῦρ, τὴν δὲ κάτω ἡ γῆ· καὶ ἐναντίαι γ’ αὐτῶν αἱ φοραί. τὸ δὲ πῦρ ἄνω μὲν φύσει, κάτω δὲ παρὰ φύσιν· καὶ ἐναντία γε ἡ κατὰ φύσιν αὐτοῦ τῇ παρὰ φύσιν. καὶ μοναὶ δ’ ὡσαύτως· ἡ γὰρ ἄνω μονὴ τῇ ἄνωθεν κάτω κινήσει ἐναντία. γίγνεται δὲ τῇ γῇ ἡ μὲν μονὴ ἐκείνη παρὰ φύσιν, ἡ δὲ κίνησις αὕτη κατὰ φύσιν. ὥστε κινήσει μονὴ ἐναντία ἡ παρὰ φύσιν τῇ κατὰ φύσιν τοῦ αὐτοῦ· καὶ γὰρ ἡ κίνησις ἡ τοῦ αὐτοῦ ἐναντία οὕτως· ἡ μὲν γὰρ κατὰ φύσιν [ἔσται] αὐτῶν, ἡ ἄνω ἢ ἡ κάτω, ἡ δὲ παρὰ φύσιν. ἔχει δ’ ἀπορίαν εἰ ἔστιν πάσης ἠρεμίας τῆς μὴ αἰεὶ γένεσις, καὶ αὕτη τὸ ἵστασθαι. τοῦ δὴ παρὰ φύσιν μένοντος, οἷον τῆς γῆς ἄνω, εἴη ἂν γένεσις. ὅτε ἄρα ἐφέρετο ἄνω βίᾳ, ἵστατο. ἀλλὰ τὸ ἱστάμενον ἀεὶ δοκεῖ φέρεσθαι θᾶττον, τὸ δὲ βίᾳ τοὐναντίον. οὐ γενόμενον ἄρα ἠρεμοῦν ἔσται ἠρεμοῦν. ἔτι δοκεῖ τὸ ἵστασθαι ἢ ὅλως εἶναι τὸ εἰς τὸν αὑτοῦ τόπον φέρεσθαι ἢ συμβαίνειν ἅμα.

ἔχει δ’ ἀπορίαν εἰ ἐναντία ἡ μονὴ ἡ ἐνταῦθα τῇ ἐντεῦθεν κινήσει· ὅταν γὰρ κινῆται ἐκ τουδὶ καὶ ἀποβάλλῃ, ἔτι δοκεῖ ἔχειν τὸ ἀποβαλλόμενον, ὥστ’ εἰ αὕτη ἡ ἠρεμία ἐναντία τῇ ἐντεῦθεν εἰς τοὐναντίον κινήσει, ἅμα ὑπάρξει τἀναντία. ἢ πῇ ἠρεμεῖ, εἰ ἔτι μένει, ὅλως δὲ τοῦ κινουμένου τὸ μὲν (231a.) ἐκεῖ, τὸ δ’ εἰς ὃ μεταβάλλει; διὸ καὶ μᾶλλον κίνησις κινήσει ἐναντίον ἢ ἠρέμησις.

καὶ περὶ μὲν κινήσεως καὶ ἠρεμίας, πῶς ἑκατέρα μία, καὶ τίνες ἐναντίαι τίσιν, εἴρηται.

[ἀπορήσειε δ’ ἄν τις καὶ περὶ τοῦ ἵστασθαι, εἰ καὶ ὅσαι παρὰ φύσιν κινήσεις, ταύταις ἔστιν ἠρεμία ἀντικειμένη. εἰ μὲν οὖν μὴ ἔσται, ἄτοπον· μένει γάρ, βίᾳ δέ. ὥστε ἠρεμοῦν τι ἔσται οὐκ ἀεὶ ἄνευ τοῦ γενέσθαι. ἀλλὰ δῆλον ὅτι ἔσται· ὥσπερ γὰρ κινεῖται παρὰ φύσιν, καὶ ἠρεμοίη ἄν τι παρὰ φύσιν. ἐπεὶ δ’ ἔστιν ἐνίοις κίνησις κατὰ φύσιν καὶ παρὰ φύσιν, οἷον πυρὶ ἡ ἄνω κατὰ φύσιν ἡ δὲ κάτω παρὰ φύσιν, πότερον αὕτη ἐναντία ἢ ἡ τῆς γῆς; αὕτη γὰρ φέρεται κατὰ φύσιν κάτω. ἢ δῆλον ὅτι ἄμφω, ἀλλ’ οὐχ ὡσαύτως, ἀλλ’ ἡ μὲν κατὰ φύσιν ὡς κατὰ φύσιν οὔσης τῆς αὐτοῦ· ἡ δ’ ἄνω τοῦ πυρὸς τῇ κάτω, ὡς ἡ κατὰ φύσιν οὖσα τῇ παρὰ φύσιν οὔσῃ. ὁμοίως δὲ καὶ ταῖς μοναῖς. ἴσως δ’ ἠρεμίᾳ κίνησίς πῃ ἀντίκειται.]

Κεφάλαιο 1

Εἰ δ’ ἐστὶ συνεχὲς καὶ ἁπτόμενον καὶ ἐφεξῆς, ὡς διώρισται πρότερον, συνεχῆ μὲν ὧν τὰ ἔσχατα ἕν, ἁπτόμενα δ’ ὧν ἅμα, ἐφεξῆς δ’ ὧν μηδὲν μεταξὺ συγγενές, ἀδύνατον ἐξ ἀδιαιρέτων εἶναί τι συνεχές, οἷον γραμμὴν ἐκ στιγμῶν, εἴπερ ἡ γραμμὴ μὲν συνεχές, ἡ στιγμὴ δὲ ἀδιαίρετον. οὔτε γὰρ ἓν τὰ ἔσχατα τῶν στιγμῶν (οὐ γάρ ἐστι τὸ μὲν ἔσχατον τὸ δ’ ἄλλο τι μόριον τοῦ ἀδιαιρέτου), οὔθ’ ἅμα τὰ ἔσχατα (οὐ γάρ ἐστιν ἔσχατον τοῦ ἀμεροῦς οὐδέν· ἕτερον γὰρ τὸ ἔσχατον καὶ οὗ ἔσχατον).

ἔτι δ’ ἀνάγκη ἤτοι συνεχεῖς εἶναι τὰς στιγμὰς ἢ ἁπτομένας ἀλλήλων, ἐξ ὧν ἐστι τὸ συνεχές· ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ πάντων τῶν (231b.) ἀδιαιρέτων. συνεχεῖς μὲν δὴ οὐκ ἂν εἶεν διὰ τὸν εἰρημένον λόγον· ἅπτεται δ’ ἅπαν ἢ ὅλον ὅλου ἢ μέρος μέρους ἢ ὅλου μέρος. ἐπεὶ δ’ ἀμερὲς τὸ ἀδιαίρετον, ἀνάγκη ὅλον ὅλου ἅπτεσθαι. ὅλον δ’ ὅλου ἁπτόμενον οὐκ ἔσται συνεχές. τὸ γὰρ συνεχὲς ἔχει τὸ μὲν ἄλλο τὸ δ’ ἄλλο μέρος, καὶ διαιρεῖται εἰς οὕτως ἕτερα καὶ τόπῳ κεχωρισμένα.

ἀλλὰ μὴν οὐδὲ ἐφεξῆς ἔσται στιγμὴ στιγμῇ ἢ τὸ νῦν τῷ νῦν, ὥστ’ ἐκ τούτων εἶναι τὸ μῆκος ἢ τὸν χρόνον· ἐφεξῆς μὲν γάρ ἐστιν ὧν μηθέν ἐστι μεταξὺ συγγενές, στιγμῶν δ’ αἰεὶ [τὸ] μεταξὺ γραμμὴ καὶ τῶν νυν χρόνος. ἔτι διαιροῖτ’ ἂν εἰς ἀδιαίρετα, εἴπερ ἐξ ὧν ἐστιν ἑκάτερον, εἰς ταῦτα διαιρεῖται· ἀλλ’ οὐθὲν ἦν τῶν συνεχῶν εἰς ἀμερῆ διαιρετόν. ἄλλο δὲ γένος οὐχ οἷόν τ’ εἶναι μεταξὺ [τῶν στιγμῶν καὶ τῶν νῦν οὐθέν]. ἢ γὰρ [ἔσται, δῆλον ὡς ἤτοι] ἀδιαίρετον ἔσται ἢ διαιρετόν, καὶ εἰ διαιρετόν, ἢ εἰς ἀδιαίρετα ἢ εἰς ἀεὶ διαιρετά· τοῦτο δὲ συνεχές.

φανερὸν δὲ καὶ ὅτι πᾶν συνεχὲς διαιρετὸν εἰς αἰεὶ διαιρετά· εἰ γὰρ εἰς ἀδιαίρετα, ἔσται ἀδιαίρετον ἀδιαιρέτου ἁπτόμενον· ἓν γὰρ τὸ ἔσχατον καὶ ἅπτεται τῶν συνεχῶν.

τοῦ δ’ αὐτοῦ λόγου μέγεθος καὶ χρόνον καὶ κίνησιν ἐξ ἀδιαιρέτων συγκεῖσθαι, καὶ διαιρεῖσθαι εἰς ἀδιαίρετα, ἢ μηθέν. δῆλον δ’ ἐκ τῶνδε. εἰ γὰρ τὸ μέγεθος ἐξ ἀδιαιρέτων σύγκειται, καὶ ἡ κίνησις ἡ τούτου ἐξ ἴσων κινήσεων ἔσται ἀδιαιρέτων, οἷον εἰ τὸ ΑΒΓ ἐκ τῶν Α Β Γ ἐστὶν ἀδιαιρέτων, ἡ κίνησις ἐφ’ ἧς ΔΕΖ, ἣν ἐκινήθη τὸ Ω ἐπὶ τῆς ΑΒΓ, ἕκαστον τὸ μέρος ἔχει ἀδιαίρετον. εἰ δὴ παρούσης κινήσεως ἀνάγκη κινεῖσθαί τι, καὶ εἰ κινεῖταί τι, παρεῖναι κίνησιν, καὶ τὸ κινεῖσθαι ἔσται ἐξ ἀδιαιρέτων. τὸ μὲν δὴ Α ἐκινήθη τὸ Ω τὴν τὸ Δ κινούμενον κίνησιν, τὸ δὲ Β τὴν τὸ Ε, καὶ τὸ Γ ὡσαύτως τὴν τὸ Ζ. εἰ δὴ ἀνάγκη τὸ κινούμενον ποθέν ποι μὴ ἅμα κινεῖσθαι καὶ κεκινῆσθαι οὗ ἐκινεῖτο ὅτε ἐκινεῖτο (οἷον εἰ Θήβαζέ τι βαδίζει, ἀδύνατον ἅμα βαδίζειν Θήβαζε καὶ βεβαδικέναι (232a.) Θήβαζε), τὴν δὲ τὸ Α τὴν ἀμερῆ ἐκινεῖτο τὸ Ω, ᾗ ἡ τὸ Δ κίνησις παρῆν· ὥστ’ εἰ μὲν ὕστερον διεληλύθει ἢ διῄει, διαιρετὴ ἂν εἴη (ὅτε γὰρ διῄει, οὔτε ἠρέμει οὔτε διεληλύθει, ἀλλὰ μεταξὺ ἦν), εἰ δ’ ἅμα διέρχεται καὶ διελήλυθε, τὸ βαδίζον, ὅτε βαδίζει, βεβαδικὸς ἐκεῖ ἔσται καὶ κεκινημένον οὗ κινεῖται. εἰ δὲ τὴν μὲν ὅλην τὴν ΑΒΓ κινεῖταί τι, καὶ ἡ κίνησις ἣν κινεῖται τὰ Δ Ε Ζ ἐστι, τὴν δ’ ἀμερῆ τὴν Α οὐθὲν κινεῖται ἀλλὰ κεκίνηται, εἴη ἂν ἡ κίνησις οὐκ ἐκ κινήσεων ἀλλ’ ἐκ κινημάτων καὶ τῷ κεκινῆσθαί τι μὴ κινούμενον· τὴν γὰρ Α διελήλυθεν οὐ διεξιόν. ὥστε ἔσται τι βεβαδικέναι μη δέποτε βαδίζον· ταύτην γὰρ βεβάδικεν οὐ βαδίζον ταύτην. εἰ οὖν ἀνάγκη ἢ ἠρεμεῖν ἢ κινεῖσθαι πᾶν, ἠρεμεῖ καθ’ ἕκαστον τῶν Α Β Γ, ὥστ’ ἔσται τι συνεχῶς ἠρεμοῦν ἅμα καὶ κινούμενον. τὴν γὰρ ΑΒΓ ὅλην ἐκινεῖτο καὶ ἠρέμει ὁτιοῦν μέρος, ὥστε καὶ πᾶσαν. καὶ εἰ μὲν τὰ ἀδιαίρετα τῆς ΔΕΖ κινήσεις, κινήσεως παρούσης ἐνδέχοιτ’ ἂν μὴ κινεῖσθαι ἀλλ’ ἠρεμεῖν· εἰ δὲ μὴ κινήσεις, τὴν κίνησιν μὴ ἐκ κινήσεων εἶναι. ὁμοίως δ’ ἀνάγκη τῷ μήκει καὶ τῇ κινήσει ἀδιαίρετον εἶναι τὸν χρόνον, καὶ συγκεῖσθαι ἐκ τῶν νῦν ὄντων ἀδιαιρέτων· εἰ γὰρ πᾶσα διαιρετός, ἐν τῷ ἐλάττονι δὲ τὸ ἰσοταχὲς δίεισιν ἔλαττον, διαιρετὸς ἔσται καὶ ὁ χρόνος. εἰ δ’ ὁ χρόνος διαιρετὸς ἐν ᾧ φέρεταί τι τὴν Α, καὶ ἡ τὸ Α ἔσται διαιρετή.

Κεφάλαιο 2

Ἐπεὶ δὲ πᾶν μέγεθος εἰς μεγέθη διαιρετόν (δέδεικται γὰρ ὅτι ἀδύνατον ἐξ ἀτόμων εἶναί τι συνεχές, μέγεθος δ᾽ ἐστὶν ἅπαν συνεχές), ἀνάγκη τὸ θᾶττον ἐν τῷ ἴσῳ χρόνῳ μεῖζον καὶ ἐν τῷ ἐλάττονι ἴσον καὶ ἐν τῷ ἐλάττονι πλεῖον κινεῖσθαι, καθάπερ ὁρίζονταί τινες τὸ θᾶττον. ἔστω γὰρ τὸ ἐφ᾽ ᾧ Α τοῦ ἐφ᾽ ᾧ Β θᾶττον. ἐπεὶ τοίνυν θᾶττόν ἐστιν τὸ πρότερον μεταβάλλον, ἐν ᾧ χρόνῳ τὸ Α μεταβέβληκεν ἀπὸ τοῦ Γ εἰς τὸ Δ, οἷον τῷ ΖΗ, ἐν τούτῳ τὸ Β οὔπω ἔσται πρὸς τῷ Δ, ἀλλ᾽ ἀπολείψει, ὥστε ἐν τῷ ἴσῳ χρόνῳ πλεῖον δίεισιν τὸ θᾶττον. ἀλλὰ μὴν καὶ ἐν τῷ ἐλάττονι πλεῖον· ἐν ᾧ γὰρ τὸ Α γεγένηται πρὸς τῷ Δ, τὸ Β ἔστω πρὸς τῷ Ε τὸ βραδύτερον ὄν. οὐκοῦν ἐπεὶ (232b.) τὸ Α πρὸς τῷ Δ γεγένηται ἐν ἅπαντι τῷ ΖΗ χρόνῳ, πρὸς τῷ Θ ἔσται ἐν ἐλάττονι τούτου· καὶ ἔστω ἐν τῷ ΖΚ. τὸ μὲν οὖν ΓΘ, ὃ διελήλυθε τὸ Α, μεῖζόν ἐστι τοῦ ΓΕ, ὁ δὲ χρόνος ὁ ΖΚ ἐλάττων τοῦ παντὸς τοῦ ΖΗ, ὥστε ἐν ἐλάττονι μεῖζον δίεισιν. φανερὸν δὲ ἐκ τούτων καὶ ὅτι τὸ θᾶττον ἐν ἐλάττονι χρόνῳ δίεισιν τὸ ἴσον. ἐπεὶ γὰρ τὴν μείζω ἐν ἐλάττονι διέρχεται τοῦ βραδυτέρου, αὐτὸ δὲ καθ᾽ αὑτὸ λαμβανόμενον ἐν πλείονι χρόνῳ τὴν μείζω τῆς ἐλάττονος, οἷον τὴν ΛΜ τῆς ΛΞ, πλείων ἂν εἴη ὁ χρόνος ὁ ΠΡ, ἐν ᾧ τὴν ΛΜ διέρχεται, ἢ ὁ ΠΣ, ἐν ᾧ τὴν ΛΞ. ὥστε εἰ ὁ ΠΡ χρόνος ἐλάττων ἐστὶν τοῦ Χ, ἐν ᾧ τὸ βραδύτερον διέρχεται τὴν ΛΞ, καὶ ὁ ΠΣ ἐλάττων ἔσται τοῦ ἐφ᾽ ᾧ Χ· τοῦ γὰρ ΠΡ ἐλάττων, τὸ δὲ τοῦ ἐλάττονος ἔλαττον καὶ αὐτὸ ἔλαττον. ὥστε ἐν ἐλάττονι κινήσεται τὸ ἴσον. ἔτι δ᾽ εἰ πᾶν ἀνάγκη ἢ ἐν ἴσῳ ἢ ἐν ἐλάττονι ἢ ἐν πλείονι κινεῖ σθαι, καὶ τὸ μὲν ἐν πλείονι βραδύτερον, τὸ δ᾽ ἐν ἴσῳ ἰσοταχές, τὸ δὲ θᾶττον οὔτε ἰσοταχὲς οὔτε βραδύτερον, οὔτ᾽ ἂν ἐν ἴσῳ οὔτ᾽ ἐν πλείονι κινοῖτο τὸ θᾶττον. λείπεται οὖν ἐν ἐλάττονι, ὥστ᾽ ἀνάγκη καὶ τὸ ἴσον μέγεθος ἐν ἐλάττονι χρόνῳ διιέναι τὸ θᾶττον. ἐπεὶ δὲ πᾶσα μὲν κίνησις ἐν χρόνῳ καὶ ἐν ἅπαντι χρόνῳ δυνατὸν κινηθῆναι, πᾶν δὲ τὸ κινούμενον ἐνδέχεται καὶ θᾶττον κινεῖσθαι καὶ βραδύτερον, ἐν ἅπαντι χρόνῳ ἔσται τὸ θᾶττον κινεῖσθαι καὶ βραδύτερον. τούτων δ᾽ ὄντων ἀνάγκη καὶ τὸν χρόνον συνεχῆ εἶναι. λέγω δὲ συνεχὲς τὸ διαιρετὸν εἰς αἰεὶ διαιρετά· τούτου γὰρ ὑποκειμένου τοῦ συνε χοῦς, ἀνάγκη συνεχῆ εἶναι τὸν χρόνον. ἐπεὶ γὰρ δέδεικται ὅτι τὸ θᾶττον ἐν ἐλάττονι χρόνῳ δίεισιν τὸ ἴσον, ἔστω τὸ μὲν ἐφ᾽ ᾧ Α θᾶττον, τὸ δ᾽ ἐφ᾽ ᾧ Β βραδύτερον, καὶ κεκινήσθω τὸ βραδύτερον τὸ ἐφ᾽ ᾧ ΓΔ μέγεθος ἐν τῷ ΖΗ χρόνῳ. δῆλον τοίνυν ὅτι τὸ θᾶττον ἐν ἐλάττονι τούτου κινήσεται τὸ αὐτὸ μέγεθος· καὶ κεκινήσθω ἐν τῷ ΖΘ. πάλιν δ᾽ ἐπεὶ τὸ θᾶττον ἐν τῷ ΖΘ διελήλυθεν τὴν ὅλην τὴν ΓΔ, τὸ βραδύτερον ἐν τῷ αὐτῷ χρόνῳ τὴν ἐλάττω δίεισιν· ἔστω οὖν ἐφ’ (233a.) ἧς ΓΚ. ἐπεὶ δὲ τὸ βραδύτερον τὸ Β ἐν τῷ ΖΘ χρόνῳ τὴν ΓΚ διελήλυθεν, τὸ θᾶττον ἐν ἐλάττονι δίεισιν, ὥστε πάλιν διαιρεθήσεται ὁ ΖΘ χρόνος. τούτου δὲ διαιρουμένου καὶ τὸ ΓΚ μέγεθος διαιρεθήσεται κατὰ τὸν αὐτὸν λόγον. εἰ δὲ τὸ μέγεθος, καὶ ὁ χρόνος. καὶ ἀεὶ τοῦτ’ ἔσται μεταλαμβάνουσιν ἀπὸ τοῦ θάττονος τὸ βραδύτερον καὶ ἀπὸ τοῦ βραδυτέρου τὸ θᾶττον, καὶ τῷ ἀποδεδειγμένῳ χρωμένοις· διαιρήσει γὰρ τὸ μὲν θᾶττον τὸν χρόνον, τὸ δὲ βραδύτερον τὸ μῆκος. εἰ οὖν αἰεὶ μὲν ἀντιστρέφειν ἀληθές, ἀντιστρεφομένου δὲ αἰεὶ γίγνεται διαίρεσις, φανερὸν ὅτι πᾶς χρόνος ἔσται συνεχής.

ἅμα δὲ δῆλον καὶ ὅτι μέγεθος ἅπαν ἐστὶ συνεχές· τὰς αὐτὰς γὰρ καὶ τὰς ἴσας διαιρέσεις ὁ χρόνος διαιρεῖται καὶ τὸ μέγεθος. ἔτι δὲ καὶ ἐκ τῶν εἰωθότων λόγων λέγεσθαι φανερὸν ὡς εἴπερ ὁ χρόνος ἐστὶ συνεχής, ὅτι καὶ τὸ μέγεθος, εἴπερ ἐν τῷ ἡμίσει χρόνῳ ἥμισυ διέρχεται καὶ ἁπλῶς ἐν τῷ ἐλάττονι ἔλαττον· αἱ γὰρ αὐταὶ διαιρέσεις ἔσονται τοῦ χρόνου καὶ τοῦ μεγέθους. καὶ εἰ ὁποτερονοῦν ἄπειρον, καὶ θάτερον, καὶ ὡς θάτερον, καὶ θάτερον, οἷον εἰ μὲν τοῖς ἐσχάτοις ἄπειρος ὁ χρόνος, καὶ τὸ μῆκος τοῖς ἐσχάτοις, εἰ δὲ τῇ διαιρέσει, τῇ διαιρέσει καὶ τὸ μῆκος, εἰ δὲ ἀμφοῖν, ἀμφοῖν καὶ τὸ μέγεθος.

διὸ καὶ ὁ Ζήνωνος λόγος ψεῦδος λαμβάνει τὸ μὴ ἐνδέχεσθαι τὰ ἄπειρα διελθεῖν ἢ ἅψασθαι τῶν ἀπείρων καθ’ ἕκαστον ἐν πεπερασμένῳ χρόνῳ. διχῶς γὰρ λέγεται καὶ τὸ μῆκος καὶ ὁ χρόνος ἄπειρον, καὶ ὅλως πᾶν τὸ συνεχές, ἤτοι κατὰ διαίρεσιν ἢ τοῖς ἐσχάτοις. τῶν μὲν οὖν κατὰ τὸ ποσὸν ἀπείρων οὐκ ἐνδέχεται ἅψασθαι ἐν πεπερασμένῳ χρόνῳ, τῶν δὲ κατὰ διαίρεσιν ἐνδέχεται· καὶ γὰρ αὐτὸς ὁ χρόνος οὕτως ἄπειρος. ὥστε ἐν τῷ ἀπείρῳ καὶ οὐκ ἐν τῷ πεπερασμένῳ συμβαίνει διιέναι τὸ ἄπειρον, καὶ ἅπτεσθαι τῶν ἀπείρων τοῖς ἀπείροις, οὐ τοῖς πεπερασμένοις. οὔτε δὴ τὸ ἄπειρον οἷόν τε ἐν πεπερασμένῳ χρόνῳ διελθεῖν, οὔτ’ ἐν ἀπείρῳ τὸ πεπερασμένον· ἀλλ’ ἐάν τε ὁ χρόνος ἄπειρος ᾖ, καὶ τὸ μέγεθος ἔσται ἄπειρον, ἐάν τε τὸ μέγεθος, καὶ ὁ χρόνος. ἔστω γὰρ πεπερασμένον μέγεθος ἐφ’ οὗ ΑΒ, χρόνος δὲ ἄπειρος ἐφ’ ᾧ Γ· εἰλήφθω δέ τι τοῦ (233b.) χρόνου πεπερασμένον, ἐφ’ ᾧ ΓΔ. ἐν τούτῳ οὖν δίεισί τι τοῦ μεγέθους, καὶ ἔστω διεληλυθὸς ἐφ’ ᾧ ΒΕ. τοῦτο δὲ ἢ καταμετρήσει τὸ ἐφ’ ᾧ ΑΒ, ἢ ἐλλείψει, ἢ ὑπερβαλεῖ· διαφέρει γὰρ οὐθέν· εἰ γὰρ ἀεὶ τὸ ἴσον τῷ ΒΕ μέγεθος ἐν ἴσῳ χρόνῳ δίεισιν, τοῦτο δὲ καταμετρεῖ τὸ ὅλον, πεπερασμέ νος ἔσται ὁ πᾶς χρόνος ἐν ᾧ διῆλθεν· εἰς ἴσα γὰρ διαιρεθήσεται καὶ τὸ μέγεθος. ἔτι δ’ εἰ μὴ πᾶν μέγεθος ἐν ἀπείρῳ χρόνῳ δίεισιν, ἀλλ’ ἐνδέχεταί τι καὶ ἐν πεπερασμένῳ διελθεῖν, οἷον τὸ ΒΕ, τοῦτο δὲ καταμετρήσει τὸ πᾶν, καὶ τὸ ἴσον ἐν ἴσῳ δίεισιν, ὥστε πεπερασμένος ἔσται καὶ ὁ χρόνος. ὅτι δ’ οὐκ ἐν ἀπείρῳ δίεισιν τὸ ΒΕ, φανερόν, εἰ ληφθείη ἐπὶ θάτερα πεπερασμένος ὁ χρόνος· εἰ γὰρ ἐν ἐλάττονι τὸ μέρος δίεισιν, τοῦτο ἀνάγκη πεπεράνθαι, θατέρου γε πέρατος ὑπάρχοντος. ἡ αὐτὴ δὲ ἀπόδειξις καὶ εἰ τὸ μὲν μῆκος ἄπειρον ὁ δὲ χρόνος πεπερασμένος. φανερὸν οὖν ἐκ τῶν εἰρημένων ὡς οὔτε γραμμὴ οὔτε ἐπίπεδον οὔτε ὅλως τῶν συνεχῶν οὐθὲν ἔσται ἄτομον,

οὐ μόνον διὰ τὸ νῦν λεχθέν, ἀλλὰ καὶ ὅτι συμβήσεται διαιρεῖσθαι τὸ ἄτομον. ἐπεὶ γὰρ ἐν ἅπαντι χρόνῳ τὸ θᾶττον καὶ βραδύτερον ἔστι, τὸ δὲ θᾶττον πλεῖον διέρχεται ἐν τῷ ἴσῳ χρόνῳ, ἐνδέχεται δὲ καὶ διπλάσιον καὶ ἡμιόλιον διιέναι μῆκος (εἴη γὰρ ἂν οὗτος ὁ λόγος τοῦ τάχους), ἐνηνέχθω οὖν τὸ θᾶττον ἡμιόλιον ἐν τῷ αὐτῷ χρόνῳ, καὶ διῃρήσθω τὰ μεγέθη τὸ μὲν τοῦ θάττονος εἰς τρία ἄτομα, ἐφ’ ὧν ΑΒ ΒΓ ΓΔ, τὸ δὲ τοῦ βραδυτέρου εἰς δύο, ἐφ’ ὧν ΕΖ ΖΗ. οὐκοῦν καὶ ὁ χρόνος διαιρεθήσεται εἰς τρία ἄτομα· τὸ γὰρ ἴσον ἐν τῷ ἴσῳ χρόνω δίεισιν. διῃρήσθω οὖν ὁ χρόνος εἰς τὰ ΚΛ ΛΜ ΜΝ. πάλιν δ’ ἐπεὶ τὸ βραδύτερον ἐνήνεκται τὴν ΕΖΗ, καὶ ὁ χρόνος τμηθήσεται δίχα. διαιρεθήσεται ἄρα τὸ ἄτομον, καὶ τὸ ἀμερὲς οὐκ ἐν ἀτόμῳ δίει σιν ἀλλ’ ἐν πλείονι. φανερὸν οὖν ὅτι οὐδέν ἐστι τῶν συνεχῶν ἀμερές.

Κεφάλαιο 3

Ἀνάγκη δὲ καὶ τὸ νῦν τὸ μὴ καθ’ ἕτερον ἀλλὰ καθ’ αὑτὸ καὶ πρῶτον λεγόμενον ἀδιαίρετον εἶναι, καὶ ἐν ἅπαντι τὸ τοιοῦτο χρόνῳ ἐνυπάρχειν. ἔστιν γὰρ ἔσχατόν τι τοῦ (234a.) γεγονότος, οὗ ἐπὶ τάδε οὐθέν ἐστι τοῦ μέλλοντος, καὶ πάλιν τοῦ μέλλοντος, οὗ ἐπὶ τάδε οὐθέν ἐστι τοῦ γεγονότος· ὃ δή φαμεν ἀμφοῖν εἶναι πέρας. τοῦτο δὲ ἐὰν δειχθῇ ὅτι τοιοῦτόν ἐστιν [καθ’ αὑτὸ] καὶ ταὐτόν, ἅμα φανερὸν ἔσται καὶ ὅτι ἀδιαίρετον. ἀνάγκη δὴ τὸ αὐτὸ εἶναι τὸ νῦν τὸ ἔσχατον ἀμφοτέ ρων τῶν χρόνων· εἰ γὰρ ἕτερον, ἐφεξῆς μὲν οὐκ ἂν εἴη θάτερον θατέρῳ διὰ τὸ μὴ εἶναι συνεχὲς ἐξ ἀμερῶν, εἰ δὲ χωρὶς ἑκάτερον, μεταξὺ ἔσται χρόνος· πᾶν γὰρ τὸ συνεχὲς τοιοῦτον ὥστ’ εἶναί τι συνώνυμον μεταξὺ τῶν περάτων. ἀλλὰ μὴν εἰ χρόνος τὸ μεταξύ, διαιρετὸν ἔσται· πᾶς γὰρ χρόνος δέδεικται ὅτι διαιρετός. ὥστε διαιρετὸν τὸ νῦν. εἰ δὲ διαιρετὸν τὸ νῦν, ἔσται τι τοῦ γεγονότος ἐν τῷ μέλλοντι καὶ τοῦ μέλλοντος ἐν τῷ γεγονότι· καθ’ ὃ γὰρ ἂν διαιρεθῇ, τοῦτο διοριεῖ τὸν παρήκοντα καὶ τὸν μέλλοντα χρόνον. ἅμα δὲ καὶ οὐκ ἂν καθ’ αὑτὸ εἴη τὸ νῦν, ἀλλὰ καθ’ ἕτερον· ἡ γὰρ διαίρεσις οὐ καθ’ αὑτό. πρὸς δὲ τούτοις τοῦ νῦν τὸ μέν τι γεγονὸς ἔσται τὸ δὲ μέλλον, καὶ οὐκ ἀεὶ τὸ αὐτὸ γεγονὸς ἢ μέλλον. οὐδὲ δὴ τὸ νῦν τὸ αὐτό· πολλαχῇ γὰρ διαιρετὸς ὁ χρόνος. ὥστ’ εἰ ταῦτα ἀδύνατον ὑπάρχειν, ἀνάγκη τὸ αὐτὸ εἶναι τὸ ἐν ἑκατέρῳ νῦν. ἀλλὰ μὴν εἰ ταὐτό, φανερὸν ὅτι καὶ ἀδιαίρετον· εἰ γὰρ διαιρετόν, πάλιν ταὐτὰ συμβήσεται ἃ καὶ ἐν τῷ πρότερον. ὅτι μὲν τοίνυν ἔστιν τι ἐν τῷ χρόνῳ ἀδιαίρετον, ὅ φαμεν εἶναι τὸ νῦν, δῆλόν ἐστιν ἐκ τῶν εἰρημένων·

ὅτι δ’ οὐθὲν ἐν τῷ νῦν κινεῖται, ἐκ τῶνδε φανερόν ἐστιν. εἰ γάρ, ἐνδέχεται καὶ θᾶττον κινεῖσθαι καὶ βραδύτερον. ἔστω δὴ τὸ νῦν ἐφ’ ᾧ Ν, κεκινήσθω δ’ ἐν αὐτῷ τὸ θᾶττον τὴν ΑΒ. οὐκοῦν τὸ βραδύτερον ἐν τῷ αὐτῷ ἐλάττω τῆς ΑΒ κινηθήσεται, οἷον τὴν ΑΓ. ἐπεὶ δὲ τὸ βραδύτερον ἐν ὅλῳ τῷ νῦν κεκίνηται τὴν ΑΓ, τὸ θᾶττον ἐν ἐλάττονι τούτου κινηθήσεται, ὥστε διαιρεθήσεται τὸ νῦν. ἀλλ’ ἦν ἀδιαίρετον. οὐκ ἄρα ἔστιν κινεῖσθαι ἐν τῷ νῦν.

ἀλλὰ μὴν οὐδ’ ἠρεμεῖν· ἠρεμεῖν γὰρ λέγομεν τὸ πεφυκὸς κινεῖσθαι μὴ κινούμενον ὅτε πέφυκεν καὶ οὗ καὶ ὥς, ὥστ’ ἐπεὶ ἐν τῷ νῦν οὐθὲν πέφυκε κινεῖσθαι, δῆλον ὡς οὐδ’ ἠρεμεῖν.

ἔτι δ’ εἰ τὸ αὐτὸ μέν ἐστι τὸ νῦν ἐν ἀμφοῖν τοῖν χρόνοιν, (234b.) ἐνδέχεται δὲ τὸν μὲν κινεῖσθαι τὸν δ’ ἠρεμεῖν ὅλον, τὸ δ’ ὅλον κινούμενον τὸν χρόνον ἐν ὁτῳοῦν κινηθήσεται τῶν τούτου καθ’ ὃ πέφυκε κινεῖσθαι, καὶ τὸ ἠρεμοῦν ὡσαύτως ἠρεμήσει, συμβήσεται τὸ αὐτὸ ἅμα ἠρεμεῖν καὶ κινεῖσθαι· τὸ γὰρ αὐτὸ ἔσχατον τῶν χρόνων ἀμφοτέρων, τὸ νῦν.

ἔτι δ’ ἠρεμεῖν μὲν λέγομεν τὸ ὁμοίως ἔχον καὶ αὐτὸ καὶ τὰ μέρη νῦν καὶ πρότερον· ἐν δὲ τῷ νῦν οὐκ ἔστι τὸ πρότερον, ὥστ’ οὐδ’ ἠρεμεῖν.

ἀνάγκη ἄρα καὶ κινεῖσθαι τὸ κινούμενον ἐν χρόνῳ καὶ ἠρεμεῖν τὸ ἠρεμοῦν.

Κεφάλαιο 4

Τὸ δὲ μεταβάλλον ἅπαν ἀνάγκη διαιρετὸν εἶναι. ἐπεὶ γὰρ ἔκ τινος εἴς τι πᾶσα μεταβολή, καὶ ὅταν μὲν ᾖ ἐν τούτῳ εἰς ὃ μετέβαλλεν, οὐκέτι μεταβάλλει, ὅταν δὲ ἐξ οὗ μετέβαλλεν, καὶ αὐτὸ καὶ τὰ μέρη πάντα, οὔπω μεταβάλλει (τὸ γὰρ ὡσαύτως ἔχον καὶ αὐτὸ καὶ τὰ μέρη οὐ μεταβάλλει), ἀνάγκη οὖν τὸ μέν τι ἐν τούτῳ εἶναι, τὸ δ’ ἐν θατέρῳ τοῦ μεταβάλλοντος· οὔτε γὰρ ἐν ἀμφοτέροις οὔτ’ ἐν μηδετέρῳ δυνατόν. λέγω δ’ εἰς ὃ μεταβάλλει τὸ πρῶτον κατὰ τὴν μεταβολήν, οἷον ἐκ τοῦ λευκοῦ τὸ φαιόν, οὐ τὸ μέλαν· οὐ γὰρ ἀνάγκη τὸ μεταβάλλον ἐν ὁποτερῳοῦν εἶναι τῶν ἄκρων. φανερὸν οὖν ὅτι πᾶν τὸ μεταβάλλον ἔσται διαιρετόν.

κίνησις δ’ ἐστὶν διαιρετὴ διχῶς, ἕνα μὲν τρόπον τῷ χρόνῳ, ἄλλον δὲ κατὰ τὰς τῶν μερῶν τοῦ κινουμένου κινήσεις, οἷον εἰ τὸ ΑΓ κινεῖται ὅλον, καὶ τὸ ΑΒ κινήσεται καὶ τὸ ΒΓ. ἔστω δὴ τοῦ μὲν ΑΒ ἡ ΔΕ, τοῦ δὲ ΒΓ ἡ ΕΖ κίνησις τῶν μερῶν. ἀνάγκη δὴ τὴν ὅλην, ἐφ’ ἧς ΔΖ, τοῦ ΑΓ εἶναι κίνησιν. κινήσεται γὰρ κατὰ ταύτην, ἐπείπερ ἑκάτερον τῶν μερῶν κινεῖται καθ’ ἑκατέραν· οὐθὲν δὲ κινεῖται κατὰ τὴν ἄλλου κίνησιν· ὥστε ἡ ὅλη κίνησις τοῦ ὅλου ἐστὶν μεγέθους κίνησις.

ἔτι δ’ εἰ πᾶσα μὲν κίνησις τινός, ἡ δ’ ὅλη κίνησις ἡ ἐφ’ ἧς ΔΖ μήτε τῶν μερῶν ἐστιν μηδετέρου (μέρους γὰρ ἑκατέρα) μήτ’ ἄλλου μηδενός (οὗ γὰρ ὅλη ὅλου, καὶ τὰ μέρη τῶν μερῶν· τὰ δὲ μέρη τῶν ΑΒ ΒΓ καὶ οὐδένων ἄλλων· πλειόνων γὰρ οὐκ ἦν μία κίνησις), κἂν ἡ ὅλη κίνησις εἴη τοῦ ΑΒΓ μεγέθους.

ἔτι δ’ εἰ ἔστιν ἄλλη τοῦ ὅλου κίνησις, οἷον ἐφ’ ἧς ΘΙ, ἀφαιρεθήσεται ἀπ’ αὐτῆς (235a.) ἡ ἑκατέρων τῶν μερῶν κίνησις· αὗται δ’ ἴσαι ἔσονται ταῖς ΔΕ ΕΖ· μία γὰρ ἑνὸς κίνησις. ὥστ’ εἰ μὲν ὅλη διαιρεθήσεται ἡ ΘΙ εἰς τὰς τῶν μερῶν κινήσεις, ἴση ἔσται ἡ ΘΙ τῇ ΔΖ· εἰ δ’ ἀπολείπει τι, οἷον τὸ ΚΙ, αὕτη οὐδενὸς ἔσται κίνησις (οὔτε γὰρ τοῦ ὅλου οὔτε τῶν μερῶν διὰ τὸ μίαν εἶναι ἑνός, οὔτε ἄλλου οὐθενός· ἡ γὰρ συνεχὴς κίνησίς ἐστι συνεχῶν τινῶν), ὡσαύτως δὲ καὶ εἰ ὑπερβάλλει κατὰ τὴν διαίρεσιν· ὥστ’ εἰ τοῦτο ἀδύνατον, ἀνάγκη τὴν αὐτὴν εἶναι καὶ ἴσην.

αὕτη μὲν οὖν ἡ διαίρεσις κατὰ τὰς τῶν μερῶν κινήσεις ἐστίν, καὶ ἀνάγκη παντὸς εἶναι τοῦ μεριστοῦ αὐτήν· ἄλλη δὲ κατὰ τὸν χρόνον· ἐπεὶ γὰρ ἅπασα κίνησις ἐν χρόνῳ, χρόνος δὲ πᾶς διαιρετός, ἐν δὲ τῷ ἐλάττονι ἐλάττων ἡ κίνησις, ἀνάγκη πᾶσαν κίνησιν διαιρεῖσθαι κατὰ τὸν χρόνον. ἐπεὶ δὲ πᾶν τὸ (13) κινούμενον ἔν τινι κινεῖται καὶ χρόνον τινά, καὶ παντὸς ἔστι κίνησις, ἀνάγκη τὰς αὐτὰς εἶναι διαιρέσεις τοῦ τε χρόνου καὶ τῆς κινήσεως καὶ τοῦ κινεῖσθαι καὶ τοῦ κινουμένου καὶ ἐν ᾧ ἡ κίνησις (πλὴν οὐ πάντων ὁμοίως ἐν οἷς ἡ κίνησις, ἀλλὰ τοῦ μὲν τόπου καθ' αὑτό, τοῦ δὲ ποιοῦ κατὰ συμβεβηκός). εἰλήφθω γὰρ ὁ χρόνος ἐν ᾧ κινεῖται ἐφ' ᾧ Α, καὶ ἡ κίνησις ἐφ' ᾧ Β. εἰ οὖν τὴν ὅλην ἐν τῷ παντὶ χρόνῳ κεκίνηται, ἐν τῷ ἡμίσει ἐλάττω, καὶ πάλιν τούτου διαιρεθέντος ἐλάττω ταύτης, καὶ ἀεὶ οὕτως.

ὁμοίως δὲ καί, εἰ ἡ κίνησις διαιρετή, καὶ ὁ χρόνος διαιρετός· εἰ γὰρ τὴν ὅλην ἐν τῷ παντί, τὴν ἡμίσειαν ἐν τῷ ἡμίσει, καὶ πάλιν τὴν ἐλάττω ἐν τῷ ἐλάττονι. τὸν αὐτὸν δὲ τρόπον καὶ τὸ κινεῖσθαι διαιρεθήσεται. ἔστω γὰρ ἐφ' ᾧ Γ τὸ κινεῖσθαι. κατὰ δὴ τὴν ἡμίσειαν κίνησιν ἔλαττον ἔσται τοῦ ὅλου, καὶ πάλιν κατὰ τὴν τῆς ἡμισείας ἡμίσειαν, καὶ αἰεὶ οὕτως. ἔστι δὲ καὶ ἐκθέμενον τὸ καθ' ἑκατέραν τῶν κινήσεων κινεῖσθαι, οἷον κατά τε τὴν ΔΓ καὶ τὴν ΓΕ, λέγειν ὅτι τὸ ὅλον ἔσται κατὰ τὴν ὅλην (εἰ γὰρ ἄλλο, πλείω ἔσται κινεῖσθαι κατὰ τὴν αὐτὴν κίνησιν), ὥσπερ ἐδείξαμεν καὶ τὴν κίνησιν διαιρετὴν εἰς τὰς τῶν μερῶν κινήσεις οὖσαν· ληφθέντος γὰρ τοῦ κινεῖσθαι καθ' ἑκατέραν συνεχὲς ἔσται τὸ ὅλον.

ὡσαύτως δὲ δειχθήσεται καὶ τὸ μῆκος διαιρετόν, καὶ ὅλως πᾶν ἐν ᾧ ἐστιν ἡ μεταβολή (πλὴν ἔνια κατὰ συμβεβηκός, ὅτι τὸ μεταβάλλον ἐστὶν διαιρετόν)· ἑνὸς γὰρ διαιρουμένου πάντα διαιρεθήσεται. καὶ ἐπὶ τοῦ (235b.) πεπερασμένα εἶναι ἢ ἄπειρα ὁμοίως ἕξει κατὰ πάντων. ἠκολούθηκεν δὲ μάλιστα τὸ διαιρεῖσθαι πάντα καὶ ἄπειρα εἶναι ἀπὸ τοῦ μεταβάλλοντος· εὐθὺς γὰρ ἐνυπάρχει τῷ μεταβάλλοντι τὸ διαιρετὸν καὶ τὸ ἄπειρον. τὸ μὲν οὖν διαιρετὸν δέδεικται πρότερον, τὸ δ' ἄπειρον ἐν τοῖς ἑπομένοις ἔσται δῆλον.

Κεφάλαιο 5

Ἐπεὶ δὲ πᾶν τὸ μεταβάλλον ἔκ τινος εἴς τι μεταβάλλει, ἀνάγκη τὸ μεταβεβληκός, ὅτε πρῶτον μεταβέβληκεν, εἶναι ἐν ᾧ μεταβέβληκεν. τὸ γὰρ μεταβάλλον, ἐξ οὗ μεταβάλλει, ἐξίσταται ἢ ἀπολείπει αὐτό, καὶ ἤτοι ταὐτόν ἐστι τὸ μεταβάλλειν καὶ τὸ ἀπολείπειν, ἢ ἀκολουθεῖ τῷ μετα βάλλειν τὸ ἀπολείπειν. εἰ δὲ τῷ μεταβάλλειν τὸ ἀπολείπειν, τῷ μεταβεβληκέναι τὸ ἀπολελοιπέναι· ὁμοίως γὰρ ἑκάτερον ἔχει πρὸς ἑκάτερον.

ἐπεὶ οὖν μία τῶν μεταβολῶν ἡ κατ' ἀντίφασιν, ὅτε μεταβέβληκεν ἐκ τοῦ μὴ ὄντος εἰς τὸ ὄν, ἀπολέλοιπεν τὸ μὴ ὄν. ἔσται ἄρα ἐν τῷ ὄντι· πᾶν γὰρ ἀνάγκη ἢ εἶναι ἢ μὴ εἶναι. φανερὸν οὖν ὅτι ἐν τῇ κατ' ἀντίφασιν μεταβολῇ τὸ μεταβεβληκὸς ἔσται ἐν ᾧ μεταβέβληκεν. εἰ δ' ἐν ταύτῃ, καὶ ἐν ταῖς ἄλλαις· ὁμοίως γὰρ ἐπὶ μιᾶς καὶ τῶν ἄλλων.

ἔτι δὲ καὶ καθ' ἑκάστην λαμβάνουσι φανερόν, εἴπερ ἀνάγκη τὸ μεταβεβληκὸς εἶναί που ἢ ἔν τινι. ἐπεὶ γὰρ ἐξ οὗ μεταβέβληκεν ἀπολέλοιπεν, ἀνάγκη δ' εἶναί που, ἢ ἐν τούτῳ ἢ ἐν ἄλλῳ ἔσται. εἰ μὲν οὖν ἐν ἄλλῳ, οἷον ἐν τῷ Γ, τὸ εἰς τὸ Β μεταβεβληκός, πάλιν ἐκ τοῦ Γ μεταβάλλει εἰς τὸ Β· οὐ γὰρ ἦν ἐχόμενον τὸ Β, ἡ δὲ μεταβολὴ συνεχής. ὥστε τὸ μεταβεβληκός, ὅτε μεταβέβληκεν, μεταβάλλει εἰς ὃ μεταβέβληκεν. τοῦτο δ' ἀδύνατον· ἀνάγκη ἄρα τὸ μεταβεβληκὸς εἶναι ἐν τούτῳ εἰς ὃ μεταβέβληκεν. φανερὸν οὖν ὅτι καὶ τὸ γεγονός, ὅτε γέγονεν, ἔσται, καὶ τὸ ἐφθαρμένον οὐκ ἔσται· καθόλου τε γὰρ εἴρηται περὶ πάσης μεταβολῆς, καὶ μάλιστα δῆλον ἐν τῇ κατ' ἀντίφασιν. ὅτι μὲν τοίνυν τὸ μεταβεβληκός, ὅτε μεταβέβληκε πρῶτον, ἐν ἐκείνῳ ἐστίν, δῆλον·

ἐν ᾧ δὲ πρώτῳ μεταβέβληκεν τὸ μεταβεβληκός, ἀνάγκη ἄτομον εἶναι. λέγω δὲ πρῶτον ὃ μὴ τῷ ἕτερόν τι αὐτοῦ εἶναι τοιοῦτόν ἐστιν. ἔστω γὰρ διαιρετὸν τὸ ΑΓ, καὶ διῃρήσθω κατὰ τὸ Β. εἰ μὲν οὖν ἐν τῷ ΑΒ μετα βέβληκεν ἢ πάλιν ἐν τῷ ΒΓ, οὐκ ἂν ἐν πρώτῳ τῷ ΑΓ με ταβεβληκὸς εἴη. εἰ δ' ἐν ἑκατέρῳ μετέβαλλεν (ἀνάγκη γὰρ (236a.) ἢ μεταβεβληκέναι ἢ μεταβάλλειν ἐν ἑκατέρῳ), κἂν ἐν τῷ ὅλῳ μεταβάλλοι· ἀλλ' ἦν μεταβεβληκός. ὁ αὐτὸς δὲ λόγος καὶ εἰ ἐν τῷ μὲν μεταβάλλει, ἐν δὲ τῷ μεταβέβληκεν· ἔσται γάρ τι τοῦ πρώτου πρότερον· ὥστ' οὐκ ἂν εἴη διαιρετὸν ἐν ᾧ μεταβέβληκεν. φανερὸν οὖν ὅτι καὶ τὸ ἐφθαρμένον καὶ τὸ γεγονὸς ἐν ἀτόμῳ τὸ μὲν ἔφθαρται τὸ δὲ γέγονεν.

λέγεται δὲ τὸ ἐν ᾧ πρώτῳ μεταβέβληκε διχῶς, τὸ μὲν ἐν ᾧ πρώτῳ ἐπετελέσθη ἡ μεταβολή (τότε γὰρ ἀληθὲς εἰπεῖν ὅτι μεταβέβληκεν), τὸ δ' ἐν ᾧ πρώτῳ ἤρξατο μεταβάλλειν. τὸ μὲν οὖν κατὰ τὸ τέλος τῆς μεταβολῆς πρῶτον λεγόμενον ὑπάρχει τε καὶ ἔστιν (ἐνδέχεται γὰρ ἐπιτελεσθῆναι μεταβολὴν καὶ ἔστι μεταβολῆς τέλος, ὃ δὴ καὶ δέδεικται ἀδιαίρετον ὂν διὰ τὸ πέρας εἶναι)· τὸ δὲ κατὰ τὴν ἀρχὴν ὅλως οὐκ ἔστιν· οὐ γὰρ ἔστιν ἀρχὴ μεταβολῆς, οὐδ᾽ ἐν ᾧ πρώτῳ τοῦ χρόνου μετέβαλλεν. ἔστω γὰρ πρῶτον ἐφ᾽ ᾧ τὸ ΑΔ. τοῦτο δὴ ἀδιαίρετον μὲν οὐκ ἔστιν· συμβήσεται γὰρ ἐχόμενα εἶναι τὰ νῦν. ἔτι δ᾽ εἰ ἐν τῷ ΓΑ χρόνῳ παντὶ ἠρεμεῖ (κείσθω γὰρ ἠρεμοῦν), καὶ ἐν τῷ Α ἠρεμεῖ, ὥστ᾽ εἰ ἀμερές ἐστι τὸ ΑΔ, ἅμα ἠρεμήσει καὶ μεταβεβληκὸς ἔσται· ἐν μὲν γὰρ τῷ Α ἠρεμεῖ, ἐν δὲ τῷ Δ μεταβέβληκεν. ἐπεὶ δ᾽ οὐκ ἔστιν ἀμερές, ἀνάγκη διαιρετὸν εἶναι καὶ ἐν ὁτῳοῦν τῶν τούτου μεταβεβληκέναι· διαιρεθέντος γὰρ τοῦ ΑΔ, εἰ μὲν ἐν μηδετέρῳ μεταβέβληκεν, οὐδ᾽ ἐν τῷ ὅλῳ· εἰ δ᾽ ἐν ἀμφοῖν μεταβάλλει καὶ ἐν τῷ παντί, εἴτ᾽ ἐν θατέρῳ μεταβέβληκεν, οὐκ ἐν τῷ ὅλῳ πρώτῳ. ὥστε ἀνάγκη ἐν ὁτῳοῦν μεταβεβληκέναι. φανερὸν τοίνυν ὅτι οὐκ ἔστιν ἐν ᾧ πρώτῳ μεταβέβληκεν· ἄπειροι γὰρ αἱ διαιρέσεις. οὐδὲ δὴ τοῦ μεταβεβληκότος ἔστιν τι πρῶτον ὃ μεταβέβληκεν. ἔστω γὰρ τὸ ΔΖ πρῶτον μεταβεβληκὸς τοῦ ΔΕ· πᾶν γὰρ δέδεικται διαιρετὸν τὸ μεταβάλλον. ὁ δὲ χρόνος ἐν ᾧ τὸ ΔΖ μεταβέβληκεν ἔστω ἐφ᾽ ᾧ ΘΙ. εἰ οὖν ἐν τῷ παντὶ τὸ ΔΖ μεταβέβληκεν, ἐν τῷ ἡμίσει ἔλαττον ἔσται τι μεταβεβληκὸς καὶ πρότερον τοῦ ΔΖ, καὶ πάλιν τούτου ἄλλο, κἀκείνου ἕτερον, καὶ αἰεὶ οὕτως. ὥστ᾽ οὐθὲν ἔσται πρῶτον τοῦ μεταβάλλοντος ὃ μεταβέβληκεν. ὅτι μὲν οὖν οὔτε τοῦ μεταβάλλοντος οὔτ᾽ ἐν ᾧ μεταβάλλει χρόνῳ πρῶτον οὐθέν ἐστιν, φανερὸν ἐκ τῶν εἰρημένων·

(236b.) αὐτὸ δὲ ὃ μεταβάλλει ἢ καθ᾽ ὃ μεταβάλλει, οὐκέθ᾽ ὁμοίως ἕξει. τρία γάρ ἐστιν ἃ λέγεται κατὰ τὴν μεταβολήν, τό τε μεταβάλλον καὶ ἐν ᾧ καὶ εἰς ὃ μεταβάλλει, οἷον ὁ ἄνθρωπος καὶ ὁ χρόνος καὶ τὸ λευκόν. ὁ μὲν οὖν ἄνθρωπος καὶ ὁ χρόνος διαιρετοί, περὶ δὲ τοῦ λευκοῦ ἄλλος λόγος. πλὴν κατὰ συμβεβηκός γε πάντα διαιρετά· ᾧ γὰρ συμβέβηκεν τὸ λευκὸν ἢ τὸ ποιόν, ἐκεῖνο διαιρετόν ἐστιν· ἐπεὶ ὅσα γε καθ᾽ αὑτὰ λέγεται διαιρετὰ καὶ μὴ κατὰ συμβεβηκός, οὐδ᾽ ἐν τούτοις ἔσται τὸ πρῶτον, οἷον ἐν τοῖς μεγέθεσιν. ἔστω γὰρ τὸ ἐφ᾽ ᾧ ΑΒ μέγεθος, κεκινήσθω δ᾽ ἐκ τοῦ Β εἰς τὸ Γ πρῶτον. οὐκοῦν εἰ μὲν ἀδιαίρετον ἔσται τὸ ΒΓ, ἀμερὲς ἀμεροῦς ἔσται ἐχόμενον· εἰ δὲ διαιρετόν, ἔσται τι τοῦ Γ πρότερον, εἰς ὃ μεταβέβληκεν, κἀκείνου πάλιν ἄλλο, καὶ ἀεὶ οὕτως διὰ τὸ μηδέποτε ὑπολείπειν τὴν διαίρεσιν. ὥστ᾽ οὐκ ἔσται πρῶτον εἰς ὃ μεταβέβλη κεν. ὁμοίως δὲ καὶ ἐπὶ τῆς τοῦ ποσοῦ μεταβολῆς· καὶ γὰρ αὕτη ἐν συνεχεῖ ἐστιν. φανερὸν οὖν ὅτι ἐν μόνῃ τῶν κινήσεων τῇ κατὰ τὸ ποιὸν ἐνδέχεται ἀδιαίρετον καθ᾽ αὑτὸ εἶναι.

Κεφάλαιο 6

Ἐπεὶ δὲ τὸ μεταβάλλον ἅπαν ἐν χρόνῳ μεταβάλλει, λέγεται δ’ ἐν χρόνῳ μεταβάλλειν καὶ ὡς ἐν πρώτῳ καὶ ὡς καθ’ ἕτερον, οἷον ἐν τῷ ἐνιαυτῷ ὅτι ἐν τῇ ἡμέρᾳ μεταβάλλει, ἐν ᾧ πρώτῳ χρόνῳ μεταβάλλει τὸ μεταβάλλον, ἐν ὁτῳοῦν ἀνάγκη τούτου μεταβάλλειν. δῆλον μὲν οὖν καὶ ἐκ τοῦ ὁρισμοῦ (τὸ γὰρ πρῶτον οὕτως ἐλέγομεν), οὐ μὴν ἀλλὰ καὶ ἐκ τῶνδε φανερόν. ἔστω γὰρ ἐν ᾧ πρώτῳ κινεῖται τὸ κινούμενον ἐφ’ ᾧ ΧΡ, καὶ διῃρήσθω κατὰ τὸ Κ· πᾶς γὰρ χρόνος διαιρετός. ἐν δὴ τῷ ΧΚ χρόνῳ ἤτοι κινεῖται ἢ οὐ κινεῖται, καὶ πάλιν ἐν τῷ ΚΡ ὡσαύτως. εἰ μὲν οὖν ἐν μηδετέρῳ κινεῖται, ἠρεμοίη ἂν ἐν τῷ παντί (κινεῖσθαι γὰρ ἐν μηθενὶ τῶν τούτου κινούμενον ἀδύνατον)· εἰ δ’ ἐν θατέρῳ μόνῳ κινεῖται, οὐκ ἂν ἐν πρώτῳ κινοῖτο τῷ ΧΡ· καθ’ ἕτερον γὰρ ἡ κίνησις. ἀνάγκη ἄρα ἐν ὁτῳοῦν τοῦ ΧΡ κινεῖσθαι.

δεδειγμένου δὲ τούτου φανερὸν ὅτι πᾶν τὸ κινούμενον ἀνάγκη κεκινῆσθαι πρότερον. εἰ γὰρ ἐν τῷ ΧΡ πρώτῳ χρόνῳ τὸ ΚΛ κεκίνηται μέγεθος, ἐν τῷ ἡμίσει τὸ ὁμοταχῶς κινούμενον καὶ ἅμα ἀρξάμενον τὸ ἥμισυ ἔσται κεκινημένον. εἰ δὲ τὸ (237a.) ὁμοταχὲς ἐν τῷ αὐτῷ χρόνῳ κεκίνηταί τι, καὶ θάτερον ἀνάγκη ταὐτὸ κεκινῆσθαι μέγεθος, ὥστε κεκινημένον ἔσται τὸ κινούμενον.

ἔτι δὲ εἰ ἐν τῷ παντὶ χρόνῳ τῷ ΧΡ κεκινῆσθαι λέγομεν, ἢ ὅλως ἐν ὁτῳοῦν χρόνῳ, τῷ λαβεῖν τὸ ἔσχατον αὐτοῦ νῦν (τοῦτο γάρ ἐστι τὸ ὁρίζον, καὶ τὸ μεταξὺ τῶν νῦν χρόνος), κἂν ἐν τοῖς ἄλλοις ὁμοίως λέγοιτο κεκινῆσθαι. τοῦ δ’ ἡμίσεος ἔσχατον ἡ διαίρεσις. ὥστε καὶ ἐν τῷ ἡμίσει κεκινημένον ἔσται καὶ ὅλως ἐν ὁτῳοῦν τῶν μερῶν· ἀεὶ γὰρ ἅμα τῇ τομῇ χρόνος ἔστιν ὡρισμένος ὑπὸ τῶν νῦν. εἰ οὖν ἅπας μὲν χρόνος διαιρετός, τὸ δὲ μεταξὺ τῶν νῦν χρό νος, ἅπαν τὸ μεταβάλλον ἄπειρα ἔσται μεταβεβληκός.

ἔτι δ’ εἰ τὸ συνεχῶς μεταβάλλον καὶ μὴ φθαρὲν μηδὲ πεπαυμένον τῆς μεταβολῆς ἢ μεταβάλλειν ἢ μεταβεβληκέναι ἀναγκαῖον ἐν ὁτῳοῦν, ἐν δὲ τῷ νῦν οὐκ ἔστιν μεταβάλλειν, ἀνάγκη μεταβεβληκέναι καθ’ ἕκαστον τῶν νῦν· ὥστ’ εἰ τὰ νῦν ἄπειρα, πᾶν τὸ μεταβάλλον ἄπειρα ἔσται μεταβεβληκός.

οὐ μόνον δὲ τὸ μεταβάλλον ἀνάγκη μεταβεβληκέναι, ἀλλὰ καὶ τὸ μεταβεβληκὸς ἀνάγκη μεταβάλλειν πρότερον· ἅπαν γὰρ τὸ ἔκ τινος εἴς τι μεταβεβληκὸς ἐν χρόνῳ μεταβέβληκεν. ἔστω γὰρ ἐν τῷ νῦν ἐκ τοῦ Α εἰς τὸ Β μεταβεβληκός. οὐκοῦν ἐν μὲν τῷ αὐτῷ νῦν ἐν ᾧ ἐστιν ἐν τῷ Α, οὐ μεταβέβληκεν (ἅμα γὰρ ἂν εἴη ἐν τῷ Α καὶ ἐν τῷ Β)· τὸ γὰρ μεταβεβληκός, ὅτε μεταβέβληκεν, ὅτι οὐκ ἔστιν ἐν τούτῳ, δέδεικται πρότερον· εἰ δ’ ἐν ἄλλῳ, μεταξὺ ἔσται χρόνος· οὐ γὰρ ἦν ἐχόμενα τὰ νῦν. ἐπεὶ οὖν ἐν χρόνῳ μεταβέβληκεν, χρόνος δ’ ἅπας διαιρετός, ἐν τῷ ἡμίσει ἄλλο ἔσται μεταβεβληκός, καὶ πάλιν ἐν τῷ ἐκείνου ἡμίσει ἄλλο, καὶ αἰεὶ οὕτως· ὥστε μεταβάλλοι ἂν πρότερον.

ἔτι δ’ ἐπὶ τοῦ μεγέθους φανερώτερον τὸ λεχθὲν διὰ τὸ συνεχὲς εἶναι τὸ μέγεθος ἐν ᾧ μεταβάλλει τὸ μεταβάλλον. ἔστω γάρ τι μεταβεβληκὸς ἐκ τοῦ Γ εἰς τὸ Δ. οὐκοῦν εἰ μὲν ἀδιαίρετόν ἐστι τὸ ΓΔ, ἀμερὲς ἀμεροῦς ἔσται ἐχόμενον· ἐπεὶ δὲ τοῦτο ἀδύνατον, ἀνάγκη μέγεθος εἶναι τὸ μεταξὺ καὶ εἰς ἄπειρα διαιρετόν· ὥστ’ εἰς ἐκεῖνα μεταβάλλει πρότερον. ἀνάγκη ἄρα πᾶν τὸ μεταβεβληκὸς μεταβάλλειν πρότερον. ἡ γὰρ αὐτὴ ἀπόδειξις (237b.) καὶ ἐν τοῖς μὴ συνεχέσιν, οἷον ἔν τε τοῖς ἐναντίοις καὶ ἐν ἀντιφάσει· ληψόμεθα γὰρ τὸν χρόνον ἐν ᾧ μεταβέβληκεν, καὶ πάλιν ταὐτὰ ἐροῦμεν. ὥστε ἀνάγκη τὸ μεταβεβληκὸς μεταβάλλειν καὶ τὸ μεταβάλλον μεταβεβληκέναι, καὶ ἔσται τοῦ μὲν μεταβάλλειν τὸ μεταβεβληκέναι πρότερον, τοῦ δὲ μεταβεβληκέναι τὸ μεταβάλλειν, καὶ οὐδέποτε ληφθήσεται τὸ πρῶτον. αἴτιον δὲ τούτου τὸ μὴ εἶναι ἀμερὲς ἀμεροῦς ἐχόμενον· ἄπειρος γὰρ ἡ διαίρεσις, καθάπερ ἐπὶ τῶν αὐξανομένων καὶ καθαιρουμένων γραμμῶν.

φανερὸν οὖν ὅτι καὶ τὸ γεγονὸς ἀνάγκη γίγνεσθαι πρότερον καὶ τὸ γιγνό μενον γεγονέναι, ὅσα διαιρετὰ καὶ συνεχῆ, οὐ μέντοι αἰεὶ ὃ γίγνεται, ἀλλ’ ἄλλο ἐνίοτε, οἷον τῶν ἐκείνου τι, ὥσπερ τῆς οἰκίας τὸν θεμέλιον. ὁμοίως δὲ καὶ ἐπὶ τοῦ φθειρομένου καὶ ἐφθαρμένου· εὐθὺς γὰρ ἐνυπάρχει τῷ γιγνομένῳ καὶ τῷ φθειρομένῳ ἄπειρόν τι συνεχεῖ γε ὄντι, καὶ οὐκ ἔστιν οὔτε γί γνεσθαι μὴ γεγονός τι οὔτε γεγονέναι μὴ γιγνόμενόν τι, ὁμοίως δὲ καὶ ἐπὶ τοῦ φθείρεσθαι καὶ ἐπὶ τοῦ ἐφθάρθαι· αἰεὶ γὰρ ἔσται τοῦ μὲν φθείρεσθαι τὸ ἐφθάρθαι πρότερον, τοῦ δ’ ἐφθάρθαι τὸ φθείρεσθαι. φανερὸν οὖν ὅτι καὶ τὸ γεγονὸς ἀνάγκη γίγνεσθαι πρότερον καὶ τὸ γιγνόμενον γεγονέναι· πᾶν γὰρ μέγεθος καὶ πᾶς χρόνος ἀεὶ διαιρετά.

ὥστ’ ἐν ᾧ ἂν ᾖ, οὐκ ἂν εἴη ὡς πρώτῳ.

Κεφάλαιο 7

Ἐπεὶ δὲ πᾶν τὸ κινούμενον ἐν χρόνῳ κινεῖται, καὶ ἐν τῷ πλείονι μεῖζον μέγεθος, ἐν τῷ ἀπείρῳ χρόνῳ ἀδύνατόν ἐστιν πεπερασμένην κινεῖσθαι, μὴ τὴν αὐτὴν αἰεὶ καὶ τῶν ἐκείνης τι κινούμενον, ἀλλ' ἐν ἅπαντι ἅπασαν. ὅτι μὲν οὖν εἴ τι ἰσοταχῶς κινοῖτο, ἀνάγκη τὸ πεπερασμένον ἐν πεπερασμένῳ κινεῖσθαι, δῆλον (ληφθέντος γὰρ μορίου ὃ καταμετρήσει τὴν ὅλην, ἐν ἴσοις χρόνοις τοσούτοις ὅσα τὰ μόριά ἐστιν, τὴν ὅλην κεκίνηται, ὥστ' ἐπεὶ ταῦτα πεπέρανται καὶ τῷ πόσον ἕκαστον καὶ τῷ ποσάκις ἅπαντα, καὶ ὁ χρόνος ἂν εἴη πεπερασμένος· τοσαυτάκις γὰρ ἔσται τοσοῦτος, ὅσος ὁ τοῦ μορίου χρόνος πολλαπλασιασθεὶς τῷ πλήθει τῶν μορίων)·

ἀλλὰ δὴ κἂν μὴ ἰσοταχῶς, διαφέρει οὐθέν. ἔστω γὰρ ἐφ' ἧς τὸ ΑΒ διάστημα πεπερασμένον, ὃ κεκίνηται (238a.) ἐν τῷ ἀπείρῳ, καὶ ὁ χρόνος ἄπειρος ἐφ' οὗ τὸ ΓΔ. εἰ δὴ ἀνάγκη πρότερον ἕτερον ἑτέρου κεκινῆσθαι (τοῦτο δὲ δῆλον, ὅτι τοῦ χρόνου ἐν τῷ προτέρῳ καὶ ὑστέρῳ ἕτερον κεκίνηται· ἀεὶ γὰρ ἐν τῷ πλείονι ἕτερον ἔσται κεκινημένον, ἐάν τε ἰσοταχῶς ἐάν τε μὴ ἰσοταχῶς μεταβάλλῃ, καὶ ἐάν τε ἐπιτείνῃ ἡ κίνησις ἐάν τε ἀνιῇ ἐάν τε μένῃ, οὐθὲν ἧττον), εἰλήφθω δή τι τοῦ ΑΒ διαστήματος, τὸ ΑΕ, ὃ καταμετρήσει τὴν ΑΒ. τοῦτο δὴ τοῦ ἀπείρου ἔν τινι ἐγένετο χρόνῳ· ἐν ἀπείρῳ γὰρ οὐχ οἷόν τε· τὸ γὰρ ἅπαν ἐν ἀπείρῳ. καὶ πάλιν ἕτερον δὴ ἐὰν λάβω ὅσον τὸ ΑΕ, ἀνάγκη ἐν πεπερασμένῳ χρόνῳ· τὸ γὰρ ἅπαν ἐν ἀπείρῳ. καὶ οὕτω δὴ λαμβάνων, ἐπειδὴ τοῦ μὲν ἀπείρου οὐθὲν ἔστι μόριον ὃ καταμετρήσει (ἀδύνατον γὰρ τὸ ἄπειρον εἶναι ἐκ πεπερασμένων καὶ ἴσων καὶ ἀνίσων, διὰ τὸ καταμετρηθήσεσθαι τὰ πεπερασμένα πλήθει καὶ μεγέθει ὑπό τινος ἑνός, ἐάν τε ἴσα ᾖ ἐάν τε ἄνισα, ὡρισμένα δὲ τῷ μεγέθει, οὐθὲν ἧττον), τὸ δὲ διάστημα τὸ πεπερασμένον ποσοῖς τοῖς ΑΕ μετρεῖται, ἐν πεπερασμένῳ ἂν χρόνῳ τὸ ΑΒ κινοῖτο (ὡσαύτως δὲ καὶ ἐπὶ ἠρεμήσεως)· ὥστε οὔτε γίγνεσθαι οὔτε φθείρεσθαι οἷόν τε ἀεί τι τὸ αὐτὸ καὶ ἕν. ὁ αὐτὸς δὲ λόγος καὶ ὅτι οὐδ' ἐν πεπερασμένῳ χρόνῳ ἄπειρον οἷόν τε κινεῖσθαι οὐδ' ἠρεμίζεσθαι, οὔθ' ὁμαλῶς κινούμενον οὔτ' ἀνωμάλως. ληφθέντος γάρ τινος μέρους ὃ ἀναμετρήσει τὸν ὅλον χρόνον, ἐν τούτῳ ποσόν τι διέξεισιν τοῦ μεγέθους καὶ οὐχ ὅλον (ἐν γὰρ τῷ παντὶ τὸ ὅλον), καὶ πάλιν ἐν τῷ ἴσῳ ἄλλο, καὶ ἐν ἑκάστῳ ὁμοίως, εἴτε ἴσον εἴτε ἄνισον τῷ ἐξ ἀρχῆς· διαφέρει γὰρ οὐδέν, εἰ μόνον πεπερασμένον ἕκαστον· δῆλον γὰρ ὡς ἀναιρουμένου τοῦ χρόνου τὸ ἄπειρον οὐκ ἀναιρεθήσεται, πεπερασμένης τῆς ἀφαιρέσεως γιγνομένης καὶ τῷ ποσῷ καὶ τῷ ποσάκις· ὥστ' οὐ δίεισιν ἐν πεπερασμένῳ χρόνῳ τὸ ἄπειρον. οὐδέν τε διαφέρει τὸ μέγεθος ἐπὶ θάτερα ἢ ἐπ' ἀμφότερα εἶναι ἄπειρον· ὁ γὰρ αὐτὸς ἔσται λόγος.

ἀποδεδειγμένων δὲ τούτων φανερὸν ὅτι οὐδὲ τὸ πεπερασμένον μέγεθος τὸ ἄπειρον ἐνδέχεται διελθεῖν ἐν πεπερασμένῳ διὰ τὴν αὐτὴν αἰτίαν· ἐν γὰρ τῷ μορίῳ τοῦ χρόνου πεπερασμένον δίεισι, καὶ ἐν ἑκάστῳ ὡσαύτως, ὥστ' ἐν τῷ παντὶ πεπερασμένον.

ἐπεὶ δὲ τὸ πεπερασμένον οὐ δίεισι τὸ ἄπειρον (238b.) ἐν πεπερασμένῳ χρόνῳ, δῆλον ὡς οὐδὲ τὸ ἄπειρον τὸ πεπερασμένον· εἰ γὰρ τὸ ἄπειρον τὸ πεπερασμένον, ἀνάγκη καὶ τὸ πεπερασμένον διιέναι τὸ ἄπειρον. οὐδὲν γὰρ διαφέρει ὁποτερονοῦν εἶναι τὸ κινούμενον· ἀμφοτέρως γὰρ τὸ πεπερασμένον δίεισι τὸ ἄπειρον. ὅταν γὰρ κινῆται τὸ ἄπειρον ἐφ' ᾧ τὸ Α, ἔσται τι αὐτοῦ κατὰ τὸ Β τὸ πεπερασμένον, οἷον τὸ ΓΔ, καὶ πάλιν ἄλλο καὶ ἄλλο, καὶ αἰεὶ οὕτως. ὥσθ' ἅμα συμβήσεται τὸ ἄπειρον κεκινῆσθαι τὸ πεπερασμένον καὶ τὸ πεπερασμένον διεληλυθέναι τὸ ἄπειρον· οὐδὲ γὰρ ἴσως δυνατὸν ἄλλως τὸ ἄπειρον κινηθῆναι τὸ πεπερασμένον ἢ τῷ τὸ πεπερασμένον διιέναι τὸ ἄπειρον, ἢ φερόμενον ἢ ἀναμετροῦν. ὥστ' ἐπεὶ τοῦτ' ἀδύνατον, οὐκ ἂν διίοι τὸ ἄπειρον τὸ πεπερασμένον. ἀλλὰ μὴν οὐδὲ τὸ ἄπειρον ἐν πεπερασμένῳ χρόνῳ τὸ ἄπειρον· δίεισιν· εἰ γὰρ τὸ ἄπειρον, καὶ τὸ πεπερασμένον· ἐνυπάρχει γὰρ τῷ ἀπείρῳ τὸ πεπερασμένον. ἔτι δὲ καὶ τοῦ χρόνου ληφθέντος ἡ αὐτὴ ἔσται ἀπόδειξις. ἐπεὶ δ' οὔτε τὸ πεπερασμένον τὸ ἄπειρον οὔτε τὸ ἄπειρον τὸ πεπερασμένον οὔτε τὸ ἄπειρον τὸ ἄπειρον ἐν πεπερασμένῳ χρόνῳ κινεῖται, φανερὸν ὅτι οὐδὲ κίνησις ἔσται ἄπειρος ἐν πεπερασμένῳ χρόνῳ· τί γὰρ διαφέρει τὴν κίνησιν ἢ τὸ μέγεθος ποιεῖν ἄπειρον; ἀνάγκη γάρ, εἰ ὁποτερονοῦν, καὶ θάτερον εἶναι ἄπειρον· πᾶσα γὰρ φορὰ ἐν τόπῳ.

Κεφάλαιο 8

Ἐπεὶ δὲ πᾶν ἢ κινεῖται ἢ ἠρεμεῖ τὸ πεφυκὸς ὅτε πέφυκε καὶ οὗ καὶ ὥς, ἀνάγκη τὸ ἱστάμενον ὅτε ἵσταται κινεῖσθαι· εἰ γὰρ μὴ κινεῖται, ἠρεμήσει, ἀλλ’ οὐκ ἐνδέχεται ἠρεμίζεσθαι τὸ ἠρεμοῦν. τούτου δ’ ἀποδεδειγμένου φανερὸν ὅτι καὶ ἐν χρόνῳ ἵστασθαι ἀνάγκη (τὸ γὰρ κινούμενον ἐν χρόνῳ κινεῖται, τὸ δ’ ἱστάμενον δέδεικται κινούμενον, ὥστε ἀνάγκη ἐν χρόνῳ ἵστασθαι)·

ἔτι δ’ εἰ τὸ μὲν θᾶττον καὶ βραδύτερον ἐν χρόνῳ λέγομεν, ἵστασθαι δ’ ἔστιν θᾶττον καὶ βραδύτερον. ἐν ᾧ δὲ χρόνῳ πρώτῳ τὸ ἱστάμενον ἵσταται, ἐν ὁτῳοῦν ἀνάγκη τούτου ἵστασθαι. διαιρεθέντος γὰρ τοῦ χρόνου εἰ μὲν ἐν μηδετέρῳ τῶν μερῶν ἵσταται, οὐδ’ ἐν τῷ ὅλῳ, ὥστ’ οὐκ ἂν ἵσταιτο τὸ ἱστάμενον· εἰ δ’ ἐν θατέρῳ, οὐκ ἂν ἐν πρώτῳ τῷ ὅλῳ ἵσταιτο· καθ’ ἕτερον γὰρ ἐν τούτῳ ἵσταται, καθάπερ ἐλέχθη καὶ ἐπὶ τοῦ κινουμένου πρότερον. ὥσπερ δὲ τὸ κινούμενον οὐκ ἔστιν (239a.) ἐν ᾧ πρώτῳ κινεῖται, οὕτως οὐδ’ ἐν ᾧ ἵσταται τὸ ἱστάμενον· οὔτε γὰρ τοῦ κινεῖσθαι οὔτε τοῦ ἵστασθαί ἐστίν τι πρῶτον. ἔστω γὰρ ἐν ᾧ πρώτῳ ἵσταται ἐφ’ ᾧ τὸ ΑΒ. τοῦτο δὴ ἀμερὲς μὲν οὐκ ἐνδέχεται εἶναι (κίνησις γὰρ οὐκ ἔστιν ἐν τῷ ἀμερεῖ διὰ τὸ κεκινῆσθαί τι ἂν αὐτοῦ, τὸ δ’ ἱστάμενον δέδεικται κινούμε νον)· ἀλλὰ μὴν εἰ διαιρετόν ἐστιν, ἐν ὁτῳοῦν αὐτοῦ τῶν μερῶν ἵσταται· τοῦτο γὰρ δέδεικται πρότερον, ὅτι ἐν ᾧ πρώτῳ ἵσταται, ἐν ὁτῳοῦν τῶν ἐκείνου ἵσταται. ἐπεὶ οὖν χρόνος ἐστὶν ἐν ᾧ πρώτῳ ἵσταται, καὶ οὐκ ἄτομον, ἅπας δὲ χρόνος εἰς ἄπειρα μεριστός, οὐκ ἔσται ἐν ᾧ πρώτῳ ἵσταται.

οὐδὲ δὴ τὸ ἠρεμοῦν ὅτε πρῶτον ἠρέμησεν ἔστιν. ἐν ἀμερεῖ μὲν γὰρ οὐκ ἠρέμησεν διὰ τὸ μὴ εἶναι κίνησιν ἐν ἀτόμῳ, ἐν ᾧ δὲ τὸ ἠρεμεῖν, καὶ τὸ κινεῖσθαι (τότε γὰρ ἔφαμεν ἠρεμεῖν, ὅτε καὶ ἐν ᾧ πεφυκὸς κινεῖσθαι μὴ κινεῖται τὸ πεφυκός)· ἔτι δὲ καὶ τότε λέγομεν ἠρεμεῖν, ὅταν ὁμοίως ἔχῃ νῦν καὶ πρότερον, ὡς οὐχ ἑνί τινι κρίνοντες ἀλλὰ δυοῖν τοῖν ἐλαχίστοιν· ὥστ’ οὐκ ἔσται ἐν ᾧ ἠρεμεῖ ἀμερές. εἰ δὲ μεριστόν, χρόνος ἂν εἴη, καὶ ἐν ὁτῳοῦν αὐτοῦ τῶν μερῶν ἠρεμήσει. τὸν αὐτὸν γὰρ τρόπον δειχθήσεται ὃν καὶ ἐπὶ τῶν πρότερον·

ὥστ’ οὐθὲν ἔσται πρῶτον. τούτου δ’ αἴτιον ὅτι ἠρεμεῖ μὲν καὶ κινεῖται πᾶν ἐν χρόνῳ, χρόνος δ’ οὐκ ἔστι πρῶτος οὐδὲ μέγεθος οὐδ’ ὅλως συνεχὲς οὐδέν· ἅπαν γὰρ εἰς ἄπειρα μεριστόν.

ἐπεὶ δὲ πᾶν τὸ κινούμενον ἐν χρόνῳ κινεῖται καὶ ἔκ τινος εἴς τι μεταβάλλει, ἐν ᾧ χρόνῳ κινεῖται καθ’ αὑτὸν καὶ μὴ τῷ ἐν ἐκείνου τινί, ἀδύνατον τότε κατά τι εἶναι πρῶτον τὸ κινού μενον. τὸ γὰρ ἠρεμεῖν ἐστιν τὸ ἐν τῷ αὐτῷ εἶναι χρόνον τινὰ καὶ αὐτὸ καὶ τῶν μερῶν ἕκαστον. οὕτως γὰρ λέγομεν ἠρεμεῖν, ὅταν ἐν ἄλλῳ καὶ ἄλλῳ τῶν νῦν ἀληθὲς ᾖ εἰπεῖν ὅτι ἐν τῷ αὐτῷ καὶ αὐτὸ καὶ τὰ μέρη. εἰ δὲ τοῦτ’ ἔστι τὸ ἠρεμεῖν, οὐκ ἐνδέχεται τὸ μεταβάλλον κατά τι εἶναι ὅλον κατὰ τὸν πρῶτον χρόνον· ὁ γὰρ χρόνος διαιρετὸς ἅπας, ὥστε ἐν ἄλλῳ καὶ ἄλλῳ αὐτοῦ μέρει ἀληθὲς ἔσται εἰπεῖν ὅτι ἐν ταὐτῷ ἐστιν καὶ αὐτὸ καὶ τὰ μέρη. εἰ γὰρ μὴ οὕτως ἀλλ’ ἐν ἑνὶ μόνῳ τῶν νῦν, οὐκ ἔσται χρόνον οὐδένα κατά τι, ἀλλὰ κατὰ τὸ πέρας τοῦ χρόνου. ἐν δὲ τῷ νῦν ἔστιν μὲν ἀεὶ κατά τι μὲν (239b.) ὄν, οὐ μέντοι ἠρεμεῖ· οὔτε γὰρ κινεῖσθαι οὔτ’ ἠρεμεῖν ἔστιν ἐν τῷ νῦν, ἀλλὰ μὴ κινεῖσθαι μὲν ἀληθὲς ἐν τῷ νῦν καὶ εἶναι κατά τι, ἐν χρόνῳ δ’ οὐκ ἐνδέχεται εἶναι κατά τι ἠρεμοῦν· συμβαίνει γὰρ τὸ φερόμενον ἠρεμεῖν.

Κεφάλαιο 9

Ζήνων δὲ παραλογίζεται· εἰ γὰρ αἰεί, φησίν, ἠρεμεῖ πᾶν [ἢ κινεῖται] ὅταν ᾖ κατὰ τὸ ἴσον, ἔστιν δ’ αἰεὶ τὸ φερόμενον ἐν τῷ νῦν, ἀκίνητον τὴν φερομένην εἶναι ὀϊστόν. τοῦτο δ’ ἐστὶ ψεῦδος· οὐ γὰρ σύγκειται ὁ χρόνος ἐκ τῶν νῦν τῶν ἀδιαιρέτων, ὥσπερ οὐδ’ ἄλλο μέγεθος οὐδέν.

τέτταρες δ’ εἰσὶν οἱ λόγοι περὶ κινήσεως Ζήνωνος οἱ παρέχοντες τὰς δυσκολίας τοῖς λύουσιν, πρῶτος μὲν ὁ περὶ τοῦ μὴ κινεῖσθαι διὰ τὸ πρότερον εἰς τὸ ἥμισυ δεῖν ἀφικέσθαι τὸ φερόμενον ἢ πρὸς τὸ τέλος, περὶ οὗ διείλομεν ἐν τοῖς πρότερον λόγοις.

δεύτερος δ’ ὁ καλούμενος Ἀχιλλεύς· ἔστι δ’ οὗτος, ὅτι τὸ βραδύτατον οὐδέποτε καταληφθήσεται θέον ὑπὸ τοῦ ταχίστου· ἔμπροσθεν γὰρ ἀναγκαῖον ἐλθεῖν τὸ διῶκον ὅθεν ὥρμησεν τὸ φεῦγον, ὥστε ἀεί τι προέχειν ἀναγκαῖον τὸ βραδύτερον. ἔστιν δὲ καὶ οὗτος ὁ αὐτὸς λόγος τῷ διχοτομεῖν, διαφέρει δ’ ἐν τῷ διαιρεῖν μὴ δίχα τὸ προσλαμβανόμενον μέγεθος. τὸ μὲν οὖν μὴ καταλαμβάνε σθαι τὸ βραδύτερον συμβέβηκεν ἐκ τοῦ λόγου, γίγνεται δὲ παρὰ ταὐτὸ τῇ διχοτομίᾳ (ἐν ἀμφοτέροις γὰρ συμβαίνει μὴ ἀφικνεῖσθαι πρὸς τὸ πέρας διαιρουμένου πως τοῦ μεγέθους· ἀλλὰ πρόσκειται ἐν τούτῳ ὅτι οὐδὲ τὸ τάχιστον τετραγῳδημένον ἐν τῷ διώκειν τὸ βραδύτατον), ὥστ’ ἀνάγκη καὶ τὴν λύσιν εἶναι τὴν αὐτήν. τὸ δ’ ἀξιοῦν ὅτι τὸ προέχον οὐ καταλαμβάνεται, ψεῦδος· ὅτε γὰρ προέχει, οὐ καταλαμβάνεται· ἀλλ’ ὅμως καταλαμβάνεται, εἴπερ δώσει διεξιέναι τὴν πεπερασμένην. οὗτοι μὲν οὖν οἱ δύο λόγοι,

τρίτος δ’ ὁ νῦν ῥηθείς, ὅτι ἡ ὀϊστὸς φερομένη ἕστηκεν. συμβαίνει δὲ παρὰ τὸ λαμβάνειν τὸν χρόνον συγκεῖσθαι ἐκ τῶν νῦν· μὴ διδομένου γὰρ τούτου οὐκ ἔσται ὁ συλλογισμός.

τέταρτος δ’ ὁ περὶ τῶν ἐν τῷ σταδίῳ κινουμένων ἐξ ἐναντίας ἴσων ὄγκων παρ’ ἴσους, τῶν μὲν ἀπὸ τέλους τοῦ σταδίου τῶν δ’ ἀπὸ μέσου, ἴσῳ τάχει, ἐν ᾧ συμβαίνειν (240a.) οἴεται ἴσον εἶναι χρόνον τῷ διπλασίῳ τὸν ἥμισυν. ἔστι δ’ ὁ παραλογισμὸς ἐν τῷ τὸ μὲν παρὰ κινούμενον τὸ δὲ παρ’ ἠρεμοῦν τὸ ἴσον μέγεθος ἀξιοῦν τῷ ἴσῳ τάχει τὸν ἴσον φέρεσθαι χρόνον· τοῦτο δ’ ἐστὶ ψεῦδος. οἷον ἔστωσαν οἱ ἑστῶτες ἴσοι ὄγκοι ἐφ’ ὧν τὰ ΑΑ, οἱ δ’ ἐφ’ ὧν τὰ ΒΒ ἀρχόμενοι ἀπὸ τοῦ μέσου, ἴσοι τὸν ἀριθμὸν τούτοις ὄντες καὶ τὸ μέγεθος, οἱ δ’ ἐφ’ ὧν τὰ ΓΓ ἀπὸ τοῦ ἐσχάτου, ἴσοι τὸν ἀριθμὸν ὄντες τούτοις καὶ τὸ μέγεθος, καὶ ἰσοταχεῖς τοῖς Β. συμβαίνει δὴ τὸ πρῶτον Β ἅμα ἐπὶ τῷ ἐσχάτῳ εἶναι καὶ τὸ πρῶτον Γ, παρ’ ἄλληλα κινουμένων.

συμβαίνει δὲ τὸ Γ παρὰ πάντα [τὰ Β] διεξεληλυθέναι, τὸ δὲ Β παρὰ τὰ ἡμίση· ὥστε ἥμισυν εἶναι τὸν χρόνον· ἴσον γὰρ ἑκάτερόν ἐστιν παρ’ ἕκαστον. ἅμα δὲ συμβαίνει τὸ πρῶτον Β παρὰ πάντα τὰ Γ παρεληλυθέναι· ἅμα γὰρ ἔσται τὸ πρῶτον Γ καὶ τὸ πρῶτον Β ἐπὶ τοῖς ἐναντίοις ἐσχάτοις, [ἴσον χρόνον παρ’ ἕκαστον γιγνόμενον τῶν Β ὅσον περ τῶν Α, ὥς φησιν,] διὰ τὸ ἀμφότερα ἴσον χρόνον παρὰ τὰ Α γίγνεσθαι. ὁ μὲν οὖν λόγος οὗτός ἐστιν, συμβαίνει δὲ παρὰ τὸ εἰρημένον ψεῦδος.

οὐδὲ δὴ κατὰ τὴν ἐν τῇ ἀντιφάσει μεταβολὴν οὐθὲν ἡμῖν ἔσται ἀδύνατον, οἷον εἰ ἐκ τοῦ μὴ λευκοῦ εἰς τὸ λευκὸν μετα βάλλει καὶ ἐν μηδετέρῳ ἐστίν, ὡς ἄρα οὔτε λευκὸν ἔσται οὔτε οὐ λευκόν· οὐ γὰρ εἰ μὴ ὅλον ἐν ὁποτερῳοῦν ἐστιν, οὐ λεχθήσεται λευκὸν ἢ οὐ λευκόν· λευκὸν γὰρ λέγομεν ἢ οὐ λευκὸν οὐ τῷ ὅλον εἶναι τοιοῦτον, ἀλλὰ τῷ τὰ πλεῖστα ἢ τὰ κυριώτατα μέρη· οὐ ταὐτὸ δ’ ἐστὶν μὴ εἶναί τε ἐν τούτῳ καὶ μὴ εἶναι ἐν τούτῳ ὅλον. ὁμοίως δὲ καὶ ἐπὶ τοῦ ὄντος καὶ ἐπὶ τοῦ μὴ ὄντος καὶ τῶν ἄλλων τῶν κατ’ ἀντίφασιν· ἔσται μὲν γὰρ ἐξ ἀνάγκης ἐν θατέρῳ τῶν ἀντικειμένων, ἐν οὐδετέρῳ δ’ ὅλον αἰεί.

πάλιν δ’ ἐπὶ τοῦ κύκλου καὶ ἐπὶ τῆς σφαίρας καὶ ὅλως τῶν ἐν αὑτοῖς κινουμένων, ὅτι συμβήσεται αὐτὰ ἠρεμεῖν· ἐν γὰρ τῷ αὐτῷ τόπῳ χρόνον τινὰ ἔσται καὶ αὐτὰ καὶ τὰ μέρη, ὥστε ἠρεμήσει ἅμα καὶ κινήσεται. πρῶτον μὲν γὰρ τὰ μέρη οὐκ ἔστιν ἐν τῷ αὐτῷ οὐθένα χρό (240b.) νον, εἶτα καὶ τὸ ὅλον μεταβάλλει αἰεὶ εἰς ἕτερον· οὐ γὰρ ἡ αὐτή ἐστιν ἡ ἀπὸ τοῦ Α λαμβανομένη περιφέρεια καὶ ἡ ἀπὸ τοῦ Β καὶ τοῦ Γ καὶ τῶν ἄλλων ἑκάστου σημείων, πλὴν ὡς ὁ μουσικὸς ἄνθρωπος καὶ ἄνθρωπος, ὅτι συμβέβηκεν. ὥστε μεταβάλλει αἰεὶ ἡ ἑτέρα εἰς τὴν ἑτέραν, καὶ οὐδέποτε ἠρεμήσει. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῆς σφαίρας καὶ ἐπὶ τῶν ἄλλων τῶν ἐν αὑτοῖς κινουμένων.

Κεφάλαιο 10

Ἀποδεδειγμένων δὲ τούτων λέγομεν ὅτι τὸ ἀμερὲς οὐκ ἐνδέχεται κινεῖσθαι πλὴν κατὰ συμβεβηκός, οἷον κινουμένου τοῦ σώματος ἢ τοῦ μεγέθους τῷ ἐνυπάρχειν, καθάπερ ἂν εἰ τὸ ἐν τῷ πλοίῳ κινοῖτο ὑπὸ τῆς τοῦ πλοίου φορᾶς ἢ τὸ μέρος τῇ τοῦ ὅλου κινήσει. (ἀμερὲς δὲ λέγω τὸ κατὰ ποσὸν ἀδιαίρετον.) καὶ γὰρ αἱ τῶν μερῶν κινήσεις ἕτεραί εἰσι κατ' αὐτά τε τὰ μέρη καὶ κατὰ τὴν τοῦ ὅλου κίνησιν. ἴδοι δ' ἄν τις ἐπὶ τῆς σφαίρας μάλιστα τὴν διαφοράν· οὐ γὰρ ταὐτὸν τάχος ἐστὶ τῶν τε πρὸς τῷ κέντρῳ καὶ τῶν ἐκτὸς καὶ τῆς ὅλης, ὡς οὐ μιᾶς οὔσης κινήσεως. καθάπερ οὖν εἴπομεν, οὕτω μὲν ἐνδέχεται κινεῖσθαι τὸ ἀμερὲς ὡς ὁ ἐν τῷ πλοίῳ καθήμενος τοῦ πλοίου θέοντος, καθ' αὑτὸ δ' οὐκ ἐνδέχεται. μεταβαλλέτω γὰρ ἐκ τοῦ ΑΒ εἰς τὸ ΒΓ, εἴτ' ἐκ μεγέθους εἰς μέγεθος εἴτ' ἐξ εἴδους εἰς εἶδος εἴτε κατ' ἀντίφασιν· ὁ δὲ χρόνος ἔστω ἐν ᾧ πρώτῳ μεταβάλλει ἐφ' οὗ Δ. οὐκοῦν ἀνάγκη αὐτὸ καθ' ὃν μεταβάλλει χρόνον ἢ ἐν τῷ ΑΒ εἶναι ἢ ἐν τῷ ΒΓ, ἢ τὸ μέν τι αὐτοῦ ἐν τούτῳ τὸ δ' ἐν θατέρῳ· πᾶν γὰρ τὸ μεταβάλλον οὕτως εἶχεν. ἐν ἑκατέρῳ μὲν οὖν οὐκ ἔσται τι αὐτοῦ· μεριστὸν γὰρ ἂν εἴη. ἀλλὰ μὴν οὐδ' ἐν τῷ ΒΓ· μεταβεβληκὸς γὰρ ἔσται, ὑπόκειται δὲ μεταβάλλειν. λείπεται δὴ αὐτὸ ἐν τῷ ΑΒ εἶναι, καθ' ὃν μεταβάλλει χρόνον. ἠρεμήσει ἄρα· τὸ γὰρ ἐν τῷ αὐτῷ εἶναι χρόνον τινὰ ἠρεμεῖν ἦν. ὥστ' οὐκ ἐνδέχεται τὸ ἀμερὲς κινεῖσθαι οὐδ' ὅλως μεταβάλλειν· μοναχῶς γὰρ ἂν οὕτως ἦν αὐτοῦ κίνησις, εἰ ὁ χρόνος ἦν ἐκ τῶν νῦν· αἰεὶ γὰρ ἐν τῷ νῦν κεκινημένον ἂν ἦν καὶ μετα(241a.) βεβληκός, ὥστε κινεῖσθαι μὲν μηδέποτε, κεκινῆσθαι δ' ἀεί. τοῦτο δ' ὅτι ἀδύνατον, δέδεικται καὶ πρότερον· οὔτε γὰρ ὁ χρόνος ἐκ τῶν νῦν οὔθ' ἡ γραμμὴ ἐκ στιγμῶν οὔθ' ἡ κίνησις ἐκ κινημάτων· οὐθὲν γὰρ ἄλλο ποιεῖ ὁ τοῦτο λέγων ἢ τὴν κίνησιν ἐξ ἀμερῶν, καθάπερ ἂν εἰ τὸν χρόνον ἐκ τῶν νῦν ἢ τὸ μῆκος ἐκ στιγμῶν.

ἔτι δὲ καὶ ἐκ τῶνδε φανερὸν ὅτι οὔτε στιγμὴν οὔτ' ἄλλο ἀδιαίρετον οὐθὲν ἐνδέχεται κινεῖσθαι. ἅπαν γὰρ τὸ κινούμενον ἀδύνατον πρότερον μεῖζον κινηθῆναι αὑτοῦ, πρὶν ἢ ἴσον ἢ ἔλαττον. εἰ δὴ τοῦτο, φανερὸν ὅτι καὶ ἡ στιγμὴ ἔλαττον ἢ ἴσον κινηθήσεται πρῶτον. ἐπεὶ δὲ ἀδιαίρετος, ἀδύνατον ἔλαττον κινηθῆναι πρότερον· ἴσην ἄρα αὑτῇ. ὥστε ἔσται ἡ γραμμὴ ἐκ στιγμῶν· αἰεὶ γὰρ ἴσην κινουμένη τὴν πᾶσαν γραμμὴν στιγμὴ καταμετρήσει. εἰ δὲ τοῦτο ἀδύνατον, καὶ τὸ κινεῖσθαι τὸ ἀδιαίρετον ἀδύνατον.

ἔτι δ’ εἰ ἅπαν ἐν χρόνῳ κινεῖται, ἐν δὲ τῷ νῦν μηθέν, ἅπας δὲ χρόνος διαιρετός, εἴη ἄν τις χρόνος ἐλάττων ὁτῳοῦν τῶν κινουμένων ἢ ἐν ᾧ κινεῖται ὅσον αὐτό. οὗτος μὲν γὰρ ἔσται χρόνος ἐν ᾧ κινεῖται διὰ τὸ πᾶν ἐν χρόνῳ κινεῖσθαι, χρόνος δὲ πᾶς διαιρετὸς δέδεικται πρότερον. εἰ δ’ ἄρα στιγμὴ κινεῖται, ἔσται τις χρόνος ἐλάττων ἢ ἐν ᾧ αὐτὴν ἐκινήθη. ἀλλὰ ἀδύνατον· ἐν γὰρ τῷ ἐλάττονι ἔλαττον ἀνάγκη κινεῖσθαι. ὥστε ἔσται διαιρετὸν τὸ ἀδιαίρετον εἰς τὸ ἔλαττον, ὥσπερ καὶ ὁ χρόνος εἰς τὸν χρόνον. μοναχῶς γὰρ ἂν κινοῖτο τὸ ἀμερὲς καὶ ἀδιαίρετον, εἰ ἦν ἐν τῷ νῦν κινεῖσθαι δυνατὸν τῷ ἀτόμῳ· τοῦ γὰρ αὐτοῦ λόγου ἐν τῷ νῦν κινεῖσθαι καὶ ἀδιαίρετόν τι κινεῖσθαι.

μεταβολὴ δ’ οὐκ ἔστιν οὐδεμία ἄπειρος· ἅπασα γὰρ ἦν ἔκ τινος εἴς τι, καὶ ἡ ἐν ἀντιφάσει καὶ ἡ ἐν ἐναντίοις. ὥστε τῶν μὲν κατ’ ἀντίφασιν ἡ φάσις καὶ ἡ ἀπόφασις πέρας (οἷον γενέσεως μὲν τὸ ὄν, φθορᾶς δὲ τὸ μὴ ὄν), τῶν δ’ ἐν τοῖς ἐναντίοις τὰ ἐναντία· ταῦτα γὰρ ἄκρα τῆς μεταβολῆς, ὥστε καὶ ἀλλοιώσεως πάσης (ἐξ ἐναντίων γάρ τινων ἡ ἀλλοίωσις), ὁμοίως δὲ καὶ αὐξήσεως καὶ φθίσεως· αὐξήσεως μὲν γὰρ τὸ πέρας τοῦ (241b.) κατὰ τὴν οἰκείαν φύσιν τελείου μεγέθους, φθίσεως δὲ ἡ τούτου ἔκστασις. ἡ δὲ φορὰ οὕτω μὲν οὐκ ἔσται πεπερασμένη· οὐ γὰρ πᾶσα ἐν ἐναντίοις· ἀλλ’ ἐπειδὴ τὸ ἀδύνατον τμηθῆναι οὕτω, τῷ μὴ ἐνδέχεσθαι τμηθῆναι (πλεοναχῶς γὰρ λέγεται τὸ ἀδύνατον), οὐκ ἐνδέχεται τὸ οὕτως ἀδύνατον τέμνεσθαι, οὐδὲ ὅλως τὸ ἀδύνατον γενέσθαι γίγνεσθαι, οὐδὲ τὸ μεταβαλεῖν ἀδύνατον ἐνδέχοιτ’ ἂν μεταβάλλειν εἰς ὃ ἀδύνατον μεταβαλεῖν. εἰ οὖν τὸ φερόμενον μεταβάλλοι εἴς τι, καὶ δυνατὸν ἔσται μεταβαλεῖν.

ὥστ’ οὐκ ἄπειρος ἡ κίνησις, οὐδ’ οἰσθήσεται τὴν ἄπειρον· ἀδύνα τον γὰρ διελθεῖν αὐτήν. ὅτι μὲν οὖν οὕτως οὐκ ἔστιν ἄπειρος μεταβολὴ ὥστε μὴ ὡρίσθαι πέρασι, φανερόν. ἀλλ’ εἰ οὕτως ἐνδέχεται ὥστε τῷ χρόνῳ εἶναι ἄπειρον τὴν αὐτὴν οὖσαν καὶ μίαν, σκεπτέον. μὴ μιᾶς μὲν γὰρ γιγνομένης οὐθὲν ἴσως κωλύει, οἷον εἰ μετὰ τὴν φορὰν ἀλλοίωσις εἴη καὶ μετὰ τὴν ἀλλοίωσιν αὔξησις καὶ πάλιν γένεσις· οὕτω γὰρ αἰεὶ μὲν ἔσται τῷ χρόνῳ κίνησις, ἀλλ’ οὐ μία διὰ τὸ μὴ εἶναι μίαν ἐξ ἁπασῶν. ὥστε δὲ γίγνεσθαι μίαν, οὐκ ἐνδέχεται ἄπειρον εἶναι τῷ χρόνῳ πλὴν μιᾶς· αὕτη δ’ ἐστὶν ἡ κύκλῳ φορά.

Κεφάλαιο 1

Ἅπαν τὸ κινούμενον ὑπό τινος ἀνάγκη κινεῖσθαι· εἰ μὲν γὰρ ἐν ἑαυτῷ μὴ ἔχει τὴν ἀρχὴν τῆς κινήσεως, φανερὸν ὅτι ὑφ’ ἑτέρου κινεῖται (ἄλλο γὰρ ἔσται τὸ κινοῦν)· εἰ δ’ ἐν αὑτῷ, ἔστω [τὸ] εἰλημμένον ἐφ’ οὗ τὸ ΑΒ ὃ κινεῖται καθ’ αὑτό, ἀλλὰ μὴ <τῷ τῶν> τούτου τι κινεῖσθαι. πρῶτον μὲν οὖν τὸ ὑπολαμβάνειν τὸ ΑΒ ὑφ’ ἑαυτοῦ κινεῖσθαι διὰ τὸ ὅλον τε κινεῖσθαι καὶ ὑπ’ οὐδενὸς τῶν ἔξωθεν ὅμοιόν ἐστιν ὥσπερ εἰ τοῦ ΚΛ κινοῦντος τὸ ΛΜ καὶ αὐτοῦ κινουμένου εἰ μὴ φάσκοι τις τὸ ΚΜ κινεῖσθαι ὑπό τινος, διὰ τὸ μὴ φανερὸν εἶναι πότερον τὸ κινοῦν καὶ πότερον τὸ κινούμενον· εἶτα τὸ μὴ ὑπό τινος κινούμενον (242a.) οὐκ ἀνάγκη παύσασθαι κινούμενον τῷ ἄλλο ἠρεμεῖν, ἀλλ’ εἴ τι ἠρεμεῖ τῷ ἄλλο πεπαῦσθαι κινούμενον, ἀνάγκη ὑπό τινος αὐτὸ κινεῖσθαι. τούτου δ’ εἰλημμένου πᾶν τὸ κινούμενον κινήσεται ὑπό τινος. ἐπεὶ γὰρ εἴληπται [τὸ] κινούμενον ἐφ’ ᾧ τὸ ΑΒ, ἀνάγκη διαιρετὸν αὐτὸ εἶναι· πᾶν γὰρ τὸ κινούμενον διαιρετόν. διῃρήσθω δὴ κατὰ τὸ Γ. τοῦ δὴ ΓΒ μὴ κινουμένου οὐ κινηθήσεται τὸ ΑΒ. εἰ γὰρ κινήσεται, δῆλον ὅτι τὸ ΑΓ κινοῖτ’ ἂν τοῦ ΓΒ ἠρεμοῦντος, ὥστε οὐ καθ’ αὑτὸ κινηθήσεται καὶ πρῶτον. ἀλλ’ ὑπέκειτο καθ’ αὑτὸ κινεῖσθαι καὶ πρῶτον. ἀνάγκη ἄρα τοῦ ΓΒ μὴ κινουμένου ἠρεμεῖν τὸ ΑΒ. ὃ δὲ ἠρεμεῖ (45) μὴ κινουμένου τινός, ὡμολόγηται ὑπό τινος κινεῖσθαι, ὥστε πᾶν ἀνάγκη τὸ κινούμενον ὑπό τινος κινεῖσθαι· ἀεὶ γὰρ ἔσται τὸ κινούμενον διαιρετόν, τοῦ δὲ μέρους μὴ κινουμένου ἀνάγκη καὶ τὸ ὅλον ἠρεμεῖν.

ἐπεὶ δὲ πᾶν τὸ κινούμενον ἀνάγκη κινεῖσθαι ὑπό τινος, ἐάν γέ τι κινῆται τὴν ἐν τόπῳ κίνησιν ὑπ’ ἄλλου κινουμένου, καὶ πάλιν τὸ κινοῦν ὑπ’ ἄλλου κινουμένου κινῆται κἀκεῖνο ὑφ’ ἑτέρου καὶ ἀεὶ οὕτως, ἀνάγκη εἶναί τι τὸ πρῶτον κινοῦν, καὶ μὴ βαδίζειν εἰς ἄπειρον· μὴ γὰρ ἔστω, ἀλλὰ γενέσθω ἄπειρον. κινείσθω δὴ τὸ μὲν Α ὑπὸ τοῦ Β, τὸ δὲ Β ὑπὸ τοῦ Γ, τὸ δὲ Γ ὑπὸ τοῦ Δ, καὶ ἀεὶ τὸ ἐχόμενον ὑπὸ τοῦ ἐχομένου. ἐπεὶ οὖν ὑπόκειται τὸ κινοῦν κινούμενον κινεῖν, ἀνάγκη ἅμα γίγνεσθαι τὴν τοῦ κινουμένου καὶ τὴν τοῦ κινοῦντος κίνησιν (ἅμα γὰρ κινεῖ τὸ κινοῦν καὶ κινεῖται τὸ κινούμενον)· φανερὸν <οὖν> ὅτι ἅμα ἔσται τοῦ Α καὶ τοῦ Β καὶ τοῦ Γ καὶ ἑκάστου τῶν κινούντων καὶ κινουμένων ἡ κίνησις. εἰλήφθω οὖν ἡ ἑκάστου κίνησις, καὶ ἔστω τοῦ μὲν Α ἐφ’ ἧς Ε, τοῦ δὲ Β ἐφ’ ἧς Ζ, τῶν <δὲ> Γ Δ ἐφ’ ὧν Η Θ. εἰ γὰρ ἀεὶ κινεῖται ἕκαστον ὑφ’ ἑκάστου, ὅμως ἔσται λαβεῖν μίαν ἑκάστου κίνησιν τῷ ἀριθμῷ· πᾶσα γὰρ κίνησις ἔκ τινος εἴς τι, καὶ οὐκ ἄπειρος τοῖς ἐσχάτοις· λέγω δὴ ἀριθμῷ μίαν κίνησιν τὴν ἐκ τοῦ αὐτοῦ εἰς τὸ αὐτὸ τῷ ἀριθμῷ ἐν τῷ αὐτῷ χρόνῳ τῷ ἀριθμῷ γιγνομένην. ἔστι γὰρ κίνησις καὶ γένει καὶ εἴδει καὶ ἀριθμῷ ἡ αὐτή, (242b.) γένει μὲν ἡ τῆς αὐτῆς κατηγορίας, οἷον οὐσίας ἢ ποιότητος, εἴδει δὲ <ἡ> ἐκ τοῦ αὐτοῦ τῷ εἴδει εἰς τὸ αὐτὸ τῷ εἴδει, οἷον ἐκ λευκοῦ εἰς μέλαν ἢ ἐξ ἀγαθοῦ εἰς κακὸν ἀδιάφορον τῷ εἴδει· ἀριθμῷ δὲ ἡ ἐξ ἑνὸς τῷ ἀριθμῷ <εἰς ἓν τῷ ἀριθμῷ> ἐν τῷ αὐτῷ χρόνῳ, οἷον ἐκ τοῦδε τοῦ λευκοῦ εἰς τόδε τὸ μέλαν, ἢ ἐκ τοῦδε τοῦ τόπου εἰς τόνδε, ἐν τῷδε τῷ χρόνῳ· εἰ γὰρ ἐν ἄλλῳ, οὐκέτι ἔσται ἀριθμῷ μία κίνησις, ἀλλ' εἴδει.

εἴρηται δὲ περὶ τούτων ἐν τοῖς πρότερον. εἰλήφθω δὲ καὶ ὁ χρόνος ἐν ᾧ κεκίνηται τὴν αὑτοῦ κίνησιν τὸ Α, καὶ ἔστω ἐφ' ᾧ Κ. πεπερασμένης δ' οὔσης τῆς τοῦ Α κινήσεως καὶ ὁ χρόνος ἔσται πεπερασμένος. ἐπεὶ δὴ ἄπειρα τὰ κινοῦντα καὶ τὰ κινούμενα, καὶ ἡ κίνησις ἡ ΕΖΗΘ ἡ ἐξ ἁπασῶν ἄπειρος ἔσται· ἐνδέχεται μὲν γὰρ ἴσην εἶναι τὴν τοῦ Α καὶ τοῦ Β καὶ τὴν τῶν ἄλλων, ἐνδέχεται δὲ μείζους τὰς τῶν ἄλλων, ὥστε εἴ τε ἴσαι εἴ τε μείζους, ἀμφοτέρως ἄπειρος ἡ ὅλη· λαμβάνομεν γὰρ τὸ ἐνδεχόμενον. ἐπεὶ δ' ἅμα κινεῖται καὶ τὸ Α καὶ τῶν ἄλλων ἕκαστον, ἡ ὅλη κίνησις ἐν τῷ αὐτῷ χρόνῳ ἔσται καὶ ἡ τοῦ Α· ἡ δὲ τοῦ Α ἐν πεπερασμένῳ· ὥστε εἴη ἂν ἄπειρος ἐν πεπερασμένῳ, τοῦτο δ' ἀδύνατον.

οὕτω μὲν οὖν δόξειεν ἂν δεδεῖχθαι τὸ ἐξ ἀρχῆς, οὐ μὴν ἀποδείκνυται διὰ τὸ μηδὲν δείκνυσθαι ἀδύνατον· ἐνδέχεται γὰρ ἐν πεπερασμένῳ χρόνῳ ἄπειρον εἶναι κίνησιν, μὴ ἑνὸς ἀλλὰ πολλῶν. ὅπερ συμβαίνει καὶ ἐπὶ τούτων· ἕκαστον γὰρ κινεῖται τὴν ἑαυτοῦ κίνησιν, ἅμα δὲ πολλὰ κινεῖσθαι οὐκ ἀδύνατον. ἀλλ' εἰ τὸ κινοῦν πρώτως κατὰ τόπον καὶ σωματικὴν κίνησιν ἀνάγκη ἢ ἅπτεσθαι ἢ συνεχὲς εἶναι τῷ κινουμένῳ, καθάπερ ὁρῶμεν ἐπὶ πάντων, ἀνάγκη τὰ κινούμενα καὶ τὰ κινοῦντα συνεχῆ εἶναι ἢ ἅπτεσθαι ἀλλήλων, ὥστ' εἶναί τι ἐξ ἁπάντων ἕν. τοῦτο δὲ εἴτε πεπερασμένον εἴτε ἄπειρον, οὐδὲν διαφέρει πρὸς τὰ νῦν· πάντως γὰρ ἡ κίνησις ἔσται ἄπειρος ἀπείρων ὄντων, εἴπερ ἐνδέχεται καὶ ἴσας εἶναι καὶ μείζους ἀλλήλων· ὃ γὰρ ἐνδέχεται, ληψόμεθα ὡς ὑπάρχον. εἰ οὖν τὸ μὲν ἐκ τῶν Α Β Γ Δ <ἢ πεπερασμένον ἢ> ἄπειρόν τί ἐστιν, κινεῖται δὲ τὴν ΕΖΗΘ κίνησιν ἐν τῷ χρόνῳ τῷ Κ, οὗτος δὲ πεπέρανται, συμβαίνει ἐν πεπερασμένῳ χρόνῳ ἄπειρον διιέναι ἢ τὸ πεπερασμένον ἢ τὸ ἄπειρον. ἀμφοτέρως δὲ ἀδύνατον· ὥστε ἀνάγκη ἵστασθαι καὶ εἶναί τι πρῶτον κινοῦν καὶ κινούμενον. οὐδὲν γὰρ διαφέρει τὸ συμβαίνειν ἐξ ὑποθέσεως τὸ ἀδύνατον· (243a.) ἡ γὰρ ὑπόθεσις εἴληπται ἐνδεχομένη, τοῦ δ' ἐνδεχομένου τεθέντος οὐδὲν προσήκει γίγνεσθαι διὰ τοῦτο ἀδύνατον.

Κεφάλαιο 2

Τὸ δὲ πρῶτον κινοῦν, μὴ ὡς τὸ οὗ ἕνεκεν, ἀλλ’ ὅθεν ἡ ἀρχὴ τῆς κινήσεως, ἅμα τῷ κινουμένῳ ἐστί (λέγω δὲ τὸ ἅμα, ὅτι οὐδέν ἐστιν αὐτῶν μεταξύ)· τοῦτο γὰρ κοινὸν ἐπὶ παντὸς κινουμένου καὶ κινοῦντός ἐστιν. ἐπεὶ δὲ τρεῖς αἱ κινήσεις, ἥ τε κατὰ τόπον καὶ ἡ κατὰ τὸ ποιὸν καὶ ἡ κατὰ τὸ ποσόν, ἀνάγκη καὶ τὰ κινοῦντα τρία εἶναι, τό τε φέρον καὶ τὸ ἀλλοιοῦν καὶ τὸ αὖξον ἢ φθῖνον.

πρῶτον οὖν εἴπωμεν περὶ τῆς φορᾶς· πρώτη γὰρ αὕτη τῶν κινήσεων. ἅπαν δὴ τὸ φερόμενον ἢ ὑφ’ ἑαυτοῦ κινεῖται ἢ ὑπ’ ἄλλου. ὅσα μὲν οὖν αὐτὰ ὑφ’ αὑτῶν κινεῖται, φανερὸν ἐν τούτοις ὅτι ἅμα τὸ κινούμενον καὶ τὸ κινοῦν ἐστιν· ἐνυπάρχει γὰρ αὐτοῖς τὸ πρῶτον κινοῦν, ὥστ’ οὐδέν ἐστιν ἀναμεταξύ· ὅσα δ’ ὑπ’ ἄλλου κινεῖται, τετραχῶς ἀνάγκη γίγνεσθαι· τέτταρα γὰρ εἴδη τῆς ὑπ’ ἄλλου φορᾶς, ἕλξις, ὦσις, ὄχησις, δίνησις. ἅπασαι γὰρ αἱ κατὰ τόπον κινήσεις ἀνάγονται εἰς ταύτας· ἡ μὲν γὰρ ἔπωσις ὦσίς τίς ἐστιν, ὅταν τὸ ἀφ’ αὑτοῦ κινοῦν ἐπακολουθοῦν ὠθῇ, ἡ δ’ ἄπωσις, ὅταν μὴ ἐπακολουθῇ κινῆσαν, ἡ δὲ ῥῖψις, ὅταν σφο (243b.) δροτέραν ποιήσῃ τὴν ἀφ’ αὑτοῦ κίνησιν τῆς κατὰ φύσιν φορᾶς, καὶ μέχρι τοσούτου φέρηται ἕως ἂν κρατῇ ἡ κίνησις. πάλιν ἡ δίωσις καὶ σύνωσις ἄπωσις καὶ ἕλξις εἰσίν· ἡ μὲν γὰρ δίωσις ἄπωσις (ἢ γὰρ ἀφ’ αὑτοῦ ἢ ἀπ’ ἄλλου ἐστὶν ἡ ἄπωσις), ἡ δὲ σύνωσις ἕλξις (καὶ γὰρ πρὸς αὑτὸ καὶ πρὸς ἄλλο ἡ ἕλξις). ὥστε καὶ ὅσα τούτων εἴδη, οἷον σπάθησις καὶ κέρκισις· ἡ μὲν γὰρ σύνωσις, ἡ δὲ δίωσις. ὁμοίως δὲ καὶ αἱ ἄλλαι συγκρίσεις καὶ διακρίσεις — ἅπασαι γὰρ ἔσονται διώσεις ἢ συνώσεις — πλὴν ὅσαι ἐν γενέσει καὶ φθορᾷ εἰσιν. ἅμα δὲ φανερὸν ὅτι οὐδ’ ἔστιν ἄλλο τι γένος κινήσεως ἡ σύγκρισις καὶ διάκρισις· ἅπασαι γὰρ διανέμονται εἴς τινας τῶν εἰρημένων. ἔτι δ’ ἡ μὲν εἰσπνοὴ ἕλξις, ἡ δ’ ἐκπνοὴ ὦσις. ὁμοίως δὲ καὶ ἡ πτύσις, καὶ ὅσαι ἄλλαι διὰ τοῦ σώματος ἢ ἐκκριτικαὶ ἢ ληπτικαὶ κινήσεις· αἱ μὲν γὰρ ἕλξεις εἰσίν, αἱ δ’ ἀπώσεις. δεῖ δὲ καὶ τὰς ἄλλας τὰς κατὰ τόπον ἀνάγειν· ἅπασαι γὰρ πίπτουσιν εἰς τέσσαρας ταύτας. τούτων δὲ πάλιν ἡ ὄχησις καὶ ἡ δίνησις εἰς ἕλξιν καὶ ὦσιν. ἡ μὲν γὰρ ὄχησις κατὰ τούτων τινὰ τῶν τριῶν τρόπων ἐστίν (τὸ μὲν γὰρ ὀχούμενον κινεῖται κατὰ συμβεβηκός, ὅτι ἐν κινουμένῳ ἐστὶν ἢ ἐπὶ κινουμένου τινός, τὸ δ’ ὀχοῦν ὀχεῖ ἢ ἑλκόμενον ἢ (244a.) ὠθούμενον ἢ δινούμενον, ὥστε κοινή ἐστιν ἁπασῶν τῶν τριῶν ἡ ὄχησις)· ἡ δὲ δίνησις σύγκειται ἐξ ἕλξεώς τε καὶ ὤσεως· ἀνάγκη γὰρ τὸ δινοῦν τὸ μὲν ἕλκειν τὸ δ’ ὠθεῖν· τὸ μὲν γὰρ ἀφ’ αὑτοῦ τὸ δὲ πρὸς αὑτὸ ἄγει. ὥστ’ εἰ τὸ ὠθοῦν καὶ τὸ ἕλκον ἅμα τῷ ὠθουμένῳ καὶ τῷ ἑλκομένῳ, φανερὸν ὅτι τοῦ κατὰ τόπον κινουμένου καὶ κινοῦντος οὐδέν ἐστι μεταξύ. ἀλλὰ μὴν τοῦτο δῆλον καὶ ἐκ τῶν ὁρισμῶν· ὦσις μὲν γάρ ἐστιν ἡ ἀφ’ αὑτοῦ ἢ ἀπ’ ἄλλου πρὸς ἄλλο κίνησις, ἕλξις δὲ ἡ ἀπ’ ἄλλου πρὸς αὑτὸ ἢ πρὸς ἄλλο, ὅταν θάττων ἡ κίνησις ᾖ [τοῦ ἕλκοντος] τῆς χωριζούσης ἀπ’ ἀλλήλων τὰ συνεχῆ· οὕτω γὰρ συνεφέλκεται θάτερον. (τάχα δὲ δόξειεν ἂν εἶναί τις ἕλξις καὶ ἄλλως· τὸ γὰρ ξύλον ἕλκει τὸ πῦρ οὐχ οὕτως. τὸ δ’ οὐθὲν διαφέρει κινουμένου τοῦ ἕλκοντος ἢ μένοντος ἕλκειν· ὁτὲ μὲν γὰρ ἕλκει οὗ ἔστιν, ὁτὲ δὲ οὗ ἦν.) ἀδύνατον δὲ ἢ ἀφ’ αὑτοῦ πρὸς ἄλλο ἢ ἀπ’ ἄλλου πρὸς αὑτὸ κινεῖν (244b.) μὴ ἁπτόμενον, ὥστε φανερὸν ὅτι τοῦ κατὰ τόπον κινουμένου καὶ κινοῦντος οὐδέν ἐστι μεταξύ.

ἀλλὰ μὴν οὐδὲ τοῦ ἀλλοιουμένου καὶ τοῦ ἀλλοιοῦντος. τοῦτο δὲ δῆλον ἐξ ἐπαγωγῆς· ἐν ἅπασι γὰρ συμβαίνει ἅμα εἶναι τὸ ἔσχατον ἀλλοιοῦν καὶ τὸ πρῶτον ἀλλοιούμενον· <ὑπόκειται γὰρ ἡμῖν τὸ τὰ ἀλλοιούμενα κατὰ τὰς παθητικὰς καλουμένας ποιότητας πάσχοντα ἀλλοιοῦσθαι>. ἅπαν γὰρ σῶμα σώματος διαφέρει τοῖς αἰσθητοῖς ἢ πλείοσιν ἢ ἐλάττοσιν ἢ τῷ μᾶλλον καὶ ἧττον τοῖς αὐτοῖς· ἀλλὰ μὴν καὶ ἀλλοιοῦται τὸ ἀλλοιούμενον ὑπὸ τῶν εἰρημένων. ταῦτα γάρ ἐστι πάθη τῆς ὑποκειμένης ποιότητος· ἢ γὰρ θερμαινόμενον ἢ γλυκαινόμενον ἢ πυκνούμενον ἢ ξηραινόμενον ἢ λευκαινόμενον ἀλλοιοῦσθαί φαμεν, ὁμοίως τό τε ἄψυχον καὶ τὸ ἔμψυχον λέγοντες, καὶ πάλιν τῶν ἐμψύχων τά τε μὴ αἰσθητικὰ τῶν μερῶν καὶ αὐτὰς τὰς αἰσθήσεις. ἀλλοιοῦνται γάρ πως καὶ αἱ αἰσθήσεις· ἡ γὰρ αἴσθησις ἡ κατ’ ἐνέργειαν κίνησίς ἐστι διὰ τοῦ σώματος, πασχούσης τι τῆς αἰσθήσεως. καθ’ ὅσα μὲν οὖν τὸ ἄψυχον ἀλλοιοῦται, καὶ τὸ ἔμψυχον, καθ’ ὅσα δὲ τὸ ἔμψυχον, οὐ κατὰ ταῦτα πάντα τὸ ἄψυχον (οὐ γὰρ ἀλλοιοῦται κατὰ τὰς αἰσθήσεις)· καὶ τὸ μὲν λανθάνει, τὸ δ’ οὐ (245a.) λανθάνει πάσχον. οὐδὲν δὲ κωλύει καὶ τὸ ἔμψυχον λανθάνειν, ὅταν μὴ κατὰ τὰς αἰσθήσεις γίγνηται ἡ ἀλλοίωσις. εἴπερ οὖν ἀλλοιοῦται τὸ ἀλλοιούμενον ὑπὸ τῶν αἰσθητῶν, ἐν ἅπασί γε τούτοις φανερὸν ὅτι ἅμα ἐστὶ τὸ ἔσχατον ἀλλοιοῦν καὶ τὸ πρῶτον ἀλλοιούμενον· τῷ μὲν γὰρ συνεχὴς ὁ ἀήρ, τῷ δ’ ἀέρι τὸ σῶμα. πάλιν δὲ τὸ μὲν χρῶμα τῷ φωτί, τὸ δὲ φῶς τῇ ὄψει. τὸν αὐτὸν δὲ τρόπον καὶ ἡ ἀκοὴ καὶ ἡ ὄσφρησις· πρῶτον γὰρ κινοῦν πρὸς τὸ κινούμενον ὁ ἀήρ. καὶ ἐπὶ τῆς γεύσεως ὁμοίως· ἅμα γὰρ τῇ γεύσει ὁ χυμός. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἀψύχων καὶ ἀναισθήτων. ὥστ’ οὐδὲν ἔσται μεταξὺ τοῦ ἀλλοιουμένου καὶ τοῦ ἀλλοιοῦντος.

οὐδὲ μὴν τοῦ αὐξανομένου τε καὶ αὔξοντος· αὐξάνει γὰρ τὸ πρῶτον αὖξον προσγιγνόμενον, ὥστε ἓν γίγνεσθαι τὸ ὅλον. καὶ πάλιν φθίνει τὸ φθῖνον ἀπογιγνομένου τινὸς τῶν τοῦ φθίνοντος. ἀνάγκη οὖν συνεχὲς εἶναι καὶ τὸ αὖξον καὶ τὸ φθῖνον, τῶν δὲ συνεχῶν οὐδὲν μεταξύ.

φανερὸν οὖν ὅτι τοῦ κινουμένου καὶ (245b.) τοῦ κινοῦντος πρώτου καὶ ἐσχάτου πρὸς τὸ κινούμενον οὐδέν ἐστιν ἀνὰ μέσον.

Κεφάλαιο 3

Ὅτι δὲ τὸ ἀλλοιούμενον ἅπαν ἀλλοιοῦται ὑπὸ τῶν αἰσθητῶν, καὶ ἐν μόνοις ὑπάρχει τούτοις ἀλλοίωσις ὅσα καθ’ αὑτὰ λέγεται πάσχειν ὑπὸ τῶν αἰσθητῶν, ἐκ τῶνδε θεωρητέον. τῶν γὰρ ἄλλων μάλιστ’ ἄν τις ὑπολάβοι ἔν τε τοῖς σχήμασι καὶ ταῖς μορφαῖς καὶ ἐν ταῖς ἕξεσι καὶ ταῖς τούτων λήψεσι καὶ ἀποβολαῖς ἀλλοίωσιν ὑπάρχειν· ἐν οὐδετέροις δ’ ἔστιν.

τὸ μὲν γὰρ σχηματιζόμενον καὶ ῥυθμιζόμενον ὅταν ἐπιτελεσθῇ, οὐ λέγομεν ἐκεῖνο ἐξ οὗ ἐστιν, οἷον τὸν ἀνδριάντα χαλκὸν ἢ τὴν πυραμίδα κηρὸν ἢ τὴν κλίνην ξύλον, ἀλλὰ παρωνυμιάζοντες τὸ μὲν χαλκοῦν, τὸ δὲ κήρινον, τὸ δὲ ξύλινον. τὸ δὲ πεπονθὸς καὶ ἠλλοιωμένον προσαγορεύομεν· ὑγρὸν γὰρ καὶ θερμὸν καὶ σκληρὸν τὸν χαλκὸν λέγομεν καὶ τὸν κηρόν

(καὶ οὐ μόνον οὕτως, ἀλλὰ καὶ τὸ ὑγρὸν καὶ τὸ θερμὸν χαλκὸν λέγομεν), ὁμωνύμως τῷ πάθει προσαγορεύοντες τὴν (246a.) ὕλην.

ὥστ’ εἰ κατὰ μὲν τὸ σχῆμα καὶ τὴν μορφὴν οὐ λέγεται τὸ γεγονὸς ἐν ᾧ ἐστι τὸ σχῆμα, κατὰ δὲ τὰ πάθη καὶ τὰς ἀλλοιώσεις λέγεται, φανερὸν ὅτι οὐκ ἂν εἶεν αἱ γενέσεις ἀλλοιώσεις.

ἔτι δὲ καὶ εἰπεῖν οὕτως ἄτοπον ἂν δόξειεν, ἠλλοιῶσθαι τὸν ἄνθρωπον ἢ τὴν οἰκίαν ἢ ἄλλο ὁτιοῦν τῶν γεγενημένων· ἀλλὰ γίγνεσθαι μὲν ἴσως ἕκαστον ἀναγκαῖον ἀλλοιουμένου τινός, οἷον τῆς ὕλης πυκνουμένης ἢ μανουμένης ἢ θερμαινομένης ἢ ψυχομένης, οὐ μέντοι τὰ γιγνόμενά γε ἀλλοιοῦται, οὐδ’ ἡ γένεσις αὐτῶν ἀλλοίωσίς ἐστιν.

ἀλλὰ μὴν οὐδ’ αἱ ἕξεις οὔθ’ αἱ τοῦ σώματος οὔθ’ αἱ τῆς ψυχῆς ἀλλοιώσεις. αἱ μὲν γὰρ ἀρεταὶ αἱ δὲ κακίαι τῶν ἕξεων· οὐκ ἔστι δὲ οὔτε ἡ ἀρετὴ οὔτε ἡ κακία ἀλλοίωσις, ἀλλ’ ἡ μὲν ἀρετὴ τελείωσίς τις (ὅταν γὰρ λάβῃ τὴν αὑτοῦ ἀρετήν, τότε λέγεται τέλειον ἕκαστον — τότε γὰρ ἔστι μάλιστα [τὸ] κατὰ φύσιν — ὥσπερ κύκλος τέλειος, ὅταν μάλιστα γένηται κύκλος καὶ ὅταν βέλτιστος), ἡ δὲ κακία φθορὰ τούτου καὶ ἔκστασις· ὥσπερ οὖν οὐδὲ τὸ τῆς οἰκίας τελείωμα λέγομεν ἀλλοίωσιν (ἄτοπον γὰρ εἰ ὁ θριγκὸς καὶ ὁ κέραμος ἀλλοίωσις, ἢ εἰ θριγκουμένη καὶ κεραμουμένη ἀλλοιοῦται ἀλλὰ μὴ τελειοῦται ἡ οἰκία), τὸν αὐτὸν τρόπον καὶ ἐπὶ τῶν ἀρε(246b.) τῶν καὶ τῶν κακιῶν καὶ τῶν ἐχόντων ἢ λαμβανόντων· αἱ μὲν γὰρ τελειώσεις αἱ δὲ ἐκστάσεις εἰσίν, ὥστ’ οὐκ ἀλλοιώσεις. ἔτι δὲ καί φαμεν ἁπάσας εἶναι τὰς ἀρετὰς ἐν τῷ πρός τι πὼς ἔχειν. τὰς μὲν γὰρ τοῦ σώματος, οἷον ὑγίειαν καὶ εὐεξίαν, ἐν κράσει καὶ συμμετρίᾳ θερμῶν καὶ ψυχρῶν τίθεμεν, ἢ αὐτῶν πρὸς αὑτὰ τῶν ἐντὸς ἢ πρὸς τὸ περιέχον· ὁμοίως δὲ καὶ τὸ κάλλος καὶ τὴν ἰσχὺν καὶ τὰς ἄλλας ἀρετὰς καὶ κακίας. ἑκάστη γάρ ἐστι τῷ πρός τι πὼς ἔχειν, καὶ περὶ τὰ οἰκεῖα πάθη εὖ ἢ κακῶς διατίθησι τὸ ἔχον· οἰκεῖα δ' ὑφ' ὧν γίγνεσθαι καὶ φθείρεσθαι πέφυκεν. ἐπεὶ οὖν τὰ πρός τι οὔτε αὐτά ἐστιν ἀλλοιώσεις, οὔτε ἔστιν αὐτῶν ἀλλοίωσις οὐδὲ γένεσις οὐδ' ὅλως μεταβολὴ οὐδεμία, φανερὸν ὅτι οὔθ' αἱ ἕξεις οὔθ' αἱ τῶν ἕξεων ἀποβολαὶ καὶ λήψεις ἀλλοιώσεις εἰσίν, ἀλλὰ γίγνεσθαι μὲν ἴσως αὐτὰς καὶ φθείρεσθαι ἀλλοιουμένων τινῶν ἀνάγκη, καθάπερ καὶ τὸ εἶδος καὶ τὴν μορφήν, οἷον θερμῶν καὶ ψυχρῶν ἢ ξηρῶν καὶ ὑγρῶν, ἢ ἐν οἷς τυγχάνουσιν οὖσαι πρώτοις. περὶ ταῦτα γὰρ ἑκάστη λέγεται κακία καὶ ἀρετή, ὑφ' ὧν ἀλλοιοῦσθαι πέφυκε τὸ ἔχον· ἡ μὲν γὰρ ἀρετὴ ποιεῖ ἢ ἀπαθὲς ἢ ὡδὶ παθητικόν, ἡ δὲ κακία παθητικὸν ἢ ἐναντίως ἀπαθές.

ὁμοίως (247a.) δὲ καὶ ἐπὶ τῶν τῆς ψυχῆς ἕξεων· ἅπασαι γὰρ καὶ αὗται τῷ πρός τι πὼς ἔχειν, καὶ αἱ μὲν ἀρεταὶ τελειώσεις, αἱ δὲ κακίαι ἐκστάσεις. ἔτι δὲ ἡ μὲν ἀρετὴ εὖ διατίθησι πρὸς τὰ οἰκεῖα πάθη, ἡ δὲ κακία κακῶς. ὥστ' οὐδ' αὗται ἔσονται ἀλλοιώσεις· οὐδὲ δὴ αἱ ἀποβολαὶ καὶ αἱ λήψεις αὐτῶν. γίγνεσθαι δ' αὐτὰς ἀναγκαῖον ἀλλοιουμένου τοῦ αἰσθητικοῦ μέρους. ἀλλοιωθήσεται δ' ὑπὸ τῶν αἰσθητῶν· ἅπασα γὰρ ἡ ἠθικὴ ἀρετὴ περὶ ἡδονὰς καὶ λύπας τὰς σωματικάς, αὗται δὲ ἢ ἐν τῷ πράττειν ἢ ἐν τῷ μεμνῆσθαι ἢ ἐν τῷ ἐλπίζειν. αἱ μὲν οὖν ἐν τῇ πράξει κατὰ τὴν αἴσθησίν εἰσιν, ὥσθ' ὑπ' αἰσθητοῦ τινὸς κινεῖσθαι, αἱ δ' ἐν τῇ μνήμῃ καὶ ἐν τῇ ἐλπίδι ἀπὸ ταύτης εἰσίν· ἢ γὰρ οἷα ἔπαθον μεμνημένοι ἥδονται, ἢ ἐλπίζοντες οἷα μέλλουσιν. ὥστ' ἀνάγκη πᾶσαν τὴν τοιαύτην ἡδονὴν ὑπὸ τῶν αἰσθητῶν γίγνεσθαι. ἐπεὶ δ' ἡδονῆς καὶ λύπης ἐγγιγνομένης καὶ ἡ κακία καὶ ἡ ἀρετὴ ἐγγίγνεται (περὶ ταύτας γάρ εἰσιν), αἱ δ' ἡδοναὶ καὶ αἱ λῦπαι ἀλλοιώσεις τοῦ αἰσθητικοῦ, φανερὸν ὅτι ἀλλοιουμένου τινὸς ἀνάγκη καὶ ταύτας ἀποβάλλειν καὶ λαμβάνειν. ὥσθ' ἡ μὲν γένεσις αὐτῶν μετ' ἀλλοιώσεως, αὐταὶ δ' οὐκ εἰσὶν ἀλλοιώσεις.

(247b.) ἀλλὰ μὴν οὐδ' αἱ τοῦ νοητικοῦ μέρους ἕξεις ἀλλοιώσεις, οὐδ' ἔστιν αὐτῶν γένεσις. πολὺ γὰρ μάλιστα τὸ ἐπιστῆμον ἐν τῷ πρός τι πὼς ἔχειν λέγομεν. ἔτι δὲ καὶ φανερὸν ὅτι οὐκ ἔστιν αὐτῶν γένεσις· τὸ γὰρ κατὰ δύναμιν ἐπιστῆμον οὐδὲν αὐτὸ κινηθὲν ἀλλὰ τῷ ἄλλο ὑπάρξαι γίγνεται ἐπιστῆμον. ὅταν γὰρ γένηται τὸ κατὰ μέρος, ἐπίσταταί πως τὰ καθόλου τῷ ἐν μέρει. πάλιν δὲ τῆς χρήσεως καὶ τῆς ἐνεργείας οὐκ ἔστι γένεσις, εἰ μή τις καὶ τῆς ἀναβλέψεως καὶ τῆς ἁφῆς οἴεται γένεσιν εἶναι· τὸ γὰρ χρῆσθαι καὶ τὸ ἐνεργεῖν ὅμοιον τούτοις. ἡ δ' ἐξ ἀρχῆς λῆψις τῆς ἐπιστήμης γένεσις οὐκ ἔστιν οὐδ' ἀλλοίωσις· τῷ γὰρ ἠρεμῆσαι καὶ στῆναι τὴν διάνοιαν ἐπίστασθαι καὶ φρονεῖν λεγόμεθα, εἰς δὲ τὸ ἠρεμεῖν οὐκ ἔστι γένεσις· ὅλως γὰρ οὐδεμιᾶς μεταβολῆς, καθάπερ εἴρηται πρότερον. ἔτι δ’ ὥσπερ ὅταν ἐκ τοῦ μεθύειν ἢ καθεύδειν ἢ νοσεῖν εἰς τἀναντία μεταστῇ τις, οὔ φαμεν ἐπιστήμονα γεγονέναι πάλιν (καίτοι ἀδύνατος ἦν τῇ ἐπιστήμῃ χρῆσθαι πρότερον), οὕτως οὐδ’ ὅταν ἐξ ἀρχῆς λαμβάνῃ τὴν ἕξιν· τῷ γὰρ καθίστασθαι τὴν ψυχὴν ἐκ τῆς φυσικῆς ταραχῆς φρόνιμόν τι γίγνεται καὶ ἐπιστῆμον. διὸ καὶ τὰ παιδία οὔτε μανθάνειν δύνανται οὔτε κατὰ τὰς αἰσθήσεις (248a.) ὁμοίως κρίνειν τοῖς πρεσβυτέροις· πολλὴ γὰρ ἡ ταραχὴ καὶ ἡ κίνησις. καθίσταται δὲ καὶ ἠρεμίζεται πρὸς ἔνια μὲν ὑπὸ τῆς φύσεως αὐτῆς, πρὸς ἔνια δ’ ὑπ’ ἄλλων, ἐν ἀμφοτέροις δὲ ἀλλοιουμένων τινῶν τῶν ἐν τῷ σώματι, καθάπερ ἐπὶ τῆς χρήσεως καὶ τῆς ἐνεργείας, ὅταν νήφων γένηται καὶ ἐγερθῇ. φανερὸν οὖν ἐκ τῶν εἰρημένων ὅτι τὸ ἀλλοιοῦσθαι καὶ ἡ ἀλλοίωσις ἔν τε τοῖς αἰσθητοῖς γίγνεται καὶ ἐν τῷ αἰσθητικῷ μορίῳ τῆς ψυχῆς, ἐν ἄλλῳ δ’ οὐδενὶ πλὴν κατὰ συμβεβηκός.

Κεφάλαιο 4

Ἀπορήσειε δ’ ἄν τις πότερόν ἐστι κίνησις πᾶσα πάσῃ συμβλητὴ ἢ οὔ. εἰ δή ἐστιν πᾶσα συμβλητή, καὶ ὁμοταχὲς τὸ ἐν ἴσῳ χρόνῳ ἴσον κινούμενον, ἔσται περιφερής τις ἴση εὐθείᾳ, καὶ μείζων δὴ καὶ ἐλάττων. ἔτι ἀλλοίωσις καὶ φορά τις ἴση, ὅταν ἐν ἴσῳ χρόνῳ τὸ μὲν ἀλλοιωθῇ τὸ δ’ ἐνεχθῇ. ἔσται ἄρα ἴσον πάθος μήκει. ἀλλ’ ἀδύνατον. ἀλλ’ ἆρα ὅταν ἐν ἴσῳ ἴσον κινηθῇ, τότε ἰσοταχές, ἴσον δ’ οὐκ ἔστιν πάθος μήκει, ὥστε οὐκ ἔστιν ἀλλοίωσις φορᾷ ἴση οὐδ’ ἐλάττων, ὥστ’ οὐ πᾶσα συμβλητή;

ἐπὶ δὲ τοῦ κύκλου καὶ τῆς εὐθείας πῶς συμβήσεται; ἄτοπόν τε γὰρ εἰ μὴ ἔστιν κύκλῳ ὁμοίως τουτὶ κινεῖσθαι καὶ τουτὶ ἐπὶ τῆς εὐθείας, ἀλλ’ εὐθὺς ἀνάγκη ἢ θᾶττον ἢ βραδύτερον, ὥσπερ ἂν εἰ κάταντες, τὸ δ’ ἄναντες· οὐδὲ διαφέρει οὐδὲν τῷ λόγῳ, εἴ τίς φησιν ἀνάγκην εἶναι θᾶττον εὐθὺς ἢ βραδύτερον κινεῖσθαι· ἔσται γὰρ μείζων καὶ ἐλάττων ἡ περιφερὴς τῆς εὐθείας, ὥστε καὶ ἴση. εἰ γὰρ ἐν τῷ Α χρόνῳ (248b.) τὴν Β διελήλυθε τὸ δὲ τὴν Γ, μείζων ἂν εἴη ἡ Β τῆς Γ· οὕτω γὰρ τὸ θᾶττον ἐλέγετο. οὐκοῦν καὶ εἰ ἐν ἐλάττονι ἴσον, θᾶττον· ὥστ’ ἔσται τι μέρος τοῦ Α ἐν ᾧ τὸ Β τοῦ κύκλου τὸ ἴσον δίεισι καὶ τὸ Γ ἐν ὅλῳ τῷ Α [τὴν Γ]. ἀλλὰ μὴν εἰ ἔστιν συμβλητά, συμβαίνει τὸ ἄρτι ῥηθέν, ἴσην εὐθεῖαν εἶναι κύκλῳ. ἀλλ’ οὐ συμβλητά· οὐδ’ ἄρα αἱ κινήσεις, ἀλλ’ ὅσα μὴ συνώνυμα, πάντ’ ἀσύμβλητα.

οἷον διὰ τί οὐ συμβλητὸν πότερον ὀξύτερον τὸ γραφεῖον ἢ ὁ οἶνος ἢ ἡ νήτη; ὅτι ὁμώνυμα, οὐ συμβλητά· ἀλλ’ ἡ νήτη τῇ παρανήτῃ συμβλητή, ὅτι τὸ αὐτὸ σημαίνει τὸ ὀξὺ ἐπ’ ἀμφοῖν. ἆρ’ οὖν οὐ ταὐτὸν τὸ ταχὺ ἐνταῦθα κἀκεῖ, πολὺ δ’ ἔτι ἧττον ἐν ἀλλοιώσει καὶ φορᾷ;

ἢ πρῶτον μὲν τοῦτο οὐκ ἀληθές, ὡς εἰ μὴ ὁμώνυμα συμβλητά; τὸ γὰρ πολὺ τὸ αὐτὸ σημαίνει ἐν ὕδατι καὶ ἀέρι, καὶ οὐ συμβλητά. εἰ δὲ μή, τό γε διπλάσιον ταὐτό (δύο γὰρ πρὸς ἕν), καὶ οὐ συμβλητά. ἢ καὶ ἐπὶ τούτων ὁ αὐτὸς λόγος; καὶ γὰρ τὸ πολὺ ὁμώνυμον. ἀλλ’ ἐνίων καὶ οἱ λόγοι ὁμώνυμοι, οἷον εἰ λέγοι τις ὅτι τὸ πολὺ τὸ τοσοῦτον καὶ ἔτι, ἄλλο τὸ τοσοῦτον· καὶ τὸ ἴσον ὁμώνυμον, καὶ τὸ ἓν δέ, εἰ ἔτυχεν, εὐθὺς ὁμώνυμον. εἰ δὲ τοῦτο, καὶ τὰ δύο, ἐπεὶ διὰ τί τὰ μὲν συμβλητὰ τὰ δ’ οὔ, εἴπερ ἦν μία φύσις; ἢ ὅτι ἐν ἄλλῳ πρώτῳ δεκτικῷ; ὁ μὲν οὖν ἵππος καὶ ὁ κύων συμβλητά, πότερον λευκότερον (ἐν ᾧ γὰρ πρώτῳ, τὸ αὐτό, ἡ ἐπιφάνεια), καὶ κατὰ μέγεθος ὡσαύτως· ὕδωρ δὲ καὶ φωνὴ οὔ· ἐν ἄλλῳ γάρ. ἢ δῆλον ὅτι ἔσται οὕτω γε πάντα ἓν ποιεῖν, ἐν ἄλλῳ (249a.) δὲ ἕκαστον φάσκειν εἶναι, καὶ ἔσται ταὐτὸ

<τὸ> ἴσον καὶ γλυκὺ καὶ λευκόν, ἀλλ’ ἄλλο ἐν ἄλλῳ; ἔτι δεκτικὸν οὐ τὸ τυχὸν <τοῦ τυχόντος> ἐστίν, ἀλλ’ ἓν ἑνὸς τὸ πρῶτον.

ἀλλ’ ἆρα οὐ μόνον δεῖ τὰ συμβλητὰ μὴ ὁμώνυμα εἶναι ἀλλὰ καὶ μὴ ἔχειν διαφοράν, μήτε ὃ μήτε ἐν ᾧ; λέγω δὲ οἷον χρῶμα ἔχει διαί ρεσιν· τοιγαροῦν οὐ συμβλητὸν κατὰ τοῦτο (οἷον πότερον κεχρωμάτισται μᾶλλον, μὴ κατὰ τὶ χρῶμα, ἀλλ’ ᾗ χρῶμα), ἀλλὰ κατὰ τὸ λευκόν.

οὕτω καὶ περὶ κίνησιν ὁμοταχὲς τῷ ἐν ἴσῳ χρόνῳ κινεῖσθαι ἴσον τοσονδί· εἰ δὴ τοῦ μήκους ἐν τῳδὶ τὸ μὲν ἠλλοιώθη τὸ δ’ ἠνέχθη, ἴση ἄρα αὕτη ἡ ἀλλοίωσις καὶ ὁμοταχὴς τῇ φορᾷ; ἀλλ’ ἄτοπον. αἴτιον δ’ ὅτι ἡ κίνησις ἔχει εἴδη, ὥστ’ εἰ τὰ ἐν ἴσῳ χρόνῳ ἐνεχθέντα ἴσον μῆκος ἰσοταχῆ ἔσται, ἴση ἡ εὐθεῖα καὶ ἡ περιφερής. πότερον οὖν αἴτιον, ὅτι ἡ φορὰ γένος ἢ ὅτι ἡ γραμμὴ γένος; ὁ μὲν γὰρ χρόνος ὁ αὐτός, ἂν δὲ τῷ εἴδει ᾖ ἄλλα, καὶ ἐκεῖνα εἴδει διαφέρει. καὶ γὰρ ἡ φορὰ εἴδη ἔχει, ἂν ἐκεῖνο ἔχῃ εἴδη ἐφ’ οὗ κινεῖται (ὁτὲ δὲ ἐὰν ᾧ, οἷον εἰ πόδες, βάδισις, εἰ δὲ πτέρυγες, πτῆσις. ἢ οὔ, ἀλλὰ τοῖς σχήμασιν ἡ φορὰ ἄλλη;). ὥστε τὰ ἐν ἴσῳ ταὐτὸ μέγεθος κινούμενα ἰσοταχῆ, τὸ αὐτὸ δὲ καὶ ἀδιάφορον εἴδει καὶ κινήσει ἀδιάφορον· ὥστε τοῦτο σκεπτέον, τίς διαφορὰ κινήσεως. καὶ σημαίνει ὁ λόγος οὗτος ὅτι τὸ γένος οὐχ ἕν τι, ἀλλὰ παρὰ τοῦτο λανθάνει πολλά, εἰσίν τε τῶν ὁμωνυμιῶν αἱ μὲν πολὺ ἀπέχουσαι, αἱ δὲ ἔχουσαί τινα ὁμοιότητα, αἱ δ’ ἐγγὺς ἢ γένει ἢ ἀναλογίᾳ, διὸ οὐ δοκοῦσιν ὁμωνυμίαι εἶναι οὖσαι.

πότε οὖν ἕτερον τὸ εἶδος, ἐὰν ταὐτὸ ἐν ἄλλῳ, ἢ ἂν ἄλλο ἐν ἄλλῳ; καὶ τίς ὅρος; ἢ τῷ κρινοῦμεν ὅτι ταὐτὸν τὸ λευκὸν καὶ τὸ γλυκὺ ἢ ἄλλο — ὅτι ἐν ἄλλῳ φαίνεται ἕτερον, ἢ ὅτι ὅλως οὐ ταὐτό; περὶ δὲ δὴ ἀλλοιώσεως, πῶς ἔσται ἰσοταχὴς ἑτέρᾳ ἑτέρα; εἰ δή ἐστι τὸ ὑγιάζεσθαι ἀλλοιοῦσθαι, ἔστι τὸν μὲν ταχὺ τὸν δὲ βραδέως ἰαθῆναι, καὶ ἅμα τινάς, ὥστ’ (249b.) ἔσται ἀλλοίωσις ἰσοταχής· ἐν ἴσῳ γὰρ χρόνῳ ἠλλοιώθη. ἀλλὰ τί ἠλλοιώθη; τὸ γὰρ ἴσον οὐκ ἔστιν ἐνταῦθα λεγόμενον, ἀλλ’ ὡς ἐν τῷ ποσῷ ἰσότης, ἐνταῦθα ὁμοιότης. ἀλλ’ ἔστω ἰσοταχὲς τὸ ἐν ἴσῳ χρόνῳ τὸ αὐτὸ μεταβάλλον. πότερον οὖν ἐν ᾧ τὸ πάθος ἢ τὸ πάθος δεῖ συμβάλλειν; ἐνταῦθα μὲν δὴ ὅτι ὑγίεια ἡ αὐτή, ἔστιν λαβεῖν ὅτι οὔτε μᾶλλον οὔτε ἧττον ἀλλ’ ὁμοίως ὑπάρχει. ἐὰν δὲ τὸ πάθος ἄλλο ᾖ, οἷον ἀλλοιοῦται τὸ λευκαινόμενον καὶ τὸ ὑγιαζόμενον, τούτοις οὐδὲν τὸ αὐτὸ οὐδ’ ἴσον οὐδ’ ὅμοιον, ᾗ ἤδη ταῦτα εἴδη ποιεῖ ἀλλοιώσεως, καὶ οὐκ ἔστι μία ὥσπερ οὐδ’ αἱ φοραί. ὥστε ληπτέον πόσα εἴδη ἀλλοιώσεως καὶ πόσα φορᾶς. εἰ μὲν οὖν τὰ κινούμενα εἴδει διαφέρει, ὧν εἰσὶν αἱ κινήσεις καθ’ αὑτὰ καὶ μὴ κατὰ συμβεβηκός, καὶ αἱ κινήσεις εἴδει διοίσουσιν· εἰ δὲ γένει, γένει, εἰ δ’ ἀριθμῷ, ἀριθμῷ. ἀλλὰ δὴ πότερον εἰς τὸ πάθος δεῖ βλέψαι, ἐὰν ᾖ τὸ αὐτὸ ἢ ὅμοιον, εἰ ἰσοταχεῖς αἱ ἀλλοιώσεις, ἢ εἰς τὸ ἀλλοιούμενον, οἷον εἰ τοῦ μὲν τοσονδὶ λελεύκανται τοῦ δὲ τοσονδί; ἢ εἰς ἄμφω, καὶ ἡ αὐτὴ μὲν ἢ ἄλλη τῷ πάθει, εἰ τὸ αὐτὸ <ἢ μὴ τὸ> αὐτό, ἴση δ’ ἢ ἄνισος, εἰ ἐκεῖνο <ἴσον ἢ> ἄνισον;

καὶ ἐπὶ γενέσεως δὲ καὶ φθορᾶς τὸ αὐτὸ σκεπτέον. πῶς ἰσοταχὴς ἡ γένεσις; εἰ ἐν ἴσῳ χρόνῳ τὸ αὐτὸ καὶ ἄτομον, οἷον ἄνθρωπος ἀλλὰ μὴ ζῷον· θάττων δ’, εἰ ἐν ἴσῳ ἕτερον (οὐ γὰρ ἔχομέν τινα δύο ἐν οἷς ἡ ἑτερότης ὡς ἡ ἀνομοιότης), ἤ, εἰ ἔστιν ἀριθμὸς ἡ οὐσία, πλείων καὶ ἐλάττων ἀριθμὸς ὁμοειδής· ἀλλ’ ἀνώνυμον τὸ κοινόν, καὶ τὸ ἑκάτερον [ποιόν· τὸ μὲν ποιόν,] ὥσπερ τὸ πλεῖον πάθος ἢ τὸ ὑπερέχον μᾶλλον, τὸ δὲ ποσὸν μεῖζον.

Κεφάλαιο 5

Ἐπεὶ δὲ τὸ κινοῦν κινεῖ τι ἀεὶ καὶ ἔν τινι καὶ μέχρι του (λέγω δὲ τὸ μὲν ἔν τινι, ὅτι ἐν χρόνῳ, τὸ δὲ μέχρι του, ὅτι ποσόν τι μῆκος· ἀεὶ γὰρ ἅμα κινεῖ καὶ κεκίνηκεν, ὥστε ποσόν τι ἔσται ὃ ἐκινήθη, καὶ ἐν ποσῷ), εἰ δὴ τὸ μὲν Α τὸ κινοῦν, τὸ δὲ Β τὸ κινούμενον, ὅσον δὲ κεκίνηται μῆ(250a.) κος τὸ Γ, ἐν ὅσῳ δέ, ὁ χρόνος, ἐφ’ οὗ τὸ Δ, ἐν δὴ τῷ ἴσῳ χρόνῳ ἡ ἴση δύναμις ἡ ἐφ’ οὗ τὸ Α τὸ ἥμισυ τοῦ Β διπλασίαν τῆς Γ κινήσει, τὴν δὲ τὸ Γ ἐν τῷ ἡμίσει τοῦ Δ· οὕτω γὰρ ἀνάλογον ἔσται. καὶ εἰ ἡ αὐτὴ δύναμις τὸ αὐτὸ ἐν τῳδὶ τῷ χρόνῳ τοσήνδε κινεῖ καὶ τὴν ἡμίσειαν ἐν τῷ ἡμίσει, καὶ ἡ ἡμίσεια ἰσχὺς τὸ ἥμισυ κινήσει ἐν τῷ ἴσῳ χρόνῳ τὸ ἴσον. οἷον τῆς Α δυνάμεως ἔστω ἡμίσεια ἡ τὸ Ε καὶ τοῦ Β τὸ Ζ ἥμισυ· ὁμοίως δὴ ἔχουσι καὶ ἀνάλογον ἡ ἰσχὺς πρὸς τὸ βάρος, ὥστε ἴσον ἐν ἴσῳ χρόνῳ κινήσουσιν. καὶ εἰ τὸ Ε τὸ Ζ κινεῖ ἐν τῷ Δ τὴν Γ, οὐκ ἀνάγκη ἐν τῷ ἴσῳ χρόνῳ τὸ ἐφ’ οὗ Ε τὸ διπλάσιον τοῦ Ζ κινεῖν τὴν ἡμίσειαν τῆς Γ· εἰ δὴ τὸ Α τὴν τὸ Β κινεῖ ἐν τῷ Δ ὅσην ἡ τὸ Γ, τὸ ἥμισυ τοῦ Α τὸ ἐφ’ ᾧ Ε τὴν τὸ Β οὐ κινήσει ἐν τῷ χρόνῳ ἐφ’ ᾧ τὸ Δ οὐδ’ ἔν τινι τοῦ Δ τι τῆς Γ ἀνάλογον πρὸς τὴν ὅλην τὴν Γ ὡς τὸ Α πρὸς τὸ Ε· ὅλως γὰρ εἰ ἔτυχεν οὐ κινήσει οὐδέν· οὐ γὰρ εἰ ἡ ὅλη ἰσχὺς τοσήνδε ἐκίνησεν, ἡ ἡμίσεια οὐ κινήσει οὔτε ποσὴν οὔτ’ ἐν ὁποσῳοῦν· εἷς γὰρ ἂν κινοίη τὸ πλοῖον, εἴπερ ἥ τε τῶν νεωλκῶν τέμνεται ἰσχὺς εἰς τὸν ἀριθμὸν καὶ τὸ μῆκος ὃ πάντες ἐκίνησαν. διὰ τοῦτο ὁ Ζήνωνος λόγος οὐκ ἀληθής, ὡς ψοφεῖ τῆς κέγχρου ὁτιοῦν μέρος· οὐδὲν γὰρ κωλύει μὴ κινεῖν τὸν ἀέρα ἐν μηδενὶ χρόνῳ τοῦτον ὃν ἐκίνησεν πεσὼν ὁ ὅλος μέδιμνος. οὐδὲ δὴ τοσοῦτον μόριον, ὅσον ἂν κινήσειεν τοῦ ὅλου εἰ εἴη καθ’ αὑτὸ τοῦτο, οὐ κινεῖ. οὐδὲ γὰρ οὐδὲν ἔστιν ἀλλ’ ἢ δυνάμει ἐν τῷ ὅλῳ.

εἰ δὲ τὰ <κινοῦντα> δύο, καὶ ἑκάτερον τῶνδε ἑκάτερον κινεῖ τὸ τοσόνδε ἐν τοσῷδε, καὶ συντιθέμεναι αἱ δυνάμεις τὸ σύνθετον ἐκ τῶν βαρῶν τὸ ἴσον κινήσουσιν μῆκος καὶ ἐν ἴσῳ χρόνῳ· ἀνάλογον γάρ.

ἆρ’ οὖν οὕτω καὶ ἐπ’ ἀλλοιώσεως καὶ ἐπ’ αὐξήσεως; τὶ μὲν γὰρ τὸ αὖξον, τὶ δὲ τὸ αὐξανόμενον, ἐν ποσῷ δὲ χρόνῳ καὶ ποσὸν τὸ μὲν αὔξει τὸ δὲ αὐξάνεται. καὶ τὸ ἀλλοιοῦν καὶ τὸ ἀλλοιούμενον ὡσαύτως — τὶ καὶ ποσὸν (250b.) κατὰ τὸ μᾶλλον καὶ ἧττον ἠλλοίωται, καὶ ἐν ποσῷ χρόνῳ, ἐν διπλασίῳ διπλάσιον, καὶ τὸ διπλάσιον ἐν διπλασίῳ· τὸ δ’ ἥμισυ ἐν ἡμίσει χρόνῳ (ἢ ἐν ἡμίσει ἥμισυ), ἢ ἐν ἴσῳ διπλάσιον.

εἰ δὲ τὸ ἀλλοιοῦν ἢ αὖξον τὸ τοσόνδε ἐν τῷ τοσῷδε αὔξει ἢ ἀλλοιοῖ, οὐκ ἀνάγκη καὶ τὸ ἥμισυ ἐν ἡμίσει καὶ ἐν ἡμίσει ἥμισυ, ἀλλ’ οὐδέν, εἰ ἔτυχεν, ἀλλοιώσει ἢ αὐξήσει, ὥσπερ καὶ ἐπὶ τοῦ βάρους.

Κεφάλαιο 1

Πότερον γέγονέ ποτε κίνησις οὐκ οὖσα πρότερον, καὶ φθείρεται πάλιν οὕτως ὥστε κινεῖσθαι μηδέν, ἢ οὔτ' ἐγένετο οὔτε φθείρεται, ἀλλ' ἀεὶ ἦν καὶ ἀεὶ ἔσται, καὶ τοῦτ' ἀθάνατον καὶ ἄπαυστον ὑπάρχει τοῖς οὖσιν, οἷον ζωή τις οὖσα τοῖς φύσει συνεστῶσι πᾶσιν;

εἶναι μὲν οὖν κίνησιν πάντες φασὶν οἱ περὶ φύσεώς τι λέγοντες διὰ τὸ κοσμοποιεῖν καὶ περὶ γενέσεως καὶ φθορᾶς εἶναι τὴν θεωρίαν πᾶσαν αὐτοῖς, ἣν ἀδύνατον ὑπάρχειν μὴ κινήσεως οὔσης· ἀλλ' ὅσοι μὲν ἀπείρους τε κόσμους εἶναί φασιν, καὶ τοὺς μὲν γίγνεσθαι τοὺς δὲ φθείρεσθαι τῶν κόσμων, ἀεί φασιν εἶναι κίνησιν (ἀναγκαῖον γὰρ τὰς γενέσεις καὶ τὰς φθορὰς εἶναι μετὰ κινήσεως αὐτῶν)· ὅσοι δ' ἕνα <ἢ ἀεὶ> ἢ μὴ ἀεί, καὶ περὶ τῆς κινήσεως ὑποτίθενται κατὰ λόγον. εἰ δὴ ἐνδέχεταί ποτε μηδὲν κινεῖσθαι, διχῶς ἀνάγκη τοῦτο συμβαίνειν· ἢ γὰρ ὡς Ἀναξαγόρας λέγει (φησὶν γὰρ ἐκεῖνος, ὁμοῦ πάντων ὄντων καὶ ἠρεμούντων τὸν ἄπειρον χρόνον, κίνησιν ἐμποιῆσαι τὸν νοῦν καὶ διακρῖναι), ἢ ὡς Ἐμπεδοκλῆς ἐν μέρει κινεῖσθαι καὶ πάλιν ἠρεμεῖν, κινεῖσθαι μὲν ὅταν ἡ φιλία ἐκ πολλῶν ποιῇ τὸ ἓν ἢ τὸ νεῖκος πολλὰ ἐξ ἑνός, ἠρεμεῖν δ' ἐν τοῖς μεταξὺ χρόνοις, λέγων οὕτως ᾗ μὲν ἓν ἐκ πλεόνων μεμάθηκε φύεσθαι, ἠδὲ πάλιν διαφύντος ἑνὸς πλέον' ἐκτελέθουσιν, (251a.) τῇ μὲν γίγνονταί τε καὶ οὔ σφισιν ἔμπεδος αἰών· ᾗ δὲ τάδ' ἀλλάσσοντα διαμπερὲς οὐδαμὰ λήγει, ταύτῃ δ' αἰὲν ἔασιν ἀκίνητοι κατὰ κύκλον. τὸ γὰρ “ᾗ δὲ τάδ' ἀλλάσσοντα” ἐνθένδε ἐκεῖσε λέγειν αὐτὸν ὑποληπτέον. σκεπτέον δὴ περὶ τούτων πῶς ἔχει·

πρὸ ἔργου γὰρ οὐ μόνον πρὸς τὴν περὶ φύσεως θεωρίαν ἰδεῖν τὴν ἀλήθειαν, ἀλλὰ καὶ πρὸς τὴν μέθοδον τὴν περὶ τῆς ἀρχῆς τῆς πρώτης. ἀρξώμεθα δὲ πρῶτον ἐκ τῶν διωρισμένων ἡμῖν ἐν τοῖς φυσικοῖς πρότερον. φαμὲν δὴ τὴν κίνησιν εἶναι ἐνέργειαν τοῦ κινητοῦ ᾗ κινητόν. ἀναγκαῖον ἄρα ὑπάρχειν τὰ πράγματα τὰ δυνάμενα κινεῖσθαι καθ' ἑκάστην κίνησιν. καὶ χωρὶς δὲ τοῦ τῆς κινήσεως ὁρισμοῦ, πᾶς ἂν ὁμολογήσειεν ἀναγκαῖον εἶναι κινεῖσθαι τὸ δυνατὸν κινεῖσθαι καθ' ἑκάστην κίνησιν, οἷον ἀλλοιοῦσθαι μὲν τὸ ἀλλοιωτόν, φέρεσθαι δὲ τὸ κατὰ τόπον μεταβλητόν, ὥστε δεῖ πρότερον καυστὸν εἶναι πρὶν κάεσθαι καὶ καυστικὸν πρὶν κάειν. οὐκοῦν καὶ ταῦτα ἀναγκαῖον ἢ γενέσθαι ποτὲ οὐκ ὄντα ἢ ἀΐδια εἶναι. εἰ μὲν τοίνυν ἐγένετο τῶν κινητῶν ἕκαστον, ἀναγκαῖον πρότερον τῆς ληφθείσης ἄλλην γενέσθαι μεταβολὴν καὶ κίνησιν, καθ' ἣν ἐγένετο τὸ δυνατὸν κινηθῆναι ἢ κινῆσαι· εἰ δ' ὄντα προϋπῆρχεν ἀεὶ κινήσεως μὴ οὔσης, ἄλογον μὲν φαίνεται καὶ αὐτόθεν ἐπιστήσασιν, οὐ μὴν ἀλλὰ μᾶλλον ἔτι προάγουσι τοῦτο συμβαίνειν ἀναγκαῖον. εἰ γὰρ τῶν μὲν κινητῶν ὄντων τῶν δὲ κινητικῶν ὁτὲ μὲν ἔσται τι πρῶτον κινοῦν, τὸ δὲ κινούμενον, ὁτὲ δ’ οὐθέν, ἀλλ’ ἠρεμεῖ, ἀναγκαῖον τοῦτο μεταβάλ λειν πρότερον· ἦν γάρ τι αἴτιον τῆς ἠρεμίας· ἡ γὰρ ἠρέμησις στέρησις κινήσεως. ὥστε πρὸ τῆς πρώτης μεταβολῆς ἔσται μεταβολὴ προτέρα. τὰ μὲν γὰρ κινεῖ μοναχῶς, τὰ δὲ καὶ τὰς ἐναντίας κινήσεις, οἷον τὸ μὲν πῦρ θερμαίνει, ψύχει δ’ οὔ, ἡ δ’ ἐπιστήμη δοκεῖ τῶν ἐναντίων εἶναι μία. φαίνεται μὲν οὖν κἀκεῖ τι εἶναι ὁμοιότροπον· τὸ γὰρ ψυχρὸν θερμαίνει στραφέν πως καὶ ἀπελθόν, ὥσπερ καὶ ἁμαρτάνει ἑκὼν ὁ ἐπιστήμων, ὅταν ἀνάπαλιν χρήσηται τῇ ἐπι(251b.) στήμῃ. ἀλλ’ οὖν ὅσα γε δυνατὰ ποιεῖν καὶ πάσχειν ἢ κινεῖν, τὰ δὲ κινεῖσθαι, οὐ πάντως δυνατά ἐστιν, ἀλλ’ ὡδὶ ἔχοντα καὶ πλησιάζοντα ἀλλήλοις. ὥσθ’ ὅταν πλησιάσῃ, κινεῖ, τὸ δὲ κινεῖται, καὶ ὅταν ὑπάρξῃ ὡς ἦν τὸ μὲν κινητικὸν τὸ δὲ κινητόν. εἰ τοίνυν μὴ ἀεὶ ἐκινεῖτο, δῆλον ὡς οὐχ οὕτως εἶχον ὡς ἦν δυνάμενα τὸ μὲν κινεῖσθαι τὸ δὲ κινεῖν, ἀλλ’ ἔδει μεταβάλλειν θάτερον αὐτῶν· ἀνάγκη γὰρ ἐν τοῖς πρός τι τοῦτο συμβαίνειν, οἷον εἰ μὴ ὂν διπλάσιον νῦν διπλάσιον, μεταβάλλειν, εἰ μὴ ἀμφότερα, θάτερον. ἔσται ἄρα τις προτέρα μεταβολὴ τῆς πρώτης. πρὸς δὲ τούτοις τὸ πρότερον καὶ ὕστερον πῶς ἔσται χρόνου μὴ ὄντος; ἢ χρόνος μὴ οὔσης κινήσεως; εἰ δή ἐστιν ὁ χρόνος κινήσεως ἀριθμὸς ἢ κίνησίς τις, εἴπερ ἀεὶ χρόνος ἔστιν, ἀνάγκη καὶ κίνησιν ἀΐδιον εἶναι. ἀλλὰ μὴν περί γε χρόνου ἔξω ἑνὸς ὁμονοητικῶς ἔχοντες φαίνονται πάντες· ἀγένητον γὰρ εἶναι λέγουσιν. καὶ διὰ τούτου Δημόκριτός γε δείκνυσιν ὡς ἀδύνατον ἅπαντα γεγονέναι· τὸν γὰρ χρόνον ἀγένητον εἶναι. Πλάτων δὲ γεννᾷ μόνος· ἅμα μὲν γὰρ αὐτὸν τῷ οὐρανῷ [γεγονέναι], τὸν δ’ οὐρανὸν γεγονέναι φησίν. εἰ οὖν ἀδύνατόν ἐστιν καὶ εἶναι καὶ νοῆσαι χρόνον ἄνευ τοῦ νῦν, τὸ δὲ νῦν ἐστι μεσότης τις, καὶ ἀρχὴν καὶ τελευτὴν ἔχον ἅμα, ἀρχὴν μὲν τοῦ ἐσομένου χρόνου, τελευτὴν δὲ τοῦ παρελθόντος, ἀνάγκη ἀεὶ εἶναι χρόνον. τὸ γὰρ ἔσχατον τοῦ τελευταίου ληφθέντος χρόνου ἔν τινι τῶν νῦν ἔσται (οὐδὲν γὰρ ἔστι λαβεῖν ἐν τῷ χρόνῳ παρὰ τὸ νῦν), ὥστ’ ἐπεί ἐστιν ἀρχή τε καὶ τελευτὴ τὸ νῦν, ἀνάγκη αὐτοῦ ἐπ’ ἀμφότερα εἶναι ἀεὶ χρόνον. ἀλλὰ μὴν εἴ γε χρόνον, φανερὸν ὅτι ἀνάγκη εἶναι καὶ κίνησιν, εἴπερ ὁ χρόνος πάθος τι κινήσεως.

ὁ δ’ αὐτὸς λόγος καὶ περὶ τοῦ ἄφθαρτον εἶναι τὴν κίνησιν· καθάπερ γὰρ ἐπὶ τοῦ γενέσθαι κίνησιν συνέβαινεν προτέραν εἶναί τινα μεταβολὴν τῆς πρώ της, οὕτως ἐνταῦθα ὑστέραν τῆς τελευταίας· οὐ γὰρ ἅμα παύεται κινούμενον καὶ κινητὸν ὄν, οἷον καιόμενον καὶ καυστὸν ὄν (ἐνδέχεται γὰρ καυστὸν εἶναι μὴ καιόμενον), οὐδὲ (252a.) κινητικὸν καὶ κινοῦν. καὶ τὸ φθαρτικὸν δὴ δεήσει φθαρῆναι ὅταν φθείρῃ· καὶ τὸ τούτου φθαρτικὸν πάλιν ὕστερον· καὶ γὰρ ἡ φθορὰ μεταβολή τίς ἐστιν. εἰ δὴ ταῦτ᾽ ἀδύνατα, δῆλον ὡς ἔστιν ἀΐδιος κίνησις, ἀλλ᾽ οὐχ ὁτὲ μὲν ἦν ὁτὲ δ᾽ οὔ· καὶ γὰρ ἔοικε τὸ οὕτω λέγειν πλάσματι μᾶλλον.

ὁμοίως δὲ καὶ τὸ λέγειν ὅτι πέφυκεν οὕτως καὶ ταύτην δεῖ νομίζειν εἶναι ἀρχήν, ὅπερ ἔοικεν Ἐμπεδοκλῆς ἂν εἰπεῖν, ὡς τὸ κρατεῖν καὶ κινεῖν ἐν μέρει τὴν φιλίαν καὶ τὸ νεῖκος ὑπάρχει τοῖς πράγμασιν ἐξ ἀνάγκης, ἠρεμεῖν δὲ τὸν μεταξὺ χρόνον. τάχα δὲ καὶ οἱ μίαν ἀρχὴν ποιοῦντες, ὥσπερ Ἀναξαγόρας, οὕτως ἂν εἴποιεν. ἀλλὰ μὴν οὐδέν γε ἄτακτον τῶν φύσει καὶ κατὰ φύσιν· ἡ γὰρ φύσις αἰτία πᾶσιν τάξεως. τὸ δ᾽ ἄπειρον πρὸς τὸ ἄπειρον οὐδένα λόγον ἔχει· τάξις δὲ πᾶσα λόγος. τὸ δ᾽ ἄπειρον χρόνον ἠρεμεῖν, εἶτα κινηθῆναί ποτε, τούτου δὲ μηδεμίαν εἶναι διαφοράν, ὅτι νῦν μᾶλλον ἢ πρότερον, μηδ᾽ αὖ τινὰ τάξιν ἔχειν, οὐκέτι φύσεως ἔργον. ἢ γὰρ ἁπλῶς ἔχει τὸ φύσει, καὶ οὐχ ὁτὲ μὲν οὕτως ὁτὲ δ᾽ ἄλλως, οἷον τὸ πῦρ ἄνω φύσει φέρεται καὶ οὐχ ὁτὲ μὲν ὁτὲ δ᾽ οὔ· ἢ λόγον ἔχει τὸ μὴ ἁπλοῦν. διόπερ βέλτιον ὡς Ἐμπεδοκλῆς, κἂν εἴ τις ἕτερος εἴρηκεν οὕτως ἔχειν, ἐν μέρει τὸ πᾶν ἠρεμεῖν καὶ κινεῖσθαι πάλιν· τάξιν γὰρ ἤδη τιν᾽ ἔχει τὸ τοιοῦτον. ἀλλὰ καὶ τοῦτο δεῖ τὸν λέγοντα μὴ φάναι μόνον, ἀλλὰ καὶ τὴν αἰτίαν αὐτοῦ λέγειν, καὶ μὴ τίθεσθαι μηδὲν μηδ᾽ ἀξιοῦν ἀξίωμ᾽ ἄλογον, ἀλλ᾽ ἢ ἐπαγωγὴν ἢ ἀπόδειξιν φέρειν· αὐτὰ μὲν γὰρ οὐκ αἴτια τὰ ὑποτεθέντα, οὐδὲ τοῦτ᾽ ἦν τὸ φιλότητι ἢ νείκει εἶναι, ἀλλὰ τῆς μὲν τὸ συνάγειν, τοῦ δὲ τὸ διακρίνειν. εἰ δὲ προσοριεῖται τὸ ἐν μέρει, λεκτέον ἐφ᾽ ὧν οὕτως, ὥσπερ ὅτι ἔστιν τι ὃ συνάγει τοὺς ἀνθρώπους, ἡ φιλία, καὶ φεύγουσιν οἱ ἐχθροὶ ἀλλήλους· τοῦτο γὰρ ὑποτίθεται καὶ ἐν τῷ ὅλῳ εἶναι· φαίνεται γὰρ ἐπί τινων οὕτως. τὸ δὲ καὶ δι᾽ ἴσων χρόνων δεῖται λόγου τινός. ὅλως δὲ τὸ νομίζειν ἀρχὴν εἶναι ταύτην ἱκανήν, εἴ τι αἰεὶ ἢ ἔστιν οὕτως ἢ γίγνεται, οὐκ ὀρθῶς ἔχει ὑπολαβεῖν, ἐφ᾽ ὃ Δημόκριτος ἀνάγει τὰς περὶ φύσεως αἰτίας, ὡς οὕτω καὶ τὸ πρότερον ἐγίγνετο· τοῦ δὲ ἀεὶ οὐκ (252b.) ἀξιοῖ ἀρχὴν ζητεῖν, λέγων ἐπί τινων ὀρθῶς, ὅτι δ᾽ ἐπὶ πάντων, οὐκ ὀρθῶς. καὶ γὰρ τὸ τρίγωνον ἔχει δυσὶν ὀρθαῖς ἀεὶ τὰς γωνίας ἴσας, ἀλλ᾽ ὅμως ἐστίν τι τῆς ἀϊδιότητος ταύτης ἕτερον αἴτιον· τῶν μέντοι ἀρχῶν οὐκ ἔστιν ἕτερον αἴτιον ἀϊδίων οὐσῶν. ὅτι μὲν οὖν οὐδεὶς ἦν χρόνος οὐδ᾽ ἔσται ὅτε κίνησις οὐκ ἦν ἢ οὐκ ἔσται, εἰρήσθω τοσαῦτα.

Κεφάλαιο 2

Τὰ δὲ ἐναντία τούτοις οὐ χαλεπὸν λύειν. δόξειε δ’ ἂν ἐκ τῶν τοιῶνδε σκοποῦσιν ἐνδέχεσθαι μάλιστα κίνησιν εἶναί ποτε μὴ οὖσαν ὅλως,

πρῶτον μὲν ὅτι οὐδεμία ἀΐδιος μεταβολή· μεταβολὴ γὰρ ἅπασα πέφυκεν ἔκ τινος εἴς τι, ὥστε ἀνάγκη πάσης μεταβολῆς εἶναι πέρας τὰ ἐναντία ἐν οἷς γίγνεται, εἰς ἄπειρον δὲ κινεῖσθαι μηδέν.

ἔτι ὁρῶμεν ὅτι δυνατὸν κινηθῆναι μήτε κινούμενον μήτ’ ἔχον ἐν ἑαυτῷ μηδεμίαν κίνησιν, οἷον ἐπὶ τῶν ἀψύχων, ὧν οὔτε μέρος οὐδὲν οὔτε τὸ ὅλον κινούμενον ἀλλ’ ἠρεμοῦν κινεῖταί ποτε· προσῆκεν δὲ ἢ ἀεὶ κινεῖσθαι ἢ μηδέποτε, εἴπερ μὴ γίγνεται οὐκ οὖσα.

πολὺ δὲ μάλιστα τὸ τοιοῦτον ἐπὶ τῶν ἐμψύχων εἶναι φανερόν· οὐδεμιᾶς γὰρ ἐν ἡμῖν ἐνούσης κινήσεως ἐνίοτε, ἀλλ’ ἡσυχάζοντες ὅμως κινούμεθά ποτε, καὶ ἐγγίγνεται ἐν ἡμῖν ἐξ ἡμῶν αὐτῶν ἀρχὴ κινήσεως, κἂν μηθὲν ἔξωθεν κινήσῃ. τοῦτο γὰρ ἐπὶ τῶν ἀψύχων οὐχ ὁρῶμεν ὁμοίως, ἀλλ’ ἀεὶ κινεῖ τι αὐτὰ τῶν ἔξωθεν ἕτερον· τὸ δὲ ζῷον αὐτό φαμεν ἑαυτὸ κινεῖν. ὥστ’ εἴπερ ἠρεμεῖ ποτὲ πάμπαν, ἐν ἀκινήτῳ κίνησις ἂν γίγνοιτο ἐξ αὑτοῦ καὶ οὐκ ἔξωθεν. εἰ δ’ ἐν ζῴῳ τοῦτο δυνατὸν γενέσθαι, τί κωλύει τὸ αὐτὸ συμβῆναι καὶ κατὰ τὸ πᾶν; εἰ γὰρ ἐν μικρῷ κόσμῳ γίγνεται, καὶ ἐν μεγάλῳ· καὶ εἰ ἐν τῷ κόσμῳ, κἀν τῷ ἀπείρῳ, εἴπερ ἐνδέχεται κινεῖσθαι τὸ ἄπειρον καὶ ἠρεμεῖν ὅλον.

τούτων δὴ τὸ μὲν πρῶτον λεχθέν, τὸ μὴ τὴν αὐτὴν ἀεὶ καὶ μίαν τῷ ἀριθμῷ εἶναι τὴν κίνησιν τὴν εἰς τὰ ἀντικείμενα, ὀρθῶς λέγεται. τοῦτο μὲν γὰρ ἴσως ἀναγκαῖον, εἴπερ μὴ ἀεὶ μίαν καὶ τὴν αὐτὴν εἶναι δυνατὸν τὴν τοῦ αὐτοῦ καὶ ἑνὸς κίνησιν· λέγω δ’ οἷον πότερον τῆς μιᾶς χορδῆς εἷς καὶ ὁ αὐτὸς φθόγγος, ἢ ἀεὶ ἕτερος, ὁμοίως ἐχούσης καὶ κινουμένης. ἀλλ’ ὅμως ὁποτέρως ποτ’ ἔχει, οὐδὲν κωλύει τὴν αὐ(253a.) τὴν εἶναί τινα τῷ συνεχῆ εἶναι καὶ ἀΐδιον· δῆλον δ’ ἔσται μᾶλλον ἐκ τῶν ὕστερον.

τὸ δὲ κινεῖσθαι μὴ κινούμενον οὐδὲν ἄτοπον, ἂν ὁτὲ μὲν ᾖ τὸ κινῆσον ἔξωθεν, ὁτὲ δὲ μή. τοῦτο μέντοι πῶς ἂν εἴη, ζητητέον, λέγω δὲ ὥστε τὸ αὐτὸ ὑπὸ τοῦ αὐτοῦ κινητικοῦ ὄντος ὁτὲ μὲν κινεῖσθαι ὁτὲ δὲ μή· οὐδὲν γὰρ ἄλλ’ ἀπορεῖ ὁ τοῦτο λέγων ἢ διὰ τί οὐκ ἀεὶ τὰ μὲν ἠρεμεῖ τῶν ὄντων τὰ δὲ κινεῖται.

μάλιστα δ’ ἂν δόξειεν τὸ τρίτον ἔχειν ἀπορίαν, ὡς ἐγγιγνομένης οὐκ ἐνούσης πρότερον κινήσεως, τὸ συμβαῖνον ἐπὶ τῶν ἐμψύχων· ἠρεμοῦν γὰρ πρότερον μετὰ ταῦτα βαδίζει, κινήσαντος τῶν ἔξωθεν οὐδενός, ὡς δοκεῖ.

τοῦτο δ' ἐστὶ ψεῦδος. ὁρῶμεν γὰρ ἀεί τι κινούμενον ἐν τῷ ζῴῳ τῶν συμφύτων· τούτου δὲ τῆς κινήσεως οὐκ αὐτὸ τὸ ζῷον αἴτιον, ἀλλὰ τὸ περιέχον ἴσως. αὐτὸ δέ φαμεν αὐτὸ κινεῖν οὐ πᾶσαν κίνησιν, ἀλλὰ τὴν κατὰ τόπον. οὐδὲν οὖν κωλύει, μᾶλλον δ' ἴσως ἀναγκαῖον, ἐν μὲν τῷ σώματι πολλὰς ἐγγίγνεσθαι κινήσεις ὑπὸ τοῦ περιέχοντος, τούτων δ' ἐνίας τὴν διάνοιαν ἢ τὴν ὄρεξιν κινεῖν, ἐκείνην δὲ τὸ ὅλον ἤδη ζῷον κινεῖν, οἷον συμβαίνει περὶ τοὺς ὕπνους· αἰσθητικῆς μὲν γὰρ οὐδεμιᾶς ἐνούσης κινήσεως, ἐνούσης μέντοι τινός, ἐγείρεται τὰ ζῷα πάλιν. ἀλλὰ γὰρ φανερὸν ἔσται καὶ περὶ τούτων ἐκ τῶν ἑπομένων.

Κεφάλαιο 3

Ἀρχὴ δὲ τῆς σκέψεως ἥπερ καὶ περὶ τῆς λεχθείσης ἀπορίας, διὰ τί ποτε ἔνια τῶν ὄντων ὁτὲ μὲν κινεῖται ὁτὲ δὲ ἠρεμεῖ πάλιν. ἀνάγκη δὴ ἤτοι πάντα ἠρεμεῖν ἀεί, ἢ πάντα ἀεὶ κινεῖσθαι, ἢ τὰ μὲν κινεῖσθαι τὰ δ' ἠρεμεῖν, καὶ πάλιν τούτων ἤτοι τὰ μὲν κινούμενα κινεῖσθαι ἀεὶ τὰ δ' ἠρεμοῦντα ἠρεμεῖν, ἢ πάντα πεφυκέναι ὁμοίως κινεῖσθαι καὶ ἠρεμεῖν, ἢ τὸ λοιπὸν ἔτι καὶ τρίτον. ἐνδέχεται γὰρ τὰ μὲν ἀεὶ τῶν ὄντων ἀκίνητα εἶναι, τὰ δ' ἀεὶ κινούμενα, τὰ δ' ἀμφοτέρων μεταλαμβάνειν· ὅπερ ἡμῖν λεκτέον ἐστίν· τοῦτο γὰρ ἔχει λύσιν τε πάντων τῶν ἀπορουμένων, καὶ τέλος ἡμῖν ταύτης τῆς πραγματείας ἐστίν.

τὸ μὲν οὖν πάντ' ἠρεμεῖν, καὶ τούτου ζητεῖν λόγον ἀφέντας τὴν αἴσθησιν, ἀρρωστία τίς ἐστιν διανοίας, καὶ περὶ ὅλου τινὸς ἀλλ' οὐ περὶ μέρους ἀμφισβήτησις· οὐδὲ μόνον πρὸς τὸν φυσικόν, ἀλλὰ πρὸς πάσας τὰς (253b.) ἐπιστήμας ὡς εἰπεῖν καὶ πάσας τὰς δόξας διὰ τὸ κινήσει χρῆσθαι πάσας. ἔτι δ' αἱ περὶ τῶν ἀρχῶν ἐνστάσεις, ὥσπερ ἐν τοῖς περὶ τὰ μαθήματα λόγοις οὐδέν εἰσιν πρὸς τὸν μαθηματικόν, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, οὕτως οὐδὲ περὶ τοῦ νῦν ῥηθέντος πρὸς τὸν φυσικόν· ὑπόθεσις γὰρ ὅτι ἡ φύσις ἀρχὴ τῆς κινήσεως.

σχεδὸν δὲ καὶ τὸ φάναι κινεῖσθαι πάντα ψεῦδος μέν, ἧττον δὲ τούτου παρὰ τὴν μέθοδον· ἐτέθη μὲν γὰρ ἡ φύσις ἐν τοῖς φυσικοῖς ἀρχή, καθάπερ κινήσεως, καὶ ἠρεμίας, ὅμως δὲ φυσικὸν ἡ κίνησις· καί φασί τινες κινεῖσθαι τῶν ὄντων οὐ τὰ μὲν τὰ δ' οὔ, ἀλλὰ πάντα καὶ ἀεί, ἀλλὰ λανθάνειν τοῦτο τὴν ἡμετέραν αἴσθησιν· πρὸς οὓς καίπερ οὐ διορίζοντας ποίαν κίνησιν λέγουσιν, ἢ πάσας, οὐ χαλεπὸν ἀπαντῆσαι. οὔτε γὰρ αὐξάνεσθαι οὔτε φθίνειν οἷόν τε συνεχῶς, ἀλλ' ἔστι καὶ τὸ μέσον. ἔστι δ' ὅμοιος ὁ λόγος τῷ περὶ τοῦ τὸν σταλαγμὸν κατατρίβειν καὶ τὰ ἐκφυόμενα τοὺς λίθους διαιρεῖν· οὐ γὰρ εἰ τοσόνδε ἐξέωσεν ἢ ἀφεῖλεν ὁ σταλαγμός, καὶ τὸ ἥμισυ ἐν ἡμίσει χρόνῳ πρότερον· ἀλλ' ὥσπερ ἡ νεωλκία, καὶ οἱ σταλαγμοὶ οἱ τοσοιδὶ τοσονδὶ κινοῦσιν, τὸ δὲ μέρος αὐτῶν ἐν οὐδενὶ χρόνῳ τοσοῦτον. διαιρεῖται μὲν οὖν τὸ ἀφαιρεθὲν εἰς πλείω, ἀλλ' οὐδὲν αὐτῶν ἐκινήθη χωρίς, ἀλλ' ἅμα. φανερὸν οὖν ὡς οὐκ ἀναγκαῖον ἀεί τι ἀπιέναι, ὅτι διαιρεῖται ἡ φθίσις εἰς ἄπειρα, ἀλλ' ὅλον ποτὲ ἀπιέναι. ὁμοίως δὲ καὶ ἐπ' ἀλλοιώσεως ὁποιασοῦν· οὐ γὰρ εἰ μεριστὸν εἰς ἄπειρα τὸ ἀλλοιούμενον, διὰ τοῦτο καὶ ἡ ἀλλοίωσις, ἀλλ' ἀθρόα γίγνεται πολλάκις, ὥσπερ ἡ πῆξις. ἔτι ὅταν τι νοσήσῃ, ἀνάγκη χρόνον γενέσθαι ἐν ᾧ ὑγιασθήσεται, καὶ μὴ ἐν πέρατι χρόνου μεταβάλλειν· ἀνάγκη δὲ εἰς ὑγίειαν μεταβάλλειν καὶ μὴ εἰς ἄλλο μηθέν. ὥστε τὸ φάναι συνεχῶς ἀλλοιοῦσθαι λίαν ἐστὶ τοῖς φανεροῖς ἀμφισβητεῖν. εἰς τοὐναντίον γὰρ ἡ ἀλλοίωσις· ὁ δὲ λίθος οὔτε σκληρότερος γίγνεται οὔτε μαλακώτερος. κατά τε τὸ φέρεσθαι θαυμαστὸν εἰ λέληθεν ὁ λίθος κάτω φερόμενος ἢ μένων ἐπὶ τῆς γῆς. ἔτι δ' ἡ γῆ καὶ τῶν ἄλλων ἕκαστον ἐξ ἀνάγκης μένουσι μὲν ἐν τοῖς οἰκείοις τόποις, κινοῦνται δὲ βιαίως ἐκ τούτων· εἴπερ οὖν ἔνι' αὐτῶν ἐστιν ἐν τοῖς οἰκείοις τόποις, (254a.) ἀνάγκη μηδὲ κατὰ τόπον πάντα κινεῖσθαι. ὅτι μὲν οὖν ἀδύνατον ἢ ἀεὶ πάντα κινεῖσθαι ἢ ἀεὶ πάντα ἠρεμεῖν, ἐκ τούτων καὶ ἄλλων τοιούτων πιστεύσειεν ἄν τις.

ἀλλὰ μὴν οὐδὲ τὰ μὲν ἀεὶ ἐνδέχεται ἠρεμεῖν, τὰ δ' ἀεὶ κινεῖσθαι, ποτὲ δ' ἠρεμεῖν καὶ ποτὲ κινεῖσθαι μηδέν. λεκτέον δ' ὅτι ἀδύνατον, ὥσπερ ἐπὶ τῶν εἰρημένων πρότερον, καὶ ἐπὶ τούτων (ὁρῶμεν γὰρ ἐπὶ τῶν αὐτῶν γιγνομένας τὰς εἰρημένας μεταβολάς), καὶ πρὸς τούτοις ὅτι μάχεται τοῖς φανεροῖς ὁ ἀμφισβητῶν· οὔτε γὰρ αὔξησις οὔθ' ἡ βίαιος ἔσται κίνησις, εἰ μὴ κινήσεται παρὰ φύσιν ἠρεμοῦν πρότερον. γένεσιν οὖν ἀναιρεῖ καὶ φθορὰν οὗτος ὁ λόγος. σχεδὸν δὲ καὶ τὸ κινεῖσθαι γίγνεσθαί τι καὶ φθείρεσθαι δοκεῖ πᾶσιν· εἰς ὃ μὲν γὰρ μεταβάλλει, γίγνεται τοῦτο ἢ ἐν τούτῳ, ἐξ οὗ δὲ μεταβάλλει, φθείρεται τοῦτο ἢ ἐντεῦθεν. ὥστε δῆλον ὅτι τὰ μὲν κινεῖται, τὰ δ' ἠρεμεῖ ἐνίοτε.

τὸ δὲ πάντα ἀξιοῦν ὁτὲ μὲν ἠρεμεῖν ὁτὲ δὲ κινεῖσθαι, τοῦτ' ἤδη συναπτέον πρὸς τοὺς πάλαι λόγους. ἀρχὴν δὲ πάλιν ποιητέον ἀπὸ τῶν νῦν διορισθέντων, τὴν αὐτὴν ἥνπερ ἠρξάμεθα πρότερον. ἢ γάρ τοι πάντα ἠρεμεῖ, ἢ πάντα κινεῖται, ἢ τὰ μὲν ἠρεμεῖ τὰ δὲ κινεῖται τῶν ὄντων. καὶ εἰ τὰ μὲν ἠρεμεῖ τὰ δὲ κινεῖται, ἀνάγκη ἤτοι πάντα ὁτὲ μὲν ἠρεμεῖν ὁτὲ δὲ κινεῖσθαι, <ἢ τὰ μὲν ἀεὶ ἠρεμεῖν τὰ δὲ ἀεὶ κινεῖσθαι>, ἢ τὰ μὲν ἀεὶ ἠρεμεῖν τὰ δὲ ἀεὶ κινεῖσθαι αὐτῶν, τὰ δ' ὁτὲ μὲν ἠρεμεῖν ὁτὲ δὲ κινεῖσθαι. ὅτι μὲν τοίνυν οὐχ οἷόν τε πάντ' ἠρεμεῖν, εἴρηται μὲν καὶ πρότερον, εἴπωμεν δὲ καὶ νῦν. εἰ γὰρ καὶ κατ' ἀλήθειαν οὕτως ἔχει καθάπερ φασί τινες, εἶναι τὸ ὂν ἄπειρον καὶ ἀκίνητον, ἀλλ' οὔτι φαίνεταί γε κατὰ τὴν αἴσθησιν, ἀλλὰ κινεῖσθαι πολλὰ τῶν ὄντων. εἴπερ οὖν ἔστιν δόξα ψευδὴς ἢ ὅλως δόξα, καὶ κίνησις ἔστιν, κἂν εἰ φαντασία, κἂν εἰ ὁτὲ μὲν οὕτως δοκεῖ ὁτὲ δ' ἑτέρως· ἡ γὰρ φαντασία καὶ ἡ δόξα κινήσεις τινὲς εἶναι δοκοῦσιν. ἀλλὰ τὸ μὲν περὶ τούτου σκοπεῖν, καὶ ζητεῖν λόγον ὧν βέλτιον ἔχομεν ἢ λόγου δεῖσθαι, κακῶς κρίνειν ἐστὶν τὸ βέλτιον καὶ τὸ χεῖρον, καὶ τὸ πιστὸν καὶ τὸ μὴ πιστόν, καὶ ἀρχὴν καὶ μὴ ἀρχήν. ὁμοίως δὲ ἀδύνατον καὶ τὸ πάντα κινεῖσθαι, ἢ τὰ μὲν ἀεὶ κινεῖσθαι τὰ δ' ἀεὶ ἠρεμεῖν. πρὸς ἅπαντα γὰρ ταῦτα ἱκανὴ μία πίστις· (254b.) ὁρῶμεν γὰρ ἔνια ὁτὲ μὲν κινούμενα ὁτὲ δ’ ἠρεμοῦντα. ὥστε φανερὸν ὅτι ἀδύνατον ὁμοίως τὸ πάντα ἠρεμεῖν καὶ τὸ πάντα κινεῖσθαι συνεχῶς τῷ τὰ μὲν ἀεὶ κινεῖσθαι τὰ δ’ ἠρεμεῖν ἀεί. λοιπὸν οὖν θεωρῆσαι πότερον πάντα τοιαῦτα οἷα κινεῖσθαι καὶ ἠρεμεῖν, ἢ ἔνια μὲν οὕτως, ἔνια δ’ ἀεὶ ἠρεμεῖ, ἔνια δ’ ἀεὶ κινεῖται· τοῦτο γὰρ δεικτέον ἡμῖν.

Κεφάλαιο 4

Τῶν δὴ κινούντων καὶ κινουμένων τὰ μὲν κατὰ συμβεβηκὸς κινεῖ καὶ κινεῖται, τὰ δὲ καθ’ αὑτά, κατὰ συμβεβηκὸς μὲν οἷον ὅσα τε τῷ ὑπάρχειν τοῖς κινοῦσιν ἢ κινουμένοις καὶ τὰ κατὰ μόριον, τὰ δὲ καθ’ αὑτά, ὅσα μὴ τῷ ὑπάρχειν τῷ κινοῦντι ἢ τῷ κινουμένῳ, μηδὲ τῷ μόριόν τι αὐτῶν κινεῖν ἢ κινεῖσθαι.

τῶν δὲ καθ’ αὑτὰ τὰ μὲν ὑφ’ ἑαυτοῦ τὰ δ’ ὑπ’ ἄλλου, καὶ τὰ μὲν φύσει τὰ δὲ βίᾳ καὶ παρὰ φύσιν. τό τε γὰρ αὐτὸ ὑφ’ αὑτοῦ κινούμενον φύσει κινεῖται, οἷον ἕκαστον τῶν ζῴων (κινεῖται γὰρ τὸ ζῷον αὐτὸ ὑφ’ αὑτοῦ, ὅσων δ’ ἡ ἀρχὴ ἐν αὐτοῖς τῆς κινήσεως, ταῦτα φύσει φαμὲν κινεῖσθαι· διὸ τὸ μὲν ζῷον ὅλον φύσει αὐτὸ ἑαυτὸ κινεῖ, τὸ μέντοι σῶμα ἐνδέχεται καὶ φύσει καὶ παρὰ φύσιν κινεῖσθαι· διαφέρει γὰρ ὁποίαν τε ἂν κίνησιν κινούμενον τύχῃ καὶ ἐκ ποίου στοιχείου συνεστηκός), καὶ τῶν ὑπ’ ἄλλου κινουμένων τὰ μὲν φύσει κινεῖται τὰ δὲ παρὰ φύσιν, παρὰ φύσιν μὲν οἷον τὰ γεηρὰ ἄνω καὶ τὸ πῦρ κάτω, ἔτι δὲ τὰ μόρια τῶν ζῴων πολλάκις κινεῖται παρὰ φύσιν, παρὰ τὰς θέσεις καὶ τοὺς τρόπους τῆς κινήσεως. καὶ μάλιστα τὸ ὑπό τινος κινεῖσθαι τὸ κινούμενον ἐν τοῖς παρὰ φύσιν κινουμένοις ἐστὶ φανερὸν διὰ τὸ δῆλον εἶναι ὑπ’ ἄλλου κινούμενον. μετὰ δὲ τὰ παρὰ φύσιν τῶν κατὰ φύσιν τὰ αὐτὰ ὑφ’ αὑτῶν, οἷον τὰ ζῷα· οὐ γὰρ τοῦτ’ ἄδηλον, εἰ ὑπό τινος κινεῖται, ἀλλὰ πῶς δεῖ διαλαβεῖν αὐτοῦ τὸ κινοῦν καὶ τὸ κινούμενον· ἔοικεν γὰρ ὥσπερ ἐν τοῖς πλοίοις καὶ τοῖς μὴ φύσει συνισταμένοις, οὕτω καὶ ἐν τοῖς ζῴοις εἶναι διῃρημένον τὸ κινοῦν καὶ τὸ κινούμενον, καὶ οὕτω τὸ ἅπαν αὐτὸ αὑτὸ κινεῖν.

μάλιστα δ’ ἀπορεῖται τὸ λοιπὸν τῆς εἰρημένης τελευταίας διαιρέσεως· τῶν γὰρ ὑπ’ ἄλλου κινουμένων τὰ μὲν παρὰ φύσιν ἐθήκαμεν κινεῖσθαι, τὰ δὲ λείπεται ἀντιθεῖναι (255a.) ὅτι φύσει. ταῦτα δ’ ἐστὶν ἃ τὴν ἀπορίαν παράσχοι ἂν ὑπὸ τίνος κινεῖται, οἷον τὰ κοῦφα καὶ τὰ βαρέα. ταῦτα γὰρ εἰς μὲν τοὺς ἀντικειμένους τόπους βίᾳ κινεῖται, εἰς δὲ τοὺς οἰκείους, τὸ μὲν κοῦφον ἄνω τὸ δὲ βαρὺ κάτω, φύσει· τὸ δ’ ὑπὸ τίνος οὐκέτι φανερόν, ὥσπερ ὅταν κινῶνται παρὰ φύσιν. τό τε γὰρ αὐτὰ ὑφ’ αὑτῶν φάναι ἀδύνατον· ζωτικόν τε γὰρ τοῦτο καὶ τῶν ἐμψύχων ἴδιον, καὶ ἱστάναι ἂν ἐδύνατο αὐτὰ αὑτά (λέγω δ’ οἷον, εἰ τοῦ βαδίζειν αἴτιον αὑτῷ, καὶ τοῦ μὴ βαδίζειν), ὥστ’ εἰ ἐπ’ αὐτῷ τὸ ἄνω φέρεσθαι τῷ πυρί, δῆλον ὅτι ἐπ’ αὐτῷ καὶ τὸ κάτω. ἄλογον δὲ καὶ τὸ μίαν κίνησιν κινεῖσθαι μόνην ὑφ’ αὑτῶν, εἴγε αὐτὰ ἑαυτὰ κινοῦσιν. ἔτι πῶς ἐνδέχεται συνεχές τι καὶ συμφυὲς αὐτὸ ἑαυτὸ κινεῖν; ᾗ γὰρ ἓν καὶ συνεχὲς μὴ ἁφῇ, ταύτῃ ἀπαθές· ἀλλ’ ᾗ κεχώρισται, ταύτῃ τὸ μὲν πέφυκε ποιεῖν τὸ δὲ πάσχειν. οὔτ’ ἄρα τούτων οὐθὲν αὐτὸ ἑαυτὸ κινεῖ (συμφυῆ γάρ), οὔτ’ ἄλλο συνεχὲς οὐδέν, ἀλλ’ ἀνάγκη διῃρῆσθαι τὸ κινοῦν ἐν ἑκάστῳ πρὸς τὸ κινούμενον, οἷον ἐπὶ τῶν ἀψύχων ὁρῶμεν, ὅταν κινῇ τι τῶν ἐμψύχων. ἀλλὰ συμβαίνει καὶ ταῦτα ὑπό τινος ἀεὶ κινεῖσθαι· γένοιτο δ’ ἂν φανερὸν διαιροῦσι τὰς αἰτίας.

ἔστιν δὲ καὶ ἐπὶ τῶν κινούντων λαβεῖν τὰ εἰρημένα· τὰ μὲν γὰρ παρὰ φύσιν αὐτῶν κινητικά ἐστιν, οἷον ὁ μοχλὸς οὐ φύσει τοῦ βάρους κινητικός, τὰ δὲ φύσει, οἷον τὸ ἐνεργείᾳ θερμὸν κινητικὸν τοῦ δυνάμει θερμοῦ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων.

καὶ κινητὸν δ’ ὡσαύτως φύσει τὸ δυνάμει ποιὸν ἢ ποσὸν ἢ πού, ὅταν ἔχῃ τὴν ἀρχὴν τὴν τοιαύτην ἐν αὑτῷ καὶ μὴ κατὰ συμβεβηκός (εἴη γὰρ ἂν τὸ αὐτὸ καὶ ποιὸν καὶ ποσόν, ἀλλὰ θατέρῳ θάτερον συμβέβηκεν καὶ οὐ καθ’ αὑτὸ ὑπάρχει). τὸ δὴ πῦρ καὶ ἡ γῆ κινοῦνται ὑπό τινος βίᾳ μὲν ὅταν παρὰ φύσιν, φύσει δ’ ὅταν εἰς τὰς αὑτῶν ἐνεργείας δυνάμει ὄντα. ἐπεὶ δὲ τὸ δυνάμει πλεοναχῶς λέγεται, τοῦτ’ αἴτιον τοῦ μὴ φανερὸν εἶναι ὑπὸ τίνος τὰ τοιαῦτα κινεῖται, οἷον τὸ πῦρ ἄνω καὶ ἡ γῆ κάτω. ἔστι δὲ δυνάμει ἄλλως ὁ μανθάνων ἐπιστήμων καὶ ὁ ἔχων ἤδη καὶ μὴ ἐνεργῶν. ἀεὶ δ’, ὅταν ἅμα τὸ ποιητικὸν καὶ τὸ παθητικὸν ὦσιν, γίγνεται ἐνεργείᾳ τὸ δυ(255b.) νατόν, οἷον τὸ μανθάνον ἐκ δυνάμει ὄντος ἕτερον γίγνεται δυνάμει (ὁ γὰρ ἔχων ἐπιστήμην μὴ θεωρῶν δὲ δυνάμει ἐστὶν ἐπιστήμων πως, ἀλλ’ οὐχ ὡς καὶ πρὶν μαθεῖν), ὅταν δ’ οὕτως ἔχῃ, ἐάν τι μὴ κωλύῃ, ἐνεργεῖ καὶ θεωρεῖ, ἢ ἔσται ἐν τῇ ἀντιφάσει καὶ ἐν ἀγνοίᾳ. ὁμοίως δὲ ταῦτ’ ἔχει καὶ ἐπὶ τῶν φυσικῶν· τὸ γὰρ ψυχρὸν δυνάμει θερμόν, ὅταν δὲ μεταβάλῃ, ἤδη πῦρ, καίει δέ, ἂν μή τι κωλύῃ καὶ ἐμποδίζῃ. ὁμοίως δ’ ἔχει καὶ περὶ τὸ βαρὺ καὶ κοῦφον· τὸ γὰρ κοῦφον γίγνεται ἐκ βαρέος, οἷον ἐξ ὕδατος ἀήρ (τοῦτο γὰρ δυνάμει πρῶτον), καὶ ἤδη κοῦφον, καὶ ἐνεργήσει γ’ εὐθύς, ἂν μή τι κωλύῃ. ἐνέργεια δὲ τοῦ κούφου τὸ ποὺ εἶναι καὶ ἄνω, κωλύεται δ’, ὅταν ἐν τῷ ἐναντίῳ τόπῳ ᾖ. καὶ τοῦθ’ ὁμοίως ἔχει καὶ ἐπὶ τοῦ ποσοῦ καὶ ἐπὶ τοῦ ποιοῦ. καίτοι τοῦτο ζητεῖται, διὰ τί ποτε κινεῖται εἰς τὸν αὑτῶν τόπον τὰ κοῦφα καὶ τὰ βαρέα. αἴτιον δ’ ὅτι πέφυκέν ποι, καὶ τοῦτ’ ἔστιν τὸ κούφῳ καὶ βαρεῖ εἶναι, τὸ μὲν τῷ ἄνω τὸ δὲ τῷ κάτω διωρισμένον. δυνάμει δ’ ἐστὶν κοῦφον καὶ βαρὺ πολλαχῶς, ὥσπερ εἴρηται· ὅταν τε γὰρ ᾖ ὕδωρ, δυνάμει γέ πώς ἐστι κοῦφον, καὶ ὅταν ἀήρ, ἔστιν ὡς ἔτι δυνάμει (ἐνδέχεται γὰρ ἐμποδιζόμενον μὴ ἄνω εἶναι)· ἀλλ’ ἐὰν ἀφαιρεθῇ τὸ ἐμποδίζον, ἐνεργεῖ καὶ ἀεὶ ἀνωτέρω γίγνεται. ὁμοίως δὲ καὶ τὸ ποιὸν εἰς τὸ ἐνεργείᾳ εἶναι μεταβάλλει· εὐθὺς γὰρ θεωρεῖ τὸ ἐπιστῆμον, ἐὰν μή τι κωλύῃ· καὶ τὸ ποσὸν ἐκτείνεται, ἐὰν μή τι κωλύῃ. ὁ δὲ τὸ ὑφιστάμενον καὶ κωλῦον κινήσας ἔστιν ὡς κινεῖ ἔστι δ’ ὡς οὔ, οἷον ὁ τὸν κίονα ὑποσπάσας ἢ ὁ τὸν λίθον ἀφελὼν ἀπὸ τοῦ ἀσκοῦ ἐν τῷ ὕδατι· κατὰ συμβεβηκὸς γὰρ κινεῖ, ὥσπερ καὶ ἡ ἀνακλασθεῖσα σφαῖρα οὐχ ὑπὸ τοῦ τοίχου ἐκινήθη ἀλλ’ ὑπὸ τοῦ βάλλοντος. ὅτι μὲν τοίνυν οὐδὲν τούτων αὐτὸ κινεῖ ἑαυτό, δῆλον· ἀλλὰ κινήσεως ἀρχὴν ἔχει, οὐ τοῦ κινεῖν οὐδὲ τοῦ ποιεῖν, ἀλλὰ τοῦ πάσχειν.

εἰ δὴ πάντα τὰ κινούμενα ἢ φύσει κινεῖται ἢ παρὰ φύσιν καὶ βίᾳ, καὶ τά τε βίᾳ καὶ παρὰ φύσιν πάντα ὑπό τινος καὶ ὑπ’ ἄλλου, τῶν δὲ φύσει πάλιν τά θ’ ὑφ’ αὑτῶν κινούμενα ὑπό τινος κινεῖται καὶ τὰ μὴ ὑφ’ αὑτῶν, οἷον τὰ κοῦφα καὶ τὰ βαρέα (256a.) (ἢ γὰρ ὑπὸ τοῦ γεννήσαντος καὶ ποιήσαντος κοῦφον ἢ βαρύ, ἢ ὑπὸ τοῦ τὰ ἐμποδίζοντα καὶ κωλύοντα λύσαντος), ἅπαντα ἂν τὰ κινούμενα ὑπό τινος κινοῖτο.

Κεφάλαιο 5

Τοῦτο δὲ διχῶς· ἢ γὰρ οὐ δι’ αὑτὸ τὸ κινοῦν, ἀλλὰ δι’ ἕτερον ὃ κινεῖ τὸ κινοῦν, ἢ δι’ αὑτό, καὶ τοῦτο ἢ πρῶτον μετὰ τὸ ἔσχατον ἢ διὰ πλειόνων, οἷον ἡ βακτηρία κινεῖ τὸν λίθον καὶ κινεῖται ὑπὸ τῆς χειρὸς κινουμένης ὑπὸ τοῦ ἀνθρώπου, οὗτος δ’ οὐκέτι τῷ ὑπ’ ἄλλου κινεῖσθαι. ἄμφω δὴ κινεῖν φαμέν, καὶ τὸ τελευταῖον καὶ τὸ πρῶτον τῶν κινούντων, ἀλλὰ μᾶλλον τὸ πρῶτον· ἐκεῖνο γὰρ κινεῖ τὸ τελευ ταῖον, ἀλλ’ οὐ τοῦτο τὸ πρῶτον, καὶ ἄνευ μὲν τοῦ πρώτου τὸ τελευταῖον οὐ κινήσει, ἐκεῖνο δ’ ἄνευ τούτου, οἷον ἡ βακτηρία οὐ κινήσει μὴ κινοῦντος τοῦ ἀνθρώπου. εἰ δὴ ἀνάγκη πᾶν τὸ κινούμενον ὑπό τινός τε κινεῖσθαι, καὶ ἢ ὑπὸ κινουμένου ὑπ’ ἄλλου ἢ μή, καὶ εἰ μὲν ὑπ’ ἄλλου [κινουμένου], ἀνάγκη τι εἶναι κινοῦν ὃ οὐχ ὑπ’ ἄλλου πρῶτον, εἰ δὲ τοιοῦτο τὸ πρῶτον, οὐκ ἀνάγκη θάτερον (ἀδύνατον γὰρ εἰς ἄπειρον ἰέναι τὸ κινοῦν καὶ κινούμενον ὑπ’ ἄλλου αὐτό· τῶν γὰρ ἀπείρων οὐκ ἔστιν οὐδὲν πρῶτον) — εἰ οὖν ἅπαν μὲν τὸ κινούμενον ὑπό τινος κινεῖται, τὸ δὲ πρῶτον κινοῦν κινεῖται μέν, οὐχ ὑπ’ ἄλλου δέ, ἀνάγκη αὐτὸ ὑφ’ αὑτοῦ κινεῖσθαι.

ἔτι δὲ καὶ ὧδε τὸν αὐτὸν τοῦτον λόγον ἔστιν ἐπελθεῖν. πᾶν γὰρ τὸ κινοῦν τί τε κινεῖ καὶ τινί. ἢ γὰρ αὑτῷ κινεῖ τὸ κινοῦν ἢ ἄλλῳ, οἷον ἄνθρωπος ἢ αὐτὸς ἢ τῇ βακτηρίᾳ, καὶ ὁ ἄνεμος κατέβαλεν ἢ αὐτὸς ἢ ὁ λίθος ὃν ἔωσεν. ἀδύνατον δὲ κινεῖν ἄνευ τοῦ αὐτὸ αὑτῷ κινοῦντος τὸ ᾧ κινεῖ· ἀλλ’ εἰ μὲν αὐτὸ αὑτῷ κινεῖ, οὐκ ἀνάγκη ἄλλο εἶναι ᾧ κινεῖ, ἂν δὲ ᾖ ἕτερον τὸ ᾧ κινεῖ, ἔστιν τι ὃ κινήσει οὐ τινὶ ἀλλ’ αὑτῷ, ἢ εἰς ἄπειρον εἶσιν. εἰ οὖν κινούμενόν τι κινεῖ, ἀνάγκη στῆναι καὶ μὴ εἰς ἄπειρον ἰέναι· εἰ γὰρ ἡ βακτηρία κινεῖ τῷ κινεῖσθαι ὑπὸ τῆς χειρός, ἡ χεὶρ κινεῖ τὴν βακτηρίαν· εἰ δὲ καὶ ταύτῃ ἄλλο κινεῖ, καὶ ταύτην ἕτερόν τι τὸ κινοῦν. ὅταν δή τινι κινῇ ἀεὶ ἕτερον, ἀνάγκη εἶναι πρότερον τὸ αὐτὸ αὑτῷ κινοῦν. εἰ οὖν κινεῖται μὲν τοῦτο, μὴ ἄλλο δὲ τὸ κινοῦν αὐτό, ἀνάγκη αὐτὸ αὑτὸ (256b.) κινεῖν· ὥστε καὶ κατὰ τοῦτον τὸν λόγον ἤτοι εὐθὺς τὸ κινούμενον ὑπὸ τοῦ αὐτὸ κινοῦντος κινεῖται, ἢ ἔρχεταί ποτε εἰς τὸ τοιοῦτον.

πρὸς δὲ τοῖς εἰρημένοις καὶ ὧδε σκοποῦσι ταὐτὰ συμβήσεται ταῦτα. εἰ γὰρ ὑπὸ κινουμένου κινεῖται τὸ κινούμενον πᾶν, ἤτοι τοῦτο ὑπάρχει τοῖς πράγμασιν κατὰ συμ βεβηκός, ὥστε κινεῖν μὲν κινούμενον, οὐ μέντοι διὰ τὸ κινεῖσθαι αὐτό, ἢ οὔ, ἀλλὰ καθ’ αὑτό. πρῶτον μὲν οὖν εἰ κατὰ συμβεβηκός, οὐκ ἀνάγκη κινεῖσθαι τὸ κινοῦν. εἰ δὲ τοῦτο, δῆλον ὡς ἐνδέχεταί ποτε μηδὲν κινεῖσθαι τῶν ὄντων· οὐ γὰρ ἀναγκαῖον τὸ συμβεβηκός, ἀλλ’ ἐνδεχόμενον μὴ εἶναι. ἐὰν οὖν θῶμεν τὸ δυνατὸν εἶναι, οὐδὲν ἀδύνατον συμβήσεται, ψεῦδος δ’ ἴσως. ἀλλὰ τὸ κίνησιν μὴ εἶναι ἀδύνατον· δέδεικται γὰρ πρότερον ὅτι ἀνάγκη κίνησιν ἀεὶ εἶναι.

καὶ εὐλόγως δὲ τοῦτο συμβέβηκεν. τρία γὰρ ἀνάγκη εἶναι, τό τε κινούμενον καὶ τὸ κινοῦν καὶ τὸ ᾧ κινεῖ. τὸ μὲν οὖν κινούμενον ἀνάγκη κινεῖσθαι, κινεῖν δ’ οὐκ ἀνάγκη· τὸ δ’ ᾧ κινεῖ, καὶ κινεῖν καὶ κινεῖσθαι (συμμεταβάλλει γὰρ τοῦτο ἅμα καὶ κατὰ τὸ αὐτὸ τῷ κινουμένῳ ὄν· δῆλον δ’ ἐπὶ τῶν κατὰ τόπον κινούντων· ἅπτεσθαι γὰρ ἀλλήλων ἀνάγκη μέχρι τινός)· τὸ δὲ κινοῦν οὕτως ὥστ’ εἶναι μὴ ᾧ κινεῖ, ἀκίνητον. ἐπεὶ δ’ ὁρῶμεν τὸ ἔσχατον, ὃ κινεῖσθαι μὲν δύναται, κινήσεως δ’ ἀρχὴν οὐκ ἔχει, καὶ ὃ κινεῖται μέν, οὐχ ὑπ’ ἄλλου δὲ ἀλλ’ ὑφ’ αὑτοῦ, εὔλογον, ἵνα μὴ ἀναγκαῖον εἴπωμεν, καὶ τὸ τρίτον εἶναι ὃ κινεῖ ἀκίνητον ὄν. διὸ καὶ Ἀναξαγόρας ὀρθῶς λέγει, τὸν νοῦν ἀπαθῆ φάσκων καὶ ἀμιγῆ εἶναι, ἐπειδή γε κινήσεως ἀρχὴν αὐτὸν εἶναι ποιεῖ· οὕτω γὰρ μόνως ἂν κινοίη ἀκίνητος ὢν καὶ κρατοίη ἀμιγὴς ὤν.

ἀλλὰ μὴν εἰ μὴ κατὰ συμβεβηκὸς ἀλλ’ ἐξ ἀνάγκης κινεῖται τὸ κινοῦν, εἰ δὲ μὴ κινοῖτο, οὐκ ἂν κινοίη, ἀνάγκη τὸ κινοῦν, ᾗ κινεῖται, ἤτοι οὕτω κινεῖσθαι ὥς γε κατὰ τὸ αὐτὸ εἶδος τῆς κινήσεως, ἢ καθ’ ἕτερον. λέγω δ’ ἤτοι τὸ θερμαῖνον καὶ αὐτὸ θερμαίνεσθαι καὶ τὸ ὑγιάζον ὑγιάζεσθαι καὶ τὸ φέρον φέρεσθαι, ἢ τὸ ὑγιάζον φέρεσθαι, τὸ δὲ φέρον αὐξάνεσθαι. ἀλλὰ φανερὸν ὅτι ἀδύνατον· δεῖ γὰρ μέχρι (257a.) τῶν ἀτόμων διαιροῦντα λέγειν, οἷον εἴ τι διδάσκει γεωμετρεῖν, τοῦτο διδάσκεσθαι γεωμετρεῖν τὸ αὐτό, ἢ εἰ ῥιπτεῖ, ῥιπτεῖσθαι τὸν αὐτὸν τρόπον τῆς ῥίψεως· ἢ οὕτως μὲν μή, ἄλλο δ’ ἐξ ἄλλου γένους, οἷον τὸ φέρον μὲν αὐξάνεσθαι, τὸ δὲ τοῦτο αὖξον ἀλλοιοῦσθαι ὑπ’ ἄλλου, τὸ δὲ τοῦτο ἀλλοιοῦν ἑτέραν τινὰ κινεῖσθαι κίνησιν. ἀλλ’ ἀνάγκη στῆναι· πεπερασμέναι γὰρ αἱ κινήσεις. τὸ δὲ πάλιν ἀνακάμπτειν καὶ τὸ ἀλλοιοῦν φάναι φέρεσθαι τὸ αὐτὸ ποιεῖν ἐστὶ κἂν εἰ εὐθὺς ἔφη τὸ φέρον φέρεσθαι καὶ διδάσκεσθαι τὸ διδάσκον (δῆλον γὰρ ὅτι κινεῖται καὶ ὑπὸ τοῦ ἀνωτέρω κινοῦντος τὸ κινούμενον πᾶν, καὶ μᾶλλον ὑπὸ τοῦ προτέρου τῶν κινούντων). ἀλλὰ μὴν τοῦτό γε ἀδύνατον· τὸ διδάσκον γὰρ συμβαίνει μανθάνειν, ὧν τὸ μὲν μὴ ἔχειν τὸ δὲ ἔχειν ἐπιστήμην ἀναγκαῖον. ἔτι δὲ μᾶλλον τούτων ἄλογον, ὅτι συμβαίνει πᾶν τὸ κινητικὸν κινητόν, εἴπερ ἅπαν ὑπὸ κινουμένου κινεῖται τὸ κινούμενον· ἔσται γὰρ κινητόν, ὥσπερ εἴ τις λέγοι πᾶν τὸ ὑγιαστικὸν [καὶ ὑγιάζον] ὑγιαστὸν εἶναι, καὶ τὸ οἰκοδομητικὸν οἰκοδομητόν, ἢ εὐθὺς ἢ διὰ πλειόνων· λέγω δ’ οἷον εἰ κινητὸν μὲν ὑπ’ ἄλλου πᾶν τὸ κινητικόν, ἀλλ’ οὐ ταύτην τὴν κίνησιν κινητὸν ἣν κινεῖ τὸ πλησίον, ἀλλ’ ἑτέραν, οἷον τὸ ὑγιαστικὸν μαθητικόν, ἀλλὰ τοῦτο ἐπαναβαῖνον ἥξει ποτὲ εἰς τὸ αὐτὸ εἶδος, ὥσπερ εἴπομεν πρότερον. τὸ μὲν οὖν τούτων ἀδύνατον, τὸ δὲ πλασματῶδες· ἄτοπον γὰρ τὸ ἐξ ἀνάγκης τὸ ἀλλοιωτικὸν αὐξητὸν εἶναι. οὐκ ἄρα ἀνάγκη ἀεὶ κινεῖσθαι τὸ κινούμενον ὑπ’ ἄλλου, καὶ τούτου κινουμένου· στήσεται ἄρα. ὥστε ἤτοι ὑπὸ ἠρεμοῦντος κινήσεται τὸ κινούμενον πρῶτον, ἢ αὐτὸ ἑαυτὸ κινήσει. ἀλλὰ μὴν καὶ εἴ γε δέοι σκοπεῖν πότερον αἴτιον κινήσεως καὶ ἀρχὴ τὸ αὐτὸ αὑτὸ κινοῦν ἢ τὸ ὑπ’ ἄλλου κινούμενον, ἐκεῖνο πᾶς ἂν θείη· τὸ γὰρ αὐτὸ καθ’ αὑτὸ ὂν ἀεὶ πρότερον αἴτιον τοῦ καθ’ ἕτερον καὶ αὐτοῦ ὄντος. ὥστε τοῦτο σκεπτέον λαβοῦσιν ἄλλην ἀρχήν, εἴ τι κινεῖ αὐτὸ αὑτό, πῶς κινεῖ καὶ τίνα τρόπον. ἀναγκαῖον δὴ τὸ κινούμενον ἅπαν εἶναι διαιρετὸν εἰς ἀεὶ διαιρετά· τοῦτο γὰρ δέδεικται πρότερον ἐν τοῖς (257b.) καθόλου τοῖς περὶ φύσεως, ὅτι πᾶν τὸ καθ’ αὑτὸ κινούμενον συνεχές. ἀδύνατον δὴ τὸ αὐτὸ αὑτὸ κινοῦν πάντῃ κινεῖν αὐτὸ αὑτό· φέροιτο γὰρ ἂν ὅλον καὶ φέροι τὴν αὐτὴν φοράν, ἓν ὂν καὶ ἄτομον τῷ εἴδει, καὶ ἀλλοιοῖτο καὶ ἀλλοιοῖ, ὥστε διδάσκοι ἂν καὶ μανθάνοι ἅμα, καὶ ὑγιάζοι καὶ ὑγιάζοιτο τὴν αὐτὴν ὑγίειαν. ἔτι διώρισται ὅτι κινεῖται τὸ κινητόν· τοῦτο δ’ ἐστὶν δυνάμει κινούμενον, οὐκ ἐντελεχείᾳ, τὸ δὲ δυνάμει εἰς ἐντελέχειαν βαδίζει, ἔστιν δ’ ἡ κίνησις ἐντελέχεια κινητοῦ ἀτελής. τὸ δὲ κινοῦν ἤδη ἐνεργείᾳ ἔστιν, οἷον θερμαίνει τὸ θερμὸν καὶ ὅλως γεννᾷ τὸ ἔχον τὸ εἶδος. ὥσθ’ ἅμα τὸ αὐτὸ κατὰ τὸ αὐτὸ θερμὸν ἔσται καὶ οὐ θερμόν. ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον, ὅσων τὸ κινοῦν ἀνάγκη ἔχειν τὸ συνώνυμον. τὸ μὲν ἄρα κινεῖ τὸ δὲ κινεῖται τοῦ αὐτὸ αὑτὸ κινοῦντος. ὅτι δ’ οὐκ ἔστιν αὐτὸ αὑτὸ κινοῦν οὕτως ὥσθ’ ἑκάτερον ὑφ’ ἑκατέρου κινεῖσθαι, ἐκ τῶνδε φανερόν. οὔτε γὰρ ἔσται πρῶτον κινοῦν οὐδέν, εἴ γε αὐτὸ ἑαυτὸ κινήσει ἑκάτερον (τὸ γὰρ πρότερον αἰτιώτερον τοῦ κινεῖσθαι τοῦ ἐχομένου καὶ κινήσει μᾶλλον· διχῶς γὰρ κινεῖν ἦν, τὸ μὲν τὸ ὑπ’ ἄλλου κινούμενον αὐτό, τὸ δ’ αὑτῷ· ἐγγύτερον δὲ τὸ πορρώτερον τοῦ κινουμένου τῆς ἀρχῆς ἢ τὸ μεταξύ)· ἔτι οὐκ ἀνάγκη τὸ κινοῦν κινεῖσθαι εἰ μὴ ὑφ’ αὑτοῦ· κατὰ συμβεβηκὸς ἄρα ἀντικινεῖ θάτερον. ἔλαβον τοίνυν ἐνδέχεσθαι μὴ κινεῖν· ἔστιν ἄρα τὸ μὲν κινούμενον τὸ δὲ κινοῦν ἀκίνητον. ἔτι οὐκ ἀνάγκη τὸ κινοῦν ἀντικινεῖσθαι, ἀλλ’ ἢ ἀκίνητόν γέ τι κινεῖν ἀνάγκη ἢ αὐτὸ ὑφ’ αὑτοῦ κινούμενον, εἴπερ ἀνάγκη ἀεὶ κίνησιν εἶναι. ἔτι ἣν κινεῖ κίνησιν, κινοῖτ’ ἄν, ὥστε τὸ θερμαῖνον θερμαίνεται. ἀλλὰ μὴν οὐδὲ τοῦ πρώτως αὐτὸ αὑτὸ κινοῦντος οὔτε ἓν μόριον οὔτε πλείω κινήσει αὐτὸ αὑτὸ ἕκαστον. τὸ γὰρ ὅλον εἰ κινεῖται αὐτὸ ὑφ’ αὑτοῦ, ἤτοι ὑπὸ τῶν αὑτοῦ τινὸς κινήσεται ἢ ἢ ὅλον ὑφ’ ὅλου. εἰ μὲν οὖν τῷ κινεῖσθαί τι μόριον αὐτὸ ὑφ’ αὑτοῦ, τοῦτ’ ἂν εἴη τὸ πρῶτον αὐτὸ αὑτὸ κινοῦν (χωρισθὲν γὰρ τοῦτο μὲν κινήσει αὐτὸ αὑτό, τὸ δὲ ὅλον οὐκέτι)· εἰ δὲ ὅλον ὑφ’ ὅλου κινεῖται, κατὰ συμβεβηκὸς ἂν ταῦτα κινοῖ αὐτὰ ἑαυτά. ὥστε εἰ μὴ ἀναγκαῖον, εἰλήφθω μὴ κινούμενα (258a.) ὑφ’ αὑτῶν. τῆς ὅλης ἄρα τὸ μὲν κινήσει ἀκίνητον ὂν τὸ δὲ κινηθήσεται· μόνως γὰρ οὕτως οἷόν τέ τι αὐτοκίνητον εἶναι. ἔτι εἴπερ ἡ ὅλη αὐτὴ αὑτὴν κινεῖ, τὸ μὲν κινήσει αὐτῆς, τὸ δὲ κινήσεται. ἡ ἄρα ΑΒ ὑφ’ αὑτῆς τε κινηθήσεται καὶ ὑπὸ τῆς Α. ἐπεὶ δὲ κινεῖ τὸ μὲν κινούμενον ὑπ’ ἄλλου τὸ δ’ ἀκίνη τον ὄν, καὶ κινεῖται τὸ μὲν κινοῦν τὸ δὲ οὐδὲν κινοῦν, τὸ αὐτὸ αὑτὸ κινοῦν ἀνάγκη ἐξ ἀκινήτου εἶναι κινοῦντος δέ, καὶ ἔτι ἐκ κινουμένου μὴ κινοῦντος δ’ ἐξ ἀνάγκης, ἀλλ’ ὁπότερ’ ἔτυχεν. ἔστω γὰρ τὸ Α κινοῦν μὲν ἀκίνητον δέ, τὸ δὲ Β κινούμενόν τε ὑπὸ τοῦ Α καὶ κινοῦν τὸ ἐφ’ ᾧ Γ, τοῦτο δὲ κινούμενον μὲν ὑπὸ τοῦ Β, μὴ κινοῦν δὲ μηδέν· εἴπερ γὰρ καὶ διὰ πλειόνων ἥξει ποτὲ εἰς τὸ Γ, ἔστω δι’ ἑνὸς μόνου. τὸ δὴ ἅπαν ΑΒΓ αὐτὸ ἑαυτὸ κινεῖ. ἀλλ’ ἐὰν ἀφέλω τὸ Γ, τὸ μὲν ΑΒ κινήσει αὐτὸ ἑαυτό, τὸ μὲν Α κινοῦν τὸ δὲ Β κινούμενον, τὸ δὲ Γ οὐ κινήσει αὐτὸ ἑαυτό, οὐδ’ ὅλως κινήσεται. ἀλλὰ μὴν οὐδ’ ἡ ΒΓ κινήσει αὐτὴ ἑαυτὴν ἄνευ τοῦ Α· τὸ γὰρ Β κινεῖ τῷ κινεῖσθαι ὑπ’ ἄλλου, οὐ τῷ ὑφ’ αὑτοῦ τινὸς μέρους. τὸ ἄρα ΑΒ μόνον αὐτὸ ἑαυτὸ κινεῖ. ἀνάγκη ἄρα τὸ αὐτὸ ἑαυτὸ κινοῦν ἔχειν τὸ κινοῦν ἀκίνητον δέ, καὶ τὸ κινούμενον μηδὲν δὲ κινοῦν ἐξ ἀνάγκης, ἁπτόμενα ἤτοι ἄμφω ἀλλήλων ἢ θατέρου θάτερον. εἰ μὲν οὖν συνεχές ἐστι τὸ κινοῦν (τὸ μὲν γὰρ κινούμενον ἀναγκαῖον εἶναι συνεχές), ἅψεται ἑκάτερον ἑκατέρου. δῆλον δὴ ὅτι τὸ πᾶν αὐτὸ ἑαυτὸ κινεῖ οὐ τῷ αὑτοῦ τι εἶναι τοιοῦτον οἷον αὐτὸ αὑτὸ κινεῖν, ἀλλ’ ὅλον κινεῖ αὐτὸ ἑαυτό, κινούμενόν τε καὶ κινοῦν τῷ αὑτοῦ τι εἶναι τὸ κινοῦν καὶ τὸ κινούμενον. οὐ γὰρ ὅλον κι νεῖ οὐδ’ ὅλον κινεῖται, ἀλλὰ κινεῖ μὲν ἡ τὸ Α, κινεῖται δὲ ἡ τὸ Β μόνον [τὸ δὲ Γ ὑπὸ τοῦ Α οὐκέτι· ἀδύνατον γάρ].

ἀπορίαν δ’ ἔχει, ἐὰν ἀφέλῃ τις ἢ τῆς Α, εἰ συνεχὲς τὸ κινοῦν μὲν ἀκίνητον δέ, ἢ τῆς Β τῆς κινουμένης· ἡ λοιπὴ ἆρα κινήσει τῆς Α ἢ τῆς Β κινηθήσεται; εἰ γὰρ τοῦτο, οὐκ ἂν εἴη πρώ τως κινουμένη ὑφ’ αὑτῆς ἡ τὸ ΑΒ· ἀφαιρεθείσης γὰρ ἀπὸ τῆς ΑΒ, ἔτι κινήσει αὑτὴν ἡ λοιπὴ ΑΒ. ἢ δυνάμει μὲν (258b.) ἑκάτερον οὐδὲν κωλύει ἢ θάτερον, τὸ κινούμενον, διαιρετὸν εἶναι, ἐντελεχείᾳ δ’ ἀδιαίρετον· ἐὰν δὲ διαιρεθῇ, μηκέτι εἶναι ἔχον τὴν αὐτὴν φύσιν· ὥστ’ οὐδὲν κωλύει ἐν διαιρετοῖς δυνάμει πρώτως ἐνεῖναι.

φανερὸν τοίνυν ἐκ τούτων ὅτι ἔστιν τὸ πρώτως κινοῦν ἀκίνητον· εἴτε γὰρ εὐθὺς ἵσταται τὸ κινούμενον, ὑπό τι νος δὲ κινούμενον, εἰς ἀκίνητον τὸ πρῶτον, εἴτε εἰς κινούμενον μέν, αὐτὸ δ’ αὑτὸ κινοῦν καὶ ἱστάν, ἀμφοτέρως συμβαίνει τὸ πρώτως κινοῦν ἅπασιν εἶναι τοῖς κινουμένοις ἀκίνητον.

Κεφάλαιο 6

Ἐπεὶ δὲ δεῖ κίνησιν ἀεὶ εἶναι καὶ μὴ διαλείπειν, ἀνάγκη εἶναί τι ἀΐδιον ὃ πρῶτον κινεῖ, εἴτε ἓν εἴτε πλείω· καὶ τὸ πρῶτον κινοῦν ἀκίνητον. ἕκαστον μὲν οὖν ἀΐδιον εἶναι τῶν ἀκινήτων μὲν κινούντων δὲ οὐδὲν πρὸς τὸν νῦν λόγον· ὅτι δ’ ἀναγκαῖον εἶναί τι τὸ ἀκίνητον μὲν αὐτὸ πάσης ἐκτὸς μεταβολῆς, καὶ ἁπλῶς καὶ κατὰ συμβεβηκός, κινητικὸν δ’ ἑτέρου, δῆλον ὧδε σκοποῦσιν. ἔστω δή, εἴ τις βούλεται, ἐπί τινων ἐνδεχόμενον ὥστε εἶναί ποτε καὶ μὴ εἶναι ἄνευ γενέσεως καὶ φθορᾶς (τάχα γὰρ ἀναγκαῖον, εἴ τι ἀμερὲς ὁτὲ μὲν ἔστιν ὁτὲ δὲ μὴ ἔστιν, ἄνευ τοῦ μεταβάλλειν ὁτὲ μὲν εἶναι ὁτὲ δὲ μὴ εἶναι πᾶν τὸ τοιοῦτον). καὶ τῶν ἀρχῶν τῶν ἀκινήτων μὲν κινητικῶν δ’ ἐνίας ὁτὲ μὲν εἶναι ὁτὲ δὲ μὴ εἶναι, ἐνδεχέσθω καὶ τοῦτο. ἀλλ’ οὔ τί γε πάσας δυνατόν· δῆλον γὰρ ὡς αἴτιον τοῖς αὐτὰ ἑαυτὰ κινοῦσίν ἐστί τι τοῦ ὁτὲ μὲν εἶναι ὁτὲ δὲ μή. τὸ μὲν γὰρ αὐτὸ ἑαυτὸ κινοῦν ἅπαν ἔχειν ἀνάγκη μέγεθος, εἰ μηδὲν κινεῖται ἀμερές, τὸ δὲ κινοῦν οὐδεμία ἀνάγκη ἐκ τῶν εἰρημένων. τοῦ δὴ τὰ μὲν γίγνεσθαι τὰ δὲ φθείρεσθαι, καὶ τοῦτ’ εἶναι συνεχῶς, οὐδὲν αἴτιον τῶν ἀκινήτων μὲν μὴ ἀεὶ δ’ ὄντων, οὐδ’ αὖ τωνδὶ μὲν ταδί [κινούντων], τούτων δ’ ἕτερα. τοῦ γὰρ ἀεὶ καὶ συνεχοῦς οὔτε ἕκαστον αὐτῶν οὔτε πάντα αἴτια· τὸ μὲν γὰρ οὕτως ἔχειν ἀΐδιον καὶ ἐξ ἀνάγκης, τὰ δὲ πάντα ἄπειρα, καὶ οὐχ ἅμα πάντα ὄντα. δῆλον τοίνυν ὅτι, εἰ καὶ μυριάκις ἔνια [ἀρχαὶ] (259a.) τῶν ἀκινήτων μὲν κινούντων δέ, καὶ πολλὰ τῶν αὐτὰ ἑαυτὰ κινούντων, φθείρεται, τὰ δ’ ἐπιγίγνεται, καὶ τόδε μὲν ἀκίνητον ὂν τόδε κινεῖ, ἕτερον δὲ τοδί, ἀλλ’ οὐδὲν ἧττον ἔστιν τι ὃ περιέχει, καὶ τοῦτο παρ’ ἕκαστον, ὅ ἐστιν αἴτιον τοῦ τὰ μὲν εἶναι τὰ δὲ μὴ καὶ τῆς συνεχοῦς μεταβολῆς· καὶ τοῦτο μὲν τούτοις, ταῦτα δὲ τοῖς ἄλλοις αἴτια κινήσεως. εἴπερ οὖν ἀΐδιος ἡ κίνησις, ἀΐδιον καὶ τὸ κινοῦν ἔσται πρῶτον, εἰ ἕν· εἰ δὲ πλείω, πλείω τὰ ἀΐδια. ἓν δὲ μᾶλλον ἢ πολλά, καὶ πεπερασμένα ἢ ἄπειρα, δεῖ νομίζειν. τῶν αὐτῶν γὰρ συμβαινόντων αἰεὶ τὰ πεπερασμένα μᾶλλον ληπτέον· ἐν γὰρ τοῖς φύσει δεῖ τὸ πεπερασμένον καὶ τὸ βέλτιον, ἂν ἐνδέχηται, ὑπάρχειν μᾶλλον. ἱκανὸν δὲ καὶ ἕν, ὃ πρῶτον τῶν ἀκινήτων ἀΐδιον ὂν ἔσται ἀρχὴ τοῖς ἄλλοις κινήσεως.

φανερὸν δὲ καὶ ἐκ τοῦδε ὅτι ἀνάγκη εἶναί τι ἓν καὶ ἀΐδιον τὸ πρῶτον κινοῦν. δέδεικται γὰρ ὅτι ἀνάγκη ἀεὶ κίνησιν εἶναι. εἰ δὲ ἀεί, ἀνάγκη συνεχῆ εἶναι· καὶ γὰρ τὸ ἀεὶ συνεχές, τὸ δ’ ἐφεξῆς οὐ συνεχές. ἀλλὰ μὴν εἴ γε συνεχής, μία. μία δ’ ἡ ὑφ’ ἑνός τε τοῦ κινοῦντος καὶ ἑνὸς τοῦ κινουμένου· εἰ γὰρ ἄλλο καὶ ἄλλο κινήσει, οὐ συνεχὴς ἡ ὅλη κίνησις, ἀλλ’ ἐφεξῆς.

ἔκ τε δὴ τούτων πιστεύσειεν ἄν τις εἶναί τι πρῶτον ἀκίνητον, καὶ πάλιν ἐπιβλέψας ἐπὶ τὰς ἀρχάς [τῶν κινούντων]. τὸ μὲν δὴ εἶναι ἄττα τῶν ὄντων ἃ ὁτὲ μὲν κινεῖται ὁτὲ δὲ ἠρεμεῖ φανερόν. καὶ διὰ τούτου γέγονε δῆλον ὅτι οὔτε πάντα κινεῖται οὔτε πάντα ἠρεμεῖ οὔτε τὰ μὲν ἀεὶ ἠρεμεῖ τὰ δὲ ἀεὶ κινεῖται· τὰ γὰρ ἐπαμφοτερί ζοντα καὶ δύναμιν ἔχοντα τοῦ κινεῖσθαι καὶ ἠρεμεῖν δείκνυσιν περὶ αὐτῶν. ἐπεὶ δὲ τὰ μὲν τοιαῦτα δῆλα πᾶσι, βουλόμεθα δὲ δεῖξαι καὶ τοῖν δυοῖν ἑκατέρου τὴν φύσιν, ὅτι ἔστιν τὰ μὲν ἀεὶ ἀκίνητα τὰ δὲ ἀεὶ κινούμενα, προϊόντες δ’ ἐπὶ τοῦτο καὶ θέντες ἅπαν τὸ κινούμενον ὑπό τινος κινεῖ σθαι, καὶ τοῦτ’ εἶναι ἢ ἀκίνητον ἢ κινούμενον, καὶ κινούμενον ἢ ὑφ’ αὑτοῦ ἢ ὑπ’ ἄλλου ἀεί, προήλθομεν ἐπὶ τὸ λαβεῖν ὅτι τῶν κινουμένων ἐστὶν ἀρχὴ κινουμένων μὲν ὃ αὐτὸ ἑαυτὸ (259b.) κινεῖ, πάντων δὲ τὸ ἀκίνητον, ὁρῶμεν δὲ καὶ φανερῶς ὄντα τοιαῦτα ἃ κινεῖ αὐτὰ ἑαυτά, οἷον τὸ τῶν ἐμψύχων καὶ τὸ τῶν ζῴων γένος, ταῦτα δὲ καὶ δόξαν παρεῖχε μή ποτε ἐνδέχεται κίνησιν ἐγγίγνεσθαι μὴ οὖσαν ὅλως, διὰ τὸ ἐν τούτοις ὁρᾶν ἡμᾶς τοῦτο συμβαῖνον (ἀκίνητα γάρ ποτε ὄντα κινεῖ ται πάλιν, ὡς δοκεῖ), τοῦτο δὴ δεῖ λαβεῖν, ὅτι μίαν κίνησιν αὐτὰ κινεῖ, καὶ ὅτι ταύτην οὐ κυρίως· οὐ γὰρ ἐξ αὑτοῦ τὸ αἴτιον, ἀλλ’ ἔνεισιν ἄλλαι κινήσεις φυσικαὶ τοῖς ζῴοις, ἃς οὐ κινοῦνται δι’ αὑτῶν, οἷον αὔξησις φθίσις ἀναπνοή, ἃς κινεῖται τῶν ζῴων ἕκαστον ἠρεμοῦν καὶ οὐ κινούμενον τὴν ὑφ’ αὑτοῦ κίνησιν. τούτου δ’ αἴτιον τὸ περιέχον καὶ πολλὰ τῶν εἰσιόντων, οἷον ἐνίων ἡ τροφή· πεττομένης μὲν γὰρ καθεύδουσιν, διακρινομένης δ’ ἐγείρονται καὶ κινοῦσιν ἑαυτούς, τῆς πρώτης ἀρχῆς ἔξωθεν οὔσης, διὸ οὐκ ἀεὶ κινοῦνται συνεχῶς ὑφ’ αὑτῶν· ἄλλο γὰρ τὸ κινοῦν, αὐτὸ κινούμενον καὶ μεταβάλλον πρὸς ἕκαστον τῶν κινούντων ἑαυτά. ἐν πᾶσι δὲ τούτοις κινεῖται τὸ κινοῦν πρῶτον καὶ τὸ αἴτιον τοῦ αὐτὸ ἑαυτὸ κινεῖν ὑφ’ αὑτοῦ, κατὰ συμβεβηκὸς μέντοι· μεταβάλλει γὰρ τὸν τόπον τὸ σῶμα, ὥστε καὶ τὸ ἐν τῷ σώματι ὂν καὶ τῇ μοχλείᾳ κινοῦν ἑαυτό. ἐξ ὧν ἔστιν πιστεῦσαι ὅτι εἴ τί ἐστι τῶν ἀκινήτων μὲν κινούντων δὲ καὶ αὐτὰ κατὰ συμβεβηκός, ἀδύνατον συνεχῆ κίνησιν κινεῖν. ὥστ’ εἴπερ ἀνάγκη συνεχῶς εἶναι κίνησιν, εἶναί τι δεῖ τὸ πρῶτον κινοῦν ἀκίνητον καὶ κατὰ συμβεβηκός, εἰ μέλλει, καθάπερ εἴπομεν, ἔσεσθαι ἐν τοῖς οὖσιν ἄπαυστός τις καὶ ἀθάνατος κίνησις, καὶ μενεῖν τὸ ὂν αὐτὸ ἐν αὑτῷ καὶ ἐν τῷ αὐτῷ· τῆς γὰρ ἀρχῆς μενούσης ἀνάγκη καὶ τὸ πᾶν μένειν συνεχὲς ὂν πρὸς τὴν ἀρχήν. οὐκ ἔστιν δὲ τὸ αὐτὸ τὸ κινεῖσθαι κατὰ συμβεβηκὸς ὑφ’ αὑτοῦ καὶ ὑφ’ ἑτέρου· τὸ μὲν γὰρ ὑφ’ ἑτέρου ὑπάρχει καὶ τῶν ἐν τῷ οὐρανῷ ἐνίαις ἀρχαῖς, ὅσα πλείους φέρεται φοράς, θάτερον δὲ τοῖς φθαρτοῖς μόνον. ἀλλὰ μὴν εἴ γε ἔστιν τι ἀεὶ τοιοῦτον, κινοῦν μέν τι ἀκίνητον δὲ αὐτὸ καὶ ἀΐδιον, ἀνάγκη καὶ τὸ πρῶτον ὑπὸ τούτου (260a.) κινούμενον ἀΐδιον εἶναι. ἔστιν δὲ τοῦτο δῆλον μὲν καὶ ἐκ τοῦ μὴ ἂν ἄλλως εἶναι γένεσιν καὶ φθορὰν καὶ μεταβολὴν τοῖς ἄλλοις, εἰ μή τι κινήσει κινούμενον· τὸ μὲν γὰρ ἀκίνητον [τὴν αὐτὴν] ἀεὶ τὸν αὐτὸν κινήσει τρόπον καὶ μίαν κίνησιν, ἅτε οὐδὲν αὐτὸ μεταβάλλον πρὸς τὸ κινούμενον. τὸ δὲ κινούμενον ὑπὸ τοῦ κινουμένου μέν, ὑπὸ τοῦ ἀκινήτου δὲ κινουμένου ἤδη, διὰ τὸ ἄλλως καὶ ἄλλως ἔχειν πρὸς τὰ πράγματα, οὐ τῆς αὐτῆς ἔσται κινήσεως αἴτιον, ἀλλὰ διὰ τὸ ἐν ἐναντίοις εἶναι τόποις ἢ εἴδεσιν ἐναντίως παρέξεται κινούμενον ἕκαστον τῶν ἄλλων, καὶ ὁτὲ μὲν ἠρεμοῦν ὁτὲ δὲ κινούμενον.

φανερὸν δὴ γέγονεν ἐκ τῶν εἰρημένων καὶ ὃ κατ' ἀρχὰς ἠποροῦμεν, τί δή ποτε οὐ πάντα ἢ κινεῖται ἢ ἠρεμεῖ, ἢ τὰ μὲν κινεῖται ἀεὶ τὰ δ' ἀεὶ ἠρεμεῖ, ἀλλ' ἔνια ὁτὲ μὲν ὁτὲ δ' οὔ. τούτου γὰρ τὸ αἴτιον δῆλόν ἐστι νῦν, ὅτι τὰ μὲν ὑπὸ ἀκινήτου κινεῖται ἀϊδίου, διὸ ἀεὶ κινεῖται, τὰ δ' ὑπὸ κινουμένου καὶ μεταβάλλοντος, ὥστε καὶ αὐτὰ ἀναγκαῖον μεταβάλλειν. τὸ δ' ἀκίνητον, ὥσπερ εἴρηται, ἅτε ἁπλῶς καὶ ὡσαύτως καὶ ἐν τῷ αὐτῷ διαμένον, μίαν καὶ ἁπλῆν κινήσει κίνησιν.

Κεφάλαιο 7

Οὐ μὴν ἀλλὰ καὶ ἄλλην ποιησαμένοις ἀρχὴν μᾶλλον ἔσται περὶ τούτων φανερόν. σκεπτέον γὰρ πότερον ἐνδέχεταί τινα κίνησιν εἶναι συνεχῆ ἢ οὔ, καὶ εἰ ἐνδέχεται, τίς αὕτη, καὶ τίς πρώτη τῶν κινήσεων· δῆλον γὰρ ὡς εἴπερ ἀναγκαῖον μὲν ἀεὶ κίνησιν εἶναι, πρώτη δὲ ἥδε καὶ συνεχής, ὅτι τὸ πρῶτον κινοῦν κινεῖ ταύτην τὴν κίνησιν, ἣν ἀναγκαῖον μίαν καὶ τὴν αὐτὴν εἶναι καὶ συνεχῆ καὶ πρώτην.

τριῶν δ’ οὐσῶν κινήσεων, τῆς τε κατὰ μέγεθος καὶ τῆς κατὰ πάθος καὶ τῆς κατὰ τόπον, ἣν καλοῦμεν φοράν, ταύτην ἀναγκαῖον εἶναι πρώτην. ἀδύνατον γὰρ αὔξησιν εἶναι ἀλλοιώσεως μὴ προϋπαρχούσης· τὸ γὰρ αὐξανόμενον ἔστιν μὲν ὡς ὁμοίῳ αὐξάνεται, ἔστιν δ’ ὡς ἀνομοίῳ· τροφὴ γὰρ λέγεται τῷ ἐναντίῳ τὸ ἐναντίον. προσγίγνεται δὲ πᾶν γιγνόμενον ὅμοιον ὁμοίῳ. ἀνάγκη οὖν ἀλλοίωσιν εἶναι τὴν εἰς τἀναντία μεταβολήν. (260b.) ἀλλὰ μὴν εἴ γε ἀλλοιοῦται, δεῖ τι εἶναι τὸ ἀλλοιοῦν καὶ ποιοῦν ἐκ τοῦ δυνάμει θερμοῦ ἐνεργείᾳ θερμόν. δῆλον οὖν ὅτι τὸ κινοῦν οὐχ ὁμοίως ἔχει, ἀλλ’ ὁτὲ μὲν ἐγγύτερον ὁτὲ δὲ πορρώτερον τοῦ ἀλλοιουμένου ἐστίν. ταῦτα δ’ ἄνευ φορᾶς οὐκ ἐνδέχεται ὑπάρχειν. εἰ ἄρα ἀνάγκη ἀεὶ κίνησιν εἶναι, ἀνάγκη καὶ φορὰν ἀεὶ εἶναι πρώτην τῶν κινήσεων, καὶ φορᾶς, εἰ ἔστιν ἡ μὲν πρώτη ἡ δ’ ὑστέρα, τὴν πρώτην. ἔτι δὲ πάντων τῶν παθημάτων ἀρχὴ πύκνωσις καὶ μάνωσις· καὶ γὰρ βαρὺ καὶ κοῦφον καὶ μαλακὸν καὶ σκληρὸν καὶ θερμὸν καὶ ψυχρὸν πυκνότητες δοκοῦσιν καὶ ἀραιότητες εἶναί τινες. πύκνωσις δὲ καὶ μάνωσις σύγκρισις καὶ διάκρισις, καθ’ ἃς γένεσις καὶ φθορὰ λέγεται τῶν οὐσιῶν. συγκρινόμενα δὲ καὶ διακρινόμενα ἀνάγκη κατὰ τόπον μεταβάλλειν. ἀλλὰ μὴν καὶ τοῦ αὐξανομένου καὶ φθίνοντος μεταβάλλει κατὰ τόπον τὸ μέγεθος.

ἔτι καὶ ἐντεῦθεν ἐπισκοποῦσιν ἔσται φανερὸν ὅτι ἡ φορὰ πρώτη. τὸ γὰρ πρῶτον, ὥσπερ ἐφ’ ἑτέρων, οὕτω καὶ ἐπὶ κινήσεως ἂν λέγοιτο πλεοναχῶς. λέγεται δὲ πρότερον οὗ τε μὴ ὄντος οὐκ ἔσται τἆλλα, ἐκεῖνο δὲ ἄνευ τῶν ἄλλων, καὶ τὸ τῷ χρόνῳ, καὶ τὸ κατ’ οὐσίαν. ὥστ’ ἐπεὶ κίνησιν μὲν ἀναγκαῖον εἶναι συνεχῶς, εἴη δ’ ἂν συνεχῶς ἢ συνεχὴς οὖσα ἢ ἐφεξῆς, μᾶλλον δ’ ἡ συνεχής, καὶ βέλτιον συνεχῆ ἢ ἐφεξῆς εἶναι, τὸ δὲ βέλτιον ἀεὶ ὑπολαμβάνομεν ἐν τῇ φύσει ὑπάρχειν, ἂν ᾖ δυνατόν, δυνατὸν δὲ συνεχῆ εἶναι (δειχθήσεται δ’ ὕστερον· νῦν δὲ τοῦτο ὑποκείσθω), καὶ ταύτην οὐδεμίαν ἄλλην οἷόν τε εἶναι ἀλλ’ ἢ φοράν, ἀνάγκη τὴν φορὰν εἶναι πρώτην. οὐδεμία γὰρ ἀνάγκη οὔτε αὔξεσθαι οὔτε ἀλλοιοῦσθαι τὸ φερόμενον, οὐδὲ δὴ γίγνεσθαι ἢ φθείρεσθαι· τούτων δὲ οὐδεμίαν ἐνδέχεται τῆς συνεχοῦς μὴ οὔσης, ἣν κινεῖ τὸ πρῶτον κινοῦν.

ἔτι χρόνῳ πρώτην· τοῖς γὰρ ἀϊδίοις μόνον ἐνδέχεται κινεῖσθαι ταύτην. ἀλλ’ ἐφ’ ἑνὸς μὲν ὁτουοῦν τῶν ἐχόντων γένεσιν τὴν φορὰν ἀναγκαῖον ὑστάτην εἶναι τῶν κινήσεων· μετὰ γὰρ τὸ γενέσθαι πρῶτον ἀλλοίωσις καὶ αὔξησις, φορὰ δ’ ἤδη τετελειωμένων κίνησίς ἐστιν. (261a.) ἀλλ’ ἕτερον ἀνάγκη κινούμενον εἶναι κατὰ φορὰν πρότερον, ὃ καὶ τῆς γενέσεως αἴτιον ἔσται τοῖς γιγνομένοις, οὐ γιγνόμενον, οἷον τὸ γεννῆσαν τοῦ γεννηθέντος, ἐπεὶ δόξειέ γ’ ἂν ἡ γένεσις εἶναι πρώτη τῶν κινήσεων διὰ τοῦτο, ὅτι γενέσθαι δεῖ τὸ πρᾶγμα πρῶτον. τὸ δ’ ἐφ’ ἑνὸς μὲν ὁτουοῦν τῶν γιγνομένων οὕτως ἔχει, ἀλλ’ ἕτερον ἀναγκαῖον πρότερόν τι κινεῖσθαι τῶν γιγνομένων ὂν αὐτὸ καὶ μὴ γιγνόμενον, καὶ τούτου ἕτερον πρότερον. ἐπεὶ δὲ γένεσιν ἀδύνατον εἶναι πρώτην (πάντα γὰρ ἂν εἴη τὰ κινούμενα φθαρτά), δῆλον ὡς οὐδὲ τῶν ἐφεξῆς κινήσεων οὐδεμία προτέρα· λέγω δ’ ἐφεξῆς αὔξησιν, εἶτ’ ἀλλοίωσιν καὶ φθίσιν καὶ φθοράν· πᾶσαι γὰρ ὕστεραι γενέσεως, ὥστ’ εἰ μηδὲ γένεσις προτέρα φορᾶς, οὐδὲ τῶν ἄλλων οὐδεμία μεταβολῶν.

ὅλως τε φαίνεται τὸ γιγνόμενον ἀτελὲς καὶ ἐπ’ ἀρχὴν ἰόν, ὥστε τὸ τῇ γενέσει ὕστερον τῇ φύσει πρότερον εἶναι. τελευταῖον δὲ φορὰ πᾶσιν ὑπάρχει τοῖς ἐν γενέσει. διὸ τὰ μὲν ὅλως ἀκίνητα τῶν ζώντων δι’ ἔνδειαν [τοῦ ὀργάνου], οἷον τὰ φυτὰ καὶ πολλὰ γένη τῶν ζῴων, τοῖς δὲ τελειουμένοις ὑπάρχει. ὥστ’ εἰ μᾶλλον ὑπάρχει φορὰ τοῖς μᾶλλον ἀπειληφόσιν τὴν φύσιν, καὶ ἡ κίνησις αὕτη πρώτη τῶν ἄλλων ἂν εἴη κατ’ οὐσίαν, διά τε ταῦτα καὶ διότι ἥκιστα τῆς οὐσίας ἐξίσταται τὸ κινούμενον τῶν κινήσεων ἐν τῷ φέρεσθαι· κατὰ μόνην γὰρ οὐδὲν μεταβάλλει τοῦ εἶναι, ὥσπερ ἀλλοιουμένου μὲν τὸ ποιόν, αὐξανομένου δὲ καὶ φθίνοντος τὸ ποσόν. μάλιστα δὲ δῆλον ὅτι τὸ κινοῦν αὐτὸ αὑτὸ μάλιστα ταύτην κινεῖ κυρίως, τὴν κατὰ τόπον· καίτοι φαμὲν τοῦτο εἶναι τῶν κινουμένων καὶ κινούντων ἀρχὴν καὶ πρῶτον τοῖς κινουμένοις, τὸ αὐτὸ αὑτὸ κινοῦν.

ὅτι μὲν τοίνυν τῶν κινήσεων ἡ φορὰ πρώτη, φανερὸν ἐκ τούτων· τίς δὲ φορὰ πρώτη, νῦν δεικτέον. ἅμα δὲ καὶ τὸ νῦν καὶ πρότερον ὑποτεθέν, ὅτι ἐνδέχεταί τινα κίνησιν εἶναι συνεχῆ καὶ ἀΐδιον, φανερὸν ἔσται τῇ αὐτῇ μεθόδῳ. ὅτι μὲν οὖν τῶν ἄλλων κινήσεων οὐδεμίαν ἐνδέχεται συνεχῆ εἶναι, ἐκ τῶνδε φανερόν. ἅπασαι γὰρ ἐξ ἀντικειμένων εἰς ἀντικείμενά εἰσιν αἱ κινήσεις καὶ μεταβολαί, οἷον γενέσει μὲν καὶ φθορᾷ τὸ ὂν καὶ τὸ μὴ ὂν ὅροι, ἀλλοιώσει δὲ τὰ ἐναντία πάθη, αὐξήσει δὲ καὶ φθίσει ἢ μέγεθος καὶ μικρότης ἢ τελειότης μεγέθους καὶ ἀτέλεια· ἐναντίαι δ’ αἱ (261b.) εἰς τὰ ἐναντία. τὸ δὲ μὴ αἰεὶ κινούμενον τήνδε τὴν κίνησιν, ὂν δὲ πρότερον, ἀνάγκη πρότερον ἠρεμεῖν. φανερὸν οὖν ὅτι ἠρεμήσει ἐν τῷ ἐναντίῳ τὸ μεταβάλλον. ὁμοίως δὲ καὶ ἐπὶ τῶν μεταβολῶν· ἀντίκειται γὰρ φθορὰ καὶ γένεσις ἁπλῶς καὶ ἡ καθ’ ἕκαστον τῇ καθ’ ἕκαστον. ὥστ’ εἰ ἀδύνατον ἅμα μεταβάλλειν τὰς ἀντικειμένας, οὐκ ἔσται συνεχὴς ἡ μεταβολή, ἀλλὰ μεταξὺ ἔσται αὐτῶν χρόνος. οὐδὲν γὰρ διαφέρει ἐναντίας ἢ μὴ ἐναντίας εἶναι τὰς κατ’ ἀντίφασιν μεταβολάς, εἰ μόνον ἀδύνατον ἅμα τῷ αὐτῷ παρεῖναι (τοῦτο γὰρ τῷ λόγῳ οὐδὲν χρήσιμον), οὐδ’ εἰ μὴ ἀνάγκη ἠρεμῆσαι ἐν τῇ ἀντιφάσει, μηδ’ ἐστὶν μεταβολὴ ἠρεμίᾳ ἐναντίον (οὐ γὰρ ἴσως ἠρεμεῖ τὸ μὴ ὄν, ἡ δὲ φθορὰ εἰς τὸ μὴ ὄν), ἀλλ’ εἰ μόνον μεταξὺ γίγνεται χρόνος· οὕτω γὰρ οὐκ ἔστιν ἡ μεταβολὴ συνεχής· οὐδὲ γὰρ ἐν τοῖς πρότερον ἡ ἐναντίωσις χρήσιμον, ἀλλὰ τὸ μὴ ἐνδέχεσθαι ἅμα ὑπάρχειν. οὐ δεῖ δὲ ταράττεσθαι ὅτι τὸ αὐτὸ πλείοσιν ἔσται ἐναντίον, οἷον ἡ κίνησις καὶ στάσει καὶ κινήσει τῇ εἰς τοὐναντίον, ἀλλὰ μόνον τοῦτο λαμβάνειν, ὅτι ἀντίκειταί πως καὶ τῇ κινήσει καὶ τῇ ἠρεμίᾳ ἡ κίνησις ἡ ἐναντία, καθάπερ τὸ ἴσον καὶ τὸ μέτριον τῷ ὑπερέχοντι καὶ τῷ ὑπερεχομένῳ, καὶ ὅτι οὐκ ἐνδέχεται ἅμα τὰς ἀντικειμένας οὔτε κινήσεις οὔτε μεταβολὰς ὑπάρχειν. ἔτι δ’ ἐπί τε τῆς γενέσεως καὶ τῆς φθορᾶς καὶ παντελῶς ἄτοπον ἂν εἶναι δόξειεν, εἰ γενόμενον εὐθὺς ἀνάγκη φθαρῆναι καὶ μηδένα χρόνον διαμεῖναι. ὥστε ἐκ τούτων ἂν ἡ πίστις γένοιτο ταῖς ἄλλαις· φυσικὸν γὰρ τὸ ὁμοίως ἔχειν ἐν ἁπάσαις.

Ὅτι δ’ ἐνδέχεται εἶναί τινα ἄπειρον, μίαν οὖσαν καὶ συνεχῆ, καὶ αὕτη ἐστὶν ἡ κύκλῳ, λέγωμεν νῦν. πᾶν μὲν γὰρ κινεῖται τὸ φερόμενον ἢ κύκλῳ ἢ εὐθεῖαν ἢ μικτήν, ὥστ’ εἰ μηδ’ ἐκείνων ἡ ἑτέρα συνεχής, οὐδὲ τὴν ἐξ ἀμφοῖν οἷόν τ’ εἶναι συγκειμένην· ὅτι δὲ τὸ φερόμενον τὴν εὐθεῖαν καὶ πεπερασμένην οὐ φέρεται συνεχῶς, δῆλον· ἀνακάμπτει γάρ, τὸ δ’ ἀνακάμπτον τὴν εὐθεῖαν τὰς ἐναντίας κινεῖται κινήσεις· ἐναντία γὰρ κατὰ τόπον ἡ ἄνω τῇ κάτω καὶ ἡ εἰς τὸ πρόσθεν τῇ εἰς τοὔπισθεν καὶ ἡ εἰς ἀριστερὰ τῇ εἰς δεξιά· τόπου γὰρ ἐναντιώσεις αὗται. τίς δ’ ἐστὶν ἡ μία καὶ (262a.) συνεχὴς κίνησις, διώρισται πρότερον, ὅτι ἡ τοῦ ἑνὸς καὶ ἐν ἑνὶ χρόνῳ καὶ ἐν ἀδιαφόρῳ κατ’ εἶδος (τρία γὰρ ἦν, τό τε κινούμενον, οἷον ἄνθρωπος ἢ θεός, καὶ ὅτε, οἷον χρόνος, καὶ τρίτον τὸ ἐν ᾧ· τοῦτο δ’ ἐστὶν τόπος ἢ πάθος ἢ εἶδος ἢ μέγεθος). τὰ δ’ ἐναντία διαφέρει τῷ εἴδει, καὶ οὐχ ἕν· τόπου δ’ αἱ εἰρημέναι διαφοραί. σημεῖον δ’ ὅτι ἐναντία ἡ κίνησις ἡ ἀπὸ τοῦ Α πρὸς τὸ Β τῇ ἀπὸ τοῦ Β πρὸς τὸ Α, ὅτι ἱστᾶσιν καὶ παύουσιν ἀλλήλας, ἐὰν ἅμα γίγνωνται. καὶ ἐπὶ κύκλου ὡσαύτως, οἷον ἡ ἀπὸ τοῦ Α ἐπὶ τὸ Β τῇ ἀπὸ τοῦ Α ἐπὶ τὸ Γ (ἱστᾶσι γάρ, κἂν συνεχεῖς ὦσιν καὶ μὴ γίγνηται ἀνάκαμψις, διὰ τὸ τἀναντία φθείρειν καὶ κωλύειν ἄλληλα)· ἀλλ’ οὐχ ἡ εἰς τὸ πλάγιον τῇ ἄνω. μάλιστα δὲ φανερὸν ὅτι ἀδύνατον εἶναι συνεχῆ τὴν ἐπὶ τῆς εὐθείας κίνησιν, ὅτι ἀνακάμπτον ἀναγκαῖον στῆναι, οὐ μόνον ἐπ’ εὐθείας, ἀλλὰ κἂν κύκλον φέρηται. οὐ γὰρ ταὐτὸν κύκλῳ φέρεσθαι καὶ κύκλον· ἔστιν γὰρ ὁτὲ μὲν συνείρειν κινούμενον, ὁτὲ δ’ ἐπὶ τὸ αὐτὸ ἐλθὸν ὅθεν ὡρμήθη ἀνακάμψαι πάλιν. ὅτι δ’ ἀνάγκη ἵστασθαι, ἡ πίστις οὐ μόνον ἐπὶ τῆς αἰσθήσεως ἀλλὰ καὶ ἐπὶ τοῦ λόγου. ἀρχὴ δὲ ἥδε. τριῶν γὰρ ὄντων, ἀρχῆς μέσου τελευτῆς, τὸ μέσον πρὸς ἑκάτερον ἄμφω ἐστίν, καὶ τῷ μὲν ἀριθμῷ ἕν, τῷ λόγῳ δὲ δύο. ἔτι δὲ ἄλλο ἐστὶν τὸ δυνάμει καὶ τὸ ἐνεργείᾳ, ὥστε τῆς εὐθείας τῶν ἐντὸς τῶν ἄκρων ὁτιοῦν σημεῖον δυνάμει μέν ἐστι μέσον, ἐνεργείᾳ δ’ οὐκ ἔστιν, ἐὰν μὴ διέλῃ ταύτῃ καὶ ἐπιστὰν πάλιν ἄρξηται κινεῖσθαι· οὕτω δὲ τὸ μέσον ἀρχὴ γίγνεται καὶ τελευτή, ἀρχὴ μὲν τῆς ὕστερον, τελευτὴ δὲ τῆς πρώτης (λέγω δ’ οἷον ἐὰν φερόμενον τὸ Α στῇ ἐπὶ τοῦ Β καὶ πάλιν φέρηται ἐπὶ τὸ Γ). ὅταν δὲ συνεχῶς φέρηται, οὔτε γεγονέναι οὔτε ἀπογεγονέναι οἷόν τε τὸ Α κατὰ τὸ Β σημεῖον, ἀλλὰ μόνον εἶναι ἐν τῷ νῦν, ἐν χρόνῳ δ’ οὐδενὶ πλὴν οὗ τὸ νῦν ἐστιν διαί ρεσις, ἐν τῷ ὅλῳ [τῷ ΑΒΓ]. τὸν αὐτὸν δὲ τρόπον ἀπαντητέον καὶ πρὸς τοὺς ἐρωτῶντας τὸν Ζήνωνος λόγον, [καὶ ἀξιοῦντας,] εἰ ἀεὶ τὸ ἥμισυ διιέναι δεῖ, ταῦτα δ’ ἄπειρα, τὰ δ’ ἄπειρα ἀδύνατον διεξελθεῖν, ἢ ὡς τὸν αὐτὸν τοῦτον λόγον τινὲς ἄλλως ἐρωτῶσιν, ἀξιοῦντες ἅμα τῷ κινεῖσθαι τὴν ἡμίσειαν πρότερον ἀριθμεῖν καθ’ ἕκαστον γιγνόμενον τὸ ἥμισυ, ὥστε διελθόντος τὴν ὅλην ἄπειρον συμβαίνει ἠριθμηκέναι ἀριθμόν· τοῦτο δ’ ὁμολογουμένως ἐστὶν ἀδύνατον. ἐν μὲν οὖν τοῖς πρώτοις λόγοις τοῖς περὶ κινήσεως ἐλύομεν διὰ τοῦ τὸν χρόνον ἄπειρα ἔχειν ἐν αὑτῷ· οὐδὲν γὰρ ἄτοπον εἰ ἐν ἀπείρῳ χρόνῳ ἄπειρα διέρχεταί τις· ὁμοίως δὲ τὸ ἄπειρον ἔν τε τῷ μήκει ὑπάρχει καὶ ἐν τῷ χρόνῳ. ἀλλ’ αὕτη ἡ λύσις πρὸς μὲν τὸν ἐρωτῶντα ἱκανῶς ἔχει (ἠρωτᾶτο γὰρ εἰ ἐν πεπερασμένῳ ἄπειρα ἐνδέχεται διεξελθεῖν ἢ ἀριθμῆσαι), πρὸς δὲ τὸ πρᾶγμα καὶ τὴν ἀλήθειαν οὐχ ἱκανῶς· ἂν γάρ τις ἀφέμενος τοῦ μήκους καὶ τοῦ ἐρωτᾶν εἰ ἐν πεπερασμένῳ χρόνῳ ἐνδέχεται ἄπειρα διεξελθεῖν, πυνθάνηται ἐπ’ αὐτοῦ τοῦ χρόνου ταῦτα (ἔχει γὰρ ὁ χρόνος ἀπείρους διαιρέσεις), οὐκέτι ἱκανὴ ἔσται αὕτη ἡ λύσις, ἀλλὰ τὸ ἀληθὲς λεκτέον, ὅπερ εἴπομεν ἐν τοῖς ἄρτι λόγοις. ἐὰν γάρ τις τὴν συνεχῆ διαιρῇ εἰς δύο ἡμίση, οὗτος τῷ ἑνὶ σημείῳ ὡς δυσὶ χρῆται· ποιεῖ γὰρ αὐτὸ ἀρχὴν καὶ τελευτήν. οὕτω δὲ ποιεῖ ὅ τε ἀριθμῶν καὶ ὁ εἰς τὰ ἡμίση διαιρῶν. οὕτω δὲ διαιροῦντος οὐκ ἔσται συνεχὴς οὔθ’ ἡ γραμμὴ οὔθ’ ἡ κίνησις· ἡ γὰρ συνεχὴς κίνησις συνεχοῦς ἐστιν, ἐν δὲ τῷ συνεχεῖ ἔνεστι μὲν ἄπειρα ἡμίση, ἀλλ’ οὐκ ἐντελεχείᾳ ἀλλὰ δυνάμει. ἂν δὲ ποιῇ ἐντελεχείᾳ, οὐ ποιήσει συνεχῆ, ἀλλὰ στήσει, ὅπερ ἐπὶ τοῦ ἀριθμοῦντος τὰ ἡμίσεα φανερόν ἐστιν ὅτι συμβαίνει· τὸ γὰρ ἓν σημεῖον ἀνάγκη (263b.) αὐτῷ ἀριθμεῖν δύο· τοῦ μὲν γὰρ ἑτέρου τελευτὴ ἡμίσεος τοῦ δ’ ἑτέρου ἀρχὴ ἔσται, ἂν μὴ μίαν ἀριθμῇ τὴν συνεχῆ, ἀλλὰ δύο ἡμισείας. ὥστε λεκτέον πρὸς τὸν ἐρωτῶντα εἰ ἐνδέχεται ἄπειρα διεξελθεῖν ἢ ἐν χρόνῳ ἢ ἐν μήκει, ὅτι ἔστιν ὡς, ἔστιν δ’ ὡς οὔ. ἐντελεχείᾳ μὲν γὰρ ὄντα οὐκ ἐνδέχεται, δυνάμει δὲ ἐνδέχεται· ὁ γὰρ συνεχῶς κινούμενος κατὰ συμβεβηκὸς ἄπειρα διελήλυθεν, ἁπλῶς δ’ οὔ· συμβέβηκε γὰρ τῇ γραμμῇ ἄπειρα ἡμίσεα εἶναι, ἡ δ’ οὐσία ἐστὶν ἑτέρα καὶ τὸ εἶναι. δῆλον δὲ καὶ ὅτι ἐὰν μή τις ποιῇ τοῦ χρόνου τὸ διαιροῦν σημεῖον τὸ πρότερον καὶ ὕστερον ἀεὶ τοῦ ὑστέρου τῷ πράγματι, ἔσται ἅμα τὸ αὐτὸ ὂν καὶ οὐκ ὄν, καὶ ὅτε γέγονεν οὐκ ὄν. τὸ σημεῖον μὲν οὖν ἀμφοῖν κοινόν, καὶ τοῦ προτέρου καὶ τοῦ ὑστέρου, καὶ ταὐτὸν καὶ ἓν ἀριθμῷ, λόγῳ δ’ οὐ ταὐτόν (τοῦ μὲν γὰρ τελευτή, τοῦ δ’ ἀρχή)· τῷ δὲ πράγματι ἀεὶ τοῦ ὑστέρου πάθους ἐστίν. χρόνος ἐφ’ ᾧ ΑΓΒ, πρᾶγμα ἐφ’ ᾧ Δ. τοῦτο ἐν μὲν τῷ Α χρόνῳ λευκόν, ἐν δὲ τῷ Β οὐ λευκόν· ἐν τῷ ἄρα Γ λευκὸν καὶ οὐ λευκόν. ἐν ὁτῳοῦν γὰρ τοῦ Α λευκὸν ἀληθὲς εἰπεῖν, εἰ πάντα τὸν χρόνον τοῦτον ἦν λευκόν, καὶ ἐν τῷ Β οὐ λευκόν· τὸ δὲ Γ ἐν ἀμφοῖν. οὐκ ἄρα δοτέον ἐν παντί, ἀλλὰ πλὴν τοῦ τελευταίου νῦν ἐφ’ οὗ τὸ Γ· τοῦτο δ’ ἤδη τοῦ ὑστέρου. καὶ εἰ ἐγίγνετο οὐ λευκὸν καὶ ἐφθείρετο <τὸ> λευκὸν ἐν τῷ Α παντί, γέγονεν ἢ ἔφθαρται ἐν τῷ Γ. ὥστε λευκὸν ἢ μὴ λευκὸν ἐν ἐκείνῳ πρῶτον ἀληθὲς εἰπεῖν, ἢ ὅτε γέγονεν οὐκ ἔσται, καὶ ὅτε ἔφθαρται ἔσται, ἢ ἅμα λευκὸν καὶ οὐ λευκὸν καὶ ὅλως ὂν καὶ μὴ ὂν ἀνάγκη εἶναι. εἰ δ’ ὃ ἂν ᾖ πρότερον μὴ ὄν, ἀνάγκη γίγνεσθαι ὄν, καὶ ὅτε γίγνεται μὴ ἔστιν, οὐχ οἷόν τε εἰς ἀτόμους χρόνους διαιρεῖσθαι τὸν χρόνον. εἰ γὰρ ἐν τῷ Α τὸ Δ ἐγίγνετο λευκόν, γέγονε δ’ ἅμα καὶ ἔστιν ἐν ἑτέρῳ ἀτόμῳ χρόνῳ ἐχομένῳ δ’, ἐν τῷ Β-εἰ ἐν τῷ Α ἐγίγνετο, οὐκ ἦν, ἐν δὲ τῷ Β ἐστί-, γένεσιν δεῖ τινὰ εἶναι μεταξύ, ὥστε καὶ (264a.) χρόνον ἐν ᾧ ἐγίγνετο. οὐ γὰρ ὁ αὐτὸς ἔσται λόγος καὶ τοῖς μὴ ἄτομα λέγουσιν, ἀλλ’ αὐτοῦ τοῦ χρόνου, ἐν ᾧ ἐγίγνετο, γέγονε καὶ ἔστιν ἐν τῷ ἐσχάτῳ σημείῳ, οὗ οὐδὲν ἐχόμενόν ἐστιν οὐδ’ ἐφεξῆς· οἱ δὲ ἄτομοι χρόνοι ἐφεξῆς. φανερὸν δ’ ὅτι εἰ ἐν τῷ Α ὅλῳ χρόνῳ ἐγίγνετο, οὐκ ἔστιν πλείων χρόνος ἐν ᾧ γέγονεν καὶ ἐγίγνετο ἢ ἐν ᾧ ἐγίγνετο μόνον παντί.

οἷς μὲν οὖν ἄν τις ὡς οἰκείοις πιστεύσειε λόγοις, οὗτοι καὶ τοιοῦτοί τινές εἰσιν· λογικῶς δ’ ἐπισκοποῦσι κἂν ἐκ τῶνδε δόξειέ τῳ ταὐτὸ τοῦτο συμβαίνειν. ἅπαν γὰρ τὸ κινούμενον συνεχῶς, ἂν ὑπὸ μηδενὸς ἐκκρούηται, εἰς ὅπερ ἦλθεν κατὰ τὴν φοράν, εἰς τοῦτο καὶ ἐφέρετο πρότερον, οἷον εἰ ἐπὶ τὸ Β ἦλθε, καὶ ἐφέρετο ἐπὶ τὸ Β, καὶ οὐχ ὅτε πλησίον ἦν, ἀλλ’ εὐθὺς ὡς ἤρξατο κινεῖσθαι· τί γὰρ μᾶλλον νῦν ἢ πρότερον; ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. τὸ δὴ ἀπὸ τοῦ Α [ἐπὶ τὸ Γ] φερόμενον, ὅταν ἐπὶ τὸ Γ ἔλθῃ, πάλιν ἥξει ἐπὶ τὸ Α συν εχῶς κινούμενον. ὅτε ἄρα ἀπὸ τοῦ Α φέρεται πρὸς τὸ Γ, τότε καὶ εἰς τὸ Α φέρεται τὴν ἀπὸ τοῦ Γ κίνησιν, ὥσθ’ ἅμα τὰς ἐναντίας· ἐναντίαι γὰρ αἱ κατ’ εὐθεῖαν. ἅμα δὲ καὶ ἐκ τούτου μεταβάλλει ἐν ᾧ οὐκ ἔστιν. εἰ οὖν τοῦτ’ ἀδύνατον, ἀνάγκη ἵστασθαι ἐπὶ τοῦ Γ. οὐκ ἄρα μία ἡ κίνησις· ἡ γὰρ διαλαμ βανομένη στάσει οὐ μία.

ἔτι καὶ ἐκ τῶνδε φανερὸν καθόλου μᾶλλον περὶ πάσης κινήσεως. εἰ γὰρ ἅπαν τὸ κινούμενον τῶν εἰρημένων τινὰ κινεῖται κινήσεων καὶ ἠρεμεῖ τῶν ἀντικειμένων ἠρεμιῶν (οὐ γὰρ ἦν ἄλλη παρὰ ταύτας), τὸ δὲ μὴ αἰεὶ κινούμενον τήνδε τὴν κίνησιν (λέγω δ’ ὅσαι ἕτεραι τῷ εἴδει, καὶ μὴ εἴ τι μόριόν ἐστιν τῆς ὅλης) ἀνάγκη πρότερον ἠρεμεῖν τὴν ἀντικειμένην ἠρεμίαν (ἡ γὰρ ἠρεμία στέρησις κινήσεως)· εἰ οὖν ἐναντίαι μὲν κινήσεις αἱ κατ’ εὐθεῖαν, ἅμα δὲ μὴ ἐνδέχεται κινεῖσθαι τὰς ἐναντίας, τὸ ἀπὸ τοῦ Α πρὸς τὸ Γ φερόμενον οὐκ ἂν φέροιτο ἅμα καὶ ἀπὸ τοῦ Γ πρὸς τὸ Α· ἐπεὶ δ’ οὐχ ἅμα φέρεται, κινήσεται δὲ ταύτην τὴν κίνησιν, ἀνάγκη πρότερον ἠρεμῆσαι πρὸς τῷ Γ· αὕτη γὰρ ἦν ἡ ἀντικειμένη ἠρεμία τῇ ἀπὸ τοῦ Γ κινήσει. δῆλον τοίνυν (264b.) ἐκ τῶν εἰρημένων ὅτι οὐκ ἔσται συνεχὴς ἡ κίνησις.

ἔτι δὲ καὶ ὅδε ὁ λόγος μᾶλλον οἰκεῖος τῶν εἰρημένων. ἅμα γὰρ ἔφθαρται τὸ οὐ λευκὸν καὶ γέγονε λευκόν. εἰ οὖν συνεχὴς ἡ ἀλλοίωσις εἰς λευκὸν καὶ ἐκ λευκοῦ καὶ μὴ μένει τινὰ χρόνον, ἅμα ἔφθαρται τὸ οὐ λευκὸν καὶ γέγονε λευκὸν καὶ γέγονεν οὐ λευκόν· τριῶν γὰρ ἔσται ὁ αὐτὸς χρόνος.

ἔτι οὐκ εἰ συνεχὴς ὁ χρόνος, καὶ ἡ κίνησις, ἀλλ’ ἐφεξῆς. πῶς δ’ ἂν εἴη τὸ ἔσχατον τὸ αὐτὸ τῶν ἐναντίων, οἷον λευκότητος καὶ μελανίας;

ἡ δ’ ἐπὶ τῆς περιφεροῦς ἔσται μία καὶ συνεχής· οὐθὲν γὰρ ἀδύνατον συμβαίνει· τὸ γὰρ ἐκ τοῦ Α κινούμενον ἅμα κινήσεται εἰς τὸ Α κατὰ τὴν αὐτὴν πρόθεσιν (εἰς ὃ γὰρ ἥξει, καὶ κινεῖται εἰς τοῦτο), ἀλλ’ οὐχ ἅμα κινήσεται τὰς ἐναντίας οὐδὲ τὰς ἀντικειμένας· οὐ γὰρ ἅπασα ἡ εἰς τοῦτο τῇ ἐκ τούτου ἐναντία οὐδ’ ἀντικειμένη, ἀλλ’ ἐναντία μὲν ἡ κατ’ εὐθεῖαν (ταύτῃ γὰρ ἔστιν ἐναντία κατὰ τόπον, οἷον τὰ κατὰ διάμε τρον· ἀπέχει γὰρ πλεῖστον), ἀντικειμένη δὲ ἡ κατὰ τὸ αὐτὸ μῆκος. ὥστ’ οὐδὲν κωλύει συνεχῶς κινεῖσθαι καὶ μηδένα χρόνον διαλείπειν· ἡ μὲν γὰρ κύκλῳ κίνησίς ἐστιν ἀφ’ αὑτοῦ εἰς αὑτό, ἡ δὲ κατ’ εὐθεῖαν ἀφ’ αὑτοῦ εἰς ἄλλο· καὶ ἡ μὲν ἐν τῷ κύκλῳ οὐδέποτε ἐν τοῖς αὐτοῖς, ἡ δὲ κατ’ εὐθεῖαν πολλάκις ἐν τοῖς αὐτοῖς. τὴν μὲν οὖν ἀεὶ ἐν ἄλλῳ καὶ ἄλλῳ γιγνομένην ἐνδέχεται κινεῖσθαι συνεχῶς, τὴν δ’ ἐν τοῖς αὐτοῖς πολλάκις οὐκ ἐνδέχεται· ἀνάγκη γὰρ ἅμα κινεῖσθαι τὰς ἀντικειμένας. ὥστ’ οὐδ’ ἐν τῷ ἡμικυκλίῳ οὐδ’ ἐν ἄλλῃ περιφερείᾳ οὐδεμιᾷ ἐνδέχεται συνεχῶς κινεῖσθαι· πολλάκις γὰρ ἀνάγκη ταὐτὰ κινεῖσθαι καὶ τὰς ἐναντίας μεταβάλλειν μεταβολάς· οὐ γὰρ συνάπτει τῇ ἀρχῇ τὸ πέρας. ἡ δὲ τοῦ κύκλου συνάπτει, καὶ ἔστι μόνη τέλειος.

φανερὸν δὲ ἐκ ταύτης τῆς διαιρέσεως ὅτι οὐδὲ τὰς ἄλλας ἐνδέχεται κινήσεις εἶναι συνεχεῖς· ἐν ἁπάσαις γὰρ ταὐτὰ συμβαίνει κινεῖσθαι πολλάκις, οἷον ἐν ἀλλοιώσει τὰ μεταξύ, καὶ ἐν τῇ τοῦ ποσοῦ τὰ ἀνὰ μέσον μεγέθη, καὶ ἐν γενέσει καὶ φθορᾷ ὡσαύτως· οὐδὲν γὰρ διαφέρει ὀλίγα ἢ πολλὰ ποιῆσαι, ἐν (265a.) οἷς ἐστὶν ἡ μεταβολή, οὐδὲ μεταξὺ θεῖναί τι ἢ ἀφελεῖν· ἀμφοτέρως γὰρ συμβαίνει ταὐτὰ κινεῖσθαι πολλάκις. δῆλον οὖν ἐκ τούτων ὅτι οὐδ’ οἱ φυσιολόγοι καλῶς λέγουσιν οἱ πάντα τὰ αἰσθητὰ κινεῖσθαι φάσκοντες ἀεί· κινεῖσθαι γὰρ ἀνάγκη τούτων τινὰ τῶν κινήσεων, καὶ μάλιστα κατ’ ἐκείνους [ἐστὶν] ἀλλοιοῦσθαι· ῥεῖν γάρ φασιν ἀεὶ καὶ φθίνειν, ἔτι δὲ καὶ τὴν γένεσιν καὶ τὴν φθορὰν ἀλλοίωσιν λέγουσιν. ὁ δὲ λόγος νῦν εἴρηκε καθόλου περὶ πάσης κινήσεως ὅτι κατ’ οὐδεμίαν κίνησιν ἐνδέχεται κινεῖσθαι συνεχῶς ἔξω τῆς κύκλῳ, ὥστε οὔτε κατ’ ἀλλοίωσιν οὔτε κατ’ αὔξησιν. ὅτι μὲν οὖν οὔτ’ ἄπειρός ἐστι μεταβολὴ οὐδεμία οὔτε συνεχὴς ἔξω τῆς κύκλῳ φορᾶς ἔστω τοσαῦθ’ ἡμῖν εἰρημένα.

Κεφάλαιο 9

Ὅτι δὲ τῶν φορῶν ἡ κυκλοφορία πρώτη, δῆλον. πᾶσα γὰρ φορά, ὥσπερ καὶ πρότερον εἴπομεν, ἢ κύκλῳ ἢ ἐπ’ εὐθείας ἢ μικτή. ταύτης δὲ ἀνάγκη προτέρας εἶναι ἐκείνας· ἐξ ἐκείνων γὰρ συνέστηκεν. τῆς δ’ εὐθείας ἡ κύκλῳ· ἁπλῆ γὰρ καὶ τέλειος μᾶλλον. ἄπειρον μὲν γὰρ οὐκ ἔστιν εὐθεῖαν φέρεσθαι (τὸ γὰρ οὕτως ἄπειρον οὐκ ἔστιν· ἅμα δ’ οὐδ’ εἰ ἦν, ἐκινεῖτ’ ἂν οὐδέν· οὐ γὰρ γίγνεται τὸ ἀδύνατον, διελθεῖν δὲ τὴν ἄπειρον ἀδύνατον)· ἡ δ’ ἐπὶ τῆς πεπερασμένης ἀνακάμπτουσα μὲν συνθετὴ καὶ δύο κινήσεις, μὴ ἀνακάμπτουσα δὲ ἀτελὴς καὶ φθαρτή. πρότερον δὲ καὶ φύσει καὶ λόγῳ καὶ χρόνῳ τὸ τέλειον μὲν τοῦ ἀτελοῦς, τοῦ φθαρτοῦ δὲ τὸ ἄφθαρτον. ἔτι προτέρα ἣν ἐνδέχεται ἀΐδιον εἶναι τῆς μὴ ἐνδεχομένης· τὴν μὲν οὖν κύκλῳ ἐνδέχεται ἀΐδιον εἶναι, τῶν δὲ ἄλλων οὔτε φορὰν οὔτε ἄλλην οὐδεμίαν· στάσιν γὰρ δεῖ γενέσθαι, εἰ δὲ στάσις, ἔφθαρται ἡ κίνησις. εὐλόγως δὲ συμβέβηκε τὸ τὴν κύκλῳ μίαν εἶναι καὶ συνεχῆ, καὶ μὴ τὴν ἐπ’ εὐθείας· τῆς μὲν γὰρ ἐπ’ εὐθείας ὥρισται καὶ ἀρχὴ καὶ τέλος καὶ μέσον, καὶ πάντ’ ἔχει ἐν αὑτῇ, ὥστ’ ἔστιν ὅθεν ἄρξεται τὸ κινούμενον καὶ οὗ τελευτήσει (πρὸς γὰρ τοῖς πέρασιν ἠρεμεῖ πᾶν, ἢ ὅθεν ἢ οὗ), τῆς δὲ περιφεροῦς ἀόριστα· τί γὰρ μᾶλλον ὁποιονοῦν πέρας τῶν ἐπὶ τῆς γραμμῆς; ὁμοίως γὰρ ἕκαστον καὶ ἀρχὴ καὶ μέσον καὶ τέλος, ὥστ’ ἀεί τε (265b.) εἶναι ἐν ἀρχῇ καὶ ἐν τέλει καὶ μηδέποτε. διὸ κινεῖταί τε καὶ ἠρεμεῖ πως ἡ σφαῖρα· τὸν αὐτὸν γὰρ κατέχει τόπον. αἴτιον δ’ ὅτι πάντα συμβέβηκε ταῦτα τῷ κέντρῳ· καὶ γὰρ ἀρχὴ καὶ μέσον τοῦ μεγέθους καὶ τέλος ἐστίν, ὥστε διὰ τὸ ἔξω εἶναι τοῦτο τῆς περιφερείας οὐκ ἔστιν ὅπου τὸ φερόμενον ἠρεμήσει ὡς διεληλυθός (ἀεὶ γὰρ φέρεται περὶ τὸ μέσον, ἀλλ’ οὐ πρὸς τὸ ἔσχατον), διὰ δὲ τὸ τοῦτο μένειν ἀεί τε ἠρεμεῖ πως τὸ ὅλον καὶ κινεῖται συνεχῶς. συμβαίνει δ’ ἀντιστρόφως· καὶ γὰρ ὅτι μέτρον τῶν κινήσεων ἡ περιφορά, πρώτην ἀναγκαῖον αὐτὴν εἶναι (ἅπαντα γὰρ μετρεῖται τῷ πρώτῳ), καὶ διότι πρώτη, μέτρον ἐστὶν τῶν ἄλλων. ἔτι δὲ καὶ ὁμαλῆ ἐνδέχεται εἶναι τὴν κύκλῳ μόνην· τὰ γὰρ ἐπ’ εὐθείας ἀνωμαλῶς ἀπὸ τῆς ἀρχῆς φέρεται καὶ πρὸς τὸ τέλος· πάντα γὰρ ὅσῳπερ ἂν ἀφίστηται [πλεῖον] τοῦ ἠρεμοῦντος, φέρεται θᾶττον· τῆς δὲ κύκλῳ μόνης οὔτ’ ἀρχὴ οὔτε τέλος ἐν αὐτῇ πέφυκεν, ἀλλ’ ἐκτός. ὅτι δ’ ἡ κατὰ τόπον φορὰ πρώτη τῶν κινήσεων, μαρτυροῦσι πάντες ὅσοι περὶ κινήσεως πεποίηνται μνείαν· τὰς γὰρ ἀρχὰς αὐτῆς ἀποδιδόασιν τοῖς κινοῦσι τοιαύτην κίνησιν. διάκρισις γὰρ καὶ σύγκρισις κινήσεις κατὰ τόπον εἰσίν, οὕτω δὲ κινοῦσιν ἡ φιλία καὶ τὸ νεῖκος· τὸ μὲν γὰρ διακρίνει, τὸ δὲ συγκρίνει αὐτῶν. καὶ τὸν νοῦν δέ φησιν Ἀναξαγόρας διακρίνειν τὸν κινήσαντα πρῶτον. ὁμοίως δὲ καὶ ὅσοι τοιαύτην μὲν οὐδεμίαν αἰτίαν λέγουσιν, διὰ δὲ τὸ κενὸν κινεῖσθαί φασιν· καὶ γὰρ οὗτοι τὴν κατὰ τόπον κίνησιν κινεῖσθαι τὴν φύσιν λέγουσιν (ἡ γὰρ διὰ τὸ κενὸν κίνησις φορά ἐστιν καὶ ὡς ἐν τόπῳ), τῶν δ’ ἄλλων οὐδεμίαν ὑπάρχειν τοῖς πρώτοις ἀλλὰ τοῖς ἐκ τούτων οἴονται· αὐξάνεσθαι γὰρ καὶ φθίνειν καὶ ἀλλοιοῦσθαι συγκρινομένων καὶ διακρινομένων τῶν ἀτόμων σωμάτων φασίν. τὸν αὐτὸν δὲ τρόπον καὶ ὅσοι διὰ πυκνότητα ἢ μανότητα κατασκευάζουσι γένεσιν καὶ φθοράν· συγκρίσει γὰρ καὶ διακρίσει ταῦτα διακοσμοῦσιν. ἔτι δὲ παρὰ τούτους οἱ τὴν ψυχὴν αἰτίαν ποιοῦντες κινήσεως· τὸ γὰρ αὐτὸ αὑτὸ κινοῦν ἀρχὴν εἶναί φασιν τῶν κινουμένων, κινεῖ δὲ τὸ ζῷον καὶ πᾶν τὸ ἔμ(266a.) ψυχον τὴν κατὰ τόπον αὐτὸ κίνησιν. καὶ κυρίως δὲ κινεῖσθαί φαμεν μόνον τὸ κινούμενον [τὴν] κατὰ τόπον [κίνησιν]· ἂν δ’ ἠρεμῇ μὲν ἐν τῷ αὐτῷ, αὐξάνηται δ’ ἢ φθίνῃ ἢ ἀλλοιούμενον τυγχάνῃ, πῂ κινεῖσθαι, ἁπλῶς δὲ κινεῖσθαι οὔ φαμεν. ὅτι μὲν οὖν ἀεί τε κίνησις ἦν καὶ ἔσται τὸν ἅπαντα χρόνον, καὶ τίς ἀρχὴ τῆς ἀϊδίου κινήσεως, ἔτι δὲ τίς πρώτη κίνησις, καὶ τίνα κίνησιν ἀΐδιον ἐνδέχεται μόνην εἶναι, καὶ τὸ κινοῦν πρῶτον ὅτι ἀκίνητον, εἴρηται.

Κεφάλαιο 10

Ὅτι δὲ τοῦτ’ ἀμερὲς ἀναγκαῖον εἶναι καὶ μηδὲν ἔχειν μέγεθος, νῦν λέγωμεν, πρῶτον περὶ τῶν προτέρων αὐτοῦ διορίσαντες.

τούτων δ’ ἓν μέν ἐστιν ὅτι οὐχ οἷόν τε οὐδὲν πεπερασμένον κινεῖν ἄπειρον χρόνον. τρία γὰρ ἔστιν, τὸ κινοῦν, τὸ κινούμενον, τὸ ἐν ᾧ τρίτον, ὁ χρόνος. ταῦτα δὲ ἢ πάντα ἄπειρα ἢ πάντα πεπερασμένα ἢ ἔνια, οἷον τὰ δύο ἢ τὸ ἕν. ἔστω δὴ τὸ Α τὸ κινοῦν, τὸ δὲ κινούμενον Β, χρόνος ἄπειρος ἐφ’ οὗ Γ. τὸ δὴ Δ τῆς Β κινείτω τι μέρος, τὸ ἐφ’ οὗ Ε. οὐ δὴ ἐν ἴσῳ τῷ Γ· ἐν πλείονι γὰρ τὸ μεῖζον. ὥστ’ οὐκ ἄπειρος ὁ χρόνος ὁ τὸ Ζ. οὕτω δὴ τῇ Δ προστιθεὶς καταναλώσω τὸ Α καὶ τῇ Ε τὸ Β· τὸν δὲ χρόνον οὐ καταναλώσω ἀεὶ ἀφαιρῶν ἴσον· ἄπειρος γάρ· ὥστε ἡ πᾶσα Α τὴν ὅλην Β κινήσει ἐν πεπερασμένῳ χρόνῳ τοῦ Γ. οὐκ ἄρα οἷόν τε ὑπὸ πεπερασμένου κινεῖσθαι οὐδὲν ἄπειρον κίνησιν.

ὅτι μὲν οὖν οὐκ ἐνδέχεται τὸ πεπερασμένον ἄπειρον κινεῖν χρόνον, φανερόν· ὅτι δ’ ὅλως οὐκ ἐνδέχεται ἐν πεπερασμένῳ μεγέθει ἄπειρον εἶναι δύναμιν, ἐκ τῶνδε δῆλον. ἔστω γὰρ ἡ πλείων δύναμις ἀεὶ ἡ τὸ ἴσον ἐν ἐλάττονι χρόνῳ ποιοῦσα, οἷον θερμαίνουσα ἢ γλυκαίνουσα ἢ ῥιπτοῦσα καὶ ὅλως κινοῦσα. ἀνάγκη ἄρα καὶ ὑπὸ τοῦ πεπερασμένου μὲν ἄπειρον δ’ ἔχοντος δύναμιν πάσχειν τι τὸ πάσχον, καὶ πλεῖον ἢ ὑπ’ ἄλλου· πλείων γὰρ ἡ ἄπειρος. ἀλλὰ μὴν χρόνον γε οὐκ ἐνδέχεται εἶναι οὐδένα. εἰ γάρ ἐστιν ὁ ἐφ’ οὗ Α χρόνος ἐν ᾧ ἡ ἄπειρος ἰσχὺς ἐθέρμανεν ἢ ἔωσεν, ἐν τῷ δὲ ΑΒ πεπερασμένη τις, πρὸς ταύτην (266b.) μείζω λαμβάνων ἀεὶ πεπερασμένην ἥξω ποτὲ εἰς τὸ ἐν τῷ Α χρόνῳ κεκινηκέναι· πρὸς πεπερασμένον γὰρ ἀεὶ προστιθεὶς ὑπερβαλῶ παντὸς ὡρισμένου, καὶ ἀφαιρῶν ἐλλείψω ὡσαύτως. ἐν ἴσῳ ἄρα χρόνῳ κινήσει τῇ ἀπείρῳ ἡ πεπερασμένη. τοῦτο δὲ ἀδύνατον· οὐδὲν ἄρα πεπερασμένον ἐνδέχε ται ἄπειρον δύναμιν ἔχειν. οὐ τοίνυν οὐδ’ ἐν ἀπείρῳ πεπε(6) ρασμένην· καίτοι ἐνδέχεται ἐν ἐλάττονι μεγέθει πλείω δύναμιν εἶναι· ἀλλ’ ἔτι μᾶλλον ἐν μείζονι πλείω. ἔστω δὴ τὸ ἐφ’ οὗ ΑΒ ἄπειρον. τὸ δὴ ΒΓ ἔχει δύναμίν τινα, ἣ ἔν τινι χρόνῳ ἐκίνησεν τὴν Δ, ἐν τῷ χρόνῳ ἐφ’ οὗ ΕΖ. ἂν δὴ τῆς ΒΓ διπλασίαν λαμβάνω, ἐν ἡμίσει χρόνῳ τοῦ ΕΖ (ἔστω γὰρ αὕτη ἡ ἀναλογία), ὥστε ἐν τῷ ΖΘ κινήσει. οὐκοῦν οὕτω λαμβάνων ἀεὶ τὴν μὲν ΑΒ οὐδέποτε διέξειμι, τοῦ χρόνου δὲ τοῦ δοθέντος αἰεὶ ἐλάττω λήψομαι. ἄπειρος ἄρα ἡ δύναμις ἔσται· πάσης γὰρ πεπερασμένης ὑπερβάλλει δυνάμεως, εἴ γε πάσης πεπερασμένης δυνάμεως ἀνάγκη πεπερασμένον εἶναι καὶ τὸν χρόνον (εἰ γὰρ ἔν τινι ἡ τοσηδί, ἡ μείζων ἐν ἐλάττονι μὲν ὡρισμένῳ δὲ χρόνῳ κινήσει, κατὰ τὴν ἀντιστροφὴν τῆς ἀναλογίας)· ἄπειρος δὲ πᾶσα δύναμις, ὥσπερ καὶ πλῆθος καὶ μέγεθος τὸ ὑπερβάλλον παντὸς ὡρισμένου. ἔστιν δὲ καὶ ὧδε δεῖξαι τοῦτο· ληψόμεθα γάρ τινα δύναμιν τὴν αὐτὴν τῷ γένει τῇ ἐν τῷ ἀπείρῳ μεγέθει, ἐν πεπερασμένῳ μεγέθει οὖσαν, ἣ καταμετρήσει τὴν ἐν τῷ ἀπείρῳ πεπερασμένην δύναμιν.

ὅτι μὲν οὖν οὐκ ἐνδέχεται ἄπειρον εἶναι δύναμιν ἐν πεπερασμένῳ μεγέθει, οὐδ’ ἐν ἀπείρῳ πεπερασμένην, ἐκ τούτων δῆλον. περὶ δὲ τῶν φερομένων ἔχει καλῶς διαπορῆσαί τινα ἀπορίαν πρῶτον. εἰ γὰρ πᾶν τὸ κινούμενον κινεῖται ὑπὸ τινός, ὅσα μὴ αὐτὰ ἑαυτὰ κινεῖ, πῶς κινεῖται ἔνια συνεχῶς μὴ ἁπτομένου τοῦ κινήσαντος, οἷον τὰ ῥιπτούμενα; εἰ δ’ ἅμα κινεῖ καὶ ἄλλο τι ὁ κινήσας, οἷον τὸν ἀέρα, ὃς κινούμενος κινεῖ, ὁμοίως ἀδύνατον τοῦ πρώτου μὴ ἁπτομένου μηδὲ κινοῦντος κινεῖσθαι, ἀλλ’ ἅμα πάντα <καὶ> κινεῖσθαι καὶ (267a.) πεπαῦσθαι ὅταν τὸ πρῶτον κινοῦν παύσηται, καὶ εἰ ποιεῖ, ὥσπερ ἡ λίθος, οἷόν τε κινεῖν ὃ ἐκίνησεν. ἀνάγκη δὴ τοῦτο μὲν λέγειν, ὅτι τὸ πρῶτον κινῆσαν ποιεῖ οἷόν τε κινεῖν ἢ τὸν ἀέρα [τοιοῦτον] ἢ τὸ ὕδωρ ἤ τι ἄλλο τοιοῦτον ὃ πέφυκε κινεῖν καὶ κινεῖσθαι· ἀλλ’ οὐχ ἅμα παύεται κινοῦν καὶ κινούμενον, ἀλλὰ κινούμενον μὲν ἅμα ὅταν ὁ κινῶν παύσηται κινῶν, κινοῦν δὲ ἔτι ἐστίν. διὸ καὶ κινεῖ τι ἄλλο ἐχόμενον· καὶ ἐπὶ τούτου ὁ αὐτὸς λόγος. παύεται δέ, ὅταν ἀεὶ ἐλάττων ἡ δύναμις τοῦ κινεῖν ἐγγίγνηται τῷ ἐχομένῳ. τέλος δὲ παύεται, ὅταν μηκέτι ποιήσῃ τὸ πρότερον κινοῦν, ἀλλὰ κινούμενον μόνον. ταῦτα δ’ ἀνάγκη ἅμα παύεσθαι, τὸ μὲν κινοῦν τὸ δὲ κινούμενον, καὶ τὴν ὅλην κίνησιν. αὕτη μὲν οὖν ἐν τοῖς ἐνδεχομένοις ὁτὲ μὲν κινεῖσθαι ὁτὲ δ’ ἠρεμεῖν ἐγγίγνεται ἡ κίνησις, καὶ οὐ συνεχής, ἀλλὰ φαίνεται· ἢ γὰρ ἐφεξῆς ὄντων ἢ ἁπτομένων ἐστίν· οὐ γὰρ ἓν τὸ κινοῦν, ἀλλ’ ἐχόμενα ἀλλήλων. διὸ ἐν ἀέρι καὶ ὕδατι γίγνεται ἡ τοιαύτη κίνησις, ἣν λέγουσί τινες ἀντιπερίστασιν εἶναι. ἀδύνατον δὲ ἄλλως τὰ ἀπορηθέντα λύειν, εἰ μὴ τὸν εἰρημένον τρόπον. ἡ δ’ ἀντιπερίστασις ἅμα πάντα κινεῖσθαι ποιεῖ καὶ κινεῖν, ὥστε καὶ παύεσθαι· νῦν δὲ φαίνεταί τι ἓν κινούμενον συνεχῶς· ὑπὸ τίνος οὖν; οὐ γὰρ ὑπὸ τοῦ αὐτοῦ. ἐπεὶ δ’ ἐν τοῖς οὖσιν ἀνάγκη κίνησιν εἶναι συνεχῆ, αὕτη δὲ μία ἐστίν, ἀνάγκη δὲ τὴν μίαν μεγέθους τέ τινος εἶναι (οὐ γὰρ κινεῖται τὸ ἀμέγεθες) καὶ ἑνὸς καὶ ὑφ’ ἑνός (οὐ γὰρ ἔσται συνεχής, ἀλλ’ ἐχομένη ἑτέρα ἑτέρας καὶ διῃρημένη), τὸ δὴ κινοῦν εἰ ἕν, ἢ κινούμενον κινεῖ ἢ ἀκίνητον ὄν. εἰ μὲν δὴ κινού μενον, συνακολουθεῖν δεήσει καὶ μεταβάλλειν αὐτό, ἅμα δὲ (267b.) κινεῖσθαι ὑπό τινος, ὥστε στήσεται καὶ ἥξει εἰς τὸ κινεῖσθαι ὑπὸ ἀκινήτου. τοῦτο γὰρ οὐκ ἀνάγκη συμμεταβάλλειν, ἀλλ’ ἀεί τε δυνήσεται κινεῖν (ἄπονον γὰρ τὸ οὕτω κινεῖν) καὶ ὁμαλὴς αὕτη ἡ κίνησις ἢ μόνη ἢ μάλιστα· οὐ γὰρ ἔχει μεταβολὴν τὸ κινοῦν οὐδεμίαν. δεῖ δὲ οὐδὲ τὸ κινούμενον πρὸς ἐκεῖνο ἔχειν μεταβολήν, ἵνα ὁμοία ᾖ ἡ κίνησις. ἀνάγκη δὴ ἢ ἐν μέσῳ ἢ ἐν κύκλῳ εἶναι· αὗται γὰρ αἱ ἀρχαί. ἀλλὰ τάχιστα κινεῖται τὰ ἐγγύτατα τοῦ κινοῦντος. τοιαύτη δ’ ἡ τοῦ κύκλου κίνησις· ἐκεῖ ἄρα τὸ κινοῦν. ἔχει δ’ ἀπορίαν εἰ ἐνδέχεταί τι κινούμενον κινεῖν συνεχῶς, ἀλλὰ μὴ ὥσπερ τὸ ὠθοῦν πάλιν καὶ πάλιν, τῷ ἐφεξῆς εἶναι συνεχῶς· ἢ γὰρ αὐτὸ δεῖ ἀεὶ ὠθεῖν ἢ ἕλκειν ἢ ἄμφω, ἢ ἕτερόν τι ἐκδεχόμενον ἄλλο παρ’ ἄλλου, ὥσπερ πάλαι ἐλέχθη ἐπὶ τῶν ῥιπτουμένων, εἰ διαιρετὸς ὢν ὁ ἀὴρ [ἢ τὸ ὕδωρ] κινεῖ ἄλλος ἀεὶ κινούμενος. ἀμφοτέρως δ’ οὐχ οἷόν τε μίαν εἶναι, ἀλλ’ ἐχομένην. μόνη ἄρα συνεχὴς ἣν κινεῖ τὸ ἀκίνητον· ἀεὶ γὰρ ὁμοίως ἔχον καὶ πρὸς τὸ κινούμενον ὁμοίως ἕξει καὶ συνεχῶς.

διωρισμένων δὲ τούτων φανερὸν ὅτι ἀδύνατον τὸ πρῶτον κινοῦν καὶ ἀκίνητον ἔχειν τι μέγεθος. εἰ γὰρ μέγεθος ἔχει, ἀνάγκη ἤτοι πεπερασμένον αὐτὸ εἶναι ἢ ἄπειρον. ἄπειρον μὲν οὖν ὅτι οὐκ ἐνδέχεται μέγεθος εἶναι, δέδεικται πρότερον ἐν τοῖς φυσικοῖς· ὅτι δὲ τὸ πεπερασμένον ἀδύνατον ἔχειν δύναμιν ἄπειρον, καὶ ὅτι ἀδύνατον ὑπὸ πεπερασμένου κινεῖσθαί τι ἄπειρον χρόνον, δέδεικται νῦν. τὸ δέ γε πρῶτον κινοῦν ἀΐδιον κινεῖ κίνησιν καὶ ἄπειρον χρόνον. φανερὸν τοίνυν ὅτι ἀδιαίρετόν ἐστι καὶ ἀμερὲς καὶ οὐδὲν ἔχον μέγεθος.

Κεφάλαιο 1

(268a.) Ἡ περὶ φύσεως ἐπιστήμη σχεδὸν ἡ πλείστη φαίνεται περί τε σώματα καὶ μεγέθη καὶ τὰ τούτων οὖσα πάθη καὶ τὰς κινήσεις, ἔτι δὲ περὶ τὰς ἀρχάς, ὅσαι τῆς τοιαύτης οὐσίας εἰσίν· τῶν γὰρ φύσει συνεστώτων τὰ μέν ἐστι σώματα καὶ μεγέθη, τὰ δ’ ἔχει σῶμα καὶ μέγεθος, τὰ δ’ ἀρχαὶ τῶν ἐχόντων εἰσίν.

Συνεχὲς μὲν οὖν ἐστι τὸ διαιρετὸν εἰς ἀεὶ διαιρετά, σῶμα δὲ τὸ πάντῃ διαιρετόν. Μεγέθους δὲ τὸ μὲν ἐφ’ ἓν γραμμή, τὸ δ’ ἐπὶ δύο ἐπίπεδον, τὸ δ’ ἐπὶ τρία σῶμα· καὶ παρὰ ταῦτα οὐκ ἔστιν ἄλλο μέγεθος διὰ τὸ τὰ τρία πάντα εἶναι καὶ τὸ τρὶς πάντῃ. Καθάπερ γάρ φασι καὶ οἱ Πυθαγόρειοι, τὸ πᾶν καὶ τὰ πάντα τοῖς τρισὶν ὥρισται· τελευτὴ γὰρ καὶ μέσον καὶ ἀρχὴ τὸν ἀριθμὸν ἔχει τὸν τοῦ παντός, ταῦτα δὲ τὸν τῆς τριάδος. Διὸ παρὰ τῆς φύσεως εἰληφότες ὥσπερ νόμους ἐκείνης, καὶ πρὸς τὰς ἁγιστείας χρώμεθα τῶν θεῶν τῷ ἀριθμῷ τούτῳ. Ἀποδίδομεν δὲ καὶ τὰς προσηγορίας τὸν τρόπον τοῦτον· τὰ γὰρ δύο ἄμφω μὲν λέγομεν καὶ τοὺς δύο ἀμφοτέρους, πάντας δ’ οὐ λέγομεν, ἀλλὰ κατὰ τῶν τριῶν ταύτην τὴν κατηγορίαν κατάφαμεν πρῶτον. Ταῦτα δ’, ὥσπερ εἴρηται, διὰ τὸ τὴν φύσιν αὐτὴν οὕτως ἐπάγειν ἀκολουθοῦμεν.

Ὥστ’ ἐπεὶ τὰ πάντα καὶ τὸ πᾶνκαὶ τὸ τέλειον οὐ κατὰ τὴν ἰδέαν διαφέρουσιν ἀλλήλων, ἀλλ’ εἴπερ, ἐν τῇ ὕλῃ καὶ ἐφ’ ὧν λέγονται, τὸ σῶμα μόνον ἂν εἴη τῶν μεγεθῶν τέλειον· μόνον γὰρ ὥρισται τοῖς τρισίν, τοῦτο δ’ ἐστὶ πᾶν. Τριχῇ δὲ ὂν διαιρετὸν πάντῃ διαιρετόν ἐστιν· τῶν δ’ ἄλλων τὸ μὲν ἐφ’ ἓν τὸ δ’ ἐπὶ δύο· ὡς γὰρ τοῦ ἀριθμοῦ τετυχήκασιν, οὕτω καὶ τῆς διαιρέσεωςκαὶ τοῦ συνεχοῦς· τὸ μὲν γὰρ ἐφ’ ἓν συνεχές, τὸ δ’ ἐπὶ δύο, τὸ δὲ πάντῃ τοιοῦτον. Ὅσα μὲν οὖν διαιρετὰ τῶν μεγεθῶν, καὶ συνεχῆ ταῦτα· εἰ δὲ καὶ τὰ συνεχῆ πάντα διαιρετά, οὔπω δῆλον ἐκ τῶν νῦν.

Ἀλλ’ ἐκεῖνο μὲν δῆλον, ὡς οὐκ (268b.) ἔστιν εἰς ἄλλο γένος μετάβασις, ὥσπερ ἐκ μήκους εἰς ἐπιφάνειαν, εἰς δὲ σῶμα ἐξ ἐπιφανείας· οὐ γὰρ ἂν ἔτι τὸ τοιοῦτον τέλειον εἴη μέγεθος· ἀνάγκη γὰρ γίγνεσθαι τὴν ἔκβασιν κατὰ τὴν ἔλλειψιν, οὐχ οἷόν τε δὲ τὸ τέλειον ἐλλείπειν· πάντῃ γάρ ἐστιν.

Τῶν μὲν οὖν ἐν μορίου εἴδει σωμάτων κατὰ τὸν λόγον ἕκαστον τοιοῦτόν ἐστιν· πάσας γὰρ ἔχει τὰς διαστάσεις· ἀλλ’ ὥρισται πρὸς τὸ πλησίον ἁφῇ· διὸ τρόπον τινὰ πολλὰ τῶν σωμάτων ἕκαστόν ἐστιν. Τὸ δὲ πᾶν οὗ ταῦτα μόρια, τέλειον ἀναγκαῖον εἶναι καὶ καθάπερ τοὔνομα ημαίνει πάντῃ, καὶ μὴ τῇ μὲν τῇ δὲ μή.

Κεφάλαιο 2

Περὶ μὲν οὖν τῆς τοῦ παντὸς φύσεως, εἴτ’ ἄπειρός ἐστι κατὰ τὸ μέγεθος εἴτε πεπέρανται τὸν σύνολον ὄγκον, ὕστερον ἐπισκεπτέον· περὶ δὲ τῶν κατ’ εἶδος αὐτοῦ μορίων νῦν λέγωμεν ἀρχὴν ποιησάμενοι τήνδε.

Πάντα γὰρ τὰ φυσικὰ σώματα καὶ μεγέθη καθ’ αὐτὰ κινητὰ λέγομεν εἶναι κατὰ τόπον· τὴν γὰρ φύσιν κινήσεως ἀρχὴν εἶναί φαμεν αὐτοῖς.

Πᾶσα δὲ κίνησις ὅση κατὰ τόπον, ἣν καλοῦμεν φοράν, ἢ εὐθεῖα ἢ κύκλῳ ἢ ἐκ τούτων μικτή· ἁπλαῖ γὰρ αὗται δύο μόναι. Αἴτιον δ’ ὅτι καὶ τὰ μεγέθη ταῦτα ἁπλᾶ μόνον, ἥ τ’ εὐθεῖα καὶ ἡ περιφερής. Κύκλῳ μὲν οὖν ἐστιν ἡ περὶ τὸ μέσον, εὐθεῖα δ’ ἡ ἄνω καὶ κάτω. Λέγω δ’ ἄνω μὲν τὴν ἀπὸ τοῦ μέσου, κάτω δὲ τὴν ἐπὶ τὸ μέσον. Ὥστ’ ἀνάγκη πᾶσαν εἶναι τὴν ἁπλῆν φορὰν τὴν μὲν ἀπὸ τοῦ μέσου, τὴν δ’ ἐπὶ τὸ μέσον, τὴν δὲ περὶ τὸ μέσον. Καὶ ἔοικεν ἠκολουθηκέναι κατὰ λόγον τοῦτο τοῖς ἐξ ἀρχῆς· τό τε γὰρ σῶμα ἀπετελέσθη ἐν τρισὶ καὶ ἡ κίνησις αὐτοῦ. Ἐπεὶ δὲ τῶν σωμάτων τὰ μέν ἐστιν ἁπλᾶ τὰ δὲ σύνθετα ἐκ τούτων (λέγω δ’ ἁπλᾶ μὲν ὅσα κινήσεως ἀρχὴν ἔχει κατὰ φύσιν, οἷον πῦρ καὶ γῆν καὶ τὰ τούτων εἴδη καὶ τὰ συγγενῆ τούτοις), ἀνάγκη καὶ τὰς κινήσεις εἶναι τὰς μὲν ἁπλᾶς τὰς δὲ μικτάς πως, (269a.) καὶ τῶν μὲν ἁπλῶν ἁπλᾶς, μικτὰς δὲ τῶν συνθέτων, κινεῖσθαι δὲ κατὰ τὸ ἐπικρατοῦν.

Εἴπερ οὖν ἐστιν ἁπλῆ κίνησις, ἁπλῆ δ’ ἡ κύκλῳ κίνησις, καὶ τοῦ τε ἁπλοῦ σώματος ἁπλῆ ἡ κίνησις καὶ ἡ ἁπλῆ κίνησις ἁπλοῦ σώματος (καὶ γὰρ ἂν συνθέτου ᾖ, κατὰ τὸ ἐπικρατοῦν ἔσται), ἀναγκαῖον εἶναί τι σῶμα ἁπλοῦν ὃ πέφυκε φέρεσθαι τὴν κύκλῳ κίνησιν κατὰ τὴν ἑαυτοῦ φύσιν· βίᾳ μὲν γὰρ ἐνδέχεται τὴν ἄλλου καὶ ἑτέρου, κατὰ φύσιν δὲ ἀδύνατον, εἴπερ μία ἑκάστου κίνησις ἡ κατὰ φύσιν τῶν ἁπλῶν.

Ἔτι εἰ ἡ παρὰ φύσιν ἐναντία τῇ κατὰ φύσιν καὶ ἓν ἑνὶ ἐναντίον, ἀνάγκη, ἐπεὶ ἁπλῆ ἡ κύκλῳ, εἰ μὴ ἔσται κατὰ φύσιν τοῦ φερομένου σώματος, παρὰ φύσιν αὐτοῦ εἶναι. Εἰ οὖν πῦρ ἢ ἄλλο τι τῶν τοιούτων ἐστὶ τὸ κύκλῳ φερόμενον, ἐναντία ἡ κατὰ φύσιν αὐτοῦ φορὰ ἔσται τῇ κύκλῳ. Ἀλλ’ ἓν ἑνὶ ἐναντίον· ἡ δ’ ἄνω καὶ κάτω ἀλλήλαις ἐναντίαι. Εἰ δ’ ἕτερόν τί ἐστι σῶμα τὸ φερόμενον κύκλῳ παρὰ φύσιν, ἔσται τις αὐτοῦ ἄλλη κίνησις κατὰ φύσιν. Ἀλλὰ τοῦτ’ ἀδύνατον· εἰ μὲν γὰρ ἡ ἄνω, πῦρ ἔσται ἢ ἀήρ, εἰ δ’ ἡ κάτω, ὕδωρ ἢ γῆ.

Ἀλλὰ μὴν καὶ πρώτην γε ἀναγκαῖον εἶναι τὴν τοιαύτην φοράν. Τὸ γὰρ τέλειον πρότερον τῇ φύσει τοῦ ἀτελοῦς, ὁ δὲ κύκλος τῶν τελείων, εὐθεῖα δὲ γραμμὴ οὐδεμία· οὔτε γὰρ ἡ ἄπειρος (ἔχοι γὰρ ἂν πέρας καὶ τέλος) οὔτε τῶν πεπερασμένων οὐδεμία (πασῶν γάρ ἐστί τι ἐκτός· αὐξῆσαι γὰρ ἐνδέχεται ὁποιανοῦν). Ὥστ' εἴπερ ἡ μὲν προτέρα κίνησις προτέρου τῇ φύσει σώματος, ἡ δὲ κύκλῳ προτέρα τῆς εὐθείας, ἡ δ' ἐπ' εὐθείας τῶν ἁπλῶν σωμάτων ἐστί (τό τε γὰρ πῦρ ἐπ' εὐθείας ἄνω φέρεται καὶ τὰ γεηρὰ κάτω πρὸς τὸ μέσον), ἀνάγκη καὶ τὴν κύκλῳ κίνησιν τῶν ἁπλῶν τινος εἶναι σωμάτων· τῶν γὰρ μικτῶν τὴν φορὰν ἔφαμεν εἶναι κατὰ τὸ ἐπικρατοῦν ἐν τῇ μίξει τῶν ἁπλῶν. Ἔκ τε δὴ τούτων φανερὸν ὅτι πέφυκέ τις οὐσία σώματος ἄλλη παρὰ τὰς ἐνταῦθα συστάσεις, θειοτέρα καὶ προτέρα τούτων ἁπάντων, κἂν εἴ τις ἔτι λάβοι πᾶσαν εἶναι κίνησιν ἢ κατὰ φύσιν ἢ παρὰ φύσιν, καὶ τὴν ἄλλῳ παρὰ φύσιν ἑτέρῳ κατὰ φύσιν, οἷον ἡ ἄνω καὶ ἡ κάτω πέπονθεν· ἡ μὲν γὰρ τῷ πυρί, ἡ δὲ τῇ γῇ παρὰ φύσιν καὶ κατὰ φύσιν· (269b.) ὥστ' ἀναγκαῖον καὶ τὴν κύκλῳ κίνησιν, ἐπειδὴ τούτοις παρὰ φύσιν, ἑτέρου τινὸς εἶναι κατὰ φύσιν. Πρὸς δὲ τούτοις εἰ μέν ἐστιν ἡ κύκλῳ τινὶ φορὰ κατὰ φύσιν, δῆλον ὡς εἴη ἄν τι σῶμα τῶν ἁπλῶν καὶ πρώτων, ὃ πέφυκεν, ὥσπερ τὸ πῦρ ἄνω καὶ ἡ γῆ κάτω, ἐκεῖνο κύκλῳ φέρεσθαι κατὰ φύσιν. Εἰ δὲ παρὰ φύσιν φέρεται τὰ φερόμενα κύκλῳ τὴν πέριξ φοράν, θαυμαστὸν καὶ παντελῶς ἄλογον τὸ μόνην εἶναι συνεχῆ ταύτην τὴν κίνησιν καὶ ἀΐδιον, οὖσαν παρὰ φύσιν· φαίνεται γὰρ ἔν γε τοῖς ἄλλοις τάχιστα φθειρόμενα τὰ παρὰ φύσιν.

Ὥστ' εἴπερ ἐστὶ πῦρ τὸ φερόμενον, καθάπερ φασί τινες, οὐδὲν ἧττον αὐτῷ παρὰ φύσιν ἡ κίνησίς ἐστιν αὕτη ἢ ἡ κάτω· πυρὸς γὰρ κίνησιν ὁρῶμεν τὴν ἀπὸ τοῦ μέσου κατ' εὐθεῖαν.

Διόπερ ἐξ ἁπάντων ἄν τις τούτων συλλογιζόμενος πιστεύσειεν ὡς ἔστι τι παρὰ τὰ σώματα τὰ δεῦρο καὶ περὶ ἡμᾶς ἕτερον κεχωρισμένον, τοσούτῳ τιμιωτέραν ἔχον τὴν φύσιν ὅσῳπερ ἀφέστηκε τῶν ἐνταῦθα πλεῖον.

Κεφάλαιο 3

Ἐπεὶ δὲ τὰ μὲν ὑπόκειται τὰ δ’ ἀποδέδεικται τῶν εἰρημένων, φανερὸν ὅτι οὔτε κουφότητα οὔτε βάρος ἔχει σῶμα ἅπαν, δεῖ δὲ ὑποθέσθαι τί λέγομεν τὸ βαρὺ καὶ τὸ κοῦφον, νῦν μὲν ἱκανῶς ὡς πρὸς τὴν παροῦσαν χρείαν, ἀκριβέστερον δὲ πάλιν, ὅταν ἐπισκοπῶμεν περὶ τῆς οὐσίας αὐτῶν. Βαρὺ μὲν οὖν ἔστω τὸ φέρεσθαι πεφυκὸς ἐπὶ τὸ μέσον, κοῦφον δὲ τὸ ἀπὸ τοῦ μέσου, βαρύτατον δὲ τὸ πᾶσιν ὑφιστάμενον τοῖς κάτω φερομένοις, κουφότατον δὲ τὸ πᾶσιν ἐπιπολάζον τοῖς ἄνω φερομένοις.

Ἀνάγκη δὴ πᾶν τὸ φερόμενον ἢ κάτω ἢ ἄνω ἢ κουφότητ’ ἔχειν ἢ βάρος ἢ ἄμφω, μὴ πρὸς τὸ αὐτὸ δέ· πρὸς ἄλληλα γάρ ἐστι βαρέα καὶ κοῦφα, οἷον ἀὴρ πρὸς ὕδωρ, καὶ πρὸς γῆν ὕδωρ. Τὸ δὲ κύκλῳ σῶμα φερόμενον ἀδύνατον ἔχειν βάρος ἢ κουφότητα· οὔτε γὰρ κατὰ φύσιν οὔτε παρὰ φύσιν ἐνδέχεται αὐτῷ κινηθῆναι ἐπὶ τὸ μέσον ἢ ἀπὸ τοῦ μέσου. Κατὰ φύσιν μὲν γὰρ οὐκ ἔστιν αὐτῷ ἡ ἐπ’ εὐθείας φορά· μία γὰρ ἦν ἑκάστου τῶν ἁπλῶν, ὥστ’ ἔσται τὸ αὐτὸ τῶν οὕτω τινὶ φερομένων. Παρὰ φύσιν δ’ ἐνεχθέντος, εἰ μὲν ἡ κάτω (270a.) παρὰ φύσιν, ἡ ἄνω ἔσται κατὰ φύσιν, εἰ δ’ ἡ ἄνω παρὰ φύσιν, ἡ κάτω κατὰ φύσιν· ἔθεμεν γὰρ τῶν ἐναντίων ᾧ ἡ ἑτέρα παρὰ φύσιν, τὴν ἑτέραν εἶναι κατὰ φύσιν.

Ἐπεὶ δ’ εἰς τὸ αὐτὸ φέρεται τὸ ὅλον καὶ τὸ μόριον κατὰ φύσιν, οἷον πᾶσα γῆ καὶ μικρὰ βῶλος, συμβαίνει πρῶτον μὲν μήτε κουφότητ’ ἔχειν αὐτὸ μηδεμίαν μήτε βάρος (ἢ γὰρ ἂν πρὸς τὸ μέσον ἢ ἀπὸ τοῦ μέσου ἠδύνατο φέρεσθαι κατὰ τὴν ἑαυτοῦ φύσιν), ἔπειθ’ ὅτι ἀδύνατον κινηθῆναι τὴν κατὰ τόπον κίνησιν ἢ ἄνω ἢ κάτω κατασπώμενον· οὔτε γὰρ κατὰ φύσιν ἐνδέχεται κινηθῆναι κίνησιν αὐτῷ ἄλλην οὔτε παρὰ φύσιν, οὔτ’ αὐτῷ οὔτε τῶν μορίων οὐδενί· ὁ γὰρ αὐτὸς λόγος περὶ ὅλου καὶ μέρους.

Ὁμοίως δ’ εὔλογον ὑπολαβεῖν περὶ αὐτοῦ καὶ ὅτι ἀγένητον καὶ ἄφθαρτον καὶ ἀναυξὲς καὶ ἀναλλοίωτον, διὰ τὸ γίγνεσθαι μὲν ἅπαν τὸ γιγνόμενον ἐξ ἐναντίου τε καὶ ὑποκειμένου τινός, καὶ φθείρεσθαι ὡσαύτως ὑποκειμένου τέ τινος καὶ ὑπ’ ἐναντίου καὶ εἰς ἐναντίον, καθάπερ ἐν τοῖς πρώτοις εἴρηται λόγοις· τῶν δ’ ἐναντίων καὶ αἱ φοραὶ ἐναντίαι. Εἰ δὴ τούτῳ μηδὲν ἐναντίον ἐνδέχεται εἶναι διὰ τὸ καὶ τῇ φορᾷ τῇ κύκλῳ μὴ εἶναι ἄν τιν’ ἐναντίαν κίνησιν, ὀρθῶς ἔοικεν ἡ φύσις τὸ μέλλον ἔσεσθαι ἀγένητον καὶ ἄφθαρτον ἐξελέσθαι ἐκ τῶν ἐναντίων· ἐν τοῖς ἐναντίοις γὰρ ἡ γένεσις καὶ ἡ φθορά.

Ἀλλὰ μὴν καὶ τὸ αὐξανόμενον ἅπαν αὐξάνεται [καὶ τὸ φθῖνον φθίνει] ὑπὸ συγγενοῦς προσιόντος καὶ ἀναλυομένου εἰς τὴν ὕλην· τούτῳ δ’ οὐκ ἔστιν ἐξ οὗ γέγονεν.

Εἰ δ’ ἐστὶ καὶ ἀναύξητον καὶ ἄφθαρτον, τῆς αὐτῆς διανοίας ἐστὶν ὑπολαβεῖν καὶ ἀναλλοίωτον εἶναι. Ἔστι μὲν γὰρ ἡ ἀλλοίωσις κίνησις κατὰ τὸ ποιόν, τοῦ δὲ ποιοῦ αἱ μὲν ἕξεις καὶ διαθέσεις οὐκ ἄνευ τῶν κατὰ τὰ πάθη γίγνονται μεταβολῶν, οἷον ὑγίεια καὶ νόσος. Κατὰ δὲ πάθος ὅσα μεταβάλλει τῶν φυσικῶν σωμάτων, ἔχονθ’ ὁρῶμεν πάντα καὶ αὔξησιν καὶ φθίσιν, οἷον τά τε τῶν ζῴων σώματα καὶ τὰ μόρια αὐτῶν καὶ τὰ τῶν φυτῶν, ὁμοίως δὲ καὶ τὰ τῶν στοιχείων· ὥστ’ εἴπερ τὸ κύκλῳ σῶμα μήτ’ αὔξησιν ἔχειν ἐνδέχεται μήτε φθίσιν, εὔλογον καὶ ἀναλλοίωτον εἶναι.

(270b.) Διότι μὲν οὖν ἀΐδιον καὶ οὔτ’ αὔξησιν ἔχον οὔτε φθίσιν, ἀλλ’ ἀγήρατον καὶ ἀναλλοίωτον καὶ ἀπαθές ἐστι τὸ πρῶτον τῶν σωμάτων, εἴ τις τοῖς ὑποκειμένοις πιστεύει, φανερὸν ἐκ τῶν εἰρημένων ἐστίν.

Ἔοικε δ’ ὅ τε λόγος τοῖς φαινομένοις μαρτυρεῖν καὶ τὰ φαινόμενα τῷ λόγῳ· πάντες γὰρ ἄνθρωποι περὶ θεῶν ἔχουσιν ὑπόληψιν, καὶ πάντες τὸν ἀνωτάτω τῷ θείῳ τόπον ἀποδιδόασι, καὶ βάρβαροι καὶ Ἕλληνες, ὅσοι περ εἶναι νομίζουσι θεούς, δῆλον ὅτι ὡς τῷ ἀθανάτῳ τὸ ἀθάνατον συνηρτημένον· ἀδύνατον γὰρ ἄλλως.

Εἴπερ οὖν ἔστι τι θεῖον, ὥσπερ ἔστι, καὶ τὰ νῦν εἰρημένα περὶ τῆς πρώτης οὐσίας τῶν σωμάτων εἴρηται καλῶς. Συμβαίνει δὲ τοῦτο καὶ διὰ τῆς αἰσθήσεως ἱκανῶς, ὥς γε πρὸς ἀνθρωπίνην εἰπεῖν πίστιν· ἐν ἅπαντι γὰρ τῷ παρεληλυθότι χρόνῳ κατὰ τὴν παραδεδομένην ἀλλήλοις μνήμην οὐθὲν φαίνεται μεταβεβληκὸς οὔτε καθ’ ὅλον τὸν ἔσχατον οὐρανὸν οὔτε κατὰ μόριον αὐτοῦ τῶν οἰκείων οὐθέν.

Ἔοικε δὲ καὶ τοὔνομα παρὰ τῶν ἀρχαίων παραδεδόσθαι μέχρι καὶ τοῦ νῦν χρόνου, τοῦτον τὸν τρόπον ὑπολαμβανόντων ὅνπερ καὶ ἡμεῖς λέγομεν· οὐ γὰρ ἅπαξ οὐδὲ δὶς ἀλλ’ ἀπειράκις δεῖ νομίζειν τὰς αὐτὰς ἀφικνεῖσθαι δόξας εἰς ἡμᾶς. Διόπερ ὡς ἑτέρου τινὸς ὄντος τοῦ πρώτου σώματος παρὰ γῆν καὶ πῦρ καὶ ἀέρα καὶ ὕδωρ, αἰθέρα προσωνόμασαν τὸν ἀνωτάτω τόπον, ἀπὸ τοῦ θεῖν ἀεὶ τὸν ἀΐδιον χρόνον θέμενοι τὴν ἐπωνυμίαν αὐτῷ. Ἀναξαγόρας δὲ καταχρῆται τῷ ὀνόματι τούτῳ οὐ καλῶς· ὀνομάζει γὰρ αἰθέρα ἀντὶ πυρός.

Φανερὸν δ’ ἐκ τῶν εἰρημένων καὶ διότι τὸν ἀριθμὸν ἀδύνατον εἶναι πλείω τὸν τῶν λεγομένων σωμάτων ἁπλῶν· τοῦ μὲν γὰρ ἁπλοῦ σώματος ἀνάγκη τὴν κίνησιν ἁπλῆν εἶναι, μόνας δὲ ταύτας εἶναί φαμεν ἁπλᾶς, τήν τε κύκλῳ καὶ τὴν ἐπ’ εὐθείας, καὶ ταύτης τὰ δύο μόρια, τὴν μὲν ἀπὸ τοῦ μέσου, τὴν δ’ ἐπὶ τὸ μέσον.

Κεφάλαιο 4

Ὅτι δ’ οὐκ ἔστι τῇ κύκλῳ φορᾷ ἐναντία ἄλλη φορά, πλεοναχόθεν ἄν τις λάβοι τὴν πίστιν· πρῶτον μὲν ὅτι τῇ περιφερεῖ τὴν εὐθεῖαν ἀντικεῖσθαι μάλιστα τίθεμεν· τὸ γὰρ κοῖλον καὶ τὸ κυρτὸν οὐ μόνον ἀλλήλοις ἀντικεῖσθαι δοκεῖ (271a.) ἀλλὰ καὶ τῷ εὐθεῖ, συνδυαζόμενα καὶ λαβόντα σύνθεσιν· ὥστ’ εἴπερ ἐναντία τίς ἐστι, τὴν ἐπὶ τῆς εὐθείας μάλιστα ἀναγκαῖον ἐναντίαν εἶναι πρὸς τὴν κύκλῳ κίνησιν. Αἱ δ’ ἐπὶ τῆς εὐθείας ἀλλήλαις ἀντίκεινται διὰ τοὺς τόπους· τὸ γὰρ ἄνω κάτω τόπου τέ ἐστι διαφορὰ καὶ ἐναντίωσις.

Ἔπειτ’ εἴ τις ὑπολαμβάνει τὸν αὐτὸν εἶναι λόγον ὅνπερ ἐπὶ τῆς εὐθείας καὶ ἐπὶ τῆς περιφεροῦς (τὴν γὰρ ἀπὸ τοῦ Α πρὸς τὸ Β φορὰν ἐναντίαν εἶναι τῇ ἀπὸ τοῦ Β πρὸς τὸ Α), τὴν ἐπὶ τῆς εὐθείας λέγει· αὕτη γὰρ πεπέρανται, περιφερεῖς δ’ ἄπειροι ἂν εἶεν περὶ τὰ αὐτὰ σημεῖα.

Ὁμοίως δὲ καὶ ἐπὶ τοῦ ἡμικυκλίου τοῦ ἑνός, οἷον ἀπὸ τοῦ Γ ἐπὶ τὸ Δ καὶ ἀπὸ τοῦ Δ ἐπὶ τὸ Γ· ἡ γὰρ αὐτὴ τῇ ἐπὶ τῆς διαμέτρου ἐστίν· ἀεὶ γὰρ ἕκαστον ἀπέχειν τὴν εὐθεῖαν τίθεμεν.

Ὁμοίως δὲ κἂν εἴ τις κύκλον ποιήσας τὴν ἐπὶ θατέρου ἡμικυκλίου φορὰν ἐναντίαν θείη τῇ ἐπὶ θατέρου, οἷον ἐν τῷ ὅλῳ κύκλῳ τὴν ἀπὸ τοῦ Ε πρὸς τὸ Ζ τοῦ Η ἡμικυκλίου τῇ ἀπὸ τοῦ Ζ πρὸς τὸ Ε ἐν τῷ Θ ἡμικυκλίῳ.

Εἰ δὲ καὶ αὗται ἐναντίαι, ἀλλ’ οὔτι γε αἱ ἐπὶ τοῦ ὅλου κύκλου φοραὶ ἀλλήλαις διὰ τοῦτο ἐναντίαι. *-* Ἀλλὰ μὴν οὐδ’ ἡ ἀπὸ τοῦ Α ἐπὶ τὸ Β κύκλῳ φορὰ ἐναντία τῇ ἀπὸ τοῦ Α ἐπὶ τὸ Γ· ἐκ ταὐτοῦ γὰρ εἰς ταὐτὸ ἡ κίνησις, ἡ δ’ ἐναντία διωρίσθη φορὰ ἐκ τοῦ ἐναντίου εἰς τὸ ἐναντίον.

Εἰ δὲ καὶ ἦν ἡ κύκλῳ τῇ κύκλῳ ἐναντία, μάτην ἂν ἦν ἡ ἑτέρα· *ἐπὶ τὸ αὐτὸ γάρ, ὅτι ἀνάγκη τὸ κύκλῳ φερόμενον ὁποθενοῦν ἀρξάμενον εἰς πάντας ὁμοίως ἀφικνεῖσθαι τοὺς ἐναντίους τόπους (εἰσὶ δὲ τόπου ἐναντιότητες τὸ ἄνω καὶ κάτω καὶ τὸ πρόσθιον καὶ ὀπίσθιον καὶ τὸ δεξιὸν καὶ ἀριστερόν), αἱ δὲ τῆς φορᾶς ἐναντιώσεις κατὰ τὰς τῶν τόπων εἰσὶν ἐναντιώσεις·* εἰ μὲν γὰρ ἴσαι ἦσαν, οὐκ ἂν ἦν κίνησις αὐτῶν, εἰ δ’ ἡ ἑτέρα κίνησις ἐκράτει, ἡ ἑτέρα οὐκ ἂν ἦν. Ὥστ’ εἰ ἀμφότερα ἦν, μάτην ἂν θάτερον ἦν σῶμα μὴ κινούμενον τὴν αὑτοῦ κίνησιν· μάτην γὰρ ὑπόδημα τοῦτο λέγομεν, οὗ μή ἐστιν ὑπόδεσις. Ὁ δὲ θεὸς καὶ ἡ φύσις οὐδὲν μάτην ποιοῦσιν.

Κεφάλαιο 5

(271b.) Ἀλλ’ ἐπεὶ δῆλον περὶ τούτων, περὶ τῶν λοιπῶν σκεπτέον, καὶ πρῶτον πότερον ἔστι τι σῶμα ἄπειρον, ὥσπερ οἱ πλεῖστοι τῶν ἀρχαίων φιλοσόφων ᾠήθησαν, ἢ τοῦτ’ ἔστιν ἕν τι τῶν ἀδυνάτων· τὸ γὰρ οὕτως ἢ ἐκείνως ἔχειν οὔ τι μικρὸν ἀλλ’ ὅλον διαφέρει καὶ πᾶν πρὸς τὴν περὶ τῆς ἀληθείας θεωρίαν· σχεδὸν γὰρ αὕτη πασῶν ἀρχὴ τῶν ἐναντιώσεων τοῖς ἀποφηναμένοις τι περὶ τῆς ὅλης φύσεως καὶ γέγονε καὶ γένοιτ’ ἄν, εἴπερ καὶ τὸ μικρὸν παραβῆναι τῆς ἀληθείας ἀφισταμένοις γίνεται πόρρω μυριοπλάσιον. Οἷον εἴ τις ἐλάχιστον εἶναί τι φαίη μέγεθος· οὗτος γὰρ τοὐλάχιστον εἰσαγαγὼν τὰ μέγιστ’ ἂν κινήσειε τῶν μαθηματικῶν. Τούτου δ’ αἴτιον ὅτι ἡ ἀρχὴ δυνάμει μείζων ἢ μεγέθει, διόπερ τὸ ἐν ἀρχῇ μικρὸν ἐν τῇ τελευτῇ γίνεται παμμέγεθες. Τὸ δ’ ἄπειρον καὶ ἀρχῆς ἔχει δύναμιν καὶ τοῦ ποσοῦ τὴν μεγίστην, ὥστ’ οὐδὲν ἄτοπον οὐδ’ ἄλογον τὸ θαυμαστὴν εἶναι τὴν διαφορὰν ἐκ τοῦ λαβεῖν ὡς ἔστι τι σῶμα ἄπειρον. Διὸ περὶ αὐτοῦ λεκτέον ἐξ ἀρχῆς ἀναλαβοῦσιν.

Ἀνάγκη δὴ πᾶν σῶμα ἤτοι τῶν ἁπλῶν εἶναι ἢ τῶν συνθέτων, ὥστε καὶ τὸ ἄπειρον ἢ ἁπλοῦν ἔσται ἢ σύνθετον. Ἀλλὰ μὴν καὶ ὅτι γε πεπερασμένων τῶν ἁπλῶν ἀνάγκη πεπερασμένον εἶναι τὸ σύνθετον, δῆλον· τὸ γὰρ ἐκ πεπερασμένων καὶ πλήθει καὶ μεγέθει συγκείμενον πεπέρανται καὶ πλήθει καὶ μεγέθει· τοσοῦτον γάρ ἐστιν ἐξ ὅσων ἐστὶ συγκείμενον.

Λοιπὸν τοίνυν ἰδεῖν πότερον ἐνδέχεταί τι τῶν ἁπλῶν ἄπειρον εἶναι τὸ μέγεθος, ἢ τοῦτ’ ἀδύνατον. Προχειρισάμενοι δὴ περὶ τοῦ πρώτου τῶν σωμάτων, οὕτω σκοπῶμεν καὶ περὶ τῶν λοιπῶν.

Ὅτι μὲν τοίνυν ἀνάγκη τὸ σῶμα τὸ κύκλῳ φερόμενον πεπεράνθαι πᾶν, ἐκ τῶνδε δῆλον.

Εἰ γὰρ ἄπειρον τὸ κύκλῳ φερόμενον σῶμα, ἄπειροι ἔσονται αἱ ἀπὸ τοῦ μέσου ἐκβαλλόμεναι. Τῶν δ’ ἀπείρων τὸ διάστημα ἄπειρον· διάστημα δὲ λέγω τῶν γραμμῶν, οὗ μηδὲν ἔστιν ἔξω λαβεῖν μέγεθος ἁπτόμενον τῶν γραμμῶν. Τοῦτ’ οὖν ἀνάγκη ἄπειρον εἶναι· τῶν γὰρ πεπερασμένων ἀεὶ ἔσται πεπερασμένον. Ἔτι δ’ ἀεὶ ἔστι τοῦ (272a.) δοθέντος μεῖζον λαβεῖν, ὥστε καθάπερ ἀριθμὸν λέγομεν ἄπειρον, ὅτι μέγιστος οὐκ ἔστιν, ὁ αὐτὸς λόγος καὶ περὶ τοῦ διαστήματος· εἰ οὖν τὸ μὲν ἄπειρον μὴ ἔστι διελθεῖν, ἀπείρου δ’ ὄντος ἀνάγκη τὸ διάστημα ἄπειρον εἶναι, οὐκ ἂν ἐνδέχοιτο κινηθῆναι κύκλῳ· τὸν δ’ οὐρανὸν ὁρῶμεν κύκλῳ στρεφόμενον, καὶ τῷ λόγῳ δὲ διωρίσαμεν ὅτι ἐστί τινος ἡ κύκλῳ κίνησις.

Ἔτι ἀπὸ πεπερασμένου χρόνου ἐὰν ἀφέλῃς πεπερασμένον, ἀνάγκη καὶ τὸν λοιπὸν εἶναι πεπερασμένον καὶ ἔχειν ἀρχήν. Εἰ δ’ ὁ χρόνος ὁ τῆς βαδίσεως ἔχει ἀρχήν, ἔστιν ἀρχὴ καὶ τῆς κινήσεως, ὥστε καὶ τοῦ μεγέθους ὃ βεβάδικεν. Ὁμοίως δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων.

Ἔστω δὴ γραμμὴ ἄπειρος, ἐφ’ ᾗ ΑΓΕ, ἐπὶ θάτερα, ᾗ τὸ Ε· ἡ δ’ ἐφ’ ᾗ τὰ ΒΒ, ἐπ’ ἀμφότερα ἄπειρος. Εἰ δὴ γράψει κύκλον ἡ τὸ ΑΓΕ ἀπὸ τοῦ Γ κέντρου, τέμνουσά ποτε οἰσθήσεται κύκλῳ τὴν τὰ ΒΒ ἡ τὸ ΑΓΕ πεπερασμένον χρόνον· ὁ γὰρ πᾶς χρόνος, ἐν ὅσῳ κύκλῳ ἠνέχθη ὁ οὐρανός, πεπερασμένος. Καὶ ὁ ἀφῃρημένος ἄρα, ὃν ἡ τέμνουσα ἐφέρετο. Ἔσται ἄρα τις ἀρχὴ ᾗ πρῶτον ἡ τὸ ΑΓΕ τὴν τὰ ΒΒ ἔτεμεν. Ἀλλ’ ἀδύνατον. Οὐκ ἄρα ἔστι κύκλῳ στραφῆναι τὸ ἄπειρον. Ὥστ’ οὐδὲ τὸν κόσμον, εἰ ἦν ἄπειρος.

Ἔτι δὲ καὶ ἐκ τῶνδε φανερόν, ὅτι τὸ ἄπειρον ἀδύνατον κινηθῆναι. Ἔστω γὰρ ἡ τὸ Α φερομένη παρὰ τὴν Β, πεπερασμένη παρὰ πεπερασμένην. Ἀνάγκη δὴ ἅμα τήν τε Α τῆς Β ἀπολελύσθαι καὶ τὴν Β τῆς Α· ὅσον γὰρ ἡ ἑτέρα ἐπιβάλλει τῆς ἑτέρας, καὶ ἡ ἑτέρα ἐκείνης τοσοῦτον. Εἰ μὲν οὖν ἄμφω κινοῖντο εἰς τοὐναντίον, θᾶττον ἂν ἀπολύοιντο, εἰ δὲ παρὰ μένουσαν φέροιτο, βραδύτερον, τῷ αὐτῷ τάχει κινουμένου τοῦ παραφερομένου. Ἀλλ’ ἐκεῖνό γε φανερόν, ὅτι ἀδύνατον τὴν ἄπειρον διελθεῖν ἐν πεπερασμένῳ χρόνῳ. Ἐν ἀπείρῳ ἄρα· δέδεικται γὰρ τοῦτο πρότερον ἐν τοῖς περὶ κινήσεως. Διαφέρει δέ γε οὐθὲν ἢ τὴν πεπερασμένην φέρεσθαι παρὰ τὴν ἄπειρον ἢ τὴν ἄπειρον παρ’ ἐκείνην· ὅταν γὰρ (272b.) ἐκείνη παρ’ ἐκείνην, κἀκείνη παραλλάττει ἐκείνην, ὁμοίως κινουμένη καὶ ἀκίνητος· πλὴν θᾶττον, ἐὰν κινῶνται ἀμφότεραι, ἀπολυθήσονται. Καίτοι γ’ ἐνίοτ’ οὐθὲν κωλύει τὴν κινουμένην παρ’ ἠρεμοῦσαν θᾶττον παρελθεῖν ἢ τὴν ἀντικινουμένην, ἐάν τις ποιήσῃ τὰς μὲν ἀντικινουμένας ἀμφοτέρας φερομένας βραδέως, τὴν δὲ παρὰ τὴν ἠρεμοῦσαν πολλῷ ἐκείνων θᾶττον φερομένην.

Οὐδὲν οὖν πρὸς τὸν λόγον ἐμπόδιον ὅτι παρ’ ἠρεμοῦσαν, ἐπείπερ κινουμένην ἐνδέχεται τὴν Α παρὰ κινουμένην τὴν Β βραδύτερον παρελθεῖν. Εἰ οὖν ἄπειρος ὁ χρόνος ὃν ἡ πεπερασμένη ἀπολύεται κινουμένη, καὶ ἐν ᾧ ἡ ἄπειρος τὴν πεπερασμένην ἐκινήθη ἀνάγκη ἄπειρον εἶναι.

Ἀδύνατον ἄρα τὸ ἄπειρον κινεῖσθαι ὅλον· ἐὰν γὰρ καὶ τοὐλάχιστον κινηθῇ, ἀνάγκη ἄπειρον γίγνεσθαι χρόνον. Ἀλλὰ μὴν ὅ γ’ οὐρανὸς περιέρχεται καὶ στρέφεται ὅλος κύκλῳ ἐν πεπερασμένῳ χρόνῳ, ὥστε περίεισιν ἅπασαν τὴν ἐντός, οἷον τὴν ΑΒ πεπερασμένην. Ἀδύνατον ἄρα ἄπειρον εἶναι τὸ κύκλῳ.

Ἔτι ὥσπερ γραμμὴν ᾗ πέρας ἐστὶν ἀδύνατον εἶναι ἄπειρον, ἀλλ’ εἴπερ, ἐπὶ μῆκος, καὶ ἐπίπεδον ὡσαύτως ᾗ πέρας οὐκ ἐνδέχεται· ὅταν δ’ ὁρισθῇ, οὐθαμῇ, οἷον τετράγωνον ἄπειρον ἢ κύκλον ἢ σφαῖραν, ὥσπερ οὐδὲ ποδιαίαν ἄπειρον. Εἰ οὖν μήτε σφαῖρα [μήτε τετράγωνον] μήτε κύκλος ἐστὶν ἄπειρος, μὴ ὄντος δὲ κύκλου οὐδ’ ἂν ἡ κύκλῳ εἴη φορά, ὁμοίως δὲ μηδ’ ἀπείρου ὄντος οὐκ ἂν εἴη ἄπειρος, εἰ μηδ’ ὁ κύκλος ἄπειρός ἐστιν, οὐκ ἂν κινοῖτο κυκλικῶς ἄπειρον σῶμα.

Ἔτι εἰ τὸ Γ κέντρον, ἡ δὲ τὸ ΑΒ ἄπειρος καὶ ἡ τὸ Ε πρὸς ὀρθὴν ἄπειρος καὶ ἡ τὸ ΓΔ κινουμένη, οὐδέποτ’ ἀπολυθήσεται τῆς Ε, ἀλλ’ ἀεὶ ἕξει ὥσπερ ἡ ΓΕ· τέμνει γὰρ ᾗ τὸ Ζ. Οὐκ ἄρα περίεισι κύκλῳ ἡ ἄπειρος. Ἔτι εἴπερ ἄπειρος ὁ οὐρανός, κινεῖται δὲ κύκλῳ, ἐν πεπερασμένῳ χρόνῳ ἄπειρον ἔσται διεληλυθώς. Ἔστω γὰρ ὁ μὲν μένων οὐρανὸς ἄπειρος,ὁ δ’ ἐν τούτῳ κινούμενος ἴσος. Ὥστ’ εἴπερ περιελήλυθε κύκλῳ ἄπειρος ὤν, ἄπειρον τὸν ἴσον αὐτῷ διελήλυθεν ἐν πεπερασμέ- (273a.) νῳ χρόνῳ. Ἀλλὰ τοῦτ’ ἦν ἀδύνατον.

Ἔστι δὲ καὶ ἀντεστραμμένως εἰπεῖν, ὅτι εἰ πεπερασμένος ὁ χρόνος ἐν ᾧ περιεστράφη, καὶ τὸ μέγεθος ὃ διελήλυθεν ἀναγκαῖον εἶναι πεπερασμένον· ἴσον δ’ αὐτῷ διελήλυθεν· πεπέρανται ἄρα καὶ αὐτός.

Ὅτι μὲν οὖν τὸ κύκλῳ κινούμενον οὐκ ἔστιν ἀτελεύτητον οὐδ’ ἄπειρον, ἀλλ’ ἔχει τέλος, φανερόν.

Κεφάλαιο 6

Ἀλλὰ μὴν οὐδὲ τὸ ἐπὶ τὸ μέσον οὐδὲ τὸ ἀπὸ τοῦ μέσου φερόμενον ἄπειρον ἔσται· ἐναντίαι γὰρ αἱ φοραὶ ἡ ἄνω καὶ ἡ κάτω, αἱ δ’ ἐναντίαι εἰς ἐναντίους τόπους. Τῶν δ’ ἐναντίων εἰ θάτερον ὥρισται, καὶ θάτερον ὡρισμένον ἔσται. Τὸ δὲ μέσον ὥρισται· εἰ γὰρ ὁποθενοῦν φέροιτο κάτω τὸ ὑφιστάμενον, οὐκ ἐνδέχεται πορρωτέρω διελθεῖν τοῦ μέσου. Ὡρισμένου οὖν τοῦ μέσου, καὶ τὸν ἄνω τόπον ἀνάγκη ὡρίσθαι. Εἰ δ’ οἱ τόποι ὡρισμένοι καὶ πεπερασμένοι, καὶ τὰ σώματα ἔσται πεπερασμένα. Ἔτι εἰ τὸ ἄνω καὶ τὸ κάτω ὥρισται, καὶ τὸ μεταξὺ ἀνάγκη ὡρίσθαι. Εἰ γὰρ μὴ ὥρισται, ἄπειρος ἂν εἴη ἡ κίνησις· τοῦτο δ’ ὅτι ἀδύνατον, δέδεικται πρότερον. Ὥρισται ἄρα τὸ μέσον, ὥστε καὶ τὸ ἐν τούτῳ σῶμα ἢ ὂν ἢ γενέσθαι δυνατόν. Ἀλλὰ μὴν τὸ ἄνω καὶ κάτω φερόμενον σῶμα δύναται ἐν τούτῳ γενέσθαι· πέφυκε γὰρ τὸ μὲν ἀπὸ τοῦ μέσου κινεῖσθαι, τὸ δ’ ἐπὶ τὸ μέσον.

Ἔκ τε δὴ τούτων φανερὸν ὅτι οὐκ ἐνδέχεται σῶμα εἶναι ἄπειρον, καὶ πρὸς τούτοις εἰ βάρος μή ἐστιν ἄπειρον, οὐδ’ ἂν τούτων τῶν σωμάτων οὐθὲν εἴη ἄπειρον· ἀνάγκη γὰρ τοῦ ἀπείρου σώματος ἄπειρον εἶναι καὶ τὸ βάρος. (Ὁ δ’ αὐτὸς λόγος ἔσται καὶ ἐπὶ τοῦ κούφου· εἰ γάρ ἐστιν ἄπειρος βαρύτης, ἔστι καὶ κουφότης, ἐὰν ἄπειρον ᾖ τὸ ἐπιπολάζον). Δῆλον δ’ ἐκ τῶνδε.

Ἔστω γὰρ πεπερασμένον, καὶ εἰλήφθω τὸ μὲν ἄπειρον σῶμα ἐφ’ ᾧ τὸ ΑΒ, τὸ δὲ βάρος αὐτοῦ ἐφ’ ᾧ τὸ Γ. Ἀφῃρήσθω οὖν ἀπὸ τοῦ ἀπείρου πεπερασμένον μέγεθος ἐφ’ ᾧ τὸ ΒΔ· καὶ τὸ βάρος αὐτοῦ ἔστω ἐφ’ ᾧ τὸ Ε. Τὸ δὴ Ε τοῦ Γ ἔλαττον ἔσται· τὸ γὰρ τοῦ ἐλάττονος βάρος ἔλαττον. Καταμετρείτω δὴ τὸ ἔλαττον ὁποσακισοῦν, (273b.) καὶ ὡς τὸ βάρος τοὔλαττον πρὸς τὸ μεῖζον, τὸ ΒΔ πρὸς τὸ ΒΖ γεγενήσθω· ἐνδέχεται γὰρ ἀφελεῖν τοῦ ἀπείρου ὁποσονοῦν. Εἰ τοίνυν ἀνάλογον τὰ μεγέθη τοῖς βάρεσι, τὸ δ’ ἔλαττον βάρος τοῦ ἐλάττονός ἐστι μεγέθους, καὶ τὸ μεῖζον ἂν εἴη τοῦ μείζονος. Ἴσον ἄρα ἔσται τὸ τοῦ πεπερασμένου καὶ τὸ τοῦ ἀπείρου βάρος.

Ἔτι δ’ εἰ τοῦ μείζονος σώματος μεῖζον τὸ βάρος, τὸ τοῦ ΗΒ μεῖζον ἔσται βάρος ἢ τὸ τοῦ ΖΒ, ὥστε τὸ τοῦ πεπερασμένου ἢ τὸ τοῦ ἀπείρου [μεῖζον ἔσται βάρος]. Καὶ τὸ τῶν ἀνίσων δὲ μεγεθῶν ταὐτὸν ἔσται βάρος· ἄνισον γὰρ τῷ πεπερασμένῳ τὸ ἄπειρον.

Οὐθὲν δὲ διαφέρει τὰ βάρη σύμμετρα εἶναι ἢ ἀσύμμετρα· καὶ γὰρ ἀσυμμέτρων ὄντων ὁ αὐτὸς ἔσται λόγος· οἷον εἰ [τὸ Ε] τρίτον ὑπερβάλλει μετροῦν τὸ βάρος· τῶν γὰρ ΒΔ μεγεθῶν τριῶν ὅλων ληφθέντων μεῖζον ἔσται τὸ βάρος ἢ τὸ ἐφ’ ᾧ τὸ Γ. Ὥστε τὸ αὐτὸ ἔσται ἀδύνατον. Ἔτι δὲ καὶ ἐγχωρεῖ σύμμετρα λαβεῖν· οὐδὲν γὰρ διαφέρει ἄρχεσθαι ἀπὸ τοῦ βάρους ἢ ἀπὸ τοῦ μεγέθους· οἷον ἐὰν ληφθῇ σύμμετρον βάρος τῷ Γ τὸ ἐφ’ ᾧ τὸ Ε, καὶ ἀπὸ τοῦ ἀπείρου ἀφαιρεθῇ τὸ ἔχον τὸ ἐφ’ ᾧ Ε βάρος, οἷον τὸ ΒΔ, εἶτα ὡς τὸ βάρος πρὸς τὸ βάρος, τὸ ΒΔ πρὸς ἄλλο γένηται μέγεθος, οἷον πρὸς τὸ ΒΖ· ἐνδέχεται γὰρ ἀπείρου ὄντος τοῦ μεγέθους ὁποσονοῦν ἀφαιρεθῆναι· τούτων γὰρ ληφθέντων σύμμετρα ἔσται καὶ τὰ μεγέθη καὶ τὰ βάρη ἀλλήλοις.

Οὐδὲ δὴ τὸ μέγεθος ὁμοιοβαρὲς εἶναι ἢ ἀνομοιοβαρὲς οὐδὲν διοίσει πρὸς τὴν ἀπόδειξιν· ἀεὶ γὰρ ἔσται λαβεῖν ἰσοβαρῆ σώματα τῷ ΒΔ, ἀπὸ τοῦ ἀπείρου ὁποσαοῦν ἢ ἀφαιροῦντας ἢ προστιθέντας.

Ὥστε δῆλον ἐκ τῶν εἰρημένων ὅτι οὐκ ἔσται τοῦ ἀπείρου σώματος πεπερασμένον τὸ βάρος. Ἄπειρον ἄρα. Εἰ τοίνυν τοῦτ’ ἀδύνατον, καὶ τὸ ἄπειρόν τι εἶναι σῶμα ἀδύνατον.

Ἀλλὰ μὴν ὅτι ἄπειρόν τι εἶναι βάρος ἀδύνατον, ἐκ τῶνδε φανερόν. Εἰ γὰρ τοσόνδε βάρος τὴν τοσήνδε ἐν τῷδε τῷ χρόνῳ κινεῖται, τὸ τοσοῦτον καὶ ἔτι ἐν ἐλάττονι, καὶ τὴν ἀναλογίαν ἣν τὰ βάρη ἔχει, οἱ χρόνοι ἀνάπαλιν ἕξου(274a.) σιν, οἷον εἰ τὸ ἥμισυ βάρος ἐν τῷδε, τὸ διπλάσιον ἐν ἡμίσει τούτου. Ἔτι τὸ πεπερασμένον βάρος ἅπασαν πεπερασμένην δίεισιν ἔν τινι χρόνῳ πεπερασμένῳ. Ἀνάγκη ἄρα ἐκ τούτων, εἴ τι ἔστιν ἄπειρον βάρος, κινεῖσθαι μὲν ᾗ τοσόνδε ὅσον τὸ πεπερασμένον καὶ ἔτι, μὴ κινεῖσθαι δέ, ᾗ ἀνάλογον μὲν δεῖ κατὰ τὰς ὑπεροχὰς κινεῖσθαι, ἐναντίως δὲ τὸ μεῖζον ἐν τῷ ἐλάττονι. Λόγος δ’ οὐθείς ἐστι τοῦ ἀπείρου πρὸς τὸ πεπερασμένον, τοῦ δ’ ἐλάττονος χρόνου πρὸς τὸν μείζω πεπερασμένον· ἀλλ’ ἀεὶ ἐν ἐλάττονι. Ἐλάχιστος δ’ οὐκ ἔστιν.

Οὐδ’ εἰ ἦν, ὄφελός τι ἂν ἦν· ἄλλο γὰρ ἄν τι πεπερασμένον ἐλήφθη ἐν τῷ αὐτῷ λόγῳ, ἐν ᾧ τὸ ἄπειρον πρὸς ἕτερον, μεῖζον, ὥστ’ ἐν ἴσῳ χρόνῳ τὴν ἴσην ἂν ἐκινεῖτο τὸ ἄπειρον τῷ πεπερασμένῳ. Ἀλλ’ ἀδύνατον. Ἀλλὰ μὴν ἀνάγκη γε, εἴπερ ἐν ὁπηλικῳοῦν χρόνῳ πεπερασμένῳ δὲ κινεῖται τὸ ἄπειρον, καὶ ἄλλο ἐν τῷ αὐτῷ τούτῳ πεπερασμένον βάρος κινεῖσθαί τινα πεπερασμένην.

Ἀδύνατον ἄρα ἄπειρον εἶναι βάρος, ὁμοίως δὲ καὶ κουφότητα. Καὶ σώματα ἄρ’ ἄπειρον βάρος ἔχοντα καὶ κουφότητα ἀδύνατον. Ὅτι μὲν οὖν οὐκ ἔστιν ἄπειρον σῶμα, δῆλον διά τε τῶν κατὰ μέρος θεωροῦσι τοῦτον τὸν τρόπον, καὶ καθόλου σκοπουμένοις μὴ μόνον κατὰ τοὺς λόγους τοὺς ἐν τοῖς περὶ τὰς ἀρχὰς εἰρημένους ἡμῖν (διωρίσθη γὰρ κἀκεῖ καθόλου πρότερον περὶ ἀπείρου πῶς ἔστι καὶ πῶς οὐκ ἔστιν) ἀλλὰ καὶ νῦν ἄλλον τρόπον.

Μετὰ δὲ ταῦτ᾽ ἐπισκεπτέον κἂν εἰ μὴ ἄπειρον μὲν τὸ σῶμα τὸ πᾶν, οὐ μὴν ἀλλὰ τοσοῦτόν γε ὥστ᾽ εἶναι πλείους οὐρανούς· τάχα γὰρ ἄν τις τοῦτ᾽ ἀπορήσειεν, ὅτι καθάπερ ὁ περὶ ἡμᾶς κόσμος συνέστηκεν, οὐδὲν κωλύει καὶ ἑτέρους εἶναι πλείους μὲν ἑνός, μὴ μέντοι γε ἀπείρους. Πρῶτον δ᾽ εἴπωμεν καθόλου περὶ τοῦ ἀπείρου.

Κεφάλαιο 7

Ἀνάγκη δὴ σῶμα πᾶν ἤτοι ἄπειρον εἶναι ἢ πεπερασμένον, καὶ εἰ ἄπειρον, ἤτοι ἀνομοιομερὲς ἅπαν ἢ ὁμοιομερές, κἂν εἰ ἀνομοιομερές, ἤτοι ἐκ πεπερασμένων εἰδῶν ἢ ἐξ ἀπείρων. Ὅτι μὲν τοίνυν οὐχ οἷόν τε ἐξ ἀπείρων, φανερόν, εἴ τις ἡμῖν ἐάσει μένειν τὰς πρώτας ὑποθέσεις· πεπερασ(274b.) μένων γὰρ τῶν πρώτων κινήσεων οὐσῶν, ἀνάγκη καὶ τὰς ἰδέας τῶν ἁπλῶν σωμάτων εἶναι πεπερασμένας. Ἁπλῆ μὲν γὰρ ἡ τοῦ ἁπλοῦ σώματος κίνησις, αἱ δ’ ἁπλαῖ πεπερασμέναι κινήσεις εἰσίν· ἀνάγκη δὲ κίνησιν ἔχειν σῶμα πᾶν φυσικόν.

Ἀλλὰ μὴν εἴ γε ἐκ πεπερασμένων ἔσται τὸ ἄπειρον, ἀνάγκη καὶ τῶν μορίων ἕκαστον εἶναι ἄπειρον, λέγω δ’ οἷον τὸ ὕδωρ ἢ τὸ πῦρ. Ἀλλ’ ἀδύνατον· δέδεικται γὰρ ὅτι οὔτε βάρος οὔτε κουφότης ἐστὶν ἄπειρος.

Ἔτι ἀναγκαῖον ἀπείρους τῷ μεγέθει εἶναι καὶ τοὺς τόπους αὐτῶν, ὥστε καὶ τὰς κινήσεις ἀπείρους εἶναι πάντων. Τοῦτο δ’ ἀδύνατον, εἰ θήσομεν ἀληθεῖς εἶναι τὰς πρώτας ὑποθέσεις, καὶ μήτε τὸ κάτω φερόμενον εἰς ἄπειρον ἐνδέχεσθαι φέρεσθαι μήτε τὸ ἄνω κατὰ τὸν αὐτὸν λόγον. Ἀδύνατον γὰρ γίνεσθαι ὃ μὴ ἐνδέχεται γενέσθαι, ὁμοίως ἐπὶ τοῦ τοιόνδε καὶ τοσόνδε καὶ τοῦ ποῦ. Λέγω δ’, εἰ ἀδύνατον γενέσθαι λευκὸν ἢ πηχυαῖον ἢ ἐν Αἰγύπτῳ, καὶ γίνεσθαί τι τούτων ἀδύνατον. Ἀδύνατον ἄρα καὶ φέρεσθαι ἐκεῖ οὗ μηθὲν δυνατὸν ἀφικέσθαι φερόμενον. Ἔτι εἰ καὶ διεσπασμένα ἐστίν, οὐδὲν ἧττον ἐνδέχοιτ’ ἂν τὸ ἐξ ἁπάντων [πῦρ] ἄπειρον εἶναι. Ἀλλὰ σῶμα ἦν τὸ πάντῃ διάστασιν ἔχον· ὥστε πῶς οἷόν τε πλείω μὲν ἀνόμοια, ἕκαστον δ’ αὐτῶν ἄπειρον εἶναι; πάντῃ γὰρ ἕκαστον δεῖ ἄπειρον εἶναι.

Ἀλλὰ μὴν οὐδὲ πᾶν ὁμοιομερὲς ἐνδέχεται τὸ ἄπειρον εἶναι. Πρῶτον μὲν γὰρ οὐκ ἔστιν ἄλλη παρὰ ταύτας κίνησις. Ἕξει οὖν μίαν τούτων. Εἰ δὲ τοῦτο, συμβήσεται ἢ βάρος ἄπειρον ἢ κουφότητα εἶναι ἄπειρον.

Ἀλλὰ μὴν οὐδ’ οἷόν τε τὸ κύκλῳ σῶμα φερόμενον [εἶναι ἄπειρον]. Ἀδύνατον γὰρ τὸ ἄπειρον φέρεσθαι κύκλῳ· οὐθὲν γὰρ διαφέρει τοῦτο λέγειν ἢ τὸ τὸν οὐρανὸν φάναι ἄπειρον εἶναι, τοῦτο δὲ δέδεικται ὅτι ἀδύνατον. Ἀλλὰ μὴν οὐδ’ ὅλως γε τὸ ἄπειρον ἐνδέχεται κινεῖσθαι. Ἢ γὰρ κατὰ φύσιν κινηθήσεται ἢ βίᾳ· καὶ εἰ βίᾳ, ἔστιν αὐτῷ καὶ ἡ κατὰ φύσιν, ὥστε καὶ τόπος ἄλλος ἴσος εἰς ὃν οἰσθήσεται. Τοῦτο δ’ ἀδύνατον.

Ὅτι δ’ ὅλως ἀδύνατον ἄπειρον ὑπὸ πεπερασμένου παθεῖν τι ἢ ποιῆσαι τὸ πεπερασμένον, ἐκ τῶνδε φανερόν. Ἔστω (275a.) γὰρ ἄπειρον ἐφ’ οὗ Α, πεπερασμένον ἐφ’ οὗ Β, χρόνος ἐν ᾧ ἐκίνησέ τι ἢ ἐκινήθη Γ. Εἰ δὴ ὑπὸ τοῦ

Β τὸ Α ἐθερμάνθη ἢ ὤσθη ἢ ἄλλο τι ἔπαθεν ἢ καὶ ὁτιοῦν ἐκινήθη ἐν τῷ χρόνῳ ἐφ’ οὗ Γ, ἔστω τὸ Δ τοῦ Β ἔλαττον, καὶ τὸ ἔλαττον ἐν τῷ ἴσῳ χρόνῳ ἔλαττον κινείτω· ἔστω δὲ τὸ ἐφ’ ᾧ Ε ὑπὸ τοῦ Δ ἠλλοιωμένον. Ὃ δή ἐστι τὸ Δ πρὸς τὸ Β, τὸ Ε ἔσται πρὸς πεπερασμένον τι. Ἔστω δὴ τὸ μὲν ἴσον ἐν ἴσῳ χρόνῳ ἴσον ἀλλοιοῦν, τὸ δ’ ἔλαττον ἐν τῷ ἴσῳ ἔλαττον, τὸ δὲ μεῖζον μεῖζον, τοσοῦτον δὲ ὅσον ἀνάλογον ἔσται ὅπερ τὸ μεῖζον πρὸς τὸ ἔλαττον. Οὐκ ἄρα τὸ ἄπειρον ὑπ’ οὐδενὸς πεπερασμένου κινηθήσεται ἐν οὐθενὶ χρόνῳ· ἔλαττον γὰρ ἄλλο ἐν τῷ ἴσῳ χρόνῳ ὑπὸ ἐλάττονος κινηθήσεται, πρὸς ὃ τὸ ἀνάλογον πεπερασμένον ἔσται· τὸ γὰρ ἄπειρον πρὸς τὸ πεπερασμένον ἐν οὐθενὶ λόγῳ ἐστίν. Ἀλλὰ μὴν οὐδὲ τὸ ἄπειρον ἐν οὐθενὶ χρόνῳ κινήσει τὸ πεπερασμένον. Ἔστω γὰρ ἐφ’ ᾧ τὸ Α ἄπειρον, τὸ δὲ Β πεπερασμένον, χρόνος ἐν ᾧ τὸ Γ. Οὐκοῦν τὸ Δ ἐν τῷ Γ ἔλαττον τοῦ Β κινήσει· ἔστω τὸ Ζ. Ὃ δή ἐστι τὸ ΒΖ ὅλον πρὸς τὸ Ζ, τὸ Ε ἔχον τὸν λόγον τοῦτον ἔστω πρὸς τὸ Δ. Κινήσει ἄρα τὸ Ε τὸ ΒΖ ἐν τῷ Γ. Τὸ πεπερασμένον τοίνυν καὶ τὸ ἄπειρον ἐν τῷ ἴσῳ χρόνῳ ἀλλοιώσει. Ἀλλ’ ἀδύνατον· ἐν ἐλάττονι γὰρ τὸ μεῖζον ὑπέκειτο. Ἀλλ’ ἀεὶ ὁ ληφθεὶς χρόνος ταὐτὸ ποιήσει, ὥστ’ οὐκ ἔσται χρόνος οὐθεὶς ἐν ᾧ κινήσει. Ἀλλὰ μὴν ἐν ἀπείρῳ γε οὐκ ἔστι κινῆσαι οὐδὲ κινηθῆναι· πέρας γὰρ οὐκ ἔχει, ἡ δὲ ποίησις καὶ τὸ πάθος ἔχει.

Οὐδ’ ἄπειρον δὴ ὑπ’ ἀπείρου ἐνδέχεται οὐθὲν παθεῖν. Ἔστω γὰρ τὸ Α ἄπειρον καὶ τὸ Β, χρόνος δ’ ἐν ᾧ ἔπαθε τὸ Β ὑπὸ τοῦ Α, ἐφ’ ᾧ ΓΔ. Τὸ δὴ ἐφ’ ᾧ τὸ Ε τοῦ ἀπείρου μέρος, ἐπεὶ ὅλον πέπονθε τὸ Β, οὐκ ἐν ἴσῳ χρόνῳ τὸ αὐτό· ὑποκείσθω γὰρ ἐν ἐλάττονι κινεῖσθαι τὸ ἔλαττον χρόνῳ. Ἔστω τὸ Ε κεκινημένον ὑπὸ τοῦ Α ἐν τῷ Δ.

Ὃ δὴ τὸ Δ πρὸς τὸ ΓΔ, τὸ Ε ἐστὶ πρός τι τοῦ Β πεπερασμένον. Τοῦτο τοίνυν ἀνάγκη ὑπὸ τοῦ Α κινηθῆναι ἐν τῷ ΓΔ χρόνῳ· ὑπὸ γὰρ τοῦ αὐτοῦ ὑποκείσθω ἐν τῷ πλείονι καὶ ἐλάττονι (275b.) χρόνῳ τὸ μεῖζον καὶ τὸ ἔλαττον πάσχειν, ὅσα ἀνάλογον τῷ χρόνῳ διῄρηται. Ἐν οὐδενὶ ἄρα χρόνῳ δυνατὸν πεπερασμένῳ ἄπειρον ὑπ’ ἀπείρου κινηθῆναι· ἐν ἀπείρῳ ἄρα. Ἀλλ’ ὁ μὲν ἄπειρος χρόνος οὐκ ἔχει τέλος, τὸ δὲ κεκινημένον ἔχει.

Εἰ τοίνυν πᾶν σῶμα αἰσθητὸν ἔχει δύναμιν ποιητικὴν ἢ παθητικὴν ἢ ἄμφω, ἀδύνατον σῶμα ἄπειρον αἰσθητὸν εἶναι. Ἀλλὰ μὴν καὶ ὅσα γε σώματα ἐν τόπῳ, πάντα αἰσθητά. Οὐκ ἔστιν ἄρα σῶμα ἄπειρον ἔξω τοῦ οὐρανοῦ οὐθέν. Ἀλλὰ μὴν οὐδὲ μέχρι τινός. Οὐθὲν ἄρα ὅλως σῶμα ἔξω τοῦ οὐρανοῦ. Εἰ μὲν γὰρ νοητόν, ἔσται ἐν τόπῳ· τὸ γὰρ ἔξω καὶ ἔσω τόπον σημαίνει. Ὥστ’ ἔσται αἰσθητόν. Αἰσθητὸν δ’ οὐθὲν μὴ ἐν τόπῳ.

Λογικώτερον δ’ ἔστιν ἐπιχειρεῖν καὶ ὧδε. Οὔτε γὰρ κύκλῳ οἷόν τε κινεῖσθαι τὸ ἄπειρον ὁμοιομερὲς ὄν· μέσον μὲν γὰρ τοῦ ἀπείρου οὐκ ἔστι, τὸ δὲ κύκλῳ περὶ τὸ μέσον κινεῖται. Ἀλλὰ μὴν οὐδ' ἐπ' εὐθείας οἷόν τε φέρεσθαι τὸ ἄπειρον· δεήσει γὰρ ἕτερον εἶναι τοσοῦτον τόπον ἄπειρον εἰς ὃν οἰσθήσεται κατὰ φύσιν, καὶ ἄλλον τοσοῦτον εἰς ὃν παρὰ φύσιν.

Ἔτι εἴτε φύσει ἔχει κίνησιν τοῦ εἰς εὐθὺ εἴτε βίᾳ κινεῖται, ἀμφοτέρως δεήσει ἄπειρον εἶναι τὴν κινοῦσαν ἰσχύν· ἥ τε γὰρ ἄπειρος ἀπείρου καὶ τοῦ ἀπείρου ἄπειρος ἡ ἰσχύς· ὥστ' ἔσται καὶ τὸ κινοῦν ἄπειρον (λόγος δ' ἐν τοῖς περὶ κινήσεως ὅτι οὐθὲν ἔχει ἄπειρον δύναμιν τῶν πεπερασμένων, οὐδὲ τῶν ἀπείρων πεπερασμένην). Εἰ οὖν τὸ κατὰ φύσιν καὶ παρὰ φύσιν ἐνδέχεται κινηθῆναι, ἔσται δύο ἄπειρα, τό τε κινοῦν οὕτω καὶ τὸ κινούμενον. Ἔτι τὸ κινοῦν τὸ ἄπειρον τί ἐστιν; εἰ μὲν γὰρ αὐτὸ ἑαυτό, ἔμψυχον ἔσται. Τοῦτο δὲ πῶς δυνατόν, ἄπειρον εἶναι ζῷον; εἰ δ' ἄλλο [τι] τὸ κινοῦν, δύο ἔσται ἄπειρα, τό τε κινοῦν καὶ τὸ κινούμενον, διαφέροντα τὴν μορφὴν καὶ τὴν δύναμιν.

Εἰ δὲ μὴ συνεχὲς τὸ πᾶν, ἀλλ' ὥσπερ λέγει Δημόκριτος καὶ Λεύκιππος, διωρισμένα τῷ κενῷ, μίαν ἀναγκαῖον εἶναι πάντων τὴν κίνησιν. Διώρισται μὲν γὰρ τοῖς σχήμασιν· τὴν δὲ φύσιν φασὶν αὐτῶν εἶναι μίαν, ὥσ(276a.) περ ἂν εἰ χρυσὸς ἕκαστον εἴη κεχωρισμένος. Τούτων δέ, καθάπερ λέγομεν, ἀναγκαῖον εἶναι τὴν αὐτὴν κίνησιν· ὅπου γὰρ μία βῶλος, καὶ ἡ σύμπασα γῆ φέρεται, καὶ τό τε πᾶν πῦρ καὶ σπινθὴρ εἰς τὸν αὐτὸν τόπον. Ὥστ' οὔτε κοῦφον ἁπλῶς οὐθὲν ἔσται τῶν σωμάτων, εἰ πάντ' ἔχει βάρος· εἰ δὲ κουφότητα, βαρὺ οὐδέν.

Ἔτι εἰ βάρος ἔχει ἢ κουφότητα, ἔσται ἢ ἔσχατόν τι τοῦ παντὸς ἢ μέσον. Τοῦτο δ' ἀδύνατον ἀπείρου γ' ὄντος. Ὅλως δ', οὗ μή ἐστι μέσον μηδ' ἔσχατον, μηδὲ τὸ μὲν ἄνω τὸ δὲ κάτω, τόπος οὐθεὶς ἔσται τοῖς σώμασι τῆς φορᾶς. Τούτου δὲ μὴ ὄντος κίνησις οὐκ ἔσται· ἀνάγκη γὰρ κινεῖσθαι ἤτοι κατὰ φύσιν ἢ παρὰ φύσιν, ταῦτα δ' ὥρισται τοῖς τόποις τοῖς τ' οἰκείοις καὶ τοῖς ἀλλοτρίοις.

Ἔτι εἰ οὗ παρὰ φύσιν τι μένει ἢ φέρεται, ἀνάγκη ἄλλου τινὸς εἶναι τοῦτον τὸν τόπον κατὰ φύσιν (τοῦτο δὲ πιστὸν ἐκ τῆς ἐπαγωγῆς), ἀνάγκη δὴ μὴ πάντα ἢ βάρος ἔχειν ἢ κουφότητα, ἀλλὰ τὰ μὲν τὰ δὲ μή. Ὅτι μὲν τοίνυν οὐκ ἔστι τὸ σῶμα τοῦ παντὸς ἄπειρον, ἐκ τούτων φανερόν.

Κεφάλαιο 8

Διότι δ’ οὐδὲ πλείους οἷόν τ’ οὐρανοὺς εἶναι, λέγωμεν· τοῦτο γὰρ ἔφαμεν ἐπισκεπτέον, εἴ τις μὴ νομίζει καθόλου δεδεῖχθαι περὶ τῶν σωμάτων ὅτι ἀδύνατον ἐκτὸς εἶναι τοῦ κόσμου τοῦδε ὁτιοῦν αὐτῶν, ἀλλὰ μόνον ἐπὶ τῶν ἀορίστως κειμένων εἰρῆσθαι τὸν λόγον.

Ἅπαντα γὰρ καὶ μένει καὶ κινεῖται καὶ κατὰ φύσιν καὶ βίᾳ, καὶ κατὰ φύσιν μέν, ἐν ᾧ μένει μὴ βίᾳ, καὶ φέρεται, καὶ εἰς ὃν φέρεται, καὶ μένει· ἐν ᾧ δὲ βίᾳ, καὶ φέρεται βίᾳ, καὶ εἰς ὃν βίᾳ φέρεται, βίᾳ καὶ μένει. Ἔτι εἰ βίᾳ ἥδε ἡ φορά, ἡ ἐναντία κατὰ φύσιν. Ἐπὶ δὴ τὸ μέσον τὸ ἐνταῦθα εἰ βίᾳ οἰσθήσεται ἡ γῆ ἐκεῖθεν, ἐντεῦθεν οἰσθήσεται ἐκεῖ κατὰ φύσιν· καὶ εἰ μένει ἐνταῦθα ἡ ἐκεῖθεν μὴ βίᾳ, καὶ οἰσθήσεται δεῦρο κατὰ φύσιν. Μία γὰρ ἡ κατὰ φύσιν.

Ἔτι ἀνάγκη πάντας τοὺς κόσμους ἐκ τῶν αὐτῶν εἶναι σωμάτων, ὁμοίους γ’ ὄντας τὴν φύσιν.

Ἀλλὰ μὴν καὶ τῶν σωμάτων ἕκαστον ἀναγκαῖον τὴν αὐτὴν (276b.) ἔχειν δύναμιν, οἷον λέγω πῦρ καὶ γῆν καὶ τὰ μεταξὺ τούτων· εἰ γὰρ ὁμώνυμα ταῦτα καὶ μὴ κατὰ τὴν αὐτὴν ἰδέαν λέγονται τἀκεῖ τοῖς παρ’ ἡμῖν, καὶ τὸ πᾶν ὁμωνύμως ἂν λέγοιτο κόσμος. Δῆλον τοίνυν ὅτι τὸ μὲν ἀπὸ τοῦ μέσου φέρεσθαι πέφυκε, τὸ δ’ ἐπὶ τὸ μέσον αὐτῶν, εἴπερ πᾶν ὁμοειδὲς τὸ πῦρ τῷ πυρὶ καὶ τῶν ἄλλων ἕκαστον, ὥσπερ καὶ τὰ ἐν τούτῳ μόρια τοῦ πυρός.

Ὅτι δ’ ἀναγκαῖον οὕτως ἔχειν, ἐκ τῶν περὶ τὰς κινήσεις ὑποθέσεων φανερόν· αἵ τε γὰρ κινήσεις πεπερασμέναι, ἕκαστόν τε τῶν στοιχείων λέγεται καθ’ ἑκάστην τῶν κινήσεων. Ὥστ’ εἴπερ καὶ αἱ κινήσεις αἱ αὐταί, καὶ τὰ στοιχεῖα ἀναγκαῖον εἶναι πανταχοῦ ταὐτά.

Πέφυκεν ἄρα φέρεσθαι καὶ ἐπὶ τόδε τὸ μέσον τὰ ἐν ἄλλῳ κόσμῳ τῆς γῆς μόρια, καὶ πρὸς τόδε τὸ ἔσχατον τὸ ἐκεῖ πῦρ. Ἀλλ’ ἀδύνατον· τούτου γὰρ συμβαίνοντος ἀνάγκη φέρεσθαι ἄνω μὲν τὴν γῆν ἐν τῷ οἰκείῳ κόσμῳ, τὸ δὲ πῦρ ἐπὶ τὸ μέσον, ὁμοίως δὲ καὶ τὴν ἐντεῦθεν γῆν ἀπὸ τοῦ μέσου φέρεσθαι κατὰ φύσιν πρὸς τὸ ἐκεῖ φερομένην μέσον, διὰ τὸ τοὺς κόσμους οὕτω κεῖσθαι πρὸς ἀλλήλους. Ἢ γὰρ οὐ θετέον τὴν αὐτὴν εἶναι φύσιν τῶν ἁπλῶν σωμάτων ἐν τοῖς πλείοσιν οὐρανοῖς, ἢ λέγοντας οὕτως τὸ μέσον ἓν ποιεῖν ἀνάγκη καὶ τὸ ἔσχατον· τούτου δ’ ὄντος ἀδύνατον εἶναι κόσμους πλείους ἑνός.

Τὸ δ’ ἀξιοῦν ἄλλην εἶναι φύσιν τῶν ἁπλῶν σωμάτων, ἂν ἀποσχῶσιν ἔλαττον ἢ πλεῖον τῶν οἰκείων τόπων, ἄλογον· τί γὰρ διαφέρει τὸ τοσονδὶ

φάναι μῆκος ἀπέχειν ἢ τοσονδί; Διοίσει γὰρ κατὰ λόγον, ὅσῳ πλεῖον μᾶλλον, τὸ δ’ εἶδος τὸ αὐτό.

Ἀλλὰ μὴν ἀνάγκη γ’ εἶναί τινα κίνησιν αὐτῶν· ὅτι μὲν γὰρ κινοῦνται, φανερόν. Πότερον οὖν βίᾳ πάσας ἐροῦμεν κινεῖσθαι καὶ τὰς ἐναντίας; ἀλλ’ ὃ μὴ πέφυκεν ὅλως κινεῖσθαι, ἀδύνατον τοῦτο κινεῖσθαι βίᾳ. Εἰ τοίνυν ἐστί τις κίνησις αὐτῶν κατὰ φύσιν, ἀνάγκη τῶν ὁμοειδῶν καὶ τῶν καθ’ ἕκαστον πρὸς ἕνα ἀριθμῷ τόπον ὑπάρχειν τὴν κίνησιν, οἷον πρὸς τόδε τι μέσον καὶ πρὸς τόδε τι ἔσχατον. Εἰ δὲ πρὸς εἴδει ταὐτά, (277a.) πλείω δέ, διότι καὶ τὰ καθ’ ἕκαστα πλείω μέν, εἴδει δ’ ἕκαστον ἀδιάφορον, οὐ τῷ μὲν τῷ δ’ οὐ τοιοῦτον ἔσται τῶν μορίων, ἀλλ’ ὁμοίως πᾶσιν· ὁμοίως γὰρ ἅπαντα κατ’ εἶδος ἀδιάφορα ἀλλήλων, ἀριθμῷ δ’ ἕτερον ὁτιοῦν ὁτουοῦν. Λέγω δὲ τοῦτο, ὅτι εἰ τὰ ἐνταῦθα μόρια πρὸς ἄλληλα καὶ τὰ ἐν ἑτέρῳ κόσμῳ ὁμοίως ἔχει, καὶ τὸ ληφθὲν ἐντεῦθεν οὐδὲν διαφερόντως πρὸς τῶν ἐν ἄλλῳ τινὶ κόσμῳ μορίων καὶ πρὸς τῶν ἐν τῷ αὐτῷ, ἀλλ’ ὡσαύτως· διαφέρουσι γὰρ οὐθὲν εἴδει ἀλλήλων. Ὥστ’ ἀναγκαῖον ἢ κινεῖν ταύτας τὰς ὑποθέσεις, ἢ τὸ μέσον ἓν εἶναι καὶ τὸ ἔσχατον. Τούτου δ’ ὄντος ἀνάγκη καὶ τὸν οὐρανὸν ἕνα μόνον εἶναι καὶ μὴ πλείους, τοῖς αὐτοῖς τεκμηρίοις τούτοις καὶ ταῖς αὐταῖς ἀνάγκαις.

Ὅτι δ’ ἔστι τι οὗ πέφυκεν ἡ γῆ φέρεσθαι καὶ τὸ πῦρ, δῆλον καὶ ἐκ τῶν ἄλλων. Ὅλως γὰρ τὸ κινούμενον ἔκ τινος εἴς τι μεταβάλλει, καὶ ταῦτα ἐξ οὗ καὶ εἰς ὃ εἴδει διαφέρει· πᾶσα δὲ πεπερασμένη μεταβολή· οἷον τὸ ὑγιαζόμενον ἐκ νόσου εἰς ὑγίειαν καὶ τὸ αὐξανόμενον ἐκ μικρότητος εἰς μέγεθος. Καὶ τὸ φερόμενον ἄρα· καὶ γὰρ τοῦτο γίνεταί ποθέν ποι. Δεῖ ἄρα εἴδει διαφέρειν ἐξ οὗ καὶ εἰς ὃ πέφυκε φέρεσθαι, ὥσπερ τὸ ὑγιαζόμενον οὐχ οὗ ἔτυχεν, οὐδ’ οὗ βούλεται ὁ κινῶν.

Καὶ τὸ πῦρ ἄρα καὶ ἡ γῆ οὐκ εἰς ἄπειρον φέρονται, ἀλλ’ εἰς ἀντικείμενα· ἀντίκειται δὲ κατὰ τόπον τὸ ἄνω τῷ κάτω, ὥστε ταῦτα ἔσται πέρατα τῆς φορᾶς. Ἐπεὶ καὶ ἡ κύκλῳ ἔχει πως ἀντικείμενα τὰ κατὰ διάμετρον, τῇ δ’ ὅλῃ οὐκ ἔστιν ἐναντίον οὐδέν, ὥστε καὶ τούτοις τρόπον τινὰ ἡ κίνησις εἰς ἀντικείμενα καὶ πεπερασμένα. Ἀνάγκη ἄρα εἶναί τι τέλος καὶ μὴ εἰς ἄπειρον φέρεσθαι.

Τεκμήριον δὲ τοῦ μὴ εἰς ἄπειρον φέρεσθαι καὶ τὸ τὴν γῆν μέν, ὅσῳ ἂν ἐγγυτέρω ᾖ τοῦ μέσου, θᾶττον φέρεσθαι, τὸ δὲ πῦρ, ὅσῳ ἂν τοῦ ἄνω. Εἰ δ’ ἄπειρον ἦν, ἄπειρος ἂν ἦν καὶ ἡ ταχυτής, εἰ δ’ ἡ ταχυτής, καὶ τὸ βάρος καὶ ἡ κουφότης· ὡς γὰρ <εἰ> τῷ κατωτέρω ταχὺ ἦν τι, ἕτερον τῷ βάρει ἂν ἦν ταχύ, οὕτως εἰ ἄπειρος ἦν ἡ τούτου ἐπίδοσις, καὶ ἡ τῆς ταχυτῆτος ἐπίδοσις ἄπειρος ἂν ἦν.

Ἀλλὰ (277b.) μὴν οὐδ’ ὑπ’ ἄλλου φέρεται αὐτῶν τὸ μὲν ἄνω τὸ δὲ κάτω· οὐδὲ βίᾳ, ὥσπερ τινές φασι τῇ ἐκθλίψει. Βραδύτερον γὰρ ἂν ἐκινεῖτο τὸ πλεῖον πῦρ ἄνω καὶ ἡ πλείων γῆ κάτω· νῦν δὲ τοὐναντίον ἀεὶ τὸ πλεῖον πῦρ θᾶττον φέρεται καὶ ἡ πλείων γῆ εἰς τὸν αὐτῶν τόπον. Οὐδὲ θᾶττον ἂν πρὸς τῷ τέλει ἐφέρετο, εἰ βίᾳ καὶ ἐκθλίψει· πάντα γὰρ τοῦ βιασαμένου πορρωτέρω γιγνόμενα βραδύτερον φέρεται, καὶ ὅθεν βίᾳ, ἐκεῖ φέρεται οὐ βίᾳ. Ὥστ’ ἐκ τούτων θεωροῦσιν ἔστι λαβεῖν τὴν πίστιν περὶ τῶν λεγομένων ἱκανῶς.

Ἔτι δὲ καὶ διὰ τῶν ἐκ τῆς πρώτης φιλοσοφίας λόγων δειχθείη ἄν, καὶ ἐκ τῆς κύκλῳ κινήσεως, ἣν ἀναγκαῖον ἀΐδιον ὁμοίως ἐνταῦθά τ’ εἶναι καὶ ἐν τοῖς ἄλλοις κόσμοις.

Δῆλον δὲ κἂν ὧδε γένοιτο σκοπουμένοις ὅτι ἀνάγκη ἕνα εἶναι τὸν οὐρανόν. Τριῶν γὰρ ὄντων τῶν σωματικῶν στοιχείων, τρεῖς ἔσονται καὶ οἱ τόποι τῶν στοιχείων, εἷς μὲν ὁ τοῦ ὑφισταμένου σώματος ὁ περὶ τὸ μέσον, ἄλλος δὲ ὁ τοῦ κύκλῳ φερομένου, ὅσπερ ἐστὶν ἔσχατος, τρίτος δ’ ὁ μεταξὺ τούτων ὁ τοῦ μέσου σώματος. Ἀνάγκη γὰρ ἐν τούτῳ εἶναι τὸ ἐπιπολάζον. Εἰ γὰρ μὴ ἐν τούτῳ, ἔξω ἔσται· ἀλλ’ ἀδύνατον ἔξω. Τὸ μὲν γὰρ ἀβαρὲς τὸ δ’ ἔχον βάρος, κατωτέρω δὲ ὁ τοῦ βάρος ἔχοντος σώματος τόπος, εἴπερ ὁ πρὸς τῷ μέσῳ τοῦ βαρέος. Ἀλλὰ μὴν οὐδὲ παρὰ φύσιν· ἄλλῳ γὰρ ἔσται κατὰ φύσιν, ἄλλο δ’ οὐκ ἦν. Ἀνάγκη ἄρα ἐν τῷ μεταξὺ εἶναι. Τούτου δ’ αὐτοῦ τίνες εἰσὶ διαφοραί, ὕστερον ἐροῦμεν.

Περὶ μὲν οὖν τῶν σωματικῶν στοιχείων, ποῖά τ’ ἐστὶ καὶ πόσα, καὶ τίς ἑκάστου τόπος, ἔτι δ’ ὅλως πόσοι τὸ πλῆθος οἱ τόποι, δῆλον ἡμῖν ἐκ τῶν εἰρημένων.

Κεφάλαιο 9

Ὅτι δ’ οὐ μόνον εἷς ἐστίν, ἀλλὰ καὶ ἀδύνατον γενέσθαι πλείους, ἔτι δ’ ὡς ἀΐδιος ἄφθαρτος ὢν καὶ ἀγένητος, λέγωμεν, πρῶτον διαπορήσαντες περὶ αὐτοῦ.

Δόξειε γὰρ ἂν ὡδὶ σκοπουμένοις ἀδύνατον ἕνα καὶ μόνον εἶναι αὐτόν· ἐν ἅπασι γὰρ καὶ τοῖς φύσει καὶ τοῖς ἀπὸ τέχνης συνεστῶσι καὶ γεγενημένοις ἕτερόν ἐστιν αὐτή τε καθ’ αὑτὴν ἡ μορφὴ καὶ μεμιγμένη μετὰ τῆς ὕλης· οἷον τῆς σφαίρας ἕτερον τὸ εἶδος (278a.) καὶ ἡ χρυσῆ καὶ ἡ χαλκῆ σφαῖρα, καὶ πάλιν τοῦ κύκλου ἑτέρα ἡ μορφὴ καὶ ὁ χαλκοῦς καὶ ὁ ξύλινος κύκλος· τὸ γὰρ τί ἦν εἶναι λέγοντες σφαίρᾳ ἢ κύκλῳ οὐκ ἐροῦμεν ἐν τῷ λόγῳ χρυσὸν ἢ χαλκόν, ὡς οὐκ ὄντα ταῦτα τῆς οὐσίας· ἂν δὲ τὴν χαλκῆν ἢ χρυσῆν, ἐροῦμεν, καὶ ἐὰν μὴ δυνώμεθα νοῆσαι μηδὲ λαβεῖν ἄλλο τι παρὰ τὸ καθ’ ἕκαστον. Ἐνίοτε γὰρ οὐθὲν κωλύει τοῦτο συμβαίνειν, οἷον εἰ μόνος εἷς ληφθείη κύκλος· οὐθὲν γὰρ ἧττον ἄλλο ἔσται τὸ κύκλῳ εἶναι καὶ τῷδε τῷ κύκλῳ, καὶ τὸ μὲν εἶδος, τὸ δ’ εἶδος ἐν τῇ ὕλῃ καὶ τῶν καθ’ ἕκαστον.

Ἐπεὶ οὖν ἐστὶν ὁ οὐρανὸς αἰσθητός, τῶν καθ’ ἕκαστον ἂν εἴη· τὸ γὰρ αἰσθητὸν ἅπαν ἐν τῇ ὕλῃ ὑπῆρχεν. Εἰ δὲ τῶν καθ’ ἕκαστον, ἕτερον ἂν εἴη τῷδε τῷ οὐρανῷ εἶναι καὶ οὐρανῷ ἁπλῶς. Ἕτερον ἄρα ὅδε ὁ οὐρανὸς καὶ οὐρανὸς ἁπλῶς, καὶ τὸ μὲν ὡς εἶδος καὶ μορφή, τὸ δ’ ὡς τῇ ὕλῃ μεμιγμένον. Ὧν δ’ ἐστὶ μορφή τις καὶ εἶδος, ἤτοι ἔστιν ἢ ἐνδέχεται πλείω γενέσθαι τὰ καθ’ ἕκαστα. Εἴτε γὰρ ἔστιν εἴδη, καθάπερ φασί τινες, ἀνάγκη τοῦτο συμβαίνειν, εἴτε καὶ χωριστὸν μηθὲν τῶν τοιούτων, οὐθὲν ἧττον· ἐπὶ πάντων γὰρ οὕτως ὁρῶμεν, ὅσων ἡ οὐσία ἐν ὕλῃ ἐστίν, πλείω καὶ ἄπειρα ὄντα τὰ ὁμοειδῆ. Ὥστε ἤτοι εἰσὶ πλείους οὐρανοὶ ἢ ἐνδέχεται πλείους εἶναι. Ἐκ μὲν δὴ τούτων ὑπολάβοι τις ἂν καὶ εἶναι καὶ ἐνδέχεσθαι πλείους εἶναι οὐρανούς· σκεπτέον δὲ πάλιν τί τούτων λέγεται καλῶς καὶ τί οὐ καλῶς.

Τὸ μὲν οὖν ἕτερον εἶναι τὸν λόγον τὸν ἄνευ τῆς ὕλης καὶ τὸν ἐν τῇ ὕλῃ τῆς μορφῆς καλῶς τε λέγεται, καὶ ἔστω τοῦτ’ ἀληθές. Ἀλλ’ οὐδὲν ἧττον οὐδεμία ἀνάγκη διὰ τοῦτο πλείους εἶναι κόσμους, οὐδ’ ἐνδέχεται γενέσθαι πλείους, εἴπερ οὗτος ἐξ ἁπάσης ἐστὶ τῆς ὕλης, ὥσπερ ἔστιν.

Ὡδὶ δὲ μᾶλλον ἴσως τὸ λεγόμενον ἔσται δῆλον. Εἰ γάρ ἐστιν ἡ γρυπότης καμπυλότης ἐν ῥινὶ ἢ σαρκί, καὶ ἔστιν ὕλη τῇ γρυπότητι ἡ σάρξ, εἰ ἐξ ἁπασῶν τῶν σαρκῶν μία γένοιτο σὰρξ καὶ ὑπάρξειεν ταύτῃ τὸ γρυπόν, οὐθὲν ἂν ἄλλ’ οὔτ’ εἴη γρυπὸν οὔτ’ ἐνδέχοιτο γενέσθαι. Ὁμοίως δὲ καὶ εἰ τῷ ἀνθρώπῳ ἐστὶν ὕλη σάρκες καὶ ὀστᾶ, εἰ ἐκ πάσης τῆς σαρκὸς καὶ πάντων

τῶν ὀστῶν ἄνθρωπος γένοιτο ἀδυνάτων ὄντων διαλυθῆναι, οὐκ ἂν ἐνδέχοιτο εἶναι ἄλλον ἄνθρωπον. Ὡσαύ(278b.) τως δὲ καὶ ἐπὶ τῶν ἄλλων· ὅλως γὰρ ὅσων ἐστὶν ἡ οὐσία ἐν ὑποκειμένῃ τινὶ ὕλῃ, τούτων οὐδὲν ἐνδέχεται γίγνεσθαι μὴ ὑπαρχούσης τινὸς ὕλης.

Ὁ δ’ οὐρανὸς ἔστι μὲν τῶν καθ’ ἕκαστα καὶ τῶν ἐκ τῆς ὕλης· ἀλλ’ εἰ μὴ ἐκ μορίου αὐτῆς συνέστηκεν ἀλλ’ ἐξ ἁπάσης, τὸ μὲν εἶναι αὐτῷ οὐρανῷ καὶ τῷδε τῷ οὐρανῷ ἕτερόν ἐστιν, οὐ μέντοι οὔτ’ ἂν εἴη ἄλλος οὔτ’ ἂν ἐνδέχοιτο γενέσθαι πλείους, διὰ τὸ πᾶσαν τὴν ὕλην περιειληφέναι τοῦτον. Λείπεται ἄρα αὐτὸ τοῦτο δεῖξαι, ὅτι ἐξ ἅπαντος τοῦ φυσικοῦ καὶ τοῦ αἰσθητοῦ συνέστηκε σώματος.

Εἴπωμεν δὲ πρῶτον τί λέγομεν εἶναι τὸν οὐρανὸν καὶ ποσαχῶς, ἵνα μᾶλλον ἡμῖν δῆλον γένηται τὸ ζητούμενον. Ἕνα μὲν οὖν τρόπον οὐρανὸν λέγομεν τὴν οὐσίαν τὴν τῆς ἐσχάτης τοῦ παντὸς περιφορᾶς, ἢ σῶμα φυσικὸν τὸ ἐν τῇ ἐσχάτῃ περιφορᾷ τοῦ παντός· εἰώθαμεν γὰρ τὸ ἔσχατον καὶ τὸ ἄνω μάλιστα καλεῖν οὐρανόν, ἐν ᾧ καὶ τὸ θεῖον πᾶν ἱδρῦσθαί φαμεν.

Ἄλλον δ’ αὖ τρόπον τὸ συνεχὲς σῶμα τῇ ἐσχάτῃ περιφορᾷ τοῦ παντός, ἐν ᾧ σελήνη καὶ ἥλιος καὶ ἔνια τῶν ἄστρων· καὶ γὰρ ταῦτα ἐν τῷ οὐρανῷ εἶναί φαμεν.

Ἔτι δ’ ἄλλως λέγομεν οὐρανὸν τὸ περιεχόμενον σῶμα ὑπὸ τῆς ἐσχάτης περιφορᾶς· τὸ γὰρ ὅλον καὶ τὸ πᾶν εἰώθαμεν λέγειν οὐρανόν.

Τριχῶς δὴ λεγομένου τοῦ οὐρανοῦ, τὸ ὅλον τὸ ὑπὸ τῆς ἐσχάτης περιεχόμενον περιφορᾶς ἐξ ἅπαντος ἀνάγκη συνεστάναι τοῦ φυσικοῦ καὶ τοῦ αἰσθητοῦ σώματος διὰ τὸ μήτ’ εἶναι μηδὲν ἔξω σῶμα τοῦ οὐρανοῦ μήτ’ ἐνδέχεσθαι γενέσθαι.

Εἰ γὰρ ἔστιν ἔξω τῆς ἐσχάτης περιφορᾶς σῶμα φυσικόν, ἀνάγκη αὐτὸ ἤτοι τῶν ἁπλῶν εἶναι σωμάτων ἢ τῶν συνθέτων, καὶ ἢ κατὰ φύσιν ἢ παρὰ φύσιν ἔχειν. Τῶν μὲν οὖν ἁπλῶν οὐθὲν ἂν εἴη. Τὸ μὲν γὰρ κύκλῳ φερόμενον δέδεικται ὅτι οὐκ ἐνδέχεται μεταλλάξαι τὸν αὑτοῦ τόπον. Ἀλλὰ μὴν οὐδὲ τὸ ἀπὸ τοῦ μέσου δυνατόν, οὐδὲ τὸ ὑφιστάμενον. Κατὰ φύσιν μὲν γὰρ οὐκ ἂν εἴησαν (ἄλλοι γὰρ αὐτῶν οἰκεῖοι τόποι), παρὰ φύσιν δ’ εἴπερ εἰσίν, ἄλλῳ τινὶ ἔσται κατὰ φύσιν ὁ ἔξω τόπος· τὸν γὰρ τούτῳ παρὰ φύσιν ἀναγκαῖον ἄλλῳ εἶναι κατὰ φύσιν. Ἀλλ’ οὐκ ἦν ἄλλο σῶμα παρὰ ταῦτα. Οὐκ ἄρ’ ἐστὶ δυνατὸν οὐθὲν τῶν ἁπλῶν ἔξω εἶναι τοῦ (279a.) οὐρανοῦ σῶμα. Εἰ δὲ μὴ τῶν ἁπλῶν, οὐδὲ τῶν μικτῶν· ἀνάγκη γὰρ εἶναι καὶ τὰ ἁπλᾶ τοῦ μικτοῦ ὄντος.

Ἀλλὰ μὴν οὐδὲ γενέσθαι δυνατόν· ἤτοι γὰρ κατὰ φύσιν ἔσται ἢ παρὰ φύσιν, καὶ ἢ ἁπλοῦν ἢ μικτόν. Ὥστε πάλιν ὁ αὐτὸς ἥξει λόγος· οὐδὲν γὰρ διαφέρει σκοπεῖν εἰ ἔστιν ἢ εἰ γενέσθαι δυνατόν.

Φανερὸν τοίνυν ἐκ τῶν εἰρημένων ὅτι οὔτ’ ἔστιν ἔξω οὔτ’ ἐγχωρεῖ γενέσθαι σώματος ὄγκον οὐθενός· ἐξ ἁπάσης ἄρ’ ἐστὶ τῆς οἰκείας ὕλης ὁ πᾶς κόσμος· ὕλη γὰρ ἦν αὐτῷ τὸ φυσικὸν σῶμα καὶ αἰσθητόν. Ὥστ’ οὔτε νῦν εἰσὶ πλείους οὐρανοὶ οὔτ’ ἐγένοντο, οὔτ’ ἐνδέχεται γενέσθαι πλείους· ἀλλ’ εἷς καὶ μόνος καὶ τέλειος οὗτος οὐρανός ἐστιν.

Ἅμα δὲ δῆλον ὅτι οὐδὲ τόπος οὐδὲ κενὸν οὐδὲ χρόνος ἐστὶν ἔξω τοῦ οὐρανοῦ. Ἐν ἅπαντι γὰρ τόπῳ δυνατὸν ὑπάρξαι σῶμα· κενὸν δ’ εἶναί φασιν ἐν ᾧ μὴ ἐνυπάρχει σῶμα, δυνατὸν δ’ ἐστὶ γενέσθαι· χρόνος δὲ ἀριθμὸς κινήσεως· κίνησις δ’ ἄνευ φυσικοῦ σώματος οὐκ ἔστιν. Ἔξω δὲ τοῦ οὐρανοῦ δέδεικται ὅτι οὔτ’ ἔστιν οὔτ’ ἐνδέχεται γενέσθαι σῶμα. Φανερὸν ἄρα ὅτι οὔτε τόπος οὔτε κενὸν οὔτε χρόνος ἐστὶν ἔξω.

Διόπερ οὔτ’ ἐν τόπῳ τἀκεῖ πέφυκεν, οὔτε χρόνος αὐτὰ ποιεῖ γηράσκειν, οὐδ’ ἐστὶν οὐδενὸς οὐδεμία μεταβολὴ τῶν ὑπὲρ τὴν ἐξωτάτω τεταγμένων φοράν, ἀλλ’ ἀναλλοίωτα καὶ ἀπαθῆ τὴν ἀρίστην ἔχοντα ζωὴν καὶ τὴν αὐταρκεστάτην διατελεῖ τὸν ἅπαντα αἰῶνα. (Καὶ γὰρ τοῦτο τοὔνομα θείως ἔφθεγκται παρὰ τῶν ἀρχαίων. Τὸ γὰρ τέλος τὸ περιέχον τὸν τῆς ἑκάστου ζωῆς χρόνον, οὗ μηθὲν ἔξω κατὰ φύσιν, αἰὼν ἑκάστου κέκληται. Κατὰ τὸν αὐτὸν δὲ λόγον καὶ τὸ τοῦ παντὸς οὐρανοῦ τέλος καὶ τὸ τὸν πάντα χρόνον καὶ τὴν ἀπειρίαν περιέχον τέλος αἰών ἐστιν, ἀπὸ τοῦ αἰεὶ εἶναι τὴν ἐπωνυμίαν εἰληφώς, ἀθάνατος καὶ θεῖος). Ὅθεν καὶ τοῖς ἄλλοις ἐξήρτηται, τοῖς μὲν ἀκριβέστερον τοῖς δ’ ἀμαυρῶς, τὸ εἶναί τε καὶ ζῆν.

Καὶ γάρ, καθάπερ ἐν τοῖς ἐγκυκλίοις φιλοσοφήμασι περὶ τὰ θεῖα, πολλάκις προφαίνεται τοῖς λόγοις ὅτι τὸ θεῖον ἀμετάβλητον ἀναγκαῖον εἶναι πᾶν τὸ πρῶτον καὶ ἀκρότατον· ὃ οὕτως ἔχον μαρτυρεῖ τοῖς εἰρημένοις. Οὔτε γὰρ ἄλλο κρεῖττόν ἐστιν ὅ τι κινήσει (ἐκεῖνο γὰρ ἂν εἴη θειότερον) οὔτ’ ἔχει φαῦλον οὐδέν, οὔτ’ ἐνδεὲς τῶν αὑτοῦ καλῶν οὐδενός ἐστιν.

(279b.) Καὶ ἄπαυστον δὴ κίνησιν κινεῖται εὐλόγως· πάντα γὰρ παύεται κινούμενα ὅταν ἔλθῃ εἰς τὸν οἰκεῖον τόπον, τοῦ δὲ κύκλῳ σώματος ὁ αὐτὸς τόπος ὅθεν ἤρξατο καὶ εἰς ὃν τελευτᾷ.

Κεφάλαιο 10

Τούτων δὲ διωρισμένων λέγωμεν μετὰ ταῦτα πότερον ἀγένητος ἢ γενητὸς καὶ ἄφθαρτος ἢ φθαρτός, διεξελθόντες πρότερον τὰς τῶν ἄλλων ὑπολήψεις· αἱ γὰρ τῶν ἐναντίων ἀποδείξεις ἀπορίαι περὶ τῶν ἐναντίων εἰσίν. Ἅμα δὲ καὶ μᾶλλον ἂν εἴη πιστὰ τὰ μέλλοντα λεχθήσεσθαι προακηκοόσι τὰ τῶν ἀμφισβητούντων λόγων δικαιώματα. Τὸ γὰρ ἐρήμην καταδικάζεσθαι δοκεῖν ἧττον ἂν ἡμῖν ὑπάρχοι· καὶ γὰρ δεῖ διαιτητὰς ἀλλ' οὐκ ἀντιδίκους εἶναι τοὺς μέλλοντας τἀληθὲς κρίνειν ἱκανῶς.

Γενόμενον μὲν οὖν ἅπαντες εἶναί φασιν, ἀλλὰ γενόμενον οἱ μὲν ἀΐδιον, οἱ δὲ φθαρτὸν ὥσπερ ὁτιοῦν ἄλλο τῶν συνισταμένων, οἱ δ' ἐναλλὰξ ὁτὲ μὲν οὕτως ὁτὲ δὲ ἄλλως ἔχειν [φθειρόμενον], καὶ τοῦτο αἰεὶ διατελεῖν οὕτως, ὥσπερ Ἐμπεδοκλῆς ὁ Ἀκραγαντῖνος καὶ Ἡράκλειτος ὁ Ἐφέσιος.

Τὸ μὲν οὖν γενέσθαι μὲν ἀΐδιον δ' ὅμως εἶναι φάναι τῶν ἀδυνάτων. Μόνα γὰρ ταῦτα θετέον ὑλόγως ὅσα ἐπὶ πολλῶν ἢ πάντων ὁρῶμεν ὑπάρχοντα, περὶ δὲ τούτου συμβαίνει τοὐναντίον· ἅπαντα γὰρ τὰ γινόμενα καὶ φθειρόμενα φαίνεται.

Ἔτι δὲ τὸ μὴ ἔχον ἀρχὴν τοῦ ὡδὶ ἔχειν, ἀλλ' ἀδύνατον ἄλλως ἔχειν πρότερον τὸν ἅπαντα αἰῶνα, ἀδύνατον καὶ μεταβάλλειν· ἔσται γάρ τι αἴτιον, ὃ εἰ ὑπῆρχε πρότερον, δυνατὸν ἂν ἦν ἄλλως ἔχειν τὸ ἀδύνατον ἄλλως ἔχειν. Εἰ δὲ πρότερον ἐξ ἄλλως ἐχόντων συνέστη ὁ κόσμος, εἰ μὲν ἀεὶ οὕτως ἐχόντων καὶ ἀδυνάτων ἄλλως ἔχειν, οὐκ ἂν ἐγένετο· εἰ δὲ γέγονεν, ἀνάγκη δηλονότι κἀκεῖνα δυνατὰ εἶναι ἄλλως ἔχειν καὶ μὴ ἀεὶ οὕτως ἔχειν, ὥστε καὶ συνεστῶτα διαλυθήσεται καὶ διαλελυμένα συνέστη ἔμπροσθεν, καὶ τοῦτ' ἀπειράκις ἢ οὕτως εἶχεν ἢ δυνατὸν ἦν. Εἰ δὲ τοῦτ', οὐκ ἂν εἴη ἄφθαρτος, οὔτ' εἰ ἄλλως εἶχέ ποτε οὔτ' εἰ δυνατὸν ἄλλως ἔχειν.

Ἣν δέ τινες βοήθειαν ἐπιχειροῦσι φέρειν ἑαυτοῖς τῶν λεγόντων ἄφθαρτον μὲν εἶναι γενόμενον δέ, οὐκ ἔστιν ἀληθής· ὁμοίως γάρ φασι τοῖς τὰ διαγράμματα γράφουσι καὶ σφᾶς εἰρηκέναι περὶ τῆς γενέσεως, οὐχ ὡς γενομένου ποτέ, ἀλλὰ (280a.) διδασκαλίας χάριν ὡς μᾶλλον γνωριζόντων, ὥσπερ τὸ διάγραμμα γιγνόμενον θεασαμένους. Τοῦτο δ' ἐστίν, ὥσπερ λέγομεν, οὐ τὸ αὐτό· ἐν μὲν γὰρ τῇ ποιήσει τῶν διαγραμμάτων πάντων τεθέντων εἶναι ἅμα τὸ αὐτὸ συμβαίνει, ἐν δὲ ταῖς τούτων ἀποδείξεσιν οὐ ταὐτόν, ἀλλ' ἀδύνατον· τὰ γὰρ λαμβανόμενα πρότερον καὶ ὕστερον ὑπεναντία ἐστίν· ἐξ ἀτάκτων γὰρ τεταγμένα γενέσθαι φασίν, ἅμα δὲ ἄτακτον εἶναι καὶ τεταγμένον ἀδύνατον, ἀλλ' ἀνάγκη γένεσιν εἶναι τὴν χωρίζουσαν καὶ χρόνον· ἐν δὲ τοῖς διαγράμμασιν οὐδὲν τῷ χρόνῳ κεχώρισται. Ὅτι μὲν οὖν ἀδύνατον ἅμ’ ἀΐδιον αὐτὸν εἶναι καὶ γενέσθαι, φανερόν.

Τὸ δ’ ἐναλλὰξ συνιστάναι καὶ διαλύειν οὐδὲν ἀλλοιότερον ποιεῖν ἐστὶν ἢ τὸ κατασκευάζειν αὐτὸν ἀΐδιον μέν, ἀλλὰ μεταβάλλοντα τὴν μορφήν, ὥσπερ εἴ τις ἐκ παιδὸς ἄνδρα γινόμενον καὶ ἐξ ἀνδρὸς παῖδα ὁτὲ μὲν φθείρεσθαι ὁτὲ δ’ εἶναι οἴοιτο· δῆλον γὰρ ὅτι καὶ εἰς ἄλληλα τῶν στοιχείων συνιόντων οὐχ ἡ τυχοῦσα τάξις γίγνεται καὶ σύστασις, ἀλλ’ ἡ αὐτή, ἄλλως τε καὶ κατὰ τοὺς τοῦτον τὸν λόγον εἰρηκότας, οἳ τῆς διαθέσεως ἑκατέρας αἰτιῶνται τὸ ἐναντίον. Ὥστ’ εἰ τὸ ὅλον σῶμα συνεχὲς ὂν ὁτὲ μὲν οὕτως ὁτὲ δ’ ἐκείνως διατίθεται καὶ διακεκόσμηται, ἡ δὲ τοῦ ὅλου σύστασίς ἐστι κόσμος καὶ οὐρανός, οὐκ ἂν ὁ κόσμος γίγνοιτο καὶ φθείροιτο, ἀλλ’ αἱ διαθέσεις αὐτοῦ.

Τὸ δ’ ὅλως γενόμενον φθαρῆναι καὶ μὴ ἀνακάμπτειν ὄντος μὲν ἑνὸς ἀδύνατόν ἐστιν· πρὶν γὰρ γενέσθαι ἀεὶ ὑπῆρχεν ἡ πρὸ αὐτοῦ σύστασις, ἣν μὴ γενομένην οὐχ οἷόν τ’ εἶναί φαμεν μεταβάλλειν· ἀπείρων δ’ ὄντων ἐνδέχεται μᾶλλον.

Οὐ μὴν ἀλλὰ καὶ τοῦτο πότερον ἀδύνατον ἢ δυνατόν, ἔσται δῆλον ἐκ τῶν ὕστερον· εἰσὶ γάρ τινες οἷς ἐνδέχεσθαι δοκεῖ καὶ ἀγένητόν τι ὂν φθαρῆναι καὶ γενόμενον ἄφθαρτον διατελεῖν, ὥσπερ ἐν τῷ Τιμαίῳ· ἐκεῖ γάρ φησι τὸν οὐρανὸν γενέσθαι μέν, οὐ μὴν ἀλλ’ ἔσεσθαί γε τὸν λοιπὸν ἀεὶ χρόνον. Πρὸς οὓς φυσικῶς μὲν περὶ οὐρανοῦ μόνον εἴρηται, καθόλου δὲ περὶ ἅπαντος σκεψαμένοις ἔσται καὶ περὶ τούτου δῆλον.

Κεφάλαιο 11

(280b.) Πρῶτον δὲ διαιρετέον πῶς ἀγένητα καὶ γενητά φαμεν καὶ φθαρτὰ καὶ ἄφθαρτα· πολλαχῶς γὰρ λεγομένων, κἂν μηδὲν διαφέρῃ πρὸς τὸν λόγον, ἀνάγκη τὴν διάνοιαν ἀορίστως ἔχειν, ἄν τις τῷ διαιρουμένῳ πολλαχῶς ὡς ἀδιαιρέτῳ χρῆται· ἄδηλον γὰρ κατὰ ποίαν φύσιν αὐτῶν συμβαίνει τὸ λεχθέν.

Λέγεται δ’ ἀγένητον ἕνα μὲν τρόπον ἐὰν ᾖ τι νῦν πρότερον μὴ ὂν ἄνευ γενέσεως καὶ μεταβολῆς, καθάπερ ἔνιοι τὸ ἅπτεσθαι καὶ τὸ κινεῖσθαι λέγουσιν· οὐ γὰρ εἶναι γενέσθαι φασὶν ἁπτόμενον, οὐδὲ κινούμενον. Ἕνα δ’ εἴ τι ἐνδεχόμενον γίνεσθαι ἢ γενέσθαι μή ἐστιν· ὁμοίως γὰρ καὶ τοῦτο ἀγένητον, ὅτι ἐνδέχεται γενέσθαι. Ἕνα δ’ εἴ τι ὅλως ἀδύνατον γενέσθαι, ὥσθ’ ὁτὲ μὲν εἶναι ὁτὲ δὲ μή. (Τὸ δ’ ἀδύνατον λέγεται διχῶς. Ἢ γὰρ τῷ μὴ ἀληθὲς εἶναι εἰπεῖν ὅτι γένοιτ’ ἄν, ἢ τῷ μὴ ῥᾳδίως μηδὲ ταχὺ ἢ καλῶς.)

Τὸν αὐτὸν δὲ τρόπον καὶ τὸ γενητὸν ἕνα μὲν εἰ μὴ ὂν πρότερον ὕστερον ἔστιν, εἴτε γινόμενον εἴτ’ ἄνευ τοῦ γίνεσθαι, ὁτὲ μὲν μὴ ὄν, πάλιν δ’ ὄν. Ἕνα δ’ εἰ δυνατόν, εἴτε τῷ ἀληθεῖ διορισθέντος τοῦ δυνατοῦ εἴτε τῷ ῥᾳδίως. Ἕνα δ’ ἐὰν ἡ γένεσις αὐτοῦ ἐκ τοῦ μὴ ὄντος εἰς τὸ ὄν, εἴτ’ ἤδη ὄντος, διὰ τοῦ γίνεσθαι δ’ ὄντος, εἴτε καὶ μήπω ὄντος, ἀλλ’ ἐνδεχομένου.

Καὶ φθαρτὸν δὲ καὶ ἄφθαρτον ὡσαύτως· εἴτε γὰρ πρότερόν τι ὂν ὕστερον ἢ μή ἐστιν ἢ ἐνδέχεται μὴ εἶναι, φθαρτὸν εἶναί φαμεν, εἴτε φθειρόμενόν ποτε καὶ μεταβάλλον, εἴτε μή. Ἔστι δ’ ὅτε καὶ τὸ διὰ τοῦ φθείρεσθαι ἐνδεχόμενον μὴ εἶναι φθαρτὸν εἶναί φαμεν, καὶ ἔτι ἄλλως τὸ ῥᾳδίως φθειρόμενον, ὃ εἴποι ἄν τις εὔφθαρτον. Καὶ περὶ τοῦ ἀφθάρτου ὁ αὐτὸς λόγος· Ἢ γὰρ τὸ ἄνευ φθορᾶς ὁτὲ μὲν ὂν ὁτὲ δὲ μὴ ὄν, οἷον τὰς ἁφάς, ὅτι ἄνευ τοῦ φθείρεσθαι πρότερον οὖσαι ὕστερον οὐκ εἰσίν. Ἢ τὸ ὂν μέν, δυνατὸν δὲ μὴ εἶναι, ἢ καὶ οὐκ ἐσόμενόν ποτε, νῦν δ’ ὄν· σὺ γὰρ εἶ, καὶ ἡ ἁφὴ νῦν· ἀλλ’ ὅμως φθαρτόν, ὅτι ἔσται ποτὲ ὅτε οὐκ ἀληθὲς εἰπεῖν ὅτι εἶ, οὐδὲ ταῦτα ἅπτεσθαι. Τὸ δὲ μάλιστα κυρίως, τὸ ὂν μέν, ἀδύνατον δὲ φθαρῆναι οὕτως ὥστε νῦν ὂν ὕστερον μὴ εἶναι ἢ ἐνδέχεσθαι μὴ εἶναι. Ἢ καὶ τὸ μήπω ἐφθαρμένον, ἐνδεχόμενον δ’ ὕστερον μὴ εἶναι. Λέγεται δ’ (281a.) ἄφθαρτον καὶ τὸ μὴ ῥᾳδίως φθειρόμενον.

Εἰ δὴ ταῦθ’ οὕτως ἔχει, σκεπτέον πῶς λέγομεν τὸ δυνατὸν καὶ ἀδύνατον· τό τε γὰρ κυριώτατα λεγόμενον ἄφθαρτον τῷ μὴ δύνασθαι ἂν φθαρῆναι, μηδ’ ὁτὲ μὲν εἶναι ὁτὲ δὲ μή· λέγεται δὲ καὶ τὸ ἀγένητον τὸ ἀδύνατον καὶ μὴ δυνάμενον γενέσθαι οὕτως ὥστε πρότερον μὲν μὴ εἶναι ὕστερον δὲ εἶναι, οἷον τὴν διάμετρον σύμμετρον. Εἰ δή τι δύναται κινηθῆναι [στάδια ἑκατὸν] ἢ ἆραι βάρος, ἀεὶ πρὸς τὸ πλεῖστον λέγομεν, οἷον τάλαντα ἆραι ἑκατὸν ἢ στάδια βαδίσαι ἑκατόν (καίτοι καὶ τὰ μόρια δύναται τὰ ἐντός, εἴπερ καὶ τὴν ὑπεροχήν), ὡς δέον ὁρίζεσθαι πρὸς τὸ τέλος καὶ τὴν ὑπεροχὴν τὴν δύναμιν. Ἀνάγκη μὲν οὖν τὸ δυνατὸν καθ’ ὑπεροχὴν τοσαδὶ καὶ τὰ ἐντὸς δύνασθαι, οἷον εἰ τάλαντα ἑκατὸν ἆραι, καὶ δύο, κἂν εἰ στάδια ἑκατόν, καὶ δύο δύνασθαι βαδίσαι. Ἡ δὲ δύναμις τῆς ὑπεροχῆς ἐστίν· κἂν εἴ τι ἀδύνατον τοσονδὶ καθ’ ὑπερβολὴν εἰπόντων, καὶ τὰ πλείω ἀδύνατον, οἷον ὁ χίλια βαδίσαι στάδια μὴ δυνάμενος δῆλον ὅτι καὶ χίλια καὶ ἕν.

Μηδὲν δ’ ἡμᾶς παρενοχλείτω· διωρίσθω γὰρ κατὰ τῆς ὑπεροχῆς τὸ τέλος λεγόμενον τὸ κυρίως δυνατόν. Τάχα γὰρ ἐνσταίη τις ἂν ὡς οὐκ ἀνάγκη τὸ λεχθέν· ὁ γὰρ ὁρῶν στάδιον οὐ καὶ τὰ ἐντὸς ὄψεται μεγέθη, ἀλλὰ τοὐναντίον μᾶλλον ὁ δυνάμενος ἰδεῖν στιγμὴν ἢ ἀκοῦσαι μικροῦ ψόφου καὶ τῶν μειζόνων ἕξει αἴσθησιν. Ἀλλ’ οὐδὲν διαφέρει πρὸς τὸν λόγον· διωρίσθω γὰρ ἤτοι ἐπὶ τῆς δυνάμεως ἢ ἐπὶ τοῦ πράγματος ἡ ὑπερβολή. Τὸ γὰρ λεγόμενον δῆλον· ἡ μὲν γὰρ ὄψις ἡ τοῦ ἐλάττονος ὑπερέχει, ἡ δὲ ταχυτὴς ἡ τοῦ πλείονος.

Κεφάλαιο 12

Διωρισμένων δὲ τούτων λεκτέον τὸ ἐφεξῆς. Εἰ δή ἐστιν ἔνια δυνατὰ καὶ εἶναι καὶ μή, ἀνάγκη χρόνον τινὰ ὡρίσθαι τὸν πλεῖστον καὶ τοῦ εἶναι καὶ τοῦ μή, λέγω δ’ ὃν δυνατὸν τὸ πρᾶγμα εἶναι καὶ ὃν δυνατὸν μὴ εἶναι καθ’ ὁποιανοῦν κατηγορίαν, οἷον ἄνθρωπον ἢ λευκὸν ἢ τρίπηχυ ἢ ἄλλ’ ὁτιοῦν τῶν τοιούτων. Εἰ γὰρ μὴ ἔσται ποσός τις, ἀλλ’ ἀεὶ πλείων τοῦ προτεθέντος καὶ οὐκ ἔστιν οὗ ἐλάττων, ἄπειρον (281b.) ἔσται χρόνον δυνατὸν εἶναι, καὶ μὴ εἶναι ἄλλον ἄπειρον· ἀλλὰ τοῦτ’ ἀδύνατον.

Ἀρχὴ δ’ ἔστω ἐντεῦθεν· τὸ γὰρ ἀδύνατον καὶ τὸ ψεῦδος οὐ ταὐτὸ σημαίνει. Ἔστι δὲ τὸ ἀδύνατον καὶ δυνατὸν καὶ ψεῦδος καὶ ἀληθὲς τὸ μὲν ἐξ ὑποθέσεως (λέγω δ’, οἷον τὸ τρίγωνον ἀδύνατον δύο ὀρθὰς ἔχειν, εἰ τάδε, καὶ ἡ διάμετρος σύμμετρος). Ἔστι δ’ ἁπλῶς καὶ δυνατὰ καὶ ἀδύνατα καὶ ψευδῆ καὶ ἀληθῆ. Οὐ δὴ ταὐτό ἐστι ψεῦδός τέ τι εἶναι ἁπλῶς καὶ ἀδύνατον ἁπλῶς. Τὸ γάρ σε μὴ ἑστῶτα φάναι ἑστάναι ψεῦδος μέν, οὐκ ἀδύνατον δέ. Ὁμοίως δὲ τὸν κιθαρίζοντα, μὴ ᾄδοντα δέ, ᾄδειν φάναι ψεῦδος, ἀλλ’ οὐκ ἀδύνατον. Τὸ δ’ ἅμα ἑστάναι καὶ καθῆσθαι, καὶ τὴν διάμετρον σύμμετρον εἶναι, οὐ μόνον ψεῦδος, ἀλλὰ καὶ ἀδύνατον. Οὐ δὴ ταὐτόν ἐστιν ὑποθέσθαι ψεῦδος καὶ ἀδύνατον. Συμβαίνει δ’ ἀδύνατον ἐξ ἀδυνάτου.

Τοῦ μὲν οὖν καθῆσθαι καὶ ἑστάναι ἅμα ἔχει τὴν δύναμιν, ὅτι ὅτε ἔχει ἐκείνην, καὶ τὴν ἑτέραν· ἀλλ’ οὐχ ὥστε ἅμα καθῆσθαι καὶ ἑστάναι, ἀλλ’ ἐν ἄλλῳ χρόνῳ. Εἰ δέ τι ἄπειρον χρόνον ἔχει πλειόνων δύναμιν, οὐκ ἔστιν ἐν ἄλλῳ χρόνῳ, ἀλλὰ τοῦθ’ ἅμα.

Ὥστ’ εἴ τι ἄπειρον χρόνον ὂν φθαρτόν ἐστι, δύναμιν ἔχοι ἂν τοῦ μὴ εἶναι. Εἰ δὴ ἄπειρον χρόνον, ἔστω ὑπάρχον ὃ δύναται. Ἅμα ἄρ’ ἔσται τε καὶ οὐκ ἔσται κατ’ ἐνέργειαν. Ψεῦδος μὲν οὖν συμβαίνοι ἄν, ὅτι ψεῦδος ἐτέθη. Ἀλλ’ εἰ μὴ ἀδύνατον ἦν, οὐκ ἂν καὶ ἀδύνατον ἦν τὸ συμβαῖνον. Ἅπαν ἄρα τὸ ἀεὶ ὂν ἁπλῶς ἄφθαρτον.

Ὁμοίως δὲ καὶ ἀγένητον· εἰ γὰρ γενητόν, ἔσται δυνατὸν χρόνον τινὰ μὴ εἶναι-φθαρτὸν μὲν γάρ ἐστι τὸ πρότερον μὲν ὄν, νῦν δὲ μὴ ὂν ἢ ἐνδεχόμενόν ποτε ὕστερον μὴ εἶναι· γενητὸν δὲ ὃ ἐνδέχεται πρότερον μὴ εἶναι-ἀλλ’ οὐκ ἔστιν ἐν ᾧ χρόνῳ δυνατὸν τὸ ἀεὶ ὂν ὥστε μὴ εἶναι, οὔτ’ ἄπειρον οὔτε πεπερασμένον· καὶ γὰρ τὸν πεπερασμένον χρόνον δύναται εἶναι, εἴπερ καὶ τὸν ἄπειρον. Οὐκ ἄρα ἐνδέχεται τὸ αὐτὸ καὶ ἓν ἀεί τε δύνασθαι εἶναι καὶ ἀεὶ μὴ εἶναι. Ἀλλὰ μὴν οὐδὲ τὴν ἀπόφασιν, οἷον λέγω

μὴ ἀεὶ εἶναι. Ἀδύνατον ἄρα καὶ ἀεὶ μέν τι εἶναι, φθαρτὸν (282a.) δ’ εἶναι. Ὁμοίως δ’ οὐδὲ γενητόν· δυοῖν γὰρ ὅροιν εἰ ἀδύνατον τὸ ὕστερον ἄνευ τοῦ προτέρου ὑπάρξαι, ἐκεῖνο δ’ ἀδύνατον ὑπάρχειν, καὶ τὸ ὕστερον. Ὥστ’ εἰ τὸ ἀεὶ ὂν μὴ ἐνδέχεταί ποτε μὴ εἶναι, ἀδύνατον καὶ γενητὸν εἶναι.

Ἐπεὶ δ’ ἀπόφασις τοῦ μὲν ἀεὶ δυναμένου εἶναι τὸ μὴ ἀεὶ δυνάμενον εἶναι, τὸ δ’ ἀεὶ δυνατὸν μὴ εἶναι ἐναντίον, οὗ ἀπόφασις τὸ μὴ ἀεὶ δυνάμενον μὴ εἶναι, ἀνάγκη τὰς ἀποφάσεις ἀμφοῖν τῷ αὐτῷ ὑπάρχειν, καὶ εἶναι μέσον τοῦ ἀεὶ ὄντος καὶ τοῦ ἀεὶ μὴ ὄντος τὸ δυνάμενον εἶναι καὶ μὴ εἶναι· ἡ γὰρ ἑκατέρου ἀπόφασίς ποτε ὑπάρξει, εἰ μὴ ἀεί. Ὥστ’ εἰ τὸ μὴ ἀεὶ μὴ ὂν ἔσται ποτὲ καὶ οὐκ ἔσται, καὶ τὸ μὴ ἀεὶ δυνάμενον εἶναι δηλονότι, ἀλλά ποτε ὄν, ὥστε καὶ μὴ εἶναι. Τὸ αὐτὸ ἄρ’ ἔσται δυνατὸν εἶναι καὶ μή, καὶ τοῦτ’ ἔστιν ἀμφοῖν μέσον. Λόγος δὲ καθόλου ὅδε. Ἔστω γὰρ τὸ A καὶ τὸ B μηδενὶ τῷ αὐτῷ δυνάμενα ὑπάρχειν, ἅπαντι δὲ τὸ A ἢ τὸ Γ καὶ τὸ B ἢ τὸ Δ. Ἀνάγκη δὴ ᾧ μήτε τὸ A ὑπάρχει μήτε τὸ B, παντὶ ὑπάρχειν τὰ ΓΔ. Ἔστω δὴ τὸ E τὸ μεταξὺ τῶν AB· ἐναντίων γὰρ τὸ μηθέτερον μέσον. Τούτῳ δὴ ἀνάγκη ἄμφω ὑπάρχειν τό τε Γ καὶ τὸ Δ. Παντὶ γὰρ ἢ τὸ A ἢ τὸ Γ, ὥστε καὶ τῷ E· ἐπεὶ οὖν τὸ A ἀδύνατον, τὸ Γ ὑπάρξει. Ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ τοῦ Δ. Οὔτε δὴ τὸ ἀεὶ ὂν γενητὸν οὐδὲ φθαρτόν, οὔτε τὸ ἀεὶ μὴ ὄν. Δῆλον δ’ ὅτι καὶ εἰ γενητὸν ἢ φθαρτόν, οὐκ ἀΐδιον. Ἅμα γὰρ ἔσται δυνάμενον ἀεὶ εἶναι καὶ δυνάμενον μὴ ἀεὶ εἶναι· τοῦτο δ’ ὅτι ἀδύνατον, δέδεικται πρότερον.

Ἆρ’ οὖν εἰ καὶ ἀγένητον, ὂν δέ, τοῦτ’ ἀνάγκη ἀΐδιον εἶναι, ὁμοίως δὲ καὶ εἰ ἄφθαρτον, ὂν δέ; (Λέγω δὲ τὸ ἀγένητον καὶ ἄφθαρτον τὰ κυρίως λεγόμενα, ἀγένητον μὲν ὃ ἔστι νῦν, καὶ πρότερον οὐκ ἀληθὲς ἦν εἰπεῖν τὸ μὴ εἶναι, ἄφθαρτον δὲ ὃ νῦν ὂν ὕστερον μὴ ἀληθὲς ἔσται εἰπεῖν μὴ εἶναι). Ἢ εἰ μὲν ταῦτα ἀλλήλοις ἀκολουθεῖ καὶ τό τε ἀγένητον ἄφθαρτον καὶ τὸ ἄφθαρτον ἀγένητον, ἀνάγκη καὶ τὸ ἀΐδιον ἑκατέρῳ ἀκολουθεῖν, καὶ εἴτε ἀγένη (282b.) τον, ἀΐδιον, εἴτε ἄφθαρτον, ἀΐδιον. Τὸ δὲ φάναι μηδὲν κωλύειν γινόμενόν τι ἄφθαρτον εἶναι καὶ ἀγένητον ὂν φθαρῆναι, ἅπαξ ὑπαρχούσης τῷ μὲν τῆς γενέσεως τῷ δὲ τῆς φθορᾶς, ἀναιρεῖν ἐστι τῶν δεδομένων τι. Ἢ γὰρ ἄπειρον ἢ ποσόν τινα ὡρισμένον χρόνον δύναται ἅπαντα ἢ ποιεῖν ἢ πάσχειν, ἢ εἶναι ἢ μὴ εἶναι * * καὶ τὸν ἄπειρον διὰ τοῦτο, ὅτι ὥρισταί πως ὁ ἄπειρος, οὗ οὐκ ἔστι πλείων. Τὸ δὴ πῇ ἄπειρον οὔτ' ἄπειρον οὔθ' ὡρισμένον.

Ἔτι τί μᾶλλον ἐπὶ τῷδε τῷ σημείῳ ἀεὶ ὂν πρότερον ἐφθάρη ἢ μὴ ὂν ἄπειρον ἐγένετο; εἰ γὰρ μηθὲν μᾶλλον, ἄπειρα δὲ τὰ σημεῖα, δῆλον ὅτι ἄπειρον χρόνον ἦν τι γενητὸν καὶ φθαρτόν. Δύναται ἄρα μὴ εἶναι ἄπειρον χρόνον· ἅμα γὰρ ἕξει δύναμιν τοῦ μὴ εἶναι καὶ εἶναι, τὸ μὲν πρότερον, εἰ φθαρτόν, τὸ δ' ὕστερον, εἰ γενητόν. Ὥστ' ἐὰν ὑπάρχειν θῶμεν ἃ δύναται, τὰ ἀντικείμενα ἅμα ὑπάρξει.

Ἔτι δὲ καὶ τοῦθ' ὁμοίως ἐν ἅπαντι σημείῳ ὑπάρξει, ὥστ' ἄπειρον χρόνον τοῦ μὴ εἶναι καὶ τοῦ εἶναι ἕξει δύναμιν· ἀλλὰ δέδεικται ὅτι ἀδύνατον τοῦτο.

Ἔτι εἰ πρότερον ἡ δύναμις ὑπάρχει τῆς ἐνεργείας, ἅπανθ' ὑπάρξει τὸν χρόνον, καὶ ὂν ἀγένητον ἦν καὶ μὴ ὄν [τὸν ἄπειρον χρόνον], γίγνεσθαι δὲ δυνάμενον. Ἅμα δὴ οὐκ ἦν καὶ τοῦ εἶναι δύναμιν εἶχε, καὶ τοῦ τότε εἶναι καὶ ὕστερον· ἄπειρον ἄρα χρόνον.

Φανερὸν δὲ καὶ ἄλλως ὅτι ἀδύνατον φθαρτὸν ὂν μὴ φθαρῆναί ποτε. Ἀεὶ γὰρ ἔσται ἅμα καὶ φθαρτὸν καὶ ἄφθαρτον ἐντελεχείᾳ, ὥστε ἅμα ἔσται δυνατὸν ἀεί τε εἶναι καὶ μὴ ἀεί· φθείρεται ἄρα ποτὲ τὸ φθαρτόν. Καὶ εἰ γενητόν, γέγονεν· δυνατὸν γὰρ γεγονέναι, καὶ μὴ ἀεὶ ἄρα εἶναι.

Ἔστι δὲ καὶ ὧδε θεωρῆσαι ὅτι ἀδύνατον ἢ γενόμενόν ποτε ἄφθαρτον διατελεῖν, ἢ ἀγένητον ὂν καὶ ἀεὶ πρότερον ὂν φθαρῆναι. Οὐδὲν γὰρ ἀπὸ τοῦ αὐτομάτου οὔτ' ἄφθαρτον οὔτ' ἀγένητον οἷόν τ' εἶναι. Τὸ μὲν γὰρ αὐτόματόν ἐστι καὶ τὸ ἀπὸ τύχης παρὰ τὸ ἀεὶ καὶ τὸ ὡς ἐπὶ (283b.) τὸ πολὺ ἢ ὂν ἢ γινόμενον· τὸ δ’ ἄπειρον χρόνον ἢ ἁπλῶς ἢ ἀπό τινος, ἢ ἀεὶ ἢ ὡς ἐπὶ τὸ πολὺ ὑπάρχει ὄν. Ἀνάγκη τοίνυν φύσει τὰ τοιαῦτα ὁτὲ μὲν εἶναι ὁτὲ δὲ μή. Τῶν δὲ τοιούτων ἡ αὐτὴ δύναμις τῆς ἀντιφάσεως, καὶ ἡ ὕλη αἰτία τοῦ εἶναι καὶ μή. Ὥστ’ ἀνάγκη ἅμα ὑπάρχειν ἐνεργείᾳ τὰ ἀντικείμενα. Ἀλλὰ μὴν οὐδέν γ’ ἀληθὲς εἰπεῖν νῦν ὅτι ἔστι πέρυσιν, οὐδὲ πέρυσιν ὅτι νῦν ἔστιν. Ἀδύνατον ἄρα μὴ ὄν ποτε ὕστερον ἀΐδιον εἶναι· ἕξει γὰρ ὕστερον καὶ τὴν τοῦ μὴ εἶναι δύναμιν, πλὴν οὐ τοῦ τότε μὴ εἶναι ὅτε ἔστιν (ὑπάρχει γὰρ ἐνεργείᾳ ὄν), ἀλλὰ τοῦ πέρυσιν καὶ ἐν τῷ παρελθόντι χρόνῳ. Ἔστω δὴ οὗ ἔχει τὴν δύναμιν ὑπάρχον ἐνεργείᾳ· ἔσται ἄρα ἀληθὲς εἰπεῖν νῦν ὅτι οὐκ ἔστι πέρυσιν. Ἀλλ’ ἀδύνατον· οὐδεμία γὰρ δύναμις τοῦ γεγονέναι ἐστίν, ἀλλὰ τοῦ εἶναι ἢ ἔσεσθαι. Ὁμοίως δὲ καὶ εἰ πρότερον ὂν ἀΐδιον ὕστερον μὴ ἔσται· ἕξει γὰρ δύναμιν οὗ ἐνεργείᾳ οὐκ ἔστιν. Ὥστ’ ἂν θῶμεν τὸ δυνατόν, ἀληθὲς ἔσται εἰπεῖν νῦν ὅτι τοῦτ’ ἔστι πέρυσιν καὶ ὅλως ἐν τῷ παρελθόντι χρόνῳ.

Καὶ φυσικῶς δὲ καὶ μὴ καθόλου σκοποῦσιν ἀδύνατον ἢ ἀΐδιον ὂν πρότερον φθαρῆναι ὕστερον, ἢ πρότερον μὴ ὂν ὕστερον ἀΐδιον εἶναι. Τὰ γὰρ φθαρτὰ καὶ γενητὰ καὶ ἀλλοιωτὰ πάντα· ἀλλοιοῦται δὲ τοῖς ἐναντίοις, καὶ ἐξ ὧν συνίσταται τὰ φύσει ὄντα, καὶ ὑπὸ τῶν αὐτῶν τούτων φθείρεται.

Κεφάλαιο 1

Ὅτι μὲν οὖν οὔτε γέγονεν ὁ πᾶς οὐρανὸς οὔτ’ ἐνδέχεται φθαρῆναι, καθάπερ τινές φασιν αὐτόν, ἀλλ’ ἔστιν εἷς καὶ ἀΐδιος, ἀρχὴν μὲν καὶ τελευτὴν οὐκ ἔχων τοῦ παντὸς αἰῶνος, ἔχων δὲ καὶ περιέχων ἐν αὐτῷ τὸν ἄπειρον χρόνον, ἔκ τε τῶν εἰρημένων ἔξεστι λαμβάνειν τὴν πίστιν, καὶ διὰ τῆς δόξης τῆς παρὰ τῶν ἄλλως λεγόντων καὶ γεννώντων αὐτόν· εἰ γὰρ οὕτως μὲν ἔχειν ἐνδέχεται, καθ’ ὃν δὲ τρόπον ἐκεῖνοι γενέσθαι λέγουσιν οὐκ ἐνδέχεται, μεγάλην ἂν ἔχοι καὶ τοῦτο (284a.) ῥοπὴν εἰς πίστιν περὶ τῆς ἀθανασίας αὐτοῦ καὶ τῆς ἀϊδιότητος. Διόπερ καλῶς ἔχει συμπείθειν ἑαυτὸν τοὺς ἀρχαίους καὶ μάλιστα πατρίους ἡμῶν ἀληθεῖς εἶναι λόγους, ὡς ἔστιν ἀθάνατόν τι καὶ θεῖον τῶν ἐχόντων μὲν κίνησιν, ἐχόντων δὲ τοιαύτην ὥστε μηθὲν εἶναι πέρας αὐτῆς, ἀλλὰ μᾶλλον ταύτην τῶν ἄλλων πέρας· τό τε γὰρ πέρας τῶν περιεχόντων ἐστί, καὶ αὕτη τέλειος οὖσα περιέχει τὰς ἀτελεῖς καὶ τὰς ἐχούσας πέρας καὶ παῦλαν, αὐτὴ μὲν οὐδεμίαν οὔτ’ ἀρχὴν ἔχουσα οὔτε τελευτήν, ἀλλ’ ἄπαυστος οὖσα τὸν ἄπειρον χρόνον, τῶν δ’ ἄλλων τῶν μὲν αἰτία τῆς ἀρχῆς, τῶν δὲ δεχομένη τὴν παῦλαν.

Τὸν δ’ οὐρανὸν καὶ τὸν ἄνω τόπον οἱ μὲν ἀρχαῖοι τοῖς θεοῖς ἀπένειμαν ὡς ὄντα μόνον ἀθάνατον· ὁ δὲ νῦν μαρτυρεῖ λόγος ὡς ἄφθαρτος καὶ ἀγένητος, ἔτι δ’ ἀπαθὴς πάσης θνητῆς δυσχερείας ἐστίν, πρὸς δὲ τούτοις ἄπονος διὰ τὸ μηδεμιᾶς προσδεῖσθαι βιαίας ἀνάγκης, ἣ κατέχει κωλύουσα φέρεσθαι πεφυκότα αὐτὸν ἄλλως· πᾶν γὰρ τὸ τοιοῦτον ἐπίπονον, ὅσῳπερ ἂν ἀϊδιώτερον ᾖ, καὶ διαθέσεως τῆς ἀρίστης ἄμοιρον.

Διόπερ οὔτε κατὰ τὸν τῶν παλαιῶν μῦθον ὑποληπτέον ἔχειν, οἵ φασιν Ἄτλαντός τινος αὐτῷ προσδεῖσθαι τὴν σωτηρίαν· ἐοίκασι γὰρ καὶ τοῦτον οἱ συστήσαντες τὸν λόγον τὴν αὐτὴν ἔχειν ὑπόληψιν τοῖς ὕστερον· ὡς γὰρ περὶ βάρος ἐχόντων καὶ γεηρῶν ἁπάντων τῶν ἄνω σωμάτων ὑπέστησαν αὐτῷ μυθικῶς ἀνάγκην ἔμψυχον.

Οὔτε δὴ τοῦτον τὸν τρόπον ὑποληπτέον, οὔτε διὰ τὴν δίνησιν θάττονος τυγχάνοντα φορᾶς τῆς οἰκείας ῥοπῆς ἔτι σώζεσθαι τοσοῦτον χρόνον, καθάπερ Ἐμπεδοκλῆς φησιν.

Ἀλλὰ μὴν οὐδ’ ὑπὸ ψυχῆς εὔλογον ἀναγκαζούσης μένειν ἀΐδιον· οὐδὲ γὰρ τῆς ψυχῆς οἷόν τ’ εἶναι τὴν τοιαύτην ζωὴν ἄλυπον καὶ μακαρίαν· ἀνάγκη γὰρ καὶ τὴν κίνησιν μετὰ βίας οὖσαν, εἴπερ κινεῖ φέρεσθαι πεφυκότος τοῦ πρώτου σώματος ἄλλως καὶ κινεῖ συνεχῶς, ἄσχολον εἶναι καὶ πάσης ἀπηλλαγμένην ῥαστώνης ἔμφρονος, εἴ γε μηδ’ ὥσπερ τῇ ψυχῇ τῇ τῶν θνητῶν ζῴων ἐστὶν ἀνάπαυσις ἡ περὶ τὸν ὕπνον γινομένη τοῦ σώματος ἄνεσις, ἀλλ’ ἀναγκαῖον Ἰξίονός τινος μοῖραν κατέχειν αὐτὴν ἀΐδιον καὶ ἄτρυτον.

Εἰ δή, καθάπερ (284b.) εἴπομεν, ἐνδέχεται τὸν εἰρημένον ἔχειν τρόπον περὶ τῆς πρώτης φορᾶς, οὐ μόνον αὐτοῦ περὶ τῆς ἀϊδιότητος οὕτως ὑπολαβεῖν ἐμμελέστερον, ἀλλὰ καὶ τῇ μαντείᾳ τῇ περὶ τὸν θεὸν μόνως ἂν ἔχοιμεν οὕτως ὁμολογουμένως ἀποφαίνεσθαι συμφώνους λόγους. Ἀλλὰ τῶν μὲν τοιούτων λόγων ἅλις ἔστω τὸ νῦν.

Κεφάλαιο 2

Ἐπειδὴ δέ τινές εἰσιν οἵ φασιν εἶναί τι δεξιὸν καὶ ἀριστερὸν τοῦ οὐρανοῦ, καθάπερ οἱ καλούμενοι Πυθαγόρειοι (ἐκείνων γὰρ οὗτος ὁ λόγος ἐστίν), σκεπτέον πότερον τοῦτον ἔχει τὸν τρόπον ὡς ἐκεῖνοι λέγουσιν, ἢ μᾶλλον ἑτέρως, εἴπερ δεῖ προσάπτειν τῷ τοῦ παντὸς σώματι ταύτας τὰς ἀρχάς.

Εὐθὺς γὰρ πρῶτον, εἰ τὸ δεξιὸν ὑπάρχει καὶ τὸ ἀριστερόν, ἔτι πρότερον τὰς προτέρας ὑποληπτέον ὑπάρχειν ἀρχὰς ἐν αὐτῷ. Διώρισται μὲν οὖν περὶ τούτων ἐν τοῖς περὶ τὰς τῶν ζῴων κινήσεις διὰ τὸ τῆς φύσεως οἰκεῖα τῆς ἐκείνων εἶναι· φανερῶς γὰρ ἔν γε τοῖς ζῴοις ὑπάρχοντα φαίνεται τοῖς μὲν πάντα τὰ τοιαῦτα μόρια, λέγω δ’ οἷον τό τε δεξιὸν καὶ τὸ ἀριστερόν, τοῖς δ’ ἔνια, τοῖς δὲ φυτοῖς τὸ ἄνω καὶ τὸ κάτω μόνον. Εἰ δὲ δεῖ καὶ τῷ οὐρανῷ προσάπτειν τι τῶν τοιούτων, καὶ τὸ πρῶτον, καθάπερ εἴπομεν, ἐν τοῖς ζῴοις ὑπάρχον εὔλογον ὑπάρχειν ἐν αὐτῷ· τριῶν γὰρ ὄντων ἕκαστον οἷον ἀρχή τις ἐστίν. Λέγω δὲ τὰ τρία τὸ ἄνω καὶ τὸ κάτω, καὶ τὸ πρόσθιον καὶ τὸ ἀντικείμενον, καὶ τὸ δεξιὸν καὶ τὸ ἀριστερόν· ταύτας γὰρ τὰς διαστάσεις εὔλογον ὑπάρχειν τοῖς σώμασι τοῖς τελείοις πάσας. Ἔστι δὲ τὸ μὲν ἄνω τοῦ μήκους ἀρχή, τὸ δὲ δεξιὸν τοῦ πλάτους, τὸ δ’ ἔμπροσθεν τοῦ βάθους. Ἔτι δ’ ἄλλως κατὰ τὰς κινήσεις· ἀρχὰς γὰρ ταύτας λέγω ὅθεν ἄρχονται πρῶτον αἱ κινήσεις τοῖς ἔχουσιν. Ἔστι δὲ ἀπὸ μὲν τοῦ ἄνω ἡ αὔξησις, ἀπὸ δὲ τῶν δεξιῶν ἡ κατὰ τόπον, ἀπὸ δὲ τῶν ἔμπροσθεν ἡ κατὰ τὴν αἴσθησιν· ἔμπροσθεν γὰρ λέγω ἐφ’ ὃ αἱ αἰσθήσεις.

Διὸ καὶ οὐκ ἐν ἅπαντι σώματι τὸ ἄνω καὶ κάτω καὶ τὸ δεξιὸν καὶ ἀριστερὸν καὶ τὸ ἔμπροσθεν καὶ ὄπισθεν ζητητέον, ἀλλ’ ὅσα ἔχει κινήσεως ἀρχὴν ἐν αὐτοῖς ἔμψυχα ὄντα· τῶν γὰρ ἀψύχων ἐν οὐθενὶ ὁρῶμεν ὅθεν ἡ ἀρχὴ τῆς κινήσεως. Τὰ μὲν γὰρ ὅλως οὐ κινεῖται, τὰ δὲ κινεῖται μὲν ἀλλ’ οὐ πανταχόθεν ὁμοίως, οἷον τὸ πῦρ ἄνω μό(285a.) νον καὶ ἡ γῆ ἐπὶ τὸ μέσον. Ἀλλ’ ἐν μὲν τούτοις λέγομεν τὸ ἄνω καὶ τὸ κάτω καὶ τὸ δεξιὸν καὶ τὸ ἀριστερὸν πρὸς ἡμᾶς ἐπαναφέροντες· ἢ γὰρ κατὰ τὰ ἡμέτερα δεξιά, ὥσπερ οἱ μάντεις, ἢ καθ’ ὁμοιότητα τοῖς ἡμετέροις, ὥσπερ τὰ τοῦ ἀνδριάντος, ἢ τὰ ἐναντίως ἔχοντα τῇ θέσει, δεξιὸν μὲν τὸ κατὰ τὸ ἡμέτερον ἀριστερόν, ἀριστερὸν δὲ τὸ κατὰ τὸ ἡμέτερον δεξιόν, [καὶ ὄπισθεν τὸ κατὰ τὸ ἡμέτερον ἔμπροσθεν]. Ἐν αὐτοῖς δὲ τούτοις οὐδεμίαν ὁρῶμεν διαφοράν· ἐὰν γὰρ ἀνάπαλιν στραφῇ, τὰ ἐναντία ἐροῦμεν δεξιὰ καὶ ἀριστερὰ καὶ ἄνω καὶ κάτω καὶ ἔμπροσθεν καὶ ὄπισθεν.

Διὸ καὶ τῶν Πυθαγορείων ἄν τις θαυμάσειεν ὅτι δύο μόνας ταύτας ἀρχὰς ἔλεγον, τὸ δεξιὸν καὶ τὸ ἀριστερόν, τὰς δὲ τέτταρας παρέλιπον οὐθὲν ἧττον κυρίας οὔσας· οὐθὲν γὰρ ἐλάττω διαφορὰν ἔχει τὰ ἄνω πρὸς τὰ κάτω καὶ τὰ ἔμπροσθεν πρὸς τὰ ὄπισθεν ἢ τὰ δεξιὰ πρὸς τὰ ἀριστερὰ ἐν ἅπασι τοῖς ζῴοις. Τὰ μὲν γὰρ τῇ δυνάμει διαφέρει μόνον, τὰ δὲ καὶ τοῖς σχήμασι, καὶ τὸ μὲν ἄνω καὶ τὸ κάτω πᾶσι τοῖς ἐμψύχοις ἐστὶν ὁμοίως ζῴοις καὶ φυτοῖς, τὸ δὲ δεξιὸν καὶ τὸ ἀριστερὸν οὐκ ἐνυπάρχει τοῖς φυτοῖς.

Ἔτι δ’ ὡς τὸ μῆκος τοῦ πλάτους πρότερον, εἰ τὸ μὲν ἄνω τοῦ μήκους ἀρχή, τὸ δὲ δεξιὸν τοῦ πλάτους, ἡ δὲ τοῦ προτέρου ἀρχὴ προτέρα, πρότερον ἂν εἴη τὸ ἄνω τοῦ δεξιοῦ κατὰ γένεσιν, ἐπειδὴ πολλαχῶς λέγεται τὸ πρότερον. Πρὸς δὲ τούτοις, εἰ τὸ μὲν ἄνω ἐστὶ τὸ ὅθεν ἡ κίνησις, τὸ δὲ δεξιὸν ἀφ’ οὗ, τὸ δ’ ἔμπροσθεν ἐφ’ ὅ, κἂν οὕτως ἔχοι τινὰ δύναμιν ἀρχῆς τὸ ἄνω πρὸς τὰς ἄλλας ἰδέας.

Διά τε δὴ τὸ παραλείπειν τὰς κυριωτέρας ἀρχὰς δίκαιον αὐτοῖς ἐπιτιμᾶν, καὶ διότι ταύτας ἐν ἅπασιν ὁμοίως ἐνόμιζον ὑπάρχειν.

Ἡμῖν δ’ ἐπεὶ διώρισται πρότερον ὅτι ἐν τοῖς ἔχουσιν ἀρχὴν κινήσεως αἱ τοιαῦται δυνάμεις ἐνυπάρχουσιν, ὁ δ’ οὐρανὸς ἔμψυχος καὶ ἔχει κινήσεως ἀρχήν, δῆλον ὅτι ἔχει καὶ τὸ ἄνω καὶ τὸ κάτω καὶ τὸ δεξιὸν καὶ τὸ ἀριστερόν.

Οὐ δεῖ γὰρ ἀπορεῖν διὰ τὸ σφαιροειδὲς εἶναι τὸ σχῆμα τοῦ παντός, ὅπως ἔσται τούτου τὸ μὲν δεξιὸν τὸ δὲ ἀριστερὸν ὁμοίων γ’ ὄντων τῶν μο(285b.) ρίων ἁπάντων καὶ κινουμένων τὸν ἅπαντα χρόνον, ἀλλὰ νοεῖν ὥσπερ ἂν εἴ τις, ἐν οἷς ἔχει τὸ δεξιὸν πρὸς τὸ ἀριστερὸν διαφορὰν καὶ τοῖς σχήμασιν, εἶτα περιθείη σφαῖραν· ἕξει μὲν γὰρ τὴν δύναμιν διαφέρουσαν, δόξει δ’ οὔ, διὰ τὴν ὁμοιότητα τοῦ σχήματος. Τὸν αὐτὸν δὲ τρόπον καὶ περὶ τῆς ἀρχῆς τοῦ κινεῖσθαι· καὶ γὰρ εἰ μηδέποτ’ ἤρξατο, ὅμως ἔχειν ἀναγκαῖον ἀρχήν, ὅθεν ἂν ἤρξατο, εἰ ἤρχετο κινούμενον, κἂν εἰ σταίη, κινηθείη ἂν πάλιν.

Λέγω δὲ μῆκος μὲν αὐτοῦ τὸ κατὰ τοὺς πόλους διάστημα, καὶ τῶν πόλων τὸν μὲν ἄνω τὸν δὲ κάτω· διαφορὰν γὰρ ἐν τούτοις μόνοις ὁρῶμεν τῶν ἡμισφαιρίων, τῷ μὴ κινεῖσθαι τοὺς πόλους. Ἅμα δὲ καὶ εἰώθαμεν λέγειν τὰ πλάγια ἐν τῷ κόσμῳ οὐ τὸ ἄνω καὶ τὸ κάτω, ἀλλὰ τὸ παρὰ τοὺς πόλους, ὡς τούτου μήκους ὄντος· τὸ γὰρ εἰς τὸ πλάγιόν ἐστι τὸ παρὰ τὸ ἄνω καὶ τὸ κάτω.

Τῶν δὲ πόλων ὁ μὲν ὑπὲρ ἡμᾶς φαινόμενος τὸ κάτω μέρος ἐστίν, ὁ δ’ ἡμῖν ἄδηλος τὸ ἄνω. Δεξιὸν γὰρ ἑκάστου λέγομεν, ὅθεν ἡ ἀρχὴ τῆς κατὰ τόπον κινήσεως· τοῦ δ’ οὐρανοῦ ἀρχὴ τῆς περιφορᾶς, ὅθεν αἱ ἀνατολαὶ τῶν ἄστρων, ὥστε τοῦτ’ ἂν εἴη δεξιόν, οὗ δ’ αἱ δύσεις, ἀριστερόν. Εἰ οὖν ἄρχεται ἀπὸ τῶν δεξιῶν καὶ ἐπὶ τὰ δεξιὰ περιφέρεται, ἀνάγκη τὸ ἄνω εἶναι τὸν ἀφανῆ πόλον· εἰ γὰρ ἔσται ὁ φανερός, ἐπ’ ἀριστερὰ ἔσται ἡ κίνησις, ὅπερ οὔ φαμεν. Δῆλον τοίνυν ὅτι ὁ ἀφανὴς πόλος ἐστὶ τὸ ἄνω. Καὶ οἱ μὲν ἐκεῖ οἰκοῦντες ἐν τῷ ἄνω εἰσὶν ἡμισφαιρίῳ καὶ πρὸς τοῖς δεξιοῖς, ἡμεῖς δ’ ἐν τῷ κάτω καὶ πρὸς τοῖς ἀριστεροῖς, ἐναντίως ἢ ὡς οἱ Πυθαγόρειοι λέγουσιν· ἐκεῖνοι γὰρ ἡμᾶς ἄνω ποιοῦσι καὶ ἐν τῷ δεξιῷ μέρει, τοὺς δ’ ἐκεῖ κάτω καὶ ἐν τῷ ἀριστερῷ. Συμβαίνει δὲ τοὐναντίον.

Ἀλλὰ τῆς μὲν δευτέρας περιφορᾶς, οἷον τῆς τῶν πλανήτων, ἡμεῖς μὲν ἐν τοῖς ἄνω καὶ ἐν τοῖς δεξιοῖς ἐσμεν, ἐκεῖνοι δὲ ἐν τοῖς κάτω καὶ ἐν τοῖς ἀριστεροῖς· ἀνάπαλιν γὰρ τούτοις ἡ ἀρχὴ τῆς κινήσεώς ἐστι διὰ τὸ ἐναντίας εἶναι τὰς φοράς, ὥστε συμβαίνειν ἡμᾶς μὲν εἶναι πρὸς τῇ ἀρχῇ, ἐκείνους δὲ πρὸς τῷ τέλει. Περὶ μὲν οὖν τῶν κατὰ τὰς δια(286a.) στάσεις τῶν μορίων καὶ τῶν κατὰ τόπον ὡρισμένων τοσαῦτα εἰρήσθω.

Κεφάλαιο 3

Ἐπεὶ δ’ οὐκ ἔστιν ἐναντία κίνησις ἡ κύκλῳ τῇ κύκλῳ, σκεπτέον διὰ τί πλείους εἰσὶ φοραί, καίπερ πόρρωθεν πειρωμένοις ποιεῖσθαι τὴν ζήτησιν, πόρρω δ’ οὐχ οὕτω τῷ τόπῳ, πολὺ δὲ μᾶλλον τῷ τῶν συμβεβηκότων αὐτοῖς περὶ πάμπαν ὀλίγων ἔχειν αἴσθησιν. Ὅμως δὲ λέγωμεν.

Ἡ δ’ αἰτία περὶ αὐτῶν ἐνθένδε ληπτέα. Ἕκαστόν ἐστιν, ὧν ἐστιν ἔργον, ἕνεκα τοῦ ἔργου. Θεοῦ δ’ ἐνέργεια ἀθανασία· τοῦτο δ’ ἐστὶ ζωὴ ἀΐδιος. ὥστ’ ἀνάγκη τῷ θεῷ κίνησιν ἀΐδιον ὑπάρχειν. Ἐπεὶ δ’ ὁ οὐρανὸς τοιοῦτος (σῶμα γάρ τι θεῖον), διὰ τοῦτο ἔχει τὸ ἐγκύκλιον σῶμα, ὃ φύσει κινεῖται κύκλῳ ἀεί.

Διὰ τί οὖν οὐχ ὅλον τὸ σῶμα τοῦ οὐρανοῦ τοιοῦτον; ὅτι ἀνάγκη μένειν τι τοῦ σώματος τοῦ φερομένου κύκλῳ, τὸ ἐπὶ τοῦ μέσου, τούτου δ’ οὐθὲν οἷόν τε μένειν μόριον, οὔθ’ ὅλως οὔτ’ ἐπὶ τοῦ μέσου. Καὶ γὰρ ἂν ἡ κατὰ φύσιν κίνησις ἦν αὐτοῦ ἐπὶ τὸ μέσον· φύσει δὲ κύκλῳ κινεῖται· οὐ γὰρ ἂν ἦν ἀΐδιος ἡ κίνησις· οὐθὲν γὰρ παρὰ φύσιν ἀΐδιον. Ὕστερον δὲ τὸ παρὰ φύσιν τοῦ κατὰ φύσιν, καὶ ἔκστασίς τίς ἐστιν ἐν τῇ γενέσει τὸ παρὰ φύσιν τοῦ κατὰ φύσιν. Ἀνάγκη τοίνυν γῆν εἶναι· τοῦτο γὰρ ἠρεμεῖ ἐπὶ τοῦ μέσου. Νῦν μὲν οὖν ὑποκείσθω τοῦτο, ὕστερον δὲ δειχθήσεται περὶ αὐτοῦ.

Ἀλλὰ μὴν εἰ γῆν, ἀνάγκη καὶ πῦρ εἶναι· τῶν γὰρ ἐναντίων εἰ θάτερον φύσει, ἀνάγκη καὶ θάτερον εἶναι φύσει, ἐάν περ ᾖ ἐναντίον, καὶ εἶναί τινα αὐτοῦ φύσιν· ἡ γὰρ αὐτὴ ὕλη τῶν ἐναντίων, καὶ τῆς στερήσεως πρότερον ἡ κατάφασις (λέγω δ’ οἷον τὸ θερμὸν τοῦ ψυχροῦ), ἡ δ’ ἠρεμία καὶ τὸ βαρὺ λέγεται κατὰ στέρησιν κουφότητος καὶ κινήσεως. Ἀλλὰ μὴν εἴπερ ἔστι πῦρ καὶ γῆ, ἀνάγκη καὶ τὰ μεταξὺ αὐτῶν εἶναι σώματα· ἐναντίωσιν γὰρ ἔχει ἕκαστον τῶν στοιχείσων πρὸς ἕκαστον. Ὑποκείσθω δὲ καὶ τοῦτο νῦν, ὕστερον δὲ πειρατέον δεῖξαι. Τούτων δ’ ὑπαρχόντων φανερὸν ὅτι ἀνάγκη γένεσιν εἶναι διὰ τὸ μηδὲν οἷόν τ’ αὐτῶν εἶναι ἀΐδιον· πάσχει γὰρ καὶ ποιεῖ τἀναντία ὑπ’ ἀλλήλων, καὶ φθαρτικὰ ἀλλήλων ἐστίν. Ἔτι δ’ οὐκ εὔλογον εἶναί τι κινητὸν ἀΐδιον, οὗ μὴ ἐνδέχεται εἶναι κατὰ φύσιν τὴν κίνησιν ἀΐδιον· (286b.) τούτων δ’ ἔστι κίνησις. Ὅτι μὲν τοίνυν ἀναγκαῖον εἶναι γένεσιν, ἐκ τούτων δῆλον.

Εἰ δὲ γένεσιν, ἀναγκαῖον καὶ ἄλλην εἶναι φοράν, ἢ μίαν ἢ πλείους· κατὰ γὰρ τὴν τοῦ ὅλου ὡσαύτως ἀναγκαῖον ἔχειν τὰ στοιχεῖα τῶν σωμάτων πρὸς ἄλληλα. Λεχθήσεται δὲ καὶ περὶ τούτου ἐν τοῖς ἑπομένοις σαφέστερον. Νῦν δὲ τοσοῦτόν ἐστι δῆλον, διὰ τίνα αἰτίαν πλείω τὰ ἐγκύκλιά ἐστι σώματα, ὅτι ἀνάγκη γένεσιν εἶναι, γένεσιν δ’, εἴπερ καὶ πῦρ, τοῦτο δὲ καὶ τἆλλα, εἴπερ καὶ γῆν· ταύτην δ’ ὅτι ἀνάγκη μένειν τι ἀεί, εἴπερ καὶ κινεῖσθαί τι ἀεί.

Κεφάλαιο 4

Σχῆμα δ’ ἀνάγκη σφαιροειδὲς ἔχειν τὸν οὐρανόν· τοῦτο γὰρ οἰκειότατόν τε τῇ οὐσίᾳ καὶ τῇ φύσει πρῶτον. Εἴπωμεν δὲ καθόλου περὶ τῶν σχημάτων, τὸ ποῖόν ἐστι πρῶτον, καὶ ἐν ἐπιπέδοις καὶ ἐν στερεοῖς. Ἅπαν δὴ σχῆμα ἐπίπεδον ἢ εὐθύγραμμόν ἐστιν ἢ περιφερόγραμμον. Καὶ τὸ μὲν εὐθύγραμμον ὑπὸ πλειόνων περιέχεται γραμμῶν, τὸ δὲ περιφερόγραμμον ὑπὸ μιᾶς. Ἐπεὶ δὲ πρότερον [τῇ φύσει] ἐν ἑκάστῳ γένει τὸ ἓν τῶν πολλῶν καὶ τὸ ἁπλοῦν τῶν συνθέτων, πρῶτον ἂν εἴη τῶν ἐπιπέδων σχημάτων ὁ κύκλος.

Ἔτι δὲ εἴπερ τέλειόν ἐστιν οὗ μηδὲν ἔξω τῶν αὐτοῦ λαβεῖν δυνατόν, ὥσπερ ὥρισται πρότερον, καὶ τῇ μὲν εὐθείᾳ πρόσθεσίς ἐστιν ἀεί, τῇ δὲ τοῦ κύκλου οὐδέποτε, φανερὸν ὅτι τέλειος ἂν εἴη ἡ περιέχουσα τὸν κύκλον· ὥστ’ εἰ τὸ τέλειον πρότερον τοῦ ἀτελοῦς, καὶ διὰ ταῦτα πρότερον ἂν εἴη τῶν σχημάτων ὁ κύκλος.

Ὡσαύτως δὲ καὶ ἡ σφαῖρα τῶν στερεῶν· μόνη γὰρ περιέχεται μιᾷ ἐπιφανείᾳ, τὰ δ’ εὐθύγραμμα πλείοσιν· ὡς γὰρ ἔχει ὁ κύκλος ἐν τοῖς ἐπιπέδοις, οὕτως ἡ σφαῖρα ἐν τοῖς στερεοῖς.

Ἔτι δὲ καὶ οἱ διαιροῦντες εἰς ἐπίπεδα καὶ ἐξ ἐπιπέδων τὰ σώματα γεννῶντες μεμαρτυρηκέναι φαίνονται τούτοις· μόνην γὰρ τῶν στερεῶν οὐ διαιροῦσι τὴν σφαῖραν ὡς οὐκ ἔχουσαν πλείους ἐπιφανείας ἢ μίαν· ἡ γὰρ εἰς τὰ ἐπίπεδα διαίρεσις οὐχ ὡς ἂν τέμνων τις εἰς τὰ μέρη διέλοι τὸ ὅλον, τοῦτον διαιρεῖται τὸν τρόπον, ἀλλ’ ὡς εἰς ἕτερα τῷ εἴδει.

Ὅτι μὲν οὖν πρῶτόν ἐστιν ἡ σφαῖρα τῶν στερεῶν σχημάτων, δῆλον. Ἔστι δὲ καὶ κατὰ τὸν ἀριθμὸν τὴν τάξιν ἀποδιδοῦσιν οὕτω τιθεμένοις εὐλογώτατον, τὸν μὲν κύκλον κατὰ τὸ ἕν, τὸ δὲ τρίγωνον (287a.) κατὰ τὴν δυάδα, ἐπειδὴ ὀρθαὶ δύο. Ἐὰν δὲ τὸ ἓν κατὰ τὸ τρίγωνον, ὁ κύκλος οὐκέτι ἔσται σχῆμα.

Ἐπεὶ δὲ τὸ μὲν πρῶτον σχῆμα τοῦ πρώτου σώματος, πρῶτον δὲ σῶμα τὸ ἐν τῇ ἐσχάτῃ περιφορᾷ, σφαιροειδὲς ἂν εἴη τὸ τὴν κύκλῳ περιφερόμενον φοράν. Καὶ τὸ συνεχὲς ἄρα ἐκείνῳ· τὸ γὰρ τῷ σφαιροειδεῖ συνεχὲς σφαιροειδές. Ὡσαύτως δὲ καὶ τὰ πρὸς τὸ μέσον τούτων· τὰ γὰρ ὑπὸ τοῦ σφαιροειδοῦς περιεχόμενα καὶ ἁπτόμενα ὅλα σφαιροειδῆ ἀνάγκη εἶναι· τὰ δὲ κάτω τῆς τῶν πλανήτων ἅπτεται τῆς ἐπάνω σφαίρας. Ὥστε σφαιροειδὴς ἂν εἴη πᾶσα· πάντα γὰρ ἅπτεται καὶ συνεχῆ ἐστι ταῖς σφαίραις.

Ἔτι δὲ ἐπεὶ φαίνεται καὶ ὑπόκειται κύκλῳ περιφέρεσθαι τὸ πᾶν, δέδεικται δ’ ὅτι τῆς ἐσχάτης περιφορᾶς οὔτε κενόν ἐστιν ἔξωθεν οὔτε τόπος, ἀνάγκη καὶ διὰ ταῦτα σφαιροειδῆ εἶναι αὐτόν. Εἰ γὰρ ἔσται εὐθύγραμμος, συμβήσεται καὶ τόπον εἶναι ἔξω καὶ σῶμα καὶ κενόν. Κύκλῳ γὰρ στρεφόμενον τὸ εὐθέγραμμον οὐδέποτε τὴν αὐτὴν ἐφέξει χώραν, ἀλλ’ ὅπου πρότερον ἦν σῶμα, νῦν οὐκ ἔσται, καὶ οὗ νῦν οὐκ ἔστι, πάλιν ἔσται, διὰ τὴν παράλλαξιν τῶν γωνιῶν.

Ὁμοίως δὲ κἂν εἴ τι ἄλλο σχῆμα γένοιτο μὴ ἴσας ἔχον τὰς ἐκ τοῦ μέσου γραμμάς, οἷον φακοειδὲς ἢ ᾠοειδές· ἐν ἅπασι γὰρ συμβήσεται καὶ τόπον ἔξω καὶ κενὸν εἶναι τῆς φορᾶς, διὰ τὸ μὴ τὴν αὐτὴν χώραν κατέχειν τὸ ὅλον. Ἔτι δ’ εἰ τῶν μὲν κινήσεων τὸ μέτρον ἡ τοῦ οὐρανοῦ φορὰ διὰ τὸ εἶναι μόνη συνεχὴς καὶ ὁμαλὴς καὶ ἀΐδιος, ἐν ἑκάστῳ δὲ μέτρον τὸ ἐλάχιστον, ἐλαχίστη δὲ κίνησις ἡ ταχίστη, δῆλον ὅτι ταχίστη ἂν εἴη πασῶν τῶν κινήσεων ἡ τοῦ οὐρανοῦ κίνησις.

Ἀλλὰ μὴν τῶν ἀφ’ αὑτοῦ ἐφ’ αὑτὸ ἐλαχίστη ἐστὶν ἡ τοῦ κύκλου γραμμή· κατὰ δὲ τὴν ἐλαχίστην ταχίστη ἡ κίνησις· ὥστ’ εἰ ὁ οὐρανὸς κύκλῳ τε φέρεται καὶ τάχιστα κινεῖται, σφαιροειδῆ αὐτὸν ἀνάγκη εἶναι.

Λάβοι δ’ ἄν τις καὶ ἐκ τῶν περὶ τὸ μέσον ἱδρυμένων σωμάτων ταύτην τὴν πίστιν. Εἰ γὰρ τὸ μὲν ὕδωρ ἐστὶ περὶ τὴν γῆν, ὁ δ’ ἀὴρ περὶ τὸ ὕδωρ, τὸ δὲ πῦρ περὶ τὸν ἀέρα, καὶ τὰ ἄνω σώματα κατὰ τὸν αὐτὸν λόγον (συνεχῆ μὲν γὰρ οὐκ ἔστιν, ἅπτεται δὲ (287b.) τούτων), ἡ δὲ τοῦ ὕδατος ἐπιφάνεια σφαιροειδής ἐστιν, τὸ δὲ τῷ σφαιροειδεῖ συνεχὲς ἢ κείμενον περὶ τὸ σφαιροειδὲς καὶ αὐτὸ τοιοῦτον ἀναγκαῖον εἶναι· ὥστε κἂν διὰ τοῦτο φανερὸν εἴη ὅτι σφαιροειδής ἐστιν ὁ οὐρανός.

Ἀλλὰ μὴν ὅτι γε ἡ τοῦ ὕδατος ἐπιφάνεια τοιαύτη φανερόν, ὑπόθεσιν λαμβάνουσιν ὅτι πέφυκεν ἀεὶ συρρεῖν τὸ ὕδωρ εἰς τὸ κοιλότερον· κοιλότερον δέ ἐστι τὸ τοῦ κέντρου ἐγγύτερον. Ἤχθωσαν οὖν ἐκ τοῦ κέντρου ἡ ΑΒ καὶ ἡ ΑΓ, καὶ ἐπεζεύχθω ἐφ’ ἧς ΒΓ. Ἡ οὖν ἀχθεῖσα ἐπὶ τὴν βάσιν, ἐφ’ ἧς ΑΔ, ἐλάττων ἐστὶ τῶν ἐκ τοῦ κέντρου· κοιλότερος ἄρα ὁ τόπος. Ὥστε περιρρεύσεται τὸ ὕδωρ, ἕως ἂν ἰσασθῇ. Ἴση δὲ ταῖς ἐκ τοῦ κέντρου ἡ ΑΕ. Ὥστ’ ἀνάγκη πρὸς ταῖς ἐκ τοῦ κέντρου εἶναι τὸ ὕδωρ· τότε γὰρ ἠρεμήσει. Ἡ δὲ τῶν ἐκ τοῦ κέντρου ἁπτομένη περιφερής· σφαιροειδὴς ἄρα ἡ τοῦ ὕδατος ἐπιφάνεια, ἐφ’ ἧς ΒΕΓ.

Ὅτι μὲν οὖν σφαιροειδής ἐστιν ὁ κόσμος, δῆλον ἐκ τούτων, καὶ ὅτι κατ’ ἀκρίβειαν ἔντορνος οὕτως ὥστε μηθὲν μήτε χειρόκμητον ἔχειν παραπλησίως μήτ’ ἄλλο μηθὲν τῶν ἡμῖν ἐν ὀφθαλμοῖς φαινομένων. Ἐξ ὧν γὰρ τὴν σύστασιν εἴληφεν, οὐδὲν οὕτω δυνατὸν ὁμαλότητα δέξασθαι καὶ ἀκρίβειαν ὡς ἡ τοῦ πέριξ σώματος φύσις· δῆλον γὰρ ὡς ἀνάλογον ἔχει, καθάπερ ὕδωρ πρὸς γῆν, καὶ τὰ πλεῖον ἀεὶ ἀπέχοντα τῶν συστοίχων.

Κεφάλαιο 5

Ἐπεὶ δ’ ἔστι διχῶς ἐπὶ τοῦ κύκλου κινηθῆναι, οἷον ἀπὸ τοῦ Α τὴν μὲν ἐπὶ τὸ Β τὴν δ’ ἐπὶ τὸ Γ, ὅτι μὲν οὖν οὐκ εἰσὶν ἐναντίαι αὗται, πρότερον εἴρηται. Ἀλλ’ εἰ μηδὲν ὡς ἔτυχε μηδ’ ἀπὸ ταὐτομάτου ἐνδέχεται ἐν τοῖς ἀϊδίοις εἶναι, ὁ δ’ οὐρανὸς ἀΐδιος καὶ ἡ κύκλῳ φορά, διὰ τίνα ποτ’ αἰτίαν ἐπὶ θάτερα φέρεται, ἀλλ’ οὐκ ἐπὶ θάτερα; ἀνάγκη γὰρ καὶ τοῦτο ἢ ἀρχὴν εἶναι ἢ εἶναι αὐτοῦ ἀρχήν.

Ἴσως μὲν οὖν τὸ περὶ ἐνίων ἀποφαίνεσθαί τι πειρᾶσθαι καὶ τὸ περὶ πάντων καὶ τὸ παριέναι μηθὲν τάχ’ ἂν δόξειεν εἶναι σημεῖον ἢ πολλῆς εὐηθείας ἢ πολλῆς προθυμίας. Οὐ μὴν δίκαιόν γε πᾶσιν ὁμοίως ἐπιτιμᾶν, ἀλλ’ ὁρᾶν δεῖ τὴν αἰτίαν τοῦ λέγειν τίς ἐστιν, ἔτι δὲ πῶς ἔχων τῷ πιστεύειν, πότερον ἀνθρωπίνως ἢ καρτερώτερον. Τὰς μὲν οὖν ἀκριβεστέρας ἀνάγκας, ὅταν (288a.) τις ἐπιτύχῃ, τότε χάριν ἔχειν δεῖ τοῖς εὑρίσκουσι, νῦν δὲ τὸ φαινόμενον ῥητέον.

Εἰ γὰρ ἡ φύσις ἀεὶ ποιεῖ τῶν ἐνδεχομένων τὸ βέλτιστον, ἔστι δὲ καθάπερ τῶν ἐπὶ τῆς εὐθείας φορῶν ἡ πρὸς τὸν ἄνω τόπον τιμιωτέρα (θειότερος γὰρ τόπος ὁ ἄνω τοῦ κάτω), τὸν αὐτὸν τρόπον καὶ ἡ εἰς τὸ πρόσθεν τῆς εἰς τοὔπισθεν, ἔχει, εἴπερ καὶ τὸ δεξιὸν καὶ τὸ ἀριστερόν, καθάπερ ἐλέχθη πρότερον, (καὶ μαρτυρεῖ δ’ ἡ ῥηθεῖσα ἀπορία ὅτι ἔχει) τὸ πρότερον καὶ ὕστερον· αὕτη γὰρ ἡ αἰτία λύει τὴν ἀπορίαν. Εἰ γὰρ ἔχει ὡς ἐνδέχεται βέλτιστα, αὕτη ἂν εἴη αἰτία καὶ τοῦ εἰρημένου· βέλτιστον γὰρ κινεῖσθαι ἁπλῆν τε κίνησιν καὶ ἄπαυστον, καὶ ταύτην ἐπὶ τὸ τιμιώτερον.

Κεφάλαιο 6

Περὶ δὲ τῆς κινήσεως αὐτοῦ, ὅτι ὁμαλής ἐστι καὶ οὐκ ἀνώμαλος, ἐφεξῆς ἂν εἴη τῶν εἰρημένων διελθεῖν. Λέγω δὲ τοῦτο περὶ τοῦ πρώτου οὐρανοῦ καὶ περὶ τῆς πρώτης φορᾶς· ἐν γὰρ τοῖς ὑποκάτω πλείους ἤδη αἱ φοραὶ συνεληλύθασιν εἰς ἕν.

Εἰ γὰρ ἀνωμάλως κινήσεται, δῆλον ὅτι ἐπίτασις ἔσται καὶ ἀκμὴ καὶ ἄνεσις τῆς φορᾶς· ἅπασα γὰρ ἡ ἀνώμαλος φορὰ καὶ ἄνεσιν ἔχει καὶ ἐπίτασιν καὶ ἀκμήν. Ἀκμὴ δ' ἐστὶν ἢ ὅθεν φέρεται ἢ οἷ ἢ ἀνὰ μέσον, οἷον ἴσως τοῖς μὲν κατὰ φύσιν οἷ φέρονται, τοῖς δὲ παρὰ φύσιν ὅθεν, τοῖς δὲ ῥιπτουμένοις ἀνὰ μέσον. Τῆς δὲ κύκλῳ φορᾶς οὐκ ἔστιν οὔτε ὅθεν οὔτε οἷ οὔτε μέσον· οὔτε γὰρ ἀρχὴ οὔτε πέρας οὔτε μέσον ἐστὶν αὐτῆς ἁπλῶς· τῷ τε γὰρ χρόνῳ ἀΐδιος καὶ τῷ μήκει συνηγμένη καὶ ἄκλαστος· ὥστ' εἰ μή ἐστιν ἀκμὴ αὐτοῦ τῆς φορᾶς, οὐδ' ἂν ἀνωμαλία εἴη· ἡ γὰρ ἀνωμαλία γίγνεται διὰ τὴν ἄνεσιν καὶ ἐπίτασιν.

Ἔτι δ' ἐπεὶ πᾶν τὸ κινούμενον ὑπό τινος κινεῖται, ἀνάγκη τὴν ἀνωμαλίαν γίγνεσθαι τῆς κινήσεως ἢ διὰ τὸ κινοῦν ἢ διὰ τὸ κινούμενον ἢ δι' ἄμφω· εἴτε γὰρ τὸ κινοῦν μὴ τῇ αὐτῇ δυνάμει κινοῖ, εἴτε τὸ κινούμενον ἀλλοιοῖτο καὶ μὴ διαμένοι τὸ αὐτό, εἴτε ἄμφω μεταβάλλοι, οὐθὲν κωλύει ἀνωμάλως κινεῖσθαι τὸ κινούμενον. Οὐθὲν δὲ τούτων δυνατὸν περὶ τὸν οὐρανὸν γενέσθαι· τὸ μὲν γὰρ κινούμενον δέδεικται ὅτι πρῶτον καὶ ἁπλοῦν καὶ (288b.) ἀγένητον καὶ ἄφθαρτον καὶ ὅλως ἀμετάβλητον, τὸ δὲ κινοῦν πολὺ μᾶλλον εὔλογον εἶναι τοιοῦτον· τὸ γὰρ πρῶτον τοῦ πρώτου καὶ τὸ ἁπλοῦν τοῦ ἁπλοῦ καὶ τὸ ἄφθαρτον καὶ ἀγένητον τοῦ ἀφθάρτου καὶ ἀγενήτου κινητικόν. Ἐπεὶ οὖν τὸ κινούμενον οὐ μεταβάλλει σῶμα ὄν, οὐδ' ἂν τὸ κινοῦν μεταβάλλοι ἀσώματον ὄν. Ὥστε καὶ τὴν φορὰν ἀδύνατον ἀνώμαλον εἶναι.

Καὶ γὰρ εἰ γίνεται ἀνώμαλος, ἤτοι ὅλη μεταβάλλει καὶ ὁτὲ μὲν γίνεται θάττων ὁτὲ δὲ βραδυτέρα πάλιν, ἢ τὰ μέρη αὐτῆς. Τὰ μὲν οὖν μέρη ὅτι οὐκ ἔστιν ἀνώμαλα, φανερόν· ἤδη γὰρ ἂν ἐγεγόνει διάστασις τῶν ἄστρων ἐν τῷ ἀπείρῳ χρόνῳ, τοῦ μὲν θᾶττον κινουμένου τοῦ δὲ βραδύτερον. Οὐ φαίνεται δ' οὐθὲν ἄλλως ἔχον τοῖς διαστήμασιν. Ἀλλὰ μὴν οὐδὲ τὴν ὅλην ἐγχωρεῖ μεταβάλλειν· ἡ γὰρ ἄνεσις ἑκάστου γίνεται δι' ἀδυναμίαν, ἡ δ' ἀδυναμία παρὰ φύσιν· καὶ γὰρ αἱ ἐν τοῖς ζῴοις ἀδυναμίαι πᾶσαι παρὰ φύσιν εἰσίν, οἷον γῆρας καὶ φθίσις. Ὅλη γὰρ ἴσως ἡ σύστασις τῶν ζῴων ἐκ τοιούτων συνέστηκεν ἃ διαφέρει τοῖς οἰκείοις τόποις· οὐθὲν γὰρ τῶν μερῶν ἔχει τὴν αὑτοῦ χώραν.

Εἰ οὖν ἐν τοῖς πρώτοις μή ἐστι τὸ παρὰ φύσιν (ἁπλᾶ γὰρ καὶ ἄμικτα καὶ ἐν τῇ οἰκείᾳ χώρᾳ, καὶ οὐθὲν αὐτοῖς ἐναντίον), οὐδ' ἂν ἀδυναμία εἴη, ὥστ' οὐδ' ἄνεσις οὐδ' ἐπίτασις· εἰ γὰρ ἐπίτασις, καὶ ἄνεσις.

Ἔτι δὲ καὶ ἄλογον ἄπειρον χρόνον ἀδύνατον εἶναι τὸ κινοῦν, καὶ πάλιν ἄλλον ἄπειρον δυνατόν· οὐθὲν γὰρ φαίνεται ὂν ἄπειρον χρόνον παρὰ φύσιν (ἡ δ' ἀδυναμία παρὰ φύσιν), οὐδὲ τὸν ἴσον χρόνον παρὰ φύσιν καὶ κατὰ φύσιν, οὐδ' ὅλως δυνατὸν καὶ ἀδύνατον· ἀνάγκη δ', εἰ ἀνίησιν ἡ κίνησις, ἄπειρον ἀνιέναι χρόνον. Ἀλλὰ μὴν οὐδ' ἐπιτείνειν ἀεὶ ἢ πάλιν ἀνίενται δυνατόν· ἄπειρος γὰρ ἂν εἴη καὶ ἀόριστος ἡ κίνησις, ἅπασαν δέ φαμεν ἔκ τινος εἴς τι εἶναι καὶ ὡρισμένην.

Ἔτι δ' εἴ τις λάβοι εἶναί τινα χρόνον ἐλάχιστον, οὗ οὐκ ἐνδέχεται ἐν ἐλάττονι κινηθῆναι τὸν οὐρανόν (ὥσπερ γὰρ οὐδὲ κιθαρίσαι οὐδὲ βαδίσαι ἐν ὁτῳοῦν χρόνῳ δυνατόν, ἀλλ' ἔστιν ἑκάστης πράξεως ὡρισμένος ὁ ἐλάχιστος χρόνος κατὰ τὸ μὴ ὑπερβάλλειν, οὕτως οὐδὲ κινηθῆναι τὸν οὐρανὸν (289a.) ἐν ὁτῳοῦν χρόνῳ δυνατόν)· εἰ οὖν τοῦτ' ἀληθές, οὐκ ἂν εἴη ἀεὶ ἐπίτασις τῆς φορᾶς (εἰ δὲ μὴ ἐπίτασις, οὐδ' ἄνεσις· ὁμοίως γὰρ ἄμφω καὶ θάτερον), εἴπερ τῷ αὐτῷ τε ἐπιτείνει τάχει ἢ μείζονι, καὶ ἄπειρον χρόνον.

Λείπεται δὴ λέγειν ἐναλλὰξ εἶναι τῇ κινήσει τὸ θᾶττον καὶ τὸ βραδύτερον· τοῦτο δὲ παντελῶς ἄλογον καὶ πλάσματι ὅμοιον. Ἔτι δὲ καὶ τὸ μὴ λανθάνειν ἐπὶ τούτων εὐλογώτερον· εὐαισθητότερα γὰρ τὰ παρ' ἄλληλα τιθέμενα.

Ὅτι μὲν οὖν εἷς τε μόνος ἐστὶν ὁ οὐρανός, καὶ οὗτος ἀγένητος καὶ ἀΐδιος, ἔτι δὲ κινούμενος ὁμαλῶς, ἐπὶ τοσοῦτον ἡμῖν εἰρήσθω.

Κεφάλαιο 7

Περὶ δὲ τῶν καλουμένων ἄστρων ἑπόμενον ἂν εἴη λέγειν, ἐκ τίνων τε συνεστᾶσι καὶ ἐν ποίοις σχήμασι καὶ τίνες αἱ κινήσεις αὐτῶν.

Εὐλογώτατον δὴ καὶ τοῖς εἰρημένοις ἑπόμενον ἡμῖν τὸ ἕκαστον τῶν ἄστρων ποιεῖν ἐκ τούτου τοῦ σώματος ἐν ᾧ τυγχάνει τὴν φορὰν ἔχον, ἐπειδὴ ἔφαμέν τι εἶναι ὃ κύκλῳ φέρεσθαι πέφυκεν· ὥσπερ γὰρ οἱ πύρινα φάσκοντες εἶναι διὰ τοῦτο λέγουσιν, ὅτι τὸ ἄνω σῶμα πῦρ εἶναί φασιν, ὡς εὔλογον ὂν ἕκαστον συνεστάναι ἐκ τούτων ἐν οἷς ἕκαστόν ἐστιν, ὁμοίως καὶ ἡμεῖς λέγομεν.

Ἡ δὲ θερμότης ἀπ' αὐτῶν καὶ τὸ φῶς γίνεται παρεκτριβομένου τοῦ ἀέρος ὑπὸ τῆς ἐκείνων φορᾶς. Πέφυκε γὰρ ἡ κίνησις ἐκπυροῦν καὶ ξύλα καὶ λίθους καὶ σίδηρον· εὐλογώτερον οὖν τὸ ἐγγύτερον τοῦ πυρός, ἐγγύτερον δὲ ὁ ἀήρ· οἷον καὶ ἐπὶ τῶν φερομένων βελῶν· ταῦτα γὰρ αὐτὰ ἐκπυροῦται οὕτως ὥστε τήκεσθαι τὰς μολυβδίδας, καὶ ἐπείπερ αὐτὰ ἐκπυροῦται, ἀνάγκη καὶ τὸν κύκλῳ αὐτῶν ἀέρα τὸ αὐτὸ τοῦτο πάσχειν. Ταῦτα μὲν οὖν αὐτὰ ἐκθερμαίνεται διὰ τὸ ἐν ἀέρι φέρεσθαι, ὃς διὰ τὴν πληγὴν τῇ κινήσει γίγνεται πῦρ.

Τῶν δὲ ἄνω ἕκαστον ἐν τῇ σφαίρᾳ φέρεται, ὥστ' αὐτὰ μὲν μὴ ἐκπυροῦσθαι, τοῦ δ' ἀέρος ὑπὸ τὴν τοῦ κυκλικοῦ σώματος σφαῖραν ὄντος ἀνάγκη φερομένης ἐκείνης ἐκθερμαίνεσθαι, καὶ ταύτῃ μάλιστα ᾗ ὁ ἥλιος τετύχηκεν ἐνδεδεμένος· διὸ δὴ πλησιάζοντός τε αὐτοῦ καὶ ἀνίσχοντος καὶ ὑπὲρ ἡμῶν ὄντος γίγνεται ἡ θερμότης. Ὅτι μὲν οὖν οὔτε πύρινά ἐστιν οὔτ' ἐν πυρὶ φέρεται, ταῦθ' ἡμῖν εἰρήσθω περὶ αὐτῶν.

Κεφάλαιο 8

(289b.) Ἐπεὶ δὲ φαίνεται καὶ τὰ ἄστρα μεθιστάμενα καὶ ὅλος ὁ οὐρανός, ἀναγκαῖον ἤτοι ἠρεμούντων ἀμφοτέρων γίγνεσθαι τὴν μεταβολήν, ἢ κινουμένων, ἢ τοῦ μὲν ἠρεμοῦντος τοῦ δὲ κινουμένου.

Ἀμφότερα μὲν τοίνυν ἠρεμεῖν ἀδύνατον ἠρεμούσης γε τῆς γῆς· οὐ γὰρ ἂν ἐγίγνετο τὰ φαινόμενα. Τὴν δὲ γῆν ὑποκείσθω ἠρεμεῖν. Λείπεται δὴ ἀμφότερα κινεῖσθαι, ἢ τὸ μὲν κινεῖσθαι τὸ δ’ ἠρεμεῖν.

Εἰ μὲν οὖν ἀμφότερα κινήσεται, ἄλογον τὸ ταὐτὰ τάχη τῶν ἄστρων εἶναι καὶ τῶν κύκλων· ἕκαστον γὰρ δὴ ὁμοταχὲς ἔσται τῷ κύκλῳ καθ’ ὃν φέρεται. Φαίνεται γὰρ ἅμα τοῖς κύκλοις καθιστάμενα πάλιν εἰς τὸ αὐτό. Συμβαίνει οὖν ἅμα τό τε ἄστρον διεληλυθέναι τὸν κύκλον καὶ τὸν κύκλον ἐνηνέχθαι τὴν αὑτοῦ φοράν, διεληλυθότα τὴν περιφέρειαν. Οὐκ ἔστι δ’ εὔλογον τὸ τὸν αὐτὸν λόγον ἔχειν τὰ τάχη τῶν ἄστρων καὶ τὰ μεγέθη τῶν κύκλων. Τοὺς μὲν γὰρ κύκλους οὐθὲν ἄτοπον ἀλλ’ ἀναγκαῖον ἀνάλογον ἔχειν τὰ τάχη τοῖς μεγέθεσι, τῶν δ’ ἄστρων ἕκαστον τῶν ἐν τούτοις οὐθαμῶς εὔλογον· εἴτε γὰρ ἐξ ἀνάγκης τὸ τὸν μείζω κύκλον φερόμενον θᾶττον ἔσται, δῆλον ὅτι κἂν μετατεθῇ τὰ ἄστρα εἰς τοὺς ἀλλήλων κύκλους, τὸ μὲν ἔσται θᾶττον τὸ δὲ βραδύτερον (οὕτω δ’ οὐκ ἂν ἔχοιεν οἰκείαν κίνησιν, ἀλλὰ φέροιντ’ ἂν ὑπὸ τῶν κύκλων), εἴτε ἀπὸ ταὐτομάτου συνέπεσεν, οὐδ’ οὕτως εὔλογον ὥστ’ ἐν ἅπασιν ἅμα τόν τε κύκλον εἶναι μείζω καὶ τὴν φορὰν θάττω τοῦ ἐν αὐτῷ ἄστρου· τὸ μὲν γὰρ ἓν ἢ δύο τοῦτον τὸν τρόπον ἔχειν οὐθὲν ἄτοπον, τὸ δὲ πάνθ’ ὁμοίως πλάσματι ἔοικεν. Ἅμα δὲ καὶ οὐκ ἔστιν ἐν τοῖς φύσει τὸ ὡς ἔτυχεν, οὐδὲ τὸ πανταχοῦ καὶ πᾶσιν ὑπάρχον τὸ ἀπὸ τύχης.

Ἀλλὰ μὴν πάλιν εἰ οἱ μὲν κύκλοι μένουσιν, αὐτὰ δὲ τὰ ἄστρα κινεῖται, τὰ αὐτὰ καὶ ὁμοίως ἔσται ἄλογα· συμβήσεται γὰρ θᾶττον κινεῖσθαι τὰ ἔξω, καὶ τὰ τάχη εἶναι κατὰ τὰ μεγέθη τῶν κύκλων.

Ἐπεὶ τοίνυν οὔτ’ ἀμφότερα κινεῖσθαι εὔλογον οὔτε τὸ ἕτερον μόνον, λείπεται τοὺς μὲν κύκλους κινεῖσθαι, τὰ δὲ ἄστρα ἠρεμεῖν καὶ ἐνδεδεμένα τοῖς κύκλοις φέρεσθαι· μόνως γὰρ οὕτως οὐθὲν ἄλογον συμβαίνει· τό τε γὰρ θᾶττον εἶναι τοῦ μείζονος κύκλου τὸ τάχος εὔλογον περὶ τὸ αὐτὸ κέντρον ἐνδεδεμένων (290a.) (ὥσπερ γὰρ ἐν τοῖς ἄλλοις τὸ μεῖζον σῶμα θᾶττον φέρεται τὴν οἰκείαν φοράν, οὕτως καὶ ἐν τοῖς ἐγκυκλίοις· μεῖζον γὰρ τῶν ἀφαιρουμένων ὑπὸ τῶν ἐκ τοῦ κέντρου τὸ τοῦ μείζονος κύκλου τμῆμα, ὥστ’ εὐλόγως ἐν τῷ ἴσῳ χρόνῳ ὁ μείζων περιοισθήσεται κύκλος), τό τε μὴ διασπᾶσθαι τὸν οὐρανὸν διά τε τοῦτο συμβήσεται καὶ ὅτι δέδεικται συνεχὲς ὂν τὸ ὅλον.

Ἔτι δ’ ἐπεὶ σφαιροειδῆ τὰ ἄστρα, καθάπερ οἵ τ’ ἄλλοι φασὶ καὶ ἡμῖν ὁμολογούμενον εἰπεῖν, ἐξ ἐκείνου γε τοῦ σώματος γεννῶσιν, τοῦ δὲ σφαιροειδοῦς δύο κινήσεις εἰσὶ καθ’ αὑτό, κύλισις καὶ δίνησις, εἴπερ οὖν κινεῖται τὰ ἄστρα δι’ αὑτῶν, τὴν ἑτέραν ἂν κινοῖτο τούτων· ἀλλ’ οὐδετέραν φαίνεται.

Δινούμενα μὲν γὰρ ἂν ἔμενεν ἐν ταὐτῷ καὶ οὐ μετέβαλλε τὸν τόπον, ὅπερ φαίνεταί τε καὶ πάντες φασίν. Ἔτι δὲ πάντα μὲν εὔλογον τὴν αὐτὴν κίνησιν κινεῖσθαι, μόνος δὲ δοκεῖ τῶν ἄστρων ὁ ἥλιος τοῦτο δρᾶν ἀνατέλλων καὶ δύνων, καὶ οὗτος οὐ δι’ αὑτὸν ἀλλὰ διὰ τὴν ἀπόστασιν τῆς ἡμετέρας ὄψεως· ἡ γὰρ ὄψις ἀποτεινομένη μακρὰν ἑλίσσεται διὰ τὴν ἀσθένειαν. Ὅπερ αἴτιον ἴσως καὶ τοῦ στίλβειν φαίνεσθαι τοὺς ἀστέρας τοὺς ἐνδεδεμένους, τοὺς δὲ πλάνητας μὴ στίλβειν· οἱ μὲν γὰρ πλάνητες ἐγγύς εἰσιν, ὥστ’ ἐγκρατὴς οὖσα πρὸς αὐτοὺς ἀφικνεῖται ἡ ὄψις· πρὸς δὲ τοὺς μένοντας κραδαίνεται διὰ τὸ μῆκος, ἀποτεινομένη πόρρω λίαν. Ὁ δὲ τρόμος αὐτῆς ποιεῖ τοῦ ἄστρου δοκεῖν εἶναι τὴν κίνησιν· οὐθὲν γὰρ διαφέρει κινεῖν τὴν ὄψιν ἢ τὸ ὁρώμενον.

Ἀλλὰ μὴν ὅτι οὐδὲ κυλίεται τὰ ἄστρα, φανερόν· τὸ μὲν γὰρ κυλιόμενον στρέφεσθαι ἀνάγκη, τῆς δὲ σελήνης ἀεὶ δῆλόν ἐστι τὸ καλούμενον πρόσωπον. Ὥστ’ ἐπεὶ κινούμενα μὲν δι’ αὑτῶν τὰς οἰκείας κινεῖσθαι κινήσεις εὔλογον, ταύτας δ’ οὐ φαίνεται κινούμενα, δῆλον ὅτι οὐκ ἂν κινοῖτο δι’ αὑτῶν.

Πρὸς δὲ τούτοις ἄλογον τὸ μηθὲν ὄργανον αὐτοῖς ἀποδοῦναι τὴν φύσιν πρὸς τὴν κίνησιν (οὐθὲν γὰρ ὡς ἔτυχε ποιεῖ ἡ φύσις), οὐδὲ τῶν μὲν ζῴων φροντίσαι, τῶν δ’ οὕτω τιμίων ὑπεριδεῖν, ἀλλ’ ἔοικεν ὥσπερ ἐπίτηδες ἀφελεῖν πάντα δι’ ὧν ἐνεδέχετο προϊέναι καθ’ αὑτά, καὶ ὅτι πλεῖστον ἀποστῆσαι τῶν ἐχόντων ὄργανα πρὸς κίνησιν.

Διὸ καὶ εὐλόγως ἂν δόξειεν ὅ τε (290b.) ὅλος οὐρανὸς σφαιροειδὴς εἶναι καὶ ἕκαστον τῶν ἄστρων. Πρὸς μὲν γὰρ τὴν ἐν ἑαυτῷ κίνησιν ἡ σφαῖρα τῶν σχημάτων χρησιμώτατον (οὕτω γὰρ ἂν καὶ τάχιστα κινοῖτο καὶ μάλιστα κατέχοι τὸν αὐτὸν τόπον), πρὸς δὲ τὴν εἰς τὸ πρόσθεν ἀχρηστότατον· ἥκιστα γὰρ ὅμοιον τοῖς δι’ αὑτῶν κινητικοῖς· οὐδὲν γὰρ ἀπηρτημένον ἔχει οὐδὲ προέχον, ὥσπερ τὸ εὐθύγραμμον, ἀλλὰ πλεῖστον ἀφέστηκε τῷ σχήματι τῶν πορευτικῶν σωμάτων.

Ἐπεὶ οὖν δεῖ τὸν μὲν οὐρανὸν κινεῖσθαι τὴν ἐν ἑαυτῷ κίνησιν, τὰ δ’ ἄλλα [ἄστρα] μὴ προϊέναι δι’ αὑτῶν, εὐλόγως ἂν ἑκάτερον εἴη σφαιροειδές·

οὕτω γὰρ μάλιστα τὸ μὲν κινήσεται τὸ δ’ ἠρεμήσει.

Κεφάλαιο 9

Φανερὸν δ’ ἐκ τούτων ὅτι καὶ τὸ φάναι γίνεσθαι φερομένων ἁρμονίαν, ὡς συμφώνων γινομένων τῶν ψόφων, κομψῶς μὲν εἴρηται καὶ περιττῶς ὑπὸ τῶν εἰπόντων, οὐ μὴν οὕτως ἔχει τἀληθές. Δοκεῖ γάρ τισιν ἀναγκαῖον εἶναι τηλικούτων φερομένων σωμάτων γίγνεσθαι ψόφον, ἐπεὶ καὶ τῶν παρ’ ἡμῖν οὔτε τοὺς ὄγκους ἐχόντων ἴσους οὔτε τοιούτῳ τάχει φερομένων· ἡλίου δὲ καὶ σελήνης, ἔτι τε τοσούτων τὸ πλῆθος ἄστρων καὶ τὸ μέγεθος φερομένων τῷ τάχει τοιαύτην φορὰν ἀδύνατον μὴ γίγνεσθαι ψόφον ἀμήχανόν τινα τὸ μέγεθος. Ὑποθέμενοι δὲ ταῦτα καὶ τὰς ταχυτῆτας ἐκ τῶν ἀποστάσεων ἔχειν τοὺς τῶν συμφωνιῶν λόγους, ἐναρμόνιον γίγνεσθαί φασι τὴν φωνὴν φερομένων κύκλῳ τῶν ἄστρων.

Ἐπεὶ δ’ ἄλογον δοκεῖ τὸ μὴ συνακούειν ἡμᾶς τῆς φωνῆς ταύτης, αἴτιον τούτου φασὶν εἶναι τὸ γιγνομένων εὐθὺς ὑπάρχειν τὸν ψόφον, ὥστε μὴ διάδηλον εἶναι πρὸς τὴν ἐναντίαν σιγήν· πρὸς ἄλληλα γὰρ φωνῆς καὶ σιγῆς εἶναι τὴν διάγνωσιν· ὥστε καθάπερ τοῖς χαλκοτύποις διὰ συνήθειαν οὐθὲν δοκεῖ διαφέρειν, καὶ τοῖς ἀνθρώποις ταὐτὸ συμβαίνειν.

Ταῦτα δή, καθάπερ εἴρηται πρότερον, ἐμμελῶς μὲν λέγεται καὶ μουσικῶς, ἀδύνατον δὲ τοῦτον ἔχειν τὸν τρόπον. Οὐ γὰρ μόνον τὸ μηθὲν ἀκούειν ἄτοπον, περὶ οὗ λέγειν ἐγχειροῦσι τὴν αἰτίαν, ἀλλὰ καὶ τὸ μηδὲν πάσχειν χωρὶς αἰσθήσεως. Οἱ γὰρ ὑπερβάλλοντες ψόφοι διακναίουσι καὶ τῶν ἀψύχων σωμάτων τοὺς ὄγκους, οἷον ὁ τῆς βροντῆς διίστησι λίθους καὶ (291a.) τὰ καρτερώτατα τῶν σωμάτων. Τοσούτων δὲ φερομένων, καὶ τοῦ ψόφου διιόντος πρὸς τὸ φερόμενον μέγεθος, πολλαπλάσιον μέγεθος ἀναγκαῖον ἀφικνεῖσθαί τε δεῦρο καὶ τὴν ἰσχὺν ἀμήχανον εἶναι τῆς βίας. Ἀλλ’ εὐλόγως οὔτ’ ἀκούομεν οὔτε πάσχοντα φαίνεται τὰ σώματα βίαιον οὐδὲν πάθος, διὰ τὸ μὴ ψοφεῖν. Ἅμα δ’ ἐστὶ τό τ’ αἴτιον τούτων δῆλον, καὶ μαρτύριον τῶν εἰρημένων ἡμῖν λόγων, ὥς εἰσιν ἀληθεῖς· τὸ γὰρ ἀπορηθὲν καὶ ποιῆσαν τοὺς Πυθαγορείους φάναι γίγνεσθαι συμφωνίαν τῶν φερομένων ἡμῖν ἐστι τεκμήριον. Ὅσα (9) μὲν γὰρ αὐτὰ φέρεται, ποιεῖ ψόφον καὶ πληγήν· ὅσα δ’ ἐν φερομένῳ ἐνδέδεται ἢ ἐνυπάρχει, καθάπερ ἐν τῷ πλοίῳ τὰ μόρια, οὐχ οἷόν τε ψοφεῖν, οὐδ’ αὐτὸ τὸ πλοῖον, εἰ φέροιτο ἐν ποταμῷ. Καίτοι τοὺς αὐτοὺς λόγους ἂν ἐξείη λέγειν, ὡς ἄτοπον εἰ μὴ φερόμενος ὁ ἱστὸς καὶ ἡ πρύμνα ποιεῖ ψόφον πολὺν τηλικαύτης νεώς, ἢ πάλιν αὐτὸ τὸ πλοῖον κινούμενον. Τὸ δ’ ἐν μὴ φερομένῳ φερόμενον ποιεῖ ψόφον· ἐν φερομένῳ δὲ συνεχὲς καὶ μὴ ποιοῦν πληγὴν ἀδύνατον ψοφεῖν.

Ὥστ’ ἐνταῦθα λεκτέον ὡς εἴπερ ἐφέρετο τὰ σώματα τούτων εἴτ’ ἐν ἀέρος πλήθει κεχυμένῳ κατὰ τὸ πᾶν εἴτε πυρός, ὥσπερ πάντες φασίν, ἀναγκαῖον ποιεῖν ὑπερφυᾶ τῷ μεγέθει τὸν ψόφον, τούτου δὲ γινομένου καὶ δεῦρ’ ἀφικνεῖσθαι καὶ διακναίειν. Ὥστ’ ἐπείπερ οὐ φαίνεται τοῦτο συμβαῖνον, οὔτ’ ἂν ἔμψυχον οὔτε βίαιον φέροιτο φορὰν οὐθὲν αὐτῶν, ὥσπερ τὸ μέλλον ἔσεσθαι προνοούσης τῆς φύσεως, ὅτι μὴ τοῦτον τὸν τρόπον ἐχούσης τῆς κινήσεως οὐθὲν ἂν ἦν τῶν περὶ τὸν δεῦρο τόπον ὁμοίως ἔχον.

Ὅτι μὲν οὖν σφαιροειδῆ τὰ ἄστρα καὶ ὅτι οὐ κινεῖται δι’ αὐτῶν, εἴρηται.

Κεφάλαιο 10

Περὶ δὲ τῆς τάξεως αὐτῶν, ὃν μὲν τρόπον ἕκαστα κινεῖται τῷ τὰ μὲν εἶναι πρότερα τὰ δ’ ὕστερα, καὶ πῶς ἔχει πρὸς ἄλληλα τοῖς ἀποστήμασιν, ἐκ τῶν περὶ ἀστρολογίαν θεωρείσθω· λέγεται γὰρ ἱκανῶς. Συμβαίνει δὲ κατὰ λόγον γίγνεσθαι τὰς ἑκάστου κινήσεις τοῖς ἀποστήμασι τῷ τὰς μὲν εἶναι θάττους τὰς δὲ βραδυτέρας· ἐπεὶ γὰρ ὑπόκειται τὴν μὲν ἐσχάτην τοῦ οὐρανοῦ περιφορὰν ἁπλῆν τ’ εἶναι (291b.) καὶ ταχίστην, τὰς δὲ τῶν ἄλλων βραδυτέρας τε καὶ πλείους (ἕκαστον γὰρ ἀντιφέρεται τῷ οὐρανῷ κατὰ τὸν αὑτοῦ κύκλον), εὔλογον ἤδη τὸ μὲν ἐγγυτάτω τῆς ἁπλῆς καὶ πρώτης περιφορᾶς ἐν πλείστῳ χρόνῳ διιέναι τὸν αὑτοῦ κύκλον, τὸ δὲ πορρωτάτω ἐν ἐλαχίστῳ, τῶν δ’ ἄλλων τὸ ἐγγύτερον ἀεὶ ἐν πλείονι, τὸ δὲ πορρώτερον ἐν ἐλάττονι. Τὸ μὲν γὰρ ἐγγυτάτω μάλιστα κρατεῖται, τὸ δὲ πορρωτάτω πάντων ἥκιστα διὰ τὴν ἀπόστασιν· τὰ δὲ μεταξὺ κατὰ λόγον ἤδη τῆς ἀποστάσεως, ὥσπερ καὶ δεικνύουσιν οἱ μαθηματικοί.

Κεφάλαιο 11

Τὸ δὲ σχῆμα τῶν ἄστρων ἑκάστου σφαιροειδὲς μάλιστ’ ἄν τις εὐλόγως ὑπολάβοι. Ἐπεὶ γὰρ δέδεικται ὅτι οὐ πεφύκασι κινεῖσθαι δι’ αὑτῶν, ἡ δὲ φύσις οὐδὲν ἀλόγως οὐδὲ μάτην ποιεῖ, δῆλον ὅτι καὶ σχῆμα τοιοῦτον ἀπέδωκε τοῖς ἀκινήτοις ὃ ἥκιστά ἐστι κινητικόν. Ἥκιστα δὲ κινητικὸν ἡ σφαῖρα διὰ τὸ μηδὲν ἔχειν ὄργανον πρὸς τὴν κίνησιν. Ὥστε δῆλον ὅτι σφαιροειδῆ ἂν εἴη τὸν ὄγκον.

Ἔτι δ’ ὁμοίως μὲν ἅπαντα καὶ ἕν, ἡ δὲ σελήνη δείκνυται διὰ τῶν περὶ τὴν ὄψιν ὅτι σφαιροειδής· οὐ γὰρ ἂν ἐγίνετο αὐξανομένη καὶ φθίνουσα τὰ μὲν πλεῖστα μηνοειδὴς ἢ ἀμφίκυρτος, ἅπαξ δὲ διχότομος. Καὶ πάλιν διὰ τῶν ἀστρολογικῶν, ὅτι οὐκ ἂν ἦσαν αἱ τοῦ ἡλίου ἐκλείψεις μηνοειδεῖς. Ὥστ’ εἴπερ ἓν τοιοῦτον, δῆλον ὅτι καὶ τἆλλα ἂν εἴη σφαιροειδῆ.

Κεφάλαιο 12

Δυοῖν δ’ ἀπορίαιν οὔσαιν, περὶ ὧν εἰκότως ἂν ὁστισοῦν ἀπορήσειε, πειρατέον λέγειν τὸ φαινόμενον, αἰδοῦς ἀξίαν εἶναι νομίζοντας τὴν προθυμίαν μᾶλλον ἢ θράσους, εἴ τις διὰ τὸ φιλοσοφίας διψῆν καὶ μικρὰς εὐπορίας ἀγαπᾷ περὶ ὧν τὰς μεγίστας ἔχομεν ἀπορίας. Ἔστι δὲ πολλῶν ὄντων τοιούτων οὐχ ἥκιστα θαυμαστόν, διὰ τίνα ποτ’ αἰτίαν οὐκ ἀεὶ τὰ πλεῖον ἀπέχοντα τῆς πρώτης φορᾶς κινεῖται πλείους κινήσεις, ἀλλὰ τὰ μεταξὺ πλείστας. Εὔλογον γὰρ ἂν δόξειεν εἶναι τοῦ πρώτου σώματος μίαν κινουμένου φορὰν τὸ πλησιαίτατον ἐλαχίστας κινεῖσθαι κινήσεις, οἷον δύο, τὸ δ’ ἐχόμενον τρεῖς ἤ τινα ἄλλην τοιαύτην τάξιν. Νῦν δὲ συμβαίνει τοὐναντίον· ἐλάττους γὰρ ἥλιος καὶ σελήνη κινοῦνται (292a.) κινήσεις ἢ τῶν πλανωμένων ἄστρων ἔνια· καίτοι πορρώτερον τοῦ μέσου καὶ πλησιαίτερον τοῦ πρώτου σώματός εἰσιν αὐτῶν. Δῆλον δὲ τοῦτο περὶ ἐνίων καὶ τῇ ὄψει γέγονεν· τὴν γὰρ σελήνην ἑωράκαμεν διχότομον μὲν οὖσαν, ὑπελθοῦσαν δὲ τῶν ἀστέρων τὸν τοῦ Ἄρεος, καὶ ἀποκρυφέντα μὲν κατὰ τὸ μέλαν αὐτῆς, ἐξελθόντα δὲ κατὰ τὸ φανὸν καὶ λαμπρόν.

Ὁμοίως δὲ καὶ περὶ τοὺς ἄλλους ἀστέρας λέγουσιν οἱ πάλαι τετηρηκότες ἐκ πλείστων ἐτῶν Αἰγύπτιοι καὶ Βαβυλώνιοι, παρ’ ὧν πολλὰς πίστεις ἔχομεν περὶ ἑκάστου τῶν ἄστρων.

Τοῦτό τε δὴ δικαίως ἀπορήσειεν ἄν τις, καὶ διὰ τίνα ποτ’ αἰτίαν ἐν μὲν τῇ πρώτῃ φορᾷ τοσοῦτόν ἐστιν ἄστρων πλῆθος ὥστε τῶν ἀναριθμήτων εἶναι δοκεῖν τὴν πᾶσαν τάξιν, τῶν δ’ ἄλλων ἓν χωρὶς ἕκαστον, δύο δ’ ἢ πλείω οὐ φαίνεται ἐν τῇ αὐτῇ ἐνδεδεμένα φορᾷ.

Περὶ δὴ τούτων ζητεῖν μὲν καλῶς ἔχει καὶ τὴν ἐπὶ πλεῖον σύνεσιν, καίπερ μικρὰς ἔχοντας ἀφορμὰς καὶ τοσαύτην ἀπόστασιν ἀπέχοντας τῶν περὶ αὐτὰ συμβαινόντων· ὅμως δ’ ἐκ τῶν τοιούτων θεωροῦσιν οὐδὲν ἄλογον ἂν δόξειεν εἶναι τὸ νῦν ἀπορούμενον. Ἀλλ’ ἡμεῖς ὡς περὶ σωμάτων αὐτῶν μόνον, καὶ μονάδων τάξιν μὲν ἐχόντων, ἀψύχων δὲ πάμπαν, διανοούμεθα· δεῖ δ’ ὡς μετεχόντων ὑπολαμβάνειν πράξεως καὶ ζωῆς· οὕτω γὰρ οὐθὲν δόξει παράλογον εἶναι τὸ συμβαῖνον. Ἔοικε γὰρ τῷ μὲν ἄριστα ἔχοντι ὑπάρχειν τὸ εὖ ἄνευ πράξεως, τῷ δ’ ἐγγύτατα διὰ ὀλίγης καὶ μιᾶς, τοῖς δὲ πορρωτέρω διὰ πλειόνων, ὥσπερ ἐπὶ σώματος τὸ μὲν οὐδὲ γυμναζόμενον εὖ ἔχει, τὸ δὲ μικρὰ περιπατῆσαν, τῷ δὲ καὶ δρόμου δεῖ καὶ πάλης καὶ κονίσεως, πάλιν δ’ ἑτέρῳ οὐδ’ ὁποσαοῦν πονοῦντι τοῦτό γ’ ἂν ἔτι ὑπάρξαι τἀγαθόν, ἀλλ’ ἕτερόν τι.

Ἔστι δὲ τὸ κατορθοῦν χαλεπὸν ἢ τὸ πολλὰ ἢ τὸ πολλάκις, οἷον μυρίους ἀστραγάλους Χίους βαλεῖν ἀμήχανον, ἀλλ’ ἕνα ἢ δύο ῥᾷον. Καὶ πάλιν ὅταν τοδὶ μὲν δέῃ τοῦδ’ ἕνεκα ποιῆσαι, τοῦτο δ’ ἄλλου καὶ τοῦτο ἑτέρου, ἐν μὲν ἑνὶ ἢ δυσὶ ῥᾴδιον ἐπιτυχεῖν, ὅσῳ δ’ ἂν διὰ πλειόνων, (292b.) χαλεπώτερον.

Διὸ δεῖ νομίζειν καὶ τὴν τῶν ἄστρων πρᾶξιν εἶναι τοιαύτην οἵα περ ἡ τῶν ζῴων καὶ φυτῶν. Καὶ γὰρ ἐνταῦθα αἱ τοῦ ἀνθρώπου πλεῖσται πράξεις· πολλῶν γὰρ τῶν εὖ δύναται τυχεῖν, ὥστε πολλὰ πράττειν, καὶ ἄλλων ἕνεκα. (Τῷ δ’ ὡς ἄριστα ἔχοντι οὐθὲν δεῖ πράξεως· ἔστι γὰρ αὐτὸ τὸ οὗ ἕνεκα, ἡ δὲ πρᾶξις ἀεί ἐστιν ἐν δυσίν, ὅταν καὶ οὗ ἕνεκα ᾖ καὶ τὸ τούτου ἕνεκα). Τῶν δ’ ἄλλων ζῴων ἐλάττους, τῶν δὲ φυτῶν μικρά τις καὶ μία ἴσως· ἢ γὰρ ἕν τί ἐστιν οὗ τύχοι ἄν, ὥσπερ καὶ ἄνθρωπος, ἢ καὶ τὰ πολλὰ πάντα πρὸ ὁδοῦ ἐστι πρὸς τὸ ἄριστον. Τὸ μὲν οὖν ἔχει καὶ μετέχει τοῦ ἀρίστου, τὸ δ’ ἀφικνεῖται [ἐγγὺς] δι’ ὀλίγων, τὸ δὲ διὰ πολλῶν, τὸ δ’ οὐδ’ ἐγχειρεῖ, ἀλλ’ ἱκανὸν εἰς τὸ ἐγγὺς τοῦ ἐσχάτου ἐλθεῖν· οἷον εἰ ὑγίεια τέλος, τὸ μὲν δὴ ἀεὶ ὑγιαίνει, τὸ δ’ ἰσχνανθέν, τὸ δὲ δραμὸν καὶ ἰσχνανθέν, τὸ δὲ καὶ ἄλλο τι πρᾶξαν τοῦ δραμεῖν ἕνεκα, ὥστε πλείους αἱ κινήσεις· ἕτερον δ’ ἀδυνατεῖ πρὸς τὸ ὑγιᾶναι ἐλθεῖν, ἀλλὰ πρὸς τὸ δραμεῖν μόνον ἢ ἰσχνανθῆναι, καὶ τούτων θάτερον τέλος αὐτοῖς. Μάλιστα μὲν γὰρ ἐκείνου τυχεῖν ἄριστον πᾶσι τοῦ τέλους· εἰ δὲ μή, ἀεὶ ἄμεινόν ἐστιν ὅσῳ ἂν ἐγγύτερον ᾖ τοῦ ἀρίστου.

Καὶ διὰ τοῦτο ἡ μὲν γῆ ὅλως οὐ κινεῖται, τὰ δ’ ἐγγὺς ὀλίγας (20) κινήσεις· οὐ γὰρ ἀφικνεῖται πρὸς τὸ ἔσχατον, ἀλλὰ μέχρι ὅτου δύναται τυχεῖν τῆς θειοτάτης ἀρχῆς. Ὁ δὲ πρῶτος οὐρανὸς εὐθὺς τυγχάνει διὰ μιᾶς κινήσεως. Τὰ δ’ ἐν μέσῳ τοῦ πρώτου καὶ τῶν ἐσχάτων ἀφικνεῖται μέν, διὰ πλειόνων δ’ ἀφικνεῖται κινήσεων. Περὶ δὲ τῆς ἀπορίας ὅτι κατὰ μὲν τὴν πρώτην μίαν οὖσαν φορὰν πολὺ πλῆθος συνέστηκεν ἄστρων, τῶν δ’ ἄλλων χωρὶς ἕκαστον εἴληφεν ἰδίας κινήσεις, δι’ ἓν μὲν ἄν τις πρῶτον εὐλόγως οἰηθείη τοῦθ’ ὑπάρχειν· νοῆσαι γὰρ δεῖ τῆς ζωῆς καὶ τῆς ἀρχῆς ἑκάστης πολλὴν ὑπεροχὴν εἶναι τῆς πρώτης πρὸς τὰς ἄλλας, εἴη δ’ ἂν ἥδε συμβαίνουσα κατὰ λόγον· ἡ μὲν γὰρ πρώτη μία οὖσα πολλὰ κινεῖ τῶν σωμάτων τῶν θείων, αἱ δὲ πολλαὶ οὖσαι ἓν μόνον (293a.) ἑκάστη· τῶν γὰρ πλανωμένων ἓν ὁτιοῦν πλείους φέρεται φοράς. Ταύτῃ τε οὖν ἀνισάζει ἡ φύσις καὶ ποιεῖ τινὰ τάξιν, τῇ μὲν μιᾷ φορᾷ πολλὰ ἀποδοῦσα σώματα, τῷ δ’ ἑνὶ σώματι πολλὰς φοράς.

Καὶ ἔτι διὰ τόδε ἓν ἔχουσι σῶμα αἱ ἄλλαι φοραί, ὅτι πολλὰ σώματα κινοῦσιν αἱ πρὸ τῆς τελευταίας καὶ τῆς ἓν ἄστρον ἐχούσης· ἐν πολλαῖς γὰρ σφαίραις ἡ τελευταία σφαῖρα ἐνδεδεμένη φέρεται, ἑκάστη δὲ σφαῖρα σῶμά τι τυγχάνει ὄν. Ἐκείνης ἂν οὖν κοινὸν εἴη τὸ ἔργον· αὐτῇ μὲν γὰρ ἑκάστῃ ἡ ἴδιος φύσει φορά, αὕτη δὲ οἷον πρόσκειται, παντὸς δὲ πεπερασμένου σώματος πρὸς πεπερασμένον ἡ δύναμίς ἐστιν.

Ἀλλὰ περὶ μὲν τῶν τὴν ἐγκύκλιον φερομένων κίνησιν ἄστρων εἴρηται ποῖ᾽ ἄττα κατά τε τὴν οὐσίαν ἐστὶ καὶ κατὰ τὸ σχῆμα, περί τε τῆς φορᾶς καὶ τῆς τάξεως αὐτῶν.

Κεφάλαιο 13

Λοιπὸν δὲ περὶ τῆς γῆς εἰπεῖν, οὗ τε τυγχάνει κειμένη, καὶ πότερον τῶν ἠρεμούντων ἐστὶν ἢ τῶν κινουμένων, καὶ περὶ τοῦ σχήματος αὐτῆς.

Περὶ μὲν οὖν τῆς θέσεως οὐ τὴν αὐτὴν ἅπαντες ἔχουσι δόξαν, ἀλλὰ τῶν πλείστων ἐπὶ τοῦ μέσου κεῖσθαι λεγόντων, ὅσοι τὸν ὅλον οὐρανὸν πεπερασμένον εἶναί φασιν, ἐναντίως οἱ περὶ τὴν Ἰταλίαν, καλούμενοι δὲ Πυθαγόρειοι λέγουσιν· ἐπὶ μὲν γὰρ τοῦ μέσου πῦρ εἶναί φασι, τὴν δὲ γῆν, ἓν τῶν ἄστρων οὖσαν, κύκλῳ φερομένην περὶ τὸ μέσον νύκτα τε καὶ ἡμέραν ποιεῖν. Ἔτι δ’ ἐναντίαν ἄλλην ταύτῃ κατασκευάζουσι γῆν, ἣν ἀντίχθονα ὄνομα καλοῦσιν, οὐ πρὸς τὰ φαινόμενα τοὺς λόγους καὶ τὰς αἰτίας ζητοῦντες, ἀλλὰ πρός τινας λόγους καὶ δόξας αὑτῶν τὰ φαινόμενα προσέλκοντες καὶ πειρώμενοι συγκοσμεῖν.

Πολλοῖς δ’ ἂν καὶ ἑτέροις συνδόξειε μὴ δεῖν τῇ γῇ τὴν τοῦ μέσου χώραν ἀποδιδόναι, τὸ πιστὸν οὐκ ἐκ τῶν φαινομένων ἀθροῦσιν ἀλλὰ μᾶλλον ἐκ τῶν λόγων. Τῷ γὰρ τιμιωτάτῳ οἴονται προσήκειν τὴν τιμιωτάτην ὑπάρχειν χώραν, εἶναι δὲ πῦρ μὲν γῆς τιμιώτερον, τὸ δὲ πέρας τοῦ μεταξύ, τὸ δ’ ἔσχατον καὶ τὸ μέσον πέρας· ὥστ’ ἐκ τούτων ἀναλογιζόμενοι οὐκ οἴονται ἐπὶ τοῦ μέσου τῆς σφαίρας κεῖσθαι αὐτήν, ἀλλὰ μᾶλλον (293b.) τὸ πῦρ. Ἔτι δ’ οἵ γε Πυθαγόρειοι καὶ διὰ τὸ μάλιστα προσήκειν φυλάττεσθαι τὸ κυριώτατον τοῦ παντός, τὸ δὲ μέσον εἶναι τοιοῦτον, [ὃ] Διὸς φυλακὴν ὀνομάζουσι τὸ ταύτην ἔχον τὴν χώραν πῦρ· ὥσπερ τὸ μέσον ἁπλῶς λεγόμενον, καὶ τὸ τοῦ μεγέθους μέσον καὶ τοῦ πράγματος ὂν μέσον καὶ τῆς φύσεως. Καίτοι καθάπερ ἐν τοῖς ζῴοις οὐ ταὐτὸν τοῦ ζῴου καὶ τοῦ σώματος μέσον, οὕτως ὑποληπτέον μᾶλλον καὶ περὶ τὸν ὅλον οὐρανόν. Διὰ μὲν οὖν ταύτην τὴν αἰτίαν οὐθὲν αὐτοὺς δεῖ θορυβεῖσθαι περὶ τὸ πᾶν, οὐδ’ εἰσάγειν φυλακὴν ἐπὶ τὸ κέντρον, ἀλλ’ ἐκεῖνο ζητεῖν τὸ μέσον, ποῖόν τι καὶ ποῦ πέφυκεν. Ἐκεῖνο μὲν γὰρ ἀρχὴ τὸ μέσον καὶ τίμιον, τὸ δὲ τοῦ τόπου μέσον ἔοικε τελευτῇ μᾶλλον ἢ ἀρχῇ· τὸ μὲν γὰρ ὁριζόμενον τὸ μέσον, τὸ δ’ ὁρίζον τὸ πέρας. Τιμιώτερον δὲ τὸ περιέχον καὶ τὸ πέρας ἢ τὸ περαινόμενον· τὸ μὲν γὰρ ὕλη, τὸ δ’ οὐσία τῆς συστάσεώς ἐστιν.

Περὶ μὲν οὖν τοῦ τόπου τῆς γῆς ταύτην ἔχουσί τινες τὴν δόξαν, ὁμοίως δὲ καὶ περὶ μονῆς καὶ κινήσεως· οὐ γὰρ τὸν αὐτὸν τρόπον ἅπαντες ὑπολαμβάνουσιν, ἀλλ’ ὅσοι μὲν μηδ’ ἐπὶ τοῦ μέσου κεῖσθαί φασιν αὐτήν, κινεῖσθαι κύκλῳ περὶ τὸ μέσον, οὐ μόνον δὲ ταύτην, ἀλλὰ καὶ τὴν ἀντίχθονα, καθάπερ εἴπομεν πρότερον.

Ἐνίοις δὲ δοκεῖ καὶ πλείω σώματα τοιαῦτα ἐνδέχεσθαι φέρεσθαι περὶ τὸ μέσον, ἡμῖν ἄδηλα διὰ τὴν ἐπιπρόσθησιν τῆς γῆς. Διὸ καὶ τὰς τῆς σελήνης ἐκλείψεις πλείους ἢ τὰς τοῦ ἡλίου γίγνεσθαί φασιν· τῶν γὰρ φερομένων ἕκαστον ἀντιφράττειν αὐτήν, ἀλλ' οὐ μόνον τὴν γῆν. Ἐπεὶ γὰρ οὐκ ἔστιν ἡ γῆ κέντρον, ἀλλ' ἀπέχει τὸ ἡμισφαίριον αὐτῆς ὅλον, οὐθὲν κωλύειν οἴονται τὰ φαινόμενα συμβαίνειν ὁμοίως μὴ κατοικοῦσιν ἡμῖν ἐπὶ τοῦ κέντρου, ὥσπερ κἂν εἰ ἐπὶ τοῦ μέσου ἦν ἡ γῆ· οὐθὲν γὰρ οὐδὲ νῦν ποιεῖν ἐπίδηλον τὴν ἡμίσειαν ἀπεχόντων τῆς διαμέτρου.

Ἔνιοι δὲ καὶ κειμένην ἐπὶ τοῦ κέντρου φασὶν αὐτὴν ἴλλεσθαι καὶ κινεῖσθαι περὶ τὸν διὰ παντὸς τεταμένον πόλον, ὥσπερ ἐν τῷ Τιμαίῳ γέγραπται.

Παραπλησίως δὲ καὶ περὶ τοῦ σχήματος ἀμφισβητεῖται· τοῖς μὲν γὰρ δοκεῖ εἶναι σφαιροειδής, τοῖς δὲ πλατεῖα καὶ τὸ σχῆμα τυμπανο(294a.) ειδής· ποιοῦνται δὲ τεκμήριον ὅτι δύνων καὶ ἀνατέλλων ὁ ἥλιος εὐθεῖαν ἀλλ' οὐ περιφερῆ τὴν ἀπόκρυψιν φαίνεται ποιούμενος ὑπὸ τῆς γῆς, ὡς δέον, εἴπερ ἦν σφαιροειδής, περιφερῆ γίνεσθαι τὴν ἀποτομήν, οὐ προσλογιζόμενοι τό τε ἀπόστημα τοῦ ἡλίου πρὸς τὴν γῆν καὶ τὸ τῆς περιφερείας μέγεθος, ὡς ἐν τοῖς φαινομένοις μικροῖς κύκλοις εὐθεῖα φαίνεται πόρρωθεν. Διὰ μὲν οὖν ταύτην τὴν φαντασίαν οὐδὲν αὐτοὺς ἀπιστεῖν δεῖ μὴ κυκλοτερῆ τὸν ὄγκον εἶναι τῆς γῆς· ἀλλ' ἔτι προστιθέασι, καὶ φασὶ διὰ τὴν ἠρεμίαν ἀναγκαῖον τὸ σχῆμα τοῦτ' ἔχειν αὐτήν.

Καὶ γὰρ δὴ οἱ περὶ τῆς κινήσεως καὶ τῆς μονῆς εἰρημένοι τρόποι πολλοὶ τυγχάνουσιν. Τὸ μὲν οὖν ἀπορῆσαι πᾶσιν ἀναγκαῖον ἐπελθεῖν· τάχα γὰρ ἀλυποτέρας διανοίας τὸ μὴ θαυμάζειν πῶς ποτε μικρὸν μὲν μόριον τῆς γῆς, ἂν μετεωρισθὲν ἀφεθῇ, φέρεται καὶ μένειν οὐκ ἐθέλει, καὶ τὸ πλεῖον ἀεὶ θᾶττον, πᾶσαν δὲ τὴν γῆν εἴ τις ἀφείη μετεωρίσας, οὐκ ἂν φέροιτο. Νῦν δ' ἠρεμεῖ τοσοῦτον βάρος. Ἀλλὰ μὴν κἂν εἴ τις τῶν φερομένων μορίων αὐτῆς, πρὶν πεσεῖν, ὑφαιροίη τὴν γῆν, οἰσθήσεται κάτω μηθενὸς ἀντερείσαντος.

Ὥστε τὸ μὲν ἀπορεῖν εἰκότως ἐγένετο φιλοσόφημα πᾶσιν· τὸ δὲ τὰς περὶ τούτου λύσεις μὴ μᾶλλον ἀτόπους εἶναι δοκεῖν τῆς ἀπορίας, θαυμάσειεν ἄν τις. Οἱ μὲν γὰρ διὰ ταῦτα ἄπειρον τὸ κάτω τῆς γῆς εἶναί φασιν, ἐπ' ἄπειρον αὐτὴν ἐρριζῶσθαι λέγοντες, ὥσπερ Ξενοφάνης ὁ Κολοφώνιος, ἵνα μὴ πράγματ' ἔχωσι ζητοῦντες τὴν αἰτίαν· διὸ καὶ Ἐμπεδοκλῆς οὕτως ἐπέπληξεν, εἰπὼν ὡς εἴ περ ἀπείρονα γῆς τε βάθη καὶ δαψιλὸς αἰθήρ, ὡς διὰ πολλῶν δὴ γλώσσης ῥηθέντα ματαίως ἐκκέχυται στομάτων, ὀλίγον τοῦ παντὸς ἰδόντων.

Οἱ δ’ ἐφ’ ὕδατος κεῖσθαι. Τοῦτον γὰρ ἀρχαιότατον παρειλήφαμεν τὸν λόγον, ὅν φασιν εἰπεῖν Θαλῆν τὸν Μιλήσιον, ὡς διὰ τὸ πλωτὴν εἶναι μένουσαν ὥσπερ ξύλον ἤ τι τοιοῦτον ἕτερον (καὶ γὰρ τούτων ἐπ’ ἀέρος μὲν οὐθὲν πέφυκε μένειν, ἀλλ’ ἐφ’ ὕδατος), ὥσπερ οὐ τὸν αὐτὸν λόγον ὄντα περὶ τῆς γῆς καὶ τοῦ ὕδατος τοῦ ὀχοῦντος τὴν γῆν· οὐδὲ γὰρ τὸ ὕδωρ πέφυκε μένειν μετέωρον, ἀλλ’ ἐπί τινός (294b.) ἐστιν.

Ἔτι δ’ ὥσπερ ἀὴρ ὕδατος κουφότερον, καὶ γῆς ὕδωρ· ὥστε πῶς οἷόν τε τὸ κουφότερον κατωτέρω κεῖσθαι τοῦ βαρυτέρου τὴν φύσιν; Ἔτι δ’ εἴπερ ὅλη πέφυκε μένειν ἐφ’ ὕδατος, δῆλον ὅτι καὶ τῶν μορίων ἕκαστον· νῦν δ’ οὐ φαίνεται τοῦτο γιγνόμενον, ἀλλὰ τὸ τυχὸν μόριον φέρεται εἰς βυθόν, καὶ θᾶττον τὸ μεῖζον.

Ἀλλ’ ἐοίκασι μέχρι τινὸς ζητεῖν, ἀλλ’ οὐ μέχρι περ οὗ δυνατὸν τῆς ἀπορίας. Πᾶσι γὰρ ἡμῖν τοῦτο σύνηθες, μὴ πρὸς τὸ πρᾶγμα ποιεῖσθαι τὴν ζήτησιν ἀλλὰ πρὸς τὸν τἀναντία λέγοντα· καὶ γὰρ αὐτὸς ἐν αὐτῷ ζητεῖ μέχρι περ ἂν οὗ μηκέτι ἔχῃ ἀντιλέγειν αὐτὸς αὑτῷ. Διὸ δεῖ τὸν μέλλοντα καλῶς ζητήσειν ἐνστατικὸν εἶναι διὰ τῶν οἰκείων ἐνστάσεων τῷ γένει, τοῦτο δ’ ἐστὶν ἐκ τοῦ πάσας τεθεωρηκέναι τὰς διαφοράς.

Ἀναξιμένης δὲ καὶ Ἀναξαγόρας καὶ Δημόκριτος τὸ πλάτος αἴτιον εἶναί φασι τοῦ μένειν αὐτήν. Οὐ γὰρ τέμνειν ἀλλ’ ἐπιπωμάζειν τὸν ἀέρα τὸν κάτωθεν, ὅπερ φαίνεται τὰ πλάτος ἔχοντα τῶν σωμάτων ποιεῖν· ταῦτα γὰρ καὶ πρὸς τοὺς ἀνέμους ἔχει δυσκινήτως διὰ τὴν ἀντέρεισιν. Ταὐτὸ δὴ τοῦτο ποιεῖν τῷ πλάτει φασὶ τὴν γῆν πρὸς τὸν ὑποκείμενον ἀέρα, (τὸν δ’ οὐκ ἔχοντα μεταστῆναι τόπον ἱκανὸν ἀθρόως [τῷ] κάτωθεν ἠρεμεῖν,) ὥσπερ τὸ ἐν ταῖς κλεψύδραις ὕδωρ. Ὅτι δὲ δύναται πολὺ βάρος φέρειν ἀπολαμβανόμενος καὶ μένων ὁ ἀήρ, τεκμήρια πολλὰ λέγουσιν. Πρῶτον μὲν οὖν εἰ μὴ πλατὺ τὸ σχῆμα τῆς γῆς ἐστι, διὰ τοῦτο μὲν οὐκ ἂν ἠρεμοῖ. Καίτοι τῆς μονῆς οὐ τὸ πλάτος αἴτιον ἐξ ὧν λέγουσιν, ἀλλὰ τὸ μέγεθος μᾶλλον· διὰ γὰρ τὴν στενοχωρίαν οὐκ ἔχων τὴν πάροδον ὁ ἀὴρ μένει διὰ τὸ πλῆθος· πολὺς δ’ ἐστὶ διὰ τὸ ὑπὸ μεγέθους πολλοῦ ἐναπολαμβάνεσθαι τοῦ τῆς γῆς. Ὥστε τοῦτο μὲν ὑπάρξει, κἂν σφαιροειδὴς μὲν ᾖ, τηλικαύτη δὲ τὸ μέγεθος· μενεῖ γὰρ κατὰ τὸν ἐκείνων λόγον.

Ὅλως δὲ πρὸς τοὺς οὕτω λέγοντας περὶ τῆς κινήσεως οὐ περὶ μορίων ἐστὶν ἡ ἀμφισβήτησις, ἀλλὰ περὶ ὅλου τινὸς καὶ παντός. Ἐξ ἀρχῆς γὰρ διοριστέον πότερόν ἐστί τις τοῖς σώμασι φύσει κίνησις ἢ οὐδεμία, καὶ πότερον φύσει μὲν οὐκ ἔστι, βίᾳ δ’ ἔστιν. Ἐπεὶ δὲ (295a.) περὶ τούτων διώρισται πρότερον ὅσα κατὰ τὴν παροῦσαν δύναμιν εἴχομεν, χρηστέον ὡς ὑπάρχουσιν.

Εἰ γὰρ μηδεμία φύσει κίνησίς ἐστιν αὐτῶν, οὐδὲ βίαιος ἔσται· εἰ δὲ μή ἐστι μήτε φύσει μήτε βίᾳ, ὅλως οὐδὲν κινηθήσεται· περὶ γὰρ τούτων ὅτι ἀναγκαῖον συμβαίνειν, διώρισται πρότερον, καὶ πρὸς τούτοις ὅτι οὐδ’ ἠρεμεῖν ἐνδέχεται· ὥσπερ γὰρ κίνησις ὑπάρχει ἢ βίᾳ ἢ φύσει, οὕτω καὶ ἠρεμία.

Ἀλλὰ μὴν εἴ γέ ἐστι κίνησίς τις κατὰ φύσιν, οὐκ ἂν ἡ βίαιος εἴη φορὰ μόνον οὐδ’ ἠρέμησις· ὥστ’ εἰ βίᾳ νῦν ἡ γῆ μένει, καὶ συνῆλθεν ἐπὶ τὸ μέσον φερομένη διὰ τὴν δίνησιν· ταύτην γὰρ τὴν αἰτίαν πάντες λέγουσιν ἐκ τῶν ἐν τοῖς ὑγροῖς καὶ περὶ τὸν ἀέρα συμβαινόντων· ἐν τούτοις γὰρ ἀεὶ φέρεται τὰ μείζω καὶ βαρύτερα πρὸς τὸ μέσον τῆς δίνης. Διὸ δὴ τὴν γῆν πάντες ὅσοι τὸν οὐρανὸν γεννῶσιν, ἐπὶ τὸ μέσον συνελθεῖν φασίν· ὅτι δὲ μένει, ζητοῦσι τὴν αἰτίαν, καὶ λέγουσιν οἱ μὲν τοῦτον τὸν τρόπον, ὅτι τὸ πλάτος καὶ τὸ μέγεθος αὐτῆς αἴτιον, οἱ δ’ ὥσπερ Ἐμπεδοκλῆς, τὴν τοῦ οὐρανοῦ φορὰν κύκλῳ περιθέουσαν καὶ θᾶττον φερομένην ἢ τὴν τῆς γῆς φορὰν κωλύειν, καθάπερ τὸ ἐν τοῖς κυάθοις ὕδωρ· καὶ γὰρ τοῦτο κύκλῳ τοῦ κυάθου φερομένου πολλάκις κάτω τοῦ χαλκοῦ γινόμενον ὅμως οὐ φέρεται κάτω, πεφυκὸς φέρεσθαι, διὰ τὴν αὐτὴν αἰτίαν. Καίτοι μήτε τῆς δίνης κωλυούσης μήτε τοῦ πλάτους, ἀλλ’ ὑπείκοντος τοῦ ἀέρος, ποῖ ποτ’ οἰσθήσεται; Πρὸς μὲν γὰρ τὸ μέσον βίᾳ, καὶ μένει βίᾳ· κατὰ φύσιν δέ γε ἀναγκαῖον εἶναί τινα αὐτῆς φοράν. Αὕτη οὖν πότερον ἄνω ἢ κάτω, ἢ ποῦ ἐστιν; Εἶναι μὲν γάρ τινα ἀναγκαῖον· εἰ δὲ μηδὲν μᾶλλον κάτω ἢ ἄνω, ὁ δ’ ἄνω ἀὴρ μὴ κωλύει τὴν ἄνω φοράν, οὐδ’ ἂν ὁ ὑπὸ τῇ γῇ κωλύοι τὴν κάτω· τὰ γὰρ αὐτὰ τῶν αὐτῶν ἀναγκαῖον εἶναι αἴτια τοῖς αὐτοῖς.

Ἔτι δὲ πρὸς Ἐμπεδοκλέα κἂν ἐκεῖνό τις εἴπειεν. Ὅτε γὰρ τὰ στοιχεῖα διειστήκει χωρὶς ὑπὸ τοῦ νείκους, τίς αἰτία τῇ γῇ τῆς μονῆς ἦν; Οὐ γὰρ δὴ καὶ τότε αἰτιάσεται τὴν δίνην. Ἄτοπον δὲ καὶ τὸ μὴ συννοεῖν ὅτι πρότερον μὲν διὰ τὴν δίνησιν ἐφέρετο τὰ μόρια τῆς γῆς πρὸς τὸ μέσον· νῦν δὲ διὰ τίν’ αἰτίαν πάντα τὰ βάρος ἔχοντα φέρεται πρὸς αὐτήν; Οὐ γὰρ ἥ γε δίνη πλησιά(295b.) ζει πρὸς ἡμᾶς. Ἔτι δὲ καὶ τὸ πῦρ ἄνω φέρεται διὰ τίν’ αἰτίαν; Οὐ γὰρ διά γε τὴν δίνην. Εἰ δὲ τοῦτο φέρεσθαί που πέφυκεν, δῆλον ὅτι καὶ τὴν γῆν οἰητέον. Ἀλλὰ μὴν οὐδὲ τῇ δίνῃ γε τὸ βαρὺ καὶ κοῦφον ὥρισται, ἀλλὰ τῶν πρότερον ὑπαρχόντων βαρέων καὶ κούφων τὰ μὲν εἰς τὸ μέσον ἔρχεται, τὰ δ’ ἐπιπολάζει διὰ τὴν κίνησιν. Ἦν ἄρα καὶ πρὶν γενέσθαι τὴν δίνην τὸ μὲν βαρὺ τὸ δὲ κοῦφον, ἃ τίνι διώριστο καὶ πῶς ἐπεφύκει φέρεσθαι ἢ ποῦ; ἀπείρου γὰρ ὄντος ἀδύνατον εἶναι ἄνω ἢ κάτω, διώρισται δὲ τούτοις τὸ βαρὺ καὶ κοῦφον.

Οἱ μὲν οὖν πλεῖστοι περὶ τὰς αἰτίας ταύτας διατρίβουσιν· εἰσὶ δέ τινες οἳ διὰ τὴν ὁμοιότητά φασιν αὐτὴν μένειν, ὥσπερ τῶν ἀρχαίων Ἀναξίμανδρος· μᾶλλον μὲν γὰρ οὐθὲν ἄνω ἢ κάτω ἢ εἰς τὰ πλάγια φέρεσθαι προσήκει τὸ ἐπὶ τοῦ μέσου ἱδρυμένον καὶ ὁμοίως πρὸς τὰ ἔσχατα ἔχον· ἅμα δ’ ἀδύνατον εἰς τὸ ἐναντίον ποιεῖσθαι τὴν κίνησιν· ὥστ’ ἐξ ἀνάγκης μένειν.

Τοῦτο δὲ λέγεται κομψῶς μέν, οὐκ ἀληθῶς δέ· κατὰ γὰρ τοῦτον τὸν λόγον ἀναγκαῖον ἅπαν ὅ τι ἂν τεθῇ ἐπὶ τοῦ μέσου, μένειν, ὥστε καὶ τὸ πῦρ ἠρεμήσει· τὸ γὰρ εἰρημένον οὐκ ἴδιόν ἐστι τῆς γῆς. Ἀλλὰ μὴν οὐκ ἀναγκαῖον. Οὐ γὰρ μόνον φαίνεται μένουσα ἐπὶ τοῦ μέσου, ἀλλὰ καὶ φερομένη πρὸς τὸ μέσον. Ὅπου γὰρ ὁτιοῦν φέρεται μόριον αὐτῆς, ἀναγκαῖον ἐνταῦθα φέρεσθαι καὶ τὴν ὅλην· οὗ δὲ φέρεται κατὰ φύσιν, καὶ μένει ἐνταυθοῖ κατὰ φύσιν. Οὐκ ἄρα διὰ τὸ ὁμοίως ἔχειν πρὸς τὰ ἔσχατα· τοῦτο μὲν γὰρ πᾶσι κοινόν, τὸ δὲ φέρεσθαι πρὸς τὸ μέσον ἴδιον τῆς γῆς.

Ἄτοπον δὲ καὶ τοῦτο μὲν ζητεῖν, διὰ τί ποτε μένει ἡ γῆ ἐπὶ τοῦ μέσου, τὸ δὲ πῦρ μὴ ζητεῖν διὰ τί ἐπὶ τοῦ ἐσχάτου. Εἰ μὲν γὰρ κἀκείνῳ φύσει τόπος ὁ ἔσχατος, δῆλον ὅτι ἀναγκαῖον εἶναί τινα καὶ τῇ γῇ φύσει τόπον· εἰ δὲ μὴ ταύτῃ οὗτος ὁ τόπος, ἀλλὰ διὰ τὴν ἀνάγκην μένει τὴν τῆς ὁμοιότητος (ὥσπερ ὁ περὶ τῆς τριχὸς λόγος τῆς ἰσχυρῶς μὲν ὁμοίως δὲ πάντῃ τεινομένης, ὅτι οὐ διαρραγήσεται, καὶ τοῦ πεινῶντος καὶ διψῶντος σφόδρα μέν, ὁμοίως δέ, καὶ τῶν ἐδωδίμων καὶ ποτῶν ἴσον ἀπέχοντος· καὶ γὰρ τοῦτον ἠρεμεῖν ἀναγκαῖον), ζητητέον αὐτοῖς περὶ τῆς τοῦ πυρὸς μονῆς ἐπὶ τῶν ἐσχάτων.

(296a.) Θαυμαστὸν δὲ καὶ τὸ περὶ μὲν τῆς μονῆς ζητεῖν, περὶ δὲ τῆς φορᾶς αὐτῶν μὴ ζητεῖν, διὰ τίν’ αἰτίαν τὸ μὲν ἄνω φέρεται, τὸ δ’ ἐπὶ τὸ μέσον, μηδενὸς ἐμποδίζοντος.

Ἀλλὰ μὴν οὐδ’ ἀληθές ἐστι τὸ λεγόμενον. Κατὰ συμβεβηκὸς μέντοι τοῦτό γ’ ἀληθές, ὡς ἀναγκαῖον μένειν ἐπὶ τοῦ μέσου πᾶν ᾧ μηθὲν μᾶλλον δεῦρο ἢ δεῦρο κινεῖσθαι προσήκει. Ἀλλὰ διά γε τοῦτον τὸν λόγον οὐ μενεῖ, ἀλλὰ κινηθήσεται, οὐ μέντοι ὅλον, ἀλλὰ διεσπασμένον. Ὁ γὰρ αὐτὸς ἁρμόσει λόγος καὶ ἐπὶ τοῦ πυρός· ἀνάγκη γὰρ τεθὲν μένειν ὁμοίως ὥσπερ τὴν γῆν· ὁμοίως γὰρ ἕξει πρὸς τῶν σημείων τῶν ἐσχάτων ὁτιοῦν· ἀλλ’ ὅμως οἰσθήσεται ἀπὸ τοῦ μέσου, ὥσπερ καὶ φαίνεται φερόμενον, ἂν μή τι κωλύῃ, πρὸς τὸ ἔσχατον· πλὴν οὐχ ὅλον πρὸς ἓν σημεῖον (τοῦτο γὰρ ἀναγκαῖον μόνον συμβαίνειν ἐκ τοῦ λόγου τοῦ περὶ τῆς ὁμοιότητος) ἀλλὰ τὸ ἀνάλογον μόριον πρὸς τὸ ἀνάλογον τοῦ ἐσχάτου, λέγω δ’ οἷον τὸ τέταρτον μέρος πρὸς τὸ τέταρτον μέρος τοῦ περιέχοντος· οὐθὲν γὰρ στιγμὴ τῶν σωμάτων ἐστίν. Ὥσπερ δὲ κἂν ἐκ μεγάλου συνέλθοι πυκνούμενον εἰς ἐλάττω τόπον, οὕτω κἂν ἐξ ἐλάττονος εἰς μείζω μανότερον γιγνόμενον· ὥστε κἂν ἡ γῆ τοῦτον τὸν τρόπον ἐκινεῖτο ἀπὸ τοῦ μέσου διά γε τὸν τῆς ὁμοιότητος λόγον, εἰ μὴ φύσει τῆς γῆς οὗτος ὁ τόπος ἦν. Ὅσα μὲν οὖν τυγχάνει περί τε τοῦ σχήματος αὐτῆς ὑπολαμβανόμενα καὶ περὶ τόπου καὶ μονῆς καὶ κινήσεως, σχεδὸν ταῦτ' ἐστίν.

Κεφάλαιο 14

Ἡμεῖς δὲ λέγωμεν πρῶτον πότερον ἔχει κίνησιν ἢ μένει· καθάπερ γὰρ εἴπομεν, οἱ μὲν αὐτὴν ἓν τῶν ἄστρων εἶναι ποιοῦσιν, οἱ δ’ ἐπὶ τοῦ μέσου θέντες ἴλλεσθαι καὶ κινεῖσθαί φασι περὶ τὸν πόλον μέσον. Ὅτι δ’ ἐστὶν ἀδύνατον, δῆλον λαβοῦσιν ἀρχὴν ὡς εἴπερ φέρεται εἴτ’ ἐκτὸς οὖσα τοῦ μέσου εἴτ’ ἐπὶ τοῦ μέσου, ἀναγκαῖον αὐτὴν βίᾳ κινεῖσθαι ταύτην τὴν κίνησιν· οὐ γὰρ αὐτῆς γε τῆς γῆς ἐστιν· καὶ γὰρ ἂν τῶν μορίων ἕκαστον ταύτην εἶχε τὴν φοράν· νῦν δ’ ἐπ’ εὐθείας πάντα φέρεται πρὸς τὸ μέσον. Διόπερ οὐχ οἷόν τ’ ἀΐδιον εἶναι, βίαιόν γ’ οὖσαν καὶ παρὰ φύσιν· ἡ δέ γε τοῦ κόσμου τάξις ἀΐδιος.

Ἔτι πάντα τὰ φερόμενα τὴν φορὰν τὴν ἐγκύκλιον ὑπολειπόμενα φαίνεται καὶ κινούμενα πλείους (296b.) μιᾶς φορᾶς ἔξω τῆς πρώτης, ὥστε καὶ τὴν γῆν ἀναγκαῖον, εἴτε περὶ τὸ μέσον εἴτ’ ἐπὶ τοῦ μέσου κειμένη φέρεται, δύο κινεῖσθαι φοράς. Τούτου δὲ συμβαίνοντος ἀναγκαῖον γίγνεσθαι πάροδον καὶ τροπὰς τῶν ἐνδεδεμένων ἄστρων. Τοῦτο δ’ οὐ φαίνεται γιγνόμενον, ἀλλ’ ἀεὶ ταὐτὰ κατὰ τοὺς αὐτοὺς ἀνατέλλει καὶ δύεται τόπους αὐτῆς. Ἔτι δ’ ἡ φορὰ τῶν μορίων καὶ ὅλης αὐτῆς ἡ κατὰ φύσιν ἐπὶ τὸ μέσον τοῦ παντός ἐστιν· διὰ τοῦτο γὰρ καὶ τυγχάνει κειμένη νῦν ἐπὶ τοῦ κέντρου· διαπορήσειε δ’ ἄν τις, ἐπεὶ ταὐτὸν ἀμφοτέρων ἐστὶ τὸ μέσον, πρὸς πότερον φέρεται τὰ βάρος ἔχοντα καὶ τὰ μόρια τῆς γῆς κατὰ φύσιν· πότερον ὅτι τοῦ παντός ἐστι μέσον, ἢ διότι τῆς γῆς. Ἀνάγκη δὴ πρὸς τὸ τοῦ παντός· καὶ γὰρ τὰ κοῦφα καὶ τὸ πῦρ εἰς τοὐναντίον φερόμενα τοῖς βάρεσι πρὸς τὸ ἔσχατον φέρεται τοῦ περιέχοντος τόπου τὸ μέσον. Συμβέβηκε δὲ ταὐτὸ μέσον εἶναι τῆς γῆς καὶ τοῦ παντός· φέρεται γὰρ καὶ ἐπὶ τὸ τῆς γῆς μέσον, ἀλλὰ κατὰ συμβεβηκός, ᾗ τὸ μέσον ἔχει ἐν τῷ τοῦ παντὸς μέσῳ. Ὅτι δὲ φέρεται καὶ πρὸς τὸ τῆς γῆς μέσον, σημεῖον ὅτι τὰ φερόμενα βάρη ἐπὶ ταύτην οὐ παρ’ ἄλληλα φέρεται ἀλλὰ πρὸς ὁμοίας γωνίας, ὥστε πρὸς ἓν τὸ μέσον φέρεται, καὶ τὸ τῆς γῆς.

Φανερὸν τοίνυν ὅτι ἀνάγκη ἐπὶ τοῦ μέσου εἶναι τὴν γῆν καὶ ἀκίνητον, διά τε τὰς εἰρημένας αἰτίας, καὶ διότι τὰ βίᾳ ῥιπτούμενα ἄνω βάρη κατὰ στάθμην πάλιν φέρεται εἰς ταὐτό, κἂν εἰς ἄπειρον ἡ δύναμις ἐκριπτῇ. Ὅτι μὲν οὖν οὔτε κινεῖται οὔτ’ ἐκτὸς κεῖται τοῦ μέσου, φανερὸν ἐκ τούτων· πρὸς δὲ τούτοις δῆλον ἐκ τῶν εἰρημένων τὸ αἴτιον τῆς μονῆς. Εἰ γὰρ φύσει πέφυκε φέρεσθαι πάντοθεν πρὸς τὸ μέσον, ὥσπερ φαίνεται, καὶ τὸ πῦρ ἀπὸ τοῦ μέσου πάλιν πρὸς τὸ ἔσχατον, ἀδύνατον ἐνεχθῆναι ὁτιοῦν μόριον αὐτῆς ἀπὸ τοῦ μέσου μὴ βιασθέν· μία γὰρ φορὰ τοῦ ἑνὸς καὶ ἁπλῆ τοῦ ἁπλοῦ, ἀλλ’ οὐχ αἱ ἐναντίαι· ἡ δ’ ἀπὸ τοῦ μέσου τῇ ἐπὶ τὸ μέσον ἐναντία. Εἰ τοίνυν ὁτιοῦν μόριον ἀδύνατον ἐνεχθῆναι ἀπὸ τοῦ μέσου, φανερὸν ὅτι καὶ τὴν ὅλην ἔτι ἀδυνατώτερον· εἰς ὃ γὰρ τὸ μόριον πέφυκε φέρεσθαι, καὶ τὸ ὅλον ἐνταῦθα πέφυκεν· ὥστ’ (297a.) εἴπερ ἀδύνατον κινηθῆναι μὴ ὑπὸ κρείττονος ἰσχύος, ἀναγκαῖον ἂν εἴη μένειν αὐτὴν ἐπὶ τοῦ μέσου.

Μαρτυρεῖ δὲ τούτοις καὶ τὰ παρὰ τῶν μαθηματικῶν λεγόμενα περὶ τὴν ἀστρολογίαν· τὰ γὰρ φαινόμενα συμβαίνει μεταβαλλόντων τῶν σχημάτων οἷς ὥρισται τῶν ἄστρων ἡ τάξις, ὡς ἐπὶ τοῦ μέσου κειμένης τῆς γῆς.

Περὶ μὲν οὖν τοῦ τόπου καὶ μονῆς καὶ κινήσεως, ὃν τρόπον ἔχει, τοσαῦτα εἰρήσθω περὶ αὐτῆς.

Σχῆμα δ’ ἔχειν σφαιροειδὲς ἀναγκαῖον αὐτήν· ἕκαστον γὰρ τῶν μορίων βάρος ἔχει μέχρι πρὸς τὸ μέσον, καὶ τὸ ἔλαττον ὑπὸ τοῦ μείζονος ὠθούμενον οὐχ οἷόν τε κυμαίνειν, ἀλλὰ συμπιέζεσθαι μᾶλλον καὶ συγχωρεῖν ἕτερον ἑτέρῳ, ἕως ἂν ἔλθῃ ἐπὶ τὸ μέσον. Δεῖ δὲ νοῆσαι τὸ λεγόμενον ὥσπερ ἂν εἰ γιγνομένης τὸν τρόπον ὃν καὶ τῶν φυσιολόγων λέγουσί τινες γενέσθαι. Πλὴν ἐκεῖνοι μὲν βίαν αἰτιῶνται τῆς κάτω φορᾶς· βέλτιον δὲ τιθέναι τἀληθές, καὶ φάναι τοῦτο συμβαίνειν διὰ τὸ φύσιν ἔχειν φέρεσθαι τὸ βάρος ἔχον πρὸς τὸ μέσον. Ἐν δυνάμει οὖν ὄντος τοῦ μίγματος τὰ διακρινόμενα ἐφέρετο ὁμοίως πάντοθεν πρὸς τὸ μέσον. Εἴτ’ οὖν ὁμοίως ἀπὸ τῶν ἐσχάτων διῃρημένα τὰ μόρια συνήχθη πρὸς τὸ μέσον, εἴτ’ ἄλλως ἔχοντα, ποιήσει ταὐτόν. Ὅτι μὲν οὖν ὁμοίως γε πανταχόθεν ἀπὸ τῶν ἐσχάτων φερομένων πρὸς ἓν μέσον ἀναγκαῖον ὅμοιον γίγνεσθαι πάντῃ τὸν ὄγκον, φανερόν· ἴσου γὰρ πάντῃ προστιθεμένου ἴσον ἀνάγκη ἀπέχειν τοῦ μέσου τὸ ἔσχατον· τοῦτο δὲ τὸ σχῆμα σφαίρας ἐστίν. Οὐδὲν δὲ διοίσει πρὸς τὸν λόγον, οὐδ’ εἰ μὴ πανταχόθεν ὁμοίως συνέθει πρὸς τὸ μέσον τὰ μόρια αὐτῆς. Τὸ γὰρ πλεῖον ἀεὶ τὸ πρὸ αὐτοῦ ἔλαττον προωθεῖν ἀναγκαῖον μέχρι τοῦ μέσου τὴν ῥοπὴν ἐχόντων ἀμφοῖν, καὶ τοῦ βαρυτέρου προωθοῦντος μέχρι τούτου τὸ ἔλαττον βάρος.

Ὃ γὰρ ἄν τις ἀπορήσειε, τὴν αὐτὴν ἔχει τούτοις λύσιν· εἰ γὰρ οὔσης ἐπὶ τοῦ μέσου καὶ σφαιροειδοῦς τῆς γῆς πολλαπλάσιον βάρος ἐπιγένοιτο πρὸς θάτερον ἡμισφαίριον, οὐκ ἔσται τὸ αὐτὸ μέσον τοῦ ὅλου καὶ τὸ τῆς γῆς· ὥστε ἢ οὐ μενεῖ ἐπὶ τοῦ μέσου, ἢ εἴπερ, ἠρεμήσει γε καὶ (297b.) μὴ τὸ μέσον ἔχουσα, ᾗ πέφυκε κινεῖσθαι καὶ νῦν.

Τὸ μὲν οὖν ἀπορούμενον τοῦτ’ ἔστιν· ἰδεῖν δ’ οὐ χαλεπὸν μικρὸν ἐπιτείναντας, καὶ διελόντας πῶς ἀξιοῦμεν ὁποσονοῦν μέγεθος φέρεσθαι πρὸς τὸ μέσον, βάρος ἔχον. Δῆλον γὰρ ὡς οὐχὶ μέχρι τοῦ ἅψασθαι τοῦ κέντρου τὸ ἔσχατον, ἀλλὰ δεῖ κρατεῖν τὸ πλέον ἕως ἂν λάβῃ τῷ αὐτοῦ μέσῳ τὸ μέσον· μέχρι τούτου γὰρ ἔχει τὴν ῥοπήν. Οὐδὲν τοίνυν τοῦτο διαφέρει λέγειν ἐπὶ βώλου καὶ μορίου τοῦ τυχόντος ἢ ἐπὶ ὅλης τῆς γῆς· οὐ γὰρ διὰ μικρότητα ἢ μέγεθος εἴρηται τὸ συμβαῖνον, ἀλλὰ κατὰ παντὸς τοῦ ῥοπὴν ἔχοντος ἐπὶ τὸ μέσον.

Ὥστε εἴτε ὅλη ποθὲν ἐφέρετο εἴτε κατὰ μέρος, ἀναγκαῖον μέχρι τούτου φέρεσθαι ἕως ἂν πανταχόθεν ὁμοίως λάβῃ τὸ μέσον, ἀνισαζομένων τῶν ἐλαττόνων ὑπὸ τῶν μειζόνων τῇ προώσει τῆς ῥοπῆς.

Εἴτ’ οὖν ἐγένετο, τοῦτον ἀναγκαῖον γενέσθαι τὸν τρόπον, ὥστε φανερὸν ὅτι σφαιροειδὴς ἡ γένεσις αὐτῆς, εἴτ’ ἀγένητος ἀεὶ διατελεῖ μένουσα, τὸν αὐτὸν τρόπον ἔχειν ὅνπερ κἂν εἰ γιγνομένη τὸ πρῶτον ἐγένετο.

Κατὰ τοῦτόν τε δὴ τὸν λόγον ἀναγκαῖον εἶναι τὸ σχῆμα σφαιροειδὲς αὐτῆς, καὶ ὅτι πάντα φέρεται τὰ βαρέα πρὸς ὁμοίας γωνίας, ἀλλ’ οὐ παρ’ ἄλληλα· τοῦτο δὲ πέφυκε πρὸς τὸ φύσει σφαιροειδές. Ἢ οὖν ἐστι σφαιροειδής, ἢ φύσει γε σφαιροειδής. Δεῖ δ’ ἕκαστον λέγειν τοιοῦτον εἶναι ὃ φύσει βούλεται εἶναι καὶ ὑπάρχειν, ἀλλὰ μὴ ὃ βίᾳ καὶ παρὰ φύσιν.

Ἔτι δὲ καὶ διὰ τῶν φαινομένων κατὰ τὴν αἴσθησιν· οὔτε γὰρ ἂν αἱ τῆς σελήνης ἐκλείψεις τοιαύτας ἂν εἶχον τὰς ἀποτομάς· νῦν γὰρ ἐν μὲν τοῖς κατὰ μῆνα σχηματισμοῖς πάσας λαμβάνει τὰς διαιρέσεις (καὶ γὰρ εὐθεῖα γίνεται καὶ ἀμφίκυρτος καὶ κοίλη), περὶ δὲ τὰς ἐκλείψεις ἀεὶ κυρτὴν ἔχει τὴν ὁρίζουσαν γραμμήν, ὥστ’ ἐπείπερ ἐκλείπει διὰ τὴν τῆς γῆς ἐπιπρόσθησιν, ἡ τῆς γῆς ἂν εἴη περιφέρεια τοῦ σχήματος αἰτία σφαιροειδὴς οὖσα. Ἔτι δὲ διὰ τῆς τῶν ἄστρων φαντασίας οὐ μόνον φανερὸν ὅτι περιφερής, ἀλλὰ καὶ τὸ μέγεθος οὐκ οὖσα μεγάλη· μικρᾶς γὰρ γιγνομένης μεταστάσεως ἡμῖν πρὸς μεσημβρίαν καὶ ἄρκτον ἐπιδήλως ἕτερος γίγνεται ὁ ὁρίζων κύκλος, ὥστε τὰ (298a.) ὑπὲρ κεφαλῆς ἄστρα μεγάλην ἔχειν τὴν μεταβολήν, καὶ μὴ ταὐτὰ φαίνεσθαι πρὸς ἄρκτον τε καὶ μεσημβρίαν μεταβαίνουσιν· ἔνιοι γὰρ ἐν Αἰγύπτῳ μὲν ἀστέρες ὁρῶνται καὶ περὶ Κύπρον, ἐν τοῖς πρὸς ἄρκτον δὲ χωρίοις οὐχ ὁρῶνται, καὶ τὰ διὰ παντὸς ἐν τοῖς πρὸς ἄρκτον φαινόμενα τῶν ἄστρων ἐν ἐκείνοις τοῖς τόποις ποιεῖται δύσιν. Ὥστ’ οὐ μόνον ἐκ τούτων δῆλον περιφερὲς ὂν τὸ σχῆμα τῆς γῆς, ἀλλὰ καὶ σφαίρας οὐ μεγάλης· οὐ γὰρ ἂν οὕτω ταχὺ ἐπίδηλον ἐποίει μεθισταμένοις οὕτω βραχύ.

Διὸ τοὺς ὑπολαμβάνοντας συνάπτειν τὸν περὶ τὰς Ἡρακλείας στήλας τόπον τῷ περὶ τὴν Ἰνδικήν, καὶ τοῦτον τὸν τρόπον εἶναι τὴν θάλατταν μίαν, μὴ λίαν ὑπολαμβάνειν ἄπιστα δοκεῖν· λέγουσι δὲ τεκμαιρόμενοι καὶ τοῖς ἐλέφασιν, ὅτι περὶ ἀμφοτέρους τοὺς τόπους τοὺς ἐσχάτους ὄντας τὸ γένος αὐτῶν ἐστιν, ὡς τῶν ἐσχάτων διὰ τὸ συνάπτειν ἀλλήλοις τοῦτο πεπονθότων.

Καὶ τῶν μαθηματικῶν δὲ ὅσοι τὸ μέγεθος ἀναλογίζεσθαι πειρῶνται τῆς περιφερείας, εἰς τετταράκοντα λέγουσιν εἶναι μυριάδας.

Ἐξ ὧν τεκμαιρομένοις οὐ μόνον σφαιροειδῆ τὸν ὄγκον ἀναγκαῖον εἶναι τῆς γῆς, ἀλλὰ καὶ μὴ μέγαν πρὸς τὸ τῶν ἄλλων ἄστρων μέγεθος.

Βιβλίο 3

Κεφάλαιο 1

Περὶ μὲν οὖν τοῦ πρώτου οὐρανοῦ καὶ τῶν μερῶν, ἔτι δὲ περὶ τῶν ἐν αὐτῷ φερομένων ἄστρων, ἐκ τίνων τε συνεστᾶσι καὶ ποῖ᾽ ἄττα τὴν φύσιν ἐστί, πρὸς δὲ τούτοις ὅτι ἀγένητα καὶ ἄφθαρτα, διεληλύθαμεν πρότερον. Ἐπεὶ δὲ τῶν φύσει λεγομένων τὰ μέν ἐστιν οὐσίαι, τὰ δ᾽ ἔργα καὶ πάθη τούτων (λέγω δ᾽ οὐσίας μὲν τά τε ἁπλᾶ σώματα, οἷον πῦρ καὶ γῆν καὶ τὰ σύστοιχα τούτοις, καὶ ὅσα ἐκ τούτων, οἷον τόν τε σύνολον οὐρανὸν καὶ τὰ μόρια αὐτοῦ, καὶ πάλιν τά τε ζῷα καὶ τὰ φυτὰ καὶ τὰ μόρια τούτων, πάθη δὲ καὶ ἔργα τάς τε κινήσεις τὰς τούτων ἑκάστου καὶ τῶν ἄλλων, ὅσων ἐστὶν αἴτια ταῦτα κατὰ τὴν δύναμιν τὴν ἑαυτῶν, ἔτι δὲ τὰς ἀλ(298b.) λοιώσεις καὶ τὰς εἰς ἄλληλα μεταβάσεις), φανερὸν ὅτι τὴν πλείστην συμβαίνει τῆς περὶ φύσεως ἱστορίας περὶ σωμάτων εἶναι· πᾶσαι γὰρ αἱ φυσικαὶ οὐσίαι ἢ σώματα ἢ μετὰ σωμάτων γίγνονται καὶ μεγεθῶν. Τοῦτο δὲ δῆλον ἔκ τε τοῦ διωρίσθαι τὰ ποῖά ἐστι φύσει, καὶ ἐκ τῆς καθ᾽ ἕκαστα θεωρίας.

Περὶ μὲν οὖν τοῦ πρώτου τῶν στοιχείων εἴρηται, καὶ ποῖόν τι τὴν φύσιν, καὶ ὅτι ἄφθαρτον καὶ ἀγένητον· λοιπὸν δὲ περὶ τοῖν δυοῖν εἰπεῖν. Ἅμα δὲ συμβήσεται περὶ τούτων λέγουσι καὶ περὶ γενέσεως καὶ φθορᾶς διασκέψασθαι· γένεσις γὰρ ἤτοι τὸ παράπαν οὐκ ἔστιν, ἢ μόνον ἐν τούτοις τοῖς στοιχείοις καὶ τοῖς ἐκ τούτων ἐστίν. Αὐτὸ δὲ τοῦτο πρῶτον ἴσως θεωρητέον, πότερον ἔστιν ἢ οὐκ ἔστιν.

Οἱ μὲν οὖν πρότερον φιλοσοφήσαντες περὶ τῆς ἀληθείας καὶ πρὸς οὓς νῦν λέγομεν ἡμεῖς λόγους καὶ πρὸς ἀλλήλους διηνέχθησαν.

Οἱ μὲν γὰρ αὐτῶν ὅλως ἀνεῖλον γένεσιν καὶ φθοράν· οὐθὲν γὰρ οὔτε γίγνεσθαί φασιν οὔτε φθείρεσθαι τῶν ὄντων, ἀλλὰ μόνον δοκεῖν ἡμῖν, οἷον οἱ περὶ Μέλισσόν τε καὶ Παρμενίδην, οὕς, εἰ καὶ τἆλλα λέγουσι καλῶς, ἀλλ᾽ οὐ φυσικῶς γε δεῖ νομίσαι λέγειν· τὸ γὰρ εἶναι ἄττα τῶν ὄντων ἀγένητα καὶ ὅλως ἀκίνητα μᾶλλόν ἐστιν ἑτέρας καὶ προτέρας ἢ τῆς φυσικῆς σκέψεως.

Ἐκεῖνοι δὲ διὰ τὸ μηθὲν μὲν ἄλλο παρὰ τὴν τῶν αἰσθητῶν οὐσίαν ὑπολαμβάνειν εἶναι, τοιαύτας δέ τινας νοῆσαι πρῶτοι φύσεις, εἴπερ ἔσται τις γνῶσις ἢ φρόνησις, οὕτω μετήνεγκαν ἐπὶ ταῦτα τοὺς ἐκεῖθεν λόγους. Ἕτεροι δέ τινες ὥσπερ ἐπίτηδες τὴν ἐναντίαν τούτοις ἔσχον δόξαν. Εἰσὶ γάρ τινες οἵ φασιν οὐθὲν ἀγένητον εἶναι τῶν πραγμάτων, ἀλλὰ πάντα γίγνεσθαι, γενόμενα δὲ τὰ μὲν ἄφθαρτα διαμένειν, τὰ δὲ πάλιν φθείρεσθαι, μάλιστα μὲν οἱ περὶ Ἡσίοδον, εἶτα καὶ τῶν ἄλλων οἱ πρῶτοι φυσιολογήσαντες.

Οἱ δὲ τὰ μὲν ἄλλα πάντα γίνεσθαί φασι καὶ ῥεῖν, εἶναι δὲ παγίως οὐθέν, ἓν δέ τι μόνον ὑπομένειν, ἐξ οὗ ταῦτα πάντα μετασχηματίζεσθαι πέφυκεν· ὅπερ ἐοίκασι βούλεσθαι λέγειν ἄλλοι τε πολλοὶ καὶ Ἡράκλειτος ὁ Ἐφέσιος. Εἰσὶ δέ τινες καὶ οἳ πᾶν σῶμα γενητὸν ποιοῦσι, συντιθέντες καὶ διαλύοντες είς (299a.) ἐπίπεδα καὶ ἐξ ἐπιπέδων.

Περὶ μὲν οὖν τῶν ἄλλων ἕτερος ἔστω λόγος· τοῖς δὲ τοῦτον τὸν τρόπον λέγουσι καὶ πάντα τὰ σώματα συνιστᾶσιν ἐξ ἐπιπέδων ὅσα μὲν ἄλλα συμβαίνει λέγειν ὑπεναντία τοῖς μαθήμασιν, ἐπιπολῆς ἰδεῖν· καίτοι δίκαιον ἢ μὴ κινεῖν ἢ πιστοτέροις αὐτὰ λόγοις κινεῖν τῶν ὑποθέσεων. Ἔπειτα δῆλον ὅτι τοῦ αὐτοῦ λόγου ἐστὶ στερεὰ μὲν ἐξ ἐπιπέδων συγκεῖσθαι, ἐπίπεδα δ’ ἐκ γραμμῶν, ταύτας δ’ ἐκ στιγμῶν· οὕτω δ’ ἐχόντων οὐκ ἀνάγκη τὸ τῆς γραμμῆς μέρος γραμμὴν εἶναι· περὶ δὲ τούτων ἐπέσκεπται πρότερον ἐν τοῖς περὶ κινήσεως λόγοις, ὅτι οὐκ ἔστιν ἀδιαίρετα μήκη.

Ὅσα δὲ περὶ τῶν φυσικῶν σωμάτων ἀδύνατα συμβαίνει λέγειν τοῖς ποιοῦσι τὰς ἀτόμους γραμμάς, ἐπὶ μικρὸν θεωρήσωμεν καὶ νῦν· τὰ μὲν γὰρ ἐπ’ ἐκείνων ἀδύνατα συμβαίνοντα καὶ τοῖς φυσικοῖς ἀκολουθήσει, τὰ δὲ τούτοις ἐπ’ ἐκείνων οὐχ ἅπαντα διὰ τὸ τὰ μὲν ἐξ ἀφαιρέσεως λέγεσθαι, τὰ μαθηματικά, τὰ δὲ φυσικὰ ἐκ προσθέσεως. Πολλὰ δ’ ἐστὶν ἃ τοῖς ἀδιαιρέτοις οὐχ οἷόν τε ὑπάρχειν, τοῖς δὲ φυσικοῖς ἀναγκαῖον. [Οἷον εἴ τί ἐστιν ἀδιαίρετον·] ἐν ἀδιαιρέτῳ γὰρ διαιρετὸν ἀδύνατον ὑπάρχειν, τὰ δὲ πάθη διαιρετὰ πάντα διχῶς· ἢ γὰρ κατ’ εἶδος ἢ κατὰ συμβεβηκός, κατ’ εἶδος μὲν οἷον χρώματος τὸ λευκὸν ἢ τὸ μέλαν, κατὰ συμβεβηκὸς δέ, ἂν ᾧ ὑπάρχει ᾖ διαιρετόν, ὥστε ὅσα ἁπλᾶ τῶν παθημάτων, πάντ’ ἐστὶ διαιρετὰ τοῦτον τὸν τρόπον. Διὸ τὸ ἀδύνατον ἐν τοῖς τοιούτοις ἐπισκεπτέον.

Εἰ δὴ τῶν ἀδυνάτων ἐστὶν ἑκατέρου μέρους μηδὲν ἔχοντος βάρος τὰ ἄμφω ἔχειν βάρος, τὰ δ’ αἰσθητὰ σώματα ἢ πάντα ἢ ἔνια βάρος ἔχει, οἷον ἡ γῆ καὶ τὸ ὕδωρ, ὡς κἂν αὐτοὶ φαῖεν, εἰ ἡ στιγμὴ μηδὲν ἔχει βάρος, δῆλον ὅτι οὐδ’ αἱ γραμμαί, εἰ δὲ μὴ αὗται, οὐδὲ τὰ ἐπίπεδα· ὥστ’ οὐδὲ τῶν σωμάτων οὐθέν.

Ἀλλὰ μὴν ὅτι τὴν στιγμὴν οὐχ οἷόν τε βάρος ἔχειν, φανερόν. Τὸ μὲν γὰρ βαρὺ ἅπαν καὶ βαρύτερον καὶ τὸ κοῦφον καὶ κουφότερον ἐνδέχε(299b.) ταί τινος εἶναι. Τὸ δὲ βαρύτερον ἢ κουφότερον ἴσως οὐκ ἀνάγκη βαρὺ ἢ κοῦφον εἶναι, ὥσπερ καὶ τὸ μὲν μέγα μεῖζον, τὸ δὲ μεῖζον οὐ πᾶν μέγα· πολλὰ γάρ ἐστιν ἃ μικρὰ ὄντα ἁπλῶς ὅμως μείζω ἑτέρων ἐστίν. Εἰ δὴ ὃ ἂν βαρὺ ὂν βαρύτερον ᾖ, ἀνάγκη βάρει μεῖζον εἶναι, τὸ βαρὺ ἅπαν διαιρετὸν ἂν εἴη. Ἡ δὲ στιγμὴ ἀδιαίρετον ὑπόκειται.

Ἔτι εἰ τὸ μὲν βαρὺ πυκνόν τι, τὸ δὲ κοῦφον μανόν, ἔστι δὲ πυκνὸν μανοῦ διαφέρον τῷ ἐν ἴσῳ ὄγκῳ πλεῖον ἐνυπάρχειν· εἰ οὖν ἐστι στιγμὴ βαρεῖα καὶ κούφη, ἔστι καὶ πυκνὴ καὶ μανή. Ἀλλὰ τὸ μὲν πυκνὸν διαιρετόν, ἡ δὲ στιγμὴ ἀδιαίρετος.

Εἰ δὲ πᾶν τὸ βαρὺ ἢ μαλακὸν ἢ σκληρὸν ἀνάγκη εἶναι, ῥᾴδιον ἐκ τούτων ἀδύνατόν τι συναγαγεῖν. Μαλακὸν μὲν γὰρ τὸ εἰς ἑαυτὸ ὑπεῖκον, σκληρὸν δὲ τὸ μὴ ὑπεῖκον· τὸ δὲ ὑπεῖκον διαιρετόν.

Ἀλλὰ μὴν οὐδ’ ἐκ μὴ ἐχόντων βάρος ἔσται βάρος. Καὶ γὰρ ἐπὶ πόσων συμβήσεται τοῦτο καὶ ἐπὶ ποίων; Ἢ πῶς διοριοῦσι μὴ βουλόμενοι πλάττειν; καὶ εἰ πᾶν μεῖζον βάρος βάρους βάρει, συμβήσεται καὶ ἕκαστον τῶν ἀβαρῶν βάρος ἔχειν· εἰ γὰρ αἱ τέτταρες στιγμαὶ βάρος ἔχουσι, τὸ δ’ ἐκ πλειόνων ἢ τοδὶ βαρέος ὄντος βαρύτερον, τὸ δὲ βαρέος βαρύτερον ἀνάγκη βάρει εἶναι, ὥσπερ καὶ τὸ λευκοῦ λευκότερον λευκῷ, ἔσται τὸ μεῖζον μιᾷ στιγμῇ βαρύτερον, ὥστε, ἀφαιρεθέντος τοῦ ἴσου, [ὥστε] καὶ ἡ μία στιγμὴ βάρος ἕξει.

Ἔτι εἰ μὲν τὰ ἐπίπεδα μόνον κατὰ γραμμὴν ἐνδέχεται συντίθεσθαι, ἄτοπον· ὥσπερ γὰρ γραμμὴ πρὸς γραμμὴν ἀμφοτέρως συντίθεται, καὶ κατὰ μῆκος καὶ κατὰ πλάτος, δεῖ καὶ ἐπίπεδον ἐπιπέδῳ τὸν αὐτὸν τρόπον. Γραμμὴ δὲ δύναται γραμμῇ συντίθεσθαι κατὰ γραμμὴν ἐπιτιθεμένη ἀλλ’ οὐ προστιθεμένη. Ἀλλὰ μὴν εἴ γε καὶ κατὰ πλάτος ἐνδέχεται συντίθεσθαι, ἔσται τι σῶμα ὃ οὔτε στοιχεῖον οὔτε ἐκ στοιχείων, συντιθέμενον ἐκ τῶν οὕτω συντιθεμένων ἐπιπέδων.

Ἔτι εἰ μὲν πλήθει βαρύτερα τὰ σώματα τῶν ἐπιπέδων, ὥσπερ ἐν τῷ (300a.) Τιμαίῳ διώρισται, δῆλον ὡς ἕξει καὶ ἡ γραμμὴ καὶ ἡ στιγμὴ βάρος· ἀνάλογον γὰρ πρὸς ἄλληλα ἔχουσιν, ὥσπερ καὶ πρότερον εἰρήκαμεν. Εἰ δὲ μὴ τοῦτον διαφέρει τὸν τρόπον ἀλλὰ τῷ τὴν μὲν γῆν εἶναι βαρὺ τὸ δὲ πῦρ κοῦφον, ἔσται καὶ τῶν ἐπιπέδων τὸ μὲν κοῦφον τὸ δὲ βαρύ. Καὶ τῶν γραμμῶν δὴ καὶ τῶν στιγμῶν ὡσαύτως· τὸ γὰρ τῆς γῆς ἐπίπεδον ἔσται βαρύτερον ἢ τὸ τοῦ πυρός. Ὅλως δὲ συμβαίνει ἢ μηδέν ποτ’ εἶναι μέγεθος, ἢ δύνασθαί γε ἀναιρεθῆναι, εἴπερ ὁμοίως ἔχει στιγμὴ μὲν πρὸς γραμμήν, γραμμὴ δὲ πρὸς ἐπίπεδον, τοῦτο δὲ πρὸς σῶμα· πάντα γὰρ εἰς ἄλληλα ἀναλυόμενα εἰς τὰ πρῶτα ἀναλυθήσεται· ὥστ’ ἐνδέχοιτ’ ἂν στιγμὰς μόνον εἶναι, σῶμα δὲ μηθέν.

Πρὸς δὲ τούτοις καὶ εἰ ὁ χρόνος ὁμοίως ἔχει, ἀναιροῖτ’ ἄν ποτε ἢ ἐνδέχοιτ’ ἂν ἀναιρεθῆναι· τὸ γὰρ νῦν τὸ ἄτομον οἷον στιγμὴ γραμμῆς ἐστιν.

Τὸ δ’ αὐτὸ συμβαίνει καὶ τοῖς ἐξ ἀριθμῶν συντιθεῖσι τὸν οὐρανόν· ἔνιοι γὰρ τὴν φύσιν ἐξ ἀριθμῶν συνιστᾶσιν, ὥσπερ τῶν Πυθαγορείων τινές· τὰ μὲν γὰρ φυσικὰ σώματα φαίνεται βάρος ἔχοντα καὶ κουφότητα, τὰς δὲ μονάδας οὔτε σώματα ποιεῖν οἷόν τε συντιθεμένας οὔτε βάρος ἔχειν.

Κεφάλαιο 2

Ὅτι δ’ ἀναγκαῖον ὑπάρχειν κίνησιν τοῖς ἁπλοῖς σώμασι φύσει τινὰ πᾶσιν, ἐκ τῶνδε δῆλον. Ἐπεὶ γὰρ κινούμενα φαίνεται, κινεῖσθαί γε ἀναγκαῖον βίᾳ, εἰ μὴ οἰκείαν ἔχει κίνησιν· τὸ δὲ βίᾳ καὶ παρὰ φύσιν ταὐτόν. Ἀλλὰ μὴν εἰ παρὰ φύσιν ἐστί τις κίνησις, ἀνάγκη εἶναι καὶ κατὰ φύσιν, παρ’ ἣν αὕτη· καὶ εἰ πολλαὶ αἱ παρὰ φύσιν, τὴν κατὰ φύσιν μίαν· κατὰ φύσιν μὲν γὰρ ἁπλῶς, παρὰ φύσιν δ’ ἔχει πολλὰς ἕκαστον.

Ἔτι δὲ καὶ ἐκ τῆς ἠρεμίας δῆλον· καὶ γὰρ ἠρεμεῖν ἀναγκαῖον ἢ βίᾳ ἢ κατὰ φύσιν· βίᾳ δὲ μένει οὗ καὶ φέρεται βίᾳ, καὶ κατὰ φύσιν οὗ κατὰ φύσιν.

Ἐπεὶ οὖν φαίνεταί τι μένον ἐπὶ τοῦ μέσου, εἰ μὲν κατὰ φύσιν, δῆλον ὅτι καὶ ἡ φορὰ ἡ ἐνταῦθα κατὰ φύσιν αὐτῷ· εἰ δὲ βίᾳ, τί τὸ φέρεσθαι κωλῦον; Εἰ μὲν ἠρεμοῦν, τὸν αὐτὸν κυκλήσομεν λόγον· ἀνάγκη γὰρ ἢ κατὰ φύσιν εἶναι τὸ (300b.) πρῶτον ἠρεμοῦν ἢ εἰς ἄπειρον ἰέναι, ὅπερ ἀδύνατον· εἰ δὲ κινούμενον τὸ κωλῦον φέρεσθαι, καθάπερ φησὶν Ἐμπεδοκλῆς τὴν γῆν ὑπὸ τῆς δίνης ἠρεμεῖν, ποῦ ἂν ἐφέρετο, ἐπειδὴ εἰς ἄπειρον ἀδύνατον; Οὐθὲν γὰρ γίγνεται ἀδύνατον, τὸ δ’ ἄπειρον διελθεῖν ἀδύνατον. Ὥστ’ ἀνάγκη στῆναί που τὸ φερόμενον, κἀκεῖ μὴ βίᾳ μένειν ἀλλὰ κατὰ φύσιν. Εἰ δ’ ἐστὶν ἠρεμία κατὰ φύσιν, ἔστι καὶ κίνησις κατὰ φύσιν, ἡ εἰς τοῦτον τὸν τόπον φορά. Διὸ καὶ Λευκίππῳ καὶ Δημοκρίτῳ, τοῖς λέγουσιν ἀεὶ κινεῖσθαι τὰ πρῶτα σώματα ἐν τῷ κενῷ καὶ τῷ ἀπείρῳ, λεκτέον τίνα κίνησιν καὶ τίς ἡ κατὰ φύσιν αὐτῶν κίνησις. Εἰ γὰρ ἄλλο ὑπ’ ἄλλου κινεῖται βίᾳ τῶν στοιχείων, ἀλλὰ καὶ κατὰ φύσιν ἀνάγκη τινὰ εἶναι κίνησιν ἑκάστου, παρ’ ἣν ἡ βίαιός ἐστιν· καὶ δεῖ τὴν πρώτην κινοῦσαν μὴ βίᾳ κινεῖν, ἀλλὰ κατὰ φύσιν· εἰς ἄπειρον γὰρ εἶσιν, εἰ μή τι ἔσται κατὰ φύσιν κινοῦν πρῶτον, ἀλλ’ ἀεὶ τὸ πρότερον βίᾳ κινούμενον κινήσει.

Τὸ αὐτὸ δὲ τοῦτο συμβαίνειν ἀναγκαῖον κἂν εἰ καθάπερ ἐν τῷ Τιμαίῳ γέγραπται, πρὶν γενέσθαι τὸν κόσμον ἐκινεῖτο τὰ στοιχεῖα ἀτάκτως. Ἀνάγκη γὰρ ἢ βίαιον εἶναι τὴν κίνησιν ἢ κατὰ φύσιν. Εἰ δὲ κατὰ φύσιν ἐκινεῖτο, ἀνάγκη κόσμον εἶναι, ἐάν τις βούληται θεωρεῖν ἐπιστήσας· τό τε γὰρ πρῶτον κινοῦν ἀνάγκη κινεῖν ἑαυτὸ κινούμενον κατὰ φύσιν, καὶ τὰ κινούμενα μὴ βίᾳ, ἐν τοῖς οἰκείοις ἠρεμοῦντα τόποις, ποιεῖν ἥνπερ ἔχουσι νῦν τάξιν, τὰ μὲν βάρος ἔχοντα ἐπὶ τὸ μέσον, τὰ δὲ κουφότητα ἔχοντα ἀπὸ τοῦ μέσου· ταύτην δ’ ὁ κόσμος ἔχει τὴν διάταξιν.

Ἔτι δὲ τοσοῦτον ἐπανέροιτ’ ἄν τις, πότερον οὐχ οἷόν τ’ ἦν κινούμενα ἀτάκτως καὶ μίγνυσθαι τοιαύτας μίξεις ἔνια, ἐξ ὧν συνίσταται τὰ κατὰ φύσιν συνιστάμενα σώματα, λέγω δ’ οἷον ὀστᾶ καὶ σάρκας, καθάπερ Ἐμπεδοκλῆς φησὶ γίνεσθαι ἐπὶ τῆς φιλότητος· λέγει γὰρ ὡς πολλαὶ μὲν κόρσαι ἀναύχενες ἐβλάστησαν.

Τοῖς δ’ ἄπειρα ἐν ἀπείρῳ τὰ κινούμενα ποιοῦσιν, εἰ μὲν ἓν τὸ κινοῦν, ἀνάγκη μίαν φέρεσθαι φοράν, ὥστ’ οὐκ ἀτάκτως κινηθήσεται, εἰ δ’ ἄπειρα τὰ (301a.) κινοῦντα, καὶ τὰς φορὰς ἀναγκαῖον ἀπείρους εἶναι· εἰ γὰρ πεπερασμέναι, τάξις τις ἔσται· οὐ γὰρ τῷ μὴ φέρεσθαι εἰς τὸ αὐτὸ ἡ ἀταξία συμβαίνει· οὐδὲ γὰρ νῦν εἰς τὸ αὐτὸ φέρεται πάντα, ἀλλὰ τὰ συγγενῆ μόνον.

Ἔτι τὸ ἀτάκτως οὐθέν ἐστιν ἕτερον ἢ τὸ παρὰ φύσιν· ἡ γὰρ τάξις ἡ οἰκεία τῶν αἰσθητῶν φύσις ἐστίν. Ἀλλὰ μὴν καὶ τοῦτο ἄτοπον καὶ ἀδύνατον, τὸ ἄπειρον ἄτακτον ἔχειν κίνησιν· ἔστι γὰρ φύσις ἐκείνη τῶν πραγμάτων οἵαν ἔχει τὰ πλείω καὶ τὸν πλείω χρόνον· συμβαίνει οὖν αὐτοῖς τοὐναντίον τὴν μὲν ἀταξίαν εἶναι κατὰ φύσιν, τὴν δὲ τάξιν καὶ τὸν κόσμον παρὰ φύσιν· καίτοι οὐδὲν ὡς ἔτυχε γίγνεται τῶν κατὰ φύσιν. Ἔοικε δὲ τοῦτό γε αὐτὸ καλῶς Ἀναξαγόρας λαβεῖν· ἐξ ἀκινήτων γὰρ ἄρχεται κοσμοποιεῖν. Πειρῶνται δὲ καὶ οἱ ἄλλοι συγκρίνοντές πως πάλιν κινεῖν καὶ διακρίνειν. Ἐκ διεστώτων δὲ καὶ κινουμένων οὐκ εὔλογον ποιεῖν τὴν γένεσιν. Διὸ καὶ Ἐμπεδοκλῆς παραλείπει τὴν ἐπὶ τῆς φιλότητος· οὐ γὰρ ἂν ἠδύνατο συστῆσαι τὸν οὐρανὸν ἐκ κεχωρισμένων μὲν κατασκευάζων, σύγκρισιν δὲ ποιῶν διὰ τὴν φιλότητα· ἐκ διακεκριμένων γὰρ συνέστηκεν ὁ κόσμος τῶν στοιχείων· ὥστ’ ἀναγκαῖον γίνεσθαι ἐξ ἑνὸς καὶ συγκεκριμένου.

Ὅτι μὲν οὖν ἐστι φυσική τις κίνησις ἑκάστου τῶν σωμάτων, ἣν οὐ βίᾳ κινοῦνται οὐδὲ παρὰ φύσιν, φανερὸν ἐκ τούτων.

Ὅτι δ’ ἔχειν ἔνια ἀναγκαῖον ῥοπὴν βάρους καὶ κουφότητος, ἐκ τῶνδε δῆλον. Κινεῖσθαι μὲν γάρ φαμεν ἀναγκαῖον εἶναι· εἰ δὲ μὴ ἕξει φύσει ῥοπὴν τὸ κινούμενον, ἀδύνατον κινεῖσθαι ἢ πρὸς τὸ μέσον ἢ ἀπὸ τοῦ μέσου. Ἔστω γὰρ τὸ μὲν ἐφ’ οὗ Α ἀβαρές, τὸ δ’ ἐφ’ οὗ Β βάρος ἔχον, ἐνηνέχθω δὲ τὸ ἀβαρὲς τὴν ΓΔ, τὸ δὲ Β ἐν τῷ ἴσῳ χρόνῳ τὴν ΓΕ· μείζω γὰρ οἰσθήσεται τὸ βάρος ἔχον. Ἐὰν δὴ διαιρεθῇ τὸ σῶμα τὸ ἔχον βάρος ὡς ἡ ΓΕ πρὸς τὴν ΓΔ (δυνατὸν γὰρ οὕτως ἔχειν πρός τι τῶν ἐν αὐτῷ μορίων), εἰ τὸ ὅλον φέρεται τὴν ὅλην τὴν ΓΕ, τὸ μόριον ἀνάγκη ἐν τῷ αὐτῷ χρόνῳ τὴν ΓΔ φέρεσθαι, ὥστε ἴσον οἰσθήσεται τὸ ἀβαρὲς καὶ τὸ βάρος ἔχον· ὅπερ ἀδύνα(301b.) τον. Ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ κουφότητος.

Ἔτι δ’ εἰ ἔσται τι σῶμα κινούμενον μήτε κουφότητα μήτε βάρος ἔχον, ἀνάγκη τοῦτο βίᾳ κινεῖσθαι, βίᾳ δὲ κινούμενον ἄπειρον ποιεῖ τὴν κίνησιν.

Ἐπεὶ γὰρ δύναμίς τις ἡ κινοῦσα, τὸ δ’ ἔλαττον καὶ τὸ κουφότερον ὑπὸ τῆς αὐτῆς δυνάμεως πλεῖον κινηθήσεται, κεκινήσθω τὸ μὲν ἐφ’ ᾧ τὸ Α, τὸ ἀβαρές, τὴν ΓΕ, τὸ δ’ ἐφ’ ᾧ τὸ Β, τὸ βάρος ἔχον, ἐν τῷ ἴσῳ χρόνῳ τὴν ΓΔ.

Διαιρεθέντος δὴ τοῦ βάρος ἔχοντος σώματος ὡς ἡ ΓΕ πρὸς τὴν ΓΔ, συμβήσεται τὸ ἀφαιρούμενον ἀπὸ τοῦ βάρος ἔχοντος σώματος τὴν ΓΕ φέρεσθαι ἐν τῷ ἴσῳ χρόνῳ, ἐπείπερ τὸ ὅλον ἐφέρετο τὴν ΓΔ. Τὸ γὰρ τάχος ἕξει τὸ τοῦ ἐλάττονος πρὸς τὸ τοῦ μείζονος ὡς τὸ μεῖζον σῶμα πρὸς τὸ ἔλαττον. Ἴσον ἄρα τὸ ἀβαρὲς οἰσθήσεται σῶμα καὶ τὸ βάρος ἔχον ἐν τῷ αὐτῷ χρόνῳ. Τοῦτο δ’ ἀδύνατον. Ὥστ’ ἐπεὶ παντὸς τοῦ προτεθέντος μεῖζον κινηθήσεται διάστημα τὸ ἀβαρές, ἄπειρον ἂν φέροιτο. Φανερὸν οὖν ὅτι ἀνάγκη σῶμα πᾶν βάρος ἔχειν ἢ κουφότητα διωρισμένον. Ἐπεὶ δὲ φύσις μέν ἐστιν ἡ ἐν αὐτῷ ὑπάρχουσα κινήσεως ἀρχή, δύναμις δ’ ἡ ἐν ἄλλῳ ᾗ ἄλλο, κίνησις δὲ ἡ μὲν κατὰ φύσιν ἡ δὲ βίᾳ πᾶσα, τὴν μὲν κατὰ φύσιν, οἷον τῷ λίθῳ τὴν κάτω, θάττω ποιήσει τὸ κατὰ δύναμιν, τὴν δὲ παρὰ φύσιν ὅλως αὐτή. Πρὸς ἀμφότερα δὲ ὥσπερ ὀργάνῳ χρῆται τῷ ἀέρι (πέφυκε γὰρ οὗτος καὶ κοῦφος εἶναι καὶ βαρύς)· τὴν μὲν οὖν ἄνω ποιήσει φορὰν ᾗ κοῦφος, ὅταν ὠσθῇ καὶ λάβῃ τὴν ἀρχὴν ἀπὸ τῆς δυνάμεως, τὴν δὲ κάτω πάλιν ᾗ βαρύς· ὥσπερ γὰρ ἐναφάψασα παραδίδωσιν ἑκατέρῳ. Διὸ καὶ οὐ παρακολουθοῦντος τοῦ κινήσαντος φέρεται τὸ βίᾳ κινηθέν. Εἰ γὰρ μὴ τοιοῦτόν τι σῶμα ὑπῆρχεν, οὐκ ἂν ἦν βίᾳ κίνησις. Καὶ τὴν κατὰ φύσιν δ’ ἑκάστου κίνησιν συνεπουρίζει τὸν αὐτὸν τρόπον. Ὅτι μὲν οὖν ἅπαν ἢ κοῦφον ἢ βαρύ, καὶ πῶς αἱ παρὰ φύσιν κινήσεις ἔχουσι ἐν τούτοις, φανερόν.

Ὅτι δ’ οὔτε πάντων ἐστὶ γένεσις οὔθ’ ἁπλῶς οὐθενός, δῆλον ἐκ τῶν προειρημένων· ἀδύνατον γὰρ παντὸς σώματος εἶναι γένεσιν, (302a.) εἰ μὴ καὶ κενὸν εἶναί τι δυνατὸν κεχωρισμένον· ἐν ᾧ γὰρ ἔσται τόπῳ τὸ νῦν γιγνόμενον εἰ ἐγίγνετο, ἐν τούτῳ πρότερον τὸ κενὸν ἀναγκαῖον εἶναι σώματος μηθενὸς ὄντος. Ἄλλο μὲν γὰρ ἐξ ἄλλου σῶμα γίγνεσθαι δυνατόν, οἷον ἐξ ἀέρος πῦρ, ὅλως δ’ ἐκ μηδενὸς ἄλλου προϋπάρχοντος μεγέθους ἀδύνατον· μάλιστα γὰρ ἂν ἐκ δυνάμει τινὸς ὄντος σώματος ἐνεργείᾳ γένοιτ’ ἂν σῶμα. Ἀλλ’ εἰ τὸ δυνάμει ὂν σῶμα μηθέν ἐστιν ἄλλο σῶμα ἐνεργείᾳ πρότερον, κενὸν ἔσται κεχωρισμένον.

Κεφάλαιο 3

Λοιπὸν δ’ εἰπεῖν τίνων τέ ἐστι γένεσις [σωμάτων], καὶ διὰ τί ἐστιν. Ἐπεὶ οὖν ἐν ἅπασιν ἡ γνῶσις διὰ τῶν πρώτων, πρῶτα δὲ τῶν ἐνυπαρχόντων τὰ στοιχεῖα, σκεπτέον ποῖα τῶν τοιούτων σωμάτων ἐστὶ στοιχεῖα, καὶ διὰ τί ἐστιν, ἔπειτα μετὰ ταῦτα πόσα καὶ ποῖ’ ἄττα.

Τοῦτο δ’ ἔσται φανερὸν ὑποθεμένοις τίς ἐστιν ἡ τοῦ στοιχείου φύσις. Ἔστω δὴ στοιχεῖον τῶν σωμάτων, εἰς ὃ τἆλλα σώματα διαιρεῖται, ἐνυπάρχον δυνάμει ἢ ἐνεργείᾳ (τοῦτο γὰρ ποτέρως, ἔτι ἀμφισβητήσιμον), αὐτὸ δ’ ἐστὶν ἀδιαίρετον εἰς ἕτερα τῷ εἴδει· τοιοῦτον γάρ τι τὸ στοιχεῖον ἅπαντες καὶ ἐν ἅπασι βούλονται λέγειν. Εἰ δὴ τὸ εἰρημένον ἐστὶ στοιχεῖον, ἀνάγκη εἶναι ἄττα τοιαῦτα τῶν σωμάτων. Ἐν μὲν γὰρ σαρκὶ καὶ ξύλῳ καὶ ἑκάστῳ τῶν τοιούτων ἔνεστι δυνάμει πῦρ καὶ γῆ· φανερὰ γὰρ ταῦτα ἐξ ἐκείνων ἐκκρινόμενα. Ἐν δὲ πυρὶ σὰρξ ἢ ξύλον οὐκ ἐνυπάρχουσιν, οὔτε κατὰ δύναμιν οὔτε κατ’ ἐνέργειαν· ἐξεκρίνετο γὰρ ἄν. Ὁμοίως δ’ οὐδ’ εἰ ἕν τι μόνον εἴη τοιοῦτον, οὐδ’ ἐν ἐκείνῳ· οὐ γὰρ εἰ ἔσται σὰρξ ἢ ὀστοῦν ἢ τῶν ἄλλων ὁτιοῦν, οὔπω φατέον ἐνυπάρχειν δυνάμει, ἀλλὰ προσθεωρητέον τίς ὁ τρόπος τῆς γενέσεως.

Ἀναξαγόρας δ’ ἐναντίως Ἐμπεδοκλεῖ λέγει περὶ τῶν στοιχείων. Ὁ μὲν γὰρ πῦρ καὶ γῆν καὶ τὰ σύστοιχα τούτοις στοιχεῖά φησιν εἶναι τῶν σωμάτων καὶ συγκεῖσθαι πάντ’ ἐκ τούτων, Ἀναξαγόρας δὲ τοὐναντίον· τὰ γὰρ ὁμοιομερῆ στοιχεῖα (λέγω δ’ οἷον σάρκα καὶ ὀστοῦν καὶ τῶν τοι(302b.) ούτων ἕκαστον), ἀέρα δὲ καὶ πῦρ μίγματα τούτων καὶ τῶν ἄλλων σπερμάτων πάντων· εἶναι γὰρ ἑκάτερον αὐτῶν ἐξ ἀοράτων τῶν ὁμοιομερῶν πάντων ἠθροισμένον. Διὸ καὶ γίγνεσθαι πάντ’ ἐκ τούτων· τὸ γὰρ πῦρ καὶ τὸν αἰθέρα προσαγορεύει ταὐτό.

Ἐπεὶ δ’ ἐστὶ παντὸς φυσικοῦ σώματος κίνησις οἰκεία, τῶν δὲ κινήσεων αἱ μὲν ἁπλαῖ αἱ δὲ μικταί, καὶ αἱ μὲν μικταὶ τῶν μικτῶν, αἱ δὲ ἁπλαῖ τῶν ἁπλῶν εἰσι, φανερὸν ὅτι ἔσται ἄττα σώματα ἁπλᾶ. Εἰσὶ γὰρ καὶ κινήσεις ἁπλαῖ. Ὥστε δῆλον καὶ ὅτι ἐστὶ στοιχεῖα καὶ διὰ τί ἐστιν.

Κεφάλαιο 4

Πότερον δὲ πεπερασμένα ἢ ἄπειρα, καὶ εἰ πεπερασμένα, πόσα τὸν ἀριθμόν, ἑπόμενον ἂν εἴη σκοπεῖν.

Πρῶτον μὲν οὖν ὅτι οὐκ ἔστιν ἄπειρα, καθάπερ οἴονταί τινες, θεωρητέον, καὶ πρῶτον τοὺς πάντα τὰ ὁμοιομερῆ στοιχεῖα ποιοῦντας, καθάπερ καὶ Ἀναξαγόρας. Οὐθεὶς γὰρ τῶν οὕτως ἀξιούντων ὀρθῶς λαμβάνει τὸ στοιχεῖον· ὁρῶμεν γὰρ πολλὰ καὶ τῶν μικτῶν σωμάτων εἰς ὁμοιομερῆ διαιρούμενα, λέγω δ’ οἷον σάρκα καὶ ὀστοῦν καὶ ξύλον καὶ λίθον. Ὥστ’ εἴπερ τὸ σύνθετον οὐκ ἔστι στοιχεῖον, οὐχ ἅπαν ἔσται τὸ ὁμοιομερὲς στοιχεῖον, ἀλλὰ τὸ ἀδιαίρετον εἰς ἕτερα τῷ εἴδει, καθάπερ εἴρηται πρότερον.

Ἔτι δ’ οὐδ’ οὕτως λαμβάνοντας τὸ στοιχεῖον ἀνάγκη ποιεῖν ἄπειρα· πάντα γὰρ ταὐτὰ ἀποδοθήσεται καὶ πεπερασμένων ὄντων, ἐάν τις λάβῃ· τὸ αὐτὸ γὰρ ποιήσει, κἂν δύο ἢ τρία μόνον ᾖ τοιαῦτα, καθάπερ ἐγχειρεῖ καὶ Ἐμπεδοκλῆς. Ἐπεὶ γὰρ καὶ ὣς αὐτοῖς συμβαίνει μὴ πάντα ποιεῖν ἐξ ὁμοιομερῶν (πρόσωπον γὰρ οὐκ ἐκ προσώπων ποιοῦσιν, οὐδ’ ἄλλο τῶν κατὰ φύσιν ἐσχηματισμένων οὐθέν), φανερὸν ὅτι πολλῷ βέλτιον πεπερασμένας ποιεῖν τὰς ἀρχάς, καὶ ταύτας ὡς ἐλαχίστας πάντων γε τῶν αὐτῶν μελλόντων δείκνυσθαι, καθάπερ ἀξιοῦσι καὶ οἱ ἐν τοῖς μαθήμασιν· ἀεὶ γὰρ πεπερασμένας λαμβάνουσιν ἀρχὰς ἢ τῷ εἴδει ἢ τῷ ποσῷ.

Ἔτι εἰ σῶμα σώματος ἕτερον λέγεται κατὰ τὰς οἰκείας διαφοράς, αἱ δὲ τῶν σωμάτων διαφοραὶ πεπερασμέναι (δια(303a.) φέρουσι γὰρ τοῖς αἰσθητοῖς, ταῦτα δὲ πεπέρανται· δεῖ δὲ τοῦτο δειχθῆναι), φανερὸν ὅτι καὶ τὰ στοιχεῖα ἀνάγκη πεπερασμένα εἶναι.

Ἀλλὰ μὴν οὐδ’ ὡς ἕτεροί τινες λέγουσιν, οἷον Λεύκιππός τε καὶ Δημόκριτος ὁ Ἀβδηρίτης, εὔλογα τὰ συμβαίνοντα· φασὶ γὰρ εἶναι τὰ πρῶτα μεγέθη πλήθει μὲν ἄπειρα, μεγέθει δὲ ἀδιαίρετα, καὶ οὔτ’ ἐξ ἑνὸς πολλὰ γίγνεσθαι οὔτε ἐκ πολλῶν ἕν, ἀλλὰ τῇ τούτων συμπλοκῇ καὶ περιπαλάξει πάντα γεννᾶσθαι. Τρόπον γάρ τινα καὶ οὗτοι πάντα τὰ ὄντα ποιοῦσιν ἀριθμοὺς καὶ ἐξ ἀριθμῶν· καὶ γὰρ εἰ μὴ σαφῶς δηλοῦσιν, ὅμως τοῦτο βούλονται λέγειν. Καὶ πρὸς τούτοις, ἐπεὶ διαφέρει τὰ σώματα σχήμασιν, ἄπειρα δὲ τὰ σχήματα, ἄπειρα καὶ τὰ ἁπλᾶ σώματά φασιν εἶναι. Ποῖον δὲ καὶ τί ἑκάστου τὸ σχῆμα τῶν στοιχείων, οὐθὲν ἐπιδιώρισαν, ἀλλὰ μόνον τῷ πυρὶ τὴν σφαῖραν ἀπέδωκαν· ἀέρα δὲ καὶ ὕδωρ καὶ τἆλλα μεγέθει καὶ μικρότητι διεῖλον, ὡς οὖσαν αὐτῶν τὴν φύσιν οἷον πανσπερμίαν πάντων τῶν στοιχείων.

Πρῶτον μὲν οὖν ταὐτὸν καὶ τούτοις ἁμάρτημα τὸ μὴ πεπερασμένας λαβεῖν τὰς ἀρχάς, ἐξὸν ἅπαντα ταὐτὰ λέγειν. Ἔτι δ’ εἰ μὴ ἄπειροι τῶν σχημάτων αἱ διαφοραί, δῆλον ὅτι οὐκ ἔσται τὰ στοιχεῖα ἄπειρα.

Πρὸς δὲ τούτοις ἀνάγκη μάχεσθαι ταῖς μαθηματικαῖς ἐπιστήμαις ἄτομα σώματα λέγοντας, καὶ πολλὰ τῶν ἐνδόξων καὶ τῶν φαινομένων κατὰ τὴν αἴσθησιν ἀναιρεῖν, περὶ ὧν εἴρηται πρότερον ἐν τοῖς περὶ χρόνου καὶ κινήσεως. Ἅμα δὲ καὶ ἐναντία λέγειν αὐτοὺς αὑτοῖς ἀνάγκη· ἀδύνατον γὰρ ἀτόμων ὄντων τῶν στοιχείων μεγέθει καὶ μικρότητι διαφέρειν ἀέρα καὶ γῆν καὶ ὕδωρ· οὐ γὰρ οἷόν τ’ ἐξ ἀλλήλων γίγνεσθαι· ὑπολείψει γὰρ ἀεὶ τὰ μέγιστα σώματα ἐκκρινόμενα, φασὶ δ’ οὕτω γίγνεσθαι ὕδωρ καὶ ἀέρα καὶ γῆν ἐξ ἀλλήλων.

Ἔτι οὐδὲ κατὰ τὴν τούτων ὑπόληψιν δόξειεν ἂν ἄπειρα γίγνεσθαι τὰ στοιχεῖα, εἴπερ τὰ μὲν σώματα διαφέρει σχήμασι, τὰ δὲ σχήματα πάντα σύγκειται ἐκ πυραμίδων, τὰ μὲν εὐθύγραμμα ἐξ εὐθυ(303b.) γράμμων, ἡ δὲ σφαῖρα ἐξ ὀκτὼ μορίων. Ἀνάγκη γὰρ εἶναί τινας ἀρχὰς τῶν σχημάτων. Ὥστε εἴτε μία εἴτε δύο εἴτε πλείους, καὶ τὰ ἁπλᾶ σώματα τοσαῦτα ἔσται τὸ πλῆθος.

Ἔτι δ’ εἰ ἑκάστῳ μὲν τῶν στοιχείων ἐστί τις οἰκεία κίνησις, καὶ ἡ τοῦ ἁπλοῦ σώματος ἁπλῆ, μή εἰσι δ’ αἱ ἁπλαῖ κινήσεις ἄπειροι διὰ τὸ μήτε τὰς ἁπλᾶς φορὰς πλείους εἶναι δυοῖν μήτε τοὺς τόπους ἀπείρους, οὐκ ἂν εἴη οὐδ’ οὕτως ἄπειρα τὰ στοιχεῖα.

Κεφάλαιο 5

Ἐπεὶ δ’ ἀνάγκη πεπεράνθαι τὰ στοιχεῖα, λοιπὸν σκέψασθαι πότερον πλείω ἔσται ἢ ἕν. Ἔνιοι γὰρ ἓν μόνον ὑποτίθενται, καὶ τοῦτο οἱ μὲν ὕδωρ, οἱ δ’ ἀέρα, οἱ δὲ πῦρ, οἱ δ’ ὕδατος μὲν λεπτότερον, ἀέρος δὲ πυκνότερον, ὃ περιέχειν φασὶ πάντας τοὺς οὐρανοὺς ἄπειρον ὄν.

Ὅσοι μὲν οὖν τὸ ἓν τοῦτο ποιοῦσιν ὕδωρ ἢ ἀέρα ἢ ὕδατος μὲν λεπτότερον, ἀέρος δὲ πυκνότερον, εἶτ’ ἐκ τούτου μανότητι καὶ πυκνότητι τἆλλα γεννῶσιν, οὗτοι λανθάνουσιν αὐτοὶ αὑτοὺς ἄλλο τι πρότερον τοῦ στοιχείου ποιοῦντες· ἔστι γὰρ ἡ μὲν ἐκ τῶν στοιχείων γένεσις σύνθεσις, ὥς φασιν, ἡ δ’ εἰς τὰ στοιχεῖα διάλυσις, ὥστ’ ἀνάγκη πρότερον εἶναι τῇ φύσει τὸ λεπτομερέστερον. Ἐπεὶ οὖν φασὶ πάντων τῶν σωμάτων τὸ πῦρ λεπτότατον εἶναι, πρῶτον ἂν εἴη τῇ φύσει τὸ πῦρ· διαφέρει δ’ οὐθέν, ἀνάγκη γὰρ ἕν τι τῶν ἄλλων εἶναι πρῶτον, καὶ μὴ τὸ μέσον. Ἔτι δὲ τὸ μὲν πυκνότητι καὶ μανότητι τἆλλα γεννᾶν οὐθὲν διαφέρει ἢ λεπτότητι καὶ παχύτητι· τὸ μὲν γὰρ λεπτὸν μανόν, τὸ δὲ παχὺ βούλονται εἶναι πυκνόν. Πάλιν δὲ τὸ λεπτότητι καὶ παχύτητι ταὐτὸν καὶ τὸ μεγέθει καὶ μικρότητι· λεπτὸν μὲν γὰρ τὸ μικρομερές, παχὺ δὲ τὸ μεγαλομερές· τὸ γὰρ ἐπεκτεινόμενον ἐπὶ πολὺ λεπτόν, τοιοῦτον δὲ τὸ ἐκ μικρῶν μερῶν συνεστός, ὥστ’ αὐτοῖς συμβαίνει μεγέθει καὶ μικρότητι διαιρεῖν τὴν τῶν ἄλλων οὐσίαν. Οὕτω δὲ διοριζομένοις ἅπαντα συμβήσεται λέγειν πρός τι, καὶ οὐκ ἔσται ἁπλῶς τὸ μὲν πῦρ τὸ δ’ ὕδωρ τὸ δ’ ἀήρ, ἀλλὰ τὸ αὐτὸ πρὸς μὲν τόδε (304a.) πῦρ, πρὸς δέ τι ἄλλο ἀήρ, ὅπερ συμβαίνει καὶ τοῖς πλείω μὲν τὰ στοιχεῖα λέγουσι, μεγέθει δὲ καὶ μικρότητι διαφέρειν φάσκουσιν· ἐπεὶ γὰρ τῷ ποσῷ διώρισται ἕκαστον, ἔσται τις λόγος πρὸς ἄλληλα τῶν μεγεθῶν, ὥστε τὰ τοῦτον ἔχοντα τὸν λόγον πρὸς ἄλληλα ἀνάγκη τὸ μὲν ἀέρα εἶναι τὸ δὲ πῦρ τὸ δὲ γῆν τὸ δ’ ὕδωρ, διὰ τὸ ἐνυπάρχειν ἐν τοῖς μείζοσι τοὺς τῶν ἐλαττόνων λόγους.

Ὅσοι δὲ πῦρ ὑποτίθενται τὸ στοιχεῖον, τοῦτο μὲν διαφεύγουσιν, ἄλλα δ’ αὐτοῖς ἀναγκαῖον ἄλογα συμβαίνειν. Οἱ μὲν γὰρ αὐτῶν σχῆμα περιάπτουσι τῷ πυρί, καθάπερ οἱ τὴν πυραμίδα ποιοῦντες, καὶ τούτων οἱ μὲν ἁπλουστέρως λέγοντες ὅτι τῶν μὲν σχημάτων τμητικώτατον ἡ πυραμίς, τῶν δὲ σωμάτων τὸ πῦρ, οἱ δὲ κομψοτέρως τῷ λόγῳ προσάγοντες ὅτι τὰ μὲν σώματα πάντα σύγκειται ἐκ τοῦ λεπτομερεστάτου, τὰ δὲ σχήματα τὰ στερεὰ ἐκ πυραμίδων, ὥστ’ ἐπεὶ τῶν μὲν σωμάτων τὸ πῦρ λεπτότατον, τῶν δὲ σχημάτων ἡ πυραμὶς μικρομερέστατον καὶ πρῶτον, τὸ δὲ πρῶτον σχῆμα τοῦ πρώτου σώματος, πυραμὶς ἂν εἴη τὸ πῦρ.

Οἱ δὲ περὶ μὲν σχήματος οὐδὲν ἀποφαίνονται, λεπτομερέστατον δὲ μόνον ποιοῦσιν, ἔπειτ’ ἐκ τούτου συντιθεμένου φασὶ γίγνεσθαι τἆλλα καθάπερ ἂν εἰ συμφυσωμένου ψήγματος.

Ἀμφοτέροις δὲ ταὐτὰ συμβαίνει δυσχερῆ· εἰ μὲν γὰρ ἄτομον τὸ πρῶτον σῶμα ποιοῦσι, πάλιν ἥξουσιν οἱ πρότερον εἰρημένοι λόγοι πρὸς ταύτην τὴν ὑπόθεσιν.

Ἔτι οὐκ ἐνδέχεται τοῦτο λέγειν φυσικῶς βουλομένοις θεωρεῖν. Εἰ γὰρ ἅπαν σῶμα σώματι συμβλητὸν κατὰ τὸ ποσόν, ἔχει δ’ ἀνάλογον τὰ μεγέθη τά τε τῶν ὁμοιομερῶν πρὸς ἄλληλα καὶ τὰ τῶν στοιχείων (οἷον τὰ τοῦ παντὸς ὕδατος πρὸς τὸν ἅπαντα ἀέρα καὶ τοῦ στοιχείου πρὸς τὸ στοιχεῖον, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων), ὁ δ’ ἀὴρ πλείων τοῦ ὕδατος καὶ ὅλως τὸ λεπτομερέστερον τοῦ παχυμερεστέρου, φανερὸν ὅτι καὶ τὸ στοιχεῖον ἔλαττον ἔσται τὸ τοῦ ὕδατος ἢ τὸ τοῦ ἀέρος. Εἰ οὖν τὸ ἔλαττον μέγεθος ἐνυπάρχει τῷ μείζονι, διαιρετὸν ἂν εἴη τὸ τοῦ ἀέρος (304b.) στοιχεῖον. Ὡσαύτως δὲ καὶ τὸ τοῦ πυρὸς καὶ ὅλως τῶν λεπτομερεστέρων.

Εἰ δὲ διαιρετόν, τοῖς μὲν σχηματίζουσι τὸ πῦρ συμβήσεται μὴ εἶναι τὸ τοῦ πυρὸς μέρος πῦρ διὰ τὸ μὴ συγκεῖσθαι τὴν πυραμίδα ἐκ πυραμίδων, ἔτι δὲ μὴ πᾶν σῶμα εἶναι ἢ στοιχεῖον ἢ ἐκ στοιχείων (τὸ γὰρ μέρος τοῦ πυρὸς οὔτε πῦρ οὔθ’ ἕτερον στοιχεῖον οὐδέν)· τοῖς δὲ τῷ μεγέθει διορίζουσι πρότερόν τι τοῦ στοιχείου στοιχεῖον εἶναι, καὶ τοῦτ’ εἰς ἄπειρον βαδίζειν, εἴπερ ἅπαν σῶμα διαιρετὸν καὶ τὸ μικρομερέστατον στοιχεῖον. Ἔτι δὲ καὶ τούτοις συμβαίνει λέγειν ὡς ταὐτὸν πρὸς μὲν τόδε πῦρ ἐστι, πρὸς ἄλλο δ’ ἀήρ, καὶ πάλιν ὕδωρ καὶ γῆ.

Κοινὸν δὲ πᾶσιν ἁμάρτημα τοῖς ἓν τὸ στοιχεῖον ὑποτιθεμένοις τὸ μίαν μόνην κίνησιν ποιεῖν φυσικήν, καὶ πάντων τὴν αὐτήν. Ὁρῶμεν γὰρ πᾶν τὸ φυσικὸν σῶμα κινήσεως ἔχον ἀρχήν. Εἰ οὖν ἅπαντα τὰ σώματα ἕν τί ἐστι, πάντων ἂν εἴη μία κίνησις· καὶ ταύτην ἀναγκαῖον ὥσῳπερ ἂν πλείω γίγνηται, κινεῖσθαι μᾶλλον, ὥσπερ καὶ τὸ πῦρ ὅσῳ ἂν πλεῖον γίγνηται, φέρεται θᾶττον ἄνω τὴν αὑτοῦ φοράν. Συμβαίνει δὲ πολλὰ κάτω φέρεσθαι θᾶττον.

Ὥστε διά τε ταῦτα καὶ πρὸς τούτοις ἐπεὶ διώρισται πρότερον ὅτι πλείους αἱ φυσικαὶ κινήσεις, δῆλον ὅτι ἀδύνατον ἓν εἶναι τὸ στοιχεῖον. Ἐπειδὴ δὲ οὔτε ἄπειρα οὔτε ἕν, ἀνάγκη πλείω εἶναι καὶ πεπερασμένα.

Κεφάλαιο 6

Ἐπισκεπτέον δὲ πρῶτον πότερον ἀΐδιά ἐστιν ἢ γινόμενα φθείρεται· τούτου γὰρ δειχθέντος φανερὸν ἔσται καὶ πόσ’ ἄττα καὶ ποῖά ἐστιν. Ἀΐδια μὲν οὖν εἶναι ἀδύνατον· ὁρῶμεν γὰρ καὶ πῦρ καὶ ὕδωρ καὶ ἕκαστον τῶν ἁπλῶν σωμάτων διαλυόμενον. Ἀνάγκη δὲ ἢ ἄπειρον εἶναι ἢ ἵστασθαι τὴν διάλυσιν. Εἰ μὲν οὖν ἄπειρος, ἔσται καὶ ὁ χρόνος ὁ τῆς διαλύσεως ἄπειρος, καὶ πάλιν ὁ τῆς συνθέσεως· ἕκαστον γὰρ ἐν ἄλλῳ χρόνῳ διαλύεται καὶ συντίθεται τῶν μορίων. Ὥστε συμβήσεται ἔξω τοῦ ἀπείρου χρόνου ἄλλον εἶναι ἄπειρον, ὅταν ὅ τε τῆς συνθέσεως ἄπειρος ᾖ καὶ ἔτι πρότερος τούτου ὁ τῆς διαλύσεως. Ὥστε τοῦ ἀπείρου ἔξω γίγνεται ἄπειρον· (305a.) ὅπερ ἀδύνατον.

Εἰ δὲ στήσεταί που ἡ διάλυσις, ἤτοι ἄτομον ἔσται τὸ σῶμα ἐν ᾧ ἵσταται, ἢ διαιρετὸν μὲν οὐ μέντοι διαιρεθησόμενον οὐδέποτε, καθάπερ ἔοικεν Ἐμπεδοκλῆς βούλεσθαι λέγειν.

Ἄτομον μὲν οὖν οὐκ ἔσται διὰ τοὺς πρότερον εἰρημένους λόγους· ἀλλὰ μὴν οὐδὲ διαιρετὸν μὲν οὐδέποτε δὲ διαλυθησόμενον. Τὸ γὰρ ἔλαττον σῶμα τοῦ μείζονος εὐφθαρτότερόν ἐστιν. Εἴπερ οὖν καὶ τὸ πολὺ φθείρεται κατὰ ταύτην τὴν φθοράν, ὥστε διαλύεσθαι εἰς ἐλάττω, ἔτι μᾶλλον τοῦτο πάσχειν εὔλογον τὸ ἔλαττον. Δύο δὲ τρόπους ὁρῶμεν φθειρόμενον τὸ πῦρ· ὑπό τε γὰρ τοῦ ἐναντίου φθείρεται σβεννύμενον, καὶ αὐτὸ ὑφ’ αὑτοῦ μαραινόμενον. Τοῦτο δὲ πάσχει τὸ ἔλαττον ὑπὸ τοῦ πλείονος, καὶ θᾶττον, ὅσῳ ἂν ᾖ ἔλαττον. Ὥστ’ ἀνάγκη φθαρτὰ καὶ γενητὰ εἶναι τὰ στοιχεῖα τῶν σωμάτων.

Ἐπεὶ δ’ ἐστὶ γενητά, ἤτοι ἐξ ἀσωμάτου ἢ ἐκ σώματος ἔσται ἡ γένεσις, καὶ εἰ ἐκ σώματος, ἤτοι ἐξ ἄλλου ἢ ἐξ ἀλλήλων.

Ὁ μὲν οὖν ἐξ ἀσωμάτου γεννῶν λόγος ποιεῖ κεχωρισμένον κενόν. Πᾶν γὰρ τὸ γινόμενον <ἔν τινι γίγνεται καὶ> ἤτοι ἀσώματον ἔσται ἐν ᾧ ἡ γένεσις, ἢ ἕξει σῶμα· καὶ εἰ μὲν ἕξει σῶμα, δύο ἅμα ἔσται σώματα ἐν τῷ αὐτῷ, τό τε γιγνόμενον καὶ τὸ προϋπάρχον· εἰ δ’ ἀσώματον, ἀνάγκη κενὸν εἶναι ἀφωρισμένον· τοῦτο δ’ ὅτι ἀδύνατον, δέδεικται πρότερον.

Ἀλλὰ μὴν οὐδ’ ἐκ σώματός τινος ἐγχωρεῖ γίνεσθαι τὰ στοιχεῖα· συμβήσεται γὰρ ἄλλο σῶμα πρότερον εἶναι τῶν στοιχείων. Τοῦτο δ’ εἰ μὲν ἕξει βάρος ἢ κουφότητα, τῶν στοιχείων ἔσται τι, μηδεμίαν δ’ ἔχον ῥοπὴν ἀκίνητον ἔσται καὶ μαθηματικόν· τοιοῦτον δὲ ὂν οὐκ ἔσται ἐν τόπῳ. Ἐν ᾧ γὰρ ἠρεμεῖ, ἐν τούτῳ καὶ κινεῖσθαι δυνατόν. Καὶ εἰ μὲν βίᾳ, παρὰ φύσιν, εἰ δὲ μὴ βίᾳ, κατὰ φύσιν. Εἰ μὲν οὖν ἔσται ἐν τόπῳ καί που, ἔσται τι τῶν στοιχείων· εἰ δὲ μὴ ἐν τόπῳ, οὐδὲν ἐξ αὐτοῦ ἔσται· τὸ γὰρ γινόμενον, καὶ ἐξ οὗ γίγνεται, ἀνάγκη ἅμα εἶναι. Ἐπεὶ δ’ οὔτε ἐξ ἀσωμάτου γίγνεσθαι δυνατὸν οὔτ’ ἐξ ἄλλου σώματος, λείπεται ἐξ ἀλλήλων γίγνεσθαι.

Κεφάλαιο 7

Πάλιν οὖν ἐπισκεπτέον τίς ὁ τρόπος τῆς ἐξ ἀλλήλων γενέσεως, πότερον ὡς Ἐμπεδοκλῆς λέγει καὶ Δημόκριτος, ἢ ὡς οἱ εἰς τὰ ἐπίπεδα διαλύοντες, ἢ ἔστιν ἄλλος τις τρόπος (305b.) παρὰ τούτους.

Οἱ μὲν οὖν περὶ Ἐμπεδοκλέα καὶ Δημόκριτον λανθάνουσιν αὑτοὶ αὑτοὺς οὐ γένεσιν ἐξ ἀλλήλων ποιοῦντες, ἀλλὰ φαινομένην γένεσιν· ἐνυπάρχον γὰρ ἕκαστον ἐκκρίνεσθαί φασιν, ὥσπερ ἐξ ἀγγείου τῆς γενέσεως οὔσης, ἀλλ’ οὐκ ἔκ τινος ὕλης, οὐδὲ γίγνεσθαι μεταβάλλοντος.

Ἔπειτα κἂν οὕτως οὐδὲν ἧττον ἄλογα τὰ συμβαίνοντα. Τὸ γὰρ αὐτὸ μέγεθος οὐ δοκεῖ συμπιληθὲν γίνεσθαι βαρύτερον. Ἀνάγκη δὲ τοῦτο λέγειν τοῖς φάσκουσιν ἐκκρίνεσθαι τὸ ὕδωρ ἐκ τοῦ ἀέρος ἐνυπάρχον· ὅταν γὰρ ὕδωρ ἐξ ἀέρος γένηται, βαρύτερόν ἐστιν.

Ἔτι δὲ τῶν μεμιγμένων σωμάτων οὐκ ἀνάγκη χωρισθὲν θάτερον ἀεὶ πλείω τόπον ἐπέχειν· ὅταν δ’ ἐξ ὕδατος ἀὴρ γένηται, πλείω καταλαμβάνει τόπον· τὸ γὰρ λεπτομερέστερον ἐν πλείονι τόπῳ γίγνεται. Φανερὸν δὲ τοῦτό γε καὶ ἐν τῇ μεταβάσει· διατμιζομένου γὰρ καὶ πνευματουμένου τοῦ ὑγροῦ ῥήγνυται τὰ περιέχοντα τοὺς ὄγκους ἀγγεῖα διὰ τὴν στενοχωρίαν. Ὥστ’ εἰ μὲν ὅλως μή ἐστι κενὸν μηδ’ ἐπεκτείνεται τὰ σώματα, καθάπερ φασὶν οἱ ταῦτα λέγοντες, φανερὸν τὸ ἀδύνατον· εἰ δ’ ἔστι κενὸν καὶ ἐπέκτασις, ἄλογον τὸ ἐξ ἀνάγκης ἀεὶ πλείω τόπον ἐπιλαμβάνειν τὸ χωριζόμενον.

Ἀνάγκη δὲ καὶ ὑπολείπειν τὴν ἐξ ἀλλήλων γένεσιν, εἴπερ ἐν τῷ πεπερασμένῳ μεγέθει μὴ ἐνυπάρχει ἄπειρα πεπερασμένα. Ὅταν γὰρ ἐκ γῆς ὕδωρ γένηται, ἀφῄρηταί τι τῆς γῆς, εἴπερ ἐκκρίσει ἡ γένεσις· καὶ πάλιν ὅταν ἐκ τῆς ὑπολειπομένης, ὡσαύτως. Εἰ μὲν οὖν ἀεὶ τοῦτ’ ἔσται, συμβήσεται ἐν τῷ πεπερασμένῳ ἄπειρα ἐνυπάρχειν· ἐπεὶ δὲ τοῦτ’ ἀδύνατον, οὐκ ἂν ἀεὶ γίγνοιτο ἐξ ἀλλήλων. Ὅτι μὲν οὖν οὐκ ἔστι τῇ ἐκκρίσει ἡ εἰς ἄλληλα μετάβασις, εἴρηται.

Λείπεται δ’ εἰς ἄλληλα μεταβάλλοντα γίγνεσθαι. Τοῦτο δὲ διχῶς· ἢ γὰρ τῇ μετασχηματίσει, καθάπερ ἐκ τοῦ αὐτοῦ κηροῦ γίγνοιτ’ ἂν σφαῖρα καὶ κύβος, ἢ τῇ διαλύσει τῇ εἰς τὰ ἐπίπεδα, ὥσπερ ἔνιοί φασιν.

Εἰ μὲν οὖν τῇ μετασχηματίσει γίνεται, συμβαίνει ἐξ ἀνάγκης ἄτομα λέγειν τὰ σώματα· διαιρετῶν γὰρ ὄντων οὐκ ἔσται τὸ τοῦ πυρὸς μέρος πῦρ, οὐδὲ τὸ τῆς γῆς γῆ, διὰ τὸ μὴ εἶναι μήτε τὸ τῆς πυραμίδος μέρος πάντως πυραμίδα μήτε τὸ τοῦ κύβου (306a.) κύβον.

Εἰ δὲ τῇ τῶν ἐπιπέδων διαλύσει, πρῶτον μὲν ἄτοπον τὸ μὴ πάντα γεννᾶν ἐξ ἀλλήλων, ὅπερ ἀνάγκη λέγειν αὐτοῖς, καὶ λέγουσιν. Οὔτε γὰρ εὔλογον ἓν μόνον ἄμοιρον γενέσθαι τῆς μεταβάσεως, οὔτε φαίνεται κατὰ τὴν αἴσθησιν, ἀλλ’ ὁμοίως πάντα μεταβάλλειν εἰς ἄλληλα. Συμβαίνει δὲ περὶ τῶν φαινομένων λέγουσι μὴ ὁμολογούμενα λέγειν τοῖς φαινομένοις. Τούτου δ’ αἴτιον τὸ μὴ καλῶς λαβεῖν τὰς πρώτας ἀρχάς, ἀλλὰ πάντα βούλεσθαι πρός τινας δόξας ὡρισμένας ἀνάγειν. Δεῖ γὰρ ἴσως τῶν μὲν αἰσθητῶν αἰσθητάς, τῶν δὲ ἀϊδίων ἀϊδίους, τῶν δὲ φθαρτῶν φθαρτὰς εἶναι τὰς ἀρχάς, ὅλως δ’ ὁμογενεῖς τοῖς ὑποκειμένοις. Οἱ δὲ διὰ τὴν τούτων φιλίαν ταὐτὸ ποιεῖν ἐοίκασι τοῖς τὰς θέσεις ἐν τοῖς λόγοις διαφυλάττουσιν· ἅπαν γὰρ ὑπομένουσι τὸ συμβαῖνον ὡς ἀληθεῖς ἔχοντες ἀρχάς, ὥσπερ οὐκ ἐνίας δέον κρίνειν ἐκ τῶν ἀποβαινόντων, καὶ μάλιστα ἐκ τοῦ τέλους.

Τέλος δὲ τῆς μὲν ποιητικῆς ἐπιστήμης τὸ ἔργον, τῆς δὲ φυσικῆς τὸ φαινόμενον ἀεὶ κυρίως κατὰ τὴν αἴσθησιν. Συμβαίνει δ’ αὐτοῖς μάλιστα τὴν γῆν εἶναι στοιχεῖον, καὶ μόνην ἄφθαρτον, εἴπερ τὸ ἀδιάλυτον ἄφθαρτόν τ’ ἐστὶ καὶ στοιχεῖον· ἡ γὰρ γῆ μόνη ἀδιάλυτος εἰς ἄλλο σῶμα.

Ἀλλὰ μὴν οὐδ’ ἐν τοῖς διαλυομένοις ἡ τῶν τριγώνων παραιώρησις εὔλογος. Συμβαίνει δὲ καὶ τοῦτο ἐν τῇ εἰς ἄλληλα μεταβάσει διὰ τὸ ἐξ ἀνίσων τῷ πλήθει συνεστάναι τριγώνων.

Ἔτι δ’ ἀνάγκη τοῖς ταῦτα λέγουσιν οὐκ ἐκ σώματος ποιεῖν γένεσιν· ὅταν γὰρ ἐξ ἐπιπέδων γένηται, οὐκ ἐκ σώματος ἔσται γεγονός.

Πρὸς δὲ τούτοις ἀνάγκη μὴ πᾶν σῶμα λέγειν διαιρετόν, ἀλλὰ μάχεσθαι ταῖς ἀκριβεστάταις ἐπιστήμαις· αἱ μὲν γὰρ καὶ τὸ νοητὸν λαμβάνουσι διαιρετόν, αἱ μαθηματικαί, οἱ δὲ οὐδὲ τὸ αἰσθητὸν ἅπαν συγχωροῦσι διὰ τὸ βούλεσθαι σῴζειν τὴν ὑπόθεσιν. Ἀνάγκη γὰρ ὅσοι σχῆμα ποιοῦσιν ἑκάστου τῶν στοιχείων καὶ τούτῳ διορίζουσι τὰς οὐσίας αὐτῶν, ἀδιαίρετα ποιεῖν αὐτά· τῆς γὰρ πυραμίδος ἢ τῆς σφαίρας διαιρεθείσης πως οὐκ ἔσται τὸ λειπόμενον σφαῖρα ἢ πυραμίς.

Ὥστε ἢ τὸ τοῦ πυρὸς μέρος οὐ πῦρ, ἀλλ’ ἔσται τι πρότερον τοῦ (306b.) στοιχείου, διὰ τὸ πᾶν εἶναι ἢ στοιχεῖον ἢ ἐκστοιχείων· ἢ οὐχ ἅπαν σῶμα διαιρετόν.

Κεφάλαιο 8

Ὅλως δὲ τὸ πειρᾶσθαι τὰ ἁπλᾶ σώματα σχηματίζειν ἄλογόν ἐστι, πρῶτον μὲν ὅτι συμβήσεται μὴ ἀναπληροῦσθαι τὸ ὅλον· ἐν μὲν γὰρ τοῖς ἐπιπέδοις τρία σχήματα δοκεῖ συμπληροῦν τὸν τόπον, τρίγωνον καὶ τετράγωνον καὶ ἑξάγωνον, ἐν δὲ τοῖς στερεοῖς δύο μόνον, πυραμὶς καὶ κύβος· ἀνάγκη δὲ πλείω τούτων λαμβάνειν διὰ τὸ πλείω τὰ στοιχεῖα ποιεῖν.

Ἔπειτα φαίνεται πάντα μὲν τὰ ἁπλᾶ σώματα σχηματιζόμενα τῷ περιέχοντι τόπῳ, μάλιστα δὲ τὸ ὕδωρ καὶ ὁ ἀήρ. Διαμένειν μὲν οὖν τὸ τοῦ στοιχείου σχῆμα ἀδύνατον· οὐ γὰρ ἂν ἥπτετο πανταχῇ τοῦ περιέχοντος τὸ ὅλον. Ἀλλὰ μὴν εἰ μεταρρυθμισθήσεται, οὐκέτι ἔσται ὕδωρ, εἴπερ τῷ σχήματι διέφερεν. Ὥστε φανερὸν ὅτι οὐκ ἔστιν ὡρισμένα τὰ σχήματα αὐτῶν.

Ἀλλ’ ἔοικεν ἡ φύσις αὐτὴ τοῦτο σημαίνειν ἡμῖν, ὃ καὶ κατὰ λόγον ἐστίν· ὥσπερ γὰρ ἐν τοῖς ἄλλοις ἀειδὲς καὶ ἄμορφον δεῖ τὸ ὑποκείμενον εἶναι (μάλιστα γὰρ ἂν οὕτω δύναιτο ῥυθμίζεσθαι, καθάπερ ἐν τῷ Τιμαίῳ γέγραπται, τὸ πανδεχές), οὕτω καὶ τὰ στοιχεῖα δεῖ νομίζειν ὥσπερ ὕλην εἶναι τοῖς συνθέτοις· διὸ καὶ δύναται μεταβάλλειν εἰς ἄλληλα χωριζομένων τῶν κατὰ τὰ πάθη διαφορῶν.

Πρὸς δὲ τούτοις πῶς ἐνδέχεται γίγνεσθαι σάρκα καὶ ὀστοῦν ἢ ὁτιοῦν τῶν συνεχῶν σωμάτων; οὔτε γὰρ ἐξ αὐτῶν τῶν στοιχείων ἐγχωρεῖ διὰ τὸ μὴ γίγνεσθαι συνεχὲς ἐκ τῆς συνθέσεως, οὔτ’ ἐκ τῶν ἐπιπέδων συντιθεμένων· τὰ γὰρ στοιχεῖα γεννᾶται τῇ συνθέσει καὶ οὐ τὰ ἐκ τῶν στοιχείων. Ὥστ’ ἐάν τις ἀκριβολογεῖσθαι βούληται καὶ μὴ ἐκ παρόδου τοὺς λόγους ἀποδέχεσθαι τοὺς τοιούτους, ἀναιροῦντας ὄψεται τὴν γένεσιν ἐκ τῶν ὄντων.

Ἀλλὰ μὴν καὶ πρὸς τὰ πάθη τε καὶ τὰς δυνάμεις καὶ τὰς κινήσεις ἀσύμφωνα τὰ σχήματα τοῖς σώμασιν, εἰς ἃ μάλιστα βλέψαντες οὕτω διένειμαν. Οἷον ἐπεὶ τὸ πῦρ εὐκίνητόν ἐστι καὶ θερμαντικὸν καὶ καυστικόν, οἱ μὲν ἐποίησαν αὐτὸ σφαῖραν, οἱ δὲ πυραμίδα· ταῦτα γὰρ εὐκινητότατα μὲν διὰ τὸ ἐλαχίστων ἅπτεσθαι καὶ ἥκι(307a.) στα βεβηκέναι, θερμαντικώτατα δὲ καὶ καυστικώτατα, διότι τὸ μὲν ὅλον ἐστὶ γωνία, τὸ δὲ ὀξυγωνιώτατον, καίει δὲ καὶ θερμαίνει ταῖς γωνίαις, ὥς φασιν.

Πρῶτον μὲν οὖν κατὰ τὴν κίνησιν ἀμφότεροι διημαρτήκασιν· εἰ γὰρ καὶ ἔστιν εὐκινητότατα ταῦτα τῶν σχημάτων, ἀλλ’ οὐ τὴν τοῦ πυρὸς κίνησιν εὐκίνητα· ἡ μὲν γὰρ τοῦ πυρὸς ἄνω καὶ κατ’ εὐθεῖαν, ταῦτα δ’ εὐκίνητα κύκλῳ, τὴν καλουμένην κύλισιν. Ἔπειτ’ εἰ ἔστιν ἡ γῆ κύβος διὰ τὸ

βεβηκέναι καὶ μένειν, μένει δ’ οὐχ οὗ ἔτυχεν ἀλλ’ ἐν τῷ αὑτῆς τόπῳ, ἐκ δὲ τοῦ ἀλλοτρίου φέρεται μὴ κωλυομένη, καὶ τὸ πῦρ δὲ καὶ τὰ ἄλλα ὡσαύτως, δῆλον ὅτι καὶ τὸ πῦρ καὶ ἕκαστον τῶν στοιχείων ἐν μὲν τῷ ἀλλοτρίῳ τόπῳ σφαῖρα ἔσται ἢ πυραμίς, ἐν δὲ τῷ οἰκείῳ κύβος. Ἔτι δ’ εἰ θερμαίνει καὶ καίει τὸ πῦρ διὰ τὰς γωνίας, ἅπαντα ἔσται τὰ στοιχεῖα θερμαντικά, μᾶλλον δ’ ἴσως ἕτερον ἑτέρου· πάντα γὰρ ἔχει γωνίας, οἷον τό τε ὀκτάεδρον καὶ τὸ δωδεκάεδρον. (Δημοκρίτῳ δὲ καὶ ἡ σφαῖρα, ὡς γωνία τις οὖσα, τέμνει ὡς εὐκίνητον).

Ὥστε διοίσει τῷ μᾶλλον καὶ ἧττον. Τοῦτο δ’ ὅτι ψεῦδος, φανερόν. Ἅμα δὲ συμβήσεται καὶ τὰ μαθηματικὰ σώματα καίειν καὶ θερμαίνειν· ἔχει γὰρ κἀκεῖνα γωνίας, καὶ ἔνεισιν ἐν αὐτοῖς ἄτομοι καὶ σφαῖραι καὶ πυραμίδες, ἄλλως τε καὶ εἰ ἔστιν ἄτομα μεγέθη, καθάπερ φασίν. Εἰ γὰρ τὰ μὲν τὰ δὲ μή, λεκτέον τὴν διαφοράν, ἀλλ’ οὐχ ἁπλῶς οὕτω λεκτέον ὡς λέγουσιν.

Ἔτι εἰ τὸ καιόμενον πυροῦται, τὸ δὲ πῦρ ἐστι σφαῖρα ἢ πυραμίς, ἀνάγκη τὸ καιόμενον γίγνεσθαι σφαίρας ἢ πυραμίδας. Τὸ μὲν οὖν τέμνειν καὶ διαιρεῖν ἔστω κατὰ λόγον συμβαῖνον τῷ σχήματι· τὸ δ’ ἐξ ἀνάγκης τὴν πυραμίδα ποιεῖν πυραμίδας ἢ τὴν σφαῖραν σφαίρας παντελῶς ἄλογον, καὶ ὅμοιον ὥσπερ εἴ τις ἀξιοίη τὴν μάχαιραν εἰς μαχαίρας διαιρεῖν ἢ τὸν πρίονα εἰς πρίονας.

Ἔτι δὲ γελοῖον πρὸς τὸ διαιρεῖν μόνον ἀποδοῦναι τὸ σχῆμα τῷ πυρί· δοκεῖ γὰρ μᾶλλον συγκρίνειν καὶ συνορίζειν ἢ διακρίνειν. Διακρίνει μὲν γὰρ τὰ μὴ (307b.) ὁμόφυλα, συγκρίνει δὲ τὰ ὁμόφυλα· καὶ ἡ μὲν σύγκρισις καθ’ αὑτό ἐστι (τὸ γὰρ συνορίζειν καὶ ἑνοῦν τοῦ πυρός), ἡ δὲ διάκρισις κατὰ συμβεβηκός (συγκρῖνον γὰρ τὸ ὁμόφυλον ἐξαιρεῖ τὸ ἀλλότριον). Ὥστ’ ἢ πρὸς ἄμφω ἐχρῆν ἀποδοῦναι ἢ μᾶλλον ἐπὶ τὸ συγκρίνειν.

Πρὸς δὲ τούτοις, ἐπεὶ τὸ θερμὸν καὶ τὸ ψυχρὸν ἐναντία τῇ δυνάμει, ἀδύνατον ἀποδοῦναι τῷ ψυχρῷ σχῆμά τι· δεῖ γὰρ ἐναντίον εἶναι τὸ ἀποδιδόμενον, οὐθὲν δ’ ἐναντίον ἐστὶ σχῆμα σχήματι. Διὸ καὶ πάντες ἀπολελοίπασι τοῦτο· καίτοι προσῆκεν ἢ πάντα ἀφορίσαι σχήμασιν ἢ μηδέν. Ἔνιοι δὲ περὶ τῆς δυνάμεως αὐτοῦ πειραθέντες εἰπεῖν ἐναντία λέγουσιν αὐτοὶ αὑτοῖς.

Φασὶ γὰρ εἶναι ψυχρὸν τὸ μεγαλομερὲς διὰ τὸ συνθλίβειν καὶ μὴ διιέναι διὰ τῶν πόρων. Δῆλον τοίνυν ὅτι καὶ τὸ θερμὸν ἂν εἴη τὸ διιόν· τοιοῦτον δ’ ἀεὶ τὸ λεπτομερές. Ὥστε συμβαίνει μικρότητι καὶ μεγέθει διαφέρειν τὸ θερμὸν καὶ τὸ ψυχρόν, ἀλλ’ οὐ τοῖς σχήμασιν. Ἔτι δ’ εἰ ἄνισοι αἱ πυραμίδες, αἱ μεγάλαι ἂν εἶεν οὐ πῦρ οὐδ’ αἴτιον τὸ σχῆμα τοῦ καίειν, ἀλλὰ τοὐναντίον.

Ὅτι μὲν οὖν οὐ τοῖς σχήμασι διαφέρει τὰ στοιχεῖα, φανερὸν ἐκ τῶν εἰρημένων· ἐπεὶ δὲ κυριώταται διαφοραὶ τῶν σωμάτων αἵ τε κατὰ τὰ πάθη καὶ τὰ ἔργα καὶ τὰς δυνάμεις (ἑκάστου γὰρ εἶναί φαμεν τῶν φύσει καὶ ἔργα καὶ πάθη καὶ δυνάμεις), πρῶτον ἂν εἴη περὶ τούτων λεκτέον, ὅπως θεωρήσαντες ταῦτα λάβωμεν τὰς ἑκάστου πρὸς ἕκαστον διαφοράς.

Βιβλίο 4

Κεφάλαιο 1

Περὶ δὲ βαρέος καὶ κούφου, τί τ’ ἐστὶν ἑκάτερον καὶ τίς ἡ φύσις αὐτῶν, σκεπτέον, καὶ διὰ τίν’ αἰτίαν ἔχουσι τὰς δυνάμεις ταύτας. Ἔστι γὰρ ἡ περὶ αὐτῶν θεωρία τοῖς περὶ κινήσεως λόγοις οἰκεία· βαρὺ γὰρ καὶ κοῦφον τῷ δύνασθαι κινεῖσθαι φυσικῶς πως λέγομεν. (Ταῖς δὲ ἐνεργείαις ὀνόματ’ αὐτῶν οὐ κεῖται, πλὴν εἴ τις οἴοιτο τὴν ῥοπὴν εἶναι τοιοῦτον.) (308a.) Διὰ δὲ τὸ τὴν φυσικὴν μὲν εἶναι πραγματείαν περὶ κίνησιν, ταῦτα δ’ ἔχειν ἐν ἑαυτοῖς οἷον ζώπυρ’ ἄττα κινήσεως, πάντες μὲν χρῶνται ταῖς δυνάμεσιν αὐτῶν, οὐ μὴν διωρίκασί γε, πλὴν ὀλίγων. Ἰδόντες οὖν πρῶτον τὰ παρὰ τῶν ἄλλων εἰρημένα, καὶ διαπορήσαντες ὅσα πρὸς τὴν σκέψιν ταύτην διελεῖν ἀναγκαῖον, οὕτω καὶ τὸ φαινόμενον ἡμῖν εἴπωμεν περὶ αὐτῶν.

Λέγεται δὴ τὸ μὲν ἁπλῶς βαρὺ καὶ κοῦφον, τὸ δὲ πρὸς ἕτερον· τῶν γὰρ ἐχόντων βάρος φαμὲν τὸ μὲν εἶναι κουφότερον, τὸ δὲ βαρύτερον, οἷον ξύλου χαλκόν. Περὶ μὲν οὖν τῶν ἁπλῶς λεγομένων οὐδὲν εἴρηται παρὰ τῶν πρότερον, περὶ δὲ τῶν πρὸς ἕτερον· οὐ γὰρ λέγουσι τί ἐστι τὸ βαρὺ καὶ τί τὸ κοῦφον, ἀλλὰ τί τὸ βαρύτερον καὶ κουφότερον ἐν τοῖς ἔχουσι βάρος. Μᾶλλον δ’ ἔσται δῆλον ὃ λέγομεν ὧδε. Τὰ μὲν γὰρ ἀεὶ πέφυκεν ἀπὸ τοῦ μέσου φέρεσθαι, τὰ δ’ ἀεὶ πρὸς τὸ μέσον. Τούτων δὲ τὸ μὲν ἀπὸ τοῦ μέσου φερόμενον ἄνω λέγω φέρεσθαι, κάτω δὲ τὸ πρὸς τὸ μέσον.

Ἄτοπον γὰρ τὸ μὴ νομίζειν εἶναί τι ἐν τῷ οὐρανῷ τὸ μὲν ἄνω τὸ δὲ κάτω, καθάπερ τινὲς ἀξιοῦσιν· οὐ γὰρ εἶναι τὸ μὲν ἄνω τὸ δὲ κάτω φασίν, εἴπερ πάντῃ ὅμοιός ἐστι, καὶ πανταχόθεν ἀντίπους ἔσται πορευόμενος ἕκαστος αὐτὸς αὑτῷ. Ἡμεῖς δὲ τὸ τοῦ παντὸς ἔσχατον ἄνω λέγομεν, ὃ καὶ κατὰ τὴν θέσιν ἐστὶν ἄνω καὶ τῇ φύσει πρῶτον· ἐπεὶ δ’ ἐστί τι τοῦ οὐρανοῦ ἔσχατον καὶ μέσον, δῆλον ὅτι ἔσται καὶ ἄνω καὶ κάτω, ὥσπερ καὶ οἱ πολλοὶ λέγουσι, πλὴν οὐχ ἱκανῶς.

Τούτου δ’ αἴτιον ὅτι νομίζουσιν οὐχ ὅμοιον εἶναι πάντῃ τὸν οὐρανόν, ἀλλ’ ἓν εἶναι μόνον τὸ ὑπὲρ ἡμᾶς ἡμισφαίριον, ἐπεὶ προσυπολαβόντες καὶ κύκλῳ τοιοῦτον, καὶ τὸ μέσον ὁμοίως ἔχειν πρὸς ἅπαν, τὸ μὲν ἄνω φήσουσιν εἶναι, τὸ δὲ μέσον κάτω.

Ἁπλῶς μὲν οὖν κοῦφον λέγομεν τὸ ἄνω φερόμενον καὶ πρὸς τὸ ἔσχατον, βαρὺ δὲ ἁπλῶς τὸ κάτω καὶ πρὸς τὸ μέσον· πρὸς ἄλλο δὲ κοῦφον καὶ κουφότερον, ὅτε, δυοῖν ἐχόντων βάρος καὶ τὸν ὄγκον ἴσον, κάτω φέρεται θάτερον φύσει θᾶττον.

Κεφάλαιο 2

Τῶν δὴ πρότερον ἐλθόντων ἐπὶ τὴν περὶ τούτων σκέψιν σχεδὸν οἱ πλεῖστοι περὶ τῶν οὕτω βαρέων καὶ κούφων εἰρήκασι μόνον, ὅσων ἀμφοτέρων ἐχόντων βάρος θάτερόν ἐστι (308b.) κουφότερον· οὕτω δὲ διελθόντες οἴονται διωρίσθαι καὶ περὶ τοῦ ἁπλῶς κούφου καὶ βαρέος· ὁ δὲ λόγος αὐτοῖς οὐκ ἐφαρμόττει. Δῆλον δ’ ἔσται τοῦτο μᾶλλον προελθοῦσιν.

Λέγουσι γὰρ τὸ κουφότερον καὶ βαρύτερον οἱ μὲν ὥσπερ ἐν τῷ Τιμαίῳ τυγχάνει γεγραμμένον, βαρύτερον μὲν τὸ ἐκ πλειόνων τῶν αὐτῶν συνεστός, κουφότερον δὲ τὸ ἐξ ἐλαττόνων, ὥσπερ μολίβδου μόλιβδος ὁ πλείων βαρύτερος καὶ χαλκοῦ χαλκός. Ὁμοίως δὲ καὶ τῶν ἄλλων τῶν ὁμοειδῶν ἕκαστον· ἐν ὑπεροχῇ γὰρ τῶν ἴσων μορίων βαρύτερον ἕκαστόν ἐστιν. Τὸν αὐτὸν δὲ τρόπον καὶ ξύλου μόλιβδόν φασιν· ἔκ τινων γὰρ τῶν αὐτῶν εἶναι πάντα τὰ σώματα καὶ μιᾶς ὕλης, ἀλλ’ οὐ δοκεῖν.

Οὕτω δὴ διωρισμένων οὐκ εἴρηται περὶ τοῦ ἁπλῶς κούφου καὶ βαρέος· νῦν γὰρ τὸ μὲν πῦρ ἀεὶ κοῦφον καὶ ἄνω φέρεται, ἡ δὲ γῆ καὶ τὰ γεηρὰ πάντα κάτω καὶ πρὸς τὸ μέσον. Ὥστ’ οὐ δι’ ὀλιγότητα τῶν τριγώνων, ἐξ ὧν συνεστάναι φασὶν ἕκαστον αὐτῶν, τὸ πῦρ ἄνω φέρεσθαι πέφυκεν· τό τε γὰρ πλεῖον ἧττον ἂν ἐφέρετο καὶ βαρύτερον ἦν ἐκ πλειόνων ὂν τριγώνων. Νῦν δὲ φαίνεται τοὐναντίον· ὅσῳ γὰρ ἂν ᾖ πλεῖον, κουφότερόν ἐστι καὶ ἄνω φέρεται θᾶττον. Καὶ ἄνωθεν δὲ κάτω τὸ ὀλίγον οἰσθήσεται θᾶττον πῦρ, τὸ δὲ πολὺ βραδύτερον.

Πρὸς δὲ τούτοις, ἐπεὶ τὸ μὲν ἐλάσσω ἔχον τὰ ὁμογενῆ κουφότερον εἶναί φασι, τὸ δὲ πλείω βαρύτερον, ἀέρα δὲ καὶ ὕδωρ καὶ πῦρ ἐκ τῶν αὐτῶν εἶναι τριγώνων, ἀλλὰ διαφέρειν ὀλιγότητι καὶ πλήθει, διὸ τὸ μὲν αὐτῶν εἶναι κουφότερον τὸ δὲ βαρύτερον, ἔσται τι πλῆθος ἀέρος ὃ βαρύτερον ὕδατος ἔσται. Συμβαίνει δὲ πᾶν τοὐναντίον· ἀεί τε γὰρ ὁ πλείων ἀὴρ ἄνω φέρεται μᾶλλον, καὶ ὅλως ὁτιοῦν μέρος ἀέρος ἄνω φέρεται ἐκ τοῦ ὕδατος.

Οἱ μὲν οὖν τοῦτον τὸν τρόπον περὶ κούφου καὶ βαρέος διώρισαν· τοῖς δ’ οὐχ ἱκανὸν ἔδοξεν οὕτω διελεῖν, ἀλλὰ καίπερ ὄντες ἀρχαιότεροι ταῖς ἡλικίαις καινοτέρως ἐνόησαν περὶ τῶν νῦν λεχθέντων. Φαίνεται γὰρ ἔνια τὸν ὄγκον μὲν ἐλάττω τῶν σωμάτων, ὄντα δὲ βαρύτερα. Δῆλον οὖν ὡς οὐχ ἱκανὸν τὸ φάσκειν ἐξ ἴσων συγκεῖσθαι τῶν πρώτων τὰ ἰσοβαρῆ· ἴσα γὰρ ἂν ἦν τὸν ὄγκον. Τὰ δὲ πρῶτα καὶ ἄτομα τοῖς μὲν ἐπίπεδα λέγουσιν ἐξ ὧν συνέστηκε τὰ βάρος ἔχοντα (309a.) τῶν σωμάτων, ἄτοπον τὸ φάναι· τοῖς δὲ στερεὰ μᾶλλον ἐνδέχεται λέγειν τὸ μεῖζον εἶναι βαρύτερον αὐτῶν. Τῶν δὲ συνθέτων, ἐπειδήπερ οὐ φαίνεται τοῦτον ἕκαστον ἔχειν τὸν τρόπον, ἀλλὰ πολλὰ βαρύτερα ὁρῶμεν ἐλάττω τὸν ὄγκον ὄντα, καθάπερ ἐρίου χαλκόν, ἕτερον τὸ αἴτιον οἴονταί τε καὶ λέγουσιν ἔνιοι· τὸ γὰρ κενὸν ἐμπεριλαμβανόμενον κουφίζειν τὰ σώματά φασι καὶ ποιεῖν ἔστιν ὅτε τὰ μείζω κουφότερα· πλεῖον γὰρ ἔχειν κενόν. Διὰ τοῦτο γὰρ καὶ τὸν ὄγκον εἶναι μείζω συγκείμενα πολλάκις ἐξ ἴσων στερεῶν ἢ καὶ ἐλαττόνων. Ὅλως δὲ καὶ παντὸς αἴτιον εἶναι τοῦ κουφοτέρου τὸ πλεῖον ἐνυπάρχειν κενόν.

Λέγουσι μὲν οὖν τοῦτον τὸν τρόπον, ἀνάγκη δὲ προσθεῖναι τοῖς οὕτω διορίζουσι μὴ μόνον τὸ κενὸν ἔχειν πλεῖον, ἂν ᾖ κουφότερον, ἀλλὰ καὶ τὸ στερεὸν ἔλαττον· εἰ γὰρ ὑπερέξει τῆς τοιαύτης ἀναλογίας, οὐκ ἔσται κουφότερον. Διὰ γὰρ τοῦτο καὶ τὸ πῦρ εἶναί φασι κουφότατον, ὅτι πλεῖστον ἔχει κενόν. Συμβήσεται οὖν μικροῦ πυρὸς πολὺν χρυσὸν πλεῖον ἔχοντα τὸ κενὸν εἶναι κουφότερον, εἰ μὴ καὶ στερεὸν ἕξει πολλαπλάσιον· ὥστε τοῦτο λεκτέον. Ἔνιοι μὲν οὖν τῶν μὴ φασκόντων εἶναι κενὸν οὐδὲν διώρισαν περὶ κούφου καὶ βαρέος, οἷον Ἀναξαγόρας καὶ Ἐμπεδοκλῆς· οἱ δὲ διορίσαντες μέν, οὐ φάσκοντες δὲ εἶναι κενόν, οὐδὲν εἶπον διὰ τί τὰ μὲν ἁπλῶς κοῦφα τὰ δὲ βαρέα τῶν σωμάτων, καὶ φέρεται τὰ μὲν ἀεὶ ἄνω τὰ δὲ κάτω, οὐδὲ περὶ τοῦ ἔνια μείζω τὸν ὄγκον ὄντα κουφότερα τῶν ἐλαττόνων εἶναι σωμάτων οὐδὲν ἐπεμνήσθησαν, οὐδὲ δῆλον πῶς ἐκ τῶν εἰρημένων ὁμολογούμενα τοῖς φαινομένοις συμβήσεται λέγειν αὐτοῖς.

Ἀναγκαῖον δὲ καὶ τοῖς περὶ τῆς τοῦ πυρὸς κουφότητος αἰτιωμένοις τὸ πολὺ κενὸν ἔχειν σχεδὸν ἐν ταῖς αὐταῖς ἐνέχεσθαι δυσχερείαις. Ἔλαττον μὲν γὰρ ἕξει στερεὸν τῶν ἄλλων σωμάτων, καὶ τὸ κενὸν πλεῖον· ἀλλ’ ὅμως ἔσται τι πυρὸς πλῆθος ἐν ᾧ τὸ στερεὸν καὶ τὸ πλῆρες ὑπερβάλλει τῶν περιεχομένων στερεῶν ἔν τινι μικρῷ πλήθει γῆς. Ἐὰν δὲ φῶσι καὶ τὸ κενόν, πῶς διοριοῦσι τὸ ἁπλῶς βαρύ; Ἢ γὰρ τῷ πλεῖον στερεὸν ἔχειν ἢ τῷ ἔλαττον κενόν. Εἰ μὲν οὖν τοῦτο (309b.) φήσουσιν, ἔσται τι πλῆθος γῆς οὕτως ὀλίγον ἐν ᾧ στερεὸν ἔσται ἔλαττον ἢ ἐν πολλῷ πλήθει πυρός. Ὁμοίως δὲ κἂν τῷ κενῷ διορίσωσιν, ἔσται τι κουφότερον τοῦ ἁπλῶς κούφου καὶ φερομένου ἀεὶ ἄνω αὐτὸ φερόμενον ἀεὶ κάτω. Τοῦτο δὲ ἀδύνατον· τὸ γὰρ ἁπλῶς κοῦφον ἀεὶ κουφότερον τῶν ἐχόντων βάρος καὶ κάτω φερομένων, τὸ δὲ κουφότερον οὐκ ἀεὶ κοῦφον διὰ τὸ λέγεσθαι καὶ ἐν τοῖς ἔχουσι βάρος ἕτερον ἑτέρου κουφότερον, οἷον γῆς ὕδωρ.

Ἀλλὰ μὴν οὐδὲ τῷ τὸ κενὸν ἀνάλογον ἔχειν πρὸς τὸ πλῆρες ἱκανὸν λῦσαι τὴν λεγομένην νῦν ἀπορίαν. Συμβήσεται γὰρ καὶ τοῦτον τὸν τρόπον λέγουσιν ὡσαύτως τὸ ἀδύνατον. Ἐν γὰρ τῷ πλείονι πυρὶ καὶ ἐν τῷ ἐλάττονι τὸν αὐτὸν ἕξει λόγον τὸ στερεὸν πρὸς τὸ κενόν. Φέρεται δέ γε θᾶττον τὸ πλεῖον ἄνω πῦρ τοῦ ἐλάττονος, καὶ κάτω δὲ πάλιν ὡσαύτως ὁ πλείων χρυσὸς καὶ ὁ μόλιβδος· ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον τῶν ἐχόντων βάρος. Οὐκ ἔδει δὲ τοῦτο συμβαίνειν, εἴπερ τούτῳ διώρισται τὸ βαρὺ καὶ κοῦφον.

Ἄτοπον δὲ καὶ εἰ διὰ τὸ κενὸν μὲν ἄνω φέρονται, τὸ δὲ κενὸν αὐτὸ μή. Ἀλλὰ μὴν εἴ γε τὸ μὲν κενὸν ἄνω πέφυκε φέρεσθαι, κάτω δὲ τὸ πλῆρες, καὶ διὰ τοῦτο τοῖς ἄλλοις αἴτια τῆς φορᾶς ἑκατέρας, οὐθὲν περὶ τῶν συνθέτων ἔδει σκοπεῖν διὰ τί τὰ μὲν κοῦφα τὰ δὲ βαρέα τῶν σωμάτων, ἀλλὰ περὶ τούτων αὐτῶν εἰπεῖν διὰ τί τὸ μὲν κοῦφον, τὸ δ’ ἔχει βάρος, ἔτι δὲ τί τὸ αἴτιον τοῦ μὴ διεστάναι τὸ πλῆρες καὶ τὸ κενόν.

Ἄλογον δὲ καὶ τὸ χώραν τῷ κενῷ ποιεῖν, ὥσπερ οὐκ αὐτὸ χώραν τινὰ οὖσαν· ἀναγκαῖον δ’, εἴπερ κινεῖται τὸ κενόν, εἶναι αὐτοῦ τινα τόπον, ἐξ οὗ μεταβάλλει καὶ εἰς ὅν.

Πρὸς δὲ τούτοις τί τῆς κινήσεως αἴτιον; Οὐ γὰρ δὴ τό γε κενόν· οὐ γὰρ αὐτὸ κινεῖται μόνον, ἀλλὰ καὶ τὸ στερεόν.

Ὡσαύτως δὲ συμβαίνει κἄν τις ἄλλως διορίζῃ, μεγέθει καὶ σμικρότητι ποιῶν βαρύτερα καὶ κουφότερα ρων, κἂν ἄλλον ὁντινοῦν τρόπον κατασκευάζων, μόνον δὲ τὴν αὐτὴν ὕλην ἅπασιν ἀποδιδούς, ἢ πλείους μὲν ὑπεναντίας δὲ μόνον.

Μιᾶς μὲν γὰρ οὔσης οὐκ ἔσται τὸ ἁπλῶς βαρὺ καὶ κοῦφον, ὥσπερ τοῖς ἐκ τῶν τριγώνων συνιστᾶσιν· ἐναντίας δέ, (310a.) καθάπερ οἱ τὸ κενὸν καὶ πλῆρες, οὐκ ἔσται τὰ μεταξὺ τῶν ἁπλῶς βαρέων καὶ κούφων διὰ τίν’ αἰτίαν βαρύτερα καὶ κουφότερα ἀλλήλων καὶ τῶν ἁπλῶν ἐστιν.

Τὸ δὲ μεγέθει καὶ μικρότητι διορίζειν πεπλασμένῳ μὲν ἔοικε μᾶλλον τῶν πρότερον, ὅτι δ’ ἐνδέχεται καθ’ ἕκαστον ποιεῖν διαφορὰς τῶν τεττάρων στοιχείων, ἀσφαλεστέρως ἔχει πρὸς τὰς ἔμπροσθεν ἀπορίας.

Τῷ δὲ μίαν ποιεῖν φύσιν τῶν τῷ μεγέθει διαφερόντων ἀναγκαῖον ταὐτὸν συμβαίνειν τοῖς μίαν ποιοῦσιν ὕλην, καὶ μήθ’ ἁπλῶς εἶναι μηθὲν κοῦφον μήτε φερόμενον ἄνω, ἀλλ’ ἢ ὑστερίζον ἢ ἐκθλιβόμενον, καὶ πολλὰ μικρὰ ὀλίγων μεγάλων βαρύτερα εἶναι. Εἰ δὲ τοῦτο ἔσται, συμβήσεται πολὺν ἀέρα καὶ πολὺ πῦρ ὕδατος εἶναι βαρύτερα καὶ γῆς ὀλίγης. Τοῦτο δ’ ἐστὶν ἀδύνατον.

Κεφάλαιο 3

Τὰ μὲν οὖν παρὰ τῶν ἄλλων εἰρημένα ταῦτα, καὶ τοῦτον λέγεται τὸν τρόπον.

Ἡμεῖς δὲ λέγωμεν πρῶτον διορίσαντες περὶ οὗ μάλιστα ἀποροῦσί τινες, διὰ τί τὰ μὲν ἄνω φέρεται τὰ δὲ κάτω τῶν σωμάτων ἀεὶ κατὰ φύσιν, τὰ δὲ καὶ ἄνω καὶ κάτω, μετὰ δὲ ταῦτα περὶ βαρέος καὶ κούφου καὶ τῶν συμβαινόντων περὶ αὐτὰ παθημάτων, διὰ τίν’ αἰτίαν ἕκαστον γίνεται.

Περὶ μὲν οὖν τοῦ φέρεσθαι εἰς τὸν αὑτοῦ τόπον ἕκαστον ὁμοίως ὑποτῶν ἑτέληπτέον ὥσπερ καὶ περὶ τὰς ἄλλας γενέσεις καὶ μεταβολάς. Ἐπεὶ γάρ εἰσι τρεῖς αἱ κινήσεις (ἡ μὲν κατὰ μέγεθος, ἡ δὲ κατ’ εἶδος, ἡ δὲ κατὰ τόπον), ἐν ἑκάστῃ τούτων τὴν μεταβολὴν ὁρῶμεν γινομένην ἐκ τῶν ἐναντίων εἰς τὰ ἐναντία καὶ τὰ μεταξύ, καὶ οὐκ εἰς τὸ τυχὸν τῷ τυχόντι μεταβολὴν οὖσαν· ὁμοίως δὲ οὐδὲ κινητικὸν τὸ τυχὸν τοῦ τυχόντος· ἀλλ’ ὥσπερ τὸ ἀλλοιωτὸν καὶ τὸ αὐξητὸν ἕτερον, οὕτω καὶ τὸ ἀλλοιωτικὸν καὶ τὸ αὐξητικόν. Τὸν αὐτὸν δὴ τρόπον ὑποληπτέον καὶ τὸ κατὰ τόπον κινητικὸν καὶ κινητὸν οὐ τὸ τυχὸν εἶναι τοῦ τυχόντος.

Εἰ οὖν εἰς τὸ ἄνω καὶ τὸ κάτω κινητικὸν μὲν τὸ βαρυντικὸν καὶ τὸ κουφιστικόν, κινητὸν δὲ τὸ δυνάμει βαρὺ καὶ κοῦφον, τὸ δ’ εἰς τὸν αὑτοῦ τόπον φέρεσθαι ἕκαστον τὸ εἰς τὸ αὑτοῦ εἶδός ἐστι φέρε(310b.) σθαι (καὶ ταύτῃ μᾶλλον ἄν τις ὑπολάβοι ὃ ἔλεγον οἱ ἀρχαῖοι, ὅτι τὸ ὅμοιον φέροιτο πρὸς τὸ ὅμοιον. Τοῦτο γὰρ οὐ συμβαίνει πάντως· οὐ γὰρ ἐάν τις μεταθῇ τὴν γῆν οὗ νῦν ἡ σελήνη, οἰσθήσεται τῶν μορίων ἕκαστον πρὸς αὐτήν, ἀλλ’ ὅπου περ καὶ νῦν. Ὅλως μὲν οὖν τοῖς ὁμοίοις καὶ ἀδιαφόροις ὑπὸ τῆς αὐτῆς κινήσεως ἀνάγκη τοῦτο συμβαίνειν, ὥσθ’ ὅπου πέφυκεν ἕν τι φέρεσθαι μόριον, καὶ τὸ πᾶν. Ἐπεὶ δ’ ὁ τόπος ἐστὶ τὸ τοῦ περιέχοντος πέρας, περιέχει δὲ πάντα τὰ κινούμενα ἄνω καὶ κάτω τό τε ἔσχατον καὶ τὸ μέσον, τοῦτο δὲ τρόπον τινὰ γίγνεται τὸ εἶδος τοῦ περιεχομένου, τὸ εἰς τὸν αὑτοῦ τόπον φέρεσθαι πρὸς τὸ ὅμοιόν ἐστι φέρεσθαι· τὰ γὰρ ἐφεξῆς ὅμοιά ἐστιν ἀλλήλοις, οἷον ὕδωρ ἀέρι καὶ ἀὴρ πυρί. Ἀνάπαλιν δὲ λέγειν τοῖς μέσοις ἔστι, τοῖς δ’ ἄκροις οὔ, οἷον ἀέρα μὲν ὕδατι, ὕδωρ δὲ γῇ· ἀεὶ γὰρ τὸ ἀνώτερον πρὸς τὸ ὑφ’ αὑτό, ὡς εἶδος πρὸς ὕλην, οὕτως ἔχει πρὸς ἄλληλα), τὸ δὲ ζητεῖν διὰ τί φέρεται τὸ πῦρ ἄνω καὶ ἡ γῆ κάτω, τὸ αὐτό ἐστι καὶ διὰ τί τὸ ὑγιαστὸν ἂν κινῆται καὶ μεταβάλλῃ ᾗ ὑγιαστόν, εἰς ὑγίειαν ἔρχεται ἀλλ’ οὐκ εἰς λευκότητα. Ὁμοίως δὲ καὶ τἆλλα πάντα τὰ ἀλλοιωτά. Ἀλλὰ μὴν καὶ τὸ αὐξητὸν ὅταν μεταβάλλῃ ᾗ αὐξητόν, οὐκ εἰς ὑγίειαν ἔρχεται ἀλλ’ εἰς μεγέθους ὑπεροχήν. Ὁμοίως δὲ καὶ τούτων ἕκαστον τὸ μὲν ἐν τῷ ποιῷ, τὸ δ’ ἐν τῷ ποσῷ μεταβάλλει, καὶ ἐν τόπῳ τὰ μὲν κοῦφα ἄνω, τὰ δὲ βαρέα κάτω.

Πλὴν ὅτι τὰ μὲν ἐν αὑτοῖς δοκεῖ ἔχειν ἀρχὴν τῆς μεταβολῆς (λέγω δὲ τὸ βαρὺ καὶ τὸ κοῦφον), τὰ δ’ οὔ, ἀλλ’ ἔξωθεν, οἷον τὸ ὑγιαστὸν καὶ τὸ αὐξητόν. Καίτοι ἐνίοτε καὶ ταῦτα ἐξ αὑτῶν μεταβάλλει, καὶ μικρᾶς γενομένης ἐν τοῖς ἔξω κινήσεως τὸ μὲν εἰς ὑγίειαν ἔρχεται, τὸ δ’ εἰς αὔξην· καὶ ἐπεὶ ταὐτὸν τὸ ὑγιαστὸν καὶ τὸ νόσου δεκτικόν, ἐὰν μὲν κινηθῇ ᾗ ὑγιαστόν, εἰς ὑγίειαν φέρεται, ἐὰν δ’ ᾗ νοσερόν, εἰς νόσον.

Μᾶλλον δὲ τὸ βαρὺ καὶ τὸ κοῦφον τούτων ἐν ἑαυτοῖς ἔχειν φαίνεται τὴν ἀρχὴν διὰ τὸ ἐγγύτατα τῆς οὐσίας εἶναι τὴν τούτων ὕλην· σημεῖον δ’ ὅτι ἡ φορὰ ἀπολελυμένων ἐστί, καὶ γενέσει ὑστάτη τῶν κινήσεων, ὥστε πρώτη (311a.) ἂν εἴη κατὰ τὴν οὐσίαν αὕτη ἡ κίνησις. Ὅταν μὲν οὖν γίγνηται ἐξ ὕδατος ἀὴρ καὶ ἐκ βαρέος κοῦφον, ἔρχεται εἰς τὸ ἄνω.

Ἅμα δ’ ἐστὶ κοῦφον, καὶ οὐκέτι γίνεται, ἀλλ’ ἐκεῖ ἔστιν. Φανερὸν δὴ ὅτι δυνάμει ὄν, εἰς ἐντελέχειαν ἰὸν ἔρχεται ἐκεῖ καὶ εἰς τὸ τοσοῦτον καὶ τὸ τοιοῦτον, οὗ ἡ ἐντελέχεια καὶ ὅσου καὶ οἵου [καὶ ὅπου]. Τὸ δ’ αὐτὸ αἴτιον καὶ τοῦ ἤδη ὑπάρχοντα καὶ ὄντα γῆν καὶ πῦρ κινεῖσθαι εἰς τοὺς αὑτῶν τόπους μηδενὸς ἐμποδίζοντος. Καὶ γὰρ ἡ τροφή, ὅταν τὸ κωλῦον, καὶ τὸ ὑγιαστόν, ὅταν τὸ ἐπίσχον μὴ ᾖ, φέρεται εὐθύς. Κινεῖ δὲ τό τε ἐξ ἀρχῆς ποιῆσαν καὶ τὸ ὑποσπάσαν ἢ ὅθεν ἀπεπήδησεν, καθάπερ εἴρηται ἐν τοῖς πρώτοις λόγοις, ἐν οἷς διωρίζομεν ὅτι οὐθὲν τούτων αὐτὸ ἑαυτὸ κινεῖ.

Διὰ τίνα μὲν οὖν αἰτίαν φέρεται τῶν φερομένων ἕκαστον, καὶ τὸ φέρεσθαι εἰς τὸν αὑτοῦ τόπον τί ἐστιν, εἴρηται.

Κεφάλαιο 4

Τὰς δὲ διαφορὰς καὶ τὰ συμβαίνοντα περὶ αὐτὰ νῦν λέγωμεν. Πρῶτον μὲν οὖν διωρίσθω, καθάπερ φαίνεται πᾶσι, βαρὺ μὲν ἁπλῶς τὸ πᾶσιν ὑφιστάμενον, κοῦφον δὲ τὸ πᾶσιν ἐπιπολάζον. Ἁπλῶς δὲ λέγω εἴς τε τὸ γένος βλέπων, καὶ ὅσοις μὴ ἀμφότερα ὑπάρχει· οἷον φαίνεται πυρὸς μὲν τὸ τυχὸν μέγεθος ἄνω φερόμενον, ἐὰν μή τι τύχῃ κωλῦον ἕτερον, γῆς δὲ κάτω· τὸν αὐτὸν δὲ τρόπον καὶ θᾶττον τὸ πλεῖον.

Ἄλλως δὲ βαρὺ καὶ κοῦφον, οἷς ἀμφότερα ὑπάρχει· καὶ γὰρ ἐπιπολάζουσί τισι καὶ ὑφίστανται, καθάπερ ἀὴρ καὶ ὕδωρ· ἁπλῶς μὲν γὰρ οὐδέτερον τούτων κοῦφον ἢ βαρύ· γῆς μὲν γὰρ ἄμφω κουφότερα (ἐπιπολάζει γὰρ αὐτῇ τὸ τυχὸν αὐτῶν μόριον), πυρὸς δὲ βαρύτερα (ὑφίσταται γὰρ αὐτῶν ὁπόσον ἂν ᾖ μόριον), πρὸς ἑαυτὰ δὲ ἁπλῶς τὸ μὲν βαρὺ τὸ δὲ κοῦφον· ἀὴρ μὲν γὰρ ὁπόσος ἂν ᾖ, ἐπιπολάζει ὕδατι, ὕδωρ δὲ ὁπόσον ἂν ᾖ, ἀέρι ὑφίσταται.

Ἐπεὶ δὲ καὶ τῶν ἄλλων τὰ μὲν ἔχει βάρος τὰ δὲ κουφότητα, δῆλον ὅτι τούτων μὲν αἰτία πάντων ἡ ἐν τοῖς ἀσυνθέτοις διαφορά· κατὰ γὰρ τὸ ἐκείνων τετυχηκέναι τοῦ μὲν πλεῖον τοῦ δ’ ἔλαττον, ἔσται τὰ μὲν κοῦφα τὰ δὲ βαρέα τῶν σωμάτων. Ὥστε περὶ ἐκείνων λεκτέον· τἆλλα γὰρ ἀκολουθεῖ τοῖς πρώτοις, ὅπερ ἔφαμεν χρῆναι ποιεῖν καὶ τοὺς διὰ τὸ πλῆρες τὸ βαρὺ λέγοντας (311b.) καὶ διὰ τὸ κενὸν τὸ κοῦφον.

Συμβαίνει δὴ μὴ πανταχοῦ ταὐτὰ βαρέα δοκεῖν εἶναι καὶ κοῦφα διὰ τὴν τῶν πρώτων διαφοράν· λέγω δ’ οἷον ἐν μὲν ἀέρι βαρύτερον ἔσται ταλαντιαῖον ξύλον μολίβδου μναϊαίου, ἐν δὲ ὕδατι κουφότερον· αἴτιον δ’ ὅτι πάντα βάρος ἔχει πλὴν πυρὸς καὶ κουφότητα πλὴν γῆς.

Γῆν μὲν οὖν καὶ ὅσα γῆς ἔχει πλεῖστον, πανταχοῦ βάρος ἔχειν ἀναγκαῖον, ὕδωρ δὲ πανταχοῦ πλὴν ἐν γῇ, ἀέρα δὲ πλὴν ἐν ὕδατι καὶ γῇ· ἐν τῇ αὑτοῦ γὰρ χώρᾳ πάντα βάρος ἔχει πλὴν πυρός, καὶ ὁ ἀήρ. Σημεῖον δ’ ὅτι ἕλκει πλεῖον ὁ πεφυσημένος ἀσκὸς τοῦ κενοῦ. Ὥστ’ εἴ τι ἀέρος ἔχει πλεῖον ἢ γῆς καὶ ὕδατος, ἐν μὲν ὕδατι ἐνδέχεται κουφότερον εἶναί τινος, ἐν δὲ ἀέρι βαρύτερον· ἀέρι μὲν γὰρ οὐκ ἐπιπολάζει, τῷ δὲ ὕδατι ἐπιπολάζει. Ὅτι δ’ ἐστί τι ἁπλῶς κοῦφον καὶ ἁπλῶς βαρύ, ἐκ τῶνδ’ ἐστὶ φανερόν. Λέγω δ’ ἁπλῶς κοῦφον ὃ ἀεὶ ἄνω καὶ βαρὺ ὃ ἀεὶ κάτω πέφυκε φέρεσθαι μὴ κωλυόμενον· τοιαῦτα γάρ ἐστί τινα, καὶ οὐχ ὥσπερ οἴονταί τινες πάντ’ ἔχειν βάρος· βαρὺ μὲν γὰρ δοκεῖ τισιν εἶναι καὶ ἑτέροις, καὶ ἀεὶ φέρεσθαι πρὸς τὸ μέσον. Ἔστι δ’ ὁμοίως καὶ τὸ κοῦφον. Ὁρῶμεν γάρ, καθάπερ εἴρηται πρότερον, ὅτι τὰ γεηρὰ πᾶσιν ὑφίσταται καὶ φέρεται πρὸς τὸ μέσον. Ἀλλὰ μὴν ὥρισται τὸ μέσον. Εἰ τοίνυν ἐστί τι ὃ πᾶσιν ἐπιπολάζει, καθάπερ φαίνεται τὸ πῦρ καὶ ἐν αὐτῷ τῷ ἀέρι ἄνω φερόμενον, ὁ δ’ ἀὴρ ἡσυχάζων, δῆλον ὅτι τοῦτο φέρεται πρὸς τὸ ἔσχατον. Ὥστε βάρος οὐδὲν οἷόν τ’ ἔχειν αὐτό· ὑφίστατο γὰρ ἂν ἄλλῳ· εἰ δὲ τοῦτο, εἴη ἄν τι ἄλλο, ὃ φέρεται ἐπὶ τὸ ἔσχατον, ὃ πᾶσι τοῖς φερομένοις ἐπιπολάζει. Νῦν δ’ οὐδὲν φαίνεται. Τὸ ἄρα πῦρ οὐδὲν ἔχει βάρος, οὐδὲ ἡ γῆ κουφότητα οὐδεμίαν, εἴπερ ὑφίσταται πᾶσι καὶ τὸ ὑφιστάμενον φέρεται ἐπὶ τὸ μέσον.

Ἀλλὰ μὴν ὅτι γ’ ἐστὶ μέσον πρὸς ὃ ἡ φορὰ τοῖς ἔχουσι βάρος καὶ ἀφ’ οὗ τοῖς κούφοις, δῆλον πολλαχόθεν. Πρῶτον μὲν τῷ εἰς ἄπειρον μὴ ἐνδέχεσθαι φέρεσθαι μηθέν. Ὥσπερ γὰρ οὐκ ἔστιν οὐθὲν ἀδύνατον, οὕτως οὐδὲ γίγνεται· ἡ δὲ φορὰ γένεσίς ποθέν ποι.

Ἔπειτα πρὸς ὁμοίας φαίνεται γωνίας τὸ μὲν πῦρ ἄνω φερόμενον, ἡ δὲ γῆ κάτω καὶ πᾶν τὸ βάρος ἔχον. Ὥστ’ ἀνάγκη φέρεσθαι (312a.) πρὸς τὸ μέσον. (Τοῦτο δὲ πότερον συμβαίνει πρὸς τὸ τῆς γῆς μέσον ἢ πρὸς τὸ τοῦ παντός, ἐπεὶ ταὐτὸν αὐτῶν ἐστιν, ἄλλος λόγος.) Ἐπεὶ δὲ τὸ πᾶσιν ὑφιστάμενον φέρεται πρὸς τὸ μέσον, ἀνάγκη τὸ πᾶσιν ἐπιπολάζον φέρεσθαι πρὸς τὸ ἔσχατον τῆς χώρας, ἐν ᾗ ποιοῦνται τὴν κίνησιν· ἐναντίον γὰρ τὸ μὲν μέσον τῷ ἐσχάτῳ, τὸ δὲ ὑφιστάμενον ἀεὶ τῷ ἐπιπολάζοντι.

Διὸ καὶ εὐλόγως τὸ βαρὺ καὶ κοῦφον δύο ἐστίν· καὶ γὰρ οἱ τόποι δύο, τὸ μέσον καὶ τὸ ἔσχατον.

Ἔστι δὲ δή τι καὶ μεταξὺ τούτων, ὃ πρὸς ἑκάτερον αὐτῶν λέγεται θάτερον· ἔστι γὰρ ὡς ἔσχατον καὶ μέσον ἀμφοτέρων ἐστὶ τὸ μεταξύ· διὰ τοῦτό ἐστί τι καὶ ἄλλο βαρὺ καὶ κοῦφον, οἷον ὕδωρ καὶ ἀήρ.

Φαμὲν δὲ τὸ μὲν περιέχον τοῦ εἴδους εἶναι, τὸ δὲ περιεχόμενον τῆς ὕλης. Ἔστι δ’ ἐν πᾶσι τοῖς γένεσιν αὕτη ἡ διάστασις· καὶ γὰρ ἐν τῷ ποιῷ καὶ ἐν τῷ ποσῷ ἐστι τὸ μὲν ὡς εἶδος μᾶλλον, τὸ δ’ ὡς ὕλη. Καὶ ἐν τοῖς κατὰ τόπον ὡσαύτως τὸ μὲν ἄνω τοῦ ὡρισμένου, τὸ δὲ κάτω τῆς ὕλης.

Ὥστε καὶ ἐν αὐτῇ τῇ ὕλῃ τῇ τοῦ βαρέος καὶ κούφου, ᾗ μὲν τοιοῦτον δυνάμει, βαρέος ὕλη, ᾗ δὲ τοιοῦτον, κούφου· καὶ ἔστι μὲν ἡ αὐτή, τὸ δ’ εἶναι οὐ ταὐτόν, ὥσπερ καὶ τὸ νοσερὸν καὶ τὸ ὑγιαστόν. Τὸ γὰρ εἶναι οὐ ταὐτόν· διόπερ οὐδὲ τὸ νοσώδει εἶναι ἢ ὑγιεινῷ.

Κεφάλαιο 5

Τὸ μὲν οὖν ἔχον τοιαύτην ὕλην κοῦφον καὶ ἀεὶ ἄνω, τὸ δὲ τὴν ἐναντίαν βαρὺ καὶ ἀεὶ κάτω· τὸ δ᾽ ἑτέρας μὲν τούτων, ἐχούσας δ᾽ οὕτω πρὸς ἀλλήλας ὡς αὖται ἁπλῶς, καὶ ἄνω καὶ κάτω [φερομένας]· διὸ ἀὴρ καὶ ὕδωρ ἔχουσι καὶ κουφότητα καὶ βάρος ἑκάτερον, καὶ ὕδωρ μὲν πλὴν γῆς πᾶσιν ὑφίσταται, ἀὴρ δὲ πλὴν πυρὸς πᾶσιν ἐπιπολάζει. Ἐπεὶ δ᾽ ἐστὶν ἓν μόνον ὃ πᾶσιν ἐπιπολάζει καὶ ἓν ὃ πᾶσιν ὑφίσταται, ἀνάγκη δύο ἄλλα εἶναι ἃ καὶ ὑφίσταταί τινι καὶ ἐπιπολάζει τινί.

Ὥστε ἀνάγκη καὶ τὰς ὕλας τοσαύτας εἶναι ὅσαπερ ταῦτα, τέτταρας, οὕτω δὲ τέτταρας ὡς μίαν μὲν ἁπάντων τὴν κοινήν, ἄλλως τε καὶ εἰ γίγνονται ἐξ ἀλλήλων, ἀλλὰ τὸ εἶναι ἕτερον. Οὐδὲν γὰρ κωλύει τῶν (312b.) ἐναντίων εἶναι μεταξὺ καὶ ἓν καὶ πλείω, ὥσπερ ἐν χρώμασιν· πολλαχῶς γὰρ λέγεται τὸ μεταξὺ καὶ τὸ μέσον.

Ἐν μὲν οὖν τῇ αὑτοῦ χώρᾳ τῶν ἐχόντων καὶ βάρος καὶ κουφότητα ἕκαστον ἔχει βάρος (ἡ δὲ γῆ ἐν ἅπασιν)· κουφότητα δ᾽ οὐκ ἔχει, ἀλλ᾽ ἢ ἐν οἷς ἐπιπολάζει.

Διὸ καὶ ὑποσπωμένων μὲν φέρεται εἰς τὰ ἐφεξῆς κάτω, ἀὴρ μὲν εἰς τὴν τοῦ ὕδατος χώραν, ὕδωρ δὲ εἰς τὴν τῆς γῆς. Ἄνω δ᾽ εἰς τὴν τοῦ πυρός, ἀναιρουμένου τοῦ πυρός, οὐκ οἰσθήσεται ὁ ἀήρ, εἰ μὴ βίᾳ, ὥσπερ καὶ τὸ ὕδωρ σπᾶται, ὅταν γένηται τὸ ἐπίπεδον ἓν καὶ θᾶττον σπάσῃ τις ἄνω τῆς φορᾶς, ἣν φέρεται τὸ ὕδωρ κάτω. Οὐδὲ τὸ ὕδωρ εἰς τὴν τοῦ ἀέρος, ἀλλ᾽ ἢ ὡς νῦν εἴρηται. Ἡ γῆ δὲ τοῦτο οὐ πάσχει, ὅτι οὐχ ἓν τὸ ἐπίπεδον. Διὸ τὸ μὲν ὕδωρ εἰς τὸ ἀγγεῖον πυρωθὲν σπᾶται, γῆ δ᾽ οὔ. Ὥσπερ δὲ οὐδ᾽ ἡ γῆ ἄνω, οὐδὲ τὸ πῦρ κάτω εἶσιν ὑφαιρουμένου τοῦ ἀέρος· οὐδὲν γὰρ ἔχει βάρος οὐδ᾽ ἐν τῇ αὑτοῦ χώρᾳ, ὥσπερ οὐδ᾽ ἡ γῆ κουφότητα. Φέρεται δὲ κάτω τὰ δύο ὑποσπωμένων, ὅτι τὸ μὲν ἁπλῶς βαρύ ἐστιν ὃ πᾶσιν ὑφίσταται, τὸ δὲ πρός τι βαρὺ ὂν εἰς τὴν αὑτοῦ χώραν ἢ οἷς ἐπιπολάζει, δι᾽ ὁμοιότητα τῆς ὕλης.

Ὅτι δ᾽ ἀναγκαῖον ποιεῖν ἴσας τὰς διαφορὰς αὐτοῖς, δῆλον. Εἰ μὲν γὰρ μία ὕλη πάντων, οἷον ἢ τὸ κενὸν ἢ τὸ πλῆρες ἢ τὸ μέγεθος ἢ τὰ τρίγωνα, ἢ πάντα ἄνω ἢ πάντα κάτω οἰσθήσεται, ἡ δὲ ἑτέρα φορὰ οὐκέτι ἔσται· ὥστ᾽ ἢ κοῦφον οὐδὲν ἔσται ἁπλῶς, εἰ πάντα ῥέπει μᾶλλον τῷ ἐκ μειζόνων εἶναι σωμάτων ἢ ἐκ πλειόνων ἢ ὅτι πλήρη (τοῦτο δὲ ὁρῶμέν τε, καὶ δέδεικται ὅτι ὁμοίως κάτω τε ἀεὶ καὶ πανταχοῦ φέρεται καὶ ἄνω)· ἐὰν δὲ τὸ κενὸν ἤ τι τοιοῦτον ὃ ἀεὶ ἄνω, οὐκ ἔσται ὃ ἀεὶ κάτω. Καὶ τῶν μεταξὺ δὴ ἔνια ἔσται

κάτω θᾶττον γῆς· ἐν γὰρ τῷ πολλῷ ἀέρι τρίγωνα πλείω ἢ τὰ στερεὰ ἢ τὰ μικρὰ ἔσται. Οὐ φαίνεται δ’ οὐδὲ ἓν μόριον ἀέρος κάτω φερόμενον. Ὁμοίως δὲ καὶ ἐπὶ τοῦ κούφου, ἐὰν ἐκεῖνο ποιῇ τις ὑπερέχειν τῇ ὕλῃ.

Ἐὰν δὲ δύο, τὰ μεταξὺ πῶς ἔσται ποιοῦντα ἃ ποιεῖ ἀήρ τε καὶ ὕδωρ; (Οἷον εἴ τις (313a.) φαίη εἶναι τὸ κενὸν καὶ πλῆρες· τὸ μὲν οὖν πῦρ κενόν, διὸ ἄνω, τὴν δὲ γῆν πλῆρες, διὸ κάτω· ἀέρα δὲ πλεῖον πυρὸς ἔχειν, ὕδωρ δὲ γῆς). Ἔσται γάρ τι ὕδωρ ὃ πλεῖον ἕξει πῦρ ὀλίγου ἀέρος, καὶ ἀὴρ πολὺς ὀλίγου ὕδατος γῆν πλείω, ὥστε δεήσει ἀέρος τι πλῆθος θᾶττον φέρεσθαι κάτω ὕδατος ὀλίγου. Τοῦτο δ’ οὐ φαίνεται οὐδαμοῦ οὐδέποτε.

Ἀνάγκη τοίνυν, ὥσπερ καὶ τὸ πῦρ ἄνω, ὅτι τοδὶ ἔχει, οἷον τὸ κενόν, τὰ δ’ ἄλλα οὔ, καὶ τὴν γῆν κάτω, ὅτι τὸ πλῆρες ἔχει, καὶ τὸν ἀέρα εἰς τὴν αὑτοῦ καὶ ἀνώτερον τοῦ ὕδατος, ὅτι τοδί τι ἔχει, καὶ τὸ ὕδωρ κάτω, ὅτι τοιόνδε τι.

Εἰ δὲ ἦν ἕν τι ἄμφω ἢ δύο, ἄμφω δ’ ὑπάρξει ταῦτα ἑκατέρῳ, ἔσται τι πλῆθος ἑκατέρου ὃ ὑπερέξει ὕδωρ τε ἀέρος ὀλίγου τῷ ἄνω καὶ ἀὴρ ὕδατος τῷ κάτω, καθάπερ εἴρηται πολλάκις.

Κεφάλαιο 6

Τὰ δὲ σχήματα οὐκ αἴτια τοῦ φέρεσθαι ἁπλῶς ἢ κάτω ἢ ἄνω, ἀλλὰ τοῦ θᾶττον ἢ βραδύτερον. Δι’ ἃς δ’ αἰτίας, οὐ χαλεπὸν ἰδεῖν· ἀπορεῖται γὰρ νῦν διὰ τί τὰ πλατέα σιδήρια καὶ μόλιβδος ἐπιπλεῖ ἐπὶ τοῦ ὕδατος, ἄλλα δὲ ἐλάττω καὶ ἧττον βαρέα, ἂν ᾖ στρογγύλα ἢ μακρά, οἷον βελόνη, κάτω φέρεται, καὶ ὅτι ἔνια διὰ μικρότητα ἐπιπλεῖ, οἷον τὸ ψῆγμα καὶ ἄλλα γεώδη καὶ κονιορτώδη ἐπὶ τοῦ ἀέρος.

Περὶ δὴ τούτων ἁπάντων τὸ μὲν νομίζειν αἴτιον εἶναι ὥσπερ Δημόκριτος οὐκ ὀρθῶς ἔχει. Ἐκεῖνος γάρ φησι τὰ ἀναφερόμενα θερμὰ ἐκ τοῦ ὕδατος ἀνακωχεύειν (313b.) τὰ πλατέα τῶν ἐχόντων βάρος, τὰ δὲ στενὰ διαπίπτειν· ὀλίγα γὰρ εἶναι τὰ ἀντικρούοντα αὐτοῖς.

Ἔδει δ’ ἐν τῷ ἀέρι ἔτι μᾶλλον τοῦτο ποιεῖν, ὥσπερ ἐνίσταται κἀκεῖνος αὐτός.

Ἀλλ’ ἐνστὰς λύει μαλακῶς· φησὶ γὰρ οὐκ εἰς ἓν ὁρμᾶν τὸν σοῦν, λέγων τὸν σοῦν τὴν κίνησιν τῶν ἄνω φερομένων σωμάτων.

Ἐπεὶ δ’ ἐστὶ τὰ μὲν εὐδιαίρετα τῶν συνεχῶν τὰ δ’ ἧττον, καὶ διαιρετικὰ δὴ τὸν αὐτὸν τρόπον τὰ μὲν μᾶλλον τὰ δ’ ἧττον, ταύτας εἶναι νομιστέον αἰτίας. Εὐδιαίρετον μὲν οὖν τὸ εὐόριστον, καὶ μᾶλλον τὸ μᾶλλον· ἀὴρ δὲ μᾶλλον ὕδατος τοιοῦτον, ὕδωρ δὲ γῆς. Καὶ τὸ ἔλαττον δὴ ἐν ἑκάστῳ γένει εὐδιαιρετώτερον καὶ διασπᾶται ῥᾷον. Τὰ μὲν οὖν ἔχοντα πλάτος διὰ τὸ πολὺ περιλαμβάνειν ἐπιμένει, διὰ τὸ μὴ διασπᾶσθαι τὸ πλεῖον ῥᾳδίως· τὰ δ’ ἐναντίως ἔχοντα τοῖς σχήμασι διὰ τὸ ὀλίγον περιλαμβάνειν φέρεται κάτω, διὰ τὸ διαιρεῖν ῥᾳδίως. Καὶ ἐν ἀέρι πολὺ μᾶλλον, ὅσῳ εὐδιαιρετώτερος ὕδατός ἐστιν.

Ἐπεὶ δὲ τό τε βάρος ἔχει τινὰ ἰσχὺν καθ’ ἣν φέρεται κάτω, καὶ τὰ συνεχῆ πρὸς τὸ μὴ διασπᾶσθαι, ταῦτα δεῖ πρὸς ἄλληλα συμβάλλειν· ἐὰν γὰρ ὑπερβάλλῃ ἡ ἰσχὺς ἡ τοῦ βάρους τῆς ἐν τῷ συνεχεῖ πρὸς τὴν διάσπασιν καὶ διαίρεσιν, βιάσεται κάτω θᾶττον, ἐὰν δὲ ἀσθενεστέρα ᾖ, ἐπιπολάσει.

Περὶ μὲν οὖν βαρέος καὶ κούφου καὶ τῶν περὶ αὐτὰ συμβεβηκότων διωρίσθω τοῦτον ἡμῖν τὸν τρόπον.

Κεφάλαιο 1

(314a.) Περὶ δὲ γενέσεως καὶ φθορᾶς τῶν φύσει γενομένων καὶ φθειρομένων, ὁμοίως κατὰ πάντων, τάς τε αἰτίας διαιρετέον καὶ τοὺς λόγους αὐτῶν, ἔτι δὲ περὶ αὐξήσεως καὶ ἀλλοιώσεως, τί ἑκάτερον, καὶ πότερον τὴν αὐτὴν ὑποληπτέον φύσιν εἶναι ἀλλοιώσεως καὶ γενέσεως, ἢ χωρίς, ὥσπερ διώρισται καὶ τοῖς ὀνόμασιν. Τῶν μὲν οὖν ἀρχαίων οἱ μὲν τὴν καλουμένην ἁπλῆν γένεσιν ἀλλοίωσιν εἶναί φασιν, οἱ δ’ ἕτεροι ἀλλοίωσιν καὶ γένεσιν. Ὅσοι μὲν γὰρ ἕν τι τὸ πᾶν λέγουσιν εἶναι καὶ πάντα ἐξ ἑνὸς γεννῶσι, τούτοις μὲν ἀνάγκη τὴν γένεσιν ἀλλοίωσιν φάναι καὶ τὸ κυρίως γινόμενον ἀλλοιοῦσθαι.

Ὅσοι δὲ πλείω τὴν ὕλην ἑνὸς τιθέασιν, οἷον Ἐμπεδοκλῆς καὶ Ἀναξαγόρας καὶ Λεύκιππος, τούτοις δὲ ἕτερον. Καίτοι Ἀναξαγόρας γε τὴν οἰκείαν φωνὴν ἠγνόησεν· λέγει γοῦν ὡς τὸ γίνεσθαι καὶ ἀπόλλυσθαι ταὐτὸν καθέστηκε τῷ ἀλλοιοῦσθαι, πολλὰ δὲ λέγει τὰ στοιχεῖα, καθάπερ καὶ ἕτεροι. Ἐμπεδοκλῆς μὲν γὰρ τὰ μὲν σωματικὰ τέτταρα, τὰ δὲ πάντα μετὰ τῶν κινούντων ἓξ τὸν ἀριθμόν, Ἀναξαγόρας δὲ ἄπειρα καὶ Λεύκιππος καὶ Δημόκριτος. Ὁ μὲν γὰρ τὰ ὁμοιομερῆ στοιχεῖα τίθησιν, οἷον ὀστοῦν καὶ σάρκα καὶ μυελόν, καὶ τῶν ἄλλων ὧν ἑκάστῳ συνώνυμον τὸ μέρος ἐστίν.

Δημόκριτος δὲ καὶ Λεύκιππος ἐκ σωμάτων ἀδιαιρέτων τἆλλα συγκεῖσθαί φασι, ταῦτα δ’ ἄπειρα καὶ τὸ πλῆθος εἶναι καὶ τὰς μορφάς, αὐτὰ δὲ πρὸς αὐτὰ διαφέρειν τούτοις ἐξ ὧν εἰσὶ καὶ θέσει καὶ τάξει τούτων. Ἐναντίως δὲ φαίνονται λέγοντες οἱ περὶ Ἀναξαγόραν τοῖς περὶ Ἐμπεδοκλέα· ὁ μὲν γάρ φησι πῦρ καὶ ὕδωρ καὶ ἀέρα καὶ γῆν στοιχεῖα τέσσαρα καὶ ἁπλᾶ εἶναι μᾶλλον ἢ σάρκα καὶ ὀστοῦν καὶ τὰ τοιαῦτα τῶν ὁμοιομερῶν, οἱ δὲ ταῦτα μὲν ἁπλᾶ καὶ στοιχεῖα, γῆν δὲ καὶ πῦρ καὶ ὕδωρ καὶ ἀέρα σύνθετα· (314b.) πανσπερμίαν γὰρ εἶναι τούτων. Τοῖς μὲν οὖν ἐξ ἑνὸς πάντα κατασκευάζουσιν ἀναγκαῖον λέγειν τὴν γένεσιν καὶ τὴν φθορὰν ἀλλοίωσιν· ἀεὶ γὰρ μένειν τὸ ὑποκείμενον ταὐτὸ καὶ ἕν· τὸ δὲ τοιοῦτον ἀλλοιοῦσθαί φαμεν· τοῖς δὲ τὰ γένη πλείω ποιοῦσι διαφέρειν τὴν ἀλλοίωσιν τῆς γενέσεως· συνιόντων γὰρ καὶ διαλυομένων ἡ γένεσις συμβαίνει καὶ ἡ φθορά. Διὸ λέγει τοῦτον τὸν τρόπον καὶ Ἐμπεδοκλῆς, ὅτι “φύσις οὐδενός ἐστιν, ... ἀλλὰ μόνον μίξις τε διάλλαξίς τε μιγέντων.” Ὅτι μὲν οὖν οἰκεῖος ὁ λόγος αὐτῶν τῇ ὑποθέσει οὕτω φάναι, δῆλον, καὶ ὅτι λέγουσι τὸν τρόπον τοῦτον· ἀναγκαῖον δὲ καὶ τούτοις τὴν ἀλλοίωσιν εἶναι μέν τι φάναι παρὰ τὴν γένεσιν, ἀδύνατον μέντοι κατὰ τὰ ὑπ’ ἐκείνων λεγόμενα. Τοῦτο δ’ ὅτι λέγομεν ὀρθῶς, ῥᾴδιον συνιδεῖν. Ὥσπερ γὰρ ὁρῶμεν ἠρεμούσης τῆς οὐσίας ἐν αὐτῇ μεταβολὴν κατὰ μέγεθος, τὴν καλουμένην αὔξησιν καὶ φθίσιν, οὕτω καὶ ἀλλοίωσιν. Οὐ μὴν ἀλλ’ ἐξ ὧν λέγουσιν οἱ πλείους ἀρχὰς ποιοῦντες μιᾶς ἀδύνατον ἀλλοιοῦσθαι. Τὰ γὰρ πάθη, καθ’ ἅ φαμεν τοῦτο συμβαίνειν, διαφοραὶ τῶν στοιχείων εἰσίν, λέγω δ’ οἷον θερμὸν ψυχρόν, λευκὸν μέλαν, ξηρὸν ὑγρόν, μαλακὸν σκληρὸν καὶ τῶν ἄλλων ἕκαστον, ὥσπερ καὶ φησὶν Ἐμπεδοκλῆς “ἠέλιον μὲν λευκὸν ὁρᾶν καὶ θερμὸν ἁπάντῃ, ὄμβρον δ’ ἐν πᾶσιν δνοφόεντά τε ῥιγαλέον τε”. Ὁμοίως δὲ διορίζει καὶ ἐπὶ τῶν λοιπῶν. Ὥστ’ εἰ μὴ δυνατὸν ἐκ πυρὸς γενέσθαι ὕδωρ μηδ’ ἐξ ὕδατος γῆν, οὐδ’ ἐκ λευκοῦ μέλαν ἔσται οὐδὲν οὐδ’ ἐκ μαλακοῦ σκληρόν· ὁ δ’ αὐτὸς λόγος καὶ περὶ τῶν ἄλλων· τοῦτο δ’ ἦν ἀλλοίωσις. Ἧι καὶ φανερὸν ὅτι μίαν ἀεὶ τοῖς ἐναντίοις ὑποθετέον ὕλην, ἄν τε μεταβάλλῃ κατὰ τόπον, ἄν τε κατ’ αὔξησιν καὶ φθίσιν, ἄν τε κατ’ ἀλλοίωσιν. Ἔτι δ’ ὁμοίως ἀναγκαῖον εἶναι τοῦτο καὶ ἀλλοίωσιν· εἴτε γὰρ ἀλλοίωσίς (315a.) ἐστι, καὶ τὸ ὑποκείμενον ἓν στοιχεῖον καὶ μία πάντων ὕλη τῶν ἐχόντων εἰς ἄλληλα μεταβολήν, κἂν εἰ τὸ ὑποκείμενον ἕν, ἔστιν ἀλλοίωσις.

Ἐμπεδοκλῆς μὲν οὖν ἔοικεν ἐναντία λέγειν καὶ πρὸς τὰ φαινόμενα καὶ πρὸς αὐτὸν αὐτός. Ἅμα μὲν γὰρ οὔ φησιν ἕτερον ἐξ ἑτέρου γίνεσθαι τῶν στοιχείων οὐδέν, ἀλλὰ τἆλλα πάντα ἐκ τούτων, ἅμα δ’ ὅταν εἰς ἓν συναγάγῃ τὴν ἅπασαν φύσιν πλὴν τοῦ νείκους, ἐκ τοῦ ἑνὸς γίνεσθαι πάλιν ἕκαστον. Ὥστ’ ἐξ ἑνός τινος δῆλον ὅτι διαφοραῖς τισι χωριζομένων καὶ πάθεσιν ἐγένετο τὸ μὲν ὕδωρ τὸ δὲ πῦρ, καθάπερ λέγει τὸν μὲν ἥλιον λευκὸν καὶ θερμόν, τὴν δὲ γῆν βαρὺ καὶ σκληρόν· ἀφαιρουμένων οὖν τούτων τῶν διαφορῶν (εἰσὶ γὰρ ἀφαιρεταὶ γενόμεναί γε) δῆλον ὡς ἀνάγκη γίνεσθαι καὶ γῆν ἐξ ὕδατος καὶ ὕδωρ ἐκ γῆς, ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον, οὐ τότε μόνον ἀλλὰ καὶ νῦν, μεταβάλλοντά γε τοῖς πάθεσιν. Ἔστι δ’ ἐξ ὧν εἴρηκε δυνάμενα προσγίνεσθαι καὶ χωρίζεσθαι πάλιν, ἄλλως τε καὶ μαχομένων ἀλλήλοις ἔτι τοῦ νείκους καὶ τῆς φιλίας. Διόπερ καὶ τότε ἐξ ἑνὸς ἐγεννήθησαν· οὐ γὰρ δὴ πῦρ γε καὶ γῆ καὶ ὕδωρ ὄντα ἓν ἦν τὸ πᾶν. Ἄδηλον δὲ καὶ πότερον ἀρχὴν αὐτῶν θετέον τὸ ἓν ἢ τὰ πολλά, λέγω δὲ πῦρ καὶ γῆν καὶ τὰ σύστοιχα τούτων. Ἧι μὲν γὰρ ὡς ὕλη ὑπόκειται, ἐξ οὗ μεταβάλλοντα διὰ τὴν κίνησιν γίνονται γῆ καὶ πῦρ, τὸ ἓν στοιχεῖον· ᾗ δὲ τοῦτο μὲν ἐκ συνθέσεως γίνεται συνιόντων ἐκείνων, ἐκεῖνα δ’ ἐκ διαλύσεως, στοιχειωδέστερα ἐκεῖνα καὶ πρότερα τὴν φύσιν.

Κεφάλαιο 2

Ὅλως τε δὴ περὶ γενέσεως καὶ φθορᾶς τῆς ἁπλῆς λεκτέον, πότερον ἔστιν ἢ οὐκ ἔστι καὶ πῶς ἔστιν, καὶ περὶ τῶν ἄλλων ἁπλῶν κινήσεων, οἷον περὶ αὐξήσεως καὶ ἀλλοιώσεως.

Πλάτων μὲν οὖν μόνον περὶ γενέσεως ἐσκέψατο καὶ φθορᾶς, ὅπως ὑπάρχει τοῖς πράγμασι, καὶ περὶ γενέσεως οὐ πάσης ἀλλὰ τῆς τῶν στοιχείων· πῶς δὲ σάρκες ἢ ὀστᾶ ἢ τῶν ἄλλων τι τῶν τοιούτων, οὐδέν· ἔτι οὔτε περὶ ἀλλοιώσεως οὔτε περὶ αὐξήσεως, τίνα τρόπον ὑπάρχουσι τοῖς πράγμασιν. Ὅλως δὲ παρὰ τὰ ἐπιπολῆς περὶ οὐδενὸς οὐδεὶς ἐπέστησεν ἔξω Δημοκρίτου. Οὗτος δ’ ἔοικε μὲν περὶ ἁπάντων φροντίσαι, ἤδη (315b.) δὲ ἐν τῷ πῶς διαφέρειν. Οὔτε γὰρ περὶ αὐξήσεως οὐδεὶς οὐδὲν διώρισεν, ὥσπερ λέγομεν, ὅ τι μὴ κἂν ὁ τυχὼν εἴπειεν, ὅτι προσιόντος αὐξάνονται τῷ ὁμοίῳ (πῶς δὲ τοῦτο, οὐκέτι), οὐδὲ περὶ μίξεως, οὔτε περὶ τῶν ἄλλων ὡς εἰπεῖν οὐδενός, οἷον τοῦ ποιεῖν καὶ τοῦ πάσχειν, τίνα τρόπον τὸ μὲν ποιεῖ τὸ δὲ πάσχει τὰς φυσικὰς ποιήσεις. Δημόκριτος δὲ καὶ Λεύκιππος ποιήσαντες τὰ σχήματα τὴν ἀλλοίωσιν καὶ τὴν γένεσιν ἐκ τούτων ποιοῦσι, διακρίσει μὲν καὶ συγκρίσει γένεσιν καὶ φθοράν, τάξει δὲ καὶ θέσει ἀλλοίωσιν. Ἐπεὶ δ’ ᾤοντο τἀληθὲς ἐν τῷ φαίνεσθαι, ἐναντία δὲ καὶ ἄπειρα τὰ φαινόμενα, τὰ σχήματα ἄπειρα ἐποίησαν, ὥστε ταῖς μεταβολαῖς τοῦ συγκειμένου τὸ αὐτὸ ἐναντίον δοκεῖν ἄλλῳ καὶ ἄλλῳ, καὶ μετακινεῖσθαι μικροῦ ἐμμιγνυμένου καὶ ὅλως ἕτερον φαίνεσθαι ἑνὸς μετακινηθέντος· ἐκ τῶν αὐτῶν γὰρ τραγῳδία καὶ κωμῳδία γίνεται γραμμάτων.

Ἐπεὶ δὲ δοκεῖ σχεδὸν πᾶσιν ἕτερον εἶναι γένεσις καὶ ἀλλοίωσις, καὶ γίνεσθαι μὲν καὶ φθείρεσθαι συγκρινόμενα καὶ διακρινόμενα, ἀλλοιοῦσθαι δὲ μεταβαλλόντων τῶν παθημάτων, περὶ τούτων ἐπιστήσασι θεωρητέον. Ἀπορίας γὰρ ἔχει ταῦτα καὶ πολλὰς καὶ εὐλόγους. Εἰ μὲν γάρ ἐστι σύγκρισις ἡ γένεσις, πολλὰ ἀδύνατα συμβαίνει· εἰσὶ δ’ αὖ λόγοι ἕτεροι ἀναγκαστικοὶ καὶ οὐκ εὔποροι διαλύειν ὡς οὐκ ἐνδέχεται ἄλλως ἔχειν. Εἴτε μή ἐστι σύγκρισις ἡ γένεσις, ἢ ὅλως οὐκ ἔστι γένεσις ἢ ἀλλοίωσις, ἢ εἰ καὶ τοῦτο διαλῦσαι χαλεπὸν ὂν πειρατέον.

Ἀρχὴ δὲ τούτων πάντων, πότερον οὕτω γίνεται καὶ ἀλλοιοῦται καὶ αὐξάνεται τὰ ὄντα καὶ τἀναντία τούτοις πάσχει, τῶν πρώτων ὑπαρχόντων μεγεθῶν ἀδιαιρέτων, ἢ οὐθέν ἐστι μέγεθος ἀδιαίρετον· διαφέρει γὰρ τοῦτο πλεῖστον. Καὶ πάλιν εἰ μεγέθη, πότερον, ὡς Δημόκριτος καὶ Λεύκιππος, σώματα ταῦτ’ ἐστίν, ἢ ὥσπερ ἐν τῷ Τιμαίῳ ἐπίπεδα. Τοῦτο μὲν οὖν αὐτό, καθάπερ καὶ ἐν ἄλλοις εἰρήκαμεν, ἄλογον μέχρι ἐπιπέδων διαλῦσαι. Διὸ μᾶλλον εὔλογον σώματα εἶναι ἀδιαίρετα.

Ἀλλὰ καὶ ταῦτα πολλὴν ἔχει ἀλογίαν. Ὅμως δὲ τούτοις ἀλλοίωσιν καὶ γένεσιν ἐνδέχεται ποιεῖν, καθάπερ εἴρηται, τροπῇ καὶ διαθιγῇ μετακινοῦντα τὸ αὐτὸ καὶ ταῖς τῶν σχημά(316a.) των διαφοραῖς, ὅπερ ποιεῖ Δημόκριτος. Διὸ καὶ χροιὰν οὔ φησιν εἶναι· τροπῇ γὰρ χρωματίζεσθαι. Τοῖς δ’ εἰς ἐπίπεδα διαιροῦσιν οὐκέτι· οὐδὲν γὰρ γίνεται πλὴν στερεὰ συντιθεμένων· πάθος γὰρ οὐδ’ ἐγχειροῦσι γεννᾶν οὐδὲν ἐξ αὐτῶν.

Αἴτιον δὲ τοῦ ἐπ’ ἔλαττον δύνασθαι τὰ ὁμολογούμενα συνορᾶν ἡ ἀπειρία. Διὸ ὅσοι ἐνῳκήκασι μᾶλλον ἐν τοῖς φυσικοῖς μᾶλλον δύνανται ὑποτίθεσθαι τοιαύτας ἀρχὰς αἳ ἐπὶ πολὺ δύνανται συνείρειν· οἱ δ’ ἐκ τῶν πολλῶν λόγων ἀθεώρητοι τῶν ὑπαρχόντων ὄντες, πρὸς ὀλίγα βλέψαντες, ἀποφαίνονται ῥᾷον. Ἴδοι δ’ ἄν τις καὶ ἐκ τούτων ὅσον διαφέρουσιν οἱ φυσικῶς καὶ λογικῶς σκοποῦντες· περὶ γὰρ τοῦ ἄτομα εἶναι μεγέθη οἱ μέν φασιν ὅτι τὸ αὐτοτρίγωνον πολλὰ ἔσται, Δημόκριτος δ’ ἂν φανείη οἰκείοις καὶ φυσικοῖς λόγοις πεπεῖσθαι. Δῆλον δ’ ἔσται ὃ λέγομεν προιοῦσιν.

Ἔχει γὰρ ἀπορίαν, εἴ τις θείη σῶμά τι εἶναι καὶ μέγεθος πάντῃ διαιρετόν, καὶ τοῦτο δυνατόν. Τί γὰρ ἔσται ὅπερ τὴν διαίρεσιν διαφεύγει; εἰ γὰρ πάντῃ διαιρετόν, καὶ τοῦτο δυνατόν, κἂν ἅμα εἴη τοῦτο πάντῃ διῃρημένον, καὶ εἰ μὴ ἅμα διῄρηται· κἂν εἰ τοῦτο γένοιτο, οὐδὲν ἂν εἴη ἀδύνατον. Οὐκοῦν καὶ κατὰ τὸ μέσον ὡσαύτως, καὶ ὅλως δέ, εἰ πάντῃ πέφυκε διαιρετόν, ἂν διαιρεθῇ, οὐδὲν ἔσται ἀδύνατον γεγονός, ἐπεὶ οὐδ’ ἂν εἰς μυρία μυριάκις διῃρημένα ᾖ, οὐδὲν ἀδύνατον· καίτοι ἴσως οὐδεὶς ἂν διέλοι. Ἐπεὶ τοίνυν πάντῃ τοιοῦτόν ἐστι τὸ σῶμα, διῃρήσθω. Τί οὖν ἔσται λοιπόν; μέγεθος; οὐ γὰρ οἷόν τε· ἔσται γάρ τι οὐ διῃρημένον, ἦν δὲ πάντῃ διαιρετόν. Ἀλλὰ μὴν εἰ μηδὲν ἔσται σῶμα μηδὲ μέγεθος, διαίρεσις δ’ ἔσται, ἢ ἐκ στιγμῶν ἔσται, καὶ ἀμεγέθη ἐξ ὧν σύγκειται, ἢ οὐδὲν παντάπασιν, ὥστε κἂν γίνοιτο ἐκ μηδενὸς κἂν εἴη συγκείμενον, καὶ τὸ πᾶν δὴ οὐδὲν ἄλλ’ ἢ φαινόμενον. Ὁμοίως δὲ κἂν ᾖ ἐκ στιγμῶν, οὐκ ἔσται ποσόν. Ὁπότε γὰρ ἥπτοντο καὶ ἓν ἦν μέγεθος καὶ ἅμα ἦσαν, οὐδὲν ἐποίουν μεῖζον τὸ πᾶν. Διαιρεθέντος γὰρ εἰς δύο καὶ πλείω, οὐδὲν ἔλαττον οὐδὲ μεῖζον τὸ πᾶν τοῦ πρότερον, ὥστε κἂν πᾶσαι συντεθῶσιν, οὐδὲν ποιήσουσι μέγεθος. Ἀλλὰ μὴν καὶ εἴ τι διαιρουμένου οἷον ἔκπρισμα (316b.) γίνεται τοῦ σώματος, καὶ οὕτως ἐκ τοῦ μεγέθους σῶμά τι ἀπέρχεται, ὁ αὐτὸς λόγος, ἐκεῖνο πῶς διαιρετόν. Εἰ δὲ μὴ σῶμα ἀλλ’ εἶδός τι χωριστὸν ἢ πάθος ὃ ἀπῆλθεν, καὶ ἔστι τὸ μέγεθος στιγμαὶ ἢ ἁφαὶ τοδὶ παθοῦσαι, ἄτοπον ἐκ μὴ μεγεθῶν μέγεθος εἶναι. Ἔτι δὲ ποῦ ἔσονται, καὶ ἀκίνητοι ἢ κινούμεναι αἱ στιγμαί; ἁφή τε ἀεὶ μία δυοῖν τινων, ὡς ὄντος τινὸς παρὰ τὴν ἁφὴν καὶ τὴν διαίρεσιν καὶ τὴν στιγμήν. Εἰ δή τις θήσεται ὁτιοῦν ἢ ὁπηλικονοῦν σῶμα εἶναι πάντῃ διαιρετόν, πάντα ταῦτα συμβαίνει. Ἔτι ἐὰν διελὼν συνθῶ τὸ ξύλον ἤ τι ἄλλο, πάλιν ἴσον τε καὶ ἕν. Οὐκοῦν οὕτως ἔχει δηλονότι κἂν τέμω τὸ ξύλον καθ’ ὁτιοῦν σημεῖον. Πάντῃ ἄρα διῄρηται δυνάμει. Τί οὖν ἔστι παρὰ τὴν διαίρεσιν; εἰ γὰρ καὶ ἔστι τι πάθος, ἀλλὰ πῶς εἰς ταῦτα διαλύεται καὶ γίνεται ἐκ τούτων; ἢ πῶς χωρίζεται ταῦτα; ὥστ’ εἴπερ ἀδύνατον ἐξ ἁφῶν ἢ στιγμῶν εἶναι τὰ μεγέθη, ἀνάγκη εἶναι σώματα ἀδιαίρετα καὶ μεγέθη. Οὐ μὴν ἀλλὰ καὶ ταῦτα θεμένοις οὐχ ἧττον συμβαίνει ἀδύνατα. Ἔσκεπται δὲ περὶ αὐτῶν ἐν ἑτέροις. Ἀλλὰ ταῦτα πειρατέον λύειν· διὸ πάλιν ἐξ ἀρχῆς τὴν ἀπορίαν λεκτέον.

Τὸ μὲν οὖν ἅπαν σῶμα αἰσθητὸν εἶναι διαιρετὸν καθ’ ὁτιοῦν σημεῖον καὶ ἀδιαίρετον οὐδὲν ἄτοπον· τὸ μὲν γὰρ δυνάμει διαιρετόν, τὸ δ’ ἐντελεχείᾳ ὑπάρξει. Τὸ δ’ εἶναι ἅμα πάντῃ διαιρετὸν δυνάμει ἀδύνατον δόξειεν ἂν εἶναι. Εἰ γὰρ δυνατόν, κἂν γένοιτο, οὐχ ὥστε εἶναι ἅμα ἄμφω ἐντελεχείᾳ ἀδιαίρετον καὶ διῃρημένον, ἀλλὰ διῃρημένον καθ’ ὁτιοῦν σημεῖον. Οὐδὲν ἄρα ἔσται λοιπόν, καὶ ἀσώματον ἐφθαρμένον τὸ σῶμα, καὶ γίνοιτο δ’ ἂν πάλιν ἤτοι ἐκ στιγμῶν ἢ ὅλως ἐξ οὐδενός. Καὶ τοῦτο πῶς δυνατόν; ἀλλὰ μὴν ὅτι γε διαιρεῖται εἰς χωριστὰ καὶ ἀεὶ εἰς ἐλάττω μεγέθη καὶ εἰς ἀπέχοντα καὶ κεχωρισμένα, φανερόν. Οὔτε δὴ κατὰ μέρος διαιροῦντι εἴη ἂν ἄπειρος ἡ θρύψις, οὔτε ἅμα οἷόν τε διαιρεθῆναι κατὰ πᾶν σημεῖον (οὐ γὰρ δυνατόν), ἀλλὰ μέχρι του. Ἀνάγκη ἄρα ἄτομα ἐνυπάρχειν μεγέθη ἀόρατα, ἄλλως τε καὶ εἴπερ ἔσται γένεσις καὶ φθορὰ ἡ μὲν διακρίσει ἡ δὲ συγκρίσει. Ὁ μὲν οὖν ἀναγκάζειν δοκῶν (317a.) λόγος εἶναι μεγέθη ἄτομα οὗτός ἐστιν· ὅτι δὲ λανθάνει παραλογιζόμενος, καὶ ᾗ λανθάνει, λέγωμεν.

Ἐπεὶ γὰρ οὐκ ἔστι στιγμὴ στιγμῆς ἐχομένη, τὸ πάντῃ εἶναι διαιρετὸν ἔστι μὲν ὡς ὑπάρχει τοῖς μεγέθεσιν, ἔστι δ’ ὡς οὔ. Δοκεῖ δ’, ὅταν τοῦτο τεθῇ, καὶ ὁπῃοῦν καὶ πάντῃ στιγμὴν εἶναι, ὥστ’ ἀναγκαῖον εἶναι διαιρεθῆναι τὸ μέγεθος εἰς μηδέν· πάντῃ γὰρ εἶναι στιγμήν, ὥστε ἢ ἐξ ἁφῶν ἢ ἐκ στιγμῶν εἶναι. Τὸ δ’ ἐστὶν ὡς ὑπάρχει πάντῃ, ὅτι μία ὁπῃοῦν ἐστι, καὶ πᾶσαι ὡς ἑκάστη· πλείους δὲ μιᾶς οὐκ εἰσίν· ἐφεξῆς γὰρ οὐκ εἰσίν, ὥστ’ οὐ πάντῃ· εἰ γὰρ κατὰ μέσον διαιρετόν, καὶ κατ’ ἐχομένην στιγμὴν ἔσται διαιρετόν· οὐ γάρ ἐστιν ἐχόμενον σημεῖον σημείου ἢ στιγμὴ στιγμῆς. Τοῦτο δ’ ἐστὶ διαίρεσις ἢ σύνθεσις. Ὥστ’ ἔστι καὶ διάκρισις καὶ σύγκρισις, ἀλλ’ οὔτ’ εἰς ἄτομα καὶ ἐξ ἀτόμων (πολλὰ γὰρ τὰ ἀδύνατα) οὔτε οὕτως ὥστε πάντῃ διαίρεσιν γενέσθαι (εἰ γὰρ ἦν ἐχομένη στιγμὴ στιγμῆς, τοῦτ’ ἂν ἦν), ἀλλ’ εἰς μικρὰ καὶ ἐλάττω ἐστί, καὶ σύγκρισις ἐξ ἐλαττόνων. Ἀλλ’ οὐχ ἡ ἁπλῆ καὶ τελεία γένεσις συγκρίσει καὶ διακρίσει ὥρισται, ὥς τινές φασιν, τὴν δ’ ἐν τῷ συνεχεῖ μεταβολὴν ἀλλοίωσιν. Ἀλλὰ τοῦτ’ ἔστιν ἐν ᾧ σφάλλεται πάντα. Ἔστι γὰρ γένεσις ἁπλῆ καὶ φθορὰ οὐ συγκρίσει καὶ διακρίσει, ἀλλ’ ὅταν μεταβάλλῃ ἐκ τοῦδε εἰς τόδε ὅλον. Οἱ δὲ οἴονται ἀλλοίωσιν πᾶσαν εἶναι τὴν τοιαύτην μεταβολήν· τὸ δὲ διαφέρει. Ἐν γὰρ τῷ ὑποκειμένῳ τὸ μέν ἐστι κατὰ τὸν λόγον, τὸ δὲ κατὰ τὴν ὕλην.

Ὅταν μὲν οὖν ἐν τούτοις ᾖ ἡ μεταβολή, γένεσις ἔσται ἢ φθορά, ὅταν δ’ ἐν τοῖς πάθεσι καὶ κατὰ συμβεβηκός, ἀλλοίωσις. Διακρινόμενα δὲ καὶ συγκρινόμενα εὔφθαρτα γίνεται. Ἐὰν μὲν γὰρ εἰς ἐλάττω ὑδάτια διαιρεθῇ, θᾶττον ἀὴρ γίνεται, ἐὰν δὲ συγκριθῇ, βραδύτερον. Μᾶλλον δ’ ἔσται δῆλον ἐν τοῖς ὕστερον. Νῦν δὲ τοσοῦτον διωρίσθω, ὅτι ἀδύνατον εἶναι τὴν γένεσιν σύγκρισιν, οἵαν δή τινές φασιν.

Κεφάλαιο 3

Διωρισμένων δὲ τούτων, πρῶτον θεωρητέον πότερόν ἐστί τι γινόμενον ἁπλῶς καὶ φθειρόμενον, ἢ κυρίως μὲν οὐδέν, ἀεὶ δ’ ἔκ τινος καὶ τί, λέγω δ’ οἷον ἐκ κάμνοντος ὑγιαῖνον καὶ κάμνον ἐξ ὑγιαίνοντος, ἢ μικρὸν ἐκ μεγάλου καὶ (317b.) μέγα ἐκ μικροῦ, καὶ τἆλλα πάντα τοῦτον τὸν τρόπον. Εἰ γὰρ ἁπλῶς ἔσται γένεσις, ἁπλῶς ἄν τι γίνοιτο ἐκ μὴ ὄντος, ὥστ’ ἀληθὲς ἂν εἴη λέγειν ὅτι ὑπάρχει τισὶ τὸ μὴ ὄν. Τὶς μὲν γὰρ γένεσις ἐκ μὴ ὄντος τινός, οἷον ἐκ μὴ λευκοῦ ἢ μὴ καλοῦ, ἡ δὲ ἁπλῆ ἐξ ἁπλῶς μὴ ὄντος. Τὸ δ’ ἁπλῶς ἤτοι τὸ πρῶτον σημαίνει καθ’ ἑκάστην κατηγορίαν τοῦ ὄντος, ἢ τὸ καθόλου καὶ τὸ πάντα περιέχον. Εἰ μὲν οὖν τὸ πρῶτον, οὐσίας ἔσται γένεσις ἐκ μὴ οὐσίας. Ὧι δὲ μὴ ὑπάρχει οὐσία μηδὲ τὸ τόδε, δῆλον ὡς οὐδὲ τῶν ἄλλων οὐδεμία κατηγοριῶν, οἷον οὔτε ποιὸν οὔτε ποσὸν οὔτε τὸ ποῦ· χωριστὰ γὰρ ἂν εἴη τὰ πάθη τῶν οὐσιῶν. Εἰ δὲ τὸ μὴ ὂν ὅλως, ἀπόφασις ἔσται καθόλου πάντων, ὥστε ἐκ μηδενὸς ἀνάγκη γίνεσθαι τὸ γινόμενον. Περὶ μὲν οὖν τούτων ἐν ἄλλοις τε διηπόρηται καὶ διώρισται τοῖς λόγοις ἐπὶ πλεῖον· συντόμως δὲ καὶ νῦν λεκτέον, ὅτι τρόπον μέν τινα ἐκ μὴ ὄντος ἁπλῶς γίνεται, τρόπον δὲ ἄλλον ἐξ ὄντος ἀεί· τὸ γὰρ δυνάμει ὂν ἐντελεχείᾳ δὲ μὴ ὂν ἀνάγκη προυπάρχειν λεγόμενον ἀμφοτέρως. Ὃ δὲ καὶ τούτων διωρισμένων ἔχει θαυμαστὴν ἀπορίαν, πάλιν ἐπαναποδιστέον, πῶς ἔστιν ἁπλῆ γένεσις, εἴτ’ ἐκ δυνάμει ὄντος οὖσα εἴτε καί πως ἄλλως. Ἀπορήσειε γὰρ ἄν τις ἆρ’ ἔστιν οὐσίας γένεσις καὶ τοῦ τοῦδε, ἀλλὰ μὴ τοῦ τοιοῦδε καὶ τοσοῦδε καὶ ποῦ. Τὸν αὐτὸν δὲ τρόπον καὶ περὶ φθορᾶς. Εἰ γάρ τι γίνεται, δῆλον ὡς ἔσται δυνάμει τις οὐσία, ἐντελεχείᾳ δ’ οὔ, ἐξ ἧς ἡ γένεσις ἔσται καὶ εἰς ἣν ἀνάγκη μεταβάλλειν τὸ φθειρόμενον. Πότερον οὖν ὑπάρξει τι τούτῳ τῶν ἄλλων ἐντελεχείᾳ; λέγω δ’ οἷον ἆρ’ ἔσται ποσὸν ἢ ποιὸν ἢ ποῦ τὸ δυνάμει μόνον τόδε καὶ ὄν, ἁπλῶς δὲ μὴ τόδε μηδ’ ὄν; εἰ γὰρ μηδὲν ἀλλὰ πάντα δυνάμει, χωριστόν τε συμβαίνει τὸ μὴ οὕτως ὄν, καὶ ἔτι, ὃ μάλιστα φοβούμενοι διετέλεσαν οἱ πρῶτοι φιλοσοφήσαντες, τὸ ἐκ μηδενὸς γίνεσθαι προυπάρχοντος· εἰ δὲ τὸ μὲν εἶναι τόδε τι ἢ οὐσίαν οὐχ ὑπάρξει, τῶν δ’ ἄλλων τι τῶν εἰρημένων, ἔσται, καθάπερ εἴπομεν, χωριστὰ τὰ πάθη τῶν οὐσιῶν.

Περί τε τούτων οὖν ὅσον ἐνδέχεται πραγματευτέον, καὶ τίς αἰτία τοῦ γένεσιν ἀεὶ εἶναι, καὶ τὴν ἁπλῆν καὶ τὴν κατὰ μέρος. (318a.) Οὔσης δ’ αἰτίας μιᾶς μὲν ὅθεν τὴν ἀρχὴν εἶναί φαμεν τῆς κινήσεως, μιᾶς δὲ τῆς ὕλης, τὴν τοιαύτην αἰτίαν λεκτέον.

Περὶ μὲν γὰρ ἐκείνης εἴρηται πρότερον ἐν τοῖς περὶ κινήσεως λόγοις, ὅτι ἐστὶ τὸ μὲν ἀκίνητον τὸν ἅπαντα χρόνον, τὸ δὲ κινούμενον ἀεί. Τούτων δὲ περὶ μὲν τῆς ἀκινήτου ἀρχῆς τῆς ἑτέρας καὶ προτέρας διελεῖν ἐστι φιλοσοφίας ἔργον· περὶ δὲ τοῦ διὰ τὸ συνεχῶς κινεῖσθαι τἆλλα κινοῦντος ὕστερον ἀποδοτέον, τί τοιοῦτον τῶν καθ' ἕκαστα λεγομένων αἴτιόν ἐστιν, νῦν δὲ τὴν ὡς ἐν ὕλης εἴδει τιθεμένην αἰτίαν εἴπωμεν, δι' ἣν ἀεὶ φθορὰ καὶ γένεσις οὐχ ὑπολείπει τὴν φύσιν· ἅμα γὰρ ἂν ἴσως τοῦτο γένοιτο δῆλον, καὶ περὶ τοῦ νῦν ἀπορηθέντος, πῶς ποτὲ δεῖ λέγειν καὶ περὶ τῆς ἁπλῆς φθορᾶς καὶ γενέσεως. Ἔχει δ' ἀπορίαν ἱκανὴν καὶ τί τὸ αἴτιον τοῦ συνείρειν τὴν γένεσιν, εἴπερ τὸ φθειρόμενον εἰς τὸ μὴ ὂν ἀπέρχεται, τὸ δὲ μὴ ὂν μηδέν ἐστιν· οὔτε γὰρ τὶ οὔτε ποιὸν οὔτε ποσὸν οὔτε ποῦ τὸ μὴ ὄν. Εἴπερ οὖν ἀεί τι τῶν ὄντων ἀπέρχεται, διὰ τί ποτ' οὐκ ἀνήλωται πάλαι καὶ φροῦδον τὸ πᾶν, εἴ γε πεπερασμένον ἦν ἐξ οὗ γίνεται τῶν γινομένων ἕκαστον; οὐ γὰρ δὴ διὰ τὸ ἄπειρον εἶναι ἐξ οὗ γίνεται, οὐχ ὑπολείπει· τοῦτο γὰρ ἀδύνατον. Κατ' ἐνέργειαν μὲν γὰρ οὐδέν ἐστιν ἄπειρον, δυνάμει δ' ἐπὶ τὴν διαίρεσιν, ὥστ' ἔδει ταύτην εἶναι μόνην τὴν μὴ ὑπολείπουσαν τῷ γίνεσθαί τι ἀεὶ ἔλαττον· νῦν δὲ τοῦτο οὐχ ὁρῶμεν. Ἆρ' οὖν διὰ τὸ τὴν τοῦδε φθορὰν ἄλλου εἶναι γένεσιν καὶ τὴν τοῦδε γένεσιν ἄλλου εἶναι φθορὰν ἄπαυστον ἀναγκαῖον εἶναι τὴν μεταβολήν;

Περὶ μὲν οὖν τοῦ γένεσιν εἶναι καὶ φθορὰν ὁμοίως περὶ ἕκαστον τῶν ὄντων, ταύτην οἰητέον εἶναι πᾶσιν ἱκανὴν αἰτίαν. Διὰ τί δέ ποτε τὰ μὲν ἁπλῶς γίνεσθαι λέγεται καὶ φθείρεσθαι τὰ δ' οὐχ ἁπλῶς, πάλιν σκεπτέον, εἴπερ τὸ αὐτό ἐστι γένεσις μὲν τουδὶ φθορὰ δὲ τουδί, καὶ φθορὰ μὲν τουδὶ γένεσις δὲ τουδί· ζητεῖ γάρ τινα τοῦτο λόγον. Λέγομεν γὰρ ὅτι φθείρεται νῦν ἁπλῶς, καὶ οὐ μόνον τοδί· καὶ αὕτη μὲν γένεσις ἁπλῶς, αὕτη δὲ φθορά. Τοδὶ δὲ γίνεται μέν τι, γίνεται δ' ἁπλῶς οὔ· φαμὲν γὰρ τὸν μανθάνοντα γίνεσθαι μὲν ἐπιστήμονα, γίνεσθαι δ' ἁπλῶς οὔ. Καθάπερ οὖν πολλάκις (318b.) διορίζομεν λέγοντες ὅτι τὰ μὲν τόδε τι σημαίνει τὰ δ' οὔ, διὰ τοῦτο συμβαίνει τὸ ζητούμενον.

Διαφέρει γὰρ εἰς ἃ μεταβάλλει τὸ μεταβάλλον, οἷον ἴσως ἡ μὲν εἰς πῦρ ὁδὸς γένεσις μὲν ἁπλῆ, φθορὰ δέ <τίς> τινός ἐστιν, οἷον γῆς, ἡ δὲ γῆς γένεσις τὶς γένεσις, γένεσις δ' οὐχ ἁπλῶς, φθορὰ δ' ἁπλῶς, οἷον πυρός, ὥσπερ Παρμενίδης λέγει δύο, τὸ ὂν καὶ τὸ μὴ ὂν εἶναι φάσκων πῦρ καὶ γῆν. Τὸ δὴ ταῦτα ἢ τοιαῦθ' ἕτερα ὑποτίθεσθαι διαφέρει οὐδέν· τὸν γὰρ τρόπον ζητοῦμεν, ἀλλ' οὐ τὸ ὑποκείμενον.

Ἡ μὲν οὖν εἰς τὸ μὴ ὂν ἁπλῶς ὁδὸς φθορὰ ἁπλῆ, ἡ δ' εἰς τὸ ἁπλῶς ὂν γένεσις ἁπλῆ. Οἷς οὖν διώρισται εἴτε πυρὶ καὶ γῇ εἴτε ἄλλοις τισί, τούτων ἔσται τὸ μὲν ὂν τὸ δὲ μὴ ὄν. Ἕνα μὲν οὖν τρόπον τούτῳ διοίσει τὸ ἁπλῶς τι γίνεσθαι καὶ φθείρεσθαι τοῦ μὴ ἁπλῶς, ἄλλον δὲ τῇ ὕλῃ ὁποία τις ἂν ᾖ· ἧς μὲν γὰρ μᾶλλον αἱ διαφοραὶ τόδε τι σημαίνουσι, μᾶλλον οὐσία, ἧς δὲ στέρησιν, μὴ ὄν, οἷον τὸ μὲν θερμὸν κατηγορία τις καὶ εἶδος, ἡ δὲ ψυχρότης στέρησις, διαφέρουσι δὲ γῆ καὶ πῦρ καὶ ταύταις ταῖς διαφοραῖς. Δοκεῖ δὲ μᾶλλον τοῖς πολλοῖς τῷ αἰσθητῷ καὶ μὴ αἰσθητῷ διαφέρειν· ὅταν μὲν γὰρ εἰς αἰσθητὴν μεταβάλλῃ ὕλην, γίνεσθαί φασιν, ὅταν δ’ εἰς ἀφανῆ, φθείρεσθαι· τὸ γὰρ ὂν καὶ τὸ μὴ ὂν τῷ αἰσθάνεσθαι καὶ τῷ μὴ αἰσθάνεσθαι διορίζουσιν, ὥσπερ τὸ μὲν ἐπιστητὸν ὄν, τὸ δ’ ἄγνωστον μὴ ὄν· ἡ γὰρ αἴσθησις ἐπιστήμης ἔχει δύναμιν. Καθάπερ οὖν αὐτοὶ τῷ αἰσθάνεσθαι ἢ τῷ δύνασθαι καὶ ζῆν καὶ εἶναι νομίζουσιν, οὕτω καὶ τὰ πράγματα, τρόπον τινὰ διώκοντες τἀληθές, αὐτὸ δὲ λέγοντες οὐκ ἀληθές. Συμβαίνει δὴ κατὰ δόξαν καὶ κατ’ ἀλήθειαν ἄλλως τὸ γίνεσθαί τε ἁπλῶς καὶ τὸ φθείρεσθαι· πνεῦμα γὰρ καὶ ἀὴρ κατὰ μὲν τὴν αἴσθησιν ἧττόν ἐστιν (διὸ καὶ τὰ φθειρόμενα ἁπλῶς τῇ εἰς ταῦτα μεταβολῇ φθείρεσθαι λέγουσιν, γίνεσθαι δ’ ὅταν εἰς ἁπτὸν καὶ εἰς γῆν μεταβάλλῃ), κατὰ δ’ ἀλήθειαν μᾶλλον τόδε τι καὶ εἶδος ταῦτα τῆς γῆς.

Τοῦ μὲν οὖν εἶναι τὴν μὲν ἁπλῆν γένεσιν φθορὰν οὖσάν τινος, τὴν δὲ φθορὰν [τὴν] ἁπλῆν γένεσιν οὖσάν τινος, εἴρηται τὸ αἴτιον· διὰ γὰρ τὸ τὴν ὕλην διαφέρειν ἢ τῷ οὐσίαν (319a.) εἶναι ἢ τῷ μή, ἢ τῷ τὴν μὲν μᾶλλον τὴν δὲ μή, ἢ τῷ τὴν μὲν μᾶλλον αἰσθητὴν εἶναι τὴν ὕλην ἐξ ἧς καὶ εἰς ἥν, τὴν δὲ ἧττον εἶναι. Τοῦ δὲ τὰ μὲν ἁπλῶς γίνεσθαι λέγεσθαι, τὰ δέ τι μόνον, μὴ τῇ ἐξ ἀλλήλων γενέσει καθ’ ὃν εἴπομεν νῦν τρόπον· νῦν μὲν γὰρ τοσοῦτον διώρισται, τί δή ποτε πάσης γενέσεως οὔσης φθορᾶς ἄλλου, καὶ πάσης φθορᾶς οὔσης ἑτέρου τινὸς γενέσεως, οὐχ ὁμοίως ἀποδίδομεν τὸ γίνεσθαι καὶ τὸ φθείρεσθαι τοῖς εἰς ἄλληλα μεταβάλλουσιν· τὸ δ’ ὕστερον εἰρημένον οὐ τοῦτο διαπορεῖ, ἀλλὰ τί ποτε τὸ μανθάνον μὲν οὐ λέγεται ἁπλῶς γίνεσθαι ἀλλὰ γίνεσθαι ἐπιστῆμον, τὸ δὲ φυόμενον γίνεσθαι. Ταῦτα δὲ διώρισται ταῖς κατηγορίαις· τὰ μὲν γὰρ τόδε τι σημαίνει, τὰ δὲ τοιόνδε, τὰ δὲ ποσόν.

Ὅσα οὖν μὴ οὐσίαν σημαίνει, οὐ λέγεται ἁπλῶς, ἀλλά τι γίνεσθαι. Οὐ μὴν ἀλλ’ ὁμοίως ἐν πᾶσι γένεσις μὲν κατὰ τὰ ἐν τῇ ἑτέρᾳ συστοιχίᾳ λέγεται, οἷον ἐν μὲν οὐσίᾳ ἐὰν πῦρ ἀλλ’ οὐκ ἐὰν γῆ, ἐν δὲ τῷ ποιῷ ἐὰν ἐπιστῆμον ἀλλ’ οὐχ ὅταν ἀνεπιστῆμον.

Περὶ μὲν οὖν τοῦ τὰ μὲν ἁπλῶς γίνεσθαι τὰ δὲ μή, καὶ ὅλως καὶ ἐν ταῖς οὐσίαις αὐταῖς, εἴρηται, καὶ διότι τοῦ γένεσιν εἶναι συνεχῶς αἰτία ὡς ὕλη τὸ ὑποκείμενον, ὅτι μεταβλητικόν ἐστι εἰς τἀναντία, καὶ ἔστιν ἡ θατέρου γένεσις ἀεὶ ἐπὶ τῶν οὐσιῶν ἄλλου φθορὰ καὶ ἡ ἄλλου φθορὰ ἄλλου γένεσις. Ἀλλὰ μὴν οὐδ’ ἀπορῆσαι δεῖ διὰ τί γίνεται ἀεὶ ἀπολλυμένων· ὥσπερ γὰρ καὶ τὸ φθείρεσθαι ἁπλῶς φασιν, ὅταν εἰς ἀναίσθητον ἔλθῃ καὶ τὸ μὴ ὄν, ὁμοίως καὶ γίνεσθαι ἐκ μὴ ὄντος φασίν, ὅταν ἐξ ἀναισθήτου. Εἴτ’ οὖν ὄντος τινὸς τοῦ ὑποκειμένου εἴτε μή, γίνεται ἐκ μὴ ὄντος. Ὥστε ὁμοίως καὶ γίνεται ἐκ μὴ ὄντος καὶ φθείρεται εἰς τὸ μὴ ὄν. Εἰκότως οὖν οὐχ ὑπολείπει· ἡ γὰρ γένεσις φθορὰ τοῦ μὴ ὄντος, ἡ δὲ φθορὰ γένεσις τοῦ μὴ ὄντος. Ἀλλὰ τοῦτο τὸ μὴ ὂν ἁπλῶς ἀπορήσειεν ἄν τις πότερον τὸ ἕτερον τῶν ἐναντίων ἐστίν, οἷον γῆ καὶ τὸ βαρὺ μὴ ὄν, πῦρ δὲ καὶ τὸ κοῦφον τὸ ὄν, ἢ οὔ, ἀλλ’ ἐστὶ καὶ γῆ τὸ ὄν, τὸ δὲ μὴ ὂν ὕλη ἡ τῆς γῆς, καὶ πυρὸς ὡσαύτως. Καὶ ἆρά γε ἑτέρα ἑκατέρου ἡ ὕλη, ἢ οὐκ ἂν γί(319b.) νοιτο ἐξ ἀλλήλων οὐδ’ ἐξ ἐναντίων; τούτοις γὰρ ὑπάρχει τἀναντία, πυρί, γῇ, ὕδατι, ἀέρι. Ἢ ἔστι μὲν ὡς ἡ αὐτή, ἔστι δ’ ὡς ἡ ἑτέρα· ὃ μὲν γάρ ποτε ὂν ὑπόκειται τὸ αὐτό, τὸ δ’ εἶναι οὐ τὸ αὐτό. Περὶ μὲν οὖν τούτων ἐπὶ τοσοῦτον εἰρήσθω.

Κεφάλαιο 4

Περὶ δὲ γενέσεως καὶ ἀλλοιώσεως λέγωμεν τί διαφέρουσιν· φαμὲν γὰρ ἑτέρας εἶναι ταύτας τὰς μεταβολὰς ἀλλήλων. Ἐπειδὴ οὖν ἐστί τι τὸ ὑποκείμενον καὶ ἕτερον τὸ πάθος ὃ κατὰ τοῦ ὑποκειμένου λέγεσθαι πέφυκεν, καὶ ἔστι μεταβολὴ ἑκατέρου τούτων, ἀλλοίωσις μέν ἐστιν, ὅταν ὑπομένοντος τοῦ ὑποκειμένου, αἰσθητοῦ ὄντος, μεταβάλλῃ ἐν τοῖς αὑτοῦ πάθεσιν, ἢ ἐναντίοις οὖσιν ἢ μεταξύ, οἷον τὸ σῶμα ὑγιαίνει καὶ πάλιν κάμνει ὑπομένον γε ταὐτό, καὶ ὁ χαλκὸς στρογγύλος, ὁτὲ δὲ γωνιοειδὴς ὁ αὐτός γε ὤν. Ὅταν δ’ ὅλον μεταβάλλῃ μὴ ὑπομένοντος αἰσθητοῦ τινὸς ὡς ὑποκειμένου τοῦ αὐτοῦ, ἀλλ’ οἷον ἐκ τῆς γονῆς αἷμα πάσης ἢ ἐξ ὕδατος ἀὴρ ἢ ἐξ ἀέρος παντὸς ὕδωρ, γένεσις ἤδη τὸ τοιοῦτον, τοῦ δὲ φθορά, μάλιστα δέ, ἂν ἡ μεταβολὴ γίνηται ἐξ ἀναισθήτου εἰς αἰσθητὸν ἢ ἁφῇ ἢ πάσαις ταῖς αἰσθήσεσιν, οἷον ὅταν ὕδωρ γένηται ἢ φθαρῇ εἰς ἀέρα· ὁ γὰρ ἀὴρ ἐπιεικῶς ἀναίσθητον. Ἐν δὲ τούτοις ἄν τι ὑπομένῃ πάθος τὸ αὐτὸ ἐναντιώσεως ἐν τῷ γενομένῳ καὶ τῷ φθαρέντι, οἷον ὅταν ἐξ ἀέρος ὕδωρ, εἰ ἄμφω διαφανῆ ἢ ψυχρά, οὐ δεῖ τούτου θάτερον πάθος εἶναι εἰς ὃ μεταβάλλει. Εἰ δὲ μή, ἔσται ἀλλοίωσις, οἷον ὁ μουσικὸς ἄνθρωπος ἐφθάρη, ἄνθρωπος δ’ ἄμουσος ἐγένετο, ὁ δ’ ἄνθρωπος ὑπομένει τὸ αὐτό. Εἰ μὲν οὖν τούτου μὴ πάθος ἦν καθ’ αὑτὸ ἡ μουσικὴ καὶ ἡ ἀμουσία, τοῦ μὲν γένεσις ἦν ἄν, τοῦ δὲ φθορά· διὸ ἀνθρώπου μὲν ταῦτα πάθη, ἀνθρώπου δὲ μουσικοῦ καὶ ἀνθρώπου ἀμούσου γένεσις καὶ φθορά· νῦν δὲ πάθος τοῦτο τοῦ ὑπομένοντος. Διὸ ἀλλοίωσις τὰ τοιαῦτα. Ὅταν μὲν οὖν κατὰ τὸ ποσὸν ᾖ ἡ μεταβολὴ τῆς ἐναντιώσεως, αὔξη καὶ φθίσις, ὅταν δὲ κατὰ τόπον, φορά, ὅταν δὲ κατὰ πάθος καὶ τὸ ποιόν, ἀλλοίωσις, ὅταν δὲ μηδὲν (320a.) ὑπομένῃ οὗ θάτερον πάθος ἢ συμβεβηκὸς ὅλως, γένεσις, τὸ δὲ φθορά. Ἐστὶ δὲ ὕλη μάλιστα μὲν καὶ κυρίως τὸ ὑποκείμενον γενέσεως καὶ φθορᾶς δεκτικόν, τρόπον δέ τινα καὶ τὸ ταῖς ἄλλαις μεταβολαῖς, ὅτι πάντα δεκτικὰ τὰ ὑποκείμενα ἐναντιώσεών τινων. Περὶ μὲν οὖν γενέσεως, εἴτε ἔστιν εἴτε μή, καὶ πῶς ἔστι, καὶ περὶ ἀλλοιώσεως διωρίσθω τοῦτον τὸν τρόπον.

Κεφάλαιο 5

Περὶ δὲ αὐξήσεως λοιπὸν εἰπεῖν, τί τε διαφέρει γενέσεως καὶ ἀλλοιώσεως, καὶ πῶς αὐξάνεται τῶν αὐξανομένων ἕκαστον καὶ φθίνει ὁτιοῦν τῶν φθινόντων. Σκεπτέον δὴ πρῶτον πότερον μόνως ἐν τῷ περὶ ὅ ἐστιν αὐτῶν ἡ πρὸς ἄλληλα διαφορά, οἷον ὅτι ἡ μὲν ἐκ τοῦδε εἰς τόδε μεταβολή, οἷον ἐκ δυνάμει οὐσίας εἰς ἐντελεχείᾳ οὐσίαν, γένεσίς ἐστιν, ἡ δὲ περὶ μέγεθος αὔξησις, ἡ δὲ περὶ πάθος ἀλλοίωσις· ἀμφότερα δὲ ἐκ δυνάμει ὄντων εἰς ἐντελέχειαν μεταβολὴ τῶν εἰρημένων ἐστίν, ἢ καὶ ὁ τρόπος διαφέρει τῆς μεταβολῆς· φαίνεται γὰρ τὸ μὲν ἀλλοιούμενον οὐκ ἐξ ἀνάγκης μεταβάλλον κατὰ τόπον, οὐδὲ τὸ γινόμενον, τὸ δ’ αὐξανόμενον καὶ τὸ φθῖνον, ἄλλον δὲ τρόπον τοῦ φερομένου. Τὸ μὲν γὰρ φερόμενον ὅλον ἀλλάττει τόπον, τὸ δ’ αὐξανόμενον ὥσπερ τὸ ἐλαυνόμενον· τούτου γὰρ μένοντος τὰ μόρια μεταβάλλει κατὰ τόπον, οὐχ ὥσπερ τὰ τῆς σφαίρας· τὰ μὲν γὰρ ἐν τῷ ἴσῳ τόπῳ μεταβάλλει τοῦ ὅλου μένοντος, τὰ δὲ τοῦ αὐξανομένου ἀεὶ ἐπὶ πλείω τόπον, ἐπ’ ἐλάττω δὲ τὰ τοῦ φθίνοντος. Ὅτι μὲν οὖν ἡ μεταβολὴ διαφέρει οὐ μόνον περὶ ὃ ἀλλὰ καὶ ὡς τοῦ τε γινομένου καὶ ἀλλοιουμένου καὶ αὐξανομένου, δῆλον. Περὶ δὲ ὅ ἐστιν ἡ μεταβολὴ ἡ τῆς αὐξήσεως καὶ ἡ τῆς φθίσεως (περὶ μέγεθος δὲ δοκεῖ εἶναι τὸ αὐξάνεσθαι καὶ φθίνειν), ποτέρως ὑποληπτέον, πότερον ἐκ δυνάμει μὲν μεγέθους καὶ σώματος, ἐντελεχείᾳ δ’ ἀσωμάτου καὶ ἀμεγέθους γίνεσθαι σῶμα καὶ μέγεθος, καὶ τούτου διχῶς ἐνδεχομένου λέγειν, ποτέρως ἡ αὔξησις γίνεται; πότερον ἐκ κεχωρισμένης αὐτῆς καθ’ αὐτὴν τῆς ὕλης, ἢ ἐνυπαρχούσης ἐν ἄλλῳ σώματι; ἢ ἀδύνατον ἀμφοτέρως. Χω(320b.) ριστὴ μὲν γὰρ οὖσα ἢ οὐδένα καθέξει τόπον, [ἢ] οἷον στιγμή τις, ἢ κενὸν ἔσται καὶ σῶμα οὐκ αἰσθητόν. Τούτων δὲ τὸ μὲν οὐκ ἐνδέχεται, τὸ δὲ ἀναγκαῖον ἔν τινι εἶναι· ἀεὶ γάρ που ἔσται τὸ γινόμενον ἐξ αὐτοῦ, ὥστε κἀκεῖνο, ἢ καθ’ αὐτὸ ἢ κατὰ συμβεβηκός. Ἀλλὰ μὴν εἴ γ’ ἔν τινι ὑπάρξει, εἰ μὲν κεχωρισμένον οὕτως ὥστε μὴ ἐκείνου καθ’ αὐτὸ ἢ κατὰ συμβεβηκός τι εἶναι, συμβήσεται πολλὰ καὶ ἀδύνατα. Λέγω δ’ οἷον εἰ γίνεται ἀὴρ ἐξ ὕδατος, οὐ τοῦ ὕδατος ἔσται μεταβάλλοντος, ἀλλὰ διὰ τὸ ὥσπερ ἐν ἀγγείῳ τῷ ὕδατι ἐνεῖναι τὴν ὕλην αὐτοῦ. Ἀπείρους γὰρ οὐδὲν κωλύει ὕλας εἶναι, ὥστε καὶ γίνεσθαι ἐντελεχείᾳ. Ἔτι δ’ οὐδ’ οὕτω φαίνεται γινόμενος ἀὴρ ἐξ ὕδατος, οἷον ἐξιὼν ὑπομένοντος. Βέλτιον τοίνυν ποιεῖν πᾶσιν ἀχώριστον τὴν ὕλην ὡς οὖσαν τὴν αὐτὴν καὶ μίαν τῷ ἀριθμῷ, τῷ λόγῳ δὲ μὴ μίαν. Ἀλλὰ μὴν οὐδὲ στιγμὰς θετέον οὐδὲ γραμμὰς τὴν τοῦ σώματος ὕλην διὰ τὰς αὐτὰς αἰτίας. Ἐκεῖνο

δὲ οὖ ταῦτα ἔσχατα ἡ ὕλη, ἣν οὐδέποτ’ ἄνευ πάθους οἷόν τε εἶναι οὐδ’ ἄνευ μορφῆς.

Γίνεται μὲν οὖν ἁπλῶς ἕτερον ἐξ ἑτέρου, ὥσπερ καὶ ἐν ἄλλοις διώρισται, καὶ ὑπό τινος δὲ ἐντελεχείᾳ ὄντος, ἢ ὁμοιοειδοῦς ἢ ὁμογενοῦς, οἷον πῦρ ὑπὸ πυρὸς ἢ ἄνθρωπος ὑπ’ ἀνθρώπου, ἢ ὑπ’ ἐντελεχείας· σκληρὸν γὰρ οὐχ ὑπὸ σκληροῦ γίνεται.

Ἐπεὶ δ’ ἐστὶ καὶ οὐσίας ὕλη σωματικῆς, σώματος δ’ ἤδη τοιουδί (σῶμα γὰρ κοινὸν οὐδέν), ἡ αὐτὴ καὶ μεγέθους καὶ πάθους ἐστί, τῷ μὲν λόγῳ χωριστή, τόπῳ δ’ οὐ χωριστή, εἰ μὴ καὶ τὰ πάθη χωριστά.

Φανερὸν δὴ ἐκ τῶν διηπορημένων ὅτι οὐκ ἔστιν ἡ αὔξησις μεταβολὴ ἐκ δυνάμει μεγέθους, ἐντελεχείᾳ δὲ μηδὲν ἔχοντος μέγεθος· χωριστὸν γὰρ ἂν εἴη τὸ κενόν, τοῦτο δ’ ὅτι ἀδύνατον, εἴρηται ἐν ἑτέροις πρότερον. Ἔτι δ’ ἥ γε τοιαύτη μεταβολὴ οὐκ αὐξήσεως ἴδιος ἀλλὰ γενέσεως ὅλως. Ἡ γὰρ αὔξησίς ἐστι τοῦ ἐνυπάρχοντος μεγέθους ἐπίδοσις, ἡ δὲ φθίσις μείωσις. Διὸ δὴ ἔχειν τι δεῖ μέγεθος τὸ αὐξανόμενον, ὥστ’ οὐκ ἐξ ἀμεγέθους ὕλης δεῖ εἶναι τὴν αὔξησιν εἰς ἐντελέχειαν μεγέθους· γένεσις γὰρ ἂν εἴη σώματος μᾶλλον, οὐκ αὔξησις.

Ληπτέον δὴ μᾶλλον οἷον ἁπτομένους (321a.) τῆς ζητήσεως ἐξ ἀρχῆς, ποίου τινὸς ὄντος τοῦ αὐξάνεσθαι ἢ τοῦ φθίνειν τὰ αἴτια ζητοῦμεν. Φαίνεται δὴ τοῦ αὐξανομένου ὁτιοῦν μέρος ηὐξῆσθαι, ὁμοίως δὲ καὶ ἐν τῷ φθίνειν ἔλαττον γεγονέναι, ἔτι δὲ προσιόντος τινὸς αὐξάνεσθαι καὶ ἀπιόντος φθίνειν. Ἀναγκαῖον δὴ ἢ ἀσωμάτῳ αὐξάνεσθαι ἢ σώματι· εἰ μὲν οὖν ἀσωμάτῳ, ἔσται χωριστὸν τὸ κενόν· ἀδύνατον δὲ μεγέθους ὕλην εἶναι χωριστήν, ὥσπερ εἴρηται πρότερον. Εἰ δὲ σώματι, δύο ἐν τῷ αὐτῷ σώματα τόπῳ ἔσται, τό τε αὐξόμενον καὶ τὸ αὖξον· ἔστι δὲ καὶ τοῦτο ἀδύνατον. Ἀλλὰ μὴν οὐδ’ οὕτως ἐνδέχεται λέγειν γίνεσθαι τὴν αὔξησιν ἢ τὴν φθίσιν, ὥσπερ ὅταν ἐξ ὕδατος ἀήρ· τότε γὰρ μείζων ὁ ὄγκος γέγονεν· οὐ γὰρ αὔξησις τοῦτο ἀλλὰ γένεσις μὲν τοῦ εἰς ὃ μεταβάλλει ἔσται, φθορὰ δὲ τοῦ ἐναντίου, αὔξησις δὲ οὐδετέρου, ἀλλ’ ἢ οὐδενὸς ἢ εἴ τι κοινὸν ἀμφοῖν ὑπάρχει, τῷ γινομένῳ καὶ τῷ φθαρέντι, οἷον εἰ σῶμα. Τὸ δ’ ὕδωρ οὐκ ηὔξηται οὐδ’ ὁ ἀήρ, ἀλλὰ τὸ μὲν ἀπόλωλε τὸ δὲ γέγονεν· τὸ σῶμα δέ, εἴπερ, ηὔξηται. Ἀλλὰ καὶ τοῦτ’ ἀδύνατον· δεῖ γὰρ σῴζειν τῷ λόγῳ τὰ ὑπάρχοντα τῷ αὐξανομένῳ καὶ φθίνοντι. Ταῦτα δὲ τρία ἐστίν, ὧν ἓν μέν ἐστι τὸ ὁτιοῦν μέρος μεῖζον γίνεσθαι τοῦ αὐξανομένου μεγέθους, οἷον εἰ σὰρξ τῆς σαρκός, καὶ προσιόντος τινός, καὶ τρίτον σωζομένου τοῦ αὐξανομένου καὶ ὑπομένοντος· ἐν μὲν γὰρ τῷ γίνεσθαί τι ἁπλῶς ἢ φθείρεσθαι οὐχ ὑπομένει,

ἐν δὲ τῷ ἀλλοιοῦσθαι ἢ αὐξάνεσθαι ἢ φθίνειν ὑπομένει τὸ αὐτὸ τὸ αὐξανόμενον καὶ ἀλλοιούμενον.

Ἀλλ’ ἔνθα μὲν τὸ πάθος ἔνθα δὲ τὸ μέγεθος τὸ αὐτὸ οὐ μένει. Εἰ δὴ ἔσται ἡ εἰρημένη αὔξησις, ἐνδέχοιτ’ ἂν μηδενός γε προσιόντος μηδὲ ὑπομένοντος αὐξάνεσθαι καὶ μηδενὸς ἀπιόντος φθίνειν καὶ μὴ ὑπομένειν τὸ αὐξανόμενον. Ἀλλὰ δεῖ τοῦτο σώζειν· ὑπόκειται γὰρ ἡ αὔξησις τοιοῦτον.

Ἀπορήσειε δ’ ἄν τις καὶ τί ἐστι τὸ αὐξανόμενον, πότερον ᾧ προστίθεταί τι, οἷον εἰ τὴν κνήμην αὐξάνει, αὕτη μείζων, ᾧ δὲ αὐξάνει, ἡ τροφή, οὔ. Διὰ τί δὴ οὖν οὐκ ἄμφω ηὔξηται; μεῖζον γὰρ καὶ ὃ καὶ ᾧ, ὥσπερ ὅταν μίξῃς οἶνον ὕδατι· ὁμοίως γὰρ πλεῖον ἑκάτερον. Ἢ ὅτι τοῦ μὲν μένει ἡ οὐσία, τοῦ δ’ οὔ, οἷον τῆς τροφῆς, ἐπεὶ καὶ ἐνταῦθα τὸ ἐπικρατοῦν λέγεται ἐν (321b.) τῇ μίξει, οἷον ὅτι οἶνος· ποιεῖ γὰρ τὸ τοῦ οἴνου ἔργον ἀλλ’ οὐ τὸ τοῦ ὕδατος τὸ συνόλον μίγμα.

Ὁμοίως δὲ καὶ ἐπ’ ἀλλοιώσεως, εἰ μένει σὰρξ οὖσα καὶ τὸ τί ἐστι, πάθος δέ τι ὑπάρχει τῶν καθ’ αὑτό, ὃ πρότερον οὐχ ὑπῆρχεν, ἠλλοίωται τοῦτο· ᾧ δ’ ἠλλοίωται, ὁτὲ μὲν οὐδὲν πέπονθεν, ὁτὲ δὲ κἀκεῖνο. Ἀλλὰ τὸ ἀλλοιοῦν καὶ ἡ ἀρχὴ τῆς κινήσεως ἐν τῷ αὐξανομένῳ καὶ τῷ ἀλλοιουμένῳ· ἐν τούτοις γὰρ τὸ κινοῦν, ἐπεὶ καὶ τὸ εἰσελθὸν γένοιτ’ ἄν ποτε μεῖζον, καὶ τὸ ἀπολαῦσαν αὐτοῦ σῶμα, οἷον εἰ εἰσελθὸν γένοιτο πνεῦμα. Ἀλλ’ ἔφθαρταί γε τοῦτο παθόν, καὶ τὸ κινοῦν οὐκ ἐν τούτῳ.

Ἐπεὶ δὲ διηπόρηται περὶ αὐτῶν ἱκανῶς, δεῖ καὶ τῆς ἀπορίας πειρᾶσθαι λύσιν εὑρεῖν, σώζοντας τὸ ὑπομένοντός τε τοῦ αὐξανομένου καὶ προσιόντος τινὸς αὐξάνεσθαι, ἀπιόντος δὲ φθίνειν, ἔτι δὲ τὸ ὁτιοῦν σημεῖον αἰσθητὸν ἢ μεῖζον ἢ ἔλαττον γεγονέναι, καὶ μήτε κενὸν εἶναι τὸ σῶμα μήτε δύο ἐν τῷ αὐτῷ τόπῳ μεγέθη μήτε ἀσωμάτῳ αὐξάνεσθαι. Ληπτέον δὲ τὸ αἴτιον διορισαμένοις πρῶτον ἓν μὲν ὅτι τὰ ἀνομοιομερῆ αὐξάνεται τῷ τὰ ὁμοιομερῆ αὐξάνεσθαι (σύγκειται γὰρ ἐκ τούτων ἕκαστον), ἔπειθ’ ὅτι σὰρξ καὶ ὀστοῦν καὶ ἕκαστον τῶν τοιούτων μορίων ἐστὶ διττόν, ὥσπερ καὶ τῶν ἄλλων τῶν ἐν ὕλῃ εἶδος ἐχόντων· καὶ γὰρ ἡ ὕλη λέγεται καὶ τὸ εἶδος σὰρξ ἢ ὀστοῦν. Τὸ οὖν ὁτιοῦν μέρος αὐξάνεσθαι καὶ προσιόντος τινὸς κατὰ μὲν τὸ εἶδός ἐστιν ἐνδεχόμενον, κατὰ δὲ τὴν ὕλην οὐκ ἔστιν· δεῖ γὰρ νοῆσαι ὥσπερ εἴ τις μετροίη τῷ αὐτῷ μέτρῳ ὕδωρ· ἀεὶ γὰρ ἄλλο καὶ ἄλλο τὸ γινόμενον. Οὕτω δ’ αὐξάνεται ἡ ὕλη τῆς σαρκός, καὶ οὐχ ὁτῳοῦν παντὶ προσγίνεται, ἀλλὰ τὸ μὲν ὑπεκρεῖ τὸ δὲ προσέρχεται, τοῦ δὲ σχήματος καὶ τοῦ εἴδους ὁτῳοῦν μορίῳ. Ἐπὶ δὲ τῶν ἀνομοιομερῶν τοῦτο μᾶλλον δῆλον, οἷον χειρός, ὅτι ἀνάλογον ηὔξηται· ἡ γὰρ ὕλη ἑτέρα οὖσα δήλη μᾶλλον τοῦ εἴδους ἐνταῦθα ἢ ἐπὶ σαρκὸς καὶ τῶν ὁμοιομερῶν· διὸ καὶ τεθνεῶτος μᾶλλον ἂν δόξειεν εἶναι ἔτι σὰρξ καὶ ὀστοῦν ἢ χεὶρ καὶ βραχίων. Ὥστε ἔστι μὲν ὡς ὁτιοῦν τῆς σαρκὸς ηὔξηται, ἔστι δ’ ὡς οὔ. Κατὰ μὲν γὰρ τὸ εἶδος ὁτῳοῦν προσελήλυθεν, κατὰ δὲ τὴν ὕλην οὔ.

Μεῖζον μέντοι τὸ ὅλον γέγονε προσελθόντος μέν τινος, ὃ κα(322a.) λεῖται τροφὴ καὶ ἐναντίον, μεταβάλλοντος δὲ εἰς τὸ αὐτὸ εἶδος, οἷον εἰ ξηρῷ προσίοι ὑγρόν, προσελθὸν δὲ μεταβάλοι καὶ γένοιτο ξηρόν· ἔστι μὲν γὰρ ὡς τὸ ὅμοιον ὁμοίῳ αὐξάνεται, ἔστι δ’ ὡς ἀνομοίῳ.

Ἀπορήσειε δ’ ἄν τις ποῖόν τι δεῖ εἶναι τὸ ᾧ αὐξάνεται. Φανερὸν δὴ ὅτι δυνάμει ἐκεῖνο, οἷον εἰ σάρξ, δυνάμει σάρκα. Ἐντελεχείᾳ ἄρα ἄλλο· φθαρὲν δὴ τοῦτο σὰρξ γέγονεν. Οὐκοῦν οὐ τοῦτο αὐτὸ καθ’ αὑτό· γένεσις γὰρ ἂν ἦν, οὐκ αὔξησις· ἀλλὰ τὸ αὐξανόμενον τούτῳ. Τί οὖν παθὸν ὑπὸ τούτου [ηὐξήθη]; ἢ μιχθέν, ὥσπερ οἴνῳ εἴ τις ἐπιχέοι ὕδωρ, ὁ δὲ δύναιτο οἶνον ποιεῖν τὸ μιχθέν; καὶ ὥσπερ τὸ πῦρ ἁψάμενον τοῦ καυστοῦ, οὕτως ἐν τῷ αὐξανομένῳ καὶ ὄντι ἐντελεχείᾳ σαρκὶ τὸ ἐνὸν αὐξητικὸν προσελθόντος δυνάμει σαρκὸς ἐποίησεν ἐντελεχείᾳ σάρκα. Οὐκοῦν ἅμα ὄντος· εἰ γὰρ χωρίς, γένεσις. Ἔστι μὲν γὰρ οὕτω πῦρ ποιῆσαι ἐπὶ τὸ ὑπάρχον ἐπιθέντα ξύλα. Ἀλλ’ οὕτω μὲν αὔξησις, ὅταν δὲ αὐτὰ τὰ ξύλα ἁφθῇ, γένεσις. Ποσὸν δὲ τὸ μὲν καθόλου οὐ γίνεται, ὥσπερ οὐδὲ ζῷον ὃ μήτ’ ἄνθρωπος μήτε τῶν καθ’ ἕκαστα· ἀλλ’ ὡς ἐνταῦθα τὸ καθόλου, κἀκεῖ τὸ ποσόν.

Σὰρξ δὲ ἢ ὀστοῦν ἢ χεὶρ καὶ τούτων τὰ ὁμοιομερῆ. Προσελθόντος μὲν δή τινος ποσοῦ, ἀλλ’ οὐ σαρκὸς ποσῆς. Ἧι μὲν οὖν δυνάμει τὸ συναμφότερον, οἷον ποσὴ σάρξ, ταύτῃ μὲν αὔξει· καὶ γὰρ ποσὴν δεῖ γενέσθαι καὶ σάρκα· ᾗ δὲ μόνον σάρξ, τρέφει· ταύτῃ γὰρ διαφέρει τροφὴ καὶ αὔξησις τῷ λόγῳ. Διὸ τρέφεται μὲν ἕως ἂν σώζηται καὶ φθῖνον, αὐξάνεται δὲ οὐκ ἀεί, καὶ ἡ τροφὴ τῇ αὐξήσει τὸ αὐτὸ μέν, τὸ δ’ εἶναι ἄλλο· ᾗ μὲν γάρ ἐστι τὸ προσιὸν δυνάμει ποσὴ σάρξ, ταύτῃ μὲν αὐξητικὸν σαρκός, ᾗ δὲ μόνον δυνάμει σάρξ, τροφή. Τοῦτο δὲ τὸ εἶδος ἄνευ ὕλης, οἷον αὐλός, δύναμίς τις ἐν ὕλῃ ἐστίν. Ἐὰν δέ τις προσίῃ ὕλη, οὖσα δυνάμει αὐλός, ἔχουσα καὶ τὸ ποσὸν δυνάμει, οὗτοι ἔσονται μείζους αὐλοί. Ἐὰν δὲ μηκέτι ποιεῖν δύνηται, ἀλλ’ οἷον ὕδωρ οἴνῳ ἀεὶ πλεῖον μιγνύμενον τέλος ὑδαρῆ ποιεῖ καὶ ὕδωρ, τότε φθίσιν ποιεῖται τοῦ ποσοῦ, τὸ δ’ εἶδος μένει.

Κεφάλαιο 6

(322b.) Ἐπεὶ δὲ πρῶτον δεῖ περὶ τῆς ὕλης καὶ τῶν καλουμένων στοιχείων εἰπεῖν, εἴτ’ ἔστιν εἴτε μή, καὶ πότερον ἀίδιον ἕκαστον ἢ γίνεταί πως, καὶ εἰ γίνεται, πότερον ἐξ ἀλλήλων γίνεται πάντα τὸν αὐτὸν τρόπον ἤ τι πρῶτον ἓν αὐτῶν ἐστιν, ἀνάγκη δὴ πρότερον εἰπεῖν περὶ ὧν ἀδιορίστως λέγεται νῦν.

Πάντες γὰρ οἵ τε τὰ στοιχεῖα γεννῶντες καὶ οἱ τὰ ἐκ τῶν στοιχείων διακρίσει χρῶνται καὶ συγκρίσει καὶ τῷ ποιεῖν καὶ πάσχειν. Ἔστι δ’ ἡ σύγκρισις μίξις· πῶς δὲ μίγνυσθαι λέγομεν, οὐ διώρισται σαφῶς. Ἀλλὰ μὴν οὐδ’ ἀλλοιοῦσθαι δυνατόν, οὐδὲ διακρίνεσθαι καὶ συγκρίνεσθαι, μηδενὸς ποιοῦντος μηδὲ πάσχοντος· καὶ γὰρ οἱ πλείω τὰ στοιχεῖα ποιοῦντες γεννῶσι τῷ ποιεῖν καὶ πάσχειν ὑπ’ ἀλλήλων, καὶ τοῖς ἐξ ἑνὸς ἀνάγκη λέγειν τὴν ποίησιν, καὶ τοῦτ’ ὀρθῶς λέγει Διογένης, ὅτι εἰ μὴ ἐξ ἑνὸς ἦν ἅπαντα, οὐκ ἂν ἦν τὸ ποιεῖν καὶ τὸ πάσχειν ὑπ’ ἀλλήλων, οἷον τὸ θερμὸν ψύχεσθαι καὶ τοῦτο θερμαίνεσθαι πάλιν· οὐ γὰρ ἡ θερμότης μεταβάλλει καὶ ἡ ψυχρότης εἰς ἄλληλα, ἀλλὰ δῆλον ὅτι τὸ ὑποκείμενον, ὥστε ἐν οἷς τὸ ποιεῖν ἐστι καὶ τὸ πάσχειν, ἀνάγκη τούτων μίαν εἶναι τὴν ὑποκειμένην φύσιν. Τὸ μὲν οὖν πάντα εἶναι τοιαῦτα φάσκειν οὐκ ἀληθές, ἀλλ’ ἐν ὅσοις τὸ ὑπ’ ἀλλήλων ἐστίν. Ἀλλὰ μὴν εἰ περὶ τοῦ ποιεῖν καὶ πάσχειν καὶ περὶ μίξεως θεωρητέον, ἀνάγκη καὶ περὶ ἁφῆς· οὔτε γὰρ ποιεῖν ταῦτα καὶ πάσχειν δύναται κυρίως ἃ μὴ οἷόν τε ἅψασθαι ἀλλήλων, οὔτε μὴ ἁψάμενά πως ἐνδέχεται μιχθῆναι πρῶτον. Ὥστε περὶ τριῶν τούτων διοριστέον, τί ἁφὴ καὶ τί μίξις καὶ τί ποίησις. Ἀρχὴν δὲ λάβωμεν τήνδε. Ἀνάγκη γὰρ τῶν ὄντων ὅσοις ἐστὶ μίξις, εἶναι ταῦτ’ ἀλλήλων ἁπτικά· κἂν εἴ τι ποιεῖ, τὸ δὲ πάσχει κυρίως, καὶ τούτοις ὡσαύτως. Διὸ πρῶτον λεκτέον περὶ ἁφῆς.

Σχεδὸν μὲν οὖν, ὥσπερ καὶ τῶν ἄλλων ὀνομάτων ἕκαστον λέγεται πολλαχῶς, καὶ τὰ μὲν ὁμωνύμως τὰ δὲ θάτερα ἀπὸ τῶν ἑτέρων καὶ τῶν προτέρων, οὕτως ἔχει καὶ περὶ ἁφῆς. Ὅμως δὲ τὸ κυρίως λεγόμενον ὑπάρχει τοῖς ἔχουσι θέσιν, θέσις δ’ οἷσπερ (323a.) καὶ τόπος· καὶ γὰρ τοῖς μαθηματικοῖς ὁμοίως ἀποδοτέον ἁφὴν καὶ τόπον, εἴτ’ ἐστὶ κεχωρισμένον ἕκαστον αὐτῶν εἴτ’ ἄλλον τρόπον. Εἰ οὖν ἐστίν, ὥσπερ διωρίσθη πρότερον, τὸ ἅπτεσθαι τὸ τὰ ἔσχατα ἔχειν ἅμα, ταῦτα ἂν ἅπτοιτο ἀλλήλων ὅσα διωρισμένα μεγέθη καὶ θέσιν ἔχοντα ἅμα ἔχει τὰ ἔσχατα. Ἐπεὶ δὲ θέσις μὲν ὅσοις καὶ τόπος ὑπάρχει, τόπου δὲ διαφορὰ πρώτη τὸ ἄνω καὶ τὸ κάτω καὶ τὰ τοιαῦτα τῶν ἀντικειμένων, ἅπαντα τὰ ἀλλήλων ἁπτόμενα βάρος ἂν ἔχοι ἢ κουφότητα, ἢ ἄμφω ἢ θάτερον. Τὰ δὲ τοιαῦτα παθητικὰ καὶ ποιητικά·

ὥστε φανερὸν ὅτι ταῦτα ἅπτεσθαι πέφυκεν ἀλλήλων, ὧν διῃρημένων μεγεθῶν ἅμα τὰ ἔσχατά ἐστιν, ὄντων κινητικῶν καὶ κινητῶν ὑπ’ ἀλλήλων.

Ἐπεὶ δὲ τὸ κινοῦν οὐχ ὁμοίως κινεῖ τὸ κινούμενον, ἀλλὰ τὸ μὲν ἀνάγκη κινούμενον καὶ αὐτὸ κινεῖν, τὸ δ’ ἀκίνητον ὄν, δῆλον ὅτι καὶ ἐπὶ τοῦ ποιοῦντος ἐροῦμεν ὡσαύτως· καὶ γὰρ τὸ κινοῦν ποιεῖν τί φασι καὶ τὸ ποιοῦν κινεῖν. Οὐ μὴν ἀλλὰ διαφέρει γε καὶ δεῖ διορίζειν· οὐ γὰρ οἷόν τε πᾶν τὸ κινοῦν ποιεῖν, εἴπερ τὸ ποιοῦν ἀντιθήσομεν τῷ πάσχοντι, τοῦτο δ’ οἷς ἡ κίνησις πάθος.

Πάθος δὲ καθ’ ὅσον ἀλλοιοῦται μόνον, οἷον τὸ λευκὸν καὶ τὸ θερμόν· ἀλλὰ τὸ κινεῖν ἐπὶ πλέον τοῦ ποιεῖν ἐστιν. Ἐκεῖνο δ’ οὖν φανερόν, ὅτι ἔστι μὲν ὡς τὰ κινοῦντα τῶν κινητῶν ἅπτοιτ’ ἄν, ἔστι δ’ ὡς οὔ. Ἀλλ’ ὁ διορισμὸς τοῦ ἅπτεσθαι καθόλου μὲν ὁ τῶν θέσιν ἐχόντων καὶ τοῦ μὲν κινητικοῦ τοῦ δὲ κινητοῦ, πρὸς ἄλληλα δὲ κινητικοῦ καὶ κινητοῦ, ἐν οἷς ὑπάρχει τὸ ποιεῖν καὶ τὸ πάσχειν. Ἔστι μὲν οὖν ὡς ἐπὶ τὸ πολὺ τὸ ἁπτόμενον ἁπτομένου ἁπτόμενον· καὶ γὰρ κινεῖ κινούμενα πάντα σχεδὸν τὰ ἐμποδών, ὅσοις ἀνάγκη καὶ φαίνεται τὸ ἁπτόμενον ἅπτεσθαι ἁπτομένου· ἔστι δ’ ὡς ἐνίοτέ φαμεν τὸ κινοῦν ἅπτεσθαι μόνου τοῦ κινουμένου, τὸ δ’ ἁπτόμενον μὴ ἅπτεσθαι ἁπτομένου· ἀλλὰ διὰ τὸ κινεῖν κινούμενα τὰ ὁμογενῆ, ἀνάγκη δοκεῖ εἶναι ἁπτομένου ἅπτεσθαι. Ὥστε εἴ τι κινεῖ ἀκίνητον ὄν, ἐκεῖνο μὲν ἂν ἅπτοιτο τοῦ κινητοῦ, ἐκείνου δὲ οὐδέν· φαμὲν γὰρ ἐνίοτε τὸν λυποῦντα ἅπτεσθαι ἡμῶν, ἀλλ’ οὐκ αὐτοὶ ἐκείνου. Περὶ μὲν οὖν ἁφῆς τῆς ἐν τοῖς φυσικοῖς διωρίσθω τοῦτον τὸν τρόπον.

Κεφάλαιο 7

(323b.) Περὶ δὲ τοῦ ποιεῖν καὶ πάσχειν λεκτέον ἐφεξῆς· παρειλήφαμεν δὲ παρὰ τῶν πρότερον ὑπεναντίους ἀλλήλοις λόγους. Οἱ μὲν γὰρ πλεῖστοι τοῦτό γε ὁμονοητικῶς λέγουσιν, ὡς τὸ μὲν ὅμοιον ὑπὸ τοῦ ὁμοίου πᾶν ἀπαθές ἐστι διὰ τὸ μηδὲν μᾶλλον ποιητικὸν ἢ παθητικὸν εἶναι θάτερον θατέρου (πάντα γὰρ ὁμοίως ὑπάρχειν ταὐτὰ τοῖς ὁμοίοις), τὰ δ’ ἀνόμοια καὶ τὰ διάφορα ποιεῖν καὶ πάσχειν εἰς ἄλληλα πέφυκεν.

Καὶ γὰρ ὅταν τὸ ἔλαττον πῦρ ὑπὸ τοῦ πλείονος φθείρηται, διὰ τὴν ἐναντίωσιν τοῦτό φασι πάσχειν· ἐναντίον γὰρ εἶναι τὸ πολὺ τῷ ὀλίγῳ. Δημόκριτος δὲ παρὰ τοὺς ἄλλους ἰδίως ἔλεξε μόνος· φησὶ γὰρ τὸ αὐτὸ καὶ ὅμοιον εἶναι τό τε ποιοῦν καὶ τὸ πάσχον· οὐ γὰρ ἐγχωρεῖν τὰ ἕτερα καὶ ιαφέροντα πάσχειν ὑπ’ ἀλλήλων, ἀλλὰ κἂν ἕτερα ὄντα ποιῇ τι εἰς ἄλληλα, οὐχ ᾗ ἕτερα ἀλλ’ ᾗ ταὐτόν τι ὑπάρχει, ταύτῃ τοῦτο συμβαίνειν αὐτοῖς.

Τὰ μὲν οὖν λεγόμενα ταῦτ’ ἐστίν, ἐοίκασι δὲ οἱ τοῦτον τὸν τρόπον λέγοντες ὑπεναντία φαίνεσθαι λέγειν. Αἴτιον δὲ τῆς ἐναντιολογίας ὅτι δέον ὅλον τι θεωρῆσαι μέρος τι τυγχάνουσι λέγοντες ἑκάτεροι· τό τε γὰρ ὅμοιον καὶ τὸ πάντῃ πάντως ἀδιάφορον εὔλογον μὴ πάσχειν ὑπὸ τοῦ ὁμοίου μηθέν· τί γὰρ μᾶλλον θάτερον ἔσται ποιητικὸν ἢ θάτερον; εἴ τε ὑπὸ τοῦ ὁμοίου τι πάσχειν δυνατόν, καὶ αὐτὸ ὑφ’ αὑτοῦ· καίτοι τούτων οὕτως ἐχόντων οὐδὲν ἂν εἴη οὔτε ἄφθαρτον οὔτε ἀκίνητον, εἴπερ τὸ ὅμοιον ᾗ ὅμοιον ποιητικόν· αὐτὸ γὰρ αὑτὸ κινήσει πᾶν, τό τε παντελῶς ἕτερον καὶ τὸ μηθαμῇ ταὐτὸν ὡσαύτως· οὐδὲν γὰρ ἂν πάθοι λευκότης ὑπὸ γραμμῆς ἢ γραμμὴ ὑπὸ λευκότητος, πλὴν εἰ μή που κατὰ συμβεβηκός, οἷον εἰ συμβέβηκε λευκὴν ἢ μέλαιναν εἶναι τὴν γραμμήν· οὐκ ἐξίστησι γὰρ ἄλληλα τῆς φύσεως ὅσα μήτ’ ἐναντία μήτ’ ἐξ ἐναντίων ἐστίν.

Ἀλλ’ ἐπεὶ οὐ τὸ τυχὸν πέφυκε πάσχειν καὶ ποιεῖν, ἀλλ’ ὅσα ἢ ἐναντία ἐστὶν ἢ ἐναντίωσιν ἔχει, ἀνάγκη καὶ τὸ ποιοῦν καὶ τὸ πάσχον τῷ γένει μὲν ὅμοιον εἶναι καὶ ταὐτό, τῷ δ’ εἴδει ἀνόμοιον καὶ ἐναντίον· πέφυκε γὰρ σῶμα μὲν ὑπὸ σώματος, χυμὸς δ’ ὑπὸ χυμοῦ, χρῶμα δ’ ὑπὸ χρώματος πάσχειν, (324a.) ὅλως δὲ τὸ ὁμογενὲς ὑπὸ τοῦ ὁμογενοῦς. Τούτου δ’ αἴτιον ὅτι τἀναντία ἐν ταὐτῷ γένει πάντα, ποιεῖ δὲ καὶ πάσχει τἀναντία ὑπ’ ἀλλήλων. Ὥστ’ ἀνάγκη πῶς μὲν εἶναι ταὐτὰ τό τε ποιοῦν καὶ τὸ πάσχον, πῶς δ’ ἕτερα καὶ ἀνόμοια ἀλλήλοις. Ἐπεὶ δὲ καὶ τὸ πάσχον καὶ τὸ ποιοῦν τῷ μὲν γένει ταὐτὰ καὶ ὅμοια τῷ δ’ εἴδει ἀνόμοια, τοιαῦτα δὲ τἀναντία, φανερὸν ὅτι παθητικὰ καὶ ποιητικὰ ἀλλήλων ἐστὶ τά τ’ ἐναντία καὶ τὰ μεταξύ· καὶ γὰρ ὅλως φθορὰ καὶ γένεσις ἐν τούτοις. Διὸ καὶ εὔλογον ἤδη τό τε πῦρ θερμαίνειν καὶ τὸ ψυχρὸν ψύχειν, καὶ ὅλως τὸ ποιητικὸν ὁμοιοῦν ἑαυτῷ τὸ πάσχον· τό τε γὰρ ποιοῦν καὶ τὸ πάσχον ἐναντία ἐστί, καὶ ἡ γένεσις εἰς τοὐναντίον. Ὥστ' ἀνάγκη τὸ πάσχον εἰς τὸ ποιοῦν μεταβάλλειν· οὕτω γὰρ ἔσται εἰς τοὐναντίον ἡ γένεσις. Καὶ κατὰ λόγον δὴ τὸ μὴ ταὐτὰ λέγοντας ἀμφοτέρους ὅμως ἅπτεσθαι τῆς φύσεως. Λέγομεν γὰρ πάσχειν ὁτὲ μὲν τὸ ὑποκείμενον, οἷον ὑγιάζεσθαι τὸν ἄνθρωπον καὶ θερμαίνεσθαι καὶ ψύχεσθαι καὶ τἆλλα τὸν αὐτὸν τρόπον, ὁτὲ δὲ θερμαίνεσθαι μὲν τὸ ψυχρόν, ὑγιάζεσθαι δὲ τὸ κάμνον· ἀμφότερα δ' ἐστὶν ἀληθῆ.

Τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τοῦ ποιοῦντος· ὁτὲ μὲν γὰρ τὸν ἄνθρωπόν φαμεν θερμαίνειν, ὁτὲ δὲ τὸ θερμόν· ἔστι μὲν γὰρ ὡς ἡ ὕλη πάσχει, ἔστι δ' ὡς τοὐναντίον. Οἱ μὲν οὖν εἰς ἐκεῖνο βλέψαντες ταὐτόν τι δεῖν ᾠήθησαν τὸ ποιοῦν ἔχειν καὶ τὸ πάσχον, οἱ δ' εἰς θάτερα τοὐναντίον. Τὸν αὐτὸν δὲ λόγον ὑποληπτέον εἶναι περὶ τοῦ ποιεῖν καὶ πάσχειν ὅνπερ καὶ περὶ τοῦ κινεῖν καὶ κινεῖσθαι· διχῶς γὰρ λέγεται καὶ τὸ κινοῦν· ἐν ᾧ τε γὰρ ἡ ἀρχὴ τῆς κινήσεως, δοκεῖ τοῦτο κινεῖν (ἡ γὰρ ἀρχὴ πρώτη τῶν αἰτίων), καὶ πάλιν τὸ ἔσχατον πρὸς τὸ κινούμενον καὶ τὴν γένεσιν. Ὁμοίως δὲ καὶ περὶ τοῦ ποιοῦντος· καὶ γὰρ τὸν ἰατρόν φαμεν ὑγιάζειν καὶ τὸν οἶνον. Τὸ μὲν οὖν πρῶτον κινοῦν οὐδὲν κωλύει ἐν μὲν κινήσει ἀκίνητον εἶναι· ἐπ' ἐνίων δὲ καὶ ἀναγκαῖον· τὸ δ' ἔσχατον ἀεὶ κινεῖν κινούμενον. Ἐπὶ δὲ ποιήσεως τὸ μὲν πρῶτον ἀπαθές, τὸ δ' ἔσχατον καὶ αὐτὸ πάσχον· ὅσα γὰρ μὴ ἔχει τὴν αὐτὴν ὕλην, ποιεῖ ἀπαθῆ ὄντα, οἷον ἡ ἰατρική· αὐτὴ γὰρ ποιοῦσα ὑγίειαν οὐδὲν πάσχει (324b.) ὑπὸ τοῦ ὑγιαζομένου. Τὸ δὲ σιτίον ποιοῦν καὶ αὐτὸ πάσχει τι· ἢ γὰρ θερμαίνεται ἢ ψύχεται ἢ ἄλλο τι πάσχει ἅμα ποιοῦν. Ἔστι δὲ ἡ μὲν ἰατρικὴ ὡς ἀρχή, τὸ δὲ σιτίον τὸ ἔσχατον καὶ ἁπτόμενον. Ὅσα μὲν οὖν μὴ ἐν ὕλῃ ἔχει τὴν μορφήν, ταῦτα μὲν ἀπαθῆ τῶν ποιητικῶν, ὅσα δ' ἐν ὕλῃ, παθητικά. Τὴν μὲν γὰρ ὕλην λέγομεν ὁμοίως ὡς εἰπεῖν τὴν αὐτὴν εἶναι τῶν ἀντικειμένων ὁποτερουοῦν, ὥσπερ γένος ὄν, τὸ δὲ δυνάμενον θερμὸν εἶναι παρόντος τοῦ θερμαντικοῦ καὶ πλησιάζοντος ἀνάγκη θερμαίνεσθαι· διό, καθάπερ εἴρηται, τὰ μὲν τῶν ποιητικῶν ἀπαθῆ τὰ δὲ παθητικά. Καὶ ὥσπερ ἐπὶ κινήσεως τὸν αὐτὸν ἔχει τρόπον καὶ ἐπὶ τῶν ποιητικῶν· ἐκεῖ τε γὰρ τὸ πρῶτον κινοῦν ἀκίνητον, καὶ ἐπὶ τῶν ποιητικῶν τὸ πρῶτον ποιοῦν ἀπαθές.

Ἔστι δὲ τὸ ποιητικὸν αἴτιον ὡς ὅθεν ἡ ἀρχὴ τῆς κινήσεως. Τὸ δ' οὗ ἕνεκα οὐ ποιητικόν. Διὸ ἡ ὑγίεια οὐ ποιητικόν, εἰ μὴ κατὰ μεταφοράν· καὶ γὰρ τοῦ μὲν ποιοῦντος ὅταν ὑπάρχῃ, γίνεταί τι τὸ πάσχον, τῶν δ' ἕξεων παρουσῶν οὐκέτι γίνεται, ἀλλ' ἔστιν ἤδη· τὰ δ' εἴδη καὶ τὰ τέλη ἕξεις τινές, ἡ δ’ ὕλη ᾗ ὕλη παθητικόν. Τὸ μὲν οὖν πῦρ ἔχει ἐν ὕλῃ τὸ θερμόν· εἰ δέ τι εἴη θερμὸν χωριστόν, τοῦτο οὐθὲν ἂν πάσχοι. Τοῦτο μὲν οὖν ἴσως ἀδύνατον εἶναι χωριστόν· εἰ δ’ ἐστὶν ἔνια τοιαῦτα, ἐπ’ ἐκείνων ἂν εἴη τὸ λεγόμενον ἀληθές. Τί μὲν οὖν τὸ ποιεῖν καὶ πάσχειν ἐστὶ καὶ τίσιν ὑπάρχει καὶ διὰ τί καὶ πῶς, διωρίσθω τοῦτον τὸν τρόπον.

Πῶς δὲ ἐνδέχεται τοῦτο συμβαίνειν, πάλιν λέγωμεν.

Κεφάλαιο 8

Τοῖς μὲν οὖν δοκεῖ πάσχειν ἕκαστον διά τινων πόρων εἰσιόντος τοῦ ποιοῦντος ἐσχάτου καὶ κυριωτάτου, καὶ τοῦτον τὸν τρόπον καὶ ὁρᾶν καὶ ἀκούειν ἡμᾶς φασι καὶ τὰς ἄλλας αἰσθήσεις αἰσθάνεσθαι πάσας, ἔτι δὲ ὁρᾶσθαι διά τε ἀέρος καὶ ὕδατος καὶ τῶν διαφανῶν, διὰ τὸ πόρους ἔχειν ἀοράτους μὲν διὰ μικρότητα, πυκνοὺς δὲ καὶ κατὰ στοῖχον, καὶ μᾶλλον ἔχειν τὰ διαφανῆ μᾶλλον. Οἱ μὲν οὖν ἐπί τινων οὕτω διώρισαν, ὥσπερ καὶ Ἐμπεδοκλῆς, οὐ μόνον ἐπὶ τῶν ποιούντων καὶ πασχόντων, ἀλλὰ καὶ μίγνυσθαί φησιν ὅσων οἱ πόροι σύμμετροι πρὸς ἀλλήλους εἰσίν. Ὁδῷ δὲ μάλιστα καὶ περὶ (325a.) πάντων ἑνὶ λόγῳ διωρίκασι Λεύκιππος καὶ Δημόκριτος, ἀρχὴν ποιησάμενοι κατὰ φύσιν ἥπερ ἐστίν.

Ἐνίοις γὰρ τῶν ἀρχαίων ἔδοξε τὸ ὂν ἐξ ἀνάγκης ἓν εἶναι καὶ ἀκίνητον· τὸ μὲν γὰρ κενὸν οὐκ ὄν, κινηθῆναι δ' οὐκ ἂν δύνασθαι μὴ ὄντος κενοῦ κεχωρισμένου. Οὐδ' αὖ πολλὰ εἶναι μὴ ὄντος τοῦ διείργοντος· τοῦτο δὲ μηδὲν διαφέρειν, εἴ τις οἴεται μὴ συνεχὲς εἶναι τὸ πᾶν ἀλλ' ἅπτεσθαι διῃρημένον, τοῦ φάναι πολλὰ καὶ μὴ ἓν εἶναι καὶ κενόν. Εἰ μὲν γὰρ πάντῃ διαιρετόν, οὐδὲν εἶναι ἕν, ὥστε οὐδὲ πολλά, ἀλλὰ κενὸν τὸ ὅλον· εἰ δὲ τῇ μὲν τῇ δὲ μή, πεπλασμένῳ τινὶ τοῦτ' ἐοικέναι· μέχρι πόσου γὰρ καὶ διὰ τί τὸ μὲν οὕτως ἔχει τοῦ ὅλου καὶ πλῆρές ἐστι, τὸ δὲ διῃρημένον; ἔτι ὁμοίως φάναι ἀναγκαῖον μὴ εἶναι κίνησιν. Ἐκ μὲν οὖν τούτων τῶν λόγων, ὑπερβάντες τὴν αἴσθησιν καὶ παριδόντες αὐτὴν ὡς τῷ λόγῳ δέον ἀκολουθεῖν, ἓν καὶ ἀκίνητον τὸ πᾶν εἶναί φασι καὶ ἄπειρον ἔνιοι· τὸ γὰρ πέρας περαίνειν ἂν πρὸς τὸ κενόν. Οἱ μὲν οὖν οὕτως καὶ διὰ ταύτας τὰς αἰτίας ἀπεφήναντο περὶ τῆς ἀληθείας· ἐπεὶ δὲ ἐπὶ μὲν τῶν λόγων δοκεῖ ταῦτα συμβαίνειν, ἐπὶ δὲ τῶν πραγμάτων μανίᾳ παραπλήσιον εἶναι τὸ δοξάζειν οὕτως· οὐδένα γὰρ τῶν μαινομένων ἐξεστάναι τοσοῦτον ὥστε τὸ πῦρ ἓν εἶναι δοκεῖν καὶ τὸν κρύσταλλον, ἀλλὰ μόνον τὰ καλὰ καὶ τὰ φαινόμενα διὰ συνήθειαν, ταῦτ' ἐνίοις διὰ τὴν μανίαν οὐθὲν δοκεῖ διαφέρειν.

Λεύκιππος δ' ἔχειν ᾠήθη λόγους οἵ τινες πρὸς τὴν αἴσθησιν ὁμολογούμενα λέγοντες οὐκ ἀναιρήσουσιν οὔτε γένεσιν οὔτε φθορὰν οὔτε κίνησιν καὶ τὸ πλῆθος τῶν ὄντων Ὁμολογήσας δὲ ταῦτα μὲν τοῖς φαινομένοις, τοῖς δὲ τὸ ἓν κατασκευάζουσιν ὡς οὐκ ἂν κίνησιν οὖσαν ἄνευ κενοῦ τό τε κενὸν μὴ ὄν, καὶ τοῦ ὄντος οὐθὲν μὴ ὄν φησιν εἶναι.

Τὸ γὰρ κυρίως ὂν παμπλῆρες ὄν· ἀλλ’ εἶναι τὸ τοιοῦτον οὐχ ἕν, ἀλλ’ ἄπειρα τὸ πλῆθος καὶ ἀόρατα διὰ σμικρότητα τῶν ὄγκων. Ταῦτα δ’ ἐν τῷ κενῷ φέρεσθαι (κενὸν γὰρ εἶναι), καὶ συνιστάμενα μὲν γένεσιν ποιεῖν, διαλυόμενα δὲ φθοράν. Ποιεῖν δὲ καὶ πάσχειν ᾗ τυγχάνουσιν ἁπτόμενα· ταύτῃ γὰρ οὐχ ἓν εἶναι. Καὶ συντιθέμενα δὲ καὶ περιπλεκόμενα γεννᾶν· ἐκ δὲ τοῦ κατ’ ἀλήθειαν ἑνὸς οὐκ ἂν γενέσθαι πλῆθος, οὐδ’ ἐκ τῶν ἀληθῶς πολλῶν ἕν, ἀλλ’ εἶναι τοῦτ’ ἀδύνατον, ἀλλ’ (325b.) ὥσπερ Ἐμπεδοκλῆς καὶ τῶν ἄλλων τινές φασι πάσχειν διὰ πόρων, οὕτω πᾶσαν ἀλλοίωσιν καὶ πᾶν τὸ πάσχειν τοῦτον γίνεσθαι τὸν τρόπον, διὰ τοῦ κενοῦ γινομένης τῆς διαλύσεως καὶ τῆς φθορᾶς, ὁμοίως δὲ καὶ τῆς αὐξήσεως, ὑπεισδυομένων στερεῶν. Σχεδὸν δὲ καὶ Ἐμπεδοκλεῖ ἀναγκαῖον λέγειν, ὥσπερ καὶ Λεύκιππός φησιν· εἶναι γὰρ ἄττα στερεά, ἀδιαίρετα δέ, εἰ μὴ πάντῃ πόροι συνεχεῖς εἰσιν. Τοῦτο δ’ ἀδύνατον· οὐθὲν γὰρ ἔσται ἕτερον στερεὸν παρὰ τοὺς πόρους, ἀλλὰ πᾶν κενόν. Ἀνάγκη ἄρα τὰ μὲν ἁπτόμενα εἶναι ἀδιαίρετα, τὰ δὲ μεταξὺ αὐτῶν κενά, οὓς ἐκεῖνος λέγει πόρους. Οὕτως δὲ καὶ Λεύκιππος λέγει περὶ τοῦ ποιεῖν καὶ πάσχειν.

Οἱ μὲν οὖν τρόποι καθ’ οὓς τὰ μὲν ποιεῖ τὰ δὲ πάσχει σχεδὸν οὗτοι λέγονται· καὶ περὶ μὲν τούτων, καὶ πῶς λέγουσι, δῆλον, καὶ πρὸς τὰς αὐτῶν θέσεις αἷς χρῶνται σχεδὸν ὁμολογουμένως φαίνεται συμβαῖνον. Τοῖς δ’ ἄλλοις ἧττον, οἷον Ἐμπεδοκλεῖ τίνα τρόπον ἔσται γένεσις καὶ φθορὰ καὶ ἀλλοίωσις οὐ δῆλον. Τοῖς μὲν γάρ ἐστιν ἀδιαίρετα τὰ πρῶτα τῶν σωμάτων, σχήματι διαφέροντα μόνον, ἐξ ὧν πρώτων σύγκειται καὶ εἰς ἃ ἔσχατα διαλύεται· Ἐμπεδοκλεῖ δὲ τὰ μὲν ἄλλα φανερὸν ὅτι μέχρι τῶν στοιχείων ἔχει τὴν γένεσιν καὶ τὴν φθοράν, αὐτῶν δὲ τούτων πῶς γίνεται καὶ φθείρεται τὸ σωρευόμενον μέγεθος, οὔτε δῆλον οὔτε ἐνδέχεται λέγειν αὐτῷ μὴ λέγοντι καὶ τοῦ πυρὸς εἶναι στοιχεῖον, ὁμοίως δὲ καὶ τῶν ἄλλων ἁπάντων, ὥσπερ ἐν τῷ Τιμαίῳ γέγραφε Πλάτων.

Τοσοῦτον γὰρ διαφέρει τοῦ μὴ τὸν αὐτὸν τρόπον Λευκίππῳ λέγειν, ὅτι ὁ μὲν στερεὰ ὁ δ’ ἐπίπεδα λέγει τὰ ἀδιαίρετα, καὶ ὁ μὲν ἀπείροις ὡρίσθαι σχήμασι τῶν ἀδιαιρέτων στερεῶν ἕκαστον ὁ δὲ ὡρισμένοις, ἐπεὶ ἀδιαίρετά γε ἀμφότεροι λέγουσι καὶ ὡρισμένα σχήμασιν. Ἐκδὴ τούτων αἱ γενέσεις καὶ αἱ διακρίσεις Λευκίππῳ μὲν δύο τρόποι ἂν εἶεν, διά τε τοῦ κενοῦ καὶ διὰ τῆς ἁφῆς (ταύτῃ γὰρ διαιρετὸν ἕκαστον), Πλάτωνι δὲ κατὰ τὴν ἁφὴν μόνον· κενὸν γὰρ οὐκ εἶναί φησιν· καὶ περὶ μὲν τῶν ἀδιαιρέτων ἐπιπέδων εἰρήκαμεν ἐν τοῖς πρότερον λόγοις· περὶ δὴ τῶν ἀδιαιρέτων στερεῶν τὸ μὲν ἐπὶ πλέον θεωρῆσαι τὸ συμβαῖνον ἀφείσθω τὸ νῦν, ὡς δὲ μικρὸν παρεκβᾶσιν εἰπεῖν, (326a.) ἀναγκαῖον ἀπαθές τε ἕκαστον λέγειν τῶν ἀδιαιρέτων (οὐ γὰρ οἷόν τε πάσχειν ἀλλ’ ἢ διὰ τοῦ κενοῦ) καὶ μηθενὸς ποιητικὸν πάθους· οὔτε γὰρ ψυχρὸν οὔτε σκληρὸν οἷόν τ’ εἶναι. Καίτοι τοῦτό γε ἄτοπον, τὸ μόνον ἀποδοῦναι τῷ περιφερεῖ σχήματι τὸ θερμόν· ἀνάγκη γὰρ καὶ τοὐναντίον τὸ ψυχρὸν ἄλλῳ τινὶ προσήκειν τῶν σχημάτων. Ἄτοπον δὲ κἂν εἰ ταῦτα μὲν ὑπάρχει, λέγω δὲ θερμότης καὶ ψυχρότης, βαρύτης δὲ καὶ κουφότης καὶ σκληρότης καὶ μαλακότης μὴ ὑπάρξει· καίτοι βαρύτερόν γε κατὰ τὴν ὑπεροχήν φησιν εἶναι Δημόκριτος ἕκαστον τῶν ἀδιαιρέτων, ὥστε δῆλον ὅτι καὶ θερμότερον. Τοιαῦτα δ’ ὄντα μὴ πάσχειν ὑπ’ ἀλλήλων ἀδύνατον, οἷον ὑπὸ τοῦ πολὺ ὑπερβάλλοντος θερμοῦ τὸ ἠρέμα θερμόν.

Ἀλλὰ μὴν εἰ σκληρόν, καὶ μαλακόν. Τὸ δὲ μαλακὸν ἤδη τῷ πάσχειν τι λέγεται· τὸ γὰρ ὑπεικτικὸν μαλακόν. Ἀλλὰ μὴν ἄτοπον καὶ εἰ μηθὲν ὑπάρχει ἀλλ’ ἢ μόνον σχῆμα· καὶ εἰ ὑπάρχει, ἓν δὲ μόνον, οἷον τὸ μὲν ψυχρὸν τὸ δὲ θερμόν· οὐδὲ γὰρ ἂν μία τις εἴη ἡ φύσις αὐτῶν. Ὁμοίως δὲ ἀδύνατον καὶ εἰ πλείω τῷ ἑνί· ἀδιαίρετον γὰρ ὂν ἐν τῷ αὐτῷ ἕξει τὰ πάθη, ὥστε καὶ ἐὰν πάσχῃ ᾗπερ ψύχεται, ταύτῃ τι καὶ ἄλλο ποιήσει ἢ πείσεται. Τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων παθημάτων· τοῦτο γὰρ καὶ τοῖς στερεὰ καὶ τοῖς ἐπίπεδα λέγουσιν ἀδιαίρετα συμβαίνει τὸν αὐτὸν τρόπον· οὔτε γὰρ μανότερα οὔτε πυκνότερα οἷόν τε γίνεσθαι κενοῦ μὴ ὄντος ἐν τοῖς ἀδιαιρέτοις.

Ἔτι δ’ ἄτοπον καὶ τὸ μικρὰ μὲν ἀδιαίρετα εἶναι, μεγάλα δὲ μή· νῦν μὲν γὰρ εὐλόγως τὰ μείζω θραύεται μᾶλλον τῶν μικρῶν· τὰ μὲν γὰρ διαλύεται ῥᾳδίως, οἷον τὰ μεγάλα· προσκόπτει γὰρ πολλοῖς· τὸ δὲ ἀδιαίρετον ὅλως διὰ τί μᾶλλον ὑπάρχει τῶν μεγάλων τοῖς μικροῖς; ἔτι δὲ πότερον μία πάντων ἡ φύσις ἐκείνων τῶν στερεῶν, ἢ διαφέρει θάτερα τῶν ἑτέρων, ὥσπερ ἂν εἰ τὰ μὲν εἴη πύρινα, τὰ δὲ γήινα τὸν ὄγκον; εἰ μὲν γὰρ μία φύσις ἐστὶν ἁπάντων, τί τὸ χωρίσαν; ἢ διὰ τί οὐ γίνεται ἁψάμενα ἕν, ὥσπερ ὕδωρ ὕδατος ὅταν θίγῃ; οὐδὲν γὰρ διαφέρει τὸ ὕστερον τοῦ προτέρου. Εἰ δ’ ἕτερα, ποῖα ταῦτα; καὶ δῆλον ὡς ταῦτα θετέον ἀρχὰς καὶ αἰτίας τῶν (326b.) συμβαινόντων μᾶλλον ἢ τὰ σχήματα. Ἔτι δὲ διαφέροντα τὴν φύσιν, κἂν ποιοῖ κἂν πάσχοι θιγγάνοντα ἀλλήλων. Ἔτι δὲ τί τὸ κινοῦν; εἰ μὲν γὰρ ἕτερον, παθητικόν· εἰ δ’ αὐτὸ αὑτὸ ἕκαστον, ἢ διαιρετὸν ἔσται, κατ’ ἄλλο μὲν κινοῦν κατ’ ἄλλο δὲ κινούμενον, ἢ κατὰ ταὐτὸ τἀναντία ὑπάρξει, καὶ ἡ ὕλη οὐ μόνον ἀριθμῷ ἔσται μία ἀλλὰ καὶ δυνάμει.

Ὅσοι (6) μὲν οὖν διὰ τῆς <διὰ> τῶν πόρων κινήσεώς φασι τὰ πάθη συμβαίνειν, εἰ μὲν καὶ πεπληρωμένων τῶν πόρων, περίεργον οἱ πόροι· εἰ γὰρ ταύτῃ τι πάσχει τὸ πᾶν, κἂν μὴ πόρους ἔχον ἀλλ’ αὐτὸ συνεχὲς ὂν πάσχοι τὸν αὐτὸν τρόπον. Ἔτι δὲ πῶς ἐνδέχεται περὶ τοῦ διορᾶν συμβαίνειν ὡς λέγουσιν; οὔτε γὰρ κατὰ τὰς ἁφὰς ἐνδέχεται διιέναι διὰ τῶν διαφανῶν, οὔτε διὰ τῶν πόρων, εἰ πλήρης ἕκαστος· τί γὰρ διοίσει τοῦ μὴ ἔχειν πόρους; πᾶν γὰρ ὁμοίως ἔσται πλῆρες.

Ἀλλὰ μὴν εἰ καὶ κενὰ μὲν ταῦτα, ἀνάγκη δὲ σώματα ἐν αὐτοῖς ἔχειν, ταὐτὸ συμβήσεται πάλιν. Εἰ δὲ τηλικαῦτα τὸ μέγεθος ὥστε μὴ δέχεσθαι σῶμα μηδέν, γελοῖον τὸ μικρὸν μὲν οἴεσθαι κενὸν εἶναι, μέγα δὲ μὴ μηδ’ ὁπηλικονοῦν, ἢ τὸ κενὸν ἄλλο τι οἴεσθαι λέγειν πλὴν χώραν σώματος, ὥστε δῆλον ὅτι παντὶ σώματι τὸν ὄγκον ἴσον ἔσται κενόν.

Ὅλως δὲ τὸ πόρους ποιεῖν περίεργον· εἰ μὲν γὰρ μηδὲν ποιεῖ κατὰ τὴν ἁφήν, οὐδὲ διὰ τῶν πόρων ποιήσει διιόν· εἰ δὲ τῷ ἅπτεσθαι, καὶ μὴ πόρων ὄντων τὰ μὲν πείσεται τὰ δὲ ποιήσει τῶν πρὸς ἄλληλα τοῦτον τὸν τρόπον πεφυκότων.

Ὅτι μὲν οὖν οὕτως λέγειν τοὺς πόρους, ὥς τινες ὑπολαμβάνουσιν, ἢ ψεῦδος ἢ μάταιον, φανερὸν ἐκ τούτων ἐστίν· διαιρετῶν δ’ ὄντων πάντῃ τῶν σωμάτων πόρους ποιεῖν γελοῖον· ᾗ γὰρ διαιρετά, δύναται χωρίζεσθαι.

Κεφάλαιο 9

Τίνα δὲ τρόπον ὑπάρχει τοῖς οὖσι γεννᾶν καὶ ποιεῖν καὶ πάσχειν, λέγωμεν λαβόντες ἀρχὴν τὴν πολλάκις εἰρημένην.

Εἰ γάρ ἐστι τὸ μὲν δυνάμει τὸ δ’ ἐντελεχείᾳ τοιοῦτον, πέφυκεν οὐ τῇ μὲν τῇ δ’ οὐ πάσχειν, ἀλλὰ πάντῃ καθ’ ὅσον ἐστὶ τοιοῦτον, ἧττον δὲ καὶ μᾶλλον ᾗ τοιοῦτον μᾶλλόν ἐστι καὶ ἧττον· καὶ ταύτῃ πόρους ἄν τις λέγοι μᾶλλον, καθάπερ ἐν τοῖς μεταλλευομένοις διατείνουσι τοῦ παθητικοῦ φλέβες (327a.) συνεχεῖς. Συμφυὲς μὲν οὖν ἕκαστον καὶ ἓν ὂν ἀπαθές.

Ὁμοίως δὲ καὶ μὴ θιγγάνοντα μήτε αὑτῶν μήτ’ ἄλλων, ἃ ποιεῖν πέφυκε καὶ πάσχειν. Λέγω δ’ οἷον οὐ μόνον ἁπτόμενον θερμαίνει τὸ πῦρ, ἀλλὰ κἂν ἄποθεν ᾖ· τὸν μὲν γὰρ ἀέρα τὸ πῦρ, ὁ δ’ ἀὴρ τὸ σῶμα θερμαίνει, πεφυκὼς ποιεῖν καὶ πάσχειν.

Τὸ δὲ τῇ μὲν οἴεσθαι πάσχειν τῇ δὲ μή, διορίσαντας ἐν ἀρχῇ τοῦτο λεκτέον. Εἰ μὲν γὰρ μὴ πάντῃ διαιρετὸν τὸ μέγεθος, ἀλλ’ ἔστι σῶμα ἀδιαίρετον ἢ πλάτος, οὐκ ἂν εἴη πάντῃ παθητικόν, ἀλλ’ οὐδὲ συνεχὲς οὐδέν· εἰ δὲ τοῦτο ψεῦδος καὶ πᾶν σῶμα διαιρετόν, οὐδὲν διαφέρει διῃρῆσθαι μὲν ἅπτεσθαι δέ, ἢ διαιρετὸν εἶναι· εἰ γὰρ διακρίνεσθαι δύναται κατὰ τὰς ἁφάς, ὥσπερ φασί τινες, κἂν μήπω ᾖ διῃρημένον, ἔσται διῃρημένον· δυνατὸν γὰρ διαιρεθῆναι· γίνεται γὰρ οὐθὲν ἀδύνατον.

Ὅλως δὲ τὸ τοῦτον γίνεσθαι τὸν τρόπον μόνον σχιζομένων τῶν σωμάτων ἄτοπον· ἀναιρεῖ γὰρ οὗτος ὁ λόγος ἀλλοίωσιν, ὁρῶμεν δὲ τὸ αὐτὸ σῶμα συνεχὲς ὂν ὁτὲ μὲν ὑγρὸν ὁτὲ δὲ πεπηγός, οὐ διαιρέσει καὶ συνθέσει τοῦτο παθόν, οὐδὲ τροπῇ καὶ διαθιγῇ, καθάπερ λέγει Δημόκριτος· οὔτε γὰρ μεταταχθὲν οὔτε μετατεθὲν τὴν φύσιν πεπηγὸς ἐξ ὑγροῦ γέγονεν· οὐδ’ ἐνυπάρχει τὰ σκληρὰ καὶ πεπηγότα ἀδιαίρετα τοὺς ὄγκους· ἀλλ’ ὁμοίως ἅπαν ὑγρόν, ὁτὲ δὲ σκληρὸν καὶ πεπηγός ἐστιν.

Ἔτι δ’ οὐδ’ αὔξησιν οἷόν τ’ εἶναι καὶ φθίσιν· οὐ γὰρ ὁτιοῦν ἔσται γεγονὸς μεῖζον, εἴπερ ἔσται πρόσθεσις, καὶ μὴ πᾶν μεταβεβληκός, ἢ μιχθέντος τινὸς ἢ καθ’ αὑτὸ μεταβαλόντος.

Ὅτι μὲν οὖν ἐστὶ τὸ γεννᾶν καὶ τὸ ποιεῖν καὶ τὸ γίνεσθαί τε καὶ πάσχειν ὑπ’ ἀλλήλων, καὶ τίνα τρόπον ἐνδέχεται, καὶ τίνα φασὶ μέν τινες οὐκ ἐνδέχεται δέ, διωρίσθω τοῦτον τὸν τρόπον.

Κεφάλαιο 10

Λοιπὸν δὲ θεωρῆσαι περὶ μίξεως κατὰ τὸν αὐτὸν τρόπον τῆς μεθόδου· τοῦτο γὰρ ἦν τρίτον τῶν προτεθέντων ἐξ ἀρχῆς. Σκεπτέον δὲ τί τ' ἐστὶν ἡ μίξις καὶ τί τὸ μικτόν, καὶ τίσιν ὑπάρχει τῶν ὄντων καὶ πῶς, ἔτι δὲ πότερον ἔστι μίξις ἢ τοῦτο ψεῦδος· ἀδύνατον γάρ ἐστι μιχθῆναί τι ἕτερον ἑτέρῳ, καθάπερ λέγουσί τινες· ὄντων μὲν γὰρ ἔτι τῶν (327b.) μιχθέντων καὶ μὴ ἠλλοιωμένων οὐδὲν μᾶλλον νῦν μεμίχθαι φασὶν ἢ πρότερον, ἀλλ' ὁμοίως ἔχειν, θατέρου δὲ φθαρέντος οὐ μεμίχθαι, ἀλλὰ τὸ μὲν εἶναι τὸ δ' οὐκ εἶναι, τὴν δὲ μίξιν ὁμοίως ἐχόντων εἶναι τὸν αὐτὸν δὲ τρόπον κἂν εἰ ἀμφοτέρων συνελθόντων ἔφθαρται τῶν μιγνυμένων ἑκάτερον· οὐ γὰρ εἶναι μεμιγμένα τά γε ὅλως οὐκ ὄντα. Οὗτος μὲν οὖν ὁ λόγος ἔοικε ζητεῖν διορίσαι τί διαφέρει μίξις γενέσεως καὶ φθορᾶς, καὶ τί τὸ μικτὸν τοῦ γεννητοῦ καὶ φθαρτοῦ· δῆλον γὰρ ὡς δεῖ διαφέρειν, εἴπερ ἔστιν. Ὥστε τούτων ὄντων φανερῶν τὰ διαπορηθέντα λύοιντ' ἄν.

Ἀλλὰ μὴν οὐδὲ τὴν ὕλην τῷ πυρὶ μεμίχθαι φαμὲν οὐδὲ μίγνυσθαι καιομένην, οὔτ' αὐτὴν αὑτῆς τοῖς μορίοις οὔτε τῷ πυρί, ἀλλὰ τὸ μὲν πῦρ γίνεσθαι, τὴν δὲ φθείρεσθαι. Τὸν αὐτὸν δὲ τρόπον οὔτε τῷ σώματι τὴν τροφὴν οὔτε τὸ σχῆμα τῷ κηρῷ μιγνύμενον σχηματίζειν τὸν ὄγκον· οὐδὲ τὸ σῶμα καὶ τὸ λευκὸν οὐδ' ὅλως τὰ πάθη καὶ τὰς ἕξεις οἷόν τε μίγνυσθαι τοῖς πράγμασιν· σωζόμενα γὰρ ὁρᾶται. Ἀλλὰ μὴν οὐδὲ τὸ λευκόν γε καὶ τὴν ἐπιστήμην ἐνδέχεται μιχθῆναι, οὐδ' ἄλλο τῶν μὴ χωριστῶν οὐδέν. Ἀλλὰ τοῦτο λέγουσιν οὐ καλῶς οἱ πάντα ποτὲ ὁμοῦ φάσκοντες εἶναι καὶ μεμίχθαι· οὐ γὰρ ἅπαν ἅπαντι μικτόν, ἀλλ' ὑπάρχειν δεῖ χωριστὸν ἑκάτερον τῶν μιχθέντων· τῶν δὲ παθῶν οὐθὲν χωριστόν. Ἐπεὶ δ' ἐστὶ τὰ μὲν δυνάμει τὰ δ' ἐνεργείᾳ τῶν ὄντων, ἐνδέχεται τὰ μιχθέντα εἶναί πως καὶ μὴ εἶναι, ἐνεργείᾳ μὲν ἑτέρου ὄντος τοῦ γεγονότος ἐξ αὐτῶν, δυνάμει δ' ἔτι ἑκατέρου ἅπερ ἦσαν πρὶν μιχθῆναι, καὶ οὐκ ἀπολωλότα· τοῦτο γὰρ ὁ λόγος διηπόρει πρότερον· φαίνεται δὲ τὰ μιγνύμενα πρότερόν τε ἐκ κεχωρισμένων συνιόντα καὶ δυνάμενα χωρίζεσθαι πάλιν· οὔτε διαμένουσιν οὖν ἐνεργείᾳ ὥσπερ τὸ σῶμα καὶ τὸ λευκόν, οὔτε φθείρονται, οὔτε θάτερον οὔτ' ἄμφω· σώζεται γὰρ ἡ δύναμις αὐτῶν.

Διὸ ταῦτα μὲν ἀφείσθω· τὸ δὲ συνεχὲς τούτοις ἀπόρημα διαιρετέον, πότερον ἡ μίξις πρὸς τὴν αἴσθησιν τί ἐστιν. Ὅταν γὰρ οὕτως εἰς μικρὰ διαιρεθῇ τὰ μιγνύμενα, καὶ τεθῇ παρ' ἄλληλα τοῦτον τὸν τρόπον ὥστε μὴ δῆλον ἕκαστον εἶναι τῇ αἰσθήσει, τότε μέμικται (328a.) ἢ οὔ, ἀλλ' ἔστιν ὥστε ὁτιοῦν εἶναι μόριον τῶν μιχθέντων; λέγεται μὲν οὖν ἐκείνως, οἷον κριθὰς μεμίχθαι πυροῖς, ὅταν ἡτισοῦν παρ' ὁντινοῦν τεθῇ. Εἰ δ' ἐστὶ πᾶν σῶμα διαιρετόν, εἴπερ ἐστὶ σῶμα σώματι μικτὸν ὁμοιομερές, ὁτιοῦν ἂν δέοι μέρος γίνεσθαι παρ' ὁτιοῦν. Ἐπεὶ δ' οὐκ ἔστιν εἰς τἀλάχιστα διαιρεθῆναι, <οὐδὲ> σύνθεσις ταὐτὸ καὶ μίξις ἀλλ' ἕτερον, δῆλον ὡς οὔτε κατὰ μικρὰ σωζόμενα δεῖ τὰ μιγνύμενα φάναι μεμίχθαι. Σύνθεσις γὰρ ἔσται καὶ οὐ κρᾶσις οὐδὲ μίξις, οὐδ' ἕξει τὸν αὐτὸν λόγον τῷ ὅλῳ τὸ μόριον.

Φαμὲν δ', εἴπερ δεῖ μεμίχθαι τι, τὸ μιχθὲν ὁμοιομερὲς εἶναι, καὶ ὥσπερ τοῦ ὕδατος τὸ μέρος ὕδωρ, οὕτω καὶ τοῦ κραθέντος. Ἂν δ' ᾖ κατὰ μικρὰ σύνθεσις ἡ μίξις, οὐθὲν συμβήσεται τούτων, ἀλλὰ μόνον μεμιγμένα πρὸς τὴν αἴσθησιν (καὶ τὸ αὐτὸ τῷ μὲν μεμιγμένον, ἐὰν μὴ βλέπῃ ὀξύ, τῷ Λυγκεῖ δ' οὐθὲν μεμιγμένον), <οὐδὲ> τῇ διαιρέσει, ὥστε ὁτιοῦν παρ' ὁτιοῦν μέρος, ἀδύνατον γὰρ οὕτω διαιρεθῆναι. Ἢ οὖν οὐκ ἔστι μίξις, ἢ λεκτέον τοῦτο πῶς ἐνδέχεται γίνεσθαι πάλιν.

Ἔστι δή, ὡς ἔφαμεν, τῶν ὄντων τὰ μὲν ποιητικὰ τὰ δ' ὑπὸ τούτων παθητικά. Τὰ μὲν οὖν ἀντιστρέφει, ὅσων ἡ αὐτὴ ὕλη ἐστί, καὶ ποιητικὰ ἀλλήλων καὶ παθητικὰ ὑπ' ἀλλήλων· τὰ δὲ ποιεῖ ἀπαθῆ ὄντα, ὅσων μὴ ἡ αὐτὴ ὕλη. Τούτων μὲν οὖν οὐκ ἔστι μίξις· διὸ οὐδ' ἡ ἰατρικὴ ποιεῖ ὑγίειαν οὐδ' ἡ ὑγίεια μιγνυμένη τοῖς σώμασιν. Τῶν δὲ ποιητικῶν καὶ παθητικῶν ὅσα εὐδιαίρετα, πολλὰ μὲν ὀλίγοις καὶ μεγάλα μικροῖς συντιθέμενα οὐ ποιεῖ μίξιν, ἀλλ' αὔξησιν τοῦ κρατοῦντος· μεταβάλλει γὰρ θάτερον εἰς τὸ κρατοῦν, οἷον σταλαγμὸς οἴνου μυρίοις χοεῦσιν ὕδατος οὐ μίγνυται· λύεται γὰρ τὸ εἶδος καὶ μεταβάλλει εἰς τὸ πᾶν ὕδωρ. Ὅταν δὲ ταῖς δυνάμεσιν ἰσάζῃ πως, τότε μεταβάλλει μὲν ἑκάτερον εἰς τὸ κρατοῦν ἐκ τῆς αὑτοῦ φύσεως, οὐ γίνεται δὲ θάτερον, ἀλλὰ μεταξὺ καὶ κοινόν.

Φανερὸν οὖν ὅτι ταῦτ' ἐστὶ μικτὰ ὅσα ἐναντίωσιν ἔχει τῶν ποιούντων· ταῦτα γὰρ δὴ ὑπ' ἀλλήλων ἐστὶ παθητικά. Καὶ μικρὰ δὲ μικροῖς παρατιθέμενα μίγνυται μᾶλλον· ῥᾷον γὰρ καὶ θᾶττον ἄλληλα μεθίστησιν.

Τὸ δὲ πολὺ καὶ ὑπὸ πολλοῦ χρονίως τοῦτο δρᾷ. Διὸ τὰ (328b.) εὐόριστα τῶν διαιρετῶν καὶ παθητικῶν μικτά (διαιρεῖται γὰρ εἰς μικρὰ ταῦτα ῥᾳδίως· τοῦτο γὰρ ἦν τὸ εὐορίστῳ εἶναι), οἷον τὰ ὑγρὰ μικτὰ μάλιστα τῶν σωμάτων· εὐόριστον γὰρ μάλιστα τὸ ὑγρὸν τῶν διαιρετῶν, ἐὰν μὴ γλίσχρον ᾖ· ταῦτα γὰρ δὴ πλείω καὶ μείζω μόνον ποιεῖ τὸν ὄγκον.

Ὅταν δ' ᾖ θάτερον μόνον παθητικὸν ἢ σφόδρα, τὸ δὲ πάμπαν ἠρέμα, ἢ οὐθὲν πλεῖον τὸ μιχθὲν ἐξ ἀμφοῖν ἢ μικρόν, ὅπερ συμβαίνει περὶ τὸν καττίτερον καὶ τὸν χαλκόν. Ἔνια γὰρ ψελλίζεται πρὸς ἄλληλα τῶν ὄντων καὶ ἐπαμφοτερίζει· φαίνεται γάρ πως καὶ μικτὰ ἠρέμα, καὶ ὡς θάτερον μὲν δεκτικὸν θάτερον δ’ εἶδος. Ὅπερ ἐπὶ τούτων συμβαίνει· ὁ γὰρ καττίτερος ὡς πάθος τι ὢν ἄνευ ὕλης τοῦ χαλκοῦ σχεδὸν ἀφανίζεται καὶ μιχθεὶς ἄπεισι χρωματίσας μόνον. Ταὐτὸ δὲ τοῦτο συμβαίνει καὶ ἐφ’ ἑτέρων.

Φανερὸν τοίνυν ἐκ τῶν εἰρημένων καὶ ὅτι ἔστι μίξις καὶ τί ἐστι καὶ διὰ τί, καὶ ποῖα μικτὰ τῶν ὄντων, ἐπείπερ ἐστὶν ἔνια τοιαῦτα οἷα παθητικά τε ὑπ’ ἀλλήλων καὶ εὐόριστα καὶ εὐδιαίρετα· ταῦτα γὰρ οὔτ’ ἐφθάρθαι ἀνάγκη μεμιγμένα οὔτ’ ἔτι ταὐτὰ ἁπλῶς εἶναι, οὔτε σύνθεσιν εἶναι τὴν μίξιν αὐτῶν, οὔτε πρὸς τὴν αἴσθησιν· ἀλλ’ ἔστι μικτὸν μὲν ὃ ἂν εὐόριστον ὂν παθητικὸν ᾖ καὶ ποιητικὸν καὶ τοιούτῳ μικτόν (πρὸς ὁμώνυμον γὰρ τὸ μικτόν), ἡ δὲ μίξις τῶν μικτῶν ἀλλοιωθέντων ἕνωσις.

Κεφάλαιο 1

Περὶ μὲν οὖν μίξεως καὶ ἁφῆς καὶ τοῦ ποιεῖν καὶ πάσχειν εἴρηται πῶς ὑπάρχει τοῖς μεταβάλλουσι κατὰ φύσιν, ἔτι δὲ περὶ γενέσεως καὶ φθορᾶς τῆς ἁπλῆς, τίνος καὶ πῶς ἐστὶ καὶ διὰ τίν’ αἰτίαν. Ὁμοίως δὲ καὶ περὶ ἀλλοιώσεως εἴρηται, τί τὸ ἀλλοιοῦσθαι καὶ τίν’ ἔχει διαφορὰν αὐτῶν.

Λοιπὸν δὲ θεωρῆσαι περὶ τὰ καλούμενα στοιχεῖα τῶν σωμάτων. Γένεσις μὲν γὰρ καὶ φθορὰ πάσαις ταῖς φύσει συνεστώσαις οὐσίαις οὐκ ἄνευ τῶν αἰσθητῶν σωμάτων.

Τούτων δὲ τὴν ὑποκειμένην ὕλην οἱ μέν φασιν εἶναι μίαν, οἷον ἀέρα τιθέντες ἢ πῦρ ἤ τι μεταξὺ τούτων, σῶμά τε ὂν καὶ χωριστόν, (329a.) οἱ δὲ πλείω τὸν ἀριθμὸν ἑνός, οἱ μὲν πῦρ καὶ γῆν, οἱ δὲ ταῦτά τε καὶ ἀέρα τρίτον, οἱ δὲ καὶ ὕδωρ τούτων τέταρτον, ὥσπερ Ἐμπεδοκλῆς· ἐξ ὧν συγκρινομένων καὶ διακρινομένων ἢ ἀλλοιουμένων συμβαίνειν τὴν γένεσιν καὶ τὴν φθορὰν τοῖς πράγμασιν.

Ὅτι μὲν οὖν τὰ πρῶτα ἀρχὰς καὶ στοιχεῖα καλῶς ἔχει λέγειν, ἔστω συνομολογούμενον, ἐξ ὧν μεταβαλλόντων ἢ κατὰ σύγκρισιν καὶ διάκρισιν ἢ κατ’ ἄλλην μεταβολὴν συμβαίνει γένεσιν εἶναι καὶ φθοράν. Ἀλλ’ οἱ μὲν ποιοῦντες μίαν ὕλην παρὰ τὰ εἰρημένα, ταύτην δὲ σωματικὴν καὶ χωριστήν, ἁμαρτάνουσιν· ἀδύνατον γὰρ ἄνευ ἐναντιώσεως εἶναι τὸ σῶμα τοῦτο αἰσθητῆς· ἢ γὰρ κοῦφον ἢ βαρὺ ἢ ψυχρὸν ἢ θερμὸν ἀνάγκη εἶναι τὸ ἄπειρον τοῦτο, ὃ λέγουσί τινες εἶναι τὴν ἀρχήν. Ὡς δ’ ἐν τῷ Τιμαίῳ γέγραπται, οὐδένα ἔχει διορισμόν· οὐ γὰρ εἴρηκε σαφῶς τὸ πανδεχές, εἰ χωρίζεται τῶν στοιχείων. Οὐδὲ χρῆται οὐδέν, φήσας εἶναι ὑποκείμενόν τι τοῖς καλουμένοις στοιχείοις πρότερον, οἷον χρυσὸν τοῖς ἔργοις τοῖς χρυσοῖς. Καίτοι καὶ τοῦτο οὐ καλῶς λέγεται τοῦτον τὸν τρόπον λεγόμενον, ἀλλ’ ὧν μὲν ἀλλοίωσις, ἐστὶν οὕτως, ὧν δὲ γένεσις καὶ φθορά, ἀδύνατον ἐκεῖνο προσαγορεύεσθαι ἐξ οὗ γέγονεν. Καίτοι γέ φησι μακρῷ ἀληθέστατον εἶναι χρυσὸν λέγειν ἕκαστον εἶναι. Ἀλλὰ τῶν στοιχείων ὄντων στερεῶν μέχρι ἐπιπέδων ποιεῖται τὴν ἀνάλυσιν· ἀδύνατον δὲ τὴν τιθήνην καὶ τὴν ὕλην τὴν πρώτην τὰ ἐπίπεδα εἶναι. Ἡμεῖς δὲ φαμὲν μὲν εἶναί τινα ὕλην τῶν σωμάτων τῶν αἰσθητῶν, ἀλλὰ ταύτην οὐ χωριστὴν ἀλλ’ ἀεὶ μετ’ ἐναντιώσεως, ἐξ ἧς γίνεται τὰ καλούμενα στοιχεῖα.

Διώρισται δὲ περὶ αὐτῶν ἐν ἑτέροις ἀκριβέστερον. Οὐ μὴν ἀλλ’ ἐπειδὴ καὶ τὸν τρόπον τοῦτόν ἐστιν ἐκ τῆς ὕλης τὰ σώματα τὰ πρῶτα, διοριστέον καὶ περὶ τούτων, ἀρχὴν μὲν καὶ πρώτην οἰομένοις εἶναι τὴν ὕλην τὴν ἀχώριστον μέν, ὑποκειμένην δὲ τοῖς ἐναντίοις· οὔτε γὰρ τὸ θερμὸν ὕλη τῷ ψυχρῷ οὔτε τοῦτο τῷ θερμῷ, ἀλλὰ τὸ ὑποκείμενον ἀμφοῖν. Ὥστε πρῶτον μὲν τὸ δυνάμει σῶμα αἰσθητὸν ἀρχή, δεύτερον δ' αἱ ἐναντιώσεις, λέγω δ' οἷον θερμότης καὶ ψυχρότης, τρίτον δ' ἤδη πῦρ καὶ ὕδωρ καὶ τὰ τοιαῦτα· ταῦτα μὲν γὰρ μεταβάλλει εἰς ἄλληλα, καὶ οὐχ ὡς Ἐμπεδοκλῆς καὶ (329b.) ἕτεροι λέγουσιν (οὐδὲ γὰρ ἂν ἦν ἀλλοίωσις), αἱ δ' ἐναντιώσεις οὐ μεταβάλλουσιν. Ἀλλ' οὐδὲν ἧττον καὶ ὣς σώματος ποίας καὶ πόσας λεκτέον ἀρχάς· οἱ μὲν γὰρ ἄλλοι ὑποθέμενοι χρῶνται, καὶ οὐδὲν λέγουσι διὰ τί αὗται ἢ τοσαῦται.

Κεφάλαιο 2

Ἐπεὶ οὖν ζητοῦμεν αἰσθητοῦ σώματος ἀρχάς, τοῦτο δ’ ἐστὶν ἁπτοῦ, ἁπτὸν δ’ οὗ ἡ αἴσθησις ἁφή, φανερὸν ὅτι οὐ πᾶσαι αἱ ἐναντιώσεις σώματος εἴδη καὶ ἀρχὰς ποιοῦσιν, ἀλλὰ μόνον αἱ κατὰ τὴν ἁφήν· κατ’ ἐναντίωσίν τε γὰρ διαφέρουσι, καὶ κατὰ ἁπτὴν ἐναντίωσιν. Διὸ οὔτε λευκότης καὶ μελανία οὔτε γλυκύτης καὶ πικρότης, ὁμοίως δ’ οὐδὲ τῶν ἄλλων τῶν αἰσθητῶν ἐναντιώσεων οὐδὲν ποιεῖ στοιχεῖον. Καίτοι πρότερον ὄψις ἁφῆς, ὥστε καὶ τὸ ὑποκείμενον πρότερον.

Ἀλλ’ οὐκ ἔστι σώματος ἁπτοῦ πάθος ᾗ ἁπτόν, ἀλλὰ καθ’ ἕτερον, καὶ εἰ ἔτυχε τῇ φύσει πρότερον. Αὐτῶν δὴ πρῶτον τῶν ἁπτῶν διαιρετέον ποῖαι πρῶται διαφοραὶ καὶ ἐναντιώσεις. Εἰσὶ δ’ ἐναντιώσεις κατὰ τὴν ἁφὴν αἵδε, θερμὸν ψυχρόν, ξηρὸν ὑγρόν, βαρὺ κοῦφον, σκληρὸν μαλακόν, γλίσχρον κραῦρον, τραχὺ λεῖον, παχὺ λεπτόν. Τούτων δὲ βαρὺ μὲν καὶ κοῦφον οὐ ποιητικὰ οὐδὲ παθητικά· οὐ γὰρ τῷ ποιεῖν τε ἕτερον ἢ πάσχειν ὑφ’ ἑτέρου λέγονται. Δεῖ δὲ ποιητικὰ καὶ παθητικὰ εἶναι ἀλλήλων τὰ στοιχεῖα· μίγνυται γὰρ καὶ μεταβάλλει εἰς ἄλληλα. Θερμὸν δὲ καὶ ψυχρὸν καὶ ὑγρὸν καὶ ξηρὸν τὰ μὲν τῷ ποιητικὰ εἶναι τὰ δὲ τῷ παθητικὰ λέγεται· θερμὸν γάρ ἐστι τὸ συγκρῖνον τὰ ὁμογενῆ (τὸ γὰρ διακρίνειν, ὅπερ φασὶ ποιεῖν τὸ πῦρ, συγκρίνειν ἐστὶ τὰ ὁμόφυλα· συμβαίνει γὰρ ἐξαιρεῖν τὰ ἀλλότρια), ψυχρὸν δὲ τὸ συνάγον καὶ συγκρῖνον ὁμοίως τά τε συγγενῆ καὶ τὰ μὴ ὁμόφυλα, ὑγρὸν δὲ τὸ ἀόριστον οἰκείῳ ὅρῳ εὐόριστον ὄν, ξηρὸν δὲ τὸ εὐόριστον μὲν οἰκείῳ ὅρῳ, δυσόριστον δέ. Τὸ δὲ λεπτὸν καὶ παχὺ καὶ γλίσχρον καὶ κραῦρον καὶ σκληρὸν καὶ μαλακὸν καὶ αἱ ἄλλαι διαφοραὶ ἐκ τούτων· ἐπεὶ γὰρ τὸ ἀναπληστικόν ἐστι τοῦ ὑγροῦ διὰ τὸ μὴ ὡρίσθαι μὲν εὐόριστον δ’ εἶναι καὶ ἀκολουθεῖν τῷ (330a.) ἁπτομένῳ, τὸ δὲ λεπτὸν ἀναπληστικόν (λεπτομερὲς γάρ, καὶ τὸ μικρομερὲς ἀναπληστικόν· ὅλον γὰρ ὅλου ἅπτεται· τὸ δὲ λεπτὸν μάλιστα τοιοῦτον), φανερὸν ὅτι τὸ μὲν λεπτὸν ἔσται τοῦ ὑγροῦ, τὸ δὲ παχὺ τοῦ ξηροῦ. Πάλιν δὲ τὸ μὲν γλίσχρον τοῦ ὑγροῦ (τὸ γὰρ γλίσχρον ὑγρὸν πεπονθός τί ἐστιν, οἷον τὸ ἔλαιον), τὸ δὲ κραῦρον τοῦ ξηροῦ· κραῦρον γὰρ τὸ τελέως ξηρόν, ὥστε καὶ πεπηγέναι δι’ ἔλλειψιν ὑγρότητος.

Ἔτι τὸ μὲν μαλακὸν τοῦ ὑγροῦ (μαλακὸν γὰρ τὸ ὑπεῖκον εἰς ἑαυτὸ καὶ μὴ μεθιστάμενον, ὅπερ ποιεῖ τὸ ὑγρόν· διὸ καὶ οὐκ ἔστι τὸ ὑγρὸν μαλακόν, ἀλλὰ τὸ μαλακὸν τοῦ ὑγροῦ), τὸ δὲ σκληρὸν τοῦ ξηροῦ· σκληρὸν γάρ ἐστι τὸ πεπηγός, τὸ δὲ πεπηγὸς ξηρόν. Λέγεται δὲ ξηρὸν καὶ ὑγρὸν πλεοναχῶς·

ἀντίκειται γὰρ τῷ ξηρῷ καὶ τὸ ὑγρὸν καὶ τὸ διερόν, καὶ πάλιν τῷ ὑγρῷ καὶ τὸ ξηρὸν καὶ τὸ πεπηγός· ἅπαντα δὲ ταῦτ’ ἐστὶ τοῦ ξηροῦ καὶ τοῦ ὑγροῦ τῶν πρώτως λεχθέντων.

Ἐπεὶ γὰρ ἀντίκειται τῷ διερῷ τὸ ξηρόν, καὶ διερὸν μέν ἐστι τὸ ἔχον ἀλλοτρίαν ὑγρότητα ἐπιπολῆς, βεβρεγμένον δὲ τὸ εἰς βάθος, ξηρὸν δὲ τὸ ἐστερημένον ταύτης, φανερὸν ὅτι τὸ μὲν διερὸν ἔσται τοῦ ὑγροῦ, τὸ δ’ ἀντικείμενον ξηρὸν τοῦ πρώτως ξηροῦ. Πάλιν δὲ τὸ ὑγρὸν καὶ τὸ πεπηγὸς ὡσαύτως· ὑγρὸν μὲν γάρ ἐστι τὸ ἔχον οἰκείαν ὑγρότητα, βεβρεγμένον δὲ τὸ ἔχον ἀλλοτρίαν ὑγρότητα ἐν τῷ βάθει, πεπηγὸς δὲ τὸ ἐστερημένον ταύτης. Ὥστε καὶ τούτων ἔσται τὸ μὲν ξηροῦ τὸ δὲ ὑγροῦ. Δῆλον τοίνυν ὅτι πᾶσαι αἱ ἄλλαι διαφοραὶ ἀνάγονται εἰς τὰς πρώτας τέτταρας. Αὗται δὲ οὐκέτι εἰς ἐλάττους· οὔτε γὰρ τὸ θερμὸν ὅπερ ὑγρὸν ἢ ὅπερ ξηρόν, οὔτε τὸ ὑγρὸν ὅπερ θερμὸν ἢ ὅπερ ψυχρόν, οὔτε τὸ ψυχρὸν καὶ τὸ ξηρὸν οὔθ’ ὑπ’ ἄλληλ’ οὔθ’ ὑπὸ τὸ θερμὸν καὶ τὸ ὑγρόν εἰσιν ὥστ’ ἀνάγκη τέτταρας εἶναι ταύτας.

Κεφάλαιο 3

Ἐπεὶ δὲ τέτταρα τὰ στοιχεῖα, τῶν δὲ τεττάρων ἓξ αἱ συζεύξεις, τὰ δ’ ἐναντία οὐ πέφυκε συνδυάζεσθαι (θερμὸν γὰρ καὶ ψυχρὸν εἶναι τὸ αὐτὸ καὶ πάλιν ξηρὸν καὶ ὑγρὸν ἀδύνατον), φανερὸν ὅτι τέτταρες ἔσονται αἱ τῶν στοιχείων συζεύξεις, θερμοῦ καὶ ξηροῦ, καὶ θερμοῦ καὶ ὑγροῦ, καὶ (330b.) πάλιν ψυχροῦ καὶ ὑγροῦ, καὶ ψυχροῦ καὶ ξηροῦ. Καὶ ἠκολούθηκε κατὰ λόγον τοῖς ἁπλοῖς φαινομένοις σώμασι, πυρὶ καὶ ἀέρι καὶ ὕδατι καὶ γῇ· τὸ μὲν γὰρ πῦρ θερμὸν καὶ ξηρόν, ὁ δ’ ἀὴρ θερμὸν καὶ ὑγρόν (οἷον ἀτμὶς γὰρ ὁ ἀήρ), τὸ δ’ ὕδωρ ψυχρὸν καὶ ὑγρόν, ἡ δὲ γῆ ψυχρὸν καὶ ξηρόν, ὥστ’ εὐλόγως διανέμεσθαι τὰς διαφορὰς τοῖς πρώτοις σώμασι, καὶ τὸ πλῆθος αὐτῶν εἶναι κατὰ λόγον. Ἅπαντες γὰρ οἱ τὰ ἁπλᾶ σώματα στοιχεῖα ποιοῦντες οἱ μὲν ἕν, οἱ δὲ δύο, οἱ δὲ τρία, οἱ δὲ τέτταρα ποιοῦσιν. Ὅσοι μὲν οὖν ἓν μόνον λέγουσιν, εἶτα πυκνώσει καὶ μανώσει τἆλλα γεννῶσι, τούτοις συμβαίνει δύο ποιεῖν τὰς ἀρχάς, τό τε μανὸν καὶ τὸ πυκνὸν ἢ τὸ θερμὸν καὶ τὸ ψυχρόν· ταῦτα γὰρ τὰ δημιουργοῦντα, τὸ δ’ ἓν ὑπόκειται καθάπερ ὕλη.

Οἱ δ’ εὐθὺς δύο ποιοῦντες, ὥσπερ Παρμενίδης πῦρ καὶ γῆν, τὰ μεταξὺ μίγματα ποιοῦσι τούτων, οἷον ἀέρα καὶ ὕδωρ. Ὡσαύτως δὲ καὶ οἱ τρία λέγοντες, καθάπερ Πλάτων ἐν ταῖς διαιρέσεσιν· τὸ γὰρ μέσον μίγμα ποιεῖ. Καὶ σχεδὸν ταὐτὰ λέγουσιν οἵ τε δύο καὶ οἱ τρία ποιοῦντες· πλὴν οἱ μὲν τέμνουσιν εἰς δύο τὸ μέσον, οἱ δ’ ἓν μόνον ποιοῦσιν. Ἔνιοι δ’ εὐθὺς τέτταρα λέγουσιν, οἷον Ἐμπεδοκλῆς. Συνάγει δὲ καὶ οὗτος εἰς τὰ δύο· τῷ γὰρ πυρὶ τἆλλα πάντα ἀντιτίθησιν. Οὐκ ἔστι δὲ τὸ πῦρ καὶ ὁ ἀὴρ καὶ ἕκαστον τῶν εἰρημένων ἁπλοῦν, ἀλλὰ μικτόν.

Τὰ δ’ ἁπλᾶ τοιαῦτα μέν ἐστιν, οὐ μέντοι ταὐτά, οἷον εἴ τι τῷ πυρὶ ὅμοιον, πυροειδές, οὐ πῦρ, καὶ τὸ τῷ ἀέρι ἀεροειδές· ὁμοίως δὲ κἀπὶ τῶν ἄλλων. Τὸ δὲ πῦρ ἐστιν ὑπερβολὴ θερμότητος, ὥσπερ καὶ κρύσταλλος ψυχρότητος· ἡ γὰρ πῆξις καὶ ἡ ζέσις ὑπερβολαί τινές εἰσιν, ἡ μὲν ψυχρότητος, ἡ δὲ θερμότητος. Εἰ οὖν ὁ κρύσταλλός ἐστι πῆξις ὑγροῦ ψυχροῦ, καὶ τὸ πῦρ ἔσται ζέσις ξηροῦ θερμοῦ. Διὸ καὶ οὐδὲν οὔτ’ ἐκ κρυστάλλου γίνεται οὔτ’ ἐκ πυρός.

Ὄντων δὲ τεττάρων τῶν ἁπλῶν σωμάτων, ἑκάτερα τοῖν δυοῖν ἑκατέρου τῶν τόπων ἐστίν· πῦρ μὲν γὰρ καὶ ἀὴρ τοῦ πρὸς τὸν ὅρον φερομένου, γῆ δὲ καὶ ὕδωρ τοῦ πρὸς τὸ μέσον. Καὶ ἄκρα μὲν καὶ εἰλικρινέστατα πῦρ καὶ γῆ, μέσα δὲ καὶ μεμιγμένα μᾶλλον (331a.) ὕδωρ καὶ ἀήρ. Καὶ ἑκάτερα ἑκατέροις ἐναντία· πυρὶ μὲν γὰρ ἐναντίον ὕδωρ, ἀέρι δὲ γῆ· ταῦτα γὰρ ἐκ τῶν ἐναντίων παθημάτων συνέστηκεν. Οὐ μὴν ἀλλ’ ἁπλῶς γε τέτταρα ὄντα ἑνὸς ἕκαστόν ἐστι, γῆ μὲν ξηροῦ μᾶλλον ἢ ψυχροῦ, ὕδωρ δὲ ψυχροῦ μᾶλλον ἢ ὑγροῦ, ἀὴρ δ’ ὑγροῦ μᾶλλον ἢ θερμοῦ, πῦρ δὲ θερμοῦ μᾶλλον ἢ ξηροῦ.

Κεφάλαιο 4

Ἐπεὶ δὲ διώρισται πρότερον ὅτι τοῖς ἁπλοῖς σώμασιν ἐξ ἀλλήλων ἡ γένεσις, ἅμα δὲ καὶ κατὰ τὴν αἴσθησιν φαίνεται γινόμενα (οὐ γὰρ ἂν ἦν ἀλλοίωσις· κατὰ γὰρ τὰ τῶν ἁπτῶν πάθη ἀλλοίωσίς ἐστιν), λεκτέον τίς ὁ τρόπος τῆς εἰς ἄλληλα μεταβολῆς, καὶ πότερον ἅπαν ἐξ ἅπαντος γίνεσθαι δυνατὸν ἢ τὰ μὲν δυνατὸν τὰ δ’ ἀδύνατον. Ὅτι μὲν οὖν ἅπαντα πέφυκεν εἰς ἄλληλα μεταβάλλειν, φανερόν· ἡ γὰρ γένεσις εἰς ἐναντία καὶ ἐξ ἐναντίων, τὰ δὲ στοιχεῖα πάντα ἔχει ἐναντίωσιν πρὸς ἄλληλα διὰ τὸ τὰς διαφορὰς ἐναντίας εἶναι· τοῖς μὲν γὰρ ἀμφότεραι ἐναντίαι, οἷον πυρὶ καὶ ὕδατι (τὸ μὲν γὰρ ξηρὸν καὶ θερμόν, τὸ δ’ ὑγρὸν καὶ ψυχρόν), τοῖς δ’ ἡ ἑτέρα μόνον, οἷον ἀέρι καὶ ὕδατι (τὸ μὲν γὰρ ὑγρὸν καὶ θερμόν, τὸ δὲ ὑγρὸν καὶ ψυχρόν).

Ὥστε καθόλου μὲν φανερὸν ὅτι πᾶν ἐκ παντὸς γίνεσθαι πέφυκεν, ἤδη δὲ καθ’ ἕκαστον οὐ χαλεπὸν ἰδεῖν πῶς· ἅπαντα μὲν γὰρ ἐξ ἁπάντων ἔσται, διοίσει δὲ τῷ θᾶττον καὶ βραδύτερον καὶ τῷ ῥᾷον καὶ χαλεπώτερον. Ὅσα μὲν γὰρ ἔχει σύμβολα πρὸς ἄλληλα, ταχεῖα τούτων ἡ μετάβασις, ὅσα δὲ μὴ ἔχει, βραδεῖα, διὰ τὸ ῥᾷον εἶναι τὸ ἓν ἢ τὰ πολλὰ μεταβάλλειν, οἷον ἐκ πυρὸς μὲν ἔσται ἀὴρ θατέρου μεταβάλλοντος (τὸ μὲν γὰρ ἦν θερμὸν καὶ ξηρόν, τὸ δὲ θερμὸν καὶ ὑγρόν, ὥστε ἂν κρατηθῇ τὸ ξηρὸν ὑπὸ τοῦ ὑγροῦ, ἀὴρ ἔσται), πάλιν δὲ ἐξ ἀέρος ὕδωρ, ἐὰν κρατηθῇ τὸ θερμὸν ὑπὸ τοῦ ψυχροῦ (τὸ μὲν γὰρ ἦν θερμὸν καὶ ὑγρόν, τὸ δὲ ψυχρὸν καὶ ὑγρόν, ὥστε μεταβάλλοντος τοῦ θερμοῦ ὕδωρ ἔσται). Τὸν αὐτὸν δὲ τρόπον καὶ ἐξ ὕδατος γῆ καὶ ἐκ γῆς πῦρ· ἔχει γὰρ ἄμφω πρὸς ἄμφω σύμβολα· τὸ μὲν γὰρ ὕδωρ ὑγρὸν καὶ ψυχρόν, ἡ δὲ γῆ ψυχρὸν καὶ ξηρόν, ὥστε κρατηθέντος τοῦ ὑγροῦ γῆ ἔσται. Καὶ πάλιν ἐπεὶ τὸ μὲν πῦρ ξηρὸν καὶ θερμόν, ἡ δὲ (331b.) γῆ ψυχρὸν καὶ ξηρόν, ἐὰν φθαρῇ τὸ ψυχρόν, πῦρ ἔσται ἐκ γῆς. Ὥστε φανερὸν ὅτι κύκλῳ τε ἔσται ἡ γένεσις τοῖς ἁπλοῖς σώμασι, καὶ ῥᾷστος οὗτος ὁ τρόπος τῆς μεταβολῆς διὰ τὸ σύμβολα ἐνυπάρχειν τοῖς ἐφεξῆς.

Ἐκ πυρὸς δὲ ὕδωρ καὶ ἐξ ἀέρος γῆν καὶ πάλιν ἐξ ὕδατος καὶ γῆς ἀέρα καὶ πῦρ ἐνδέχεται μὲν γίνεσθαι, χαλεπώτερον δὲ διὰ τὸ πλειόνων εἶναι τὴν μεταβολήν· ἀνάγκη γάρ, εἰ ἔσται ἐξ ὕδατος πῦρ, φθαρῆναι καὶ τὸ ψυχρὸν καὶ τὸ ὑγρόν, καὶ πάλιν εἰ ἐκ γῆς ἀήρ, φθαρῆναι καὶ τὸ ψυχρὸν καὶ τὸ ξηρόν. Ὡσαύτως δὲ καὶ εἰ ἐκ πυρὸς καὶ ἀέρος ὕδωρ καὶ γῆ, ἀνάγκη ἀμφότερα μεταβάλλειν. Αὕτη μὲν οὖν χρονιωτέρα ἡ γένεσις· ἐὰν δ’ ἑκατέρου φθαρῇ θάτερον, ῥᾴων μέν, οὐκ εἰς ἄλληλα δὲ ἡ μετάβασις, ἀλλ’ ἐκ πυρὸς μὲν καὶ ὕδατος ἔσται γῆ καὶ ἀήρ, ἐξ ἀέρος δὲ καὶ γῆς πῦρ καὶ ὕδωρ. Ὅταν μὲν γὰρ τοῦ ὕδατος φθαρῇ τὸ ψυχρὸν τοῦ δὲ πυρὸς τὸ ξηρόν, ἀὴρ ἔσται (λείπεται γὰρ τοῦ μὲν τὸ θερμὸν τοῦ δὲ τὸ ὑγρόν), ὅταν δὲ τοῦ μὲν πυρὸς τὸ θερμὸν τοῦ δ’ ὕδατος τὸ ὑγρόν, γῆ, διὰ τὸ λείπεσθαι τοῦ μὲν τὸ ξηρὸν τοῦ δὲ τὸ ψυχρόν. Ὡσαύτως δὲ καὶ ἐξ ἀέρος καὶ γῆς πῦρ καὶ ὕδωρ· ὅταν μὲν γὰρ τοῦ ἀέρος φθαρῇ τὸ θερμὸν τῆς δὲ γῆς τὸ ξηρόν, ὕδωρ ἔσται (λείπεται γὰρ τοῦ μὲν τὸ ὑγρὸν τῆς δὲ τὸ ψυχρόν), ὅταν δὲ τοῦ μὲν ἀέρος τὸ ὑγρὸν τῆς δὲ γῆς τὸ ψυχρόν, πῦρ, διὰ τὸ λείπεσθαι τοῦ μὲν τὸ θερμὸν τῆς δὲ τὸ ξηρόν, ἅπερ ἦν πυρός.

Ὁμολογουμένη δὲ καὶ τῇ αἰσθήσει ἡ τοῦ πυρὸς γένεσις. Μάλιστα μὲν γὰρ πῦρ ἡ φλόξ, αὕτη δ’ ἐστὶ καπνὸς καιόμενος, ὁ δὲ καπνὸς ἐξ ἀέρος καὶ γῆς. Ἐν δὲ τοῖς ἐφεξῆς οὐκ ἐνδέχεται φθαρέντος ἐν ἑκατέρῳ θατέρου τῶν στοιχείων γενέσθαι μετάβασιν εἰς οὐδὲν τῶν σωμάτων διὰ τὸ λείπεσθαι ἐν ἀμφοῖν ἢ ταὐτὰ ἢ τἀναντία. Ἐξ οὐδετέρων δὲ ἐγχωρεῖ γίνεσθαι σῶμα, οἷον εἰ μὲν τοῦ πυρὸς φθαρείη τὸ ξηρόν, τοῦ δ’ ἀέρος τὸ ὑγρόν· λείπεται γὰρ ἐν ἀμφοῖν τὸ θερμόν· ἐὰν δ’ ἐξ ἑκατέρου τὸ θερμόν, λείπεται τἀναντία, ξηρὸν καὶ ὑγρόν. Ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις· ἐν ἅπασι γὰρ τοῖς ἐφεξῆς ἐνυπάρχει τὸ μὲν ταὐτὸ τὸ δ’ ἐναντίον.

Ὥσθ’ ἅμα δῆλον ὅτι τὰ μὲν ἐξ ἑνὸς εἰς ἓν μεταβαίνοντα ἑνὸς φθαρέντος γίνεται, τὰ δ’ ἐκ δυοῖν εἰς ἓν πλειόνων. Ὅτι (332a.) μὲν οὖν ἅπαντα ἐκ παντὸς γίνεται, καὶ τίνα τρόπον εἰς ἄλληλα μετάβασις γίνεται, εἴρηται. Οὐ μὴν ἀλλ’ ἔτι καὶ ὧδε θεωρήσωμεν περὶ αὐτῶν.

Κεφάλαιο 5

Εἰ γάρ ἐστι τῶν φυσικῶν σωμάτων ὕλη, ὥσπερ καὶ δοκεῖ ἐνίοις, ὕδωρ καὶ ἀὴρ καὶ τὰ τοιαῦτα, ἀνάγκη ἤτοι ἓν ἢ δύο εἶναι ταῦτα ἢ πλείω. Ἓν μὲν δὴ πάντα οὐχ οἷόν τε, οἷον ἀέρα πάντα ἢ ὕδωρ ἢ πῦρ ἢ γῆν, εἴπερ ἡ μεταβολὴ εἰς τἀναντία. Εἰ γὰρ εἴη ἀήρ, εἰ μὲν ὑπομένει, ἀλλοίωσις ἔσται ἀλλ' οὐ γένεσις. Ἅμα δ' οὐδ' οὕτω δοκεῖ, ὥστε ὕδωρ εἶναι ἅμα καὶ ἀέρα ἢ ἄλλ' ὁτιοῦν. Ἔσται δή τις ἐναντίωσις καὶ διαφορὰ ἧς ἕξει τι θάτερον μόριον, τὸ πῦρ οἷον θερμότητα. Ἀλλὰ μὴν οὐκ ἔσται τό γε πῦρ ἀὴρ θερμός· ἀλλοίωσίς τε γὰρ τὸ τοιοῦτον, καὶ οὐ φαίνεται. Ἅμα δὲ πάλιν εἰ ἔσται ἐκ πυρὸς ἀήρ, τοῦ θερμοῦ εἰς τοὐναντίον μεταβάλλοντος ἔσται. Ὑπάρξει ἄρα τῷ ἀέρι τοῦτο, καὶ ἔσται ὁ ἀὴρ ψυχρόν τι. Ὥστε ἀδύνατον τὸ πῦρ ἀέρα θερμὸν εἶναι· ἅμα γὰρ τὸ αὐτὸ θερμὸν καὶ ψυχρὸν ἔσται. Ἄλλο τι ἄρ' ἀμφότερα τὸ αὐτὸ ἔσται, καὶ ἄλλη τις ὕλη κοινή.

Ὁ δ' αὐτὸς λόγος περὶ ἁπάντων, ὅτι οὐκ ἔστιν ἓν τούτων ἐξ οὗ τὰ πάντα. Οὐ μὴν οὐδ' ἄλλο τί γε παρὰ ταῦτα, οἷον μέσον τι ἀέρος καὶ ὕδατος ἢ ἀέρος καὶ πυρός, ἀέρος μὲν παχύτερον καὶ πυρός, τῶν δὲ λεπτότερον· ἔσται γὰρ ἀὴρ καὶ πῦρ ἐκεῖνο μετ' ἐναντιότητος· ἀλλὰ στέρησις τὸ ἕτερον τῶν ἐναντίων· ὥστ' οὐκ ἐνδέχεται μονοῦσθαι ἐκεῖνο οὐδέποτε, ὥσπερ φασί τινες τὸ ἄπειρον καὶ τὸ περιέχον. Ὁμοίως ἄρα ὁτιοῦν τούτων ἢ οὐδέν. Εἰ οὖν μηδὲν αἰσθητόν γε πρότερον τούτων, ταῦτα ἂν εἴη πάντα. Ἀνάγκη τοίνυν ἢ ἀεὶ μένοντα καὶ ἀμετάβλητα εἰς ἄλληλα, ἢ μεταβάλλοντα, καὶ ἢ ἅπαντα, ἢ τὰ μὲν τὰ δ' οὔ, ὥσπερ ἐν τῷ Τιμαίῳ Πλάτων ἔγραψεν. Ὅτι μὲν τοίνυν μεταβάλλειν ἀνάγκη εἰς ἄλληλα, δέδεικται πρότερον· ὅτι δ' οὐχ ὁμοίως ταχέως ἄλλο ἐξ ἄλλου, εἴρηται πρότερον, ὅτι τὰ μὲν ἔχοντα σύμβολον θᾶττον γίνεται ἐξ ἀλλήλων, τὰ δ' οὐκ ἔχοντα βραδύτερον.

Εἰ μὲν τοίνυν ἡ ἐναντιότης μία ἐστὶ καθ' ἣν μεταβάλλουσιν, ἀνάγκη δύο εἶναι· ἡ γὰρ ὕλη τὸ μέσον ἀναίσθητος οὖσα (332b.) καὶ ἀχώριστος. Ἐπεὶ δὲ πλείω ὁρᾶται ὄντα, δύο ἂν εἶεν αἱ ἐλάχισται. Δύο δ' οὐσῶν οὐχ οἷόν τε τρία εἶναι, ἀλλὰ τέσσαρα, ὥσπερ φαίνεται· τοσαῦται γὰρ αἱ συζυγίαι· ἓξ γὰρ οὐσῶν τὰς δύο ἀδύνατον γενέσθαι διὰ τὸ ἐναντίας εἶναι ἀλλήλαις. Περὶ μὲν οὖν τούτων εἴρηται πρότερον.

Ὅτι δ' ἐπειδὴ μεταβάλλουσιν εἰς ἄλληλα, ἀδύνατον ἀρχήν τινα εἶναι αὐτῶν ἢ ἐπὶ τῷ ἄκρῳ ἢ μέσῳ, ἐκ τῶνδε δῆλον. Ἐπὶ μὲν οὖν τοῖς ἄκροις οὐκ ἔσται, ὅτι πῦρ ἔσται ἢ γῆ πάντα· καὶ ὁ αὐτὸς λόγος τῷ φάναι ἐκ πυρὸς ἢ γῆς εἶναι πάντα.

Ὅτι δ’ οὐδὲ μέσον, ὥσπερ δοκεῖ τισιν ἀὴρ μὲν καὶ εἰς πῦρ μεταβάλλειν καὶ εἰς ὕδωρ, ὕδωρ δὲ καὶ εἰς ἀέρα καὶ εἰς γῆν· τὰ δ’ ἔσχατα οὐκέτι εἰς ἄλληλα· δεῖ μὲν γὰρ στῆναι καὶ μὴ εἰς ἄπειρον τοῦτο ἰέναι ἐπ’ εὐθείας ἐφ’ ἑκάτερα.

Ἄπειροι γὰρ ἐναντιότητες ἐπὶ τοῦ ἑνὸς ἔσονται. Γῆ ἐφ’ ᾧ Γ, ὕδωρ ἐφ’ ᾧ Υ, ἀὴρ ἐφ’ ᾧ Α, πῦρ ἐφ’ ᾧ Π. Εἰ δὴ τὸ Α μεταβάλλει εἰς τὸ Π καὶ Υ, ἐναντιότης ἔσται τῶν Α Π.

Ἔστω ταῦτα λευκότης καὶ μελανία. Πάλιν εἰ εἰς τὸ Υ τὸ Α, ἔσται ἄλλη· οὐ γὰρ ταὐτὸ τὸ Υ καὶ Π. Ἔστω δὲ ξηρότης καὶ ὑγρότης, τὸ μὲν Ξ ξηρότης, τὸ δὲ Υ ὑγρότης.

Οὐκοῦν εἰ μὲν μένει τὸ λευκόν, ὑπάρξει τὸ ὕδωρ ὑγρὸν καὶ λευκόν, εἰ δὲ μή, μέλαν ἔσται τὸ ὕδωρ· εἰς τἀναντία γὰρ ἡ μεταβολή. Ἀνάγκη ἄρα ἢ λευκὸν ἢ μέλαν εἶναι τὸ ὕδωρ.

Ἔστω δὴ τὸ πρῶτον. Ὁμοίως τοίνυν καὶ τῷ Π τὸ Ξ ὑπάρξει ἡ ξηρότης. Ἔσται ἄρα καὶ τῷ Π τῷ πυρὶ μεταβολὴ εἰς τὸ ὕδωρ· ἐναντία γὰρ ὑπάρχει· τὸ μὲν γὰρ πῦρ τὸ πρῶτον μέλαν ἦν, ἔπειτα δὲ ξηρόν, τὸ δ’ ὕδωρ ὑγρόν, ἔπειτα δὲ λευκόν. Φανερὸν δὴ ὅτι πᾶσιν ἐξ ἀλλήλων ἔσται ἡ μεταβολή, καὶ ἐπί γε τούτων, ὅτι καὶ ἐν τῷ Γ τῇ γῇ ὑπάρξει τὰ λοιπά, καὶ δύο σύμβολα τὸ μέλαν καὶ τὸ ὑγρόν· ταῦτα γὰρ οὐ συνδεδύασταί πως.

Ὅτι δ’ εἰς ἄπειρον οὐχ οἷόν τ’ ἰέναι, ὅπερ μελλήσαντες δείξειν ἐπὶ τοῦτο ἔμπροσθεν ἤλθομεν, δῆλον ἐκ τῶνδε. Εἰ γὰρ πάλιν τὸ πῦρ, ἐφ’ ᾧ Π, εἰς ἄλλο μεταβαλεῖ καὶ μὴ ἀνακάμψει, οἷον εἰς τὸ Ψ, ἐναντιότης τις τῷ πυρὶ καὶ τῷ Ψ ἄλλη ὑπάρξει τῶν εἰρημένων· οὐδενὶ γὰρ τὸ αὐτὸ ὑπόκειται τῶν Γ Υ Α Π (333a.) τὸ Ψ. Ἔστω δὴ τῷ μὲν Π τὸ Κ, τῷ δὲ Ψ τὸ Φ. Τὸ δὴ Κ πᾶσιν ὑπάρξει τοῖς Γ Υ Α Π· μεταβάλλουσι γὰρ εἰς ἄλληλα. Ἀλλὰ γὰρ τοῦτο μὲν ἔστω μήπω δεδειγμένον· ἀλλ’ ἐκεῖνο δῆλον, ὅτι εἰ πάλιν τὸ Ψ εἰς ἄλλο, ἄλλη ἐναντιότης καὶ τῷ Ψ ὑπάρξει καὶ τῷ πυρὶ τῷ Π. Ὁμοίως δ’ ἀεὶ μετὰ τοῦ προστιθεμένου ἐναντιότης τις ὑπάρξει τοῖς ἔμπροσθεν, ὥστ’ εἰ ἄπειρα, καὶ ἐναντιότητες ἄπειροι τῷ ἑνὶ ὑπάρξουσιν. Εἰ δὲ τοῦτο, οὐκ ἔσται οὔτε ὁρίσασθαι οὐδὲν οὔτε γενέσθαι· δεήσει γάρ, εἰ ἄλλο ἔσται ἐξ ἄλλου, τοσαύτας διεξελθεῖν ἐναντιότητας, καὶ ἔτι πλείους, ὥστ’ εἰς ἔνια μὲν οὐδέποτ’ ἔσται μεταβολή, οἷον εἰ ἄπειρα τὰ μεταξύ· ἀνάγκη δ’, εἴπερ ἄπειρα τὰ στοιχεῖα· ἔτι δ’ οὐδ’ ἐξ ἀέρος εἰς πῦρ, εἰ ἄπειροι αἱ ἐναντιότητες. Γίνεται δὲ καὶ πάντα ἕν· ἀνάγκη γὰρ πάσας ὑπάρχειν τοῖς μὲν κάτω τοῦ Π τὰς τῶν ἄνωθεν, τούτοις δὲ τὰς τῶν κάτωθεν, ὥστε πάντα ἓν ἔσται.

Κεφάλαιο 6

Θαυμάσειε δ’ ἄν τις τῶν λεγόντων πλείω ἑνὸς τὰ στοιχεῖα τῶν σωμάτων ὥστε μὴ μεταβάλλειν εἰς ἄλληλα, καθάπερ Ἐμπεδοκλῆς φησι, πῶς ἐνδέχεται λέγειν αὐτοῖς εἶναι συμβλητὰ τὰ στοιχεῖα. Καίτοι λέγει οὕτω· “ταῦτα γὰρ ἶσά τε πάντα”. Εἰ μὲν οὖν κατὰ τὸ ποσόν, ἀνάγκη ταὐτό τι εἶναι ὑπάρχον ἅπασι τοῖς συμβλητοῖς ᾧ μετροῦνται, οἷον εἰ ἐξ ὕδατος κοτύλης εἶεν ἀέρος δέκα· τὸ αὐτό τι ἦν ἄρα ἄμφω, εἰ μετρεῖται τῷ αὐτῷ. Εἰ δὲ μὴ οὕτω κατὰ τὸ ποσὸν συμβλητὰ ὡς ποσὸν ἐκ ποσοῦ, ἀλλ’ ὅσον δύναται, οἷον εἰ κοτύλη ὕδατος ἴσον δύναται ψύχειν καὶ δέκα ἀέρος, καὶ οὕτως κατὰ τὸ ποσὸν οὐχ ᾗ ποσὸν συμβλητά, ἀλλ’ ᾗ δύναταί τι. Εἴη δ’ ἂν καὶ μὴ τῷ τοῦ ποσοῦ μέτρῳ συμβάλλεσθαι τὰς δυνάμεις, ἀλλὰ κατ’ ἀναλογίαν, οἷον ὡς τόδε λευκὸν τόδε θερμόν. Τὸ δ’ ὡς τόδε σημαίνει ἐν μὲν ποιῷ τὸ ὅμοιον, ἐν δὲ τῷ ποσῷ τὸ ἴσον. Ἄτοπον δὴ φαίνεται, εἰ τὰ σώματα ἀμετάβλητα ὄντα μὴ ἀναλογίᾳ συμβλητά ἐστιν, ἀλλὰ μέτρῳ τῶν δυνάμεων καὶ τῷ εἶναι ἴσον θερμὸν ἢ ὅμοιον πυρὸς τοσονδὶ καὶ ἀέρος πολλαπλάσιον· τὸ γὰρ αὐτὸ πλεῖον τῷ ὁμογενὲς εἶναι τοιοῦτον ἕξει τὸν λόγον.

Ἀλλὰ μὴν οὐδ’ αὔξησις ἂν εἴη κατ’ Ἐμπεδοκλέα, ἀλλ’ ἢ (333b.) κατὰ πρόσθεσιν· πυρὶ γὰρ αὔξει τὸ πῦρ· “αὔξει δὲ χθὼν μὲν σφέτερον δέμας, αἰθέρα δ’ αἰθήρ”. Ταῦτα δὲ προστίθεται· δοκεῖ δ’ οὐχ οὕτως αὔξεσθαι τὰ αὐξανόμενα.

Πολὺ δὲ χαλεπώτερον ἀποδοῦναι περὶ γενέσεως τῆς κατὰ φύσιν. Τὰ γὰρ γινόμενα φύσει πάντα γίνεται ἢ ἀεὶ ἢ ὡς ἐπὶ τὸ πολύ, τὰ δὲ παρὰ τὸ ἀεὶ καὶ ὡς ἐπὶ τὸ πολὺ ἀπὸ ταὐτομάτου καὶ ἀπὸ τύχης. Τί οὖν τὸ αἴτιον τοῦ ἐξ ἀνθρώπου ἄνθρωπον ἢ ἀεὶ ἢ ὡς ἐπὶ τὸ πολύ, καὶ ἐκ τοῦ πυροῦ πυρὸν ἀλλὰ μὴ ἐλαίαν; ἢ καὶ ἐὰν ὡδὶ συντεθῇ ὀστοῦν; οὐ γὰρ ὅπως ἔτυχε συνελθόντων οὐδὲν γίνεται, καθ’ ἃ ἐκεῖνός φησιν, ἀλλὰ λόγῳ τινί. Τί οὖν τούτων αἴτιον; οὐ γὰρ δὴ πῦρ γε ἢ γῆ. Ἀλλὰ μὴν οὐδ’ ἡ φιλία καὶ τὸ νεῖκος· συγκρίσεως γὰρ <τὸ μέν>, τὸ δὲ διακρίσεως αἴτιον. Τοῦτο δ’ ἐστὶν ἡ οὐσία ἡ ἑκάστου, ἀλλ’ οὐ “μόνον μίξις τε διάλλαξίς τε μιγέντων”, ὥσπερ ἐκεῖνός φησιν. Τύχη δ’ ἐπὶ τούτοις ὀνομάζεται, ἀλλ’ οὐ λόγος· ἔστι γὰρ μιχθῆναι ὡς ἔτυχεν. Τῶν δὴ φύσει ὄντων αἴτιον τὸ οὕτως ἔχειν, καὶ ἡ ἑκάστου φύσις αὕτη, περὶ ἧς οὐδὲν λέγει. Οὐδὲν ἄρα περὶ φύσεως λέγει.

Ἀλλὰ μὴν καὶ τὸ εὖ τοῦτο καὶ ἀγαθόν· ὁ δὲ τὴν μίξιν μόνον ἐπαινεῖ. Καίτοι τά γε στοιχεῖα διακρίνει οὐ τὸ νεῖκος, ἀλλ’ ἡ φιλία τὰ φύσει πρότερα τοῦ θεοῦ· θεοὶ δὲ καὶ ταῦτα.

Ἔτι δὲ περὶ κινήσεως ἁπλῶς λέγει· οὐ γὰρ ἱκανὸν εἰπεῖν διότι ἡ φιλία καὶ τὸ νεῖκος κινεῖ, εἰ μὴ τοῦτ’ ἦν φιλίᾳ εἶναι τὸ κινήσει τοιᾳδί, νείκει δὲ τὸ τοιᾳδί. Ἔδει οὖν ἢ ὁρίσασθαι ἢ ὑποθέσθαι ἢ ἀποδεῖξαι, ἢ ἀκριβῶς ἢ μαλακῶς, ἢ ἄλλως γέ πως. Ἔτι δ’ ἐπεὶ φαίνεται καὶ βίᾳ καὶ παρὰ φύσιν κινούμενα τὰ σώματα καὶ κατὰ φύσιν, οἷον τὸ πῦρ ἄνω μὲν οὐ βίᾳ, κάτω δὲ βίᾳ, τῷ δὲ βίᾳ τὸ κατὰ φύσιν ἐναντίον, ἔστι δὲ τὸ βίᾳ, ἔστιν ἄρα καὶ τὸ κατὰ φύσιν κινεῖσθαι. Ταύτην οὖν ἡ φιλία κινεῖ; ἢ οὔ; τοὐναντίον γὰρ τὴν γῆν ἄνω καὶ διακρίσει ἔοικεν, καὶ μᾶλλον τὸ νεῖκος αἴτιον τῆς κατὰ φύσιν κινήεως ἢ ἡ φιλία. Ὥστε καὶ ὅλως παρὰ φύσιν ἡ φιλία ἂν εἴη μᾶλλον. Ἁπλῶς δὲ εἰ μὴ ἡ φιλία ἢ τὸ νεῖκος κινοῖ, αὐτῶν τῶν σωμάτων οὐδεμία κίνησίς ἐστιν οὐδὲ μονή· ἀλλ’ ἄτοπον. Ἔτι δὲ καὶ φαίνεται κινούμενα· (334a.) διέκρινε μὲν γὰρ τὸ νεῖκος, ἠνέχθη δ’ ἄνω ὁ αἰθὴρ οὐχ ὑπὸ τοῦ νείκους, ἀλλ’ ὁτὲ μέν φησιν ὥσπερ ἀπὸ τύχης “οὕτω γὰρ συνέκυρσε θέων τοτέ, πολλάκι δ’ ἄλλως” ὁτὲ δέ φησι πεφυκέναι τὸ πῦρ ἄνω φέρεσθαι, ὁ δ’ αἰθήρ, φησί, “<δ’ αὖ> μακρῇσι κατὰ χθόνα δύετο ῥίζαις”. Ἅμα δὲ καὶ τὸν κόσμον ὁμοίως ἔχειν φησὶν ἐπί τε τοῦ νείκους νῦν καὶ πρότερον ἐπὶ τῆς φιλίας. Τί οὖν ἐστὶ τὸ κινοῦν πρῶτον καὶ αἴτιον τῆς κινήσεως; οὐ γὰρ δὴ ἡ φιλία καὶ τὸ νεῖκος, ἀλλά τινος κινήσεως ταῦτα αἴτια· εἰ δ’ ἔστιν, ἐκεῖνο ἀρχή· ἄτοπον δὲ καὶ εἰ ἡ ψυχὴ ἐκ τῶν στοιχείων ἢ ἕν τι αὐτῶν· αἱ γὰρ ἀλλοιώσεις αἱ τῆς ψυχῆς πῶς ἔσονται, οἷον τὸ μουσικὸν εἶναι καὶ πάλιν ἄμουσον, ἢ μνήμη ἢ λήθη; δῆλον γὰρ ὅτι εἰ μὲν πῦρ ἡ ψυχή, τὰ πάθη ὑπάρξει αὐτῇ ὅσα πυρὶ ᾗ πῦρ· εἰ δὲ μικτόν, τὰ σωματικά· τούτων δ’ οὐδὲν σωματικόν. Ἀλλὰ περὶ μὲν τούτων ἑτέρας ἔργον ἐστὶ θεωρίας.

Κεφάλαιο 7

Περὶ δὲ τῶν στοιχείων ἐξ ὧν τὰ σώματα συνέστηκεν, ὅσοις μὲν δοκεῖ τι εἶναι κοινὸν ἢ μεταβάλλειν εἰς ἄλληλα, ἀνάγκη εἰ θάτερον τούτων, καὶ θάτερον συμβαίνειν· ὅσοι δὲ μὴ ποιοῦσιν ἐξ ἀλλήλων γένεσιν μηδ’ ὡς ἐξ ἑκάστου, πλὴν ὡς ἐκ τοίχου πλίνθους, ἄτοπον πῶς ἐξ ἐκείνων ἔσονται σάρκες καὶ ὀστᾶ καὶ τῶν ἄλλων ὁτιοῦν. Ἔχει δὲ τὸ λεγόμενον ἀπορίαν καὶ τοῖς ἐξ ἀλλήλων γεννῶσιν, τίνα τρόπον γίνεται ἐξ αὐτῶν ἕτερόν τι παρ’ αὐτά. Λέγω δ’ οἷον ἔστιν ἐκ πυρὸς ὕδωρ καὶ ἐκ τούτου γίνεσθαι πῦρ· ἔστι γάρ τι κοινὸν ὑποκείμενον.

Ἀλλὰ δὴ καὶ σὰρξ ἐξ αὐτῶν γίνεται καὶ μυελός· ταῦτα δὴ γίνεται πῶς; ἐκείνοις τε γὰρ τοῖς λέγουσιν ὡς Ἐμπεδοκλῆς τίς ἔσται τρόπος; ἀνάγκη γὰρ σύνθεσιν εἶναι καθάπερ ἐξ πλίνθων καὶ λίθων τοῖχος· καὶ τὸ μίγμα δὲ τοῦτο ἐκ σωζομένων μὲν ἔσται τῶν στοιχείων, κατὰ μικρὰ δὲ παρ’ ἄλληλα συγκειμένων. Οὕτω δὴ σὰρξ καὶ τῶν ἄλλων ἕκαστον. Συμβαίνει δὴ μὴ ἐξ ὁτουοῦν μέρους σαρκὸς γίνεσθαι πῦρ καὶ ὕδωρ, ὥσπερ ἐκ κηροῦ γένοιτ’ ἂν ἐκ μὲν τουδὶ τοῦ μέρους σφαῖρα, πυραμὶς δ’ ἐξ ἄλλου τινός· ἀλλ’ ἐνεδέχετό γε ἐξ ἑκατέρου ἑκάτερον γενέσθαι. Τοῦτο μὲν δὴ τοῦτον γίνεται τὸν τρόπον ἐκ τῆς σαρκὸς ἐξ ὁτουοῦν ἄμφω· τοῖς δ’ ἐκείνως λέγουσιν οὐκ ἐνδέχεται, ἀλλ’ ὡς ἐκ τοίχου λίθος καὶ πλίνθος, (334b.) ἑκάτερον ἐξ ἄλλου τόπου καὶ μέρους. Ὁμοίως δὲ καὶ τοῖς ποιοῦσι μίαν αὐτῶν ὕλην ἔχει τινὰ ἀπορίαν, πῶς ἔσται τι ἐξ ἀμφοτέρων, οἷον ψυχροῦ καὶ θερμοῦ ἢ πυρὸς καὶ γῆς. Εἰ ἐστιν ἡ σὰρξ ἐξ ἀμφοῖν καὶ μηδέτερον ἐκείνων, μηδ’ αὖ σύνθεσις σωζομένων, τί λείπεται πλὴν τὴν ὕλην εἶναι τὸ ἐξ ἐκείνων; ἡ γὰρ θατέρου φθορὰ ἢ θάτερον ποεῖ ἢ τὴν ὕλην.

Ἆρ’ οὖν ἐπειδή ἐστι καὶ μᾶλλον καὶ ἧττον θερμὸν καὶ ψυχρόν, ὅταν μὲν ἁπλῶς ᾖ θάτερον ἐντελεχείᾳ, δυνάμει θάτερον ἔσται· ὅταν δὲ μὴ παντελῶς, ἀλλ’ ὡς μὲν θερμὸν ψυχρόν, ὡς δὲ ψυχρὸν θερμὸν διὰ τὸ μιγνύμενα φθείρειν τὰς ὑπεροχὰς ἀλλήλων, τότε οὔθ’ ἡ ὕλη ἔσται οὔτε ἐκείνων τῶν ἐναντίων ἑκάτερον ἐντελεχείᾳ ἁπλῶς, ἀλλὰ μεταξύ· κατὰ δὲ τὸ δυνάμει μᾶλλον εἶναι θερμὸν ἢ ψυχρὸν ἢ τοὐναντίον, κατὰ τοῦτον τὸν λόγον διπλασίως θερμὸν δυνάμει ἢ ψυχρόν, ἢ τριπλασίως, ἢ κατ’ ἄλλον τρόπον τοιοῦτον.

Ἔσται δὴ μιχθέντων τἆλλ’ ἐκ τῶν ἐναντίων ἢ τῶν στοιχείων, καὶ τὰ στοιχεῖα ἐξ ἐκείνων δυνάμει πως ὄντων, οὐχ οὕτω δὲ ὡς ἡ ὕλη, ἀλλὰ τὸν εἰρημένον τρόπον· καὶ ἔστιν οὕτω μὲν μίξις, ἐκείνως δὲ ὕλη τὸ γινόμενον.

Ἐπεὶ δὲ καὶ πάσχει τἀναντία κατὰ τὸν ἐν τοῖς πρώτοις διορισμόν· ἔστι γὰρ τὸ ἐνεργείᾳ θερμὸν δυνάμει ψυχρὸν καὶ τὸ ἐνεργείᾳ ψυχρὸν δυνάμει θερμόν, ὥστε ἐὰν μὴ ἰσάζῃ, μεταβάλλει εἰς ἄλληλα· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ἐναντίων. Καὶ πρῶτον οὕτω τὰ στοιχεῖα μεταβάλλει, ἐκ δὲ τούτων σάρκες καὶ ὀστᾶ καὶ τὰ τοιαῦτα, τοῦ μὲν θερμοῦ γινομένου ψυχροῦ, τοῦ δὲ ψυχροῦ θερμοῦ, ὅταν πρὸς τὸ μέσον ἔλθῃ· ἐνταῦθα γὰρ οὐδέτερον, τὸ δὲ μέσον πολὺ καὶ οὐκ ἀδιαίρετον. Ὁμοίως δὲ καὶ τὸ ξηρὸν καὶ ὑγρὸν καὶ τὰ τοιαῦτα κατὰ μεσότητα ποιοῦσι σάρκα καὶ ὀστοῦν καὶ τἆλλα.

Κεφάλαιο 8

Ἅπαντα δὲ τὰ μικτὰ σώματα, ὅσα περὶ τὸν τοῦ μέσου τόπον ἐστίν, ἐξ ἁπάντων σύγκειται τῶν ἁπλῶν. Γῆ μὲν γὰρ ἐνυπάρχει πᾶσι διὰ τὸ ἕκαστον εἶναι μάλιστα καὶ πλεῖστον ἐν τῷ οἰκείῳ τόπῳ, ὕδωρ δὲ διὰ τὸ δεῖν μὲν ὁρίζεσθαι τὸ σύνθετον, μόνον δ’ εἶναι τῶν ἁπλῶν εὐόριστον τὸ (335a.) ὕδωρ, ἔτι δὲ καὶ τὴν γῆν ἄνευ τοῦ ὑγροῦ μὴ δύνασθαι συμμένειν, ἀλλὰ τοῦτ’ εἶναι τὸ συνέχον· εἰ γὰρ ἐξαιρεθείη τελέως ἐξ αὐτῆς τὸ ὑγρόν, διαπίπτοι ἄν. Γῆ μὲν οὖν καὶ ὕδωρ διὰ ταύτας ἐνυπάρχει τὰς αἰτίας, ἀὴρ δὲ καὶ πῦρ, ὅτι ἐναντία ἐστὶ γῇ καὶ ὕδατι· γῆ μὲν γὰρ ἀέρι, ὕδωρ δὲ πυρὶ ἐναντίον ἐστίν, ὡς ἐνδέχεται οὐσίαν οὐσίᾳ ἐναντίαν εἶναι. Ἐπεὶ οὖν αἱ γενέσεις ἐκ τῶν ἐναντίων εἰσίν, ἐνυπάρχει δὲ θάτερα ἄκρα τῶν ἐναντίων, ἀνάγκη καὶ θάτερον ἐνυπάρχειν, ὥστ’ ἐν ἅπαντι τῷ συνθέτῳ πάντα τὰ ἁπλᾶ ἐνέσται. Μαρτυρεῖν δ’ ἔοικε καὶ ἡ τροφὴ ἑκάστων· ἅπαντα μὲν γὰρ τρέφεται τοῖς αὐτοῖς ἐξ ὧνπέρ ἐστιν, ἅπαντα δὲ πλείοσι τρέφεται. Καὶ γὰρ ἅπερ ἂν δόξειεν ἑνὶ μόνῳ τρέφεσθαι, τῷ ὕδατι τὰ φυτά, πλείοσι τρέφεται· μέμικται γὰρ τῷ ὕδατι γῆ· διὸ καὶ οἱ γεωργοὶ πειρῶνται μίξαντες ἄρδειν.

Ἐπεὶ δ’ ἐστὶν ἡ μὲν τροφὴ τῆς ὕλης, τὸ δὲ τρεφόμενον συνειλημμένον τῇ ὕλῃ ἡ μορφὴ καὶ τὸ εἶδος, εὔλογον ἤδη τὸ μόνον τῶν ἁπλῶν σωμάτων τρέφεσθαι τὸ πῦρ ἁπάντων ἐξ ἀλλήλων γινομένων, ὥσπερ καὶ οἱ πρότεροι λέγουσιν· μόνον γάρ ἐστι καὶ μάλιστα τοῦ εἴδους τὸ πῦρ διὰ τὸ πεφυκέναι φέρεσθαι πρὸς τὸν ὅρον. Ἕκαστον δὲ πέφυκεν εἰς τὴν ἑαυτοῦ χώραν φέρεσθαι· ἡ δὲ μορφὴ καὶ τὸ εἶδος ἁπάντων ἐν τοῖς ὅροις. Ὅτι μὲν οὖν ἅπαντα τὰ σώματα ἐξ ἁπάντων συνέστηκε τῶν ἁπλῶν, εἴρηται.

Κεφάλαιο 9

Ἐπεὶ δ’ ἐστὶν ἔνια γενητὰ καὶ φθαρτά, καὶ ἡ γένεσις τυγχάνει οὖσα ἐν τῷ περὶ τὸ μέσον τόπῳ, λεκτέον περὶ πάσης γενέσεως ὁμοίως πόσαι τε καὶ τίνες αὐτῆς ἀρχαί· ῥᾷον γὰρ οὕτω τὰ καθ’ ἕκαστον θεωρήσομεν, ὅταν περὶ τῶν καθόλου λάβωμεν πρῶτον. Εἰσὶν οὖν καὶ τὸν ἀριθμὸν ἴσαι καὶ τῷ γένει αἱ αὐταὶ αἵπερ ἐν τοῖς ἀιδίοις τε καὶ πρώτοις· ἡ μὲν γάρ ἐστιν ὡς ὕλη, ἡ δ’ ὡς μορφή. Δεῖ δὲ καὶ τὴν τρίτην ἔτι προσυπάρχειν· οὐ γὰρ ἱκαναὶ πρὸς τὸ γεννῆσαι αἱ δύο, καθάπερ οὐδ’ ἐν τοῖς πρώτοις. Ὡς μὲν οὖν ὕλη τοῖς γενητοῖς ἐστιν αἴτιον τὸ δυνατὸν εἶναι καὶ μὴ εἶναι. Τὰ μὲν γὰρ ἐξ ἀνάγκης ἐστίν, οἷον τὰ ἀίδια, τὰ δ’ ἐξ ἀνάγκης οὐκ ἔστιν. Τούτων δὲ τὰ μὲν ἀδύνατον μὴ εἶναι, τὰ δὲ ἀδύνατον (335b.) εἶναι διὰ τὸ μὴ ἐνδέχεσθαι παρὰ τὸ ἀναγκαῖον ἄλλως ἔχειν. Ἔνια δὲ καὶ εἶναι καὶ μὴ εἶναι δυνατά, ὅπερ ἐστὶ τὸ γενητὸν καὶ φθαρτόν· ποτὲ μὲν γὰρ ἔστι τοῦτο, ποτὲ δ’ οὐκ ἔστιν. Ὥστ’ ἀνάγκη γένεσιν εἶναι καὶ φθορὰν περὶ τὸ δυνατὸν εἶναι καὶ μὴ εἶναι. Διὸ καὶ ὡς μὲν ὕλη τοῦτ’ ἐστὶν αἴτιον τοῖς γενητοῖς, ὡς δὲ τὸ οὗ ἕνεκεν ἡ μορφὴ καὶ τὸ εἶδος· τοῦτο δ’ ἐστὶν ὁ λόγος ὁ τῆς ἑκάστου οὐσίας.

Δεῖ δὲ προσεῖναι καὶ τὴν τρίτην, ἣν ἅπαντες μὲν ὀνειρώττουσι, λέγει δ’ οὐδείς, ἀλλ’ οἱ μὲν ἱκανὴν ᾠήθησαν αἰτίαν εἶναι πρὸς τὸ γίνεσθαι τὴν τῶν εἰδῶν φύσιν, ὥσπερ ὁ ἐν Φαίδωνι Σωκράτης· καὶ γὰρ ἐκεῖνος, ἐπιτιμήσας τοῖς ἄλλοις ὡς οὐδὲν εἰρηκόσιν, ὑποτίθεται ὅτι ἐστὶ τῶν ὄντων τὰ μὲν εἴδη τὰ δὲ μεθεκτικὰ τῶν εἰδῶν, καὶ ὅτι εἶναι μὲν ἕκαστον λέγεται κατὰ τὸ εἶδος, γίνεσθαι δὲ κατὰ τὴν μετάληψιν καὶ φθείρεσθαι κατὰ τὴν ἀποβολήν, ὥστ’ εἰ ταῦτα ἀληθῆ, τὰ εἴδη οἴεται ἐξ ἀνάγκης αἴτια εἶναι καὶ γενέσεως καὶ φθορᾶς. Οἱ δ’ αὐτὴν τὴν ὕλην· ἀπὸ ταύτης γὰρ εἶναι τὴν κίνησιν. Οὐδέτεροι δὲ λέγουσι καλῶς.

Εἰ μὲν γάρ ἐστιν αἴτια τὰ εἴδη, διὰ τί οὐκ ἀεὶ γεννᾷ συνεχῶς, ἀλλὰ ποτὲ μὲν ποτὲ δ’ οὔ, ὄντων καὶ τῶν εἰδῶν ἀεὶ καὶ τῶν μεθεκτικῶν; ἔτι δ’ ἐπ’ ἐνίων θεωροῦμεν ἄλλο τὸ αἴτιον ὄν· ὑγίειαν γὰρ ὁ ἰατρὸς ἐμποιεῖ καὶ ἐπιστήμην ὁ ἐπιστήμων, οὔσης καὶ ὑγιείας αὐτῆς καὶ ἐπιστήμης καὶ τῶν μεθεκτικῶν· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν κατὰ δύναμιν πραττομένων. Εἰ δὲ τὴν ὕλην τις φήσειε γεννᾶν διὰ τὴν κίνησιν, φυσικώτερον μὲν ἂν λέγοι τῶν οὕτω λεγόντων· τὸ γὰρ ἀλλοιοῦν καὶ τὸ μετασχηματίζον αἰτιώτερόν τε τοῦ γεννᾶν, καὶ ἐν ἅπασιν εἰώθαμεν τοῦτο λέγειν τὸ ποιοῦν, ὁμοίως ἔν τε τοῖς φύσει καὶ ἐν τοῖς ἀπὸ τέχνης, ὃ ἂν ᾖ κινητικόν.

Οὐ μὴν ἀλλὰ καὶ οὗτοι οὐκ ὀρθῶς λέγουσιν· τῆς μὲν γὰρ ὕλης τὸ πάσχειν ἐστὶ καὶ τὸ κινεῖσθαι, τὸ δὲ κινεῖν καὶ ποιεῖν ἑτέρας δυνάμεως. Δῆλον δὲ καὶ ἐπὶ τῶν τέχνῃ καὶ ἐπὶ τῶν φύσει γινομένων· οὐ γὰρ αὐτὸ ποιεῖ τὸ ὕδωρ ζῷον ἐξ αὑτοῦ, οὐδὲ τὸ ξύλον κλίνην, ἀλλ' ἡ τέχνη. Ὥστε καὶ οὗτοι διὰ τοῦτο λέγουσιν οὐκ ὀρθῶς, καὶ ὅτι παραλείπουσι τὴν κυριωτέραν αἰτίαν· ἐξαιροῦσι γὰρ τὸ τί ἦν εἶναι καὶ τὴν μορφήν.

(336a.) Ἔτι δὲ καὶ τὰς δυνάμεις ἀποδιδόασι τοῖς σώμασι, δι' ἃς γεννῶσι, λίαν ὀργανικῶς, ἀφαιροῦντες τὴν κατὰ τὸ εἶδος αἰτίαν. Ἐπειδὴ γὰρ πέφυκεν, ὥς φασι, τὸ μὲν θερμὸν διακρίνειν τὸ δὲ ψυχρὸν συνιστάναι, καὶ τῶν ἄλλων ἕκαστον τὸ μὲν ποιεῖν τὸ δὲ πάσχειν, ἐκ τούτων λέγουσι καὶ διὰ τούτων ἅπαντα τἆλλα γίνεσθαι καὶ φθείρεσθαι· φαίνεται δὲ καὶ τὸ πῦρ αὐτὸ κινούμενον καὶ πάσχον. Ἔτι δὲ παραπλήσιον ποιοῦσιν ὥσπερ εἴ τις τῷ πρίονι καὶ ἑκάστῳ τῶν ὀργάνων ἀπονέμοι τὴν αἰτίαν τῶν γινομένων· ἀνάγκη γὰρ πρίονος ὄντος διαιρεῖσθαι καὶ ξέοντος λεαίνεσθαι, καὶ ἐπὶ τῶν ἄλλων ὁμοίως. Ὥστ' εἰ ὅτι μάλιστα ποιεῖ καὶ κινεῖ τὸ πῦρ, ἀλλὰ πῶς κινεῖ οὐχ ὁρῶσιν, ὅτι χεῖρον ἢ τὰ ὄργανα.

Κεφάλαιο 10

Ἡμῖν δὲ καθόλου τε πρότερον εἴρηται περὶ τῶν αἰτίων, καὶ νῦν διώρισται περί τε τῆς ὕλης καὶ τῆς μορφῆς.

Ἔτι δὲ ἐπεὶ ἡ κατὰ τὴν φορὰν κίνησις δέδεικται ὅτι ἀίδιος, ἀνάγκη τούτων ὄντων καὶ γένεσιν εἶναι συνεχῶς· ἡ γὰρ φορὰ ποιήσει τὴν γένεσιν ἐνδελεχῶς διὰ τὸ προσάγειν καὶ ἀπάγειν τὸ γεννητικόν. Ἅμα δὲ δῆλον ὅτι καὶ τὸ πρότερον καλῶς εἴρηται, τὸ πρώτην τῶν μεταβολῶν τὴν φορὰν ἀλλὰ μὴ τὴν γένεσιν εἰπεῖν· πολὺ γὰρ εὐλογώτερον τὸ ὂν τῷ μὴ ὄντι γενέσεως αἴτιον εἶναι ἢ τὸ μὴ ὂν τῷ ὄντι τοῦ εἶναι. Τὸ μὲν οὖν φερόμενον ἔστι, τὸ δὲ γινόμενον οὐκ ἔστιν· διὸ καὶ ἡ φορὰ προτέρα τῆς γενέσεως. Ἐπεὶ δ’ ὑπόκειται καὶ δέδεικται συνεχὴς οὖσα τοῖς πράγμασι καὶ γένεσις καὶ φθορά, φαμὲν δ’ αἰτίαν εἶναι τὴν φορὰν τοῦ γίνεσθαι, φανερὸν ὅτι μιᾶς μὲν οὔσης τῆς φορᾶς οὐκ ἐνδέχεται γίνεσθαι ἄμφω διὰ τὸ ἐναντία εἶναι· τὸ γὰρ αὐτὸ καὶ ὡσαύτως ἔχον ἀεὶ τὸ αὐτὸ πέφυκε ποιεῖν. Ὥστε ἤτοι γένεσις ἀεὶ ἔσται ἢ φθορά. Δεῖ <δὴ> πλείους εἶναι τὰς κινήσεις καὶ ἐναντίας, ἢ τῇ φορᾷ ἢ τῇ ἀνωμαλίᾳ· τῶν γὰρ ἐναντίων τἀναντία αἴτια· διὸ καὶ οὐχ ἡ πρώτη φορὰ αἰτία ἐστὶ γενέσεως καὶ φθορᾶς, ἀλλ’ ἡ κατὰ τὸν λοξὸν κύκλον· ἐν ταύτῃ γὰρ καὶ τὸ συνεχές ἐστι καὶ τὸ κινεῖσθαι δύο κινήσεις· ἀνάγκη γάρ, εἴ γε ἀεὶ ἔσται συνεχὴς γένεσις καὶ (336b.) φθορά, ἀεὶ μέν τι κινεῖσθαι, ἵνα μὴ ἐπιλείπωσιν αὗται αἱ μεταβολαί, δύο δ’, ὅπως μὴ θάτερον συμβαίνῃ μόνον.

Τῆς μὲν οὖν συνεχείας ἡ τοῦ ὅλου φορὰ αἰτία, τοῦ δὲ προσιέναι καὶ ἀπιέναι ἡ ἔγκλισις· συμβαίνει γὰρ ὁτὲ μὲν πόρρω γίνεσθαι ὁτὲ δ’ ἐγγύς. Ἀνίσου δὲ τοῦ διαστήματος ὄντος ἀνώμαλος ἔσται ἡ κίνησις· ὥστ’ εἰ τῷ προσιέναι καὶ ἐγγὺς εἶναι γεννᾷ, τῷ ἀπιέναι ταὐτὸν τοῦτο καὶ πόρρω γίνεσθαι φθείρει, καὶ εἰ τῷ πολλάκις προσελθεῖν γεννᾷ, καὶ τῷ πολλάκις ἀπελθεῖν φθείρει· τῶν γὰρ ἐναντίων τἀναντία αἴτια. Καὶ ἐν ἴσῳ χρόνῳ καὶ ἡ φθορὰ καὶ ἡ γένεσις ἡ κατὰ φύσιν. Διὸ καὶ οἱ χρόνοι καὶ οἱ βίοι ἑκάστων ἀριθμὸν ἔχουσι καὶ τούτῳ διορίζονται· πάντων γάρ ἐστι τάξις, καὶ πᾶς βίος καὶ χρόνος μετρεῖται περιόδῳ, πλὴν οὐ τῇ αὐτῇ πάντες, ἀλλ’ οἱ μὲν ἐλάττονι οἱ δὲ πλείονι· τοῖς μὲν γὰρ ἐνιαυτός, τοῖς δὲ μείζων, τοῖς δὲ ἐλάττων ἡ περίοδός ἐστι τὸ μέτρον.

Φαίνεται δὲ καὶ κατὰ τὴν αἴσθησιν ὁμολογούμενα τοῖς παρ’ ἡμῶν λόγοις· ὁρῶμεν γὰρ ὅτι προσιόντος μὲν τοῦ ἡλίου γένεσίς ἐστιν, ἀπιόντος δὲ φθίσις, καὶ ἐν ἴσῳ χρόνῳ ἑκάτερον· ἴσος γὰρ ὁ χρόνος τῆς φθορᾶς καὶ τῆς γενέσεως τῆς κατὰ φύσιν.

Ἀλλὰ συμβαίνει πολλάκις ἐν ἐλάττονι φθείρεσθαι διὰ τὴν πρὸς ἄλληλα σύγκρασιν· ἀνωμάλου γὰρ οὔσης τῆς ὕλης καὶ οὐ πανταχοῦ τῆς αὐτῆς ἀνάγκη καὶ τὰς γενέσεις ἀνωμάλους εἶναι καὶ τὰς μὲν θάττους τὰς δὲ βραδυτέρας, ὥστε συμβαίνει διὰ τὴν τούτων γένεσιν ἄλλοις γίνεσθαι φθοράν.

Ἀεὶ δ’, ὥσπερ εἴρηται, συνεχὴς ἔσται ἡ γένεσις καὶ ἡ φθορά, καὶ οὐδέποτε ὑπολείψει δι’ ἣν εἴπομεν αἰτίαν. Τοῦτο δ’ εὐλόγως συμβέβηκεν· ἐπεὶ γὰρ ἐν ἅπασιν ἀεὶ τοῦ βελτίονος ὀρέγεσθαί φαμεν τὴν φύσιν, βέλτιον δὲ τὸ εἶναι ἢ τὸ μὴ εἶναι (τὸ δ’ εἶναι ποσαχῶς λέγομεν ἐν ἄλλοις εἴρηται), τοῦτο δ’ ἀδύνατον ἐν ἅπασιν ὑπάρχειν διὰ τὸ πόρρω τῆς ἀρχῆς ἀφίστασθαι, τῷ λειπομένῳ τρόπῳ συνεπλήρωσε τὸ ὅλον ὁ θεός, ἐνδελεχῆ ποιήσας τὴν γένεσιν· οὕτω γὰρ ἂν μάλιστα συνείροιτο τὸ εἶναι διὰ τὸ ἐγγύτατα εἶναι τῆς οὐσίας τὸ γίνεσθαι ἀεὶ καὶ τὴν γένεσιν. Τούτου δ’ αἴτιον, ὥσπερ (337a.) εἴρηται πολλάκις, ἡ κύκλῳ φορά· μόνη γὰρ συνεχής. Διὸ καὶ τἆλλα ὅσα μεταβάλλει εἰς ἄλληλα κατὰ τὰ πάθη καὶ τὰς δυνάμεις, οἷον τὰ ἁπλᾶ σώματα, μιμεῖται τὴν κύκλῳ φοράν· ὅταν γὰρ ἐξ ὕδατος ἀὴρ γένηται καὶ ἐξ ἀέρος πῦρ καὶ πάλιν ἐκ πυρὸς ὕδωρ, κύκλῳ φαμὲν περιεληλυθέναι τὴν γένεσιν διὰ τὸ πάλιν ἀνακάμπτειν. Ὥστε καὶ ἡ εὐθεῖα φορὰ μιμουμένη τὴν κύκλῳ συνεχής ἐστιν.

Ἅμα δὲ δῆλον ἐκ τούτων ὅ τινες ἀποροῦσιν, διὰ τί ἑκάστου τῶν σωμάτων εἰς τὴν οἰκείαν φερομένου χώραν ἐν τῷ ἀπείρῳ χρόνῳ οὐ διεστᾶσι τὰ σώματα. Αἴτιον γὰρ τούτου ἐστὶν ἡ εἰς ἄλληλα μετάβασις· εἰ γὰρ ἕκαστον ἔμενεν ἐν τῇ αὑτοῦ χώρᾳ καὶ μὴ μετέβαλλεν ὑπὸ τοῦ πλησίον, ἤδη ἂν διεστήκεσαν.

Μεταβάλλει μὲν οὖν διὰ τὴν φορὰν διπλῆν οὖσαν· διὰ δὲ τὸ μεταβάλλειν οὐκ ἐνδέχεται μένειν οὐδὲν αὐτῶν ἐν οὐδεμιᾷ χώρᾳ τεταγμένῃ.

Διότι μὲν οὖν ἔστι γένεσις καὶ φθορὰ καὶ διὰ τίν’ αἰτίαν, καὶ τί τὸ γενητὸν καὶ φθαρτόν, φανερὸν ἐκ τῶν εἰρημένων. Ἐπεὶ δ’ ἀνάγκη εἶναί τι τὸ κινοῦν εἰ κίνησις ἔσται, ὥσπερ εἴρηται πρότερον ἐν ἑτέροις, καὶ εἰ ἀεί, ὅτι ἀεί τι δεῖ εἶναι, καὶ εἰ συνεχής, ἓν τὸ αὐτὸ καὶ ἀκίνητον καὶ ἀγένητον καὶ ἀναλλοίωτον, καὶ εἰ πλείους εἶεν αἱ κύκλῳ κινήσεις, πλείους μέν, πάσας δέ πως εἶναι ταύτας ἀνάγκη ὑπὸ μίαν ἀρχήν· συνεχοῦς δ’ ὄντος τοῦ χρόνου ἀνάγκη τὴν κίνησιν συνεχῆ εἶναι, εἴπερ ἀδύνατον χρόνον χωρὶς κινήσεως εἶναι· συνεχοῦς ἄρα τινὸς ἀριθμὸς ὁ χρόνος, τῆς κύκλῳ ἄρα, καθάπερ ἐν τοῖς ἐν ἀρχῇ λόγοις διωρίσθη. Συνεχὴς δ’ ἡ κίνησις πότερον τῷ τὸ κινούμενον συνεχὲς εἶναι ἢ τῷ τὸ ἐν ᾧ κινεῖται, οἷον τὸν τόπον λέγω ἢ τὸ πάθος; δῆλον δὴ ὅτι τῷ τὸ κινούμενον· πῶς γὰρ τὸ πάθος συνεχὲς ἀλλ’ ἢ τῷ τὸ πρᾶγμα ᾧ συμβέβηκε συνεχὲς εἶναι; εἰ δὲ καὶ τῷ ἐν ᾧ, μόνῳ τοῦτο τῷ τόπῳ ὑπάρχει· μέγεθος γάρ τι ἔχει, τούτου δὲ τὸ κύκλῳ μόνον συνεχές, ὥστε αὐτὸ αὑτῷ ἀεὶ συνεχές. Τοῦτο ἄρα ἐστὶν ὃ ποιεῖ συνεχῆ κίνησιν, τὸ κύκλῳ σῶμα φερόμενον· ἡ δὲ κίνησις τὸν χρόνον.

Κεφάλαιο 11

Ἐπεὶ δ’ ἐν τοῖς συνεχῶς κινουμένοις κατὰ γένεσιν ἢ ἀλλοίωσιν ἢ ὅλως μεταβολὴν ὁρῶμεν τὸ ἐφεξῆς ὂν καὶ (337b.) γινόμενον τόδε μετὰ τόδε ὥστε μὴ διαλείπειν, σκεπτέον πότερον ἔστι τι ὃ ἐξ ἀνάγκης ἔσται, ἢ οὐδέν, ἀλλὰ πάντα ἐνδέχεται μὴ γενέσθαι. Ὅτι μὲν γὰρ ἔνια, δῆλον, καὶ εὐθὺς τὸ ἔσται καὶ τὸ μέλλον ἕτερον διὰ τοῦτο· ὃ μὲν γὰρ ἀληθὲς εἰπεῖν ὅτι ἔσται, δεῖ τοῦτο εἶναί ποτε ἀληθὲς ὅτι ἐστίν· ὃ δὲ νῦν ἀληθὲς εἰπεῖν ὅτι μέλλει, οὐδὲν κωλύει μὴ γενέσθαι· μέλλων γὰρ ἂν βαδίζειν τις οὐκ ἂν βαδίσειεν. Ὅλως δ’, ἐπεὶ ἐνδέχεται ἔνια τῶν ὄντων καὶ μὴ εἶναι, δῆλον ὅτι καὶ τὰ γινόμενα οὕτως ἕξει, καὶ οὐκ ἐξ ἀνάγκης τοῦτ’ ἔσται.

Πότερον οὖν ἅπαντα τοιαῦτα ἢ οὔ, ἀλλ’ ἔνια ἀναγκαῖον ἁπλῶς γίνεσθαι, καὶ ἔστιν ὥσπερ ἐπὶ τοῦ εἶναι τὰ μὲν ἀδύνατα μὴ εἶναι τὰ δὲ δυνατά, οὕτως καὶ περὶ τὴν γένεσιν; οἷον τροπὰς ἆρα ἀνάγκη γενέσθαι, καὶ οὐχ οἷόν τε μὴ ἐνδέχεσθαι;

Εἰ δὴ τὸ πρότερον ἀνάγκη γενέσθαι, εἰ τὸ ὕστερον ἔσται, οἷον εἰ οἰκία, θεμέλιον, εἰ δὲ τοῦτο, πηλόν, ἆρ’ οὖν καὶ εἰ θεμέλιος γέγονεν, ἀνάγκη οἰκίαν γενέσθαι; ἢ οὐκέτι, εἰ μὴ κἀκεῖνο ἀνάγκη γενέσθαι ἁπλῶς· εἰ δὲ τοῦτο, ἀνάγκη καὶ θεμελίου γενομένου γενέσθαι οἰκίαν· οὕτω γὰρ ἦν τὸ πρότερον ἔχον πρὸς τὸ ὕστερον, ὥστ’ εἰ ἐκεῖνο ἔσται, ἀνάγκη ἐκεῖνο πρότερον. Εἰ τοίνυν ἀνάγκη γενέσθαι τὸ ὕστερον, καὶ τὸ πρότερον ἀνάγκη· καὶ εἰ τὸ πρότερον, καὶ τὸ ὕστερον τοίνυν ἀνάγκη, ἀλλ’ οὐ δι’ ἐκεῖνο, ἀλλ’ ὅτι ὑπέκειτο ἐξ ἀνάγκης ἐσόμενον. Ἐν οἷς ἄρα τὸ ὕστερον ἀνάγκη εἶναι, ἐν τούτοις ἀντιστρέφει, καὶ ἀεὶ τοῦ προτέρου γενομένου ἀνάγκη γενέσθαι τὸ ὕστερον. Εἰ μὲν οὖν εἰς ἄπειρον εἶσιν ἐπὶ τὸ κάτω, οὐκ ἔσται ἀνάγκη τὸ ὕστερον τόδε γενέσθαι ἁπλῶς. Ἀλλ’ ἐξ ὑποθέσεως· ἀεὶ γὰρ ἕτερον ἔμπροσθεν ἀνάγκη ἔσται, δι’ ὃ ἐκεῖνο ἀνάγκη γενέσθαι. Ὥστ’ εἰ μή ἐστιν ἀρχὴ τοῦ ἀπείρου, οὐδὲ πρῶτον ἔσται οὐδὲν δι’ ὃ ἀναγκαῖον ἔσται γενέσθαι. Ἀλλὰ μὴν οὐδ’ ἐν τοῖς πέρας ἔχουσι τοῦτ’ ἔσται εἰπεῖν ἀληθῶς, ὅτι ἁπλῶς ἀνάγκη γενέσθαι, οἷον οἰκίαν, ὅταν θεμέλιος γένηται· ὅταν γὰρ γένηται, εἰ μὴ ἀεὶ τοῦτο ἀνάγκη γίνεσθαι, συμβήσεται ἀεὶ εἶναι τὸ ἐνδεχόμενον μὴ ἀεὶ εἶναι. Ἀλλὰ δεῖ τῇ γενέσει ἀεὶ εἶναι, εἰ ἐξ ἀνάγκης αὐτοῦ ἐστιν ἡ γένεσις· τὸ γὰρ ἐξ ἀνάγκης καὶ ἀεὶ ἅμα· ὃ γὰρ εἶναι ἀνάγκη (338a.) οὐχ οἷόν τε μὴ εἶναι· ὥστ’ εἰ ἔστιν ἐξ ἀνάγκης, ἀΐδιόν ἐστι, καὶ εἰ ἀΐδιον, ἐξ ἀνάγκης. Καὶ εἰ ἡ γένεσις τοίνυν ἐξ ἀνάγκης, ἀΐδιος ἡ γένεσις τούτου, καὶ εἰ ἀΐδιος, ἐξ ἀνάγκης.

Εἰ ἄρα τινὸς ἐξ ἀνάγκης ἁπλῶς ἡ γένεσις, ἀνάγκη ἀνακυκλεῖν καὶ ἀνακάμπτειν. Ἀνάγκη γὰρ ἤτοι πέρας ἔχειν τὴν γένεσιν ἢ μή, καὶ εἰ μή, ἢ εἰς εὐθὺ ἢ κύκλῳ. Τούτων δ' εἴπερ ἔσται ἀίδιος, οὐκ εἰς εὐθὺ οἷόν τε διὰ τὸ μηδαμῶς εἶναι ἀρχὴν μήτ' ἂν κάτω, ὡς ἐπὶ τῶν ἐσομένων λαμβανομένων, μήτ' ἄνω, ὡς ἐπὶ τῶν γενομένων· ἀνάγκη δ' εἶναι ἀρχήν, μὴ πεπερασμένης οὔσης, καὶ ἀίδιον εἶναι. Διὸ ἀνάγκη κύκλῳ εἶναι. Ἀντιστρέφειν ἄρα ἀνάγκη ἔσται, οἷον εἰ τοδὶ ἐξ ἀνάγκης, καὶ τὸ πρότερον ἄρα· ἀλλὰ μὴν εἰ τοῦτο, καὶ τὸ ὕστερον ἀνάγκη γενέσθαι. Καὶ τοῦτο ἀεὶ δὴ συνεχῶς· οὐδὲν γὰρ τοῦτο διαφέρει λέγειν διὰ δύο ἢ πολλῶν. Ἐν τῇ κύκλῳ ἄρα κινήσει καὶ γενέσει ἐστὶ τὸ ἐξ ἀνάγκης ἁπλῶς· καὶ εἴτε κύκλῳ, ἀνάγκη ἕκαστον γίνεσθαι καὶ γεγονέναι, καὶ εἰ ἀνάγκη, ἡ τούτων γένεσις κύκλῳ.

Ταῦτα μὲν δὴ εὐλόγως, ἐπεὶ ἀίδιος καὶ ἄλλως ἐφάνη ἡ κύκλῳ κίνησις καὶ ἡ τοῦ οὐρανοῦ, ὅτι ταῦτα ἐξ ἀνάγκης γίνεται καὶ ἔσται, ὅσαι (338b.) ταύτης κινήσεις καὶ ὅσαι διὰ ταύτην· εἰ γὰρ τὸ κύκλῳ κινούμενον ἀεί τι κινεῖ, ἀνάγκη καὶ τούτων κύκλῳ εἶναι τὴν κίνησιν, οἷον τῆς ἄνω φορᾶς οὔσης κύκλῳ ὁ ἥλιος ὡδί, ἐπεὶ δ' οὕτως, αἱ ὧραι διὰ τοῦτο κύκλῳ γίνονται καὶ ἀνακάμπτουσιν, τούτων δ' οὕτω γινομένων πάλιν τὰ ὑπὸ τούτων.

Τί οὖν δή ποτε τὰ μὲν οὕτω φαίνεται, οἷον ὕδατα καὶ ἀὴρ κύκλῳ γινόμενα, καὶ εἰ μὲν νέφος ἔσται, δεῖ ὗσαι, καὶ εἰ ὕσει γε, δεῖ καὶ νέφος εἶναι, ἄνθρωποι δὲ καὶ ζῷα οὐκ ἀνακάμπτουσιν εἰς αὑτοὺς ὥστε πάλιν γίνεσθαι τὸν αὐτόν· οὐ γὰρ ἀνάγκη, εἰ ὁ πατὴρ ἐγένετο, σὲ γενέσθαι· ἀλλ' εἰ σύ, ἐκεῖνον. Εἰς εὐθὺ δὲ ἔοικεν εἶναι αὕτη ἡ γένεσις.

Ἀρχὴ δὲ τῆς σκέψεως πάλιν αὕτη, πότερον ὁμοίως ἅπαντα ἀνακάμπτει ἢ οὔ, ἀλλὰ τὰ μὲν ἀριθμῷ τὰ δὲ εἴδει μόνον.

Ὅσων μὲν οὖν ἄφθαρτος ἡ οὐσία ἡ κινουμένη, φανερὸν ὅτι καὶ ἀριθμῷ ταὐτὰ ἔσται (ἡ γὰρ κίνησις ἀκολουθεῖ τῷ κινουμένῳ), ὅσων δὲ μὴ ἀλλὰ φθαρτή, ἀνάγκη τῷ εἴδει, ἀριθμῷ δὲ μὴ ἀνακάμπτειν. Διὸ ὕδωρ ἐξ ἀέρος καὶ ἀὴρ ἐξ ὕδατος εἴδει ὁ αὐτός, οὐκ ἀριθμῷ. Εἰ δὲ καὶ ταῦτα ἀριθμῷ, ἀλλ' οὐχ ὧν ἡ οὐσία γίνεται οὖσα τοιαύτη οἵα ἐνδέχεσθαι μὴ εἶναι.

Μετεωρολογικά (338a) Meteorology

Βιβλίο Α’Περὶ μὲν οὖν τῶν πρώτων αἰτίων τῆς φύσεως καὶ περὶ πάσης κινήσεως φυσικῆς, ἔτι δὲ περὶ τῶν κατὰ τὴν ἄνω φορὰν διακεκοσμημένων ἄστρων καὶ περὶ τῶν στοιχείων τῶν σωματικῶν, πόσα τε καὶ ποῖα, καὶ τῆς εἰς ἄλληλα μεταβολῆς, καὶ περὶ γενέσεως καὶ φθορᾶς τῆς κοινῆς εἴρηται πρότερον. λοιπὸν δ’ ἐστὶ μέρος τῆς μεθόδου ταύτης ἔτι θεωρητέον, ὃ πάντες οἱ πρότεροι μετεωρολογίαν ἐκάλουν· ταῦτα [338b.20] δ’ ἐστὶν ὅσα συμβαίνει κατὰ φύσιν μέν, ἀτακτοτέραν μέντοι τῆς τοῦ πρώτου στοιχείου τῶν σωμάτων, περὶ τὸν γειτνιῶντα μάλιστα τόπον τῇ φορᾷ τῇ τῶν ἄστρων, οἷον περί τε γάλακτος καὶ κομητῶν καὶ τῶν ἐκπυρουμένων καὶ κινουμένων φασμάτων, ὅσα τε θείημεν ἂν ἀέρος εἶναι κοινὰ πάθη καὶ ὕδατος, ἔτι δὲ γῆς ὅσα μέρη καὶ εἴδη καὶ πάθη τῶν μερῶν, ἐξ ὧν περί τε πνευμάτων καὶ σεισμῶν θεωρήσαιμεν ἂν τὰς αἰτίας [339a] καὶ περὶ πάντων τῶν γιγνομένων κατὰ τὰς κινήσεις τὰς τούτων· ἐν οἷς τὰ μὲν ἀποροῦμεν, τῶν δὲ ἐφαπτόμεθά τινα τρόπον· ἔτι δὲ περὶ κεραυνῶν πτώσεως καὶ τυφώνων καὶ πρηστήρων καὶ τῶν ἄλλων τῶν ἐγκυκλίων, ὅσα διὰ πῆξιν συμβαίνει πάθη τῶν αὐτῶν σωμάτων τούτων. διελθόντες δὲ περὶ τούτων, θεωρήσωμεν εἴ τι δυνάμεθα κατὰ τὸν ὑφηγημένον τρόπον ἀποδοῦναι περὶ ζῴων καὶ φυτῶν, καθόλου τε καὶ χωρίς· σχεδὸν γὰρ τούτων ῥηθέντων τέλος ἂν εἴη γεγονὸς τῆς ἐξ ἀρχῆς ἡμῖν προαιρέσεως πάσης. ὧδ’ οὖν ἀρξάμενοι λέγωμεν περὶ αὐτῶν πρῶτον.

ἐπειδὴ γὰρ διώρισται πρότερον ἡμῖν μία μὲν ἀρχὴ τῶν σωμάτων, ἐξ ὧν συνέστηκεν ἡ τῶν ἐγκυκλίως φερομένων σωμάτων φύσις, ἄλλα δὲ τέτταρα σώματα διὰ τὰς τέτταρας ἀρχάς, ὧν διπλῆν εἶναί φαμεν τὴν κίνησιν, τὴν μὲν ἀπὸ τοῦ μέσου τὴν δ’ ἐπὶ τὸ μέσον· τεττάρων δ’ ὄντων τούτων, πυρὸς καὶ ἀέρος καὶ ὕδατος καὶ γῆς, τὸ μὲν τούτοις πᾶσιν ἐπιπολάζον εἶναι πῦρ, τὸ δ’ ὑφιστάμενον γῆν· δύο δὲ ἃ πρὸς αὑτὰ τούτοις ἀνάλογον ἔχει (ἀὴρ μὲν γὰρ πυρὸς ἐγγυτάτω τῶν ἄλλων, ὕδωρ δὲ γῆς)· ὁ δὴ περὶ τὴν γῆν ὅλος κόσμος ἐκ τούτων συνέστηκε τῶν σωμάτων· περὶ οὗ τὰ συμβαίνοντα πάθη φαμὲν εἶναι ληπτέον. ἔστιν δ’ ἐξ ἀνάγκης συνεχὴς οὗτος ταῖς ἄνω φοραῖς, ὥστε πᾶσαν αὐτοῦ τὴν δύναμιν κυβερνᾶσθαι ἐκεῖθεν· ὅθεν γὰρ ἡ τῆς κινήσεως ἀρχὴ πᾶσιν, ἐκείνην αἰτίαν νομιστέον πρώτην. πρὸς δὲ τούτοις ἡ μὲν ἀίδιος καὶ τέλος οὐκ ἔχουσα τῷ τόπῳ τῆς κινήσεως, ἀλλ’ ἀεὶ ἐν τέλει· ταῦτα δὲ τὰ σώματα πάντα πεπερασμένους διέστηκε τόπους ἀλλήλων. ὥστε τῶν συμβαινόντων περὶ αὐτὸν πῦρ μὲν καὶ γῆν καὶ τὰ συγγενῆ τούτοις ὡς ἐν ὕλης εἴδει τῶν γιγνομένων αἴτια χρὴ νομίζειν (τὸ γὰρ ὑποκείμενον καὶ πάσχον τοῦτον προσαγορεύομεν τὸν τρόπον), τὸ δ’ οὕτως αἴτιον ὅθεν ἡ τῆς κινήσεως ἀρχή, τὴν τῶν ἀεὶ κινουμένων αἰτιατέον δύναμιν.

ἀναλαβόντες οὖν τὰς ἐξ ἀρχῆς θέσεις καὶ τοὺς εἰρημένους πρότερον διορισμούς, λέγωμεν περί τε τῆς τοῦ γάλακτος φαντασίας καὶ περὶ κομητῶν καὶ τῶν ἄλλων ὅσα τυγχάνει τούτοις ὄντα συγγενῆ. φαμὲν δὴ πῦρ καὶ ἀέρα καὶ ὕδωρ καὶ γῆν γίγνεσθαι ἐξ ἀλλήλων, καὶ ἕκαστον ἐν ἑκάστῳ [339b] ὑπάρχειν τούτων δυνάμει, ὥσπερ καὶ τῶν ἄλλων οἷς ἕν τι καὶ ταὐτὸν ὑπόκειται, εἰς ὃ δὴ ἀναλύονται ἔσχατον. πρῶτον μὲν οὖν ἀπορήσειεν ἄν τις περὶ τὸν καλούμενον ἀέρα, τίνα τε χρὴ λαβεῖν αὐτοῦ τὴν φύσιν ἐν τῷ περιέχοντι κόσμῳ τὴν γῆν, καὶ πῶς ἔχει τῇ τάξει πρὸς τἆλλα τὰ λεγόμενα στοιχεῖα τῶν σωμάτων. ὁ μὲν γὰρ δὴ τῆς γῆς ὄγκος πηλίκος ἄν τις εἴη πρὸς τὰ περιέχοντα μεγέθη, οὐκ ἄδηλον· ἤδη γὰρ ὦπται διὰ τῶν ἀστρολογικῶν θεωρημάτων ἡμῖν ὅτι πολὺ καὶ τῶν ἄστρων ἐνίων ἐλάττων ἐστίν. ὕδατος δὲ φύσιν συνεστηκυῖαν καὶ ἀφωρισμένην οὔθ’ ὁρῶμεν οὔτ’ ἐνδέχεται κεχωρισμένην εἶναι τοῦ περὶ τὴν γῆν ἱδρυμένου σώματος, οἷον τῶν τε φανερῶν, θαλάττης καὶ ποταμῶν, κἂν εἴ τι κατὰ βάθους ἄδηλον ἡμῖν ἐστιν. τὸ δὲ δὴ μεταξὺ τῆς γῆς τε καὶ τῶν ἐσχάτων ἄστρων πότερον ἕν τι νομιστέον εἶναι σῶμα τὴν φύσιν ἢ πλείω, κἂν εἰ πλείω, πόσα, καὶ μέχρι ποῦ διώρισται τοῖς τόποις; ἡμῖν μὲν οὖν εἴρηται πρότερον περὶ τοῦ πρώτου στοιχείου, ποῖόν τι τὴν δύναμίν ἐστιν, καὶ διότι πᾶς ὁ περὶ τὰς ἄνω φορὰς κόσμος ἐκείνου τοῦ σώματος πλήρης ἐστί. καὶ ταύτην τὴν δόξαν οὐ μόνον ἡμεῖς τυγχάνομεν ἔχοντες, φαίνεται δὲ ἀρχαία τις ὑπόληψις αὕτη καὶ τῶν πρότερον ἀνθρώπων· ὁ γὰρ λεγόμενος αἰθὴρ παλαιὰν εἴληφε τὴν προσηγορίαν, ἣν Ἀναξαγόρας μὲν τῷ πυρὶ ταὐτὸν ἡγήσασθαί μοι δοκεῖ σημαίνειν· τά τε γὰρ ἄνω πλήρη πυρὸς εἶναι, κἀκεῖνος τὴν ἐκεῖ δύναμιν αἰθέρα καλεῖν ἐνόμισεν, τοῦτο μὲν ὀρθῶς νομίσας· τὸ γὰρ ἀεὶ σῶμα θέον ἅμα καὶ θεῖόν τι τὴν φύσιν ἐοίκασιν ὑπολαβεῖν, καὶ διώρισαν ὀνομάζειν αἰθέρα τὸ τοιοῦτον ὡς ὂν οὐδενὶ τῶν παρ’ ἡμῖν τὸ αὐτό· οὐ γὰρ δὴ φήσομεν ἅπαξ οὐδὲ δὶς οὐδ’ ὀλιγάκις τὰς αὐτὰς δόξας ἀνακυκλεῖν γιγνομένας ἐν τοῖς ἀνθρώποις, ἀλλ’ ἀπειράκις. ὅσοι δὲ πῦρ καθαρὸν εἶναί φασι τὸ περιέχον καὶ μὴ μόνον τὰ φερόμενα σώματα, τὸ δὲ μεταξὺ γῆς καὶ τῶν ἄστρων ἀέρα, θεωρήσαντες ἂν τὰ νῦν δεικνύμενα διὰ τῶν μαθημάτων ἱκανῶς ἴσως ἂν ἐπαύσαντο ταύτης τῆς παιδικῆς δόξης· λίαν γὰρ ἁπλοῦν τὸ νομίζειν μικρὸν τοῖς μεγέθεσιν εἶναι τῶν φερομένων ἕκαστον, ὅτι φαίνεται θεωροῦσιν ἐντεῦθεν ἡμῖν οὕτως. εἴρηται μὲν οὖν καὶ πρότερον ἐν τοῖς περὶ τὸν ἄνω τόπον θεωρήμασι· λέγωμεν δὲ τὸν αὐτὸν λόγον καὶ νῦν. [340a] εἰ γὰρ τά τε διαστήματα πλήρη πυρὸς καὶ τὰ σώματα συνέστηκεν ἐκ πυρός, πάλαι φροῦδον ἂν ἦν ἕκαστον τῶν ἄλλων στοιχείων. ἀλλὰ μὴν οὐδ’ ἀέρος γε μόνου πλήρη· πολὺ γὰρ ἂν ὑπερβάλλοι τὴν ἰσότητα τῆς κοινῆς ἀναλογίας πρὸς τὰ σύστοιχα σώματα, κἂν εἰ δύο στοιχείων πλήρης ὁ μεταξὺ γῆς τε καὶ οὐρανοῦ τόπος ἐστίν· οὐδὲν γὰρ ὡς εἰπεῖν μόριον ὁ τῆς γῆς ἐστιν ὄγκος, ἐν ᾧ συνείληπται πᾶν καὶ τὸ τοῦ ὕδατος πλῆθος, πρὸς τὸ περιέχον μέγεθος. ὁρῶμεν δ’ οὐκ ἐν τοσούτῳ μεγέθει γιγνομένην τὴν ὑπεροχὴν τῶν ὄγκων, ὅταν ἐξ ὕδατος ἀὴρ γένηται διακριθέντος ἢ πῦρ ἐξ ἀέρος· ἀνάγκη δὲ τὸν αὐτὸν ἔχειν λόγον ὃν ἔχει τὸ τοσονδὶ καὶ μικρὸν ὕδωρ πρὸς τὸν ἐξ αὐτοῦ γιγνόμενον ἀέρα, καὶ τὸν πάντα πρὸς τὸ πᾶν ὕδωρ. διαφέρει δ’ οὐδὲν οὐδ’ εἴ τις φήσει μὲν μὴ γίγνεσθαι ταῦτα ἐξ ἀλλήλων, ἴσα μέντοι τὴν δύναμιν εἶναι· κατὰ τοῦτον γὰρ τὸν τρόπον ἀνάγκη τὴν ἰσότητα τῆς δυνάμεως ὑπάρχειν τοῖς μεγέθεσιν αὐτῶν, ὥσπερ κἂν εἰ γιγνόμενα ἐξ ἀλλήλων ὑπῆρχεν. ὅτι μὲν οὖν οὔτ’ ἀὴρ οὔτε πῦρ συμπεπλήρωκε μόνον τὸν μεταξὺ τόπον, φανερόν ἐστι· λοιπὸν δὲ διαπορήσαντας εἰπεῖν πῶς τέτακται τὰ δύο πρὸς τὴν τοῦ πρώτου σώματος θέσιν, λέγω δὲ ἀέρα τε καὶ πῦρ, καὶ διὰ τίν’ αἰτίαν ἡ θερμότης ἀπὸ τῶν ἄνωθεν ἄστρων γίγνεται τοῖς περὶ τὴν γῆν τόποις. περὶ ἀέρος οὖν εἰπόντες πρῶτον, ὥσπερ ὑπεθέμεθα, λέγωμεν οὕτω καὶ περὶ τούτων πάλιν. εἰ δὴ γίγνεται ὕδωρ ἐξ ἀέρος καὶ ἀὴρ ἐξ ὕδατος, διὰ τίνα ποτ’ αἰτίαν οὐ συνίσταται νέφη κατὰ τὸν ἄνω τόπον; προσῆκε γὰρ μᾶλλον ὅσῳ πορρώτερον ὁ τόπος τῆς γῆς καὶ ψυχρότερος, διὰ τὸ μήθ’ οὕτω πλησίον εἶναι τῶν ἄστρων θερμῶν ὄντων μήτε τῶν ἀπὸ τῆς γῆς ἀνακλωμένων ἀκτίνων, αἳ κωλύουσι πλησίον τῆς γῆς συνίστασθαι, διακρίνουσαι τῇ θερμότητι τὰς συστάσεις· γίγνονται γὰρ αἱ τῶν νεφῶν ἀθροίσεις, οὗ λήγουσιν ἤδη διὰ τὸ σχίζεσθαι εἰς ἀχανὲς αἱ ἀκτῖνες. ἢ οὖν οὐκ ἐξ ἅπαντος τοῦ ἀέρος πέφυκεν ὕδωρ γίγνεσθαι, ἢ εἰ ὁμοίως ἐξ ἅπαντος, ὁ περὶ τὴν γῆν οὐ μόνον ἀήρ ἐστιν ἀλλ’ οἷον ἀτμίς, διὸ πάλιν συνίσταται εἰς ὕδωρ. ἀλλὰ μὴν εἰ τοσοῦτος ὢν ὁ ἀὴρ ἅπας ἀτμίς ἐστι, δόξειεν ἂν πολὺ ὑπερβάλλειν ἡ τοῦ ἀέρος φύσις καὶ ἡ τοῦ ὕδατος, εἴπερ τά τε διαστήματα τῶν ἄνω πλήρη ἐστὶ [340b] σώματός τινος, καὶ πυρὸς μὲν ἀδύνατον διὰ τὸ κατεξηράνθαι ἂν τἆλλα πάντα, λείπεται δ’ ἀέρος καὶ τοῦ περὶ τὴν γῆν πᾶσαν ὕδατος· ἡ γὰρ ἀτμὶς ὕδατος διάκρισίς ἐστιν. περὶ μὲν οὖν τούτων ἠπορήσθω τοῦτον τὸν τρόπον· ἡμεῖς δὲ λέγωμεν ἅμα πρός τε τὰ λεχθησόμενα διορίζοντες καὶ πρὸς τὰ νῦν εἰρημένα. τὸ μὲν γὰρ ἄνω καὶ μέχρι σελήνης ἕτερον εἶναι σῶμά φαμεν πυρός τε καὶ ἀέρος, οὐ μὴν ἀλλ’ ἐν αὐτῷ γε τὸ μὲν καθαρώτερον εἶναι τὸ δ’ ἧττον εἰλικρινές, καὶ διαφορὰς ἔχειν, καὶ μάλιστα ᾗ καταλήγει πρὸς τὸν ἀέρα καὶ πρὸς τὸν περὶ τὴν γῆν κόσμον. φερομένου δὲ τοῦ πρώτου στοιχείου κύκλῳ καὶ τῶν ἐν αὐτῷ σωμάτων, τὸ προσεχὲς ἀεὶ τοῦ κάτω κόσμου καὶ σώματος τῇ κινήσει διακρινόμενον ἐκπυροῦται καὶ ποιεῖ τὴν θερμότητα. δεῖ δὲ νοεῖν οὕτως καὶ ἐντεῦθεν ἀρξαμένους. τὸ γὰρ ὑπὸ τὴν ἄνω περιφορὰν σῶμα οἷον ὕλη τις οὖσα καὶ δυνάμει θερμὴ καὶ ψυχρὰ καὶ ξηρὰ καὶ ὑγρά, καὶ ὅσα ἄλλα τούτοις ἀκολουθεῖ πάθη, γίγνεται τοιαύτη καὶ ἔστιν ὑπὸ κινήσεως καὶ ἀκινησίας, ἧς τὴν αἰτίαν καὶ τὴν ἀρχὴν εἰρήκαμεν πρότερον. ἐπὶ μὲν οὖν τοῦ μέσου καὶ περὶ τὸ μέσον τὸ βαρύτατόν ἐστιν καὶ ψυχρότατον ἀποκεκριμένον, γῆ καὶ ὕδωρ· περὶ δὲ ταῦτα καὶ ἐχόμενα τούτων, ἀήρ τε καὶ ὃ διὰ συνήθειαν καλοῦμεν πῦρ, οὐκ ἔστι δὲ πῦρ· ὑπερβολὴ γὰρ θερμοῦ καὶ οἷον ζέσις ἐστὶ τὸ πῦρ. ἀλλὰ δεῖ νοῆσαι τοῦ λεγομένου ὑφ’ ἡμῶν ἀέρος τὸ μὲν περὶ τὴν γῆν οἷον ὑγρὸν καὶ θερμὸν εἶναι διὰ τὸ ἀτμίζειν τε καὶ ἀναθυμίασιν ἔχειν γῆς, τὸ δὲ ὑπὲρ τοῦτο θερμὸν ἤδη καὶ ξηρόν. ἔστιν γὰρ ἀτμίδος μὲν φύσις ὑγρὸν καὶ θερμόν, ἀναθυμιάσεως δὲ θερμὸν καὶ ξηρόν· καὶ ἔστιν ἀτμὶς μὲν δυνάμει οἷον ὕδωρ, ἀναθυμίασις δὲ δυνάμει οἷον πῦρ. τοῦ μὲν οὖν ἐν τῷ ἄνω τόπῳ μὴ συνίστασθαι νέφη ταύτην ὑποληπτέον αἰτίαν εἶναι, ὅτι οὐκ ἔνεστιν ἀὴρ μόνον ἀλλὰ μᾶλλον οἷον πῦρ. οὐδὲν δὲ κωλύει καὶ διὰ τὴν κύκλῳ φορὰν κωλύεσθαι συνίστασθαι νέφη ἐν τῷ ἀνωτέρω τόπῳ· ῥεῖν γὰρ ἀναγκαῖον ἅπαντα τὸν κύκλῳ ἀέρα, ὅσος μὴ ἐντὸς τῆς περιφερείας λαμβάνεται τῆς ἀπαρτιζούσης ὥστε τὴν γῆν σφαιροειδῆ εἶναι πᾶσαν· φαίνεται γὰρ καὶ νῦν ἡ τῶν ἀνέμων γένεσις ἐν τοῖς λιμνάζουσι τόποις τῆς γῆς, καὶ οὐχ [341a] ὑπερβάλλειν τὰ πνεύματα τῶν ὑψηλῶν ὀρῶν. ῥεῖ δὲ κύκλῳ διὰ τὸ συνεφέλκεσθαι τῇ τοῦ ὅλου περιφορᾷ. τὸ μὲν γὰρ πῦρ τῷ ἄνω στοιχείῳ, τῷ δὲ πυρὶ ὁ ἀὴρ συνεχής ἐστιν· ὥστε καὶ διὰ τὴν κίνησιν κωλύεται συγκρίνεσθαι εἰς ὕδωρ, ἀλλ’ ἀεὶ ὅ τι ἂν βαρύνηται μόριον αὐτοῦ ἐκθλιβομένου εἰς τὸν ἄνω τόπον τοῦ θερμοῦ κάτω φέρεται, ἄλλα δ’ ἐν μέρει συναναφέρεται τῷ ἀναθυμιωμένῳ πυρί, καὶ οὕτω συνεχῶς τὸ [341a.8] μὲν ἀέρος διατελεῖ πλῆρες ὂν τὸ δὲ πυρός, καὶ ἀεὶ ἄλλο καὶ ἄλλο γίγνεται ἕκαστον αὐτῶν. περὶ μὲν οὖν τοῦ μὴ γίγνεσθαι νέφη μηδ’ εἰς ὕδωρ σύγκρισιν, καὶ πῶς δεῖ λαβεῖν περὶ τοῦ μεταξὺ τόπου τῶν ἄστρων καὶ τῆς γῆς, καὶ τίνος ἐστὶν σώματος πλήρης, τοσαῦτα εἰρήσθω. περὶ δὲ τῆς γιγνομένης θερμότητος, ἣν παρέχεται ὁ ἥλιος, μᾶλλον μὲν καθ’ ἑαυτὸ καὶ ἀκριβῶς ἐν τοῖς περὶ αἰσθήσεως προσήκει λέγειν (πάθος γάρ τι τὸ θερμὸν αἰσθήσεώς ἐστιν), διὰ τίνα δ’ αἰτίαν γίγνεται μὴ τοιούτων ὄντων ἐκείνων τὴν φύσιν, λεκτέον καὶ νῦν. ὁρῶμεν δὴ τὴν κίνησιν ὅτι δύναται διακρίνειν τὸν ἀέρα καὶ ἐκπυροῦν, ὥστε καὶ τὰ φερόμενα τηκόμενα φαίνεσθαι πολλάκις. τὸ μὲν οὖν γίγνεσθαι τὴν ἀλέαν καὶ τὴν θερμότητα ἱκανή ἐστιν παρασκευάζειν καὶ ἡ τοῦ ἡλίου φορὰ μόνον· ταχεῖάν τε γὰρ δεῖ καὶ μὴ πόρρω εἶναι. ἡ μὲν οὖν τῶν ἄστρων ταχεῖα μὲν πόρρω δέ, ἡ δὲ τῆς σελήνης κάτω μὲν βραδεῖα δέ· ἡ δὲ τοῦ ἡλίου ἄμφω ταῦτα ἔχει ἱκανῶς. τὸ δὲ μᾶλλον γίγνεσθαι ἅμα τῷ ἡλίῳ αὐτῷ τὴν θερμότητα εὔλογον, λαμβάνοντας τὸ ὅμοιον ἐκ τῶν παρ’ ἡμῖν γιγνομένων· καὶ γὰρ ἐνταῦθα τῶν βίᾳ φερομένων ὁ πλησιάζων ἀὴρ μάλιστα γίγνεται θερμός. καὶ τοῦτ’ εὐλόγως συμβαίνει· μάλιστα γὰρ ἡ τοῦ στερεοῦ διακρίνει κίνησις αὐτόν. διά τε ταύτην οὖν τὴν αἰτίαν ἀφικνεῖται πρὸς τόνδε τὸν τόπον ἡ θερμότης, καὶ διὰ τὸ τὸ περιέχον πῦρ τὸν ἀέρα διαρραίνεσθαι τῇ κινήσει πολλάκις καὶ φέρεσθαι βίᾳ κάτω. σημεῖον δ’ ἱκανὸν ὅτι ὁ ἄνω τόπος οὐκ ἔστι θερμὸς οὐδ’ ἐκπεπυρωμένος καὶ αἱ διαδρομαὶ τῶν ἀστέρων. ἐκεῖ μὲν γὰρ οὐ γίγνονται, κάτω δέ· καίτοι τὰ μᾶλλον κινούμενα καὶ θᾶττον, ἐκπυροῦται θᾶττον. πρὸς δὲ τούτοις ὁ ἥλιος, ὅσπερ μάλιστα εἶναι δοκεῖ θερμός, φαίνεται λευκὸς ἀλλ’ οὐ πυρώδης ὤν. [341b] τούτων δὲ διωρισμένων, λέγωμεν διὰ τίν’ αἰτίαν αἵ τε φλόγες αἱ καιόμεναι φαίνονται περὶ τὸν οὐρανὸν καὶ οἱ διαθέοντες ἀστέρες καὶ οἱ καλούμενοι ὑπό τινων δαλοὶ καὶ αἶγες· ταῦτα γὰρ πάντ’ ἐστὶν τὸ αὐτὸ καὶ διὰ τὴν αὐτὴν αἰτίαν, διαφέρει δὲ τῷ μᾶλλον καὶ ἧττον. ἀρχὴ δέ ἐστιν καὶ τούτων καὶ πολλῶν ἄλλων ἥδε. θερμαινομένης γὰρ τῆς γῆς ὑπὸ τοῦ ἡλίου τὴν ἀναθυμίασιν ἀναγκαῖον γίγνεσθαι μὴ ἁπλῆν, ὥς τινες οἴονται, ἀλλὰ διπλῆν, τὴν μὲν ἀτμιδωδεστέραν τὴν δὲ πνευματωδεστέραν, τὴν μὲν τοῦ ἐν τῇ γῇ καὶ ἐπὶ τῇ γῇ ὑγροῦ ἀτμίδα, τὴν δ’ αὐτῆς τῆς γῆς οὔσης ξηρᾶς καπνώδη· καὶ τούτων τὴν μὲν πνευματώδη ἐπιπολάζειν διὰ τὸ θερμόν, τὴν δὲ ὑγροτέραν ὑφίστασθαι διὰ τὸ βάρος. καὶ διὰ ταῦτα τοῦτον τὸν τρόπον κεκόσμηται τὸ πέριξ· πρῶτον μὲν γὰρ ὑπὸ τὴν ἐγκύκλιον φοράν ἐστιν τὸ θερμὸν καὶ ξηρόν, ὃ λέγομεν πῦρ (ἀνώνυμον γὰρ τὸ κοινὸν ἐπὶ πάσης τῆς καπνώδους διακρίσεως· ὅμως δὲ διὰ τὸ μάλιστα πεφυκέναι τὸ τοιοῦτον ἐκκαίεσθαι τῶν σωμάτων οὕτως ἀναγκαῖον χρῆσθαι τοῖς ὀνόμασιν), ὑπὸ δὲ ταύτην τὴν φύσιν ἀήρ. δεῖ δὴ νοῆσαι οἷον ὑπέκκαυμα τοῦτο ὃ νῦν εἴπομεν πῦρ περιτετάσθαι τῆς περὶ τὴν γῆν σφαίρας ἔσχατον, ὥστε μικρᾶς κινήσεως τυχὸν ἐκκαίεσθαι πολλάκις ὥσπερ τὸν καπνόν· ἔστι γὰρ ἡ φλὸξ πνεύματος ξηροῦ ζέσις. ᾗ ἂν οὖν μάλιστα εὐκαίρως ἔχῃ ἡ τοιαύτη σύστασις, ὅταν ὑπὸ τῆς περιφορᾶς κινηθῇ πως, ἐκκάεται. διαφέρει δ’ ἤδη κατὰ τὴν τοῦ ὑπεκκαύματος θέσιν ἢ τὸ πλῆθος· ἂν μὲν γὰρ πλάτος ἔχῃ καὶ μῆκος τὸ ὑπέκκαυμα, πολλάκις ὁρᾶται καιομένη φλὸξ ὥσπερ ἐν ἀρούρᾳ καιομένης καλάμης, ἐὰν δὲ κατὰ μῆκος μόνον, οἱ καλούμενοι δαλοὶ καὶ αἶγες καὶ ἀστέρες. ἐὰν μὲν πλέον τὸ ὑπέκκαυμα ᾖ κατὰ τὸ μῆκος ἢ τὸ πλάτος, ὅταν μὲν οἷον ἀποσπινθηρίζῃ ἅμα καιόμενον (τοῦτο δὲ γίγνεται διὰ τὸ παρεκπυροῦσθαι, κατὰ μικρὰ μέν, ἐπ’ ἀρχὴν δέ), αἲξ καλεῖται, ὅταν δ’ ἄνευ τούτου τοῦ πάθους, δαλός. ἐὰν δὲ τὰ μήκη τῆς ἀναθυμιάσεως κατὰ μικρά τε καὶ πολλαχῇ διεσπαρμένα ᾖ καὶ ὁμοίως κατὰ πλάτος καὶ βάθος, οἱ δοκοῦντες ἀστέρες διάττειν γίγνονται. ὁτὲ μὲν οὖν ὑπὸ τῆς κινήσεως ἡ ἀναθυμίασις ἐκκαιομένη γεννᾷ αὐτά· ὁτὲ δὲ ὑπὸ τοῦ διὰ τὴν ψύξιν [342a] συνισταμένου ἀέρος ἐκθλίβεται καὶ ἐκκρίνεται τὸ θερμόν, διὸ καὶ ἔοικεν ἡ φορὰ ῥίψει μᾶλλον αὐτῶν, ἀλλ’ οὐκ ἐκκαύσει. ἀπορήσειε γὰρ ἄν τις πότερον ὥσπερ ἡ ὑπὸ τοὺς λύχνους τιθεμένη ἀναθυμίασις ἀπὸ τῆς ἄνωθεν φλογὸς ἅπτει τὸν κάτωθεν λύχνον (θαυμαστὴ γὰρ καὶ τούτου ἡ ταχυτής ἐστιν καὶ ὁμοία ῥίψει, ἀλλ’ οὐχ ὡς ἄλλου καὶ ἄλλου γιγνομένου πυρός), ἢ ῥίψεις τοῦ αὐτοῦ τινος σώματός εἰσιν αἱ διαδρομαί. ἔοικε δὴ δι’ ἄμφω· καὶ γὰρ οὕτως ὡς ἡ ἀπὸ τοῦ λύχνου γίγνεται, καὶ ἔνια διὰ τὸ ἐκθλίβεσθαι ῥιπτεῖται, ὥσπερ οἱ ἐκ τῶν δακτύλων πυρῆνες, ὥστε καὶ εἰς τὴν γῆν καὶ εἰς τὴν θάλατταν φαίνεσθαι πίπτοντα, καὶ νύκτωρ καὶ μεθ’ ἡμέραν καὶ αἰθρίας οὔσης. κάτω δὲ ῥιπτεῖται διὰ τὸ τὴν πύκνωσιν εἰς τὸ κάτω ῥέπειν τὴν ἀπωθοῦσαν. διὸ καὶ οἱ κεραυνοὶ κάτω πίπτουσιν <, τοῦ πυρὸς ἄνω φερομένου [342a.14] κατὰ φύσιν>· πάντων γὰρ τούτων ἡ γένεσις οὐκ ἔκκαυσις ἀλλ’ ἔκκρισις ὑπὸ τῆς ἐκθλίψεώς ἐστιν, ἐπεὶ κατὰ φύσιν γε τὸ θερμὸν ἄνω πέφυκε φέρεσθαι πᾶν. ὅσα μὲν οὖν μᾶλλον ἐν τῷ ἀνωτάτω τόπῳ συνίσταται, ἐκκαιομένης γίγνεται τῆς ἀναθυμιάσεως, ὅσα δὲ κατώτερον, ἐκκρινομένης διὰ τὸ συνιέναι καὶ ψύχεσθαι τὴν ὑγροτέραν ἀναθυμίασιν· αὕτη γὰρ συνιοῦσα καὶ κάτω ῥέπουσα ἀπωθεῖ πυκνουμένη καὶ κάτω ποιεῖ τοῦ θερμοῦ τὴν ῥῖψιν· διὰ δὲ τὴν θέσιν τῆς ἀναθυμιάσεως, ὅπως ἂν τύχῃ κειμένη τοῦ πλάτους καὶ τοῦ βάθους, οὕτω φέρεται ἢ ἄνω ἢ κάτω ἢ εἰς τὸ πλάγιον. τὰ πλεῖστα δ’ εἰς τὸ πλάγιον διὰ τὸ δύο φέρεσθαι φοράς, βίᾳ μὲν κάτω, φύσει δ’ ἄνω· πάντα γὰρ κατὰ τὴν διάμετρον φέρεται τὰ τοιαῦτα. διὸ καὶ τῶν διαθεόντων ἀστέρων ἡ πλείστη λοξὴ γίγνεται φορά. πάντων δὴ τούτων αἴτιον ὡς μὲν ὕλη ἡ ἀναθυμίασις, ὡς δὲ τὸ κινοῦν ὁτὲ μὲν ἡ ἄνω φορά, ὁτὲ δ’ ἡ τοῦ ἀέρος συγκρινομένου πῆξις. πάντα δὲ κάτω ταῦτα σελήνης γίγνεται. σημεῖον δ’ ἡ φαινομένη αὐτῶν ταχυτὴς ὁμοία οὖσα τοῖς ὑφ’ ἡμῶν ῥιπτουμένοις, ἃ διὰ τὸ πλησίον εἶναι ἡμῶν πολὺ δοκεῖ τῷ τάχει παραλλάττειν ἄστρα τε καὶ ἥλιον καὶ σελήνην.

φαίνεται δέ ποτε συνιστάμενα νύκτωρ αἰθρίας οὔσης πολλὰ φάσματα ἐν τῷ οὐρανῷ, οἷον χάσματά τε καὶ βόθυνοι καὶ αἱματώδη χρώματα. αἴτιον δὲ ἐπὶ τούτων τὸ [342b] αὐτό· ἐπεὶ γὰρ φανερός ἐστι συνιστάμενος ὁ ἄνω ἀὴρ ὥστ’ ἐκπυροῦσθαι, καὶ τὴν ἐκπύρωσιν ὁτὲ μὲν τοιαύτην γίγνεσθαι ὥστε φλόγα δοκεῖν καίεσθαι, ὁτὲ δὲ οἷον δαλοὺς φέρεσθαι καὶ ἀστέρας, οὐδὲν ἄτοπον εἰ χρωματίζεται ὁ αὐτὸς οὗτος ἀὴρ συνιστάμενος παντοδαπὰς χρόας· διά τε γὰρ πυκνοτέρου διαφαινόμενον ἔλαττον φῶς καὶ ἀνάκλασιν δεχόμενος ὁ ἀὴρ παντοδαπὰ χρώματα ποιήσει, μάλιστα δὲ φοινικοῦν ἢ πορφυροῦν, διὰ τὸ ταῦτα μάλιστα ἐκ τοῦ πυρώδους καὶ λευκοῦ φαίνεσθαι μειγνυμένων κατὰ τὰς ἐπιπροσθήσεις, οἷον ἀνίσχοντα τὰ ἄστρα καὶ δυόμενα, ἐὰν ᾖ καῦμα, καὶ διὰ καπνοῦ φοινικᾶ φαίνεται. καὶ τῇ ἀνακλάσει δὲ ποιήσει, ὅταν τὸ ἔνοπτρον ᾖ τοιοῦτον ὥστε μὴ τὸ σχῆμα ἀλλὰ τὸ χρῶμα δέχεσθαι. τοῦ δὲ μὴ πολὺν χρόνον μένειν ταῦτα ἡ σύστασις αἰτία ταχεῖα οὖσα. τὰ δὲ χάσματα ἀναρρηγνυμένου τοῦ φωτὸς ἐκ κυανοῦ καὶ μέλανος ποιεῖ τι βάθος ἔχειν δοκεῖν. πολλάκις δ’ ἐκ τῶν τοιούτων καὶ δαλοὶ ἐκπίπτουσιν, ὅταν συγκριθῇ μᾶλλον· συνιὸν δ’ ἔτι χάσμα [342b.18] δοκεῖ. ὅλως δ’ ἐν τῷ μέλανι τὸ λευκὸν πολλὰς ποιεῖ ποικιλίας, οἷον ἡ φλὸξ ἐν τῷ καπνῷ. ἡμέρας μὲν οὖν ὁ ἥλιος κωλύει, νυκτὸς δ’ ἔξω τοῦ φοινικοῦ τὰ ἄλλα δι’ ὁμόχροιαν οὐ φαίνεται. περὶ μὲν οὖν τῶν διαθεόντων ἀστέρων καὶ τῶν ἐκπυρουμένων, ἔτι δὲ τῶν ἄλλων τῶν τοιούτων φασμάτων ὅσα ταχείας ποιεῖται τὰς φαντασίας, ταύτας ὑπολαβεῖν δεῖ τὰς αἰτίας.

περὶ δὲ τῶν κομητῶν καὶ τοῦ καλουμένου γάλακτος λέγωμεν, διαπορήσαντες πρὸς τὰ παρὰ τῶν ἄλλων εἰρημένα πρῶτον. Ἀναξαγόρας μὲν οὖν καὶ Δημόκριτός φασιν εἶναι τοὺς κομήτας σύμφασιν τῶν πλανήτων ἀστέρων, ὅταν διὰ τὸ πλησίον ἐλθεῖν δόξωσι θιγγάνειν ἀλλήλων. τῶν δ’ Ἰταλικῶν τινες καλουμένων Πυθαγορείων ἕνα λέγουσιν αὐτὸν εἶναι τῶν πλανήτων ἀστέρων, ἀλλὰ διὰ πολλοῦ τε χρόνου τὴν φαντασίαν αὐτοῦ εἶναι καὶ τὴν ὑπερβολὴν ἐπὶ μικρόν, ὅπερ συμβαίνει καὶ περὶ τὸν τοῦ Ἑρμοῦ ἀστέρα· διὰ γὰρ τὸ μικρὸν ἐπαναβαίνειν πολλὰς ἐκλείπει φάσεις, ὥστε διὰ χρόνου φαίνεσθαι πολλοῦ. παραπλησίως δὲ τούτοις καὶ οἱ περὶ Ἱπποκράτην τὸν Χῖον καὶ τὸν μαθητὴν αὐτοῦ [343a] Αἰσχύλον ἀπεφήναντο, πλὴν τήν γε κόμην οὐκ ἐξ αὐτοῦ φασιν ἔχειν, ἀλλὰ πλανώμενον διὰ τὸν τόπον ἐνίοτε λαμβάνειν ἀνακλωμένης τῆς ἡμετέρας ὄψεως ἀπὸ τῆς ἑλκομένης ὑγρότητος ὑπ’ αὐτοῦ πρὸς τὸν ἥλιον. διὰ δὲ τὸ ὑπολείπεσθαι βραδύτατα τῷ χρόνῳ διὰ πλείστου χρόνου φαίνεσθαι τῶν ἄλλων ἄστρων, ὡς ὅταν ἐκ ταὐτοῦ φανῇ ὑπολελειμμένον ὅλον τὸν ἑαυτοῦ κύκλον· ὑπολείπεσθαι δ’ αὐτὸν καὶ πρὸς ἄρκτον καὶ πρὸς νότον. ἐν μὲν οὖν τῷ μεταξὺ τόπῳ τῶν τροπικῶν οὐχ ἕλκειν τὸ ὕδωρ πρὸς ἑαυτὸν διὰ τὸ κεκαῦσθαι ὑπὸ τῆς τοῦ ἡλίου φορᾶς· πρὸς δὲ νότον ὅταν φέρηται, δαψίλειαν μὲν ἔχειν τῆς τοιαύτης νοτίδος, ἀλλὰ διὰ τὸ μικρὸν εἶναι τὸ ὑπὲρ τῆς γῆς τμῆμα τοῦ κύκλου, τὸ δὲ κάτω πολλαπλάσιον, οὐ δύνασθαι τὴν ὄψιν τῶν ἀνθρώπων φέρεσθαι κλωμένην πρὸς τὸν ἥλιον οὔτε τῷ τροπικῷ τόπῳ πλησιάζοντος οὔτ' ἐπὶ θεριναῖς τροπαῖς ὄντος τοῦ ἡλίου· διόπερ ἐν τούτοις μὲν τοῖς τόποις οὐ γίγνεσθαι κομήτην αὐτόν· ὅταν δὲ πρὸς βορέαν ὑπολειφθεὶς τύχῃ, λαμβάνειν κόμην διὰ τὸ μεγάλην εἶναι τὴν περιφέρειαν τὴν ἄνωθεν τοῦ ὁρίζοντος, τὸ δὲ κάτω μέρος τοῦ κύκλου μικρόν· ῥᾳδίως γὰρ τὴν ὄψιν τῶν ἀνθρώπων ἀφικνεῖσθαι τότε πρὸς τὸν ἥλιον. πᾶσιν δὲ τούτοις τὰ μὲν κοινῇ συμπίπτει λέγειν ἀδύνατα, τὰ δὲ χωρίς. πρῶτον μὲν οὖν τοῖς λέγουσιν ὅτι τῶν πλανωμένων ἐστὶν εἷς ἀστέρων ὁ κομήτης· οἱ γὰρ πλανώμενοι πάντες ἐν τῷ κύκλῳ ὑπολείπονται τῷ τῶν ζῳδίων, κομῆται δὲ πολλοὶ ἑωραμένοι εἰσὶν ἔξω τοῦ κύκλου. εἶτα καὶ πλείους ἑνὸς ἅμα γεγένηνται πολλάκις. πρὸς δὲ τούτοις, εἰ διὰ τὴν ἀνάκλασιν τὴν κόμην ἴσχουσι, καθάπερ φησὶν Αἰσχύλος καὶ Ἱπποκράτης, ἔδει ποτὲ φαίνεσθαι καὶ ἄνευ κόμης τὸν ἀστέρα τοῦτον, ἐπειδήπερ ὑπολείπεται μὲν καὶ εἰς ἄλλους τόπους, τὴν δὲ κόμην ἴσχει οὐ πανταχοῦ· νῦν δ' οὐδεὶς ὦπται παρὰ τοὺς πέντε ἀστέρας· οὗτοι δὲ πολλάκις ἅμα πάντες μετέωροι φαίνονται ὑπὲρ τοῦ ὁρίζοντος. καὶ φανερῶν δὲ ὄντων αὐτῶν ἁπάντων καὶ μὴ φαινομένων πάντων, ἀλλ' ἐνίων ὄντων πρὸς τῷ ἡλίῳ, οὐδὲν ἧττον κομῆται φαίνονται γιγνόμενοι πολλάκις. ἀλλὰ μὴν οὐδὲ τοῦτο ἀληθές, ὡς ἐν τῷ πρὸς ἄρκτον τόπῳ γίγνεται κομήτης μόνον, ἅμα καὶ τοῦ ἡλίου [343b] ὄντος περὶ θερινὰς τροπάς· ὅ τε γὰρ μέγας κομήτης ὁ γενόμενος περὶ τὸν ἐν Ἀχαΐᾳ σεισμὸν καὶ τὴν τοῦ κύματος ἔφοδον ἀπὸ δυσμῶν τῶν ἰσημερινῶν ἀνέσχεν, καὶ πρὸς νότον ἤδη πολλοὶ γεγόνασιν. ἐπὶ δ' ἄρχοντος Ἀθήνησιν Εὐκλέους τοῦ Μόλωνος ἐγένετο κομήτης ἀστὴρ πρὸς ἄρκτον μηνὸς Γαμηλιῶνος περὶ τροπὰς ὄντος τοῦ ἡλίου χειμερινάς· καίτοι τοσοῦτον ἀνακλασθῆναι καὶ αὐτοὶ τῶν ἀδυνάτων εἶναί φασι. κοινὸν δὲ καὶ τούτοις καὶ τοῖς τὴν σύναψιν λέγουσιν πρῶτον μὲν ὅτι καὶ τῶν ἀπλανῶν λαμβάνουσι κόμην τινές. καὶ τοῦτ' οὐ μόνον Αἰγυπτίοις πιστεῦσαι δεῖ, καίτοι κἀκεῖνοί φασιν, ἀλλὰ καὶ ἡμεῖς ἐφεωράκαμεν· τῶν γὰρ ἐν τῷ ἰσχίῳ τοῦ κυνὸς ἀστήρ τις ἔσχε κόμην, ἀμαυρὰν μέντοι· ἀτενίζουσιν μὲν γὰρ εἰς αὐτὸν ἀμυδρὸν ἐγίγνετο τὸ φέγγος, παραβλέπουσι δ' ἠρέμα τὴν ὄψιν πλέον. πρὸς δὲ τούτοις ἅπαντες οἱ καθ' ἡμᾶς ὠμμένοι ἄνευ δύσεως ἠφανίσθησαν ἐν τῷ ὑπὲρ τοῦ ὁρίζοντος τόπῳ ἀπομαρανθέντες κατὰ μικρὸν οὕτως, ὥστε μήτε ἑνὸς ἀστέρος ὑπολειφθῆναι σῶμα μήτε πλειόνων, ἐπεὶ καὶ ὁ μέγας ἀστὴρ περὶ οὗ πρότερον ἐμνήσθημεν ἐφάνη μὲν χειμῶνος ἐν πάγοις καὶ αἰθρίαις ἀφ' ἑσπέρας, ἐπὶ Ἀστείου ἄρχοντος, καὶ τῇ μὲν πρώτῃ οὐκ ὤφθη ὡς προδεδυκὼς τοῦ ἡλίου, τῇ δ' ὑστεραίᾳ ὤφθη· ὅσον ἐνδέχεται γὰρ ἐλάχιστον ὑπελείφθη, καὶ εὐθὺς ἔδυ· τὸ δὲ φέγγος ἀπέτεινε μέχρι τοῦ τρίτου μέρους τοῦ οὐρανοῦ οἷον ἅλμα· διὸ καὶ ἐκλήθη ὁδός. ἐπανῆλθε δὲ μέχρι τῆς ζώνης τοῦ Ὠρίωνος, καὶ ἐνταυθοῖ διελύθη. καίτοι Δημόκριτός γε προσπεφιλονείκηκεν τῇ δόξῃ τῇ αὑτοῦ· φησὶ γὰρ ὦφθαι διαλυομένων τῶν κομητῶν ἀστέρας τινάς. τοῦτο δὲ οὐχ ὁτὲ μὲν ἔδει γίγνεσθαι ὁτὲ δὲ οὔ, ἀλλ’ ἀεί. πρὸς δὲ τούτοις καὶ οἱ Αἰγύπτιοί φασι καὶ τῶν πλανήτων καὶ πρὸς αὑτοὺς καὶ πρὸς τοὺς ἀπλανεῖς γίγνεσθαι συνόδους, καὶ αὐτοὶ ἑωράκαμεν τὸν ἀστέρα τὸν τοῦ Διὸς τῶν ἐν τοῖς διδύμοις συνελθόντα τινὶ ἤδη καὶ ἀφανίσαντα, ἀλλ’ οὐ κομήτην γενόμενον. ἔτι δὲ καὶ ἐκ τοῦ λόγου φανερόν· οἱ γὰρ ἀστέρες κἂν εἰ μείζους καὶ ἐλάττους φαίνονται, ἀλλ’ ὅμως ἀδιαίρετοί γε καθ’ ἑαυτοὺς εἶναι δοκοῦσιν. ὥσπερ οὖν καὶ εἰ ἦσαν ἀδιαίρετοι, ἁψάμενοι οὐδὲν ἂν ἐποίησαν μέγεθος μεῖζον, οὕτως καὶ ἐπειδὴ οὐκ εἰσὶν μὲν φαίνονται δὲ [344a] ἀδιαίρετοι, καὶ συνελθόντες οὐδὲν φανοῦνται μείζους τὸ μέγεθος ὄντες. ὅτι μὲν οὖν αἱ λεγόμεναι περὶ αὐτῶν αἰτίαι ψευδεῖς οὖσαι τυγχάνουσιν, εἰ μὴ διὰ πλειόνων, ἀλλὰ καὶ διὰ τούτων ἱκανῶς δῆλόν ἐστιν.

ἐπεὶ δὲ περὶ τῶν ἀφανῶν τῇ αἰσθήσει νομίζομεν ἱκανῶς ἀποδεδεῖχθαι κατὰ τὸν λόγον, ἐὰν εἰς τὸ δυνατὸν ἀναγάγωμεν, ἔκ τε τῶν νῦν φαινομένων ὑπολάβοι τις ἂν ὧδε περὶ τούτων μάλιστα συμβαίνειν· ὑπόκειται γὰρ ἡμῖν τοῦ κόσμου τοῦ περὶ τὴν γῆν, ὅσον ὑπὸ τὴν ἐγκύκλιόν ἐστιν φοράν, εἶναι τὸ πρῶτον μέρος ἀναθυμίασιν ξηρὰν καὶ θερμήν· αὕτη δὲ αὐτή τε καὶ τοῦ συνεχοῦς ὑπ’ αὐτὴν ἀέρος ἐπὶ πολὺ συμπεριάγεται περὶ τὴν γῆν ὑπὸ τῆς φορᾶς καὶ τῆς κινήσεως τῆς κύκλῳ· φερομένη δὲ καὶ κινουμένη τοῦτον τὸν τρόπον, ᾗ ἂν τύχῃ εὔκρατος οὖσα, πολλάκις ἐκπυροῦται· διό φαμεν γίγνεσθαι καὶ τὰς τῶν σποράδων ἀστέρων διαδρομάς. ὅταν οὖν εἰς τὴν τοιαύτην πύκνωσιν ἐμπέσῃ διὰ τὴν ἄνωθεν κίνησιν ἀρχὴ πυρώδης, μήτε οὕτω πολλὴ λίαν ὥστε ταχὺ καὶ ἐπὶ πολὺ ἐκκαίειν, μήθ’ οὕτως ἀσθενὴς ὥστε ἀποσβεσθῆναι ταχύ, ἀλλὰ πλείων καὶ ἐπὶ πολύ, ἅμα δὲ κάτωθεν συμπίπτῃ ἀναβαίνειν εὔκρατον ἀναθυμίασιν, ἀστὴρ τοῦτο γίγνεται κομήτης, ὅπως ἂν τὸ ἀναθυμιώμενον τύχῃ ἐσχηματισμένον· ἐὰν μὲν γὰρ πάντῃ ὁμοίως, κομήτης, ἐὰν δ’ ἐπὶ μῆκος, καλεῖται πωγωνίας. ὥσπερ δὲ ἡ τοιαύτη φορὰ ἀστέρος φορὰ δοκεῖ εἶναι, οὕτως καὶ ἡ μονὴ ἡ ὁμοία ἀστέρος μονὴ δοκεῖ εἶναι· παραπλήσιον γὰρ τὸ γιγνόμενον οἷον εἴ τις εἰς ἀχύρων θημῶνα καὶ πλῆθος ὤσειε δαλὸν ἢ πυρὸς ἀρχὴν ἐμβάλοι μικράν· φαίνεται γὰρ ὁμοία καὶ ἡ τῶν ἀστέρων διαδρομὴ τούτῳ· ταχὺ γὰρ διὰ τὴν εὐφυΐαν τοῦ [344a.29] ὑπεκκαύματος διαδίδωσιν ἐπὶ μῆκος. εἰ δὴ τοῦτο μείνειε καὶ μὴ καταμαρανθείη διελθόν, ᾗ μάλιστα ἐπύκνωσε τὸ ὑπέκκαυμα, γένοιτ’ ἂν ἀρχὴ τῆς φορᾶς ἡ τελευτὴ τῆς διαδρομῆς. τοιοῦτον ὁ κομήτης ἐστὶν ἀστήρ, ὥσπερ διαδρομὴ ἀστέρος, ἔχων ἐν ἑαυτῷ πέρας καὶ ἀρχήν. ὅταν μὲν οὖν ἐν αὐτῷ τῷ κάτω τόπῳ ἡ ἀρχὴ τῆς συστάσεως ᾖ, καθ’ ἑαυτὸν φαίνεται κομήτης· ὅταν δ’ ὑπὸ τῶν ἄστρων τινός, ἢ τῶν ἀπλανῶν ἢ τῶν πλανήτων, ὑπὸ τῆς κινήσεως συνιστῆται ἡ [344b] ἀναθυμίασις, τότε κομήτης γίγνεται τούτων τις· οὐ γὰρ πρὸς αὐτοῖς ἡ κόμη γίγνεται τοῖς ἄστροις, ἀλλ’ ὥσπερ αἱ ἅλῳ περὶ τὸν ἥλιον φαίνονται καὶ τὴν σελήνην παρακολουθοῦσαι, καίπερ μεθισταμένων, ὅταν οὕτως ᾖ πεπυκνωμένος ὁ ἀὴρ ὥστε τοῦτο γίγνεσθαι τὸ πάθος ὑπὸ τὴν τοῦ ἡλίου πορείαν, οὕτω καὶ ἡ κόμη τοῖς ἄστροις οἷον ἅλως ἐστίν· πλὴν ἡ μὲν γίγνεται δι’ ἀνάκλασιν τοιαύτη τὴν χρόαν, ἐκεῖ δ’ ἐπ’ αὐτῶν τὸ χρῶμα φαινόμενόν ἐστιν. ὅταν μὲν οὖν κατ’ ἀστέρα γένηται ἡ τοιαύτη σύγκρισις, τὴν αὐτὴν ἀνάγκη φαίνεσθαι φορὰν κινούμενον τὸν κομήτην ἥνπερ φέρεται ὁ ἀστήρ· ὅταν δὲ συστῇ καθ’ αὑτόν, τότε ὑπολειπόμενοι φαίνονται. τοιαύτη γὰρ ἡ φορὰ τοῦ κόσμου τοῦ περὶ τὴν γῆν. τοῦτο γὰρ μάλιστα μηνύει μὴ εἶναι ἀνάκλασίν τινα τὸν κομήτην, ὡς ἅλω ἐν ὑπεκκαύματι καθαρῷ πρὸς αὐτὸν τὸν ἀστέρα γιγνομένην, καὶ μὴ ὡς λέγουσιν οἱ περὶ Ἱπποκράτην, πρὸς τὸν ἥλιον, ὅτι καὶ καθ’ αὑτὸν γίγνεται κομήτης πολλάκις καὶ πλεονάκις ἢ περὶ τῶν ὡρισμένων τινὰς ἀστέρων. περὶ μὲν οὖν τῆς ἅλω τὴν αἰτίαν ὕστερον ἐροῦμεν· περὶ δὲ τοῦ πυρώδη τὴν σύστασιν αὐτῶν εἶναι τεκμήριον χρὴ νομίζειν ὅτι σημαίνουσι γιγνόμενοι πλείους πνεύματα καὶ αὐχμούς· δῆλον γὰρ ὅτι γίγνονται διὰ τὸ πολλὴν εἶναι τὴν τοιαύτην ἔκκρισιν, ὥστε ξηρότερον ἀναγκαῖον εἶναι τὸν ἀέρα, καὶ διακρίνεσθαι καὶ διαλύεσθαι τὸ διατμίζον ὑγρὸν ὑπὸ τοῦ πλήθους τῆς θερμῆς ἀναθυμιάσεως, ὥστε μὴ συνίστασθαι ῥᾳδίως εἰς ὕδωρ. σαφέστερον δ’ ἐροῦμεν καὶ περὶ τούτου τοῦ πάθους, ὅταν καὶ περὶ πνευμάτων λέγειν ᾖ καιρός. ὅταν μὲν οὖν πυκνοὶ καὶ πλείους φαίνωνται, καθάπερ λέγομεν, ξηροὶ καὶ πνευματώδεις γίγνονται οἱ ἐνιαυτοὶ ἐπιδήλως· ὅταν δὲ σπανιώτεροι καὶ ἀμαυρότεροι τὸ μέγεθος, ὁμοίως μὲν οὐ γίγνεται τὸ τοιοῦτον, οὐ μὴν ἀλλ’ ὡς ἐπὶ τὸ πολὺ γίγνεταί τις ὑπερβολὴ πνεύματος ἢ κατὰ χρόνον ἢ κατὰ μέγεθος, ἐπεὶ καὶ ὅτε ὁ ἐν Αἰγὸς ποταμοῖς ἔπεσε λίθος ἐκ τοῦ ἀέρος, ὑπὸ πνεύματος ἀρθεὶς ἐξέπεσε μεθ’ ἡμέραν· ἔτυχε δὲ καὶ τότε κομήτης ἀστὴρ γενόμενος ἀφ’ ἑσπέρας. καὶ περὶ τὸν μέγαν ἀστέρα τὸν κομήτην ξηρὸς ἦν ὁ χειμὼν καὶ βόρειος, καὶ τὸ κῦμα δι’ ἐναντίωσιν ἐγένετο πνευμάτων· ἐν μὲν γὰρ τῷ κόλπῳ [345a] βορέας κατεῖχεν, ἔξω δὲ νότος ἔπνευσε μέγας. ἔτι δ’ ἐπ’ ἄρχοντος Νικομάχου ἐγένετο ὀλίγας ἡμέρας κομήτης περὶ τὸν ἰσημερινὸν κύκλον, οὐκ ἀφ’ ἑσπέρας ποιησάμενος τὴν ἀνατολήν, ἐφ’ ᾧ τὸ περὶ Κόρινθον πνεῦμα γενέσθαι συνέπεσεν. τοῦ δὲ μὴ γίγνεσθαι πολλοὺς μηδὲ πολλάκις κομήτας, καὶ μᾶλλον ἐκτὸς τῶν τροπικῶν ἢ ἐντός, αἴτιος ἡ τοῦ ἡλίου καὶ ἡ τῶν ἀστέρων κίνησις, οὐ μόνον ἐκκρίνουσα τὸ θερμόν, ἀλλὰ καὶ διακρίνουσα τὸ συνιστάμενον. μάλιστα δ' αἴτιον ὅτι τὸ πλεῖστον εἰς τὴν τοῦ γάλακτος ἀθροίζεται χώραν.

ὅπως δὲ καὶ διὰ τίν' αἰτίαν γίγνεται καὶ τί ἐστι τὸ γάλα, λέγωμεν ἤδη. προδιέλθωμεν δὲ καὶ περὶ τούτου τὰ παρὰ τῶν ἄλλων εἰρημένα πρῶτον. τῶν μὲν οὖν καλουμένων Πυθαγορείων φασί τινες ὁδὸν εἶναι ταύτην οἱ μὲν τῶν ἐκπεσόντων τινὸς ἀστέρων, κατὰ τὴν λεγομένην ἐπὶ Φαέθοντος φθοράν, οἱ δὲ τὸν ἥλιον τοῦτον τὸν κύκλον φέρεσθαί ποτέ φασιν· οἷον οὖν διακεκαῦσθαι τὸν τόπον τοῦτον ἤ τι τοιοῦτον ἄλλο πεπονθέναι πάθος ὑπὸ τῆς φορᾶς αὐτῶν. ἄτοπον δὲ τὸ μὴ συννοεῖν ὅτι εἴπερ τοῦτ' ἦν τὸ αἴτιον, ἔδει καὶ τὸν τῶν ζῳδίων κύκλον οὕτως ἔχειν, καὶ μᾶλλον ἢ τὸν τοῦ γάλακτος· ἅπαντα γὰρ ἐν αὐτῷ φέρεται τὰ πλανώμενα καὶ οὐχ ὁ ἥλιος μόνος. δῆλος δ' ἡμῖν ἅπας ὁ κύκλος· αἰεὶ γὰρ αὐτοῦ φανερὸν ἡμικύκλιον τῆς νυκτός. ἀλλὰ πεπονθὼς οὐδὲν φαίνεται τοιοῦτον, πλὴν εἴ τι συνάπτει μόριον αὐτοῦ πρὸς τὸν τοῦ γάλακτος κύκλον. οἱ δὲ περὶ Ἀναξαγόραν καὶ Δημόκριτον φῶς εἶναι τὸ γάλα λέγουσιν ἄστρων τινῶν· τὸν γὰρ ἥλιον ὑπὸ τὴν γῆν φερόμενον οὐχ ὁρᾶν ἔνια τῶν ἄστρων. ὅσα μὲν οὖν περιορᾶται ὑπ' αὐτοῦ, τούτων μὲν οὐ φαίνεσθαι τὸ φῶς (κωλύεσθαι γὰρ ὑπὸ τῶν τοῦ ἡλίου ἀκτίνων)· ὅσοις δ' ἀντιφράττει ἡ γῆ ὥστε μὴ ὁρᾶσθαι ὑπὸ τοῦ ἡλίου, τὸ τούτων οἰκεῖον φῶς εἶναί φασι τὸ γάλα. φανερὸν δ' ὅτι καὶ τοῦτ' ἀδύνατον· τὸ μὲν γὰρ γάλα ἀεὶ τὸ αὐτὸ ἐν τοῖς αὐτοῖς ἐστιν ἄστροις (φαίνεται γὰρ μέγιστος ὢν κύκλος), ὑπὸ δὲ τοῦ ἡλίου ἀεὶ ἕτερα τὰ οὐχ ὁρώμενα διὰ τὸ μὴ ἐν ταὐτῷ μένειν τόπῳ. ἔδει οὖν μεθισταμένου τοῦ ἡλίου μεθίστασθαι καὶ τὸ γάλα· νῦν δὲ οὐ φαίνεται τοῦτο γιγνόμενον. πρὸς [345b] δὲ τούτοις, εἰ καθάπερ δείκνυται νῦν ἐν τοῖς περὶ ἀστρολογίαν θεωρήμασιν, τὸ τοῦ ἡλίου μέγεθος μεῖζόν ἐστιν ἢ τὸ τῆς γῆς καὶ τὸ διάστημα πολλαπλασίως μεῖζον τὸ τῶν ἄστρων πρὸς τὴν γῆν ἢ τὸ τοῦ ἡλίου, καθάπερ τὸ τοῦ ἡλίου πρὸς τὴν γῆν ἢ τὸ τῆς σελήνης, οὐκ ἂν πόρρω που τῆς γῆς ὁ κῶνος ὁ ἀπὸ τοῦ ἡλίου συμβάλλοι τὰς ἀκτῖνας, οὐδ' ἂν ἡ σκιὰ πρὸς τοῖς ἄστροις εἴη τῆς γῆς, ἡ καλουμένη νύξ· ἀλλ' ἀνάγκη πάντα τὸν ἥλιον τὰ ἄστρα περιορᾶν, καὶ μηδενὶ τὴν γῆν ἀντιφράττειν αὐτῶν. ἔτι δ' ἐστὶν τρίτη τις ὑπόληψις περὶ αὐτοῦ· λέγουσιν γάρ τινες ἀνάκλασιν εἶναι τὸ γάλα τῆς ἡμετέρας ὄψεως πρὸς τὸν ἥλιον, ὥσπερ καὶ τὸν ἀστέρα τὸν κομήτην. ἀδύνατον δὲ καὶ τοῦτο· εἰ μὲν γὰρ τό τε ὁρῶν ἠρεμοίη καὶ τὸ ἔνοπτρον καὶ τὸ ὁρώμενον ἅπαν, ἐν τῷ αὐτῷ σημείῳ τοῦ ἐνόπτρου τὸ αὐτὸ φαίνοιτ' ἂν μέρος τῆς ἐμφάσεως· εἰ δὲ κινοῖτο τὸ ἔνοπτρον καὶ τὸ ὁρώμενον ἐν τῷ αὐτῷ μὲν ἀποστήματι πρὸς τὸ ὁρῶν καὶ ἠρεμοῦν, πρὸς ἄλληλα δὲ μήτε ἰσοταχῶς μηδ’ ἐν τῷ αὐτῷ ἀεὶ διαστήματι, ἀδύνατον τὴν αὐτὴν ἔμφασιν ἐπὶ τοῦ αὐτοῦ εἶναι μέρους τοῦ ἐνόπτρου. τὰ δ’ ἐν τῷ τοῦ γάλακτος κύκλῳ φερόμενα ἄστρα κινεῖται καὶ ὁ ἥλιος πρὸς ὃν ἡ ἀνάκλασις, μενόντων ἡμῶν, καὶ ὁμοίως καὶ ἴσον πρὸς ἡμᾶς ἀπέχοντα, αὐτῶν δ’ οὐκ ἴσον· ὁτὲ μὲν γὰρ μέσων νυκτῶν ὁ δελφὶς ἐπιτέλλει, ὁτὲ δὲ ἕωθεν, τὰ δὲ μόρια τοῦ γάλακτος τὰ αὐτὰ μένει ἐν ἑκάστῳ. καίτοι οὐκ ἔδει, εἰ ἦν ἔμφασις, ἀλλὰ μὴ ἐν αὐτοῖς τι ἦν τοῦτο τὸ πάθος τοῖς τόποις. ἔτι δὲ νύκτωρ ἐν ὕδατι καὶ τοῖς τοιούτοις ἐνόπτροις τὸ μὲν γάλα ἐμφαίνεται θεωροῦσι, τὸ δὲ τὴν ὄψιν ἀνακλᾶσθαι πρὸς τὸν ἥλιον πῶς δυνατόν; ὅτι μὲν οὖν οὔτε ὁδὸς τῶν πλανήτων οὐδενὸς οὔτε φῶς ἐστι τῶν μὴ ὁρωμένων ἄστρων οὔτ’ ἀνάκλασις, ἐκ τούτων φανερόν. σχεδὸν δὲ ταῦτ’ ἐστὶν μόνον τὰ μέχρι τοῦ νῦν παραδεδομένα παρὰ τῶν ἄλλων. ἡμεῖς δὲ λέγωμεν ἀναλαβόντες τὴν ὑποκειμένην ἀρχὴν ἡμῖν. εἴρηται γὰρ πρότερον ὅτι τὸ ἔσχατον τοῦ λεγομένου ἀέρος δύναμιν ἔχει πυρός, ὥστε τῇ κινήσει διακρινομένου τοῦ ἀέρος ἀποκρίνεσθαι τοιαύτην σύστασιν οἵαν καὶ τοὺς κομήτας ἀστέρας εἶναί φαμεν. τοιοῦτον δὴ δεῖ νοῆσαι γιγνόμενον ὅπερ ἐπ’ ἐκείνων, ὅταν μὴ αὐτὴ [346a] καθ’ αὑτὴν γένηται ἡ τοιαύτη ἔκκρισις, ἀλλ’ ὑπό τινος τῶν [346a.2] ἄστρων ἢ τῶν ἐνδεδεμένων ἢ τῶν πλανωμένων· τότε γὰρ οὗτοι φαίνονται κομῆται διὰ τὸ παρακολουθεῖν αὐτῶν τῇ φορᾷ ὥσπερ τῷ ἡλίῳ τὴν τοιαύτην σύγκρισιν, ἀφ’ ἧς διὰ τὴν ἀνάκλασιν τὴν ἅλω φαίνεσθαί φαμεν, ὅταν οὕτω τύχῃ κεκραμένος ὁ ἀήρ. ὃ δὴ καθ’ ἕνα συμβαίνει τῶν ἀστέρων, τοῦτο δεῖ λαβεῖν γιγνόμενον περὶ ὅλον τὸν οὐρανὸν καὶ τὴν ἄνω φορὰν ἅπασαν· εὔλογον γάρ, εἴπερ ἡ ἑνὸς ἄστρου κίνησις, καὶ τὴν τῶν πάντων ποιεῖν τι τοιοῦτον καὶ ἐκριπίζειν ἀέρα [346a] τε καὶ διακρίνειν διὰ τὸ τοῦ κύκλου μέγεθος. <ἀνάγκη τοίνυν τῶν αὐτῶν μεγίστων κύκλων μάλιστα τὴν μέλλουσαν τοῦτο ποιήσειν φοράν. . . χρὴ γὰρ τοῦτο, ἵνα πολλὴ κίνησις ᾖ διὰ τὸ μέγεθος γιγνομένη καὶ πλείονα τὴν ἔξαψιν ποιήσῃ.> [346a.10] καὶ πρὸς τούτοις ἔτι καθ’ ὃν τόπον πυκνότατα καὶ πλεῖστα καὶ μέγιστα τυγχάνουσιν ὄντα τῶν ἄστρων. ὁ μὲν οὖν τῶν ζῳδίων διὰ τὴν τοῦ ἡλίου φορὰν καὶ τὴν τῶν πλανητῶν διαλύει τὴν τοιαύτην σύστασιν· διόπερ οἱ πολλοὶ τῶν κομητῶν ἐκτὸς γίγνονται τῶν τροπικῶν. ἔτι δ’ οὔτε περὶ τὸν ἥλιον οὔτε περὶ σελήνην γίγνεται κόμη· θᾶττον γὰρ διακρίνουσιν ἢ ὥστε συστῆναι τοιαύτην σύγκρισιν. οὗτος δ’ ὁ κύκλος ἐν ᾧ τὸ γάλα φαίνεται τοῖς ὁρῶσιν, ὅ τε μέγιστος ὢν τυγχάνει καὶ τῇ θέσει κείμενος οὕτως ὥστε πολὺ τοὺς τροπικοὺς ὑπερβάλλειν. πρὸς δὲ τούτοις ἄστρων ὁ τόπος πλήρης ἐστὶν τῶν μεγίστων καὶ λαμπροτάτων, καὶ ἔτι τῶν σποράδων καλουμένων (τοῦτο δ’ ἐστὶν καὶ τοῖς ὄμμασιν ἰδεῖν φανερόν), ὥστε διὰ ταῦτα συνεχῶς καὶ ἀεὶ ταύτην πᾶσαν ἀθροίζεσθαι τὴν σύγκρισιν. σημεῖον δέ· καὶ γὰρ αὐτοῦ τοῦ κύκλου πλέον τὸ φῶς ἐστιν ἐν θατέρῳ ἡμικυκλίῳ τῷ τὸ δίπλωμα ἔχοντι· ἐν τούτῳ γὰρ πλείω καὶ πυκνότερά ἐστιν ἄστρα ἢ ἐν θατέρῳ, ὡς οὐ δι' ἑτέραν τιν' αἰτίαν γιγνομένου τοῦ φέγγους ἢ διὰ τὴν τῶν ἄστρων φοράν· εἰ γὰρ ἔν τε τῷ κύκλῳ τούτῳ γίγνεται ἐν ᾧ τὰ πλεῖστα κεῖται τῶν ἄστρων, καὶ αὐτοῦ τοῦ κύκλου ἐν ᾧ μᾶλλον φαίνεται καταπεπυκνῶσθαι καὶ μεγέθει καὶ πλήθει ἀστέρων, ταύτην εἰκὸς ὑπολαβεῖν οἰκειοτάτην αἰτίαν εἶναι τοῦ πάθους. θεωρείσθω δ' ὅ τε κύκλος καὶ τὰ ἐν αὐτῷ ἄστρα ἐκ τῆς ὑπογραφῆς. τοὺς δὲ σποράδας καλουμένους οὕτω μὲν εἰς τὴν σφαῖραν οὐκ ἔσται τάξαι διὰ τὸ μηδεμίαν διὰ τέλους ἔχειν φανερὰν ἕκαστον θέσιν, εἰς δὲ τὸν οὐρανὸν ἀναβλέπουσίν ἐστι δῆλον· ἐν μόνῳ γὰρ τούτῳ τῶν κύκλων τὰ μεταξὺ πλήρη τοιούτων ἀστέρων ἐστίν, ἐν δὲ τοῖς ἄλλοις διαλείπει [346b] φανερῶς. ὥστ' εἴπερ καὶ περὶ τοῦ φαίνεσθαι κομήτας ἀποδεχόμεθα τὴν αἰτίαν ὡς εἰρημένην μετρίως, καὶ περὶ τοῦ γάλακτος τὸν αὐτὸν ὑποληπτέον τρόπον ἔχειν· ὃ γὰρ ἐκεῖ περὶ ἕνα ἐστὶν πάθος ἡ κόμη, τοῦτο περὶ κύκλον τινὰ συμβαίνει γίγνεσθαι τὸ αὐτό, καὶ ἔστιν τὸ γάλα, ὡς εἰπεῖν οἷον ὁριζόμενον, ἡ τοῦ μεγίστου διὰ τὴν ἔκκρισιν κύκλου κόμη. διὸ καθάπερ πρότερον εἴπομεν, οὐ πολλοὶ οὐδὲ πολλάκις γίγνονται κομῆται, διὰ τὸ συνεχῶς ἀποκεκρίσθαι καὶ ἀποκρίνεσθαι καθ' ἑκάστην περίοδον εἰς τοῦτον τὸν τόπον αἰεὶ τὴν τοιαύτην σύστασιν. περὶ μὲν οὖν τῶν γιγνομένων ἐν τῷ περὶ τὴν γῆν κόσμῳ τῷ συνεχεῖ ταῖς φοραῖς εἴρηται, περί τε τῆς διαδρομῆς τῶν ἄστρων καὶ τῆς ἐκπιμπραμένης φλογός, ἔτι δὲ περί τε κομητῶν καὶ τοῦ καλουμένου γάλακτος· σχεδὸν γάρ εἰσιν τοσαῦτα τὰ πάθη τὰ φαινόμενα περὶ τὸν τόπον τοῦτον.

περὶ δὲ τοῦ τῇ θέσει μὲν δευτέρου τόπου μετὰ τοῦτον, πρώτου δὲ περὶ τὴν γῆν, λέγωμεν· οὗτος γὰρ κοινὸς ὕδατός τε τόπος καὶ ἀέρος καὶ τῶν συμβαινόντων περὶ τὴν ἄνω γένεσιν αὐτοῦ. ληπτέον δὲ καὶ τούτων τὰς ἀρχὰς καὶ τὰς αἰτίας πάντων ὁμοίως. ἡ μὲν οὖν ὡς κινοῦσα καὶ κυρία καὶ πρώτη τῶν ἀρχῶν ὁ κύκλος ἐστίν, ἐν ᾧ φανερῶς ἡ τοῦ ἡλίου φορὰ διακρίνουσα καὶ συγκρίνουσα τῷ γίγνεσθαι πλησίον ἢ πορρώτερον αἰτία τῆς γενέσεως καὶ τῆς φθορᾶς ἐστι. μενούσης δὲ τῆς γῆς, τὸ περὶ αὐτὴν ὑγρὸν ὑπὸ τῶν ἀκτίνων καὶ ὑπὸ τῆς ἄλλης τῆς ἄνωθεν θερμότητος ἀτμιδούμενον φέρεται ἄνω· τῆς δὲ θερμότητος ἀπολιπούσης τῆς ἀναγούσης αὐτό, καὶ τῆς μὲν διασκεδαννυμένης πρὸς τὸν ἄνω τόπον, τῆς δὲ καὶ σβεννυμένης διὰ τὸ μετεωρίζεσθαι πορρώτερον εἰς τὸν ὑπὲρ τῆς γῆς ἀέρα, συνίσταται πάλιν ἡ ἀτμὶς ψυχομένη διά τε τὴν ἀπόλειψιν τοῦ θερμοῦ καὶ τὸν τόπον, καὶ γίγνεται ὕδωρ ἐξ ἀέρος· γενόμενον δὲ πάλιν φέρεται πρὸς τὴν γῆν. ἔστι δ’ ἡ μὲν ἐξ ὕδατος ἀναθυμίασις ἀτμίς, ἡ δ’ ἐξ ἀέρος εἰς ὕδωρ νέφος· ὁμίχλη δὲ νεφέλης περίττωμα τῆς εἰς ὕδωρ συγκρίσεως. διὸ σημεῖον μᾶλλόν ἐστιν εὐδίας ἢ ὑδάτων· οἷον γάρ ἐστιν ἡ ὁμίχλη νεφέλη ἄγονος. γίγνεται δὲ κύκλος οὗτος μιμούμενος τὸν τοῦ ἡλίου κύκλον· ἅμα γὰρ [347a] ἐκεῖνος εἰς τὰ πλάγια μεταβάλλει καὶ οὗτος ἄνω καὶ κάτω. δεῖ δὲ νοῆσαι τοῦτον ὥσπερ ποταμὸν ῥέοντα κύκλῳ ἄνω καὶ κάτω, κοινὸν ἀέρος καὶ ὕδατος· πλησίον μὲν γὰρ ὄντος τοῦ ἡλίου ὁ τῆς ἀτμίδος ἄνω ῥεῖ ποταμός, ἀφισταμένου δὲ ὁ τοῦ ὕδατος κάτω. καὶ τοῦτ’ ἐνδελεχὲς ἐθέλει γίγνεσθαι κατά γε τὴν τάξιν· ὥστ’ εἴπερ ᾐνίττοντο τὸν ὠκεανὸν οἱ πρότερον, τάχ’ ἂν τοῦτον τὸν ποταμὸν λέγοιεν τὸν κύκλῳ ῥέοντα περὶ τὴν γῆν. ἀναγομένου δὲ τοῦ ὑγροῦ αἰεὶ διὰ τὴν τοῦ θερμοῦ δύναμιν καὶ πάλιν φερομένου κάτω διὰ τὴν ψύξιν πρὸς τὴν γῆν, οἰκείως τὰ ὀνόματα τοῖς πάθεσιν κεῖται καί τισιν διαφοραῖς αὐτῶν· ὅταν μὲν γὰρ κατὰ μικρὰ φέρηται, ψακάδες, ὅταν δὲ κατὰ μείζω μόρια, ὑετὸς καλεῖται.

ἐκ δὲ τοῦ καθ’ ἡμέραν ἀτμίζοντος ὅσον ἂν μὴ μετεωρισθῇ δι’ ὀλιγότητα τοῦ ἀνάγοντος αὐτὸ πυρὸς πρὸς τὸ ἀναγόμενον ὕδωρ, πάλιν καταφερόμενον ὅταν ψυχθῇ νύκτωρ, καλεῖται δρόσος καὶ πάχνη, πάχνη μὲν ὅταν ἡ ἀτμὶς παγῇ πρὶν εἰς ὕδωρ συγκριθῆναι πάλιν (γίγνεται δὲ χειμῶνος, καὶ μᾶλλον ἐν τοῖς χειμερινοῖς τόποις), δρόσος δ’ ὅταν συγκριθῇ εἰς ὕδωρ ἡ ἀτμίς, καὶ μήθ’ οὕτως ἔχῃ ἡ ἀλέα ὥστε ξηρᾶναι τὸ ἀναχθέν, μήθ’ οὕτω ψῦχος ὥστε παγῆναι τὴν ἀτμίδα αὐτὴν διὰ τὸ ἢ τὸν τόπον ἀλεεινότερον ἢ τὴν ὥραν εἶναι· γίγνεται γὰρ μᾶλλον ἡ δρόσος ἐν εὐδίᾳ καὶ ἐν τοῖς εὐδιεινοτέροις τόποις, ἡ δὲ πάχνη, καθάπερ εἴρηται, τοὐναντίον· δῆλον γὰρ ὡς ἡ ἀτμὶς θερμότερον ὕδατος (ἔχει γὰρ τὸ ἀνάγον ἔτι πῦρ), ὥστε πλείονος ψυχρότητος αὐτὴν πῆξαι. γίγνεται δ’ ἄμφω αἰθρίας τε καὶ νηνεμίας· οὔτε γὰρ ἀναχθήσεται μὴ οὔσης αἰθρίας, οὔτε συστῆναι δύναιτ’ ἂν ἀνέμου πνέοντος. σημεῖον δ’ ὅτι γίγνεται ταῦτα διὰ τὸ μὴ πόρρω μετεωρίζεσθαι τὴν ἀτμίδα· ἐν γὰρ τοῖς ὄρεσιν οὐ γίγνεται πάχνη. αἰτία δὲ μία μὲν αὕτη, ὅτι ἀνάγεται ἐκ τῶν κοίλων καὶ ἐφύδρων τόπων, ὥστε καθάπερ φορτίον φέρουσα πλέον ἢ ἀνάγουσα θερμότης ἢ καθ’ ἑαυτὴν οὐ δύναται μετεωρίζειν ἐπὶ πολὺν τόπον αὐτὸ τοῦ ὕψους, ἀλλ’ ἐγγὺς ἀφίησι πάλιν· ἑτέρα δ’ ὅτι καὶ ῥεῖ μάλιστα ὁ ἀὴρ ῥέων ἐν τοῖς ὑψηλοῖς, ὃς διαλύει τὴν σύστασιν τὴν τοιαύτην. γίγνεται δ’ ἡ δρόσος πανταχοῦ νοτίοις, οὐ βορείοις, πλὴν ἐν τῷ Πόντῳ. ἐκεῖ δὲ τοὐναντίον· βορείοις μὲν γὰρ γίγνεται, νοτίοις δ’ οὐ [347b] γίγνεται. αἴτιον δ’ ὁμοίως ὥσπερ ὅτι εὐδίας μὲν γίγνεται, χειμῶνος δ’ οὔ· ὁ μὲν γὰρ νότος εὐδίαν ποιεῖ, ὁ δὲ βορέας χειμῶνα· ψυχρὸς γάρ, ὥστ' ἐκ τοῦ χειμῶνος τῆς ἀναθυμιάσεως σβέννυσι τὴν θερμότητα. ἐν δὲ τῷ Πόντῳ ὁ μὲν νότος οὐχ οὕτως ποιεῖ εὐδίαν ὥστε γίγνεσθαι ἀτμίδα, ὁ δὲ βορέας διὰ τὴν ψυχρότητα ἀντιπεριιστὰς τὸ θερμὸν [347b.7] ἀθροίζει, ὥστε πλέον ἀτμίζει μᾶλλον. πολλάκις δὲ τοῦτο καὶ ἐν τοῖς ἔξω τόποις ἰδεῖν γιγνόμενον ἔστιν· ἀτμίζει γὰρ τὰ φρέατα βορείοις μᾶλλον ἢ νοτίοις· ἀλλὰ τὰ μὲν βόρεια σβέννυσιν πρὶν συστῆναί τι πλῆθος, ἐν δὲ τοῖς νοτίοις ἐᾶται ἀθροίζεσθαι ἡ ἀναθυμίασις. αὐτὸ δὲ τὸ ὕδωρ οὐ πήγνυται, καθάπερ ἐν τῷ περὶ τὰ νέφη τόπῳ. ἐκεῖθεν γὰρ τρία φοιτᾷ σώματα συνιστάμενα διὰ τὴν ψύξιν, ὕδωρ καὶ χιὼν καὶ χάλαζα. τούτων δὲ τὰ μὲν δύο ἀνάλογον καὶ διὰ τὰς αὐτὰς αἰτίας γίγνεται τοῖς κάτω, διαφέροντα τῷ μᾶλλον καὶ ἧττον καὶ πλήθει καὶ ὀλιγότητι· χιὼν γὰρ καὶ πάχνη ταὐτόν, καὶ ὑετὸς καὶ δρόσος, ἀλλὰ τὸ μὲν πολὺ τὸ δ' ὀλίγον. ὁ μὲν γὰρ ὑετὸς ἐκ πολλῆς ἀτμίδος γίγνεται ψυχομένης· τούτου δ' αἴτιον ὅ τε τόπος πολὺς καὶ ὁ χρόνος ὤν, ἐν ᾧ συλλέγεται καὶ ἐξ οὗ. τὸ δ' ὀλίγον ἡ δρόσος· ἐφήμερος γὰρ ἡ σύστασις καὶ ὁ τόπος μικρός· δηλοῖ τε ἥ τε γένεσις οὖσα ταχεῖα καὶ βραχὺ τὸ πλῆθος. ὁμοίως δὲ καὶ πάχνη καὶ χιών· ὅταν γὰρ παγῇ τὸ νέφος, χιών ἐστιν, ὅταν δ' ἡ ἀτμίς, πάχνη. διὸ ἢ ὥρας ἢ χώρας ἐστὶν σημεῖον ψυχρᾶς· οὐ γὰρ ἂν ἐπήγνυτο ἔτι πολλῆς ἐνούσης θερμότητος, εἰ μὴ ἐπεκράτει τὸ ψῦχος· ἐν γὰρ τῷ νέφει ἔτι ἔνεστιν πολὺ θερμὸν τὸ ὑπόλοιπον τοῦ ἐξατμίσαντος ἐκ τῆς γῆς τὸ ὑγρὸν πυρός. χάλαζα δ' ἐκεῖ μὲν γίγνεται, ἐν δὲ τῷ πλησίον τῆς γῆς ἀτμίζοντι τοῦτ' ἐκλείπει· καθάπερ γὰρ εἴπομεν, ὡς μὲν ἐκεῖ χιών, ἐνταῦθα γίγνεται πάχνη, ὡς δ' ἐκεῖ ὑετός, ἐνταῦθα δρόσος· ὡς δ' ἐκεῖ χάλαζα, ἐνταῦθα οὐκ ἀνταποδίδωσι τὸ ὅμοιον. τὸ δ' αἴτιον εἰποῦσι περὶ χαλάζης ἔσται δῆλον.

δεῖ δὲ λαβεῖν ἅμα καὶ τὰ συμβαίνοντα περὶ τὴν γένεσιν αὐτῆς, τά τε μὴ πλανῶντα καὶ τὰ δοκοῦντ' εἶναι παράλογα. ἔστι μὲν γὰρ ἡ χάλαζα κρύσταλλος, πήγνυται δὲ τὸ ὕδωρ τοῦ χειμῶνος· αἱ δὲ χάλαζαι γίγνονται ἔαρος μὲν [348a] καὶ μετοπώρου μάλιστα, εἶτα δὲ καὶ τῆς ὀπώρας, χειμῶνος δ' ὀλιγάκις, καὶ ὅταν ἧττον ᾖ ψῦχος. καὶ ὅλως δὲ γίγνονται χάλαζαι μὲν ἐν τοῖς εὐδιεινοτέροις τόποις, αἱ δὲ χιόνες ἐν τοῖς ψυχροτέροις. ἄτοπον δὲ καὶ τὸ πήγνυσθαι ὕδωρ ἐν τῷ ἄνω τόπῳ· οὔτε γὰρ παγῆναι δυνατὸν πρὶν γενέσθαι ὕδωρ, οὔτε τὸ ὕδωρ οὐδένα χρόνον οἷόν τε μένειν μετέωρον ὄν. ἀλλὰ μὴν οὐδ' ὥσπερ αἱ ψακάδες ἄνω μὲν ὀχοῦνται διὰ μικρότητα, ἐνδιατρίψασαι δ' ἐπὶ τοῦ ἀέρος, ὥσπερ καὶ ἐπὶ τοῦ ὕδατος γῆ καὶ χρυσὸς διὰ μικρομέρειαν πολλάκις ἐπιπλέουσιν, οὕτως ἐπὶ τοῦ ἀέρος τὸ ὕδωρ, συνελθόντων δὲ πολλῶν μικρῶν μεγάλαι καταφέρονται ψακάδες· τοῦτο γὰρ οὐκ ἐνδέχεται γενέσθαι ἐπὶ τῆς χαλάζης· οὐ γὰρ συμφύεται τὰ πεπηγότα ὥσπερ τὰ ὑγρά. δῆλον οὖν ὅτι ἄνω τοσοῦτον ὕδωρ ἔμεινεν· οὐ γὰρ ἂν ἐπάγη τοσοῦτον. τοῖς μὲν οὖν δοκεῖ τοῦ πάθους αἴτιον εἶναι τούτου καὶ τῆς γενέσεως, ὅταν ἀπωσθῇ τὸ νέφος εἰς τὸν ἄνω τόπον μᾶλλον ὄντα ψυχρὸν διὰ τὸ λήγειν ἐκεῖ τὰς ἀπὸ τῆς γῆς τῶν ἀκτίνων ἀνακλάσεις, ἐλθὸν δ' ἐκεῖ πήγνυσθαι τὸ ὕδωρ· διὸ καὶ θέρους μᾶλλον καὶ ἐν ταῖς ἀλεειναῖς χώραις γίγνεσθαι τὰς χαλάζας, ὅτι ἐπὶ πλέον τὸ θερμὸν ἀνωθεῖ ἀπὸ τῆς γῆς τὰς νεφέλας. συμβαίνει δ' ἐν τοῖς σφόδρα ὑψηλοῖς ἥκιστα γίγνεσθαι χάλαζαν· καίτοι ἔδει, ὥσπερ καὶ τὴν χιόνα ὁρῶμεν ἐπὶ τοῖς ὑψηλοῖς μάλιστα γιγνομένην. ἔτι δὲ πολλάκις ὦπται νέφη φερόμενα σὺν ψόφῳ πολλῷ παρ' αὐτὴν τὴν γῆν, ὥστε φοβερὸν εἶναι τοῖς ἀκούουσιν καὶ ὁρῶσιν ὡς ἐσομένου τινὸς μείζονος. ὁτὲ δὲ καὶ ἄνευ ψόφου τοιούτων ὀφθέντων νεφῶν χάλαζα γίγνεται πολλὴ καὶ τὸ μέγεθος ἄπιστος, καὶ τοῖς σχήμασιν οὐ στρογγύλη, διὰ τὸ μὴ πολὺν χρόνον γίγνεσθαι τὴν φορὰν αὐτῆς ὡς πλησίον τῆς πήξεως γενομένης τῆς γῆς, ἀλλ' οὐχ ὥσπερ ἐκεῖνοί φασιν. ἀλλὰ μὴν ἀναγκαῖον ὑπὸ τοῦ μάλιστ' αἰτίου τῆς πήξεως μεγάλας γίγνεσθαι χαλάζας· κρύσταλλος γὰρ ἡ χάλαζα, καὶ τοῦτο παντὶ δῆλον. μεγάλαι δ' εἰσὶν αἱ τοῖς σχήμασιν μὴ στρογγύλαι. τοῦτο δ' ἐστὶ σημεῖον τοῦ παγῆναι πλησίον τῆς γῆς· αἱ γὰρ φερόμεναι πόρρωθεν διὰ τὸ φέρεσθαι μακρὰν περιθραυόμεναι γίγνονταί τό τε σχῆμα περιφερεῖς καὶ τὸ μέγεθος ἐλάττους. ὅτι μὲν [348b] οὖν οὐ τῷ ἀπωθεῖσθαι εἰς τὸν ἄνω τόπον τὸν ψυχρὸν ἡ πῆξις συμβαίνει, δῆλον· ἀλλ' ἐπειδὴ ὁρῶμεν ὅτι γίγνεται ἀντιπερίστασις τῷ θερμῷ καὶ ψυχρῷ ἀλλήλοις (διὸ ἔν τε ταῖς ἀλέαις ψυχρὰ τὰ κάτω τῆς γῆς καὶ ἀλεεινὰ ἐν τοῖς πάγοις), τοῦτο δεῖ νομίζειν καὶ ἐν τῷ ἄνω γίγνεσθαι τόπῳ, ὥστ' ἐν ταῖς ἀλεεινοτέραις ὥραις ἀντιπεριιστάμενον εἴσω τὸ ψυχρὸν διὰ τὴν κύκλῳ θερμότητα ὁτὲ μὲν ταχὺ ὕδωρ ἐκ νέφους ποιεῖ· διὸ καὶ αἱ ψακάδες πολὺ μείζους ἐν ταῖς ἀλεειναῖς γίγνονται ἡμέραις ἢ ἐν τῷ χειμῶνι, καὶ ὕδατα λαβρότερα· λαβρότερα μὲν γὰρ λέγεται ὅταν ἀθροώτερα, ἀθροώτερα δὲ διὰ τὸ τάχος τῆς πυκνώσεως. (τοῦτο δὲ γίγνεται αὐτὸ τοὐναντίον ἢ ὡς Ἀναξαγόρας λέγει· ὁ μὲν γὰρ ὅταν εἰς τὸν ψυχρὸν ἀέρα ἐπανέλθῃ φησὶ τοῦτο πάσχειν, ἡμεῖς δ' ὅταν εἰς τὸν θερμὸν κατέλθῃ, καὶ μάλιστα ὅταν μάλιστα.) ὅταν δ' ἔτι μᾶλλον ἀντιπεριστῇ ἐντὸς τὸ ψυχρὸν ὑπὸ τοῦ ἔξω θερμοῦ, ὕδωρ ποιῆσαν ἔπηξεν καὶ γίγνεται χάλαζα. συμβαίνει δὲ τοῦτο ὅταν θᾶττον ᾖ ἡ πῆξις ἢ ἡ τοῦ ὕδατος φορὰ ἡ κάτω· εἰ γὰρ φέρεται μὲν ἐν τοσῷδε χρόνῳ, ἡ δὲ ψυχρότης σφοδρὰ οὖσα ἐν ἐλάττονι ἔπηξεν, οὐδὲν κωλύει μετέωρον παγῆναι, ἐὰν ἡ πῆξις ἐν ἐλάττονι γίγνηται χρόνῳ τῆς κάτω φορᾶς. καὶ ὅσῳ δ' ἂν ἐγγύτερον καὶ ἀθροωτέρα γένηται ἡ πῆξις, τά τε ὕδατα λαβρότερα γίγνεται καὶ αἱ ψακάδες καὶ αἱ χάλαζαι μείζους διὰ τὸ βραχὺν φέρεσθαι τόπον. καὶ οὐ πυκναὶ αἱ ψακάδες αἱ μεγάλαι πίπτουσιν διὰ τὴν αὐτὴν αἰτίαν. ἧττον δὲ τοῦ θέρους γίγνεται ἢ ἔαρος καὶ μετοπώρου, μᾶλλον μέντοι ἢ χειμῶνος, ὅτι ξηρότερος ὁ ἀὴρ τοῦ θέρους· ἐν δὲ τῷ ἔαρι ἔτι ὑγρός, ἐν δὲ τῷ μετοπώρῳ ἤδη ὑγραίνεται. γίγνονται δέ ποτε, καθάπερ εἴρηται, καὶ τῆς ὀπώρας χάλαζαι διὰ τὴν αὐτὴν αἰτίαν. συμβάλλεται δ' ἔτι πρὸς τὴν ταχυτῆτα τῆς πήξεως καὶ τὸ προτεθερμάνθαι τὸ ὕδωρ· θᾶττον γὰρ ψύχεται. διὸ πολλοὶ ὅταν τὸ ὕδωρ ψῦξαι ταχὺ βουληθῶσιν, εἰς τὸν ἥλιον τιθέασι πρῶτον, καὶ οἱ περὶ τὸν Πόντον ὅταν ἐπὶ τοῦ κρυστάλλου σκηνοποιῶνται πρὸς τὰς τῶν ἰχθύων θήρας (θηρεύουσι γὰρ διακόπτοντες τὸν κρύσταλλον), ὕδωρ θερμὸν [349a] περιχέουσι τοῖς καλάμοις διὰ τὸ θᾶττον πήγνυσθαι· χρῶνται γὰρ τῷ κρυστάλλῳ ὥσπερ τῷ μολύβδῳ, ἵν' ἠρεμῶσιν οἱ κάλαμοι. θερμὸν δὲ γίγνεται ταχὺ τὸ συνιστάμενον ὕδωρ ἔν τε ταῖς χώραις καὶ ταῖς ὥραις ταῖς ἀλεειναῖς. γίγνεται δὲ καὶ περὶ τὴν Ἀραβίαν καὶ τὴν Αἰθιοπίαν τοῦ θέρους τὰ ὕδατα καὶ οὐ τοῦ χειμῶνος, καὶ ταῦτα ῥαγδαῖα, καὶ τῆς αὐτῆς ἡμέρας πολλάκις, διὰ τὴν αὐτὴν αἰτίαν· ταχὺ γὰρ ψύχεται τῇ ἀντιπεριστάσει, ἣ γίγνεται διὰ τὸ ἀλεεινὴν εἶναι τὴν χώραν ἰσχυρῶς. περὶ μὲν οὖν ὑετοῦ καὶ δρόσου καὶ νιφετοῦ καὶ πάχνης καὶ χαλάζης, διὰ τίν' αἰτίαν γίγνεται καὶ τίς ἡ φύσις αὐτῶν ἐστιν, εἰρήσθω τοσαῦτα.

περὶ δὲ ἀνέμων καὶ πάντων πνευμάτων, ἔτι δὲ ποταμῶν καὶ θαλάττης λέγωμεν, πρῶτον καὶ περὶ τούτων διαπορήσαντες πρὸς ἡμᾶς αὐτούς· ὥσπερ γὰρ καὶ περὶ ἄλλων, οὕτως καὶ περὶ τούτων οὐδὲν παρειλήφαμεν λεγόμενον τοιοῦτον ὃ μὴ κἂν ὁ τυχὼν εἴπειεν. εἰσὶ δέ τινες οἵ φασι τὸν καλούμενον ἀέρα κινούμενον μὲν καὶ ῥέοντα ἄνεμον εἶναι, [349a.18] συνιστάμενον δὲ τὸν αὐτὸν τοῦτον πάλιν νέφος καὶ ὕδωρ, ὡς τῆς αὐτῆς φύσεως οὔσης ὕδατος καὶ πνεύματος, καὶ τὸν ἄνεμον εἶναι κίνησιν ἀέρος. διὸ καὶ τῶν σοφῶς βουλομένων λέγειν τινὲς ἕνα φασὶν ἄνεμον εἶναι πάντας τοὺς ἀνέμους, ὅτι συμπέπτωκε καὶ τὸν ἀέρα τὸν κινούμενον ἕνα καὶ τὸν αὐτὸν εἶναι πάντα, δοκεῖν δὲ διαφέρειν οὐδὲν διαφέροντα διὰ τοὺς τόπους ὅθεν ἂν τυγχάνῃ ῥέων ἑκάστοτε, παραπλησίως λέγοντες ὥσπερ ἂν εἴ τις οἴοιτο καὶ τοὺς ποταμοὺς πάντας ἕνα ποταμὸν εἶναι. διὸ βέλτιον οἱ πολλοὶ λέγουσιν ἄνευ ζητήσεως τῶν μετὰ ζητήσεως οὕτω λεγόντων· εἰ μὲν γὰρ ἐκ μιᾶς ἀρχῆς ἅπαντες ῥέουσι, κἀκεῖ τὰ πνεύματα τὸν αὐτὸν τρόπον, τάχα λέγοιεν ἄν τι οἱ λέγοντες οὕτως· εἰ δ' ὁμοίως ἐνταῦθα κἀκεῖ, δῆλον ὅτι τὸ κόμψευμα ἂν εἴη τοῦτο ψεῦδος, ἐπεὶ τοῦτό γε προσήκουσαν ἔχει σκέψιν, τί τ' ἐστὶν ὁ ἄνεμος, καὶ γίγνεται πῶς, καὶ τί τὸ κινοῦν, καὶ ἡ ἀρχὴ πόθεν αὐτῶν, καὶ πότερον ἄρ' ὥσπερ ἐξ ἀγγείου δεῖ λαβεῖν ῥέοντα τὸν ἄνεμον, καὶ μέχρι τούτου ῥεῖν ἕως ἂν κενωθῇ τὸ ἀγγεῖον, οἷον ἐξ ἀσκῶν ἀφιέμενον, [349b] ἢ καθάπερ καὶ οἱ γραφεῖς γράφουσιν, ἐξ αὐτῶν τὴν ἀρχὴν ἀφιέντας. ὁμοίως δὲ καὶ περὶ τῆς τῶν ποταμῶν γενέσεως δοκεῖ τισιν ἔχειν· τὸ γὰρ ἀναχθὲν ὑπὸ τοῦ ἡλίου ὕδωρ πάλιν ὑόμενον ἀθροισθὲν ὑπὸ γῆν ῥεῖν ἐκ κοιλίας μεγάλης, ἢ πάντας μιᾶς ἢ ἄλλον ἄλλης· καὶ οὐ γίγνεσθαι ὕδωρ οὐδέν, ἀλλὰ τὸ συλλεχθὲν ἐκ τοῦ χειμῶνος εἰς τὰς τοιαύτας ὑποδοχάς, τοῦτο γίγνεσθαι τὸ πλῆθος τὸ τῶν ποταμῶν. διὸ καὶ μείζους ἀεὶ τοῦ χειμῶνος ῥεῖν ἢ τοῦ θέρους, καὶ τοὺς μὲν ἀενάους εἶναι τοὺς δ’ οὐκ ἀενάους· ὅσων μὲν γὰρ διὰ τὸ μέγεθος τῆς κοιλίας πολὺ τὸ συλλεγόμενον ὕδωρ ἐστίν, ὥστε διαρκεῖν καὶ μὴ προαναλίσκεσθαι πρὶν ἐπελθεῖν τὸ ὄμβριον ἐν τῷ χειμῶνι πάλιν, τούτους μὲν ἀενάους εἶναι διὰ τέλους, ὅσοις δὲ ἐλάττους αἱ ὑποδοχαί, τούτους δὲ δι’ ὀλιγότητα τοῦ ὕδατος φθάνειν ξηραινομένους πρὶν ἐπελθεῖν τὸ ἐκ τοῦ οὐρανοῦ, κενουμένου τοῦ ἀγγείου. καίτοι φανερόν, εἴ τις βούλεται ποιήσας οἷον ὑποδοχὴν πρὸ ὀμμάτων τῷ καθ’ ἡμέραν ὕδατι ῥέοντι συνεχῶς νοῆσαι τὸ πλῆθος· ὑπερβάλλοι γὰρ ἂν τῷ μεγέθει τὸν τῆς γῆς ὄγκον ἢ οὐ πολὺ ἂν ἐλλείποι τὸ δεχόμενον πᾶν τὸ ῥέον ὕδωρ εἰς τὸν ἐνιαυτόν. ἀλλὰ δῆλον ὅτι συμβαίνει μὲν καὶ πολλὰ τοιαῦτα πολλαχοῦ τῆς γῆς, οὐ μὴν ἀλλ’ ἄτοπον εἴ τις μὴ νομίζει διὰ τὴν αὐτὴν αἰτίαν ὕδωρ ἐξ ἀέρος γίγνεσθαι δι’ ἥνπερ ὑπὲρ γῆς καὶ ἐν τῇ γῇ. ὥστ’ εἴπερ κἀκεῖ διὰ ψυχρότητα συνίσταται ὁ ἀτμίζων ἀὴρ εἰς ὕδωρ, καὶ ὑπὸ τῆς ἐν τῇ γῇ ψυχρότητος τὸ αὐτὸ τοῦτο δεῖ νομίζειν συμβαίνειν, καὶ γίγνεσθαι μὴ μόνον τὸ ἀποκεκριμένον ὕδωρ ἐν αὐτῇ, καὶ τοῦτο ῥεῖν, ἀλλὰ καὶ γίγνεσθαι συνεχῶς. ἔτι δὲ τοῦ μὴ γιγνομένου ἀλλ’ ὑπάρχοντος ὕδατος καθ’ ἡμέραν μὴ τοιαύτην εἶναι τὴν ἀρχὴν τῶν ποταμῶν, οἷον ὑπὸ γῆν λίμνας τινὰς ἀποκεκριμένας, καθάπερ ἔνιοι λέγουσιν, ἀλλ’ ὁμοίως ὥσπερ καὶ ἐν τῷ ὑπὲρ γῆς τόπῳ μικραὶ συνιστάμεναι ῥανίδες, καὶ πάλιν αὗται ἑτέραις, τέλος μετὰ πλήθους καταβαίνει τὸ ὑόμενον ὕδωρ, οὕτω καὶ ἐν τῇ γῇ ἐκ μικρῶν συλλείβεσθαι τὸ πρῶτον καὶ εἶναι οἷον πιδώσης εἰς ἓν τῆς γῆς τὰς ἀρχὰς τῶν ποταμῶν. δηλοῖ δ’ αὐτὸ τὸ ἔργον· οἱ γὰρ τὰς ὑδραγωγίας [350a] ποιοῦντες ὑπονόμοις καὶ διώρυξι συνάγουσιν, ὥσπερ ἂν ἱδιούσης τῆς γῆς ἀπὸ τῶν ὑψηλῶν. διὸ καὶ τὰ ῥεύματα τῶν ποταμῶν ἐκ τῶν ὀρῶν φαίνεται ῥέοντα, καὶ πλεῖστοι καὶ μέγιστοι ποταμοὶ ῥέουσιν ἐκ τῶν μεγίστων ὀρῶν. ὁμοίως δὲ καὶ αἱ κρῆναι αἱ πλεῖσται ὄρεσιν καὶ τόποις ὑψηλοῖς γειτνιῶσιν· ἐν δὲ τοῖς πεδίοις ἄνευ ποταμῶν ὀλίγαι γίγνονται πάμπαν. οἱ γὰρ ὀρεινοὶ καὶ ὑψηλοὶ τόποι, οἷον σπόγγος πυκνὸς ἐπικρεμάμενοι, κατὰ μικρὰ μὲν πολλαχῇ δὲ διαπιδῶσι καὶ συλλείβουσι τὸ ὕδωρ· δέχονταί τε γὰρ τοῦ κατιόντος ὕδατος πολὺ πλῆθος (τί γὰρ διαφέρει κοίλην καὶ ὑπτίαν ἢ πρηνῆ τὴν περιφέρειαν εἶναι καὶ κυρτήν; ἀμφοτέρως γὰρ τὸν ἴσον ὄγκον περιλήψεται σώματος) καὶ τὴν ἀνιοῦσαν ἀτμίδα ψύχουσι καὶ συγκρίνουσι πάλιν εἰς ὕδωρ· διό, καθάπερ εἴπομεν, οἱ μέγιστοι τῶν ποταμῶν ἐκ τῶν μεγίστων φαίνονται ῥέοντες ὀρῶν. δῆλον δ’ ἐστὶ τοῦτο θεωμένοις τὰς τῆς γῆς περιόδους· ταύτας γὰρ ἐκ τοῦ πυνθάνεσθαι παρ’ ἑκάστων οὕτως ἀνέγραψαν, ὅσων μὴ συμβέβηκεν αὐτόπτας γενέσθαι τοὺς λέγοντας. ἐν μὲν οὖν τῇ Ἀσίᾳ πλεῖστοι μὲν ἐκ τοῦ Παρνασσοῦ καλουμένου φαίνονται ῥέοντες ὄρους καὶ μέγιστοι ποταμοί, τοῦτο δ’ ὁμολογεῖται πάντων εἶναι μέγιστον τὸ ὄρος τῶν πρὸς τὴν ἕω τὴν χειμερινήν· ὑπερβάντι γὰρ ἤδη τοῦτο φαίνεται ἡ ἔξω θάλαττα, ἧς τὸ πέρας οὐ δῆλον τοῖς ἐντεῦθεν. ἐκ μὲν οὖν τούτου ῥέουσιν ἄλλοι τε ποταμοὶ καὶ ὁ Βάκτρος καὶ ὁ Χοάσπης καὶ ὁ Ἀράξης· τούτου δ’ ὁ Τάναϊς ἀποσχίζεται μέρος ὢν εἰς τὴν Μαιῶτιν λίμνην. ῥεῖ δὲ καὶ ὁ Ἰνδὸς ἐξ αὐτοῦ, πάντων τῶν ποταμῶν ῥεῦμα πλεῖστον. ἐκ δὲ τοῦ Καυκάσου ἄλλοι τε ῥέουσι πολλοὶ καὶ κατὰ πλῆθος καὶ κατὰ μέγεθος ὑπερβάλλοντες, καὶ ὁ Φᾶσις· ὁ δὲ Καύκασος μέγιστον ὄρος τῶν πρὸς τὴν ἕω τὴν θερινήν ἐστιν καὶ πλήθει καὶ ὕψει. σημεῖα δὲ τοῦ μὲν ὕψους ὅτι ὁρᾶται καὶ ἀπὸ τῶν καλουμένων βαθέων καὶ εἰς τὴν λίμνην εἰσπλεόντων, ἔτι δ’ ἡλιοῦται τῆς νυκτὸς αὐτοῦ τὰ ἄκρα μέχρι τοῦ τρίτου μέρους ἀπό τε τῆς ἕω καὶ πάλιν ἀπὸ τῆς ἑσπέρας· τοῦ δὲ πλήθους ὅτι πολλὰς ἔχον ἕδρας, ἐν αἷς ἔθνη τε κατοικεῖ πολλὰ καὶ λίμνας εἶναί φασι μεγάλας, ἀλλ’ ὅμως πάσας τὰς ἕδρας εἶναί φασι φανερὰς μέχρι τῆς ἐσχάτης κορυφῆς. ἐκ δὲ [350b] τῆς Πυρήνης (τοῦτο δ’ ἐστὶν ὄρος πρὸς δυσμὴν ἰσημερινὴν ἐν τῇ Κελτικῇ) ῥέουσιν ὅ τε Ἴστρος καὶ ὁ Ταρτησσός. οὗτος μὲν οὖν ἔξω στηλῶν, ὁ δ’ Ἴστρος δι’ ὅλης τῆς Εὐρώπης εἰς τὸν Εὔξεινον πόντον. τῶν δ’ ἄλλων ποταμῶν οἱ πλεῖστοι πρὸς ἄρκτον ἐκ τῶν ὀρῶν τῶν Ἀρκυνίων· ταῦτα δὲ καὶ ὕψει καὶ πλήθει μέγιστα περὶ τὸν τόπον τοῦτόν ἐστιν. ὑπ’ αὐτὴν δὲ τὴν ἄρκτον ὑπὲρ τῆς ἐσχάτης Σκυθίας αἱ καλούμεναι Ῥῖπαι, περὶ ὧν τοῦ μεγέθους λίαν εἰσὶν οἱ λεγόμενοι λόγοι μυθώδεις· ῥέουσι δ’ οὖν οἱ πλεῖστοι καὶ μέγιστοι μετὰ τὸν Ἴστρον τῶν ἄλλων ποταμῶν ἐντεῦθεν, ὥς φασιν. ὁμοίως δὲ καὶ περὶ τὴν Λιβύην οἱ μὲν ἐκ τῶν Αἰθιοπικῶν ὀρῶν, ὅ τε Αἰγὼν καὶ ὁ Νύσης, οἱ δὲ μέγιστοι τῶν διωνομασμένων, ὅ τε Χρεμέτης καλούμενος, ὃς εἰς τὴν ἔξω ῥεῖ θάλατταν, καὶ τοῦ Νείλου τὸ ῥεῦμα τὸ πρῶτον, ἐκ τοῦ Ἀργυροῦ καλουμένου ὄρους. τῶν δὲ περὶ τὸν Ἑλληνικὸν τόπον ὁ μὲν Ἀχελῷος ἐκ Πίνδου, καὶ ὁ Ἴναχος ἐντεῦθεν, ὁ δὲ Στρυμὼν καὶ Νέσσος καὶ ὁ Ἕβρος ἅπαντες τρεῖς ὄντες ἐκ τοῦ Σκόμβρου· πολλὰ δὲ ῥεύματα καὶ ἐκ τῆς Ῥοδόπης ἐστίν. ὁμοίως δὲ καὶ τοὺς ἄλλους ποταμοὺς εὕροι τις ἂν ῥέοντας· ἀλλὰ μαρτυρίου χάριν τούτους εἴπομεν· ἐπεὶ καὶ ὅσοι αὐτῶν ῥέουσιν ἐξ ἑλῶν, τὰ ἕλη ὑπὸ ὄρη κεῖσθαι συμβαίνει πάντα σχεδὸν ἢ τόπους ὑψηλοὺς ἐκ προσαγωγῆς. ὅτι μὲν οὖν οὐ δεῖ νομίζειν οὕτω γίγνεσθαι τὰς ἀρχὰς τῶν ποταμῶν ὡς ἐξ ἀφωρισμένων κοιλιῶν, φανερόν· οὔτε γὰρ ἂν ὁ τόπος ἱκανὸς ἦν ὁ τῆς γῆς ὡς εἰπεῖν, ὥσπερ οὐδ' ὁ τῶν νεφῶν, εἰ τὸ ὂν ἔδει ῥεῖν μόνον, ἀλλὰ μὴ τὸ μὲν ἀπῄει τὸ δ' ἐγίγνετο, ἀλλ' αἰεὶ ἀπὸ ὄντος ἐταμιεύετο· τό τε ὑπὸ τοῖς ὄρεσιν ἔχειν τὰς [350b.28] πηγὰς μαρτυρεῖ διότι τῷ συρρεῖν εἰς ὀλίγον καὶ κατὰ μικρὸν ἐκ πολλῶν νοτίδων διαδίδωσιν ὁ τόπος καὶ γίγνονται οὕτως αἱ πηγαὶ τῶν ποταμῶν. οὐ μὴν ἀλλὰ καὶ τοιούτους εἶναι τόπους ἔχοντας πλῆθος ὕδατος, οἷον λίμνας, οὐδὲν ἄτοπον, πλὴν οὔτι τηλικαύτας ὥστε τοῦτο συμβαίνειν, οὐδὲν μᾶλλον ἢ εἴ τις οἴοιτο τὰς φανερὰς εἶναι πηγὰς τῶν ποταμῶν· σχεδὸν γὰρ ἐκ κρηνῶν οἱ πλεῖστοι ῥέουσιν. ὅμοιον οὖν τὸ ἐκείνας καὶ τὸ ταύτας νομίζειν εἶναι τὸ σῶμα τὸ τοῦ ὕδατος πᾶν. ὅτι δ' εἰσὶν τοιαῦται φάραγγες καὶ διαστάσεις τῆς γῆς, [351a] δηλοῦσιν οἱ καταπινόμενοι τῶν ποταμῶν. συμβαίνει δὲ τοῦτο πολλαχοῦ τῆς γῆς, οἷον τῆς μὲν Πελοποννήσου πλεῖστα τοιαῦτα περὶ τὴν Ἀρκαδίαν ἐστίν. αἴτιον δὲ διὰ τὸ ὀρεινὴν οὖσαν μὴ ἔχειν ἐκροὰς ἐκ τῶν κοίλων εἰς θάλατταν· πληρούμενοι γὰρ οἱ τόποι καὶ οὐκ ἔχοντες ἔκρυσιν αὐτοῖς εὑρίσκονται τὴν δίοδον εἰς βάθος, ἀποβιαζομένου τοῦ ἄνωθεν ἐπιόντος ὕδατος. περὶ μὲν οὖν τὴν Ἑλλάδα μικρὰ τοιαῦτα παντελῶς ἐστιν γιγνόμενα· ἀλλ' ἥ γε ὑπὸ τὸν Καύκασον λίμνη, ἣν καλοῦσιν οἱ ἐκεῖ θάλατταν· αὕτη γὰρ ποταμῶν πολλῶν καὶ μεγάλων εἰσβαλλόντων οὐκ ἔχουσα ἔκρουν φανερὸν ἐκδίδωσιν ὑπὸ γῆν κατὰ Κοραξούς, περὶ τὰ καλούμενα βαθέα τοῦ Πόντου· ταῦτα δ' ἐστὶν ἄπειρόν τι τῆς θαλάττης βάθος· οὐδεὶς γοῦν πώποτε καθεὶς ἐδυνήθη πέρας εὑρεῖν. ταύτῃ δὲ πόρρω τῆς γῆς σχεδὸν περὶ τριακόσια στάδια πότιμον ἀναδίδωσιν ὕδωρ ἐπὶ πολὺν τόπον, οὐ συνεχῆ δέ, ἀλλὰ τρισσαχῇ. καὶ περὶ τὴν Λιγυστικὴν οὐκ ἐλάττων τοῦ Ῥοδανοῦ καταπίνεταί τις ποταμός, καὶ πάλιν ἀναδίδωσιν κατ' ἄλλον τόπον· ὁ δὲ Ῥοδανὸς ποταμὸς ναυσιπέρατός ἐστιν.

οὐκ αἰεὶ δ' οἱ αὐτοὶ τόποι τῆς γῆς οὔτ' ἔνυγροί εἰσιν οὔτε ξηροί, ἀλλὰ μεταβάλλουσιν κατὰ τὰς τῶν ποταμῶν γενέσεις καὶ τὰς ἀπολείψεις· διὸ καὶ τὰ περὶ τὴν ἤπειρον μεταβάλλει καὶ τὴν θάλατταν, καὶ οὐκ αἰεὶ τὰ μὲν γῆ τὰ δὲ θάλαττα διατελεῖ πάντα τὸν χρόνον, ἀλλὰ γίγνεται θάλαττα μὲν ὅπου χέρσος, ἔνθα δὲ νῦν θάλαττα, πάλιν ἐνταῦθα γῆ. κατὰ μέντοι τινὰ τάξιν νομίζειν χρὴ ταῦτα γίγνεσθαι καὶ περίοδον. ἀρχὴ δὲ τούτων καὶ αἴτιον ὅτι καὶ τῆς γῆς τὰ ἐντός, ὥσπερ τὰ σώματα τῶν φυτῶν καὶ ζῴων, ἀκμὴν ἔχει καὶ γῆρας. πλὴν ἐκείνοις μὲν οὐ κατὰ μέρος ταῦτα συμβαίνει πάσχειν, ἀλλ' ἅμα πᾶν ἀκμάζειν καὶ φθίνειν ἀναγκαῖον· τῇ δὲ γῇ τοῦτο γίγνεται κατὰ μέρος διὰ ψύξιν καὶ θερμότητα. ταῦτα μὲν οὖν αὔξεται καὶ φθίνει διὰ τὸν ἥλιον καὶ τὴν περιφοράν, διὰ δὲ ταῦτα καὶ τὴν δύναμιν τὰ μέρη τῆς γῆς λαμβάνει διαφέρουσαν, ὥστε μέχρι τινὸς ἔνυδρα δύναται διαμένειν, εἶτα ξηραίνεται καὶ γηράσκει πάλιν· ἕτεροι δὲ τόποι βιώσκονται καὶ ἔνυδροι γίγνονται κατὰ μέρος. ἀνάγκη δὲ τῶν μὲν τόπων γιγνομένων [351b] ξηροτέρων τὰς πηγὰς ἀφανίζεσθαι, τούτων δὲ συμβαινόντων τοὺς ποταμοὺς πρῶτον μὲν ἐκ μεγάλων μικρούς, εἶτα τέλος γίγνεσθαι ξηρούς, τῶν δὲ ποταμῶν μεθισταμένων καὶ ἔνθεν μὲν ἀφανιζομένων ἐν ἄλλοις δ' ἀνάλογον γιγνομένων μεταβάλλειν τὴν θάλατταν· ὅπου μὲν γὰρ ἐξωθουμένη ὑπὸ τῶν ποταμῶν ἐπλεόναζεν, ἀπιοῦσαν ξηρὰν ποιεῖν ἀναγκαῖον, ὅπου δὲ τοῖς ῥεύμασιν πληθύουσα ἐξηραίνετο προσχουμένη, πάλιν ἐνταῦθα λιμνάζειν. ἀλλὰ διὰ τὸ γίγνεσθαι πᾶσαν τὴν φυσικὴν περὶ τὴν γῆν γένεσιν ἐκ προσαγωγῆς καὶ ἐν χρόνοις παμμήκεσι πρὸς τὴν ἡμετέραν ζωήν, λανθάνει ταῦτα γιγνόμενα, καὶ πρότερον ὅλων τῶν ἐθνῶν ἀπώλειαι γίγνονται καὶ φθοραὶ πρὶν μνημονευθῆναι τὴν τούτων μεταβολὴν ἐξ ἀρχῆς εἰς τέλος. μέγισται μὲν οὖν φθοραὶ γίγνονται καὶ τάχισται ἐν τοῖς πολέμοις, ἄλλαι δὲ νόσοις, αἱ δὲ ἀφορίαις, καὶ ταύταις αἱ μὲν μεγάλαι αἱ δὲ κατὰ μικρόν, ὥστε λανθάνουσι τῶν γε τοιούτων ἐθνῶν καὶ αἱ μεταναστάσεις διὰ τὸ τοὺς μὲν λείπειν τὰς χώρας, τοὺς δὲ ὑπομένειν μέχρι τούτου μέχριπερ ἂν μηκέτι δύνηται τρέφειν ἡ χώρα πλῆθος μηδέν. ἀπὸ τῆς πρώτης οὖν ἀπολείψεως εἰς τὴν ὑστέραν εἰκὸς γίγνεσθαι μακροὺς χρόνους, ὥστε μηδένα μνημονεύειν, ἀλλὰ σῳζομένων ἔτι τῶν ὑπομενόντων ἐπιλελῆσθαι διὰ χρόνου πλῆθος. τὸν αὐτὸν δὲ τρόπον χρὴ νομίζειν καὶ τοὺς κατοικισμοὺς λανθάνειν πότε πρῶτον ἐγένοντο τοῖς ἔθνεσιν ἑκάστοις εἰς τὰ μεταβάλλοντα καὶ γιγνόμενα ξηρὰ ἐξ ἑλωδῶν καὶ ἐνύδρων· καὶ γὰρ ἐνταῦθα κατὰ μικρὸν ἐν πολλῷ γίγνεται χρόνῳ ἡ ἐπίδοσις, ὥστε μὴ μνημονεύειν τίνες πρῶτοι καὶ πότε καὶ πῶς ἐχόντων ἦλθον τῶν τόπων, οἷον συμβέβηκεν καὶ τὰ περὶ Αἴγυπτον· καὶ γὰρ οὗτος ἀεὶ ξηρότερος ὁ τόπος φαίνεται γιγνόμενος καὶ πᾶσα ἡ χώρα τοῦ ποταμοῦ πρόσχωσις οὖσα τοῦ Νείλου, διὰ δὲ τὸ κατὰ μικρὸν ξηραινομένων τῶν ἑλῶν τοὺς πλησίον εἰσοικίζεσθαι τὸ τοῦ χρόνου μῆκος ἀφῄρηται τὴν ἀρχήν. φαίνεται οὖν καὶ τὰ στόματα πάντα, πλὴν ἑνὸς τοῦ Κανωβικοῦ, χειροποίητα καὶ οὐ τοῦ ποταμοῦ ὄντα, καὶ τὸ ἀρχαῖον ἡ Αἴγυπτος Θῆβαι καλούμεναι. δηλοῖ δὲ καὶ Ὅμηρος, οὕτως πρόσφατος ὢν ὡς εἰπεῖν πρὸς τὰς τοιαύτας μεταβολάς· ἐκείνου γὰρ τοῦ τόπου [352a] ποιεῖται μνείαν ὡς οὔπω Μέμφιος οὔσης ἢ ὅλως ἢ οὐ τηλικαύτης. τοῦτο δ' εἰκὸς οὕτω συμβαίνειν· οἱ γὰρ κάτωθεν τόποι τῶν ἄνωθεν ὕστερον ᾠκίσθησαν· ἑλώδεις γὰρ ἐπὶ πλείω χρόνον ἀναγκαῖον εἶναι τοὺς ἐγγύτερον τῆς προσχώσεως διὰ τὸ λιμνάζειν ἐν τοῖς ἐσχάτοις ἀεὶ μᾶλλον. μεταβάλλει δὲ τοῦτο καὶ πάλιν εὐθενεῖ· ξηραινόμενοι γὰρ οἱ τόποι ἔρχονται εἰς τὸ καλῶς ἔχειν, οἱ δὲ πρότερον εὐκραεῖς ὑπερξηραινόμενοί ποτε γίγνονται χείρους. ὅπερ συμβέβηκε τῆς Ἑλλάδος καὶ περὶ τὴν Ἀργείων καὶ Μυκηναίων χώραν· ἐπὶ μὲν γὰρ τῶν Τρωικῶν ἡ μὲν Ἀργεία διὰ τὸ ἑλώδης εἶναι ὀλίγους ἐδύνατο τρέφειν, ἡ δὲ Μυκηναία καλῶς εἶχεν (διὸ ἐντιμοτέρα ἦν), νῦν δὲ τοὐναντίον διὰ τὴν προειρημένην αἰτίαν· ἡ μὲν γὰρ ἀργὴ γέγονεν καὶ ξηρὰ πάμπαν, τῆς δὲ τὰ τότε διὰ τὸ λιμνάζειν ἀργὰ νῦν χρήσιμα γέγονεν. ὥσπερ οὖν ἐπὶ τούτου τοῦ τόπου συμβέβηκεν ὄντος μικροῦ, ταὐτὸ δεῖ νομίζειν τοῦτο συμβαίνειν καὶ περὶ μεγάλους τόπους καὶ χώρας ὅλας. οἱ μὲν οὖν βλέποντες ἐπὶ μικρὸν αἰτίαν οἴονται τῶν τοιούτων εἶναι παθημάτων τὴν τοῦ ὅλου μεταβολὴν ὡς γιγνομένου τοῦ οὐρανοῦ· διὸ καὶ τὴν θάλατταν ἐλάττω γίγνεσθαί φασιν ὡς ξηραινομένην, ὅτι πλείους φαίνονται τόποι τοῦτο πεπονθότες νῦν ἢ πρότερον. ἔστιν δὲ τούτων τὸ μὲν ἀληθὲς τὸ δ’ οὐκ ἀληθές· πλείους μὲν γάρ εἰσιν οἱ πρότερον ἔνυδροι νῦν δὲ χερσεύοντες, οὐ μὴν ἀλλὰ καὶ τοὐναντίον· πολλαχῇ γὰρ σκοποῦντες εὑρήσουσιν ἐπεληλυθυῖαν τὴν θάλατταν. ἀλλὰ τούτου τὴν αἰτίαν οὐ τὴν τοῦ κόσμου γένεσιν οἴεσθαι χρή· γελοῖον γὰρ διὰ μικρὰς καὶ ἀκαριαίας μεταβολὰς κινεῖν τὸ πᾶν, ὁ δὲ τῆς γῆς ὄγκος καὶ τὸ μέγεθος οὐδέν ἐστι δή που πρὸς τὸν ὅλον οὐρανόν· ἀλλὰ πάντων τούτων αἴτιον ὑποληπτέον ὅτι γίγνεται διὰ χρόνων εἱμαρμένων, οἷον ἐν ταῖς κατ’ ἐνιαυτὸν ὥραις χειμών, οὕτως περιόδου τινὸς μεγάλης μέγας χειμὼν καὶ ὑπερβολὴ ὄμβρων. αὕτη δὲ οὐκ ἀεὶ κατὰ τοὺς αὐτοὺς τόπους, ἀλλ’ ὥσπερ ὁ καλούμενος ἐπὶ Δευκαλίωνος κατακλυσμός· καὶ γὰρ οὗτος περὶ τὸν Ἑλληνικὸν ἐγένετο τόπον μάλιστα, καὶ τούτου περὶ τὴν Ἑλλάδα τὴν ἀρχαίαν. αὕτη δ’ ἐστὶν ἡ περὶ Δωδώνην καὶ τὸν Ἀχελῷον· [352b] οὗτος γὰρ πολλαχοῦ τὸ ῥεῦμα μεταβέβληκεν· ᾤκουν γὰρ οἱ Σελλοὶ ἐνταῦθα καὶ οἱ καλούμενοι τότε μὲν Γραικοὶ νῦν δ’ Ἕλληνες. ὅταν οὖν γένηται τοιαύτη ὑπερβολὴ ὄμβρων, [352b.4] νομίζειν χρὴ ἐπὶ πολὺν χρόνον διαρκεῖν, καὶ ὥσπερ νῦν τοῦ ἀενάους εἶναί τινας τῶν ποταμῶν τοὺς δὲ μὴ οἱ μέν φασιν αἴτιον εἶναι τὸ μέγεθος τῶν ὑπὸ γῆς χασμάτων, ἡμεῖς δὲ τὸ μέγεθος τῶν ὑψηλῶν τόπων καὶ τὴν πυκνότητα καὶ ψυχρότητα αὐτῶν (οὗτοι γὰρ πλεῖστον καὶ δέχονται ὕδωρ καὶ στέγουσιν καὶ ποιοῦσιν· ὅσοις δὲ μικραὶ αἱ ἐπικρεμάμεναι τῶν ὀρῶν συστάσεις ἢ σομφαὶ καὶ λιθώδεις καὶ ἀργιλώδεις, τούτους δὲ προαπολείπειν), οὕτως οἴεσθαι δεῖν τότε, ἐν οἷς ἂν γένηται ἡ τοιαύτη τοῦ ὑγροῦ φορά, οἷον ἀενάους ποιεῖν τὰς ὑγρότητας τῶν τόπων μᾶλλον. τῷ χρόνῳ δὲ ταῦτα ξηραίνεται γιγνόμενα μᾶλλον, θάτερα δ’ ἐλάττω τὰ ἔφυδρα, ἕως ἂν ἔλθῃ πάλιν ἡ καταβολὴ τῆς περιόδου τῆς αὐτῆς. ἐπεὶ δ’ ἀνάγκη τοῦ ὅλου γίγνεσθαι μέν τινα μεταβολήν, μὴ μέντοι γένεσιν καὶ φθοράν, εἴπερ μένει τὸ πᾶν, ἀνάγκη, καθάπερ ἡμεῖς λέγομεν, μὴ τοὺς αὐτοὺς ἀεὶ τόπους ὑγρούς τ’ εἶναι θαλάττῃ καὶ ποταμοῖς καὶ ξηρούς. δηλοῖ δὲ τὸ γιγνόμενον· οὕς γάρ φαμεν ἀρχαιοτάτους εἶναι τῶν ἀνθρώπων Αἰγυπτίους, τούτων ἡ χώρα πᾶσα γεγονυῖα φαίνεται καὶ οὖσα τοῦ ποταμοῦ ἔργον. καὶ τοῦτο κατά τε τὴν χώραν αὐτὴν ὁρῶντι δῆλόν ἐστιν, καὶ τὰ περὶ τὴν ἐρυθρὰν θάλατταν τεκμήριον ἱκανόν· ταύτην γὰρ τῶν βασιλέων τις ἐπειράθη διορύττειν (οὐ γὰρ μικρὰς εἶχεν ἂν αὐτοῖς ὠφελείας πλωτὸς πᾶς ὁ τόπος γενόμενος· λέγεται δὲ πρῶτος Σέσωστρις ἐγχειρῆσαι τῶν παλαιῶν), ἀλλ’ εὗρεν ὑψηλοτέραν οὖσαν τὴν θάλατταν τῆς γῆς· διὸ ἐκεῖνός τε πρότερον καὶ Δαρεῖος ὕστερον ἐπαύσατο διορύττων, ὅπως μὴ διαφθαρῇ τὸ ῥεῦμα τοῦ ποταμοῦ συμμιγείσης τῆς θαλάττης. φανερὸν οὖν ὅτι θάλαττα πάντα μία ταύτῃ συνεχὴς ἦν. διὸ καὶ τὰ περὶ τὴν Λιβύην τὴν Ἀμμωνίαν χώραν ταπεινότερα φαίνεται καὶ κοιλότερα παρὰ λόγον τῆς κάτωθεν χώρας· δῆλον γὰρ ὡς ἐγχώσεως μὲν γενομένης ἐγένοντο λίμναι καὶ χέρσος, χρόνου δὲ γενομένου τὸ ἐναπολειφθὲν καὶ λιμνάσαν ὕδωρ [353a] ξηρανθέν ἐστιν ἤδη φροῦδον. ἀλλὰ μὴν καὶ τὰ περὶ τὴν Μαιῶτιν λίμνην ἐπιδέδωκε τῇ προσχώσει τῶν ποταμῶν τοσοῦτον, ὥστε πολλῷ ἐλάττω μεγέθει πλοῖα νῦν εἰσπλεῖν πρὸς τὴν ἐργασίαν ἢ ἔτος ἑξηκοστόν· ὥστε ἐκ τούτου ῥᾴδιον ἀναλογίσασθαι ὅτι καὶ τὸ πρῶτον, ὥσπερ αἱ πολλαὶ τῶν λιμνῶν, καὶ αὕτη ἔργον ἐστὶ τῶν ποταμῶν, καὶ τὸ τελευταῖον πᾶσαν ἀνάγκη γενέσθαι ξηράν. ἔτι δὲ ὁ Βόσπορος ἀεὶ μὲν ῥεῖ διὰ τὸ προσχοῦσθαι, καὶ ἔστιν ἔτι ταῦτα καὶ τοῖς ὄμμασιν ἰδεῖν ὅν τινα συμβαίνει τρόπον· ὅτε γὰρ ἀπὸ τῆς Ἀσίας ᾐόνα ποιήσειεν ὁ ῥοῦς, τὸ ὄπισθεν λίμνη ἐγίγνετο μικρὰ τὸ πρῶτον, εἶτ’ ἐξηράνθη ἄν, μετὰ δὲ τοῦτο ἄλλη ἡ ἀπὸ ταύτης ᾐών, καὶ λίμνη ἀπὸ ταύτης· καὶ τοῦτο ἀεὶ οὕτως συνέβαινεν ὁμοίως· τούτου δὲ γιγνομένου πολλάκις ἀνάγκη χρόνου προϊόντος ὥσπερ ποταμὸν γενέσθαι, τέλος δὲ καὶ τοῦτον ξηρόν. φανερὸν τοίνυν, ἐπεὶ ὅ τε χρόνος οὐχ ὑπολείψει καὶ τὸ ὅλον ἀίδιον, ὅτι οὔτε ὁ Τάναϊς οὔτε ὁ Νεῖλος ἀεὶ ἔρρει, ἀλλ’ ἦν ποτε ξηρὸς ὁ τόπος ὅθεν ῥέουσιν· τὸ γὰρ ἔργον ἔχει αὐτῶν πέρας, ὁ δὲ χρόνος οὐκ ἔχει. ὁμοίως δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων ἁρμόσει ποταμῶν λέγειν. ἀλλὰ μὴν εἴπερ καὶ οἱ ποταμοὶ γίγνονται καὶ φθείρονται καὶ μὴ ἀεὶ οἱ αὐτοὶ τόποι τῆς γῆς ἔνυδροι, καὶ τὴν θάλατταν ἀνάγκη μεταβάλλειν ὁμοίως. τῆς δὲ θαλάττης τὰ μὲν ἀπολειπούσης τὰ δ’ ἐπιούσης ἀεὶ φανερὸν ὅτι τῆς πάσης γῆς οὐκ ἀεὶ τὰ αὐτὰ τὰ μέν ἐστιν θάλαττα τὰ δ’ ἤπειρος, ἀλλὰ μεταβάλλει τῷ χρόνῳ πάντα. διότι μὲν οὖν οὐκ ἀεὶ ταὐτὰ οὔτε χερσεύει τῆς γῆς οὔτε πλωτά ἐστιν, καὶ διὰ τίν' αἰτίαν ταῦτα συμβαίνει, εἴρηται· ὁμοίως δὲ καὶ διὰ τί οἱ μὲν ἀέναοι οἱ δ' οὒ τῶν ποταμῶν εἰσιν.

Βιβλίο Β'Περὶ δὲ θαλάττης, καὶ τίς ἡ φύσις αὐτῆς, καὶ διὰ τίν' αἰτίαν ἁλμυρὸν τοσοῦτόν ἐστιν ὕδατος πλῆθος, ἔτι δὲ περὶ τῆς ἐξ ἀρχῆς γενέσεως λέγωμεν. οἱ μὲν οὖν ἀρχαῖοι καὶ διατρίβοντες περὶ τὰς θεολογίας ποιοῦσιν αὐτῆς πηγάς, ἵν' [353b] αὐτοῖς ὦσιν ἀρχαὶ καὶ ῥίζαι γῆς καὶ θαλάττης· τραγικώτερον γὰρ οὕτω καὶ σεμνότερον ὑπέλαβον ἴσως εἶναι τὸ λεγόμενον, ὡς μέγα τι τοῦ παντὸς τοῦτο μόριον ὄν· καὶ τὸν λοιπὸν οὐρανὸν ὅλον περὶ τοῦτον συνεστάναι τὸν τόπον καὶ τούτου χάριν ὡς ὄντα τιμιώτατον καὶ ἀρχήν. οἱ δὲ σοφώτεροι τὴν ἀνθρωπίνην σοφίαν ποιοῦσιν αὐτῆς γένεσιν· εἶναι γὰρ τὸ πρῶτον ὑγρὸν ἅπαντα τὸν περὶ τὴν γῆν τόπον, ὑπὸ δὲ τοῦ ἡλίου ξηραινόμενον τὸ μὲν διατμίσαν πνεύματα καὶ τροπὰς ἡλίου καὶ σελήνης φασὶ ποιεῖν, τὸ δὲ λειφθὲν θάλατταν εἶναι· διὸ καὶ ἐλάττω γίγνεσθαι ξηραινομένην οἴονται, καὶ τέλος ἔσεσθαί ποτε πᾶσαν ξηράν. ἔνιοι δ' αὐτῶν θερμαινομένης φασὶν ὑπὸ τοῦ ἡλίου τῆς γῆς οἷον ἱδρῶτα γίγνεσθαι· διὸ καὶ ἁλμυρὰν εἶναι· καὶ γὰρ ὁ ἱδρὼς ἁλμυρός. οἱ δὲ τῆς ἁλμυρότητος αἰτίαν τὴν γῆν εἶναί φασιν· καθάπερ γὰρ τὸ διὰ τῆς τέφρας ἠθούμενον ἁλμυρὸν γίγνεται, τὸν αὐτὸν τρόπον καὶ ταύτην ἁλμυρὰν εἶναι μειχθείσης αὐτῇ τοιαύτης γῆς. ὅτι μὲν οὖν πηγὰς τῆς θαλάττης ἀδύνατον εἶναι, διὰ τῶν ὑπαρχόντων ἤδη θεωρεῖν δεῖ. τῶν γὰρ περὶ τὴν γῆν ὑδάτων τὰ μὲν ῥυτὰ τυγχάνει ὄντα τὰ δὲ στάσιμα. τὰ μὲν οὖν ῥυτὰ πάντα πηγαῖα· περὶ δὲ τῶν πηγῶν εἰρήκαμεν πρότερον ὅτι δεῖ νοεῖν οὐχ ὥσπερ ἐξ ἀγγείου ταμιευόμενον τὴν ἀρχὴν εἶναι πηγήν, ἀλλ' εἰς ἓν ἀεὶ γιγνόμενον καὶ συρρέον ἀπαντᾶν πρώτην. τῶν δὲ στασίμων τὰ μὲν συλλογιμαῖα καὶ ὑποστάσεις, οἷον τὰ τελματιαῖα καὶ ὅσα λιμνώδη, πλήθει καὶ ὀλιγότητι διαφέροντα, τὰ δὲ πηγαῖα. ταῦτα δὲ πάντα χειρόκμητα, λέγω δ' οἷον τὰ φρεατιαῖα καλούμενα· πάντων γὰρ ἀνωτέρω δεῖ τὴν πηγὴν εἶναι τῆς ῥύσεως. διὸ τὰ μὲν αὐτόματα ῥεῖ τὰ κρηναῖα καὶ ποτάμια, ταῦτα δὲ τέχνης προσδεῖται τῆς ἐργασομένης. αἱ μὲν οὖν διαφοραὶ τοσαῦται καὶ τοιαῦται τῶν ὑδάτων εἰσίν· τούτων δ' οὕτω διωρισμένων ἀδύνατον πηγὰς εἶναι τῆς θαλάττης· ἐν οὐδετέρῳ γὰρ τούτων οἷόν τ' εἶναι τῶν γενῶν αὐτήν· οὔτε γὰρ ἀπόρρυτός ἐστιν οὔτε χειροποίητος, τὰ δὲ πηγαῖα πάντα τούτων θάτερον πέπονθεν· αὐτόματον δὲ στάσιμον τοσοῦτον πλῆθος οὐδὲν ὁρῶμεν πηγαῖον γιγνόμενον. ἔτι δ' ἐπεὶ πλείους εἰσὶ [354a] θάλατται πρὸς ἀλλήλας οὐ συμμειγνύουσαι κατ' οὐδένα τόπον, ὧν ἡ μὲν ἐρυθρὰ φαίνεται κατὰ μικρὸν κοινωνοῦσα πρὸς τὴν ἔξω στηλῶν θάλατταν, ἡ δ' Ὑρκανία καὶ Κασπία κεχωρισμέναι τε ταύτης καὶ περιοικούμεναι κύκλῳ, ὥστ' οὐκ ἂν ἐλάνθανον αἱ πηγαί, εἰ κατά τινα τόπον αὐτῶν ἦσαν. ῥέουσα δ’ ἡ θάλαττα φαίνεται κατά τε τὰς στενότητας, εἴ που διὰ τὴν περιέχουσαν γῆν εἰς μικρὸν ἐκ μεγάλου συνάγεται πελάγους, διὰ τὸ ταλαντεύεσθαι δεῦρο κἀκεῖσε πολλάκις. τοῦτο δ’ ἐν μὲν πολλῷ πλήθει θαλάττης ἄδηλον· ᾗ δὲ διὰ τὴν στενότητα τῆς γῆς ὀλίγον ἐπέχει τόπον, ἀναγκαῖον τὴν ἐν τῷ πελάγει μικρὰν ταλάντωσιν ἐκεῖ φαίνεσθαι μεγάλην. ἡ δ’ ἐντὸς Ἡρακλείων στηλῶν ἅπασα κατὰ τὴν τῆς γῆς κοιλότητα ῥεῖ, καὶ τῶν ποταμῶν τὸ πλῆθος· ἡ μὲν γὰρ Μαιῶτις εἰς τὸν Πόντον ῥεῖ, οὗτος δ’ εἰς τὸν Αἰγαῖον. τὰ δ’ ἤδη τούτων ἔξω πελάγη ἧττον ποιεῖ τοῦτ’ ἐπιδήλως. ἐκείνοις δὲ διά τε τὸ τῶν ποταμῶν πλῆθος συμβαίνει τοῦτο (πλείους γὰρ εἰς τὸν Εὔξεινον ῥέουσιν ποταμοὶ καὶ τὴν Μαιῶτιν ἢ τὴν πολλαπλασίαν χώραν αὐτῆς) καὶ διὰ τὴν βραχύτητα τοῦ βάθους· ἀεὶ γὰρ ἔτι βαθυτέρα φαίνεται οὖσα ἡ θάλαττα, καὶ τῆς [354a.20] μὲν Μαιώτιδος ὁ Πόντος, τούτου δ’ ὁ Αἰγαῖος, τοῦ δ’ Αἰγαίου ὁ Σικελικός· ὁ δὲ Σαρδονικὸς καὶ Τυρρηνικὸς βαθύτατοι πάντων. τὰ δ’ ἔξω στηλῶν βραχέα μὲν διὰ τὸν πηλόν, ἄπνοα δ’ ἐστὶν ὡς ἐν κοίλῳ τῆς θαλάττης οὔσης. ὥσπερ οὖν καὶ κατὰ μέρος ἐκ τῶν ὑψηλῶν οἱ ποταμοὶ φαίνονται ῥέοντες, οὕτω καὶ τῆς ὅλης γῆς ἐκ τῶν ὑψηλοτέρων τῶν πρὸς ἄρκτον τὸ ῥεῦμα γίγνεται τὸ πλεῖστον· ὥστε τὰ μὲν διὰ τὴν ἔκχυσιν οὐ βαθέα, τὰ δ’ ἔξω πελάγη βαθέα μᾶλλον. περὶ δὲ τοῦ τὰ πρὸς ἄρκτον εἶναι τῆς γῆς ὑψηλὰ σημεῖόν τι καὶ τὸ πολλοὺς πεισθῆναι τῶν ἀρχαίων μετεωρολόγων τὸν ἥλιον μὴ φέρεσθαι ὑπὸ γῆν ἀλλὰ περὶ τὴν γῆν καὶ τὸν τόπον τοῦτον, ἀφανίζεσθαι δὲ καὶ ποιεῖν νύκτα διὰ τὸ ὑψηλὴν εἶναι πρὸς ἄρκτον τὴν γῆν. ὅτι μὲν οὖν οὔτε πηγὰς οἷόν τ’ εἶναι τῆς θαλάττης, καὶ διὰ τίν’ αἰτίαν οὕτως φαίνεται ῥέουσα, τοιαῦτα καὶ τοσαῦθ’ ἡμῖν εἰρήσθω. [354b] περὶ δὲ τῆς γενέσεως αὐτῆς, εἰ γέγονε, καὶ τοῦ χυμοῦ, τίς ἡ αἰτία τῆς ἁλμυρότητος καὶ πικρότητος, λεκτέον. ἡ μὲν οὖν αἰτία ἡ ποιήσασα τοὺς πρότερον οἴεσθαι τὴν θάλατταν ἀρχὴν εἶναι καὶ σῶμα τοῦ παντὸς ὕδατος ἥδ’ ἐστίν· δόξειε γὰρ ἂν εὔλογον εἶναι, καθάπερ καὶ τῶν ἄλλων στοιχείων ἐστὶν ἠθροισμένος ὄγκος καὶ ἀρχὴ διὰ τὸ πλῆθος, ὅθεν μεταβάλλει τε μεριζόμενον καὶ μείγνυται τοῖς ἄλλοις-οἷον πυρὸς μὲν ἐν τοῖς ἄνω τόποις, ἀέρος δὲ πλῆθος τὸ μετὰ τὸν τοῦ πυρὸς τόπον, γῆς δὲ σῶμα περὶ ὃ ταῦτα πάντα κεῖται φανερῶς· ὥστε δῆλον ὅτι κατὰ τὸν αὐτὸν λόγον καὶ περὶ ὕδατος ἀνάγκη ζητεῖν. τοιοῦτον δ’ οὐδὲν ἄλλο φαίνεται σῶμα κείμενον ἀθρόον, ὥσπερ καὶ τῶν ἄλλων στοιχείων, πλὴν τὸ τῆς θαλάττης μέγεθος· τὸ γὰρ τῶν ποταμῶν οὔτ’ ἀθρόον οὔτε στάσιμον, ἀλλ’ ὡς γιγνόμενον ἀεὶ φαίνεται καθ’ ἡμέραν. ἐκ ταύτης δὴ τῆς ἀπορίας καὶ ἀρχὴ τῶν ὑγρῶν ἔδοξεν εἶναι καὶ τοῦ παντὸς ὕδατος ἡ θάλαττα. διὸ καὶ τοὺς ποταμοὺς οὐ μόνον εἰς ταύτην ἀλλὰ καὶ ἐκ ταύτης φασί τινες ῥεῖν· διηθούμενον γὰρ γίγνεσθαι τὸ ἁλμυρὸν πότιμον. ἀντίκειται δὲ ἑτέρα πρὸς ταύτην τὴν δόξαν ἀπορία, τί δή ποτ’ οὐκ ἔστιν τὸ συνεστὸς ὕδωρ τοῦτο πότιμον, εἴπερ ἀρχὴ τοῦ παντὸς ὕδατος, ἀλλ’ ἁλμυρόν. τὸ δ’ αἴτιον ἅμα ταύτης τε τῆς ἀπορίας λύσις ἔσται, καὶ περὶ θαλάττης τὴν πρώτην λαβεῖν ὑπόληψιν ἀναγκαῖον ὀρθῶς. τοῦ γὰρ ὕδατος περὶ τὴν γῆν περιτεταμένου, καθάπερ περὶ τοῦτο ἡ τοῦ ἀέρος σφαῖρα καὶ περὶ ταύτην ἡ λεγομένη πυρός (τοῦτο γάρ ἐστι πάντων ἔσχατον, εἴθ’ ὡς οἱ πλεῖστοι λέγουσιν εἴθ’ ὡς ἡμεῖς), φερομένου δὲ τοῦ ἡλίου τοῦτον τὸν τρόπον, καὶ διὰ ταῦτα τῆς μεταβολῆς καὶ γενέσεώς τε καὶ φθορᾶς οὔσης, τὸ μὲν λεπτότατον καὶ γλυκύτατον ἀνάγεται καθ’ ἑκάστην ἡμέραν καὶ φέρεται διακρινόμενον καὶ ἀτμίζον εἰς τὸν ἄνω τόπον, ἐκεῖ δὲ πάλιν συστὰν διὰ τὴν ψύξιν καταφέρεται πάλιν πρὸς τὴν γῆν. καὶ τοῦτ’ ἀεὶ βούλεται ποιεῖν ἡ φύσις οὕτως, καθάπερ εἴρηται πρότερον. διὸ καὶ γελοῖοι πάντες ὅσοι τῶν πρότερον ὑπέλαβον τὸν ἥλιον τρέφεσθαι τῷ ὑγρῷ· καὶ διὰ τοῦτ’ ἔνιοί γέ [355a] φασιν καὶ ποιεῖσθαι τὰς τροπὰς αὐτόν· οὐ γὰρ αἰεὶ τοὺς αὐτοὺς δύνασθαι τόπους παρασκευάζειν αὐτῷ τὴν τροφήν· ἀναγκαῖον δ’ εἶναι τοῦτο συμβαίνειν περὶ αὐτὸν ἢ φθείρεσθαι· καὶ γὰρ τὸ φανερὸν πῦρ, ἕως ἂν ἔχῃ τροφήν, μέχρι τούτου ζῆν, τὸ δ’ ὑγρὸν τῷ πυρὶ τροφὴν εἶναι μόνον, -ὥσπερ ἀφικνούμενον μέχρι πρὸς τὸν ἥλιον τὸ ἀναγόμενον τοῦ ὑγροῦ, ἢ τὴν ἄνοδον τοιαύτην οὖσαν οἵανπερ τῇ γιγνομένῃ φλογί, δι’ ἧς τὸ εἰκὸς λαβόντες οὕτω καὶ περὶ τοῦ ἡλίου ὑπέλαβον. τὸ δ’ οὐκ ἔστιν ὅμοιον· ἡ μὲν γὰρ φλὸξ διὰ συνεχοῦς ὑγροῦ καὶ ξηροῦ μεταβαλλόντων γίγνεται καὶ οὐ τρέφεται (οὐ γὰρ ἡ αὐτὴ οὖσα διαμένει οὐδένα χρόνον ὡς εἰπεῖν), περὶ δὲ τὸν ἥλιον ἀδύνατον τοῦτο συμβαίνειν, ἐπεὶ τρεφομένου γε τὸν αὐτὸν τρόπον, ὥσπερ ἐκεῖνοί φασιν, δῆλον ὅτι καὶ ὁ ἥλιος οὐ μόνον καθάπερ Ἡράκλειτός φησιν, νέος ἐφ’ ἡμέρῃ ἐστίν, ἀλλ’ ἀεὶ νέος συνεχῶς. ἔτι δ’ ἡ ὑπὸ τοῦ ἡλίου ἀναγωγὴ τοῦ ὑγροῦ ὁμοία τοῖς θερμαινομένοις ἐστὶν ὕδασιν ὑπὸ πυρός· εἰ οὖν μηδὲ τὸ ὑποκαόμενον τρέφεται πῦρ, οὐδὲ τὸν ἥλιον εἰκὸς ἦν ὑπολαβεῖν, οὐδ’ εἰ πᾶν θερμαίνων ἐξατμίσειεν τὸ ὕδωρ. ἄτοπον δὲ καὶ τὸ μόνον φροντίσαι τοῦ ἡλίου, τῶν δ’ ἄλλων ἄστρων αὐτοὺς παριδεῖν τὴν σωτηρίαν, τοσούτων καὶ τὸ πλῆθος καὶ τὸ μέγεθος ὄντων. τὸ δ’ αὐτὸ συμβαίνει καὶ τούτοις ἄλογον καὶ τοῖς φάσκουσι τὸ πρῶτον ὑγρᾶς οὔσης καὶ τῆς γῆς, καὶ τοῦ κόσμου τοῦ περὶ τὴν γῆν ὑπὸ τοῦ ἡλίου θερμαινομένου, ἀέρα γενέσθαι καὶ τὸν ὅλον οὐρανὸν αὐξηθῆναι, καὶ τοῦτον πνεύματά τε παρέχεσθαι καὶ τὰς τροπὰς αὐτοῦ ποιεῖν· φανερῶς γὰρ ἀεὶ τὸ ἀναχθὲν ὁρῶμεν καταβαῖνον πάλιν ὕδωρ· κἂν μὴ κατ’ ἐνιαυτὸν ἀποδιδῷ καὶ καθ’ ἑκάστην ὁμοίως χώραν, ἀλλ’ ἔν γέ τισιν τεταγμένοις χρόνοις ἀποδίδωσι πᾶν τὸ ληφθέν, ὡς οὔτε τρεφομένων τῶν ἄνωθεν, οὔτε τοῦ μὲν μένοντος ἀέρος ἤδη μετὰ τὴν γένεσιν, τοῦ δὲ γιγνομένου καὶ φθειρομένου πάλιν εἰς ὕδωρ, ἀλλ' ὁμοίως ἅπαντος διαλυομένου καὶ συνισταμένου πάλιν εἰς ὕδωρ. τὸ μὲν οὖν πότιμον καὶ γλυκὺ διὰ κουφότητα πᾶν ἀνάγεται, τὸ δ' ἁλμυρὸν ὑπομένει διὰ βάρος οὐκ ἐν τῷ αὑτοῦ οἰκείῳ τόπῳ· τοῦτο γὰρ οἰητέον ἀπορηθῆναί τε προσηκόντως (ἄλογον γὰρ εἰ μή [355b] τίς ἐστιν τόπος ὕδατος ὥσπερ καὶ τῶν ἄλλων στοιχείων) καὶ ταύτην εἶναι λύσιν· ὃν γὰρ ὁρῶμεν κατέχουσαν τόπον τὴν θάλατταν, οὗτος οὐκ ἔστιν θαλάττης ἀλλὰ μᾶλλον ὕδατος. φαίνεται δὲ θαλάττης, ὅτι τὸ μὲν ἁλμυρὸν ὑπομένει διὰ τὸ βάρος, τὸ δὲ γλυκὺ καὶ πότιμον ἀνάγεται διὰ τὴν κουφότητα, καθάπερ ἐν τοῖς τῶν ζῴων σώμασιν. καὶ γὰρ ἐν τούτοις τῆς τροφῆς εἰσελθούσης γλυκείας ἡ τῆς ὑγρᾶς τροφῆς ὑπόστασις καὶ τὸ περίττωμα φαίνεται πικρὸν ὂν καὶ ἁλμυρόν· τὸ γὰρ γλυκὺ καὶ πότιμον ὑπὸ τῆς ἐμφύτου θερμότητος ἑλκυσθὲν εἰς τὰς σάρκας καὶ τὴν ἄλλην σύνταξιν ἦλθεν τῶν μερῶν, ὡς ἕκαστον πέφυκεν. ὥσπερ οὖν κἀκεῖ ἄτοπον εἴ τις τῆς ποτίμου τροφῆς μὴ νομίζοι τόπον εἶναι τὴν κοιλίαν, ὅτι ταχέως ἀφανίζεται, ἀλλὰ τοῦ περιττώματος, ὅτι τοῦθ' ὁρᾷ ὑπομένον, οὐκ ἂν ὑπολαμβάνοι καλῶς. ὁμοίως δὲ καὶ ἐν τούτοις· ἔστιν γάρ, ὥσπερ λέγομεν, οὗτος ὁ τόπος ὕδατος· διὸ καὶ οἱ ποταμοὶ ῥέουσιν εἰς αὐτὸν ἅπαντες καὶ πᾶν τὸ γιγνόμενον ὕδωρ· εἴς τε γὰρ τὸ κοιλότατον ἡ ῥύσις, καὶ ἡ θάλαττα τὸν τοιοῦτον ἐπέχει τῆς γῆς τόπον· ἀλλὰ τὸ μὲν ἀναφέρεται ταχὺ διὰ τὸν ἥλιον ἅπαν, τὸ δ' ὑπολείπεται διὰ τὴν εἰρημένην αἰτίαν. τὸ δὲ ζητεῖν τὴν ἀρχαίαν ἀπορίαν, διὰ τί τοσοῦτον πλῆθος ὕδατος οὐδαμοῦ φαίνεται (καθ' ἑκάστην γὰρ ἡμέραν ποταμῶν ῥεόντων ἀναρίθμων καὶ τὸ μέγεθος ἀπλέτων οὐδὲν ἡ θάλαττα γίγνεται πλείων), τοῦτο οὐδὲν μὲν ἄτοπον ἀπορῆσαί τινας, οὐ μὴν ἐπιβλέψαντά γε χαλεπὸν ἰδεῖν. τὸ γὰρ αὐτὸ πλῆθος ὕδατος εἰς πλάτος τε διαταθὲν καὶ ἀθρόον οὐκ ἐν ἴσῳ χρόνῳ ἀναξηραίνεται, ἀλλὰ διαφέρει τοσοῦτον ὥστε τὸ μὲν διαμεῖναι ἂν ὅλην τὴν ἡμέραν, τὸ δ' ὥσπερ εἴ τις ἐπὶ τράπεζαν μεγάλην περιτείνειεν ὕδατος κύαθον, ἅμα διανοουμένοις ἂν ἀφανισθείη πᾶν. ὃ δὴ καὶ περὶ τοὺς ποταμοὺς συμβαίνει· συνεχῶς γὰρ ῥεόντων ἀθρόων ἀεὶ τὸ ἀφικνούμενον εἰς ἀχανῆ καὶ πλατὺν τόπον ἀναξηραίνεται ταχὺ καὶ ἀδήλως. τὸ δ' ἐν τῷ Φαίδωνι γεγραμμένον περί τε τῶν ποταμῶν καὶ τῆς θαλάττης [355b.34] ἀδύνατόν ἐστιν. λέγεται γὰρ ὡς ἅπαντα μὲν εἰς ἄλληλα συντέτρηται ὑπὸ γῆν, ἀρχὴ δὲ πάντων εἴη καὶ πηγὴ τῶν [356a] ὑδάτων ὁ καλούμενος Τάρταρος, περὶ τὸ μέσον ὕδατός τι πλῆθος, ἐξ οὗ καὶ τὰ ῥέοντα καὶ τὰ μὴ ῥέοντα ἀναδίδωσιν πάντα· τὴν δ' ἐπίρρυσιν ποιεῖν ἐφ' ἕκαστα τῶν ῥευμάτων διὰ τὸ σαλεύειν ἀεὶ τὸ πρῶτον καὶ τὴν ἀρχήν· οὐκ ἔχειν γὰρ ἕδραν, ἀλλ’ ἀεὶ περὶ τὸ μέσον εἰλεῖσθαι· κινούμενον δ’ ἄνω καὶ κάτω ποιεῖν τὴν ἐπίχυσιν τοῖς ῥεύμασιν. τὰ δὲ πολλαχοῦ μὲν λιμνάζειν, οἷον καὶ τὴν παρ’ ἡμῖν εἶναι θάλατταν, πάντα δὲ πάλιν κύκλῳ περιάγειν εἰς τὴν ἀρχήν, ὅθεν ἤρξαντο ῥεῖν, πολλὰ μὲν κατὰ τὸν αὐτὸν τόπον, τὰ δὲ καὶ καταντικρὺ τῇ θέσει τῆς ἐκροῆς, οἷον εἰ ῥεῖν ἤρξαντο κάτωθεν, ἄνωθεν εἰσβάλλειν. εἶναι δὲ μέχρι τοῦ μέσου τὴν κάθεσιν· τὸ γὰρ λοιπὸν πρὸς ἄναντες ἤδη πᾶσιν εἶναι τὴν φοράν. τοὺς δὲ χυμοὺς καὶ τὰς χρόας ἴσχειν τὸ ὕδωρ δι’ οἵας ἂν τύχωσι ῥέοντα γῆς. συμβαίνει δὲ τοὺς ποταμοὺς ῥεῖν οὐκ ἐπὶ ταὐτὸν ἀεὶ κατὰ τὸν λόγον τοῦτον· ἐπεὶ γὰρ εἰς τὸ μέσον εἰσρέουσιν ἀφ’ οὗπερ ἐκρέουσιν, οὐδὲν μᾶλλον ῥευσοῦνται κάτωθεν ἢ ἄνωθεν, ἀλλ’ ἐφ’ ὁπότερ’ ἂν ῥέψῃ κυμαίνων ὁ Τάρταρος. καίτοι τούτου συμβαίνοντος γένοιτ’ ἂν τὸ λεγόμενον ἄνω ποταμῶν· ὅπερ ἀδύνατον. ἔτι τὸ γιγνόμενον ὕδωρ καὶ τὸ πάλιν ἀναγόμενον πόθεν ἔσται; τοῦτο γὰρ ἐξαίρειν ὅλον ἀναγκαῖον, εἴπερ ἀεὶ σῴζεται τὸ ἴσον· ὅσον γὰρ ἔξω ῥεῖ, πάλιν ῥεῖ πρὸς τὴν ἀρχήν. καίτοι πάντες οἱ ποταμοὶ φαίνονται τελευτῶντες εἰς τὴν θάλατταν, ὅσοι μὴ εἰς ἀλλήλους· εἰς δὲ γῆν οὐδείς, ἀλλὰ κἂν ἀφανισθῇ, πάλιν ἀναδύνουσιν. μεγάλοι δὲ γίγνονται τῶν ποταμῶν οἱ μακρὰν ῥέοντες διὰ κοίλης· πολλῶν γὰρ δέχονται ῥεύματα ποταμῶν, ὑποτεμνόμενοι τῷ τόπῳ καὶ τῷ μήκει τὰς ὁδούς· διόπερ ὅ τ’ Ἴστρος καὶ ὁ Νεῖλος μέγιστοι τῶν ποταμῶν εἰσιν τῶν εἰς τήνδε τὴν θάλατταν ἐξιόντων. καὶ περὶ τῶν πηγῶν ἄλλοι λέγουσιν ἑκάστου τῶν ποταμῶν ἄλλας αἰτίας διὰ τὸ πολλοὺς εἰς τὸν αὐτὸν ἐμβάλλειν. ταῦτα δὴ πάντα φανερὸν ὡς ἀδύνατόν ἐστι συμβαίνειν ἄλλως τε καὶ τῆς θαλάττης ἐκεῖθεν τὴν ἀρχὴν ἐχούσης. ὅτι μὲν οὖν ὕδατός τε ὁ τόπος ἐστὶν οὗτος καὶ οὐ θαλάττης, καὶ διὰ τίν’ αἰτίαν τὸ μὲν πότιμον ἄδηλον πλὴν ῥέον, τὸ δ’ ὑπομένον, καὶ διότι τελευτὴ [356b] μᾶλλον ὕδατος ἢ ἀρχή ἐστιν ἡ θάλαττα, καθάπερ τὸ ἐν τοῖς σώμασιν περίττωμα τῆς τροφῆς πάσης, καὶ μάλιστα τὸ τῆς ὑγρᾶς, εἰρήσθω τοσαῦθ’ ἡμῖν.

περὶ δὲ τῆς ἁλμυρότητος αὐτῆς λεκτέον, καὶ πότερον αἰεί ἐστιν ἡ αὐτή, ἢ οὔτ’ ἦν οὔτ’ ἔσται ἀλλ’ ὑπολείψει· καὶ γὰρ οὕτως οἴονταί τινες. τοῦτο μὲν οὖν ἐοίκασι πάντες ὁμολογεῖν, ὅτι γέγονεν, εἴπερ καὶ πᾶς ὁ κόσμος· ἅμα γὰρ αὐτῆς ποιοῦσι τὴν γένεσιν. ὥστε δῆλον ὡς εἴπερ ἀίδιον τὸ πᾶν, καὶ περὶ τῆς θαλάττης οὕτως ὑποληπτέον. τὸ δὲ νομίζειν ἐλάττω τε γίγνεσθαι τὸ πλῆθος, ὥσπερ φησὶ Δημόκριτος, καὶ τέλος ὑπολείψειν, τῶν Αἰσώπου μύθων οὐδὲν διαφέρειν ἔοικεν ὁ πεπεισμένος οὕτως· καὶ γὰρ ἐκεῖνος ἐμυθολόγησεν ὡς δὶς μὲν ἡ Χάρυβδις ἀναρροφήσασα τὸ μὲν πρῶτον τὰ ὄρη ἐποίησεν φανερά, τὸ δὲ δεύτερον τὰς νήσους, τὸ δὲ τελευταῖον ῥοφήσασα ξηρὰν ποιήσει πάμπαν. ἐκείνῳ μὲν οὖν ἥρμοττεν ὀργιζομένῳ πρὸς τὸν πορθμέα τοιοῦτον εἰπεῖν μῦθον, τοῖς δὲ τὴν ἀλήθειαν ζητοῦσιν ἧττον· δι' ἣν γὰρ αἰτίαν ἔμεινε τὸ πρῶτον, εἴτε διὰ βάρος, ὥσπερ τινὲς καὶ τούτων φασίν (ἐν προχείρῳ γὰρ τούτου τὴν αἰτίαν ἰδεῖν), εἴτε καὶ δι' ἄλλο τι, δῆλον ὅτι διὰ τοῦτο διαμένειν ἀναγκαῖον καὶ τὸν λοιπὸν χρόνον αὐτήν. ἢ γὰρ λεκτέον αὐτοῖς ὅτι οὐδὲ τὸ ἀναχθὲν ὕδωρ ὑπὸ τοῦ ἡλίου ἥξει πάλιν, ἢ εἴπερ τοῦτ' ἔσται, ἀναγκαῖον ἤτοι ἀεὶ ἢ μέχρι οὗπερ ἂν ᾖ τοῦτο ὑπολείπεσθαι τὴν θάλατταν, καὶ πάλιν ἀναχθῆναι ἐκεῖνο πρότερον δεήσει τὸ πότιμον. ὥστε οὐδέποτε ξηρανεῖται· πάλιν γὰρ ἐκεῖνο φθήσεται καταβὰν εἰς τὴν αὐτὴν τὸ προανελθόν· διαφέρει γὰρ οὐδὲν ἅπαξ τοῦτ' εἰπεῖν ἢ πολλάκις. εἰ μὲν οὖν τὸν ἥλιον παύσει τις τῆς φορᾶς, τί ἔσται τὸ ξηραῖνον; εἰ δ' ἐάσει εἶναι τὴν περιφοράν, ἀεὶ πλησιάζων τὸ πότιμον, καθάπερ εἴπομεν, ἀνάξει, ἀφήσει δὲ πάλιν ἀναχωρῶν. ἔλαβον δὲ ταύτην τὴν διάνοιαν κατὰ τῆς θαλάττης ἐκ τοῦ πολλοὺς τόπους φαίνεσθαι ξηροτέρους νῦν ἢ πρότερον· περὶ οὗ τὴν αἰτίαν εἴπομεν, ὅτι τῶν κατά τινα χρόνον ὑπερβολῶν γιγνομένων ὕδατος τοῦτ' ἐστὶν τὸ πάθος, ἀλλ' οὐ διὰ τὴν τοῦ παντὸς γένεσιν καὶ τῶν μορίων· καὶ πάλιν γ' ἔσται τοὐναντίον· καὶ [357a] ὅταν γένηται, ξηρανεῖται πάλιν· καὶ τοῦθ' οὕτως κατὰ κύκλον ἀναγκαῖον ἀεὶ βαδίζειν· μᾶλλον γὰρ οὕτως εὔλογον ὑπολαβεῖν ἢ διὰ ταῦτα τὸν οὐρανὸν ὅλον μεταβάλλειν. ἀλλὰ περὶ μὲν τούτων πλείω τῆς ἀξίας ἐνδιατέτριφεν ὁ λόγος· περὶ δὲ τῆς ἁλμυρότητος, τοῖς μὲν ἅπαξ γεννήσασι καὶ ὅλως αὐτὴν γεννῶσιν ἀδύνατόν ἐστιν ἁλμυρὰν ποιεῖν. εἰ γὰρ παντὸς τοῦ ὑγροῦ τοῦ περὶ τὴν γῆν ὄντος καὶ ἀναχθέντος ὑπὸ τοῦ ἡλίου τὸ ὑπολειφθὲν ἐγένετο θάλαττα, εἴτ' ἐνυπῆρχε τοσοῦτος χυμὸς ἐν τῷ πολλῷ ὕδατι καὶ γλυκεῖ διὰ τὸ συμμειχθῆναί τινα γῆν τοιαύτην, οὐδὲν ἧττον ἐλθόντος πάλιν τοῦ διατμίσαντος ὕδατος ἀνάγκη, ἴσου γ' ὄντος τοῦ πλήθους, καὶ τὸ πρῶτον· ἢ εἰ μηδὲ τὸ πρῶτον, μηδ' ὕστερον ἁλμυρὰν αὐτὴν εἶναι. εἰ δὲ καὶ τὸ πρῶτον εὐθὺς ἦν, λεκτέον τίς ἡ αἰτία, καὶ ἅμα διὰ τί οὐκ εἰ καὶ τότε ἀνήχθη καὶ νῦν πάσχει ταὐτό. ἀλλὰ μὴν καὶ ὅσοι τὴν γῆν αἰτιῶνται τῆς ἁλμυρότητος ἐμμειγνυμένην (ἔχειν γάρ φασι πολλοὺς χυμοὺς αὐτήν, ὥσθ' ὑπὸ τῶν ποταμῶν συγκαταφερομένην διὰ τὴν μεῖξιν ποιεῖν ἁλμυράν), ἄτοπον τὸ μὴ καὶ τοὺς ποταμοὺς ἁλμυροὺς εἶναι· πῶς γὰρ δυνατὸν ἐν πολλῷ μὲν πλήθει ὕδατος ἐπίδηλον οὕτως ποιεῖν τὴν μεῖξιν τῆς τοιαύτης γῆς, ἐν ἑκάστῳ δὲ μή; δῆλον γὰρ ὅτι ἡ θάλαττά ἐστιν ἅπαν τὸ ποτάμιον ὕδωρ· οὐδενὶ γὰρ διέφερεν ἀλλ' ἢ τῷ ἁλμυρὰ εἶναι τῶν ποταμῶν· τοῦτο δ' ἐν ἐκείνοις ἔρχεται εἰς τὸν τόπον εἰς ὃν ἀθρόοι ῥέουσιν. ὁμοίως δὲ γελοῖον κἂν εἴ τις εἰπὼν ἱδρῶτα τῆς γῆς εἶναι τὴν θάλατταν οἴεταί τι σαφὲς εἰρηκέναι, καθάπερ Ἐμπεδοκλῆς· πρὸς ποίησιν μὲν γὰρ οὕτως εἰπὼν ἴσως εἴρηκεν ἱκανῶς (ἡ γὰρ μεταφορὰ ποιητικόν), πρὸς δὲ τὸ γνῶναι τὴν φύσιν οὐχ ἱκανῶς· οὐδὲ γὰρ ἐνταῦθα δῆλον πῶς ἐκ γλυκέος τοῦ πόματος ἁλμυρὸς γίγνεται ὁ ἱδρώς, πότερον ἀπελθόντος τινὸς μόνον οἷον τοῦ γλυκυτάτου, ἢ συμμειχθέντος τινός, καθάπερ ἐν τοῖς διὰ τῆς τέφρας ἠθουμένοις ὕδασιν. φαίνεται δὲ τὸ αἴτιον ταὐτὸ καὶ περὶ τὸ εἰς τὴν κύστιν περίττωμα συλλεγόμενον· καὶ γὰρ ἐκεῖνο πικρὸν καὶ ἁλμυρὸν γίγνεται τοῦ πινομένου καὶ τοῦ ἐν τῇ τροφῇ ὑγροῦ [357b] γλυκέος ὄντος. εἰ δὴ ὥσπερ τὸ διὰ τῆς κονίας ἠθούμενον ὕδωρ γίγνεται πικρόν, καὶ ταῦτα, τῷ μὲν οὔρῳ συγκαταφερομένης τοιαύτης τινὸς δυνάμεως οἷα καὶ φαίνεται ὑφισταμένη ἐν τοῖς ἀγγείοις ἁλμυρίς, τῷ δ’ ἱδρῶτι συνεκκρινομένης ἐκ τῶν σαρκῶν, οἷον καταπλύνοντος τὸ τοιοῦτον ἐκ τοῦ σώματος τοῦ ἐξιόντος ὑγροῦ, δῆλον ὅτι κἀν τῇ θαλάττῃ τὸ ἐκ τῆς γῆς συγκαταμισγόμενον τῷ ὑγρῷ αἴτιον τῆς ἁλμυρότητος. ἐν μὲν οὖν τῷ σώματι γίγνεται τὸ τοιοῦτον ἡ τῆς τροφῆς ὑπόστασις διὰ τὴν ἀπεψίαν· ἐν δὲ τῇ γῇ τίνα τρόπον ὑπῆρχε, λεκτέον. ὅλως δὲ πῶς οἷόν τε τοσοῦτον ὕδατος πλῆθος [357b.11] ξηραινομένης καὶ θερμαινομένης ἐκκριθῆναι; πολλοστὸν γὰρ δεῖ μέρος αὐτὸ τοῦ λειφθέντος εἶναι ἐν τῇ γῇ. ἔτι διὰ τί οὐ καὶ νῦν ὅταν ξηραινομένη τύχῃ γῆ, εἴτε πλείων εἴτε ἐλάττων, ἰδίει; (ἡ γὰρ ὑγρότης καὶ ὁ ἱδρὼς γίγνεται πικρός.) εἴπερ γὰρ καὶ τότε, καὶ νῦν ἐχρῆν. οὐ φαίνεται δὲ τοῦτο συμβαῖνον, ἀλλὰ ξηρὰ μὲν οὖσα ὑγραίνεται, ὑγρὰ δ’ οὖσα οὐδὲν πάσχει τοιοῦτον. πῶς οὖν οἷόν τε περὶ τὴν πρώτην γένεσιν, ὑγρᾶς οὔσης τῆς γῆς, ἰδίειν ξηραινομένην; ἀλλὰ μᾶλλον εἰκός, ὥσπερ φασί τινες, ἀπελθόντος τοῦ πλείστου καὶ μετεωρισθέντος τοῦ ὑγροῦ διὰ τὸν ἥλιον, τὸ λειφθὲν εἶναι θάλατταν· ὑγρὰν δ’ οὖσαν ἰδίειν ἀδύνατον. τὰ μὲν οὖν λεγόμενα τῆς ἁλμυρότητος αἴτια διαφεύγειν φαίνεται τὸν λόγον· ἡμεῖς δὲ λέγωμεν ἀρχὴν λαβόντες τὴν αὐτὴν ἣν καὶ πρότερον· ἐπειδὴ γὰρ κεῖται διπλῆν εἶναι τὴν ἀναθυμίασιν, τὴν μὲν ὑγρὰν τὴν δὲ ξηράν, δῆλον ὅτι ταύτην οἰητέον ἀρχὴν εἶναι τῶν τοιούτων. καὶ δὴ καὶ περὶ οὗ ἀπορῆσαι πρότερον ἀναγκαῖον, πότερον καὶ ἡ θάλαττα ἀεὶ διαμένει τῶν αὐτῶν οὖσα μορίων ἀριθμῷ ἢ τῷ εἴδει καὶ τῷ ποσῷ μεταβαλλόντων ἀεὶ τῶν μερῶν, καθάπερ ἀὴρ καὶ τὸ πότιμον ὕδωρ καὶ πῦρ (ἀεὶ γὰρ ἄλλο καὶ ἄλλο γίγνεται τούτων ἕκαστον, τὸ δ’ εἶδος τοῦ πλήθους ἑκάστου τούτων μένει, καθάπερ τὸ τῶν ῥεόντων ὑδάτων καὶ τὸ τῆς φλογὸς ῥεῦμα)· φανερὸν δὴ καὶ τοῦτο καὶ πιθανόν, ὡς ἀδύνατον μὴ τὸν αὐτὸν εἶναι περὶ πάντων τούτων λόγον, καὶ διαφέρειν ταχυτῆτι καὶ [358a] βραδυτῆτι τῆς μεταβολῆς, ἐπὶ πάντων τε φθορὰν εἶναι καὶ γένεσιν, ταύτην μέντοι τεταγμένως συμβαίνειν πᾶσιν αὐτοῖς. τούτων δ’ οὕτως ἐχόντων, πειρατέον ἀποδοῦναι τὴν αἰτίαν καὶ περὶ τῆς ἁλμυρότητος. φανερὸν δὴ διὰ πολλῶν σημείων ὅτι γίγνεται τοιοῦτος ὁ χυμὸς διὰ σύμμειξίν τινος. ἔν τε γὰρ τοῖς σώμασι τὸ ἀπεπτότατον ἁλμυρὸν καὶ πικρόν, ὥσπερ καὶ πρότερον εἴπομεν· ἀπεπτότατον γὰρ τὸ περίττωμα τῆς ὑγρᾶς τροφῆς· τοιαύτη δὲ πᾶσα μὲν ἡ ὑπόστασις, μάλιστα δὲ ἡ εἰς τὴν κύστιν (σημεῖον δ’ ὅτι λεπτοτάτη ἐστίν· τὰ δὲ πεττόμενα πάντα συνίστασθαι πέφυκεν)· ἔπειτα ἱδρώς [ἀεί]· ἐν οἷς τὸ αὐτὸ σῶμα συνεκκρίνεται, ὃ ποιεῖ τὸν χυμὸν τοῦτον. ὁμοίως δὲ καὶ ἐν τοῖς καομένοις· οὗ γὰρ ἂν μὴ κρατήσῃ τὸ θερμόν, ἐν μὲν τοῖς σώμασι γίγνεται περίττωσις, ἐν δὲ τοῖς καομένοις τέφρα. διὸ καὶ τὴν θάλαττάν τινες ἐκ κατακεκαυμένης φασὶ γενέσθαι γῆς. ὃ οὕτω μὲν εἰπεῖν ἄτοπον, τὸ μέντοι ἐκ τοιαύτης ἀληθές· ὥσπερ γὰρ καὶ ἐν τοῖς εἰρημένοις, οὕτω καὶ ἐν τῷ ὅλῳ ἔκ τε τῶν φυομένων καὶ γιγνομένων κατὰ φύσιν ἀεὶ δεῖ νοεῖν, ὥσπερ ἐκ πεπυρωμένων τὸ λειπόμενον τοιαύτην εἶναι γῆν, καὶ δὴ καὶ τὴν ἐν τῇ ξηρᾷ ἀναθυμίασιν πᾶσαν· αὕτη γὰρ καὶ παρέχεται τὸ πολὺ τοῦτο πλῆθος. μεμειγμένης δ’ οὔσης, ὥσπερ εἴπομεν, τῆς τε ἀτμιδώδους ἀναθυμιάσεως καὶ τῆς ξηρᾶς, ὅταν συνιστῆται εἰς νέφη καὶ ὕδωρ, ἀναγκαῖον ἐμπεριλαμβάνεσθαί τι πλῆθος ἀεὶ ταύτης τῆς δυνάμεως, καὶ συγκαταφέρεσθαι πάλιν ὕοντος, καὶ τοῦτ’ ἀεὶ γίγνεσθαι κατά τινα τάξιν, ὡς ἐνδέχεται μετέχειν τὰ ἐνταῦθα τάξεως. ὅθεν μὲν οὖν ἡ γένεσις ἔνεστιν τοῦ ἁλμυροῦ ἐν τῷ ὕδατι, εἴρηται. καὶ διὰ τοῦτο τά τε νότια ὕδατα πλατύτερα καὶ τὰ πρῶτα τῶν μετοπωρινῶν· ὅ τε γὰρ νότος καὶ τῷ μεγέθει καὶ τῷ πνεύματι ἀλεεινότατος ἄνεμός ἐστιν, καὶ πνεῖ ἀπὸ τόπων ξηρῶν καὶ θερμῶν, ὥστε μετ’ ὀλίγης ἀτμίδος. διὸ καὶ θερμός ἐστιν· εἰ γὰρ καὶ μὴ τοιοῦτος, ἀλλ’ ὅθεν ἄρχεται πνεῖν ψυχρός, οὐδὲν ἧττον προϊὼν διὰ τὸ συμπεριλαμβάνειν πολλὴν ἀναθυμίασιν ξηρὰν ἐκ τῶν σύνεγγυς τόπων θερμός ἐστιν· ὁ δὲ βορέας ἅτε ἀφ’ ὑγρῶν τόπων ἀτμιδώδης· διὸ [358b] ψυχρός· τῷ δ’ ἀπωθεῖν αἴθριος ἐνταῦθα, ἐν δὲ τοῖς ἐναντίοις ὑδατώδης. ὁμοίως δὲ καὶ ὁ νότος αἴθριος τοῖς περὶ τὴν Λιβύην. πολὺ οὖν ἐν τῷ καταφερομένῳ ὕδατι συμβάλλεται τοιοῦτον, καὶ τοῦ μετοπώρου πλατέα τὰ ὕδατα· ἀνάγκη γὰρ τὰ βαρύτατα πρῶτα φέρεσθαι. ὥστ’ ἐν ὅσοις ἔνεστι τῆς τοιαύτης γῆς πλῆθος, ῥέπει τάχιστα κάτω ταῦτα. καὶ θερμή γε ἡ θάλαττα διὰ τοῦτό ἐστιν· πάντα γὰρ ὅσα πεπύρωται, ἔχει δυνάμει θερμότητα ἐν αὑτοῖς. ὁρᾶν δ’ ἔξεστι καὶ τὴν κονίαν καὶ τὴν τέφραν καὶ τὴν ὑπόστασιν τῶν ζῴων καὶ τὴν ξηρὰν καὶ τὴν ὑγράν· καὶ τῶν θερμοτάτων γε κατὰ τὴν κοιλίαν ζῴων συμβαίνει θερμοτάτην εἶναι τὴν ὑπόστασιν. γίγνεται μὲν οὖν ἀεί τε πλατυτέρα διὰ ταύτην τὴν αἰτίαν, ἀνάγεται δ’ ἀεί τι μέρος αὐτῆς μετὰ τοῦ γλυκέος (ἀλλ’ ἔλαττον τοσούτῳ ὅσῳ καὶ ἐν τῷ ὑομένῳ τὸ ἁλμυρὸν καὶ πλατὺ τοῦ γλυκέος ἔλαττον· διόπερ ἰσάζει ὡς ἐπίπαν εἰπεῖν). ὅτι δὲ γίγνεται ἀτμίζουσα πότιμος καὶ οὐκ εἰς θάλατταν συγκρίνεται τὸ ἀτμίζον, ὅταν συνιστῆται πάλιν, πεπειραμένοι λέγωμεν. πάσχει δὲ καὶ τἆλλα ταὐτό· καὶ γὰρ οἶνος καὶ πάντες οἱ χυμοί, ὅσοι ἂν ἀτμίσαντες πάλιν εἰς ὑγρὸν συστῶσιν, ὕδωρ γίγνονται· πάθη γὰρ τἆλλα διά τινα σύμμειξιν τοῦ ὕδατός ἐστιν, καὶ οἶον ἄν τι ᾖ τὸ συμμειχθέν, τοιοῦτον ποιεῖ τὸν χυμόν. ἀλλὰ περὶ μὲν τούτων ἐν ἄλλοις καιροῖς οἰκειοτέροις ποιητέον τὴν σκέψιν. νῦν δὲ τοσοῦτον λέγωμεν, ὅτι τῆς θαλάττης ὑπαρχούσης αἰεί τι ἀνάγεται καὶ γίγνεται πότιμον καὶ ἄνωθεν ἐν τῷ ὑομένῳ κατέρχεται ἄλλο γεγενημένον, οὐ τὸ ἀναχθέν· καὶ διὰ βάρος ὑφίσταται τῷ ποτίμῳ. καὶ διὰ τοῦτο οὔτ' ἐπιλείπει, ὥσπερ οἱ ποταμοί, ἀλλ' ἢ τοῖς τόποις (τοῦτο δ' ἐπ' ἀμφοτέρων ἀνάγκη συμβαίνειν ὁμοίως), οὔτε ἀεὶ τὰ αὐτὰ μέρη διαμένει, οὔτε γῆς οὔτε θαλάττης, ἀλλ' ἢ μόνον ὁ πᾶς ὄγκος. καὶ γὰρ καὶ περὶ γῆς ὁμοίως δεῖ ὑπολαβεῖν· τὸ μὲν γὰρ ἀνέρχεται, τὸ δὲ πάλιν συγκαταβαίνει, καὶ τοὺς τόπους μεταβάλλει τά τ' ἐπιπολάζοντα καὶ τὰ κατιόντα πάλιν. ὅτι δ' ἐστὶν ἐν μείξει τινὸς τὸ ἁλμυρόν, δῆλον οὐ μόνον ἐκ τῶν εἰρημένων, ἀλλὰ καὶ ἐάν τις ἀγγεῖον [359a] πλάσας θῇ κήρινον εἰς τὴν θάλατταν, περιδήσας τὸ στόμα τοιούτοις ὥστε μὴ παρεγχεῖσθαι τῆς θαλάττης· τὸ γὰρ εἰσιὸν διὰ τῶν τοίχων τῶν κηρίνων γίγνεται πότιμον ὕδωρ· ὥσπερ γὰρ δι' ἠθμοῦ τὸ γεῶδες ἀποκρίνεται καὶ τὸ ποιοῦν τὴν ἁλμυρότητα διὰ τὴν σύμμειξιν. τοῦτο γὰρ αἴτιον καὶ τοῦ βάρους (πλέον γὰρ ἕλκει τὸ ἁλμυρὸν ἢ τὸ πότιμον) καὶ τοῦ πάχους· καὶ γὰρ τὸ πάχος διαφέρει τοσοῦτον ὥστε τὰ πλοῖα ἀπὸ τοῦ αὐτοῦ τῶν ἀγωγίμων βάρους ἐν μὲν τοῖς ποταμοῖς ὀλίγου καταδύνειν, ἐν δὲ τῇ θαλάττῃ μετρίως ἔχειν καὶ πλευστικῶς· διόπερ ἔνιοι τῶν ἐν τοῖς ποταμοῖς γεμιζόντων διὰ ταύτην τὴν ἄγνοιαν ἐζημιώθησαν. τεκμήριον δὲ τοῦ μειγνυμένου τὸ παχύτερον εἶναι τὸν ὄγκον· ἐὰν γάρ τις ὕδωρ ἁλμυρὸν ποιήσῃ σφόδρα μείξας ἅλας, ἐπιπλέουσι τὰ ᾠά, κἂν ᾖ πλήρη· σχεδὸν γὰρ ὥσπερ πηλὸς γίγνεται· τοσοῦτον ἔχει σωματῶδες πλῆθος ἡ θάλαττα. ταὐτὸ δὲ τοῦτο δρῶσι καὶ περὶ τὰς ταριχείας. εἰ δ' ἔστιν ὥσπερ μυθολογοῦσί τινες ἐν Παλαιστίνῃ τοιαύτη λίμνη, εἰς ἣν ἐάν τις ἐμβάλῃ συνδήσας ἄνθρωπον ἢ ὑποζύγιον ἐπιπλεῖν καὶ οὐ καταδύεσθαι κατὰ τοῦ ὕδατος, μαρτύριον ἂν εἴη τι τοῖς εἰρημένοις· λέγουσι γὰρ πικρὰν οὕτως εἶναι τὴν λίμνην καὶ ἁλμυρὰν ὥστε μηδένα ἰχθὺν ἐγγίγνεσθαι, τὰ δὲ ἱμάτια ῥύπτειν, ἐάν τις διασείσῃ βρέξας. ἔστι δὲ καὶ τὰ τοιαῦτα σημεῖα πάντα τῶν εἰρημένων, ὅτι τὸ ἁλμυρὸν ποιεῖ σῶμά τι, καὶ γεῶδές ἐστιν τὸ ἐνυπάρχον· ἔν τε γὰρ τῇ Χαονίᾳ κρήνη τίς ἐστιν ὕδατος πλατυτέρου, ἀπορρεῖ δ' [359a.26] αὕτη εἰς ποταμὸν πλησίον γλυκὺν μέν, ἰχθῦς δ' οὐκ ἔχοντα· εἵλοντο γὰρ δή, ὡς οἱ ἐκεῖ μυθολογοῦσιν, ἐξουσίας δοθείσης ὑπὸ τοῦ Ἡρακλέους, ὅτ' ἦλθεν ἄγων ἐκ τῆς Ἐρυθείας τὰς βοῦς, ἅλας ἀντὶ τῶν ἰχθύων, οἳ γίγνονται αὐτοῖς ἐκ τῆς κρήνης· τούτου γὰρ τοῦ ὕδατος ἀφέψοντές τι μέρος τιθέασι, καὶ γίγνεται ψυχθέν, ὅταν ἀπατμίσῃ τὸ ὑγρὸν ἅμα τῷ θερμῷ, ἅλες, οὐ χονδροὶ ἀλλὰ χαῦνοι καὶ λεπτοὶ ὥσπερ χιών. εἰσίν τε τήν τε δύναμιν ἀσθενέστεροι τῶν ἄλλων καὶ πλείους ἡδύνουσιν ἐμβληθέντες, καὶ τὴν χροιὰν οὐχ ὁμοίως λευκοί. τοιοῦτον δ’ ἕτερον γίγνεται καὶ ἐν Ὀμβρικοῖς· [359b] ἔστι γάρ τις τόπος ἐν ᾧ πεφύκασι κάλαμοι καὶ σχοῖνος· τούτων κατακάουσι, καὶ τὴν τέφραν ἐμβάλλοντες εἰς ὕδωρ ἀφέψουσιν· ὅταν δὲ λίπωσί τι μέρος τοῦ ὕδατος, τοῦτο ψυχθὲν ἁλῶν γίγνεται πλῆθος. ὅσα δ’ ἐστὶν ἁλμυρὰ ῥεύματα ποταμῶν ἢ κρηνῶν, τὰ πλεῖστα θερμά ποτε εἶναι δεῖ νομίζειν, εἶτα τὴν μὲν ἀρχὴν ἀπεσβέσθαι τοῦ πυρός, δι’ ἧς δὲ διηθοῦνται γῆς, ἔτι μένειν οὖσαν οἷον κονίαν καὶ τέφραν. εἰσὶ δὲ πολλαχοῦ καὶ κρῆναι καὶ ῥεύματα ποταμῶν παντοδαποὺς ἔχοντα χυμούς, ὧν πάντων αἰτιατέον τὴν ἐνοῦσαν ἢ ἐγγιγνομένην δύναμιν πυρός· καομένη γὰρ ἡ γῆ τῷ μᾶλλον καὶ ἧττον παντοδαπὰς λαμβάνει μορφὰς καὶ χρόας χυμῶν· στυπτηρίας γὰρ καὶ κονίας καὶ τῶν ἄλλων τῶν τοιούτων γίγνεται πλήρης δυνάμεων, δι’ ὧν τὰ ἠθούμενα ὕδατα ὄντα γλυκέα μεταβάλλει, καὶ τὰ μὲν ὀξέα γίγνεται, καθάπερ ἐν τῇ Σικάνῃ τῆς Σικελίας· ἐκεῖ γὰρ ὀξάλμη γίγνεται, καὶ χρῶνται καθάπερ ὄξει πρὸς ἔνια τῶν ἐδεσμάτων αὐτῷ. ἔστι δὲ καὶ περὶ Λύγκον κρήνη τις ὕδατος ὀξέος, περὶ δὲ τὴν Σκυθικὴν πικρά· τὸ δ’ ἀπορρέον αὐτῆς τὸν ποταμὸν εἰς ὃν εἰσβάλλει ποιεῖ πικρὸν ὅλον. αἱ δὲ διαφοραὶ τούτων ἐκεῖθεν δῆλαι, ποῖοι χυμοὶ ἐκ ποίων γίγνονται κράσεων· εἴρηται δὲ περὶ αὐτῶν χωρὶς ἐν ἄλλοις. περὶ μὲν οὖν ὕδατος καὶ θαλάττης, δι’ ἃς αἰτίας αἰεί τε συνεχῶς εἰσι καὶ πῶς μεταβάλλουσι καὶ τίς ἡ φύσις αὐτῶν, ἔτι δ’ ὅσα πάθη κατὰ φύσιν αὐτοῖς συμβαίνει ποιεῖν ἢ πάσχειν, εἴρηται σχεδὸν ἡμῖν περὶ τῶν πλείστων.

περὶ δὲ πνευμάτων λέγωμεν, λαβόντες ἀρχὴν τὴν εἰρημένην ἡμῖν ἤδη πρότερον. ἔστι γὰρ δύ’ εἴδη τῆς ἀναθυμιάσεως, ὥς φαμεν, ἡ μὲν ὑγρὰ ἡ δὲ ξηρά· καλεῖται δ’ ἡ μὲν ἀτμίς, ἡ δὲ τὸ μὲν ὅλον ἀνώνυμος, τῷ δ’ ἐπὶ μέρους ἀνάγκη χρωμένους καθόλου προσαγορεύειν αὐτὴν οἷον καπνόν· ἔστι δ’ οὔτε τὸ ὑγρὸν ἄνευ τοῦ ξηροῦ οὔτε τὸ ξηρὸν ἄνευ τοῦ ὑγροῦ, ἀλλὰ πάντα ταῦτα λέγεται κατὰ τὴν ὑπεροχήν. φερομένου δὴ τοῦ ἡλίου κύκλῳ, καὶ ὅταν μὲν πλησιάζῃ, τῇ θερμότητι ἀνάγοντος τὸ ὑγρόν, πορρωτέρω [360a] δὲ γιγνομένου διὰ τὴν ψύξιν συνισταμένης πάλιν τῆς ἀναχθείσης ἀτμίδος εἰς ὕδωρ (διὸ χειμῶνός τε μᾶλλον γίγνεται τὰ ὕδατα, καὶ νύκτωρ ἢ μεθ’ ἡμέραν· ἀλλ’ οὐ δοκεῖ, διὰ τὸ λανθάνειν τὰ νυκτερινὰ τῶν μεθ’ ἡμέραν μᾶλλον), τὸ δὴ κατιὸν ὕδωρ διαδίδοται πᾶν εἰς τὴν γῆν, ὑπάρχει δ’ ἐν τῇ γῇ πολὺ πῦρ καὶ πολλὴ θερμότης, καὶ ὁ ἥλιος οὐ μόνον τὸ ἐπιπολάζον τῆς γῆς ὑγρὸν ἕλκει, ἀλλὰ καὶ τὴν γῆν αὐτὴν ξηραίνει θερμαίνων· τῆς δ’ ἀναθυμιάσεως, ὥσπερ εἴρηται, διπλῆς οὔσης, τῆς μὲν ἀτμιδώδους τῆς δὲ καπνώδους, ἀμφοτέρας ἀναγκαῖον γίγνεσθαι. τούτων δ’ ἡ μὲν ὑγροῦ πλέον ἔχουσα πλῆθος ἀναθυμίασις ἀρχὴ τοῦ ὑομένου ὕδατός ἐστιν, ὥσπερ εἴρηται πρότερον, ἡ δὲ ξηρὰ τῶν πνευμάτων ἀρχὴ καὶ φύσις πάντων. ταῦτα δὲ ὅτι τοῦτον τὸν τρόπον ἀναγκαῖον συμβαίνειν, καὶ ἐξ αὐτῶν τῶν ἔργων δῆλον· καὶ γὰρ τὴν ἀναθυμίασιν διαφέρειν ἀναγκαῖον, καὶ τὸν ἥλιον καὶ τὴν ἐν τῇ γῇ θερμότητα ταῦτα ποιεῖν οὐ μόνον δυνατὸν ἀλλ’ ἀναγκαῖόν ἐστιν. ἐπειδὴ δ’ ἕτερον ἑκατέρας τὸ εἶδος, φανερὸν ὅτι διαφέρει, καὶ οὐχ ἡ αὐτή ἐστιν ἥ τε ἀνέμου φύσις καὶ ἡ τοῦ ὑομένου ὕδατος, καθάπερ τινὲς λέγουσιν· τὸν γὰρ αὐτὸν ἀέρα κινούμενον μὲν ἄνεμον εἶναι, συνιστάμενον δὲ πάλιν ὕδωρ. ὁ μὲν οὖν ἀήρ, καθάπερ ἐν τοῖς πρὸ τούτων λόγοις εἰρήκαμεν, γίγνεται ἐκ τούτων· ἡ μὲν γὰρ ἀτμὶς ὑγρὸν καὶ ψυχρόν (εὐόριστον μὲν γὰρ ὡς ὑγρόν, διὰ δὲ τὸ ὕδατος εἶναι ψυχρὸν τῇ οἰκείᾳ φύσει, ὥσπερ ὕδωρ μὴ θερμανθέν), ὁ δὲ καπνὸς θερμὸν καὶ ξηρόν· ὥστε καθάπερ ἐκ συμβόλων, συνίσταιτο ἂν ὁ ἀὴρ ὑγρὸς καὶ θερμός. καὶ γὰρ ἄτοπον εἰ ὁ περὶ ἑκάστους περικεχυμένος ἀὴρ οὗτος γίγνεται κινούμενος πνεῦμα, καὶ ὅθεν ἂν τύχῃ κινηθείς, ἄνεμος ἔσται, ἀλλ’ οὐ καθάπερ τοὺς ποταμοὺς ὑπολαμβάνομεν οὐχ ὁπωσοῦν τοῦ ὕδατος εἶναι ῥέοντος, οὐδ’ ἂν ἔχῃ πλῆθος, ἀλλὰ δεῖ πηγαῖον εἶναι τὸ ῥέον· οὕτω γὰρ καὶ περὶ τῶν ἀνέμων ἔχει· κινηθείη γὰρ ἂν πολὺ πλῆθος ἀέρος ὑπό τινος μεγάλης πτώσεως, οὐκ ἔχον ἀρχὴν οὐδὲ πηγήν. μαρτυρεῖ δὲ τὰ γιγνόμενα τοῖς εἰρημένοις· διὰ γὰρ τὸ συνεχῶς μὲν μᾶλλον δὲ καὶ ἧττον καὶ πλείω καὶ ἐλάττω γίγνεσθαι τὴν [360b] ἀναθυμίασιν, ἀεὶ νέφη τε καὶ πνεύματα γίγνεται κατὰ τὴν ὥραν ἑκάστην ὡς πέφυκεν· διὰ δὲ τὸ ἐνίοτε μὲν τὴν ἀτμιδώδη γίγνεσθαι πολλαπλασίαν ὁτὲ δὲ τὴν ξηρὰν καὶ καπνώδη, ὁτὲ μὲν ἔπομβρα τὰ ἔτη γίγνεται καὶ ὑγρά, ὁτὲ δὲ ἀνεμώδη καὶ αὐχμοί. ὁτὲ μὲν οὖν συμβαίνει καὶ τοὺς αὐχμοὺς καὶ τὰς ἐπομβρίας πολλοὺς ἅμα καὶ κατὰ συνεχῆ γίγνεσθαι χώραν, ὁτὲ δὲ κατὰ μέρη· πολλάκις γὰρ ἡ μὲν κύκλῳ χώρα λαμβάνει τοὺς ὡραίους ὄμβρους ἢ καὶ πλείους, ἐν δέ τινι μέρει ταύτης αὐχμός ἐστιν· ὁτὲ δὲ τοὐναντίον τῆς κύκλῳ πάσης ἢ μετρίοις χρωμένης ὕδασιν ἢ καὶ μᾶλλον αὐχμώσης, ἕν τι μόριον ὕδατος ἄφθονον λαμβάνει πλῆθος. αἴτιον δ’ ὅτι ὡς μὲν τὰ πολλὰ τὸ αὐτὸ πάθος ἐπὶ πλείω διήκειν εἰκὸς χώραν, διὰ τὸ παραπλησίως κεῖσθαι πρὸς τὸν ἥλιον τὰ σύνεγγυς, ἐὰν μή τι διάφορον ἔχωσιν ἴδιον· οὐ μὴν ἀλλ’ ἐνίοτε κατὰ τοδὶ μὲν τὸ μέρος ἡ ξηρὰ ἀναθυμίασις ἐγένετο πλείων, κατὰ δὲ τὸ ἄλλο ἡ ἀτμιδώδης, ὁτὲ δὲ τοὐναντίον. καὶ αὐτοῦ δὲ τούτου αἴτιον τὸ ἑκατέραν μεταπίπτειν εἰς τὴν τῆς ἐχομένης χώρας ἀναθυμίασιν, οἷον ἡ μὲν ξηρὰ κατὰ τὴν οἰκείαν ῥεῖ χώραν, ἡ δ’ ὑγρὰ πρὸς τὴν γειτνιῶσαν, ἢ καὶ εἰς τῶν πόρρω τινὰ τόπων ἀπεώσθη ὑπὸ πνευμάτων· ὁτὲ δὲ αὕτη μὲν ἔμεινεν, ἡ δ’ ἐναντία ταὐτὸν ἐποίησεν. καὶ συμβαίνει τοῦτο πολλάκις, ὥσπερ ἐπὶ τοῦ σώματος, ἐὰν ἡ ἄνω κοιλία ξηρὰ ᾖ, τὴν κάτω ἐναντίως διακεῖσθαι, καὶ ταύτης ξηρᾶς οὔσης ὑγρὰν εἶναι τὴν ἄνω καὶ ψυχράν, οὕτω καὶ περὶ τοὺς τόπους ἀντιπεριίστασθαι καὶ μεταβάλλειν τὰς ἀναθυμιάσεις. ἔτι δὲ μετά τε τοὺς ὄμβρους ἄνεμος ὡς τὰ πολλὰ γίγνεται ἐν ἐκείνοις τοῖς τόποις καθ’ οὓς ἂν συμπέσῃ γενέσθαι τοὺς ὄμβρους, καὶ τὰ πνεύματα παύεται ὕδατος γενομένου. ταῦτα γὰρ ἀνάγκη συμβαίνειν διὰ τὰς εἰρημένας ἀρχάς· ὕσαντός τε γὰρ ἡ γῆ ξηραινομένη ὑπό τε τοῦ ἐν αὐτῇ θερμοῦ καὶ ὑπὸ τοῦ ἄνωθεν ἀναθυμιᾶται, τοῦτο δ’ ἦν ἀνέμου σῶμα· καὶ ὅταν ἡ τοιαύτη ἀπόκρισις ᾖ καὶ ἄνεμοι κατέχωσι, παυομένων διὰ τὸ ἀποκρίνεσθαι τὸ θερμὸν ἀεὶ καὶ ἀναφέρεσθαι εἰς τὸν ἄνω τόπον συνίσταται ἡ ἀτμὶς ψυχομένη καὶ γίγνεται ὕδωρ· [361a] καὶ ὅταν εἰς ταὐτὸν συνωσθῶσι τὰ νέφη καὶ ἀντιπεριστῇ εἰς αὐτὰ ἡ ψύξις, ὕδωρ γίγνεται καὶ καταψύχει τὴν ξηρὰν ἀναθυμίασιν. παύουσί τε οὖν τὰ ὕδατα γιγνόμενα τοὺς ἀνέμους, καὶ παυομένων αὐτὰ γίγνεται διὰ ταύτας τὰς αἰτίας. ἔτι δὲ τοῦ γίγνεσθαι μάλιστα πνεύματα ἀπό τε τῆς ἄρκτου καὶ [361a.6] μεσημβρίας τὸ αὐτὸ αἴτιον· πλεῖστοι γὰρ βορέαι καὶ νότοι γίγνονται τῶν ἀνέμων· ὁ γὰρ ἥλιος τούτους μόνους οὐκ ἐπέρχεται τοὺς τόπους, ἀλλὰ πρὸς τούτους καὶ ἀπὸ τούτων, ἐπὶ δυσμὰς δὲ καὶ ἐπ’ ἀνατολὰς ἀεὶ φέρεται· διὸ τὰ νέφη συνίσταται ἐν τοῖς πλαγίοις, καὶ γίγνεται προσιόντος μὲν ἡ ἀναθυμίασις τοῦ ὑγροῦ, ἀπιόντος δὲ πρὸς τὸν ἐναντίον τόπον ὕδατα καὶ χειμῶνες. διὰ μὲν οὖν τὴν φορὰν τὴν ἐπὶ τροπὰς καὶ ἀπὸ τροπῶν θέρος γίγνεται καὶ χειμών, καὶ ἀνάγεταί τε ἄνω τὸ ὕδωρ καὶ γίγνεται πάλιν· ἐπεὶ δὲ πλεῖστον μὲν καταβαίνει ὕδωρ ἐν τούτοις τοῖς τόποις ἐφ’ οὓς τρέπεται καὶ ἀφ’ ὧν, οὗτοι δέ εἰσιν ὅ τε πρὸς ἄρκτον καὶ μεσημβρίαν, ὅπου δὲ πλεῖστον ὕδωρ ἡ γῆ δέχεται, ἐνταῦθα πλείστην ἀναγκαῖον γίγνεσθαι τὴν ἀναθυμίασιν παραπλησίως οἷον ἐκ χλωρῶν ξύλων καπνόν, ἡ δ’ ἀναθυμίασις αὕτη ἄνεμός ἐστιν, εὐλόγως ἂν οὖν ἐντεῦθεν γίγνοιτο τὰ πλεῖστα καὶ κυριώτατα τῶν πνευμάτων. καλοῦνται δ’ οἱ μὲν ἀπὸ τῆς ἄρκτου βορέαι, οἱ δὲ ἀπὸ τῆς μεσημβρίας νότοι. ἡ δὲ φορὰ λοξὴ αὐτῶν ἐστιν· περὶ γὰρ τὴν γῆν πνέουσιν εἰς ὀρθὸν γιγνομένης τῆς ἀναθυμιάσεως, ὅτι πᾶς ὁ κύκλῳ ἀὴρ συνέπεται τῇ φορᾷ. διὸ καὶ ἀπορήσειεν ἄν τις ποτέρωθεν ἡ ἀρχὴ τῶν πνευμάτων ἐστί, πότερον ἄνωθεν ἢ κάτωθεν· ἡ μὲν γὰρ κίνησις ἄνωθεν καὶ πρὶν πνεῖν, ὁ δ’ ἀὴρ ἐπίδηλος, κἂν ᾖ νέφος ἢ ἀχλύς· σημαίνει γὰρ κινουμένην πνεύματος ἀρχὴν πρὶν φανερῶς ἐληλυθέναι τὸν ἄνεμον, ὡς ἄνωθεν αὐτῶν ἐχόντων τὴν ἀρχήν. ἐπεὶ δ’ ἐστὶν ἄνεμος πλῆθός τι τῆς ξηρᾶς ἐκ γῆς ἀναθυμιάσεως κινούμενον περὶ τὴν γῆν, δῆλον ὅτι τῆς μὲν κινήσεως ἡ ἀρχὴ ἄνωθεν, τῆς δὲ ὕλης καὶ τῆς γενέσεως κάτωθεν· ᾗ μὲν γὰρ ῥευσεῖται τὸ ἀνιόν, ἐκεῖθεν τὸ αἴτιον· ἡ γὰρ φορὰ τῶν πορρωτέρω κυρία τῆς γῆς· καὶ ἅμα κάτωθεν μὲν εἰς ὀρθὸν ἀναφέρεται, καὶ πᾶν ἰσχύει μᾶλλον ἐγγύς, ἡ δὲ τῆς γενέσεως ἀρχὴ δῆλον ὡς ἐκ τῆς [361b] γῆς ἐστιν. ὅτι δ’ ἐκ πολλῶν ἀναθυμιάσεων συνιουσῶν κατὰ μικρόν, ὥσπερ αἱ τῶν ποταμῶν ἀρχαὶ γίγνονται νοτιζούσης τῆς γῆς, δῆλον καὶ ἐπὶ τῶν ἔργων· ὅθεν γὰρ ἑκάστοτε πνέουσιν, ἐλάχιστοι πάντες εἰσί, προϊόντες δὲ καὶ πόρρω λαμπροὶ πνέουσιν. ἔτι δὲ καὶ τὰ περὶ τὴν ἄρκτον ἐν τῷ χειμῶνι νήνεμα καὶ ἄπνοα, κατ’ αὐτὸν ἐκεῖνον τὸν τόπον· ἀλλὰ τὸ κατὰ μικρὸν ἀποπνέον καὶ λανθάνον ἔξω προϊὸν ἤδη πνεῦμα γίγνεται λαμπρόν. τίς μὲν οὖν ἐστιν ἡ τοῦ ἀνέμου φύσις καὶ πῶς γίγνεται, ἔτι δὲ αὐχμῶν τε πέρι καὶ ἐπομβρίας, καὶ διὰ τίν’ αἰτίαν καὶ παύονται καὶ γίγνονται μετὰ τοὺς ὄμβρους, διὰ τί τε βορέαι καὶ νότοι πλεῖστοι τῶν ἀνέμων εἰσίν, εἴρηται· πρὸς δὲ τούτοις καὶ περὶ τῆς φορᾶς αὐτῶν.

ὁ δ’ ἥλιος καὶ παύει καὶ συνεξορμᾷ τὰ πνεύματα· ἀσθενεῖς μὲν γὰρ καὶ ὀλίγας οὔσας τὰς ἀναθυμιάσεις μαραίνει τῷ πλείονι θερμῷ τὸ ἐν τῇ ἀναθυμιάσει ἔλαττον ὄν, καὶ διακρίνει. ἔτι δὲ αὐτὴν τὴν γῆν φθάνει ξηραίνων πρὶν γενέσθαι ἔκκρισιν ἀθρόαν, ὥσπερ εἰς πολὺ πῦρ ἐὰν ὀλίγον ἐμπέσῃ ὑπέκκαυμα, φθάνει πολλάκις πρὶν καπνὸν ποιῆσαι κατακαυθέν. διὰ μὲν οὖν ταύτας τὰς αἰτίας καταπαύει τε τὰ πνεύματα καὶ ἐξ ἀρχῆς γίγνεσθαι κωλύει, τῇ μὲν μαράνσει καταπαύων, τῷ δὲ τάχει τῆς ξηρότητος γίγνεσθαι κωλύων· διὸ περὶ Ὠρίωνος ἀνατολὴν μάλιστα γίγνεται νηνεμία, καὶ μέχρι τῶν ἐτησίων καὶ προδρόμων. ὅλως δὲ γίγνονται αἱ νηνεμίαι διὰ δύ’ αἰτίας· ἢ γὰρ διὰ ψῦχος ἀποσβεννυμένης τῆς ἀναθυμιάσεως, οἷον ὅταν γένηται πάγος ἰσχυρός, ἢ καταμαραινομένης ὑπὸ τοῦ πνίγους. αἱ δὲ πλεῖσται καὶ ἐν ταῖς ἀνὰ μέσον ὥραις, ἢ τῷ μήπω ἀναθυμιᾶσθαι, ἢ τῷ ἤδη ἐξεληλυθέναι τὴν ἀναθυμίασιν καὶ ἄλλην μήπω ἐπιρρεῖν. ἄκριτος δὲ καὶ χαλεπὸς ὁ Ὠρίων εἶναι δοκεῖ, καὶ δύνων καὶ ἐπιτέλλων, διὰ τὸ ἐν μεταβολῇ ὥρας συμβαίνειν τὴν δύσιν καὶ τὴν ἀνατολήν, θέρους ἢ χειμῶνος, καὶ διὰ τὸ μέγεθος τοῦ ἄστρου ἡμερῶν γίγνεται πλῆθος· αἱ δὲ μεταβολαὶ πάντων ταραχώδεις διὰ τὴν ἀοριστίαν εἰσίν. οἱ δ’ ἐτησίαι πνέουσι μετὰ τροπὰς καὶ κυνὸς ἐπιτολήν, καὶ οὔτε τηνικαῦτα ὅτε μάλιστα πλησιάζει ὁ ἥλιος, [362a] οὔτε ὅτε πόρρω· καὶ τὰς μὲν ἡμέρας πνέουσι, τὰς δὲ νύκτας παύονται. αἴτιον δ’ ὅτι πλησίον μὲν ὢν φθάνει ξηραίνων πρὶν γενέσθαι τὴν ἀναθυμίασιν· ὅταν δ’ ἀπέλθῃ μικρόν, σύμμετρος ἤδη γίγνεται ἡ ἀναθυμίασις καὶ ἡ θερμότης, ὥστε τὰ πεπηγότα ὕδατα τήκεσθαι, καὶ τῆς γῆς ξηραινομένης ὑπό τε τῆς οἰκείας θερμότητος καὶ ὑπὸ τῆς τοῦ ἡλίου οἷον τύφεσθαι καὶ θυμιᾶσθαι. τῆς δὲ νυκτὸς λωφῶσι διὰ τὸ τὰ πεπηγότα τηκόμενα παύεσθαι διὰ τὴν ψυχρότητα τῶν νυκτῶν. θυμιᾶται δ’ οὔτε τὸ πεπηγὸς οὔτε τὸ μηδὲν ἔχον ξηρόν, ἀλλ’ ὅταν ἔχῃ τὸ ξηρὸν ὑγρότητα, τοῦτο θερμαινόμενον θυμιᾶται. ἀποροῦσι δέ τινες διὰ τί βορέαι μὲν γίγνονται συνεχεῖς, οὓς καλοῦμεν ἐτησίας, μετὰ τὰς θερινὰς τροπάς, νότοι δὲ οὕτως οὐ γίγνονται μετὰ τὰς χειμερινάς. ἔχει δὲ οὐκ ἀλόγως· γίγνονται μὲν γὰρ οἱ καλούμενοι λευκόνοτοι τὴν ἀντικειμένην ὥραν, οὐχ οὕτως δὲ γίγνονται συνεχεῖς· διὸ λανθάνοντες ποιοῦσιν ἐπιζητεῖν. αἴτιον δ’ ὅτι ὁ μὲν βορέας ἀπὸ τῶν ὑπὸ τὴν ἄρκτον πνεῖ τόπων, οἳ πλήρεις ὕδατος καὶ χιόνος εἰσὶ πολλῆς, ὧν τηκομένων ὑπὸ τοῦ ἡλίου μετὰ τὰς θερινὰς τροπὰς μᾶλλον ἢ ἐν αὐταῖς πνέουσιν οἱ ἐτησίαι· οὕτω γὰρ καὶ τὰ πνίγη γίγνεται, οὐχ ὅταν μάλιστα πλησιάζῃ πρὸς ἄρκτον, ἀλλ’ ὅταν πλείων μὲν ᾖ χρόνος θερμαίνοντι, ἔτι δὲ ἐγγύς. ὁμοίως δὲ καὶ μετὰ χειμερινὰς τροπὰς πνέουσιν οἱ ὀρνιθίαι· καὶ γὰρ οὗτοι ἐτησίαι εἰσὶν ἀσθενεῖς· ἐλάττους δὲ καὶ ὀψιαίτεροι τῶν ἐτησίων πνέουσιν· ἑβδομηκοστῇ γὰρ ἄρχονται πνεῖν διὰ τὸ πόρρω ὄντα τὸν ἥλιον ἐνισχύειν ἧττον. οὐ συνεχεῖς δ’ ὁμοίως πνέουσι, διότι τὰ μὲν ἐπιπολῆς καὶ ἀσθενῆ τότε ἀποκρίνεται, τὰ δὲ μᾶλλον πεπηγότα πλείονος δεῖται θερμότητος. διὸ διαλείποντες οὗτοι πνέουσιν, ἕως ἂν ἐπὶ τροπαῖς πάλιν ταῖς θεριναῖς πνεύσωσιν οἱ ἐτησίαι, ἐπεὶ θέλει γε ὅτι μάλιστα συνεχῶς ἐντεῦθεν ἀεὶ πνεῖν ἄνεμος. ὁ δὲ νότος ἀπὸ τῆς θερινῆς τροπῆς πνεῖ, καὶ οὐκ ἀπὸ τῆς ἑτέρας ἄρκτου. δύο γὰρ ὄντων τμημάτων τῆς δυνατῆς οἰκεῖσθαι χώρας, τῆς μὲν πρὸς τὸν ἄνω πόλον, καθ’ ἡμᾶς, τῆς δὲ πρὸς τὸν ἕτερον καὶ πρὸς μεσημβρίαν, καὶ οὔσης οἷον τυμπάνου (τοιοῦτον γὰρ σχῆμα τῆς γῆς [362b] ἐκτέμνουσιν αἱ ἐκ τοῦ κέντρου αὐτῆς ἀγόμεναι, καὶ ποιοῦσι δύο κώνους, τὸν μὲν ἔχοντα βάσιν τὸν τροπικόν, τὸν δὲ τὸν διὰ παντὸς φανερόν, τὴν δὲ κορυφὴν ἐπὶ τοῦ μέσου τῆς γῆς· τὸν αὐτὸν δὲ τρόπον πρὸς τὸν κάτω πόλον ἕτεροι δύο κῶνοι τῆς γῆς ἐκτμήματα ποιοῦσι. ταῦτα δ’ οἰκεῖσθαι μόνα δυνατόν, καὶ οὔτ’ ἐπέκεινα τῶν τροπῶν (σκιὰ γὰρ οὐκ ἂν ἦν πρὸς ἄρκτον, νῦν δ’ ἀοίκητοι πρότερον γίγνονται οἱ τόποι πρὶν ἢ ὑπολείπειν ἢ μεταβάλλειν τὴν σκιὰν πρὸς μεσημβρίαν) τά θ’ ὑπὸ τὴν ἄρκτον ὑπὸ ψύχους ἀοίκητα. φέρεται δὲ καὶ ὁ στέφανος κατὰ τοῦτον τὸν τόπον· φαίνεται γὰρ ὑπὲρ κεφαλῆς γιγνόμενος ἡμῖν, ὅταν ᾖ κατὰ τὸν μεσημβρινόν. διὸ καὶ γελοίως γράφουσι νῦν τὰς περιόδους τῆς γῆς· γράφουσι γὰρ κυκλοτερῆ τὴν οἰκουμένην, τοῦτο δ’ ἐστὶν ἀδύνατον κατά τε τὰ φαινόμενα καὶ κατὰ τὸν λόγον. ὅ τε γὰρ λόγος δείκνυσιν ὅτι ἐπὶ πλάτος μὲν ὥρισται, τὸ δὲ κύκλῳ συνάπτειν ἐνδέχεται διὰ τὴν κρᾶσιν, -οὐ γὰρ ὑπερβάλλει τὰ καύματα καὶ τὸ ψῦχος κατὰ μῆκος, ἀλλ' ἐπὶ [362b.18] πλάτος, ὥστ' εἰ μή που κωλύει θαλάττης πλῆθος, ἅπαν εἶναι πορεύσιμον, -καὶ κατὰ τὰ φαινόμενα περί τε τοὺς πλοῦς καὶ τὰς πορείας· πολὺ γὰρ τὸ μῆκος διαφέρει τοῦ πλάτους. τὸ γὰρ ἀπὸ Ἡρακλείων στηλῶν μέχρι τῆς Ἰνδικῆς τοῦ ἐξ Αἰθιοπίας πρὸς τὴν Μαιῶτιν καὶ τοὺς ἐσχατεύοντας τῆς Σκυθίας τόπους πλέον ἢ πέντε πρὸς τρία τὸ μέγεθός ἐστιν, ἐάν τέ τις τοὺς πλοῦς λογίζηται καὶ τὰς ὁδούς, ὡς ἐνδέχεται λαμβάνειν τῶν τοιούτων τὰς ἀκριβείας. καίτοι ἐπὶ πλάτος μὲν μέχρι τῶν ἀοικήτων ἴσμεν τὴν οἰκουμένην· ἔνθα μὲν γὰρ διὰ ψῦχος οὐκέτι κατοικοῦσιν, ἔνθα δὲ διὰ τὴν ἀλέαν. τὰ δὲ τῆς Ἰνδικῆς ἔξω καὶ τῶν στηλῶν τῶν Ἡρακλείων διὰ τὴν θάλατταν οὐ φαίνεται συνείρειν, τῷ συνεχῶς εἶναι πᾶσαν οἰκουμένην)· ἐπεὶ δ' ὁμοίως ἔχειν ἀνάγκη τόπον τινὰ πρὸς τὸν ἕτερον πόλον ὥσπερ ὃν ἡμεῖς οἰκοῦμεν πρὸς τὸν ὑπὲρ ἡμῶν, δῆλον ὡς ἀνάλογον ἕξει τά τ' ἄλλα καὶ τῶν πνευμάτων ἡ στάσις· ὥστε καθάπερ ἐνταῦθα βορέας ἐστίν, κἀκείνοις ἀπὸ τῆς ἐκεῖ ἄρκτου τις ἄνεμος οὕτως ὤν, ὃν οὐδὲν δυνατὸν διέχειν δεῦρο, ἐπεὶ οὐδ' ὁ βορέας οὗτος εἰς τὴν ἐνταῦθα [363a] οἰκουμένην πᾶσάν ἐστιν· ἔστιν γὰρ ὥσπερ ἀπόγειον τὸ πνεῦμα τὸ βόρειον [[Μετεωρολογικά/Β#ρέως ὁ βορέας οὗτος εἰς τὴν ἐνταῦθα οἰκουμένην πνεῖ|[ἕως ὁ βορέας οὗτος εἰς τὴν ἐνταῦθα οἰκουμένην πνεῖ]]]. ἀλλὰ διὰ τὸ τὴν οἴκησιν κεῖσθαι ταύτην πρὸς ἄρκτον, πλεῖστοι βορέαι πνέουσιν. ὅμως δὲ καὶ ἐνταῦθα ἐλλείπει καὶ οὐ δύναται πόρρω διήκειν, ἐπεὶ περὶ τὴν ἔξω Λιβύης θάλατταν τὴν νοτίαν, ὥσπερ ἐνταῦθα οἱ βορέαι καὶ οἱ νότοι πνέουσιν, οὕτως ἐκεῖ εὖροι καὶ ζέφυροι διαδεχόμενοι συνεχεῖς ἀεὶ πνέουσιν. ὅτι μὲν οὖν ὁ νότος οὐκ ἔστιν ὁ ἀπὸ τοῦ ἑτέρου πόλου πνέων ἄνεμος, δῆλον. ἐπεὶ δ' οὔτ' ἐκεῖνος, οὔτε ὁ ἀπὸ χειμερινῆς τροπῆς (δέοι γὰρ ἂν ἄλλον ἀπὸ θερινῆς εἶναι τροπῆς· οὕτως γὰρ τὸ ἀνάλογον ἀποδώσει· νῦν δ' οὐκ ἔστιν· εἷς γὰρ μόνος φαίνεται πνέων ἐκ τῶν ἐκεῖθεν τόπων)· ὥστ' ἀνάγκη τὸν ἀπὸ τοῦ κατακεκαυμένου τόπου πνέοντα ἄνεμον εἶναι νότον. ἐκεῖνος δ' ὁ τόπος διὰ τὴν τοῦ ἡλίου γειτνίασιν οὐκ ἔχει ὕδατα καὶ νομάς, αἳ διὰ τὴν πῆξιν ποιήσουσιν ἐτησίας· ἀλλὰ διὰ τὸ τὸν τόπον εἶναι πολὺ πλείω ἐκεῖνον καὶ ἀναπεπταμένον, μείζων καὶ πλείων καὶ μᾶλλον ἀλεεινὸς ἄνεμος ὁ νότος ἐστὶ τοῦ βορέου, καὶ διήκει μᾶλλον δεῦρο ἢ οὗτος ἐκεῖ. τίς μὲν οὖν αἰτία τούτων ἐστὶ τῶν ἀνέμων, καὶ πῶς ἔχουσι πρὸς ἀλλήλους, εἴρηται.

περὶ δὲ θέσεως αὐτῶν, καὶ τίνες ἐναντίοι τίσι, καὶ ποίους ἅμα πνεῖν ἐνδέχεται καὶ ποίους οὔ, ἔτι δὲ καὶ τίνες καὶ πόσοι τυγχάνουσιν ὄντες, καὶ πρὸς τούτοις περὶ τῶν ἄλλων παθημάτων ὅσα μὴ συμβέβηκεν ἐν τοῖς προβλήμασιν εἰρῆσθαι τοῖς κατὰ μέρος, νῦν λέγωμεν. δεῖ δὲ περὶ τῆς θέσεως ἅμα τοὺς λόγους ἐκ τῆς ὑπογραφῆς θεωρεῖν. γέγραπται μὲν οὖν, τοῦ μᾶλλον εὐσήμως ἔχειν, ὁ τοῦ ὁρίζοντος κύκλος· διὸ καὶ στρογγύλος. δεῖ δὲ νοεῖν αὐτοῦ τὸ ἕτερον ἔκτμημα τὸ ὑφ’ ἡμῶν οἰκούμενον· ἔσται γὰρ κἀκεῖνο διελεῖν τὸν αὐτὸν τρόπον. ὑποκείσθω δὲ πρῶτον μὲν ἐναντία κατὰ τόπον εἶναι τὰ πλεῖστον ἀπέχοντα κατὰ τόπον, ὥσπερ κατ’ εἶδος ἐναντία τὰ πλεῖστον ἀπέχοντα κατὰ τὸ εἶδος· πλεῖστον δ’ ἀπέχει κατὰ τόπον τὰ κείμενα πρὸς ἄλληλα κατὰ διάμετρον. ἔστω οὖν τὸ μὲν ἐφ’ ᾧ Α δυσμὴ ἰσημερινή, [363b] ἐναντίος δὲ τούτῳ τόπος, ἐφ’ οὗ τὸ Β, ἀνατολὴ ἰσημερινή· ἄλλη δὲ διάμετρος ταύτην πρὸς ὀρθὴν τέμνουσα, ἧς τὸ ἐφ’ οὗ Η ἔστω ἄρκτος· τούτῳ δ’ ἐναντίον ἐξ ἐναντίας, τὸ ἐφ’ οὗ Θ, μεσημβρία· τὸ δ’ ἐφ’ οὗ Ζ ἀνατολὴ θερινή, τὸ δ’ ἐφ’ ᾧ Ε δυσμὴ θερινή, τὸ δ’ ἐφ’ οὗ Δ ἀνατολὴ χειμερινή, τὸ δ’ ἐφ’ οὗ Γ δυσμὴ χειμερινή. ἀπὸ δὲ τοῦ Ζ ἤχθω διάμετρος ἐπὶ τὸ Γ, καὶ ἀπὸ τοῦ Δ ἐπὶ τὸ Ε. ἐπεὶ οὖν τὰ μὲν πλεῖστον ἀπέχοντα κατὰ τόπον ἐναντία κατὰ τόπον, πλεῖστον δ’ ἀπέχει τὰ κατὰ διάμετρον, ἀναγκαῖον καὶ τῶν πνευμάτων ταῦτα ἀλλήλοις ἐναντία εἶναι, ὅσα κατὰ διάμετρόν ἐστιν. καλεῖται δὲ κατὰ τὴν θέσιν τῶν τόπων τὰ πνεύματα ὧδε· ζέφυρος μὲν τὸ ἀπὸ τοῦ Α· τοῦτο γὰρ δυσμὴ ἰσημερινή. ἐναντίος δὲ τούτῳ ἀπηλιώτης ἀπὸ τοῦ Β· τοῦτο γὰρ ἀνατολὴ ἰσημερινή. βορέας δὲ <καὶ> ἀπαρκτίας ἀπὸ τοῦ Η· ἐνταῦθα γὰρ ἡ ἄρκτος. ἐναντίος δὲ τούτῳ νότος ἀπὸ τοῦ Θ· μεσημβρία τε γὰρ αὕτη ἀφ’ ἧς πνεῖ, καὶ τὸ Θ τῷ Η ἐναντίον· κατὰ διάμετρον γάρ. ἀπὸ δὲ τοῦ Ζ καικίας· αὕτη γὰρ ἀνατολὴ θερινή. ἐναντίος δ’ οὐχ ὁ ἀπὸ τοῦ Ε πνέων, ἀλλ’ ὁ ἀπὸ τοῦ Γ λίψ· οὗτος γὰρ ἀπὸ δυσμῆς χειμερινῆς, ἐναντίος δὲ τούτῳ (κατὰ διάμετρον γὰρ κεῖται). ἀπὸ δὲ τοῦ Δ εὖρος· οὗτος γὰρ ἀπ’ ἀνατολῆς χειμερινῆς πνεῖ, γειτνιῶν τῷ νότῳ· διὸ καὶ πολλάκις εὐρόνοτοι λέγονται πνεῖν. ἐναντίος δὲ τούτῳ οὐχ ὁ ἀπὸ τοῦ Γ λίψ, ἀλλ’ ὁ ἀπὸ τοῦ Ε, ὃν καλοῦσιν οἱ μὲν ἀργέστην; οἱ δ’ ὀλυμπίαν, οἱ δὲ σκίρωνα· οὗτος γὰρ ἀπὸ δυσμῆς θερινῆς πνεῖ, καὶ κατὰ διάμετρον αὐτῷ κεῖται μόνος. οὗτοι μὲν οὖν οἱ κατὰ διάμετρόν τε κείμενοι ἄνεμοι καὶ οἷς εἰσιν ἐναντίοι· ἕτεροι δ’ εἰσὶν καθ’ οὓς οὐκ ἔστιν ἐναντία πνεύματα. ἀπὸ μὲν γὰρ τοῦ Ι ὃν καλοῦσι θρασκίαν· οὗτος γὰρ μέσος ἀργέστου καὶ ἀπαρκτίου· ἀπὸ δὲ τοῦ Κ ὃν καλοῦσιν μέσην· οὗτος γὰρ μέσος καικίου καὶ ἀπαρκτίου. ἡ δὲ τοῦ ΙΚ διάμετρος βούλεται μὲν κατὰ τὸν διὰ παντὸς εἶναι φαινόμενον, οὐκ ἀκριβοῖ δέ. ἐναντία δὲ τούτοις οὐκ ἔστι τοῖς πνεύμασιν, οὔτε τῷ μέσῃ (ἔπνει γὰρ ἄν τις ἐφ’ οὗ τὸ Μ· τοῦτο γὰρ κατὰ [364a] διάμετρον) οὔτε τῷ Ι, τῷ θρασκίᾳ (ἔπνει γὰρ ἂν ἀπὸ τοῦ Ν· τοῦτο γὰρ κατὰ διάμετρον τὸ σημεῖον, εἰ μὴ ἀπ’ αὐτοῦ καὶ ἐπ’ ὀλίγον πνεῖ τις ἄνεμος, ὃν καλοῦσιν οἱ περὶ τὸν τόπον ἐκεῖνον φοινικίαν). τὰ μὲν οὖν κυριώτατα καὶ διωρισμένα πνεύματα ταῦτ’ ἐστὶ καὶ τοῦτον τέτακται τὸν τρόπον· τοῦ δ’ εἶναι πλείους ἀνέμους ἀπὸ τῶν πρὸς ἄρκτον τόπων ἢ τῶν πρὸς μεσημβρίαν αἴτιον τό τε τὴν οἰκουμένην ὑποκεῖσθαι πρὸς τοῦτον τὸν τόπον, καὶ ὅτι πολλῷ πλέον ὕδωρ καὶ χιὼν ἀπωθεῖται εἰς τοῦτο τὸ μέρος διὰ τὸ ἐκεῖνα ὑπὸ τὸν ἥλιον εἶναι καὶ τὴν ἐκείνου φοράν, ὧν τηκομένων εἰς τὴν γῆν καὶ θερμαινομένων ὑπὸ τοῦ ἡλίου καὶ τῆς γῆς ἀναγκαῖον πλείω καὶ ἐπὶ πλείω τόπον γίγνεσθαι τὴν ἀναθυμίασιν διὰ ταύτην τὴν αἰτίαν. ἔστι δὲ τῶν εἰρημένων πνευμάτων βορέας μὲν ὅ τ’ ἀπαρκτίας κυριώτατα, καὶ θρασκίας καὶ μέσης· ὁ δὲ καικίας κοινὸς ἀπηλιώτου καὶ βορέου· νότος δὲ ὅ τε ἰθαγενὴς ὁ ἀπὸ μεσημβρίας καὶ λίψ· ἀπηλιώτης δὲ ὅ τε ἀπ’ ἀνατολῆς ἰσημερινῆς καὶ ὁ εὖρος· ὁ δὲ φοινικίας κοινός· ζέφυρος δὲ ὅ τε ἰθαγενὴς καὶ ὁ ἀργέστης καλούμενος. ὅλως δὲ τὰ μὲν βόρεια τούτων καλεῖται, τὰ δὲ νότια· προστίθεται δὲ τὰ μὲν ζεφυρικὰ τῷ βορέᾳ (ψυχρότερα γὰρ διὰ τὸ ἀπὸ δυσμῶν πνεῖν), νότῳ δὲ τὰ ἀπηλιωτικά (θερμότερα γὰρ διὰ τὸ ἀπ’ ἀνατολῆς πνεῖν). διωρισμένων οὖν τῷ ψυχρῷ καὶ τῷ θερμῷ καὶ ἀλεεινῷ τῶν πνευμάτων οὕτως ἐκάλεσαν. θερμότερα μὲν τὰ ἀπὸ τῆς ἕω τῶν ἀπὸ δυσμῆς, ὅτι πλείω χρόνον ὑπὸ τὸν ἥλιόν ἐστι τὰ ἀπ’ ἀνατολῆς· τὰ δ’ ἀπὸ δυσμῆς ἀπολείπει τε θᾶττον καὶ πλησιάζει τῷ τόπῳ ὀψιαίτερον. οὕτω δὲ τεταγμένων τῶν ἀνέμων, δῆλον ὅτι ἅμα πνεῖν τοὺς μὲν ἐναντίους οὐχ οἷόν τε (κατὰ διάμετρον γάρ· ἅτερος οὖν παύσεται ἀποβιασθείς), τοὺς δὲ μὴ οὕτως κειμένους πρὸς ἀλλήλους οὐδὲν κωλύει, οἷον τὸν Ζ καὶ Δ. διὰ [364a.31] τοῦτο ἅμα πνέουσιν ἐνίοτε ἀμφότεροι οὔριοι, ἐπὶ τὸ αὐτὸ σημεῖον, οὐκ ἐκ ταὐτοῦ οὐδὲ τῷ αὐτῷ πνεύματι. κατὰ δὲ τὰς ὥρας τὰς ἐναντίας οἱ ἐναντίοι μάλιστα πνέουσιν, οἷον περὶ [364b] ἰσημερίαν τὴν μὲν ἐαρινὴν καικίας καὶ ὅλως τὰ ἐπέκεινα τροπῆς θερινῆς, περὶ δὲ τὴν μετοπωρινὴν λίβες, περὶ δὲ τροπὰς θερινὰς μὲν ζέφυρος, χειμερινὰς δὲ εὖρος. ἐπιπίπτουσι δὲ τοῖς ἄλλοις μάλιστα καὶ παύουσιν ἀπαρκτίαι καὶ θρασκίαι καὶ ἀργέσται· διὰ τὸ ἐγγυτάτω γὰρ τὴν ὁρμὴν αὐτῶν εἶναι πολλοί τε καὶ ἰσχυροὶ πνέουσι μάλιστα οὗτοι. διὸ καὶ αἰθριώτατοί εἰσι τῶν ἀνέμων· πνέοντες γὰρ ἐγγύθεν μάλιστα ἀποβιαζόμενοί τε τἆλλα πνεύματα παύουσι, καὶ ἀποφυσῶντες τὰ συνιστάμενα νέφη ποιοῦσιν αἰθρίαν, ἂν μὴ ψυχροὶ σφόδρα τύχωσιν ἅμα ὄντες. τότε δὲ οὐκ αἴθριοι· ἐὰν γὰρ ὦσι μᾶλλον ψυχροὶ ἢ μεγάλοι, φθάνουσι πηγνύντες ἢ προωθοῦντες. ὁ δὲ καικίας οὐκ αἴθριος, ὅτι ἀνακάμπτει εἰς αὑτόν· ὅθεν καὶ λέγεται ἡ παροιμία “ἕλκων ἐφ’ αὑτὸν ὥστε καικίας νέφος.” αἱ δὲ περιστάσεις γίγνονται αὐτῶν καταπαυομένων εἰς τοὺς ἐχομένους κατὰ τὴν τοῦ ἡλίου μετάστασιν, διὰ τὸ κινεῖσθαι μάλιστα τὸ ἐχόμενον τῆς ἀρχῆς· ἡ δὲ ἀρχὴ οὕτω κινεῖται τῶν πνευμάτων ὡς ὁ ἥλιος. οἱ ἐναντίοι δὲ ἢ ταὐτὸ ποιοῦσιν ἢ ἐναντίον, οἷον ὑγροὶ λὶψ καὶ καικίας, ὃν ἑλλησποντίαν ἔνιοι καλοῦσιν, καὶ εὖρος, ὃν ἀπηλιώτην. ξηροὶ δὲ ἀργέστης καὶ εὖρος· ἀπ’ ἀρχῆς δὲ οὗτος ξηρός, τελευτῶν δὲ ὑδατώδης. νιφετώδης δὲ μέσης καὶ ἀπαρκτίας μάλιστα· οὗτοι γὰρ ψυχρότατοι. χαλαζώδεις δὲ ἀπαρκτίας καὶ θρασκίας καὶ ἀργέστης. καυματώδης δὲ νότος καὶ ζέφυρος καὶ εὖρος. νέφεσι δὲ πυκνοῦσι τὸν οὐρανὸν καικίας μὲν σφόδρα, λὶψ δὲ ἀραιοτέροις, καικίας μὲν διά τε τὸ ἀνακάμπτειν πρὸς αὑτὸν καὶ διὰ τὸ κοινὸς εἶναι βορέου καὶ εὔρου, ὥστε διὰ μὲν τὸ ψυχρὸς εἶναι πηγνὺς τὸν ἀτμίζοντα ἀέρα συνίστησι, διὰ δὲ τὸ τῷ τόπῳ ἀπηλιωτικὸς εἶναι ἔχει πολλὴν ὕλην καὶ ἀτμίδα ἣν προωθεῖ. αἴθριοι δὲ ἀπαρκτίας, θρασκίας, ἀργέστης· ἡ δ’ αἰτία εἴρηται πρότερον. ἀστραπὰς δὲ ποιοῦσιν μάλιστα οὗτοί τε καὶ ὁ μέσης· διὰ μὲν γὰρ τὸ ἐγγύθεν πνεῖν ψυχροί εἰσιν, διὰ δὲ τὸ ψυχρὸν ἀστραπὴ γίγνεται· ἐκκρίνεται γὰρ συνιόντων τῶν νεφῶν. διὸ καὶ ἔνιοι τῶν αὐτῶν τούτων [365a] χαλαζώδεις εἰσίν· ταχὺ γὰρ πηγνύουσιν. ἐκνεφίαι δὲ γίγνονται μετοπώρου μὲν μάλιστα, εἶτα ἔαρος, καὶ μάλιστα ἀπαρκτίας καὶ θρασκίας καὶ ἀργέστης. αἴτιον δ’ ὅτι οἱ ἐκνεφίαι γίγνονται μάλιστα ὅταν τῶν ἄλλων πνεόντων ἐμπίπτωσιν ἕτεροι, οὗτοι δὲ μάλιστα ἐμπίπτουσιν τοῖς ἄλλοις πνέουσιν· ἡ δ’ αἰτία εἴρηται καὶ τούτου πρότερον. οἱ δ’ ἐτησίαι περιίστανται τοῖς μὲν περὶ δυσμὰς οἰκοῦσιν ἐκ τῶν ἀπαρκτίων εἰς θρασκίας καὶ ἀργέστας καὶ ζεφύρους (ὁ γὰρ ἀπαρκτίας . . . ζέφυρός ἐστιν), ἀρχόμενοι μὲν ἀπὸ τῆς ἄρκτου, τελευτῶντες δ’ εἰς τοὺς πόρρω· τοῖς δὲ πρὸς ἕω περιίστανται μέχρι τοῦ ἀπηλιώτου. περὶ μὲν οὖν ἀνέμων, τῆς τε ἐξ ἀρχῆς αὐτῶν γενέσεως καὶ οὐσίας καὶ τῶν συμβαινόντων κοινῇ τε παθημάτων καὶ περὶ ἕκαστον, τοσαῦθ’ ἡμῖν εἰρήσθω.

περὶ δὲ σεισμοῦ καὶ κινήσεως γῆς μετὰ ταῦτα λεκτέον· ἡ γὰρ αἰτία τοῦ πάθους ἐχομένη τούτου τοῦ γένους ἐστίν. ἔστι δὲ τὰ παρειλημμένα μέχρι γε τοῦ νῦν χρόνου τρία καὶ παρὰ τριῶν. Ἀναξαγόρας τε γὰρ ὁ Κλαζομένιος καὶ πρότερον Ἀναξιμένης ὁ Μιλήσιος ἀπεφήναντο, καὶ τούτων ὕστερον Δημόκριτος ὁ Ἀβδηρίτης. Ἀναξαγόρας μὲν οὖν φησι τὸν αἰθέρα πεφυκότα φέρεσθαι ἄνω, ἐμπίπτοντα δ’ εἰς τὰ κάτω τῆς γῆς καὶ κοῖλα κινεῖν αὐτήν· τὰ μὲν γὰρ ἄνω συναληλεῖφθαι διὰ τοὺς ὄμβρους (ἐπεὶ φύσει γε ἅπασαν ὁμοίως εἶναι σομφήν), ὡς ὄντος τοῦ μὲν ἄνω τοῦ δὲ κάτω τῆς ὅλης σφαίρας, καὶ ἄνω μὲν τούτου ὄντος τοῦ μορίου ἐφ’ οὗ τυγχάνομεν οἰκοῦντες, κάτω δὲ θατέρου. πρὸς μὲν οὖν ταύτην τὴν αἰτίαν οὐδὲν ἴσως δεῖ λέγειν ὡς λίαν ἁπλῶς εἰρημένην· τό τε γὰρ ἄνω καὶ τὸ κάτω νομίζειν οὕτως ἔχειν ὥστε μὴ πρὸς μὲν τὴν γῆν πάντῃ φέρεσθαι τὰ βάρος ἔχοντα τῶν σωμάτων, ἄνω δὲ τὰ κοῦφα καὶ τὸ πῦρ, εὔηθες, καὶ ταῦθ’ ὁρῶντας τὸν ὁρίζοντα τὴν οἰκουμένην, ὅσην ἡμεῖς ἴσμεν, ἕτερον ἀεὶ γιγνόμενον μεθισταμένων, ὡς οὔσης κυρτῆς καὶ σφαιροειδοῦς· καὶ τὸ λέγειν μὲν ὡς διὰ τὸ μέγεθος ἐπὶ τοῦ ἀέρος μένειν, σείεσθαι δὲ φάσκειν τυπτομένην κάτωθεν ἄνω δι’ ὅλης. πρὸς δὲ τούτοις οὐδὲν ἀποδίδωσι τῶν συμβαινόντων περὶ τοὺς σεισμούς· οὔτε γὰρ χῶραι οὔτε ὧραι αἱ τυχοῦσαι μετέχουσι τούτου τοῦ πάθους. [365b] Δημόκριτος δέ φησι πλήρη τὴν γῆν ὕδατος οὖσαν, καὶ πολὺ δεχομένην ἕτερον ὄμβριον ὕδωρ, ὑπὸ τούτου κινεῖσθαι· πλείονός τε γὰρ γιγνομένου διὰ τὸ μὴ δύνασθαι δέχεσθαι τὰς κοιλίας ἀποβιαζόμενον ποιεῖν τὸν σεισμόν, καὶ ξηραινομένην ἕλκουσαν εἰς τοὺς κενοὺς τόπους ἐκ τῶν πληρεστέρων τὸ μεταβάλλον ἐμπῖπτον κινεῖν. Ἀναξιμένης δέ φησιν βρεχομένην τὴν γῆν καὶ ξηραινομένην ῥήγνυσθαι, καὶ ὑπὸ τούτων τῶν ἀπορρηγνυμένων κολωνῶν ἐμπιπτόντων σείεσθαι· διὸ καὶ γίγνεσθαι τοὺς σεισμοὺς ἔν τε τοῖς αὐχμοῖς καὶ πάλιν ἐν ταῖς ἐπομβρίαις· ἔν τε γὰρ τοῖς αὐχμοῖς, ὥσπερ εἴρηται, ξηραινομένην ῥήγνυσθαι, καὶ ὑπὸ τῶν ὑδάτων ὑπερυγραινομένην διαπίπτειν. ἔδει δὲ τούτου συμβαίνοντος ὑπονοστοῦσαν πολλαχῇ φαίνεσθαι τὴν γῆν. ἔτι δὲ διὰ τίν’ αἰτίαν περὶ τόπους τινὰς πολλάκις γίγνεται τοῦτο τὸ πάθος οὐδεμιᾷ διαφέροντας ὑπερβολῇ τοιαύτῃ παρὰ τοὺς ἄλλους; καίτοι ἐχρῆν. ὅλως δὲ τοῖς οὕτως ὑπολαμβάνουσιν ἀναγκαῖον ἧττον ἀεὶ τοὺς σεισμοὺς φάναι γίγνεσθαι, καὶ τέλος παύσασθαί ποτε σειομένην· τὸ γὰρ σαττόμενον τοιαύτην ἔχει φύσιν. ὥστ’ εἰ τοῦτ’ ἀδύνατον, δῆλον ὅτι ἀδύνατον καὶ ταύτην εἶναι τὴν αἰτίαν.

ἀλλ’ ἐπειδὴ φανερὸν ὅτι ἀναγκαῖον καὶ ἀπὸ ὑγροῦ καὶ ἀπὸ ξηροῦ γίγνεσθαι ἀναθυμίασιν, ὥσπερ εἴπομεν ἐν τοῖς πρότερον, ἀνάγκη τούτων ὑπαρχόντων γίγνεσθαι τοὺς σεισμούς. ὑπάρχει γὰρ ἡ γῆ καθ’ αὑτὴν μὲν ξηρά, διὰ δὲ τοὺς ὄμβρους ἔχουσα ἐν αὑτῇ νοτίδα πολλήν, ὥσθ’ ὑπό τε τοῦ ἡλίου καὶ τοῦ ἐν αὑτῇ πυρὸς θερμαινομένης πολὺ μὲν ἔξω πολὺ δ’ ἐντὸς γίγνεσθαι τὸ πνεῦμα· καὶ τοῦτο ὁτὲ μὲν συνεχὲς ἔξω ῥεῖ πᾶν, ὁτὲ δ’ εἴσω πᾶν, ἐνίοτε δὲ καὶ μερίζεται. εἰ δὴ τοῦτ’ ἀδύνατον ἄλλως ἔχειν, τὸ μετὰ τοῦτο σκεπτέον ἂν εἴη ποῖον κινητικώτατον εἴη τῶν σωμάτων· ἀνάγκη γὰρ τὸ ἐπὶ πλεῖστόν τε πεφυκὸς ἰέναι καὶ σφοδρότατον μάλιστα τοιοῦτον εἶναι. σφοδρότατον μὲν οὖν ἐξ ἀνάγκης τὸ τάχιστα φερόμενον· πλήσσει γὰρ μάλιστα διὰ τὸ τάχος· ἐπὶ πλεῖστον δὲ πέφυκε διιέναι τὸ διὰ παντὸς ἰέναι μάλιστα δυνάμενον, τοιοῦτον δὲ τὸ λεπτότατον. ὥστ’ εἴπερ ἡ τοῦ [366a] πνεύματος φύσις τοιαύτη, μάλιστα τῶν σωμάτων τὸ πνεῦμα κινητικόν· καὶ γὰρ τὸ πῦρ ὅταν μετὰ πνεύματος ᾖ, γίγνεται φλὸξ καὶ φέρεται ταχέως. οὐκ ἂν οὖν ὕδωρ οὐδὲ γῆ αἴτιον εἴη, ἀλλὰ πνεῦμα τῆς κινήσεως, ὅταν εἴσω τύχῃ ῥυὲν τὸ ἔξω ἀναθυμιώμενον. διὸ γίγνονται νηνεμίας οἱ πλεῖστοι καὶ μέγιστοι τῶν σεισμῶν· συνεχὴς γὰρ οὖσα ἡ ἀναθυμίασις ἀκολουθεῖ ὡς ἐπὶ τὸ πολὺ τῇ ὁρμῇ τῆς ἀρχῆς, ὥστε ἢ ἔσω ἅμα ἢ ἔξω ὁρμᾷ πᾶσα. τὸ δ’ ἐνίους γίγνεσθαι καὶ πνεύματος ὄντος οὐδὲν ἄλογον· ὁρῶμεν γὰρ ἐνίοτε ἅμα πλείους πνέοντας ἀνέμους, ὧν ὅταν εἰς τὴν γῆν ὁρμήσῃ θάτερον, ἔσται πνεύματος ὄντος ὁ σεισμός. ἐλάττους δ’ οὗτοι τὸ μέγεθος [366a.12] γίγνονται διὰ τὸ διῃρῆσθαι τὴν ἀρχὴν καὶ τὴν αἰτίαν αὐτῶν. νυκτὸς δ’ οἱ πλείους καὶ μείζους γίγνονται τῶν σεισμῶν, οἱ δὲ τῆς ἡμέρας περὶ μεσημβρίαν· νηνεμώτατον γάρ ἐστιν ὡς ἐπὶ τὸ πολὺ τῆς ἡμέρας ἡ μεσημβρία (ὁ γὰρ ἥλιος ὅταν μάλιστα κρατῇ, κατακλείει τὴν ἀναθυμίασιν εἰς τὴν γῆν· κρατεῖ δὲ μάλιστα περὶ τὴν μεσημβρίαν), καὶ αἱ νύκτες δὲ τῶν ἡμερῶν νηνεμώτεραι διὰ τὴν ἀπουσίαν τὴν τοῦ ἡλίου· ὥστ’ ἔσω γίγνεται πάλιν ἡ ῥύσις, ὥσπερ ἄμπωτις, εἰς τοὐναντίον τῆς ἔξω πλημμυρίδος, καὶ πρὸς ὄρθρον μάλιστα· τηνικαῦτα γὰρ καὶ τὰ πνεύματα πέφυκεν ἄρχεσθαι πνεῖν. ἐὰν οὖν εἴσω τύχῃ μεταβάλλουσα ἡ ἀρχὴ αὐτῶν ὥσπερ Εὔριπος, διὰ τὸ πλῆθος ἰσχυρότερον ποιεῖ τὸν σεισμόν. ἔτι δὲ περὶ τόπους τοιούτους οἱ ἰσχυρότατοι γίγνονται τῶν σεισμῶν, ὅπου θάλαττα ῥοώδης ἢ ἡ χώρα σομφὴ καὶ ὕπαντρος· διὸ καὶ περὶ Ἑλλήσποντον καὶ περὶ Ἀχαΐαν καὶ Σικελίαν, καὶ τῆς Εὐβοίας περὶ τούτους τοὺς τόπους· δοκεῖ γὰρ διαυλωνίζειν ὑπὸ τὴν γῆν ἡ θάλαττα· διὸ καὶ τὰ θερμὰ τὰ περὶ Αἰδηψὸν ἀπὸ τοιαύτης αἰτίας γέγονε. περὶ δὲ τοὺς εἰρημένους τόπους οἱ σεισμοὶ γίγνονται μάλιστα διὰ τὴν στενότητα· τὸ γὰρ πνεῦμα γιγνόμενον σφοδρὸν καὶ διὰ τὸ πλῆθος τῆς θαλάττης πολλῆς προσφερομένης ἀπωθεῖται πάλιν εἰς τὴν γῆν, τὸ πεφυκὸς ἀποπνεῖν ἐκ τῆς γῆς. αἵ τε χῶραι ὅσαι [366b] σομφοὺς ἔχουσι τοὺς κάτω τόπους, πολὺ δεχόμεναι πνεῦμα σείονται μᾶλλον. καὶ ἔαρος δὲ καὶ μετοπώρου μάλιστα καὶ ἐν ἐπομβρίαις καὶ ἐν αὐχμοῖς γίγνονται διὰ τὴν αὐτὴν αἰτίαν· αἵ τε γὰρ ὧραι αὗται πνευματωδέσταται· τὸ γὰρ θέρος καὶ ὁ χειμών, τὸ μὲν διὰ τὸν πάγον, τὸ δὲ διὰ τὴν ἀλέαν ποιεῖ τὴν ἀκινησίαν· τὸ μὲν γὰρ ἄγαν ψυχρόν, τὸ δ’ ἄγαν ξηρόν ἐστι· καὶ ἐν μὲν τοῖς αὐχμοῖς πνευματώδης ὁ ἀήρ· τοῦτο γὰρ αὐτό ἐστιν ὁ αὐχμός, ὅταν πλείων ἡ ἀναθυμίασις ἡ ξηρὰ γίγνηται τῆς ὑγρᾶς· ἐν δὲ ταῖς ὑπερομβρίαις πλείω τε ποιεῖ τὴν ἐντὸς ἀναθυμίασιν, καὶ τῷ ἐναπολαμβάνεσθαι ἐν στενοτέροις τόποις καὶ ἀποβιάζεσθαι εἰς ἐλάττω τόπον τὴν τοιαύτην ἀπόκρισιν, πληρουμένων τῶν κοιλιῶν ὕδατος, ὅταν ἄρξηται κρατεῖν διὰ τὸ πολὺ εἰς ὀλίγον πιληθῆναι τόπον, ἰσχυρῶς κινεῖ ῥέων ὁ ἄνεμος καὶ προσπίπτων· δεῖ γὰρ νοεῖν ὅτι ὥσπερ ἐν τῷ σώματι ἡμῶν καὶ τρόμων καὶ σφυγμῶν αἴτιόν ἐστιν ἡ τοῦ πνεύματος ἐναπολαμβανομένη δύναμις, οὕτω καὶ ἐν τῇ γῇ τὸ πνεῦμα παραπλήσιον ποιεῖν, καὶ τὸν μὲν τῶν σεισμῶν οἷον τρόμον εἶναι τὸν δ’ οἷον σφυγμόν, καὶ καθάπερ συμβαίνει πολλάκις μετὰ τὴν οὔρησιν (διὰ τοῦ σώματος γὰρ γίγνεται ὥσπερ τρόμος τις ἀντιμεθισταμένου τοῦ πνεύματος ἔξωθεν εἴσω ἀθρόου), τοιαῦτα [γὰρ] γίγνεσθαι καὶ περὶ τὴν γῆν. ὅσην δ’ ἔχει τὸ πνεῦμα δύναμιν, οὐ μόνον ἐκ τῶν ἐν τῷ ἀέρι δεῖ θεωρεῖν γιγνομένων (ἐνταῦθα μὲν γὰρ διὰ τὸ μέγεθος ὑπολάβοι τις ἂν τοιαῦτα δύνασθαι ποιεῖν) ἀλλὰ καὶ ἐν τοῖς σώμασι τοῖς τῶν ζῴων· οἵ τε γὰρ τέτανοι καὶ οἱ σπασμοὶ πνεύματος μέν εἰσιν κινήσεις, τοσαύτην δὲ ἔχουσιν ἰσχὺν ὥστε πολλοὺς ἅμα πειρωμένους ἀποβιάζεσθαι μὴ δύνασθαι κρατεῖν τῆς κινήσεως τῶν ἀρρωστούντων. τοιοῦτον δὴ δεῖ νοεῖν τὸ γιγνόμενον καὶ ἐν τῇ γῇ, ὡς εἰκάσαι πρὸς μικρὸν μεῖζον. σημεῖα δὲ τούτων καὶ πρὸς τὴν ἡμετέραν αἴσθησιν πολλαχῇ γέγονεν· ἤδη γὰρ σεισμὸς ἐν τόποις τισὶν γιγνόμενος οὐ πρότερον ἔληξε πρὶν ἐκρήξας εἰς τὸν ὑπὲρ τῆς γῆς τόπον φανερῶς ὥσπερ ἐκνεφίας ἐξῆλθεν ὁ κινήσας ἄνεμος, [367a] οἷον καὶ περὶ Ἡράκλειαν ἐγένετο τὴν ἐν τῷ Πόντῳ νεωστί, καὶ πρότερον περὶ τὴν Ἱερὰν νῆσον (αὕτη δ’ ἐστὶν μία τῶν Αἰόλου καλουμένων νήσων)· ἐν ταύτῃ γὰρ ἀνῴδει τι τῆς γῆς, καὶ ἀνῄει οἷον λοφώδης ὄγκος μετὰ ψόφου· τέλος δὲ ῥαγέντος ἐξῆλθεν πνεῦμα πολὺ καὶ τὸν φέψαλον καὶ τὴν τέφραν ἀνῆκεν καὶ τήν τε Λιπαραίων πόλιν οὖσαν οὐ πόρρω πᾶσαν κατετέφρωσε καὶ εἰς ἐνίας τῶν ἐν Ἰταλίᾳ πόλεων ἦλθεν· καὶ νῦν ὅπου τὸ ἀναφύσημα τοῦτο ἐγένετο, δῆλόν ἐστιν. καὶ γὰρ δὴ τοῦ γιγνομένου πυρὸς ἐν τῇ γῇ ταύτην οἰητέον εἶναι τὴν αἰτίαν, ὅταν κοπτόμενον ἐκπρησθῇ πρῶτον εἰς μικρὰ κερματισθέντος τοῦ ἀέρος. τεκμήριον δ’ ἐστὶ τοῦ ῥεῖν ὑπὸ γῆν τὰ πνεύματα καὶ τὸ γιγνόμενον περὶ ταύτας τὰς νήσους· ὅταν γὰρ ἄνεμος μέλλῃ πνευσεῖσθαι νότος, προσημαίνει πρότερον· ἠχοῦσι γὰρ οἱ τόποι ἐξ ὧν γίγνεται τὰ ἀναφυσήματα, διὰ τὸ τὴν θάλατταν μὲν προωθεῖσθαι ἤδη πόρρωθεν, ὑπὸ δὲ ταύτης τὸ ἐκ τῆς γῆς ἀναφυσώμενον ἀπωθεῖσθαι πάλιν εἴσω, ᾗπερ ἐπέρχεται ἡ θάλαττα ταύτῃ. ποιεῖ δὲ ψόφον ἄνευ σεισμοῦ διά τε τὴν εὐρυχωρίαν τῶν τόπων (ὑπερχεῖται γὰρ εἰς τὸ ἀχανὲς ἔξω) καὶ δι’ ὀλιγότητα τοῦ ἀπωθουμένου ἀέρος. ἔτι τὸ γίγνεσθαι τὸν ἥλιον ἀχλυώδη καὶ ἀμαυρότερον ἄνευ νέφους, καὶ πρὸ τῶν ὀρθρίων σεισμῶν ἐνίοτε νηνεμίαν τε καὶ κρύος ἰσχυρόν, σημεῖον τῆς εἰρημένης αἰτίας ἐστίν. τόν τε γὰρ ἥλιον ἀχλυώδη καὶ ἀμαυρὸν ἀναγκαῖον εἶναι ὑπονοστεῖν ἀρχομένου τοῦ πνεύματος εἰς τὴν γῆν τοῦ διαλύοντος τὸν ἀέρα καὶ διακρίνοντος, καὶ πρὸς τὴν ἕω καὶ περὶ τοὺς ὄρθρους νηνεμίαν τε καὶ ψῦχος. τὴν μὲν γὰρ νηνεμίαν ἀναγκαῖον ὡς ἐπὶ τὸ πολὺ συμβαίνειν, καθάπερ εἴρηται καὶ πρότερον, οἷον μεταρροίας εἴσω γιγνομένης τοῦ πνεύματος, καὶ μᾶλλον πρὸ τῶν μειζόνων σεισμῶν· μὴ διασπώμενον γὰρ τὸ μὲν ἔξω τὸ δ’ ἐντός, ἀλλ’ ἀθρόως φερόμενον ἀναγκαῖον ἰσχύειν μᾶλλον. τὸ δὲ ψῦχος συμβαίνει διὰ τὸ τὴν ἀναθυμίασιν εἴσω τρέπεσθαι, φύσει θερμὴν οὖσαν καθ’ αὑτήν. οὐ δοκοῦσι δ’ οἱ ἄνεμοι εἶναι θερμοὶ διὰ τὸ κινεῖν τὸν ἀέρα πλήρη πολλῆς ὄντα καὶ ψυχρᾶς ἀτμίδος, [367b] ὥσπερ τὸ πνεῦμα <τὸ> διὰ τοῦ στόματος φυσώμενον· καὶ γὰρ τοῦτο ἐγγύθεν μέν ἐστι θερμόν, ὥσπερ καὶ ὅταν ἀάζωμεν, ἀλλὰ δι’ ὀλιγότητα οὐχ ὁμοίως ἐπίδηλον, πόρρωθεν δὲ ψυχρὸν διὰ τὴν αὐτὴν αἰτίαν τοῖς ἀνέμοις. ἐκλειπούσης οὖν εἰς τὴν γῆν τῆς τοιαύτης δυνάμεως, συνιοῦσα δι’ ὑγρότητα ἡ ἀτμιδώδης ἀπόρροια ποιεῖ τὸ ψῦχος, ἐν οἷς συμβαίνει τόποις γίγνεσθαι τοῦτο τὸ πάθος. τὸ δ’ αὐτὸ αἴτιον καὶ τοῦ εἰωθότος ἐνίοτε γίγνεσθαι σημείου πρὸ τῶν σεισμῶν· ἢ γὰρ μεθ’ ἡμέραν ἢ μικρὸν μετὰ δυσμάς, αἰθρίας οὔσης, νεφέλιον λεπτὸν φαίνεται διατεῖνον καὶ μακρόν, οἷον γραμμῆς μῆκος εὐθύτητι διηκριβωμένον, τοῦ πνεύματος ἀπομαραινομένου διὰ τὴν μετάστασιν. τὸ δ’ ὅμοιον συμβαίνει καὶ ἐν τῇ θαλάττῃ περὶ τοὺς αἰγιαλούς· ὅταν μὲν γὰρ κυμαίνουσα ἐκβάλλῃ, σφόδρα παχεῖαι καὶ σκολιαὶ γίγνονται αἱ ῥηγμῖνες, ὅταν δὲ γαλήνη ᾖ, διὰ τὸ μικρὰν ποιεῖσθαι τὴν ἔκκρισιν λεπταί εἰσι καὶ εὐθεῖαι. ὅπερ οὖν ἡ θάλαττα ποιεῖ περὶ τὴν γῆν, τοῦτο τὸ πνεῦμα περὶ τὴν ἐν τῷ ἀέρι ἀχλύν, ὥσθ’ ὅταν γένηται νηνεμία, πάμπαν εὐθεῖαν καὶ λεπτὴν καταλείπεσθαι ὥσπερ ῥηγμῖνα οὖσαν ἀέρος τὴν νεφέλην. διὰ ταῦτα δὲ καὶ περὶ τὰς ἐκλείψεις ἐνίοτε τῆς σελήνης συμβαίνει γίγνεσθαι σεισμόν· ὅταν γὰρ ἤδη πλησίον ᾖ ἡ ἀντίφραξις, καὶ μήπω μὲν ᾖ πάμπαν ἀπολελοιπὸς τὸ φῶς καὶ τὸ ἀπὸ τοῦ ἡλίου θερμὸν ἐκ τοῦ ἀέρος, ἤδη δ’ ἀπομαραινόμενον, νηνεμία γίγνεται ἀντιμεθισταμένου τοῦ πνεύματος εἰς τὴν γῆν, ὃ ποιεῖ τὸν σεισμὸν πρὸ τῶν ἐκλείψεων. γίγνονται γὰρ καὶ ἄνεμοι πρὸ τῶν ἐκλείψεων πολλάκις, ἀκρόνυχον μὲν πρὸ τῶν μεσονυκτίων ἐκλείψεων, μεσονύκτιον δὲ πρὸ τῶν ἑῴων. συμβαίνει δὲ τοῦτο διὰ τὸ ἀμαυροῦσθαι τὸ θερμὸν τὸ ἀπὸ τῆς σελήνης, [367b.29] ὅταν πλησίον ἤδη γίγνηται ἡ φορὰ ἐν ᾧ γενομένων ἔσται ἡ ἔκλειψις. ἀνιεμένου οὖν ᾧ κατείχετο ὁ ἀὴρ καὶ ἠρέμει, πάλιν κινεῖται καὶ γίγνεται πνεῦμα τῆς ὀψιαίτερον ἐκλείψεως ὀψιαίτερον. ὅταν δ’ ἰσχυρὸς γένηται σεισμός, οὐκ εὐθὺς οὐδ’ εἰσάπαξ παύεται σείσας, ἀλλὰ τὸ πρῶτον μὲν μέχρι περὶ τετταράκοντα πρόεισι πολλάκις ἡμέρας, ὕστερον δὲ καὶ ἐφ’ [368a] ἓν καὶ ἐπὶ δύο ἔτη ἐπισημαίνει κατὰ τοὺς αὐτοὺς τόπους. αἴτιον δὲ τοῦ μὲν μεγέθους τὸ πλῆθος τοῦ πνεύματος καὶ τῶν τόπων τὰ σχήματα δι’ οἵων ἂν ῥυῇ· ᾗ γὰρ ἂν ἀντιτυπήσῃ καὶ μὴ ῥᾳδίως διέλθῃ, μάλιστά τε σείει καὶ ἐγκαταλείπεσθαι ἀναγκαῖον ἐν ταῖς δυσχωρίαις, οἷον ὕδωρ ἐν σκεύει οὐ δυνάμενον διεξελθεῖν. διὸ καθάπερ ἐν σώματι οἱ σφυγμοὶ οὐκ ἐξαίφνης παύονται οὐδὲ ταχέως, ἀλλ’ ἐκ προσαγωγῆς ἅμα καταμαραινομένου τοῦ πάθους, καὶ ἡ ἀρχὴ ἀφ’ ἧς ἡ ἀναθυμίασις ἐγένετο καὶ ἡ ὁρμὴ τοῦ πνεύματος δῆλον ὅτι οὐκ εὐθὺς ἅπασαν ἀνήλωσεν τὴν ὕλην, ἐξ ἧς ἐποίησε τὸν ἄνεμον, ὃν καλοῦμεν σεισμόν. ἕως ἂν οὖν ἀναλωθῇ τὰ ὑπόλοιπα τούτων, ἀνάγκη σείειν, ἠρεμαιότερον δὲ καὶ μέχρι τούτου ἕως ἂν ἔλαττον ᾖ τὸ ἀναθυμιώμενον ἢ ὥστε δύνασθαι κινεῖν ἐπιδήλως. ποιεῖ δὲ καὶ τοὺς ψόφους τοὺς ὑπὸ τὴν γῆν γιγνομένους τὸ πνεῦμα, καὶ τοὺς πρὸ τῶν σεισμῶν· καὶ ἄνευ δὲ σεισμῶν ἤδη που γεγόνασιν ὑπὸ γῆν· ὥσπερ γὰρ καὶ ῥαπιζόμενος ὁ ἀὴρ παντοδαποὺς ἀφίησι ψόφους, οὕτως καὶ τύπτων αὐτός· οὐδὲν γὰρ διαφέρει· τὸ γὰρ τύπτον ἅμα καὶ αὐτὸ τύπτεται πᾶν. προέρχεται δὲ ὁ ψόφος τῆς κινήσεως διὰ τὸ λεπτομερέστερον εἶναι καὶ μᾶλλον διὰ παντὸς ἰέναι τοῦ πνεύματος τὸν ψόφον. ὅταν δ’ ἔλαττον ᾖ ἢ ὥστε κινῆσαι τὴν γῆν διὰ λεπτότητα, διὰ μὲν τὸ ῥᾳδίως διηθεῖσθαι οὐ δύναται κινεῖν, διὰ δὲ τὸ προσπίπτειν στερεοῖς ὄγκοις καὶ κοίλοις καὶ παντοδαποῖς σχήμασι παντοδαπὴν ἀφίησι φωνήν, ὥστ’ ἐνίοτε δοκεῖν ὅπερ λέγουσιν οἱ τερατολογοῦντες, μυκᾶσθαι τὴν γῆν. ἤδη δὲ καὶ ὕδατα ἀνερράγη γιγνομένων σεισμῶν· ἀλλ’ οὐ διὰ τοῦτο αἴτιον τὸ ὕδωρ τῆς κινήσεως, ἀλλ’ ἂν ᾖ ἐξ ἐπιπολῆς ἢ κάτωθεν βιάζηται τὸ πνεῦμα, ἐκεῖνο τὸ κινοῦν ἐστιν, ὥσπερ τῶν κυμάτων οἱ ἄνεμοι ἀλλ’ οὐ τὰ κύματα τῶν ἀνέμων εἰσὶν αἴτια, ἐπεὶ καὶ τὴν γῆν οὕτως ἄν τις αἰτιῷτο τοῦ πάθους· ἀνατρέπεται γὰρ σειομένη, καθάπερ ὕδωρ (ἡ γὰρ ἔκχυσις ἀνάτρεψίς τίς ἐστιν). ἀλλ’ αἴτια ταῦτα μὲν ἄμφω ὡς ὕλη (πάσχει γάρ, ἀλλ’ οὐ ποιεῖ), τὸ δὲ πνεῦμα ὡς ἀρχή. ὅπου δ’ ἅμα κῦμα σεισμῷ γέγονεν, αἴτιον, ὅταν ἐναντία γίγνηται τὰ πνεύματα. τοῦτο δὲ γίγνεται ὅταν τὸ [368b] σεῖον τὴν γῆν πνεῦμα φερομένην ὑπ’ ἄλλου πνεύματος τὴν θάλατταν ἀπῶσαι μὲν ὅλως μὴ δύνηται, προωθοῦν δὲ καὶ συστέλλον εἰς ταὐτὸν συναθροίσῃ πολλήν· τότε γὰρ ἀναγκαῖον ἡττηθέντος τούτου τοῦ πνεύματος ἀθρόαν ὠθουμένην ὑπὸ τοῦ ἐναντίου πνεύματος ἐκρήγνυσθαι καὶ ποιεῖν τὸν κατακλυσμόν. ἐγένετο δὲ τοῦτο καὶ περὶ Ἀχαΐαν· ἔξω μὲν γὰρ ἦν νότος, ἐκεῖ δὲ βορέας, νηνεμίας δὲ γενομένης καὶ ῥυέντος εἴσω τοῦ ἀνέμου ἐγένετο τό τε κῦμα καὶ ὁ σεισμὸς ἅμα, καὶ μᾶλλον διὰ τὸ τὴν θάλατταν μὴ διδόναι διαπνοὴν τῷ ὑπὸ τὴν γῆν ὡρμημένῳ πνεύματι, ἀλλ’ ἀντιφράττειν· ἀποβιαζόμενα γὰρ ἄλληλα τὸ μὲν πνεῦμα τὸν σεισμὸν ἐποίησεν, ἡ δ’ ὑπόστασις τοῦ κύματος τὸν κατακλυσμόν. κατὰ μέρος δὲ γίγνονται οἱ σεισμοὶ τῆς γῆς, καὶ πολλάκις ἐπὶ μικρὸν τόπον, οἱ δ’ ἄνεμοι οὔ· κατὰ μέρος μέν, ὅταν αἱ ἀναθυμιάσεις αἱ κατὰ τὸν τόπον αὐτὸν καὶ τὸν γειτνιῶντα συνέλθωσιν εἰς ἕν, ὥσπερ καὶ τοὺς αὐχμοὺς ἔφαμεν γίγνεσθαι καὶ τὰς ὑπερομβρίας τὰς κατὰ μέρος. καὶ οἱ μὲν σεισμοὶ γίγνονται διὰ τοῦτον τὸν τρόπον, οἱ δ’ ἄνεμοι οὔ· τὰ μὲν γὰρ ἐν τῇ γῇ τὴν ἀρχὴν ἔχει, ὥστ’ ἐφ’ ἓν ἁπάσας ὁρμᾶν· ὁ δ’ ἥλιος οὐχ ὁμοίως δύναται, τὰς δὲ μετεώρους μᾶλλον, ὥστε ῥεῖν, ὅταν ἀρχὴν λάβωσιν ἀπὸ τῆς τοῦ ἡλίου φορᾶς ἤδη κατὰ τὰς διαφορὰς τῶν τόπων, ἐφ’ ἕν. ὅταν μὲν οὖν ᾖ πολὺ τὸ πνεῦμα, κινεῖ τὴν γῆν, ὥσπερ δὲ ὁ τρόμος, ἐπὶ πλάτος· γίγνεται δ’ ὀλιγάκις καὶ κατά τινας τόπους, οἷον σφυγμός, ἄνω κάτωθεν· διὸ καὶ ἐλαττονάκις [δίδωσιν] σείει τοῦτον τὸν τρόπον· οὐ γὰρ ῥᾴδιον οὕτω πολλὴν συνελθεῖν ἀρχήν· ἐπὶ μῆκος γὰρ πολλαπλασία τῆς ἀπὸ τοῦ βάθους ἡ διάκρισις. ὅπου δ’ ἂν γένηται τοιοῦτος σεισμός, ἐπιπολάζει πλῆθος λίθων, ὥσπερ τῶν ἐν τοῖς λίκνοις ἀναβραττομένων· τοῦτον γὰρ τὸν τρόπον γενομένου σεισμοῦ τά τε περὶ Σίπυλον ἀνετράπη καὶ τὸ Φλεγραῖον καλούμενον πεδίον καὶ τὰ περὶ τὴν Λιγυστικὴν χώραν. ἐν δὲ ταῖς νήσοις ταῖς ποντίαις ἧττον γίγνονται σεισμοὶ τῶν προσγείων· τὸ γὰρ πλῆθος τῆς θαλάττης καταψύχει τὰς ἀναθυμιάσεις καὶ κωλύει τῷ βάρει καὶ ἀποβιάζεται· ἔτι δὲ ῥεῖ καὶ οὐ σείεται [369a] κρατουμένη ὑπὸ τῶν πνευμάτων· καὶ διὰ τὸ πολὺν ἐπέχειν τόπον οὐκ εἰς ταύτην ἀλλ’ ἐκ ταύτης αἱ ἀναθυμιάσεις γίγνονται, καὶ ταύταις ἀκολουθοῦσιν αἱ ἐκ τῆς γῆς. αἱ δ’ ἐγγὺς τῆς ἠπείρου μόριόν εἰσιν τῆς ἠπείρου· τὸ γὰρ μεταξὺ διὰ μικρότητα οὐδεμίαν ἔχει δύναμιν· τὰς δὲ ποντίας οὐκ ἔστιν κινῆσαι ἄνευ τῆς θαλάττης ὅλης, ὑφ’ ἧς περιεχόμεναι τυγχάνουσιν. περὶ μὲν οὖν σεισμῶν, καὶ τίς ἡ φύσις, καὶ διὰ τίνα αἰτίαν γίγνονται, καὶ περὶ τῶν ἄλλων τῶν συμβαινόντων περὶ αὐτούς, εἴρηται σχεδὸν περὶ τῶν μεγίστων.

περὶ δὲ ἀστραπῆς καὶ βροντῆς, ἔτι δὲ περὶ τυφῶνος καὶ πρηστῆρος καὶ κεραυνῶν λέγωμεν· καὶ γὰρ τούτων τὴν αὐτὴν ἀρχὴν ὑπολαβεῖν δεῖ πάντων. τῆς γὰρ ἀναθυμιάσεως, ὥσπερ εἴπομεν, οὔσης διττῆς, τῆς μὲν ὑγρᾶς τῆς δὲ ξηρᾶς, καὶ τῆς συγκρίσεως ἐχούσης ἄμφω ταῦτα δυνάμει καὶ συνισταμένης εἰς νέφος, ὥσπερ εἴρηται πρότερον, ἔτι δὲ πυκνοτέρας τῆς συστάσεως τῶν νεφῶν γιγνομένης πρὸς τὸ ἔσχατον πέρας (ᾗ γὰρ ἐκλείπει τὸ θερμὸν διακρινόμενον εἰς τὸν ἄνω τόπον, ταύτῃ πυκνοτέραν καὶ ψυχροτέραν ἀναγκαῖον εἶναι τὴν σύστασιν· διὸ καὶ οἱ κεραυνοὶ καὶ οἱ ἐκνεφίαι καὶ πάντα τὰ τοιαῦτα φέρεται κάτω, καίτοι πεφυκότος ἄνω τοῦ θερμοῦ φέρεσθαι παντός· ἀλλ’ εἰς τοὐναντίον τῆς πυκνότητος ἀναγκαῖον γίγνεσθαι τὴν ἔκθλιψιν, οἷον οἱ πυρῆνες οἱ ἐκ τῶν δακτύλων ἐκπηδῶντες· καὶ γὰρ ταῦτα βάρος ἔχοντα φέρεται πολλάκις ἄνω)· ἡ μὲν οὖν ἐκκρινομένη θερμότης εἰς τὸν ἄνω διασπείρεται τόπον· ὅση δ’ ἐμπεριλαμβάνεται τῆς ξηρᾶς ἀναθυμιάσεως ἐν τῇ μεταβολῇ ψυχομένου τοῦ ἀέρος, αὕτη συνιόντων τῶν νεφῶν ἐκκρίνεται, βίᾳ δὲ φερομένη καὶ προσπίπτουσα τοῖς περιεχομένοις νέφεσι ποιεῖ πληγήν, ἧς ὁ ψόφος καλεῖται βροντή. γίγνεται δ’ ἡ πληγὴ τὸν αὐτὸν τρόπον, ὡς παρεικάσαι μείζονι μικρὸν πάθος, τῷ ἐν τῇ φλογὶ γιγνομένῳ ψόφῳ, ὃν καλοῦσιν οἱ μὲν τὸν Ἥφαιστον γελᾶν, οἱ δὲ τὴν Ἑστίαν, οἱ δ’ ἀπειλὴν τούτων. γίγνεται δ’ ὅταν ἡ ἀναθυμίασις εἰς τὴν φλόγα συνεστραμμένη φέρηται, ῥηγνυμένων καὶ ξηραινομένων τῶν ξύλων· οὕτως γὰρ καὶ ἐν τοῖς νέφεσι ἡ γιγνομένη τοῦ πνεύματος ἔκκρισις πρὸς τὴν πυκνότητα τῶν νεφῶν ἐμπίπτουσα [369b] ποιεῖ τὴν βροντήν. παντοδαποὶ δὲ ψόφοι διὰ τὴν ἀνωμαλίαν τε γίγνονται τῶν νεφῶν καὶ διὰ τὰς μεταξὺ κοιλίας, ᾗ τὸ συνεχὲς ἐκλείπει τῆς πυκνότητος. ἡ μὲν οὖν βροντὴ τοῦτ’ ἔστι, καὶ γίγνεται διὰ ταύτην τὴν αἰτίαν· τὸ δὲ πνεῦμα τὸ ἐκθλιβόμενον τὰ πολλὰ μὲν ἐκπυροῦται λεπτῇ καὶ ἀσθενεῖ πυρώσει, καὶ τοῦτ’ ἔστιν ἣν καλοῦμεν ἀστραπήν, ᾗ ἂν ὥσπερ [369b.7] ἐκπῖπτον τὸ πνεῦμα χρωματισθὲν ὀφθῇ. γίγνεται δὲ μετὰ τὴν πληγὴν καὶ ὕστερον τῆς βροντῆς· ἀλλὰ φαίνεται πρότερον διὰ τὸ τὴν ὄψιν προτερεῖν τῆς ἀκοῆς. δηλοῖ δ’ ἐπὶ τῆς εἰρεσίας τῶν τριήρων· ἤδη γὰρ ἀναφερόντων πάλιν τὰς κώπας ὁ πρῶτος ἀφικνεῖται ψόφος τῆς κωπηλασίας. καίτοι τινὲς λέγουσιν ὡς ἐν τοῖς νέφεσιν ἐγγίγνεται πῦρ· τοῦτο δ’ Ἐμπεδοκλῆς μέν φησιν εἶναι τὸ ἐμπεριλαμβανόμενον τῶν τοῦ ἡλίου ἀκτίνων, Ἀναξαγόρας δὲ τοῦ ἄνωθεν αἰθέρος, ὃ δὴ ἐκεῖνος καλεῖ πῦρ κατενεχθὲν ἄνωθεν κάτω. τὴν μὲν οὖν διάλαμψιν ἀστραπὴν εἶναι τὴν τούτου τοῦ πυρός, τὸν δὲ ψόφον ἐναποσβεννυμένου καὶ τὴν σίξιν βροντήν, ὡς καθάπερ φαίνεται καὶ γιγνόμενον οὕτως καὶ πρότερον τὴν ἀστραπὴν οὖσαν τῆς βροντῆς. ἄλογος δὲ καὶ ἡ τοῦ πυρὸς ἐμπερίληψις, ἀμφοτέρως μέν, μᾶλλον δ’ ἡ κατάσπασις τοῦ ἄνωθεν αἰθέρος. τοῦ τε γὰρ κάτω φέρεσθαι τὸ πεφυκὸς ἄνω δεῖ λέγεσθαι τὴν αἰτίαν, καὶ διὰ τί ποτε τοῦτο γίγνεται κατὰ τὸν οὐρανὸν ὅταν ἐπινέφελον ᾖ μόνον, ἀλλ’ οὐ συνεχῶς οὕτως· αἰθρίας δὲ οὔσης οὐ γίγνεται. τοῦτο γὰρ παντάπασιν ἔοικεν εἰρῆσθαι προχείρως. ὁμοίως δὲ καὶ τὸ τὴν ἀπὸ τῶν ἀκτίνων θερμότητα φάναι τὴν ἀπολαμβανομένην ἐν τοῖς νέφεσιν εἶναι τούτων αἰτίαν οὐ πιθανόν· καὶ γὰρ οὗτος ὁ λόγος ἀπραγμόνως εἴρηται λίαν· ἀποκεκριμένον τε γὰρ ἀναγκαῖον εἶναι τὸ αἴτιον ἀεὶ καὶ ὡρισμένον, τό τε τῆς βροντῆς καὶ τῆς ἀστραπῆς καὶ τῶν ἄλλων τῶν τοιούτων, καὶ οὕτω γίγνεσθαι. τοῦτο δὲ διαφέρει πλεῖστον· ὅμοιον γὰρ κἂν εἴ τις οἴοιτο τὸ ὕδωρ καὶ τὴν χιόνα καὶ τὴν χάλαζαν ἐνυπάρχοντα πρότερον ὕστερον ἐκκρίνεσθαι καὶ μὴ γίγνεσθαι, οἷον ὑπὸ χεῖρα ποιούσης ἀεὶ τῆς συγκρίσεως ἕκαστον αὐτῶν· ὡσαύτως γὰρ ἐκεῖνά τε συγκρίσεις καὶ ταῦτα διακρίσεις ὑποληπτέον εἶναι, ὥστ’ εἰ θάτερα τούτων μὴ γίγνεται ἀλλ’ ἔστι, περὶ ἀμφοτέρων ὁ αὐτὸς [370a] ἁρμόσει λόγος. τήν τ’ ἐναπόληψιν τί ἂν ἀλλοιότερον λέγοι τις ἢ καθάπερ ἐν τοῖς πυκνοτέροις; καὶ γὰρ τὸ ὕδωρ ὑπὸ τοῦ ἡλίου καὶ τοῦ πυρὸς γίγνεται θερμόν· ἀλλ’ ὅμως ὅταν πάλιν συνίῃ καὶ ψύχηται τὸ ὕδωρ πηγνύμενον, οὐδεμίαν συμβαίνει γίγνεσθαι τοιαύτην ἔκπτωσιν οἵαν ἐκεῖνοι λέγουσιν. καίτοι γ’ ἐχρῆν κατὰ λόγον τοῦ μεγέθους τὴν ζέσιν ποιεῖν τὸ ἐγγιγνόμενον πνεῦμα ὑπὸ τοῦ πυρός, ἣν οὔτε δυνατὸν ἐνυπάρχειν πρότερον, οὔτ’ ἐκεῖνοι τὸν ψόφον ζέσιν ποιοῦσιν ἀλλὰ σίξιν· ἔστι δὲ καὶ ἡ σίξις μικρὰ ζέσις· ᾗ γὰρ τὸ προσπῖπτον κρατεῖ σβεννύμενον, ταύτῃ ζέον ποιεῖ τὸν ψόφον. εἰσὶ δέ τινες οἳ τὴν ἀστραπήν, ὥσπερ καὶ Κλείδημος, οὐκ εἶναί φασιν ἀλλὰ φαίνεσθαι, παρεικάζοντες ὡς τὸ πάθος ὅμοιον ὂν καὶ ὅταν τὴν θάλατταν τις ῥάβδῳ τύπτῃ· φαίνεται γὰρ τὸ ὕδωρ ἀποστίλβον τῆς νυκτός· οὕτως ἐν τῇ νεφέλῃ ῥαπιζομένου τοῦ ὑγροῦ τὴν φάντασιν τῆς λαμπρότητος εἶναι τὴν ἀστραπήν. οὗτοι μὲν οὖν οὔπω συνήθεις ἦσαν ταῖς περὶ τῆς ἀνακλάσεως δόξαις, ὅπερ αἴτιον δοκεῖ τοῦ τοιούτου πάθους εἶναι· φαίνεται γὰρ τὸ ὕδωρ στίλβειν τυπτόμενον ἀνακλωμένης ἀπ’ αὐτοῦ τῆς ὄψεως πρός τι τῶν λαμπρῶν. διὸ καὶ γίγνεται μᾶλλον τοῦτο νύκτωρ· τῆς γὰρ ἡμέρας οὐ φαίνεται διὰ τὸ πλέον ὂν τὸ φέγγος τὸ τῆς ἡμέρας ἀφανίζειν. τὰ μὲν οὖν λεγόμενα περὶ βροντῆς τε καὶ ἀστραπῆς παρὰ τῶν ἄλλων ταῦτ’ ἐστί, τῶν μὲν ὅτι ἀνάκλασις ἡ ἀστραπή, τῶν δ’ ὅτι πυρὸς μὲν ἡ ἀστραπὴ διάλαμψις, ἡ δὲ βροντὴ σβέσις, οὐκ ἐγγιγνομένου παρ’ ἕκαστον πάθος τοῦ πυρὸς ἀλλ’ ἐνυπάρχοντος. ἡμεῖς δέ φαμεν τὴν αὐτὴν εἶναι φύσιν ἐπὶ μὲν τῆς γῆς ἄνεμον, ἐν δὲ τῇ γῇ σεισμόν, ἐν δὲ τοῖς νέφεσι βροντήν· πάντα γὰρ εἶναι ταῦτα τὴν οὐσίαν ταὐτόν, ἀναθυμίασιν ξηράν, ἣ ῥέουσα μέν πως ἄνεμός ἐστιν, ὡδὶ δὲ ποιεῖ τοὺς σεισμούς, ἐν δὲ τοῖς νέφεσι μεταβάλλουσα διακρινομένη, συνιόντων καὶ συγκρινομένων αὐτῶν εἰς ὕδωρ, βροντάς τε καὶ ἀστραπὰς καὶ πρὸς τούτοις τἆλλα τὰ τῆς αὐτῆς φύσεως τούτοις ὄντα. καὶ περὶ μὲν βροντῆς εἴρηται καὶ ἀστραπῆς.

Βιβλίο Γ'Περὶ δὲ τῶν ὑπολοίπων εἴπωμεν ἔργων τῆς ἐκκρίσεως ταύτης, τὸν ὑφηγημένον ἤδη τρόπον λέγοντες. τὸ γὰρ πνεῦμα τοῦτο ἐκκρινόμενον κατὰ μικρὰ μὲν καὶ σποράδην διαχεόμενον καὶ πολλάκις γιγνόμενον καὶ διαπνέον καὶ λεπτομερέστερον ὂν βροντὰς ποιεῖ καὶ ἀστραπάς· ἂν δ' ἀθρόον καὶ πυκνότερον, ἧττον δ' ἐκκριθῇ λεπτόν, ἐκνεφίας ἄνεμος γίγνεται· διὸ καὶ βίαιος (τὸ γὰρ τάχος τῆς ἐκκρίσεως ποιεῖ τὴν ἰσχύν). ὅταν μὲν οὖν συνακολουθήσῃ πολλὴ καὶ συνεχὴς ἔκκρισις, τὸν αὐτὸν γίγνεται τρόπον ὥσπερ ὅταν πάλιν εἰς τοὐναντίον ὁρμήσῃ· τότε γὰρ ὑετὸς καὶ ὕδατος γίγνεται πλῆθος. ὑπάρχει μὲν οὖν ἄμφω δυνάμει ταῦτα κατὰ τὴν ὕλην· ὅταν δὲ ἀρχὴ γένηται τῆς δυνάμεως ὁποτερασοῦν, ἀκολουθεῖ συγκρινόμενον ἐκ τῆς ὕλης ὁποτέρου ἂν ᾖ πλῆθος ἐνυπάρχον πλέον, καὶ γίγνεται τὸ μὲν ὄμβρος, τὸ δὲ τῆς ἑτέρας ἀναθυμιάσεως ἐκνεφίας. ὅταν δὲ τὸ ἐκκρινόμενον πνεῦμα τὸ ἐν τῷ νέφει ἑτέρῳ ἀντιτυπήσῃ οὕτως ὥσπερ ὅταν ἐξ εὐρέος εἰς στενὸν βιάζηται ὁ ἄνεμος ἐν πύλαις ἢ ὁδοῖς (συμβαίνει γὰρ πολλάκις ἐν τοῖς τοιούτοις ἀπωσθέντος τοῦ πρώτου μορίου τοῦ ῥέοντος σώματος διὰ τὸ μὴ ὑπείκειν, ἢ διὰ στενότητα ἢ διὰ τὸ ἀντιπνεῖν, κύκλον καὶ δίνην γίγνεσθαι τοῦ πνεύματος· τὸ μὲν γὰρ εἰς τὸ πρόσθεν κωλύει προϊέναι, τὸ δ' ὄπισθεν ἐπωθεῖ, ὥστε ἀναγκάζεται εἰς τὸ πλάγιον, ᾗ οὐ κωλύεται, φέρεσθαι, καὶ οὕτως ἀεὶ τὸ ἐχόμενον, ἕως ἂν ἓν γένηται, τοῦτο δ' ἐστὶ κύκλος· οὗ γὰρ μία φορὰ σχήματος, τοῦτο καὶ αὐτὸ ἀνάγκη ἓν εἶναι)· ἐπί τε τῆς γῆς οὖν διὰ ταῦτα γίγνονται οἱ δῖνοι, καὶ ἐν τοῖς νέφεσιν ὁμοίως κατὰ τὴν ἀρχήν, πλὴν ὅτι, ὥσπερ, ὅταν ἐκνεφίας γίγνηται, ἀεὶ τὸ νέφος ἐκκρίνεται καὶ γίγνεται συνεχὴς ἄνεμος, οὕτως ἐνταῦθα ἀεὶ τὸ συνεχὲς ἀκολουθεῖ τοῦ νέφους· διὰ δὲ πυκνότητα οὐ δυνάμενον ἐκκριθῆναι τὸ πνεῦμα ἐκ τοῦ νέφους στρέφεται μὲν κύκλῳ τὸ πρῶτον διὰ τὴν εἰρημένην αἰτίαν, κάτω δὲ φέρεται διὰ [371a] τὸ ἀεὶ τὰ νέφη πυκνοῦσθαι, ᾗ ἐκπίπτει τὸ θερμόν. καλεῖται δ', ἂν ἀχρωμάτιστον ᾖ, τοῦτο τὸ πάθος τυφῶν, ἄνεμος ὤν, οἷον ἐκνεφίας ἄπεπτος. βορείοις δ' οὐ γίγνεται τυφῶν, οὐδὲ νιπτικῶς ἐχόντων ἐκνεφίας, διὰ τὸ πάντα ταῦτ' εἶναι πνεῦμα, τὸ δὲ πνεῦμα ξηρὰν εἶναι καὶ θερμὴν ἀναθυμίασιν. ὁ οὖν πάγος καὶ τὸ ψῦχος διὰ τὸ κρατεῖν σβέννυσιν εὐθὺς γιγνομένην ἔτι τὴν ἀρχήν. ὅτι δὲ κρατεῖ, δῆλον· οὐδὲ γὰρ ἂν ἦν νιφετός, οὐδὲ βόρεια τὰ ὑγρά· ταῦτα γὰρ συμβαίνει κρατούσης εἶναι τῆς ψυχρότητος. γίγνεται μὲν οὖν τυφῶν, ὅταν ἐκνεφίας γιγνόμενος μὴ δύνηται ἐκκριθῆναι τοῦ νέφους· ἔστι δὲ διὰ τὴν ἀντίκρουσιν τῆς δίνης, ὅταν ἐπὶ γῆν φέρηται ἡ ἕλιξ συγκατάγουσα τὸ νέφος, οὐ δυναμένη ἀπολυθῆναι. ᾗ δὲ κατ' εὐθυωρίαν ἐκπνεῖ, ταύτῃ τῷ πνεύματι κινεῖ, καὶ τῇ κύκλῳ κινήσει στρέφει καὶ ἀναφέρει ᾧ ἂν προσπέσῃ βιαζόμενον. ὅταν δὲ κατασπώμενον ἐκπυρωθῇ (τοῦτο δ’ ἐστὶν ἐὰν λεπτότερον τὸ πνεῦμα γένηται), καλεῖται πρηστήρ· συνεκπίμπρησι γὰρ τὸν ἀέρα τῇ πυρώσει χρωματίζων. ἐὰν δ’ ἐν αὐτῷ τῷ νέφει πολὺ καὶ λεπτὸν ἐκθλιφθῇ πνεῦμα, τοῦτο γίγνεται κεραυνός, ἐὰν μὲν πάνυ λεπτόν, οὐκ ἐπικάων διὰ λεπτότητα, ὃν οἱ ποιηταὶ ἀργῆτα καλοῦσιν, ἐὰν δ’ ἧττον, ἐπικάων, ὃν ψολόεντα καλοῦσιν· ὁ μὲν γὰρ διὰ τὴν λεπτότητα φέρεται, διὰ δὲ τὸ τάχος φθάνει διιὼν πρὶν ἢ [371a.23] ἐκπυρῶσαι καὶ ἐπιδιατρίψας μελᾶναι· ὁ δὲ βραδύτερος ἔχρωσε μέν, ἔκαυσε δ’ οὔ, ἀλλ’ ἔφθασε. διὸ καὶ τὰ μὲν ἀντιτυπήσαντα πάσχει τι, τὰ δὲ μὴ οὐδέν, οἷον ἀσπίδος ἤδη τὸ μὲν χάλκωμα ἐτάκη, τὸ δὲ ξύλον οὐδὲν ἔπαθεν· διὰ γὰρ μανότητα ἔφθασε τὸ πνεῦμα διηθηθὲν καὶ διελθόν· καὶ δι’ ἱματίων ὁμοίως οὐ κατέκαυσεν, ἀλλ’ οἷον τρῦχος ἐποίησεν· ὥστε ὅτι γε πνεῦμα ταῦτα πάντα, δῆλον καὶ ἐκ τῶν τοιούτων. ἔστι δ’ ἐνίοτε καὶ τοῖς ὄμμασιν θεωρεῖν, οἷον καὶ νῦν ἐθεωροῦμεν περὶ τὸν ἐν Ἐφέσῳ ναὸν καόμενον· πολλαχῇ γὰρ ἡ φλὸξ ἐφέρετο συνεχής, ἀποσπωμένη χωρίς. ὅτι μὲν γὰρ ὅ τε καπνὸς πνεῦμα καὶ κάεται ὁ καπνός, [371b] φανερόν, καὶ εἴρηται ἐν ἑτέροις πρότερον· ὅταν δ’ ἀθρόον χωρῇ, τότε φανερῶς δοκεῖ πνεῦμα εἶναι. ὅπερ οὖν ἐν ταῖς μικραῖς πυρκαϊαῖς φαίνεται, τοῦτο καὶ τότε πολλῆς ὕλης καομένης ἐγίγνετο πολλῷ ἰσχυρότερον. ῥηγνυμένων οὖν τῶν ξύλων, ὅθεν ἡ ἀρχὴ τοῦ πνεύματος ἦν, πολὺ ἐχώρει ἀθρόον, ᾗ ἐξέπνει, καὶ ἐφέρετο ἄνω πεπυρωμένον. ὥστ’ ἐφαίνετο ἡ φλὸξ φέρεσθαι καὶ εἰσπίπτειν εἰς τὰς οἰκίας. ἀεὶ γὰρ οἴεσθαι δεῖ ἐπακολουθεῖν τοῖς κεραυνοῖς πνεῦμα καὶ προϊέναι· ἀλλ’ οὐχ ὁρᾶται, διὰ τὸ ἀχρωμάτιστον εἶναι. διὸ καὶ ᾗ μέλλει πατάξειν, κινεῖται πρὶν πληγῆναι, ἅτε πρότερον προσπιπτούσης τῆς ἀρχῆς τοῦ πνεύματος. καὶ αἱ βρονταὶ δὲ διιστᾶσιν οὐ τῷ ψόφῳ, ἀλλ’ ὅτι ἅμα συνεκκρίνεται τὸ τὴν πληγὴν ποιῆσαν καὶ τὸν ψόφον πνεῦμα· ὃ ἐὰν πατάξῃ, διέστησεν, ἐπέκαυσε δ’ οὔ. περὶ μὲν οὖν βροντῆς καὶ ἀστραπῆς καὶ ἐκνεφίου, ἔτι δὲ πρηστήρων τε καὶ τυφώνων καὶ κεραυνῶν, εἴρηται, καὶ ὅτι ταὐτὸ πάντα, καὶ τίς ἡ διαφορὰ πάντων αὐτῶν.

περὶ δὲ ἅλω καὶ ἴριδος, τί τε ἑκάτερον καὶ διὰ τίν’ αἰτίαν γίγνεται, λέγωμεν, καὶ περὶ παρηλίων καὶ ῥάβδων· καὶ γὰρ ταῦτα γίγνεται πάντα διὰ τὰς αὐτὰς αἰτίας ἀλλήλοις. πρῶτον δὲ δεῖ λαβεῖν τὰ πάθη καὶ τὰ συμβαίνοντα περὶ ἕκαστον αὐτῶν. τῆς μὲν οὖν ἅλω φαίνεται πολλάκις κύκλος ὅλος, καὶ γίγνεται περὶ ἥλιον καὶ σελήνην καὶ περὶ τὰ λαμπρὰ τῶν ἄστρων, ἔτι δ’ οὐδὲν ἧττον νυκτὸς ἢ ἡμέρας καὶ περὶ μεσημβρίαν ἢ δείλην· ἕωθεν δ’ ἐλαττονάκις καὶ περὶ δύσιν. τῆς δ’ ἴριδος οὐδέποτε γίγνεται κύκλος οὐδὲ μεῖζον ἡμικυκλίου τμῆμα· καὶ δύνοντος μὲν καὶ ἀνατέλλοντος ἐλαχίστου μὲν κύκλου, μεγίστη δ’ ἡ ἁψίς, αἰρομένου δὲ μᾶλλον κύκλου μὲν μείζονος, ἐλάττων δ’ ἡ ἁψίς· καὶ μετὰ μὲν τὴν μετοπωρινὴν ἰσημερίαν, ἐν ταῖς βραχυτέραις ἡμέραις, πᾶσαν ὥραν γίγνεται τῆς ἡμέρας, ἐν δὲ ταῖς θεριναῖς οὐ γίγνεται περὶ μεσημβρίαν. οὐδὲ δὴ δυοῖν πλείους ἴριδες οὐ γίγνονται ἅμα. τούτων δὲ τρίχρως μὲν ἑκατέρα, καὶ τὰ [372a] χρώματα ταὐτὰ καὶ ἴσα τὸν ἀριθμὸν ἔχουσιν ἀλλήλαις, ἀμυδρότερα δ’ ἐν τῇ ἐκτὸς καὶ ἐξ ἐναντίας κείμενα κατὰ τὴν θέσιν· ἡ μὲν γὰρ ἐντὸς τὴν πρώτην ἔχει περιφέρειαν τὴν μεγίστην φοινικίαν, ἡ δ’ ἔξωθεν τὴν ἐλαχίστην μὲν ἐγγύτατα δὲ πρὸς ταύτην, καὶ τὰς ἄλλας ἀνάλογον. ἔστι δὲ τὰ χρώματα ταῦτα ἅπερ μόνα σχεδὸν οὐ δύνανται ποιεῖν οἱ γραφεῖς· ἔνια γὰρ αὐτοὶ κεραννύουσι, τὸ δὲ φοινικοῦν καὶ πράσινον καὶ ἁλουργὸν οὐ γίγνεται κεραννύμενον· ἡ δὲ ἶρις ταῦτ’ ἔχει τὰ χρώματα. τὸ δὲ μεταξὺ τοῦ φοινικοῦ καὶ πρασίνου φαίνεται πολλάκις ξανθόν. παρήλιοι δὲ καὶ ῥάβδοι γίγνονται ἐκ πλαγίας αἰεὶ καὶ οὔτ’ ἄνωθεν οὔτε πρὸς τῆς γῆς οὔτ’ ἐξ ἐναντίας, οὐδὲ δὴ νύκτωρ, ἀλλ’ ἀεὶ περὶ τὸν ἥλιον, ἔτι δὲ ἢ αἰρομένου ἢ καταφερομένου· τὰ πλεῖστα δὲ πρὸς δυσμάς· μεσουρανοῦντος δὲ σπάνιον εἴ τι γέγονεν, οἷον ἐν Βοσπόρῳ ποτὲ συνέπεσε· δι’ ὅλης γὰρ τῆς ἡμέρας συνανασχόντες δύο παρήλιοι διετέλεσαν μέχρι δυσμῶν. τὰ μὲν οὖν περὶ ἕκαστον αὐτῶν συμβαίνοντα ταῦτ’ ἐστίν· τὸ δ’ αἴτιον τούτων ἁπάντων ταὐτό· πάντα γὰρ ἀνάκλασις ταῦτ’ ἐστί. διαφέρουσι δὲ τοῖς τρόποις καὶ ἀφ’ ὧν, καὶ ὡς συμβαίνει γίγνεσθαι τὴν ἀνάκλασιν πρὸς τὸν ἥλιον ἢ πρὸς ἄλλο τι τῶν λαμπρῶν. καὶ μεθ’ ἡμέραν μὲν ἶρις γίγνεται, νύκτωρ δ’ ἀπὸ σελήνης, ὡς μὲν οἱ ἀρχαῖοι ᾤοντο, οὐκ ἐγίγνετο· τοῦτο δ’ ἔπαθον διὰ τὸ σπάνιον· ἐλάνθανε γὰρ αὐτούς· γίγνεται μὲν γάρ, ὀλιγάκις δὲ γίγνεται. τὸ δ’ αἴτιον ὅτι τ’ ἐν τῷ σκότει λανθάνει τὰ χρώματα, καὶ ἄλλα πολλὰ δεῖ συμπεσεῖν, καὶ ταῦτα πάντα ἐν ἡμέρᾳ μιᾷ τοῦ μηνός· ἐν τῇ πανσελήνῳ γὰρ γενέσθαι ἀνάγκη τὸ μέλλον ἔσεσθαι, καὶ τότε ἀνατελλούσης ἢ δυνούσης· διόπερ ἐν ἔτεσιν ὑπὲρ τὰ πεντήκοντα δὶς ἐνετύχομεν μόνον. ὅτι μὲν οὖν ἡ ὄψις ἀνακλᾶται, ὥσπερ καὶ ἀφ’ ὕδατος, οὕτω καὶ ἀπὸ ἀέρος καὶ πάντων τῶν ἐχόντων τὴν ἐπιφάνειαν λείαν, ἐκ τῶν περὶ τὴν ὄψιν δεικνυμένων δεῖ λαμβάνειν τὴν πίστιν, καὶ διότι τῶν ἐνόπτρων ἐν ἐνίοις μὲν καὶ τὰ σχήματα ἐμφαίνεται, ἐν ἐνίοις δὲ τὰ χρώματα μόνον· τοιαῦτα δ’ ἐστὶν ὅσα [372b] μικρὰ τῶν ἐνόπτρων, καὶ μηδεμίαν αἰσθητὴν ἔχει διαίρεσιν· ἐν γὰρ τούτοις τὸ μὲν σχῆμα ἀδύνατον ἐμφαίνεσθαι (δόξει γὰρ εἶναι διαιρετόν· πᾶν γὰρ σχῆμα ἅμα δοκεῖ σχῆμά τ’ εἶναι καὶ διαίρεσιν ἔχειν), ἐπεὶ δ’ ἐμφαίνεσθαί τι ἀναγκαῖον, τοῦτο δὲ ἀδύνατον, λείπεται τὸ χρῶμα μόνον ἐμφαίνεσθαι. τὸ δὲ χρῶμα ὁτὲ μὲν λαμπρὸν φαίνεται τῶν λαμπρῶν, ὁτὲ δέ, ἢ τῷ μείγνυσθαι τῷ τοῦ ἐνόπτρου ἢ διὰ τὴν ἀσθένειαν τῆς ὄψεως, ἄλλου χρώματος ἐμποιεῖ φαντασίαν. ἔστω δὲ περὶ τούτων ἡμῖν τεθεωρημένον ἐν τοῖς περὶ τὰς αἰσθήσεις δεικνυμένοις· διὸ τὰ μὲν λέγωμεν, τοῖς δ’ ὡς ὑπάρχουσι χρησώμεθα αὐτῶν.

πρῶτον δὲ περὶ τῆς ἅλω τοῦ σχήματος εἴπωμεν, διότι τε κύκλος γίγνεται, καὶ διότι περὶ τὸν ἥλιον ἢ τὴν σελήνην, ὁμοίως δὲ καὶ περί τι τῶν ἄλλων ἄστρων· ὁ γὰρ αὐτὸς ἐπὶ πάντων ἁρμόσει λόγος. γίγνεται μὲν οὖν ἡ ἀνάκλασις τῆς ὄψεως συνισταμένου τοῦ ἀέρος καὶ τῆς ἀτμίδος εἰς νέφος, ἐὰν ὁμαλὴς καὶ μικρομερὴς συνισταμένη τύχῃ. διὸ καὶ σημεῖον ἡ μὲν σύστασις ὕδατός ἐστιν, αἱ μέντοι διασπάσεις ἢ μαράνσεις, αὗται μὲν εὐδιῶν, αἱ δὲ διασπάσεις πνεύματος. ἐὰν μὲν γὰρ μήτε καταμαρανθῇ μήτε διασπασθῇ, ἀλλ’ ἐαθῇ τὴν φύσιν ἀπολαμβάνειν τὴν αὑτῆς, ὕδατος εἰκότως σημεῖόν ἐστι· δηλοῖ γὰρ ἤδη γίγνεσθαι τοιαύτην τὴν σύστασιν, ἐξ ἧς τὸ συνεχὲς λαμβανούσης τῆς πυκνώσεως ἀναγκαῖον εἰς ὕδωρ ἐλθεῖν· διὸ καὶ μέλαιναι γίγνονται τὴν χρόαν αὗται μάλιστα τῶν ἄλλων. ὅταν δὲ διασπασθῇ, πνεύματος σημεῖον· ἡ γὰρ διαίρεσις ὑπὸ πνεύματος γέγονεν ἤδη μὲν ὄντος, οὔπω δὲ παρόντος. σημεῖον δὲ τούτου διότι ἐντεῦθεν γίγνεται ὁ ἄνεμος, ὅθεν ἂν ἡ κυρία γίγνηται διάσπασις. ἀπομαραινομένη δὲ εὐδίας· εἰ γὰρ μὴ ἔχει πως οὕτως ὁ ἀὴρ ὥστε κρατεῖν τοῦ ἐναπολαμβανομένου θερμοῦ μηδ’ ἔρχεσθαι εἰς πύκνωσιν ὑδατώδη, [ἀπὸ] δῆλον ὡς οὔπω ἡ ἀτμὶς ἀποκέκριται τῆς ἀναθυμιάσεως τῆς ξηρᾶς καὶ πυρώδους· τοῦτο δὲ εὐδίας αἴτιον. πῶς μὲν οὖν ἔχοντος τοῦ ἀέρος γίγνεται ἡ ἀνάκλασις, εἴρηται. [373a] ἀνακλᾶται δ’ ἀπὸ τῆς συνισταμένης ἀχλύος περὶ τὸν ἥλιον ἢ τὴν σελήνην ἡ ὄψις· διὸ οὐκ ἐξ ἐναντίας ὥσπερ ἶρις φαίνεται. πάντοθεν δὲ ὁμοίως ἀνακλωμένης ἀναγκαῖον κύκλον εἶναι ἢ κύκλου μέρος· ἀπὸ γὰρ τοῦ αὐτοῦ σημείου πρὸς τὸ αὐτὸ σημεῖον αἱ ἴσαι κλασθήσονται ἐπὶ κύκλου γραμμῆς ἀεί. ἔστω γὰρ ἀπὸ τοῦ σημείου ἐφ’ ᾧ τὸ Α πρὸς τὸ Β κεκλασμένη ἥ τε τὸ ΑΓΒ καὶ ἡ τὸ ΑΖΒ καὶ ἡ τὸ ΑΔ Β· ἴσαι δὲ αὗταί τε αἱ ΑΓ ΑΖ ΑΔ ἀλλήλαις, καὶ [373a.9] αἱ πρὸς τὸ Β ἀλλήλαις, οἷον αἱ ΓΒ ΖΒ ΔΒ· καὶ ἐπεζεύχθω ἡ ΑΕΒ, ὥστε τὰ τρίγωνα ἴσα· καὶ γὰρ ἐπ’ ἴσης τῆς ΑΕΒ. ἤχθωσαν δὴ κάθετοι ἐπὶ τὴν ΑΕΒ ἐκ τῶν γωνιῶν, ἀπὸ μὲν τῆς Γ ἡ τὸ ΓΕ, ἀπὸ δὲ τῆς Ζ ἡ τὸ ΖΕ, ἀπὸ δὲ τῆς Δ ἡ τὸ ΔΕ. ἴσαι δὴ αὗται· ἐν ἴσοις γὰρ τριγώνοις καὶ ἐν ἑνὶ ἐπιπέδῳ πᾶσαι· πρὸς ὀρθὰς γὰρ πᾶσαι τῇ ΑΕΒ, καὶ ἐφ’ ἓν σημεῖον τὸ Ε συνάπτουσι. κύκλος ἄρα ἔσται ἡ γραφομένη, κέντρον δὲ τὸ Ε. ἔστι δὴ τὸ μὲν Β ὁ ἥλιος, τὸ δὲ Α ἡ ὄψις, ἡ δὲ περὶ τὸ ΓΖΔ περιφέρεια τὸ νέφος ἀφ’ οὗ ἀνακλᾶται ἡ ὄψις πρὸς τὸν ἥλιον. δεῖ δὲ νοεῖν συνεχῆ τὰ ἔνοπτρα· ἀλλὰ διὰ μικρότητα ἕκαστον μὲν ἀόρατον, τὸ δ’ ἐξ ἁπάντων ἓν εἶναι δοκεῖ διὰ τὸ ἐφεξῆς. φαίνεται δὲ τὸ μὲν λευκόν, ὁ ἥλιος, κύκλῳ συνεχῶς ἐν ἑκάστῳ φαινόμενος τῶν ἐνόπτρων, καὶ μηδεμίαν ἔχων αἰσθητὴν διαίρεσιν, πρὸς δὲ τῇ γῇ μᾶλλον διὰ τὸ νηνεμώτερον εἶναι· πνεύματος γὰρ ὄντος οὐκ εἶναι στάσιν φανερόν. παρὰ δὲ τοῦτο μέλαινα ἡ ἐχομένη περιφέρεια, διὰ τὴν ἐκείνης λευκότητα δοκοῦσα εἶναι μελαντέρα. πλεονάκις δὲ γίγνονται αἱ ἅλῳ περὶ τὴν σελήνην διὰ τὸ τὸν ἥλιον θερμότερον ὄντα θᾶττον διαλύειν τὰς συστάσεις τοῦ ἀέρος. περὶ δὲ τοὺς ἀστέρας γίγνονται μὲν διὰ τὰς αὐτὰς αἰτίας, οὐ σημειώδεις δ’ ὁμοίως, ὅτι μικρὰς πάμπαν ἐπιδηλοῦσι τὰς συστάσεις καὶ οὔπω γονίμους.

ἡ δ’ ἶρις ὅτι μέν ἐστιν ἀνάκλασις, εἴρηται πρότερον· ποία δέ τις ἀνάκλασις, καὶ πῶς καὶ διὰ τίν’ αἰτίαν ἕκαστα γίγνεται τῶν συμβαινόντων περὶ ταύτην, λέγωμεν νῦν. ἀνακλωμένη μὲν οὖν ἡ ὄψις ἀπὸ πάντων φαίνεται τῶν λείων, [373b] τούτων δ’ ἐστὶν καὶ ἀὴρ καὶ ὕδωρ. γίγνεται δὲ ἀπὸ μὲν ἀέρος, ὅταν τύχῃ συνιστάμενος. διὰ δὲ τὴν τῆς ὄψεως ἀσθένειαν πολλάκις καὶ ἄνευ συστάσεως ποιεῖ ἀνάκλασιν, οἷόν ποτε συνέβαινέ τινι πάθος ἠρέμα καὶ οὐκ ὀξὺ βλέποντι· ἀεὶ γὰρ εἴδωλον ἐδόκει προηγεῖσθαι βαδίζοντι αὐτῷ, ἐξ ἐναντίας βλέπον πρὸς αὐτόν. τοῦτο δ’ ἔπασχε διὰ τὸ τὴν ὄψιν ἀνακλᾶσθαι πρὸς αὐτόν· οὕτω γὰρ ἀσθενὴς ἦν καὶ λεπτὴ πάμπαν ὑπὸ τῆς ἀρρωστίας, ὥστ’ ἔνοπτρον ἐγίγνετο καὶ ὁ πλησίον ἀήρ, καὶ οὐκ ἐδύνατο ἀπωθεῖν-ὡς ὁ πόρρω καὶ πυκνός· διόπερ αἵ τ’ ἄκραι ἀνεσπασμέναι φαίνονται ἐν τῇ θαλάττῃ, καὶ μείζω τὰ μεγέθη πάντων, ὅταν εὖροι πνέωσι, καὶ τὰ ἐν ταῖς ἀχλύσιν, οἷον καὶ ἥλιος καὶ ἄστρα ἀνίσχοντα καὶ δύνοντα μᾶλλον ἢ μεσουρανοῦντα. ἀπὸ δὲ ὕδατος μάλιστα ἀνακλᾶται, καὶ ἀπὸ ἀρχομένου γίγνεσθαι μᾶλλον ἔτι ἢ ἀπ’ ἀέρος· ἕκαστον γὰρ τῶν μορίων ἐξ ὧν γίγνεται συνισταμένων ἡ ψακὰς ἔνοπτρον ἀναγκαῖον εἶναι μᾶλλον τῆς ἀχλύος. ἐπεὶ δὲ καὶ δῆλον καὶ εἴρηται πρότερον ὅτι ἐν τοῖς τοιούτοις ἐνόπτροις τὸ χρῶμα μόνον ἐμφαίνεται, τὸ δὲ σχῆμα ἄδηλον, ἀναγκαῖον, ὅταν ἄρχηται ὕειν καὶ ἤδη μὲν συνιστῆται εἰς ψακάδας ὁ ἐν τοῖς νέφεσιν ἀήρ, μήπω δὲ ὕῃ, ἐὰν ἐξ ἐναντίας ᾖ ὁ ἥλιος ἢ ἄλλο τι οὕτω λαμπρὸν ὥστε γίγνεσθαι ἔνοπτρον τὸ νέφος, καὶ τὴν ἀνάκλασιν γίγνεσθαι πρὸς τὸ λαμπρὸν ἐξ ἐναντίας, γίγνεσθαι ἔμφασιν χρώματος, οὐ σχήματος. ἑκάστου δ’ ὄντος τῶν ἐνόπτρων μικροῦ καὶ ἀοράτου, τῆς δ’ ἐξ ἁπάντων αὐτῶν συνεχείας τοῦ μεγέθους ὁρωμένης, ἀνάγκη συνεχὲς μέγεθος τοῦ αὐτοῦ φαίνεσθαι χρώματος· ἕκαστον γὰρ τῶν ἐνόπτρων τὸ αὐτὸ ἀποδίδωσι χρῶμα τῷ συνεχεῖ. ὥστ’ ἐπεὶ ταῦτ’ ἐνδέχεται συμβαίνειν, ὅταν τοῦτον ἔχῃ τὸν τρόπον ὅ τε ἥλιος καὶ τὸ νέφος καὶ ἡμεῖς ὦμεν μεταξὺ αὐτῶν, ἔσται διὰ τὴν ἀνάκλασιν ἔμφασίς τις. ἀλλὰ μὴν καὶ φαίνεται τότε καὶ οὐκ ἄλλως ἐχόντων γιγνομένη ἡ ἶρις. ὅτι μὲν οὖν ἀνάκλασις ἡ ἶρις τῆς ὄψεως πρὸς τὸν ἥλιόν ἐστι, φανερόν· διὸ καὶ ἐξ ἐναντίας ἀεὶ γίγνεται, ἡ δ’ ἅλως περὶ αὐτόν· καίτοι ἄμφω ἀνάκλασις· ἀλλ’ ἥ γε τῶν χρωμάτων [374a] ποικιλία διαφέρει· ἡ μὲν γὰρ ἀφ’ ὕδατος καὶ μέλανος γίγνεται ἀνάκλασις καὶ πόρρωθεν, ἡ δ’ ἐγγύθεν καὶ ἀπὸ ἀέρος λευκοτέρου τὴν φύσιν. φαίνεται δὲ τὸ λαμπρὸν διὰ τοῦ μέλανος ἢ ἐν τῷ μέλανι (διαφέρει γὰρ οὐδέν) φοινικοῦν (ὁρᾶν δ’ ἔξεστι τό γε τῶν χλωρῶν ξύλων πῦρ, ὡς ἐρυθρὰν ἔχει τὴν φλόγα διὰ τὸ τῷ καπνῷ πολλῷ μεμεῖχθαι τὸ πῦρ λαμπρὸν ὂν καὶ λευκόν)· καὶ δι’ ἀχλύος καὶ καπνοῦ ὁ ἥλιος φαίνεται φοινικοῦς. διὸ ἡ μὲν τῆς ἴριδος ἀνάκλασις ἡ μὲν πρώτη τοιαύτην ἔχειν φαίνεται τὴν χρόαν (ἀπὸ ῥανίδων γὰρ μικρῶν γίγνεται ἡ ἀνάκλασις), ἡ δὲ τῆς ἅλω οὔ. περὶ δὲ τῶν ἄλλων χρωμάτων ὕστερον ἐροῦμεν. ἔτι δὲ περὶ αὐτὸν μὲν τὸν ἥλιον οὐ γίγνεται διατριβὴ τοιαύτης συστάσεως, ἀλλ’ ἢ ὕει ἢ διαλύεται. ἐκ δὲ τῶν ἐναντίων ἐν τῷ μεταξὺ τῆς τοῦ ὕδατος γενέσεως γίγνεταί τις χρόνος· τούτου γὰρ μὴ συμβαίνοντος ἦσαν ἂν κεχρωματισμέναι αἱ ἅλως ὥσπερ ἡ ἶρις. νῦν δ’ ὅλα μὲν οὐ γίγνεται τοιαύτην ἔχοντα τὴν ἔμφασιν, οὐδὲ κύκλῳ, μικρὰ δὲ καὶ κατὰ μόριον, αἳ καλοῦνται ῥάβδοι, ἐπεὶ εἰ συνίστατο τοιαύτη ἀχλὺς οἵα γένοιτ’ ἂν ὕδατος ἤ τινος ἄλλου μέλανος, καθάπερ λέγομεν, ἐφαίνετο ἂν ἡ ἶρις ὅλη, ὥσπερ ἡ περὶ τοὺς λύχνους. περὶ γὰρ τούτους τὰ πλεῖστα νοτίων ὄντων ἶρις γίγνεται τοῦ χειμῶνος, μάλιστα δὲ δήλη γίγνεται τοῖς ὑγροὺς ἔχουσι τοὺς ὀφθαλμούς· τούτων γὰρ ἡ ὄψις ταχὺ δι’ ἀσθένειαν ἀνακλᾶται. γίγνεται δ’ ἀπό τε τῆς τοῦ ἀέρος ὑγρότητος καὶ ἀπὸ λιγνύος τῆς ἀπὸ τῆς φλογὸς ἀπορρεούσης καὶ μειγνυμένης· τότε γὰρ γίγνεται ἔνοπτρον, καὶ διὰ τὴν μελανίαν· καπνώδης γὰρ ἡ λιγνύς· τὸ δὲ τοῦ λύχνου φῶς οὐ λευκὸν ἀλλὰ πορφυροῦν φαίνεται κύκλῳ καὶ ἰριῶδες, φοινικοῦν δ’ οὔ· ἔστι γὰρ ἥ τε ὄψις ὀλίγη ἡ ἀνακλωμένη, καὶ μέλαν τὸ ἔνοπτρον. ἡ δ’ ἀπὸ τῶν κωπῶν τῶν ἀναφερομένων ἐκ τῆς θαλάττης ἶρις τῇ μὲν θέσει τὸν αὐτὸν γίγνεται τρόπον τῇ ἐν τῷ οὐρανῷ, τὸ δὲ χρῶμα ὁμοιοτέρα τῇ περὶ τοὺς λύχνους· οὐ γὰρ φοινικῆν ἀλλὰ πορφυρᾶν ἔχουσα φαίνεται τὴν χρόαν. ἡ δ’ ἀνάκλασις ἀπὸ τῶν μικροτάτων μὲν συνεχῶν δὲ γίγνεται ῥανίδων· αὗται δ’ ὕδωρ ἀποκεκριμένον εἰσὶν ἤδη παντελῶς. γίγνεται δὲ κἄν [374b] τις λεπταῖς ῥαίνῃ ῥανίσιν εἴς τι τοιοῦτον χωρίον ὃ τὴν θέσιν πρὸς τὸν ἥλιον ἐστραμμένον ἐστὶ καὶ τῇ μὲν ὁ ἥλιος ἀνέχῃ τῇ δὲ σκιάζῃ· ἐν τῷ τοιούτῳ γάρ, ἐὰν εἴσω τις ῥαίνῃ, τῷ ἑστῶτι ἐκτός, ᾗ ἐπαλλάττουσιν αἱ ἀκτῖνες καὶ ποιοῦσι τὴν σκιάν, φαίνεται ἶρις. ὁ δὲ τρόπος καὶ ἡ χρόα ὁμοία καὶ τὸ αἴτιον τὸ αὐτὸ τῇ ἀπὸ τῶν κωπῶν· τῇ γὰρ χειρὶ κώπῃ χρῆται ὁ ῥαίνων. ὅτι δὲ τὸ χρῶμα τοιοῦτον, ἅμα δῆλον ἔσται καὶ περὶ τῶν ἄλλων χρωμάτων τῆς φαντασίας, ἐκ τῶνδε. δεῖ γὰρ νοήσαντας, ὥσπερ εἴρηται, καὶ ὑποθεμένους πρῶτον μὲν ὅτι τὸ λαμπρὸν ἐν τῷ μέλανι ἢ διὰ τοῦ μέλανος χρῶμα ποιεῖ φοινικοῦν, δεύτερον δ’ ὅτι ἡ ὄψις ἐκτεινομένη ἀσθενεστέρα γίγνεται καὶ ἐλάττων, τρίτον δ’ ὅτι τὸ μέλαν οἷον ἀπόφασίς ἐστιν· τῷ γὰρ ἐκλείπειν τὴν ὄψιν φαίνεται μέλαν· διὸ τὰ πόρρω πάντα μελάντερα φαίνεται, διὰ τὸ μὴ δικνεῖσθαι τὴν ὄψιν. θεωρείσθω μὲν οὖν ταῦτ’ ἐκ τῶν περὶ τὰς αἰσθήσεις συμβαινόντων· ἐκείνων γὰρ ἴδιοι οἱ περὶ τούτων λόγοι· νῦν δ’ ὅσον ἀνάγκη, τοσοῦτον περὶ αὐτῶν λέγωμεν. φαίνεται δ’ οὖν διὰ ταύτην τὴν αἰτίαν τά τε πόρρω μελάντερα καὶ ἐλάττω καὶ λειότερα, καὶ τὰ ἐν τοῖς ἐνόπτροις, καὶ τὰ νέφη μελάντερα βλέπουσιν εἰς τὸ ὕδωρ ἢ εἰς αὐτὰ τὰ νέφη. καὶ τοῦτο πάνυ ἐπιδήλως· διὰ γὰρ τὴν [374b.22] ἀνάκλασιν ὀλίγῃ τῇ ὄψει θεωροῦνται. διαφέρει δ’ οὐδὲν τὸ ὁρώμενον μεταβάλλειν ἢ τὴν ὄψιν· ἀμφοτέρως γὰρ ἔσται ταὐτόν. πρὸς δὲ τούτοις δεῖ μὴ λεληθέναι καὶ τόδε· συμβαίνει γὰρ ὅταν ᾖ τοῦ ἡλίου νέφος πλησίον, εἰς μὲν αὐτὸ βλέποντι μηδὲν φαίνεσθαι κεχρωματισμένον ἀλλ’ εἶναι λευκόν, ἐν δὲ τῷ ὕδατι αὐτὸ τοῦτο θεωροῦντι χρῶμά τι ἔχειν τῆς ἴριδος. δῆλον τοίνυν ὅτι ἡ ὄψις ὥσπερ καὶ τὸ μέλαν κλωμένη δι’ ἀσθένειαν μελάντερον ποιεῖ φαίνεσθαι, καὶ τὸ λευκὸν ἧττον λευκόν, καὶ προσάγει πρὸς τὸ μέλαν. ἡ μὲν οὖν ἰσχυροτέρα ὄψις εἰς φοινικοῦν χρῶμα μετέβαλεν, ἡ δ’ ἐχομένη εἰς τὸ πράσινον, ἡ δὲ ἔτι ἀσθενεστέρα εἰς τὸ ἁλουργόν. ἐπὶ δὲ τὸ πλέον οὐκέτι φαίνεται, ἀλλ’ ἐν τοῖς τρισίν, ὥσπερ καὶ τῶν ἄλλων τὰ πλεῖστα, καὶ τούτων ἔσχεν τέλος· τῶν δ’ ἄλλων ἀναίσθητος ἡ μεταβολή. διὸ καὶ ἡ [375a] ἶρις τρίχρως φαίνεται, ἑκατέρα μέν, ἐναντίως δέ. ἡ μὲν οὖν πρώτη τὴν ἔξω φοινικῆν ἔχει· ἀπὸ μεγίστης γὰρ περιφερείας πλείστη προσπίπτει ὄψις πρὸς τὸν ἥλιον, μεγίστη δ’ ἡ ἔξω· ἡ δ’ ἐχομένη καὶ ἡ τρίτη ἀνάλογον. ὥστ’ εἰ τὰ περὶ τῶν χρωμάτων τῆς φαντασίας εἴρηται καλῶς, ἀνάγκη τρίχρων τε εἶναι αὐτὴν καὶ τούτοις τοῖς χρώμασι κεχρῶσθαι μόνοις. τὸ δὲ ξανθὸν φαίνεται διὰ τὸ παρ’ ἄλληλα φαίνεσθαι. τὸ γὰρ φοινικοῦν παρὰ τὸ πράσινον λευκὸν φαίνεται. σημεῖον δὲ τούτου· ἐν γὰρ τῷ μελαντάτῳ νέφει μάλιστα ἄκρατος γίγνεται ἶρις· συμβαίνει δὲ τότε ξανθότερον εἶναι δοκεῖν τὸ φοινικοῦν. ἔστι δὲ τὸ ξανθὸν ἐν τῇ ἴριδι χρῶμα μεταξὺ τοῦ τε φοινικοῦ καὶ πρασίνου χρώματος. διὰ τὴν μελανίαν οὖν τοῦ κύκλῳ νέφους ὅλον αὐτοῦ φαίνεται τὸ φοινικοῦν λευκόν· ἔστι γὰρ πρὸς ἐκεῖνα λευκόν. καὶ πάλιν ἀπομαραινομένης τῆς ἴριδος ἐγγύτατα, ὅταν λύηται τὸ φοινικοῦν· ἡ γὰρ νεφέλη λευκὴ οὖσα, προσπίπτουσα παρὰ τὸ πράσινον, μεταβάλλει εἰς τὸ ξανθόν. μέγιστον δὲ σημεῖον τούτων ἡ ἀπὸ τῆς σελήνης ἶρις· φαίνεται γὰρ λευκὴ πάμπαν. γίγνεται δὲ τοῦτο ὅτι ἔν τε τῷ νέφει ζοφερῷ φαίνεται καὶ ἐν νυκτί. ὥσπερ οὖν πῦρ ἐπὶ πῦρ, μέλαν παρὰ μέλαν ποιεῖ τὸ ἠρέμα λευκὸν παντελῶς φαίνεσθαι λευκόν· τοῦτο δ’ ἐστὶν τὸ φοινικοῦν. γίγνεται δὲ τοῦτο τὸ πάθος καταφανὲς καὶ ἐπὶ τῶν ἀνθῶν· ἐν γὰρ τοῖς ὑφάσμασιν καὶ ποικίλμασιν ἀμύθητον διαφέρει τῇ φαντασίᾳ ἄλλα παρ’ ἄλλα τιθέμενα τῶν χρωμάτων, οἷον καὶ τὰ πορφυρᾶ ἐν λευκοῖς ἢ μέλασιν ἐρίοις, ἔτι δ’ ἐν αὐγῇ τοιᾳδὶ ἢ τοιᾳδί· διὸ καὶ οἱ ποικιλταί φασι διαμαρτάνειν ἐργαζόμενοι πρὸς τὸν λύχνον πολλάκις τῶν ἀνθῶν, λαμβάνοντες ἕτερα ἀνθ’ ἑτέρων. διότι μὲν οὖν τρίχρως τε, καὶ ὅτι ἐκ τούτων φαίνεται τῶν χρωμάτων μόνων ἡ ἶρις, εἴρηται. διπλῆ δὲ καὶ ἀμαυροτέρα τοῖς χρώμασιν ἡ περιέχουσα, καὶ τῇ θέσει τὰς χρόας ἐξ ἐναντίας ἔχει κειμένας διὰ τὴν αὐτὴν αἰτίαν· μακροτέρα γὰρ ἀποτεινομένη ἡ ὄψις ὥσπερ τὸ πορρώτερον ὁρᾷ, καὶ τὸ ἐνταῦθα τὸν αὐτὸν τρόπον. ἀσθενεστέρα οὖν ἀπὸ τῆς ἔξωθεν ἡ [375b] ἀνάκλασις γίγνεται διὰ τὸ πορρώτερον ποιεῖσθαι τὴν ἀνάκλασιν, ὥστ’ ἐλάττων προσπίπτουσα τὰ χρώματα ποιεῖ ἀμαυρότερα φαίνεσθαι. καὶ ἀντεστραμμένως δὴ διὰ τὸ πλείω ἀπὸ τῆς ἐλάττονος καὶ τῆς ἐντὸς περιφερείας προσπίπτειν πρὸς τὸν ἥλιον· ἐγγυτέρω γὰρ τῆς ὄψεως οὖσα ἀνακλᾶται ἀπὸ τῆς ἐγγυτάτω περιφερείας τῆς πρώτης ἴριδος. ἐγγυτάτω δὲ ἐν τῇ ἔξωθεν ἴριδι ἡ ἐλαχίστη περιφέρεια, ὥστε αὕτη ἕξει τὸ χρῶμα φοινικοῦν· ἡ δ’ ἐχομένη καὶ ἡ τρίτη κατὰ λόγον. ἡ ἔξω ἶρις ἐφ’ ᾧ τὸ Β· ἡ ἔσω, ἡ πρώτη, ἐφ’ ᾧ τὸ Α· τὰ χρώματα δ’, ἐφ’ ᾧ τὸ Γ, φοινικοῦν, ἐφ’ ᾧ τὸ Δ, πράσινον, ἐφ’ ᾧ Ε, ἁλουργόν· τὸ ξανθὸν δὲ φαίνεται ἐφ’ οὗ τὸ Ζ. τρεῖς δ’ οὐκέτι γίγνονται, οὐδὲ πλείους ἴριδες, διὰ τὸ καὶ τὴν δευτέραν γίγνεσθαι ἀμαυροτέραν, ὥστε καὶ τὴν τρίτην ἀνάκλασιν πάμπαν ἀσθενῆ γίγνεσθαι καὶ ἀδυνατεῖν ἀφικνεῖσθαι πρὸς τὸν ἥλιον.

ὅτι δ’ οὔτε κύκλον οἷόν τε γενέσθαι τῆς ἴριδος οὔτε μεῖζον ἡμικυκλίου τμῆμα, καὶ περὶ τῶν ἄλλων τῶν συμβαινόντων περὶ αὐτήν, ἐκ τοῦ διαγράμματος ἔσται θεωροῦσι δῆλον. ἡμισφαιρίου γὰρ ὄντος ἐπὶ τοῦ ὁρίζοντος κύκλου τοῦ ἐφ’ ᾧ τὸ Α, κέντρου δὲ τοῦ Κ, ἄλλου δέ τινος ἀνατέλλοντος σημείου ἐφ’ ᾧ τὸ Η, ἐὰν ἀπὸ τοῦ Κ γραμμαὶ κατὰ κῶνον ἐκπίπτουσαι ποιῶσιν ὡσπερεὶ ἄξονα τὴν ἐφ’ ᾗ ΗΚ, καὶ ἀπὸ τοῦ Κ ἐπὶ τὸ Μ ἐπιζευχθεῖσαι ἀνακλασθῶσιν ἀπὸ τοῦ ἡμισφαιρίου ἐπὶ τὸ Η ἐπὶ τὴν μείζω γωνίαν, πρὸς κύκλου περιφέρειαν προσπεσοῦνται αἱ ἀπὸ τοῦ Κ· καὶ ἐὰν μὲν ἐπ’ ἀνατολῆς ἢ ἐπὶ δύσεως τοῦ ἄστρου ἡ ἀνάκλασις γένηται, ἡμικύκλιον ἀποληφθήσεται τοῦ κύκλου ὑπὸ τοῦ ὁρίζοντος τὸ ὑπὲρ γῆν γιγνόμενον, ἐὰν δ’ ἐπάνω, ἀεὶ ἔλαττον ἡμικυκλίου· ἐλάχιστον δέ, ὅταν ἐπὶ τοῦ μεσημβρινοῦ γένηται τὸ ἄστρον. ἔστω γὰρ ἐπ’ ἀνατολῆς πρῶτον, οὗ τὸ Η, καὶ ἀνακεκλάσθω ἡ ΚΜ ἐπὶ τὸ Η, καὶ τὸ ἐπίπεδον ἐκβεβλήσθω ἐν ᾧ ἡ Α, τὸ ἀπὸ τοῦ τριγώνου ἐν ᾧ τὸ ΗΚΜ. κύκλος οὖν ἡ τομὴ ἔσται τῆς σφαίρας ὁ μέγιστος. ἔστω ὁ ἐφ’ ᾧ Α· διοίσει γὰρ οὐδὲν ἂν ὁποιονοῦν τῶν ἐπὶ τῆς ΗΚ κατὰ τὸ τρίγωνον τὸ [376a] ΚΜΗ ἐκβληθῇ τὸ ἐπίπεδον. αἱ οὖν ἀπὸ τῶν Η Κ ἀναγόμεναι γραμμαὶ ἐν τούτῳ τῷ λόγῳ οὐ συσταθήσονται τοῦ ἐφ’ ᾧ Α ἡμικυκλίου πρὸς ἄλλο καὶ ἄλλο σημεῖον· ἐπεὶ γὰρ τά τε Κ Η σημεῖα δέδοται καὶ ἡ ΗΚ, δεδομένη ἂν εἴη καὶ ἡ ΜΗ, ὥστε καὶ λόγος τῆς ΜΗ πρὸς ΜΚ. δεδομένης οὖν περιφερείας ἐφάψεται τὸ Μ. ἔστω δὴ αὕτη ἐφ’ ἧς τὰ Ν Μ· ὥστε ἡ τομὴ τῶν περιφερειῶν δέδοται. πρὸς ἄλλῃ δέ γε ἢ τῇ ΜΝ περιφερείᾳ ἀπὸ τῶν αὐτῶν σημείων ὁ αὐτὸς λόγος ἐν τῷ αὐτῷ ἐπιπέδῳ οὐ συνίσταται. ἐκκείσθω οὖν τις γραμμὴ ἡ ΔΒ, καὶ τετμήσθω ὡς ἡ ΜΗ πρὸς ΜΚ ἡ Δ πρὸς Β. μείζων δὲ ἡ ΜΗ τῆς ΚΜ, ἐπείπερ ἐπὶ τὴν μείζω γωνίαν ἡ ἀνάκλασις τοῦ κώνου· ὑπὸ γὰρ τὴν μείζω γωνίαν ὑποτείνει τοῦ ΚΜΗ τριγώνου. τὰς δ’ αὐτὰς αἰτίας ὑποληπτέον καὶ περὶ παρηλίων καὶ ῥάβδων ταῖς εἰρημέναις. γίγνεται γὰρ παρήλιος μὲν ἀνακλωμένης τῆς ὄψεως πρὸς τὸν

ἥλιον, ῥάβδοι δὲ διὰ τὸ προσπίπτειν τοιαύτην οὖσαν τὴν ὄψιν, οἵαν εἴπομεν ἀεὶ γίγνεσθαι ὅταν πλησίον ὄντων τοῦ ἡλίου νεφῶν ἀπό τινος ἀνακλασθῇ τῶν ὑγρῶν πρὸς τὸ νέφος· φαίνεται γὰρ αὐτὰ μὲν [377b] ἀχρωμάτιστα τὰ νέφη κατ' εὐθυωρίαν εἰσβλέπουσιν, ἐν δὲ τῷ ὕδατι ῥάβδων μεστὸν τὸ νέφος· πλὴν τότε μὲν ἐν τῷ ὕδατι δοκεῖ τὸ χρῶμα τοῦ νέφους εἶναι, ἐν δὲ ταῖς ῥάβδοις ἐπ' αὐτοῦ τοῦ νέφους. γίγνεται δὲ τοῦτο ὅταν ἀνώμαλος ἡ τοῦ νέφους ᾖ σύστασις, καὶ τῇ μὲν πυκνότερον τῇ δὲ μανόν, καὶ τῇ μὲν ὑδατωδέστερον τῇ δ' ἧττον· ἀνακλασθείσης γὰρ τῆς [τοῦ ἡλίου] ὄψεως πρὸς τὸν ἥλιον, τὸ σχῆμα μὲν οὐχ ὁρᾶται [διὰ μικρότητα τῶν ἐνόπτρων], τὸ δὲ χρῶμα· διὰ δὲ τὸ ἐν ἀνωμάλῳ φαίνεσθαι λαμπρὸν καὶ λευκὸν τὸν ἥλιον, πρὸς ὃν ἀνεκλάσθη ἡ ὄψις, τὸ μὲν φοινικοῦν φαίνεται, τὸ δὲ πράσινον ἢ ξανθόν. διαφέρει γὰρ οὐδὲν διὰ τοιούτων ὁρᾶν ἢ ἀπὸ τοιούτων ἀνακλωμένην· ἀμφοτέρως γὰρ φαίνεται τὴν χρόαν ὅμοιον, ὥστ' εἰ κἀκείνως φοινικοῦν, καὶ οὕτως. αἱ μὲν οὖν ῥάβδοι γίγνονται δι' ἀνωμαλίαν τοῦ ἐνόπτρου οὐ τῷ σχήματι ἀλλὰ τῷ χρώματι· ὁ δὲ παρήλιος, ὅταν ὅτι μάλιστα ὁμαλὸς ᾖ ὁ ἀὴρ καὶ πυκνὸς ὁμοίως· διὸ φαίνεται λευκός. ἡ μὲν γὰρ ὁμαλότης τοῦ ἐνόπτρου ποιεῖ χρόαν μίαν τῆς ἐμφάσεως· ἡ δ' ἀνάκλασις ἀθρόας τῆς ὄψεως, διὰ τὸ ἅμα προσπίπτειν πρὸς τὸν ἥλιον ἀπὸ πυκνῆς οὔσης τῆς ἀχλύος, [διὰ] καὶ οὔπω μὲν οὔσης ὕδωρ ἐγγὺς δ' ὕδατος, τὸ ὑπάρχον τῷ ἡλίῳ ἐμφαίνεσθαι χρῶμα ποιεῖ, ὥσπερ ἀπὸ χαλκοῦ λείου κλωμένην διὰ τὴν πυκνότητα. ὥστ' ἐπεὶ τὸ χρῶμα τοῦ ἡλίου λευκόν, καὶ ὁ παρήλιος φαίνεται λευκός. διὰ δὲ τὸ αὐτὸ τοῦτο μᾶλλον ὕδατος σημεῖον ὁ παρήλιος τῶν ῥάβδων· μᾶλλον γὰρ συμβαίνει τὸν ἀέρα εὐεργῶς ἔχειν πρὸς γένεσιν ὕδατος. ὁ δὲ νότιος τοῦ βορείου μᾶλλον, ὅτι μᾶλλον ὁ νότιος ἀὴρ εἰς ὕδωρ μεταβάλλει τοῦ πρὸς ἄρκτον. γίγνονται δ', ὥσπερ εἴπομεν, περί τε δυσμὰς καὶ περὶ τὰς ἀνατολάς, καὶ οὔτε ἄνωθεν οὔτε κάτωθεν, ἀλλ' ἐκ τῶν πλαγίων καὶ ῥάβδοι καὶ παρήλιοι· καὶ οὔτ' ἐγγὺς τοῦ ἡλίου λίαν οὔτε πόρρω παντελῶς· ἐγγὺς μὲν γὰρ οὖσαν ὁ ἥλιος διαλύει τὴν σύστασιν, πόρρω δ' οὔσης ἡ ὄψις οὐκ ἀνακλασθήσεται· ἀπὸ γὰρ μικροῦ ἐνόπτρου πόρρω ἀποτεινομένη ἀσθενὴς γίγνεται· διὸ καὶ αἱ ἅλως οὐ γίγνονται ἐξ ἐναντίας τοῦ ἡλίου. ἄνω [378a] μὲν οὖν ἐὰν γίγνηται καὶ ἐγγύς, διαλύσει ὁ ἥλιος· ἐὰν δὲ πόρρω, ἐλάττων ἡ ὄψις οὖσα ἢ ὥστε ποιεῖν ἀνάκλασιν οὐ [ὑπὸ τὸν ἥλιον] προσπεσεῖται. ἐν δὲ τῷ πλαγίῳ ἐστὶ τοσοῦτον ἀποστῆναι τὸ ἔνοπτρον, ὥστε μήτε τὸν ἥλιον διαλῦσαι, τήν τε ὄψιν ἀθρόαν ἐλθεῖν, διὰ τὸ πρὸς τὴν γῆν φερομένην μὴ διασπᾶσθαι ὥσπερ δι' ἀχανοῦς φερομένην. ὑπὸ δὲ τὸν ἥλιον οὐ γίγνεται διὰ τὸ πλησίον μὲν τῆς γῆς διαλύεσθαι ἂν ὑπὸ τοῦ ἡλίου, ἄνω δὲ μεσουρανίου <γιγνομένης συστάσεως> τὴν ὄψιν διασπᾶσθαι.

καὶ ὅλως οὐδ’ ἐκ πλαγίου μεσουρανίου γίγνεται· ἡ γὰρ ὄψις οὐχ ὑπὸ τὴν γῆν φέρεται, ὥστε ὀλίγη ἀφικνεῖται πρὸς τὸ ἔνοπτρον, καὶ ἡ ἀνακλωμένη γίγνεται πάμπαν ἀσθενής. ὅσα μὲν οὖν ἔργα συμβαίνει παρέχεσθαι τὴν ἔκκρισιν ἐν τοῖς τόποις τοῖς ὑπὲρ τῆς γῆς, σχεδόν ἐστι τοσαῦτα καὶ τοιαῦτα.

ὅσα δ’ ἐν αὐτῇ τῇ γῇ, ἐγκατακλειομένη τοῖς τῆς γῆς μέρεσιν, ἀπεργάζεται, λεκτέον. ποιεῖ γὰρ δύο διαφορὰς σωμάτων διὰ τὸ διπλῆ πεφυκέναι καὶ αὐτή, καθάπερ καὶ ἐν τῷ μετεώρῳ· δύο μὲν γὰρ αἱ ἀναθυμιάσεις, ἡ μὲν ἀτμιδώδης ἡ δὲ καπνώδης, ὥς φαμεν, εἰσίν· δύο δὲ καὶ τὰ εἴδη τῶν ἐν τῇ γῇ γιγνομένων, τὰ μὲν ὀρυκτὰ τὰ δὲ μεταλλευτά. ἡ μὲν οὖν ξηρὰ ἀναθυμίασίς ἐστιν ἥ τις ἐκπυροῦσα ποιεῖ τὰ ὀρυκτὰ πάντα, οἷον λίθων τε γένη τὰ [378a.23] ἄτηκτα καὶ σανδαράκην καὶ ὤχραν καὶ μίλτον καὶ θεῖον καὶ τἆλλα τὰ τοιαῦτα. τὰ δὲ πλεῖστα τῶν ὀρυκτῶν ἐστιν τὰ μὲν κονία κεχρωματισμένη, τὰ δὲ λίθος ἐκ τοιαύτης γεγονὼς συστάσεως, οἷον τὸ κιννάβαρι. τῆς δ’ ἀναθυμιάσεως τῆς ἀτμιδώδους, ὅσα μεταλλεύεται, καὶ ἔστιν ἢ χυτὰ ἢ ἐλατά, οἷον σίδηρος, χρυσός, χαλκός. ποιεῖ δὲ ταῦτα πάντα ἡ ἀναθυμίασις ἡ ἀτμιδώδης ἐγκατακλειομένη, καὶ μάλιστα ἐν τοῖς λίθοις, διὰ ξηρότητα εἰς ἓν συνθλιβομένη καὶ πηγνυμένη, οἷον ἢ δρόσος ἢ πάχνη, ὅταν ἀποκριθῇ. ἐνταῦθα δὲ πρὶν ἀποκριθῆναι γεννᾶται ταῦτα. διὸ ἔστι μὲν ὡς ὕδωρ ταῦτα, ἔστιν δ’ ὡς οὔ· δυνάμει μὲν γὰρ ἡ ὕλη ὕδατος ἦν, ἔστι δ’ οὐκέτι, οὐδ’ ἐξ ὕδατος γενομένου διά τι πάθος, ὥσπερ [378b] οἱ χυμοί· οὐδὲ γὰρ οὕτω γίγνεται τὸ μὲν χαλκὸς τὸ δὲ χρυσός, ἀλλὰ πρὶν γενέσθαι παγείσης τῆς ἀναθυμιάσεως ἕκαστα τούτων ἐστίν. διὸ καὶ πυροῦται πάντα καὶ γῆν ἔχει· ξηρὰν γὰρ ἔχει ἀναθυμίασιν· ὁ δὲ χρυσὸς μόνος οὐ πυροῦται. κοινῇ μὲν οὖν εἴρηται περὶ αὐτῶν ἁπάντων, ἰδίᾳ δὲ σκεπτέον προχειριζομένοις περὶ ἕκαστον γένος.

Βιβλίο Δ’Ἐπεὶ δὲ τέτταρα αἴτια διώρισται τῶν στοιχείων, τούτων

δὲ κατὰ συζυγίας καὶ τὰ στοιχεῖα τέτταρα συμβέβηκεν εἶναι, ὧν τὰ μὲν δύο ποιητικά, τὸ θερμὸν καὶ τὸ ψυχρόν, τὰ δὲ δύο παθητικά, τὸ ξηρὸν καὶ τὸ ὑγρόν· ἡ δὲ πίστις τούτων ἐκ τῆς ἐπαγωγῆς· φαίνεται γὰρ ἐν πᾶσιν ἡ μὲν θερμότης καὶ ψυχρότης ὁρίζουσαι καὶ συμφύουσαι καὶ μεταβάλλουσαι τά θ’ ὁμογενῆ καὶ τὰ μὴ ὁμογενῆ, καὶ ὑγραίνουσαι καὶ ξηραίνουσαι καὶ σκληρύνουσαι καὶ μαλάττουσαι, τὰ δὲ ξηρὰ καὶ ὑγρὰ ὁριζόμενα καὶ τἆλλα τὰ εἰρημένα πάθη πάσχοντα αὐτά τε καθ’ αὐτὰ καὶ ὅσα κοινὰ ἐξ ἀμφοῖν σώματα συνέστηκεν· ἔτι δ’ ἐκ τῶν λόγων δῆλον, οἷς ὁριζόμεθα τὰς φύσεις αὐτῶν· τὸ μὲν γὰρ θερμὸν καὶ ψυχρὸν ὡς ποιητικὰ λέγομεν (τὸ γὰρ συγκριτικὸν ὥσπερ ποιητικόν τί ἐστι), τὸ δὲ ὑγρὸν καὶ ξηρὸν παθητικόν (τὸ γὰρ εὐόριστον καὶ δυσόριστον τῷ πάσχειν τι λέγεται τὴν φύσιν αὐτῶν)· ὅτι μὲν οὖν τὰ μὲν ποιητικὰ τὰ δὲ παθητικά, φανερόν· διωρισμένων δὲ τούτων ληπτέον ἂν εἴη τὰς ἐργασίας αὐτῶν, αἷς ἐργάζονται τὰ ποιητικά, καὶ τῶν παθητικῶν τὰ εἴδη. πρῶτον μὲν οὖν καθόλου ἡ ἁπλῆ γένεσις καὶ ἡ φυσικὴ μεταβολὴ τούτων τῶν δυνάμεών ἐστιν ἔργον, καὶ ἡ ἀντικειμένη φθορὰ κατὰ φύσιν. αὗται μὲν οὖν τοῖς τε φυτοῖς ὑπάρχουσι καὶ ζῴοις καὶ τοῖς μέρεσιν αὐτῶν. ἔστι δ’ ἡ ἁπλῆ καὶ ἡ φυσικὴ γένεσις μεταβολὴ ὑπὸ τούτων τῶν δυνάμεων, ὅταν ἔχωσι λόγον, ἐκ τῆς ὑποκειμένης ὕλης ἑκάστῃ φύσει· αὗται δ’ εἰσὶν αἱ εἰρημέναι δυνάμεις παθητικαί. [379a] γεννῶσι δὲ τὸ θερμὸν καὶ ψυχρὸν κρατοῦντα τῆς ὕλης· ὅταν δὲ μὴ κρατῇ, κατὰ μέρος μὲν μόλυνσις καὶ ἀπεψία γίγνεται. τῇ δ’ ἁπλῇ γενέσει ἐναντίον μάλιστα κοινὸν σῆψις· πᾶσα γὰρ ἡ κατὰ φύσιν φθορὰ εἰς τοῦθ’ ὁδός ἐστιν, οἷον γῆρας καὶ αὔανσις. τέλος δὲ πάντων τῶν ἄλλων τούτων σαπρότης, ἐὰν μή τι βίᾳ φθαρῇ τῶν φύσει συνεστώτων· ἔστιν γὰρ καὶ σάρκα καὶ ὀστοῦν καὶ ὁτιοῦν κατακαῦσαι, ὧν τὸ τέλος τῆς κατὰ φύσιν φθορᾶς σῆψίς ἐστιν. διὸ ὑγρὰ πρῶτον, εἶτα ξηρὰ τέλος γίγνεται τὰ σηπόμενα· ἐκ τούτων γὰρ ἐγένετο, καὶ ὡρίσθη τῷ ὑγρῷ τὸ ξηρὸν ἐργαζομένων τῶν ποιητικῶν. γίγνεται δ’ ἡ φθορὰ ὅταν κρατῇ τοῦ ὁρίζοντος τὸ ὁριζόμενον διὰ τὸ περιέχον. (οὐ μὴν ἀλλ’ ἰδίως γε λέγεται σῆψις ἐπὶ τῶν κατὰ μέρος φθειρομένων, ὅταν χωρισθῇ τῆς φύσεως.) διὸ καὶ σήπεται πάντα τἆλλα πλὴν πυρός· καὶ γὰρ γῆ καὶ ὕδωρ καὶ ἀὴρ σήπεται· πάντα γὰρ ὕλη τῷ πυρί ἐστι ταῦτα. σῆψις δ’ ἐστὶν φθορὰ τῆς ἐν ἑκάστῳ ὑγρῷ οἰκείας καὶ κατὰ φύσιν θερμότητος ὑπ’ ἀλλοτρίας θερμότητος· αὕτη δ’ ἐστὶν ἡ τοῦ περιέχοντος. ὥστε ἐπεὶ κατ’ ἔνδειαν πάσχει θερμοῦ, ἐνδεὲς δὲ ὂν τοιαύτης δυνάμεως ψυχρὸν πᾶν, ἄμφω ἂν αἴτια εἴη, καὶ κοινὸν τὸ πάθος ἡ σῆψις, ψυχρότητός τε οἰκείας καὶ θερμότητος ἀλλοτρίας. διὰ τοῦτο γὰρ καὶ ξηρότερα γίγνεται τὰ σηπόμενα πάντα, καὶ τέλος γῆ καὶ κόπρος· ἐξιόντος γὰρ τοῦ οἰκείου θερμοῦ συνεξατμίζεται τὸ κατὰ φύσιν ὑγρόν, καὶ τὸ σπῶν τὴν ὑγρότητα οὐκ ἔστιν· ἐπάγει γὰρ ἕλκουσα ἡ οἰκεία θερμότης. καὶ ἐν τοῖς ψύχεσι δ’ ἧττον σήπεται ἢ ἐν ταῖς ἀλέαις (ἐν μὲν γὰρ τῷ χειμῶνι ὀλίγον ἐν τῷ περιέχοντι ἀέρι καὶ ὕδατι τὸ θερμόν, ὥστ’ οὐδὲν ἰσχύει, ἐν δὲ τῷ θέρει πλέον)· καὶ οὔτε τὸ πεπηγός (μᾶλλον γὰρ ψυχρὸν ἢ ὁ ἀὴρ θερμόν· οὔκουν κρατεῖται, τὸ δὲ κινοῦν κρατεῖ) οὔτε τὸ ζέον ἢ θερμόν (ἐλάττων γὰρ ἡ ἐν τῷ ἀέρι θερμότης τῆς ἐν τῷ πράγματι, ὥστ’ οὐ κρατεῖ οὐδὲ ποιεῖ μεταβολὴν οὐδεμίαν). ὁμοίως δὲ καὶ τὸ κινούμενον καὶ ῥέον ἧττον σήπεται τοῦ ἀκινητίζοντος· ἀσθενεστέρα γὰρ γίγνεται ἡ ὑπὸ τῆς ἐν τῷ ἀέρι θερμότητος κίνησις τῆς ἐν τῷ [379b] πράγματι προϋπαρχούσης, ὥστε οὐδὲν ποιεῖ μεταβάλλειν. ἡ δ’ αὐτὴ αἰτία καὶ τοῦ τὸ πολὺ ἧττον τοῦ ὀλίγου σήπεσθαι· ἐν γὰρ τῷ πλέονι πλέον ἐστὶν πῦρ οἰκεῖον καὶ ψυχρὸν ἢ ὥστε κρατεῖν τὰς ἐν τῷ περιεστῶτι δυνάμεις. διὸ ἡ θάλαττα κατὰ μέρος μὲν διαιρουμένη ταχὺ σήπεται, ἅπασα δ’ οὔ, καὶ τἆλλα ὕδατα ὡσαύτως. καὶ ζῷα ἐγγίγνεται τοῖς σηπομένοις διὰ τὸ τὴν ἀποκεκριμένην θερμότητα φυσικὴν οὖσαν συνιστάναι τὰ ἐκκριθέντα. τί μὲν οὖν ἐστι γένεσις καὶ τί φθορά, εἴρηται.

λοιπὸν δ’ εἰπεῖν τὰ ἐχόμενα εἴδη, ὅσα αἱ εἰρημέναι δυνάμεις ἐργάζονται ἐξ ὑποκειμένων τῶν φύσει συνεστώτων ἤδη. ἔστι δὴ θερμοῦ μὲν πέψις, πέψεως δὲ πέπανσις, ἕψησις, ἔτι ὄπτησις· ψυχρότητος δὲ ἀπεψία, ταύτης δὲ ὠμότης, μόλυνσις, στάτευσις. δεῖ δὲ ὑπολαμβάνειν μὴ κυρίως ταῦτα λέγεσθαι τὰ ὀνόματα τοῖς πράγμασιν, ἀλλ’ οὐ κεῖται καθόλου τοῖς ὁμοίοις, ὥστε οὐ ταῦτα ἀλλὰ τοιαῦτα δεῖ νομίζειν εἶναι τὰ εἰρημένα εἴδη. εἴπωμεν δ’ αὐτῶν ἕκαστον τί ἐστιν. πέψις μὲν οὖν ἐστιν τελείωσις ὑπὸ τοῦ φυσικοῦ καὶ οἰκείου θερμοῦ ἐκ τῶν ἀντικειμένων παθητικῶν· ταῦτα δ’ ἐστὶν ἡ οἰκεία ἑκάστῳ ὕλη. ὅταν γὰρ πεφθῇ, τετελείωταί τε καὶ γέγονεν. καὶ ἡ ἀρχὴ τῆς τελειώσεως ὑπὸ θερμότητος τῆς οἰκείας συμβαίνει, κἂν διά τινος τῶν ἐκτὸς βοηθείας συνεπιτελεσθῇ, οἷον ἡ τροφὴ συμπέττεται καὶ διὰ λουτρῶν καὶ δι’ ἄλλων τοιούτων· ἀλλ’ ἥ γε ἀρχὴ ἡ ἐν αὐτῷ θερμότης ἐστίν. τὸ δὲ τέλος τοῖς μὲν ἡ φύσις ἐστίν, φύσις δὲ ἣν λέγομεν ὡς εἶδος καὶ οὐσίαν· τοῖς δὲ εἰς ὑποκειμένην τινὰ μορφὴν τὸ τέλος ἐστὶ τῆς πέψεως, ὅταν τοιονδὶ γένηται καὶ τοσονδὶ τὸ ὑγρὸν ἢ ὀπτώμενον ἢ ἑψόμενον ἢ σηπόμενον ἢ ἄλλως πως θερμαινόμενον· τότε γὰρ χρήσιμόν ἐστι καὶ πεπέφθαι φαμέν, ὥσπερ τὸ γλεῦκος καὶ τὰ ἐν τοῖς φύμασιν συνιστάμενα, ὅταν γένηται πύον, καὶ τὸ δάκρυον, ὅταν γένηται λήμη· ὁμοίως δὲ καὶ τἆλλα. συμβαίνει δὲ τοῦτο πάσχειν ἅπασιν, ὅταν κρατηθῇ ἡ ὕλη καὶ ἡ ὑγρότης· αὕτη γάρ ἐστιν ἡ ὁριζομένη ὑπὸ τῆς ἐν τῇ φύσει θερμότητος. ἕως γὰρ ἂν ἐνῇ ἐν αὐτῇ ὁ λόγος, φύσις τοῦτ’ ἐστίν. [380a] διὸ καὶ ὑγιείας σημεῖα τὰ τοιαῦτα, καὶ οὖρα καὶ ὑποχωρήσεις καὶ ὅλως τὰ περιττώματα. καὶ λέγεται πεπέφθαι, ὅτι δηλοῖ κρατεῖν τὴν θερμότητα τὴν οἰκείαν τοῦ ἀορίστου. ἀνάγκη δὲ τὰ πεττόμενα παχύτερα καὶ θερμότερα εἶναι· τοιοῦτον γὰρ ἀποτελεῖ τὸ θερμόν, εὐογκότερον καὶ παχύτερον καὶ ξηρότερον. πέψις μὲν οὖν τοῦτο ἐστίν· ἀπεψία δὲ ἀτέλεια δι’ [380a.7] ἔνδειαν τῆς οἰκείας θερμότητος (ἡ δὲ ἔνδεια τῆς θερμότητος ψυχρότης ἐστίν)· ἡ δ’ ἀτέλειά ἐστιν τῶν ἀντικειμένων παθητικῶν, ἥπερ ἐστὶν ἑκάστῳ φύσει ὕλη. πέψις μὲν οὖν καὶ ἀπεψία διωρίσθω τοῦτον τὸν τρόπον.

πέπανσις δ’ ἐστὶν πέψις τις· ἡ γὰρ τῆς ἐν τοῖς περικαρπίοις τροφῆς πέψις πέπανσις λέγεται. ἐπεὶ δ’ ἡ πέψις τελέωσις, τότε ἡ πέπανσις τελέα ἐστὶν ὅταν τὰ ἐν τῷ περικαρπίῳ σπέρματα δύνηται ἀποτελεῖν τοιοῦτον ἕτερον οἷον αὐτό· καὶ γὰρ ἐπὶ τῶν ἄλλων τὸ τέλεον οὕτω λέγομεν. περικαρπίου μὲν οὖν αὕτη πέπανσις, λέγεται δὲ καὶ ἄλλα πολλὰ πέπονα τῶν πεπεμμένων, κατὰ μὲν τὴν αὐτὴν ἰδέαν, μεταφοραῖς δέ, διὰ τὸ μὴ κεῖσθαι, καθάπερ εἴρηται καὶ πρότερον, ὀνόματα καθ' ἑκάστην τελείωσιν περὶ τὰ ὁριζόμενα ὑπὸ τῆς φυσικῆς θερμότητος καὶ ψυχρότητος. ἔστιν δὲ ἡ φυμάτων καὶ φλέγματος καὶ τῶν τοιούτων πέπανσις ἡ ὑπὸ τοῦ φυσικοῦ θερμοῦ τοῦ ἐνόντος ὑγροῦ πέψις· ἀδύνατον γὰρ ὁρίζειν μὴ κρατοῦν. ἐκ μὲν οὖν τῶν πνευματικῶν ὑδατώδη, ἐκ δὲ τῶν τοιούτων τὰ γεηρὰ συνίσταται, καὶ ἐκ λεπτῶν αἰεὶ παχύτερα γίγνεται πεπαινόμενα πάντα. καὶ τὰ μὲν εἰς αὐτὴν ἡ φύσις ἄγει κατὰ τοῦτο, τὰ δὲ ἐκβάλλει. πέπανσις μὲν οὖν εἴρηται τί ἐστιν· ὠμότης δ' ἐστὶν τὸ ἐναντίον· ἐναντίον δὲ πεπάνσει ἀπεψία τῆς ἐν τῷ περικαρπίῳ τροφῆς· αὕτη δ' ἐστὶν ἡ ἀόριστος ὑγρότης. διὸ ἢ πνευματικὴ ἢ ὑδατώδης ἢ τῶν ἐξ ἀμφοῖν ἐστιν ἡ ὠμότης. ἐπεὶ δ' ἡ πέπανσις τελέωσίς τίς ἐστιν, ἡ ὠμότης ἀτέλεια ἔσται. γίγνεται δ' ἡ ἀτέλεια δι' ἔνδειαν τοῦ φυσικοῦ θερμοῦ καὶ ἀσυμμετρίαν πρὸς τὸ ὑγρὸν τὸ πεπαινόμενον. οὐδὲν δὲ ὑγρὸν αὐτὸ καθ' αὐτὸ πεπαίνεται ἄνευ ξηροῦ· ὕδωρ γὰρ οὐ παχύνεται μόνον τῶν ὑγρῶν. [380b] συμβαίνει δὲ τοῦτο ἢ τῷ τὸ θερμὸν ὀλίγον εἶναι ἢ τῷ τὸ ὁριζόμενον πολύ· διὸ καὶ λεπτοὶ οἱ χυμοὶ τῶν ὠμῶν, καὶ ψυχροὶ μᾶλλον ἢ θερμοί, καὶ ἄβρωτοι καὶ ἄποτοι. λέγεται δὲ καὶ ἡ ὠμότης ὥσπερ καὶ ἡ πέπανσις, πολλαχῶς. ὅθεν καὶ οὖρα καὶ ὑποχωρήσεις καὶ κατάρροι ὠμοὶ λέγονται διὰ τὸ αὐτὸ αἴτιον· τῷ γὰρ μὴ κεκρατῆσθαι ὑπὸ τῆς θερμότητος μηδὲ συνεστάναι ὠμὰ πάντα προσαγορεύεται. πόρρω δὲ προϊόντων καὶ κέραμος ὠμὸς καὶ γάλα ὠμὸν καὶ ἄλλα πολλὰ λέγεται, ἐὰν δυνάμενα μεταβάλλειν καὶ συνίστασθαι ὑπὸ θερμότητος ἀπαθῆ ᾖ. διὸ τὸ ὕδωρ ἑφθὸν μὲν λέγεται, ὠμὸν δ' οὔ, ὅτι οὐ παχύνεται. πέπανσις μὲν οὖν καὶ ὠμότης εἴρηται τί ἐστιν, καὶ διὰ τί ἐστιν ἑκάτερον αὐτῶν· ἕψησις δ' ἐστὶν τὸ μὲν ὅλον πέψις ὑπὸ θερμότητος ὑγρᾶς τοῦ ἐνυπάρχοντος ἀορίστου ἐν τῷ ὑγρῷ, λέγεται δὲ τοὔνομα κυρίως μόνον ἐπὶ τῶν ἑψομένων. τοῦτο δ' ἂν εἴη, ὥσπερ εἴρηται, πνευματῶδες ἢ ὑδατῶδες. ἡ δὲ πέψις γίγνεται ἀπὸ τοῦ ἐν τῷ ὑγρῷ πυρός· τὸ γὰρ ἐπὶ τῶν τηγάνων ὀπτᾶται (ὑπὸ γὰρ τοῦ ἔξωθεν θερμοῦ πάσχει, ἐν ᾧ δ' ἐστὶν ὑγρῷ, ποιεῖ ἐκεῖνο μᾶλλον ξηρόν, εἰς αὐτὸ ἀναλαμβάνον), τὸ δ' ἑψόμενον τοὐναντίον ποιεῖ (ἐκκρίνεται γὰρ ἐξ αὐτοῦ τὸ ὑγρὸν ὑπὸ τῆς ἐν τῷ ἔξω ὑγρῷ θερμασίας)· διὸ ξηρότερα τὰ ἑφθὰ τῶν ὀπτῶν· οὐ γὰρ ἀνασπᾷ εἰς ἑαυτὰ τὸ ὑγρὸν τὰ ἑψόμενα· κρατεῖ γὰρ ἡ ἔξωθεν θερμότης τῆς ἐντός· εἰ δ' ἐκράτει ἡ ἐντός, εἷλκεν ἂν εἰς ἑαυτήν. ἔστιν δ' οὐ πᾶν σῶμα ἑψητόν· οὔτε γὰρ ἐν ᾧ μηδέν ἐστιν ὑγρόν, οἷον ἐν λίθοις, οὔτ' ἐν οἷς ἔνεστι μέν, ἀλλ' ἀδύνατον κρατηθῆναι διὰ πυκνότητα, οἷον ἐν τοῖς ξύλοις· ἀλλ’ ὅσα τῶν σωμάτων ἔχει ὑγρότητα παθητικὴν ὑπὸ τῆς ἐν τῷ ὑγρῷ πυρώσεως. λέγεται δὲ καὶ χρυσὸς ἕψεσθαι καὶ ξύλον καὶ ἄλλα πολλά, κατὰ μὲν τὴν ἰδέαν οὐ τὴν αὐτήν, μεταφορᾷ δέ· οὐ γὰρ κεῖται ὀνόματα ταῖς διαφοραῖς. καὶ τὰ ὑγρὰ δὲ ἕψεσθαι λέγομεν, οἷον γάλα καὶ γλεῦκος, ὅταν ἐν τῷ ὑγρῷ ὁ χυμὸς εἰς εἶδός τι μεταβάλλῃ ὑπὸ τοῦ κύκλῳ καὶ ἔξωθεν πυρὸς θερμαίνοντος, ὥστε τρόπον τινὰ παραπλήσιον τῇ εἰρημένῃ [381a] ἑψήσει ποιεῖ. (τέλος δὲ οὐ ταὐτὸ πᾶσιν, οὔτε ἑψομένοις οὔτε πεττομένοις, ἀλλὰ τοῖς μὲν πρὸς ἐδωδήν, τοῖς δὲ πρὸς ῥόφησιν, τοῖς δὲ πρὸς ἄλλην χρείαν, ἐπεὶ καὶ τὰ φάρμακα ἕψειν λέγομεν.) ὥστε ὅσα παχύτερα δύναται γίγνεσθαι ἢ ἐλάττω ἢ βαρύτερα, ἢ τὰ μὲν αὐτῶν τοιαῦτα τὰ δ’ ἐναντία, διὰ τὸ διακρινόμενα τὰ μὲν παχύνεσθαι τὰ δὲ λεπτύνεσθαι, ὥσπερ τὸ γάλα εἴς τε ὀρὸν καὶ πυετίαν, πάντα ἑψητά ἐστιν. τὸ δὲ ἔλαιον οὐχ ἕψεται αὐτὸ καθ’ ἑαυτό, ὅτι τούτων οὐδὲν πάσχει. ἡ μὲν οὖν κατὰ τὴν ἕψησιν λεγομένη πέψις τοῦτ’ ἐστίν· καὶ οὐδὲν διαφέρει ἐν ὀργάνοις τεχνικοῖς καὶ φυσικοῖς ἐάν τι γίγνηται· διὰ τὴν αὐτὴν γὰρ αἰτίαν πάντα ἔσται. μόλυνσις δὲ ἀπεψία μὲν ἡ ἐναντία ἑψήσει· εἴη δ’ ἂν ἐναντία ἥ τε πρώτη λεχθεῖσα ἀπεψία τοῦ ἐν τῷ σώματι ἀορίστου δι’ ἔνδειαν τῆς ἐν τῷ ὑγρῷ τῷ πέριξ θερμότητος (ἡ δ’ ἔνδεια μετὰ ψυχρότητος ὅτι ἐστίν, εἴρηται)· γίγνεται δὲ διὰ κίνησιν ἄλλην· ἐκκρούεται γὰρ ἡ πέττουσα, καὶ ἡ ἔνδεια δὲ ἢ διὰ τὸ πλῆθος τῆς ἐν τῷ ὑγρῷ ψυχρότητος ἢ διὰ τὸ ἐν τῷ ἑψομένῳ πλῆθος· τότε γὰρ συμβαίνει τὴν ἐν τῷ ὑγρῷ θερμότητα πλείω μὲν εἶναι ἢ ὥστε μὴ κινῆσαι, ἐλάττω δὲ ἢ ὥστε ὁμαλῦναι καὶ συμπέψαι. διὸ σκληρότερα μὲν τὰ μεμωλυσμένα γίγνεται τῶν ἑφθῶν, τὰ δ’ ὑγρὰ διωρισμένα μᾶλλον. ἕψησις μὲν οὖν καὶ μόλυνσις εἴρηται, καὶ τί ἐστιν καὶ διὰ τί ἐστιν· ὄπτησις δ’ ἐστὶν πέψις ὑπὸ θερμότητος ξηρᾶς καὶ ἀλλοτρίας. διὰ τοῦτο κἂν ἕψων τις ποιῇ μεταβάλλειν καὶ πέττεσθαι, μὴ ὑπὸ τῆς τοῦ ὑγροῦ θερμότητος ἀλλ’ ὑπὸ τῆς τοῦ πυρός, ὅταν τελεσθῇ, ὀπτὸν γίγνεται καὶ οὐχ ἑφθόν, καὶ τῇ ὑπερβολῇ προσκεκαῦσθαι λέγεται· ὑπὸ ξηρᾶς δὲ θερμότητος γίγνεται ὅταν ξηρότερον γίγνηται ἐπιτελεσθέν. διὸ καὶ τὰ ἐκτὸς ξηρότερα τῶν ἐντός· τὰ δ’ ἑφθὰ τοὐναντίον. καὶ ἔργον ἐπὶ τῶν χειροκμήτων τὸ ὀπτῆσαι μεῖζον ἢ ἑψῆσαι· χαλεπὸν γὰρ τὰ ἐκτὸς καὶ τὰ ἐντὸς ὁμαλῶς θερμαίνειν. ἀεὶ γὰρ τὰ ἐγγύτερον τοῦ πυρὸς ξηραίνεται [381b] θᾶττον, ὥστε καὶ μᾶλλον. συνιόντων οὖν τῶν ἔξω πόρων οὐ δύναται ἐκκρίνεσθαι τὸ ἐνυπάρχον ὑγρόν, ἀλλ’ ἐγκατακλείεται, ὅταν οἱ πόροι μύσωσιν. ὄπτησις μὲν οὖν καὶ ἕψησις γίγνονται μὲν τέχνῃ, ἔστιν δ’, ὥσπερ λέγομεν, τὰ εἴδη καθόλου ταὐτὰ καὶ φύσει· ὅμοια γὰρ τὰ γιγνόμενα πάθη, ἀλλ’ ἀνώνυμα· μιμεῖται γὰρ ἡ τέχνη τὴν φύσιν, ἐπεὶ καὶ ἡ τῆς τροφῆς ἐν τῷ σώματι πέψις ὁμοία ἑψήσει ἐστίν· καὶ γὰρ ἐν ὑγρῷ καὶ θερμῷ ὑπὸ τῆς τοῦ σώματος θερμότητος γίγνεται. καὶ ἀπεψίαι ἔνιαι ὅμοιαι τῇ μολύνσει. καὶ ζῷον οὐκ ἐγγίγνεται ἐν τῇ πέψει, ὥσπερ τινές φασιν, ἀλλ' ἐν τῇ ἀποκρίσει σηπομένῃ ἐν τῇ κάτω κοιλίᾳ, εἶτ' ἐπανέρχεται ἄνω· πέττεται μὲν γὰρ ἐν τῇ ἄνω κοιλίᾳ, σήπεται δ' ἐν τῇ κάτω τὸ ἀποκριθέν· δι' ἣν δ' αἰτίαν, εἴρηται ἐν ἑτέροις. ἡ μὲν οὖν μόλυνσις τῇ ἑψήσει ἐναντίον· τῇ δὲ ὡς ὀπτήσει λεγομένῃ πέψει ἔστι μέν τι ἀντικείμενον ὁμοίως, ἀνωνυμώτερον δέ. εἴη δ' ἂν οἷον εἰ γένοιτο στάτευσις ἀλλὰ μὴ ὄπτησις δι' ἔνδειαν θερμότητος, ἣ συμβαίη ἂν ἢ δι' ὀλιγότητα τοῦ ἔξω πυρὸς ἢ διὰ πλῆθος τοῦ ἐν τῷ ὀπτωμένῳ ὕδατος· τότε γὰρ πλείων μέν ἐστιν ἢ ὥστε μὴ κινῆσαι, ἐλάττων δὲ ἢ ὥστε πέψαι. τί μὲν οὖν ἐστι πέψις καὶ ἀπεψία, καὶ πέπανσις καὶ ὠμότης, καὶ ἕψησις καὶ ὄπτησις καὶ τἀναντία τούτοις, εἴρηται.

τῶν δὲ παθητικῶν, τοῦ ὑγροῦ καὶ τοῦ ξηροῦ, λεκτέον τὰ [381b.24] εἴδη. εἰσὶν δ' αἱ μὲν ἀρχαὶ τῶν σωμάτων αἱ παθητικαὶ ὑγρὸν καὶ ξηρόν, τὰ δ' ἄλλα μεικτὰ μὲν ἐκ τούτων, ὁποτέρου δὲ μᾶλλον, τούτου μᾶλλον τὴν φύσιν ἐστίν, οἷον τὰ μὲν ξηροῦ μᾶλλον τὰ δ' ὑγροῦ. πάντα δὲ τὰ μὲν ἐντελεχείᾳ ἔσται, τὰ δ' ἐν τῷ ἀντικειμένῳ· ἔχει δ' οὕτως τῆξις πρὸς τὸ τηκτόν. ἐπεὶ δ' ἐστὶν τὸ μὲν ὑγρὸν εὐόριστον, τὸ δὲ ξηρὸν δυσόριστον, ὅμοιόν τι τῷ ὄψῳ καὶ τοῖς ἡδύσμασι πρὸς ἄλληλα πάσχουσι· τὸ γὰρ ὑγρὸν τῷ ξηρῷ αἴτιον τοῦ ὁρίζεσθαι, καὶ ἑκάτερον ἑκατέρῳ οἷον κόλλα γίγνεται, ὥσπερ καὶ [382a] Ἐμπεδοκλῆς ἐποίησεν ἐν τοῖς φυσικοῖς "ἄλφιτον ὕδατι κολλήσας." καὶ διὰ τοῦτο ἐξ ἀμφοῖν ἐστιν τὸ ὡρισμένον σῶμα. λέγεται δὲ τῶν στοιχείων ἰδιαίτατα ξηροῦ μὲν γῆ, ὑγροῦ δὲ ὕδωρ. διὰ τοῦτο ἅπαντά τε τὰ ὡρισμένα σώματα ἐνταῦθα οὐκ ἄνευ γῆς καὶ ὕδατος (ὁποτέρου δὲ πλέον, κατὰ τὴν δύναμιν τούτου ἕκαστον φαίνεται)· καὶ ἐν γῇ καὶ ἐν ὕδατι ζῷα μόνον ἐστίν, ἐν ἀέρι δὲ καὶ πυρὶ οὐκ ἔστιν, ὅτι τῶν σωμάτων ὕλη ταῦτα. τῶν δὲ σωματικῶν παθημάτων ταῦτα πρῶτα ἀνάγκη ὑπάρχειν τῷ ὡρισμένῳ, σκληρότητα ἢ μαλακότητα· ἀνάγκη γὰρ τὸ ἐξ ὑγροῦ καὶ ξηροῦ ἢ σκληρὸν εἶναι ἢ μαλακόν. ἔστι δὲ σκληρὸν μὲν τὸ μὴ ὑπεῖκον εἰς αὑτὸ κατὰ τὸ ἐπίπεδον, μαλακὸν δὲ τὸ ὑπεῖκον τῷ μὴ ἀντιπεριίστασθαι· τὸ γὰρ ὕδωρ οὐ μαλακόν· οὐ γὰρ ὑπείκει τῇ θλίψει τὸ ἐπίπεδον εἰς βάθος, ἀλλ' ἀντιπεριίσταται. ἁπλῶς μὲν οὖν σκληρὸν ἢ μαλακὸν τὸ ἁπλῶς τοιοῦτον, πρὸς ἕτερον δὲ τὸ πρὸς ἐκεῖνο τοιοῦτον. πρὸς μὲν οὖν ἄλληλα ἀόριστά ἐστιν τῷ μᾶλλον καὶ ἧττον· ἐπεὶ δὲ πρὸς τὴν αἴσθησιν πάντα κρίνομεν τὰ αἰσθητά, δῆλον ὅτι καὶ τὸ σκληρὸν καὶ τὸ μαλακὸν ἁπλῶς πρὸς τὴν ἁφὴν ὡρίκαμεν, ὡς μεσότητι χρώμενοι τῇ ἁφῇ· διὸ τὸ μὲν ὑπερβάλλον αὐτὴν σκληρόν, τὸ δ' ἐλλεῖπον μαλακὸν εἶναί φαμεν.

ἀνάγκη δὲ σκληρὸν ἢ μαλακὸν εἶναι τὸ ὡρισμένον σῶμα οἰκείῳ ὅρῳ (ἢ γὰρ ὑπείκει ἢ μή)· ἔτι πεπηγὸς εἶναι (τούτῳ γὰρ ὁρίζεται)· ὥστ’ ἐπεὶ πᾶν μὲν τὸ ὡρισμένον καὶ συνεστὸς ἢ μαλακὸν ἢ σκληρόν, ταῦτα δὲ πήξει ἐστίν, ἅπαντ’ ἂν εἴη τὰ σώματα τὰ σύνθετα καὶ ὡρισμένα οὐκ ἄνευ πήξεως. πήξεως οὖν πέρι ῥητέον. ἔστιν δὴ τὰ αἴτια τὰ παρὰ τὴν ὕλην δύο, τό τε ποιοῦν καὶ τὸ πάθος (τὸ μὲν οὖν ποιοῦν ὡς ὅθεν ἡ κίνησις, τὸ δὲ πάθος ὡς εἶδος)· ὥστε καὶ πήξεως καὶ διαχύσεως, καὶ τοῦ ξηραίνεσθαι καὶ τοῦ ὑγραίνεσθαι. ποιεῖ δὲ τὸ ποιοῦν δυσὶ δυνάμεσι, καὶ πάσχει παθήμασιν δυσίν, ὥσπερ εἴρηται· ποιεῖ μὲν θερμῷ καὶ ψυχρῷ, τὸ δὲ πάθος ἢ ἀπουσίᾳ ἢ παρουσίᾳ θερμοῦ ἢ [382b] ψυχροῦ. ἐπεὶ δὲ τὸ πήγνυσθαι ξηραίνεσθαί πώς ἐστιν, περὶ τούτου εἴπωμεν πρῶτον. τὸ δὴ πάσχον ἢ ὑγρὸν ἢ ξηρὸν ἢ ἐκ τούτων. τιθέμεθα δὲ ὑγροῦ σῶμα ὕδωρ, ξηροῦ δὲ γῆν· ταῦτα γὰρ τῶν ὑγρῶν καὶ τῶν ξηρῶν παθητικά. διὸ καὶ τὸ ψυχρὸν τῶν παθητικῶν μᾶλλον· ἐν τούτοις γάρ ἐστιν· καὶ γὰρ ἡ γῆ καὶ τὸ ὕδωρ ψυχρὰ ὑπόκειται. ποιητικὸν δὲ τὸ ψυχρὸν ὡς φθαρτικὸν ἢ ὡς κατὰ συμβεβηκός, καθάπερ εἴρηται πρότερον· ἐνίοτε γὰρ καὶ κάειν λέγεται καὶ θερμαίνειν τὸ ψυχρόν, οὐχ ὡς τὸ θερμόν, ἀλλὰ τῷ συνάγειν ἢ ἀντιπεριιστάναι τὸ θερμόν. ξηραίνεται δὲ ὅσα ἐστὶν ὕδωρ καὶ ὕδατος εἴδη, ἢ ἔχει ὕδωρ εἴτ’ ἐπακτὸν εἴτε συμφυές (λέγω δὲ ἐπακτὸν μὲν οἷον ἐν ἐρίῳ, σύμφυτον δ’ οἷον ἐν γάλακτι). ὕδατος δ’ εἴδη τὰ τοιάδε, οἶνος, οὖρον, ὀρός, καὶ ὅλως ὅσα μηδεμίαν ἢ βραχεῖαν ἔχει ὑπόστασιν, μὴ διὰ γλισχρότητα· ἐνίοις γὰρ αἴτιον τοῦ μὴ ὑφίστασθαι μηδὲν ἡ γλισχρότης, ὥσπερ ἐλαίῳ ἢ πίττῃ. ξηραίνεται δὲ πάντα ἢ θερμαινόμενα ἢ ψυχόμενα, ἀμφότερα δὲ θερμῷ, καὶ ὑπὸ τῆς ἐντὸς θερμότητος ἢ τῆς ἔξω· καὶ γὰρ τὰ τῇ ψύξει ξηραινόμενα, ὥσπερ ἱμάτιον, ἐὰν ᾖ κεχωρισμένον αὐτὸ καθ’ αὑτὸ τὸ ὑγρόν, ὑπὸ τοῦ ἐντὸς θερμοῦ συνεξατμίζοντος τὸ ὑγρὸν ξηραίνεται, ἂν ὀλίγον ᾖ τὸ ὑγρόν, ἐξιούσης τῆς θερμότητος ὑπὸ τοῦ περιεστῶτος ψυχροῦ. ξηραίνεται μὲν οὖν, ὥσπερ εἴρηται, ἅπαντα ἢ θερμαινόμενα ἢ ψυχόμενα, καὶ πάντα θερμῷ, ἢ τῷ ἐντὸς ἢ τῷ ἐκτὸς συνεξατμίζοντι τὸ ὑγρόν (λέγω δ’ ἐκτὸς μὲν ὥσπερ τὰ ἑψόμενα, ἐντὸς δὲ ὅταν ἀφαιρεθέντος ὑφ’ ἧς ἔχει θερμότητος ἀναλωθῇ ἀποπνεούσης). περὶ μὲν οὖν τοῦ ξηραίνεσθαι εἴρηται.

τὸ δ’ ὑγραίνεσθαί ἐστιν ἓν μὲν τὸ ὕδωρ γίγνεσθαι συνιστάμενον, ἓν δὲ τὸ τήκεσθαι τὸ πεπηγός. τούτων δὲ συνίσταται μὲν ψυχόμενον τὸ πνεῦμα· περὶ δὲ τήξεως ἅμα καὶ περὶ πήξεως ἔσται δῆλον. πήγνυται δὲ ὅσα πήγνυται ἢ ὕδατος ὄντα ἢ γῆς καὶ ὕδατος, καὶ ταῦτα ἢ θερμῷ ξηρῷ ἢ ψυχρῷ. διὸ καὶ λύεται τοῖς ἐναντίοις, ὅσα [383a] λύεται τῶν ὑπὸ θερμοῦ παγέντων ἢ ὑπὸ ψυχροῦ· τὰ μὲν γὰρ ὑπὸ ξηροῦ θερμοῦ παγέντα ὑπὸ ὕδατος λύεται, ὅ ἐστιν ὑγρὸν ψυχρόν, τὰ δὲ ὑπὸ ψυχροῦ παγέντα ὑπὸ πυρὸς λύεται, ὅ ἐστιν θερμόν. πήγνυσθαι δ’ ἔνια δόξειεν ἂν ὑπὸ ὕδατος, ὡς τὸ μέλι τὸ ἑφθόν· πήγνυται δὲ οὐχ ὑπὸ τοῦ ὕδατος, ἀλλ’ ὑπὸ τοῦ ἐν αὐτῷ ψυχροῦ. ὅσα μὲν οὖν ἐστιν ὕδατος, οὐ πήγνυται ὑπὸ πυρός· λύεται γὰρ ὑπὸ πυρός, τὸ δὲ αὐτὸ τῷ αὐτῷ κατὰ ταὐτὸ οὐκ ἔσται αἴτιον τοῦ ἐναντίου. ἔτι τῷ ἀπιέναι τὸ θερμὸν πήγνυται, ὥστε δῆλον ὅτι τῷ εἰσιέναι λυθήσεται· ὥστε ποιοῦντος τοῦ ψυχροῦ πήγνυται. διὸ καὶ οὐ παχύνεται τὰ τοιαῦτα πηγνύμενα· ἡ γὰρ πάχυνσις ὑγροῦ μὲν ἀπιόντος γίγνεται, τοῦ ξηροῦ δὲ συνισταμένου· ὕδωρ δὲ τῶν ὑγρῶν οὐ παχύνεται μόνον. ὅσα δὲ κοινὰ γῆς καὶ ὕδατος, καὶ ὑπὸ πυρὸς πήγνυται καὶ ὑπὸ ψυχροῦ, παχύνεται δὲ ὑπ’ ἀμφοῖν ἔστι μὲν ὡς τὸν αὐτὸν τρόπον, ἔστι δ’ ὡς ἄλλως, ὑπὸ μὲν θερμοῦ τὸ ὑγρὸν ἐξάγοντος (ἐξατμίζοντος γὰρ τοῦ ὑγροῦ παχύνεται τὸ ξηρὸν καὶ συνίσταται), ὑπὸ δὲ ψυχροῦ τὸ θερμὸν ἐκθλίβοντος, μεθ’ οὗ τὸ ὑγρὸν συναπέρχεται συνεξατμίζον. ὅσα μὲν οὖν μαλακὰ ἀλλὰ μὴ ὑγρά, οὐ παχύνεται ἀλλὰ πήγνυται ἐξιόντος τοῦ ὑγροῦ, οἷον ὁ ὀπτώμενος κέραμος· ὅσα δὲ ὑγρὰ τῶν μεικτῶν, καὶ παχύνεται, οἷον γάλα. πολλὰ δὲ καὶ ὑγραίνεται πρῶτον, ὅσα ἢ παχέα ἢ σκληρὰ ὑπὸ ψυχροῦ προϋπῆρχεν ὄντα, ὥσπερ καὶ ὁ κέραμος τὸ πρῶτον ὀπτώμενος ἀτμίζει καὶ μαλακώτερος γίγνεται· διὸ καὶ διαστρέφεται ἐν ταῖς καμίνοις. ὅσα μὲν οὖν ὑπὸ ψυχροῦ πήγνυται τῶν κοινῶν γῆς καὶ ὕδατος, πλέον δὲ ἐχόντων γῆς, τὰ μὲν τῷ τὸ θερμὸν ἐξεληλυθέναι πηγνύμενα, ταῦτα τήκεται θερμῷ εἰσιόντος πάλιν τοῦ θερμοῦ, οἷον ὁ πηλὸς ὅταν παγῇ· ὅσα δὲ διὰ ψύξιν, καὶ τοῦ θερμοῦ συνεξατμίσαντος ἅπαντος, ταῦτα δὲ ἄλυτα μὴ ὑπερβαλλούσῃ θερμότητι, ἀλλὰ μαλάττεται, οἷον σίδηρος καὶ κέρας. τήκεται δὲ καὶ ὁ εἰργασμένος σίδηρος, ὥστε ὑγρὸς γίγνεσθαι καὶ πάλιν πήγνυσθαι. καὶ τὰ στομώματα ποιοῦσιν οὕτως· ὑφίσταται γὰρ καὶ ἀποκαθαίρεται κάτω [383b] ἡ σκωρία· ὅταν δὲ πολλάκις πάθῃ καὶ καθαρὸς γένηται, τοῦτο στόμωμα γίγνεται. οὐ ποιοῦσι δὲ πολλάκις αὐτὸ διὰ τὸ ἀπουσίαν γίγνεσθαι πολλὴν καὶ τὸν σταθμὸν ἐλάττω ἀποκαθαιρομένου. ἔστιν δ’ ἀμείνων σίδηρος ὁ ἐλάττω ἔχων ἀποκάθαρσιν. τήκεται δὲ καὶ ὁ λίθος ὁ πυρίμαχος ὥστε στάζειν καὶ ῥεῖν· τὸ δὲ πηγνύμενον ὅταν ῥυῇ, πάλιν γίγνεται σκληρόν. καὶ αἱ μύλαι τήκονται ὥστε ῥεῖν· τὸ δὲ ῥέον πηγνύμενον τὸ μὲν χρῶμα μέλαν, ὅμοιον δὲ γίγνεται τῇ τιτάνῳ. τήκεται δὲ καὶ ὁ πηλὸς καὶ ἡ γῆ. ὅσα δ’ ὑπὸ [383b.10] ξηροῦ θερμοῦ πήγνυται, τὰ μὲν ἄλυτα, τὰ δὲ λυτὰ ὑγρῷ. κέραμος μὲν οὖν καὶ λίθων ἐνίων γένη, ὅσοι ὑπὸ πυρὸς τῆς γῆς συγκαυθείσης γίγνονται, οἷον οἱ μυλίαι, ἄλυτα, νίτρον δὲ καὶ ἅλες λυτὰ ὑγρῷ, οὐ παντὶ δὲ ἀλλὰ ψυχρῷ· διὸ ὕδατι καὶ ὅσα ὕδατος εἴδη τήκεται, ἐλαίῳ δ’ οὐ τήκεται· τῷ γὰρ ξηρῷ θερμῷ ἐναντίον ψυχρὸν ὑγρόν. εἰ οὖν ἔπηξεν θάτερον, θάτερον λύσει· οὕτω γὰρ τἀναντία ἔσται αἴτια τῶν ἐναντίων.

παχύνεται μὲν οὖν ὑπὸ πυρὸς μόνον, ὅσα ὕδατος πλέον ἔχει ἢ γῆς, πήγνυται δέ, ὅσα γῆς. διὸ καὶ τὸ νίτρον καὶ οἱ ἅλες γῆς εἰσιν μᾶλλον, καὶ λίθος καὶ κέραμος. ἀπορώτατα δὲ ἔχει ἡ τοῦ ἐλαίου φύσις. εἰ μὲν γὰρ ὕδατος, ἔδει πήγνυσθαι ὑπὸ ψυχροῦ, εἰ δὲ γῆς πλέον, ὑπὸ πυρός· νῦν δὲ πήγνυται μὲν ὑπ’ οὐδετέρου, παχύνεται δὲ ὑπ’ ἀμφοῖν. αἴτιον δ’ ἐστὶν ὅτι ἀέρος ἐστὶν πλῆρες. διὸ καὶ ἐν τῷ ὕδατι ἐπιπολάζει· καὶ γὰρ ὁ ἀὴρ φέρεται ἄνω. τὸ μὲν οὖν ψυχρὸν ἐκ τοῦ ἐνόντος πνεύματος ὕδωρ ποιοῦν παχύνει· ἀεὶ γάρ, ὅταν μειχθῇ ὕδωρ καὶ ἔλαιον, ἀμφοῖν γίγνεται παχύτερον. ὑπὸ δὲ πυρὸς καὶ χρόνου παχύνεται καὶ λευκαίνεται, λευκαίνεται μὲν ἐξατμίζοντος εἴ τι ἐνῆν ὕδατος, παχύνεται δὲ διὰ τὸ μαραινομένου τοῦ θερμοῦ ἐκ τοῦ ἀέρος γίγνεσθαι ὕδωρ. ἀμφοτέρως μὲν οὖν τὸ αὐτὸ γίγνεται πάθος, καὶ διὰ τὸ αὐτό, ἀλλ’ οὐχ ὡσαύτως. παχύνεται μὲν οὖν ὑπ’ ἀμφοτέρων, οὐ ξηραίνεται δ’ ὑπ’ οὐδετέρου· οὔτε γὰρ ὁ ἥλιος οὔτε τὸ ψῦχος ξηραίνει· οὐ μόνον διότι γλίσχρον, [384a] ἀλλὰ καὶ διότι ἀέρος ἐστίν. οὐ ξηραίνεται δὲ τὸ ὕδωρ οὐδ’ ἕψεται ὑπὸ πυρός, ὅτι οὐκ ἀτμίζει διὰ γλισχρότητα. ὅσα δὲ μεικτὰ ὕδατος καὶ γῆς, κατὰ τὸ πλῆθος ἑκατέρου ἄξιον λέγεσθαι· οἶνος γάρ τις καὶ πήγνυται καὶ ἕψεται, οἷον τὸ γλεῦκος. ἀπέρχεται δὲ ἀπὸ πάντων τῶν τοιούτων ξηραινομένων τὸ ὕδωρ. σημεῖον δ’ ὅτι τὸ ὕδωρ· ἡ γὰρ ἀτμὶς συνίσταται εἰς ὕδωρ, ἐάν τις βούληται συλλέγειν· ὥστε ὅσοις λείπεταί τι, τοῦτο γῆς. ἔνια δὲ τούτων καὶ ὑπὸ ψυχροῦ, ὥσπερ εἴρηται, παχύνεται καὶ ξηραίνεται· τὸ γὰρ ψυχρὸν οὐ μόνον πήγνυσιν, ἀλλὰ ξηραίνει μὲν ὕδωρ, παχύνει δὲ τὸν ἀέρα ὕδωρ ποιοῦν· ἡ δὲ πῆξις εἴρηται ξηρασία τις οὖσα. ὅσα μὲν οὖν μὴ παχύνεται ὑπὸ τοῦ ψυχροῦ ἀλλὰ πήγνυται, ὕδατός ἐστι μᾶλλον, οἷον οἶνος καὶ οὖρον καὶ ὄξος καὶ κονία καὶ ὀρός· ὅσα δὲ παχύνεται μὴ ἐξατμίζοντα ὑπὸ πυρός, τὰ μὲν γῆς, τὰ δὲ κοινὰ ὕδατος καὶ ἀέρος, μέλι μὲν γῆς, ἔλαιον δ’ ἀέρος. ἔστιν δὲ καὶ τὸ γάλα καὶ τὸ αἷμα ἀμφοῖν μὲν κοινὰ καὶ ὕδατος καὶ γῆς, μᾶλλον δὲ τὰ πολλὰ γῆς, ὥσπερ καὶ ἐξ ὅσων ὑγρῶν νίτρον γίγνεται καὶ ἅλες (καὶ λίθοι δ’ ἔκ τινων συνίστανται τοιούτων). διὸ ἐὰν μὴ χωρισθῇ ὁ ὀρός, ἐκκάεται ὑπὸ τοῦ πυρὸς ἑψόμενος. τὸ δὲ γεῶδες συνίσταται καὶ ὑπὸ τοῦ ὀποῦ, ἐάν πως ἕψῃ τις, οἷον οἱ ἰατροὶ ὀπίζοντες. οὕτω δὲ χωρίζεται ὁ ὀρὸς καὶ ὁ τυρός. ὁ δὲ χωρισθεὶς ὀρὸς οὐκέτι παχύνεται, ἀλλ’ ἐκκάεται ὥσπερ ὕδωρ. εἰ δέ τι μὴ ἔχει τυρὸν γάλα ἢ ὀλίγον, τοῦτο μᾶλλον ὕδατος καὶ ἄτροφον. καὶ τὸ αἷμα δὲ ὁμοίως· πήγνυται γὰρ τῷ ξηραίνεσθαι ψυχόμενον. ὅσα δὲ μὴ πήγνυται, οἷον τὸ τῆς ἐλάφου, τὰ τοιαῦτα ὕδατος μᾶλλον, καὶ ψυχρὰ ταῦτα. διὸ καὶ οὐκ ἔχει ἶνας· αἱ γὰρ ἶνές εἰσιν γῆς καὶ στερεόν· ὥστε καὶ ἐξαιρεθεισῶν οὐ πήγνυται· τοῦτο δ’ ἐστὶν ὅτι οὐ ξηραίνεται· ὕδωρ γὰρ τὸ λοιπόν, ὡς τὸ γάλα τοῦ τυροῦ ἐξαιρεθέντος. σημεῖον δέ· τὰ νοσώδη γὰρ αἵματα οὐ θέλει πήγνυσθαι· ἰχωροειδῆ γάρ, τοῦτο δὲ φλέγμα καὶ ὕδωρ διὰ τὸ ἄπεπτον εἶναι καὶ ἀκράτητον ὑπὸ τῆς φύσεως. ἔτι δὲ τὰ μὲν λυτά ἐστιν, οἷον νίτρον, τὰ δὲ ἄλυτα, οἷον [384b] κέραμος, καὶ τούτων τὰ μὲν μαλακτά, οἷον κέρας, τὰ δὲ ἀμάλακτα, οἷον κέραμος καὶ λίθος. αἴτιον δ’ ὅτι τἀναντία τῶν ἐναντίων αἴτια, ὥστ’ εἰ πήγνυται δυοῖν, ψυχρῷ καὶ ξηρῷ, λύεσθαι ἀνάγκη θερμῷ καὶ ὑγρῷ· διὸ πυρὶ καὶ ὕδατι (ταῦτα γὰρ ἐναντία), ὕδατι μὲν ὅσα πυρὶ μόνῳ, πυρὶ δὲ ὅσα ψυχρῷ μόνῳ· ὥστ’ εἴ τι ὑπ’ ἀμφοῖν συμβαίνει πήγνυσθαι, ταῦτα ἄλυτα μάλιστα. γίγνεται δὲ τοιαῦτα ὅσα θερμανθέντα ἔπειτα τῷ ψυχρῷ πήγνυται· συμβαίνει γάρ, ὅταν τὸ θερμὸν ἐξικμάσῃ ἐξιόν, τὸ πλεῖστον ὑγρὸν συνθλίβεσθαι πάλιν ὑπὸ τοῦ ψυχροῦ, ὥστε μηδὲ ὑγρῷ διδόναι δίοδον. καὶ διὰ ταῦτα οὔτε τὸ θερμὸν λύει· ὅσα γὰρ ὑπὸ ψυχροῦ πήγνυται μόνου, ταῦτα λύει· οὔθ’ ὑπὸ ὕδατος· ὅσα γὰρ ὑπὸ ψυχροῦ πήγνυται, οὐ λύει, ἀλλ’ ὅσα ὑπὸ θερμοῦ ξηροῦ μόνον. ὁ δὲ σίδηρος τακεὶς ὑπὸ θερμοῦ ψυχθεὶς πήγνυται. τὰ δὲ ξύλα ἐστὶν γῆς καὶ ἀέρος· διὸ καυστὰ καὶ οὐ τηκτὰ οὐδὲ μαλακτά, καὶ ἐπὶ τῷ ὕδατι ἐπιπλεῖ, πλὴν ἐβένου· αὕτη δ’ οὔ· τὰ μὲν γὰρ ἄλλα ἀέρος ἔχει πλέον, ἐκ δὲ τῆς ἐβένου τῆς μελαίνης διαπέπνευκεν ὁ ἀήρ, καὶ ἔστι πλέον ἐν αὐτῇ γῆς. κέραμος δὲ γῆς μόνον διὰ τὸ ξηραινόμενος παγῆναι κατὰ μικρόν· οὔτε γὰρ τὸ ὕδωρ εἰσόδους ἔχει, δι’ ὧν μόνον πνεῦμα ἐξῆλθεν, οὔτε πῦρ· ἔπηξε γὰρ αὐτό. τί μὲν οὖν ἐστι πῆξις καὶ τῆξις, καὶ διὰ πόσα καὶ ἐν πόσοις ἐστίν, εἴρηται.

ἐκ δὲ τούτων φανερὸν ὅτι ὑπὸ θερμοῦ καὶ ψυχροῦ συνίσταται τὰ σώματα, ταῦτα δὲ παχύνοντα καὶ πηγνύντα ποιεῖται τὴν ἐργασίαν αὐτῶν. διὰ δὲ τὸ ὑπὸ τούτων δημιουργεῖσθαι ἐν ἅπασιν ἔνεστι θερμότης, τισὶ δὲ καὶ ψυχρότης ᾗ ἐκλείπει. ὥστ’ ἐπεὶ ταῦτα μὲν ὑπάρχει διὰ τὸ ποιεῖν, ὑγρὸν δὲ καὶ ξηρὸν διὰ τὸ πάσχειν, μετέχει αὐτῶν τὰ κοινὰ πάντων. ἐκ μὲν οὖν ὕδατος καὶ γῆς τὰ ὁμοιομερῆ σώματα συνίσταται, καὶ ἐν φυτοῖς καὶ ἐν ζῴοις, καὶ τὰ μεταλλευόμενα, οἷον χρυσὸς καὶ ἄργυρος καὶ ὅσα ἄλλα τοιαῦτα, ἐξ αὐτῶν τε καὶ ἐκ τῆς ἀναθυμιάσεως τῆς ἑκατέρου ἐγκατακλειομένης, ὥσπερ εἴρηται ἐν ἄλλοις. ταῦτα [385a] δὲ διαφέρει ἀλλήλων τοῖς τε πρὸς τὰς αἰσθήσεις ἰδίοις ἅπαντα, τῷ ποιεῖν τι δύνασθαι (λευκὸν γὰρ καὶ εὐῶδες καὶ ψοφητικὸν καὶ γλυκὺ καὶ θερμὸν καὶ ψυχρὸν τῷ ποιεῖν τι δύνασθαι τὴν αἴσθησίν ἐστι), καὶ ἄλλοις οἰκειοτέροις πάθεσιν, ὅσα τῷ πάσχειν λέγονται, λέγω δ’ οἷον τὸ τηκτὸν καὶ πηκτὸν καὶ καμπτὸν καὶ ὅσα ἄλλα τοιαῦτα· πάντα γὰρ τὰ τοιαῦτα παθητικά, ὥσπερ τὸ ὑγρὸν καὶ τὸ ξηρόν. τούτοις δ’ ἤδη διαφέρει ὀστοῦν καὶ σὰρξ καὶ νεῦρον καὶ ξύλον καὶ φλοιὸς καὶ λίθος καὶ τῶν ἄλλων ἕκαστον τῶν ὁμοιομερῶν μὲν φυσικῶν δὲ σωμάτων. εἴπωμεν δὲ πρῶτον τὸν ἀριθμὸν αὐτῶν, ὅσα κατὰ δύναμιν καὶ ἀδυναμίαν λέγεται. ἔστιν δὲ τάδε, πηκτὸν ἄπηκτον, τηκτὸν ἄτηκτον, μαλακτὸν ἀμάλακτον, τεγκτὸν ἄτεγκτον, καμπτὸν ἄκαμπτον, κατακτὸν ἀκάτακτον, θραυστὸν ἄθραυστον, θλαστὸν ἄθλαστον, πλαστὸν ἄπλαστον, πιεστὸν ἀπίεστον, ἑλκτὸν ἄνελκτον, ἐλατὸν ἀνήλατον, σχιστὸν ἄσχιστον, τμητὸν ἄτμητον, γλίσχρον ψαθυρόν, πιλητὸν ἀπίλητον, καυστὸν ἄκαυστον, θυμιατὸν ἀθυμίατον. τὰ μὲν οὖν πλεῖστα σχεδὸν τῶν σωμάτων τούτοις διαφέρει τοῖς πάθεσιν· τίνα δ’ ἕκαστον τούτων ἔχει δύναμιν, εἴπωμεν. περὶ μὲν οὖν πηκτοῦ καὶ ἀπήκτου καὶ τηκτοῦ καὶ ἀτήκτου εἴρηται μὲν καθόλου πρότερον, ὅμως δ’ ἐπανέλθωμεν καὶ νῦν. τῶν γὰρ σωμάτων ὅσα πήγνυται καὶ σκληρύνεται, τὰ μὲν ὑπὸ θερμοῦ πάσχει τοῦτο τὰ δ’ ὑπὸ ψυχροῦ, ὑπὸ μὲν τοῦ θερμοῦ ξηραίνοντος τὸ ὑγρόν, ὑπὸ δὲ τοῦ ψυχροῦ ἐκθλίβοντος τὸ θερμόν. ὥστε τὰ μὲν ὑγροῦ ἀπουσίᾳ τὰ δὲ θερμοῦ τοῦτο πάσχει, ὅσα μὲν ὕδατος, θερμοῦ, ὅσα δὲ γῆς, ὑγροῦ. τὰ μὲν [385a.28] οὖν ὑγροῦ ἀπουσίᾳ ὑπὸ ὑγροῦ διατήκεται, ἂν μὴ οὕτως συνέλθῃ ὥστε ἐλάττους τοὺς πόρους λειφθῆναι τῶν τοῦ ὕδατος ὄγκων, οἷον ὁ κέραμος· ὅσα δὲ μὴ οὕτω, πάντα ὑγρῷ τήκεται, οἷον νίτρον, ἅλες, γῆ ἡ ἐκ πηλοῦ· τὰ δὲ θερμοῦ στερήσει ὑπὸ θερμοῦ τήκεται, οἷον κρύσταλλος, μόλυβδος, χαλκός. ποῖα μὲν οὖν πηκτὰ καὶ τηκτά, εἴρηται, καὶ ποῖα [385b] ἄτηκτα. ἄπηκτα δὲ ὅσα μὴ ἔχει ὑγρότητα ὑδατώδη, μηδὲ ὕδατός ἐστιν, ἀλλὰ πλέον θερμοῦ καὶ γῆς, οἷον μέλι καὶ γλεῦκος (ὥσπερ ζέοντα γάρ ἐστιν), καὶ ὅσα ὕδατος μὲν ἔχει, ἔστιν δὲ πλέον ἀέρος, ὥσπερ τὸ ἔλαιον καὶ ὁ ἄργυρος ὁ χυτός, καὶ εἴ τι γλίσχρον, οἷον <πίττα καὶ> ἰξός.

μαλακτὰ δ’ ἐστὶ τῶν πεπηγότων ὅσα μὴ ἐξ ὕδατος, οἷον κρύσταλλος ὕδατος, ἀλλ’ ὅσα γῆς μᾶλλον, καὶ μήτ’ ἐξίκμασται πᾶν τὸ ὑγρὸν ὥσπερ ἐν νίτρῳ ἢ ἁλσί, μήτ’ ἔχει ἀνωμάλως ὥσπερ ὁ κέραμος, ἀλλ’ ἢ ἑλκτὰ μὴ ὄντα διαντά, ἢ ἐλατὰ μὴ ὄντα ὕδατος, καὶ μαλακτὰ πυρί, οἷον σίδηρος καὶ κέρας καὶ ξύλα. ἔστι δὲ καὶ τῶν τηκτῶν καὶ τῶν ἀτήκτων τὰ μὲν τεγκτὰ τὰ δὲ ἄτεγκτα, οἷον χαλκὸς ἄτεγκτον, τηκτὸν ὄν, ἔριον δὲ καὶ γῆ τεγκτόν· βρέχεται γάρ. καὶ χαλκὸς μὲν δὴ τηκτόν, οὐχ ὑπὸ ὕδατος δὲ τηκτόν. ἀλλὰ καὶ τῶν ὑπὸ ὕδατος τηκτῶν ἔνια ἄτεγκτα, οἷον νίτρον καὶ ἅλες· οὐδὲ γὰρ ἄλλο τεγκτὸν οὐδὲν ὃ μὴ μαλακώτερον γίγνεται βρεχόμενον. ἔνια δὲ τεγκτὰ ὄντα οὐ τηκτά ἐστιν, οἷον ἔριον καὶ οἱ καρποί. ἔστι δὲ τεγκτὰ μὲν ὅσα γῆς ὄντα ἔχει τοὺς πόρους μείζους τῶν τοῦ ὕδατος ὄγκων, ὄντων σκληροτέρων τοῦ ὕδατος. τηκτὰ δὲ ὕδατι ὅσα δι’ ὅλου. διὰ τί δ’ ἡ μὲν γῆ καὶ τήκεται καὶ τέγγεται ὑπὸ τοῦ ὑγροῦ, τὸ δὲ νίτρον τήκεται μέν, τέγγεται δ’ οὔ; ὅτι ἐν μὲν τῷ νίτρῳ δι’ ὅλου οἱ πόροι, ὥστε διαιρεῖται εὐθὺς ὑπὸ τοῦ ὕδατος τὰ μόρια, ἐν δὲ τῇ γῇ καὶ παραλλάξ εἰσι πόροι, ὥστε ὁποτέρως ἂν δέξηται, διαφέρει τὸ πάθος. ἔστι δὲ καὶ τὰ μὲν τῶν σωμάτων καμπτὰ καὶ εὐθυντά, οἷον κάλαμος καὶ λύγος, τὰ δ’ ἄκαμπτα τῶν σωμάτων, οἷον κέραμος καὶ λίθος. ἔστιν δὲ ἄκαμπτα μὲν καὶ ἀνεύθυντα ὅσων σωμάτων οὐ δύναται τὸ μῆκος εἰς εὐθύτητα ἐκ περιφερείας καὶ ἐξ εὐθύτητος εἰς περιφέρειαν μεταβάλλειν, καὶ τὸ κάμπτεσθαι καὶ τὸ εὐθύνεσθαί ἐστιν τὸ εἰς εὐθύτητα ἢ περιφέρειαν μεθίστασθαι ἢ κινεῖσθαι· καὶ γὰρ τὸ ἀνακαμπτόμενον καὶ τὸ [386a] κατακαμπτόμενον κάμπτεται. ἡ μὲν οὖν εἰς κυρτότητα ἢ κοιλότητα κίνησις τοῦ μήκους σῳζομένου κάμψις ἐστίν· εἰ γὰρ καὶ εἰς τὸ εὐθύ, εἴη ἂν ἅμα κεκαμμένον καὶ εὐθύ· ὅπερ ἀδύνατον, τὸ εὐθὺ κεκάμφθαι. καὶ εἰ κάμπτεται πᾶν ἢ ἀνακάμψει ἢ κατακάμψει, τούτων δὲ τὸ μὲν εἰς τὸ κυρτὸν τὸ δ’ εἰς τὸ κοῖλον μετάβασις, οὐκ ἂν εἴη καὶ εἰς τὸ εὐθὺ κάμψις, ἀλλ’ ἔστι κάμψις καὶ εὔθυνσις ἄλλο καὶ ἄλλο. καὶ ταῦτά ἐστιν καμπτὰ καὶ εὐθυντά, καὶ ἄκαμπτα καὶ ἀνεύθυντα. καὶ τὰ μὲν κατακτὰ καὶ θραυστὰ ἅμα ἢ χωρίς, οἷον ξύλον μὲν κατακτόν, θραυστὸν δ’ οὔ, κρύσταλλος δὲ καὶ λίθος θραυστόν, κατακτὸν δ’ οὔ, κέραμος δὲ καὶ θραυστὸν καὶ κατακτόν. διαφέρει δ’, ὅτι κάταξις μέν ἐστιν εἰς μεγάλα μέρη διαίρεσις καὶ χώρισις, θραῦσις δὲ εἰς τὰ τυχόντα καὶ πλείω δυοῖν. ὅσα μὲν οὖν οὕτω πέπηγεν ὥστε πολλοὺς ἔχειν παραλλάττοντας πόρους, θραυστά (μέχρι γὰρ τούτου διίσταται), ὅσα δ’ εἰς πολύ, κατακτά, ὅσα δ’ ἄμφω, ἀμφότερα. καὶ τὰ μὲν θλαστά, οἷον χαλκὸς καὶ κηρός, τὰ δ’ ἄθλαστα, οἷον κέραμος καὶ ὕδωρ. ἔστιν δὲ θλάσις ἐπιπέδου κατὰ μέρος εἰς βάθος μετάστασις ὤσει ἢ πληγῇ, τὸ δ’ ὅλον ἁφῇ. ἔστιν δὲ τὰ τοιαῦτα καὶ μαλακτά, οἷον κηρὸς μένοντος τοῦ ἄλλου ἐπιπέδου κατὰ μέρος μεθίσταται, καὶ σκληρά, οἷον χαλκός, καὶ ἄθλαστα καὶ σκληρά, οἷον κέραμος (οὐ γὰρ ὑπείκει εἰς βάθος τὸ ἐπίπεδον), καὶ ὑγρά, οἷον ὕδωρ (τὸ γὰρ ὕδωρ ὑπείκει μέν, ἀλλ’ οὐ κατὰ μέρος, ἀλλ’ ἀντιμεθίσταται). τῶν δὲ θλαστῶν ὅσα μὲν μένει θλασθέντα καὶ εὔθλαστα χειρί, ταῦτα μὲν πλαστά, τὰ δὲ ἢ μὴ εὔθλαστα, ὥσπερ λίθος ἢ ξύλον, ἢ εὔθλαστα μέν, μὴ μένει δὲ ἡ θλάσις, ὥσπερ ἐρίου ἢ σπόγγου, οὐ πλαστά, ἀλλὰ πιεστὰ ταῦτ’ ἐστίν. ἔστι δὲ πιεστὰ ὅσα ὠθούμενα εἰς αὑτὰ συνιέναι δύναται, εἰς βάθος τοῦ ἐπιπέδου παραλλάττοντος, οὐ διαιρουμένου, καὶ <μὴ> μεθισταμένου ἄλλου ἄλλῳ μορίου, οἷον τὸ ὕδωρ ποιεῖ· τοῦτο γὰρ ἀντιμεθίσταται. ἔστι δὲ ὦσις ἡ κίνησις ὑπὸ τοῦ κινοῦντος, ἣ [386b] γίγνεται ἀπὸ τῆς ἅψεως· πληγὴ δέ, ὅταν ἀπὸ τῆς φορᾶς. πιέζεται δὲ ὅσα πόρους ἔχει κενοὺς συγγενοῦς σώματος· καὶ πιεστὰ ταῦτα ὅσα δύναται εἰς τὰ ἑαυτῶν κενὰ συνιέναι ἢ εἰς τοὺς ἑαυτῶν πόρους· [ἐνίοτε γὰρ οὐ κενοί εἰσιν εἰς οὓς συνέρχεται,] οἷον ὁ βεβρεγμένος σπόγγος (πλήρεις γὰρ αὐτοῦ οἱ πόροι), ἀλλ’ ὧν ἂν οἱ πόροι πλήρεις ὦσι μαλακωτέρων ἢ αὐτὸ τὸ πεφυκὸς συνιέναι εἰς αὐτά. πιεστὰ μὲν οὖν ἐστιν οἷον σπόγγος, κηρός, σάρξ· ἀπίεστα δὲ τὰ μὴ πεφυκότα συνιέναι ὤσει εἰς τοὺς ἑαυτῶν πόρους διὰ τὸ ἢ μὴ ἔχειν ἢ σκληροτέρων ἔχειν πλήρεις· ὁ γὰρ σίδηρος ἀπίεστος καὶ λίθος καὶ ὕδωρ καὶ πᾶν ὑγρόν. ἑλκτὰ δ’ ἐστὶν ὅσων δυνατὸν εἰς τὸ πλάγιον μεθίστασθαι τὸ ἐπίπεδον· τὸ γὰρ ἕλκεσθαί ἐστι τὸ ἐπὶ τὸ κινοῦν μεθίστασθαι τὸ ἐπίπεδον συνεχὲς ὄν. ἔστιν δὲ τὰ μὲν ἑλκτά, οἷον θρίξ, ἱμάς, νεῦρον, σταίς, ἰξός, τὰ δ’ ἄνελκτα, οἷον ὕδωρ καὶ λίθος. τὰ μὲν οὖν ταὐτά ἐστιν ἑλκτὰ καὶ πιεστά, οἷον ἔριον, τὰ δ’ οὐ ταὐτά, οἷον φλέγμα πιεστὸν μὲν οὐκ ἔστιν, ἑλκτὸν δέ, καὶ ὁ σπόγγος πιεστὸν μέν, οὐχ ἑλκτὸν δέ. ἔστιν δὲ καὶ τὰ μὲν ἐλατά, οἷον χαλκός, τὰ δ’ ἀνήλατα, οἷον λίθος καὶ ξύλον. ἔστιν δ’ ἐλατὰ μὲν ὅσα τῇ αὐτῇ πληγῇ δύναται ἅμα καὶ εἰς πλάτος καὶ εἰς βάθος τὸ ἐπίπεδον μεθίστασθαι κατὰ μέρος, ἀνήλατα δὲ ὅσα ἀδύνατα. ἔστιν δὲ τὰ μὲν ἐλατὰ ἅπαντα καὶ θλαστά, τὰ δὲ θλαστὰ οὐ πάντα ἐλατά, οἷον ξύλον· ὡς μέντοι ἐπίπαν εἰπεῖν, ἀντιστρέφει. τῶν δὲ πιεστῶν τὰ μὲν ἐλατὰ τὰ δ’ οὔ, κηρὸς μὲν καὶ πηλὸς ἐλατά, ἔριον δ’ οὔ [οὐδ’ ὕδωρ]. ἔστιν δὲ καὶ τὰ μὲν σχιστά, οἷον ξύλον, τὰ δὲ ἄσχιστα, οἷον κέραμος. ἔστιν δὲ σχιστὸν τὸ δυνάμενον διαιρεῖσθαι ἐπὶ πλέον ἢ τὸ διαιροῦν διαιρεῖ· σχίζεται γάρ, ὅταν ἐπὶ πλέον διαιρῆται ἢ τὸ διαιροῦν διαιρεῖ, καὶ προηγεῖται ἡ διαίρεσις· ἐν δὲ τῇ τμήσει οὐκ ἔστιν τοῦτο. ἄσχιστα δὲ ὅσα μὴ δύνανται τοῦτο πάσχειν. ἔστιν δὲ οὔτε μαλακὸν οὐδὲν σχιστόν (λέγω δὲ τῶν ἁπλῶς μαλακῶν καὶ μὴ πρὸς ἄλληλα· οὕτω μὲν γὰρ καὶ σίδηρος ἔσται μαλακός) οὔτε τὰ σκληρὰ πάντα, [387a] ἀλλ’ ὅσα μήτε ὑγρά ἐστιν μήτε θλαστὰ μήτε θραυστά· τοιαῦτα δ’ ἐστὶν ὅσα κατὰ μῆκος ἔχει τοὺς πόρους, καθ’ οὓς προσφύεται ἀλλήλοις, ἀλλὰ μὴ κατὰ πλάτος. τμητὰ δ’ ἐστὶν τῶν συνεστώτων σκληρῶν ἢ μαλακῶν ὅσα δύναται μήτ’ ἐξ ἀνάγκης προηγεῖσθαι τῆς διαιρέσεως μήτε θραύεσθαι διαιρούμενα· ὅσα δὲ μὴ ὑγρὰ ᾖ, τὰ τοιαῦτα ἄτμητα. ἔνια δ’ ἐστὶν ταὐτὰ καὶ τμητὰ καὶ σχιστά, οἷον ξύλον· ἀλλ’ ὡς ἐπὶ τὸ πολὺ σχιστὸν μὲν κατὰ τὸ μῆκος, τμητὸν δὲ κατὰ τὸ πλάτος· ἐπεὶ γὰρ διαιρεῖται ἕκαστον εἰς πολλά, ᾗ μὲν μήκη πολλὰ τὸ ἕν, σχιστὸν ταύτῃ, ᾗ δὲ πλάτη πολλὰ τὸ ἕν, τμητὸν ταύτῃ. γλίσχρον δ’ ἐστὶν ὅταν ἑλκτὸν ᾖ ὑγρὸν ὂν ἢ μαλακόν. τοιοῦτον δὲ γίγνεται τῇ ἐπαλλάξει ὅσα ὥσπερ αἱ ἁλύσεις σύγκεινται τῶν σωμάτων· [387a.14] ταῦτα γὰρ ἐπὶ πολὺ δύναται ἐκτείνεσθαι καὶ συνιέναι. ὅσα δὲ μὴ τοιαῦτα, ψαθυρά. πιλητὰ δ’ ὅσα τῶν πιεστῶν μόνιμον ἔχει τὴν πίεσιν, ἀπίλητα δὲ ὅσα ἢ ὅλως ἀπίεστα ἢ μὴ μόνιμον ἔχει τὴν πίεσιν. καὶ τὰ μὲν καυστά ἐστιν τὰ δὲ ἄκαυστα, οἷον ξύλον μὲν καυστὸν καὶ ἔριον καὶ ὀστοῦν, λίθος δὲ καὶ κρύσταλλος ἄκαυστον. ἔστιν δὲ καυστὰ ὅσα ἔχει πόρους δεκτικοὺς πυρὸς καὶ ὑγρότητα ἐν τοῖς κατ’ εὐθυωρίαν πόροις ἀσθενεστέραν πυρός. ὅσα δὲ μὴ ἔχει ἢ ἰσχυροτέραν, οἷον κρύσταλλος καὶ τὰ σφόδρα χλωρά, ἄκαυστα. θυμιατὰ δ’ ἐστὶ τῶν σωμάτων ὅσα ὑγρότητα ἔχει μέν, οὕτω δ’ ἔχει ὥστε μὴ ἐξατμίζειν πυρουμένων χωρίς· ἔστιν γὰρ ἀτμὶς ἡ ὑπὸ θερμοῦ καυστικοῦ εἰς ἀέρα καὶ πνεῦμα ἔκκρισις ἐξ ὑγροῦ διαντική. τὰ δὲ θυμιατὰ χρόνῳ εἰς ἀέρα ἐκκρίνεται, καὶ τὰ μὲν ἀφανιζόμενα ξηρά, τὰ δὲ γῆ γίγνεται. διαφέρει δ’ αὕτη ἡ ἔκκρισις, ὅτι οὔτε διαίνει οὔτε πνεῦμα γίγνεται. ἔστιν δὲ πνεῦμα ῥύσις συνεχὴς ἀέρος ἐπὶ μῆκος· θυμίασις δ’ ἐστὶν ἡ ὑπὸ θερμοῦ καυστικοῦ κοινὴ ἔκκρισις ξηροῦ καὶ ὑγροῦ ἀθρόως· διόπερ οὐ διαίνει, ἀλλὰ χρωματίζει μᾶλλον. ἔστι δ’ ἡ μὲν ξυλώδους σώματος [387b] θυμίασις καπνός. λέγω γὰρ καὶ ὀστᾶ καὶ τρίχας καὶ πᾶν τὸ τοιοῦτον ἐν ταὐτῷ· οὐ γὰρ κεῖται ὄνομα κοινόν, ἀλλὰ κατ’ ἀναλογίαν ὅμως ἐν ταὐτῷ πάντ’ ἐστίν, ὥσπερ καὶ Ἐμπεδοκλῆς φησιν “ταὐτὰ τρίχες καὶ φύλλα καὶ οἰωνῶν πτερὰ πυκνὰ καὶ λοπίδες γίγνονται ἐπὶ στιβαροῖσι μέλεσσιν.” ἡ δὲ πίονος θυμίασις λιγνύς, ἡ δὲ λιπαροῦ κνῖσα. διὰ τοῦτο τὸ ἔλαιον οὐχ ἕψεται οὐδὲ παχύνεται, ὅτι θυμιατόν ἐστιν ἀλλ’ οὐκ ἀτμιστόν· ὕδωρ δ’ οὐ θυμιατὸν ἀλλ’ ἀτμιστόν. οἶνος δ’ ὁ μὲν γλυκὺς θυμιᾶται. πίων γάρ, καὶ ταὐτὰ ποιεῖ τῷ ἐλαίῳ· οὔτε γὰρ ὑπὸ ψύχους πήγνυται, καίεταί τε. ἔστιν δὲ ὀνόματι οἶνος, ἔργῳ δ’ οὐκ ἔστιν· οὐ γὰρ οἰνώδης ὁ χυμός· διὸ οὐ μεθύσκει, ὁ τυχὼν δ’ οἶνος (μικρὰν δ’ ἔχει θυμίασιν· διὸ ἀνίησιν φλόγα). καυστὰ δὲ δοκεῖ εἶναι ὅσα εἰς τέφραν διαλύεται τῶν σωμάτων. πάσχει δὲ τοῦτο πάντα ὅσα πέπηγεν ἢ ὑπὸ θερμοῦ ἢ ὑπ’ ἀμφοῖν, ψυχροῦ καὶ θερμοῦ· ταῦτα γὰρ φαίνεται κρατούμενα ὑπὸ τοῦ πυρός· ἥκιστα δὲ τῶν λίθων ἡ σφραγίς, ὁ καλούμενος ἄνθραξ. τῶν δὲ καυστῶν τὰ μὲν φλογιστά ἐστιν τὰ δ’ ἀφλόγιστα· τούτων δ’ ἔνια ἀνθρακευτά. φλογιστὰ μὲν οὖν ὅσα φλόγα δύναται παρέχεσθαι· ὅσα δὲ ἀδύνατα, ἀφλόγιστα. ἔστι δὲ φλογιστὰ ὅσα μὴ ὑγρὰ ὄντα θυμιατά ἐστιν· πίττα δὲ ἢ ἔλαιον ἢ κηρὸς μᾶλλον μετ’ ἄλλων ἢ καθ’ αὑτὰ φλογιστά· μάλιστα δ’ ὅσα καπνὸν ἀνίησιν. ἀνθρακευτὰ δ’ ὅσα τῶν τοιούτων γῆς πλέον ἔχει ἢ καπνοῦ. ἔτι δ’ ἔνια τηκτὰ ὄντα οὐ φλογιστά ἐστιν, οἷον χαλκός, καὶ φλογιστὰ οὐ τηκτά, οἷον ξύλον, τὰ δ’ ἄμφω, οἷον λιβανωτός. αἴτιον δ’ ὅτι τὰ μὲν ξύλα ἀθρόον ἔχει τὸ ὑγρόν, καὶ δι’ ὅλου συνεχές ἐστιν, ὥστε διακάεσθαι, ὁ δὲ χαλκὸς παρ’ ἕκαστον μὲν μέρος, οὐ συνεχὲς δέ, καὶ ἔλαττον ἢ ὥστε φλόγα ποιῆσαι· ὁ δὲ λιβανωτὸς τῇ μὲν οὕτως τῇ δ’ ἐκείνως ἔχει. φλογιστὰ δ’ ἐστὶν τῶν θυμιατῶν ὅσα μὴ τηκτά ἐστιν διὰ τὸ μᾶλλον εἶναι γῆς. (τὸ ξηρὸν γὰρ ἔχει κοινὸν τῷ [388a] πυρί· τοῦτ’ οὖν θερμὸν ἂν γένηται τὸ ξηρόν, πῦρ γίγνεται. διὰ τοῦτο ἡ φλὸξ πνεῦμα ἢ καπνὸς καόμενός ἐστιν.) ξύλων μὲν οὖν ἡ θυμίασις καπνός, κηροῦ δὲ καὶ λιβανωτοῦ καὶ τῶν τοιούτων καὶ πίττης, καὶ ὅσα ἔχει πίτταν ἢ τοιαῦτα, λιγνύς, ἐλαίου δὲ καὶ ὅσα ἐλαιώδη, κνῖσα, καὶ ὅσα ἥκιστα καίεται μόνα, ὅτι ὀλίγον ξηροῦ ἔχει, ἡ δὲ μετάβασις διὰ τούτου, μετὰ δ' ἑτέρου τάχιστα· τοῦτο γάρ ἐστιν τὸ πῖον, ξηρὸν λιπαρόν. τὰ μὲν οὖν ἐκθυμιώμενα τῶν ὑγρῶν ὑγροῦ μᾶλλον, ὡς ἔλαιον καὶ πίττα, τὰ δὲ καόμενα ξηροῦ.

τούτοις δὲ τοῖς παθήμασιν καὶ ταύταις ταῖς διαφοραῖς τὰ ὁμοιομερῆ τῶν σωμάτων, ὥσπερ εἴρηται, διαφέρει ἀλλήλων κατὰ τὴν ἁφήν, καὶ ἔτι χυμοῖς καὶ ὀσμαῖς καὶ χρώμασιν· λέγω δ' ὁμοιομερῆ οἷον τά τε μεταλλευόμενα-χαλκόν, χρυσόν, ἄργυρον, καττίτερον, σίδηρον, λίθον, καὶ τἆλλα τὰ τοιαῦτα, καὶ ὅσα ἐκ τούτων γίγνεται ἐκκρινόμενα-καὶ τὰ ἐν τοῖς ζῴοις καὶ φυτοῖς, οἷον σάρκες, ὀστᾶ, νεῦρον, δέρμα, σπλάγχνον, τρίχες, ἶνες, φλέβες, ἐξ ὧν ἤδη συνέστηκε τὰ ἀνομοιομερῆ, οἷον πρόσωπον, χείρ, πούς, καὶ τἆλλα τὰ τοιαῦτα, καὶ ἐν φυτοῖς ξύλον, φλοιός, φύλλον, ῥίζα, καὶ ὅσα τοιαῦτα. ἐπεὶ δὲ ταῦτα μὲν ὑπ' ἄλλης αἰτίας συνέστηκεν, ἐξ ὧν δὲ ταῦτα ὕλη μὲν τὸ ξηρὸν καὶ ὑγρόν, ὥστε ὕδωρ καὶ γῆ (ταῦτα γὰρ προφανεστάτην ἔχει τὴν δύναμιν ἑκάτερον ἑκατέρου), τὰ δὲ ποιοῦντα τὸ θερμὸν καὶ ψυχρόν (ταῦτα γὰρ συνίστησιν καὶ πήγνυσιν ἐξ ἐκείνων), λάβωμεν τῶν ὁμοιομερῶν ποῖα γῆς εἴδη καὶ ποῖα ὕδατος καὶ ποῖα κοινά. ἔστι δὴ τῶν σωμάτων τῶν δεδημιουργημένων τὰ μὲν ὑγρά, τὰ δὲ μαλακά, τὰ δὲ σκληρά· τούτων δὲ ὁπόσα σκληρὰ ἢ μαλακὰ πήξει ἐστίν, εἴρηται πρότερον. τῶν μὲν οὖν ὑγρῶν ὅσα μὲν ἐξατμίζεται, ὕδατος, ὅσα δὲ μή, ἢ γῆς ἢ κοινὰ γῆς καὶ ὕδατος, οἷον γάλα, ἢ γῆς καὶ ἀέρος, οἷον ξύλον, ἢ ὕδατος καὶ ἀέρος, οἷον ἔλαιον. καὶ ὅσα μὲν ὑπὸ θερμοῦ παχύνεται, κοινά (ἀπορήσειε δ' ἄν τις περὶ οἴνου τῶν ὑγρῶν· τοῦτο [388b] γὰρ καὶ ἐξατμισθείη ἄν, καὶ παχύνεται ὥσπερ ὁ νέος· αἴτιον δ' ὅτι οὔτε ἐν ἑνὶ εἴδει λέγεται ὁ οἶνος, καὶ ὅτι ἄλλος ἄλλως· ὁ γὰρ νέος μᾶλλον γῆς ἢ ὁ παλαιός· διὸ καὶ παχύνεται τῷ θερμῷ μάλιστα καὶ πήγνυται ἧττον ὑπὸ τοῦ ψυχροῦ· ἔχει γὰρ καὶ θερμὸν πολὺ καὶ γῆς, ὥσπερ ὁ ἐν Ἀρκαδίᾳ οὕτως ἀποξηραίνεται ὑπὲρ τοῦ καπνοῦ ἐν τοῖς ἀσκοῖς ὥστε ξυόμενος πίνεσθαι· εἰ δὴ ἅπας ἰλὺν ἔχει, οὕτως ἑκατέρου ἐστίν, ἢ γῆς ἢ ὕδατος, ὡς ταύτης ἔχει πλῆθος)· ὅσα δὲ ὑπὸ ψυχροῦ παχύνεται, γῆς· ὅσα δ' ὑπ' ἀμφοῖν, κοινὰ πλειόνων, οἷον ἔλαιον καὶ μέλι καὶ ὁ γλυκὺς οἶνος. τῶν δὲ συνεστώτων ὅσα μὲν πέπηγεν ὑπὸ ψυχροῦ, ὕδατος, οἷον κρύσταλλος, χιών, χάλαζα, πάχνη· ὅσα δ' ὑπὸ θερμοῦ, γῆς, οἷον κέραμος, τυρός, νίτρον, ἅλες· ὅσα δ' ὑπ' ἀμφοῖν (τοιαῦτα δ' ἐστὶν ὅσα ψύξει· ταῦτα δ' ἐστὶν ὅσα ἀμφοῖν στερήσει, καὶ θερμοῦ καὶ ὑγροῦ συνεξιόντος τῷ θερμῷ· οἱ μὲν γὰρ ἅλες ὑγροῦ μόνου στερήσει πήγνυνται, καὶ ὅσα εἰλικρινῆ γῆς, ὁ δὲ κρύσταλλος θερμοῦ μόνου), ταῦτα δ’ ἀμφοῖν. διὸ καὶ ὑπ’ ἀμφοῖν καὶ εἶχεν ἄμφω. ὅσων μὲν οὖν ἅπαν ἐξικμάσθη, οἷον κέραμος ἢ ἤλεκτρον (καὶ γὰρ τὸ ἤλεκτρον, καὶ ὅσα λέγεται ὡς δάκρυα, ψύξει ἐστίν, οἷον σμύρνα, λιβανωτός, κόμμι· καὶ τὸ ἤλεκτρον δὲ τούτου τοῦ γένους ἔοικεν, καὶ πήγνυται· ἐμπεριειλημμένα γοῦν ζῷα ἐν αὐτῷ φαίνεται· ὑπὸ δὲ τοῦ ποταμοῦ τὸ θερμὸν ἐξιὸν ὥσπερ τοῦ ἑψομένου μέλιτος, ὅταν εἰς ὕδωρ ἀφεθῇ, ἐξατμίζει τὸ ὑγρόν), ταῦτα πάντα γῆς. καὶ τὰ μὲν ἄτηκτα καὶ ἀμάλακτα, οἷον τὸ ἤλεκτρον καὶ λίθοι ἔνιοι, ὥσπερ οἱ πῶροι οἱ ἐν τοῖς σπηλαίοις· καὶ γὰρ οὗτοι ὁμοίως γίγνονται τούτοις, καὶ οὐχ ὡς ὑπὸ πυρὸς ἀλλ’ ὡς ὑπὸ τοῦ ψυχροῦ διεξιόντος τοῦ θερμοῦ συνεξέρχεται τὸ ὑγρὸν ὑπὸ τοῦ ἐξ αὐτοῦ ἐξιόντος θερμοῦ· ἐν δὲ τοῖς ἑτέροις ὑπὸ τοῦ ἔξωθεν πυρός. ὅσα δὲ μὴ ὅλα, γῆς μέν ἐστι μᾶλλον, μαλακτὰ δέ, οἷον σίδηρος καὶ κέρας. (λιβανωτοὶ δὲ καὶ τὰ τοιαῦτα παραπλησίως τοῖς ξύλοις ἀτμίζει.) ἐπεὶ οὖν τηκτά γε θετέον καὶ ὅσα τήκεται ὑπὸ πυρός, ταῦτ’ ἐστὶν ὑδατωδέστερα, ἔνια [389a] δὲ καὶ κοινά, οἷον κηρός· ὅσα δὲ ὑπὸ ὕδατος, ταῦτα δὲ [389a.2] γῆς· ὅσα δὲ μηδ’ ὑφ’ ἑτέρου, ταῦτα ἢ γῆς ἢ ἀμφοῖν. εἰ οὖν ἅπαντα μὲν ἢ ὑγρὰ ἢ πεπηγότα, τούτων δὲ τὰ ἐν τοῖς εἰρημένοις πάθεσιν, καὶ οὐκ ἔστιν μεταξύ, ἅπαντ’ ἂν εἴη εἰρημένα οἷς διαγνωσόμεθα πότερον γῆς ἢ ὕδατος ἢ πλειόνων κοινόν, καὶ πότερον ὑπὸ πυρὸς συνέστηκεν ἢ ψυχροῦ ἢ ἀμφοῖν. χρυσὸς μὲν δὴ καὶ ἄργυρος καὶ χαλκὸς καὶ καττίτερος καὶ μόλυβδος καὶ ὕαλος καὶ λίθοι πολλοὶ ἀνώνυμοι ὕδατος· πάντα γὰρ τήκεται ταῦτα θερμῷ. ἔτι οἶνοι ἔνιοι καὶ οὖρον καὶ ὄξος καὶ κονία καὶ ὀρὸς καὶ ἰχὼρ ὕδατος· πάντα γὰρ πήγνυται ψυχρῷ. σίδηρος δὲ καὶ κέρας καὶ ὄνυξ καὶ ὀστοῦν καὶ νεῦρον καὶ ξύλον καὶ τρίχες καὶ φύλλα καὶ φλοιὸς γῆς μᾶλλον· ἔτι ἤλεκτρον, σμύρνα, λίβανος, καὶ πάντα τὰ δάκρυα λεγόμενα, καὶ πῶρος, καὶ οἱ καρποί, οἷον τὰ χεδροπά, καὶ σῖτος (τὰ τοιαῦτα γὰρ τὰ μὲν σφόδρα, τὰ δὲ ἧττον μὲν τούτων, ὅμως δὲ γῆς· τὰ μὲν γὰρ μαλακτά, τὰ δὲ θυμιατὰ καὶ ψύξει γεγενημένα)· ἔτι νίτρον, ἅλες, λίθων γένη, ὅσα μήτε ψύξει μήτε τηκτά. αἷμα δὲ καὶ γονὴ κοινὰ γῆς καὶ ὕδατος καὶ ἀέρος, τὸ μὲν ἔχον αἷμα ἶνας μᾶλλον γῆς (διὸ ψύχει πήγνυται καὶ ὑγρῷ τήκεται), τὰ δὲ μὴ ἔχοντα ἶνας ὕδατος (διὸ καὶ οὐ πήγνυται). γονὴ δὲ πήγνυται ψύξει ἐξιόντος τοῦ ὑγροῦ μετὰ τοῦ θερμοῦ.

ποῖα δὲ θερμὰ ἢ ψυχρὰ τῶν πεπηγότων ἢ τῶν ὑγρῶν, ἐκ τῶν εἰρημένων δεῖ μεταδιώκειν. ὅσα μὲν οὖν ὕδατος, ὡς ἐπὶ τὸ πολὺ ψυχρά, ἐὰν μὴ ἀλλοτρίαν ἔχῃ θερμότητα, οἷον κονία, οὖρον, οἶνος· ὅσα δὲ γῆς, ὡς ἐπὶ τὸ πολὺ θερμὰ διὰ τὴν τοῦ θερμοῦ δημιουργίαν, οἷον τίτανος καὶ τέφρα. δεῖ δὲ λαβεῖν τὴν ὕλην ψυχρότητά τινα εἶναι· ἐπεὶ γὰρ τὸ ξηρὸν καὶ τὸ ὑγρὸν ὕλη (ταῦτα γὰρ παθητικά), τούτων δὲ σώματα μάλιστα γῆ καὶ ὕδωρ ἐστίν (ταῦτα γὰρ ψυχρότητι ὥρισται), δῆλον ὅτι πάντα τὰ σώματα ὅσα ἑκατέρου ἁπλῶς [389b] τοῦ στοιχείου, ψυχρὰ μᾶλλόν ἐστιν, ἐὰν μὴ ἔχῃ ἀλλοτρίαν θερμότητα, οἷον τὸ ζέον ὕδωρ ἢ τὸ διὰ τέφρας ἠθημένον· καὶ γὰρ τοῦτο ἔχει τὴν ἐκ τῆς τέφρας θερμότητα· ἐν ἅπασι γάρ ἐστι θερμότης, ἢ πλείων ἢ ἐλάττων, τοῖς πεπυρωμένοις· διὸ καὶ ἐν τοῖς σαπροῖς ζῷα ἐγγίγνεται· ἔνεστι γὰρ θερμότης ἡ φθείρασα τὴν ἑκάστου οἰκείαν θερμότητα. ὅσα δὲ κοινά, ἔχει θερμότητα· συνέστηκε γὰρ τὰ πλεῖστα ὑπὸ θερμότητος πεψάσης. ἔνια δὲ σήψεις εἰσίν, οἷον τὰ συντηκτά· ὥστε ἔχοντα μὲν τὴν φύσιν θερμὰ καὶ αἷμα καὶ γονὴ καὶ μυελὸς καὶ ὀπὸς καὶ πάντα τὰ τοιαῦτα, φθειρόμενα δὲ καὶ ἐξιστάμενα τῆς φύσεως οὐκέτι· λείπεται γὰρ ἡ ὕλη, γῆ οὖσα ἢ ὕδωρ· διὸ ἀμφότερα δοκεῖ τισιν, καὶ οἱ μὲν ψυχρὰ οἱ δὲ θερμὰ ταῦτά φασιν εἶναι, ὁρῶντες, ὅταν μὲν ἐν τῇ φύσει ὦσιν, θερμά, ὅταν δὲ χωρισθῶσιν, πηγνύμενα. ἔχει μὲν οὖν οὕτως, ὅμως δέ, ὥσπερ διώρισται, ἐν οἷς μὲν ἡ ὕλη ὕδατος τὸ πλεῖστον, ψυχρά (ἀντίκειται γὰρ μάλιστα τοῦτο τῷ πυρί), ἐν οἷς δὲ γῆς ἢ ἀέρος, θερμότερα. συμβαίνει δέ ποτε ταὐτὰ γίγνεσθαι ψυχρότατα καὶ θερμότατα ἀλλοτρίᾳ θερμότητι· ὅσα γὰρ μάλιστα πέπηγε καὶ στερεώτερά ἐστιν, ταῦτα ψυχρά τε μάλιστα, ἐὰν στερηθῇ θερμότητος, καὶ κάει μάλιστα, ἐὰν πυρωθῇ, οἷον ὕδωρ καπνοῦ καὶ ὁ λίθος ὕδατος καίει μᾶλλον.

ἐπεὶ δὲ περὶ τούτων διώρισται, καθ’ ἕκαστον λέγωμεν τί σὰρξ ἢ ὀστοῦν ἢ τῶν ἄλλων τῶν ὁμοιομερῶν· ἔχομεν γὰρ ἐξ ὧν ἡ τῶν ὁμοιομερῶν φύσις συνέστηκεν, τὰ γένη αὐτῶν, τίνος ἕκαστον γένους, διὰ τῆς γενέσεως· ἐκ μὲν γὰρ τῶν στοιχείων τὰ ὁμοιομερῆ, ἐκ δὲ τούτων ὡς ὕλης τὰ ὅλα ἔργα τῆς φύσεως. ἔστιν δ’ ἅπαντα ὡς μὲν ἐξ ὕλης ἐκ τῶν εἰρημένων, ὡς δὲ κατ’ οὐσίαν τῷ λόγῳ. ἀεὶ δὲ μᾶλλον δῆλον ἐπὶ τῶν ὑστέρων καὶ ὅλως ὅσα οἷον ὄργανα καὶ ἕνεκά του. μᾶλλον γὰρ δῆλον ὅτι ὁ νεκρὸς ἄνθρωπος ὁμωνύμως. οὕτω τοίνυν καὶ χεὶρ τελευτήσαντος ὁμωνύμως, καθάπερ καὶ [390a] αὐλοὶ λίθινοι λεχθείησαν· οἷον γὰρ καὶ ταῦτα ὄργανα ἄττα ἔοικεν εἶναι. ἧττον δ’ ἐπὶ σαρκὸς καὶ ὀστοῦ τὰ τοιαῦτα δῆλα. ἔτι δ’ ἐπὶ πυρὸς καὶ ὕδατος ἧττον· τὸ γὰρ οὗ ἕνεκα ἥκιστα ἐνταῦθα δῆλον, ὅπου δὴ πλεῖστον τῆς ὕλης· ὥσπερ γὰρ εἰ καὶ τὰ ἔσχατα ληφθείη, ἡ μὲν ὕλη οὐδὲν ἄλλο παρ’ αὐτήν, ἡ δ’ οὐσία οὐδὲν ἄλλο ἢ λόγος, τὰ δὲ μεταξὺ ἀνάλογον τῷ ἐγγὺς εἶναι ἕκαστον, ἐπεὶ καὶ τούτων ὁτιοῦν ἐστιν ἕνεκά του, καὶ οὐ πάντως ἔχον ὕδωρ ἢ πῦρ, ὥσπερ οὐδὲ σὰρξ οὐδὲ σπλάγχνον. τούτων δ’ ἔτι μᾶλλον πρόσωπον καὶ χείρ. ἅπαντα δ’ ἐστὶν ὡρισμένα τῷ ἔργῳ· τὰ μὲν γὰρ δυνάμενα ποιεῖν τὸ αὐτῶν ἔργον ἀληθῶς ἐστιν ἕκαστον, οἷον ὀφθαλμὸς εἰ ὁρᾷ, τὸ δὲ μὴ δυνάμενον ὁμωνύμως, οἷον ὁ τεθνεὼς ἢ ὁ λίθινος· οὐδὲ γὰρ πρίων ὁ ξύλινος, ἀλλ’ ἢ ὡς εἰκών. οὕτω τοίνυν καὶ σάρξ· ἀλλὰ τὸ ἔργον αὐτῆς ἧττον δῆλον ἢ τὸ τῆς γλώττης. ὁμοίως δὲ καὶ πῦρ· ἀλλ’ ἔτι ἧττον ἴσως δῆλον φυσικῶς ἢ τὸ τῆς σαρκὸς ἔργον. ὁμοίως δὲ καὶ τὰ ἐν τοῖς φυτοῖς καὶ τὰ ἄψυχα, οἷον χαλκὸς καὶ ἄργυρος· πάντα γὰρ δυνάμει τινί ἐστιν ἢ τοῦ ποιεῖν ἢ τοῦ πάσχειν, ὥσπερ σὰρξ καὶ νεῦρον· ἀλλ’ οἱ λόγοι αὐτῶν οὐκ ἀκριβεῖς. ὥστε πότε ὑπάρχει καὶ πότε οὔ, οὐ ῥᾴδιον διιδεῖν, ἂν μὴ σφόδρα ἐξίτηλον ᾖ καὶ τὰ σχήματα μόνα ᾖ λοιπά, οἷον καὶ τὰ τῶν παλαιουμένων νεκρῶν σώματα ἐξαίφνης τέφρα γίγνεται ἐν ταῖς θήκαις· καὶ καρποὶ μόνον τῷ [390b] σχήματι, τὴν δ’ αἴσθησιν οὐ φαίνονται, παλαιούμενοι σφόδρα· καὶ τὰ ἐκ τοῦ γάλακτος πηγνύμενα. τὰ μὲν οὖν τοιαῦτα μόρια θερμότητι καὶ ψυχρότητι καὶ ταῖς ὑπὸ τούτων κινήσεσιν ἐνδέχεται γίγνεσθαι, πηγνύμενα τῷ θερμῷ καὶ τῷ ψυχρῷ· λέγω δ’ ὅσα ὁμοιομερῆ, οἷον σάρκα, ὀστοῦν, τρίχας, νεῦρον, καὶ ὅσα τοιαῦτα· πάντα γὰρ διαφέρει ταῖς πρότερον εἰρημέναις διαφοραῖς, τάσει, ἕλξει, θραύσει, σκληρότητι, μαλακότητι καὶ τοῖς ἄλλοις τοῖς τοιούτοις· ταῦτα δὲ ὑπὸ θερμοῦ καὶ ψυχροῦ καὶ τῶν κινήσεων γίγνεται μειγνυμένων. τὰ δ’ ἐκ τούτων συνεστῶτα οὐδενὶ ἂν ἔτι δόξειεν τὰ ἀνομοιομερῆ, οἷον κεφαλὴ ἢ χεὶρ ἢ πούς, ἀλλ’ ὥσπερ καὶ τοῦ χαλκὸν μὲν ἢ ἄργυρον γενέσθαι αἰτία ψυχρότης καὶ θερμότης καὶ κίνησις, τοῦ δὲ πρίονα ἢ φιάλην ἢ κιβωτὸν οὐκέτι, ἀλλ’ ἐνταῦθα μὲν τέχνη, ἐκεῖ δὲ φύσις ἢ ἄλλη τις αἰτία. εἰ οὖν ἔχομεν τίνος γένους ἕκαστον τῶν ὁμοιομερῶν, ληπτέον καθ’ ἕκαστον τί ἐστιν, οἷον τί αἷμα ἢ σὰρξ ἢ σπέρμα καὶ τῶν ἄλλων ἕκαστον· οὕτω γὰρ ἴσμεν ἕκαστον διὰ τί καὶ τί ἐστιν, ἐὰν ἢ τὴν ὕλην ἢ τὸν λόγον ἔχωμεν, μάλιστα δ’ ὅταν ἄμφω τῆς τε γενέσεως καὶ φθορᾶς, καὶ πόθεν ἡ ἀρχὴ τῆς κινήσεως. δηλωθέντων δὲ τούτων ὁμοίως τὰ ἀνομοιομερῆ θεωρητέον, καὶ τέλος τὰ ἐκ τούτων συνεστῶτα, οἷον ἄνθρωπον, φυτόν, καὶ τἆλλα τὰ τοιαῦτα.

Περὶ κόσμου (ψευδεπίγραφο) (391a) On the Universe

Πολλάκις μὲν ἔμοιγε θεῖόν τι καὶ δαιμόνιον ὄντως χρῆμα, ὦ Ἀλέξανδρε, ἡ φιλοσοφία ἔδοξεν εἶναι, μάλιστα δὲ ἐν οἷς μόνη διαραμένη πρὸς τὴν τῶν ὄντων θέαν ἐσπούδασε γνῶναι τὴν ἐν αὐτοῖς ἀλήθειαν, καὶ τῶν ἄλλων ταύτης ἀποστάντων διὰ τὸ ὕψος καὶ τὸ μέγεθος, αὕτη τὸ πρᾶγμα οὐκ ἔδεισεν οὐδ᾽ αὑτὴν τῶν καλλίστων ἀπηξίωσεν, ἀλλὰ καὶ συγγενεστάτην ἑαυτῇ καὶ μάλιστα πρέπουσαν ἐνόμισεν εἶναι τὴν ἐκείνων μάθησιν. Ἐπειδὴ γὰρ οὐχ οἷόν τε ἦν τῷ σώματι εἰς τὸν οὐράνιον ἀφικέσθαι τόπον καὶ τὴν γῆν ἐκλιπόντα τὸν ἱερὸν ἐκεῖνον χῶρον κατοπτεῦσαι, καθάπερ οἱ ἀνόητοί ποτε ἐπενόουν Ἀλῳάδαι, ἡ γοῦν ψυχὴ διὰ φιλοσοφίας, λαβοῦσα ἡγεμόνα τὸν νοῦν, ἐπεραιώθη καὶ ἐξεδήμησεν, ἀκοπίατόν τινα ὁδὸν εὑροῦσα, καὶ τὰ πλεῖστον ἀλλήλων ἀφεστῶτα τοῖς τόποις τῇ διανοίᾳ συνεφόρησε, ῥᾳδίως, οἶμαι, τὰ συγγενῆ γνωρίσασα, καὶ θείῳ ψυχῆς ὄμματι τὰ θεῖα καταλαβομένη, τοῖς τε ἀνθρώποις προφητεύουσα. Τοῦτο δὲ ἔπαθε, καθ᾽ ὅσον οἷόν τε ἦν, πᾶσιν ἀφθόνως μεταδοῦναι βουληθεῖσα τῶν παρ᾽ αὑτῇ τιμίων. Διὸ καὶ τοὺς μετὰ σπουδῆς διαγράψαντας ἡμῖν ἑνὸς τόπου φύσιν ἢ μιᾶς σχῆμα πόλεως ἢ ποταμοῦ μέγεθος ἢ ὄρους κάλλος, οἷά τινες ἤδη πεποιήκασι, φράζοντες οἱ μὲν τὴν Ὄσσαν, οἱ δὲ τὴν Νύσσαν, οἱ δὲ τὸ Κωρύκιον ἄντρον, οἱ δὲ ὁτιοῦν ἔτυχε τῶν ἐπὶ μέρους, οἰκτίσειεν ἄν τις τῆς μικροψυχίας, τὰ τυχόντα ἐκπεπληγμένους καὶ μέγα φρονοῦντας ἐπὶ θεωρίᾳ μικρᾷ. Τοῦτο δὲ πάσχουσι διὰ τὸ ἀθέατοι τῶν κρειττόνων εἶναι, κόσμου λέγω καὶ τῶν ἐν κόσμῳ μεγίστων· οὐδέποτε γὰρ ἂν τούτοις γνησίως ἐπιστήσαντες ἐθαύμαζόν τι τῶν ἄλλων, ἀλλὰ πάντα αὐτοῖς τὰ ἄλλα μικρὰ κατεφαίνετο ἂν καὶ οὐδενὸς ἄξια πρὸς τὴν τούτων ὑπεροχήν. Λέγωμεν δὴ ἡμεῖς καί, καθ᾽ ὅσον ἐφικτόν, θεολογῶμεν περὶ τούτων συμπάντων, ὡς ἕκαστον ἔχει φύσεως καὶ θέσεως καὶ κινήσεως. Πρέπειν δέ γε οἶμαι καὶ σοί, ὄντι ἡγεμόνων ἀρίστῳ, τὴν τῶν μεγίστων ἱστορίαν μετιέναι, φιλοσοφίᾳ τε μηδὲν μικρὸν ἐπινοεῖν, ἀλλὰ τοῖς τοιούτοις δώροις δεξιοῦσθαι τοὺς ἀρίστους.

Κόσμος μὲν οὖν ἐστι σύστημα ἐξ οὐρανοῦ καὶ γῆς καὶ τῶν ἐν τούτοις περιεχομένων φύσεων. Λέγεται δὲ καὶ ἑτέρως κόσμος ἡ τῶν ὅλων τάξις τε καὶ διακόσμησις, ὑπὸ θεοῦ τε καὶ διὰ θεὸν φυλαττομένη. Ταύτης δὲ τὸ μὲν μέσον, ἀκίνητόν τε καὶ ἑδραῖον ὄν, ἡ φερέσβιος εἴληχε γῆ, παντοδαπῶν ζῴων ἑστία τε οὖσα καὶ μήτηρ. Τὸ δὲ ὕπερθεν αὐτῆς, πᾶν τε καὶ πάντῃ πεπερατωμένον εἰς τὸ ἀνωτάτω, θεῶν οἰκητήριον, οὐρανὸς ὠνόμασται. Πλήρης δὲ ὢν σωμάτων θείων, ἃ δὴ καλεῖν ἄστρα εἰώθαμεν, κινούμενος κίνησιν ἀίδιον, μιᾷ περιαγωγῇ καὶ κύκλῳ συναναχορεύει πᾶσι τούτοις ἀπαύστως δι’ αἰῶνος. Τοῦ δὲ σύμπαντος οὐρανοῦ τε καὶ κόσμου σφαιροειδοῦς ὄντος καὶ κινουμένου, καθάπερ εἶπον, ἐνδελεχῶς, δύο ἐξ ἀνάγκης ἀκίνητά ἐστι σημεῖα, καταντικρὺ ἀλλήλων, καθάπερ τῆς ἐν τόρνῳ κυκλοφορουμένης σφαίρας, στερεὰ μένοντα καὶ συνέχοντα τὴν σφαῖραν, περὶ ἃ ὁ πᾶς ὄγκος κύκλῳ στρέφεται· καλοῦνται δὲ οὗτοι πόλοι· δι’ ὧν εἰ νοήσαιμεν ἐπεζευγμένην εὐθεῖαν, ἥν τινες ἄξονα καλοῦσι, διάμετρος ἔσται τοῦ κόσμου, μέσον μὲν ἔχουσα τὴν γῆν, τοὺς δὲ δύο πόλους πέρατα. Τῶν δὲ ἀκινήτων πόλων τούτων ὁ μὲν ἀεὶ φανερός ἐστιν ὑπὲρ κορυφὴν ὢν κατὰ τὸ βόρειον κλίμα, ἀρκτικὸς καλούμενος, ὁ δὲ ὑπὸ γῆν ἀεὶ κατακέκρυπται, κατὰ τὸ νότιον, ἀνταρκτικὸς καλούμενος. Οὐρανοῦ δὲ καὶ ἄστρων οὐσίαν μὲν αἰθέρα καλοῦμεν, οὐχ, ὥς τινες, διὰ τὸ πυρώδη οὖσαν αἴθεσθαι, πλημμελοῦντες περὶ τὴν πλεῖστον πυρὸς ἀπηλλαγμένην δύναμιν, ἀλλὰ διὰ τὸ ἀεὶ θεῖν κυκλοφορουμένην, στοιχεῖον οὖσαν ἕτερον τῶν τεττάρων, ἀκήρατόν τε καὶ θεῖον. Τῶν γε μὴν ἐμπεριεχομένων ἄστρων τὰ μὲν ἀπλανῶς τῷ σύμπαντι οὐρανῷ συμπεριστρέφεται, τὰς αὐτὰς ἔχοντα ἕδρας, ὧν μέσος ὁ ζῳοφόρος καλούμενος κύκλος ἐγκάρσιος διὰ τῶν τροπικῶν διέζωσται, κατὰ μέρη διῃρημένος εἰς δώδεκα ζῳδίων χώρας, τὰ δέ, πλανητὰ ὄντα, οὔτε τοῖς προτέροις ὁμοταχῶς κινεῖσθαι πέφυκεν οὔτε ἀλλήλοις, ἀλλ’ ἐν ἑτέροις καὶ ἑτέροις κύκλοις, ὥστε αὐτῶν τὸ μὲν προσγειότερον εἶναι, τὸ δὲ ἀνώτερον. Τὸ μὲν οὖν τῶν ἀπλανῶν πλῆθος ἀνεξεύρετόν ἐστιν ἀνθρώποις, καίπερ ἐπὶ μιᾶς κινουμένων ἐπιφανείας τῆς τοῦ σύμπαντος οὐρανοῦ· τὸ δὲ τῶν πλανήτων, εἰς ἑπτὰ μέρη κεφαλαιούμενον, ἐν τοσούτοις ἐστὶ κύκλοις ἐφεξῆς κειμένοις, ὥστε ἀεὶ τὸν ἀνωτέρω μείζω τοῦ ὑποκάτω εἶναι, τούς τε ἑπτὰ ἐν ἀλλήλοις ἐμπεριέχεσθαι, πάντας γε μὴν ὑπὸ τῆς τῶν ἀπλανῶν σφαίρας περιειλῆφθαι. Συνεχῆ δὲ ἔχει ἀεὶ τὴν θέσιν ταύτῃ ὁ τοῦ Φαίνοντος ἅμα καὶ Κρόνου καλούμενος κύκλος, ἐφεξῆς δὲ ὁ τοῦ Φαέθοντος καὶ Διὸς λεγόμενος, εἶθ’ ὁ Πυρόεις, Ἡρακλέους τε καὶ Ἄρεος προσαγορευόμενος, ἑξῆς δὲ ὁ Στίλβων, ὃν ἱερὸν Ἑρμοῦ καλοῦσιν ἔνιοι, τινὲς δὲ Ἀπόλλωνος· μεθ’ ὃν ὁ τοῦ Φωσφόρου, ὃν Ἀφροδίτης, οἱ δὲ Ἥρας προσαγορεύουσιν, εἶτα ὁ ἡλίου, καὶ τελευταῖος ὁ τῆς σελήνης, μέχρις ἧς ὁρίζεται ὁ αἰθήρ, τά τε θεῖα ἐμπεριέχων σώματα καὶ τὴν τῆς κινήσεως τάξιν. Μετὰ δὲ τὴν αἰθέριον καὶ θείαν φύσιν, ἥντινα τεταγμένην ἀποφαίνομεν, ἔτι δὲ ἄτρεπτον καὶ ἀνετεροίωτον καὶ ἀπαθῆ, συνεχής ἐστιν ἡ δι’ ὅλων παθητή τε καὶ τρεπτή, καί, τὸ σύμπαν εἰπεῖν, φθαρτή τε καὶ ἐπίκηρος. Ταύτης δὲ αὐτῆς πρώτη μέν ἐστιν ἡ λεπτομερὴς καὶ φλογώδης οὐσία, ὑπὸ τῆς αἰθερίου πυρουμένη διὰ τὸ μέγεθος αὐτῆς καὶ τὴν ὀξύτητα τῆς κινήσεως· ἐν δὲ τῇ πυρώδει καὶ ἀτάκτῳ λεγομένῃ τά τε σέλα διᾴττει καὶ φλόγες ἀκοντίζονται καὶ δοκίδες τε καὶ βόθυνοι καὶ κομῆται λεγόμενοι στηρίζονται καὶ σβέννυνται πολλάκις. Ἑξῆς δὲ ταύτης ὁ ἀὴρ ὑποκέχυται, ζοφώδης ὢν καὶ παγετώδης τὴν φύσιν· ὑπὸ δὲ ἐκείνης λαμπόμενος ἅμα καὶ διακαιόμενος λαμπρός τε γίνεται καὶ ἀλεεινός. Ἐν δὲ τούτῳ, τῆς παθητῆς ὄντι καὶ αὐτῷ δυνάμεως καὶ παντοδαπῶς ἀλλοιουμένῳ, νέφη τε συνίσταται καὶ ὄμβροι καταράσσουσι, χιόνες τε καὶ πάχναι καὶ χάλαζαι πνοαί τε ἀνέμων καὶ τυφώνων, ἔτι τε βρονταὶ καὶ ἀστραπαὶ καὶ πτώσεις κεραυνῶν μυρίων τε γνόφων συμπληγάδες.

Ἑξῆς δὲ τῆς ἀερίου φύσεως γῆ καὶ θάλασσα ἐρήρεισται, φυτοῖς βρύουσα καὶ ζῴοις πηγαῖς τε καὶ ποταμοῖς, τοῖς μὲν ἐν γῇ ἀναλισκομένοις, τοῖς δὲ ἀνερευγομένοις εἰς θάλασσαν. Πεποίκιλται δὲ καὶ χλόαις μυρίαις ὄρεσι τε ὑψήλοις καὶ βαθυξύλοις δρυμοῖς καὶ πόλεσιν, ἃς τὸ σοφὸν ζῷον, ὁ ἄνθρωπος, ἱδρύσατο, νήσοις τε ἐναλίοις καὶ ἠπείροις. Τὴν μὲν οὖν οἰκουμένην ὁ πολὺς λόγος εἴς τε νήσους καὶ ἠπείρους διεῖλεν, ἀγνοῶν ὅτι καὶ ἡ σύμπασα μία νῆσός ἐστιν, ὑπὸ τῆς Ἀτλαντικῆς καλουμένης θαλάσσης περιρρεομένη. Πολλὰς δὲ καὶ ἄλλας εἰκὸς τῆσδε ἀντιπόρθμους ἄπωθεν κεῖσθαι, τὰς μὲν μείζους αὐτῆς, τὰς δὲ ἐλάττους, ἡμῖν δὲ πάσας πλὴν τῆσδε ἀοράτους· ὅπερ γὰρ αἱ παρ’ ἡμῖν νῆσοι πρὸς ταυτὶ τὰ πελάγη πεπόνθασι, τοῦτο ἥδε ἡ οἰκουμένη πρὸς τὴν Ἀτλαντικὴν θάλασσαν πολλαί τε ἕτεραι πρὸς σύμπασαν τὴν θάλασσαν· καὶ γὰρ αὗται μεγάλαι τινές εἰσι νῆσοι μεγάλοις περικλυζόμεναι πελάγεσιν. Ἡ δὲ σύμπασα τοῦ ὑγροῦ φύσις ἐπιπολάζουσα, κατά τινας τῆς γῆς σπίλους τὰς καλουμένας ἀναπεφαγκυῖα οἰκουμένας, ἑξῆς ἂν εἴη τῆς ἀερίου μάλιστα φύσεως. Μετὰ δὲ ταύτην ἐν τοῖς βυθοῖς κατὰ τὸ μεσαίτατον τοῦ κόσμου συνερηρεισμένη γῆ πᾶσα καὶ πεπιεσμένη συνέστηκεν, ἀκίνητος καὶ ἀσάλευτος· καὶ τοῦτ’ ἔστι τοῦ κόσμου τὸ πᾶν ὃ καλοῦμεν κάτω. Πέντε δὴ στοιχεῖα ταῦτα ἐν πέντε χώραις σφαιρικῶς ἐγκείμενα, περιεχομένης ἀεὶ τῆς ἐλάττονος τῇ μείζονι - λέγω δὲ γῆς μὲν ἐν ὕδατι, ὕδατος δὲ ἐν ἀέρι, ἀέρος δὲ ἐν πυρί, πυρὸς δὲ ἐν αἰθέρι - τὸν ὅλον κόσμον συνεστήσατο, καὶ τὸ μὲν ἄνω πᾶν θεῶν ἀπέδειξεν οἰκητήριον, τὸ κάτω δὲ ἐφημέρων ζῴων. Αὐτοῦ γε μὴν τούτου τὸ μὲν ὑγρόν ἐστιν, ὃ καλεῖν ποταμοὺς καὶ νάματα καὶ θαλάσσας εἰθίσμεθα, τὸ δὲ ξηρὸν, ὃ γῆν τε καὶ ἠπείρους καὶ νήσους ὀνομάζομεν.

Τῶν δὲ νήσων αἱ μέν εἰσι μεγάλαι, καθάπερ ἡ σύμπασα ἥδε οἰκουμένη λέλεκται πολλαί τε ἕτεραι μεγάλοις περιρρεόμεναι πελάγεσιν, αἱ δὲ ἐλάττους, φανεραί τε ἡμῖν καὶ ἐντὸς οὖσαι. Καὶ τούτων αἱ μὲν ἀξιόλογοι, Σικελία καὶ Σαρδὼ καὶ Κύρνος Κρήτη τε καὶ Εὔβοια καὶ Κύπρος καὶ Λέσβος, αἱ δὲ ὑποδεέστεραι, ὧν αἱ μὲν Σποράδες, αἱ δὲ Κυκλάδες, αἱ δὲ ἄλλως ὀνομάζονται.

Πέλαγος δὲ τὸ μὲν ἔξω τῆς οἰκουμένης Ἀτλαντικόν τε καὶ Ὠκεανὸς καλεῖται, περιρρέων ἡμᾶς. Ἐντὸς δὲ πρὸς δύσεις στενοπόρῳ διανεωγὼς στόματι, κατὰ τὰς Ἡρακλείους λεγομένας στήλας τὸν εἴσρουν εἰς τὴν ἔσω θάλασσαν ὡς ἂν εἰς λιμένα ποιεῖται, κατὰ μικρὸν δὲ ἐπιπλατυνόμενος ἀναχεῖται, μεγάλους περιλαμβάνων κόλπους ἀλλήλοις συναφεῖς, πῇ μὲν κατὰ στενοπόρους αὐχένας ἀνεστομωμένος, πῇ δὲ πάλιν πλατυνόμενος. Πρῶτον μὲν οὖν λέγεται ἐγκεκολπῶσθαι ἐν δεξιᾷ εἰσπλέοντι τὰς Ἡρακλείους στήλας, διχῶς, εἰς τὰς καλουμένας Σύρτεις, ὧν τὴν μὲν Μεγάλην, τὴν δὲ Μικρὰν, καλοῦσιν· ἐπὶ θάτερα δὲ οὐκέτι ὁμοίως ἀποκολπούμενος τρία ποιεῖ πελάγη, τό τε Σαρδόνιον καὶ τὸ Γαλατικὸν λεγόμενον καὶ Ἀδρίαν, ἑξῆς δὲ τούτων ἐγκάρσιον τὸ Σικελικόν, μετὰ δὲ τοῦτο τὸ Κρητικόν, συνεχὲς δὲ αὐτοῦ, τῇ μὲν τὸ Αἰγύπτιόν τε καὶ Παμφύλιον καὶ Σύριον, τῇ δὲ τὸ Αἰγαῖόν τε καὶ Μυρτῷον. Ἀντιπαρήκει δὲ τοῖς εἰρημένοις πολυμερέστατος ὢν ὁ Πόντος, οὗ τὸ μὲν μυχαίτατον Μαιῶτις καλεῖται, τὸ δὲ ἔξω πρὸς τὸν Ἑλλήσποντον συνανεστόμωται τῇ καλουμένῃ Προποντίδι. Πρός γε μὴν ταῖς ἀνασχέσεσι τοῦ ἡλίου πάλιν εἰσρέων ὁ Ὠκεανός, τὸν Ἰνδικόν τε καὶ Περσικὸν διανοίξας κόλπον, ἀναφαίνει συνεχῆ τὴν Ἐρυθρὰν θάλασσαν διειληφώς. Ἐπὶ θάτερον δὲ κέρας κατὰ στενόν τε καὶ ἐπιμήκη διήκων αὐχένα, πάλιν ἀνευρύνεται, τὴν Ὑρκανίαν τε καὶ Κασπίαν ὁρίζων· τὸ δὲ ὑπὲρ ταύτην βαθὺν ἔχει τὸν ὑπὲρ τὴν Μαιῶτιν λίμνην τόπον. Εἶτα κατ’ ὀλίγον ὑπὲρ τοὺς Σκύθας τε καὶ Κελτικὴν σφίγγει τὴν οἰκουμένην πρός τε τὸν Γαλατικὸν κόλπον καὶ τὰς προειρημένας Ἡρακλείους στήλας, ὧν ἔξω περιρρέει τὴν γῆν ὁ Ὠκεανός. Ἐν τούτῳ γε μὴν νῆσοι μέγισται τυγχάνουσιν οὖσαι δύο, Βρεττανικαὶ λεγόμεναι, Ἀλβίων καὶ Ἰέρνη, τῶν προϊστορημένων μείζους, ὑπὲρ τοὺς Κελτοὺς κείμεναι. Τούτων δὲ οὐκ ἐλάττους ἥ τε Ταπροβάνη πέραν Ἰνδῶν, λοξὴ πρὸς τὴν οἰκουμένην, καὶ ἡ †Φεβὸλ καλουμένη, κατὰ τὸν Ἀραβικὸν κειμένη κόλπον. Οὐκ ὀλίγαι δὲ ἄλλαι μικραὶ περὶ τὰς Βρεττανικὰς καὶ τὴν Ἰβηρίαν κύκλῳ περιεστεφάνωνται τὴν οἰκουμένην ταύτην, ἣν δὴ νῆσον εἰρήκαμεν· ἧς πλάτος μέν ἐστι κατὰ τὸ βαθύτατον τῆς ἠπείρου βραχὺ ἀποδέον τετρακισμυρίων σταδίων, ὥς φασιν οἱ εὖ γεωγραφήσαντες, μῆκος δὲ περὶ ἑπτακισμυρίους μάλιστα. Διαιρεῖται δὲ εἴς τε Εὐρώπην καὶ Ἀσίαν καὶ Λιβύην.

Εὐρώπη μὲν οὖν ἐστιν ἧς ὅροι κύκλῳ στῆλαί τε Ἡρακλέους καὶ μυχοὶ Πόντου θάλαττά τε Ὑρκανία, καθ’ ἣν στενότατος ἰσθμὸς εἰς τὸν Πόντον διήκει· τινὲς δὲ ἀντὶ τοῦ ἰσθμοῦ Τάναϊν ποταμὸν εἰρήκασιν. Ἀσία δέ ἐστι τὸ ἀπὸ τοῦ εἰρημένου ἰσθμοῦ τοῦ τε Πόντου καὶ τῆς Ὑρκανίας θαλάσσης μέχρι θατέρου ἰσθμοῦ, ὃς μεταξὺ κεῖται τοῦ τε Ἀραβικοῦ κόλπου καὶ τῆς ἔσω θαλάσσης, περιεχόμενος ὑπό τε ταύτης καὶ τοῦ πέριξ Ὠκεανοῦ· τινὲς δὲ ἀπὸ Τανάϊδος μέχρι Νείλου στομάτων τὸν τῆς Ἀσίας τίθενται ὅρον. Λιβύη δὲ τὸ ἀπὸ τοῦ Ἀραβικοῦ ἰσθμοῦ ἕως Ἡρακλέους στηλῶν. Οἱ δὲ ἀπὸ τοῦ Νείλου φασὶν ἕως ἐκείνων. Τὴν δὲ Αἴγυπτον, ὑπὸ τῶν τοῦ Νείλου στομάτων περιρρεομένην, οἱ μὲν τῇ Ἀσίᾳ, οἱ δὲ τῇ Λιβύῃ προσάπτουσι, καὶ τὰς νήσους οἱ μὲν ἐξαιρέτους ποιοῦσιν, οἱ δὲ προσνέμουσι ταῖς γείτοσιν ἀεὶ μοίραις. Γῆς μὲν δὴ καὶ θαλάττης φύσιν καὶ θέσιν, ἥντινα καλεῖν εἰώθαμεν οἰκουμένην, τοιάνδε τινὰ ἱστορήκαμεν.

Περὶ δὲ τῶν ἀξιολογωτάτων ἐν αὐτῇ καὶ περὶ αὐτὴν παθῶν νῦν λέγωμεν, αὐτὰ τὰ ἀναγκαῖα κεφαλαιούμενοι. Δύο γὰρ δή τινες ἀπ’ αὐτῆς ἀναθυμιάσεις ἀναφέρονται συνεχῶς εἰς τὸν ὑπὲρ ἡμᾶς ἀέρα, λεπτομερεῖς καὶ ἀόρατοι παντάπασιν, εἰ [τι] μὴ κατὰ τὰς ἑῴας ἔστιν ὅτε ἀπὸ ποταμῶν τε καὶ ναμάτων ἀναφερόμεναι θεωροῦνται. Τούτων δὲ ἡ μέν ἐστι ξηρὰ καὶ καπνώδης, ἀπὸ τῆς γῆς ἀπορρέουσα, ἡ δὲ νοτερὰ καὶ ἀτμώδης, ἀπὸ τῆς ὑγρᾶς ἀναθυμιωμένη φύσεως. Γίνονται δὲ ἀπὸ μὲν ταύτης ὁμίχλαι καὶ δρόσοι καὶ πάγων ἰδέαι νέφη τε καὶ ὄμβροι καὶ χιόνες καὶ χάλαζαι, ἀπὸ δὲ τῆς ξηρᾶς ἄνεμοί τε καὶ πνευμάτων διαφοραὶ βρονταί τε καὶ ἀστραπαὶ καὶ πρηστῆρες καὶ κεραυνοὶ καὶ τὰ ἄλλα ἃ δὴ τούτοις ἐστὶ σύμφυλα. Ἔστι δὲ ὁμίχλη μὲν ἀτμώδης ἀναθυμίασις ἄγονος ὕδατος, ἀέρος μὲν παχυτέρα, νέφους δὲ ἀραιοτέρα· γίνεται δὲ ἤτοι ἐξ ἀρχῆς νέφους ἢ ἐξ ὑπολείμματος. Ἀντίπαλος δὲ αὐτῇ λέγεταί τε καὶ ἔστιν αἰθρία, οὐδὲν ἄλλο οὖσα πλὴν ἀὴρ ἀνέφελος καὶ ἀνόμιχλος. Δρόσος δέ ἐστιν ὑγρὸν ἐξ αἰθρίας κατὰ σύστασιν λεπτὴν φερόμενον, κρύσταλλος δὲ ἀθρόον ὕδωρ ἐξ αἰθρίας πεπηγός, πάχνη δὲ δρόσος πεπηγυῖα, δροσοπάχνη δὲ ἡμιπαγὴς δρόσος. Νέφος δέ ἐστι πάχος ἀτμῶδες συνεστραμμένον, γόνιμον ὕδατος· ὄμβρος δὲ γίνεται μὲν κατ’ ἐκπιεσμὸν νέφους εὖ μάλα πεπαχυσμένου, διαφορὰς δὲ ἴσχει τοσάσδε ὅσας καὶ ἡ τοῦ νέφους θλῖψις· ἠπία μὲν γὰρ οὖσα μαλακὰς ψεκάδας διασπείρει, σφοδρὰ δὲ ἁδροτέρας· καὶ τοῦτο καλοῦμεν ὑετὸν, ὄμβρου μείζω καὶ συνεχῆ συστρέμματα ἐπὶ γῆς φερόμενον. Χιὼν δὲ γίνεται κατὰ νεφῶν πεπυκνωμένων ἀπόθραυσιν πρὸ τῆς εἰς ὕδωρ μεταβολῆς ἀνακοπέντων·

ἐργάζεται δὲ ἡ μὲν κοπὴ τὸ ἀφρῶδες καὶ ἔκλευκον, ἡ δὲ σύμπηξις τοῦ ἐνόντος ὑγροῦ τὴν ψυχρότητα οὔπω χυθέντος οὐδὲ ἠραιωμένου. Σφοδρὰ δὲ αὔτη καὶ ἀθρόα καταφερομένη νιφετὸς ὠνόμασται. Χάλαζα δὲ γίνεται νιφετοῦ συστραφέντος καὶ βρῖθος ἐκ πιλήματος εἰς καταφορὰν ταχυτέραν λαβόντος· παρὰ δὲ τὰ μεγέθη τῶν ἀπορρηγνυμένων θραυσμάτων οἵ τε ὄγκοι μείζους αἵ τε φοραὶ γίνονται βιαιότεραι. Ταῦτα μὲν οὖν ἐκ τῆς ὑγρᾶς ἀναθυμιάσεως πέφυκε συμπίπτειν.

Ἐκ δὲ τῆς ξηρᾶς ὑπὸ ψύχους μὲν ὠσθείσης ὥστε ῥεῖν ἄνεμος ἐγένετο· οὐδὲν γάρ ἐστιν οὗτος πλὴν ἀὴρ πολὺς ῥέων καὶ ἀθρόος· ὅστις ἅμα καὶ πνεῦμα λέγεται. Λέγεται δὲ καὶ ἑτέρως πνεῦμα ἥ τε ἐν φυτοῖς καὶ ζῴοις καὶ διὰ πάντων διήκουσα ἔμψυχός τε καὶ γόνιμος οὐσία, περὶ ἧς νῦν λέγειν οὐκ ἀναγκαῖον. Τὰ δὲ ἐν ἀέρι πνέοντα πνεύματα καλοῦμεν ἀνέμους, αὔρας δὲ τὰς ἐξ ὑγροῦ φερομένας ἐκπνοάς. Τῶν δὲ ἀνέμων οἱ μὲν ἐκ νενοτισμένης γῆς πνέοντες ἀπόγειοι λέγονται, οἱ δὲ ἐκ κόλπων διεξᾴττοντες ἐγκολπίαι· τούτοις δὲ ἀνάλογόν τι ἔχουσιν οἱ ἐκ ποταμῶν καὶ λιμνῶν. Οἱ δὲ κατὰ ῥῆξιν νέφους γινόμενοι καὶ ἀνάλυσιν τοῦ πάχους εἰς ἑαυτοὺς ποιούμενοι ἐκνεφίαι καλοῦνται· μεθ’ ὕδατος δὲ ἀθρόον ῥαγέντες ἐξυδρίαι λέγονται. Καὶ οἱ μὲν ἀπὸ ἀνατολῆς συνεχεῖς εὖροι κέκληνται, βορέαι δὲ οἱ ἀπὸ ἄρκτου, ζέφυροι δὲ οἱ ἀπὸ δύσεως, νότοι δὲ οἱ ἀπὸ μεσημβρίας. Τῶν γε μὴν εὔρων καικίας μὲν λέγεται ὁ ἀπὸ τοῦ περὶ τὰς θερινὰς ἀνατολὰς τόπου πνέων ἄνεμος, ἀπηλιώτης δὲ ὁ ἀπὸ τοῦ περὶ τὰς ἰσημερινάς, εὖρος δὲ ὁ ἀπὸ τοῦ περὶ τὰς χειμερινάς. Καὶ τῶν ἐναντίων ζεφύρων ἀργέστης μὲν ὁ ἀπὸ τῆς θερινῆς δύσεως, ὅν τινες καλοῦσιν ὀλυμπίαν, οἱ δὲ ἰάπυγα· ζέφυρος δὲ ὁ ἀπὸ τῆς ἰσημερινῆς, λὶψ δὲ ὁ ἀπὸ τῆς χειμερινῆς. Καὶ τῶν βορεῶν ἰδίως ὁ μὲν ἑξῆς τῷ καικίᾳ καλεῖται βορέας, ἀπαρκτίας δὲ ὁ ἐφεξῆς ἀπὸ τοῦ πόλου κατὰ τὸ μεσημβρινὸν πνέων, θρασκίας δὲ ὁ ἑξῆς πνέων τῷ ἀργέστῃ, ὃν ἔνιοι κιρκίαν καλοῦσιν. Καὶ τῶν νότων ὁ μὲν ἀπὸ τοῦ ἀφανοῦς πόλου φερόμενος ἀντίπαλος τῷ ἀπαρκτίᾳ καλεῖται νότος, εὐρόνοτος δὲ ὁ μεταξὺ νότου καὶ εὔρου· τὸν δὲ ἐπὶ θάτερα μεταξὺ λιβὸς καὶ νότου οἱ μὲν λιβόνοτον, οἱ δὲ λιβοφοίνικα, καλοῦσιν. Τῶν δὲ ἀνέμων οἱ μέν εἰσιν εὐθύπνοοι, ὁπόσοι διεκπνέουσι πρόσω κατ’ εὐθεῖαν, οἱ δὲ ἀνακαμψίπνοοι, καθάπερ ὁ καικίας λεγόμενος, καὶ οἱ μὲν χειμῶνος, ὥσπερ οἱ νότοι, δυναστεύοντες, οἱ δὲ θέρους, ὡς οἱ ἐτησίαι λεγόμενοι, μῖξιν ἔχοντες τῶν τε ἀπὸ τῆς ἄρκτου φερομένων καὶ ζεφύρων· οἱ δὲ ὀρνιθίαι καλούμενοι, ἐαρινοί τινες ὄντες ἄνεμοι, βορέαι εἰσὶ τῷ γένει. Τῶν γε μὴν βιαίων πνευμάτων καταιγὶς μέν ἐστι πνεῦμα ἄνωθεν τύπτον ἐξαίφνης, θύελλα δὲ πνεῦμα βίαιον καὶ ἄφνω προσαλλόμενον, λαῖλαψ δὲ καὶ στρόβιλος πνεῦμα εἱλούμενον κάτωθεν ἄνω, ἀναφύσημα δὲ γῆς πνεῦμα ἄνω φερόμενον κατὰ τὴν ἐκ βυθοῦ τινος ἢ ῥήγματος ἀνάδοσιν· ὅταν δὲ εἱλούμενον πολὺ φέρηται, πρηστὴρ χθόνιός ἐστιν. Εἱληθὲν δὲ πνεῦμα ἐν νέφει παχεῖ τε καὶ νοτερῷ, καὶ ἐξωσθὲν δι᾽ αὐτοῦ, βιαίως ῥηγνύον τὰ συνεχῆ πιλήματα τοῦ νέφους, βρόμον καὶ πάταγον μέγαν ἀπειργάσατο, ‹ὃς› βροντὴ λέγεται, ὥσπερ ἐν ὕδατι πνεῦμα σφοδρῶς ἐλαυνόμενον. Κατὰ δὲ τὴν τοῦ νέφους ἔκρηξιν πυρωθὲν τὸ πνεῦμα καὶ λάμψαν ἀστραπὴ λέγεται· ὃ δὴ πρότερον τῆς βροντῆς προσέπεσεν, ὕστερον γενόμενον, ἐπεὶ τὸ ἀκουστὸν ὑπὸ τοῦ ὁρατοῦ πέφυκε φθάνεσθαι, τοῦ μὲν καὶ πόρρωθεν ὁρωμένου, τοῦ δὲ ἐπειδὰν ἐμπελάσῃ τῇ ἀκοῇ, καὶ μάλιστα ὅταν τὸ μὲν τάχιστον ᾖ τῶν ὄντων, λέγω δὲ τὸ πυρῶδες, τὸ δὲ ἧττον ταχύ, ἀερῶδες ὄν, ἐν τῇ πλήξει πρὸς ἀκοὴν ἀφικνούμενον. Τὸ δὲ ἀστράψαν ἀναπυρωθέν, βιαίως ἄχρι τῆς γῆς διεκθέον, κεραυνὸς καλεῖται, ἐὰν δὲ ἡμίπυρον ᾖ, σφοδρὸν δὲ ἄλλως καὶ ἀθρόον, πρηστήρ, ἐὰν δὲ ἄπυρον παντελῶς, τυφών· ἕκαστον δὲ τούτων κατασκῆψαν εἰς τὴν γῆν σκηπτὸς ὀνομάζεται. Τῶν δὲ κεραυνῶν οἱ μὲν αἰθαλώδεις ψολόεντες λέγονται, οἱ δὲ ταχέως διᾴττοντες ἀργῆτες, ἑλικίαι δὲ οἱ γραμμοειδῶς φερόμενοι, σκηπτοὶ δὲ ὅσοι κατασκήπτουσιν εἰς τὴν γῆν. Συλλήβδην δὲ τῶν ἐν ἀέρι φαντασμάτων τὰ μέν ἐστι κατ᾽ ἔμφασιν, τὰ δὲ καθ᾽ ὑπόστασιν - κατ᾽ ἔμφασιν μὲν ἴριδες καὶ ῥάβδοι καὶ τὰ τοιαῦτα, καθ᾽ ὑπόστασιν δὲ σέλα τε καὶ διᾴττοντες καὶ κομῆται καὶ τὰ τούτοις παραπλήσια. Ἶρις μὲν οὖν ἐστιν ἔμφασις ἡλίου τμήματος ἢ σελήνης, ἐν νέφει νοτερῷ καὶ κοίλῳ καὶ συνεχεῖ πρὸς φαντασίαν, ὡς ἐν κατόπτρῳ, θεωρουμένη κατὰ κύκλου περιφέρειαν. Ῥάβδος δέ ἐστιν ἴριδος ἔμφασις εὐθεῖα. Ἅλως δέ ἐστιν ἔμφασις λαμπρότητος ἄστρου περίαυγος· διαφέρει δὲ ἴριδος ὅτι ἡ μὲν ἶρις ἐξ ἐναντίας φαίνεται ἡλίου καὶ σελήνης, ἡ δὲ ἅλως κύκλῳ παντὸς ἄστρου. Σέλας δέ ἐστι πυρὸς ἀθρόου ἔξαψις ἐν ἀέρι. Τῶν δὲ σελάων ἃ μὲν ἀκοντίζεται, ἃ δὲ στηρίζεται. Ὁ μὲν οὖν ἐξακοντισμός ἐστι πυρὸς γένεσις ἐκ παρατρίψεως ἐν ἀέρι φερομένου ταχέως καὶ φαντασίαν μήκους ἐμφαίνοντος διὰ τὸ τάχος, ὁ δὲ στηριγμός ἐστι χωρὶς φορᾶς προμήκης ἔκτασις καὶ οἷον ἄστρου ῥύσις· πλατυνομένη δὲ κατὰ θάτερον κομήτης καλεῖται. Πολλάκις δὲ τῶν σελάων τὰ μὲν ἐπιμένει πλείονα χρόνον, τὰ δὲ παραχρῆμα σβέννυται. Πολλαὶ δὲ καὶ ἄλλαι φαντασμάτων ἰδέαι θεωροῦνται, λαμπάδες τε καλούμεναι καὶ δοκίδες καὶ πίθοι καὶ βόθυνοι, κατὰ τὴν πρὸς ταῦτα ὁμοιότητα ὧδε προσαγορευθεῖσαι. Καὶ τὰ μὲν τούτων ἑσπέρια, τὰ δὲ ἑῷα, τὰ δὲ ἀμφιφανῆ θεωρεῖται, σπανίως δὲ βόρεια καὶ νότια. Πάντα δὲ ἀβέβαια· οὐδέποτε γάρ τι τούτων ἀεὶ φανερὸν ἱστόρηται κατεστηριγμένον. Τὰ μὲν τοίνυν ἀέρια τοιαῦτα.

Ἐμπεριέχει δὲ καὶ ἡ γῆ πολλὰς ἐν αὑτῇ, καθάπερ ὕδατος, οὕτως καὶ πνεύματος καὶ πυρὸς πηγάς· Τούτων δὲ αἱ μὲν ὑπὸ γῆν εἰσιν ἀόρατοι, πολλαὶ δὲ ἀναπνοὰς ἔχουσι καὶ ἀναφυσήσεις, ὥσπερ Λιπάρα τε καὶ Αἴτνη καὶ αἱ ἐν Αἰόλου νήσοις· αἳ δὴ καὶ ῥέουσι πολλάκις ποταμοῦ δίκην, καὶ μύδρους ἀναρριπτοῦσι διαπύρους. Ἔνιαι δὲ ὑπὸ γῆν οὖσαι πλησίον πηγαίων ὑδάτων θερμαίνουσι ταῦτα, καὶ τὰ μὲν χλιαρὰ τῶν ναμάτων ἀνιᾶσι, τὰ δὲ ὑπέρζεστα, τὰ δὲ εὖ ἔχοντα κράσεως. Ὁμοίως δὲ καὶ τῶν πνευμάτων πολλὰ πολλαχοῦ γῆς στόμια ἀνέῳκται· ὧν τὰ μὲν ἐνθουσιᾶν ποιεῖ τοὺς ἐμπελάζοντας, τὰ δὲ ἀτροφεῖν, τὰ δὲ χρησμῳδεῖν, ὥσπερ τὰ ἐν Δελφοῖς καὶ Λεβαδείᾳ, τὰ δὲ καὶ παντάπασιν ἀναιρεῖ, καθάπερ τὸ ἐν Φρυγίᾳ. Πολλάκις δὲ καὶ συγγενὲς πνεῦμα εὔκρατον ἐν γῇ παρεξωσθὲν εἰς μυχίους σήραγγας αὐτῆς, ἔξεδρον γενόμενον ἐκ τῶν οἰκείων τόπων, πολλὰ μέρη συνεκράδανεν. Πολλάκις δὲ πολὺ γενόμενον ἔξωθεν ἐγκατειλήθη τοῖς ταύτης κοιλώμασι καὶ ἀποκλεισθὲν [ἐξόδου] μετὰ βίας αὐτὴν συνετίναξε, ζητοῦν ἔξοδον ἑαυτῷ, καὶ ἀπειργάσατο πάθος τοῦτο ὃ καλεῖν εἰώθαμεν σεισμόν. Τῶν δὲ σεισμῶν οἱ μὲν εἰς πλάγια σείοντες κατ’ ὀξείας γωνίας ἐπικλίνται καλοῦνται, οἱ δὲ ἄνω ῥιπτοῦντες καὶ κάτω κατ’ ὀρθὰς γωνίας βράσται, οἱ δὲ συνιζήσεις ποιοῦντες εἰς τὰ κοῖλα ἱζηματίαι· οἱ δὲ χάσματα ἀνοίγοντες καὶ τὴν γῆν ἀναρρηγνύντες ῥῆκται καλοῦνται. Τούτων δὲ οἱ μὲν καὶ πνεῦμα προσαναβάλλουσιν, οἱ δὲ πέτρας, οἱ δὲ πηλόν, οἱ δὲ πηγὰς φαίνουσι τὰς πρότερον οὐκ οὔσας. Τινὲς δὲ ἀνατρέπουσι κατὰ μίαν πρόωσιν, οὓς καλοῦσιν ὤστας. Οἱ δὲ ἀνταποπάλλοντες καὶ ταῖς εἰς ἑκάτερον ἐγκλίσεσι καὶ ἀποπάλσεσι διορθοῦντες ἀεὶ τὸ σειόμενον παλματίαι λέγονται, τρόμῳ πάθος ὅμοιον ἀπεργαζόμενοι. Γίνονται δὲ καὶ μυκηταὶ σεισμοί, σείοντες τὴν γῆν μετὰ βρόμου. Πολλάκις δὲ καὶ χωρὶς σεισμοῦ γίνεται μύκημα γῆς, ὅταν τὸ πνεῦμα σείειν μὲν μὴ αὔταρκες ᾖ, ἐνειλούμενον δὲ ἐν αὐτῇ κόπτηται μετὰ ῥοθίου βίας. Συσσωματοποιεῖται δὲ τὰ εἰσιόντα πνεύματα καὶ ὑπὸ τῶν ἐν τῇ γῇ ὑγρῶν κεκρυμμένων.

Τὰ δὲ ἀνάλογον συμπίπτει [τούτοις] καὶ ἐν θαλάσσῃ· χάσματά τε γὰρ γίνεται θαλάσσης καὶ ἀναχωρήματα πολλάκις καὶ κυμάτων ἐπιδρομαί, ποτὲ μὲν ἀντανακοπὴν ἔχουσαι, ποτὲ δὲ πρόωσιν μόνον, ὥσπερ ἱστορεῖται περὶ Ἑλίκην τε καὶ Βοῦραν. Πολλάκις δὲ καὶ ἀναφυσήματα γίνεται πυρὸς ἐν τῇ θαλάσσῃ καὶ πηγῶν ἀναβλύσεις καὶ ποταμῶν ἐκβολαὶ καὶ δένδρων ἐκφύσεις ῥοαί τε καὶ δῖναι ταῖς τῶν πνευμάτων ἀνάλογον, αἱ μὲν ἐν μέσοις πελάγεσιν, αἱ δὲ κατὰ τοὺς εὐρίπους τε καὶ πορθμούς. Πολλαί τε ἀμπώτεις λέγονται καὶ κυμάτων ἄρσεις συμπεριοδεύειν ἀεὶ τῇ σελήνῃ κατά τινας ὡρισμένους καιρούς. Ὡς δὲ τὸ πᾶν εἰπεῖν, τῶν στοιχείων ἐγκεκραμένων ἀλλήλοις ἐν ἀέρι τε καὶ γῇ καὶ θαλάσσῃ κατὰ τὸ εἰκὸς αἱ τῶν παθῶν ὁμοιότητες συνίστανται, τοῖς μὲν ἐπὶ μέρους φθορὰς καὶ γενέσεις φέρουσαι, τὸ δὲ σύμπαν ἀνώλεθρόν τε καὶ ἀγένητον φυλάττουσαι.

Καίτοι γέ τις ἐθαύμασε πῶς ποτε, ἐκ τῶν ἐναντίων ἀρχῶν συνεστηκὼς ὁ κόσμος, λέγω δὲ ξηρῶν τε καὶ ὑγρῶν, ψυχρῶν τε καὶ θερμῶν, οὐ πάλαι διέφθαρται καὶ ἀπόλωλεν, ὡς κἂν εἰ πόλιν τινὲς θαυμάζοιεν, ὅπως διαμένει συνεστηκυῖα ἐκ τῶν ἐναντιωτάτων ἐθνῶν, πενήτων λέγω καὶ πλουσίων, νέων γερόντων, ἀσθενῶν ἰσχυρῶν, πονηρῶν χρηστῶν. Ἀγνοοῦσι δὲ ὅτι τοῦτ’ ἦν πολιτικῆς ὁμονοίας τὸ θαυμασιώτατον, λέγω δὲ τὸ ἐκ πολλῶν μίαν καὶ ὁμοίαν ἐξ ἀνομοίων ἀποτελεῖν διάθεσιν ὑποδεχομένην πᾶσαν καὶ φύσιν καὶ τύχην. Ἴσως δὲ τῶν ἐναντίων ἡ φύσις γλίχεται καὶ ἐκ τούτων ἀποτελεῖ τὸ σύμφωνον, οὐκ ἐκ τῶν ὁμοίων, ὥσπερ ἀμέλει τὸ ἄρρεν συνήγαγε πρὸς τὸ θῆλυ καὶ οὐχ ἑκάτερον πρὸς τὸ ὁμόφυλον, καὶ τὴν πρώτην ὁμόνοιαν διὰ τῶν ἐναντίων σηνῆψεν, οὐ διὰ τῶν ὁμοίων. Ἔοικε δὲ καὶ ἡ τέχνη τὴν φύσιν μιμουμένη τοῦτο ποιεῖν. Ζωγραφία μὲν γὰρ λευκῶν τε καὶ μελάνων, ὠχρῶν τε καὶ ἐρυθρῶν, χρωμάτων ἐγκερασαμένη φύσεις τὰς εἰκόνας τοῖς προηγουμένοις ἀπετέλεσε συμφώνους, μουσικὴ δὲ ὀξεῖς ἅμα καὶ βαρεῖς, μακρούς τε καὶ βραχεῖς, φθόγγους μίξασα ἐν διαφόροις φωναῖς μίαν ἀπετέλεσεν ἁρμονίαν, γραμματικὴ δὲ ἐκ φωνηέντων καὶ ἀφώνων γραμμάτων κρᾶσιν ποιησαμένη τὴν ὅλην τέχνην ἀπ’ αὐτῶν συνεστήσατο. Ταὐτὸ δὲ τοῦτο ἦν καὶ τὸ παρὰ τῷ σκοτεινῷ λεγόμενον Ἡρακλείτῳ· “Συλλάψιες ὅλα καὶ οὐχ ὅλα, συμφερόμενον διαφερόμενον, συνᾷδον διᾷδον· ἐκ πάντων ἓν καὶ ἐξ ἑνὸς πάντα.” Οὕτως οὖν καὶ τὴν τῶν ὅλων σύστασιν, οὐρανοῦ λέγω καὶ γῆς τοῦ τε σύμπαντος κόσμου, διὰ τῆς τῶν ἐναντιωτάτων κράσεως ἀρχῶν μία διεκόσμησεν ἁρμονία· ξηρὸν γὰρ ὑγρῷ, θερμὸν δὲ ψυχρῷ, βαρεῖ τε κοῦφον μιγέν, καὶ ὀρθὸν περιφερεῖ, γῆν τε πᾶσαν καὶ θάλασσαν αἰθέρα τε καὶ ἥλιον καὶ σελήνην καὶ τὸν ὅλον οὐρανὸν διεκόσμησε μία [ἡ] διὰ πάντων διήκουσα δύναμις, ἐκ τῶν ἀμίκτων καὶ ἑτεροίων, ἀέρος τε καὶ γῆς καὶ πυρὸς καὶ ὕδατος, τὸν σύμπαντα κόσμον δημιουργήσασα καὶ μιᾷ διαλαβοῦσα σφαίρας ἐπιφανείᾳ τάς τε ἐναντιωτάτας ἐν αὐτῷ φύσεις ἀλλήλαις ἀναγκάσασα ὁμολογῆσαι καὶ ἐκ τούτων μηχανησαμένη τῷ παντὶ σωτηρίαν. Αἰτία δὲ ταύτης μὲν ἡ τῶν στοιχείων ὁμολογία, τῆς δὲ ὁμολογίας ἡ ἰσομοιρία καὶ τὸ μηδὲν αὐτῶν πλέον ἕτερον ἑτέρου δύνασθαι· τὴν γὰρ ἴσην ἀντίστασιν ἔχει τὰ βαρέα πρὸς τὰ κοῦφα καὶ τὰ θερμὰ πρὸς θάτερα, τῆς φύσεως ἐπὶ τῶν μειζόνων διδασκούσης ὅτι τὸ ἴσον σωστικόν πώς ἐστιν ὁμονοίας, ἡ δὲ ὁμόνοια τοῦ πάντων γενετῆρος καὶ περικαλλεστάτου κόσμου. Τίς γὰρ ἂν εἴη φύσις τοῦδε κρείττων; ἣν γὰρ ἂν εἴπῃ τις, μέρος ἐστὶν αὐτοῦ. Τό τε καλὸν πᾶν ἐπώνυμόν ἐστι τούτου καὶ τὸ τεταγμένον, ἀπὸ τοῦ κόσμου λεγόμενον κεκοσμῆσθαι. Τί δὲ τῶν ἐπὶ μέρους δύναιτ' ἂν ἐξισωθῆναι τῇ κατ' οὐρανὸν τάξει τε καὶ φορᾷ τῶν ἄστρων ἡλίου τε καὶ σελήνης, κινουμένων ἐν ἀκριβεστάτοις μέτροις ἐξ αἰῶνος εἰς ἕτερον αἰῶνα; τίς δὲ γένοιτ' ἂν ἀψεύδεια τοιάδε, ἥντινα φυλάττουσιν αἱ καλαὶ καὶ γόνιμοι τῶν ὅλων ὧραι, θέρη τε καὶ χειμῶνας ἐπάγουσαι τεταγμένως ἡμέρας τε καὶ νύκτας εἰς μηνὸς ἀποτέλεσμα καὶ ἐνιαυτοῦ; καὶ μὴν μεγέθει μὲν οὗτος πανυπέρτατος, κινήσει δὲ ὀξύτατος, λαμπρότητι δὲ εὐαυγέστατος, δυνάμει δὲ ἀγήρως τε καὶ ἄφθαρτος. Οὗτος ἐναλίων ζῴων καὶ πεζῶν καὶ ἀερίων φύσεις ἐχώρισε καὶ βίους ἐμέτρησε ταῖς ἑαυτοῦ κινήσεσιν. Ἐκ τούτου πάντα ἐμπνεῖ τε καὶ ψυχὴν ἴσχει τὰ ζῷα. Τούτου καὶ αἱ παράδοξοι νεοχμώσεις τεταγμένως ἀποτελοῦνται, συναραττόντων μὲν ἀνέμων παντοίων, πιπτόντων δὲ ἐξ οὐρανοῦ κεραυνῶν, ῥηγνυμένων δὲ χειμώνων ἐξαισίων. Διὰ δὲ τούτων τὸ νοτερὸν ἐκπιεζόμενον τό τε πυρῶδες διαπνεόμενον εἰς ὁμόνοιαν ἄγει τὸ πᾶν καὶ καθίστησιν. Ἥ τε γῆ φυτοῖς κομῶσα παντοδαποῖς νάμασί τε περιβλύζουσα καὶ περιοχουμένη ζῴοις, κατὰ καιρὸν ἐκφύουσά τε πάντα καὶ τρέφουσα καὶ δεχομένη, μυρίας τε φέρουσα ἰδέας καὶ πάθη, τὴν ἀγήρω φύσιν ὁμοίως τηρεῖ, καίτοι καὶ σεισμοῖς τινασσομένη καὶ πλημυρίσιν ἐπικλυζομένη πυρκαϊαῖς τε κατὰ μέρος φλογιζομένη. Ταῦτα δὲ πάντα ἔοικεν αὐτῇ πρὸς ἀγαθοῦ γινόμενα τὴν δι' αἰῶνος σωτηρίαν παρέχειν· σειομένης τε γὰρ διεξᾴττουσιν αἱ τῶν πνευμάτων παρεμπτώσεις κατὰ τὰ ῥήγματα τὰς ἀναπνοὰς ἴσχουσαι, καθὼς ἄνω λέλεκται, καθαιρομένη τε ὄμβροις ἀποκλύζεται πάντα τὰ νοσώδη, περιπνεομένη δὲ αὔραις τά τε ὑπ' αὐτὴν καὶ τὰ ὑπὲρ αὐτὴν εἰλικρινεῖται. Καὶ μὴν αἱ φλόγες μὲν τὸ παγετῶδες ἠπιαίνουσιν, οἱ πάγοι δὲ τὰς φλόγας ἀνιᾶσιν. Καὶ τῶν ἐπὶ μέρους τὰ μὲν γίνεται, τὰ δὲ ἀκμάζει, τὰ δὲ φθείρεται. Καὶ αἱ μὲν γενέσεις ἐπαναστέλλουσι τὰς φθοράς, αἱ δὲ φθοραὶ κουφίζουσι τὰς γενέσεις. Μία δὲ ἐκ πάντων περαινομένη σωτηρία διὰ τέλους ἀντιπεριισταμένων ἀλλήλοις καὶ τοτὲ μὲν κρατούντων, τοτὲ δὲ κρατουμένων, φυλάττει τὸ σύμπαν ἄφθαρτον δι' αἰῶνος.

Λοιπὸν δὴ περὶ τῆς τῶν ὅλων συνεκτικῆς αἰτίας κεφαλαιωδῶς εἰπεῖν, ὃν τρόπον καὶ περὶ τῶν ἄλλων· πλημμελὲς γὰρ περὶ κόσμου λέγοντας, εἰ καὶ μὴ δι' ἀκριβείας, ἀλλ' οὖν γε ὡς εἰς τυπώδη μάθησιν, τὸ τοῦ κόσμου κυριώτατον παραλιπεῖν. Ἀρχαῖος μὲν οὖν τις λόγος καὶ πάτριός ἐστι πᾶσιν ἀνθρώποις ὡς ἐκ θεοῦ πάντα καὶ διὰ θεὸν συνέστηκεν, οὐδεμία δὲ φύσις αὐτὴ καθ' ἑαυτήν ἐστιν αὐτάρκης, ἐρημωθεῖσα τῆς ἐκ τούτου σωτηρίας. Διὸ καὶ τῶν παλαιῶν εἰπεῖν τινες προήχθησαν ὅτι πάντα ταῦτά ἐστι θεῶν πλέα τὰ καὶ δι’ ὀφθαλμῶν ἰνδαλλόμενα ἡμῖν καὶ δι’ ἀκοῆς καὶ πάσης αἰσθήσεως, τῇ μὲν θείᾳ δυνάμει πρέποντα καταβαλλόμενοι λόγον, οὐ μὴν τῇ γε οὐσίᾳ. Σωτὴρ μὲν γὰρ ὄντως ἁπάντων ἐστὶ καὶ γενέτωρ τῶν ὁπωσδήποτε κατὰ τόνδε τὸν κόσμον συντελουμένων ὁ θεός, οὐ μὴν αὐτουργοῦ καὶ ἐπιπόνου ζῴου κάματον ὑπομένων, ἀλλὰ δυνάμει χρώμενος ἀτρύτῳ, δι’ ἧς καὶ τῶν πόρρω δοκούντων εἶναι περιγίνεται. Τὴν μὲν οὖν ἀνωτάτω καὶ πρώτην ἕδραν αὐτὸς ἔλαχεν, ὕπατός τε διὰ τοῦτο ὠνόμασται, κατὰ τὸν ποιητὴν “ἀκροτάτῃ κορυφῇ” τοῦ σύμπαντος ἐγκαθιδρυμένος οὐρανοῦ· μάλιστα δέ πως αὐτοῦ τῆς δυνάμεως ἀπολαύει τὸ πλησίον αὐτοῦ σῶμα, καὶ ἔπειτα τὸ μετ’ ἐκεῖνο, καὶ ἐφεξῆς οὕτως ἄχρι τῶν καθ’ ἡμᾶς τόπων. Διὸ γῆ τε καὶ τὰ ἐπὶ γῆς ἔοικεν, ἐν ἀποστάσει πλείστῃ τῆς ἐκ θεοῦ ὄντα ὠφελείας, ἀσθενῆ καὶ ἀκατάλληλα εἶναι καὶ πολλῆς μεστὰ ταραχῆς· οὐ μὴν ἀλλὰ καθ’ ὅσον ἐπὶ πᾶν διικνεῖσθαι πέφυκε τὸ θεῖον, καὶ ἐπὶ τὰ καθ’ ἡμᾶς ὁμοίως συμβαίνει τά τε ὑπὲρ ἡμᾶς, κατὰ τὸ ἔγγιόν τε καὶ πορρωτέρω θεοῦ εἶναι μᾶλλόν τε καὶ ἧττον ὠφελείας μεταλαμβάνοντα. Κρεῖττον οὖν ὑπολαβεῖν, ὃ καὶ πρέπον ἐστὶ καὶ θεῷ μάλιστα ἁρμόζον, ὡς ἡ ἐν οὐρανῷ δύναμις ἱδρυμένη καὶ τοῖς πλεῖστον ἀφεστηκόσιν, ὡς ἕνι γε εἰπεῖν, καὶ σύμπασιν αἴτιος γίνεται σωτηρίας, μᾶλλον ἢ ὡς διήκουσα καὶ φοιτῶσα ἔνθα μὴ καλὸν μηδὲ εὔσχημον αὐτουργεῖ[ν] τὰ ἐπὶ γῆς. Τοῦτο μὲν γὰρ οὐδὲ ἀνθρώπων ἡγεμόσιν ἁρμόττει, παντὶ καὶ τῷ τυχόντι ἐφίστασθαι ἔργῳ, λέγω δὲ οἷον στρατιᾶς ἄρχοντι ἢ πόλεως ἢ οἴκου, [καὶ] εἰ χρεὼν στρωματόδεσμον εἴη δῆσαι καὶ εἴ τι φαυλότερον ἀποτελεῖν ἔργον, ὃ κἂν τὸ τυχὸν ἀνδράποδον ποιήσειεν, ἀλλ’ οἷον ἐπὶ τοῦ μεγάλου βασιλέως ἱστορεῖται. Τὸ ‹γὰρ› Καμβύσου Ξέρξου τε καὶ Δαρείου πρόσχημα εἰς σεμνότητος καὶ ὑπεροχῆς ὕψος μεγαλοπρεπῶς διεκεκόσμητο· αὐτὸς μὲν γάρ, ὡς λόγος, ἵδρυτο ἐν Σούσοις ἢ Ἐκβατάνοις, παντὶ ἀόρατος, θαυμαστὸν ἐπέχων βασίλειον οἶκον καὶ περίβολον χρυσῷ καὶ ἠλέκτρῳ καὶ ἐλέφαντι ἀστράπτοντα· πυλῶνες δὲ πολλοὶ καὶ συνεχεῖς πρόθυρά τε σύχνοις εἰργόμενα σταδίοις ἀπ’ ἀλλήλων θύραις τε χαλκαῖς καὶ τείχεσι μεγάλοις ὠχύρωτο· ἔξω δὲ τούτων ἄνδρες οἱ πρῶτοι καὶ δοκιμώτατοι διεκεκόσμηντο, οἱ μὲν ἀμφ’ αὐτὸν τὸν βασιλέα δορυφόροι τε καὶ θεράποντες, οἱ δὲ ἑκάστου περιβόλου φύλακες, πυλωροί τε καὶ ὠτακουσταὶ λεγόμενοι, ὡς ἂν ὁ βασιλεὺς αὐτός, δεσπότης καὶ θεὸς ὀνομαζόμενος, πάντα μὲν βλέποι, πάντα δὲ ἀκούοι. Χωρὶς δὲ τούτων ἄλλοι καθειστήκεσαν προσόδων ταμίαι καὶ στρατηγοὶ πολέμων καὶ κυνηγεσίων δώρων τε ἀποδεκτῆρες τῶν τε λοιπῶν ἔργων ἕκαστοι κατὰ τὰς χρείας ἐπιμεληταί. Τὴν δὲ σύμπασαν ἀρχὴν τῆς Ἀσίας, περατουμένην

Ἑλλησπόντῳ μὲν ἐκ τῶν πρὸς ἑσπέραν μερῶν, Ἰνδῷ δὲ ἐκ τῶν πρὸς ἕω, διειλήφεσαν κατὰ ἔθνη στρατηγοὶ καὶ σατράπαι καὶ βασιλεῖς, δοῦλοι τοῦ μεγάλου βασιλέως, ἡμεροδρόμοι τε καὶ σκοποὶ καὶ ἀγγελιαφόροι φρυκτωριῶν τε ἐποπτῆρες. Τοσοῦτος δὲ ἦν ὁ κόσμος, καὶ μάλιστα τῶν φρυκτωρ[ι]ῶν, κατὰ διαδοχὰς πυρσευόντων ἀλλήλοις ἐκ περάτων τῆς ἀρχῆς μέχρι Σούσων καὶ Ἐκβατάνων, ὥστε τὸν βασιλέα γινώσκειν αὐθημερὸν πάντα τὰ ἐν τῇ Ἀσίᾳ καινουργούμενα.

Νομιστέον δὴ τὴν τοῦ μεγάλου βασιλέως ὑπεροχὴν πρὸς τὴν τοῦ τὸν κόσμον ἐπέχοντος θεοῦ τοσοῦτον καταδεεστέραν ὅσον τῆς ἐκείνου τὴν τοῦ φαυλοτάτου τε καὶ ἀσθενεστάτου ζῴου, ὥστε, εἴπερ ἄσεμνον ἦν αὐτὸν αὑτῷ δοκεῖν Ξέρξην αὐτουργεῖν ἅπαντα καὶ ἐπιτελεῖν ἃ βούλοιτο καὶ ἐφιστάμενον ‹ἑκασταχοῦ› διοικεῖν, πολὺ μᾶλλον ἀπρεπὲς ἂν εἴη θεῷ. Σεμνότερον δὲ καὶ πρεπωδέστερον αὐτὸν μὲν ἐπὶ τῆς ἀνωτάτω χώρας ἱδρῦσθαι, τὴν δὲ δύναμιν διὰ τοῦ σύμπαντος κόσμου διήκουσαν ἥλιόν τε κινεῖν καὶ σελήνην καὶ τὸν πάντα οὐρανὸν περιάγειν αἴτιόν τε γίνεσθαι τοῖς ἐπὶ τῆς γῆς σωτηρίας. Οὐδὲν γὰρ ἐπιτεχνήσεως δεῖ καὶ ὑπηρεσίας τῆς παρ' ἑτέρων, ὥσπερ τοῖς παρ' ἡμῖν ἄρχουσι τῆς πολυχειρίας διὰ τὴν ἀσθένειαν, ἀλλὰ τοῦτο ἦν τὸ θειότατον, τὸ μετὰ ῥᾳστώνης καὶ ἁπλῆς κινήσεως παντοδαπὰς ἀποτελεῖν ἰδέας, ὥσπερ ἀμέλει δρῶσιν οἱ μηχανοτέχναι, διὰ μιᾶς ὀργάνου σχαστηρίας πολλὰς καὶ ποικίλας ἐνεργείας ἀποτελοῦντες. Ὁμοίως δὲ καὶ οἱ νευροσπάσται μίαν μήρινθον ἐπισπασάμενοι ποιοῦσι καὶ αὐχένα κινεῖσθαι καὶ χεῖρα τοῦ ζῴου καὶ ὦμον καὶ ὀφθαλμόν, ἔστι δὲ ὅτε πάντα τὰ μέρη, μετά τινος εὐρυθμίας. Οὕτως οὖν καὶ ἡ θεία φύσις ἀπό τινος ἁπλῆς κινήσεως τοῦ πρώτου τὴν δύναμιν εἰς τὰ συνεχῆ δίδωσι καὶ ἀπ' ἐκείνων πάλιν εἰς τὰ πορρωτέρω, μέχρις ἂν διὰ τοῦ παντὸς διεξέλθῃ· κινηθὲν γὰρ ἕτερον ὑφ' ἑτέρου καὶ αὐτὸ πάλιν ἐκίνησεν ἄλλο σὺν κόσμῳ, δρώντων μὲν πάντων οἰκείως ταῖς σφετέραις κατασκευαῖς, οὐ τῆς αὐτῆς δὲ ὁδοῦ πᾶσιν οὔσης, ἀλλὰ διαφόρου καὶ ἑτεροίας, ἔστι δὲ οἷς καὶ ἐναντίας, καίτοι τῆς πρώτης οἷον ἐνδόσεως εἰς κίνησιν μιᾶς γενομένης· ὥσπερ ἂν εἴ τις ἐξ ἄγγους ὁμοῦ ῥίψειε σφαῖραν καὶ κύβον καὶ κῶνον καὶ κύλινδρον - ἕκαστον γὰρ αὐτῶν κατὰ τὸ ἴδιον κινηθήσεται σχῆμα - ἢ εἴ τις ὁμοῦ ζῷον ἔνυδρόν τε καὶ χερσαῖον καὶ πτηνὸν ἐν τοῖς κόλποις ἔχων ἐκβάλοι· δῆλον γὰρ ὅτι τὸ μὲν νηκτὸν ἁλόμενον εἰς τὴν ἑαυτοῦ δίαιταν ἐκνήξεται, τὸ δὲ χερσαῖον εἰς τὰ σφέτερα ἤθη καὶ νομοὺς διεξερπύσει, τὸ δὲ ἀέριον ἐξαρθὲν ἐκ γῆς μετάρσιον οἰχήσεται πετόμενον, μιᾶς τῆς πρώτης αἰτίας πᾶσιν ἀποδούσης τὴν οἰκείαν εὐμάρειαν. Οὕτως καὶ ἐπὶ κόσμου· διὰ γὰρ ἁπλῆς τοῦ σύμπαντος οὐρανοῦ περιαγωγῆς ἡμέρᾳ καὶ νυκτὶ περατουμένης ἀλλοῖαι πάντων διέξοδοι γίνονται, καίτοι ὑπὸ μιᾶς σφαίρας περιεχομένων, τῶν μὲν θᾶττον, τῶν δὲ σχολαιότερον κινουμένων παρά τε τὰ τῶν διαστημάτων μήκη καὶ τὰς ἰδίας ἑκάστων κατασκευάς. Σελήνη μὲν γὰρ ἐν μηνὶ τὸν ἑαυτῆς διαπεραίνεται κύκλον αὐξομένη τε καὶ μειουμένη καὶ φθίνουσα, ἥλιος δὲ ἐν ἐνιαυτῷ καὶ οἱ τούτου ἰσόδρομοι, ὅ τε Φωσφόρος καὶ ὁ Ἑρμοῦ λεγόμενος, ὁ δὲ Πυρόεις ἐν διπλασίονι τούτων χρόνῳ, ὁ δὲ Διὸς ἐν ἑξαπλασίονι τούτου, καὶ τελευταῖος ὁ Κρόνου λεγόμενος ἐν διπλασίονι καὶ ἡμίσει τοῦ ὑποκάτω. Μία δὲ ἐκ πάντων ἁρμονία συναδόντων καὶ χορευόντων κατὰ τὸν οὐρανὸν ἐξ ἑνός τε γίνεται καὶ εἰς ἓν ἀπολήγει, κόσμον ἐτύμως τὸ σύμπαν ἀλλ’ οὐκ ἀκοσμίαν ὀνομάσασα. Καθάπερ δὲ ἐν χορῷ κορυφαίου κατάρξαντος συνεπηχεῖ πᾶς ὁ χορὸς ἀνδρῶν, ἔσθ’ ὅτε καὶ γυναικῶν, ἐν διαφόροις φωναῖς ὀξυτέραις καὶ βαρυτέραις μίαν ἁρμονίαν ἐμμελῆ κεραννύντων, οὕτως ἔχει καὶ ἐπὶ τοῦ τὸ σύμπαν διέποντος θεοῦ· κατὰ γὰρ τὸ ἄνωθεν ἐνδόσιμον ὑπὸ τοῦ φερωνύμως ἂν κορυφαίου προσαγορευθέντος κινεῖται μὲν τὰ ἄστρα ἀεὶ καὶ ὁ σύμπας οὐρανός, πορεύεται δὲ διττὰς πορείας ὁ παμφαὴς ἥλιος, τῇ μὲν ἡμέραν καὶ νύκτα διορίζων ἀνατολῇ καὶ δύσει, τῇ δὲ τὰς τέσσαρας ὥρας ἄγων τοῦ ἔτους, πρόσω τε βόρειος καὶ ὀπίσω νότιος διεξέρπων. Γίνονται δὲ ὑετοὶ κατὰ καιρὸν καὶ ἄνεμοι καὶ δρόσοι τά τε πάθη τὰ ἐν τῷ περιέχοντι συμβαίνοντα διὰ τὴν πρώτην καὶ ἀρχέγονον αἰτίαν. Ἕπονται δὲ τούτοις ποταμῶν ἐκροαί, θαλάσσης ἀνοιδήσεις, δένδρων ἐκφύσεις, καρπῶν πεπάνσεις, γοναὶ ζῴων, ἐκτροφαί τε πάντων καὶ ἀκμαὶ καὶ φθίσεις, συμβαλλομένης πρὸς ταῦτα καὶ τῆς ἑκάστου κατασκευῆς, ὡς ἔφην. Ὅταν οὖν ὁ πάντων ἡγεμών τε καὶ γενέτωρ, ἀόρατος ὢν ἄλλῳ πλὴν λογισμῷ, σημήνῃ πάσῃ φύσει μεταξὺ οὐρανοῦ τε καὶ γῆς φερομένῃ, κινεῖται πᾶσα ἐνδελεχῶς ἐν κύκλοις καὶ πέρασιν ἰδίοις, ποτὲ μὲν ἀφανιζομένη, ποτὲ δὲ φαινομένη, μυρίας ἰδέας ἀναφαίνουσά τε καὶ πάλιν ἀποκρύπτουσα ἐκ μιᾶς ἀρχῆς. Ἔοικε δὲ κομιδῇ τὸ δρώμενον τοῖς ἐν πολέμου καιροῖς μάλιστα γινομένοις, ἐπειδὰν ἡ σάλπιγξ σημήνῃ τῷ στρατοπέδῳ· τότε γὰρ τῆς φωνῆς ἕκαστος ἀκούσας ὁ μὲν ἀσπίδα ἀναιρεῖται, ὁ δὲ θώρακα ἐνδύεται, ὁ δὲ κνημῖδας ἢ κράνος ἢ ζωστῆρα περιτίθεται· καὶ ὁ μὲν ἵππον χαλινοῖ, ὁ δὲ συνωρίδα ἀναβαίνει, ὁ δὲ σύνθημα παρεγγυᾷ· καθίσταται δὲ εὐθέως ὁ μὲν λοχαγὸς εἰς λόχον, ὁ δὲ ταξίαρχος εἰς τάξιν, ὁ δὲ ἱππεὺς ἐπὶ κέρας, ὁ δὲ ψιλὸς εἰς τὴν ἰδίαν ἐκτρέχει χώραν· πάντα δὲ ὑφ’ ἕνα σημάντορα δονεῖται κατὰ προστάξιν τοῦ τὸ κράτος ἔχοντος ἡγεμόνος. Οὕτω χρὴ καὶ περὶ τοῦ σύμπαντος φρονεῖν· ὑπὸ γὰρ μιᾶς ῥοπῆς ὀτρυνομένων ἁπάντων γίνεται τὰ οἰκεῖα, καὶ ταύτης ἀοράτου καὶ ἀφανοῦς. Ὅπερ οὐδαμῶς ἐστιν ἐμπόδιον οὔτε ἐκείνῃ πρὸς τὸ δρᾶν οὔτε ἡμῖν πρὸς τὸ πιστεῦσαι· καὶ γὰρ ἡ ψυχή, δι’ ἣν ζῶμέν τε καὶ οἴκους καὶ πόλεις ἔχομεν, ἀόρατος οὖσα τοῖς ἔργοις αὐτῆς ὁρᾶται· πᾶς γὰρ ὁ τοῦ βίου διάκοσμος ὑπὸ ταύτης εὕρηται καὶ διατέτακται καὶ συνέχεται, γῆς ἀρόσεις καὶ φυτεύσεις, τέχνης ἐπίνοιαι, χρήσεις νόμων, κόσμος πολιτείας, ἔνδημοι πράξεις, ὑπερόριος πόλεμος, εἰρήνη. Ταῦτα χρὴ καὶ περὶ θεοῦ διανοεῖσθαι, δυνάμει μὲν ὄντος ἰσχυροτάτου, κάλλει δὲ εὐπρεπεστάτου, ζωῇ δὲ ἀθανάτου, ἀρετῇ δὲ κρατίστου, διότι πάσῃ θνητῇ φύσει γενόμενος ἀθεώρητος ἀπ’ αὐτῶν τῶν ἔργων θεωρεῖται. Τὰ γὰρ πάθη, καὶ τὰ δι’ ἀέρος ἅπαντα καὶ τὰ ἐπὶ γῆς καὶ τὰ ἐν ὕδατι, θεοῦ λέγοιτ’ ἂν ὄντως ἔργα εἶναι τοῦ τὸν κόσμον ἐπέχοντος· ἐξ οὗ, κατὰ τὸν φυσικὸν Ἐμπεδοκλέα,

“πάνθ’ ὅσα τ’ ἦν ὅσα τ’ ἔσθ’ ὅσα τ’ ἔσται ὀπίσσω,
δένδρεά τ’ ἐβλάστησε καὶ ἀνέρες ἠδὲ γυναῖκες
θῆρές τ’ οἰωνοί τε καὶ ὑδατοθρέμμονες ἰχθῦς.”

Ἔοικε δὲ ὄντως, εἰ καὶ μικρότερον παραβαλεῖν, τοῖς ὀμφαλοῖς λεγομένοις τοῖς ἐν ταῖς ψαλίσιν [λίθοις], οἳ μέσοι κείμενοι κατὰ τὴν εἰς ἑκάτερον μέρος ἔνδεσιν ἐν ἁρμονίᾳ τηροῦσι καὶ ἐν τάξει τὸ πᾶν σχῆμα τῆς ψαλίδος καὶ ἀκίνητον. Φασὶ δὲ καὶ τὸν ἀγαλματοποιὸν Φειδίαν κατασκευάζοντα τὴν ἐν ἀκροπόλει Ἀθηνᾶν ἐν μέσῃ τῇ ταύτης ἀσπίδι τὸ ἑαυτοῦ πρόσωπον ἐντυπώσασθαι, καὶ συνδῆσαι τῷ ἀγάλματι διά τινος ἀφανοῦς δημιουργίας, ὥστε ἐξ ἀνάγκης, εἴ τις βούλοιτο αὐτὸ περιαιρεῖν, τὸ σύμπαν ἄγαλμα λύειν τε καὶ συγχεῖν. Τοῦτον οὖν ἔχει τὸν λόγον ὁ θεὸς ἐν κόσμῳ, συνέχων τὴν τῶν ὅλων ἁρμονίαν τε καὶ σωτηρίαν, πλὴν οὔτε μέσος ὤν, ἔνθα ἡ γῆ τε καὶ ὁ θολερὸς τόπος οὗτος, ἀλλ’ ἄνω καθαρὸς ἐν καθαρῷ χωρῷ βεβηκώς, ὃν ἐτύμως καλοῦμεν οὐρανὸν μὲν ἀπὸ τοῦ ὅρον εἶναι τὸν ἄνω, Ὄλυμπον δὲ οἷον ὁλολαμπῆ τε καὶ παντὸς ζόφου καὶ ἀτάκτου κινήματος κεχωρισμένον, οἷα γίνεται παρ’ ἡμῖν διὰ χειμῶνος καὶ ἀνέμων βίας, ὥσπερ ἔφη καὶ ὁ ποιητὴς

“Οὔλυμπόνδ’ ὅθι φασὶ θεῶν ἕδος ἀσφαλὲς αἰεὶ
ἔμμεναι· οὔτ’ ἀνέμοισι τινάσσεται οὔτε ποτ’ ὄμβρῳ
δεύεται, οὔτε χιὼν ἐπιπίλναται, ἀλλὰ μάλ’ αἴθρη
πέπταται ἀνέφελος, λευκὴ δ’ ἐπιδέδρομεν αἴγλη.”

συνεπιμαρτυρεῖ δὲ καὶ ὁ βίος ἅπας, τὴν ἄνω χώραν ἀποδοὺς θεῷ· καὶ γὰρ πάντες ἄνθρωποι ἀνατείνομεν τὰς χεῖρας εἰς τὸν οὐρανὸν εὐχὰς ποιούμενοι. Καθ’ ὃν λόγον οὐ κακῶς κἀκεῖνο ἀναπεφώνηται

“Ζεὺς δ’ ἔλαχ’ οὐρανὸν εὐρὺν ἐν αἰθέρι καὶ νεφέλῃσι.”

διὸ καὶ τῶν αἰσθητῶν τὰ τιμιώτατα τὸν αὐτὸν ἐπέχει τόπον, ἄστρα τε καὶ ἥλιος καὶ σελήνη, μόνα τε τὰ οὐράνια διὰ τοῦτο ἀεὶ τὴν αὐτὴν σώζοντα τάξιν διακεκόσμηται, καὶ οὔποτε ἀλλοιωθέντα μετεκινήθη, καθάπερ τὰ ἐπὶ γῆς εὔτρεπτα ὄντα πολλὰς ἑτεροιώσεις καὶ πάθη ἀναδέδεκται· σεισμοί τε γὰρ ἤδη βίαιοι πολλὰ μέρη τῆς γῆς ἀνέρρηξαν, ὄμβροι τε κατέκλυσαν ἐξαίσιοι καταρραγέντες, ἐπιδρομαί τε κυμάτων καὶ ἀναχωρήσεις πολλάκις καὶ ἠπείρους ἐθαλάττωσαν καὶ θάλαττας ἠπείρωσαν, βιαί τε πνευμάτων καὶ τυφώνων ἔστιν ὅτε πόλεις ὅλας ἀνέτρεψαν, πυρκαϊαί τε καὶ φλόγες αἱ μὲν ἐξ οὐρανοῦ γενόμεναι πρότερον, ὥσπερ φασίν, ἐπὶ Φαέθοντος τὰ πρὸς ἕω μέρη κατέφλεξαν, αἱ δὲ πρὸς ἑσπέραν ἐκ γῆς ἀναβλύσασαι καὶ ἐκφυσήσασαι, καθάπερ τῶν ἐν Αἴτνῃ κρατήρων ἀναρραγέντων καὶ ἀνὰ τὴν γῆν φερομένων χειμάρρου δίκην. Ἔνθα καὶ τὸ τῶν εὐσεβῶν γένος ἐξόχως ἐτίμησε τὸ δαιμόνιον· περικαταληφθέντων γὰρ ‹αὐτῶν› ὑπὸ τοῦ ῥεύματος διὰ τὸ βαστάζειν γέροντας ἐπὶ τῶν ὤμων γονεῖς καὶ σώζειν, πλησίον [αὐτῶν] γενόμενος ὁ τοῦ πυρὸς ποταμὸς ἐξεσχίσθη παρέτρεψέ τε τοῦ φλογμοῦ τὸ μὲν ἔνθα, τὸ δὲ ἔνθα, καὶ ἐτήρησεν ἀβλαβεῖς ἅμα τοῖς γονεῦσι τοὺς νεανίσκους. Καθόλου δὲ ὅπερ ἐν νηὶ μὲν κυβερνήτης, ἐν ἅρματι δὲ ἡνίοχος, ἐν χορῷ δὲ κορυφαῖος, ἐν πόλει δὲ νομο‹θέτη›ς, ἐν στρατοπέδῳ δὲ ἡγεμών, τοῦτο θεὸς ἐν κόσμῳ, πλὴν καθ’ ὅσον τοῖς μὲν καματηρὸν τὸ ἄρχειν πολυκίνητόν τε καὶ πολυμέριμνον, τῷ δὲ ἄλυπον ἄπονόν τε καὶ πάσης κεχωρισμένον σωματικῆς ἀσθενείας· ἐν ἀκινήτῳ γὰρ ἱδρυμένος δυνάμει πάντα κινεῖ καὶ περιάγει, ὅπου βούλεται καὶ ὅπως, ἐν διαφόροις ἰδέαις τε καὶ φύσεσιν, ὥσπερ ἀμέλει καὶ ὁ τῆς πόλεως νόμος ἀκίνητος ὢν ἐν ταῖς τῶν χρωμένων ψυχαῖς πάντα οἰκονομεῖ τὰ κατὰ τὴν πολιτείαν· ἐφεπόμενοι γὰρ αὐτῷ δηλονότι ἐξίασιν ἄρχοντες μὲν ἐπὶ τὰ ἀρχεῖα, θεσμοθέται δὲ εἰς τὰ οἰκεῖα δικαστήρια, βουλευταὶ δὲ καὶ ἐκκλησιασταὶ εἰς συνέδρια τὰ προσήκοντα, καὶ ὁ μέν τις εἰς τὸ πρυτανεῖον βαδίζει σιτησόμενος, ὁ δὲ πρὸς τοὺς δικαστὰς ἀπολογησόμενος, ὁ δὲ εἰς τὸ δεσμωτήριον ἀποθανούμενος. Γίνονται δὲ καὶ δημοθοινίαι νόμιμοι καὶ πανηγύρεις ἐνιαύσιοι θεῶν τε θυσίαι καὶ ἡρώων θεραπεῖαι καὶ χοαὶ κεκμηκότων· ἄλλα δὲ ἄλλως ἐνεργούμενα κατὰ μίαν πρόσταξιν ἢ νόμιμον ἐξουσίαν σώζει τὸ τοῦ ποιήσαντος ὄντως ὅτι

“πόλις δ’ ὁμοῦ μὲν θυμιαμάτων γέμει,
ὁμοῦ δὲ παιάνων τε καὶ στεναγμάτων,”

οὕτως ὑποληπτέον καὶ ἐπὶ τῆς μείζονος πόλεως, λέγω δὲ τοῦ κόσμου· νόμος γὰρ ἡμῖν ἰσοκλινὴς ὁ θεός, οὐδεμίαν ἐπιδεχόμενος διόρθωσιν ἢ μετάθεσιν, κρείττων δέ, οἶμαι, καὶ βεβαιότερος τῶν ἐν ταῖς κύρβεσιν ἀναγεγραμμένων. Ἡγουμένου δὲ ἀκινήτως αὐτοῦ καὶ ἐμμελῶς ὁ σύμπας οἰκονομεῖται διάκοσμος οὐρανοῦ καὶ γῆς, μεμερισμένος κατὰ τὰς φύσεις πάσας διὰ τῶν οἰκείων σπερμάτων εἴς τε φυτὰ καὶ ζῷα κατὰ γένη τε καὶ εἴδη· καὶ γὰρ ἄμπελοι καὶ φοίνικες καὶ περσέαι

“συκέαι τε γλυκεραὶ καὶ ἐλαῖαι”,

ὥς φησιν ὁ ποιητής, τά τε ἄκαρπα μέν, ἄλλας δὲ παρεχόμενα χρείας, πλάτανοι καὶ πίτυες καὶ πύξοι

“κλήθρη τ’ αἴγειρός τε καὶ εὐώδης κυπάρισσος,”

αἵ τε καρπὸν ὀπώρας ἡδὺν ἄλλως δὲ δυσθησαύριστον φέρουσαι,

“ὄχναι καὶ ῥοιαὶ καὶ μηλέαι ἀγλαόκαρποι,”

τῶν τε ζῴων τά τε ἄγρια καὶ ἥμερα, τά τε ἐν ἀέρι καὶ ἐπὶ γῆς καὶ ἐν ὕδατι βοσκόμενα, γίνεται καὶ ἀκμάζει καὶ φθείρεται τοῖς τοῦ θεοῦ πειθόμενα θεσμοῖς· “πᾶν γὰρ ἑρπετὸν πληγῇ νέμεται”, ὥς φησιν Ἡράκλειτος.

Εἷς δὲ ὢν πολυώνυμός ἐστι, κατονομαζόμενος τοῖς πάθεσι πᾶσιν ἅπερ αὐτὸς νεοχμοῖ. Καλοῦμεν γὰρ αὐτὸν καὶ Ζῆνα καὶ Δία, παραλλήλως χρώμενοι τοῖς ὀνόμασιν, ὡς κἂν εἰ λέγοιμεν δι’ ὃν ζῶμεν. Κρόνου δὲ παῖς καὶ χρόνου λέγεται, διήκων ἐξ αἰῶνος ἀτέρμονος εἰς ἕτερον αἰῶνα· ἀστραπαῖός τε καὶ βρονταῖος καὶ αἴθριος καὶ αἰθέριος κεραύνιός τε καὶ ὑέτιος ἀπὸ τῶν ὑετῶν καὶ κεραυνῶν καὶ τῶν ἄλλων καλεῖται. Καὶ μὴν ἐπικάρπιος μὲν ἀπὸ τῶν καρπῶν, πολιεὺς δὲ ἀπὸ τῶν πόλεων ὀνομάζεται, γενέθλιός τε καὶ ἑρκεῖος καὶ ὁμόγνιος καὶ πατρῷος ἀπὸ τῆς πρὸς ταῦτα κοινωνίας, ἑταιρεῖός τε καὶ φίλιος καὶ ξένιος καὶ στράτιος καὶ τροπαιοῦχος καθάρσιός τε καὶ παλαμναῖος καὶ ἱκέσιος καὶ μειλίχιος, ὥσπερ οἱ ποιηταὶ λέγουσι, σωτήρ τε καὶ ἐλευθέριος ἐτύμως, ὡς δὲ τὸ πᾶν εἰπεῖν, οὐράνιός τε καὶ χθόνιος, πάσης ἐπώνυμος φύσεως ὢν καὶ τύχης, ἅτε πάντων αὐτὸς αἴτιος ὤν. Διὸ καὶ ἐν τοῖς Ὀρφικοῖς οὐ κακῶς λέγεται

“Ζεὺς πρῶτος γένετο, Ζεὺς ὕστατος ἀρχικέραυνος·
Ζεὺς κεφαλή, Ζεὺς μέσσα, Διὸς δ’ ἐκ πάντα τέτυκται·
Ζεὺς πυθμὴν γαίης τε καὶ οὐρανοῦ ἀστερόεντος·
Ζεὺς ἄρσην γένετο, Ζεὺς ἄμβροτος ἔπλετο νύμφη·
Ζεὺς πνοιὴ πάντων, Ζεὺς ἀκαμάτου πυρὸς ὁρμή·
Ζεὺς πόντου ῥίζα, Ζεὺς ἥλιος ἠδὲ σελήνη·
Ζεὺς βασιλεύς, Ζεὺς ἀρχὸς ἁπάντων ἀρχικέραυνος·
πάντας γὰρ κρύψας αὖθις φάος ἐς πολυγηθὲς
ἐκ καθαρῆς κραδίης ἀνενέγκατο, μέρμερα ῥέζων.”

οἶμαι δὲ καὶ τὴν Ἀνάγκην οὐκ ἄλλο τι λέγεσθαι πλὴν τοῦτον, οἱονεὶ ἀνίκητον αἰτίαν ὄντα, Εἱμαρμένην δὲ διὰ τὸ εἴρειν τε καὶ χωρεῖν ἀκωλύτως, Πεπρωμένην δὲ διὰ τὸ πεπερατῶσθαι πάντα καὶ μηδὲν ἐν τοῖς οὖσιν ἄπειρον εἶναι, καὶ Μοῖραν μὲν ἀπὸ τοῦ μεμερίσθαι, Νέμεσιν δὲ ἀπὸ τῆς ἑκάστῳ διανεμήσεως, Ἀδράστειαν δὲ ἀναπόδραστον αἰτίαν οὖσαν κατὰ φύσιν, Αἶσαν δὲ ἀεὶ οὖσαν. Τά τε περὶ τὰς Μοίρας καὶ τὸν ἄτρακτον εἰς ταὐτό πως νεύει· τρεῖς μὲν γὰρ αἱ Μοῖραι, κατὰ τοὺς χρόνους μεμερισμέναι, νῆμα δὲ ἀτράκτου τὸ μὲν ἐξειργασμένον, τὸ δὲ μέλλον, τὸ δὲ περιστρεφόμενον· τέτακται δὲ κατὰ μὲν τὸ γεγονὸς μία τῶν Μοιρῶν, Ἄτροπος, ἐπεὶ τὰ παρελθόντα πάντα ἄτρεπτά ἐστι, κατὰ δὲ τὸ μέλλον Λάχεσις - [εἰς] πάντα γὰρ ἡ κατὰ φύσιν μένει λῆξις - κατὰ δὲ τὸ ἐνεστὼς Κλωθώ, συμπεραίνουσά τε καὶ κλώθουσα ἑκάστῳ τὰ οἰκεῖα. Περαίνεται δὲ καὶ ὁ μῦθος οὐκ ἀτάκτως. Ταῦτα δὲ πάντα ἐστὶν οὐκ ἄλλο τι πλὴν ὁ θεός, καθάπερ καὶ ὁ γενναῖος Πλάτων φησίν· “ὁ μὲν δὴ θεός, ὥσπερ ὁ παλαιὸς λόγος, ἀρχήν τε καὶ τελευτὴν καὶ μέσα τῶν ὄντων ἁπάντων ἔχων, εὐθείᾳ περαίνει κατὰ φύσιν πορευόμενος· τῷ δὲ ἀεὶ ξυνέπεται δίκη, τῶν ἀπολειπομένων τοῦ θείου νόμου τιμωρός”, “ἧς ὁ γενήσεσθαι μέλλων μακάριός τε καὶ εὐδαίμων ἐξ ἀρχῆς εὐθὺς μέτοχος εἴη.”

Κεφάλαιο 1

[402a] Τῶν καλῶν καὶ τιμίων τὴν εἴδησιν ὑπολαμβάνοντες, μᾶλλον δ’ ἑτέραν ἑτέρας ἢ κατ’ ἀκρίβειαν ἢ τῷ βελτιόνων τε καὶ θαυμασιωτέρων εἶναι, δι’ ἀμφότερα ταῦτα τὴν περὶ τῆς ψυχῆς ἱστορίαν εὐλόγως ἂν ἐν πρώτοις τιθείημεν. δοκεῖ δὲ καὶ πρὸς ἀλήθειαν ἅπασαν ἡ γνῶσις αὐτῆς μεγάλα συμβάλλεσθαι, μάλιστα δὲ πρὸς τὴν φύσιν· ἔστι γὰρ οἷον ἀρχὴ τῶν ζῴων. ἐπιζητοῦμεν δὲ θεωρῆσαι καὶ γνῶναι τήν τε φύσιν αὐτῆς καὶ τὴν οὐσίαν, εἶθ’ ὅσα συμβέβηκε περὶ αὐτήν· ὧν τὰ μὲν ἴδια πάθη τῆς ψυχῆς εἶναι δοκεῖ, τὰ δὲ δι’ ἐκείνην καὶ τοῖς ζῴοις ὑπάρχειν.

πάντῃ δὲ πάντως ἐστὶ τῶν χαλεπωτάτων λαβεῖν τινα πίστιν περὶ αὐτῆς. καὶ γάρ, ὄντος κοινοῦ τοῦ ζητήματος καὶ πολλοῖς ἑτέροις, λέγω δὲ τοῦ περὶ τὴν οὐσίαν καὶ τὸ τί ἐστι, τάχ’ ἄν τῳ δόξειε μία τις εἶναι μέθοδος κατὰ πάντων περὶ ὧν βουλόμεθα γνῶναι τὴν οὐσίαν, ὥσπερ καὶ τῶν κατὰ συμβεβηκὸς ἰδίων ἀπόδειξις, ὥστε ζητητέον ἂν εἴη τὴν μέθοδον ταύτην· εἰ δὲ μὴ ἔστι μία τις καὶ κοινὴ μέθοδος περὶ τὸ τί ἐστιν, ἔτι χαλεπώτερον γίνεται τὸ πραγματευθῆναι· δεήσει γὰρ λαβεῖν περὶ ἕκαστον τίς ὁ τρόπος, ἐὰν δὲ φανερὸν ᾖ πότερον ἀπόδειξίς ἐστιν ἢ διαίρεσις ἢ καί τις ἄλλη μέθοδος, ἔτι πολλὰς ἀπορίας ἔχει καὶ πλάνας, ἐκ τίνων δεῖ ζητεῖν· ἄλλαι γὰρ ἄλλων ἀρχαί, καθάπερ ἀριθμῶν καὶ ἐπιπέδων.

πρῶτον δ’ ἴσως ἀναγκαῖον διελεῖν ἐν τίνι τῶν γενῶν καὶ τί ἐστι, λέγω δὲ πότερον τόδε τι καὶ οὐσία ἢ ποιὸν ἢ ποσόν, ἢ καί τις ἄλλη τῶν διαιρεθεισῶν κατηγοριῶν, ἔτι δὲ πότερον τῶν ἐν δυνάμει ὄντων ἢ μᾶλλον ἐντελέχειά τις· διαφέρει γὰρ οὔ τι [402b] μικρόν.

σκεπτέον δὲ καὶ εἰ μεριστὴ ἢ ἀμερής, καὶ πότερον ὁμοειδὴς ἅπασα ψυχὴ ἢ οὔ· εἰ δὲ μὴ ὁμοειδής, πότερον εἴδει διαφέρουσα ἢ γένει. νῦν μὲν γὰρ οἱ λέγοντες καὶ ζητοῦντες περὶ ψυχῆς περὶ τῆς ἀνθρωπίνης μόνης ἐοίκασιν ἐπισκοπεῖν·

εὐλαβητέον δ’ ὅπως μὴ λανθάνῃ πότερον εἷς ὁ λόγος αὐτῆς ἐστι, καθάπερ ζῴου, ἢ καθ’ ἕκαστον ἕτερος, οἷον ἵππου, κυνός, ἀνθρώπου, θεοῦ, τὸ δὲ ζῷον τὸ καθόλου ἤτοι οὐθέν ἐστιν ἢ ὕστερον, ὁμοίως δὲ κἂν εἴ τι κοινὸν ἄλλο κατηγοροῖτο·

ἔτι δέ, εἰ μὴ πολλαὶ ψυχαὶ ἀλλὰ μόρια, πότερον δεῖ ζητεῖν πρότερον τὴν ὅλην ψυχὴν ἢ τὰ μόρια. χαλεπὸν δὲ καὶ τούτων διορίσαι ποῖα πέφυκεν ἕτερα ἀλλήλων, καὶ πότερον τὰ μόρια χρὴ ζητεῖν πρότερον ἢ τὰ ἔργα αὐτῶν, οἷον τὸ νοεῖν ἢ τὸν νοῦν, καὶ τὸ αἰσθάνεσθαι ἢ τὸ αἰσθητικόν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

εἰ δὲ τὰ ἔργα πρότερον, πάλιν ἄν τις ἀπορήσειεν εἰ τὰ ἀντικείμενα πρότερον τούτων ζητητέον, οἷον τὸ αἰσθητὸν τοῦ αἰσθητικοῦ, καὶ τὸ νοητὸν τοῦ νοῦ.

[402b16] ἔοικε δ᾽ οὐ μόνον τὸ τί ἐστι γνῶναι χρήσιμον εἶναι πρὸς τὸ θεωρῆσαι τὰς αἰτίας τῶν συμβεβηκότων ταῖς οὐσίαις (ὥσπερ ἐν τοῖς μαθήμασι τί τὸ εὐθὺ καὶ τὸ καμπύλον, ἢ τί γραμμὴ καὶ ἐπίπεδον, πρὸς τὸ κατιδεῖν πόσαις ὀρθαῖς αἱ τοῦ τριγώνου γωνίαι ἴσαι), ἀλλὰ καὶ ἀνάπαλιν τὰ συμβεβηκότα συμβάλλεται μέγα μέρος πρὸς τὸ εἰδέναι τὸ τί ἐστιν· ἐπειδὰν γὰρ ἔχωμεν ἀποδιδόναι κατὰ τὴν φαντασίαν περὶ τῶν συμβεβηκότων, ἢ πάντων ἢ τῶν πλείστων, τότε καὶ περὶ τῆς οὐσίας ἕξομεν λέγειν κάλλιστα· πάσης γὰρ ἀποδείξεως ἀρχὴ τὸ τί ἐστιν, ὥστε καθ᾽ ὅσους τῶν ὁρισμῶν μὴ συμβαίνει τὰ [403a] συμβεβηκότα γνωρίζειν, ἀλλὰ μηδ᾽ εἰκάσαι περὶ αὐτῶν εὐμαρές, δῆλον ὅτι διαλεκτικῶς εἴρηνται καὶ κενῶς ἅπαντες.

[403a3] ἀπορίαν δ᾽ ἔχει καὶ τὰ πάθη τῆς ψυχῆς, πότερόν ἐστι πάντα κοινὰ καὶ τοῦ ἔχοντος ἢ ἔστι τι καὶ τῆς ψυχῆς ἴδιον αὐτῆς· τοῦτο γὰρ λαβεῖν μὲν ἀναγκαῖον, οὐ ῥᾴδιον δέ. φαίνεται δὲ τῶν μὲν πλείστων οὐθὲν ἄνευ τοῦ σώματος πάσχειν οὐδὲ ποιεῖν, οἷον ὀργίζεσθαι, θαρρεῖν, ἐπιθυμεῖν, ὅλως αἰσθάνεσθαι, μάλιστα δ᾽ ἔοικεν ἰδίῳ τὸ νοεῖν· εἰ δ᾽ ἐστὶ καὶ τοῦτο φαντασία τις ἢ μὴ ἄνευ φαντασίας, οὐκ ἐνδέχοιτ᾽ ἂν οὐδὲ τοῦτ᾽ ἄνευ σώματος εἶναι.

εἰ μὲν οὖν ἔστι τι τῶν τῆς ψυχῆς ἔργων ἢ παθημάτων ἴδιον, ἐνδέχοιτ᾽ ἂν αὐτὴν χωρίζεσθαι· εἰ δὲ μηθέν ἐστιν ἴδιον αὐτῆς, οὐκ ἂν εἴη χωριστή, ἀλλὰ καθάπερ τῷ εὐθεῖ, ᾗ εὐθύ, πολλὰ συμβαίνει, οἷον ἅπτεσθαι τῆς [χαλκῆς] σφαίρας κατὰ στιγμήν, οὐ μέντοι γ᾽ ἅψεται οὕτως χωρισθέν τι εὐθύ· ἀχώριστον γάρ, εἴπερ ἀεὶ μετὰ σώματός τινος ἐστιν. ἔοικε δὲ καὶ τὰ τῆς ψυχῆς πάθη πάντα εἶναι μετὰ σώματος, θυμός, πραότης, φόβος, ἔλεος, θάρσος, ἔτι χαρὰ καὶ τὸ φιλεῖν τε καὶ μισεῖν· ἅμα γὰρ τούτοις πάσχει τι τὸ σῶμα. μηνύει δὲ τὸ ποτὲ μὲν ἰσχυρῶν καὶ ἐναργῶν παθημάτων συμβαινόντων μηδὲν παροξύνεσθαι ἢ φοβεῖσθαι, ἐνίοτε δ᾽ ὑπὸ μικρῶν καὶ ἀμαυρῶν κινεῖσθαι, ὅταν ὀργᾷ τὸ σῶμα καὶ οὕτως ἔχῃ ὥσπερ ὅταν ὀργίζηται. ἔτι δὲ μᾶλλον τοῦτο φανερόν· μηθενὸς γὰρ φοβεροῦ συμβαίνοντος ἐν τοῖς πάθεσι γίνονται τοῖς τοῦ φοβουμένου. εἰ δ᾽ οὕτως ἔχει, δῆλον ὅτι τὰ πάθη λόγοι ἔνυλοί εἰσιν· ὥστε οἱ ὅροι τοιοῦτοι οἷον "τὸ ὀργίζεσθαι κίνησίς τις τοῦ τοιουδὶ σώματος ἢ μέρους ἢ δυνάμεως ὑπὸ τοῦδε ἕνεκα τοῦδε", καὶ διὰ ταῦτα ἤδη φυσικοῦ τὸ θεωρῆσαι περὶ ψυχῆς, ἢ πάσης ἢ τῆς τοιαύτης. διαφερόντως δ’ ἂν ὁρίσαιντο ὁ φυσικὸς [τε] καὶ ὁ διαλεκτικὸς ἕκαστον αὐτῶν, οἷον ὀργὴ τί ἐστιν· ὁ μὲν γὰρ ὄρεξιν ἀντιλυπήσεως ἤ τι τοιοῦτον, ὁ δὲ ζέσιν τοῦ περὶ καρδίαν αἵματος [403b] καὶ θερμοῦ. τούτων δὲ ὁ μὲν τὴν ὕλην ἀποδίδωσιν, ὁ δὲ τὸ εἶδος καὶ τὸν λόγον. ὁ μὲν γὰρ λόγος ὅδε τοῦ πράγματος, ἀνάγκη δ’ εἶναι τοῦτον ἐν ὕλῃ τοιᾳδί, εἰ ἔσται· ὥσπερ οἰκίας ὁ μὲν λόγος τοιοῦτος, ὅτι σκέπασμα κωλυτικὸν φθορᾶς ὑπ’ ἀνέμων καὶ ὄμβρων καὶ καυμάτων, ὁ δὲ φήσει λίθους καὶ πλίνθους καὶ ξύλα, ἕτερος δ’ ἐν τούτοις τὸ εἶδος <οὗ> ἕνεκα τωνδί. τίς οὖν ὁ φυσικὸς τούτων; πότερον ὁ περὶ τὴν ὕλην, τὸν δὲ λόγον ἀγνοῶν, ἢ ὁ περὶ τὸν λόγον μόνον; ἢ μᾶλλον ὁ ἐξ ἀμφοῖν; ἐκείνων δὲ δὴ τίς ἑκάτερος; ἢ οὐκ ἔστιν εἷς ὁ περὶ τὰ πάθη τῆς ὕλης τὰ μὴ χωριστὰ μηδ’ ᾗ χωριστά, ἀλλ’ ὁ φυσικὸς περὶ ἅπανθ’ ὅσα τοῦ τοιουδὶ σώματος καὶ τῆς τοι- αύτης ὕλης ἔργα καὶ πάθη, ὅσα δὲ μὴ τοιαῦτα, ἄλλος, καὶ περὶ τινῶν μὲν τεχνίτης, ἐὰν τύχῃ, οἷον τέκτων ἢ ἰατρός, τῶν δὲ μὴ χωριστῶν μέν, ᾗ δὲ μὴ τοιούτου σώματος πάθη καὶ ἐξ ἀφαιρέσεως, ὁ μαθηματικός, ᾗ δὲ κεχωρισμένα, ὁ πρῶτος φιλόσοφος; ἀλλ’ ἐπανιτέον ὅθεν ὁ λόγος. ἐλέγομεν δὴ ὅτι τὰ πάθη τῆς ψυχῆς οὕτως ἀχώριστα τῆς φυσικῆς ὕλης τῶν ζῴων, ᾗ γε τοιαῦθ’ ὑπάρχει <οἷα> θυμὸς καὶ φόβος, καὶ οὐχ ὥσπερ γραμμὴ καὶ ἐπίπεδον.

Κεφάλαιο 2

[403b20] Ἐπισκοποῦντας δὲ περὶ ψυχῆς ἀναγκαῖον, ἅμα διαποροῦντας περὶ ὧν εὐπορεῖν δεῖ προελθόντας, τὰς τῶν προτέρων δόξας συμπαραλαμβάνειν ὅσοι τι περὶ αὐτῆς ἀπεφήναντο, ὅπως τὰ μὲν καλῶς εἰρημένα λάβωμεν, εἰ δέ τι μὴ καλῶς, τοῦτ' εὐλαβηθῶμεν.

ἀρχὴ δὲ τῆς ζητήσεως προθέσθαι τὰ μάλιστα δοκοῦνθ' ὑπάρχειν αὐτῇ κατὰ φύσιν. τὸ ἔμψυχον δὴ τοῦ ἀψύχου δυσὶ μάλιστα διαφέρειν δοκεῖ, κινήσει τε καὶ τῷ αἰσθάνεσθαι. παρειλήφαμεν δὲ καὶ παρὰ τῶν προγενεστέρων σχεδὸν δύο ταῦτα περὶ ψυχῆς· φασὶ γὰρ ἔνιοι καὶ μάλιστα καὶ πρώτως ψυχὴν εἶναι τὸ κινοῦν, οἰηθέντες δὲ τὸ μὴ κινούμενον αὐτὸ μὴ ἐνδέχεσθαι κινεῖν ἕτερον, τῶν κινουμένων τι τὴν ψυχὴν ὑπέλαβον εἶναι. ὅθεν Δημόκριτος μὲν [404a] πῦρ τι καὶ θερμόν φησιν αὐτὴν εἶναι· ἀπείρων γὰρ ὄντων σχημάτων καὶ ἀτόμων τὰ σφαιροειδῆ πῦρ καὶ ψυχὴν λέγει (οἷον ἐν τῷ ἀέρι τὰ καλούμενα ξύσματα, ἃ φαίνεται ἐν ταῖς διὰ τῶν θυρίδων ἀκτῖσιν), ὧν τὴν μὲν πανσπερμίαν στοιχεῖα λέγει τῆς ὅλης φύσεως (ὁμοίως δὲ καὶ Λεύκιππος), τού- των δὲ τὰ σφαιροειδῆ ψυχήν, διὰ τὸ μάλιστα διὰ παντὸς δύνασθαι διαδύνειν τοὺς τοιούτους ῥυσμοὺς καὶ κινεῖν τὰ λοιπά, κινούμενα καὶ αὐτά, ὑπολαμβάνοντες τὴν ψυχὴν εἶναι τὸ παρέχον τοῖς ζῴοις τὴν κίνησιν· διὸ καὶ τοῦ ζῆν ὅρον εἶναι τὴν ἀναπνοήν· συνάγοντος γὰρ τοῦ περιέχοντος τὰ σώματα καὶ ἐκθλίβοντος τῶν σχημάτων τὰ παρέχοντα τοῖς ζῴοις τὴν κίνησιν διὰ τὸ μηδ' αὐτὰ ἠρεμεῖν μηδέποτε, βοήθειαν γίνεσθαι θύραθεν ἐπεισιόντων ἄλλων τοιούτων ἐν τῷ ἀναπνεῖν· κωλύειν γὰρ αὐτὰ καὶ τὰ ἐνυπάρχοντα ἐν τοῖς ζῴοις ἐκκρίνεσθαι, συνανείργοντα τὸ συνάγον καὶ πηγνύον· καὶ ζῆν δὲ ἕως ἂν δύνωνται τοῦτο ποιεῖν.

[404a16] ἔοικε δὲ καὶ τὸ παρὰ τῶν Πυθαγορείων λεγόμενον τὴν αὐτὴν ἔχειν διάνοιαν· ἔφασαν γάρ τινες αὐτῶν ψυχὴν εἶναι τὰ ἐν τῷ ἀέρι ξύσματα, οἱ δὲ τὸ ταῦτα κινοῦν, περὶ δὲ τούτων εἴρηται ὅτι συνεχῶς φαίνεται κινούμενα, κἂν ᾖ νηνεμία παντελής. ἐπὶ ταὐτὸ δὲ φέρονται καὶ ὅσοι λέγουσι τὴν ψυχὴν τὸ αὑτὸ κινοῦν· ἐοίκασι γὰρ οὗτοι πάντες ὑπειληφέναι τὴν κίνησιν οἰκειότατον εἶναι τῇ ψυχῇ, καὶ τὰ μὲν ἄλλα πάντα κινεῖσθαι διὰ τὴν ψυχήν, ταύτην δ' ὑφ' ἑαυτῆς, διὰ τὸ μηθὲν ὁρᾶν κινοῦν ὃ μὴ καὶ αὐτὸ κινεῖται.

ὁμοίως δὲ καὶ Ἀναξαγόρας ψυχὴν εἶναι λέγει τὴν κινοῦσαν, καὶ εἴ τις ἄλλος εἴρηκεν ὡς τὸ πᾶν ἐκίνησε νοῦς· οὐ μὴν παντελῶς γ' ὥσπερ

Δημόκριτος. ἐκεῖνος μὲν γὰρ ἁπλῶς ταὐτὸν ψυχὴν καὶ νοῦν (τὸ γὰρ ἀληθὲς εἶναι τὸ φαινόμενον, διὸ καλῶς ποιῆσαι [τὸν] Ὅμηρον ὡς ὁ Ἕκτωρ “κεῖτ’ ἀλλοφρονέων”· οὐ δὴ χρῆται τῷ νῷ ὡς δυνάμει τινὶ περὶ τὴν ἀλήθειαν, ἀλλὰ ταὐτὸ λέγει ψυχὴν καὶ νοῦν)·

[404b] Ἀναξαγόρας δ’ ἧττον διασαφεῖ περὶ αὐτῶν· πολλαχοῦ μὲν γὰρ τὸ αἴτιον τοῦ καλῶς καὶ ὀρθῶς τὸν νοῦν λέγει, ἑτέρωθι δὲ τὸν νοῦν εἶναι ταὐτὸν τῇ ψυχῇ· ἐν ἅπασι γὰρ ὑπάρχειν αὐτὸν τοῖς ζῴοις, καὶ μεγάλοις καὶ μικροῖς, καὶ τιμίοις καὶ ἀτιμοτέροις· οὐ φαίνεται δ’ ὅ γε κατὰ φρόνησιν λεγόμενος νοῦς πᾶσιν ὁμοίως ὑπάρχειν τοῖς ζῴοις, ἀλλ’ οὐδὲ τοῖς ἀνθρώποις πᾶσιν.

ὅσοι μὲν οὖν ἐπὶ τὸ κινεῖσθαι τὸ ἔμψυχον ἀπέβλεψαν, οὗτοι τὸ κινητικώτατον ὑπέλαβον τὴν ψυχήν· ὅσοι δ’ ἐπὶ τὸ γινώσκειν καὶ τὸ αἰσθάνεσθαι τῶν ὄντων, οὗτοι δὲ λέγουσι τὴν ψυχὴν τὰς ἀρχάς, οἱ μὲν πλείους ποιοῦντες, ταύτας, οἱ δὲ μίαν, ταύτην, ὥσπερ Ἐμπεδοκλῆς μὲν ἐκ τῶν στοιχείων πάντων, εἶναι δὲ καὶ ἕκαστον ψυχὴν τούτων, λέγων οὕτως,

γαίῃ μὲν γὰρ γαῖαν ὀπώπαμεν, ὕδατι δ’ ὕδωρ,
αἰθέρι δ’ αἰθέρα δῖαν, ἀτὰρ πυρὶ πῦρ ἀΐδηλον,
στοργῇ δὲ στοργήν, νεῖκος δέ τε νείκεϊ λυγρῷ·

τὸν αὐτὸν δὲ τρόπον καὶ Πλάτων ἐν τῷ Τιμαίῳ τὴν ψυχὴν ἐκ τῶν στοιχείων ποιεῖ· γινώσκεσθαι γὰρ τῷ ὁμοίῳ τὸ ὅμοιον, τὰ δὲ πράγματα ἐκ τῶν ἀρχῶν εἶναι. ὁμοίως δὲ καὶ ἐν τοῖς περὶ φιλοσοφίας λεγομένοις διωρίσθη, αὐτὸ μὲν τὸ ζῷον ἐξ αὐτῆς τῆς τοῦ ἑνὸς ἰδέας καὶ τοῦ πρώτου μήκους καὶ πλάτους καὶ βάθους, τὰ δ’ ἄλλα ὁμοιοτρόπως· ἔτι δὲ καὶ ἄλλως, νοῦν μὲν τὸ ἕν, ἐπιστήμην δὲ τὰ δύο (μοναχῶς γὰρ ἐφ’ ἕν), τὸν δὲ τοῦ ἐπιπέδου ἀριθμὸν δόξαν, αἴσθησιν δὲ τὸν τοῦ στερεοῦ. οἱ μὲν γὰρ ἀριθμοὶ τὰ εἴδη αὐτὰ καὶ αἱ [404b25] ἀρχαὶ ἐλέγοντο, εἰσὶ δ’ ἐκ τῶν στοιχείων, κρίνεται δὲ τὰ πράγματα τὰ μὲν νῷ, τὰ δ’ ἐπιστήμῃ, τὰ δὲ δόξῃ, τὰ δ’ αἰσθήσει· εἴδη δ’ οἱ ἀριθμοὶ οὗτοι τῶν πραγμάτων.

[404b27] ἐπεὶ δὲ καὶ κινητικὸν ἐδόκει ἡ ψυχὴ εἶναι καὶ γνωριστικὸν οὕτως, ἔνιοι συνέπλεξαν ἐξ ἀμφοῖν, ἀποφηνάμενοι τὴν ψυχὴν ἀριθμὸν κινοῦνθ’ ἑαυτόν,

διαφέρονται δὲ περὶ τῶν ἀρχῶν, τίνες καὶ πόσαι, μάλιστα μὲν οἱ σωματικὰς ποιοῦντες τοῖς ἀσωμάτους, [405a] τούτοις δ’ οἱ μίξαντες καὶ ἀπ’ ἀμφοῖν τὰς ἀρχὰς ἀποφηνάμενοι.

διαφέρονται δὲ καὶ περὶ τοῦ πλήθους· οἱ μὲν γὰρ μίαν οἱ δὲ πλείους λέγουσιν. ἑπομένως δὲ τούτοις καὶ τὴν ψυχὴν ἀποδιδόασιν· τὸ γὰρ κινητικὸν τὴν φύσιν τῶν πρώτων ὑπειλήφασιν, οὐκ ἀλόγως.

ὅθεν ἔδοξέ τισι πῦρ εἶναι· καὶ γὰρ τοῦτο λεπτομερέστατόν τε καὶ μάλιστα τῶν στοιχείων ἀσώματον, ἔτι δὲ κινεῖταί τε καὶ κινεῖ τὰ ἄλλα πρώτως.

Δημόκριτος δὲ καὶ γλαφυρωτέρως εἴρηκεν ἀποφαινόμενος διὰ τί τούτων ἑκάτερον· ψυχὴν μὲν γὰρ εἶναι ταὐτὸ καὶ νοῦν, τοῦτο δ’ εἶναι τῶν πρώτων καὶ ἀδιαιρέτων σωμάτων, κινητικὸν δὲ διὰ μικρομέρειαν καὶ τὸ σχῆμα· τῶν δὲ σχημάτων εὐκινητότατον τὸ σφαιροειδὲς λέγει· τοιοῦτον δ’ εἶναι τόν τε νοῦν καὶ τὸ πῦρ.

Ἀναξαγόρας δ’ ἔοικε μὲν ἕτερον λέγειν ψυχήν τε καὶ νοῦν, ὥσπερ εἴπομεν καὶ πρότερον, χρῆται δ’ ἀμφοῖν ὡς μιᾷ φύσει, πλὴν ἀρχήν γε τὸν νοῦν τίθεται μάλιστα πάντων· μόνον γοῦν φησὶν αὐτὸν τῶν ὄντων ἁπλοῦν εἶναι καὶ ἀμιγῆ τε καὶ καθαρόν. ἀποδίδωσι δ’ ἄμφω τῇ αὐτῇ ἀρχῇ, τό τε γινώσκειν καὶ τὸ κινεῖν, λέγων νοῦν κινῆσαι τὸ πᾶν.

ἔοικε δὲ καὶ Θαλῆς ἐξ ὧν ἀπομνημονεύουσι κινητικόν τι τὴν ψυχὴν ὑπολαβεῖν, εἴπερ τὴν λίθον ἔφη ψυχὴν ἔχειν, ὅτι τὸν σίδηρον κινεῖ·

Διογένης δ’ ὥσπερ καὶ ἕτεροί τινες ἀέρα, τοῦτον οἰηθεὶς πάντων λεπτομερέστατον εἶναι καὶ ἀρχήν· καὶ διὰ τοῦτο γινώσκειν τε καὶ κινεῖν τὴν ψυχήν, ᾗ μὲν πρῶτόν ἐστι, καὶ ἐκ τούτου τὰ λοιπά, γινώσκειν, ᾗ δὲ λεπτότατον, κινητικὸν εἶναι.

καὶ Ἡράκλειτος δὲ τὴν ἀρχὴν εἶναί φησι ψυχήν, εἴπερ τὴν ἀναθυμίασιν, ἐξ ἧς τἆλλα συνίστησιν· καὶ ἀσωματώτατόν τε καὶ ῥέον ἀεί· τὸ δὲ κινούμενον κινουμένῳ γινώσκεσθαι· ἐν κινήσει δ’ εἶναι τὰ ὄντα κἀκεῖνος ᾤετο καὶ οἱ πολλοί.

παραπλησίως δὲ τούτοις καὶ Ἀλκμαίων ἔοικεν ὑπολαβεῖν περὶ ψυχῆς· φησὶ γὰρ αὐτὴν ἀθάνατον εἶναι διὰ τὸ ἐοικέναι τοῖς ἀθανάτοις· τοῦτο δ’ ὑπάρχειν αὐτῇ ὡς ἀεὶ κινουμένῃ· κινεῖσθαι γὰρ καὶ τὰ θεῖα πάντα συνεχῶς [405b] ἀεί, σελήνην, ἥλιον, τοὺς ἀστέρας καὶ τὸν οὐρανὸν ὅλον.

τῶν δὲ φορτικωτέρων καὶ ὕδωρ τινὲς ἀπεφήναντο, καθάπερ Ἵππων· πεισθῆναι δ’ ἐοίκασιν ἐκ τῆς γονῆς, ὅτι πάντων ὑγρά. καὶ γὰρ ἐλέγχει τοὺς αἷμα φάσκοντας τὴν ψυχήν, ὅτι ἡ γονὴ οὐχ αἷμα· ταύτην δ’ εἶναι τὴν πρώτην ψυχήν.

ἕτεροι δ’ αἷμα, καθάπερ Κριτίας, τὸ αἰσθάνεσθαι ψυχῆς οἰκειότατον ὑπολαμβάνοντες, τοῦτο δ’ ὑπάρχειν διὰ τὴν τοῦ αἵματος φύσιν. πάντα γὰρ τὰ στοιχεῖα κριτὴν εἴληφε, πλὴν τῆς γῆς· ταύτην δ’ οὐθεὶς ἀποπέφανται, πλὴν εἴ τις αὐτὴν εἴρηκεν ἐκ πάντων εἶναι τῶν στοιχείων ἢ πάντα.

ὁρίζονται δὴ πάντες τὴν ψυχὴν τρισὶν ὡς εἰπεῖν, κινήσει, αἰσθήσει, τῷ ἀσωμάτῳ· τούτων δ’ ἕκαστον ἀνάγεται πρὸς τὰς ἀρχάς. διὸ καὶ οἱ τῷ γινώσκειν ὁριζόμενοι αὐτὴν ἢ στοιχεῖον ἢ ἐκ τῶν στοιχείων ποιοῦσι, λέγοντες παραπλησίως ἀλλήλοις, πλὴν ἑνός· φασὶ γὰρ γινώσκεσθαι τὸ ὅμοιον τῷ ὁμοίῳ· ἐπειδὴ γὰρ ἡ ψυχὴ πάντα γινώσκει, συνιστᾶσιν αὐτὴν ἐκ πασῶν τῶν ἀρχῶν.

ὅσοι μὲν οὖν μίαν τινὰ λέγουσιν αἰτίαν καὶ στοιχεῖον ἕν, καὶ τὴν ψυχὴν ἓν τιθέασιν, οἷον πῦρ ἢ ἀέρα· οἱ δὲ πλείους λέγοντες τὰς ἀρχὰς καὶ τὴν ψυχὴν πλείω ποιοῦσιν.

Ἀναξαγόρας δὲ μόνος ἀπαθῆ φησιν εἶναι τὸν νοῦν, καὶ κοινὸν οὐθὲν οὐθενὶ τῶν ἄλλων ἔχειν. τοιοῦτος δ’ ὢν πῶς γνωριεῖ καὶ διὰ τίν’ αἰτίαν, οὔτ’ ἐκεῖνος εἴρηκεν οὔτ’ ἐκ τῶν εἰρημένων συμφανές ἐστιν. ὅσοι δ’ ἐναντιώσεις ποιοῦσιν ἐν ταῖς ἀρχαῖς, καὶ τὴν ψυχὴν ἐκ τῶν ἐναντίων συνιστᾶσιν· οἱ δὲ θάτερον τῶν ἐναντίων, οἷον θερμὸν ἢ ψυχρὸν ἤ τι τοιοῦτον ἄλλο, καὶ τὴν ψυχὴν ὁμοίως ἕν τι τούτων τιθέασιν. διὸ καὶ τοῖς ὀνόμασιν ἀκολουθοῦσιν, οἱ μὲν τὸ θερμὸν λέγοντες, ὅτι διὰ τοῦτο καὶ τὸ ζῆν ὠνόμασται, οἱ δὲ τὸ ψυχρόν, <διὰ τὸ> διὰ τὴν ἀναπνοὴν καὶ τὴν κατάψυξιν καλεῖσθαι ψυχήν.

τὰ μὲν οὖν παραδεδομένα περὶ ψυχῆς, καὶ δι’ ἃς αἰτίας λέγουσιν οὕτω, ταῦτ’ ἐστίν.

Κεφάλαιο 3

[405a31] Ἐπισκεπτέον δὲ πρῶτον μὲν περὶ κινήσεως· ἴσως γὰρ οὐ μόνον ψεῦδός ἐστι τὸ τὴν οὐσίαν αὐτῆς τοιαύτην εἶναι οἵαν [406a] φασὶν οἱ λέγοντες ψυχὴν εἶναι τὸ κινοῦν ἑαυτὸ ἢ δυνάμενον κινεῖν, ἀλλ’ ἕν τι τῶν ἀδυνάτων τὸ ὑπάρχειν αὐτῇ κίνησιν.

ὅτι μὲν οὖν οὐκ ἀναγκαῖον τὸ κινοῦν καὶ αὐτὸ κινεῖσθαι, πρότερον εἴρηται. διχῶς δὲ κινουμένου παντός-ἢ γὰρ καθ’ ἕτερον ἢ καθ’ αὑτό· καθ’ ἕτερον δὲ λέγομεν ὅσα κινεῖται τῷ ἐν κινουμένῳ εἶναι, οἷον πλωτῆρες· οὐ γὰρ ὁμοίως κινοῦνται τῷ πλοίῳ· τὸ μὲν γὰρ καθ’ αὑτὸ κινεῖται, οἱ δὲ τῷ ἐν κινουμένῳ εἶναι (δῆλον δ’ ἐπὶ τῶν μορίων· οἰκεία μὲν γάρ ἐστι κίνησις ποδῶν βάδισις, αὕτη δὲ καὶ ἀνθρώπων· οὐχ ὑπάρχει δὲ τοῖς πλωτῆρσι τόδε) -διχῶς δὴ λεγομένου τοῦ κινεῖσθαι νῦν ἐπισκοποῦμεν περὶ τῆς ψυχῆς εἰ καθ’ αὑτὴν κινεῖται καὶ μετέχει κινήσεως.

[406a12] τεσσάρων δὲ κινήσεων οὐσῶν, φορᾶς ἀλλοιώσεως φθίσεως αὐξήσεως, ἢ μίαν τούτων κινοῖτ’ ἂν ἢ πλείους ἢ πάσας. εἰ δὲ κινεῖται μὴ κατὰ συμβεβηκός, φύσει ἂν ὑπάρχοι κίνησις αὐτῇ· εἰ δὲ τοῦτο, καὶ τόπος· πᾶσαι γὰρ αἱ λεχθεῖσαι κινήσεις ἐν τόπῳ. εἰ δ’ ἐστὶν ἡ οὐσία τῆς ψυχῆς τὸ κινεῖν ἑαυτήν, οὐ κατὰ συμβεβηκὸς αὐτῇ τὸ κινεῖσθαι ὑπάρξει, ὥσπερ τῷ λευκῷ ἢ τῷ τριπήχει· κινεῖται γὰρ καὶ ταῦτα, ἀλλὰ κατὰ συμβεβηκός· ᾧ γὰρ ὑπάρχουσιν, ἐκεῖνο κινεῖται, τὸ σῶμα. διὸ καὶ οὐκ ἔστι τόπος αὐτῶν· τῆς δὲ ψυχῆς ἔσται, εἴπερ φύσει κινήσεως μετέχει.

ἔτι δ’ εἰ φύσει κινεῖται, κἂν βίᾳ κινηθείη· κἂν εἰ βίᾳ, καὶ φύσει. τὸν αὐτὸν δὲ τρόπον ἔχει καὶ περὶ ἠρεμίας· εἰς ὃ γὰρ κινεῖται φύσει, καὶ ἠρεμεῖ ἐν τούτῳ φύσει· ὁμοίως δὲ καὶ εἰς ὃ κινεῖται βίᾳ, καὶ ἠρεμεῖ ἐν τούτῳ βίᾳ. ποῖαι δὲ βίαιοι τῆς ψυχῆς κινήσεις ἔσονται καὶ ἠρεμίαι, οὐδὲ πλάττειν βουλομένοις ῥᾴδιον ἀποδοῦναι.

ἔτι δ’ εἰ μὲν ἄνω κινήσεται, πῦρ ἔσται, εἰ δὲ κάτω, γῆ· τούτων γὰρ τῶν σωμάτων αἱ κινήσεις αὗται·

ὁ δ’ αὐτὸς λόγος καὶ περὶ τῶν μεταξύ. ἔτι δ’ ἐπεὶ φαίνεται κινοῦσα τὸ σῶμα, ταύτας εὔλογον κινεῖν τὰς κινήσεις ἃς καὶ αὐτὴ κινεῖται. εἰ δὲ τοῦτο, καὶ ἀντιστρέψασιν εἰπεῖν ἀληθὲς ὅτι ἣν τὸ [406b] σῶμα κινεῖται, ταύτην καὶ αὐτή. τὸ δὲ σῶμα κινεῖται φορᾷ· ὥστε καὶ ἡ ψυχὴ μεταβάλλοι ἂν κατὰ τὸ σῶμα ἢ ὅλη ἢ κατὰ μόρια μεθισταμένη. εἰ δὲ τοῦτ’ ἐνδέχεται, καὶ ἐξελθοῦσαν εἰσιέναι πάλιν ἐνδέχοιτ’ ἄν· τούτῳ δ’ ἕποιτ’ ἂν τὸ ἀνίστασθαι τὰ τεθνεῶτα τῶν ζῴων.

τὴν δὲ κατὰ συμβεβηκὸς κίνησιν κἂν ὑφ’ ἑτέρου κινοῖτο· ὠσθείη γὰρ ἂν βίᾳ τὸ ζῷον. οὐ δεῖ δὲ ᾧ τὸ ὑφ’ ἑαυτοῦ κινεῖσθαι ἐν τῇ οὐσίᾳ, τοῦθ’ ὑπ’ ἄλλου κινεῖσθαι, πλὴν εἰ μὴ κατὰ συμβεβηκός, ὥσπερ οὐδὲ τὸ καθ’ αὑτὸ ἀγαθὸν ἢ δι’ αὑτό, τὸ μὲν δι’ ἄλλο εἶναι, τὸ δ’ ἑτέρου ἕνεκεν. τὴν δὲ ψυχὴν μάλιστα φαίη τις ἂν ὑπὸ τῶν αἰσθητῶν κινεῖσθαι, εἴπερ κινεῖται.

ἀλλὰ μὴν καὶ εἰ κινεῖ [406b12] γε αὐτὴ αὑτήν, καὶ αὐτὴ κινοῖτ’ ἄν, ὥστ’ εἰ πᾶσα κίνησις ἔκστασίς ἐστι τοῦ κινουμένου ᾗ κινεῖται, καὶ ἡ ψυχὴ ἐξίσταιτ’ ἂν ἐκ τῆς οὐσίας, εἰ μὴ κατὰ συμβεβηκὸς ἑαυτὴν κινεῖ, ἀλλ’ ἐστὶν ἡ κίνησις τῆς οὐσίας αὐτῆς καθ’ αὑτήν.

ἔνιοι δὲ καὶ κινεῖν φασι τὴν ψυχὴν τὸ σῶμα ἐν ᾧ ἐστιν, ὡς αὐτὴ κινεῖται, οἷον Δημόκριτος, παραπλησίως λέγων Φιλίππῳ τῷ κωμῳδοδιδασκάλῳ· φησὶ γὰρ τὸν Δαίδαλον κινουμένην ποιῆσαι τὴν ξυλίνην Ἀφροδίτην, ἐγχέαντ’ ἄργυρον χυτόν· ὁμοίως δὲ καὶ Δημόκριτος λέγει· κινουμένας γάρ φησι τὰς ἀδιαιρέτους σφαίρας, διὰ τὸ πεφυκέναι μηδέποτε μένειν, συνεφέλκειν καὶ κινεῖν τὸ σῶμα πᾶν. ἡμεῖς δ’ ἐρωτήσομεν εἰ καὶ ἠρέμησιν ποιεῖ τοῦτο αὐτό· πῶς δὲ ποιήσει, χαλεπὸν ἢ καὶ ἀδύνατον εἰπεῖν. ὅλως δ’ οὐχ οὕτω φαίνεται κινεῖν ἡ ψυχὴ τὸ ζῷον, ἀλλὰ διὰ προαιρέσεώς τινος καὶ νοήσεως.

τὸν αὐτὸν δὲ τρόπον καὶ ὁ Τίμαιος φυσιολογεῖ τὴν ψυχὴν κινεῖν τὸ σῶμα· τῷ γὰρ κινεῖσθαι αὐτὴν καὶ τὸ σῶμα κινεῖν διὰ τὸ συμπεπλέχθαι πρὸς αὐτό. συνεστηκυῖαν γὰρ ἐκ τῶν στοιχείων καὶ μεμερισμένην κατὰ τοὺς ἁρμονικοὺς ἀριθμούς, ὅπως αἴσθησίν τε σύμφυτον ἁρμονίας ἔχῃ καὶ τὸ πᾶν φέρηται συμφώνους φοράς, τὴν εὐθυωρίαν εἰς κύκλον κατέκαμψεν· καὶ διελὼν ἐκ τοῦ ἑνὸς δύο κύκλους διссαχῇ συνημμένους [407a] πάλιν τὸν ἕνα διεῖλεν εἰς ἑπτὰ κύκλους, ὡς οὔσας τὰς τοῦ οὐρανοῦ φορὰς τὰς τῆς ψυχῆς κινήσεις.

[407a2] πρῶτον μὲν οὖν οὐ καλῶς τὸ λέγειν τὴν ψυχὴν μέγεθος εἶναι· τὴν γὰρ τοῦ παντὸς δῆλον ὅτι τοιαύτην εἶναι βούλεται οἷόν ποτ’ ἐστὶν ὁ καλούμενος νοῦς (οὐ γὰρ δὴ οἷόν γ’ ἡ αἰσθητική, οὐδ’ οἷον ἡ ἐπιθυμητική· τούτων γὰρ ἡ κίνησις οὐ κυκλοφορία)·

ὁ δὲ νοῦς εἷς καὶ συνεχὴς ὥσπερ καὶ ἡ νόησις· ἡ δὲ νόησις τὰ νοήματα· ταῦτα δὲ τῷ ἐφεξῆς ἕν, ὡς ὁ ἀριθμός, ἀλλ’ οὐχ ὡς τὸ μέγεθος· διόπερ οὐδ’ ὁ νοῦς οὕτω συνεχής, ἀλλ’ ἤτοι ἀμερὴς ἢ οὐχ ὡς μέγεθός τι συνεχής. πῶς γὰρ δὴ καὶ νοήσει, μέγεθος ὤν, πότερον ὁτῳοῦν τῶν μορίων τῶν αὑτοῦ, μορίων δ’ ἤτοι κατὰ μέγεθος ἢ κατὰ στιγμήν, εἰ δεῖ καὶ τοῦτο μόριον εἰπεῖν;

εἰ μὲν οὖν κατὰ στιγμήν, αὗται δ’ ἄπειροι, δῆλον ὡς οὐδέποτε διέξεισιν· εἰ δὲ κατὰ μέγεθος, πολλάκις ἢ ἀπειράκις νοήσει τὸ αὐτό. φαίνεται δὲ καὶ ἅπαξ ἐνδεχόμενον. εἰ δ’ ἱκανὸν θιγεῖν ὁτῳοῦν τῶν μορίων, τί δεῖ κύκλῳ κινεῖσθαι, ἢ καὶ ὅλως μέγεθος ἔχειν; εἰ δ’ ἀναγκαῖον νοῆσαι τῷ ὅλῳ κύκλῳ θιγόντα, τίς ἐστιν ἡ τοῖς μορίοις θίξις; ἔτι δὲ πῶς νοήσει τὸ μεριστὸν ἀμερεῖ ἢ τὸ ἀμερὲς μεριστῷ; ἀναγκαῖον δὲ τὸν νοῦν εἶναι τὸν κύκλον τοῦτον· νοῦ μὲν γὰρ κίνησις νόησις κύκλου δὲ περιφορά·

εἰ οὖν ἡ νόησις περιφορά, καὶ νοῦς ἂν εἴη ὁ κύκλος οὗ ἡ τοιαύτη περιφορὰ νόησις. ἀεὶ δὲ δὴ τί νοήσει (δεῖ γάρ, εἴπερ ἀΐδιος ἡ περιφορά); τῶν μὲν γὰρ πρακτικῶν νοήσεων ἔστι πέρατα (πᾶσαι γὰρ ἑτέρου χάριν), αἱ δὲ θεωρητικαὶ τοῖς λόγοις ὁμοίως ὁρίζονται· λόγος δὲ πᾶς ὁρισμὸς ἢ ἀπόδειξις· αἱ μὲν οὖν ἀποδείξεις καὶ ἀπ’ ἀρχῆς καὶ ἔχουσαί πως τέλος, τὸν συλλογισμὸν ἢ τὸ συμπέρασμα (εἰ δὲ μὴ περατοῦνται, ἀλλ’ οὐκ ἀνακάμπτουσί γε πάλιν ἐπ’ ἀρχήν, προσλαμβάνουσαι δ’ ἀεὶ μέσον καὶ ἄκρον εὐθυποροῦσιν· ἡ δὲ περιφορὰ πάλιν ἐπ’ ἀρχὴν ἀνακάμπτει)· οἱ δ’ ὁρισμοὶ πάντες πεπερασμένοι.

ἔτι εἰ ἡ αὐτὴ περιφορὰ πολλάκις, δεήσει πολλάκις νοεῖν τὸ αὐτό.

ἔτι δ’ ἡ νόησις ἔοικεν ἠρεμήσει τινὶ καὶ ἐπιστάσει μᾶλλον ἢ κινήσει· τὸν αὐτὸν δὲ τρόπον καὶ ὁ συλλογισμός.

ἀλλὰ μὴν οὐδὲ μακάριόν γε τὸ μὴ [407b] ῥᾴδιον ἀλλὰ βίαιον· εἰ δ’ ἐστὶν ἡ κίνησις αὐτῆς ᾗ οὐσία, παρὰ φύσιν ἂν κινοῖτο. ἐπίπονον δὲ καὶ τὸ μεμῖχθαι τῷ σώματι μὴ δυνάμενον ἀπολυθῆναι, καὶ προσέτι φευκτόν, εἴπερ βέλτιον τῷ νῷ μὴ μετὰ σώματος εἶναι, καθάπερ εἴωθέ τε λέγεσθαι καὶ πολλοῖς συνδοκεῖ.

ἄδηλος δὲ καὶ τοῦ κύκλῳ φέρεσθαι τὸν οὐρανὸν ἡ αἰτία· οὔτε γὰρ τῆς ψυχῆς ἡ οὐσία αἰτία τοῦ κύκλῳ φέρεσθαι, ἀλλὰ κατὰ συμβεβηκὸς οὕτω κινεῖται, οὔτε τὸ σῶμα αἴτιον, ἀλλ’ ἡ ψυχὴ μᾶλλον ἐκείνῳ. ἀλλὰ μὴν οὐδ’ ὅτι βέλτιον λέγεται· καίτοι γ’ ἐχρῆν διὰ τοῦτο τὸν θεὸν κύκλῳ ποιεῖν φέρεσθαι τὴν ψυχήν, ὅτι βέλτιον αὐτῇ τὸ κινεῖσθαι τοῦ μένειν, κινεῖσθαι δ’ οὕτως ἢ ἄλλως.

ἐπεὶ δ’ ἐστὶν ἡ τοιαύτη σκέψις ἑτέρων λόγων οἰκειοτέρα, ταύτην μὲν ἀφῶμεν τὸ νῦν. ἐκεῖνο δὲ ἄτοπον συμβαίνει καὶ τούτῳ τῷ λόγῳ καὶ τοῖς πλείστοις τῶν περὶ ψυχῆς· συνάπτουσι γὰρ καὶ τιθέασιν εἰς σῶμα τὴν ψυχήν, οὐθὲν προσδιορίσαντες διὰ τίν’ αἰτίαν καὶ πῶς ἔχοντος τοῦ σώματος. καίτοι δόξειεν ἂν τοῦτ’ ἀναγκαῖον εἶναι· διὰ γὰρ τὴν κοινωνίαν τὸ μὲν ποιεῖ τὸ δὲ πάσχει καὶ τὸ μὲν κινεῖται τὸ δὲ κινεῖ, τούτων δ’ οὐθὲν ὑπάρχει πρὸς ἄλληλα τοῖς τυχοῦσιν.

οἱ δὲ μόνον ἐπιχειροῦσι λέγειν ποῖόν τι ἡ ψυχή, περὶ δὲ τοῦ δεξομένου σώματος οὐθὲν ἔτι προσδιορίζουσιν, ὥσπερ ἐνδεχόμενον κατὰ τοὺς

Πυθαγορικοὺς μύθους τὴν τυχοῦσαν ψυχὴν εἰς τὸ τυχὸν ἐνδύεσθαι σῶμα. δοκεῖ γὰρ ἕκαστον ἴδιον ἔχειν εἶδος καὶ μορφήν, παραπλήσιον δὲ λέγουσιν ὥσπερ εἴ τις φαίη τὴν τεκτονικὴν εἰς αὐλοὺς ἐνδύεσθαι· δεῖ γὰρ τὴν μὲν τέχνην χρῆσθαι τοῖς ὀργάνοις, τὴν δὲ ψυχὴν τῷ σώματι.

Κεφάλαιο 4

[407b27] Καὶ ἄλλη δέ τις δόξα παραδέδοται περὶ ψυχῆς, πιθανὴ μὲν πολλοῖς οὐδεμιᾶς ἧττον τῶν λεγομένων, λόγον δ’ ὥσπερ εὐθύνοις δεδωκυῖα κἀν τοῖς ἐν κοινῷ γεγενημένοις λόγοις. ἁρμονίαν γάρ τινα αὐτὴν λέγουσι· καὶ γὰρ τὴν ἁρμονίαν κρᾶσιν καὶ σύνθεσιν ἐναντίων εἶναι, καὶ τὸ σῶμα συγκεῖσθαι ἐξ ἐναντίων.

καίτοι γε ἡ μὲν ἁρμονία λόγος τίς ἐστι τῶν μιχθέντων ἢ σύνθεσις, τὴν δὲ ψυχὴν οὐδέτερον οἷόν τ’ εἶναι τούτων. ἔτι δὲ τὸ κινεῖν οὐκ ἔστιν ἁρμονίας, ψυχῇ δὲ [408a] πάντες ἀπονέμουσι τοῦτο μάλισθ’ ὡς εἰπεῖν. ἁρμόζει δὲ μᾶλλον καθ’ ὑγιείας λέγειν ἁρμονίαν, καὶ ὅλως τῶν σωματικῶν ἀρετῶν, ἢ κατὰ ψυχῆς. φανερώτατον δ’ εἴ τις ἀποδιδόναι πειραθείη τὰ πάθη καὶ τὰ ἔργα τῆς ψυχῆς ἁρμονίᾳ τινί· χαλεπὸν γὰρ ἐφαρμόζειν.

ἔτι δ’ εἰ λέγομεν τὴν ἁρμονίαν εἰς δύο ἀποβλέποντες, κυριώτατα μέν, τῶν μεγεθῶν ἐν τοῖς ἔχουσι κίνησιν καὶ θέσιν, τὴν σύνθεσιν αὐτῶν, ἐπειδὰν οὕτω συναρμόζωσιν ὥστε μηδὲν συγγενὲς παραδέχεσθαι, ἐντεῦθεν δὲ καὶ τὸν τῶν μεμιγμένων λόγον-οὐδετέρως μὲν οὖν εὔλογον, ἡ δὲ σύνθεσις τῶν τοῦ σώματος μερῶν λίαν εὐεξέταστος. πολλαί τε γὰρ αἱ συνθέσεις τῶν μερῶν καὶ πολλαχῶς· τίνος οὖν ἢ πῶς ὑπολαβεῖν τὸν νοῦν χρὴ σύνθεσιν εἶναι, ἢ καὶ τὸ αἰσθητικὸν ἢ ὀρεκτικόν; ὁμοίως δὲ ἄτοπον καὶ τὸ τὸν λόγον τῆς μίξεως εἶναι τὴν ψυχήν· οὐ γὰρ τὸν αὐτὸν ἔχει λόγον ἡ μίξις τῶν στοιχείων καθ’ ἣν σὰρξ καὶ καθ’ ἣν ὀστοῦν. συμβήσεται οὖν πολλάς τε ψυχὰς ἔχειν καὶ κατὰ πᾶν τὸ σῶμα, εἴπερ πάντα μὲν ἐκ τῶν στοιχείων μεμιγμένων, ὁ δὲ τῆς μίξεως λόγος ἁρμονία καὶ ψυχή.

ἀπαιτήσειε δ’ ἄν τις τοῦτό γε καὶ παρ’ Ἐμπεδοκλέους· ἕκαστον γὰρ αὐτῶν λόγῳ τινί φησιν εἶναι· πότερον οὖν ὁ λόγος ἐστὶν ἡ ψυχή, ἢ μᾶλλον ἕτερόν τι οὖσα ἐγγίνεται τοῖς μέρεσιν; ἔτι δὲ πότερον ἡ φιλία τῆς τυχούσης αἰτία μίξεως ἢ τῆς κατὰ τὸν λόγον, καὶ αὕτη πότερον ὁ λόγος ἐστὶν ἢ παρὰ τὸν λόγον ἕτερόν τι;

ταῦτα μὲν οὖν ἔχει τοιαύτας ἀπορίας. εἰ δ’ ἐστὶν ἕτερον ἡ ψυχὴ τῆς μίξεως, τί δή ποτε ἅμα τῷ σαρκὶ εἶναι ἀναιρεῖται καὶ τὸ τοῖς ἄλλοις μορίοις τοῦ ζῴου; πρὸς δὲ τούτοις εἴπερ μὴ ἕκαστον τῶν μορίων ψυχὴν ἔχει, εἰ μὴ ἔστιν ἡ ψυχὴ ὁ λόγος τῆς μίξεως, τί ἐστιν ὃ φθείρεται τῆς ψυχῆς ἀπολιπούσης;

ὅτι μὲν οὖν οὔθ’ ἁρμονίαν οἷόν τ’ εἶναι τὴν ψυχὴν οὔτε κύκλῳ περιφέρεσθαι, δῆλον ἐκ τῶν εἰρημένων. κατὰ συμβεβηκὸς δὲ κινεῖσθαι, καθάπερ εἴπομεν, ἔστι, καὶ κι- νεῖν ἑαυτήν, οἷον κινεῖσθαι μὲν ἐν ᾧ ἐστι, τοῦτο δὲ κινεῖσθαι ὑπὸ τῆς ψυχῆς· ἄλλως δ’ οὐχ οἷόν τε κινεῖσθαι κατὰ τόπον αὐτήν.

εὐλογώτερον δ’ ἀπορήσειεν ἄν τις περὶ αὐτῆς ὡς [408b] κινουμένης, εἰς τὰ τοιαῦτα ἀποβλέψας· φαμὲν γὰρ τὴν ψυχὴν λυπεῖσθαι χαίρειν, θαρρεῖν φοβεῖσθαι, ἔτι δὲ ὀργίζεσθαί τε καὶ αἰσθάνεσθαι καὶ διανοεῖσθαι· ταῦτα δὲ πάντα κινήσεις εἶναι δοκοῦσιν. ὅθεν οἰηθείη τις ἂν αὐτὴν κινεῖσθαι·

τὸ δ’ οὐκ ἔστιν ἀναγκαῖον. εἰ γὰρ καὶ ὅτι μάλιστα τὸ λυπεῖσθαι ἢ χαίρειν ἢ διανοεῖσθαι κινήσεις εἰσί, καὶ ἕκαστον κινεῖσθαί τι τούτων, τὸ δὲ κινεῖσθαί ἐστιν ὑπὸ τῆς ψυχῆς, οἷον τὸ ὀργίζεσθαι ἢ φοβεῖσθαι τὸ τὴν καρδίαν ὡδὶ κινεῖσθαι, τὸ δὲ διανοεῖσθαι ἤ τι τοιοῦτον ἴσως ἢ ἕτερόν τι, τούτων δὲ συμβαίνει τὰ μὲν κατὰ φοράν τινων κινουμένων, τὰ δὲ κατ’ ἀλλοίωσιν (ποῖα δὲ καὶ πῶς, ἕτερός ἐστι λόγος),

τὸ δὴ λέγειν ὀργίζεσθαι τὴν ψυχὴν ὅμοιον κἂν εἴ τις λέγοι τὴν ψυχὴν ὑφαίνειν ἢ οἰκοδομεῖν· βέλτιον γὰρ ἴσως μὴ λέγειν τὴν ψυχὴν ἐλεεῖν ἢ μανθάνειν ἢ διανοεῖσθαι, ἀλλὰ τὸν ἄνθρωπον τῇ ψυχῇ· τοῦτο δὲ μὴ ὡς ἐν ἐκείνῃ τῆς κινήσεως οὔσης, ἀλλ’ ὁτὲ μὲν μέχρι ἐκείνης, ὁτὲ δ’ ἀπ’ ἐκείνης, οἷον ἡ μὲν αἴσθησις ἀπὸ τωνδί, ἡ δ’ ἀνάμνησις ἀπ’ ἐκείνης ἐπὶ τὰς ἐν τοῖς αἰσθητηρίοις κινήσεις ἢ μονάς.

[408b18] ὁ δὲ νοῦς ἔοικεν ἐγγίνεσθαι οὐσία τις οὖσα, καὶ οὐ φθείρεσθαι. μάλιστα γὰρ ἐφθείρετ’ ἂν ὑπὸ τῆς ἐν τῷ γήρᾳ ἀμαυρώσεως, νῦν δ’ ὥσπερ ἐπὶ τῶν αἰσθητηρίων συμβαίνει· εἰ γὰρ λάβοι ὁ πρεσβύτης ὄμμα τοιονδί, βλέποι ἂν ὥσπερ καὶ ὁ νέος. ὥστε τὸ γῆρας οὐ τῷ τὴν ψυχήν τι πεπονθέναι, ἀλλ’ ἐν ᾧ, καθάπερ ἐν μέθαις καὶ νόσοις.

καὶ τὸ νοεῖν δὴ καὶ τὸ θεωρεῖν μαραίνεται ἄλλου τινὸς ἔσω φθειρομένου, αὐτὸ δὲ ἀπαθές ἐστιν. τὸ δὲ διανοεῖσθαι καὶ φιλεῖν ἢ μισεῖν οὐκ ἔστιν ἐκείνου πάθη, ἀλλὰ τουδὶ τοῦ ἔχοντος ἐκεῖνο, ᾗ ἐκεῖνο ἔχει. διὸ καὶ τούτου φθειρομένου οὔτε μνημονεύει οὔτε φιλεῖ· οὐ γὰρ ἐκείνου ἦν, ἀλλὰ τοῦ κοινοῦ, ὃ ἀπόλωλεν· ὁ δὲ νοῦς ἴσως θειότερόν τι καὶ ἀπαθές ἐστιν.

ὅτι μὲν οὖν οὐχ οἷόν τε κινεῖσθαι τὴν ψυχήν, φανερὸν ἐκ τούτων· εἰ δ’ ὅλως μὴ κινεῖται, δῆλον ὡς οὐδ’ ὑφ’ ἑαυτῆς.

πολὺ δὲ τῶν εἰρημένων ἀλογώτατον τὸ λέγειν ἀριθμὸν εἶναι τὴν ψυχὴν κινοῦνθ’ ἑαυτόν· ὑπάρχει γὰρ αὐτοῖς ἀδύνατα πρῶτα μὲν τὰ ἐκ τοῦ κινεῖσθαι συμβαίνοντα, ἴδια δ’ ἐκ τοῦ [409a] λέγειν αὐτὴν ἀριθμόν. πῶς γὰρ χρὴ νοῆσαι μονάδα κινουμένην, καὶ ὑπὸ τίνος, καὶ πῶς, ἀμερῆ καὶ ἀδιάφορον οὖσαν; ᾗ γάρ ἐστι κινητικὴ καὶ κινητή, διαφέρειν δεῖ. ἔτι δ’ ἐπεί φασι κινηθεῖσαν γραμμὴν ἐπίπεδον ποιεῖν, στιγμὴν δὲ γραμμήν, καὶ αἱ τῶν μονάδων κινήσεις γραμμαὶ ἔσονται· ἡ γὰρ στιγμὴ μονάς ἐστι θέσιν ἔχουσα, ὁ δ' ἀριθμὸς τῆς ψυχῆς ἤδη πού ἐστι καὶ θέσιν ἔχει.

ἔτι δ' ἀριθμοῦ μὲν ἐὰν ἀφέλῃ τις ἀριθμὸν ἢ μονάδα, λείπεται ἄλλος ἀριθμός· τὰ δὲ φυτὰ καὶ τῶν ζῴων πολλὰ διαιρούμενα ζῇ καὶ δοκεῖ τὴν αὐτὴν ψυχὴν ἔχειν τῷ εἴδει.

δόξειε δ' ἂν οὐθὲν διαφέρειν μονάδας λέγειν ἢ σωμάτια μικρά· καὶ γὰρ ἐκ τῶν Δημοκρίτου σφαιρίων ἐὰν γένωνται στιγμαί, μόνον δὲ μένῃ τὸ ποσόν, ἔσται [τι] ἐν αὐτῷ τὸ μὲν κινοῦν τὸ δὲ κινούμενον, ὥσπερ ἐν τῷ συνεχεῖ· οὐ γὰρ διὰ τὸ μεγέθει διαφέρειν ἢ μικρότητι συμβαίνει τὸ λεχθέν, ἀλλ' ὅτι ποσόν· διὸ ἀναγκαῖον εἶναί τι τὸ κινῆσον τὰς μονάδας. εἰ δ' ἐν τῷ ζῴῳ τὸ κινοῦν ἡ ψυχή, καὶ ἐν τῷ ἀριθμῷ, ὥστε οὐ τὸ κινοῦν καὶ κινούμενον ἡ ψυχή, ἀλλὰ τὸ κινοῦν μόνον.

ἐνδέχεται δὲ δὴ πῶς μονάδα ταύτην εἶναι; δεῖ γὰρ ὑπάρχειν τινὰ αὐτῇ διαφορὰν πρὸς τὰς ἄλλας, στιγμῆς δὲ μοναδικῆς τίς ἂν εἴη διαφορὰ πλὴν θέσις; εἰ μὲν οὖν εἰσὶν ἕτεραι αἱ ἐν τῷ σώματι μονάδες καὶ αἱ στιγμαί, ἐν τῷ αὐτῷ ἔσονται αἱ μονάδες· καθέξει γὰρ <ἑκάστη> χώραν στιγμῆς. καίτοι τί κωλύει ἐν τῷ αὐτῷ εἶναι, εἰ δύο, καὶ ἄπειρα; ὧν γὰρ ὁ τόπος ἀδιαίρετος, καὶ αὐτά.

εἰ δ' αἱ ἐν τῷ σώματι στιγμαὶ ὁ ἀριθμὸς ὁ τῆς ψυχῆς, ἢ εἰ ὁ τῶν ἐν τῷ σώματι στιγμῶν ἀριθμὸς ἡ ψυχή, διὰ τί οὐ πάντα ψυχὴν ἔχουσι τὰ σώματα; στιγμαὶ γὰρ ἐν ἅπασι δοκοῦσιν εἶναι καὶ ἄπειροι.

ἔτι δὲ πῶς οἷόν τε χωρίζεσθαι τὰς στιγμὰς καὶ ἀπολύεσθαι τῶν σωμάτων, εἴ γε μὴ διαιροῦνται αἱ γραμμαὶ εἰς στιγμάς;

Κεφάλαιο 5

[409a31] Συμβαίνει δέ, καθάπερ εἴπομεν, τῇ μὲν ταὐτὸ λέγειν τοῖς σῶμά τι λεπτομερὲς αὐτὴν τιθεῖσι, τῇ δ’, ὥσπερ [409b] Δημόκριτος κινεῖσθαί φησιν ὑπὸ τῆς ψυχῆς, ἴδιον τὸ ἄτοπον. εἴπερ γάρ ἐστιν ἡ ψυχὴ ἐν παντὶ τῷ αἰσθανομένῳ σώματι, ἀναγκαῖον ἐν τῷ αὐτῷ δύο εἶναι σώματα, εἰ σῶμά τι ἡ ψυχή· τοῖς δ’ ἀριθμὸν λέγουσιν, ἐν τῇ μιᾷ στιγμῇ πολλὰς στιγμάς, καὶ πᾶν σῶμα ψυχὴν ἔχειν, εἰ μὴ διαφέρων τις ἀριθμὸς ἐγγίνεται καὶ ἄλλος τις τῶν ὑπαρχουσῶν ἐν τῷ σώματι στιγμῶν·

συμβαίνει τε κινεῖσθαι τὸ ζῷον ὑπὸ τοῦ ἀριθμοῦ, καθάπερ καὶ Δημόκριτον αὐτὸ ἔφαμεν κινεῖν· τί γὰρ διαφέρει σφαίρας λέγειν μικρὰς ἢ μονάδας μεγάλας, ἢ ὅλως μονάδας φερομένας; ἀμφοτέρως γὰρ ἀναγκαῖον κινεῖν τὸ ζῷον τῷ κινεῖσθαι ταύτας.

τοῖς δὴ συμπλέξασιν εἰς τὸ αὐτὸ κίνησιν καὶ ἀριθμὸν ταῦτά τε συμβαίνει καὶ πολλὰ ἕτερα τοιαῦτα· οὐ γὰρ μόνον ὁρισμὸν ψυχῆς ἀδύνατον τοιοῦτον εἶναι, ἀλλὰ καὶ συμβεβηκός. δῆλον δ’ εἴ τις ἐπιχειρήσειεν ἐκ τοῦ λόγου τούτου τὰ πάθη καὶ τὰ ἔργα τῆς ψυχῆς ἀποδιδόναι, οἷον λογισμούς, αἰσθήσεις, ἡδονάς, λύπας, ὅσα ἄλλα τοιαῦτα· ὥσπερ γὰρ εἴπομεν πρότερον, οὐδὲ μαντεύσασθαι ῥᾴδιον ἐξ αὐτῶν.

τριῶν δὲ τρόπων παραδεδομένων καθ’ οὓς ὁρίζονται τὴν ψυχήν, οἱ μὲν τὸ κινητικώτατον ἀπεφήναντο τῷ κινεῖν ἑαυτό, οἱ δὲ σῶμα τὸ λεπτομερέστατον ἢ τὸ ἀσωματώτατον τῶν ἄλλων. ταῦτα δὲ τίνας ἀπορίας τε καὶ ὑπεναντιώσεις ἔχει, διεληλύθαμεν σχεδόν·

λείπεται δ’ ἐπισκέψασθαι πῶς λέγεται τὸ ἐκ τῶν στοιχείων αὐτὴν εἶναι. λέγουσι μὲν γάρ, ἵν’ αἰσθάνηταί τε τῶν ὄντων καὶ ἕκαστον γνωρίζῃ· ἀναγκαῖον δὲ συμβαίνειν πολλὰ καὶ ἀδύνατα τῷ λόγῳ. τίθενται γὰρ γνωρίζειν τῷ ὁμοίῳ τὸ ὅμοιον, ὥσπερ ἂν εἰ τὴν ψυχὴν τὰ πράγματα τιθέντες. οὐκ ἔστι δὲ μόνα ταῦτα, πολλὰ δὲ καὶ ἕτερα, μᾶλλον δ’ ἴσως ἄπειρα τὸν ἀριθμὸν τὰ ἐκ τούτων. ἐξ ὧν μὲν οὖν ἐστιν ἕκαστον τούτων, ἔστω γινώσκειν τὴν ψυχὴν καὶ αἰσθάνεσθαι· ἀλλὰ τὸ σύνολον τίνι γνωριεῖ ἢ αἰσθήσεται, οἷον τί θεὸς ἢ ἄνθρωπος ἢ σὰρξ ἢ ὀστοῦν; ὁμοίως δὲ καὶ [410a] ἄλλο ὁτιοῦν τῶν συνθέτων· οὐ γὰρ ὁπωσοῦν ἔχοντα τὰ στοιχεῖα τούτων ἕκαστον, ἀλλὰ λόγῳ τινὶ καὶ συνθέσει, καθάπερ φησὶ καὶ Ἐμπεδοκλῆς τὸ ὀστοῦν·

ἡ δὲ χθὼν ἐπίηρος ἐν εὐστέρνοις χοάνοισιν
τὼ δύο τῶν ὀκτὼ μερέων λάχε νήστιδος αἴγλης,

τέσσαρα δ’ Ἡφαίστοιο· τὰ δ’ ὀστέα λευκὰ γένοντο.

οὐδὲν οὖν ὄφελος ἐνεῖναι τὰ στοιχεῖα ἐν τῇ ψυχῇ, εἰ μὴ καὶ οἱ λόγοι ἐνέσονται καὶ ἡ σύνθεσις· γνωριεῖ γὰρ ἕκαστον τὸ ὅμοιον, τὸ δ’ ὀστοῦν ἢ τὸν ἄνθρωπον οὐθέν, εἰ μὴ καὶ ταῦτ’ ἐνέσται. τοῦτο δ’ ὅτι ἀδύνατον, οὐθὲν δεῖ λέγειν· τίς γὰρ ἂν ἀπορήσειεν εἰ ἔνεστιν ἐν τῇ ψυχῇ λίθος ἢ ἄνθρωπος; ὁμοίως δὲ καὶ τὸ ἀγαθὸν καὶ τὸ μὴ ἀγαθόν· τὸν αὐτὸν δὲ τρόπον καὶ περὶ τῶν ἄλλων.

[410a13] ἔτι δὲ πολλαχῶς λεγομένου τοῦ ὄντος (σημαίνει γὰρ τὸ μὲν τόδε τι, τὸ δὲ ποσὸν ἢ ποιὸν ἢ καί τινα ἄλλην τῶν διαιρεθεισῶν κατηγοριῶν) πότερον ἐξ ἁπάντων ἔσται ἡ ψυχὴ ἢ οὔ; ἀλλ’ οὐ δοκεῖ κοινὰ πάντων εἶναι στοιχεῖα. ἆρ’ οὖν ὅσα τῶν οὐσιῶν, ἐκ τούτων μόνον; πῶς οὖν γινώσκει καὶ τῶν ἄλλων ἕκαστον; ἢ φήσουσιν ἑκάστου γένους εἶναι στοιχεῖα καὶ ἀρχὰς ἰδίας, ἐξ ὧν τὴν ψυχὴν συνεστάναι; ἔσται ἄρα ποσὸν καὶ ποιὸν καὶ οὐσία. ἀλλ’ ἀδύνατον ἐκ τῶν τοῦ ποσοῦ στοιχείων οὐσίαν εἶναι καὶ μὴ ποσόν. τοῖς δὴ λέγουσιν ἐκ πάντων ταῦτά τε καὶ τοιαῦθ’ ἕτερα συμβαίνει.

ἄτοπον δὲ καὶ τὸ φάναι μὲν ἀπαθὲς εἶναι τὸ ὅμοιον ὑπὸ τοῦ ὁμοίου, αἰσθάνεσθαι δὲ τὸ ὅμοιον τοῦ ὁμοίου καὶ γινώσκειν τῷ ὁμοίῳ τὸ ὅμοιον· τὸ δ’ αἰσθάνεσθαι πάσχειν τι καὶ κινεῖσθαι τιθέασιν· ὁμοίως δὲ καὶ τὸ νοεῖν τε καὶ γινώσκειν.

πολλὰς δ’ ἀπορίας καὶ δυσχερείας ἔχοντος τοῦ λέγειν, καθάπερ Ἐμπεδοκλῆς, ὡς τοῖς σωματικοῖς στοιχείοις ἕκαστα γνωρίζεται, καί, πρός, τῷ ὁμοίῳ, μαρτυρεῖ τὸ νῦν λεχθέν· ὅσα γάρ ἐστιν ἐν τοῖς τῶν ζῴων σώμασιν ἁπλῶς γῆς, οἷον [410b] ὀστᾶ νεῦρα τρίχες, οὐθενὸς αἰσθάνεσθαι δοκεῖ, ὥστ’ οὐδὲ τῶν ὁμοίων· καίτοι προσῆκεν. ἔτι δ’ ἑκάστῃ τῶν ἀρχῶν ἄγνοια πλείων ἢ σύνεσις ὑπάρξει· γνώσεται μὲν γὰρ ἓν ἑκάστη, πολλὰ δ’ ἀγνοήσει· πάντα γὰρ τἆλλα. συμβαίνει δ’ Ἐμπεδοκλεῖ γε καὶ ἀφρονέστατον εἶναι τὸν θεόν· μόνος γὰρ τῶν στοιχείων ἓν οὐ γνωριεῖ, τὸ νεῖκος, τὰ δὲ θνητὰ πάντα· ἐκ πάντων γὰρ ἕκαστον.

ὅλως τε διὰ τίν’ αἰτίαν οὐχ ἅπαντα ψυχὴν ἔχει τὰ ὄντα, ἐπειδὴ πᾶν ἤτοι στοιχεῖον ἢ ἐκ στοιχείου ἑνὸς ἢ πλειόνων ἢ πάντων; ἀναγκαῖον γάρ ἐστιν ἕν τι γινώσκειν ἢ τινὰ ἢ πάντα.

ἀπορήσειε δ’ ἄν τις καὶ τί ποτ’ ἐστὶ τὸ ἑνοποιοῦν αὐτά· ὕλῃ γὰρ ἔοικε τά γε στοιχεῖα, κυριώτατον δ’ ἐκεῖνο τὸ συνέχον, ὅ τί ποτ’ ἐστίν· τῆς δὲ ψυχῆς εἶναί τι κρεῖττον καὶ ἄρχον ἀδύνατον· ἀδυνατώτερον δ’ ἔτι τοῦ νοῦ· εὔλογον γὰρ τοῦτον εἶναι προγενέστατον καὶ κύριον κατὰ φύσιν, τὰ δὲ στοιχεῖά φασι πρῶτα τῶν ὄντων εἶναι.

πάντες δὲ καὶ οἱ διὰ τὸ γνωρίζειν καὶ αἰσθάνεσθαι τὰ ὄντα τὴν ψυχὴν ἐκ τῶν στοιχείων λέγοντες αὐτήν, καὶ οἱ τὸ κινητικώτατον, οὐ περὶ πάσης λέγουσι ψυχῆς. οὔτε γὰρ τὰ αἰσθανόμενα πάντα κινητικά (φαίνεται γὰρ εἶναί τινα μόνιμα τῶν ζῴων κατὰ τόπον· καίτοι δοκεῖ γε ταύτην μόνην τῶν κινήσεων κινεῖν ἡ ψυχὴ τὸ ζῷον)· ὁμοίως δὲ καὶ ὅσοι τὸν νοῦν καὶ τὸ αἰσθητικὸν ἐκ τῶν στοιχείων ποιοῦσιν. φαίνεται γὰρ τά τε φυτὰ ζῆν οὐ μετέχοντα [φορᾶς οὐδ’] αἰσθήσεως, καὶ τῶν ζῴων <τὰ> πολλὰ διάνοιαν οὐκ ἔχειν.

εἰ δέ τις καὶ ταῦτα παραχωρήσειε καὶ θείη τὸν νοῦν μέρος τι τῆς ψυχῆς, ὁμοίως δὲ καὶ τὸ αἰσθητικόν, οὐδ’ ἂν οὕτω λέγοιεν καθόλου περὶ πάσης ψυχῆς οὐδὲ περὶ ὅλης οὐδεμιᾶς.

τοῦτο δὲ πέπονθε καὶ ὁ ἐν τοῖς Ὀρφικοῖς καλουμένοις ἔπεσι λόγος· φησὶ γὰρ τὴν ψυχὴν ἐκ τοῦ ὅλου εἰσιέναι ἀναπνεόντων, φερομένην ὑπὸ τῶν ἀνέμων, οὐχ οἷόν τε δὲ τοῖς φυτοῖς τοῦτο συμβαίνειν οὐδὲ [411a] τῶν ζῴων ἐνίοις, εἴπερ μὴ πάντα ἀναπνέουσιν· τοῦτο δὲ λέληθε τοὺς οὕτως ὑπειληφότας.

(εἰ δὲ δεῖ τὴν ψυχὴν ἐκ τῶν στοιχείων ποιεῖν, οὐθὲν δεῖ ἐξ ἁπάντων· ἱκανὸν γὰρ θάτερον μέρος τῆς ἐναντιώσεως ἑαυτό τε κρίνειν καὶ τὸ ἀντικείμενον. καὶ γὰρ τῷ εὐθεῖ καὶ αὐτὸ καὶ τὸ καμπύλον γινώσκομεν· κριτὴς γὰρ ἀμφοῖν ὁ κανών, τὸ δὲ καμπύλον οὔθ’ ἑαυτοῦ οὔτε τοῦ εὐθέος.)

καὶ ἐν τῷ ὅλῳ δή τινες αὐτὴν μεμῖχθαί φασιν, ὅθεν ἴσως καὶ Θαλῆς ᾠήθη πάντα πλήρη θεῶν εἶναι.

τοῦτο δ’ ἔχει τινὰς ἀπορίας· διὰ τίνα γὰρ αἰτίαν ἐν μὲν τῷ ἀέρι ἢ τῷ πυρὶ οὖσα ἡ ψυχὴ οὐ ποιεῖ ζῷον, ἐν δὲ τοῖς μικτοῖς, καὶ ταῦτα βελτίων ἐν τούτοις εἶναι δοκοῦσα;

(ἐπιζητήσειε δ’ ἄν τις καὶ διὰ τίν’ αἰτίαν ἡ ἐν τῷ ἀέρι ψυχὴ τῆς ἐν τοῖς ζῴοις βελτίων ἐστὶ καὶ ἀθανατωτέρα.)

συμβαίνει δ’ ἀμφοτέρως ἄτοπον καὶ παράλογον· καὶ γὰρ τὸ λέγειν ζῷον τὸ πῦρ ἢ τὸν ἀέρα τῶν παραλογωτέρων ἐστί, καὶ τὸ μὴ λέγειν ζῷα ψυχῆς ἐνούσης ἄτοπον. ὑπολαβεῖν δ’ ἐοίκασιν εἶναι τὴν ψυχὴν ἐν τούτοις ὅτι τὸ ὅλον τοῖς μορίοις ὁμοειδές· ὥστ’ ἀναγκαῖον αὐτοῖς λέγειν καὶ τὴν ψυχὴν ὁμοειδῆ τοῖς μορίοις εἶναι, εἰ τῷ ἀπολαμβάνεσθαί τι τοῦ περιέχοντος ἐν τοῖς ζῴοις ἔμψυχα τὰ ζῷα γίνεται. εἰ δ’ ὁ μὲν ἀὴρ διασπώ- μενος ὁμοειδής, ἡ δὲ ψυχὴ ἀνομοιομερής, τὸ μέν τι αὐτῆς ὑπάρξει δῆλον ὅτι, τὸ δ’ οὐχ ὑπάρξει. ἀναγκαῖον οὖν αὐτὴν ἢ ὁμοιομερῆ εἶναι ἢ μὴ ἐνυπάρχειν ἐν ὁτῳοῦν μορίῳ τοῦ παντός.

φανερὸν οὖν ἐκ τῶν εἰρημένων ὡς οὔτε τὸ γινώσκειν ὑπάρχει τῇ ψυχῇ διὰ τὸ ἐκ τῶν στοιχείων εἶναι, οὔτε τὸ κινεῖσθαι αὐτὴν καλῶς οὐδ’ ἀληθῶς λέγεται.

ἐπεὶ δὲ τὸ γινώσκειν τῆς ψυχῆς ἐστι καὶ τὸ αἰσθάνεσθαί τε καὶ τὸ δοξάζειν, ἔτι δὲ τὸ ἐπιθυμεῖν καὶ βούλεσθαι καὶ ὅλως αἱ ὀρέξεις, γίνεται δὲ καὶ ἡ κατὰ τόπον κίνησις τοῖς ζῴοις ὑπὸ τῆς ψυχῆς, ἔτι δ’ αὔξη τε καὶ ἀκμὴ καὶ φθίσις, πότερον ὅλῃ [411b] τῇ ψυχῇ τούτων ἕκαστον ὑπάρχει, καὶ πάσῃ νοοῦμέν τε καὶ αἰσθανόμεθα καὶ κινούμεθα καὶ τῶν ἄλλων ἕκαστον ποιοῦμέν τε καὶ πάσχομεν, ἢ μορίοις ἑτέροις ἕτερα; καὶ τὸ ζῆν δὴ πότερον ἔν τινι τούτων ἐστὶν ἑνὶ ἢ καὶ ἐν πλείοσιν ἢ πᾶσιν, ἢ καὶ ἄλλο τι αἴτιον;

λέγουσι δή τινες μεριστὴν αὐτήν, καὶ ἄλλῳ μὲν νοεῖν ἄλλῳ δὲ ἐπιθυμεῖν. τί οὖν δή ποτε συνέχει τὴν ψυχήν, εἰ μεριστὴ πέφυκεν; οὐ γὰρ δὴ τό γε σῶμα· δοκεῖ γὰρ τοὐναντίον μᾶλλον ἡ ψυχὴ τὸ σῶμα συνέχειν· ἐξελθούσης γοῦν διαπνεῖται καὶ σήπεται. εἰ οὖν ἕτερόν τι μίαν αὐτὴν ποιεῖ, ἐκεῖνο μάλιστ’ ἂν εἴη ψυχή. δεήσει δὲ πάλιν κἀκεῖνο ζητεῖν πότερον ἓν ἢ πολυμερές. εἰ μὲν γὰρ ἕν, διὰ τί οὐκ εὐθέως καὶ ἡ ψυχὴ ἕν; εἰ δὲ μεριστόν, πάλιν ὁ λόγος ζητήσει τί τὸ συνέχον ἐκεῖνο, καὶ οὕτω δὴ πρόεισιν ἐπὶ τὸ ἄπειρον.

[411b14] ἀπορήσειε δ’ ἄν τις καὶ περὶ τῶν μορίων αὐτῆς, τίν’ ἔχει δύναμιν ἕκαστον ἐν τῷ σώματι. εἰ γὰρ ἡ ὅλη ψυχὴ πᾶν τὸ σῶμα συνέχει, προσήκει καὶ τῶν μορίων ἕκαστον συνέχειν τι τοῦ σώματος. τοῦτο δ’ ἔοικεν ἀδυνάτῳ· ποῖον γὰρ μόριον ἢ πῶς ὁ νοῦς συνέξει, χαλεπὸν καὶ πλάσαι.

φαίνεται δὲ καὶ τὰ φυτὰ διαιρούμενα ζῆν καὶ τῶν ζῴων ἔνια τῶν ἐντόμων, ὡς τὴν αὐτὴν ἔχοντα ψυχὴν τῷ εἴδει, εἰ καὶ μὴ ἀριθμῷ· ἑκάτερον γὰρ τῶν μορίων αἴσθησιν ἔχει καὶ κινεῖται κατὰ τόπον ἐπί τινα χρόνον. εἰ δὲ μὴ διατελοῦσιν, οὐθὲν ἄτοπον· ὄργανα γὰρ οὐκ ἔχουσιν ὥστε σώζειν τὴν φύσιν. ἀλλ’ οὐδὲν ἧττον ἐν ἑκατέρῳ τῶν μορίων ἅπαντ’ ἐνυπάρχει τὰ μόρια τῆς ψυχῆς, καὶ ὁμοειδῆ ἐστιν ἀλλήλοις καὶ τῇ ὅλῃ, ἀλλήλοις μὲν ὡς οὐ χωριστὰ ὄντα, τῇ δ’ ὅλῃ ψυχῇ ὡς οὐ διαιρετῇ οὔσῃ.

ἔοικε δὲ καὶ ἡ ἐν τοῖς φυτοῖς ἀρχὴ ψυχή τις εἶναι· μόνης γὰρ ταύτης κοινωνεῖ καὶ ζῷα καὶ φυτά, καὶ αὕτη μὲν χωρίζεται τῆς αἰσθητικῆς ἀρχῆς, αἴσθησιν δ’ οὐθὲν ἄνευ ταύτης ἔχει.

Βιβλίο B

Κεφάλαιο 1

[412a] 1. Τὰ μὲν δὴ ὑπὸ τῶν πρότερον παραδεδομένα περὶ ψυχῆς εἰρήσθω· πάλιν δ’ ὥσπερ ἐξ ὑπαρχῆς ἐπανίωμεν, πειρώμενοι διορίσαι τί ἐστι ψυχὴ καὶ τίς ἂν εἴη κοινότατος λόγος αὐτῆς.

2. λέγομεν δὴ γένος ἕν τι τῶν ὄντων τὴν οὐσίαν, ταύτης δὲ τὸ μέν, ὡς ὕλην, ὃ καθ’ αὑτὸ οὐκ ἔστι τόδε τι, ἕτερον δὲ μορφὴν καὶ εἶδος, καθ’ ἣν ἤδη λέγεται τόδε τι, καὶ τρίτον τὸ ἐκ τούτων. ἔστι δ’ ἡ μὲν ὕλη δύναμις, τὸ δ’ εἶδος ἐντελέχεια, καὶ τοῦτο διχῶς, τὸ μὲν ὡς ἐπιστήμη, τὸ δ’ ὡς τὸ θεωρεῖν.

3. οὐσίαι δὲ μάλιστ’ εἶναι δοκοῦσι τὰ σώματα, καὶ τούτων τὰ φυσικά· ταῦτα γὰρ τῶν ἄλλων ἀρχαί. τῶν δὲ φυσικῶν τὰ μὲν ἔχει ζωήν, τὰ δ’ οὐκ ἔχει· ζωὴν δὲ λέγομεν τὴν δι’ αὑτοῦ τροφήν τε καὶ αὔξησιν καὶ φθίσιν. ὥστε πᾶν σῶμα φυσικὸν μετέχον ζωῆς οὐσία ἂν εἴη, οὐσία δ’ οὕτως ὡς συνθέτη.

4. ἐπεὶ δ’ ἐστὶ καὶ σῶμα καὶ τοιόνδε, ζωὴν γὰρ ἔχον, οὐκ ἂν εἴη σῶμα ἡ ψυχή· οὐ γάρ ἐστι τῶν καθ’ ὑποκειμένου τὸ σῶμα, μᾶλλον δ’ ὡς ὑποκείμενον καὶ ὕλη. ἀναγκαῖον ἄρα τὴν ψυχὴν οὐσίαν εἶναι ὡς εἶδος σώματος φυσικοῦ δυνάμει ζωὴν ἔχοντος. ἡ δ’ οὐσία ἐντελέχεια· τοιούτου ἄρα σώματος ἐντελέχεια.

5. αὕτη δὲ λέγεται διχῶς, ἡ μὲν ὡς ἐπιστήμη, ἡ δ’ ὡς τὸ θεωρεῖν. φανερὸν οὖν ὅτι ὡς ἐπιστήμη· ἐν γὰρ τῷ ὑπάρχειν τὴν ψυχὴν καὶ ὕπνος καὶ ἐγρήγορσίς ἐστιν, ἀνάλογον δ’ ἡ μὲν ἐγρήγορσις τῷ θεωρεῖν, ὁ δ’ ὕπνος τῷ ἔχειν καὶ μὴ ἐνεργεῖν· προτέρα δὲ τῇ γενέσει ἐπὶ τοῦ αὐτοῦ ἡ ἐπιστήμη. διὸ ἡ ψυχή ἐστιν ἐντελέχεια ἡ πρώτη σώματος φυσικοῦ δυνάμει ζωὴν ἔχοντος.

6. τοιοῦτον δὲ ὃ ἂν ᾖ ὀργανικόν. (ὄργανα δὲ καὶ τὰ τῶν φυτῶν μέρη, ἀλλὰ παντελῶς ἁπλᾶ, οἷον τὸ φύλλον περικαρπίου σκέπασμα, τὸ δὲ περικάρπιον καρποῦ· αἱ δὲ ῥίζαι τῷ στόματι ἀνάλογον· ἄμφω γὰρ ἕλκει τὴν τροφήν.) εἰ δή τι κοινὸν ἐπὶ πάσης ψυχῆς δεῖ λέγειν, εἴη ἂν ἐντελέχεια ἡ πρώτη σώματος φυσικοῦ ὀργανικοῦ.

7. διὸ καὶ οὐ δεῖ ζητεῖν εἰ ἓν ἡ ψυχὴ καὶ τὸ σῶμα, ὥσπερ οὐδὲ τὸν κηρὸν καὶ τὸ σχῆμα, οὐδ’ ὅλως τὴν ἑκάστου ὕλην καὶ τὸ οὗ ἡ ὕλη· τὸ γὰρ ἓν καὶ τὸ εἶναι ἐπεὶ πλεοναχῶς λέγεται, τὸ κυρίως ἡ ἐντελέχειά ἐστιν.

8. καθόλου μὲν οὖν εἴρηται τί ἐστιν ἡ ψυχή· οὐσία γὰρ ἡ κατὰ τὸν λόγον. τοῦτο δὲ τὸ τί ἦν εἶναι τῷ τοιῳδὶ σώματι, καθάπερ εἴ τι τῶν ὀργάνων φυσικὸν ἦν σῶμα, οἷον πέλεκυς· ἦν μὲν γὰρ ἂν τὸ πελέκει εἶναι ἡ οὐσία αὐτοῦ, καὶ ἡ ψυχὴ τοῦτο· χωρισθείσης δὲ ταύτης οὐκ ἂν ἔτι πέλεκυς ἦν, ἀλλ’ ἢ ὁμωνύμως, νῦν δ’ ἔστι πέλεκυς. οὐ γὰρ τοιούτου σώματος τὸ τί ἦν

εἶναι καὶ ὁ λόγος ἡ ψυχή, ἀλλὰ φυσικοῦ τοιουδί, ἔχοντος ἀρχὴν κινήσεως καὶ στάσεως ἐν ἑαυτῷ.

9. θεωρεῖν δὲ καὶ ἐπὶ τῶν μερῶν δεῖ τὸ λεχθέν. εἰ γὰρ ἦν ὁ ὀφθαλμὸς ζῷον, ψυχὴ ἂν ἦν αὐτοῦ ἡ ὄψις· αὕτη γὰρ οὐσία ὀφθαλμοῦ ἡ κατὰ τὸν λόγον (ὁ δ’ ὀφθαλμὸς ὕλη ὄψεως), ἧς ἀπολειπούσης οὐκέτ’ ὀφθαλμός, πλὴν ὁμωνύμως, καθάπερ ὁ λίθινος καὶ ὁ γεγραμμένος. δεῖ δὴ λαβεῖν τὸ ἐπὶ μέρους ἐφ’ ὅλου τοῦ ζῶντος σώματος· ἀνάλογον γὰρ ἔχει ὡς τὸ μέρος πρὸς τὸ μέρος, οὕτως ἡ ὅλη αἴσθησις πρὸς τὸ ὅλον σῶμα τὸ αἰσθητικόν, ᾗ τοιοῦτον.

10. ἔστι δὲ οὐ τὸ ἀποβεβληκὸς τὴν ψυχὴν τὸ δυνάμει ὂν ὥστε ζῆν, ἀλλὰ τὸ ἔχον· τὸ δὲ σπέρμα καὶ ὁ καρπὸς τὸ δυνάμει τοιονδὶ σῶμα. ὡς μὲν οὖν ἡ τμῆσις καὶ ἡ ὅρασις, οὕτω καὶ ἡ ἐγρήγορσις ἐντελέ-[413a]χεια, ὡς δ’ ἡ ὄψις καὶ ἡ δύναμις τοῦ ὀργάνου, ἡ ψυχή· τὸ δὲ σῶμα τὸ δυνάμει ὄν· ἀλλ’ ὥσπερ ὀφθαλμὸς ἡ κόρη καὶ ἡ ὄψις, κἀκεῖ ἡ ψυχὴ καὶ τὸ σῶμα ζῷον.

11. ὅτι μὲν οὖν οὐκ ἔστιν ἡ ψυχὴ χωριστὴ τοῦ σώματος, ἢ μέρη τινὰ αὐτῆς, εἰ μεριστὴ πέφυκεν, οὐκ ἄδηλον· ἐνίων γὰρ ἡ ἐντελέχεια τῶν μερῶν ἐστὶν αὐτῶν. οὐ μὴν ἀλλ’ ἔνιά γε οὐθὲν κωλύει, διὰ τὸ μηθενὸς εἶναι σώματος ἐντελεχείας.

12. ἔτι δὲ ἄδηλον εἰ οὕτως ἐντελέχεια τοῦ σώματος ἡ ψυχὴ <ἢ> ὥσπερ πλωτὴρ πλοίου. τύπῳ μὲν οὖν ταύτῃ διωρίσθω καὶ ὑπογεγράφθω περὶ ψυχῆς.

Κεφάλαιο 2

[413a11] 1. Ἐπεὶ δ’ ἐκ τῶν ἀσαφῶν μὲν φανερωτέρων δὲ γίνεται τὸ σαφὲς καὶ κατὰ τὸν λόγον γνωριμώτερον, πειρατέον πάλιν οὕτω γ’ ἐπελθεῖν περὶ αὐτῆς· οὐ γὰρ μόνον τὸ ὅτι δεῖ τὸν ὁριστικὸν λόγον δηλοῦν, ὥσπερ οἱ πλεῖστοι τῶν ὅρων λέγουσιν, ἀλλὰ καὶ τὴν αἰτίαν ἐνυπάρχειν καὶ ἐμφαίνεσθαι. νῦν δ’ ὥσπερ συμπεράσμαθ’ οἱ λόγοι τῶν ὅρων εἰσίν· οἷον τί ἐστιν ὁ τετραγωνισμός; τὸ ἴσον ἑτερομήκει ὀρθογώνιον εἶναι ἰσόπλευρον. ὁ δὲ τοιοῦτος ὅρος λόγος τοῦ συμπεράσματος· ὁ δὲ λέγων ὅτι ἐστὶν ὁ τετραγωνισμὸς μέσης εὕρεσις τοῦ πράγματος λέγει τὸ αἴτιον.

2. λέγομεν οὖν, ἀρχὴν λαβόντες τῆς σκέψεως, διωρίσθαι τὸ ἔμψυχον τοῦ ἀψύχου τῷ ζῆν. πλεοναχῶς δὲ τοῦ ζῆν λεγομένου, κἂν ἕν τι τούτων ἐνυπάρχῃ μόνον, ζῆν αὐτό φαμεν, οἷον νοῦς, αἴσθησις, κίνησις καὶ στάσις ἡ κατὰ τόπον, ἔτι κίνησις ἡ κατὰ τροφὴν καὶ φθίσις τε καὶ αὔξησις.

3. διὸ καὶ τὰ φυόμενα πάντα δοκεῖ ζῆν· φαίνεται γὰρ ἐν αὐτοῖς ἔχοντα δύναμιν καὶ ἀρχὴν τοιαύτην, δι’ ἧς αὔξησίν τε καὶ φθίσιν λαμβάνουσι κατὰ τοὺς ἐναντίους τόπους· οὐ γὰρ ἄνω μὲν αὔξεται, κάτω δ’ οὔ, ἀλλ’ ὁμοίως ἐπ’ ἄμφω καὶ πάντῃ, ὅσα ἀεὶ τρέφεταί τε καὶ ζῇ διὰ τέλους, ἕως ἂν δύνηται λαμβάνειν τροφήν.

4. χωρίζεσθαι δὲ τοῦτο μὲν τῶν ἄλλων δυνατόν, τὰ δ’ ἄλλα τούτου ἀδύνατον ἐν τοῖς θνητοῖς. φανερὸν δ’ ἐπὶ τῶν φυομένων· οὐδεμία γὰρ αὐτοῖς ὑπάρχει δύναμις ἄλλη [413b] ψυχῆς. τὸ μὲν οὖν ζῆν διὰ τὴν ἀρχὴν ταύτην ὑπάρχει τοῖς ζῶσι, τὸ δὲ ζῷον διὰ τὴν αἴσθησιν πρώτως· καὶ γὰρ τὰ μὴ κινούμενα μηδ’ ἀλλάττοντα τόπον, ἔχοντα δ’ αἴσθησιν, ζῷα λέγομεν καὶ οὐ ζῆν μόνον. αἰσθήσεως δὲ πρῶτον ὑπάρχει πᾶσιν ἁφή· ὥσπερ δὲ τὸ θρεπτικὸν δύναται χωρίζεσθαι τῆς ἁφῆς καὶ πάσης αἰσθήσεως, οὕτως ἡ ἁφὴ τῶν ἄλλων αἰσθήσεων (θρεπτικὸν δὲ λέγομεν τὸ τοιοῦτον μόριον τῆς ψυχῆς οὗ καὶ τὰ φυόμενα μετέχει), τὰ δὲ ζῷα πάντα φαίνεται τὴν ἁπτικὴν αἴσθησιν ἔχοντα· δι’ ἣν δ’ αἰτίαν ἑκάτερον τούτων συμβέβηκεν, ὕστερον ἐροῦμεν.

5. νῦν δ’ ἐπὶ τοσοῦτον εἰρήσθω μόνον, ὅτι ἐστὶν ἡ ψυχὴ τῶν εἰρημένων τούτων ἀρχὴ καὶ τούτοις ὥρισται, θρεπτικῷ, αἰσθητικῷ, διανοητικῷ, κινήσει. πότερον δὲ τούτων ἕκαστόν ἐστι ψυχὴ ἢ μόριον ψυχῆς, καὶ εἰ μόριον, πότερον οὕτως ὥστ’ εἶναι χωριστὸν λόγῳ μόνον ἢ καὶ τόπῳ, περὶ μὲν τινῶν τούτων οὐ χαλεπὸν ἰδεῖν, ἔνια δὲ ἀπορίαν ἔχει.

6. ὥσπερ γὰρ ἐπὶ τῶν φυτῶν ἔνια διαιρούμενα φαίνεται ζῶντα καὶ χωριζόμενα ἀπ’ ἀλλήλων, ὡς οὔσης τῆς ἐν αὐτοῖς ψυχῆς ἐντελεχείᾳ μὲν μιᾶς ἐν ἑκάστῳ φυτῷ, δυνάμει δὲ πλειόνων, οὕτως ὁρῶμεν καὶ περὶ ἑτέρας διαφορὰς τῆς ψυχῆς συμβαῖνον ἐπὶ τῶν ἐντόμων ἐν τοῖς διατεμνομένοις· καὶ γὰρ αἴσθησιν ἑκάτερον τῶν μερῶν ἔχει καὶ κίνησιν τὴν κατὰ τόπον, εἰ δ’ αἴσθησιν, καὶ φαντασίαν καὶ ὄρεξιν· ὅπου μὲν γὰρ αἴσθησις, καὶ λύπη τε καὶ ἡδονή, ὅπου δὲ ταῦτα, ἐξ ἀνάγκης καὶ ἐπιθυμία.

7. περὶ δὲ τοῦ νοῦ καὶ τῆς θεωρητικῆς δυνάμεως οὐδέν πω φανερόν, ἀλλ’ ἔοικε ψυχῆς γένος ἕτερον εἶναι, καὶ τοῦτο μόνον ἐνδέχεσθαι χωρίζεσθαι, καθάπερ τὸ ἀΐδιον τοῦ φθαρτοῦ.

8. τὰ δὲ λοιπὰ μόρια τῆς ψυχῆς φανερὸν ἐκ τούτων ὅτι οὐκ ἔστι χωριστά, καθάπερ τινές φασιν· τῷ δὲ λόγῳ ὅτι ἕτερα, φανερόν· αἰσθητικῷ γὰρ εἶναι καὶ δοξαστικῷ ἕτερον, εἴπερ καὶ τὸ αἰσθάνεσθαι τοῦ δοξάζειν, ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον τῶν εἰρημένων.

9. ἔτι δ’ ἐνίοις μὲν τῶν ζῴων ἅπανθ’ ὑπάρχει ταῦτα, τισὶ δὲ τινὰ τούτων, ἑτέροις δὲ ἓν μόνον (τοῦτο δὲ ποιεῖ δια- [414a] φορὰν τῶν ζῴων)· διὰ τίνα δ’ αἰτίαν, ὕστερον ἐπισκεπτέον. παραπλήσιον δὲ καὶ περὶ τὰς αἰσθήσεις συμβέβηκεν· τὰ μὲν γὰρ ἔχει πάσας, τὰ δὲ τινάς, τὰ δὲ μίαν τὴν ἀναγκαιοτάτην, ἁφήν.

10. ἐπεὶ δὲ ᾧ ζῶμεν καὶ αἰσθανόμεθα διχῶς λέγεται, καθάπερ ᾧ ἐπιστάμεθα (λέγομεν δὲ τὸ μὲν ἐπιστήμην τὸ δὲ ψυχήν, ἑκατέρῳ γὰρ τούτων φαμὲν ἐπίστασθαι), ὁμοίως δὲ καὶ [ᾧ] ὑγιαίνομεν τὸ μὲν ὑγιείᾳ τὸ δὲ μορίῳ τινὶ τοῦ σώματος ἢ καὶ ὅλῳ, τούτων δ’ ἡ μὲν ἐπιστήμη τε καὶ ὑγίεια μορφὴ καὶ εἶδός τι καὶ λόγος καὶ οἷον ἐνέργεια τοῦ δεκτικοῦ, ἡ μὲν τοῦ ἐπιστημονικοῦ, ἡ δὲ τοῦ ὑγιαστοῦ (δοκεῖ γὰρ ἐν τῷ πάσχοντι καὶ διατιθεμένῳ ἡ τῶν ποιητικῶν ὑπάρχειν ἐνέργεια), ἡ ψυχὴ δὲ τοῦτο ᾧ ζῶμεν καὶ αἰσθανόμεθα καὶ διανοούμεθα πρώτως-ὥστε λόγος τις ἂν εἴη καὶ εἶδος, ἀλλ’ οὐχ ὕλη καὶ τὸ ὑποκείμενον.

11. τριχῶς γὰρ λεγομένης τῆς οὐσίας, καθάπερ εἴπομεν, ὧν τὸ μὲν εἶδος, τὸ δὲ ὕλη, τὸ δὲ ἐξ ἀμφοῖν, τούτων δ’ ἡ μὲν ὕλη δύναμις, τὸ δὲ εἶδος ἐντελέχεια, ἐπεὶ τὸ ἐξ ἀμφοῖν ἔμψυχον, οὐ τὸ σῶμά ἐστιν ἐντελέχεια ψυχῆς, ἀλλ’ αὕτη σώματός τινος. καὶ διὰ τοῦτο καλῶς ὑπολαμβάνουσιν οἷς δοκεῖ μήτ’ ἄνευ σώματος εἶναι μήτε σῶμά τι ἡ ψυχή· σῶμα μὲν γὰρ οὐκ ἔστι, σώματος δέ τι,

12. καὶ διὰ τοῦτο ἐν σώματι ὑπάρχει, καὶ ἐν σώματι τοιούτῳ, καὶ οὐχ ὥσπερ οἱ πρότερον εἰς σῶμα ἐνήρμοζον αὐτήν, οὐθὲν προσδιορίζοντες ἐν τίνι καὶ ποίῳ, καίπερ οὐδὲ φαινομένου τοῦ τυχόντος δέχεσθαι τὸ τυχόν.

13. οὕτω δὲ γίνεται καὶ κατὰ λόγον· ἑκάστου γὰρ ἡ ἐντελέχεια ἐν τῷ δυνάμει ὑπάρχοντι καὶ τῇ οἰκείᾳ ὕλῃ πέφυκεν ἐγγίνεσθαι. ὅτι μὲν οὖν ἐντελέχειά τίς ἐστι καὶ λόγος τοῦ δύναμιν ἔχοντος εἶναι τοιούτου, φανερὸν ἐκ τούτων.

Κεφάλαιο 3

[414a27] 1. Τῶν δὲ δυνάμεων τῆς ψυχῆς αἱ λεχθεῖσαι τοῖς μὲν ὑπάρχουσι πᾶσαι, καθάπερ εἴπομεν, τοῖς δὲ τινὲς αὐτῶν, ἐνίοις δὲ μία μόνη. δυνάμεις δ’ εἴπομεν θρεπτικόν, αἰσθητικόν, ὀρεκτικόν, κινητικὸν κατὰ τόπον, διανοητικόν.

2. ὑπάρχει δὲ τοῖς μὲν φυτοῖς τὸ θρεπτικὸν μόνον, ἑτέροις δὲ [414b] τοῦτό τε καὶ τὸ αἰσθητικόν. εἰ δὲ τὸ αἰσθητικόν, καὶ τὸ ὀρεκτικόν· ὄρεξις μὲν γὰρ ἐπιθυμία καὶ θυμὸς καὶ βούλησις, τὰ δὲ ζῷα πάντ’ ἔχουσι μίαν γε τῶν αἰσθήσεων, τὴν ἁφήν· ᾧ δ’ αἴσθησις ὑπάρχει, τούτῳ ἡδονή τε καὶ λύπη καὶ τὸ ἡδύ τε καὶ λυπηρόν, οἷς δὲ ταῦτα, καὶ ἐπιθυμία· τοῦ γὰρ ἡδέος ὄρεξις αὕτη.

3. ἔτι δὲ τῆς τροφῆς αἴσθησιν ἔχουσιν· ἡ γὰρ ἁφὴ τῆς τροφῆς αἴσθησις· ξηροῖς γὰρ καὶ ὑγροῖς καὶ θερμοῖς καὶ ψυχροῖς τρέφεται τὰ ζῶντα πάντα, τούτων δ’ αἴσθησις ἁφή, τῶν δ’ ἄλλων αἰσθητῶν κατὰ συμβεβηκός. οὐθὲν γὰρ εἰς τροφὴν συμβάλλεται ψόφος οὐδὲ χρῶμα οὐδὲ ὀσμή, ὁ δὲ χυμὸς ἕν τι τῶν ἁπτῶν ἐστιν. πεῖνα δὲ καὶ δίψα ἐπιθυμία, καὶ ἡ μὲν πεῖνα ξηροῦ καὶ θερμοῦ, ἡ δὲ δίψα ὑγροῦ καὶ ψυχροῦ· ὁ δὲ χυμὸς οἷον ἥδυσμά τι τούτων ἐστίν. διασαφητέον δὲ περὶ αὐτῶν ὕστερον, νῦν δ’ ἐπὶ τοσοῦτον εἰρήσθω, ὅτι τῶν ζώντων τοῖς ἔχουσιν ἁφὴν καὶ ὄρεξις ὑπάρχει. περὶ δὲ φαντασίας ἄδηλον, ὕστερον δ’ ἐπισκεπτέον.

4. ἐνίοις δὲ πρὸς τούτοις ὑπάρχει καὶ τὸ κατὰ τόπον κινητικόν, ἑτέροις δὲ καὶ τὸ διανοητικόν τε καὶ νοῦς, οἷον ἀνθρώποις καὶ εἴ τι τοιοῦτον ἕτερον ἔστιν ἢ τιμιώτερον.

5. δῆλον οὖν ὅτι τὸν αὐτὸν τρόπον εἷς ἂν εἴη λόγος ψυχῆς τε καὶ σχήματος· οὔτε γὰρ ἐκεῖ σχῆμα παρὰ τὸ τρίγωνον ἔστι καὶ τὰ ἐφεξῆς, οὔτ’ ἐνταῦθα ψυχὴ παρὰ τὰς εἰρημένας. γένοιτο δ’ ἂν καὶ ἐπὶ τῶν σχημάτων λόγος κοινός, ὃς ἐφαρμόσει μὲν πᾶσιν, ἴδιος δ’ οὐδενὸς ἔσται σχήματος. ὁμοίως δὲ καὶ ἐπὶ ταῖς εἰρημέναις ψυχαῖς. διὸ γελοῖον ζητεῖν τὸν κοινὸν λόγον καὶ ἐπὶ τούτων καὶ ἐφ’ ἑτέρων, ὃς οὐδενὸς ἔσται τῶν ὄντων ἴδιος λόγος, οὐδὲ κατὰ τὸ οἰκεῖον καὶ ἄτομον εἶδος, ἀφέντας τὸν τοιοῦτον.

6. (παραπλησίως δ’ ἔχει τῷ περὶ τῶν σχημάτων καὶ τὰ κατὰ ψυχήν· ἀεὶ γὰρ ἐν τῷ ἐφεξῆς ὑπάρχει δυνάμει τὸ πρότερον ἐπί τε τῶν σχημάτων καὶ ἐπὶ τῶν ἐμψύχων, οἷον ἐν τετραγώνῳ μὲν τρίγωνον, ἐν αἰσθητικῷ δὲ τὸ θρεπτικόν.) ὥστε καθ’ ἕκαστον ζητητέον, τίς ἑκάστου ψυχή, οἷον τίς φυτοῦ καὶ τίς ἀνθρώπου ἢ θηρίου.

7. διὰ τίνα δ’ αἰτίαν τῷ [415a] ἐφεξῆς οὕτως ἔχουσι, σκεπτέον. ἄνευ μὲν γὰρ τοῦ θρεπτικοῦ τὸ αἰσθητικὸν οὐκ ἔστιν· τοῦ δ’ αἰσθητικοῦ χωρίζεται τὸ θρεπτικὸν ἐν τοῖς φυτοῖς. πάλιν δ’ ἄνευ μὲν τοῦ ἁπτικοῦ τῶν ἄλλων αἰσθήσεων οὐδεμία ὑπάρχει, ἁφὴ δ’ ἄνευ τῶν ἄλλων ὑπάρχει· πολλὰ γὰρ τῶν ζῴων οὔτ’ ὄψιν οὔτ’ ἀκοὴν ἔχουσιν οὔτ’ ὀσμῆς αἴσθησιν. καὶ τῶν αἰσθητικῶν δὲ τὰ μὲν ἔχει τὸ κατὰ τόπον κινητικόν, τὰ δ’ οὐκ ἔχει· τελευταῖον δὲ καὶ ἐλάχιστα λογισμὸν καὶ διάνοιαν· οἷς μὲν γὰρ ὑπάρχει λογισμὸς τῶν φθαρτῶν, τούτοις καὶ τὰ λοιπὰ πάντα, οἷς δ’ ἐκείνων ἕκαστον, οὐ πᾶσι λογισμός, ἀλλὰ τοῖς μὲν οὐδὲ φαντασία, τὰ δὲ ταύτῃ μόνῃ ζῶσιν. περὶ δὲ τοῦ θεωρητικοῦ νοῦ ἕτερος λόγος. ὅτι μὲν οὖν ὁ περὶ τούτων ἑκάστου λόγος, οὗτος οἰκειότατος καὶ περὶ ψυχῆς, δῆλον.

Κεφάλαιο 4

[415a13] 1. Ἀναγκαῖον δὲ τὸν μέλλοντα περὶ τούτων σκέψιν ποιεῖσθαι λαβεῖν ἕκαστον αὐτῶν τί ἐστιν, εἶθ’ οὕτως περὶ τῶν ἐχομένων καὶ περὶ τῶν ἄλλων ἐπιζητεῖν. εἰ δὲ χρὴ λέγειν τί ἕκαστον αὐτῶν, οἷον τί τὸ νοητικὸν ἢ τὸ αἰσθητικὸν ἢ τὸ θρεπτικόν, πρότερον ἔτι λεκτέον τί τὸ νοεῖν καὶ τί τὸ αἰσθάνεσθαι· πρότεραι γάρ εἰσι τῶν δυνάμεων αἱ ἐνέργειαι καὶ αἱ πράξεις κατὰ τὸν λόγον. εἰ δ’ οὕτως, τούτων δ’ ἔτι πρότερα τὰ ἀντικείμενα δεῖ τεθεωρηκέναι, περὶ ἐκείνων πρῶτον ἂν δέοι διορίσαι διὰ τὴν αὐτὴν αἰτίαν, οἷον περὶ τροφῆς καὶ αἰσθητοῦ καὶ νοητοῦ.

2. ὥστε πρῶτον περὶ τροφῆς καὶ γεννήσεως λεκτέον· ἡ γὰρ θρεπτικὴ ψυχὴ καὶ τοῖς ἄλλοις ὑπάρχει, καὶ πρώτη καὶ κοινοτάτη δύναμίς ἐστι ψυχῆς, καθ’ ἣν ὑπάρχει τὸ ζῆν ἅπασιν. ἧς ἐστὶν ἔργα γεννῆσαι καὶ τροφῇ χρῆσθαι· φυσικώτατον γὰρ τῶν ἔργων τοῖς ζῶσιν, ὅσα τέλεια καὶ μὴ πηρώματα ἢ τὴν γένεσιν αὐτομάτην ἔχει, τὸ ποιῆσαι ἕτερον οἷον αὐτό, ζῷον μὲν ζῷον, φυτὸν δὲ φυτόν, ἵνα τοῦ ἀεὶ καὶ τοῦ θείου μετέχωσιν ᾗ [415b] δύνανται· πάντα γὰρ ἐκείνου ὀρέγεται, καὶ ἐκείνου ἕνεκα πράττει ὅσα πράττει κατὰ φύσιν (τὸ δ’ οὗ ἕνεκα διττόν, τὸ μὲν οὗ, τὸ δὲ ᾧ). ἐπεὶ οὖν κοινωνεῖν ἀδυνατεῖ τοῦ ἀεὶ καὶ τοῦ θείου τῇ συνεχείᾳ, διὰ τὸ μηδὲν ἐνδέχεσθαι τῶν φθαρτῶν ταὐτὸ καὶ ἓν ἀριθμῷ διαμένειν, ᾗ δύναται μετέχειν ἕκαστον, κοινωνεῖ ταύτῃ, τὸ μὲν μᾶλλον τὸ δ’ ἧττον, καὶ διαμένει οὐκ αὐτὸ ἀλλ’ οἷον αὐτό, ἀριθμῷ μὲν οὐχ ἕν, εἴδει δ’ ἕν.

3. ἔστι δὲ ἡ ψυχὴ τοῦ ζῶντος σώματος αἰτία καὶ ἀρχή. ταῦτα δὲ πολλαχῶς λέγεται, ὁμοίως δ’ ἡ ψυχὴ κατὰ τοὺς διωρισμένους τρόπους τρεῖς αἰτία· καὶ γὰρ ὅθεν ἡ κίνησις καὶ οὗ ἕνεκα καὶ ὡς ἡ οὐσία τῶν ἐμψύχων σωμάτων ἡ ψυχὴ αἰτία.

4. ὅτι μὲν οὖν ὡς οὐσία, δῆλον· τὸ γὰρ αἴτιον τοῦ εἶναι πᾶσιν ἡ οὐσία, τὸ δὲ ζῆν τοῖς ζῶσι τὸ εἶναί ἐστιν, αἰτία δὲ καὶ ἀρχὴ τούτου ἡ ψυχή. ἔτι τοῦ δυνάμει ὄντος λόγος ἡ ἐντελέχεια.

5. φανερὸν δ’ ὡς καὶ οὗ ἕνεκεν ἡ ψυχὴ αἰτία· ὥσπερ γὰρ ὁ νοῦς ἕνεκά του ποιεῖ, τὸν αὐτὸν τρόπον καὶ ἡ φύσις, καὶ τοῦτ’ ἔστιν αὐτῆς τέλος. τοιοῦτον δ’ ἐν τοῖς ζῴοις ἡ ψυχὴ κατὰ φύσιν· πάντα γὰρ τὰ φυσικὰ σώματα τῆς ψυχῆς ὄργανα, καθάπερ τὰ τῶν ζῴων, οὕτω καὶ τὰ τῶν φυτῶν, ὡς ἕνεκα τῆς ψυχῆς ὄντα· διττῶς δὲ τὸ οὗ ἕνεκα, τό τε οὗ καὶ τὸ ᾧ.

6. ἀλλὰ μὴν καὶ ὅθεν πρῶτον ἡ κατὰ τόπον κίνησις, ψυχή· οὐ πᾶσι δ’ ὑπάρχει τοῖς ζῶσιν ἡ δύναμις αὕτη. ἔστι δὲ καὶ ἀλλοίωσις καὶ αὔξησις κατὰ

ψυχήν· ἡ μὲν γὰρ αἴσθησις ἀλλοίωσίς τις εἶναι δοκεῖ, αἰσθάνεται δ’ οὐθὲν ὃ μὴ μετέχει ψυχῆς, ὁμοίως δὲ καὶ περὶ αὐξήσεώς τε καὶ φθίσεως ἔχει· οὐδὲν γὰρ φθίνει οὐδ’ αὔξεται φυσικῶς μὴ τρεφόμενον, τρέφεται δ’ οὐθὲν ὃ μὴ κοινωνεῖ ζωῆς.

7. Ἐμπεδοκλῆς δ’ οὐ καλῶς εἴρηκε τοῦτο προστιθείς, τὴν αὔξησιν συμβαίνειν τοῖς φυτοῖς κάτω μὲν συρριζουμένοις διὰ τὸ τὴν γῆν οὕτω φέρεσθαι κατὰ φύσιν, ἄνω δὲ διὰ τὸ <τὸ> πῦρ ὡσαύτως. οὔτε γὰρ τὸ ἄνω καὶ κάτω καλῶς λαμβάνει (οὐ γὰρ ταὐτὸ πᾶσι τὸ ἄνω καὶ κάτω καὶ τῷ παντί, ἀλλ’ ὡς ἡ κεφαλὴ τῶν ζῴων, οὕτως αἱ ῥίζαι τῶν φυτῶν, εἰ χρὴ τὰ ὄργανα λέγειν ἕτερα καὶ ταὐτὰ τοῖς ἔργοις) πρὸς δὲ τούτοις τί τὸ συνέχον εἰς τἀναντία φερόμενα τὸ πῦρ καὶ τὴν γῆν; διασπασθήσεται γάρ, εἰ μή τι ἔσται τὸ κωλῦον· εἰ δ’ ἔσται, τοῦτ’ ἔστιν ἡ ψυχή, καὶ τὸ αἴτιον τοῦ αὐξάνεσθαι καὶ τρέφεσθαι.

8. δοκεῖ δέ τισιν ἡ τοῦ πυρὸς φύσις ἁπλῶς αἰτία τῆς τροφῆς καὶ τῆς αὐξήσεως εἶναι· καὶ γὰρ αὐτὸ φαίνεται μόνον τῶν σωμάτων [ἢ τῶν στοιχείων] τρεφόμενον καὶ αὐξόμενον, διὸ καὶ ἐν τοῖς φυτοῖς καὶ ἐν τοῖς ζῴοις ὑπολάβοι τις ἂν τοῦτο εἶναι τὸ ἐργαζόμενον. τὸ δὲ συναίτιον μέν πώς ἐστιν, οὐ μὴν ἁπλῶς γε αἴτιον, ἀλλὰ μᾶλλον ἡ ψυχή· ἡ μὲν γὰρ τοῦ πυρὸς αὔξησις εἰς ἄπειρον, ἕως ἂν ᾖ τὸ καυστόν, τῶν δὲ φύσει συνισταμένων πάντων ἔστι πέρας καὶ λόγος μεγέθους τε καὶ αὐξήσεως· ταῦτα δὲ ψυχῆς, ἀλλ’ οὐ πυρός, καὶ λόγου μᾶλλον ἢ ὕλης.

9. ἐπεὶ δ’ ἡ αὐτὴ δύναμις τῆς ψυχῆς θρεπτικὴ καὶ γεννητική, περὶ τροφῆς ἀναγκαῖον διωρίσθαι πρῶτον· ἀφορίζεται γὰρ πρὸς τὰς ἄλλας δυνάμεις τῷ ἔργῳ τούτῳ. δοκεῖ δ’ εἶναι ἡ τροφὴ τὸ ἐναντίον τῷ ἐναντίῳ, οὐ πᾶν δὲ παντί, ἀλλ’ ὅσα τῶν ἐναντίων μὴ μόνον γένεσιν ἐξ ἀλλήλων ἔχουσιν ἀλλὰ καὶ αὔξησιν· γίνεται γὰρ πολλὰ ἐξ ἀλλήλων, ἀλλ’ οὐ πάντα ποσά, οἷον ὑγιὲς ἐκ κάμνοντος. φαίνεται δ’ οὐδ’ ἐκεῖνα τὸν αὐτὸν τρόπον ἀλλήλοις εἶναι τροφή, ἀλλὰ τὸ μὲν ὕδωρ τῷ πυρὶ τροφή, τὸ δὲ πῦρ οὐ τρέφει τὸ ὕδωρ. ἐν μὲν οὖν τοῖς ἁπλοῖς σώμασι ταῦτ’ εἶναι δοκεῖ μάλιστα τὸ μὲν τροφὴ τὸ δὲ τρεφόμενον.

10. ἀπορίαν δ’ ἔχει· φασὶ γὰρ οἱ μὲν τὸ ὅμοιον τῷ ὁμοίῳ τρέφεσθαι, καθάπερ καὶ αὐξάνεσθαι, τοῖς δ’ ὥσπερ εἴπομεν τοὔμπαλιν δοκεῖ, τὸ ἐναντίον τῷ ἐναντίῳ, ὡς ἀπαθοῦς ὄντος τοῦ ὁμοίου ὑπὸ τοῦ ὁμοίου, τὴν δὲ τροφὴν δεῖν μεταβάλλειν καὶ πέττεσθαι· ἡ δὲ μεταβολὴ πᾶσιν εἰς τὸ ἀντικείμενον ἢ τὸ μεταξύ. ἔτι πάσχει τι ἡ τροφὴ ὑπὸ τοῦ τρεφομένου, ἀλλ’ οὐ τοῦτο ὑπὸ τῆς [416b]

11. τροφῆς, ὥσπερ οὐδ’ ὁ τέκτων ὑπὸ τῆς ὕλης, ἀλλ’ ὑπ’ ἐκεί- νου αὕτη· ὁ δὲ τέκτων μεταβάλλει μόνον εἰς ἐνέργειαν ἐξ ἀργίας. πότερον δ’ ἐστὶν ἡ τροφὴ τὸ τελευταῖον προσγινόμενον ἢ τὸ πρῶτον, ἔχει διαφοράν. εἰ δ’ ἄμφω, ἀλλ’ ἡ μὲν ἄπεπτος ἡ δὲ πεπεμμένη, ἀμφοτέρως ἂν ἐνδέχοιτο τὴν τροφὴν λέγειν· ᾗ μὲν γὰρ ἄπεπτος, τὸ ἐναντίον τῷ ἐναντίῳ τρέφεται, ᾗ δὲ πεπεμμένη, τὸ ὅμοιον τῷ ὁμοίῳ. ὥστε φανερὸν ὅτι λέγουσί τινα τρόπον ἀμφότεροι καὶ ὀρθῶς καὶ οὐκ ὀρθῶς.

12. ἐπεὶ δ’ οὐθὲν τρέφεται μὴ μετέχον ζωῆς, τὸ ἔμψυχον ἂν εἴη σῶμα τὸ τρεφόμενον, ᾗ ἔμψυχον, ὥστε καὶ ἡ τροφὴ πρὸς ἔμψυχόν ἐστι, καὶ οὐ κατὰ συμβεβηκός. ἔστι δ’ ἕτερον τροφῇ καὶ αὐξητικῷ εἶναι· ᾗ μὲν γὰρ ποσόν τι τὸ ἔμψυχον, αὐξητικόν, ᾗ δὲ τόδε τι καὶ οὐσία, τροφή (σώζει γὰρ τὴν οὐσίαν, καὶ μέχρι τούτου ἔστιν ἕως ἂν τρέφηται), καὶ γενέσεως ποιητικόν, οὐ τοῦ τρεφομένου, ἀλλ’ οἷον τὸ τρεφόμενον· ἤδη γὰρ ἔστιν αὐτοῦ ἡ οὐσία, γεννᾷ δ’ οὐθὲν αὐτὸ ἑαυτό, ἀλλὰ σώζει. ὥσθ’ ἡ μὲν τοιαύτη τῆς ψυχῆς ἀρχὴ δύναμίς ἐστιν οἵα σώζειν τὸ ἔχον αὐτὴν ᾗ τοιοῦτον, ἡ δὲ τροφὴ παρασκευάζει ἐνεργεῖν· διὸ στερηθὲν τροφῆς οὐ δύναται εἶναι.

13. [ἐπεὶ δ’ ἔστι τρία, τὸ τρεφόμενον καὶ ᾧ τρέφεται καὶ τὸ τρέφον, τὸ μὲν τρέφον ἐστὶν ἡ πρώτη ψυχή, τὸ δὲ τρεφόμενον τὸ ἔχον ταύτην σῶμα, ᾧ δὲ τρέφεται, ἡ τροφή.] ἐπεὶ δὲ ἀπὸ τοῦ τέλους ἅπαντα προσαγορεύειν δίκαιον, τέλος δὲ τὸ γεννῆσαι οἷον αὐτό, εἴη ἂν ἡ πρώτη ψυχὴ γεννητικὴ οἷον αὐτό. ἔστι δὲ ᾧ [416b26] τρέφει διττόν, ὥσπερ καὶ ᾧ κυβερνᾷ καὶ ἡ χεὶρ καὶ τὸ πηδά- λιον, τὸ μὲν κινοῦν καὶ κινούμενον, τὸ δὲ κινούμενον μόνον. πᾶσαν δ’ ἀναγκαῖον τροφὴν δύνασθαι πέττεσθαι, ἐργάζεται δὲ τὴν πέψιν τὸ θερμόν· διὸ πᾶν ἔμψυχον ἔχει θερμότητα. τύπῳ μὲν οὖν ἡ τροφὴ τί ἐστιν εἴρηται· διασαφητέον δ’ ἐστὶν ὕστερον περὶ αὐτῆς ἐν τοῖς οἰκείοις λόγοις.

Κεφάλαιο 5

[416b32] 1. Διωρισμένων δὲ τούτων λέγωμεν κοινῇ περὶ πάσης αἰσθήσεως. ἡ δ’ αἴσθησις ἐν τῷ κινεῖσθαί τε καὶ πάσχειν συμβαίνει, καθάπερ εἴρηται· δοκεῖ γὰρ ἀλλοίωσίς τις εἶναι. φασὶ δέ τινες καὶ τὸ ὅμοιον ὑπὸ τοῦ ὁμοίου πάσχειν. [417a] τοῦτο δὲ πῶς δυνατὸν ἢ ἀδύνατον, εἰρήκαμεν ἐν τοῖς καθόλου λόγοις περὶ τοῦ ποιεῖν καὶ πάσχειν.

2. ἔχει δ’ ἀπορίαν διὰ τί καὶ τῶν αἰσθήσεων αὐτῶν οὐ γίνεται αἴσθησις, καὶ διὰ τί ἄνευ τῶν ἔξω οὐ ποιοῦσιν αἴσθησιν, ἐνόντος πυρὸς καὶ γῆς καὶ τῶν ἄλλων στοιχείων, ὧν ἐστιν ἡ αἴσθησις καθ’ αὑτὰ ἢ τὰ συμβεβηκότα τούτοις. δῆλον οὖν ὅτι τὸ αἰσθητικὸν οὐκ ἔστιν ἐνεργείᾳ, ἀλλὰ δυνάμει μόνον, διὸ οὐκ αἰσθάνεται, καθάπερ τὸ καυστὸν οὐ καίεται αὐτὸ καθ’ αὑτὸ ἄνευ τοῦ καυστικοῦ· ἔκαιε γὰρ ἂν ἑαυτό, καὶ οὐθὲν ἐδεῖτο τοῦ ἐντελεχείᾳ πυρὸς ὄντος. ἐπειδὴ δὲ τὸ αἰσθάνεσθαι λέγομεν διχῶς (τό τε γὰρ δυνάμει ἀκοῦον καὶ ὁρῶν ἀκούειν καὶ ὁρᾶν λέγομεν, κἂν τύχῃ καθεῦδον, καὶ τὸ ἤδη ἐνεργοῦν), διχῶς ἂν λέγοιτο καὶ ἡ αἴσθησις, ἡ μὲν ὡς δυνάμει, ἡ δὲ ὡς ἐνεργείᾳ. ὁμοίως δὲ καὶ τὸ αἰσθητόν, τό τε δυνάμει ὂν καὶ τὸ ἐνεργείᾳ.

3. πρῶτον μὲν οὖν ὡς τοῦ αὐτοῦ ὄντος τοῦ πάσχειν καὶ τοῦ κινεῖσθαι καὶ τοῦ ἐνεργεῖν λέγωμεν· καὶ γὰρ ἔστιν ἡ κίνησις ἐνέργειά τις, ἀτελὴς μέντοι, καθάπερ ἐν ἑτέροις εἴρηται. πάντα δὲ πάσχει καὶ κινεῖται ὑπὸ τοῦ ποιητικοῦ καὶ ἐνεργείᾳ ὄντος. διὸ ἔστι μὲν ὡς ὑπὸ τοῦ ὁμοίου πάσχει, ἔστι δὲ ὡς ὑπὸ τοῦ ἀνομοίου, καθάπερ εἴπομεν· πάσχει μὲν γὰρ τὸ ἀνόμοιον, πεπονθὸς δ’ ὅμοιόν ἐστιν.

4. διαιρετέον δὲ καὶ περὶ δυνάμεως καὶ ἐντελεχείας· νῦν γὰρ ἁπλῶς ἐλέγομεν περὶ αὐτῶν. ἔστι μὲν γὰρ οὕτως ἐπιστῆμόν τι ὡς ἂν εἴποιμεν ἄνθρωπον ἐπιστήμονα ὅτι ὁ ἄνθρωπος τῶν ἐπιστημόνων καὶ ἐχόντων ἐπιστήμην· ἔστι δ’ ὡς ἤδη λέγομεν ἐπιστήμονα τὸν ἔχοντα τὴν γραμματικήν· ἑκάτερος δὲ τούτων οὐ τὸν αὐτὸν τρόπον δυνατός ἐστιν, ἀλλ’ ὁ μὲν ὅτι τὸ γένος τοιοῦτον καὶ ἡ ὕλη, ὁ δ’ ὅτι βουληθεὶς δυνατὸς θεωρεῖν, ἂν μή τι κωλύσῃ τῶν ἔξωθεν· ὁ δ’ ἤδη θεωρῶν, ἐντελεχείᾳ ὢν καὶ κυρίως ἐπιστάμενος τόδε τὸ Α. ἀμφότεροι μὲν οὖν οἱ πρῶτοι, κατὰ δύναμιν ἐπιστήμονες <ὄντες, ἐνεργείᾳ γίνονται ἐπιστήμονες,> ἀλλ’ ὁ μὲν διὰ μαθήσεως ἀλλοιωθεὶς καὶ πολλάκις ἐξ ἐναντίας μεταβαλὼν ἕξεως, ὁ δ’ ἐκ τοῦ ἔχειν τὴν ἀριθμητικὴν ἢ τὴν γραμματικήν, μὴ ἐνεργεῖν δέ, εἰς τὸ ἐνεργεῖν, ἄλλον τρόπον.

5. οὐκ ἔστι δ’ ἁπλοῦν οὐδὲ τὸ πάσχειν, ἀλλὰ τὸ μὲν φθορά τις ὑπὸ τοῦ ἐναντίου, τὸ δὲ σωτηρία μᾶλλον ὑπὸ τοῦ ἐντελεχείᾳ ὄντος τοῦ δυνάμει ὄντος καὶ ὁμοίου οὕτως ὡς δύναμις ἔχει πρὸς ἐντελέχειαν· θεωροῦν γὰρ γίνεται τὸ ἔχον τὴν ἐπιστήμην, ὅπερ ἢ οὐκ ἔστιν ἀλλοιοῦσθαι (εἰς αὑτὸ γὰρ ἡ ἐπίδοσις καὶ εἰς ἐντελέχειαν) ἢ ἕτερον γένος ἀλλοιώσεως. διὸ οὐ καλῶς ἔχει λέγειν τὸ φρονοῦν, ὅταν φρονῇ, ἀλλοιοῦσθαι, ὥσπερ οὐδὲ τὸν οἰκοδόμον ὅταν οἰκοδομῇ. τὸ μὲν οὖν εἰς ἐντελέχειαν ἄγειν ἐκ δυνάμει ὄντος [κατὰ] τὸ νοοῦν καὶ φρονοῦν οὐ διδασκαλίαν ἀλλ’ ἑτέραν ἐπωνυμίαν ἔχειν δίκαιον· τὸ δ’ ἐκ δυνάμει ὄντος μανθάνον καὶ λαμβάνον ἐπιστήμην ὑπὸ τοῦ ἐντελεχείᾳ ὄντος καὶ διδασκαλικοῦ ἤτοι οὐδὲ πάσχειν φατέον, [ὥσπερ εἴρηται,] ἢ δύο τρόπους εἶναι ἀλλοιώσεως, τήν τε ἐπὶ τὰς στερητικὰς διαθέσεις μεταβολὴν καὶ τὴν ἐπὶ τὰς ἕξεις καὶ τὴν φύσιν.

6. τοῦ δ’ αἰσθητικοῦ ἡ μὲν πρώτη μεταβολὴ γίνεται ὑπὸ τοῦ γεννῶντος, ὅταν δὲ γεννηθῇ, ἔχει ἤδη, ὥσπερ ἐπιστήμην, καὶ τὸ αἰσθάνεσθαι. τὸ κατ’ ἐνέργειαν δὲ ὁμοίως λέγεται τῷ θεωρεῖν· διαφέρει δέ, ὅτι τοῦ μὲν τὰ ποιητικὰ τῆς ἐνεργείας ἔξωθεν, τὸ ὁρατὸν καὶ τὸ ἀκουστόν, ὁμοίως δὲ καὶ τὰ λοιπὰ τῶν αἰσθητῶν. αἴτιον δ’ ὅτι τῶν καθ’ ἕκαστον ἡ κατ’ ἐνέργειαν αἴσθησις, ἡ δ’ ἐπιστήμη τῶν καθόλου· ταῦτα δ’ ἐν αὐτῇ πώς ἐστι τῇ ψυχῇ.

διὸ νοῆσαι μὲν ἐπ’ αὐτῷ, ὁπόταν βούληται, αἰσθάνεσθαι δ’ οὐκ ἐπ’ αὐτῷ· ἀναγκαῖον γὰρ ὑπάρχειν τὸ αἰσθητόν. ὁμοίως δὲ τοῦτο ἔχει κἀν ταῖς ἐπιστήμαις ταῖς τῶν αἰσθητῶν, καὶ διὰ τὴν αὐτὴν αἰτίαν, ὅτι τὰ αἰσθητὰ τῶν καθ’ ἕκαστα καὶ τῶν ἔξωθεν.

7. ἀλλὰ περὶ μὲν τούτων διασαφῆσαι καιρὸς γένοιτ’ ἂν καὶ εἰςαῦθις· νῦν δὲ διωρίσθω τοσοῦτον, ὅτι οὐχ ἁπλοῦ ὄντος τοῦ δυνάμει λεγομένου, ἀλλὰ τοῦ μὲν ὥσπερ ἂν εἴποιμεν τὸν παῖδα δύνασθαι στρατηγεῖν, τοῦ δὲ ὡς τὸν ἐν ἡλικίᾳ ὄντα, οὕτως ἔχει [[418a] τὸ αἰσθητικόν. ἐπεὶ δ’ ἀνώνυμος αὐτῶν ἡ διαφορά, διώρισται δὲ περὶ αὐτῶν ὅτι ἕτερα καὶ πῶς ἕτερα, χρῆσθαι ἀναγκαῖον τῷ πάσχειν καὶ ἀλλοιοῦσθαι ὡς κυρίοις ὀνόμασιν. τὸ δ’ αἰσθητικὸν δυνάμει ἐστὶν οἷον τὸ αἰσθητὸν ἤδη ἐντελεχείᾳ, καθάπερ εἴρηται. πάσχει μὲν οὖν οὐχ ὅμοιον ὄν, πεπονθὸς δ’ ὡμοίωται καὶ ἔστιν οἷον ἐκεῖνο.

Κεφάλαιο 6

[418a7] 1. Λεκτέον δὲ καθ’ ἑκάστην αἴσθησιν περὶ τῶν αἰσθητῶν πρῶτον. λέγεται δὲ τὸ αἰσθητὸν τριχῶς, ὧν δύο μὲν καθ’ αὑτά φαμεν αἰσθάνεσθαι, τὸ δὲ ἓν κατὰ συμβεβηκός. τῶν δὲ δυοῖν τὸ μὲν ἴδιόν ἐστιν ἑκάστης αἰσθήσεως, τὸ δὲ κοινὸν πασῶν.

2. λέγω δ’ ἴδιον μὲν ὃ μὴ ἐνδέχεται ἑτέρᾳ αἰσθήσει αἰσθάνεσθαι, καὶ περὶ ὃ μὴ ἐνδέχεται ἀπατηθῆναι, οἷον ὄψις χρώματος καὶ ἀκοὴ ψόφου καὶ γεῦσις χυμοῦ, ἡ δ’ ἁφὴ πλείους [μὲν] ἔχει διαφοράς, ἀλλ’ ἑκάστη γε κρίνει περὶ τούτων, καὶ οὐκ ἀπατᾶται ὅτι χρῶμα οὐδ’ ὅτι ψόφος, ἀλλὰ τί τὸ κεχρωσμένον ἢ ποῦ, ἢ τί τὸ ψοφοῦν ἢ ποῦ. τὰ μὲν οὖν τοιαῦτα λέγεται ἴδια ἑκάστης,

3. κοινὰ δὲ κίνησις, ἠρεμία, ἀριθμός, σχῆμα, μέγεθος· τὰ γὰρ τοιαῦτα οὐδεμιᾶς ἐστὶν ἴδια, ἀλλὰ κοινὰ πάσαις· καὶ γὰρ ἁφῇ κίνησίς τίς ἐστιν αἰσθητὴ καὶ ὄψει.

4. κατὰ συμβεβηκὸς δὲ λέγεται αἰσθητόν, οἷον εἰ τὸ λευκὸν εἴη Διάρους υἱός· κατὰ συμβεβηκὸς γὰρ τούτου αἰσθάνεται, ὅτι τῷ λευκῷ συμβέβηκε τοῦτο, οὗ αἰσθάνεται· διὸ καὶ οὐδὲν πάσχει ᾗ τοιοῦτον ὑπὸ τοῦ αἰσθητοῦ. τῶν δὲ καθ’ αὑτὰ αἰσθητῶν τὰ ἴδια κυρίως ἐστὶν αἰσθητά, καὶ πρὸς ἃ ἡ οὐσία πέφυκεν ἑκάστης αἰσθήσεως.

Κεφάλαιο 7

[418a26] 1. Οὗ μὲν οὖν ἐστιν ἡ ὄψις, τοῦτ’ ἐστὶν ὁρατόν, ὁρατὸν δ’ ἐστὶ χρῶμά τε καὶ ὃ λόγῳ μὲν ἔστιν εἰπεῖν, ἀνώνυμον δὲ τυγχάνει ὄν· δῆλον δὲ ἔσται ὃ λέγομεν προελθοῦσι. τὸ γὰρ ὁρατόν ἐστι χρῶμα, τοῦτο δ’ ἐστὶ τὸ ἐπὶ τοῦ καθ’ αὑτὸ ὁρατοῦ· καθ’ αὑτὸ δὲ οὐ τῷ λόγῳ, ἀλλ’ ὅτι ἐν ἑαυτῷ ἔχει τὸ αἴτιον τοῦ εἶναι ὁρατόν. πᾶν δὲ χρῶμα [418b] κινητικόν ἐστι τοῦ κατ’ ἐνέργειαν διαφανοῦς, καὶ τοῦτ’ ἐστὶν αὐτοῦ ἡ φύσις· διόπερ οὐχ ὁρατὸν ἄνευ φωτός, ἀλλὰ πᾶν τὸ ἑκάστου χρῶμα ἐν φωτὶ ὁρᾶται. διὸ περὶ φωτὸς πρῶτον λεκτέον τί ἐστιν.

2. ἔστι δή τι διαφανές. διαφανὲς δὲ λέγω ὃ ἔστι μὲν ὁρατόν, οὐ καθ’ αὑτὸ δὲ ὁρατὸν ὡς ἁπλῶς εἰπεῖν, ἀλλὰ δι’ ἀλλότριον χρῶμα. τοιοῦτον δέ ἐστιν ἀὴρ καὶ ὕδωρ καὶ πολλὰ τῶν στερεῶν· οὐ γὰρ ᾗ ὕδωρ οὐδ’ ᾗ ἀὴρ διαφανές, ἀλλ’ ὅτι ἔστι τις φύσις ἐνυπάρχουσα ἡ αὐτὴ ἐν τούτοις ἀμφοτέροις καὶ ἐν τῷ ἀϊδίῳ τῷ ἄνω σώματι. φῶς δέ ἐστιν ἡ τούτου ἐνέργεια, τοῦ διαφανοῦς ᾗ διαφανές. δυνάμει δέ, ἐν ᾧ τοῦτ’ ἐστί, καὶ τὸ σκότος. τὸ δὲ φῶς οἷον χρῶμά ἐστι τοῦ διαφανοῦς, ὅταν ᾖ ἐντελεχείᾳ διαφανὲς ὑπὸ πυρὸς ἢ τοιούτου οἷον τὸ ἄνω σῶμα· καὶ γὰρ τούτῳ τι ὑπάρχει ἓν καὶ ταὐτόν. τί μὲν οὖν τὸ διαφανὲς καὶ τί τὸ φῶς, εἴρηται, ὅτι οὔτε πῦρ οὔθ’ ὅλως σῶμα οὐδ’ ἀπορροὴ σώματος οὐδενός (εἴη γὰρ ἂν σῶμά τι καὶ οὕτως), ἀλλὰ πυρὸς ἢ τοιούτου τινὸς παρουσία ἐν τῷ διαφανεῖ· οὔτε γὰρ δύο σώματα ἅμα δυνατὸν ἐν τῷ αὐτῷ εἶναι,

3. δοκεῖ τε τὸ φῶς ἐναντίον εἶναι τῷ σκότει· ἔστι δὲ τὸ σκότος στέρησις τῆς τοιαύτης ἕξεως ἐκ διαφανοῦς, ὥστε δῆλον ὅτι καὶ ἡ τούτου παρουσία τὸ φῶς ἐστιν. καὶ οὐκ ὀρθῶς Ἐμπεδοκλῆς, οὐδ’ εἴ τις ἄλλος οὕτως εἴρηκεν, ὡς φερομένου τοῦ φωτὸς καὶ γιγνομένου ποτὲ μεταξὺ τῆς γῆς καὶ τοῦ περιέχοντος, ἡμᾶς δὲ λανθάνοντος· τοῦτο γάρ ἐστι καὶ παρὰ τὴν τοῦ λόγου ἐνάργειαν καὶ παρὰ τὰ φαινόμενα· ἐν μικρῷ μὲν γὰρ διαστήματι λάθοι ἄν, ἀπ’ ἀνατολῆς δ’ ἐπὶ δυσμὰς τὸ λανθάνειν μέγα λίαν τὸ αἴτημα. [418b26]

4. ἔστι δὲ χρώματος μὲν δεκτικὸν τὸ ἄχρουν, ψόφου δὲ τὸ ἄψοφον. ἄχρουν δ’ ἐστὶ τὸ διαφανὲς καὶ τὸ ἀόρατον ἢ τὸ μόλις ὁρώμενον, οἷον δοκεῖ τὸ σκοτεινόν. τοιοῦτον δὲ τὸ διαφανὲς μέν, ἀλλ’ οὐχ ὅταν ᾖ ἐντελεχείᾳ διαφανές, ἀλλ’ ὅταν δυνάμει· ἡ γὰρ αὐτὴ φύσις ὁτὲ μὲν σκότος ὁτὲ δὲ φῶς [419a]

5. νῦν δ’ ἐπὶ τοσοῦτον φανερόν ἐστιν, ὅτι τὸ μὲν ἐν φωτὶ ὁρώμενον χρῶμα (διὸ καὶ οὐχ ὁρᾶται ἄνευ φωτός· τοῦτο γὰρ ἦν αὐτῷ τὸ χρώματι

εἶναι, τὸ κινητικῷ εἶναι τοῦ κατ᾽ ἐνέργειαν διαφανοῦς), ἡ δ᾽ ἐντελέχεια τοῦ διαφανοῦς φῶς ἐστιν. σημεῖον δὲ τούτου φανερόν· ἐὰν γάρ τις θῇ τὸ ἔχον χρῶμα ἐπ᾽ αὐτὴν τὴν ὄψιν, οὐκ ὄψεται· ἀλλὰ τὸ μὲν χρῶμα κινεῖ τὸ διαφανές, οἷον τὸν ἀέρα, ὑπὸ τούτου δὲ συνεχοῦς ὄντος κινεῖται τὸ αἰσθητήριον.

6. οὐ γὰρ καλῶς τοῦτο λέγει Δημόκριτος, οἰόμενος, εἰ γένοιτο κενὸν τὸ μεταξύ, ὁρᾶσθαι ἂν ἀκριβῶς καὶ εἰ μύρμηξ ἐν τῷ οὐρανῷ εἴη· τοῦτο γὰρ ἀδύνατόν ἐστιν. πάσχοντος γάρ τι τοῦ αἰσθητικοῦ γίνεται τὸ ὁρᾶν· ὑπ᾽ αὐτοῦ μὲν οὖν τοῦ ὁρωμένου χρώματος ἀδύνατον· λείπεται δὴ ὑπὸ τοῦ μεταξύ, ὥστ᾽ ἀναγκαῖόν τι εἶναι μεταξύ· κενοῦ δὲ γενομένου οὐχ ὅτι ἀκριβῶς, ἀλλ᾽ ὅλως οὐθὲν ὀφθήσεται.

7. δι᾽ ἣν μὲν οὖν αἰτίαν τὸ χρῶμα ἀναγκαῖον ἐν φωτὶ ὁρᾶσθαι, εἴρηται. πῦρ δὲ ἐν ἀμφοῖν ὁρᾶται, καὶ ἐν σκότει καὶ ἐν φωτί, καὶ τοῦτο ἐξ ἀνάγκης· τὸ γὰρ διαφανὲς ὑπὸ τούτου γίνεται διαφανές.

8. ὁ δ᾽ αὐτὸς λόγος καὶ περὶ ψόφου καὶ ὀσμῆς ἐστιν· οὐθὲν γὰρ αὐτῶν ἁπτόμενον τοῦ αἰσθητηρίου ποιεῖ τὴν αἴσθησιν, ἀλλ᾽ ὑπὸ μὲν ὀσμῆς καὶ ψόφου τὸ μεταξὺ κινεῖται, ὑπὸ δὲ τούτου τῶν αἰσθητηρίων ἑκάτερον· ὅταν δ᾽ ἐπ᾽ αὐτό τις ἐπιθῇ τὸ αἰσθητήριον τὸ ψοφοῦν ἢ τὸ ὄζον, οὐδεμίαν αἴσθησιν ποιήσει. περὶ δὲ ἁφῆς καὶ γεύσεως ἔχει μὲν ὁμοίως, οὐ φαίνεται δέ· δι᾽ ἣν δ᾽ αἰτίαν, ὕστερον ἔσται δῆλον.

9. τὸ δὲ μεταξὺ ψόφων μὲν ἀήρ, ὀσμῆς δ᾽ ἀνώνυμον· κοινὸν γάρ τι πάθος ἐπ᾽ ἀέρος καὶ ὕδατος ἔστιν, ὥσπερ τὸ διαφανὲς χρώματι, οὕτω τῷ ἔχοντι ὀσμὴν ὃ ἐν ἀμφοτέροις ὑπάρχει τούτοις· φαίνεται γὰρ καὶ τὰ ἔνυδρα τῶν ζῴων [419b] ἔχειν αἴσθησιν ὀσμῆς. ἀλλ᾽ ὁ μὲν ἄνθρωπος, καὶ τῶν πεζῶν ὅσα ἀναπνεῖ, ἀδυνατεῖ ὀσμᾶσθαι μὴ ἀναπνέοντα. ἡ δ᾽ αἰτία καὶ περὶ τούτων ὕστερον λεχθήσεται.

Κεφάλαιο 8

[419b4] 1. Νῦν δὲ πρῶτον περὶ ψόφου καὶ ἀκοῆς διορίσωμεν. ἔστι δὲ διττὸς ὁ ψόφος· ὁ μὲν γὰρ ἐνέργειά τις, ὁ δὲ δύναμις· τὰ μὲν γὰρ οὔ φαμεν ἔχειν ψόφον, οἷον σπόγγον, ἔρια, τὰ δ’ ἔχειν, οἷον χαλκὸν καὶ ὅσα στερεὰ καὶ λεῖα, ὅτι δύναται ψοφῆσαι (τοῦτο δ’ ἐστὶν αὐτοῦ μεταξὺ καὶ τῆς ἀκοῆς ἐμποιῆσαι ψόφον ἐνεργείᾳ)·

2. γίνεται δ’ ὁ κατ’ ἐνέργειαν ψόφος ἀεί τινος πρός τι καὶ ἔν τινι· πληγὴ γάρ ἐστιν ἡ ποιοῦσα. διὸ καὶ ἀδύνατον ἑνὸς ὄντος γενέσθαι ψόφον· ἕτερον γὰρ τὸ τύπτον καὶ τὸ τυπτόμενον· ὥστε τὸ ψοφοῦν πρός τι ψοφεῖ· πληγὴ δ’ οὐ γίνεται ἄνευ φορᾶς. ὥσπερ δ’ εἴπομεν, οὐ τῶν τυχόντων πληγὴ ὁ ψόφος· οὐθένα γὰρ ποιεῖ ψόφον ἔρια ἂν πληγῇ, ἀλλὰ χαλκὸς καὶ ὅσα λεῖα καὶ κοῖλα· ὁ μὲν χαλκὸς ὅτι λεῖος, τὰ δὲ κοῖλα τῇ ἀνακλάσει πολλὰς ποιεῖ πληγὰς μετὰ τὴν πρώτην, ἀδυνατοῦντος ἐξελθεῖν τοῦ κινηθέντος.

3. ἔτι ἀκούεται ἐν ἀέρι, κἀν ὕδατι, ἀλλ’ ἧττον, οὐκ ἔστι δὲ ψόφου κύριος ὁ ἀὴρ οὐδὲ τὸ ὕδωρ, ἀλλὰ δεῖ στερεῶν πληγὴν γενέσθαι πρὸς ἄλληλα καὶ πρὸς τὸν ἀέρα. τοῦτο δὲ γίνεται ὅταν ὑπομένῃ πληγεὶς ὁ ἀὴρ καὶ μὴ διαχυθῇ. διὸ ἐὰν ταχέως καὶ σφοδρῶς πληγῇ, ψοφεῖ· δεῖ γὰρ φθάσαι τὴν κίνησιν τοῦ ῥαπίζοντος τὴν θρύψιν τοῦ ἀέρος, ὥσπερ ἂν εἰ σωρὸν ἢ ὁρμαθὸν ψάμμου τύπτοι τις φερόμενον ταχύ.

4. ἠχὼ δὲ γίνεται ὅταν, ἀέρος ἑνὸς γενομένου διὰ τὸ ἀγγεῖον τὸ διορίσαν καὶ κωλῦσαν θρυφθῆναι, πάλιν ὁ ἀὴρ ἀπωσθῇ, ὥσπερ σφαῖρα. ἔοικε δ’ ἀεὶ γίνεσθαι ἠχώ, ἀλλ’ οὐ σαφής, ἐπεὶ συμβαίνει γε ἐπὶ τοῦ ψόφου καθάπερ καὶ ἐπὶ τοῦ φωτός· καὶ γὰρ τὸ φῶς ἀεὶ ἀνακλᾶται (οὐδὲ γὰρ ἂν ἐγίνετο πάντῃ φῶς, ἀλλὰ σκότος ἔξω τοῦ ἡλιουμένου), ἀλλ’ οὐχ οὕτως ἀνακλᾶται ὥσπερ ἀφ’ ὕδατος ἢ χαλκοῦ ἢ καί τινος ἄλλου τῶν λείων, ὥστε σκιὰν ποιεῖν, ᾗ τὸ φῶς ὁρίζομεν.

5. τὸ δὲ κενὸν ὀρθῶς λέγεται κύριον τοῦ ἀκούειν. δοκεῖ γὰρ εἶναι κενὸν ὁ ἀήρ, οὗτος δ’ ἐστὶν ὁ ποιῶν ἀκούειν, ὅταν κινηθῇ συνεχὴς καὶ εἷς. ἀλλὰ διὰ τὸ ψαθυρὸς [420a] εἶναι οὐ γεγωνεῖ, ἂν μὴ λεῖον ᾖ τὸ πληγέν. τότε δὲ εἷς γίνεται ἅμα διὰ τὸ ἐπίπεδον· ἓν γὰρ τὸ τοῦ λείου ἐπίπεδον.

6. ψοφητικὸν μὲν οὖν τὸ κινητικὸν ἑνὸς ἀέρος συνεχείᾳ μέχρις ἀκοῆς. ἀκοῇ δὲ συμφυὴς <ἔστιν> ἀήρ· διὰ δὲ τὸ ἐν ἀέρι εἶναι, κινουμένου τοῦ ἔξω ὁ εἴσω κινεῖται. διόπερ οὐ πάντῃ τὸ ζῷον ἀκούει, οὐδὲ πάντῃ διέρχεται ὁ ἀήρ· οὐ γὰρ πάντῃ ἔχει ἀέρα τὸ κινησόμενον μέρος καὶ ἔμψυχον. αὐτὸς μὲν δὴ ἄψοφον ὁ ἀὴρ διὰ τὸ εὔθρυπτον· ὅταν δὲ κωλυθῇ θρύπτεσθαι, ἡ τούτου

κίνησις ψόφος. ὁ δ’ ἐν τοῖς ὠσὶν ἐγκατῳκοδόμηται πρὸς τὸ ἀκίνητος εἶναι, ὅπως ἀκριβῶς αἰσθάνηται πάσας τὰς διαφορὰς τῆς κινήσεως. διὰ ταῦτα δὲ καὶ ἐν ὕδατι ἀκούομεν, ὅτι οὐκ εἰσέρχεται πρὸς αὐτὸν τὸν συμφυῆ ἀέρα· ἀλλ’ οὐδ’ εἰς τὸ οὖς, διὰ τὰς ἕλικας. ὅταν δὲ τοῦτο συμβῇ, οὐκ ἀκούει· οὐδ’ ἂν ἡ μῆνιγξ κάμῃ, ὥσπερ τὸ ἐπὶ τῇ κόρῃ δέρμα [ὅταν κάμῃ]. ἀλλ’ οὐ σημεῖον τοῦ ἀκούειν ἢ μὴ τὸ ἠχεῖν τὸ οὖς ὥσπερ τὸ κέρας· ἀεὶ γὰρ οἰκείαν τινὰ κίνησιν ὁ ἀὴρ κινεῖται ὁ ἐν τοῖς ὠσίν, ἀλλ’ ὁ ψόφος ἀλλότριος καὶ οὐκ ἴδιος. καὶ διὰ τοῦτό φασιν ἀκούειν τῷ κενῷ καὶ ἠχοῦντι, ὅτι ἀκούομεν τῷ ἔχοντι ὡρισμένον τὸν ἀέρα. [420a.19]

7. πότερον δὲ ψοφεῖ τὸ τυπτόμενον ἢ τὸ τύπτον; ἢ καὶ ἄμφω, τρόπον δ’ ἕτερον; ἔστι γὰρ ὁ ψόφος κίνησις τοῦ δυναμένου κινεῖσθαι τὸν τρόπον τοῦτον ὅνπερ τὰ ἀφαλλόμενα ἀπὸ τῶν λείων, ὅταν τις κρούσῃ. οὐ δὴ πᾶν, ὥσπερ εἴρηται, ψοφεῖ τυπτόμενον καὶ τύπτον, οἷον ἐὰν πατάξῃ βελόνη βελόνην, ἀλλὰ δεῖ τὸ τυπτόμενον ὁμαλὸν εἶναι, ὥστε τὸν ἀέρα ἀθροῦν ἀφάλλεσθαι καὶ σείεσθαι.

8. αἱ δὲ διαφοραὶ τῶν ψοφούντων ἐν τῷ κατ’ ἐνέργειαν ψόφῳ δηλοῦνται· ὥσπερ γὰρ ἄνευ φωτὸς οὐχ ὁρᾶται τὰ χρώματα, οὕτως οὐδ’ ἄνευ ψόφου τὸ ὀξὺ καὶ τὸ βαρύ. ταῦτα δὲ λέγεται κατὰ μεταφορὰν ἀπὸ τῶν ἁπτῶν· τὸ μὲν γὰρ ὀξὺ κινεῖ τὴν αἴσθησιν ἐν ὀλίγῳ χρόνῳ ἐπὶ πολύ, τὸ δὲ βαρὺ ἐν πολλῷ ἐπ’ ὀλίγον. οὐ δὴ ταχὺ τὸ ὀξύ, τὸ δὲ βαρὺ βραδύ, ἀλλὰ γίνεται τοῦ μὲν διὰ τὸ τάχος ἡ κίνησις τοιαύτη, τοῦ δὲ διὰ βραδυτῆτα, [420b] καὶ ἔοικεν ἀνάλογον ἔχειν τῷ περὶ τὴν ἁφὴν ὀξεῖ καὶ ἀμβλεῖ· τὸ μὲν γὰρ ὀξὺ οἷον κεντεῖ, τὸ δ’ ἀμβλὺ οἷον ὠθεῖ, διὰ τὸ κινεῖν τὸ μὲν ἐν ὀλίγῳ τὸ δὲ ἐν πολλῷ, ὥστε συμβαίνει τὸ μὲν ταχὺ τὸ δὲ βραδὺ εἶναι.

9. περὶ μὲν οὖν ψόφου ταύτῃ διωρίσθω. ἡ δὲ φωνὴ ψόφος τίς ἐστιν ἐμψύχου· τῶν γὰρ ἀψύχων οὐθὲν φωνεῖ, ἀλλὰ καθ’ ὁμοιότητα λέγεται φωνεῖν, οἷον αὐλὸς καὶ λύρα καὶ ὅσα ἄλλα τῶν ἀψύχων ἀπότασιν ἔχει καὶ μέλος καὶ διάλεκτον. ἔοικε γάρ, ὅτι καὶ ἡ φωνὴ ταῦτ’ ἔχει. πολλὰ δὲ τῶν ζῴων οὐκ ἔχουσι φωνήν, οἷον τά τε ἄναιμα καὶ τῶν ἐναίμων ἰχθύες (καὶ τοῦτ’ εὐλόγως, εἴπερ ἀέρος κίνησίς τίς ἐστιν ὁ ψόφος), ἀλλ’ οἱ λεγόμενοι φωνεῖν, οἷον <οἱ> ἐν τῷ Ἀχελῴῳ, ψοφοῦσι τοῖς βραγχίοις ἤ τινι ἑτέρῳ τοιούτῳ,

10. φωνὴ δ’ ἐστὶ ζῴου ψόφος οὐ τῷ τυχόντι μορίῳ. ἀλλ’ ἐπεὶ πᾶν ψοφεῖ τύπτοντός τινος καί τι καὶ ἔν τινι, τοῦτο δ’ ἐστὶν ἀήρ, εὐλόγως ἂν φωνοίη ταῦτα μόνα ὅσα δέχεται τὸν ἀέρα. τῷ γὰρ ἤδη ἀναπνεομένῳ καταχρῆται ἡ φύσις ἐπὶ δύο ἔργα-καθάπερ τῇ γλώττῃ ἐπί τε τὴν γεῦσιν καὶ τὴν διάλεκτον, ὧν ἡ μὲν γεῦσις ἀναγκαῖον (διὸ καὶ πλείοσιν ὑπάρχει), ἡ δ’ ἑρμηνεία ἕνεκα

τοῦ εὖ, οὕτω καὶ τῷ πνεύματι πρός τε τὴν θερ- μότητα τὴν ἐντὸς ὡς ἀναγκαῖον <ὄν> (τὸ δ’ αἴτιον ἐν ἑτέροις εἰρήσεται) καὶ πρὸς τὴν φωνὴν ὅπως ὑπάρχῃ τὸ εὖ.

11. ὄργανον δὲ τῇ ἀναπνοῇ ὁ φάρυγξ· οὗ δ’ ἕνεκα τὸ μόριόν ἐστι τοῦτο, πνεύμων· τούτῳ γὰρ τῷ μορίῳ πλέον ἔχει τὸ θερμὸν τὰ πεζὰ τῶν ἄλλων. δεῖται δὲ τῆς ἀναπνοῆς καὶ ὁ περὶ τὴν καρδίαν τόπος πρῶτος. διὸ ἀναγκαῖον εἴσω ἀναπνεόμενον εἰσιέναι τὸν ἀέρα. ὥστε ἡ πληγὴ τοῦ ἀναπνεομένου ἀέρος ὑπὸ τῆς ἐν τούτοις τοῖς μορίοις ψυχῆς πρὸς τὴν καλουμένην ἀρτηρίαν φωνή ἐστιν (οὐ γὰρ πᾶς ζῴου ψόφος φωνή, καθάπερ εἴπομεν-ἔστι γὰρ καὶ τῇ γλώττῃ ψοφεῖν καὶ ὡς οἱ βήττοντες-ἀλλὰ δεῖ ἔμψυχόν τε εἶναι τὸ τύπτον καὶ μετὰ φαντασίας τινός· σημαντικὸς γὰρ δή τις ψόφος ἐστὶν ἡ φωνή)· καὶ οὐ τοῦ ἀναπνεομένου ἀέρος ὥσπερ ἡ βήξ, [421a] ἀλλὰ τούτῳ τύπτει τὸν ἐν τῇ ἀρτηρίᾳ πρὸς αὐτήν.

12. σημεῖον δὲ τὸ μὴ δύνασθαι φωνεῖν ἀναπνέοντα μηδ’ ἐκπνέοντα, ἀλλὰ κατέχοντα· κινεῖ γὰρ τούτῳ ὁ κατέχων. φανερὸν δὲ καὶ διότι οἱ ἰχθύες ἄφωνοι· οὐ γὰρ ἔχουσι φάρυγγα. τοῦτο δὲ τὸ μόριον οὐκ ἔχουσιν ὅτι οὐ δέχονται τὸν ἀέρα οὐδ’ ἀναπνέουσιν. δι’ ἣν μὲν οὖν αἰτίαν, ἕτερός ἐστι λόγος.

Κεφάλαιο 9

[421a7] 1. Περὶ δὲ ὀσμῆς καὶ ὀσφραντοῦ ἧττον εὐδιόριστόν ἐστι τῶν εἰρημένων· οὐ γὰρ δῆλον ποῖόν τί ἐστιν ἡ ὀσμή, οὕτως ὡς ὁ ψόφος ἢ τὸ χρῶμα. αἴτιον δ’ ὅτι τὴν αἴσθησιν ταύτην οὐκ ἔχομεν ἀκριβῆ, ἀλλὰ χείρω πολλῶν ζῴων· φαύλως γὰρ ἄνθρωπος ὀσμᾶται, καὶ οὐθενὸς αἰσθάνεται τῶν ὀσφραντῶν ἄνευ τοῦ λυπηροῦ ἢ τοῦ ἡδέος, ὡς οὐκ ὄντος ἀκριβοῦς τοῦ αἰσθητηρίου.

2. εὔλογον δ’ οὕτω καὶ τὰ σκληρόφθαλμα τῶν χρωμάτων αἰσθάνεσθαι, καὶ μὴ διαδήλους αὐτοῖς εἶναι τὰς διαφορὰς τῶν χρωμάτων πλὴν τῷ φοβερῷ καὶ ἀφόβῳ· οὕτω δὲ καὶ περὶ τὰς ὀσμὰς τὸ τῶν ἀνθρώπων γένος. ἔοικε μὲν γὰρ ἀνάλογον ἔχειν πρὸς τὴν γεῦσιν, καὶ ὁμοίως τὰ εἴδη τῶν χυμῶν τοῖς τῆς ὀσμῆς, ἀλλ’ ἀκριβεστέραν ἔχομεν τὴν γεῦσιν διὰ τὸ εἶναι αὐτὴν ἁφήν τινα, ταύτην δ’ ἔχειν τὴν αἴσθησιν τὸν ἄνθρωπον ἀκριβεστάτην· ἐν μὲν γὰρ ταῖς ἄλλαις λείπεται πολλῶν τῶν ζῴων, κατὰ δὲ τὴν ἁφὴν πολλῷ τῶν ἄλλων διαφερόντως ἀκριβοῖ· διὸ καὶ φρονιμώτατόν ἐστι τῶν ζῴων. σημεῖον δὲ τὸ καὶ ἐν τῷ γένει τῶν ἀνθρώπων παρὰ τὸ αἰσθητήριον τοῦτο εἶναι εὐφυεῖς καὶ ἀφυεῖς, παρ’ ἄλλο δὲ μηδέν· οἱ μὲν γὰρ σκληρόσαρκοι ἀφυεῖς τὴν διάνοιαν, οἱ δὲ μαλακόσαρκοι εὐφυεῖς. [421a26]

3. ἔστι δ’, ὥσπερ χυμὸς ὁ μὲν γλυκὺς ὁ δὲ πικρός, οὕτω καὶ ὀσμαί, ἀλλὰ τὰ μὲν ἔχουσι τὴν ἀνάλογον ὀσμὴν καὶ χυμόν, λέγω δὲ οἷον γλυκεῖαν ὀσμὴν καὶ γλυκὺν χυμόν, τὰ δὲ τοὐναντίον. ὁμοίως δὲ καὶ δριμεῖα καὶ αὐστηρὰ καὶ ὀξεῖα καὶ λιπαρά ἐστιν ὀσμή. ἀλλ’ ὥσπερ εἴπομεν, διὰ τὸ μὴ σφόδρα διαδήλους εἶναι τὰς ὀσμὰς ὥσπερ τοὺς χυμούς, [ἀπὸ τούτων] εἴληφε τὰ [421b] ὀνόματα καθ’ ὁμοιότητα τῶν πραγμάτων, ἡ μὲν γλυκεῖα κρόκου καὶ μέλιτος, ἡ δὲ δριμεῖα θύμου καὶ τῶν τοιούτων· τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων.

4. ἔστι δ’ ὥςπερ ἡ ἀκοὴ καὶ ἑκάστη τῶν αἰσθήσεων, ἡ μὲν τοῦ ἀκουστοῦ καὶ ἀνηκούστου, ἡ δὲ τοῦ ὁρατοῦ καὶ ἀοράτου, καὶ ἡ ὄσφρησις τοῦ ὀσφραντοῦ καὶ ἀνοσφράντου. ἀνόσφραντον δὲ τὸ μὲν παρὰ τὸ ὅλως ἀδύνατον <εἶναι> ἔχειν ὀσμήν, τὸ δὲ μικρὰν ἔχον καὶ φαύλην. ὁμοίως δὲ καὶ τὸ ἄγευστον λέγεται.

5. ἔστι δὲ καὶ ἡ ὄσφρησις διὰ τοῦ μεταξύ, οἷον ἀέρος ἢ ὕδατος· καὶ γὰρ τὰ ἔνυδρα δοκοῦσιν ὀσμῆς αἰσθάνεσθαι, ὁμοίως καὶ τὰ ἔναιμα καὶ τὰ ἄναιμα, ὥσπερ καὶ τὰ ἐν τῷ ἀέρι· καὶ γὰρ τούτων ἔνια πόρρωθεν ἀπαντᾷ πρὸς τὴν τροφὴν ὕποσμα γινόμενα.

6. διὸ καὶ ἄπορον φαίνεται εἰ πάντα μὲν ὁμοίως ὀσμᾶται, ὁ δ’ ἄνθρωπος ἀναπνέων μέν, μὴ ἀναπνέων δὲ ἀλλ’ ἐκπνέων ἢ κατέχων τὸ πνεῦμα οὐκ ὀσμᾶται, οὔτε πόρρωθεν οὔτ’ ἐγγύθεν, οὐδ’ ἂν ἐπὶ τοῦ μυκτῆρος ἐντὸς τεθῇ· καὶ τὸ μὲν ἐπ’ αὐτῷ τιθέμενον τῷ αἰσθητηρίῳ ἀναίσθητον εἶναι κοινὸν πάντων, ἀλλὰ τὸ ἄνευ τοῦ ἀναπνεῖν μὴ αἰσθάνεσθαι ἴδιον ἐπὶ τῶν ἀνθρώπων· δῆλον δὲ πειρωμένοις· ὥστε τὰ ἄναιμα, ἐπειδὴ οὐκ ἀναπνέουσιν, ἑτέραν ἄν τιν’ αἴσθησιν ἔχοι παρὰ τὰς λεγομένας. ἀλλ’ ἀδύνατον, εἴπερ τῆς ὀσμῆς αἰσθάνεται· ἡ γὰρ τοῦ ὀσφραντοῦ αἴσθησις καὶ δυσώδους καὶ εὐώδους ὄσφρησίς ἐστιν. ἔτι δὲ καὶ φθειρόμενα φαίνεται ὑπὸ τῶν ἰσχυρῶν ὀσμῶν ὑφ’ ὧνπερ ἄνθρωπος, οἷον ἀσφάλτου καὶ θείου καὶ τῶν τοιούτων. ὀσφραίνεσθαι μὲν οὖν ἀναγκαῖον, ἀλλ’ οὐκ ἀναπνέοντα.

7. ἔοικε δὲ τοῖς ἀνθρώποις διαφέρειν τὸ αἰσθητήριον τοῦτο πρὸς τὸ τῶν ἄλλων ζῴων, ὥσπερ τὰ ὄμματα πρὸς τὰ τῶν σκληροφθάλμων-τὰ μὲν γὰρ ἔχει φράγμα καὶ ὥσπερ ἔλυτρον τὰ βλέφαρα, ἃ μὴ κινήσας μηδ’ ἀνασπάσας οὐχ ὁρᾷ· τὰ δὲ σκληρόφθαλμα οὐδὲν ἔχει τοιοῦτον, ἀλλ’ εὐθέως ὁρᾷ τὰ γινόμενα ἐν τῷ διαφανεῖ-οὕτως οὖν καὶ τὸ ὀσφραντικὸν αἰσθητήριον τοῖς μὲν [422a] ἀκαλυφὲς εἶναι, ὥσπερ τὸ ὄμμα, τοῖς δὲ τὸν ἀέρα δεχομένοις ἔχειν ἐπικάλυμμα, ὃ ἀναπνεόντων ἀποκαλύπτεται, διευρυνομένων τῶν φλεβίων καὶ τῶν πόρων.

8. καὶ διὰ τοῦτο τὰ ἀναπνέοντα οὐκ ὀσμᾶται ἐν τῷ ὑγρῷ· ἀναγκαῖον γὰρ ὀσφρανθῆναι ἀναπνεύσαντα, τοῦτο δὲ ποιεῖν ἐν τῷ ὑγρῷ ἀδύνατον. ἔστι δ’ ἡ ὀσμὴ τοῦ ξηροῦ (ὥσπερ ὁ χυμὸς τοῦ ὑγροῦ), τὸ δὲ ὀσφραντικὸν αἰσθητήριον δυνάμει τοιοῦτον.

Κεφάλαιο 10

[422a8] 1. Τὸ δὲ γευστόν ἐστιν ἁπτόν τι· καὶ τοῦτ’ αἴτιον τοῦ μὴ εἶναι αἰσθητὸν διὰ τοῦ μεταξὺ ἀλλοτρίου ὄντος σώματος· οὐδὲ γὰρ τῇ ἁφῇ. καὶ τὸ σῶμα δὲ ἐν ᾧ ὁ χυμός, τὸ γευστόν, ἐν ὑγρῷ ὡς ὕλῃ· τοῦτο δ’ ἁπτόν τι. διὸ κἂν εἰ ἐν ὕδατι ἦμεν, ᾐσθανόμεθ’ ἂν ἐμβληθέντος τοῦ γλυκέος, οὐκ ἦν δ’ ἂν ἡ αἴσθησις ἡμῖν διὰ τοῦ μεταξύ, ἀλλὰ τῷ μιχθῆναι τῷ ὑγρῷ, καθάπερ ἐπὶ τοῦ ποτοῦ. τὸ δὲ χρῶμα οὐχ οὕτως ὁρᾶται τῷ μίγνυσθαι, οὐδὲ ταῖς ἀπορροίαις. ὡς μὲν οὖν τὸ μεταξὺ οὐθὲν ἔστιν· ὡς δὲ χρῶμα τὸ ὁρατόν, οὕτω τὸ γευστὸν ὁ χυμός. οὐθὲν δὲ ποιεῖ χυμοῦ αἴσθησιν ἄνευ ὑγρότητος, ἀλλ’ ἔχει ἐνεργείᾳ ἢ δυνάμει ὑγρότητα, οἷον τὸ ἁλμυρόν· εὔτηκτόν τε γὰρ αὐτὸ καὶ συντηκτικὸν γλώττης. ὥσπερ δὲ καὶ ἡ ὄψις ἐστὶ τοῦ τε ὁρατοῦ καὶ τοῦ ἀοράτου (τὸ γὰρ σκότος ἀόρατον, κρίνει δὲ καὶ τοῦτο ἡ ὄψις), ἔτι τε τοῦ λίαν λαμπροῦ (καὶ γὰρ τοῦτο ἀόρατον, ἄλλον δὲ τρόπον τοῦ σκότους), ὁμοίως δὲ καὶ ἡ ἀκοὴ ψόφου τε καὶ σιγῆς, ὧν τὸ μὲν ἀκουστὸν τὸ δ’ οὐκ ἀκουστόν, καὶ μεγάλου ψόφου καθάπερ ἡ ὄψις τοῦ λαμπροῦ (ὥσπερ γὰρ ὁ μικρὸς ψόφος ἀνήκουστος, τρόπον τινὰ καὶ ὁ μέγας τε καὶ ὁ βίαιος), ἀόρατον δὲ τὸ μὲν ὅλως λέγεται, ὥσπερ καὶ ἐπ’ ἄλλων τὸ ἀδύνατον, τὸ δ’ ἐὰν πεφυκὸς μὴ ἔχῃ ἢ φαύλως, ὥσπερ τὸ ἄπουν καὶ τὸ ἀπύρηνον-οὕτω δὴ καὶ ἡ γεῦσις τοῦ γευστοῦ τε καὶ ἀγεύστου, τοῦτο δὲ τὸ μικρὸν ἢ φαῦλον ἔχον χυμὸν ἢ φθαρτικὸν τῆς γεύσεως. [422b] δοκεῖ δ’ εἶναι ἀρχὴ τὸ ποτὸν καὶ ἄποτον (γεῦσις γάρ τις ἀμφοτέρου· ἀλλὰ τοῦ μὲν φαύλη καὶ φθαρτική [τῆς γεύσεως], τοῦ δὲ κατὰ φύσιν)· ἔστι δὲ κοινὸν ἁφῆς καὶ γεύσεως τὸ ποτόν. ἐπεὶ δ’ ὑγρὸν τὸ γευστόν,

ἀνάγκη καὶ τὸ αἰσθητήριον αὐτοῦ μήτε ὑγρὸν εἶναι ἐντελεχείᾳ μήτε ἀδύνατον ὑγραίνεσθαι· πάσχει γάρ τι ἡ γεῦσις ὑπὸ τοῦ γευστοῦ, ᾗ γευστόν. ἀναγκαῖον ἄρα ὑγρανθῆναι τὸ δυνάμενον μὲν ὑγραίνεσθαι σωζόμενον, μὴ ὑγρὸν δέ, τὸ γευστικὸν αἰσθητήριον. σημεῖον δὲ τὸ μήτε κατάξηρον οὖσαν τὴν γλῶτταν αἰσθάνεσθαι μήτε λίαν ὑγράν· αὕτη γὰρ ἁφῇ γίνεται τοῦ πρώτου ὑγροῦ, ὥσπερ ὅταν προγευματίσας τις ἰσχυροῦ χυμοῦ γεύηται ἑτέρου, καὶ οἷον τοῖς κάμνουσι πικρὰ πάντα φαίνεται διὰ τὸ τῇ γλώττῃ πλήρει τοιαύτης ὑγρότητος αἰσθάνεσθαι.

2. τὰ δ’ εἴδη τῶν χυμῶν, ὥσπερ καὶ ἐπὶ τῶν χρωμάτων, ἁπλᾶ μὲν τἀναντία, τὸ γλυκὺ καὶ τὸ πικρόν, ἐχόμενα δὲ τοῦ μὲν τὸ λιπαρόν, τοῦ δὲ τὸ ἁλμυρόν· μεταξὺ δὲ τούτων τό τε δριμὺ καὶ τὸ αὐστηρὸν καὶ στρυφνὸν καὶ

ὀξύ· σχεδὸν γὰρ αὗται δοκοῦσιν εἶναι διαφοραὶ χυμῶν. ὥστε τὸ γευστικόν ἐστι τὸ δυνάμει τοιοῦτον, γευστὸν δὲ τὸ ποιητικὸν ἐντελεχείᾳ αὐτοῦ.

Κεφάλαιο 11

[422b17] 1. Περὶ δὲ τοῦ ἁπτοῦ καὶ περὶ ἁφῆς ὁ αὐτὸς λόγος· εἰ γὰρ ἡ ἁφὴ μὴ μία ἐστὶν αἴσθησις ἀλλὰ πλείους, ἀναγκαῖον καὶ τὰ ἁπτὰ αἰσθητὰ πλείω εἶναι. ἔχει δ' ἀπορίαν πότερον πλείους εἰσὶν ἢ μία, καὶ τί τὸ αἰσθητήριον τὸ τοῦ ἁπτικοῦ, πότερον ἡ σὰρξ καὶ ἐν τοῖς ἄλλοις τὸ ἀνάλογον, ἢ οὔ, ἀλλὰ τοῦτο μέν ἐστι τὸ μεταξύ, τὸ δὲ πρῶτον αἰσθητήριον ἄλλο τί ἐστιν ἐντός.

2. πᾶσα γὰρ αἴσθησις μιᾶς ἐναντιώσεως εἶναι δοκεῖ, οἷον ὄψις λευκοῦ καὶ μέλανος, καὶ ἀκοὴ ὀξέος καὶ βαρέος, καὶ γεῦσις πικροῦ καὶ γλυκέος· ἐν δὲ τῷ ἁπτῷ πολλαὶ ἔνεισιν ἐναντιώσεις, θερμὸν ψυχρόν, ξηρὸν ὑγρόν, σκληρὸν μαλακόν, καὶ τῶν ἄλλων ὅσα τοιαῦτα. ἔχει δέ τινα λύσιν πρός γε ταύτην τὴν ἀπορίαν, ὅτι καὶ ἐπὶ τῶν ἄλλων αἰσθήσεων εἰσὶν ἐναντιώσεις πλείους, οἷον ἐν φωνῇ οὐ μόνον ὀξύτης καὶ βαρύτης, ἀλλὰ καὶ μέγεθος καὶ μικρότης, καὶ λειότης καὶ τραχύτης φωνῆς, καὶ τοιαῦθ' ἕτερα. εἰσὶ δὲ καὶ περὶ χρῶμα διαφοραὶ τοιαῦται ἕτεραι. ἀλλὰ τί τὸ ἓν τὸ ὑποκείμενον, ὥσπερ ἀκοῇ ψόφος, οὕτω τῇ ἁφῇ, οὐκ ἔστιν ἔνδηλον.

3. πότερον δ' ἐστὶ τὸ αἰσθητήριον ἐντός, ἢ οὔ, ἀλλ' [423a] εὐθέως ἡ σάρξ, οὐδὲν δοκεῖ σημεῖον εἶναι τὸ γίνεσθαι τὴν αἴσθησιν ἅμα θιγγανομένων. καὶ γὰρ νῦν εἴ τίς <τι> περὶ τὴν σάρκα περιτείνειεν οἷον ὑμένα ποιήσας, ὁμοίως τὴν αἴσθησιν εὐθέως ἁψάμενος ἐνσημανεῖ· καίτοι δῆλον ὡς οὐκ ἔστιν ἐν τούτῳ τὸ αἰσθητήριον (εἰ δὲ καὶ συμφυὲς γένοιτο, θᾶττον ἔτι διικνοῖτ' ἂν ἡ αἴσθησις)·

4. διὸ τὸ τοιοῦτον μόριον τοῦ σώματος ἔοικεν οὕτως ἔχειν ὥσπερ ἂν εἰ κύκλῳ ἡμῖν περιεπεφύκει ὁ ἀήρ· ἐδοκοῦμεν γὰρ ἂν ἑνί τινι αἰσθάνεσθαι καὶ ψόφου καὶ χρώματος καὶ ὀσμῆς, καὶ μία τις αἴσθησις εἶναι ὄψις ἀκοὴ ὄσφρησις. νῦν δὲ διὰ τὸ διωρίσθαι δι' οὗ γίνονται αἱ κινήσεις, φανερὰ τὰ εἰρημένα αἰσθητήρια ἕτερα ὄντα. ἐπὶ δὲ τῆς ἁφῆς τοῦτο νῦν ἄδηλον· ἐξ ἀέρος μὲν γὰρ ἢ ὕδατος ἀδύνατον συστῆναι τὸ ἔμψυχον σῶμα· δεῖ γάρ τι στερεὸν εἶναι· λείπεται δὴ μικτὸν ἐκ τῆς καὶ τούτων εἶναι, οἷον βούλεται εἶναι ἡ σὰρξ καὶ τὸ ἀνάλογον· ὥστε ἀναγκαῖον τὸ σῶμα εἶναι τὸ μεταξὺ τοῦ ἁπτικοῦ προσπεφυκός, δι' οὗ γίνονται αἱ αἰσθήσεις πλείους οὖσαι.

5. δηλοῖ δ' ὅτι πλείους ἡ ἐπὶ τῆς γλώττης ἁφή· ἁπάντων γὰρ τῶν ἁπτῶν αἰσθάνεται κατὰ τὸ αὐτὸ μόριον καὶ χυμοῦ. εἰ μὲν οὖν καὶ ἡ ἄλλη σὰρξ ᾐσθάνετο τοῦ χυμοῦ, ἐδόκει ἂν ἡ αὐτὴ καὶ μία εἶναι αἴσθησις ἡ γεῦσις καὶ ἡ ἁφή· νῦν δὲ δύο διὰ τὸ μὴ ἀντιστρέφειν.

6. ἀπορήσειε δ’ ἄν τις, εἰ πᾶν σῶμα βάθος ἔχει, τοῦτο δ’ ἐστὶ τὸ τρίτον μέγεθος, ὧν δ’ ἐστὶ δύο σωμάτων μεταξὺ σῶμά τι, οὐκ ἐνδέχεται ταῦτα ἀλλήλων ἅπτεσθαι, τὸ δ’ ὑγρὸν οὐκ ἔστιν ἄνευ σώματος, οὐδὲ τὸ διερόν, ἀλλ’ ἀναγκαῖον ὕδωρ εἶναι ἢ ἔχειν ὕδωρ,

τὰ δὲ ἁπτόμενα ἀλλήλων ἐν τῷ ὕδατι, μὴ ξηρῶν τῶν ἄκρων ὄντων, ἀναγκαῖον ὕδωρ ἔχειν μεταξύ, οὗ ἀνάπλεα τὰ ἔσχατα, εἰ δὲ τοῦτ’ ἀληθές, ἀδύνατον ἅψασθαι ἄλλο ἄλλου ἐν ὕδατι, τὸν αὐτὸν δὲ τρόπον καὶ ἐν τῷ ἀέρι (ὁμοίως γὰρ ἔχει ὁ ἀὴρ πρὸς τὰ ἐν αὐτῷ καὶ τὸ ὕδωρ πρὸς τὰ ἐν τῷ ὕδατι, λανθάνει δὲ μᾶλλον ἡμᾶς, ὥσπερ καὶ τὰ ἐν τῷ ὕδατι ζῷα [423b] εἰ διερὸν διεροῦ ἅπτεται)

-πότερον οὖν πάντων ὁμοίως ἐστὶν ἡ αἴσθησις, ἢ ἄλλων ἄλλως, καθάπερ νῦν δοκεῖ ἡ μὲν γεῦσις καὶ ἡ ἁφὴ τῷ ἅπτεσθαι, αἱ δ’ ἄλλαι ἄποθεν. τὸ δ’ οὐκ ἔστιν, ἀλλὰ καὶ τὸ σκληρὸν καὶ τὸ μαλακὸν δι’ ἑτέρων αἰσθανόμεθα, ὥσπερ καὶ τὸ ψοφητικὸν καὶ τὸ ὁρατὸν καὶ τὸ ὀσφραντόν· ἀλλὰ τὰ μὲν πόρρωθεν, τὰ δ’ ἐγγύθεν, διὸ λανθάνει· ἐπεὶ αἰσθανόμεθά γε πάντων διὰ τοῦ μέσου, ἀλλ’ ἐπὶ τούτων λανθάνει. καίτοι καθάπερ εἴπομεν καὶ πρότερον, κἂν εἰ δι’ ὑμένος αἰσθανοίμεθα τῶν ἁπτῶν ἁπάντων λανθάνοντος ὅτι διείργει, ὁμοίως ἂν ἔχοιμεν ὥσπερ καὶ νῦν ἐν τῷ ὕδατι καὶ ἐν τῷ ἀέρι· δοκοῦμεν γὰρ νῦν αὐτῶν ἅπτεσθαι καὶ οὐδὲν εἶναι διὰ μέσου.

8. ἀλλὰ διαφέρει τὸ ἁπτὸν τῶν ὁρατῶν καὶ τῶν ψοφητικῶν, ὅτι ἐκείνων μὲν αἰσθανόμεθα τῷ τὸ μεταξὺ ποιεῖν τι ἡμᾶς, τῶν δὲ ἁπτῶν οὐχ ὑπὸ τοῦ μεταξὺ ἀλλ’ ἅμα τῷ μεταξύ, ὥσπερ ὁ δι’ ἀσπίδος πληγείς· οὐ γὰρ ἡ ἀσπὶς πληγεῖσα ἐπάταξεν, ἀλλ’ ἅμ’ ἄμφω συνέβη πληγῆναι.

9. ὅλως δ’ ἔοικεν ἡ σὰρξ καὶ ἡ γλῶττα, ὡς ὁ ἀὴρ καὶ τὸ ὕδωρ πρὸς τὴν ὄψιν καὶ τὴν ἀκοὴν καὶ τὴν ὄσφρησιν ἔχουσιν, οὕτως ἔχειν πρὸς τὸ αἰσθητήριον ὥσπερ ἐκείνων ἕκαστον. αὐτοῦ δὲ τοῦ αἰσθητηρίου ἁπτομένου οὔτ’ ἐκεῖ οὔτ’ ἐνταῦθα γένοιτ’ ἂν αἴσθησις, οἷον εἴ τις σῶμά τι λευκὸν ἐπὶ τοῦ ὄμματος θείη τὸ ἔσχατον. ᾗ καὶ δῆλον ὅτι ἐντὸς τὸ τοῦ ἁπτοῦ αἰσθητικόν. οὕτω γὰρ ἂν συμβαίνοι ὅπερ καὶ ἐπὶ τῶν ἄλλων· ἐπιτιθεμένων γὰρ ἐπὶ τὸ αἰσθητήριον οὐκ αἰσθάνεται, ἐπὶ δὲ τὴν σάρκα ἐπιτιθεμένων αἰσθάνεται· ὥστε τὸ μεταξὺ τοῦ ἁπτικοῦ ἡ σάρξ.

10. ἁπταὶ μὲν οὖν εἰσὶν αἱ διαφοραὶ τοῦ σώματος ᾗ σῶμα· λέγω δὲ διαφορὰς αἳ τὰ στοιχεῖα διορίζουσι, θερμὸν ψυχρόν, ξηρὸν ὑγρόν, περὶ ὧν εἰρήκαμεν πρότερον ἐν τοῖς περὶ τῶν στοιχείων.

11. τὸ δὲ αἰσθητήριον αὐτῶν τὸ ἁπτικόν, καὶ ἐν ᾧ ἡ καλουμένη ἁφὴ ὑπάρχει αἴσθησις πρώτῳ, τὸ δυνάμει τοιοῦτόν ἐστι μόριον· [424a] τὸ γὰρ αἰσθάνεσθαι πάσχειν τι ἐστίν· ὥστε τὸ ποιοῦν, οἷον αὐτὸ ἐνεργείᾳ, τοιοῦτον

ἐκεῖνο ποιεῖ, δυνάμει ὄν. διὸ τοῦ ὁμοίως θερμοῦ καὶ ψυχροῦ, ἢ σκληροῦ καὶ μαλακοῦ, οὐκ αἰσθανόμεθα, ἀλλὰ τῶν ὑπερβολῶν, ὡς τῆς αἰσθήσεως οἷον μεσότητός τινος οὔσης τῆς ἐν τοῖς αἰσθητοῖς ἐναντιώσεως. καὶ διὰ τοῦτο κρίνει τὰ αἰσθητά. τὸ γὰρ μέσον κριτικόν· γίνεται γὰρ πρὸς ἑκάτερον αὐτῶν θάτερον τῶν ἄκρων· καὶ δεῖ ὥσπερ τὸ μέλλον αἰσθήσεσθαι λευκοῦ καὶ μέλανος μηδέτερον αὐτῶν εἶναι ἐνεργείᾳ, δυνάμει δ’ ἄμφω (οὕτω δὲ καὶ ἐπὶ τῶν ἄλλων), καὶ ἐπὶ τῆς ἁφῆς μήτε θερμὸν μήτε ψυχρόν.

12. ἔτι δ’ ὥσπερ ὁρατοῦ καὶ ἀοράτου ἦν πως ἡ ὄψις, ὁμοίως δὲ καὶ αἱ λοιπαὶ τῶν ἀντικειμένων, οὕτω καὶ ἡ ἁφὴ τοῦ ἁπτοῦ καὶ ἀνάπτου· ἄναπτον δ’ ἐστὶ τό τε μικρὰν ἔχον πάμπαν διαφορὰν τῶν ἁπτῶν, οἷον πέπονθεν ὁ ἀήρ, καὶ τῶν ἁπτῶν αἱ ὑπερβολαί, ὥσπερ τὰ φθαρτικά. καθ’ ἑκάστην μὲν οὖν τῶν αἰσθήσεων εἴρηται τύπῳ.

Κεφάλαιο 12

[424a17] 1. Καθόλου δὲ περὶ πάσης αἰσθήσεως δεῖ λαβεῖν ὅτι ἡ μὲν αἴσθησίς ἐστι τὸ δεκτικὸν τῶν αἰσθητῶν εἰδῶν ἄνευ τῆς ὕλης, οἷον ὁ κηρὸς τοῦ δακτυλίου ἄνευ τοῦ σιδήρου καὶ τοῦ χρυσοῦ δέχεται τὸ σημεῖον, λαμβάνει δὲ τὸ χρυσοῦν ἢ τὸ χαλκοῦν σημεῖον, ἀλλ’ οὐχ ᾗ χρυσὸς ἢ χαλκός· ὁμοίως δὲ καὶ ἡ αἴσθησις ἑκάστου ὑπὸ τοῦ ἔχοντος χρῶμα ἢ χυμὸν ἢ ψόφον πάσχει, ἀλλ’ οὐχ ᾗ ἕκαστον ἐκείνων λέγεται, ἀλλ’ ᾗ τοιονδί, καὶ κατὰ τὸν λόγον.

2. αἰσθητήριον δὲ πρῶτον ἐν ᾧ ἡ τοιαύτη δύναμις. ἔστι μὲν οὖν ταὐτόν, τὸ δ’ εἶναι ἕτερον· μέγεθος μὲν γὰρ ἄν τι εἴη τὸ αἰσθανόμενον, οὐ μὴν τό γε αἰσθητικῷ εἶναι οὐδ’ ἡ αἴσθησις μέγεθός ἐστιν, ἀλλὰ λόγος τις καὶ δύναμις ἐκείνου.

3. φανερὸν δ’ ἐκ τούτων καὶ διὰ τί ποτε τῶν αἰσθητῶν αἱ ὑπερβολαὶ φθείρουσι τὰ αἰσθητήρια (ἐὰν γὰρ ᾖ ἰσχυροτέρα τοῦ αἰσθητηρίου ἡ κίνησις, λύεται ὁ λόγος-τοῦτο δ’ ἦν ἡ αἴσθησις-ὥσπερ καὶ ἡ συμφωνία καὶ ὁ τόνος κρουομένων σφόδρα τῶν χορδῶν),

4. καὶ διὰ τί ποτε τὰ φυτὰ οὐκ αἰσθάνεται, ἔχοντά τι μόριον ψυχικὸν καὶ πάσχοντά τι ὑπὸ τῶν ἁπτῶν (καὶ γὰρ ψύχε- [424b] ται καὶ θερμαίνεται)· αἴτιον γὰρ τὸ μὴ ἔχειν μεσότητα, μηδὲ τοιαύτην ἀρχὴν οἵαν τὰ εἴδη δέχεσθαι τῶν αἰσθητῶν, ἀλλὰ πάσχειν μετὰ τῆς ὕλης.

5. ἀπορήσειε δ’ ἄν τις εἰ πάθοι ἄν τι ὑπ’ ὀσμῆς τὸ ἀδύνατον ὀσφρανθῆναι, ἢ ὑπὸ χρώματος τὸ μὴ δυνάμενον ἰδεῖν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. εἰ δὲ τὸ ὀσφραντὸν ὀσμή, εἴ τι ποιεῖ, τὴν ὄσφρησιν ἡ ὀσμὴ ποιεῖ· ὥστε τῶν ἀδυνάτων ὀσφρανθῆναι οὐθὲν οἷόν τε πάσχειν ὑπ’ ὀσμῆς (ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ τῶν ἄλλων)· οὐδὲ τῶν δυνατῶν, ἀλλ’ <ἢ> ᾗ αἰσθητικὸν ἕκαστον. ἅμα δὲ δῆλον καὶ οὕτως· οὔτε γὰρ φῶς καὶ σκότος οὔτε ψόφος οὔτε ὀσμὴ οὐδὲν ποιεῖ τὰ σώματα, ἀλλ’ ἐν οἷς ἐστίν, οἷον ἀὴρ ὁ μετὰ βροντῆς διίστησι τὸ ξύλον.

6. ἀλλὰ τὰ ἁπτὰ καὶ οἱ χυμοὶ ποιοῦσιν· εἰ γὰρ μή, ὑπὸ τίνος ἂν πάσχοι τὰ ἄψυχα καὶ ἀλλοιοῖτο; ἆρ’ οὖν κἀκεῖνα ποιήσει; ἢ οὐ πᾶν σῶμα παθητικὸν ὑπ’ ὀσμῆς καὶ ψόφου, καὶ τὰ πάσχοντα ἀόριστα, καὶ οὐ μένει, οἷον ἀήρ (ὄζει γὰρ ὥσπερ παθών τι); τί οὖν ἐστι τὸ ὀσμᾶσθαι παρὰ τὸ πάσχειν τι; ἢ τὸ μὲν ὀσμᾶσθαι αἰσθάνεσθαι, ὁ δ’ ἀὴρ παθὼν ταχέως αἰσθητὸς γίνεται;

Βιβλίο Γ

Κεφάλαιο 1

[424b.22] 1. Ὅτι δ’ οὐκ ἔστιν αἴσθησις ἑτέρα παρὰ τὰς πέντε (λέγω δὲ ταύτας ὄψιν, ἀκοήν, ὄσφρησιν, γεῦσιν, ἁφήν), ἐκ τῶνδε πιστεύσειεν ἄν τις. εἰ γὰρ παντὸς οὗ ἐστὶν αἴσθησις ἁφὴ καὶ νῦν αἴσθησιν ἔχομεν (πάντα γὰρ τὰ τοῦ ἁπτοῦ ᾗ ἁπτὸν πάθη τῇ ἁφῇ ἡμῖν αἰσθητά ἐστιν), ἀνάγκη τ’, εἴπερ ἐκλείπει τις αἴσθησις, καὶ αἰσθητήριόν τι ἡμῖν ἐκλείπειν, καὶ ὅσων μὲν αὐτῶν ἁπτόμενοι αἰσθανόμεθα, τῇ ἁφῇ αἰσθητά ἐστιν, ἣν τυγχάνομεν ἔχοντες, ὅσα δὲ διὰ τῶν μεταξὺ καὶ μὴ αὐτῶν ἁπτόμενοι, τοῖς ἁπλοῖς, λέγω δ’ οἷον ἀέρι καὶ ὕδατι,

2. ἔχει δ’ οὕτως ὥστ’ εἰ μὲν δι’ ἑνὸς πλείω αἰσθητὰ ἕτερα ὄντα ἀλλήλων τῷ γένει, ἀνάγκη τὸν ἔχοντα τὸ τοιοῦτον αἰσθητήριον ἀμφοῖν αἰσθητικὸν εἶναι (οἷον εἰ ἐξ ἀέρος ἐστὶ τὸ αἰσθητήριον, καὶ ἔστιν ὁ ἀὴρ καὶ ψόφου καὶ χρόας), εἰ δὲ πλείω [425a] τοῦ αὐτοῦ, οἷον χρόας καὶ ἀὴρ καὶ ὕδωρ (ἄμφω γὰρ διαφανῆ), καὶ ὁ τὸ ἕτερον αὐτῶν ἔχων μόνον αἰσθήσεται τοῦ δι’ ἀμφοῖν,

3. τῶν δὲ ἁπλῶν ἐκ δύο τούτων αἰσθητήρια μόνον ἐστίν, ἐξ ἀέρος καὶ ὕδατος (ἡ μὲν γὰρ κόρη ὕδατος, ἡ δ’ ἀκοὴ ἀέρος, ἡ δ’ ὄσφρησις θατέρου τούτων), τὸ δὲ πῦρ ἢ οὐθενὸς ἢ κοινὸν πάντων (οὐθὲν γὰρ ἄνευ θερμότητος αἰσθητικόν), γῆ δὲ ἢ οὐθενός, ἢ ἐν τῇ ἁφῇ μάλιστα μέμικται ἰδίως, διὸ λείποιτ’ ἂν μηθὲν εἶναι αἰσθητήριον ἔξω ὕδατος καὶ ἀέρος,

4. ταῦτα δὲ καὶ νῦν ἔχουσιν ἔνια ζῷα-πᾶσαι ἄρα αἱ αἰσθήσεις ἔχονται ὑπὸ τῶν μὴ ἀτελῶν μηδὲ πεπηρωμένων (φαίνεται γὰρ καὶ ἡ ἀσπάλαξ ὑπὸ τὸ δέρμα ἔχουσα ὀφθαλμούς)· ὥστ’ εἰ μή τι ἕτερον ἔστι σῶμα, καὶ πάθος ὃ μηθενός ἐστι τῶν ἐνταῦθα σωμάτων, οὐδεμία ἂν ἐκλείποι αἴσθησις.

5. ἀλλὰ μὴν οὐδὲ τῶν κοινῶν οἷόν τ’ εἶναι αἰσθητήριόν τι ἴδιον, ὧν ἑκάστῃ αἰσθήσει αἰσθανόμεθα κατὰ συμβεβηκός, οἷον κινήσεως, στάσεως, σχήματος, μεγέθους, ἀριθμοῦ· ταῦτα γὰρ πάντα [κινήσει] αἰσθανόμεθα, οἷον μέγεθος κινήσει (ὥστε καὶ σχῆμα· μέγεθος γάρ τι τὸ σχῆμα), τὸ δ’ ἠρεμοῦν τῷ μὴ κινεῖσθαι, ὁ δ’ ἀριθμὸς τῇ ἀποφάσει τοῦ συνεχοῦς, καὶ τοῖς ἰδίοις (ἑκάστη γὰρ ἓν αἰσθάνεται αἴσθησις)· ὥστε δῆλον ὅτι ἀδύνατον ὁτουοῦν ἰδίαν αἴσθησιν εἶναι τούτων, οἷον κινήσεως· οὕτω γὰρ ἔσται ὥσπερ νῦν τῇ ὄψει τὸ γλυκὺ αἰσθανόμεθα·

6. τοῦτο δ’ ὅτι ἀμφοῖν ἔχοντες τυγχάνομεν αἴσθησιν, ᾗ ὅταν συμπέσωσιν ἅμα γνωρίζομεν. εἰ δὲ μή, οὐδαμῶς ἂν ἀλλ’ ἢ κατὰ συμβεβηκὸς

ᾐσθανόμεθα (οἷον τὸν Κλέωνος υἱὸν οὐχ ὅτι Κλέωνος υἱός, ἀλλ’ ὅτι λευκός, τούτῳ δὲ συμβέβηκεν υἱῷ Κλέωνος εἶναι)·

7. τῶν δὲ κοινῶν ἤδη ἔχομεν αἴσθησιν κοινήν, οὐ κατὰ συμβεβηκός· οὐκ ἄρ’ ἐστὶν ἰδία· οὐδαμῶς γὰρ ἂν ᾐσθανόμεθα ἀλλ’ ἢ οὕτως ὥσπερ εἴρηται [τὸν Κλέωνος υἱὸν ἡμᾶς ὁρᾶν]. τὰ δ’ ἀλλήλων ἴδια κατὰ συμβεβηκὸς αἰσθάνονται αἱ αἰσθήσεις, οὐχ ᾗ αὐταί, ἀλλ’ ᾗ μία, ὅταν [425b] ἅμα γένηται ἡ αἴσθησις ἐπὶ τοῦ αὐτοῦ, οἷον χολῆς ὅτι πικρὰ καὶ ξανθή (οὐ γὰρ δὴ ἑτέρας γε τὸ εἰπεῖν ὅτι ἄμφω ἕν)· διὸ καὶ ἀπατᾶται, καὶ ἐὰν ᾖ ξανθόν, χολὴν οἴεται εἶναι.

8. ζητήσειε δ’ ἄν τις τίνος ἕνεκα πλείους ἔχομεν αἰσθήσεις, ἀλλ’ οὐ μίαν μόνην. ἢ ὅπως ἧττον λανθάνῃ τὰ ἀκολουθοῦντα καὶ κοινά, οἷον κίνησις καὶ μέγεθος καὶ ἀριθμός; εἰ γὰρ ἦν ἡ ὄψις μόνη, καὶ αὕτη λευκοῦ, ἐλάνθανεν ἂν μᾶλλον κἂν ἐδόκει ταὐτὸν εἶναι πάντα διὰ τὸ ἀκολουθεῖν ἀλλήλοις ἅμα χρῶμα καὶ μέγεθος. νῦν δ’ ἐπεὶ καὶ ἐν ἑτέρῳ αἰσθητῷ τὰ κοινὰ ὑπάρχει, δῆλον ποιεῖ ὅτι ἄλλο τι ἕκαστον αὐτῶν.

Κεφάλαιο 2

[425b12] 1. Ἐπεὶ δ’ αἰσθανόμεθα ὅτι ὁρῶμεν καὶ ἀκούομεν, ἀνάγκη ἢ τῇ ὄψει αἰσθάνεσθαι ὅτι ὁρᾷ, ἢ ἑτέρᾳ. ἀλλ’ ἡ αὐτὴ ἔσται τῆς ὄψεως καὶ τοῦ ὑποκειμένου χρώματος, ὥστε ἢ δύο τοῦ αὐτοῦ ἔσονται ἢ αὐτὴ αὑτῆς.

2. ἔτι δ’ εἰ καὶ ἑτέρα εἴη ἡ τῆς ὄψεως αἴσθησις, ἢ εἰς ἄπειρον εἶσιν ἢ αὐτή τις ἔσται αὑτῆς· ὥστ’ ἐπὶ τῆς πρώτης τοῦτο ποιητέον. ἔχει δ’ ἀπορίαν· εἰ γὰρ τὸ τῇ ὄψει αἰσθάνεσθαί ἐστιν ὁρᾶν, ὁρᾶται δὲ χρῶμα ἢ τὸ ἔχον, εἰ ὄψεταί τις τὸ ὁρῶν, καὶ χρῶμα ἕξει τὸ ὁρῶν πρῶτον.

3. φανερὸν τοίνυν ὅτι οὐχ ἓν τὸ τῇ ὄψει αἰσθάνεσθαι· καὶ γὰρ ὅταν μὴ ὁρῶμεν, τῇ ὄψει κρίνομεν καὶ τὸ σκότος καὶ τὸ φῶς, ἀλλ’ οὐχ ὡσαύτως. ἔτι δὲ καὶ τὸ ὁρῶν ἔστιν ὡς κεχρωμάτισται· τὸ γὰρ αἰσθητήριον δεκτικὸν τοῦ αἰσθητοῦ ἄνευ τῆς ὕλης ἕκαστον· διὸ καὶ ἀπελθόντων τῶν αἰσθητῶν ἔνεισιν αἰσθήσεις καὶ φαντασίαι ἐν τοῖς αἰσθητηρίοις.

4. ἡ δὲ τοῦ αἰσθητοῦ ἐνέργεια καὶ τῆς αἰσθήσεως ἡ αὐτὴ μέν ἐστι καὶ μία, τὸ δ’ εἶναι οὐ τὸ αὐτὸ αὐταῖς· λέγω δ’ οἷον ὁ ψόφος ὁ κατ’ ἐνέργειαν καὶ ἡ ἀκοὴ ἡ κατ’ ἐνέργειαν· ἔστι γὰρ ἀκοὴν ἔχοντα μὴ ἀκούειν, καὶ τὸ ἔχον ψόφον οὐκ ἀεὶ ψοφεῖ, ὅταν δ’ ἐνεργῇ τὸ δυνάμενον ἀκούειν καὶ ψοφῇ τὸ δυνάμενον ψοφεῖν, τότε ἡ κατ’ ἐνέργειαν ἀκοὴ ἅμα γίνεται καὶ ὁ κατ’ [426a] ἐνέργειαν ψόφος, ὧν εἴπειεν ἄν τις τὸ μὲν εἶναι ἄκουσιν τὸ δὲ ψόφησιν.

5. εἰ δή ἐστιν ἡ κίνησις (καὶ ἡ ποίησις καὶ τὸ πάθος) ἐν τῷ κινουμένῳ, ἀνάγκη καὶ τὸν ψόφον καὶ τὴν ἀκοὴν τὴν κατ’ ἐνέργειαν ἐν τῷ κατὰ δύναμιν εἶναι· ἡ γὰρ τοῦ ποιητικοῦ καὶ κινητικοῦ ἐνέργεια ἐν τῷ πάσχοντι ἐγγίνεται· διὸ οὐκ ἀνάγκη τὸ κινοῦν κινεῖσθαι. ἡ μὲν οὖν τοῦ ψοφητικοῦ ἐνέργειά ἐστι ψόφος ἢ ψόφησις, ἡ δὲ τοῦ ἀκουστικοῦ ἀκοὴ ἢ ἄκουσις· διττὸν γὰρ ἡ ἀκοή, καὶ διττὸν ὁ ψόφος.

6. ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ τῶν ἄλλων αἰσθήσεων καὶ αἰσθητῶν. ὥσπερ γὰρ καὶ ἡ ποίησις καὶ ἡ πάθησις ἐν τῷ πάσχοντι ἀλλ’ οὐκ ἐν τῷ ποιοῦντι, οὕτω καὶ ἡ τοῦ αἰσθητοῦ ἐνέργεια καὶ ἡ τοῦ αἰσθητικοῦ ἐν τῷ αἰσθητικῷ. ἀλλ’ ἐπ’ ἐνίων μὲν ὠνόμασται, οἷον ἡ ψόφησις καὶ ἡ ἄκουσις, ἐπ’ ἐνίων δ’ ἀνώνυμον θάτερον· ὅρασις γὰρ λέγεται ἡ τῆς ὄψεως ἐνέργεια, ἡ δὲ τοῦ χρώματος ἀνώνυμος, καὶ γεῦσις ἡ τοῦ γευστικοῦ, ἡ δὲ τοῦ χυμοῦ ἀνώνυμος.

7. ἐπεὶ δὲ μία μέν ἐστιν ἐνέργεια ἡ τοῦ αἰσθητοῦ καὶ τοῦ αἰσθητικοῦ, τὸ δ’ εἶναι ἕτερον, ἀνάγκη ἅμα φθείρεσθαι καὶ σώζεσθαι τὴν οὕτω λεγομένην

ἀκοὴν καὶ ψόφον, καὶ χυμὸν δὴ καὶ γεῦσιν, καὶ τὰ ἄλλα ὁμοίως· τὰ δὲ κατὰ δύναμιν λεγόμενα οὐκ ἀνάγκη·

8. ἀλλ’ οἱ πρότερον φυσιολόγοι τοῦτο οὐ καλῶς ἔλεγον, οὐθὲν οἰόμενοι οὔτε λευκὸν οὔτε μέλαν εἶναι ἄνευ ὄψεως, οὐδὲ χυμὸν ἄνευ γεύσεως. τῇ μὲν γὰρ ἔλεγον ὀρθῶς, τῇ δ’ οὐκ ὀρθῶς· διχῶς γὰρ λεγομένης τῆς αἰσθήσεως καὶ τοῦ αἰσθητοῦ, τῶν μὲν κατὰ δύναμιν τῶν δὲ κατ’ ἐνέργειαν, ἐπὶ τούτων μὲν συμβαίνει τὸ λεχθέν, ἐπὶ δὲ τῶν ἑτέρων οὐ συμβαίνει. ἀλλ’ ἐκεῖνοι ἁπλῶς ἔλεγον περὶ τῶν λεγομένων οὐχ ἁπλῶς.

9. εἰ δ’ ἡ φωνὴ συμφωνία τίς ἐστιν, ἡ δὲ φωνὴ καὶ ἡ ἀκοὴ ἔστιν ὡς ἕν ἐστι [καὶ ἔστιν ὡς οὐχ ἓν τὸ αὐτό], λόγος δ’ ἡ συμφωνία, ἀνάγκη καὶ τὴν ἀκοὴν λόγον τινὰ εἶναι. καὶ διὰ τοῦτο καὶ φθείρει ἕκαστον ὑπερβάλλον, καὶ τὸ ὀξὺ καὶ τὸ βαρύ, τὴν ἀκοήν· ὁμοίως δὲ καὶ ἐν χυμοῖς τὴν [426b] γεῦσιν, καὶ ἐν χρώμασι τὴν ὄψιν τὸ σφόδρα λαμπρὸν ἢ ζοφερόν, καὶ ἐν ὀσφρήσει ἡ ἰσχυρὰ ὀσμή, καὶ γλυκεῖα καὶ πικρά, ὡς λόγου τινὸς ὄντος τῆς αἰσθήσεως. διὸ καὶ ἡδέα μέν, ὅταν εἰλικρινῆ καὶ ἄμικτα ὄντα ἄγηται εἰς τὸν λόγον, οἷον τὸ ὀξὺ ἢ γλυκὺ ἢ ἁλμυρόν, ἡδέα γὰρ τότε· ὅλως δὲ μᾶλλον τὸ μικτόν, συμφωνία, ἢ τὸ ὀξὺ ἢ βαρύ, ἁφῇ δὲ τὸ θερμαντὸν ἢ ψυκτόν· ἡ δ’ αἴσθησις ὁ λόγος· ὑπερβάλλοντα δὲ λύει ἢ φθείρει.

10. ἑκάστη μὲν οὖν αἴσθησις τοῦ ὑποκειμένου αἰσθητοῦ ἐστίν, ὑπάρχουσα ἐν τῷ αἰσθητηρίῳ ᾗ αἰσθητήριον, καὶ κρίνει τὰς τοῦ ὑποκειμένου αἰσθητοῦ διαφοράς, οἷον λευκὸν μὲν καὶ μέλαν ὄψις, γλυκὺ δὲ καὶ πικρὸν γεῦσις· ὁμοίως δ’ ἔχει τοῦτο καὶ ἐπὶ τῶν ἄλλων. ἐπεὶ δὲ καὶ τὸ λευκὸν καὶ τὸ γλυκὺ καὶ ἕκαστον τῶν αἰσθητῶν πρὸς ἕκαστον κρίνομεν, τινὶ καὶ αἰσθανόμεθα ὅτι διαφέρει. ἀνάγκη δὴ αἰσθήσει· αἰσθητὰ γάρ ἐστιν.

11. ᾗ καὶ δῆλον ὅτι ἡ σὰρξ οὐκ ἔστι τὸ ἔσχατον αἰσθητήριον· ἀνάγκη γὰρ ἂν ἦν ἁπτόμενον αὐτὸ κρίνειν τὸ κρῖνον. οὔτε δὴ κεχωρισμένοις ἐνδέχεται κρίνειν ὅτι ἕτερον τὸ γλυκὺ τοῦ λευκοῦ, ἀλλὰ δεῖ ἑνί τινι ἄμφω δῆλα εἶναι-οὕτω μὲν γὰρ κἂν εἰ τοῦ μὲν ἐγὼ τοῦ δὲ σὺ αἴσθοιο, δῆλον ἂν εἴη ὅτι ἕτερα ἀλλήλων, δεῖ δὲ τὸ ἓν λέγειν ὅτι ἕτερον· ἕτερον γὰρ τὸ γλυκὺ τοῦ λευκοῦ· λέγει ἄρα τὸ αὐτό· ὥστε ὡς λέγει, οὕτω καὶ νοεῖ καὶ αἰσθάνεται-

12. ὅτι μὲν οὖν οὐχ οἷόν τε κεχωρισμένοις κρίνειν τὰ κεχωρισμένα, δῆλον· ὅτι δ’ οὐδ’ ἐν κεχωρισμένῳ χρόνῳ, ἐντεῦθεν. ὥσπερ γὰρ τὸ αὐτὸ λέγει ὅτι ἕτερον τὸ ἀγαθὸν καὶ τὸ κακόν, οὕτω καὶ ὅτε θάτερον λέγει ὅτι ἕτερον καὶ θάτερον (οὐ κατὰ συμβεβηκὸς τὸ ὅτε, λέγω δ’, οἷον νῦν λέγω ὅτι ἕτερον, οὐ μέντοι ὅτι νῦν ἕτερον, ἀλλ’ οὕτω λέγει, καὶ νῦν καὶ ὅτι νῦν)· ἅμα ἄρα. ὥστε ἀχώριστον καὶ ἐν ἀχωρίστῳ χρόνῳ.

13. ἀλλὰ μὴν ἀδύνατον ἅμα τὰς ἐναντίας κινήσεις κινεῖσθαι τὸ αὐτὸ ᾗ ἀδιαίρετον, καὶ ἐν ἀδιαιρέτῳ χρόνῳ. εἰ γὰρ γλυκύ, ᾡδὶ κινεῖ τὴν αἴσθησιν [427a]

14. ἢ τὴν νόησιν, τὸ δὲ πικρὸν ἐναντίως, καὶ τὸ λευκὸν ἑτέρως. ἆρ᾽ οὖν ἅμα μὲν ἀριθμῷ ἀδιαίρετον καὶ ἀχώριστον τὸ κρῖνον, τῷ εἶναι δὲ κεχωρισμένον; ἔστι δὴ [πως] ὡς τὸ διαιρετὸν τῶν διῃρημένων αἰσθάνεται, ἔστι δ᾽ ὡς ᾗ ἀδιαίρετον· τῷ εἶναι μὲν γὰρ διαιρετόν, τόπῳ δὲ καὶ ἀριθμῷ ἀδιαίρετον. ἢ οὐχ οἷόν τε; δυνάμει μὲν γὰρ τὸ αὐτὸ καὶ ἀδιαίρετον τἀναντία, τῷ δ᾽ εἶναι οὔ, ἀλλὰ τῷ ἐνεργεῖσθαι διαιρετόν, καὶ οὐχ οἷόν τε ἅμα λευκὸν καὶ μέλαν εἶναι, ὥστ᾽ οὐδὲ τὰ εἴδη πάσχειν αὐτῶν, εἰ τοιοῦτον ἡ αἴσθησις καὶ ἡ νόησις.

15. ἀλλ᾽ ὥσπερ ἣν καλοῦσί τινες στιγμήν, ᾗ μία καὶ δύο, ταύτῃ <καὶ ἀδιαίρετος> καὶ διαιρετή. ᾗ μὲν οὖν ἀδιαίρετον, ἓν τὸ κρῖνόν ἐστι καὶ ἅμα, ᾗ δὲ διαιρετὸν ὑπάρχει, δὶς τῷ αὐτῷ χρῆται σημείῳ ἅμα· ᾗ μὲν οὖν δὶς χρῆται τῷ πέρατι, δύο κρίνει καὶ κεχωρισμένα, ἔστιν ὡς κεχωρισμένως· ᾗ δὲ ἑνί, ἓν καὶ ἅμα. περὶ μὲν οὖν τῆς ἀρχῆς ᾗ φαμὲν τὸ ζῷον αἰσθητικὸν εἶναι, διωρίσθω τὸν τρόπον τοῦτον.

Κεφάλαιο 3

[427a17] 1. Ἐπεὶ δὲ δύο διαφοραῖς ὁρίζονται μάλιστα τὴν ψυχήν, κινήσει τε τῇ κατὰ τόπον καὶ τῷ νοεῖν καὶ φρονεῖν καὶ αἰσθάνεσθαι, δοκεῖ δὲ καὶ τὸ νοεῖν καὶ τὸ φρονεῖν ὥσπερ αἰσθάνεσθαί τι εἶναι (ἐν ἀμφοτέροις γὰρ τούτοις κρίνει τι ἡ ψυχὴ καὶ γνωρίζει τῶν ὄντων), καὶ οἵ γε ἀρχαῖοι τὸ φρονεῖν καὶ τὸ αἰσθάνεσθαι ταὐτὸν εἶναί φασιν-ὥσπερ καὶ Ἐμπεδοκλῆς εἴρηκε "πρὸς παρεὸν γὰρ μῆτις ἀέξεται ἀνθρώποισιν" καὶ ἐν ἄλλοις "ὅθεν σφίσιν αἰεὶ καὶ τὸ φρονεῖν ἀλλοῖα παρίσταται", τὸ δ' αὐτὸ τούτοις βούλεται καὶ τὸ Ὁμήρου "τοῖος γὰρ νόος ἐστίν",

2. πάντες γὰρ οὗτοι τὸ νοεῖν σωματικὸν ὥσπερ τὸ αἰσθάνεσθαι ὑπολαμβάνουσιν, καὶ αἰσθάνεσθαί τε καὶ φρονεῖν τῷ ὁμοίῳ τὸ ὅμοιον, ὥσπερ καὶ ἐν τοῖς κατ' ἀρχὰς λόγοις διωρίσαμεν (καίτοι ἔδει ἅμα καὶ περὶ [427b] τοῦ ἠπατῆσθαι αὐτοὺς λέγειν, οἰκειότερον γὰρ τοῖς ζῴοις, καὶ πλείω χρόνον ἐν τούτῳ διατελεῖ ἡ ψυχή· διὸ ἀνάγκη ἤτοι, ὥσπερ ἔνιοι λέγουσι, πάντα τὰ φαινόμενα εἶναι ἀληθῆ, ἢ τὴν τοῦ ἀνομοίου θίξιν ἀπάτην εἶναι, τοῦτο γὰρ ἐναντίον τῷ τὸ ὅμοιον τῷ ὁμοίῳ γνωρίζειν· δοκεῖ δὲ καὶ ἡ ἀπάτη καὶ ἡ ἐπιστήμη τῶν ἐναντίων ἡ αὐτὴ εἶναι)

3. ὅτι μὲν οὖν οὐ ταὐτόν ἐστι τὸ αἰσθάνεσθαι καὶ τὸ φρονεῖν, φανερόν· τοῦ μὲν γὰρ πᾶσι μέτεστι, τοῦ δὲ ὀλίγοις τῶν ζῴων. ἀλλ' οὐδὲ τὸ νοεῖν, ἐν ᾧ ἐστι τὸ ὀρθῶς καὶ τὸ μὴ ὀρθῶς, τὸ μὲν ὀρθῶς φρόνησις καὶ ἐπιστήμη καὶ δόξα ἀληθής, τὸ δὲ μὴ ὀρθῶς τἀναντία τούτων-οὐδὲ τοῦτό ἐστι ταὐτὸ τῷ αἰσθάνεσθαι· ἡ μὲν γὰρ αἴσθησις τῶν ἰδίων ἀεὶ ἀληθής, καὶ πᾶσιν ὑπάρχει τοῖς ζῴοις, διανοεῖσθαι δ' ἐνδέχεται καὶ ψευδῶς, καὶ οὐδενὶ ὑπάρχει ᾧ μὴ καὶ λόγος·

4. φαντασία γὰρ ἕτερον καὶ αἰσθήσεως καὶ διανοίας, αὕτη τε οὐ γίγνεται ἄνευ αἰσθήσεως, καὶ ἄνευ ταύτης οὐκ ἔστιν ὑπόληψις. ὅτι δ' οὐκ ἔστιν ἡ αὐτὴ [νόησις] καὶ ὑπόληψις, φανερόν. τοῦτο μὲν γὰρ τὸ πάθος ἐφ' ἡμῖν ἐστιν, ὅταν βουλώμεθα (πρὸ ὀμμάτων γὰρ ἔστι τι ποιήσασθαι, ὥσπερ οἱ ἐν τοῖς μνημονικοῖς τιθέμενοι καὶ εἰδωλοποιοῦντες), δοξάζειν δ' οὐκ ἐφ' ἡμῖν· ἀνάγκη γὰρ ἢ ψεύδεσθαι ἢ ἀληθεύειν. ἔτι δὲ ὅταν μὲν δοξάσωμεν δεινόν τι ἢ φοβερόν, εὐθὺς συμπάσχομεν, ὁμοίως δὲ κἂν θαρραλέον· κατὰ δὲ τὴν φαντασίαν ὡσαύτως ἔχομεν ὥσπερ ἂν εἰ θεώμενοι ἐν γραφῇ τὰ δεινὰ ἢ θαρραλέα.

5. εἰσὶ δὲ καὶ αὐτῆς τῆς ὑπολήψεως διαφοραί, ἐπιστήμη καὶ δόξα καὶ φρόνησις καὶ τἀναντία τούτων, περὶ ὧν τῆς διαφορᾶς ἕτερος ἔστω

λόγος. περὶ δὲ τοῦ νοεῖν, ἐπεὶ ἕτερον τοῦ αἰσθάνεσθαι, τούτου δὲ τὸ μὲν φαντασία δοκεῖ εἶναι τὸ δὲ ὑπόληψις, περὶ φαντασίας διορίσαντας οὕτω περὶ θατέρου λεκτέον. [428a]

6. εἰ δή ἐστιν ἡ φαντασία καθ’ ἣν λέγομεν φάντασμά τι ἡμῖν γίγνεσθαι καὶ μὴ εἴ τι κατὰ μεταφορὰν λέγομεν, <ἆρα> μία τις ἔστι τούτων δύναμις ἢ ἕξις καθ’ ἃς κρίνομεν καὶ ἀληθεύομεν ἢ ψευδόμεθα; τοιαῦται δ’ εἰσὶν αἴσθησις, δόξα, ἐπιστήμη, νοῦς. ὅτι μὲν οὖν οὐκ ἔστιν αἴσθησις, δῆλον ἐκ τῶνδε. αἴσθησις μὲν γὰρ ἤτοι δύναμις ἢ ἐνέργεια, οἷον ὄψις καὶ ὅρασις, φαίνεται δέ τι καὶ μηδετέρου ὑπάρχοντος τούτων, οἷον τὰ ἐν τοῖς ὕπνοις. εἶτα αἴσθησις μὲν ἀεὶ πάρεστι, φαντασία δ’ οὔ. εἰ δὲ τῇ ἐνεργείᾳ τὸ αὐτό, πᾶσιν ἂν ἐνδέχοιτο τοῖς θηρίοις φαντασίαν ὑπάρχειν· δοκεῖ δ’ οὔ, οἷον μύρμηκι ἢ μελίττῃ, σκώληκι δ’ οὔ. εἶτα αἱ μὲν ἀληθεῖς ἀεί, αἱ δὲ φαντασίαι γίνονται αἱ πλείους ψευδεῖς. ἔπειτα οὐδὲ λέγομεν, ὅταν ἐνεργῶμεν ἀκριβῶς περὶ τὸ αἰσθητόν, ὅτι φαίνεται τοῦτο ἡμῖν ἄνθρωπος, ἀλλὰ μᾶλλον ὅταν μὴ ἐναργῶς αἰσθανώμεθα πότερον ἀληθὴς ἢ ψευδής. καὶ ὅπερ δὴ ἐλέγομεν πρότερον, φαίνεται καὶ μύουσιν ὁράματα.

8. ἀλλὰ μὴν οὐδὲ τῶν ἀεὶ ἀληθευουσῶν οὐδεμία ἔσται, οἷον ἐπιστήμη ἢ νοῦς· ἔστι γὰρ φαντασία καὶ ψευδής. λείπεται ἄρα ἰδεῖν εἰ δόξα· γίνεται γὰρ δόξα καὶ ἀληθὴς καὶ ψευδής, ἀλλὰ δόξῃ μὲν ἕπεται πίστις (οὐκ ἐνδέχεται γὰρ δοξάζοντα οἷς δοκεῖ μὴ πιστεύειν), τῶν δὲ θηρίων οὐθενὶ ὑπάρχει πίστις, φαντασία δὲ πολλοῖς. [ἔτι πάσῃ μὲν δόξῃ ἀκολουθεῖ πίστις, πίστει δὲ τὸ πεπεῖσθαι, πειθοῖ δὲ λόγος· τῶν δὲ θηρίων ἐνίοις φαντασία μὲν ὑπάρχει, λόγος δ’ οὔ.] [428a24]

9. φανερὸν τοίνυν ὅτι οὐδὲ δόξα μετ’ αἰσθήσεως, οὐδὲ δι’ αἰσθήσεως, οὐδὲ συμπλοκὴ δόξης καὶ αἰσθήσεως, φαντασία ἂν εἴη, διά τε ταῦτα καὶ διότι οὐκ ἄλλου τινὸς ἔσται ἡ δόξα, ἀλλ’ ἐκείνου, εἴπερ ἔστιν, οὗ καὶ ἡ αἴσθησις· λέγω δ’, ἐκ τῆς τοῦ λευκοῦ δόξης καὶ αἰσθήσεως ἡ συμπλοκὴ φαντασία ἔσται· οὐ γὰρ δὴ ἐκ τῆς δόξης μὲν τῆς τοῦ ἀγαθοῦ, αἰσθήσεως δὲ τῆς τοῦ [428b] λευκοῦ. τὸ οὖν φαίνεσθαι ἔσται τὸ δοξάζειν ὅπερ αἰσθάνεται, μὴ κατὰ συμβεβηκός.

10. φαίνεται δέ γε καὶ ψευδῆ, περὶ ὧν ἅμα ὑπόληψιν ἀληθῆ ἔχει, οἷον φαίνεται μὲν ὁ ἥλιος ποδιαῖος, πιστεύεται δ’ εἶναι μείζων τῆς οἰκουμένης· συμβαίνει οὖν ἤτοι ἀποβεβληκέναι τὴν ἑαυτοῦ ἀληθῆ δόξαν, ἣν εἶχε, σωζομένου τοῦ πράγματος, μὴ ἐπιλαθόμενον μηδὲ μεταπεισθέντα, ἢ εἰ ἔτι ἔχει, ἀνάγκη τὴν αὐτὴν ἀληθῆ εἶναι καὶ ψευδῆ. ἀλλὰ ψευδὴς ἐγένετο ὅτε λάθοι μεταπεσὸν τὸ πρᾶγμα. οὔτ’ ἄρα ἕν τι τούτων ἐστὶν οὔτ’ ἐκ τούτων ἡ φαντασία.

11. ἀλλ’ ἐπειδὴ ἔστι κινηθέντος τουδὶ κινεῖσθαι ἕτερον ὑπὸ τούτου, ἡ δὲ φαντασία κίνησίς τις δοκεῖ εἶναι καὶ οὐκ ἄνευ αἰσθήσεως γίνεσθαι ἀλλ’ αἰσθανομένοις καὶ ὧν αἴσθησις ἔστιν, ἔστι δὲ γίνεσθαι κίνησιν ὑπὸ τῆς ἐνεργείας τῆς αἰσθήσεως, καὶ ταύτην ὁμοίαν ἀνάγκη εἶναι τῇ αἰσθήσει, εἴη ἂν αὕτη ἡ κίνησις οὔτε ἄνευ αἰσθήσεως ἐνδεχομένη οὔτε μὴ αἰσθανομένοις ὑπάρχειν, καὶ πολλὰ κατ’ αὐτὴν καὶ ποιεῖν καὶ πάσχειν τὸ ἔχον, καὶ εἶναι καὶ ἀληθῆ καὶ ψευδῆ.

12. τοῦτο δὲ συμβαίνει διὰ τάδε· ἡ αἴσθησις τῶν μὲν ἰδίων ἀληθής ἐστιν ἢ ὅτι ὀλίγιστον ἔχουσα τὸ ψεῦδος. δεύτερον δὲ τοῦ συμβεβηκέναι ταῦτα <ἃ συμβέβηκε τοῖς αἰσθητοῖς>· καὶ ἐνταῦθα ἤδη ἐνδέχετα διαψεύδεσθαι· ὅτι μὲν γὰρ λευκόν, οὐ ψεύδεται, εἰ δὲ τοῦτο τὸ λευκὸν ἢ ἄλλο τι, ψεύδεται. τρίτον δὲ τῶν κοινῶν καὶ ἑπομένων τοῖς συμβεβηκόσιν οἷς ὑπάρχει τὰ ἴδια (λέγω δ’ οἷον κίνησις καὶ μέγεθος) [ἃ συμβέβηκε τοῖς αἰσθητοῖς]· περὶ ἃ μάλιστα ἤδη ἔστιν ἀπατηθῆναι κατὰ τὴν αἴσθησιν.

13. ἡ δὲ κίνησις ἡ ὑπὸ τῆς ἐνεργείας τῆς αἰσθήσεως γινομένη διοίσει, ἡ ἀπὸ τούτων τῶν τριῶν αἰσθήσεων, καὶ ἡ μὲν πρώτη παρούσης τῆς αἰσθήσεως ἀληθής, αἱ δ’ ἕτεραι καὶ παρούσης καὶ ἀπούσης εἶεν ἂν ψευδεῖς, καὶ μάλιστα ὅταν πόρρω τὸ αἰσθητὸν ᾖ. εἰ οὖν μηθὲν ἄλλο ἔχει τὰ εἰρημένα ἢ [429a] φαντασία (τοῦτο δ’ ἐστὶ τὸ λεχθέν), ἡ φαντασία ἂν εἴη κίνησις ὑπὸ τῆς αἰσθήσεως τῆς κατ’ ἐνέργειαν γιγνομένη.

14. ἐπεὶ δ’ ἡ ὄψις μάλιστα αἴσθησίς ἐστι, καὶ τὸ ὄνομα ἀπὸ τοῦ φάους εἴληφεν, ὅτι ἄνευ φωτὸς οὐκ ἔστιν ἰδεῖν.

15. καὶ διὰ τὸ ἐμμένειν καὶ ὁμοίας εἶναι ταῖς αἰσθήσεσι, πολλὰ κατ’ αὐτὰς πράττει τὰ ζῷα, τὰ μὲν διὰ τὸ μὴ ἔχειν νοῦν, οἷον τὰ θηρία, τὰ δὲ διὰ τὸ ἐπικαλύπτεσθαι τὸν νοῦν ἐνίοτε πάθει ἢ νόσῳ ἢ ὕπνῳ, οἷον οἱ ἄνθρωποι. περὶ μὲν οὖν φαντασίας, τί ἐστι καὶ διὰ τί ἐστιν, εἰρήσθω ἐπὶ τοσοῦτον.

Κεφάλαιο 4

[429a10] 1. Περὶ δὲ τοῦ μορίου τοῦ τῆς ψυχῆς ᾧ γινώσκει τε ἡ ψυχὴ καὶ φρονεῖ, εἴτε χωριστοῦ ὄντος εἴτε μὴ χωριστοῦ κατὰ μέγεθος ἀλλὰ κατὰ λόγον, σκεπτέον τίν’ ἔχει διαφοράν, καὶ πῶς ποτὲ γίνεται τὸ νοεῖν.

2. εἰ δή ἐστι τὸ νοεῖν ὥσπερ τὸ αἰσθάνεσθαι, ἢ πάσχειν τι ἂν εἴη ὑπὸ τοῦ νοητοῦ ἤ τι τοιοῦτον ἕτερον.

3. ἀπαθὲς ἄρα δεῖ εἶναι, δεκτικὸν δὲ τοῦ εἴδους καὶ δυνάμει τοιοῦτον ἀλλὰ μὴ τοῦτο, καὶ ὁμοίως ἔχειν, ὥσπερ τὸ αἰσθητικὸν πρὸς τὰ αἰσθητά, οὕτω τὸν νοῦν πρὸς τὰ νοητά. ἀνάγκη ἄρα, ἐπεὶ πάντα νοεῖ, ἀμιγῆ εἶναι, ὥσπερ φησὶν Ἀναξαγόρας, ἵνα κρατῇ, τοῦτο δ’ ἐστὶν ἵνα γνωρίζῃ (παρεμφαινόμενον γὰρ κωλύει τὸ ἀλλότριον καὶ ἀντιφράττει)· ὥστε μηδ’ αὐτοῦ εἶναι φύσιν μηδεμίαν ἀλλ’ ἢ ταύτην, ὅτι δυνατός. ὁ ἄρα καλούμενος τῆς ψυχῆς νοῦς (λέγω δὲ νοῦν ᾧ διανοεῖται καὶ ὑπολαμβάνει ἡ ψυχή) οὐθέν ἐστιν ἐνεργείᾳ τῶν ὄντων πρὶν νοεῖν·

4. διὸ οὐδὲ μεμῖχθαι εὔλογον αὐτὸν τῷ σώματι· ποιός τις γὰρ ἂν γίγνοιτο, ἢ ψυχρὸς ἢ θερμός, κἂν ὄργανόν τι εἴη, ὥσπερ τῷ αἰσθητικῷ· νῦν δ’ οὐθὲν ἔστιν. καὶ εὖ δὴ οἱ λέγοντες τὴν ψυχὴν εἶναι τόπον εἰδῶν, πλὴν ὅτι οὔτε ὅλη ἀλλ’ ἡ νοητική, οὔτε ἐντελεχείᾳ ἀλλὰ δυνάμει τὰ εἴδη.

5. ὅτι δ’ οὐχ ὁμοία ἡ ἀπάθεια τοῦ αἰσθητικοῦ καὶ τοῦ νοητικοῦ, φανερὸν ἐπὶ τῶν αἰσθητηρίων καὶ τῆς αἰσθήσεως. ἡ μὲν γὰρ αἴσθησις οὐ δύναται [429b] αἰσθάνεσθαι ἐκ τοῦ σφόδρα αἰσθητοῦ, οἷον ψόφου ἐκ τῶν μεγάλων ψόφων, οὐδ’ ἐκ τῶν ἰσχυρῶν χρωμάτων καὶ ὀσμῶν οὔτε ὁρᾶν οὔτε ὀσμᾶσθαι· ἀλλ’ ὁ νοῦς ὅταν τι νοήσῃ σφόδρα νοητόν, οὐχ ἧττον νοεῖ τὰ ὑποδεέστερα, ἀλλὰ καὶ μᾶλλον· τὸ μὲν γὰρ αἰσθητικὸν οὐκ ἄνευ σώματος, ὁ δὲ χωριστός.

6. ὅταν δ’ οὕτως ἕκαστα γένηται ὡς ὁ ἐπιστήμων λέγεται ὁ κατ’ ἐνέργειαν (τοῦτο δὲ συμβαίνει ὅταν δύνηται ἐνεργεῖν δι’ αὑτοῦ), ἔστι μὲν καὶ τότε δυνάμει πως, οὐ μὴν ὁμοίως καὶ πρὶν μαθεῖν ἢ εὑρεῖν· καὶ αὐτὸς δι’ αὑτοῦ τότε δύναται νοεῖν.

7. ἐπεὶ δ’ ἄλλο ἐστὶ τὸ μέγεθος καὶ τὸ μεγέθει εἶναι, καὶ ὕδωρ καὶ ὕδατι εἶναι (οὕτω δὲ καὶ ἐφ’ ἑτέρων πολλῶν, ἀλλ’ οὐκ ἐπὶ πάντων· ἐπ’ ἐνίων γὰρ ταὐτόν ἐστι), τὸ σαρκὶ εἶναι καὶ σάρκα ἢ ἄλλῳ ἢ ἄλλως ἔχοντι κρίνει· ἡ γὰρ σὰρξ οὐκ ἄνευ τῆς ὕλης, ἀλλ’ ὥσπερ τὸ σιμόν, τόδε ἐν τῷδε. τῷ μὲν οὖν αἰσθητικῷ τὸ θερμὸν καὶ τὸ ψυχρὸν κρίνει, καὶ ὧν λόγος τις ἡ σάρξ· ἄλλῳ

δέ, ἤτοι χωριστῷ ἢ ὡς ἡ κεκλασμένη ἔχει πρὸς αὐτὴν ὅταν ἐκταθῇ, τὸ σαρκὶ εἶναι κρίνει.

8. πάλιν δ’ ἐπὶ τῶν ἐν ἀφαιρέσει ὄντων τὸ εὐθὺ ὡς τὸ σιμόν· μετὰ συνεχοῦς γάρ· τὸ δὲ τί ἦν εἶναι, εἰ ἔστιν ἕτερον τὸ εὐθεῖ εἶναι καὶ τὸ εὐθύ, ἄλλο· ἔστω γὰρ δυάς. ἑτέρῳ ἄρα ἢ ἑτέρως ἔχοντι κρίνει. ὅλως ἄρα ὡς χωριστὰ τὰ πράγματα τῆς ὕλης, οὕτω καὶ τὰ περὶ τὸν νοῦν. [429b22]

9. ἀπορήσειε δ’ ἄν τις, εἰ ὁ νοῦς ἁπλοῦν ἐστὶ καὶ ἀπαθὲς καὶ μηθενὶ μηθὲν ἔχει κοινόν, ὥσπερ φησὶν Ἀναξαγόρας, πῶς νοήσει, εἰ τὸ νοεῖν πάσχειν τί ἐστιν (ᾗ γάρ τι κοινὸν ἀμφοῖν ὑπάρχει, τὸ μὲν ποιεῖν δοκεῖ τὸ δὲ πάσχειν),

10. ἔτι δ’ εἰ νοητὸς καὶ αὐτός; ἢ γὰρ τοῖς ἄλλοις νοῦς ὑπάρξει, εἰ μὴ κατ’ ἄλλο αὐτὸς νοητός, ἓν δέ τι τὸ νοητὸν εἴδει, ἢ μεμιγμένον τι ἕξει, ὃ ποιεῖ νοητὸν αὐτὸν ὥσπερ τἆλλα.

11. ἢ τὸ μὲν πάσχειν κατὰ κοινόν τι διῄρηται πρότερον, ὅτι δυνάμει πώς ἐστι τὰ νοητὰ ὁ νοῦς, ἀλλ’ ἐντελεχείᾳ οὐδέν, πρὶν ἂν νοῇ· δυνάμει δ’ οὕτως [430a] ὥσπερ ἐν γραμματείῳ ᾧ μηθὲν ἐνυπάρχει ἐντελεχείᾳ γεγραμμένον· ὅπερ συμβαίνει ἐπὶ τοῦ νοῦ.

12. καὶ αὐτὸς δὲ νοητός ἐστιν ὥσπερ τὰ νοητά. ἐπὶ μὲν γὰρ τῶν ἄνευ ὕλης τὸ αὐτό ἐστι τὸ νοοῦν καὶ τὸ νοούμενον· ἡ γὰρ ἐπιστήμη ἡ θεωρητικὴ καὶ τὸ οὕτως ἐπιστητὸν τὸ αὐτό ἐστιν (τοῦ δὲ μὴ ἀεὶ νοεῖν τὸ αἴτιον ἐπισκεπτέον)· ἐν δὲ τοῖς ἔχουσιν ὕλην δυνάμει ἕκαστον ἔστι τῶν νοητῶν. ὥστ’ ἐκείνοις μὲν οὐχ ὑπάρξει νοῦς (ἄνευ γὰρ ὕλης δύναμις ὁ νοῦς τῶν τοιούτων), ἐκείνῳ δὲ τὸ νοητὸν ὑπάρξει.

Κεφάλαιο 5

[4310a10] 1. Ἐπεὶ δ’ [ὥσπερ] ἐν ἁπάσῃ τῇ φύσει ἐστὶ [τι] τὸ μὲν ὕλη ἑκάστῳ γένει (τοῦτο δὲ ὃ πάντα δυνάμει ἐκεῖνα), ἕτερον δὲ τὸ αἴτιον καὶ ποιητικόν, τῷ ποιεῖν πάντα, οἷον ἡ τέχνη πρὸς τὴν ὕλην πέπονθεν, ἀνάγκη καὶ ἐν τῇ ψυχῇ ὑπάρχειν ταύτας τὰς διαφοράς· καὶ ἔστιν ὁ μὲν τοιοῦτος νοῦς τῷ πάντα γίνεσθαι, ὁ δὲ τῷ πάντα ποιεῖν, ὡς ἕξις τις, οἷον τὸ φῶς· τρόπον γάρ τινα καὶ τὸ φῶς ποιεῖ τὰ δυνάμει ὄντα χρώματα ἐνεργείᾳ χρώματα. καὶ οὗτος ὁ νοῦς χωριστὸς καὶ ἀπαθὴς καὶ ἀμιγής, τῇ οὐσίᾳ ὢν ἐνέργεια·

2. ἀεὶ γὰρ τιμιώτερον τὸ ποιοῦν τοῦ πάσχοντος καὶ ἡ ἀρχὴ τῆς ὕλης. [τὸ δ’ αὐτό ἐστιν ἡ κατ’ ἐνέργειαν ἐπιστήμη τῷ πράγματι· ἡ δὲ κατὰ δύναμιν χρόνῳ προτέρα ἐν τῷ ἑνί, ὅλως δὲ οὐδὲ χρόνῳ, ἀλλ’ οὐχ ὁτὲ μὲν νοεῖ ὁτὲ δ’ οὐ νοεῖ.] χωρισθεὶς δ’ ἐστὶ μόνον τοῦθ’ ὅπερ ἐστί, καὶ τοῦτο μόνον ἀθάνατον καὶ ἀΐδιον (οὐ μνημονεύομεν δέ, ὅτι τοῦτο μὲν ἀπαθές, ὁ δὲ παθητικὸς νοῦς φθαρτός)· καὶ ἄνευ τούτου οὐθὲν νοεῖ.

Κεφάλαιο 6

[430a27] 1. Ἡ μὲν οὖν τῶν ἀδιαιρέτων νόησις ἐν τούτοις περὶ ἃ οὐκ ἔστι τὸ ψεῦδος, ἐν οἷς δὲ καὶ τὸ ψεῦδος καὶ τὸ ἀληθές σύνθεσίς τις ἤδη νοημάτων ὥσπερ ἓν ὄντων-καθάπερ Ἐμπεδοκλῆς ἔφη "ᾗ πολλῶν μὲν κόρσαι ἀναύχενες ἐβλάστησαν", ἔπειτα συντίθεσθαι τῇ φιλίᾳ, οὕτω καὶ ταῦτα κεχωρισμένα συντίθεται, οἷον τὸ ἀσύμμετρον καὶ ἡ διάμετρος -

2. ἂν δὲ [430b] γενομένων ἢ ἐσομένων, τὸν χρόνον προσεννοῶν [καὶ] συντίθησι. τὸ γὰρ ψεῦδος ἐν συνθέσει ἀεί· καὶ γὰρ ἂν τὸ λευκὸν μὴ λευκὸν <φῇ, τὸ λευκὸν καὶ> τὸ μὴ λευκὸν συνέθηκεν· ἐνδέχεται δὲ καὶ διαίρεσιν φάναι πάντα. ἀλλ' οὖν ἔστι γε οὐ μόνον τὸ ψεῦδος ἢ ἀληθὲς ὅτι λευκὸς Κλέων ἐστίν, ἀλλὰ καὶ ὅτι ἦν ἢ ἔσται. τὸ δὲ ἓν ποιοῦν ἕκαστον, τοῦτο ὁ νοῦς. [430b6]

3. τὸ δ' ἀδιαίρετον ἐπεὶ διχῶς, ἢ δυνάμει ἢ ἐνεργείᾳ, οὐθὲν κωλύει νοεῖν τὸ <διαιρετὸν ᾗ> ἀδιαίρετον, <οἷον> ὅταν νοῇ τὸ μῆκος (ἀδιαίρετον γὰρ ἐνεργείᾳ), καὶ ἐν χρόνῳ ἀδιαιρέτῳ· ὁμοίως γὰρ ὁ χρόνος διαιρετὸς καὶ ἀδιαίρετος τῷ μήκει. οὔκουν ἔστιν εἰπεῖν ἐν τῷ ἡμίσει τί ἐνόει ἑκατέρῳ· οὐ γὰρ ἔστιν, ἂν μὴ διαιρεθῇ, ἀλλ' ἢ δυνάμει. χωρὶς δ' ἑκάτερον νοῶν τῶν ἡμίσεων διαιρεῖ καὶ τὸν χρόνον ἅμα, τότε δ' οἱονεὶ μήκη· εἰ δ' ὡς ἐξ ἀμφοῖν, καὶ ἐν τῷ χρόνῳ τῷ ἐπ' ἀμφοῖν.

4. [τὸ δὲ μὴ κατὰ τὸ ποσὸν ἀδιαίρετον ἀλλὰ τῷ εἴδει νοεῖ ἐν ἀδιαιρέτῳ χρόνῳ καὶ ἀδιαιρέτῳ τῆς ψυχῆς.] κατὰ συμβεβηκὸς δέ, καὶ οὐχ ᾗ ἐκεῖνα, διαιρετὰ ὃ νοεῖ καὶ ἐν ᾧ χρόνῳ, ἀλλ' ᾗ <ἐκεῖνα> ἀδιαίρετα· ἔνεστι γὰρ κἀν τούτοις τι ἀδιαίρετον, ἀλλ' ἴσως οὐ χωριστόν, ὃ ποιεῖ ἕνα τὸν χρόνον καὶ τὸ μῆκος. καὶ τοῦθ' ὁμοίως ἐν ἅπαντί ἐστι τῷ συνεχεῖ, καὶ χρόνῳ καὶ μήκει. [430b20] <τὸ δὲ μὴ κατὰ τὸ ποσὸν ἀδιαίρετον ἀλλὰ τῷ εἴδει νοεῖ ἐν ἀδιαιρέτῳ χρόνῳ καὶ ἀδιαιρέτῳ <τῳ> τῆς ψυχῆς.>

5. ἡ δὲ στιγμὴ καὶ πᾶσα διαίρεσις, καὶ τὸ οὕτως ἀδιαίρετον, δηλοῦται ὥσπερ ἡ στέρησις. καὶ ὅμοιος ὁ λόγος ἐπὶ τῶν ἄλλων, οἷον πῶς τὸ κακὸν γνωρίζει ἢ τὸ μέλαν· τῷ ἐναντίῳ γάρ πως γνωρίζει.

6. δεῖ δὲ δυνάμει εἶναι τὸ γνωρίζον καὶ ἐνεῖναι ἐν αὐτῷ. εἰ δέ τινι μηδὲν ἔστιν ἐναντίον [τῶν αἰτίων], αὐτὸ ἑαυτὸ γινώσκει καὶ ἐνέργειά ἐστι καὶ χωριστόν.

7. ἔστι δ' ἡ μὲν φάσις τι κατά τινος, ὥσπερ καὶ ἡ ἀπόφασις, καὶ ἀληθὴς ἢ ψευδὴς πᾶσα· ὁ δὲ νοῦς οὐ πᾶς, ἀλλ' ὁ τοῦ τί ἐστι κατὰ τὸ τί ἦν εἶναι

ἀληθής, καὶ οὐ τὶ κατά τινος· ἀλλ’ ὥσπερ τὸ ὁρᾶν τοῦ ἰδίου ἀληθές, εἰ δ’ ἄνθρωπος τὸ λευκὸν ἢ μή, οὐκ ἀληθὲς ἀεί, οὕτως ἔχει ὅσα ἄνευ ὕλης.

Κεφάλαιο 7

[431a] 1. Τὸ δ’ αὐτό ἐστιν ἡ κατ’ ἐνέργειαν ἐπιστήμη τῷ πράγματι. ἡ δὲ κατὰ δύναμιν χρόνῳ προτέρα ἐν τῷ ἑνί, ὅλως δὲ οὐδὲ χρόνῳ· ἔστι γὰρ ἐξ ἐντελεχείᾳ ὄντος πάντα τὰ γιγνόμενα. -φαίνεται δὲ τὸ μὲν αἰσθητὸν ἐκ δυνάμει ὄντος τοῦ αἰσθητικοῦ ἐνεργείᾳ ποιοῦν· οὐ γὰρ πάσχει οὐδ’ ἀλλοιοῦται. διὸ ἄλλο εἶδος τοῦτο κινήσεως· ἡ γὰρ κίνησις τοῦ ἀτελοῦς ἐνέργεια, ἡ δ’ ἁπλῶς ἐνέργεια ἑτέρα, ἡ τοῦ τετελεσμένου.

2. τὸ μὲν οὖν αἰσθάνεσθαι ὅμοιον τῷ φάναι μόνον καὶ νοεῖν· ὅταν δὲ ἡδὺ ἢ λυπηρόν, οἷον καταφᾶσα ἢ ἀποφᾶσα διώκει ἢ φεύγει· καὶ ἔστι τὸ ἥδεσθαι καὶ λυπεῖσθαι τὸ ἐνεργεῖν τῇ αἰσθητικῇ μεσότητι πρὸς τὸ ἀγαθὸν ἢ κακόν, ᾗ τοιαῦτα. καὶ ἡ φυγὴ δὲ καὶ ἡ ὄρεξις ταὐτό, ἡ κατ’ ἐνέργειαν, καὶ οὐχ ἕτερον τὸ ὀρεκτικὸν καὶ τὸ φευκτικόν, οὔτ’ ἀλλήλων οὔτε τοῦ αἰσθητικοῦ· ἀλλὰ τὸ εἶναι ἄλλο.

3. τῇ δὲ διανοητικῇ ψυχῇ τὰ φαντάσματα οἷον αἰσθήματα ὑπάρχει, ὅταν δὲ ἀγαθὸν ἢ κακὸν φήσῃ ἢ ἀποφήσῃ, φεύγει ἢ διώκει· διὸ οὐδέποτε νοεῖ ἄνευ φαντάσματος ἡ ψυχή. -ὥσπερ δὲ ὁ ἀὴρ τὴν κόρην τοιανδὶ ἐποίησεν, αὕτη δ’ ἕτερον, καὶ ἡ ἀκοὴ ὡσαύτως, τὸ δὲ ἔσχατον ἕν, καὶ μία <ἡ> μεσότης, τὸ δ’ εἶναι αὐτῇ πλείω ... [431a20]

4. -τίνι δ’ ἐπικρίνει τί διαφέρει γλυκὺ καὶ θερμόν, εἴρηται μὲν καὶ πρότερον, λεκτέον δὲ καὶ ὧδε. ἔστι γὰρ ἕν τι, οὕτω δὲ ὡς ὁ ὅρος, καὶ ταῦτα, ἓν τῷ ἀνάλογον καὶ τῷ ἀριθμῷ ὄντα, ἔχει <ἑκάτερον> πρὸς ἑκάτερον ὡς ἐκεῖνα πρὸς ἄλληλα· τί γὰρ διαφέρει τὸ ἀπορεῖν πῶς τὰ μὴ ὁμογενῆ κρίνει ἢ τὰ ἐναντία, οἷον λευκὸν καὶ μέλαν; ἔστω δὴ ὡς τὸ Α τὸ λευκὸν πρὸς τὸ Β τὸ μέλαν, τὸ Γ πρὸς τὸ Δ [ὡς ἐκεῖνα πρὸς ἄλληλα]· ὥστε καὶ ἐναλλάξ. εἰ δὴ τὰ ΓΑ ἑνὶ εἴη ὑπάρχοντα, οὕτως ἕξει, ὥσπερ καὶ τὰ ΔΒ, τὸ αὐτὸ μὲν καὶ ἕν, τὸ δ’ εἶναι οὐ τὸ αὐτό-κἀκεῖνα ὁμοίως. ὁ δ’ αὐτὸς [431b] λόγος καὶ εἰ τὸ μὲν Α τὸ γλυκὺ εἴη, τὸ δὲ Β τὸ λευκόν.

5. τὰ μὲν οὖν εἴδη τὸ νοητικὸν ἐν τοῖς φαντάσμασι νοεῖ, καὶ ὡς ἐν ἐκείνοις ὥρισται αὐτῷ τὸ διωκτὸν καὶ φευκτόν, καὶ ἐκτὸς τῆς αἰσθήσεως, ὅταν ἐπὶ τῶν φαντασμάτων ᾖ, κινεῖται· οἷον, αἰσθανόμενος τὸν φρυκτὸν ὅτι πῦρ, τῇ κοινῇ ὁρῶν κινούμενον γνωρίζει ὅτι πολέμιος·

6. ὁτὲ δὲ τοῖς ἐν τῇ ψυχῇ φαντάσμασιν ἢ νοήμασιν, ὥσπερ ὁρῶν, λογίζεται καὶ βουλεύεται τὰ μέλλοντα πρὸς τὰ παρόντα· καὶ ὅταν εἴπῃ ὡς ἐκεῖ τὸ ἡδὺ ἢ λυπηρόν, ἐνταῦθα φεύγει ἢ διώκει- καὶ ὅλως ἓν πράξει. καὶ τὸ

ἄνευ δὲ πράξεως, τὸ ἀληθὲς καὶ τὸ ψεῦδος, ἐν τῷ αὐτῷ γένει ἐστὶ τῷ ἀγαθῷ καὶ τῷ κακῷ· ἀλλὰ τῷ γε ἁπλῶς διαφέρει καὶ τινί.

7. -τὰ δὲ ἐν ἀφαιρέσει λεγόμενα <νοεῖ> ὥσπερ, εἴ <τις> τὸ σιμὸν ᾗ μὲν σιμὸν οὔ, κεχωρισμένως δὲ ᾗ κοῖλον [εἴ τις] ἐνόει [ἐνεργείᾳ], ἄνευ τῆς σαρκὸς ἂν ἐνόει ἐν ᾗ τὸ κοῖλον-οὕτω τὰ μαθηματικά, οὐ κεχωρισμένα <ὄντα>, ὡς κεχωρισμένα νοεῖ, ὅταν νοῇ <ᾗ> ἐκεῖνα.

8. ὅλως δὲ ὁ νοῦς ἐστιν, ὁ κατ’ ἐνέργειαν, τὰ πράγματα. ἆρα δ’ ἐνδέχεται τῶν κεχωρισμένων τι νοεῖν ὄντα αὐτὸν μὴ κεχωρισμένον μεγέθους, ἢ οὔ, σκεπτέον ὕστερον.

Κεφάλαιο 8

[431b20] 1. Νῦν δέ, περὶ ψυχῆς τὰ λεχθέντα συγκεφαλαιώσαντες, εἴπωμεν πάλιν ὅτι ἡ ψυχὴ τὰ ὄντα πώς ἐστι πάντα· ἢ γὰρ αἰσθητὰ τὰ ὄντα ἢ νοητά, ἔστι δ’ ἡ ἐπιστήμη μὲν τὰ ἐπιστητά πως, ἡ δ’ αἴσθησις τὰ αἰσθητά·

2. πῶς δὲ τοῦτο, δεῖ ζητεῖν. τέμνεται οὖν ἡ ἐπιστήμη καὶ ἡ αἴσθησις εἰς τὰ πράγματα, ἡ μὲν δυνάμει εἰς τὰ δυνάμει, ἡ δ’ ἐντελεχείᾳ εἰς τὰ ἐντελεχείᾳ· τῆς δὲ ψυχῆς τὸ αἰσθητικὸν καὶ τὸ ἐπιστημονικὸν δυνάμει ταὐτά ἐστι, τὸ μὲν <τὸ> ἐπιστητὸν τὸ δὲ <τὸ> αἰσθητόν. ἀνάγκη δ’ ἢ αὐτὰ ἢ τὰ εἴδη εἶναι. αὐτὰ μὲν δὴ οὔ· οὐ γὰρ ὁ λίθος ἐν τῇ ψυχῇ, ἀλλὰ τὸ [432a] εἶδος· ὥστε ἡ ψυχὴ ὥσπερ ἡ χείρ ἐστιν· καὶ γὰρ ἡ χεὶρ ὄργανόν ἐστιν ὀργάνων, καὶ ὁ νοῦς εἶδος εἰδῶν καὶ ἡ αἴ- σθησις εἶδος αἰσθητῶν.

3. ἐπεὶ δὲ οὐδὲ πρᾶγμα οὐθὲν ἔστι παρὰ τὰ μεγέθη, ὡς δοκεῖ, τὰ αἰσθητὰ κεχωρισμένον, ἐν τοῖς εἴδεσι τοῖς αἰσθητοῖς τὰ νοητά ἐστι, τά τε ἐν ἀφαιρέσει λεγόμενα καὶ ὅσα τῶν αἰσθητῶν ἕξεις καὶ πάθη. καὶ διὰ τοῦτο οὔτε μὴ αἰσθανόμενος μηθὲν οὐθὲν ἂν μάθοι οὐδὲ ξυνείη, ὅταν τε θεωρῇ, ἀνάγκη ἅμα φάντασμά τι θεωρεῖν· τὰ γὰρ φαντάσματα ὥσπερ αἰσθήματά ἐστι, πλὴν ἄνευ ὕλης. ἔστι δ’ ἡ φαντασία ἕτερον φάσεως καὶ ἀποφάσεως· συμπλοκὴ γὰρ νοημάτων ἐστὶ τὸ ἀληθὲς ἢ ψεῦδος. τὰ δὲ πρῶτα νοήματα τί διοίσει τοῦ μὴ φαντάσματα εἶναι; ἢ οὐδὲ ταῦτα φαντάσματα, ἀλλ’ οὐκ ἄνευ φαντασμάτων.

Κεφάλαιο 9

[432a15] 1. Ἐπεὶ δὲ ἡ ψυχὴ κατὰ δύο ὥρισται δυνάμεις ἡ τῶν ζῴων, τῷ τε κριτικῷ, ὃ διανοίας ἔργον ἐστὶ καὶ αἰσθήσεως, καὶ ἔτι τῷ κινεῖν τὴν κατὰ τόπον κίνησιν, περὶ μὲν αἰσθήσεως καὶ νοῦ διωρίσθω τοσαῦτα, περὶ δὲ τοῦ κινοῦντος, τί ποτέ ἐστι τῆς ψυχῆς, σκεπτέον, πότερον ἕν τι μόριον αὐτῆς χωριστὸν ὂν ἢ μεγέθει ἢ λόγῳ, ἢ πᾶσα ἡ ψυχή, καὶ εἰ μόριόν τι, πότερον ἴδιόν τι παρὰ τὰ εἰωθότα λέγεσθαι καὶ τὰ εἰρημένα, ἢ τούτων ἕν τι.

2. ἔχει δὲ ἀπορίαν εὐθὺς πῶς τε δεῖ μόρια λέγειν τῆς ψυχῆς καὶ πόσα. τρόπον γάρ τινα ἄπειρα φαίνεται, καὶ οὐ μόνον ἅ τινες λέγουσι διορίζοντες, λογιστικὸν καὶ θυμικὸν καὶ ἐπιθυμητικόν, οἱ δὲ τὸ λόγον ἔχον καὶ τὸ ἄλογον· κατὰ γὰρ τὰς διαφορὰς δι’ ἃς ταῦτα χωρίζουσι, καὶ ἄλλα φαίνεται μόρια μείζω διάστασιν ἔχοντα τούτων, περὶ ὧν καὶ νῦν εἴρηται, τό τε θρεπτικόν, ὃ καὶ τοῖς φυτοῖς ὑπάρχει καὶ πᾶσι τοῖς ζῴοις, καὶ τὸ αἰσθητικόν, ὃ οὔτε ὡς ἄλογον οὔτε ὡς λόγον ἔχον θείη ἄν τις ῥᾳδίως·

3. ἔτι δὲ τὸ φανταστικόν, [432b] ὃ τῷ μὲν εἶναι πάντων ἕτερον, τίνι δὲ τούτων ταὐτὸν ἢ ἕτερον ἔχει πολλὴν ἀπορίαν, εἴ τις θήσει κεχωρισμένα μόρια τῆς ψυχῆς· πρὸς δὲ τούτοις τὸ ὀρεκτικόν, ὃ καὶ λόγῳ καὶ δυνάμει ἕτερον ἂν δόξειεν εἶναι πάντων. καὶ ἄτοπον δὴ τὸ τοῦτο διασπᾶν· ἔν τε τῷ λογιστικῷ γὰρ ἡ βούλησις γίνεται, καὶ ἐν τῷ ἀλόγῳ ἡ ἐπιθυμία καὶ ὁ θυμός· εἰ δὲ τρία ἡ ψυχή, ἐν ἑκάστῳ ἔσται ὄρεξις.

4. καὶ δὴ καὶ περὶ οὗ νῦν ὁ λόγος ἐνέστηκε, τί τὸ κινοῦν κατὰ τόπον τὸ ζῷόν ἐστιν; τὴν μὲν γὰρ κατ’ αὔξησιν καὶ φθίσιν κίνησιν, ἅπασιν ὑπάρχουσαν, τὸ πᾶσιν ὑπάρχον δόξειεν ἂν κινεῖν, τὸ γεννητικὸν καὶ θρεπτικόν· περὶ δὲ ἀναπνοῆς καὶ ἐκπνοῆς, καὶ ὕπνου καὶ ἐγρηγόρσεως, ὕστερον ἐπισκεπτέον· ἔχει γὰρ καὶ ταῦτα πολλὴν ἀπορίαν.

5. ἀλλὰ περὶ τῆς κατὰ τόπον κινήσεως, τί τὸ κινοῦν τὸ ζῷον τὴν πορευτικὴν κίνησιν, σκεπτέον. ὅτι μὲν οὖν οὐχ ἡ θρεπτικὴ δύναμις, δῆλον· ἀεί τε γὰρ ἕνεκά του ἡ κίνησις αὕτη, καὶ μετὰ φαντασίας καὶ ὀρέξεώς ἐστιν· οὐθὲν γὰρ μὴ ὀρεγόμενον ἢ φεῦγον κινεῖται ἀλλ’ ἢ βίᾳ· ἔτι κἂν τὰ φυτὰ κινητικὰ ἦν, κἂν εἶχέ τι μόριον ὀργανικὸν πρὸς τὴν κίνησιν ταύτην.

6. ὁμοίως δὲ οὐδὲ τὸ αἰσθητικόν· πολλὰ γὰρ ἔστι τῶν ζῴων ἃ αἴσθησιν μὲν ἔχει, μόνιμα δ’ ἐστὶ καὶ ἀκίνητα διὰ τέλους. εἰ οὖν ἡ φύσις μήτε ποιεῖ μάτην μηθὲν μήτε ἀπολείπει τι τῶν ἀναγκαίων, πλὴν ἐν τοῖς πηρώμασι καὶ ἐν τοῖς ἀτελέσιν, τὰ δὲ τοιαῦτα τῶν ζῴων τέλεια καὶ οὐ πηρώματά ἐστιν

(σημεῖον δ’ ὅτι ἐστὶ γεννητικὰ καὶ ἀκμὴν ἔχει καὶ φθίσιν) -ὥστ’ εἶχεν ἂν καὶ τὰ ὀργανικὰ μέρη τῆς πορείας.

7. ἀλλὰ μὴν οὐδὲ τὸ λογιστικὸν καὶ ὁ καλούμενος νοῦς ἐστιν ὁ κινῶν· ὁ μὲν γὰρ θεωρητικὸς οὐθὲν θεωρεῖ πρακτόν, οὐδὲ λέγει περὶ φευκτοῦ καὶ διωκτοῦ οὐθέν, ἀεὶ δὲ ἡ κίνησις ἢ φεύγοντός τι ἢ διώκοντός τί ἐστιν. ἀλλ’ οὐδ’ ὅταν θεωρῇ τι τοιοῦτον, ἤδη κελεύει φεύγειν ἢ διώκειν, οἷον πολλάκις διανοεῖται φοβερόν τι ἢ ἡδύ, οὐ κελεύει δὲ φοβεῖσθαι, ἡ δὲ καρδία [433a] κινεῖται, ἂν δ’ ἡδύ, ἕτερόν τι μόριον.

8. ἔτι καὶ ἐπιτάττοντος τοῦ νοῦ καὶ λεγούσης τῆς διανοίας φεύγειν τι ἢ διώκειν οὐ κινεῖται, ἀλλὰ κατὰ τὴν ἐπιθυμίαν πράττει, οἷον ὁ ἀκρατής. καὶ ὅλως δὲ ὁρῶμεν ὅτι ὁ ἔχων τὴν ἰατρικὴν οὐκ ἰᾶται, ὡς ἑτέρου τινὸς κυρίου ὄντος τοῦ ποιεῖν κατὰ τὴν ἐπιστήμην, ἀλλ’ οὐ τῆς ἐπιστήμης. ἀλλὰ μὴν οὐδ’ ἡ ὄρεξις ταύτης κυρία τῆς κινήσεως· οἱ γὰρ ἐγκρατεῖς ὀρεγόμενοι καὶ ἐπιθυμοῦντες οὐ πράττουσιν ὧν ἔχουσι τὴν ὄρεξιν, ἀλλ’ ἀκολουθοῦσι τῷ νῷ.

Κεφάλαιο 10

[433a9] 1. Φαίνεται δέ γε δύο ταῦτα κινοῦντα, ἢ ὄρεξις ἢ νοῦς, εἴ τις τὴν φαντασίαν τιθείη ὡς νόησίν τινα· πολλοὶ γὰρ παρὰ τὴν ἐπιστήμην ἀκολουθοῦσι ταῖς φαντασίαις, καὶ ἐν τοῖς ἄλλοις ζῴοις οὐ νόησις οὐδὲ λογισμὸς ἔστιν, ἀλλὰ φαντασία. ἄμφω ἄρα ταῦτα κινητικὰ κατὰ τόπον, νοῦς καὶ ὄρεξις,

2. νοῦς δὲ ὁ ἕνεκά του λογιζόμενος καὶ ὁ πρακτικός· διαφέρει δὲ τοῦ θεωρητικοῦ τῷ τέλει. καὶ ἡ ὄρεξις <δ'> ἕνεκά του πᾶσα· οὗ γὰρ ἡ ὄρεξις, αὕτη ἀρχὴ τοῦ πρακτικοῦ νοῦ, τὸ δ' ἔσχατον ἀρχὴ τῆς πράξεως. ὥστε εὐλόγως δύο ταῦτα φαίνεται τὰ κινοῦντα, ὄρεξις καὶ διάνοια πρακτική· τὸ ὀρεκτὸν γὰρ κι- νεῖ, καὶ διὰ τοῦτο ἡ διάνοια κινεῖ, ὅτι ἀρχὴ αὐτῆς ἐστι τὸ ὀρεκτόν.

3. καὶ ἡ φαντασία δὲ ὅταν κινῇ, οὐ κινεῖ ἄνευ ὀρέξεως. ἓν δή τι τὸ κινοῦν, τὸ ὀρεκτικόν. εἰ γὰρ δύο, νοῦς καὶ ὄρεξις, ἐκίνουν, κατὰ κοινὸν ἄν τι ἐκίνουν εἶδος· νῦν δὲ ὁ μὲν νοῦς οὐ φαίνεται κινῶν ἄνευ ὀρέξεως (ἡ γὰρ βούλησις ὄρεξις, ὅταν δὲ κατὰ τὸν λογισμὸν κινῆται, καὶ κατὰ βούλησιν κινεῖται), ἡ δ' ὄρεξις κινεῖ καὶ παρὰ τὸν λογισμόν· ἡ γὰρ ἐπιθυμία ὄρεξίς τίς ἐστιν.

4. νοῦς μὲν οὖν πᾶς ὀρθός ἐστιν· ὄρεξις δὲ καὶ φαντασία καὶ ὀρθὴ καὶ οὐκ ὀρθή. διὸ ἀεὶ κινεῖ μὲν τὸ ὀρεκτόν, ἀλλὰ τοῦτ' ἐστὶν ἢ τὸ ἀγαθὸν ἢ τὸ φαινόμενον ἀγαθόν· οὐ πᾶν δέ, ἀλλὰ τὸ πρακτὸν ἀγαθόν. πρακτὸν δ' ἐστὶ τὸ ἐνδεχόμενον καὶ ἄλλως ἔχειν.

5. ὅτι μὲν οὖν ἡ τοιαύτη δύναμις κινεῖ τῆς ψυχῆς, ἡ καλουμένη [433b] ὄρεξις, φανερόν. τοῖς δὲ διαιροῦσι τὰ μέρη τῆς ψυχῆς, ἐὰν κατὰ τὰς δυνάμεις διαιρῶσι καὶ χωρίζωσι, πάμπολλα γίνεται, θρεπτικόν, αἰσθητικόν, νοητικόν, βουλευτικόν, ἔτι ὀρεκτικόν· ταῦτα γὰρ πλέον διαφέρει ἀλλήλων ἢ ἐπιθυμητικὸν καὶ θυμικόν.

6. ἐπεὶ δ' ὀρέξεις γίνονται ἐναντίαι ἀλλήλαις, τοῦτο δὲ συμβαίνει ὅταν ὁ λόγος καὶ αἱ ἐπιθυμίαι ἐναντίαι ὦσι, γίνεται δ' ἐν τοῖς χρόνου αἴσθησιν ἔχουσιν (ὁ μὲν γὰρ νοῦς διὰ τὸ μέλλον ἀνθέλκειν κελεύει, ἡ δ' ἐπιθυμία διὰ τὸ ἤδη· φαίνεται γὰρ τὸ ἤδη ἡδὺ καὶ ἁπλῶς ἡδὺ καὶ ἀγαθὸν ἁπλῶς, διὰ τὸ μὴ ὁρᾶν τὸ μέλλον), εἴδει μὲν ἓν ἂν εἴη τὸ κινοῦν, τὸ ὀρεκτικόν, ᾗ ὀρεκτικόν-πρῶτον δὲ πάντων τὸ ὀρεκτόν· τοῦτο γὰρ κινεῖ οὐ κινούμενον, τῷ νοηθῆναι ἢ φαντασθῆναι-ἀριθμῷ δὲ πλείω τὰ κινοῦντα.

7. ἐπεὶ δ’ ἔστι τρία, ἓν μὲν τὸ κινοῦν, δεύτερον δ’ ᾧ κινεῖ, ἔτι τρίτον τὸ κινούμενον, τὸ δὲ κινοῦν διττόν, τὸ μὲν ἀκίνητον, τὸ δὲ κινοῦν καὶ κινούμενον, ἔστι δὴ τὸ μὲν ἀκίνητον τὸ πρακτὸν ἀγαθόν, τὸ δὲ κινοῦν καὶ κινούμενον τὸ ὀρεκτικόν (κινεῖται γὰρ τὸ κινούμενον ᾗ ὀρέγεται, καὶ ἡ ὄρεξις κίνησίς τίς ἐστιν, ἡ ἐνεργείᾳ), τὸ δὲ κινούμενον τὸ ζῷον· ᾧ δὲ κινεῖ ὀργάνῳ ἡ ὄρεξις, ἤδη τοῦτο σωματικόν ἐστιν - διὸ ἐν τοῖς κοινοῖς σώματος καὶ ψυχῆς ἔργοις θεωρητέον περὶ αὐτοῦ.

8. νῦν δὲ ὡς ἐν κεφαλαίῳ εἰπεῖν, τὸ κινοῦν ὀργανικῶς ὅπου ἀρχὴ καὶ τελευτὴ τὸ αὐτό-οἷον ὁ γιγγλυμός· ἐνταῦθα γὰρ τὸ κυρτὸν καὶ τὸ κοῖλον τὸ μὲν τελευτὴ τὸ δ’ ἀρχή (διὸ τὸ μὲν ἠρεμεῖ τὸ δὲ κινεῖται), λόγῳ μὲν ἕτερα ὄντα, μεγέθει δ’ ἀχώριστα. πάντα γὰρ ὤσει καὶ ἕλξει κινεῖται· διὸ δεῖ, ὥσπερ ἐν κύκλῳ, μένειν τι, καὶ ἐντεῦθεν ἄρχεσθαι τὴν κίνησιν.

9. ὅλως μὲν οὖν, ὥσπερ εἴρηται, ᾗ ὀρεκτικὸν τὸ ζῷον, ταύτῃ αὑτοῦ κινητικόν· ὀρεκτικὸν δὲ οὐκ ἄνευ φαντασίας· φαντασία δὲ πᾶσα ἢ λογιστικὴ ἢ αἰσθητική. ταύτης μὲν οὖν καὶ τὰ ἄλλα ζῷα μετέχει.

Κεφάλαιο 11

[433b31] 1. Σκεπτέον δὲ καὶ περὶ τῶν ἀτελῶν τί τὸ κινοῦν ἐστιν, [434a] οἷς ἁφῇ μόνον ὑπάρχει αἴσθησις, πότερον ἐνδέχεται φαντασίαν ὑπάρχειν τούτοις, ἢ οὔ, καὶ ἐπιθυμίαν. φαίνεται γὰρ λύπη καὶ ἡδονὴ ἐνοῦσα, εἰ δὲ ταῦτα, καὶ ἐπιθυμίαν ἀνάγκη. φαντασία δὲ πῶς ἂν ἐνείη; ἢ ὥσπερ καὶ κινεῖται ἀορίστως, καὶ ταῦτ' ἔνεστι μέν, ἀορίστως δ' ἔνεστιν.

2. ἡ μὲν οὖν αἰσθητικὴ φαντασία, ὥσπερ εἴρηται, καὶ ἐν τοῖς ἄλλοις ζῴοις ὑπάρ- χει, ἡ δὲ βουλευτικὴ ἐν τοῖς λογιστικοῖς (πότερον γὰρ πράξει τόδε ἢ τόδε, λογισμοῦ ἤδη ἐστὶν ἔργον· καὶ ἀνάγκη ἑνὶ μετρεῖν· τὸ μεῖζον γὰρ διώκει· ὥστε δύναται ἓν ἐκ πλειόνων φαντασμάτων ποιεῖν). καὶ αἴτιον τοῦτο τοῦ δόξαν μὴ δοκεῖν ἔχειν, ὅτι τὴν ἐκ συλλογισμοῦ οὐκ ἔχει, αὕτη δὲ κινεῖ·

3. διὸ τὸ βουλευτικὸν οὐκ ἔχει ἡ ὄρεξις· νικᾷ δ' ἐνίοτε καὶ κινεῖ ὁτὲ μὲν αὕτη ἐκείνην, ὁτὲ δ' ἐκείνη ταύτην, ὥσπερ σφαῖρα <σφαῖραν>, ἡ ὄρεξις τὴν ὄρεξιν, ὅταν ἀκρασία γένηται· φύσει δὲ ἀεὶ ἡ ἄνω ἀρχικωτέρα καὶ κινεῖ· ὥστε τρεῖς φορὰς ἤδη κινεῖσθαι.

4. τὸ δ' ἐπιστημονικὸν οὐ κινεῖται, ἀλλὰ μένει. ἐπεὶ δ' ἡ μὲν καθόλου ὑπόληψις καὶ λόγος, ἡ δὲ τοῦ καθ' ἕκαστον (ἡ μὲν γὰρ λέγει ὅτι δεῖ τὸν τοιοῦτον τὸ τοιόνδε πράττειν, ἡ δὲ ὅτι τόδε τοιόνδε, κἀγὼ δὲ τοιόσδε), ἢ δὴ αὕτη κινεῖ ἡ δόξα, οὐχ ἡ καθόλου, ἢ ἄμφω, ἀλλ' ἡ μὲν ἠρεμοῦσα μᾶλλον, ἡ δ' οὔ.

Κεφάλαιο 12

[434a21] 1. Τὴν μὲν οὖν θρεπτικὴν ψυχὴν ἀνάγκη πᾶν ἔχειν ὅτι περ ἂν ζῇ καὶ ψυχὴν ἔχῃ, ἀπὸ γενέσεως καὶ μέχρι φθορᾶς· ἀνάγκη γὰρ τὸ γενόμενον αὔξησιν ἔχειν καὶ ἀκμὴν καὶ φθίσιν, ταῦτα δ' ἄνευ τροφῆς ἀδύνατον· ἀνάγκη ἄρα ἐνεῖναι τὴν θρεπτικὴν δύναμιν ἐν πᾶσι τοῖς φυομένοις καὶ φθίνουσιν·

2. αἴσθησιν δ' οὐκ ἀναγκαῖον ἐν ἅπασι τοῖς ζῶσιν· οὔτε γὰρ ὅσων τὸ σῶμα ἁπλοῦν ἐνδέχεται αὐτὴν ἔχειν, [οὔτε ἄνευ ταύτης οἷόν τε οὐθὲν εἶναι ζῷον] οὔτε ὅσα μὴ δεκτικὰ τῶν εἰδῶν ἄνευ τῆς ὕλης.

3. τὸ δὲ ζῷον ἀναγκαῖον αἴσθησιν ἔχειν, [434a30] <οὐδὲ ἄνευ ταύτης οἷόν τε οὐθὲν εἶναι ζῷον,> εἰ μηθὲν μάτην ποιεῖ ἡ φύσις. ἕνεκά του γὰρ πάντα ὑπάρχει τὰ φύσει, ἢ συμπτώματα ἔσται τῶν ἕνεκά του. εἰ οὖν πᾶν σῶμα πορευτικόν, μὴ ἔχον αἴσθησιν, φθείροιτο ἂν καὶ [434b] εἰς τέλος οὐκ ἂν ἔλθοι, ὅ ἐστι φύσεως ἔργον (πῶς γὰρ θρέψεται; τοῖς μὲν γὰρ μονίμοις ὑπάρχει τοῦτο ὅθεν πεφύκασιν,

4. οὐχ οἷόν τε δὲ σῶμα ἔχειν μὲν ψυχὴν καὶ νοῦν κριτικόν, αἴσθησιν δὲ μὴ ἔχειν, μὴ μόνιμον ὄν, γενητὸν δέ-ἀλλὰ μὴν οὐδὲ ἀγένητον· διὰ τί γὰρ οὐχ ἕξει; ἢ γὰρ τῇ ψυχῇ βέλτιον ἢ τῷ σώματι, νῦν δ' οὐδέτερον· ἡ μὲν γὰρ οὐ μᾶλλον νοήσει, τῷ δ' οὐθὲν ἔσται μᾶλλον δι' ἐκεῖνο) -οὐθὲν ἄρα ἔχει ψυχὴν σῶμα μὴ μόνιμον <ὂν> ἄνευ αἰσθήσεως.

5. ἀλλὰ μὴν εἴγε αἴσθησιν ἔχει, ἀνάγκη τὸ σῶμα εἶναι ἢ ἁπλοῦν ἢ μικτόν. οὐχ οἷόν τε δὲ ἁπλοῦν· ἁφὴν γὰρ οὐχ ἕξει, ἔστι δὲ ἀνάγκη ταύτην ἔχειν. τοῦτο δὲ ἐκ τῶνδε δῆλον.

6. ἐπεὶ γὰρ τὸ ζῷον σῶμα ἔμψυχόν ἐστι, σῶμα δὲ ἅπαν ἁπτόν, [ἁπτὸν δὲ τὸ αἰσθητὸν ἁφῇ,] ἀνάγκη [καὶ] τὸ τοῦ ζῴου σῶμα ἁπτικὸν εἶναι, εἰ μέλλει σώζεσθαι τὸ ζῷον. αἱ γὰρ ἄλλαι αἰσθήσεις δι' ἑτέρων αἰσθάνονται, οἷον ὄσφρησις ὄψις ἀκοή· ἁπτόμενον δέ, εἰ μὴ ἕξει αἴσθησιν, οὐ δυνήσεται τὰ μὲν φεύγειν τὰ δὲ λαβεῖν. εἰ δὲ τοῦτο, ἀδύνατον ἔσται σώζεσθαι τὸ ζῷον.

7. διὸ καὶ ἡ γεῦσίς ἐστιν ὥσπερ ἁφή τις· τροφῆς γάρ ἐστιν, ἡ δὲ τροφὴ τὸ σῶμα ἁπτόν. ψόφος δὲ καὶ χρῶμα καὶ ὀσμὴ οὐ τρέφει, οὐδὲ ποιεῖ οὔτ' αὔξησιν οὔτε φθίσιν· ὥστε καὶ τὴν γεῦσιν ἀνάγκη ἁφὴν εἶναί τινα, διὰ τὸ τοῦ ἁπτοῦ καὶ θρεπτικοῦ αἴσθησιν εἶναι· αὗται μὲν οὖν ἀναγκαῖαι τῷ ζῴῳ, καὶ φανερὸν ὅτι οὐχ οἷόν τε ἄνευ ἁφῆς εἶναι ζῷον,

8. αἱ δὲ ἄλλαι τοῦ τε εὖ ἕνεκα καὶ γένει ζῴων ἤδη οὐ τῷ τυχόντι· ἀλλὰ τισίν, οἷον τῷ πορευτικῷ, ἀνάγκη ὑπάρχειν· εἰ γὰρ μέλλει σώζεσθαι, οὐ

μόνον δεῖ ἁπτόμενον αἰσθάνεσθαι ἀλλὰ καὶ ἄποθεν. τοῦτο δ’ ἂν εἴη, εἰ διὰ τοῦ μεταξὺ αἰσθητικὸν εἴη τῷ ἐκεῖνο μὲν ὑπὸ τοῦ αἰσθητοῦ πάσχειν καὶ κινεῖσθαι, αὐτὸ δ’ ὑπ’ ἐκείνου.

9. ὥσπερ γὰρ τὸ κινοῦν κατὰ τόπον μέχρι του μεταβάλλειν ποιεῖ, καὶ τὸ ὦσαν ἕτερον ποιεῖ ὥστε ὠθεῖν, καὶ ἔστι διὰ μέσου ἡ κίνησις, καὶ τὸ μὲν πρῶτον κινοῦν ὠθεῖ οὐκ ὠθούμενον, τὸ δ’ ἔσχατον μόνον ὠθεῖται οὐκ ὦσαν, τὸ δὲ μέσον ἄμφω, [435a] πολλὰ δὲ τὰ μέσα, οὕτω καὶ ἐπ’ ἀλλοιώσεως, πλὴν ὅτι μένοντος ἐν τῷ αὐτῷ τόπῳ ἀλλοιοῖ, οἷον εἰ εἰς κηρὸν βάψειέ τις, μέχρι τούτου ἐκινήθη, ἕως ἔβαψεν· λίθος δὲ οὐδέν, ἀλλ’ ὕδωρ μέχρι πόρρω· ὁ δ’ ἀὴρ ἐπὶ πλεῖστον κινεῖται καὶ ποιεῖ καὶ πάσχει, ἐὰν μένῃ καὶ εἷς ᾖ. διὸ καὶ περὶ ἀνακλάσεως βέλτιον ἢ τὴν ὄψιν ἐξιοῦσαν ἀνακλᾶσθαι τὸν ἀέρα πάσχειν ὑπὸ τοῦ σχήματος καὶ χρώματος, μέχρι περ οὗ ἂν ᾖ εἷς. ἐπὶ δὲ τοῦ λείου ἐστὶν εἷς· διὸ πάλιν οὗτος τὴν ὄψιν κινεῖ, ὥσπερ ἂν εἰ τὸ ἐν τῷ κηρῷ σημεῖον διεδίδοτο μέχρι τοῦ πέρατος.

Κεφάλαιο 13

[435a11] 1. Ὅτι δ’ οὐχ οἷόν τε ἁπλοῦν εἶναι τὸ τοῦ ζῴου σῶμα, φανερόν, λέγω δ’ οἷον πύρινον ἢ ἀέρινον. ἄνευ μὲν γὰρ ἁφῆς οὐδεμίαν ἐνδέχεται ἄλλην αἴσθησιν ἔχειν (τὸ γὰρ σῶμα ἁπτικὸν τὸ ἔμψυχον πᾶν, ὥσπερ εἴρηται)· τὰ δὲ ἄλλα ἔξω γῆς αἰσθητήρια μὲν ἂν γένοιτο, πάντα δὲ τῷ δι’ ἑτέρου αἰσθάνεσθαι ποιεῖ τὴν αἴσθησιν, καὶ διὰ τῶν μετα- ξύ, ἡ δ’ ἁφὴ τῷ αὐτῶν ἅπτεσθαί ἐστιν, διὸ καὶ τοὔνομα τοῦτο ἔχει. καίτοι καὶ τὰ ἄλλα αἰσθητήρια ἁφῇ αἰσθάνεται, ἀλλὰ δι’ ἑτέρου· αὕτη δὲ δοκεῖ μόνη δι’ αὑτῆς. ὥστε τῶν μὲν τοιούτων στοιχείων οὐθὲν ἂν εἴη σῶμα τοῦ ζῴου. οὐδὲ δὴ γήϊνον. πάντων γὰρ ἡ ἁφὴ τῶν ἁπτῶν ἐστὶν ὥσπερ μεσότης, καὶ δεκτικὸν τὸ αἰσθητήριον οὐ μόνον ὅσαι διαφοραὶ γῆς εἰσίν, ἀλλὰ καὶ θερμοῦ καὶ ψυχροῦ καὶ τῶν ἄλλων ἁπτῶν ἁπάντων. καὶ διὰ τοῦτο τοῖς ὀστοῖς καὶ ταῖς θριξὶ καὶ τοῖς τοιούτοις μορίοις οὐκ αἰσθανόμεθα, ὅτι γῆς ἐστιν, [435b] καὶ τὰ φυτὰ διὰ τοῦτο οὐδεμίαν ἔχει αἴσθησιν, ὅτι γῆς ἐστιν· ἄνευ δὲ ἁφῆς οὐδεμίαν οἷόν τε ἄλλην ὑπάρχειν, τοῦτο δὲ τὸ αἰσθητήριον οὐκ ἔστιν οὔτε γῆς οὔτε ἄλλου τῶν στοιχείων οὐδενός.

2. φανερὸν τοίνυν ὅτι ἀνάγκη μόνης ταύτης στερισκόμενα τῆς αἰσθήσεως τὰ ζῷα ἀποθνήσκειν· οὔτε γὰρ ταύτην ἔχειν οἷόν τε μὴ ζῷον ὄν, οὔτε ζῷον ὂν ἄλλην ἔχειν ἀνάγκη πλὴν ταύτην. καὶ διὰ τοῦτο τὰ μὲν ἄλλα αἰσθητὰ ταῖς ὑπερβολαῖς οὐ διαφθείρει τὸ ζῷον, οἷον χρῶμα καὶ ψόφος καὶ ὀσμή, ἀλλὰ μόνον τὰ αἰσθητήρια (ἂν μὴ κατὰ συμβεβηκός, οἷον ἂν ἅμα τῷ ψόφῳ ὦσις γένηται καὶ πληγή), καὶ ὑπὸ ὁραμάτων καὶ ὀσμῆς ἕτερα κινεῖται, ἃ τῇ ἁφῇ φθείρει (καὶ ὁ χυμὸς δὲ ᾗ ἅμα συμβαίνει ἁπτικὸν εἶναι, ταύτῃ φθείρει),

3. ἡ δὲ τῶν ἁπτῶν ὑπερβολή, οἷον θερμῶν καὶ ψυχρῶν καὶ σκληρῶν, ἀναιρεῖ τὸ ζῷον· παντὸς μὲν γὰρ ὑπερβολὴ αἰσθητοῦ ἀναιρεῖ τὸ αἰσθητήριον, ὥστε καὶ τὸ ἁπτὸν τὴν ἁφήν, ταύτῃ δὲ ὥρισται τὸ ζῷον· ἄνευ γὰρ ἁφῆς δέδεικται ὅτι ἀδύνατον εἶναι ζῷον. διὸ ἡ τῶν ἁπτῶν ὑπερβολὴ οὐ μόνον τὸ αἰσθητήριον φθείρει, ἀλλὰ καὶ τὸ ζῷον, ὅτι ἀνάγκη μόνην ἔχειν ταύτην. τὰς δ’ ἄλλας αἰσθήσεις ἔχει τὸ ζῷον, ὥσπερ εἴρηται, οὐ τοῦ εἶναι ἕνεκα ἀλλὰ τοῦ εὖ, οἷον ὄψιν, ἐπεὶ ἐν ἀέρι καὶ ὕδατι, ὅπως ὁρᾷ, ὅλως δ’ ἐπεὶ ἐν διαφανεῖ, γεῦσιν δὲ διὰ τὸ ἡδὺ καὶ λυπηρόν, ἵνα αἰσθάνηται τὸ ἐν τροφῇ καὶ ἐπιθυμῇ καὶ κινῆται, ἀκοὴν δὲ ὅπως σημαίνηταί τι αὐτῷ [γλῶτταν δὲ ὅπως σημαίνῃ τι ἑτέρῳ].

Περι Αισθησεωσ και Αισθητων (436a) Sense and Sensibilia

[436a] Ἐπεὶ δὲ περὶ ψυχῆς καθ’ αὑτὴν διώρισται πρότερον καὶ περὶ τῶν δυνάμεων ἑκάστης κατὰ μόριον αὐτῆς, ἐχόμενόν ἐστι ποιήσασθαι τὴν ἐπίσκεψιν περὶ τῶν ζῴων καὶ τῶν ζωὴν ἐχόντων ἁπάντων, τίνες εἰσὶν ἴδιαι καὶ τίνες κοιναὶ πράξεις αὐτῶν. τὰ μὲν οὖν εἰρημένα περὶ ψυχῆς ὑποκείσθω, περὶ δὲ τῶν λοιπῶν λέγωμεν, καὶ πρῶτον περὶ τῶν πρώτων. φαίνεται δὲ τὰ μέγιστα, καὶ τὰ κοινὰ καὶ τὰ ἴδια τῶν ζῴων, κοινὰ τῆς τε ψυχῆς ὄντα καὶ τοῦ σώματος, οἷον αἴσθησις καὶ μνήμη καὶ θυμὸς καὶ ἐπιθυμία καὶ ὅλως ὄρεξις, καὶ πρὸς τούτοις ἡδονὴ καὶ λύπη· καὶ γὰρ ταῦτα σχεδὸν ὑπάρχει πᾶσι τοῖς ζῴοις. πρὸς δὲ τούτοις τὰ μὲν πάντων ἐστὶ τῶν μετεχόντων ζωῆς κοινά, τὰ δὲ τῶν ζῴων ἐνίοις. τυγχάνουσι δὲ τούτων τὰ μέγιστα τέτταρες οὖσαι συζυγίαι τὸν ἀριθμόν, οἷον ἐγρήγορσις καὶ ὕπνος, καὶ νεότης καὶ γῆρας, καὶ ἀναπνοὴ καὶ ἐκπνοή, καὶ ζωὴ καὶ θάνατος· περὶ ὧν θεωρητέον, τί τε ἕκαστον αὐτῶν, καὶ διὰ τίνας αἰτίας συμβαίνει. φυσικοῦ δὲ καὶ περὶ ὑγιείας καὶ νόσου τὰς πρώτας ἰδεῖν ἀρχάς· οὔτε γὰρ ὑγίειαν οὔτε νόσον οἷόν τε γίγνεσθαι τοῖς ἐστερημένοις ζωῆς. διὸ σχεδὸν τῶν περὶ φύσεως οἱ πλεῖστοι καὶ τῶν ἰατρῶν οἱ φιλοσοφωτέρως τὴν τέχνην μετιόντες, οἱ μὲν τελευτῶσιν εἰς τὰ περὶ ἰατρικῆς, [436b] οἱ δ’ ἐκ τῶν περὶ φύσεως ἄρχονται [περὶ τῆς ἰατρικῆς].

ὅτι δὲ πάντα τὰ λεχθέντα κοινὰ τῆς τε ψυχῆς ἐστὶ καὶ τοῦ σώματος, οὐκ ἄδηλον. πάντα γὰρ τὰ μὲν μετ’ αἰσθήσεως συμβαίνει, τὰ δὲ δι’ αἰσθήσεως, ἔνια δὲ τὰ μὲν πάθη ταύτης ὄντα τυγχάνει, τὰ δ’ ἕξεις, τὰ δὲ φυλακαὶ καὶ σωτηρίαι, τὰ δὲ φθοραὶ καὶ στερήσεις· ἡ δ’ αἴσθησις ὅτι διὰ σώματος γίγνεται τῇ ψυχῇ, δῆλον καὶ διὰ τοῦ λόγου καὶ τοῦ λόγου χωρίς. ἀλλὰ περὶ μὲν αἰσθήσεως καὶ τοῦ αἰσθάνεσθαι, τί ἐστι καὶ διὰ τί συμβαίνει τοῖς ζῴοις τοῦτο τὸ πάθος, εἴρηται πρότερον ἐν τοῖς περὶ ψυχῆς. τοῖς δὲ ζῴοις, ᾗ μὲν ζῷον ἕκαστον, ἀνάγκη ὑπάρχειν αἴσθησιν· τούτῳ γὰρ τὸ ζῷον εἶναι καὶ μὴ ζῷον διορίζομεν. ἰδίᾳ δ’ ἤδη καθ’ ἕκαστον ἡ μὲν ἁφὴ καὶ γεῦσις ἀκολουθεῖ πᾶσιν ἐξ ἀνάγκης, ἡ μὲν ἁφὴ διὰ τὴν εἰρημένην αἰτίαν ἐν τοῖς περὶ ψυχῆς, ἡ δὲ γεῦσις διὰ τὴν τροφήν· τὸ γὰρ ἡδὺ διακρίνει καὶ τὸ λυπηρὸν αὐτῇ περὶ τὴν τροφήν, ὥστε τὸ μὲν φεύγειν τὸ δὲ διώκειν, καὶ ὅλως ὁ χυμός ἐστι τοῦ θρεπτικοῦ πάθος. αἱ δὲ διὰ τῶν ἔξωθεν αἰσθήσεις τοῖς πορευτικοῖς αὐτῶν, οἷον ὄσφρησις καὶ ἀκοὴ καὶ ὄψις, πᾶσι μὲν τοῖς ἔχουσι σωτηρίας ἕνεκεν ὑπάρχουσιν, ὅπως διώκωσί τε προαισθανόμενα τὴν τροφὴν καὶ τὰ φαῦλα καὶ τὰ φθαρτικὰ [437a] φεύγωσι, τοῖς δὲ καὶ φρονήσεως τυγχάνουσι τοῦ εὖ ἕνεκα· πολλὰς γὰρ εἰσαγγέλλουσι διαφοράς, ἐξ ὧν ἥ τε τῶν νοητῶν ἐγγίνεται φρόνησις καὶ ἡ τῶν πρακτῶν.

αὐτῶν δὲ τούτων πρὸς μὲν τὰ ἀναγκαῖα κρείττων ἡ ὄψις καθ’ αὑτήν, πρὸς δὲ νοῦν κατὰ συμβεβηκὸς ἡ ἀκοή. διαφορὰς μὲν γὰρ πολλὰς καὶ παντοδαπὰς ἡ τῆς ὄψεως εἰσαγγέλλει δύναμις διὰ τὸ πάντα τὰ σώματα μετέχειν χρώματος, ὥστε καὶ τὰ κοινὰ διὰ ταύτης αἰσθάνεσθαι μάλιστα (λέγω δὲ κοινὰ μέγεθος, σχῆμα, κίνησιν, ἀριθμόν), ἡ δ’ ἀκοὴ τὰς τοῦ ψόφου διαφορὰς μόνον, ὀλίγοις δὲ καὶ τὰς τῆς φωνῆς· κατὰ συμβεβηκὸς δὲ πρὸς φρόνησιν ἡ ἀκοὴ πλεῖστον συμβάλλεται μέρος. ὁ γὰρ λόγος αἴτιός ἐστι τῆς μαθήσεως ἀκουστὸς ὤν, οὐ καθ’ αὑτὸν ἀλλὰ κατὰ συμβεβηκός· ἐξ ὀνομάτων γὰρ σύγκειται, τῶν δ’ ὀνομάτων ἕκαστον σύμβολόν ἐστιν. διόπερ φρονιμώτεροι τῶν ἐκ γενετῆς ἐστερημένων εἰσὶν ἑκατέρας τῆς αἰσθήσεως οἱ τυφλοὶ τῶν ἐνεῶν καὶ κωφῶν.

Περὶ μὲν οὖν τῆς δυνάμεως ἣν ἔχει τῶν αἰσθήσεων ἑκάστη, πρότερον εἴρηται. τοῦ δὲ σώματος ἐν οἷς ἐγγίγνεσθαι πέφυκεν αἰσθητηρίοις, ἔνιοι μὲν ζητοῦσι κατὰ τὰ στοιχεῖα τῶν σωμάτων· οὐκ εὐποροῦντες δὲ πρὸς τέτταρα πέντ’ οὔσας συνάγειν, γλίχονται περὶ τῆς πέμπτης. ποιοῦσι δὲ πάντες τὴν ὄψιν πυρὸς διὰ τὸ πάθους τινὸς ἀγνοεῖν τὴν αἰτίαν· θλιβομένου γὰρ καὶ κινουμένου τοῦ ὀφθαλμοῦ φαίνεται πῦρ ἐκλάμπειν· τοῦτο δ’ ἐν τῷ σκότει πέφυκε συμβαίνειν, ἢ τῶν βλεφάρων ἐπικεκαλυμμένων· γίγνεται γὰρ καὶ τότε σκότος.

ἔχει δ’ ἀπορίαν τοῦτο καὶ ἑτέραν. εἰ γὰρ μὴ ἔστι λανθάνειν ‹μὴ› αἰσθανόμενον καὶ ὁρῶντα, ἀνάγκη ἄρ’ αὐτὸν ἑαυτὸν ὁρᾶν τὸν ὀφθαλμόν. διὰ τί οὖν ἠρεμοῦντι τοῦτ’ οὐ συμβαίνει; τὸ δ’ αἴτιον τούτου, καὶ τῆς ἀπορίας καὶ τοῦ δοκεῖν πῦρ εἶναι τὴν ὄψιν, ἐντεῦθεν ληπτέον. τὰ γὰρ λεῖα πέφυκεν ἐν τῷ σκότει λάμπειν, οὐ μέντοι φῶς γε ποιεῖν, τοῦ δ’ ὀφθαλμοῦ [437b] τὸ καλούμενον μέλαν καὶ μέσον λεῖον. φαίνεται δὲ τοῦτο κινουμένου τοῦ ὄμματος διὰ τὸ συμβαίνειν ὥσπερ δύο γίγνεσθαι τὸ ἕν. τοῦτο δ’ ἡ ταχυτὴς ποιεῖ τῆς κινήσεως, ὥστε δοκεῖν ἕτερον εἶναι τὸ ὁρῶν καὶ τὸ ὁρώμενον. διὸ καὶ οὐ γίγνεται, ἐὰν μὴ ταχέως καὶ ἐν σκότει τοῦτο συμβῇ· τὸ γὰρ λεῖον ἐν τῷ σκότει πέφυκε λάμπειν (οἷον κεφαλαὶ ἰχθύων τινῶν καὶ ὁ τῆς σηπίας θολός), καὶ βραδέως μεταβάλλοντος τοῦ ὄμματος οὐ συμβαίνει ὥστε δοκεῖν ἅμα ἓν καὶ δύο εἶναι τό θ’ ὁρῶν καὶ τὸ ὁρώμενον.

ἐκείνως δ’ αὐτὸς αὑτὸν ὁρᾷ ὁ ὀφθαλμός, ὥσπερ καὶ ἐν τῇ ἀνακλάσει· ἐπεὶ εἴ γε πῦρ ἦν, καθάπερ Ἐμπεδοκλῆς φησὶ καὶ ἐν τῷ Τιμαίῳ γέγραπται, καὶ συνέβαινε τὸ ὁρᾶν ἐξιόντος ὥσπερ ἐκ λαμπτῆρος τοῦ φωτός, διὰ τί οὐ καὶ ἐν τῷ σκότει ἑώρα ἂν ἡ ὄψις; τὸ δ’ ἀποσβέννυσθαι φάναι ἐν τῷ σκότει ἐξιοῦσαν, ὥσπερ ὁ Τίμαιος λέγει, κενόν ἐστι παντελῶς· τίς γὰρ ἀπόσβεσις φωτός ἐστιν; σβέννυται γὰρ ἢ ὑγρῷ ἢ ψυχρῷ τὸ θερμὸν καὶ ξηρόν (οἷον δοκεῖ τό τ’ ἐν τοῖς ἀνθρακώδεσιν εἶναι πῦρ καὶ ἡ φλόξ), ὧν τῷ φωτὶ οὐδέτερον φαίνεται ὑπάρχον. εἰ δ’ ἄρα ὑπάρχει μὲν ἀλλὰ διὰ τὸ ἠρέμα λανθάνει ἡμᾶς, ἔδει μεθ’ ἡμέραν γε καὶ ἐν τῷ ὕδατι ἀποσβέννυσθαι τὸ φῶς καὶ ἐν τοῖς πάγοις μᾶλλον γίγνεσθαι σκότον· ἡ γοῦν φλὸξ καὶ τὰ πεπυρωμένα σώματα πάσχει τοῦτο· νῦν δ’ οὐδὲν συμβαίνει τοιοῦτον.

Ἐμπεδοκλῆς δ’ ἔοικε νομίζοντι ὁτὲ μὲν ἐξιόντος τοῦ φωτός, ὥσπερ εἴρηται πρότερον, βλέπειν· λέγει γοῦν οὕτως·

ὡς δ’ ὅτε τις πρόοδον νοέων ὡπλίσσατο λύχνον
χειμερίην διὰ νύκατα, πυρὸς σέλας αἰθομένοιο,
ἅψας παντοίων ἀνέμων λαμπτῆρας ἀμοργούς,
οἵ τ’ ἀνέμων μὲν πνεῦμα διασκιδνᾶσιν ἀέντων,
πῦρ δ’ ἔξω διαθρῷσκον, ὅσον ταναώτερον ἦεν,
λάμπεσκεν κατὰ βηλὸν ἀτειρέσιν ἀκτίνεσσιν·
ὣς δὲ τότ’ ἐν μήνιγξιν ἐεργμένον ὠγύγιον πῦρ
[438a] λεπτῇσιν τ’ ὀθόνῃσι λοχεύσατο κύκλοπα κούρην·
‹αἳ› χοάνῃσι δίαντα τετρήατο θεσπεσίῃσιν·
αἱ δ’ ὕδατος μὲν βένθος ἀπέστεγον ἀμφιναέντος,
πῦρ δ’ ἔξω διίεσκον, ὅσον ταναώτερον ἦεν.

ὁτὲ μὲν οὖν οὕτως ὁρᾶν φησίν, ὁτὲ δὲ ταῖς ἀπορροίαις ταῖς ἀπὸ τῶν ὁρωμένων.

Δημόκριτος δ’ ὅτι μὲν ὕδωρ εἶναί φησι, λέγει καλῶς, ὅτι δ’ οἴεται τὸ ὁρᾶν εἶναι τὴν ἔμφασιν, οὐ καλῶς· τοῦτο μὲν γὰρ συμβαίνει ὅτι τὸ ὄμμα λεῖον, καὶ ἔστιν οὐκ ἐν ἐκείνῳ ἀλλ’ ἐν τῷ ὁρῶντι· ἀνάκλασις γὰρ τὸ πάθος, ἀλλὰ καθόλου περὶ τῶν ἐμφαινομένων καὶ ἀνακλάσεως οὐδέν πω δῆλον ἦν, ὡς ἔοικεν. ἄτοπον δὲ καὶ τὸ μὴ ἐπελθεῖν αὐτῷ ἀπορῆσαι διὰ τί ὁ ὀφθαλμὸς ὁρᾷ μόνον, τῶν δ’ ἄλλων οὐδὲν ἐν οἷς ἐμφαίνεται τὰ εἴδωλα. τὸ μὲν οὖν τὴν ὄψιν εἶναι ὕδατος ἀληθὲς μέν, οὐ μέντοι συμβαίνει τὸ ὁρᾶν ᾗ ὕδωρ ἀλλ’ ᾗ διαφανές· ὃ καὶ ἐπὶ τοῦ ἀέρος κοινόν ἐστιν. ἀλλ’ εὐφυλακτότερον καὶ εὐπιλητότερον τὸ ὕδωρ τοῦ ἀέρος· διόπερ ἡ κόρη καὶ τὸ ὄμμα ὕδατός ἐστιν. τοῦτο δὲ καὶ ἐπ’ αὐτῶν τῶν ἔργων δῆλον· φαίνεται γὰρ ὕδωρ τὸ ἐκρέον διαφθειρομένων, καὶ ἔν γε τοῖς πάμπαν ἐμβρύοις τῇ ψυχρότητι ὑπερβάλλον καὶ τῇ λαμπρότητι, καὶ τὸ λευκὸν τοῦ ὄμματος ἐν τοῖς ἔχουσιν αἷμα πῖον καὶ λιπαρόν· ὅπερ διὰ τοῦτ᾽ ἐστί, πρὸς τὸ διαμένειν τὸ ὑγρὸν ἄπηκτον, καὶ διὰ τοῦτο τοῦ σώματος ἀρριγότατον ὁ ὀφθαλμός ἐστιν· οὐδεὶς γάρ πω τὸ ἐντὸς τῶν βλεφάρων ἐρρίγωσεν. τῶν δ᾽ ἀναίμων σκληρόδερμοι οἱ ὀφθαλμοί εἰσι, καὶ τοῦτο ποιεῖ τὴν σκέπην. ἄλογον δὲ ὅλως τὸ ἐξιόντι τινὶ τὴν ὄψιν ὁρᾶν, καὶ ἀποτείνεσθαι μέχρι τῶν ἄστρων, ἢ μέχρι τινὸς ἐξιοῦσαν συμφύεσθαι, καθάπερ λέγουσί τινες. τούτου μὲν γὰρ βέλτιον τὸ ἐν ‹τῇ› ἀρχῇ συμφύεσθαι τοῦ ὄμματος. ἀλλὰ καὶ τοῦτο εὔηθες· τό τε γὰρ συμφύεσθαι τί ἐστι φωτὶ πρὸς φῶς, ἢ πῶς οἷόν θ᾽ ὑπάρχειν (οὐ γὰρ τῷ τυχόντι [438b] συμφύεται τὸ τυχόν), τό τ᾽ ἐντὸς τῷ ἐκτὸς πῶς; ἡ γὰρ μῆνιγξ μεταξύ ἐστιν.

περὶ μὲν οὖν τοῦ ἄνευ φωτὸς μὴ ὁρᾶν εἴρηται ἐν ἄλλοις· ἀλλ᾽ εἴτε φῶς εἴτ᾽ ἀήρ ἐστι τὸ μεταξὺ τοῦ ὁρωμένου καὶ τοῦ ὄμματος, ἡ διὰ τούτου κίνησίς ἐστιν ἡ ποιοῦσα τὸ ὁρᾶν. καὶ εὐλόγως τὸ ἐντός ἐστιν ὕδατος· διαφανὲς γὰρ τὸ ὕδωρ, ὁρᾶται δὲ ὥσπερ καὶ ἔξω οὐκ ἄνευ φωτός, οὕτως καὶ ἐντός· διαφανὲς ἄρα δεῖ εἶναι· ἀνάγκη ἄρα ὕδωρ εἶναι, ἐπειδὴ οὐκ ἀήρ. οὐ γὰρ ἐπὶ ἐσχάτου τοῦ ὄμματος ἡ ψυχὴ ἢ τῆς ψυχῆς τὸ αἰσθητικόν ἐστιν, ἀλλὰ δῆλον ὅτι ἐντός· διόπερ ἀνάγκη διαφανὲς εἶναι καὶ δεκτικὸν φωτὸς τὸ ἐντὸς τοῦ ὄμματος. καὶ τοῦτο καὶ ἐπὶ τῶν συμβαινόντων δῆλον· ἤδη γάρ τισι πληγεῖσιν ἐν πολέμῳ παρὰ τὸν κρόταφον οὕτως ὥστ᾽ ἀποτμηθῆναι τοὺς πόρους τοῦ ὄμματος ἔδοξε γενέσθαι σκότος ὥσπερ λύχνου ἀποσβεσθέντος, διὰ τὸ οἷον λαμπτῆρά τινα ἀποτμηθῆναι τὸ διαφανές, τὴν καλουμένην κόρην. ὥστ᾽ εἴπερ ἐπὶ τούτων συμβαίνει καθάπερ λέγομεν, φανερὸν ὡς εἰ δεῖ τοῦτον τὸν τρόπον ἀποδιδόναι καὶ προσάπτειν ἕκαστον τῶν αἰσθητηρίων ἑνὶ τῶν στοιχείων, τοῦ μὲν ὄμματος τὸ ὁρατικὸν ὕδατος ὑποληπτέον, ἀέρος δὲ τὸ τῶν ψόφων αἰσθητικόν, πυρὸς δὲ τὴν ὄσφρησιν (ὃ γὰρ ἐνεργείᾳ ἡ ὄσφρησις, τοῦτο δυνάμει τὸ ὀσφραντικόν· τὸ γὰρ αἰσθητὸν ἐνεργεῖν ποιεῖ τὴν αἴσθησιν, ὥσθ᾽ ὑπάρχειν ἀναγκαῖον αὐτὴν δυνάμει πρότερον. ἡ δ᾽ ὀσμὴ καπνώδης τίς ἐστιν ἀναθυμίασις, ἡ δ᾽ ἀναθυμίασις ἡ καπνώδης ἐκ πυρός. διὸ καὶ τῷ περὶ τὸν ἐγκέφαλον τόπῳ τὸ τῆς ὀσφρήσεως αἰσθητήριόν ἐστιν ἴδιον· δυνάμει γὰρ θερμὴ ἡ τοῦ ψυχροῦ ὕλη ἐστίν. καὶ ἡ τοῦ ὄμματος γένεσις τὸν αὐτὸν ἔχει τρόπον· ἀπὸ τοῦ ἐγκεφάλου γὰρ συνέστηκεν· οὗτος γὰρ ὑγρότατος καὶ ψυχρότατος τῶν ἐν τῷ σώματι μορίων ἐστίν). τὸ δ᾽ ἁπτικὸν γῆς, τὸ δὲ γευστικὸν [439a] εἶδός τι ἁφῆς ἐστίν. καὶ διὰ τοῦτο πρὸς τῇ καρδίᾳ τὸ αἰσθητήριον αὐτῶν, τῆς γεύσεως καὶ τῆς ἁφῆς· ἀντίκειται γὰρ τῷ ἐγκεφάλῳ αὕτη, καὶ ἔστι θερμότατον τῶν μορίων. καὶ περὶ μὲν τῶν αἰσθητικῶν τοῦ σώματος μορίων ἔστω τοῦτον τὸν τρόπον διωρισμένα.

Περὶ δὲ τῶν αἰσθητῶν τῶν καθ’ ἕκαστον αἰσθητήριον, οἷον λέγω χρώματος καὶ ψόφου καὶ ὀσμῆς καὶ χυμοῦ καὶ ἁφῆς, καθόλου μὲν εἴρηται ἐν τοῖς περὶ ψυχῆς, τί τὸ ἔργον αὐτῶν καὶ τί τὸ ἐνεργεῖν καθ’ ἕκαστον τῶν αἰσθητηρίων. τί δέ ποτε δεῖ λέγειν ὁτιοῦν αὐτῶν, οἷον τί χρῶμα ἢ τί ψόφον ἢ τί ὀσμὴν ἢ χυμόν, ὁμοίως δὲ καὶ περὶ ἁφῆς, ἐπισκεπτέον, καὶ πρῶτον περὶ χρώματος. ἔστι μὲν οὖν ἕκαστον διχῶς λεγόμενον, τὸ μὲν ἐνεργείᾳ τὸ δὲ δυνάμει. τὸ μὲν οὖν ἐνεργείᾳ χρῶμα καὶ ψόφος πῶς ἐστὶ τὸ αὐτὸ ἢ ἕτερον ταῖς κατ’ ἐνέργειαν αἰσθήσεσιν, οἷον ὁράσει καὶ ἀκούσει, εἴρηται ἐν τοῖς περὶ ψυχῆς· τί δὲ ἕκαστον αὐτῶν ὂν ποιήσει τὴν αἴσθησιν καὶ τὴν ἐνέργειαν, νῦν λέγωμεν. ὥσπερ οὖν εἴρηται περὶ φωτὸς ἐν ἐκείνοις, ὅτι ἐστὶ χρῶμα τοῦ διαφανοῦς κατὰ συμβεβηκός - ὅταν γὰρ ᾖ τι πυρῶδες ἐν διαφανεῖ, ἡ μὲν παρουσία φῶς, ἡ δὲ στέρησίς ἐστι σκότος· ὃ δὲ λέγομεν διαφανὲς οὐκ ἔστιν ἴδιον ἀέρος ἢ ὕδατος οὐδ’ ἄλλου τῶν οὕτω λεγομένων σωμάτων, ἀλλά τίς ἐστι κοινὴ φύσις καὶ δύναμις, ἣ χωριστὴ μὲν οὐκ ἔστιν, ἐν τούτοις δ’ ἔστι, καὶ τοῖς ἄλλοις σώμασιν ἐνυπάρχει, τοῖς μὲν μᾶλλον τοῖς δ’ ἧττον· ὥσπερ οὖν καὶ τῶν σωμάτων ἀνάγκη τι εἶναι ἔσχατον, καὶ ταύτης - ἡ μὲν οὖν τοῦ φωτὸς φύσις ἐν ἀορίστῳ τῷ διαφανεῖ ἐστίν· τοῦ δ’ ἐν τοῖς σώμασι διαφανοῦς τὸ ἔσχατον ὅτι μὲν εἴη ἄν τι, δῆλον, ὅτι δὲ τοῦτ’ ἐστὶ τὸ χρῶμα, ἐκ τῶν συμβαινόντων φανερόν. τὸ γὰρ χρῶμα ἢ ἐν τῷ πέρατί ἐστιν ἢ πέρας (διὸ καὶ οἱ Πυθαγόρειοι τὴν ἐπιφάνειαν χρόαν ἐκάλουν)· ἔστι μὲν γὰρ ἐν τῷ τοῦ σώματος πέρατι, ἀλλ’ οὐ τὸ τοῦ σώματος πέρας, ἀλλὰ τὴν αὐτὴν φύσιν δεῖ νομίζειν ἥπερ καὶ ἔξω [439b] χρωματίζεται, ταύτην καὶ ἐντός.

φαίνεται δὲ καὶ ἀὴρ καὶ ὕδωρ χρωματιζόμενα· καὶ γὰρ ἡ αὐγὴ τοιοῦτόν ἐστιν. ἀλλ’ ἐκεῖ μὲν διὰ τὸ ἐν ἀορίστῳ οὐ τὴν αὐτὴν ἐγγύθεν καὶ προσιοῦσι καὶ πόρρωθεν ἔχει χρόαν οὔθ’ ὁ ἀὴρ οὔθ’ ἡ θάλαττα· ἐν δὲ τοῖς σώμασιν, ἐὰν μὴ τὸ περιέχον ποιῇ μεταβάλλειν, ὥρισται καὶ ἡ φαντασία τῆς χρόας. δῆλον ἄρα ὅτι τὸ αὐτὸ κἀκεῖ κἀνθάδε δεκτικὸν τῆς χρόας ἐστίν. τὸ ἄρα διαφανὲς καθ’ ὅσον ὑπάρχει ἐν τοῖς σώμασιν (ὑπάρχει δὲ μᾶλλον καὶ ἧττον ἐν πᾶσι) χρώματος ποιεῖ μετέχειν. ἐπεὶ δ’ ἐν πέρατι ἡ χροά, τούτου ἂν ἐν πέρατι εἴη. ὥστε χρῶμα ἂν εἴη τὸ τοῦ διαφανοῦς ἐν σώματι ὡρισμένῳ πέρας. καὶ αὐτῶν δὲ τῶν διαφανῶν, οἷον ὕδατος καὶ εἴ τι ἄλλο τοιοῦτον, καὶ ὅσοις φαίνεται χρῶμα ἴδιον ὑπάρχειν, κατὰ τὸ ἔσχατον ὁμοίως πᾶσιν ὑπάρχει. ἔστι μὲν οὖν ἐνεῖναι ἐν τῷ διαφανεῖ τοῦθ’ ὅπερ καὶ ἐν τῷ ἀέρι ποιεῖ φῶς, ἔστι δὲ μή, ἀλλ’ ἐστερῆσθαι. ὥσπερ οὖν ἐκεῖ τὸ μὲν φῶς τὸ δὲ σκότος, οὕτως ἐν τοῖς σώμασιν ἐγγίγνεται τὸ λευκὸν καὶ τὸ μέλαν. περὶ δὲ τῶν ἄλλων χρωμάτων ἤδη, διελομένοις ποσαχῶς ἐνδέχεται γίγνεσθαι, λεκτέον. ἐνδέχεται μὲν γὰρ παρ' ἄλληλα τιθέμενα τὸ λευκὸν καὶ τὸ μέλαν, ὥσθ' ἑκάτερον μὲν εἶναι ἀόρατον διὰ σμικρότητα, τὸ δ' ἐξ ἀμφοῖν ὁρατόν, οὕτω γίγνεσθαι. τοῦτο γὰρ οὔτε λευκὸν οἷόν τε φαίνεσθαι οὔτε μέλαν· ἐπεὶ δ' ἀνάγκη μέν τι ἔχειν χρῶμα, τούτων δ' οὐδέτερον δυνατόν, ἀνάγκη μεικτόν τι εἶναι καὶ εἶδός τι χρόας ἕτερον. ἔστι μὲν οὖν οὕτως ὑπολαβεῖν πλείους εἶναι χρόας παρὰ τὸ λευκὸν καὶ τὸ μέλαν, πολλὰς δὲ τῷ λόγῳ (τρία γὰρ πρὸς δύο, καὶ τρία πρὸς τέτταρα, καὶ κατ' ἄλλους ἀριθμοὺς ἔστι παρ' ἄλληλα κεῖσθαι· τὰ δ' ὅλως κατὰ μὲν λόγον μηδένα, καθ' ὑπεροχὴν δέ τινα καὶ ἔλλειψιν ἀσύμμετρον), καὶ τὸν αὐτὸν δὴ τρόπον ἔχειν ταῦτα ταῖς συμφωνίαις· τὰ μὲν γὰρ ἐν ἀριθμοῖς εὐλογίστοις χρώματα, καθάπερ ἐκεῖ τὰς συμφωνίας, τὰ ἥδιστα τῶν χρωμάτων εἶναι δοκοῦντα, οἷον [440a] τὸ ἁλουργὸν καὶ τὸ φοινικοῦν καὶ ὀλίγ' ἄττα τοιαῦτα (δι' ἥνπερ αἰτίαν καὶ αἱ συμφωνίαι ὀλίγαι), τὰ δὲ μὴ ἐν ἀριθμοῖς τἆλλα χρώματα· ἢ καὶ πάσας τὰς χρόας ἐν ἀριθμοῖς εἶναι, τὰς μὲν τεταγμένας τὰς δὲ ἀτάκτους, καὶ αὐτὰς ταύτας, ὅταν μὴ καθαραὶ ὦσι, διὰ τὸ μὴ ἐν ἀριθμοῖς εἶναι τοιαύτας γίγνεσθαι.

εἷς μὲν οὖν τρόπος τῆς γενέσεως τῶν χρωμάτων οὗτος, εἷς δὲ τὸ φαίνεσθαι δι' ἀλλήλων, οἷον ἐνίοτε οἱ γραφεῖς ποιοῦσιν, ἑτέραν χρόαν ἐφ' ἑτέραν ἐναργεστέραν ἐπαλείφοντες, ὥσπερ ὅταν ἐν ὕδατί τι ἢ ἐν ἀέρι βούλωνται ποιῆσαι φαινόμενον, καὶ οἷον ὁ ἥλιος καθ' αὑτὸν μὲν λευκὸς φαίνεται, διὰ δ' ἀχλύος καὶ καπνοῦ φοινικοῦς. πολλαὶ δὲ καὶ οὕτως ἔσονται χρόαι τὸν αὐτὸν τρόπον τῷ πρότερον εἰρημένῳ· λόγος γὰρ ἂν εἴη τις τῶν ἐπιπολῆς πρὸς τὰ ἐν βάθει, τὰ δὲ καὶ ὅλως οὐκ ἐν λόγῳ. τὸ μὲν οὖν, ὥσπερ οἱ ἀρχαῖοι, λέγειν ἀπόρροιαν εἶναι τὴν χρόαν καὶ ὁρᾶσθαι διὰ τοιαύτην αἰτίαν ἄτοπον· πάντως γὰρ δι' ἁφῆς ἀναγκαῖον αὐτοῖς ποιεῖν τὴν αἴσθησιν, ὥστ' εὐθὺς κρεῖττον φάναι τῷ κινεῖσθαι τὸ μεταξὺ τῆς αἰσθήσεως ὑπὸ τοῦ αἰσθητοῦ γίγνεσθαι τὴν αἴσθησιν, ἁφῇ καὶ μὴ ταῖς ἀπορροίαις. ἐπὶ μὲν οὖν τῶν παρ' ἄλληλα κειμένων ἀνάγκη ὥσπερ καὶ μέγεθος λαμβάνειν ἀόρατον, οὕτω καὶ χρόνον ἀναίσθητον, ἵνα λανθάνωσιν αἱ κινήσεις ἀφικνούμεναι καὶ ἓν δοκῇ εἶναι διὰ τὸ ἅμα φαίνεσθαι· ἐνταῦθα δὲ οὐδεμία ἀνάγκη, ἀλλὰ τὸ ἐπιπολῆς χρῶμα ἀκίνητον ὂν καὶ κινούμενον ὑπὸ τοῦ ὑποκειμένου οὐχ ὁμοίαν ποιήσει τὴν κίνησιν. διὸ καὶ ἕτερον φαίνεται καὶ οὔτε λευκὸν οὔτε μέλαν. ὥστ' εἰ μὴ ἐνδέχεται μηδὲν εἶναι μέγεθος ἀόρατον, ἀλλὰ πᾶν ἔκ τινος ἀποστήματος ὁρατόν, καίτοι αὕτη τις ἂν εἴη χρωμάτων μίξις.

κἀκείνως δ’ οὐδὲν κωλύει φαίνεσθαί τινα χρόαν κοινὴν τοῖς πόρρωθεν· ὅτι γὰρ οὐκ ἔστιν οὐδὲν μέγεθος ἀόρατον, ἐν τοῖς ὕστερον ἐπισκεπτέον.

εἰ δ’ ἔστι μίξις τῶν σωμάτων [440b] μὴ μόνον τὸν τρόπον τοῦτον ὅνπερ οἴονταί τινες, παρ’ ἄλληλα τῶν ἐλαχίστων τιθεμένων, ἀδήλων δ’ ἡμῖν διὰ τὴν αἴσθησιν, ἀλλ’ ὅλως πάντη πάντως, ὥσπερ ἐν τοῖς περὶ μίξεως εἴρηται καθόλου περὶ πάντων (ἐκείνως μὲν γὰρ μείγνυται ταῦτα μόνον ὅσα ἐνδέχεται διελεῖν εἰς τὰ ἐλάχιστα, καθάπερ ἀνθρώπους ‹ἢ› ἵππους ἢ τὰ σπέρματα· τῶν μὲν γὰρ ἀνθρώπων ἄνθρωπος ἐλάχιστον, τῶν δ’ ἵππων ἵππος· ὥστε τῇ τούτων παρ’ ἄλληλα θέσει τὸ πλῆθος μέμεικται τῶν συναμφοτέρων· ἄνθρωπον δὲ ἕνα ἑνὶ ἵππῳ οὐ λέγομεν μεμεῖχθαι· ὅσα δὲ μὴ διαιρεῖται εἰς τὸ ἐλάχιστον, τούτων οὐκ ἐνδέχεται μίξιν γενέσθαι τὸν τρόπον τοῦτον ἀλλὰ τῷ πάντη μεμεῖχθαι, ἅπερ καὶ μάλιστα μείγνυσθαι πέφυκεν· πῶς δὲ τοῦτο γίγνεσθαι δυνατόν, ἐν τοῖς περὶ μίξεως εἴρηται πρότερον) - ἀλλ’ ὅτι ἀνάγκη μειγνυμένων καὶ τὰς χρόας μείγνυσθαι, δῆλον, καὶ ταύτην τὴν αἰτίαν εἶναι κυρίαν τοῦ πολλὰς εἶναι χρόας, ἀλλὰ μὴ τὴν ἐπιπόλασιν μηδὲ τὴν παρ’ ἄλληλα θέσιν· οὐ γὰρ πόρρωθεν μὲν ἐγγύθεν δ’ οὔ φαίνεται μία χρόα τῶν μεμειγμένων, ἀλλὰ πάντοθεν. πολλαὶ δ’ ἔσονται χρόαι διὰ τὸ κατὰ πολλοὺς λόγους ἐνδέχεσθαι μείγνυσθαι ἀλλήλοις τὰ μειγνύμενα, καὶ τὰ μὲν ἐν ἀριθμοῖς τὰ δὲ καθ’ ὑπεροχὴν μόνον. καὶ τἆλλα δὴ τὸν αὐτὸν τρόπον ὅνπερ ἐπὶ τῶν παρ’ ἄλληλα τιθεμένων χρωμάτων ἢ ἐπιπολῆς, ἐνδέχεται λέγειν καὶ περὶ τῶν μειγνυμένων. διὰ τίνα δ’ αἰτίαν εἴδη τῶν χρωμάτων ἐστὶν ὡρισμένα καὶ οὐκ ἄπειρα, καὶ χυμῶν καὶ ψόφων, ὕστερον ἐπισκεπτέον.

Τί μὲν οὖν ἐστὶ χρῶμα καὶ διὰ τίν’ αἰτίαν πολλαὶ χρόαι εἰσίν, εἴρηται· [περὶ δὲ ψόφου καὶ φωνῆς εἴρηται πρότερον ἐν τοῖς περὶ ψυχῆς·] περὶ δὲ ὀσμῆς καὶ χυμοῦ λεκτέον. σχεδὸν γάρ ἐστι τὸ αὐτὸ πάθος, οὐκ ἐν τοῖς αὐτοῖς δ’ ἐστὶν ἑκάτερον αὐτῶν. ἐναργέστερον δ’ ἡμῖν ἐστι τὸ τῶν χυμῶν γένος ἢ τὸ τῆς ὀσμῆς. τούτου δ’ αἴτιον ὅτι χειρίστην [441a] ἔχομεν τῶν ἄλλων ζῴων τὴν ὄσφρησιν καὶ τῶν ἐν ἡμῖν αὐτοῖς αἰσθήσεων, τὴν δ’ ἁφὴν ἀκριβεστάτην τῶν ἄλλων ζῴων· ἡ δὲ γεῦσις ἁφή τίς ἐστιν.

ἡ μὲν οὖν τοῦ ὕδατος φύσις βούλεται ἄχυμος εἶναι· ἀνάγκη δ’ ἢ ἐν αὑτῷ τὸ ὕδωρ ἔχειν τὰ γένη τῶν χυμῶν ἀναίσθητα διὰ μικρότητα, καθάπερ Ἐμπεδοκλῆς φησίν, ἢ ὕλην τοιαύτην εἶναι οἷον πανσπερμίαν χυμῶν, καὶ ἅπαντα μὲν ἐξ ὕδατος γίγνεσθαι, ἄλλο δ’ ἐξ ἄλλου μέρους, ἢ μηδεμίαν ἔχοντος διαφορὰν τοῦ ὕδατος τὸ ποιοῦν αἴτιον εἶναι, οἷον εἰ τὸ θερμὸν καὶ τὸν ἥλιον φαίη τις. τούτων δ’ ὡς μὲν Ἐμπεδοκλῆς λέγει λίαν εὐσύνοπτον τὸ ψεῦδος· ὁρῶμεν γὰρ μεταβάλλοντας ὑπὸ τοῦ θερμοῦ τοὺς χυμοὺς ἀφαιρουμένων τῶν περικαρπίων [εἰς τὸν ἥλιον] καὶ πυρουμένων, ὡς οὐ τῷ ἐκ τοῦ ὕδατος ἕλκειν τοιούτους γιγνομένους, ἀλλ' ἐν αὐτῷ τῷ περικαρπίῳ μεταβάλλοντας, καὶ ἐξικμαζομένους δὲ καὶ κειμένους διὰ τὸν χρόνον αὐστηροὺς ἐκ γλυκέων καὶ πικροὺς καὶ παντοδαποὺς γιγνομένους, καὶ ἑψομένους εἰς πάντα τὰ γένη τῶν χυμῶν ὡς εἰπεῖν μεταβάλλοντας. ὁμοίως δὲ καὶ τὸ πανσπερμίας εἶναι τὸ ὕδωρ ὕλην ἀδύνατον· ἐκ τοῦ αὐτοῦ γὰρ ὁρῶμεν ὡς [ἐκ τῆς αὐτῆς] τροφῆς γιγνομένους ἑτέρους χυμούς.

λείπεται δὴ τῷ πάσχειν τι τὸ ὕδωρ μεταβάλλειν. ὅτι μὲν τοίνυν οὐχ ὑπὸ τῆς τοῦ θερμοῦ μόνον δυνάμεως λαμβάνει ταύτην τὴν δύναμιν ἣν καλοῦμεν χυμόν, φανερόν. λεπτότατον γὰρ πάντων τῶν οὕτως ὑγρῶν τὸ ὕδωρ ἐστί, καὶ αὐτοῦ τοῦ ἐλαίου (ἀλλ' ἐπεκτείνεται ἐπὶ πλέον τοῦ ὕδατος τὸ ἔλαιον διὰ τὴν γλισχρότητα· τὸ δ' ὕδωρ ψαθυρόν ἐστι, διὸ καὶ χαλεπώτερον φυλάξαι ἐν τῇ χειρὶ τὸ ὕδωρ ἤπερ ἔλαιον), ἐπεὶ δὲ θερμαινόμενον οὐδὲν φαίνεται παχυνόμενον τὸ ὕδωρ αὐτὸ μόνον, δῆλον ὅτι ἑτέρα τις ἂν εἴη αἰτία· οἱ γὰρ χυμοὶ πάντες πάχος ἔχουσι μᾶλλον· τὸ δὲ θερμὸν συναίτιον. φαίνονται δ' οἱ χυμοὶ ὅσοιπερ καὶ ἐν τοῖς περικαρπίοις, [441b] οὗτοι ὑπάρχοντες καὶ ἐν τῇ γῇ. διὸ καὶ πολλοί φασι τῶν ἀρχαίων φυσιολόγων τοιοῦτον εἶναι τὸ ὕδωρ δι' οἵας ἂν γῆς πορεύηται. καὶ τοῦτο δῆλόν ἐστιν ἐπὶ τῶν ἁλμυρῶν ὑδάτων μάλιστα· οἱ γὰρ ἅλες γῆς τι εἶδός εἰσιν. καὶ τὰ διὰ τῆς τέφρας διηθούμενα πικρᾶς οὔσης πικρὸν ποιεῖ τὸν χυμόν, εἰσί τε κρῆναι πολλαὶ αἱ μὲν πικραί, αἱ δ' ὀξεῖαι, αἱ δὲ παντοδαποὺς ἔχουσαι χυμοὺς ἄλλους. εὐλόγως δ' ἐν τοῖς φυομένοις τὸ τῶν χυμῶν γίγνεται γένος μάλιστα. πάσχειν γὰρ πέφυκε τὸ ὑγρόν, ὥσπερ καὶ τἆλλα, ὑπὸ τοῦ ἐναντίου· ἐναντίον δὲ τὸ ξηρόν. διὸ καὶ ὑπὸ τοῦ πυρὸς πάσχει τι· ξηρὰ γὰρ ἡ τοῦ πυρὸς φύσις. ἀλλ' ἴδιον τοῦ πυρὸς τὸ θερμόν ἐστι, γῆς δὲ τὸ ξηρόν, ὥσπερ εἴρηται ἐν τοῖς περὶ στοιχείων. ᾗ μὲν οὖν πῦρ καὶ ᾗ γῆ, οὐδὲν πέφυκε ποιεῖν καὶ πάσχειν, οὐδ' ἄλλο οὐδέν· ᾗ δ' ὑπάρχει ἐναντιότης ἐν ἑκάστῳ, ταύτῃ πάντα καὶ ποιοῦσι καὶ πάσχουσιν.

ὥσπερ οὖν οἱ ἐναποπλύνοντες ἐν τῷ ὑγρῷ τὰ χρώματα καὶ τοὺς χυμοὺς τοιοῦτον ἔχειν ποιοῦσι τὸ ὕδωρ, οὕτως καὶ ἡ φύσις τὸ ξηρὸν καὶ γεῶδες, καὶ διὰ τοῦ ξηροῦ καὶ γεώδους διηθοῦσα καὶ κινοῦσα τῷ θερμῷ ποιόν τι τὸ ὑγρὸν παρασκευάζει. καὶ ἔστι τοῦτο χυμός, τὸ γιγνόμενον ὑπὸ τοῦ εἰρημένου ξηροῦ πάθος ἐν τῷ ὑγρῷ, τῆς γεύσεως τῆς κατὰ δύναμιν ἀλλοιωτικὸν ‹ὂν› εἰς ἐνέργειαν· ἄγει γὰρ τὸ αἰσθητικὸν εἰς τοῦτο δυνάμει προϋπάρχον· οὐ γὰρ κατὰ τὸ μανθάνειν ἀλλὰ κατὰ τὸ θεωρεῖν ἐστι τὸ αἰσθάνεσθαι. ὅτι δ' οὐ παντὸς ξηροῦ ἀλλὰ τοῦ τροφίμου οἱ χυμοὶ ἢ πάθος εἰσὶν ἢ στέρησις, δεῖ λαβεῖν ἐντεῦθεν, ὅτι οὔτε τὸ ξηρὸν ἄνευ τοῦ ὑγροῦ οὔτε τὸ ὑγρὸν ἄνευ τοῦ ξηροῦ· τροφὴ γὰρ οὐχ ἓν μόνον τοῖς ζῴοις, ἀλλὰ τὸ μεμειγμένον. καὶ ἔστι τῆς προσφερομένης τροφῆς τοῖς ζῴοις τὰ μὲν ἁπτὰ τῶν αἰσθητῶν αὔξησιν ποιοῦντα καὶ φθίσιν· τούτων μὲν γὰρ αἴτιον ᾗ θερμὸν καὶ ψυχρὸν τὸ προσφερόμενον (ταῦτα γὰρ ποιεῖ καὶ αὔξησιν [442a] καὶ φθίσιν), τρέφει δὲ ᾗ γευστὸν τὸ προσφερόμενον (πάντα γὰρ τρέφεται τῷ γλυκεῖ, ἢ ἁπλῶς ἢ μεμειγμένῳ). δεῖ μὲν οὖν διορίζειν περὶ τούτων ἐν τοῖς περὶ γενέσεως, νῦν δ' ὅσον ἀναγκαῖον ἅψασθαι αὐτῶν. τὸ γὰρ θερμὸν αὐξάνει, καὶ δημιουργεῖ τὴν τροφήν, καὶ τὸ κοῦφον ἕλκει, τὸ δ' ἁλμυρὸν καὶ πικρὸν καταλείπει διὰ τὸ βάρος. ὃ δὴ ἐν τοῖς ἔξω σώμασι ποιεῖ τὸ ἔξω θερμόν, τοῦτο τὸ ἐν τῇ φύσει τῶν ζῴων καὶ φυτῶν· διὸ τρέφεται τῷ γλυκεῖ. συμμείγνυνται δ' οἱ ἄλλοι χυμοὶ εἰς τὴν τροφὴν τὸν αὐτὸν τρόπον τῷ ἁλμυρῷ καὶ ὀξεῖ, ἀντὶ ἡδύσματος, ταῦτα δὲ διὰ τὸ ἀντισπᾶν τῷ λίαν τρόφιμον εἶναι τὸ γλυκὺ καὶ ἐπιπολαστικόν.

ὥσπερ δὲ τὰ χρώματα ἐκ λευκοῦ καὶ μέλανος μίξεώς ἐστιν, οὕτως οἱ χυμοὶ ἐκ γλυκέος καὶ πικροῦ, καὶ κατὰ λόγον δ' ἢ τῷ μᾶλλον καὶ ἧττον ἕκαστοί εἰσιν, εἴτε κατ' ἀριθμούς τινας τῆς μίξεως καὶ κινήσεως, εἴτε καὶ ἀορίστως, οἱ δὲ τὴν ἡδονὴν ποιοῦντες μειγνύμενοι, οὗτοι ἐν ἀριθμοῖς μόνον· ὁ μὲν οὖν λιπαρὸς τοῦ γλυκέος ἐστὶ χυμός, τὸ δ' ἁλμυρὸν καὶ πικρὸν σχεδὸν τὸ αὐτό, ὁ δὲ δριμὺς καὶ αὐστηρὸς καὶ στρυφνὸς καὶ ὀξὺς ἀνὰ μέσον. σχεδὸν γὰρ ἴσα καὶ τὰ τῶν χυμῶν εἴδη καὶ τὰ τῶν χρωμάτων ἐστίν· ἑπτὰ γὰρ ἀμφοτέρων εἴδη, ἄν τις τιθῇ, ὥσπερ εὔλογον, τὸ φαιὸν μέλαν τι εἶναι· λείπεται γὰρ τὸ ξανθὸν μὲν τοῦ λευκοῦ εἶναι ὥσπερ τὸ λιπαρὸν τοῦ γλυκέος, τὸ φοινικοῦν δὲ καὶ ἁλουργὸν καὶ πράσινον καὶ κυανοῦν μεταξὺ τοῦ λευκοῦ καὶ μέλανος, τὰ δ' ἄλλα μεικτὰ ἐκ τούτων. καὶ ὥσπερ τὸ μέλαν στέρησις ἐν τῷ διαφανεῖ τοῦ λευκοῦ, οὕτω τὸ ἁλμυρὸν καὶ τὸ πικρὸν τοῦ γλυκέος ἐν τῷ τροφίμῳ ὑγρῷ. διὸ καὶ ἡ τέφρα τῶν κατακαιομένων πικρὰ πάντων· ἐξίκμασται γὰρ τὸ πότιμον ἐξ αὐτῶν.

Δημόκριτος δὲ καὶ οἱ πλεῖστοι τῶν φυσιολόγων, ὅσοι λέγουσι περὶ αἰσθήσεως, ἀτοπώτατόν τι [442b] ποιοῦσιν· πάντα γὰρ τὰ αἰσθητὰ ἁπτὰ ποιοῦσιν. καίτοι εἰ τοῦτο οὕτως ἔχει, δῆλον ὡς καὶ τῶν ἄλλων αἰσθήσεων ἑκάστη ἁφή τίς ἐστιν· τοῦτο δ' ὅτι ἀδύνατον, οὐ χαλεπὸν συνιδεῖν. ἔτι δὲ τοῖς κοινοῖς τῶν αἰσθήσεων πασῶν χρῶνται ὡς ἰδίοις· μέγεθος γὰρ καὶ σχῆμα καὶ τὸ τραχὺ καὶ τὸ λεῖον, ἔτι δὲ τὸ ὀξὺ καὶ τὸ ἀμβλὺ τὸ ἐν τοῖς ὄγκοις, κοινὰ τῶν αἰσθήσεών ἐστιν, εἰ δὲ μὴ πασῶν, ἀλλ' ὄψεώς γε καὶ ἁφῆς. διὸ καὶ περὶ μὲν τούτων ἀπατῶνται, περὶ δὲ τῶν ἰδίων οὐκ ἀπατῶνται, οἷον ἡ ὄψις περὶ χρώματος καὶ ἡ ἀκοὴ περὶ ψόφων. οἱ δὲ τὰ ἴδια εἰς ταῦτα ἀνάγουσιν, ὥσπερ Δημόκριτος· τὸ γὰρ λευκὸν καὶ τὸ μέλαν τὸ μὲν τραχύ φησιν εἶναι τὸ δὲ λεῖον, εἰς δὲ τὰ σχήματα ἀνάγει τοὺς χυμούς. καίτοι ἢ οὐδεμιᾶς ἢ μᾶλλον τῆς ὄψεως τὰ κοινὰ γνωρίζειν. εἰ δ’ ἄρα τῆς γεύσεως μᾶλλον, τὰ γοῦν ἐλάχιστα τῆς ἀκριβεστάτης ἐστὶν αἰσθήσεως διακρίνειν περὶ ἕκαστον γένος, ὥστε ἐχρῆν τὴν γεῦσιν καὶ τῶν ἄλλων κοινῶν αἰσθάνεσθαι μάλιστα καὶ τῶν σχημάτων εἶναι κριτικωτάτην. ἔτι τὰ μὲν αἰσθητὰ πάντα ἔχει ἐναντίωσιν, οἷον ἐν χρώματι τῷ μέλανι τὸ λευκὸν καὶ ἐν χυμοῖς τῷ γλυκεῖ τὸ πικρόν· σχῆμα δὲ σχήματι οὐ δοκεῖ εἶναι ἐναντίον· τίνι γὰρ τῶν πολυγώνων τὸ περιφερὲς ἐναντίον; ἔτι ἀπείρων ὄντων τῶν σχημάτων ἀναγκαῖον καὶ τοὺς χυμοὺς εἶναι ἀπείρους· διὰ τί γὰρ ὁ μὲν τῶν χυμῶν αἴσθησιν ποιήσει, ὁ δ’ οὐκ ἂν ποιήσειεν; καὶ περὶ μὲν τοῦ γευστοῦ καὶ χυμοῦ εἴρηται· τὰ γὰρ ἄλλα πάθη τῶν χυμῶν οἰκείαν ἔχει τὴν σκέψιν ἐν τῇ φυσιολογίᾳ τῇ περὶ τῶν φυτῶν.

Τὸν αὐτὸν δὲ τρόπον δεῖ νοῆσαι καὶ περὶ τὰς ὀσμάς· ὅπερ γὰρ ποιεῖ ἐν τῷ ὑγρῷ τὸ ξηρόν, τοῦτο ποιεῖ ἐν ἄλλῳ γένει τὸ ἔγχυμον ὑγρόν, ἐν ἀέρι καὶ ὕδατι ὁμοίως. (κοινὸν δὲ κατὰ τούτων νῦν μὲν λέγομεν τὸ διαφανές, ἔστι δ’ ὀσφραντὸν [443a] οὐχ ᾗ διαφανές, ἀλλ’ ᾗ πλυτικὸν καὶ ῥυπτικὸν ἐγχύμου ξηρότητος.) οὐ γὰρ μόνον ἐν ἀέρι ἀλλὰ καὶ ἐν ὕδατι τὸ τῆς ὀσφρήσεώς ἐστιν. δῆλον δ’ ἐπὶ τῶν ἰχθύων καὶ τῶν ὀστρακοδέρμων· φαίνονται γὰρ ὀσφραινόμενα οὔτε ἀέρος ὄντος ἐν τῷ ὕδατι (ἐπιπολάζει γὰρ ὁ ἀήρ, ὅταν ἐγγένηται) οὔτ’ αὐτὰ ἀναπνέοντα. εἰ οὖν τις θείη καὶ τὸν ἀέρα καὶ τὸ ὕδωρ ἄμφω ὑγρά, εἴη ἂν ἡ ἐν ὑγρῷ τοῦ ἐγχύμου ξηροῦ φύσις ὀσμή, καὶ ὀσφραντὸν τὸ τοιοῦτον. ὅτι δ’ ἀπ’ ἐγχύμου ἐστὶ τὸ πάθος, δῆλον ἐκ τῶν ἐχόντων καὶ μὴ ἐχόντων ὀσμήν· τά τε γὰρ στοιχεῖα ἄοσμα, οἷον πῦρ ἀὴρ γῆ ὕδωρ, διὰ τὸ τά τε ξηρὰ αὐτῶν καὶ τὰ ὑγρὰ ἄχυμα εἶναι, ἂν μή τι μειγνύμενον ποιῇ. διὸ καὶ ἡ θάλαττα ἔχει ὀσμήν (ἔχει γὰρ χυμὸν καὶ ξηρότητα), καὶ ἅλες μᾶλλον νίτρου ὀσμώδεις (δηλοῖ δὲ τὸ ἐξικμαζόμενον ἐξ αὐτῶν ἔλαιον), τὸ δὲ νίτρον γῆς ἐστι μᾶλλον. ἔτι λίθος μὲν ἄοσμον, ἄχυμον γάρ, τὰ δὲ ξύλα ὀσμώδη, ἔγχυμα γάρ· καὶ τούτων τὰ ὑδατώδη ἧττον. ἔτι ἐπὶ τῶν μεταλλευομένων χρυσὸς ἄοσμον, ἄχυμον γάρ, ὁ δὲ χαλκὸς καὶ ὁ σίδηρος ὀσμώδη· ὅταν δ’ ἐκκαυθῇ τὸ ὑγρόν, ἀοσμότεραι αἱ σκωρίαι γίγνονται πάντων· ἄργυρος δὲ καὶ καττίτερος τῶν μὲν μᾶλλον ὀσμώδη τῶν δ’ ἧττον· ὑδατώδη γάρ.

δοκεῖ δ’ ἐνίοις ἡ καπνώδης ἀναθυμίασις εἶναι ὀσμή, οὖσα κοινὴ γῆς τε καὶ ἀέρος [καὶ πάντες ἐπιφέρονται ἐπὶ τοῦτο περὶ ὀσμῆς]· διὸ καὶ Ἡράκλειτος οὕτως εἴρηκεν, ὡς εἰ πάντα τὰ ὄντα καπνὸς γένοιτο, ῥῖνες ἂν διαγνοῖεν, ‹καὶ πάντες ἐπιφέρονται ἐπὶ τοῦτο περὶ ὀσμῆς›, οἱ μὲν ὡς ἀτμίδα, οἱ δ’ ὡς ἀναθυμίασιν, οἱ δ’ ὡς ἄμφω ταῦτα· ἔστι δ’ ἡ μὲν ἀτμὶς ὑγρότης τις, ἡ δὲ καπνώδης ἀναθυμίασις, ὥσπερ εἴρηται, κοινὸν ἀέρος καὶ γῆς· καὶ συνίσταται ἐκ μὲν ἐκείνης ὕδωρ, ἐκ δὲ ταύτης γῆς τι εἶδος. ἀλλ’ οὐδέτερον τούτων ἔοικεν· ἡ μὲν γὰρ ἀτμίς ἐστιν ὕδατος, ἡ δὲ καπνώδης ἀναθυμίασις ἀδύνατος ἐν ὕδατι γενέσθαι· ὀσμᾶται δὲ καὶ τὰ ἐν τῷ ὕδατι, [443b] ὥσπερ εἴρηται πρότερον. ἔτι ἡ ἀναθυμίασις ὁμοίως λέγεται ταῖς ἀπορροίαις· εἰ οὖν μηδ’ ἐκεῖναι καλῶς, οὐδ’ αὕτη καλῶς. ὅτι μὲν οὖν ἐνδέχεται ἀπολαύειν τὸ ὑγρόν, καὶ τὸ ἐν τῷ πνεύματι καὶ τὸ ἐν τῷ ὕδατι, καὶ πάσχειν τι ὑπὸ τῆς ἐγχύμου ξηρότητος, οὐκ ἄδηλον· καὶ γὰρ ὁ ἀὴρ ὑγρὸν τὴν φύσιν ἐστίν. ἔτι δ’ εἴπερ ὁμοίως ἐν τοῖς ὑγροῖς ποιεῖ καὶ ἐν τῷ ἀέρι οἷον ἀποπλυνόμενον τὸ ξηρόν, φανερὸν ὅτι δεῖ ἀνάλογον εἶναι τὰς ὀσμὰς τοῖς χυμοῖς. ἀλλὰ μὴν τοῦτό γε ἐπ’ ἐνίων συμβέβηκεν· καὶ γὰρ δριμεῖαι καὶ γλυκεῖαί εἰσιν ὀσμαὶ καὶ αὐστηραὶ καὶ στρυφναὶ καὶ λιπαραί, καὶ τοῖς πικροῖς τὰς σαπρὰς ἄν τις ἀνάλογον εἴποι· διὸ ὥσπερ ἐκεῖνα δυσκατάποτα, τὰ σαπρὰ δυσανάπνευστά ἐστιν. δῆλον ἄρα ὅτι ὅπερ ἐν τῷ ὕδατι ὁ χυμός, τοῦτ’ ἐν τῷ ἀέρι καὶ ὕδατι ἡ ὀσμή. καὶ διὰ τοῦτο τὸ ψυχρὸν καὶ ἡ πῆξις καὶ τοὺς χυμοὺς ἀμβλύνει καὶ τὰς ὀσμὰς ἀφανίζει· τὸ γὰρ θερμὸν τὸ κινοῦν καὶ δημιουργοῦν ἀφανίζουσιν ἡ ψύξις καὶ ἡ πῆξις.

εἴδη δὲ τοῦ ὀσφραντοῦ δύο ἐστίν· οὐ γάρ, ὥσπερ τινές φασιν, οὐκ ἔστιν εἴδη τοῦ ὀσφραντοῦ, ἀλλ’ ἔστιν. διοριστέον δὲ πῶς ἔστι καὶ πῶς οὐκ ἔστιν· τὸ μὲν γάρ ἐστι κατὰ τοὺς χυμοὺς τεταγμένον αὐτῶν, ὥσπερ εἴπομεν, καὶ τὸ ἡδὺ καὶ τὸ λυπηρὸν κατὰ συμβεβηκὸς ἔχουσιν (διὰ γὰρ τὸ τοῦ θρεπτικοῦ πάθη εἶναι, ἐπιθυμούντων μὲν ἡδεῖαι αἱ ὀσμαὶ τούτων εἰσί, πεπληρωμένοις δὲ καὶ μηδὲν δεομένοις οὐχ ἡδεῖαι, οὐδ’ ὅσοις μὴ καὶ ἡ τροφὴ ἡ ἔχουσα τὰς ὀσμὰς ἡδεῖα, οὐδὲ τούτοις) - ὥστε αὗται μέν, καθάπερ εἴπομεν, κατὰ συμβεβηκὸς ἔχουσι τὸ ἡδὺ καὶ λυπηρόν, διὸ καὶ πάντων εἰσὶ κοιναὶ τῶν ζῴων· αἱ δὲ καθ’ αὑτὰς ἡδεῖαι τῶν ὀσμῶν εἰσιν, οἷον αἱ τῶν ἀνθῶν· οὐδὲν γὰρ μᾶλλον οὐδ’ ἧττον πρὸς τὴν τροφὴν παρακαλοῦσιν, οὐδὲ συμβάλλονται πρὸς ἐπιθυμίαν οὐδέν, ἀλλὰ τοὐναντίον μᾶλλον· ἀληθὲς γὰρ ὅπερ Εὐριπίδην σκώπτων εἶπε Στράττις, “ὅταν φακῆν ἕψητε, μὴ ‘πιχεῖν μύρον.” οἱ δὲ νῦν μειγνύντες [444a] εἰς τὰ πόματα τὰς τοιαύτας δυνάμεις βιάζονται τῇ συνηθείᾳ τὴν ἡδονήν, ἕως ἂν ἐκ δύ’ αἰσθήσεων γένηται τὸ ἡδὺ ὡς ἂν καὶ ἀπὸ μιᾶς.

τοῦτο μὲν οὖν τὸ ὀσφραντὸν ἴδιον ἀνθρώπου ἐστίν, ἡ δὲ κατὰ τοὺς χυμοὺς τεταγμένη καὶ τῶν ἄλλων ζῴων, ὥσπερ εἴρηται πρότερον· κἀκείνων μέν, διὰ τὸ κατὰ συμβεβηκὸς ἔχειν τὸ ἡδύ, διῄρηται τὰ εἴδη κατὰ τοὺς χυμούς, ταύτης δ’ οὐκέτι, διὰ τὸ τὴν φύσιν αὐτῆς εἶναι καθ’ αὑτὴν ἡδεῖαν ἢ λυπηράν. αἴτιον δὲ τοῦ ἴδιον εἶναι ἀνθρώπου τὴν τοιαύτην ὀσμὴν διὰ τὴν ἕξιν τὴν περὶ τὸν ἐγκέφαλον. ψυχροῦ γὰρ ὄντος τὴν φύσιν τοῦ ἐγκεφάλου, καὶ τοῦ αἵματος τοῦ περὶ αὐτὸν ἐν τοῖς φλεβίοις ὄντος λεπτοῦ μὲν καὶ καθαροῦ, εὐψύκτου δέ (διὸ καὶ ἡ τῆς τροφῆς ἀναθυμίασις ψυχομένη διὰ τὸν τόπον τὰ νοσηματικὰ ῥεύματα ποιεῖ), τοῖς ἀνθρώποις πρὸς βοήθειαν ὑγιείας γέγονε τὸ τοιοῦτον εἶδος τῆς ὀσμῆς· οὐδὲν γὰρ ἄλλο ἔργον ἐστὶν αὐτῆς ἢ τοῦτο. τοῦτο δὲ ποιεῖ φανερῶς· ἡ μὲν γὰρ τροφὴ ἡδεῖα οὖσα, καὶ ἡ ξηρὰ καὶ ἡ ὑγρά, πολλάκις νοσώδης ἐστίν, ἡ δ’ ἀπὸ τῆς ὀσμῆς τῆς καθ’ αὑτὴν ἡδείας εὐωδία ὁπωσοῦν ἔχουσιν ὠφέλιμος ὡς εἰπεῖν αἰεί. καὶ διὰ τοῦτο γίγνεται διὰ τῆς ἀναπνοῆς, οὐ πᾶσιν ἀλλὰ τοῖς ἀνθρώποις καὶ τῶν ἐναίμων οἷον τοῖς τετράποσι καὶ ὅσα μετέχει μᾶλλον τῆς τοῦ ἀέρος φύσεως· ἀναφερομένων γὰρ τῶν ὀσμῶν πρὸς τὸν ἐγκέφαλον διὰ τὴν ἐν αὐταῖς τῆς θερμότητος κουφότητα ὑγιεινοτέρως ἔχει τὰ περὶ τὸν τόπον τοῦτον· ἡ γὰρ τῆς ὀσμῆς δύναμις θερμὴ τὴν φύσιν ἐστίν. κατακέχρηται δ’ ἡ φύσις τῇ ἀναπνοῇ ἐπὶ δύο, ὡς ἔργῳ μὲν ἐπὶ τὴν εἰς τὸν θώρακα βοήθειαν, ὡς παρέργῳ δ’ ἐπὶ τὴν ὀσμήν· ἀναπνέοντος γὰρ ὥσπερ ἐκ παρόδου ποιεῖται διὰ τῶν μυκτήρων τὴν κίνησιν.

ἴδιον δὲ τῆς τοῦ ἀνθρώπου φύσεώς ἐστι τὸ τῆς ὀσμῆς τῆς τοιαύτης γένος διὰ τὸ πλεῖστον ἐγκέφαλον καὶ ὑγρότατον ἔχειν τῶν ἄλλων ζῴων ὡς κατὰ μέγεθος· διὰ γὰρ τοῦτο καὶ μόνον ὡς εἰπεῖν αἰσθάνεται τῶν ζῴων ἄνθρωπος καὶ χαίρει ταῖς τῶν ἀνθῶν καὶ τῶν τοιούτων ὀσμαῖς· σύμμετρος γὰρ αὐτῶν [444b] ἡ θερμότης καὶ ἡ κίνησις πρὸς τὴν ὑπερβολὴν τῆς ἐν τῷ τόπῳ ὑγρότητος καὶ ψυχρότητός ἐστιν. τοῖς δ’ ἄλλοις ὅσα πνεύμονα ἔχει διὰ τοῦ ἀναπνεῖν τοῦ ἑτέρου γένους τῆς ὀσμῆς τὴν αἴσθησιν ἀποδέδωκεν ἡ φύσις, ὅπως μὴ δύο αἰσθητήρια ποιῇ· ἀπόχρη γάρ, ἐπείπερ καὶ ὣς ἀναπνέουσιν, ὥσπερ τοῖς ἀνθρώποις ἀμφοτέρων τῶν ὀσφραντῶν, τούτοις τῶν ἑτέρων μόνων ὑπάρχουσα ἡ αἴσθησις. τὰ δὲ μὴ ἀναπνέοντα ὅτι μὲν ἔχει αἴσθησιν τοῦ ὀσφραντοῦ, φανερόν· καὶ γὰρ ἰχθύες καὶ τὸ τῶν ἐντόμων γένος πᾶν ἀκριβῶς καὶ πόρρωθεν αἰσθάνεται, διὰ τὸ θρεπτικὸν εἶδος τῆς ὀσμῆς, ἀπέχοντα πολὺ τῆς οἰκείας τροφῆς, οἷον αἵ τε μέλιτται [ποιοῦσι πρὸς τὸ μέλι] καὶ τὸ τῶν μικρῶν μυρμήκων γένος, οὓς καλοῦσί τινες κνῖπας, καὶ τῶν θαλαττίων αἱ πορφύραι, καὶ πολλὰ τῶν ἄλλων τῶν τοιούτων ζῴων ὀξέως αἰσθάνεται τῆς τροφῆς διὰ τὴν ὀσμήν. ὅτῳ δὲ αἰσθάνεται, οὐχ ὁμοίως φανερόν. διὸ κἂν ἀπορήσειέ τις τίνι αἰσθάνονται τῆς ὀσμῆς, εἴπερ ἀναπνέουσι μὲν γίγνεται τὸ ὀσμᾶσθαι μοναχῶς (τοῦτο γὰρ φαίνεται ἐπὶ τῶν ἀναπνεόντων συμβαῖνον πάντων), ἐκείνων δ’ οὐθὲν ἀναπνεῖ, αἰσθάνεται μέντοι, εἰ μή τις παρὰ τὰς πέντε αἰσθήσεις ἑτέρα. τοῦτο δ’ ἀδύνατον· τοῦ γὰρ ὀσφραντοῦ ὄσφρησις, ἐκεῖνα δὲ τούτου αἰσθάνεται, ἀλλ’ οὐ τὸν αὐτὸν ἴσως τρόπον, ἀλλὰ τοῖς μὲν ἀναπνέουσι τὸ πνεῦμα ἀφαιρεῖ τὸ ἐπικείμενον ὥσπερ πῶμά τι (διὸ οὐκ αἰσθάνεται μὴ ἀναπνέοντα), τοῖς δὲ μὴ ἀναπνέουσιν ἀφῄρηται τοῦτο, καθάπερ ἐπὶ τῶν ὀφθαλμῶν τὰ μὲν ἔχει βλέφαρα τῶν ζῴων, ὧν μὴ ἀνακαλυφθέντων οὐ δύναται ὁρᾶν, τὰ δὲ σκληρόφθαλμα οὐκ ἔχει, διόπερ οὐ προσδεῖται οὐδενὸς τοῦ ἀνακαλύψοντος, ἀλλ’ ὁρᾷ ἐκ τοῦ δυνατοῦ ὄντος αὐτοῖς εὐθύς.

ὁμοίως δὲ καὶ τῶν ἄλλων ζῴων ὁτιοῦν οὐδὲν δυσχεραίνει τῶν καθ’ αὑτὰ δυσωδῶν τὴν ὀσμήν, ἂν μή τι τύχῃ φθαρτικὸν ὄν, ὑπὸ τούτων δ’ ὁμοίως φθαρεῖται καθάπερ καὶ οἱ ἄνθρωποι ὑπὸ τῆς τῶν ἀνθράκων ἀτμίδος καρηβαροῦσι καὶ φθείρονται πολλάκις· οὕτως ὑπὸ τῆς τοῦ θείου δυνάμεως καὶ τῶν ἀσφαλτωδῶν φθείρεται [445a] τἆλλα ζῷα, καὶ φεύγει διὰ τὸ πάθος. αὐτῆς δὲ καθ’ αὑτὴν τῆς δυσωδίας οὐδὲν φροντίζουσιν (καίτοι πολλὰ τῶν φυομένων δυσώδεις ἔχει τὰς ὀσμάς), ἐὰν μή τι συμβάλληται πρὸς τὴν γεῦσιν ἢ τὴν ἐδωδὴν αὐτοῖς. ἔοικε δ’ ἡ αἴσθησις ἡ τοῦ ὀσφραίνεσθαι, περιττῶν οὐσῶν τῶν αἰσθήσεων καὶ τοῦ ἀριθμοῦ ἔχοντος μέσον τοῦ περιττοῦ, καὶ αὐτὴ μέση εἶναι τῶν τε ἁπτικῶν, οἷον ἁφῆς καὶ γεύσεως, καὶ τῶν δι’ ἄλλου αἰσθητικῶν, οἷον ὄψεως καὶ ἀκοῆς. διὸ καὶ τὸ ὀσφραντὸν τῶν θρεπτικῶν ἐστὶ πάθος τι (ταῦτα δ’ ἐν τῷ ἁπτῷ γένει), καὶ τοῦ ἀκουστοῦ δὲ καὶ τοῦ ὁρατοῦ, διὸ καὶ ἐν ἀέρι καὶ ἐν ὕδατι ὀσμῶνται. ὥστ’ ἐστὶ τὸ ὀσφραντὸν κοινόν τι τούτων ἀμφοτέρων, καὶ τῷ τε ἁπτῷ ὑπάρχει καὶ τῷ ἀκουστῷ καὶ τῷ διαφανεῖ· διὸ καὶ εὐλόγως παρείκασται ξηρότητος ἐν ὑγρῷ καὶ χυτῷ οἷον βαφή τις εἶναι καὶ πλύσις. πῶς μὲν οὖν εἴδη δεῖ λέγειν καὶ πῶς οὐ δεῖ τοῦ ὀσφραντοῦ, ἐπὶ τοσοῦτον εἰρήσθω.

ὃ δὲ λέγουσί τινες τῶν Πυθαγορείων, οὐκ ἔστιν εὔλογον· τρέφεσθαι γάρ φασιν ἔνια ζῷα ταῖς ὀσμαῖς. πρῶτον μὲν γὰρ ὁρῶμεν ὅτι τὴν τροφὴν δεῖ εἶναι συνθετήν (καὶ γὰρ τὰ τρεφόμενα οὐχ ἁπλᾶ ἐστιν, διὸ καὶ περιττώματα γίγνεται τῆς τροφῆς, ἢ ἐν αὑτοῖς ἢ ἔξω, ὥσπερ τοῖς φυτοῖς, ἐπεὶ δ’ οὐδὲ τὸ ὕδωρ ἐθέλει αὐτὸ μόνον ἄμεικτον ὂν τρέφειν - σωματῶδες γάρ τι δεῖ εἶναι τὸ συστησόμενον - ἔτι πολὺ ἧττον εὔλογον τὸν ἀέρα σωματοῦσθαι)· πρὸς δὲ τούτοις, ὅτι πᾶσιν ἔστι τοῖς ζῴοις τόπος δεκτικὸς τῆς τροφῆς, ἐξ οὗ ἕλκον λαμβάνει τὸ σῶμα· τοῦ δ’ ὀσφραντοῦ ἐν τῇ κεφαλῇ τὸ αἰσθητήριον, καὶ μετὰ πνευματώδους εἰσέρχεται ἀναθυμιάσεως, ὥστ’ εἰς τὸν ἀναπνευστικὸν βαδίζοι ἂν τόπον. ὅτι μὲν οὖν οὐ συμβάλλεται εἰς τροφὴν τὸ ὀσφραντόν, ᾗ ὀσφραντόν, δῆλον· ὅτι μέντοι εἰς ὑγίειαν, καὶ ἐκ τῆς αἰσθήσεως καὶ ἐκ τῶν εἰρημένων φανερόν, ὥστε ὅπερ ὁ χυμὸς ἐν τῷ θρεπτικῷ καὶ πρὸς τὰ τρεφόμενα, τοῦτ’ ἐστὶ πρὸς ὑγίειαν τὸ [445b] ὀσφραντόν. καθ’ ἕκαστον μὲν οὖν αἰσθητήριον διωρίσθω τὸν τρόπον τοῦτον.

Ἀπορήσειε δ’ ἄν τις, εἰ πᾶν σῶμα εἰς ἄπειρον διαιρεῖται, ἆρα καὶ τὰ παθήματα τὰ αἰσθητά, οἷον χρῶμα καὶ χυμὸς καὶ ὀσμὴ καὶ ψόφος, καὶ βαρὺ καὶ κοῦφον, καὶ θερμὸν καὶ ψυχρόν, καὶ σκληρὸν καὶ μαλακόν, ἢ ἀδύνατον. ποιητικὸν γάρ ἐστιν ἕκαστον αὐτῶν τῆς αἰσθήσεως (τῷ δύνασθαι γὰρ κινεῖν αὐτὴν λέγεται πάντα), ὥστ’ ἀνάγκη, εἰ ἡ δύναμις, καὶ τὴν αἴσθησιν εἰς ἄπειρα διαιρεῖσθαι καὶ πᾶν εἶναι μέγεθος αἰσθητόν (ἀδύνατον γὰρ λευκὸν μὲν ὁρᾶν, μὴ ποσὸν δέ)· εἰ γὰρ μὴ οὕτως, ἐνδέχοιτ’ ἂν εἶναί τι σῶμα μηδὲν ἔχον χρῶμα μηδὲ βάρος μηδ’ ἄλλο τι τοιοῦτον πάθος, ὥστ’ οὐδ’ αἰσθητὸν ὅλως· ταῦτα γὰρ τὰ αἰσθητά. τὸ ἄρ’ αἰσθητὸν ἔσται συγκείμενον οὐκ ἐξ αἰσθητῶν. ἀλλ’ ἀναγκαῖον· οὐ γὰρ δὴ ἔκ γε τῶν μαθηματικῶν. ἔτι τίνι κρινοῦμεν ταῦτα καὶ γνωσόμεθα; ἢ τῷ νῷ; ἀλλ’ οὐ νοητά, οὐδὲ νοεῖ ὁ νοῦς τὰ ἐκτὸς μὴ μετ’ αἰσθήσεως. ἅμα δ’ εἰ ταῦτ’ ἔχει οὕτως, ἔοικε μαρτυρεῖν τοῖς τὰ ἄτομα ποιοῦσι μεγέθη· οὕτω γὰρ ἂν λύοιτο ὁ λόγος. ἀλλ’ ἀδύνατα· εἴρηται δὲ περὶ αὐτῶν ἐν τοῖς λόγοις τοῖς περὶ κινήσεως.

περὶ δὲ τῆς λύσεως αὐτῶν ἅμα δῆλον ἔσται καὶ διὰ τί πεπέρανται τὰ εἴδη καὶ χρώματος καὶ χυμοῦ καὶ φθόγγων καὶ τῶν ἄλλων αἰσθητῶν. ὧν μὲν γάρ ἐστιν ἔσχατα, ἀνάγκη πεπεράνθαι τὰ ἐντός· τὰ δ’ ἐναντία ἔσχατα, πᾶν δὲ τὸ αἰσθητὸν ἔχει ἐναντίωσιν, οἷον ἐν χρώματι τὸ λευκὸν καὶ τὸ μέλαν, ἐν χυμῷ γλυκὺ καὶ πικρόν· καὶ ἐν τοῖς ἄλλοις δὴ πᾶσίν ἐστιν ἔσχατα τὰ ἐναντία. τὸ μὲν οὖν συνεχὲς εἰς ἄπειρα τέμνεται ἄνισα, εἰς δ’ ἴσα πεπερασμένα· τὸ δὲ μὴ καθ’ αὑτὸ συνεχὲς εἰς πεπερασμένα εἴδη. ἐπεὶ οὖν τὰ μὲν πάθη ὡς εἴδη λεκτέον, ὑπάρχει δὲ συνέχεια ἀεὶ ἐν τούτοις, ληπτέον ὅτι τὸ δυνάμει καὶ τὸ ἐνεργείᾳ ἕτερον· καὶ διὰ τοῦτο τὸ μυριοστημόριον λανθάνει [446a] τῆς κέγχρου ὁρωμένης, καίτοι ἡ ὄψις ἐπελήλυθεν, καὶ ὁ ἐν τῇ διέσει φθόγγος λανθάνει, καίτοι συνεχοῦς ὄντος ἀκούει τοῦ μέλους παντός· τὸ δὲ διάστημα τὸ τοῦ μεταξὺ πρὸς τοὺς ἐσχάτους λανθάνει. ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις αἰσθητοῖς τὰ μικρὰ πάμπαν· δυνάμει γὰρ ὁρατά, ἐνεργείᾳ δ’ οὔ, ὅταν μὴ χωρὶς ᾖ· καὶ γὰρ ἐνυπάρχει δυνάμει ἡ ποδιαία τῇ δίποδι, ἐνεργείᾳ δ’ ἤδη ἀφαιρεθεῖσα. χωριζόμεναι δ’ αἱ τηλικαῦται ὑπεροχαὶ εὐλόγως μὲν ἂν καὶ διαλύοιντο εἰς τὰ περιέχοντα, ὥσπερ καὶ ἀκαριαῖος χυμὸς εἰς τὴν θάλατταν ἐγχυθείς. οὐ μὴν ἀλλ’ ἐπειδὴ οὐδ’ ἡ τῆς αἰσθήσεως ὑπεροχὴ καθ’ αὑτὴν αἰσθητὴ οὐδὲ χωριστή (δυνάμει γὰρ ἐνυπάρχει ἐν τῇ ἀκριβεστέρᾳ ἡ ὑπεροχή), οὐδὲ τὸ τηλικοῦτον αἰσθητὸν χωριστὸν ἔσται ἐνεργείᾳ αἰσθάνεσθαι. ἀλλ’ ὅμως ἔσται αἰσθητόν· δυνάμει τε γάρ ἐστιν ἤδη, καὶ ἐνεργείᾳ ἔσται προσγενόμενον. ὅτι μὲν οὖν ἔνια μεγέθη καὶ πάθη λανθάνει, καὶ διὰ τίν’ αἰτίαν, καὶ πῶς αἰσθητὰ καὶ πῶς οὔ, εἴρηται. ὅταν δὲ δὴ ἐνυπάρχῃ τούτῳ τοσαῦτα ὥστε καὶ ἐνεργείᾳ αἰσθητὰ εἶναι, καὶ μὴ μόνον ὅτι ἐν τῷ ὅλῳ ἀλλὰ καὶ χωρίς, πεπερασμένα ἀνάγκη εἶναι τὸν ἀριθμόν, καὶ χρώματα καὶ χυμοὺς καὶ φθόγγους.

ἀπορήσειε δ’ ἄν τις, ἆρ’ ἀφικνοῦνται ἢ τὰ αἰσθητὰ ἢ αἱ κινήσεις αἱ ἀπὸ τῶν αἰσθητῶν (ὁποτέρως ποτὲ γίγνεται ἡ αἴσθησις), ὅταν ἐνεργῶσιν, εἰς τὸ μέσον πρῶτον, οἷον ἥ τε ὀσμὴ φαίνεται ποιοῦσα καὶ ὁ ψόφος· πρότερον γὰρ ὁ ἐγγὺς αἰσθάνεται τῆς ὀσμῆς, καὶ ὁ ψόφος ὕστερον ἀφικνεῖται τῆς πληγῆς. ἆρ’ οὖν οὕτω καὶ τὸ ὁρώμενον καὶ τὸ φῶς, καθάπερ καὶ Ἐμπεδοκλῆς φησιν ἀφικνεῖσθαι πρότερον τὸ ἀπὸ τοῦ ἡλίου φῶς εἰς τὸ μεταξὺ πρὶν πρὸς τὴν ὄψιν ἢ ἐπὶ τὴν γῆν; δόξειε δ’ ἂν εὐλόγως τοῦτο συμβαίνειν· τὸ γὰρ κινούμενον κινεῖταί ποθέν ποι, ὥστ’ ἀνάγκη εἶναί τινα καὶ χρόνον ἐν ᾧ κινεῖται ἐκ θατέρου πρὸς θάτερον· ὁ δὲ [446b] χρόνος πᾶς διαιρετός, ὥστε ἦν ὅτε οὔ πω ἑωρᾶτο ἀλλ’ ἔτ’ ἐφέρετο ἡ ἀκτὶς ἐν τῷ μεταξύ. καὶ εἰ ‹καὶ› ἅπαν ἅμα ἀκούει καὶ ἀκήκοε, καὶ ὅλως αἰσθάνεται καὶ ᾔσθηται, καὶ μή ἐστι γένεσις αὐτῶν, ἀλλ’ εἰσὶν ἄνευ τοῦ γίγνεσθαι, ὅμως οὐδὲν ἧττον, ὥσπερ ὁ ψόφος ἤδη γεγενημένης τῆς πληγῆς οὔ πω πρὸς τῇ ἀκοῇ - δηλοῖ δὲ τοῦτο καὶ ἡ τῶν γραμμάτων μετασχημάτισις, ὡς γιγνομένης τῆς φορᾶς ἐν τῷ μεταξύ· οὐ γὰρ τὸ λεχθὲν φαίνονται ἀκηκοότες διὰ τὸ μετασχηματίζεσθαι φερόμενον τὸν ἀέρα - ἆρ’ οὖν οὕτω καὶ τὸ χρῶμα καὶ τὸ φῶς; οὐ γὰρ δὴ τῷ πως ἔχειν τὸ μὲν ὁρᾷ τὸ δ’ ὁρᾶται, ὥσπερ ἴσα ἐστίν· οὐθὲν γὰρ ἂν ἔδει που ἑκάτερον εἶναι· τοῖς γὰρ ἴσοις γιγνομένοις οὐδὲν διαφέρει ἢ ἐγγὺς ἢ πόρρω ἀλλήλων εἶναι.

ἢ περὶ μὲν τὸν ψόφον καὶ τὴν ὀσμὴν τοῦτο συμβαίνειν εὔλογον· ὥσπερ γὰρ ὁ ἀὴρ καὶ τὸ ὕδωρ, συνεχῆ μέν, μεμέρισται δ’ ἀμφοτέρων ἡ κίνησις. διὸ καὶ ἔστι μὲν ὡς τὸ αὐτὸ ἀκούει ὁ πρῶτος καὶ ὁ ὕστερος καὶ ὀσφραίνεται, ἔστι δ’ ὡς οὔ. δοκεῖ δέ τισιν εἶναι ἀπορία καὶ περὶ τούτων· ἀδύνατον γάρ φασί τινες ἄλλον ἄλλῳ τὸ αὐτὸ ἀκούειν καὶ ὁρᾶν καὶ ὀσφραίνεσθαι· οὐ γὰρ οἷόν τ’ εἶναι πολλοὺς καὶ χωρὶς ὄντας ‹ἓν› ἀκούειν καὶ ὀσφραίνεσθαι· τὸ γὰρ ἓν χωρὶς ἂν αὐτὸ αὑτοῦ εἶναι. ἢ τοῦ μὲν κινήσαντος πρώτου, οἷον τῆς κώδωνος ἢ λιβανωτοῦ ἢ πυρός, τοῦ αὐτοῦ καὶ ἑνὸς ἀριθμῷ αἰσθάνονται πάντες, τοῦ δὲ δὴ ἰδίου ἑτέρου ἀριθμῷ, εἴδει δὲ τοῦ αὐτοῦ, διὸ ἅμα πολλοὶ ὁρῶσι καὶ ὀσμῶνται καὶ ἀκούουσιν; ἔστι δ’ οὔτε σώματα ταῦτα, ἀλλὰ πάθος καὶ κίνησίς τις (οὐ γὰρ ἂν τοῦτο συνέβαινεν), οὔτ’ ἄνευ σώματος. περὶ δὲ τοῦ φωτὸς ἄλλος λόγος· τῷ ἐνεῖναι γάρ τι τὸ φῶς ἐστιν, ἀλλ’ οὐ κίνησίς τις. ὅλως δὲ οὐδὲ ὁμοίως ἐπί τε ἀλλοιώσεως ἔχει καὶ φορᾶς· αἱ μὲν γὰρ φοραὶ εὐλόγως εἰς τὸ μεταξὺ πρῶτον ἀφικνοῦνται (δοκεῖ δ’ ὁ ψόφος εἶναι φερομένου [447a] τινὸς κίνησις), ὅσα δ’ ἀλλοιοῦται, οὐκέτι ὁμοίως· ἐνδέχεται γὰρ ἀθρόον ἀλλοιοῦσθαι, καὶ μὴ τὸ ἥμισυ πρότερον, οἷον τὸ ὕδωρ ἅμα πᾶν πήγνυσθαι. οὐ μὴν ἀλλ’ ἂν ᾖ πολὺ τὸ θερμαινόμενον ἢ πηγνύμενον, τὸ ἐχόμενον ὑπὸ τοῦ ἐχομένου πάσχει, τὸ δὲ πρῶτον ὑπ’ αὐτοῦ τοῦ ἀλλοιοῦντος μεταβάλλει καὶ ἀνάγκη ἅμα ἀλλοιοῦσθαι καὶ ἀθρόον. ἦν δ’ ἂν καὶ τὸ γεύεσθαι ὥσπερ ἡ ὀσμή, εἰ ἐν ὑγρῷ ἦμεν καὶ πορρωτέρωθεν πρὶν θιγεῖν αὐτοῦ ᾐσθανόμεθα. εὐλόγως δὴ ὧν ἐστι μεταξὺ τοῦ αἰσθητηρίου, οὐχ ἅμα πάντα πάσχει, πλὴν ἐπὶ τοῦ φωτὸς διὰ τὸ εἰρημένον, διὰ τὸ αὐτὸ δὲ καὶ ἐπὶ τοῦ ὁρᾶν· τὸ γὰρ φῶς ποιεῖ τὸ ὁρᾶν.

Ἔστι δ’ ἀπορία καὶ ἄλλη τις τοιάδε περὶ τὰς αἰσθήσεις, πότερον ἐνδέχεται δυεῖν ἅμα αἰσθάνεσθαι ἐν τῷ αὐτῷ καὶ ἀτόμῳ χρόνῳ, ἢ οὔ. εἰ δὴ ἀεὶ ἡ μείζων κίνησις τὴν ἐλάττω ἐκκρούει - διὸ ὑποφερομένων ὑπὸ τὰ ὄμματα οὐκ αἰσθάνονται, ἐὰν τύχωσι σφόδρα τι ἐννοοῦντες ἢ φοβούμενοι ἢ ἀκούοντες πολὺν ψόφον - τοῦτο δὴ ὑποκείσθω, καὶ ὅτι ἑκάστου μᾶλλον ἔστιν αἰσθάνεσθαι ἁπλοῦ ὄντος ἢ κεκραμένου, οἷον οἴνου ἀκράτου ἢ κεκραμένου, καὶ μέλιτος, καὶ χρόας, καὶ τῆς νήτης μόνης ἢ ἐν τῇ διὰ πασῶν, διὰ τὸ ἀφανίζειν ἄλληλα. τοῦτο δὲ ποιεῖ ἐξ ὧν ἕν τι γίγνεται. εἰ δὴ ἡ μείζων τὴν ἐλάττω κίνησιν ἐκκρούει, ἀνάγκη, ἂν ἅμα ὦσι, καὶ αὐτὴν ἧττον αἰσθητὴν εἶναι ἢ εἰ μόνη ἦν· ἀφαιρεῖται γάρ τι ἡ ἐλάττων μειγνυμένη, εἴπερ ἅπαντα τὰ ἁπλᾶ μᾶλλον αἰσθητά ἐστιν. ἐὰν ἄρα ἴσαι ὦσιν ἕτεραι οὖσαι, οὐδετέρας ἔσται αἴσθησις· ἀφανιεῖ γὰρ ἡ ἑτέρα ὁμοίως τὴν ἑτέραν, ἁπλῆς δ’ οὐκ ἔστιν αἰσθάνεσθαι. ὥστε ἢ οὐδεμία ἔσται αἴσθησις, ἢ ἄλλη ἐξ ἀμφοῖν· ὅπερ καὶ γίγνεσθαι δοκεῖ ἐπὶ τῶν κεραννυμένων ἐν ᾧ ἂν μειχθῶσιν.

ἐπεὶ οὖν ἐκ μὲν ἐνίων γίγνεταί τι, ἐκ δ’ ἐνίων οὐ γίγνεται, τοιαῦτα δὲ τὰ ὑφ’ ἑτέραν αἴσθησιν (μείγνυνται γὰρ [447b] ὧν τὰ ἔσχατα ἐναντία· οὐκ ἔστι δ’ ἐκ λευκοῦ καὶ ὀξέος ἓν γίγνεσθαι ἀλλ’ ἢ κατὰ συμβεβηκός, ἀλλ’ οὐχ ὡς ἐξ ὀξέος καὶ βαρέος συμφωνία), οὐκ ἄρα οὐδ’ αἰσθάνεσθαι ἐνδέχεται αὐτῶν ἅμα. ἴσαι μὲν γὰρ οὖσαι αἱ κινήσεις ἀφανιοῦσιν ἀλλήλας, ἐπεὶ μία οὐ γίγνεται ἐξ αὐτῶν· ἂν δ’ ἄνισοι, ἡ κρείττων αἴσθησιν ἐμποιήσει. ἔτι μᾶλλον ἅμα δυοῖν αἴσθοιτ’ ἂν ἡ ψυχὴ τῇ μιᾷ αἰσθήσει ὧν μία αἴσθησις, οἷον ὀξέος καὶ βαρέος (μᾶλλον γὰρ ἅμα ἡ κίνησις τῇ μιᾶς αὐτὴ ἑαυτῇ ἢ τοῖν δυοῖν, οἷον ὄψεως καὶ ἀκοῆς), τῇ μιᾷ δὲ ἅμα δυοῖν οὐκ ἔστιν αἰσθάνεσθαι ἂν μὴ μειχθῇ (τὸ γὰρ μεῖγμα ἓν βούλεται εἶναι, τοῦ δ’ ἑνὸς μία αἴσθησις, ἡ δὲ μία ἅμα αὐτῇ), ὥστ’ ἐξ ἀνάγκης τῶν μεμειγμένων ἅμα αἰσθάνεται, ὅτι μιᾷ αἰσθήσει κατ’ ἐνέργειαν αἰσθάνεται· ἑνὸς μὲν γὰρ ἀριθμῷ ἡ κατ’ ἐνέργειαν μία, εἴδει δὲ ἡ κατὰ δύναμιν μία· καὶ εἰ μία τοίνυν ἡ αἴσθησις ἡ κατ’ ἐνέργειαν, ἓν ἐκεῖνα ἐρεῖ. μεμεῖχθαι ἄρα ἀνάγκη αὐτά. ὅταν ἄρα μὴ ᾖ μεμειγμένα, δύο ἔσονται αἰσθήσεις αἱ κατ’ ἐνέργειαν. ἀλλὰ κατὰ μίαν δύναμιν καὶ ἄτομον χρόνον μίαν ἀνάγκη εἶναι τὴν ἐνέργειαν· μιᾶς γὰρ ἡ εἰσάπαξ μία χρῆσις καὶ κίνησις, μία δὲ ἡ δύναμις. οὐκ ἄρα ἐνδέχεται δυοῖν ἅμα αἰσθάνεσθαι τῇ μιᾷ αἰσθήσει.

ἀλλὰ μὴν εἰ τὰ ὑπὸ τὴν αὐτὴν αἴσθησιν ἅμα ἀδύνατον, ἐὰν ᾖ δύο, δῆλον ὅτι ἧττον ἔτι τὰ κατὰ δύο αἰσθήσεις ἐνδέχεται ἅμα αἰσθάνεσθαι, οἷον λευκὸν καὶ γλυκύ. φαίνεται γὰρ τὸ μὲν τῷ ἀριθμῷ ἓν ἡ ψυχὴ οὐδενὶ ἑτέρῳ λέγειν ἀλλ’ ἢ τῷ ἅμα, τὸ δὲ τῷ εἴδει ἓν τῇ κρινούσῃ αἰσθήσει καὶ τῷ τρόπῳ. λέγω δὲ τοῦτο, ὅτι ἴσως τὸ λευκὸν καὶ τὸ μέλαν, ἕτερον τῷ εἴδει ὄν, ἡ αὐτὴ κρίνει, καὶ τὸ γλυκὺ καὶ τὸ πικρὸν ἡ αὐτὴ μὲν ἑαυτῇ, ἐκείνης δ’ ἄλλη, ἀλλ’ ἑτέρως ἑκάτερον τῶν ἐναντίων, ὡς δ’ αὔτως ἑαυταῖς τὰ σύστοιχα, οἷον ὡς ἡ γεῦσις τὸ γλυκύ, οὕτως ἡ ὄψις τὸ λευκόν, [448a] ὡς δ’ αὕτη τὸ μέλαν, οὕτως ἐκείνη τὸ πικρόν. ἔτι εἰ αἱ τῶν ἐναντίων κινήσεις ἐναντίαι, ἅμα δὲ τὰ ἐναντία ἐν τῷ αὐτῷ καὶ ἀτόμῳ οὐκ ἐνδέχεται ὑπάρχειν, ὑπὸ δὲ τὴν αἴσθησιν τὴν μίαν ἐναντία ἐστίν, οἷον γλυκὺ πικρῷ, τούτων οὐκ ἂν ἐνδέχοιτο αἰσθάνεσθαι ἅμα. ὁμοίως δὲ δῆλον ὅτι οὐδὲ τὰ μὴ ἐναντία· τὰ μὲν γὰρ τοῦ λευκοῦ τὰ δὲ τοῦ μέλανός ἐστιν, καὶ ἐν τοῖς ἄλλοις ὁμοίως, οἷον τῶν χυμῶν οἱ μὲν τοῦ γλυκέος οἱ δὲ τοῦ πικροῦ. οὐδὲ τὰ μεμειγμένα ἅμα (λόγοι γάρ εἰσιν ἀντικειμένων, οἷον τὸ διὰ πασῶν καὶ τὸ διὰ πέντε), ἐὰν μὴ ὡς ἓν αἰσθάνηται. οὕτως δ’ εἷς ὁ λόγος ὁ τῶν ἄκρων γίγνεται· ἄλλως δ’ οὔ, ἔσται γὰρ ἅμα ὁ μὲν πολλοῦ πρὸς ὀλίγον ἢ περιττοῦ πρὸς ἄρτιον, ὁ δ’ ὀλίγου πρὸς πολὺ ἢ ἀρτίου πρὸς περιττόν. εἰ οὖν πλεῖον ἔτι ἀπέχει ἀλλήλων καὶ διαφέρει τὰ συστοίχως μὲν λεγόμενα ἐν ἄλλῳ δὲ γένει τῶν ἐν τῷ αὐτῷ γένει (λέγω δ’ οἷον τὸ γλυκὺ καὶ τὸ λευκὸν καλῶ σύστοιχα, γένει δ’ ἕτερα, τὸ γλυκὺ δὲ τοῦ λευκοῦ πλεῖον ἔτι τῷ εἴδει διαφέρει ἢ τὸ μέλαν), ἔτι ἂν ἧττον ἅμα ἐνδέχοιτο αὐτὰ αἰσθάνεσθαι ἢ τὰ τῷ γένει ταὐτά. ὥστ’ εἰ μὴ ταῦτα, οὐδ’ ἐκεῖνα.

ὃ δὲ λέγουσί τινες τῶν περὶ τὰς συμφωνίας, ὅτι οὐχ ἅμα μὲν ἀφικνοῦνται οἱ ψόφοι, φαίνονται δέ, καὶ λανθάνει, ὅταν ὁ χρόνος ᾖ ἀναίσθητος, πότερον ὀρθῶς λέγεται ἢ οὔ; τάχα γὰρ ἂν φαίη τις καὶ νῦν παρὰ τοῦτο δοκεῖν ἅμα ὁρᾶν καὶ ἀκούειν, ὅτι οἱ μεταξὺ χρόνοι λανθάνουσιν. ἢ τοῦτ’ οὐκ ἀληθές, οὐδ’ ἐνδέχεται χρόνον εἶναι ἀναίσθητον οὐδένα οὐδὲ λανθάνειν, ἀλλὰ παντὸς ἐνδέχεται αἰσθάνεσθαι; εἰ γάρ, ὅτε αὐτὸς αὑτοῦ τις αἰσθάνεται ἢ ἄλλου ἐν συνεχεῖ χρόνῳ, μὴ ἐνδέχεται τότε λανθάνειν ὅτι ἔστιν, ἔστι δέ τις ἐν τῷ συνεχεῖ καὶ τοσοῦτος ὅσος ὅλως ἀναίσθητός ἐστι, δῆλον ὅτι τότε λανθάνοι ἂν εἰ ἔστιν αὐτὸς αὑτόν, καὶ εἰ ὁρᾷ καὶ αἰσθάνεται [καὶ εἰ αἰσθάνεται]. ἔτι οὐκ ἂν εἴη [448b] οὔτε χρόνος οὔτε πρᾶγμα οὐδὲν ὃ αἰσθάνεται ἢ ἐν ᾧ, εἰ μὴ οὕτως, ὅτι ἐν τούτου τινὶ ἢ ὅτι τούτου τι ὁρᾷ, εἴπερ ἔστι τι μέγεθος καὶ χρόνου καὶ πράγματος ἀναίσθητον ὅλως διὰ μικρότητα· εἰ γὰρ τὴν ὅλην ὁρᾷ, καὶ αἰσθάνεται τὸν αὐτὸν συνεχῶς χρόνον, οὕτω, τῷ ἐν τούτου τινί, ἀφῃρήσθω τὸ ΓΒ, ἐν ᾧ οὐκ ᾐσθάνετο. οὐκοῦν ἐν ταύτης τινὶ ἢ ταύτης τι, ὥσπερ τὴν γῆν ὁρᾷ ὅλην, ὅτι τοδὶ αὐτῆς, καὶ ἐν τῷ ἐνιαυτῷ βαδίζει, ὅτι ἐν τῳδὶ τῷ μέρει αὐτοῦ. ἀλλὰ μὴν ἐν τῷ ΓΒ οὐδὲν αἰσθάνεται. τῷ ἄρα ἐν τούτου τινὶ τοῦ ΑΒ αἰσθάνεσθαι λέγεται τοῦ ὅλου αἰσθάνεσθαι καὶ τὴν ὅλην. ὁ δ’ αὐτὸς λόγος καὶ ἐπὶ τῆς ΑΓ· ἀεὶ γὰρ ἐν τινὶ καὶ τινός, ὅλου δ’ οὐκ ἔστιν αἰσθάνεσθαι. ἅπαντα μὲν οὖν αἰσθητά ἐστιν, ἀλλ’ οὐ φαίνεται ὅσα ἐστίν· τοῦ γὰρ ἡλίου τὸ μέγεθος ὁρᾷ καὶ τὸ τετράπηχυ πόρρωθεν, ἀλλ’ οὐ φαίνεται ὅσον, ἀλλ’ ἐνίοτε ἀδιαίρετον, ‹ὃ› ὁρᾷ δ’ οὐκ ἀδιαίρετον. ἡ δ’ αἰτία εἴρηται ἐν τοῖς ἔμπροσθεν περὶ τούτου.

ὅτι μὲν οὖν οὐθείς ἐστι χρόνος ἀναίσθητος, ἐκ τούτων φανερόν· περὶ δὲ τῆς πρότερον λεχθείσης ἀπορίας σκεπτέον, πότερον ἐνδέχεται ἅμα πλειόνων αἰσθάνεσθαι ἢ οὐκ ἐνδέχεται. τὸ δ’ ἅμα λέγω ἐν ἑνὶ καὶ ἀτόμῳ χρόνῳ πρὸς ἄλληλα. πρῶτον μὲν οὖν ἆρ’ ὧδ’ ἐνδέχεται, ἅμα μέν, ἑτέρῳ δὲ τῆς ψυχῆς αἰσθάνεσθαι, κἂν [οὐ τῷ ἀτόμῳ] οὕτως ἀτόμῳ ὡς παντὶ ὄντι συνεχεῖ; ἢ [ὅτι] πρῶτον μὲν κατὰ τὴν μίαν αἴσθησιν, οἷον λέγω ὄψιν, εἰ ἔσται ἄλλῳ αἰσθανομένη ἄλλου καὶ ἄλλου χρώματος, πλείω γε μέρη ἕξει εἴδει ταὐτά; καὶ γὰρ ἃ αἰσθάνεται ἐν τῷ αὐτῷ γένει ἐστίν. εἰ δέ, [ὅτι] ὡς ὄμματα δύο, φαίη τις οὐδὲν κωλύειν οὕτω καὶ ἐν τῇ ψυχῇ, [ὅτι] ἴσως ἐκ μὲν τούτων ἕν τι γίγνεται καὶ μία ἡ ἐνέργεια αὐτῶν· ἐκεῖ δέ, εἰ μὲν ἓν τὸ ἐξ ἀμφοῖν, ἐκεῖνο τὸ αἰσθανόμενον ἔσται, εἰ δὲ χωρίς, οὐχ ὁμοίως ἕξει. ἔτι αἰσθήσεις αἱ αὐταὶ πλείους ἔσονται, ὥσπερ εἴ τις ἐπιστήμας [449a] διαφόρους φαίη· οὔτε γὰρ ἡ ἐνέργεια ἄνευ τῆς κατ’ αὐτὴν ἔσται δυνάμεως, οὔτ’ ἄνευ ταύτης αἴσθησις ἔσται.

εἰ δὲ τούτων ἐν ἑνὶ καὶ ἀτόμῳ ‹μὴ› αἰσθάνεται, δῆλον ὅτι καὶ τῶν ἄλλων· μᾶλλον γὰρ ἐνεδέχετο τούτων ἅμα πλειόνων ἢ τῶν τῷ γένει ἑτέρων. εἰ δὲ δὴ ἄλλῳ μὲν γλυκέος ἄλλῳ δὲ λευκοῦ αἰσθάνεται ἡ ψυχὴ μέρει, ἤτοι τὸ ἐκ τούτων ἕν τί ἐστιν ἢ οὐχ ἕν. ἀλλ’ ἀνάγκη ἕν· ἓν γάρ τι τὸ αἰσθητικόν ἐστι μέρος. τίνος οὖν ἐκεῖνο ἑνός; οὐδὲν γὰρ ἐκ τούτων ἕν. ἀνάγκη ἄρα ἕν τι εἶναι τῆς ψυχῆς ᾧ ἅπαντα αἰσθάνεται, καθάπερ εἴρηται πρότερον, ἄλλο δὲ γένος δι’ ἄλλου. ἆρ’ οὖν ᾗ μὲν ἀδιαίρετόν ἐστι κατ’ ἐνέργειαν, ἕν τί ἐστι τὸ αἰσθητικὸν γλυκέος καὶ λευκοῦ, ὅταν δὲ διαιρετὸν γένηται κατ’ ἐνέργειαν, ἕτερον; ἢ ὥσπερ ἐπὶ τῶν πραγμάτων αὐτῶν ἐνδέχεται, οὕτως καὶ ἐπὶ τῆς ψυχῆς; τὸ γὰρ αὐτὸ καὶ ἓν ἀριθμῷ λευκὸν καὶ γλυκύ ἐστι, καὶ ἄλλα πολλά· εἰ γὰρ μὴ χωριστὰ τὰ πάθη ἀλλήλων, ἀλλὰ τὸ εἶναι ἕτερον ἑκάστῳ. ὁμοίως τοίνυν θετέον καὶ ἐπὶ τῆς ψυχῆς τὸ αὐτὸ καὶ ἓν εἶναι ἀριθμῷ τὸ αἰσθητικὸν πάντων, τὸ μέντοι εἶναι ἕτερον καὶ ἕτερον τῶν μὲν γένει τῶν δὲ εἴδει. ὥστε καὶ αἰσθάνοιτ' ἂν ἅμα τῷ αὐτῷ καὶ ἑνί, λόγῳ δ' οὐ τῷ αὐτῷ.

ὅτι δὲ τὸ αἰσθητὸν πᾶν ἐστι μέγεθος καὶ οὐκ ἔστιν ἀδιαίρετον αἰσθητόν, δῆλον. ἔστι γὰρ ὅθεν μὲν οὐκ ἂν ὀφθείη ἄπειρον τὸ ἀπόστημα, ὅθεν δὲ ὁρᾶται, πεπερασμένον· ὁμοίως δὲ καὶ τὸ ὀσφραντὸν καὶ ἀκουστὸν καὶ ὅσων μὴ αὐτῶν ἁπτόμενοι αἰσθάνονται. ἔστι δή τι ἔσχατον τοῦ ἀποστήματος ὅθεν οὐχ ὁρᾶται, καὶ πρῶτον ὅθεν ὁρᾶται. τοῦτο δὴ ἀνάγκη ἀδιαίρετον εἶναι, οὗ ἐν μὲν τῷ ἐπέκεινα οὐκ ἐνδέχεται αἰσθάνεσθαι ὄντος, ἐν δὲ τῷ ἐπὶ τάδε ἀνάγκη αἰσθάνεσθαι. εἰ δή τι ἔστιν ἀδιαίρετον αἰσθητόν, ὅταν τεθῇ ἐπὶ τῷ ἐσχάτῳ ὅθεν ἐστὶν ὕστατον μὲν οὐκ αἰσθητὸν πρῶτον δ' αἰσθητόν, ἅμα συμβήσεται ὁρατὸν εἶναι καὶ ἀόρατον· τοῦτο δ' ἀδύνατον.

[449b] περὶ μὲν οὖν τῶν αἰσθητηρίων καὶ τῶν αἰσθητῶν τίνα τρόπον ἔχει καὶ κοινῇ καὶ καθ' ἕκαστον αἰσθητήριον εἴρηται· τῶν δὲ λοιπῶν πρῶτον σκεπτέον περὶ μνήμης καὶ τοῦ μνημονεύειν.

Περι Μνημησ και Αναμνησεωσ (449b) On Memory

[449b] Περὶ μνήμης καὶ τοῦ μνημονεύειν λεκτέον τί ἐστι καὶ διὰ τίν’ αἰτίαν γίγνεται καὶ τίνι τῶν τῆς ψυχῆς μορίων συμβαίνει τοῦτο τὸ πάθος καὶ τὸ ἀναμιμνήσκεσθαι· οὐ γὰρ οἱ αὐτοί εἰσι μνημονικοὶ καὶ ἀναμνηστικοί, ἀλλ’ ὡς ἐπὶ τὸ πολὺ μνημονικώτεροι μὲν οἱ βραδεῖς, ἀναμνηστικώτεροι δὲ οἱ ταχεῖς καὶ εὐμαθεῖς. πρῶτον μὲν οὖν σκεπτέον ποῖά ἐστι τὰ μνημονευτά· πολλάκις γὰρ ἐξαπατᾷ τοῦτο. οὔτε γὰρ τὸ μέλλον ἐνδέχεται μνημονεύειν, ἀλλ’ ἔστι δοξαστὸν καὶ ἐλπιστόν (εἴη δ’ ἂν καὶ ἐπιστήμη τις ἐλπιστική, καθάπερ τινές φασι τὴν μαντικήν), οὔτε τοῦ παρόντος, ἀλλ’ αἴσθησις· ταύτῃ γὰρ οὔτε τὸ μέλλον οὔτε τὸ γενόμενον γνωρίζομεν, ἀλλὰ τὸ παρὸν μόνον. ἡ δὲ μνήμη τοῦ γενομένου· τὸ δὲ παρὸν ὅτε πάρεστιν, οἷον τοδὶ τὸ λευκὸν ὅτε ὁρᾷ, οὐδεὶς ἂν φαίη μνημονεύειν, οὐδὲ τὸ θεωρούμενον, ὅτε θεωρῶν τυγχάνει καὶ νοῶν, ἀλλὰ τὸ μὲν αἰσθάνεσθαί φησι, τὸ δ’ ἐπίστασθαι μόνον· ὅταν δ’ ἄνευ τῶν ἔργων σχῇ τὴν ἐπιστήμην καὶ τὴν αἴσθησιν, οὕτω μέμνηται [τὰς τοῦ τριγώνου ὅτι δύο ὀρθαῖς ἴσαι], τὸ μὲν ὅτι ἔμαθεν ἢ ἐθεώρησεν, τὸ δὲ ὅτι ἤκουσεν ἢ εἶδεν ἤ τι τοιοῦτον· ἀεὶ γὰρ ὅταν ἐνεργῇ κατὰ τὸ μνημονεύειν, οὕτως ἐν τῇ ψυχῇ λέγει, ὅτι πρότερον τοῦτο ἤκουσεν ἢ ᾔσθετο ἢ ἐνόησεν. ἔστι μὲν οὖν ἡ μνήμη οὔτε αἴσθησις οὔτε ὑπόληψις, ἀλλὰ τούτων τινὸς ἕξις ἢ πάθος, ὅταν γένηται χρόνος. τοῦ δὲ νῦν ἐν τῷ νῦν οὐκ ἔστι μνήμη, καθάπερ εἴρηται [καὶ πρότερον], ἀλλὰ τοῦ μὲν παρόντος αἴσθησις, τοῦ δὲ μέλλοντος ἐλπίς, τοῦ δὲ γενομένου μνήμη· διὸ μετὰ χρόνου πᾶσα μνήμη. ὥσθ’ ὅσα χρόνου αἰσθάνεται, ταῦτα μόνα τῶν ζῴων μνημονεύει, καὶ τούτῳ ᾧ αἰσθάνεται.

ἐπεὶ δὲ περὶ φαντασίας εἴρηται πρότερον ἐν τοῖς περὶ ψυχῆς, καὶ νοεῖν οὐκ ἔστιν ἄνευ φαντάσματος [450a] - συμβαίνει γὰρ τὸ αὐτὸ πάθος ἐν τῷ νοεῖν ὅπερ καὶ ἐν τῷ διαγράφειν· ἐκεῖ τε γὰρ οὐθὲν προσχρώμενοι τῷ τὸ ποσὸν ὡρισμένον εἶναι τοῦ τριγώνου, ὅμως γράφομεν ὡρισμένον κατὰ τὸ ποσόν, καὶ ὁ νοῶν ὡσαύτως, κἂν μὴ ποσὸν νοῇ, τίθεται πρὸ ὀμμάτων ποσόν, νοεῖ δ’ οὐχ ᾗ ποσόν· ἂν δ’ ἡ φύσις ᾖ τῶν ποσῶν, ἀορίστων δέ, τίθεται μὲν ποσὸν ὡρισμένον, νοεῖ δ’ ᾗ ποσὸν μόνον - διὰ τίνα μὲν οὖν αἰτίαν οὐκ ἐνδέχεται νοεῖν οὐδὲν ἄνευ συνεχοῦς, οὐδ’ ἄνευ χρόνου τὰ μὴ ἐν χρόνῳ ὄντα, ἄλλος λόγος· μέγεθος δ’ ἀναγκαῖον γνωρίζειν καὶ κίνησιν ᾧ καὶ χρόνον· [καὶ τὸ φάντασμα τῆς κοινῆς αἰσθήσεως πάθος ἐστίν] ὥστε φανερὸν ὅτι τῷ πρώτῳ αἰσθητικῷ τούτων ἡ γνῶσίς ἐστιν· ἡ δὲ μνήμη, καὶ ἡ τῶν νοητῶν, οὐκ ἄνευ φαντάσματός ἐστιν, ‹καὶ τὸ φάντασμα τῆς κοινῆς αἰσθήσεως πάθος ἐστίν›· ὥστε τοῦ νοῦ μὲν κατὰ συμβεβηκὸς ἂν εἴη, καθ' αὑτὸ δὲ τοῦ πρώτου αἰσθητικοῦ. διὸ καὶ ἑτέροις τισὶν ὑπάρχει τῶν ζῴων, καὶ οὐ μόνον ἀνθρώποις καὶ τοῖς ἔχουσι δόξαν ἢ φρόνησιν. εἰ δὲ τῶν νοητικῶν τι μορίων ἦν, οὐκ ἂν ὑπῆρχε πολλοῖς τῶν ἄλλων ζῴων, ἴσως δ' οὐδενὶ τῶν ἀνοήτων, ἐπεὶ οὐδὲ νῦν πᾶσι διὰ τὸ μὴ πάντα χρόνου αἴσθησιν ἔχειν· ἀεὶ γὰρ ὅταν ἐνεργῇ τῇ μνήμῃ, καθάπερ καὶ πρότερον εἴπομεν, ὅτι εἶδε τοῦτο ἢ ἤκουσεν ἢ ἔμαθε, προσαισθάνεται ὅτι πρότερον· τὸ δὲ πρότερον καὶ ὕστερον ἐν χρόνῳ ἐστίν. τίνος μὲν οὖν τῶν τῆς ψυχῆς ἐστι μνήμη, φανερόν, ὅτι οὗπερ καὶ ἡ φαντασία· καί ἐστι μνημονευτὰ καθ' αὑτὰ μὲν ὧν ἐστι φαντασία, κατὰ συμβεβηκὸς δὲ ὅσα μὴ ἄνευ φαντασίας.

ἀπορήσειε δ' ἄν τις πῶς ποτε τοῦ μὲν πάθους παρόντος τοῦ δὲ πράγματος ἀπόντος μνημονεύεται τὸ μὴ παρόν. δῆλον γὰρ ὅτι δεῖ νοῆσαι τοιοῦτον τὸ γιγνόμενον διὰ τῆς αἰσθήσεως ἐν τῇ ψυχῇ καὶ τῷ μορίῳ τοῦ σώματος τῷ ἔχοντι αὐτήν - οἷον ζωγράφημά τι [τὸ πάθος] οὗ φαμεν τὴν ἕξιν μνήμην εἶναι· ἡ γὰρ γιγνομένη κίνησις ἐνσημαίνεται οἷον τύπον τινὰ τοῦ αἰσθήματος, καθάπερ οἱ σφραγιζόμενοι τοῖς δακτυλίοις. διὸ καὶ τοῖς [450b] μὲν ἐν κινήσει πολλῇ διὰ πάθος ἢ δι' ἡλικίαν οὖσιν οὐ γίγνεται μνήμη, καθάπερ ἂν εἰς ὕδωρ ῥέον ἐμπιπτούσης τῆς κινήσεως καὶ τῆς σφραγῖδος· τοῖς δὲ διὰ τὸ ψήχεσθαι, καθάπερ τὰ παλαιὰ τῶν οἰκοδομημάτων, καὶ διὰ σκληρότητα τοῦ δεχομένου τὸ πάθος οὐκ ἐγγίγνεται ὁ τύπος. διόπερ οἵ τε σφόδρα νέοι καὶ οἱ γέροντες ἀμνήμονές εἰσιν· ῥέουσι γὰρ οἱ μὲν διὰ τὴν αὔξησιν, οἱ δὲ διὰ τὴν φθίσιν. ὁμοίως δὲ καὶ οἱ λίαν ταχεῖς καὶ οἱ λίαν βραδεῖς οὐδέτεροι φαίνονται μνήμονες· οἱ μὲν γάρ εἰσιν ὑγρότεροι τοῦ δέοντος, οἱ δὲ σκληρότεροι· τοῖς μὲν οὖν οὐ μένει τὸ φάντασμα ἐν τῇ ψυχῇ, τῶν δ' οὐχ ἅπτεται.

ἀλλ' εἰ δὴ τοιοῦτόν ἐστι τὸ συμβαῖνον περὶ τὴν μνήμην, πότερον τοῦτο μνημονεύει τὸ πάθος, ἢ ἐκεῖνο ἀφ' οὗ ἐγένετο; εἰ μὲν γὰρ τοῦτο, τῶν ἀπόντων οὐδὲν ἂν μνημονεύοιμεν· εἰ δ' ἐκεῖνο, πῶς αἰσθανόμενοι τοῦτο μνημονεύομεν οὗ μὴ αἰσθανόμεθα, τὸ ἀπόν; εἴ τ' ἐστὶν ὅμοιον ὥσπερ τύπος ἢ γραφὴ ἐν ἡμῖν, ἡ τούτου αἴσθησις διὰ τί ἂν εἴη μνήμη ἑτέρου, ἀλλ' οὐκ αὐτοῦ τούτου; ὁ γὰρ ἐνεργῶν τῇ μνήμῃ θεωρεῖ τὸ πάθος τοῦτο καὶ αἰσθάνεται τούτου. πῶς οὖν τὸ μὴ παρὸν μνημονεύσει; εἴη γὰρ ἂν καὶ ὁρᾶν τὸ μὴ παρὸν καὶ ἀκούειν. ἢ ἔστιν ὡς ἐνδέχεται καὶ συμβαίνειν τοῦτο; οἷον γὰρ τὸ ἐν πίνακι γεγραμμένον ζῷον καὶ ζῷόν ἐστι καὶ εἰκών, καὶ τὸ αὐτὸ καὶ ἓν τοῦτ᾽ ἐστὶν ἄμφω, τὸ μέντοι εἶναι οὐ ταὐτὸν ἀμφοῖν, καὶ ἔστι θεωρεῖν καὶ ὡς ζῷον καὶ ὡς εἰκόνα, οὕτω καὶ τὸ ἐν ἡμῖν φάντασμα δεῖ ὑπολαβεῖν καὶ αὐτό τι καθ᾽ αὑτὸ εἶναι καὶ ἄλλου [φάντασμα]. ᾗ μὲν οὖν καθ᾽ αὑτό, θεώρημα ἢ φάντασμά ἐστιν, ᾗ δ᾽ ἄλλου, οἷον εἰκὼν καὶ μνημόνευμα. ὥστε καὶ ὅταν ἐνεργῇ ἡ κίνησις αὐτοῦ, ἂν μὲν ᾗ καθ᾽ αὑτό ἐστι, ταύτῃ αἰσθάνηται ἡ ψυχὴ αὐτοῦ, οἷον νόημά τι ἢ φάντασμα φαίνεται ἐπελθεῖν· ἂν δ᾽ ᾗ ἄλλου καὶ ὥσπερ ἐν τῇ γραφῇ ὡς εἰκόνα θεωρεῖ καί, μὴ ἑωρακὼς τὸν Κορίσκον, ὡς Κορίσκου, ἐνταῦθά τε ἄλλο τὸ πάθος τῆς θεωρίας ταύτης καὶ ὅταν ὡς ζῷον γεγραμμένον [451a] θεωρῇ, ἔν τε τῇ ψυχῇ τὸ μὲν γίγνεται ὥσπερ νόημα μόνον, τὸ δ᾽ ὡς ἐκεῖ ὅτι εἰκών, μνημόνευμα. καὶ διὰ τοῦτο ἐνίοτ᾽ οὐκ ἴσμεν, ἐγγινομένων ἡμῖν ἐν τῇ ψυχῇ τοιούτων κινήσεων ἀπὸ τοῦ αἰσθέσθαι πρότερον, εἰ κατὰ τὸ ᾐσθῆσθαι συμβαίνει, καὶ εἰ ἔστι μνήμη ἢ οὔ, διστάζομεν· ὁτὲ δὲ συμβαίνει ἐννοῆσαι καὶ ἀναμνησθῆναι ὅτι ἠκούσαμέν τι πρότερον ἢ εἴδομεν. τοῦτο δὲ συμβαίνει, ὅταν θεωρῶν ὡς αὐτὸ μεταβάλλῃ καὶ θεωρῇ ὡς ἄλλου.

γίγνεται δὲ καὶ τοὐναντίον, οἷον συνέβη Ἀντιφέροντι τῷ Ὠρείτῃ καὶ ἄλλοις ἐξισταμένοις· τὰ γὰρ φαντάσματα ἔλεγον ὡς γενόμενα καὶ ὡς μνημονεύοντες. τοῦτο δὲ γίγνεται ὅταν τις τὴν μὴ εἰκόνα ὡς εἰκόνα θεωρῇ. αἱ δὲ μελέται τὴν μνήμην σῴζουσι τῷ ἐπαναμιμνήσκειν· τοῦτο δ᾽ ἐστὶν οὐδὲν ἕτερον ἢ τὸ θεωρεῖν πολλάκις ὡς εἰκόνα καὶ μὴ ὡς καθ᾽ αὑτό. τί μὲν οὖν ἐστι μνήμη καὶ τὸ μνημονεύειν, εἴρηται, ὅτι φαντάσματος, ὡς εἰκόνος οὗ φάντασμα, ἕξις, καὶ τίνος μορίου τῶν ἐν ἡμῖν, ὅτι τοῦ πρώτου αἰσθητικοῦ καὶ ᾧ χρόνου αἰσθανόμεθα.

Περὶ δὲ τοῦ ἀναμιμνήσκεσθαι λοιπὸν εἰπεῖν. πρῶτον μὲν οὖν ὅσα ἐν τοῖς ἐπιχειρηματικοῖς λόγοις ἐστὶν ἀληθῆ, δεῖ τιθέναι ὡς ὑπάρχοντα. οὔτε γὰρ μνήμης ἐστὶν ἀνάληψις ἡ ἀνάμνησις οὔτε λῆψις· ὅταν γὰρ τὸ πρῶτον μάθῃ ἢ πάθῃ, οὔτ᾽ ἀναλαμβάνει μνήμην οὐδεμίαν (οὐδεμία γὰρ προγέγονεν) οὔτ᾽ ἐξ ἀρχῆς λαμβάνει· ὅταν γὰρ ἐγγένηται ἡ ἕξις ἢ τὸ πάθος, τότε μνήμη ἐστίν, ὥστε μετὰ τοῦ πάθους ἐγγινομένου οὐκ ἐγγίνεται. ἔτι δ᾽ ὅτε τὸ πρῶτον ἐγγέγονε τῷ ἀτόμῳ καὶ ἐσχάτῳ, τὸ μὲν πάθος ἐνυπάρχει ἤδη τῷ παθόντι καὶ ἡ ἐπιστήμη, εἰ δεῖ καλεῖν ἐπιστήμην τὴν ἕξιν ἢ τὸ πάθος (οὐθὲν δὲ κωλύει κατὰ συμβεβηκὸς καὶ μνημονεύειν ἔνια ὧν ἐπιστάμεθα)· τὸ δὲ μνημονεύειν καθ᾽ αὑτὸ οὐχ ὑπάρχει πρὶν χρονισθῆναι· μνημονεύει γὰρ νῦν ὃ εἶδεν ἢ ἔπαθε πρότερον, οὐχ ὃ νῦν ἔπαθε, νῦν μνημονεύει. ἔτι δὲ φανερὸν [451b] ὅτι μνημονεύειν ἔστι μὴ νῦν ἀναμνησθέντα, ἀλλ᾽ ἐξ ἀρχῆς αἰσθόμενον ἢ παθόντα· ἀλλ᾽ ὅταν ἀναλαμβάνῃ ἣν πρότερον εἶχεν ἐπιστήμην ἢ αἴσθησιν ἢ οὗ ποτε τὴν ἕξιν ἐλέγομεν μνήμην, τοῦτ᾽ ἐστὶ καὶ τότε τὸ ἀναμιμνήσκεσθαι τῶν εἰρημένων τι, τῷ δὲ μνημονεύειν συμβαίνει καὶ μνήμην ἀκολουθεῖν. οὐδὲ δὴ ταῦτα ἁπλῶς, ἐὰν ἔμπροσθεν ὑπάρξαντα πάλιν ἐγγένηται, ἀλλ’ ἔστιν ὡς, ἔστι δ’ ὡς οὔ. δὶς γὰρ μαθεῖν καὶ εὑρεῖν ἐνδέχεται τὸν αὐτὸν τὸ αὐτό· δεῖ οὖν διαφέρειν τὸ ἀναμιμνήσκεσθαι τούτων, καὶ ἐνούσης πλείονος ἀρχῆς ἢ ἐξ ἧς μανθάνουσιν ἀναμιμνήσκεσθαι.

συμβαίνουσι δ’ αἱ ἀναμνήσεις ἐπειδὴ πέφυκεν ἡ κίνησις ἥδε γενέσθαι μετὰ τήνδε· εἰ μὲν ἐξ ἀνάγκης, δῆλον ὡς ὅταν ἐκείνην κινηθῇ, τήνδε κινηθήσεται· εἰ δὲ μὴ ἐξ ἀνάγκης ἀλλ’ ἔθει, ὡς ἐπὶ τὸ πολὺ κινηθήσεται. συμβαίνει δ’ ἐνίας ἅπαξ ἐθισθῆναι μᾶλλον ἢ ἑτέρας πολλάκις κινουμένους· διὸ ἔνια ἅπαξ ἰδόντες μᾶλλον μνημονεύομεν ἢ ἕτερα πολλάκις. ὅταν οὖν ἀναμιμνησκώμεθα, κινούμεθα τῶν προτέρων τινὰ κινήσεων, ἕως ἂν κινηθῶμεν μεθ’ ἣν ἐκείνη εἴωθεν. διὸ καὶ τὸ ἐφεξῆς θηρεύομεν νοήσαντες ἀπὸ τοῦ νῦν ἢ ἄλλου τινός, καὶ ἀφ’ ὁμοίου ἢ ἐναντίου ἢ τοῦ σύνεγγυς. διὰ τοῦτο γίγνεται ἡ ἀνάμνησις· αἱ γὰρ κινήσεις τούτων τῶν μὲν αἱ αὐταί, τῶν δ’ ἅμα, τῶν δὲ μέρος ἔχουσιν, ὥστε τὸ λοιπὸν μικρὸν ὃ ἐκινήθη μετ’ ἐκεῖνο.

ζητοῦσι μὲν οὖν οὕτω, καὶ μὴ ζητοῦντες δ’ οὕτως ἀναμιμνήσκονται, ὅταν μεθ’ ἑτέραν κίνησιν ἐκείνη γένηται· ὡς δὲ τὰ πολλὰ ἑτέρων γενομένων κινήσεων οἵων εἴπομεν ἐγένετο ἐκείνη. οὐδὲν δὲ δεῖ σκοπεῖν τὰ πόρρω, πῶς μεμνήμεθα, ἀλλὰ τὰ σύνεγγυς· δῆλον γὰρ ὅτι ὁ αὐτός ἐστι τρόπος. [λέγω δὲ τὸ ἐφεξῆς οὐ προζητήσας οὐδ’ ἀναμνησθείς.] τῷ γὰρ ἔθει ἀκολουθοῦσιν αἱ κινήσεις ἀλλήλαις, ἥδε μετὰ τήνδε, καὶ ὅταν τοίνυν ἀναμιμνήσκεσθαι βούληται, τοῦτο ποιήσει· ζητήσει λαβεῖν ἀρχὴν κινήσεως, μεθ’ ἣν ἐκείνη ἔσται. διὸ τάχιστα καὶ κάλλιστα γίνονται [452a] ἀπ’ ἀρχῆς αἱ ἀναμνήσεις· ὡς γὰρ ἔχουσι τὰ πράγματα πρὸς ἄλληλα τῷ ἐφεξῆς, οὕτω καὶ αἱ κινήσεις. καὶ ἔστιν εὐμνημόνευτα ὅσα τάξιν τινὰ ἔχει, ὥσπερ τὰ μαθήματα· τὰ δὲ φαύλως καὶ χαλεπῶς. καὶ τούτῳ διαφέρει τὸ ἀναμιμνήσκεσθαι τοῦ πάλιν μανθάνειν, ὅτι δυνήσεταί πως δι’ αὑτοῦ κινηθῆναι ἐπὶ τὸ μετὰ τὴν ἀρχήν. ὅταν δὲ μή, ἀλλὰ δι’ ἄλλου, οὐκέτι μέμνηται. πολλάκις δ’ ἤδη μὲν ἀδυνατεῖ ἀναμνησθῆναι, ζητῶν δὲ δύναται καὶ εὑρίσκει. τοῦτο δὲ γίγνεται κινοῦντι πολλά, ἕως ἂν τοιαύτην κινήσῃ κίνησιν ᾗ ἀκολουθήσει τὸ πρᾶγμα. τὸ γὰρ μεμνῆσθαί ἐστι τὸ ἐνεῖναι δύναμιν τὴν κινοῦσαν· τοῦτο δέ, ὥστ’ ἐξ αὑτοῦ καὶ ὧν ἔχει κινήσεων κινηθῆναι, ὥσπερ εἴρηται. δεῖ δὲ λαβέσθαι ἀρχῆς· διὸ ἀπὸ τόπων δοκοῦσιν ἀναμιμνήσκεσθαι ἐνίοτε. τὸ δ’ αἴτιον ὅτι ταχὺ ἀπ’ ἄλλου ἐπ’ ἄλλο ἔρχονται, οἷον ἀπὸ γάλακτος ἐπὶ λευκόν, ἀπὸ λευκοῦ δ’ ἐπ’ ἀέρα, καὶ ἀπὸ τούτου ἐφ’ ὑγρόν, ἀφ’ οὗ ἐμνήσθη μετοπώρου, ταύτην ἐπιζητῶν τὴν ὥραν.

ἔοικε δὲ καθόλου ἀρχῇ καὶ τὸ μέσον πάντων· εἰ γὰρ μὴ πρότερον, ὅταν ἐπὶ τοῦτο ἔλθῃ μνησθήσεται, ἢ οὐκέτ’ οὐδὲ ἄλλοθεν, οἷον εἴ τις νοήσειεν ἐφ’ ὧν Α Β Γ Δ Ε Ζ Η Θ ‹Ι›· εἰ γὰρ μὴ ἐπὶ τοῦ Ι μέμνηται, ἐπὶ τοῦ Ε μνησθήσεται· ἐντεῦθεν γὰρ ἐπ’ ἄμφω κινηθῆναι ἐνδέχεται, καὶ ἐπὶ τὸ Δ καὶ ἐπὶ τὸ Ζ. εἰ δὲ μὴ τούτων τι ἐζήτει, ἐπὶ τὸ Γ ἐλθὼν μνησθήσεται, εἰ τὸ Α ἢ τὸ Β ἐπιζητεῖ, εἰ δὲ μή, ἐπὶ τὸ Η· καὶ οὕτως ἀεί. τοῦ δ’ ἀπὸ τοῦ αὐτοῦ ἐνίοτε μὲν μνησθῆναι, ἐνίοτε δὲ μή, αἴτιον ὅτι ἐπὶ πλείω ἐνδέχεται κινηθῆναι ἀπὸ τῆς αὐτῆς ἀρχῆς, οἷον ἀπὸ τοῦ Γ ἐπὶ τὸ Β ἢ τὸ Δ. ἐὰν οὖν διὰ πολλοῦ κινηθῇ, ἐπὶ τὸ συνηθέστερον κινεῖται· ὥσπερ γὰρ φύσις ἤδη τὸ ἔθος. διὸ ἃ πολλάκις ἐννοοῦμεν, ταχὺ ἀναμιμνησκόμεθα· ὥσπερ γὰρ φύσει τόδε μετὰ τόδε ἐστίν, οὕτω καὶ ἐνεργείᾳ· τὸ δὲ πολλάκις φύσιν ποιεῖ. ἐπεὶ δ’ ὥσπερ [452b] ἐν τοῖς φύσει γίγνεται καὶ παρὰ φύσιν καὶ ἀπὸ τύχης, ἔτι μᾶλλον ἐν τοῖς δι’ ἔθος, οἷς ἡ φύσις γε μὴ ὁμοίως ὑπάρχει, ὥστε κινηθῆναι ἐνίοτε κἀκεῖ καὶ ἄλλως, ἄλλως τε καὶ ὅταν ἀφέλκῃ ‹τι› ἐκεῖθεν αὐτόσε πῃ, διὰ τοῦτο καὶ ὅταν δέῃ ὄνομα μνημονεῦσαι, παρόμοιον ‹εἰ› ἴσμεν, εἰς ἐκεῖνο σολοικίζομεν. τὸ μὲν οὖν ἀναμιμνήσκεσθαι τοῦτον συμβαίνει τὸν τρόπον.

τὸ δὲ μέγιστον, γνωρίζειν δεῖ τὸν χρόνον, ἢ μέτρῳ ἢ ἀορίστως. ἔστω δέ τι ᾧ κρίνει τὸν πλείω καὶ ἐλάττω· εὔλογον δ’ ὥσπερ τὰ μεγέθη· νοεῖ γὰρ τὰ μεγάλα καὶ πόρρω οὐ τῷ ἀποτείνειν ἐκεῖ τὴν διάνοιαν ὥσπερ τὴν ὄψιν φασί τινες (καὶ γὰρ μὴ ὄντων ὁμοίως νοήσει), ἀλλὰ τῇ ἀνάλογον κινήσει· ἔστι γὰρ ἐν αὐτῇ τὰ ὅμοια σχήματα καὶ κινήσεις. τίνι οὖν διοίσει, ὅταν τὰ μείζω νοῇ, ὅτι ἐκεῖνα νοεῖ ἢ τὰ ἐλάττω; πάντα γὰρ τὰ ἐντὸς ἐλάττω, καὶ ἀνὰ λόγον [καὶ τὰ ἐκτός]. ἔστι δ’ ἴσως ὥσπερ καὶ τοῖς εἴδεσιν ἀνάλογον λαβεῖν ἄλλο ἐν αὐτῷ, οὕτως καὶ τοῖς ἀποστήμασιν. ὥσπερ οὖν εἰ τὴν Α Β Β Ε κινεῖται, ποιεῖ τὴν Γ Δ· ἀνάλογον γὰρ ἡ Α Γ καὶ ἡ Γ Δ. τί οὖν μᾶλλον τὴν Γ Δ ἢ τὴν Ζ Η ποιεῖ; ἢ ὡς ἡ Α Γ πρὸς τὴν Α Β ἔχει, οὕτως ἡ Θ πρὸς τὴν Ι ἔχει; ταύτας οὖν ἅμα κινεῖται. ἂν δὲ τὴν Ζ Η βούληται νοῆσαι, τὴν μὲν Β Ε ὁμοίως νοεῖ, ἀντὶ δὲ τῶν Θ Ι τὰς Κ Λ νοεῖ· αὗται γὰρ ἔχουσιν ὡς Ζ Α πρὸς Β Α.

ὅταν οὖν ἅμα ἥ τε τοῦ πράγματος γίγνηται κίνησις καὶ ἡ τοῦ χρόνου, τότε τῇ μνήμῃ ἐνεργεῖ. ἂν δ’ οἴηται μὴ ποιῶν, οἴεται μνημονεύειν· οὐθὲν γὰρ κωλύει διαψευσθῆναί τινα καὶ δοκεῖν μνημονεύειν μὴ μνημονεύοντα. ἐνεργοῦντα δὲ τῇ μνήμῃ μὴ οἴεσθαι ἀλλὰ λανθάνειν μεμνημένον οὐκ ἔστιν· τοῦτο γὰρ ἦν αὐτὸ τὸ μεμνῆσθαι. ἀλλ’ ἐὰν ἡ τοῦ πράγματος γένηται χωρὶς τῆς τοῦ χρόνου ἢ αὕτη ἐκείνης, οὐ μέμνηται. ἡ δὲ τοῦ χρόνου διττή ἐστιν· ὁτὲ μὲν γὰρ μέτρῳ οὐ μέμνηται αὐτόν, [453a] οἷον ὅτι τρίτῃ ἡμέρᾳ ὁδήποτε ἐποίησεν, ὁτὲ δὲ καὶ μέτρῳ· ἀλλὰ μέμνηται καὶ ἐὰν μὴ μέτρῳ. εἰώθασι δὲ λέγειν ὅτι μέμνηνται μέν, πότε μέντοι οὐκ ἴσασιν, ὅταν μὴ γνωρίζωσι τοῦ πότε τὸ ποσὸν μέτρῳ.

ὅτι μὲν οὖν οὐχ οἱ αὐτοὶ μνημονικοὶ καὶ ἀναμνηστικοί, ἐν τοῖς πρότερον εἴρηται. διαφέρει δὲ τοῦ μνημονεύειν τὸ ἀναμιμνήσκεσθαι οὐ μόνον κατὰ τὸν χρόνον, ἀλλ’ ὅτι τοῦ μὲν μνημονεύειν καὶ τῶν ἄλλων ζῴων μετέχει πολλά, τοῦ δ’ ἀναμιμνήσκεσθαι οὐδὲν ὡς εἰπεῖν τῶν γνωριζομένων ζῴων, πλὴν ἄνθρωπος. αἴτιον δ’ ὅτι τὸ ἀναμιμνήσκεσθαί ἐστιν οἷον συλλογισμός τις· ὅτι γὰρ πρότερον εἶδεν ἢ ἤκουσεν ἤ τι τοιοῦτον ἔπαθε, συλλογίζεται ὁ ἀναμιμνησκόμενος, καὶ ἔστιν οἷον ζήτησίς τις. τοῦτο δ’ οἷς καὶ τὸ βουλευτικὸν ὑπάρχει, φύσει μόνοις συμβέβηκεν· καὶ γὰρ τὸ βουλεύεσθαι συλλογισμός τίς ἐστιν.

ὅτι δ’ ἐστὶ σωματικόν τι τὸ πάθος, καὶ ἡ ἀνάμνησις ζήτησις ἐν τοιούτῳ φαντάσματος, σημεῖον τὸ παρενοχλεῖν ἐνίους ἐπειδὰν μὴ δύνωνται ἀναμνησθῆναι καὶ πάνυ ἐπέχοντες τὴν διάνοιαν, καὶ οὐκέτ’ ἐπιχειροῦντας ἀναμιμνήσκεσθαι οὐδὲν ἧττον, καὶ μάλιστα τοὺς μελαγχολικούς· τούτους γὰρ φαντάσματα κινεῖ μάλιστα. αἴτιον δὲ τοῦ μὴ ἐπ’ αὐτοῖς εἶναι [τὸ ἀναμιμνήσκεσθαι], ὅτι καθάπερ τοῖς βάλλουσιν οὐκέτι ἐπ’ αὐτοῖς τὸ στῆσαι, οὕτως καὶ ὁ ἀναμιμνησκόμενος καὶ θηρεύων σωματικόν τι κινεῖ, ἐν ᾧ τὸ πάθος. μάλιστα δ’ ἐνοχλοῦνται οἷς ἂν ὑγρότης τύχῃ ὑπάρχουσα περὶ τὸν αἰσθητικὸν τόπον· οὐ γὰρ ῥᾳδίως παύεται κινηθεῖσα, ἕως ἂν ἐπανέλθῃ τὸ ζητούμενον καὶ εὐθυπορήσῃ ἡ κίνησις. διὸ καὶ ὀργαὶ καὶ φόβοι, ὅταν τι κινήσωσιν, ἀντικινούντων πάλιν τούτων οὐ καθίστανται, ἀλλ’ ἐπὶ τὸ αὐτὸ ἀντικινοῦσιν. καὶ ἔοικε τὸ πάθος τοῖς ὀνόμασι καὶ μέλεσι καὶ λόγοις, ὅταν διὰ στόματος γένηταί τι αὐτῶν σφόδρα· παυσαμένοις γὰρ καὶ οὐ βουλομένοις ἐπέρχεται πάλιν ᾄδειν ἢ λέγειν. εἰσὶ δὲ καὶ οἱ τὰ ἄνω μείζω ἔχοντες καὶ οἱ νανώδεις [453b] ἀμνημονέστεροι τῶν ἐναντίων διὰ τὸ πολὺ βάρος ἔχειν ἐπὶ τῷ αἰσθητικῷ, καὶ μήτ’ ἐξ ἀρχῆς τὰς κινήσεις δύνασθαι ἐμμένειν ἀλλὰ διαλύεσθαι μήτ’ ἐν τῷ ἀναμιμνήσκεσθαι ῥᾳδίως εὐθυπορεῖν. οἱ δὲ πάμπαν νέοι καὶ λίαν γέροντες ἀμνήμονες διὰ τὴν κίνησιν· οἱ μὲν γὰρ ἐν φθίσει, οἱ δ’ ἐν αὐξήσει πολλῇ εἰσίν· ἔτι δὲ τά γε παιδία καὶ νανώδη ἐστὶ μέχρι πόρρω τῆς ἡλικίας.

περὶ μὲν οὖν μνήμης καὶ τοῦ μνημονεύειν, τίς ἡ φύσις αὐτῶν καὶ τίνι τῶν τῆς ψυχῆς μνημονεύει τὰ ζῷα, καὶ περὶ τοῦ ἀναμιμνήσκεσθαι, τί ἐστι καὶ πῶς γίγνεται καὶ διὰ τίνας αἰτίας, εἴρηται.

Περι Υπνον και Εγρηγορσεωσ (453b) On Sleep

[453b] Περὶ δὲ ὕπνου καὶ ἐγρηγόρσεως ἐπισκεπτέον τίνα τε τυγχάνει ὄντα, καὶ πότερον ἴδια τῆς ψυχῆς ἢ τοῦ σώματος ἢ κοινά, καὶ εἰ κοινά, τίνος μορίου τῆς ψυχῆς ἢ τοῦ σώματος, καὶ διὰ τίν’ αἰτίαν ὑπάρχει τοῖς ζῴοις· καὶ πότερον ἅπαντα κεκοινώνηκεν ἀμφοτέρων, ἢ τὰ μὲν θατέρου τὰ δὲ θατέρου μόνον, ἢ τὰ μὲν οὐδετέρου τὰ δὲ ἀμφοτέρων· πρὸς δὲ τούτοις τί ἐστι τὸ ἐνύπνιον, καὶ διὰ τίνα αἰτίαν οἱ καθεύδοντες ὁτὲ μὲν ὀνειρώττουσιν ὁτὲ δὲ οὔ, ἢ συμβαίνει μὲν ἀεὶ τοῖς καθεύδουσιν ἐνυπνιάζειν, ἀλλ’ οὐ μνημονεύουσιν, καὶ εἰ τοῦτο γίγνεται, διὰ τίνα αἰτίαν γίγνεται· καὶ πότερον ἐνδέχεται τὰ μέλλοντα προορᾶν ἢ οὐκ ἐνδέχεται, καὶ τίνα τρόπον εἰ ἐνδέχεται· καὶ πότερον τὰ μέλλοντα ὑπ’ ἀνθρώπου πράσσεσθαι μόνον, ἢ καὶ ὧν τὸ δαιμόνιον ἔχει τὴν αἰτίαν, καὶ φύσει γίγνεται ἢ ἀπὸ ταὐτομάτου.

πρῶτον μὲν οὖν τοῦτό γε φανερόν, ὅτι τῷ αὐτῷ τοῦ ζῴου ἥ τε ἐγρήγορσις ὑπάρχει καὶ ὁ ὕπνος· ἀντίκεινται γάρ, καὶ φαίνεται στέρησίς τις ὁ ὕπνος τῆς ἐγρηγόρσεως· ἀεὶ γὰρ τὰ ἐναντία καὶ ἐπὶ τῶν ἄλλων καὶ ἐν τοῖς φυσικοῖς ἐν τῷ αὐτῷ δεκτικῷ φαίνεται γιγνόμενα, καὶ τοῦ αὐτοῦ ὄντα πάθη, λέγω δ’ οἷον ὑγίεια καὶ νόσος, καὶ κάλλος καὶ αἶσχος, καὶ ἰσχὺς καὶ ἀσθένεια, καὶ ὄψις καὶ τυφλότης, καὶ ἀκοὴ καὶ κωφότης. ἔτι δὲ [454a] καὶ ἐκ τῶνδε δῆλον· ᾧ γὰρ τὸν ἐγρηγορότα γνωρίζομεν, τούτῳ καὶ τὸν καθυπνοῦντα· τὸν δὲ αἰσθανόμενον ἐγρηγορέναι νομίζομεν, καὶ τὸν ἐγρηγορότα πάντα ἢ τῶν ἔξωθέν τινος αἰσθάνεσθαι ἢ τῶν ἐν αὑτῷ κινήσεων. εἰ τοίνυν τὸ ἐγρηγορέναι ἐν μηδενὶ ἄλλῳ ἐστὶν ἢ τῷ αἰσθάνεσθαι, δῆλον ὅτι ᾧ περ αἰσθάνεται, τούτῳ καὶ ἐγρήγορε τὰ ἐγρηγορότα καὶ καθεύδει τὰ καθεύδοντα. ἐπεὶ δὲ οὔτε τῆς ψυχῆς ἴδιον τὸ αἰσθάνεσθαι οὔτε τοῦ σώματος (οὗ γὰρ ἡ δύναμις, τούτου καὶ ἡ ἐνέργεια· ἡ δὲ λεγομένη αἴσθησις ὡς ἐνέργεια κίνησίς τις διὰ τοῦ σώματος τῆς ψυχῆς ἐστι), φανερὸν ὡς οὔτε τῆς ψυχῆς τὸ πάθος ἴδιον, οὔτ’ ἄψυχον σῶμα δυνατὸν αἰσθάνεσθαι.

διωρισμένων δὲ πρότερον ἐν ἑτέροις περὶ τῶν λεγομένων ὡς μορίων τῆς ψυχῆς, καὶ τοῦ μὲν θρεπτικοῦ χωριζομένου τῶν ἄλλων ἐν τοῖς ἔχουσι σώμασι ζωήν, τῶν δ’ ἄλλων οὐδενὸς ἄνευ τούτου, δῆλον ὡς ὅσα μὲν αὐξήσεως καὶ φθίσεως μετέχει μόνον τῶν ζώντων, [ὅτι] τούτοις οὐχ ὑπάρχει ὕπνος οὐδὲ ἐγρήγορσις, οἷον τοῖς φυτοῖς (οὐ γὰρ ἔχουσι τὸ αἰσθητικὸν μόριον, οὔτε εἰ χωριστόν ἐστιν οὔτε εἰ μὴ χωριστόν· τῇ γὰρ δυνάμει καὶ τῷ εἶναι χωριστόν ἐστιν)· ὁμοίως δὲ καὶ ὅτι οὐδέν ἐστιν ὃ ἀεὶ ἐγρήγορεν ἢ ἀεὶ καθεύδει, ἀλλὰ τοῖς αὐτοῖς ὑπάρχει τῶν ζῴων ἀμφότερα τὰ πάθη ταῦτα. οὐ γάρ, εἴ τι ἔστι ζῷον ‹μὴ› ἔχον αἴσθησιν, τοῦτ' ἐνδέχεται οὔτε καθεύδειν οὔτε ἐγρηγορέναι (ἄμφω γάρ ἐστι τὰ πάθη ταῦτα περὶ αἴσθησιν τοῦ πρώτου αἰσθητικοῦ)· οὐκ ἐνδέχεται δὲ οὐδὲ θάτερον τούτων ἀεὶ ὑπάρχειν τῷ αὐτῷ, οἷον ἀεί τι γένος ζῴων καθεύδειν ἢ ἀεί τι ἐγρηγορέναι. ἔτι ὅσων ἔστι τι ἔργον κατὰ φύσιν, ὅταν ὑπερβάλλῃ τὸν χρόνον ὅσον δύναταί τι ποιεῖν, ἀνάγκη ἀδυνατεῖν, οἷον τὰ ὄμματα ὁρῶντα, καὶ παύεσθαι τοῦτο ποιοῦντα, ὁμοίως δὲ καὶ χεῖρα καὶ ἄλλο πᾶν οὗ ἔστι τι ἔργον. εἰ δή τινός ἐστιν ἔργον τὸ αἰσθάνεσθαι, καὶ τοῦτο, ἂν ὑπερβάλλῃ ὅσον ἦν χρόνον δυνάμενον αἰσθάνεσθαι συνεχῶς, ἀδυνατήσει καὶ οὐκέτι τοῦτο ποιήσει. εἰ τοίνυν τὸ ἐγρηγορέναι ὥρισται τῷ λελύσθαι [454b] τὴν αἴσθησιν, τῶν δ' ἐναντίων τῶν μὲν ἀνάγκη θάτερον ἀεὶ παρεῖναι τῶν δ' οὔ, τῷ δ' ἐγρηγορέναι τὸ καθεύδειν ἐναντίον, καὶ ἀναγκαῖον ἅπαντι θάτερον ὑπάρχειν, ἀναγκαῖον ἂν εἴη καθεύδειν. εἰ οὖν τὸ τοιοῦτον πάθος ὕπνος, τοῦτο δ' ἐστὶν ἀδυναμία δι' ὑπερβολὴν τοῦ ἐγρηγορέναι, ἡ δὲ τοῦ ἐγρηγορέναι ὑπερβολὴ ὁτὲ μὲν νοσώδης ὁτὲ δὲ ἄνευ νόσου γίγνεται, ὥστε καὶ ἡ ἀδυναμία καὶ ἡ διάλυσις ὡσαύτως ἔσται, ἀνάγκη πᾶν τὸ ἐγρηγορὸς ἐνδέχεσθαι καθεύδειν· ἀδύνατον γὰρ ἀεὶ ἐνεργεῖν.

ὁμοίως δὲ οὐδὲ καθεύδειν οὐδὲν ἀεὶ ἐνδέχεται. ὁ γὰρ ὕπνος πάθος τι τοῦ αἰσθητικοῦ μορίου ἐστίν, οἷον δεσμός τις καὶ ἀκινησία, ὥστ' ἀνάγκη πᾶν τὸ καθεῦδον ἔχειν τὸ αἰσθητικὸν μόριον. αἰσθητικὸν δὲ τὸ δυνατὸν αἰσθάνεσθαι κατ' ἐνέργειαν· ἐνεργεῖν δὲ τῇ αἰσθήσει κυρίως καὶ ἁπλῶς ἀδύνατον καθεῦδον ἅμα· διὸ ἀναγκαῖον ὕπνον πάντα ἐγερτὸν εἶναι. τὰ μὲν οὖν ἄλλα σχεδὸν ἅπαντα δῆλα κοινωνοῦνθ' ὕπνου, καὶ πλωτὰ καὶ πτηνὰ καὶ πεζά· καὶ γὰρ τὰ τῶν ἰχθύων γένη πάντα καὶ τὰ τῶν μαλακίων ὦπται καθεύδοντα, καὶ τἆλλα πάντα ὅσαπερ ἔχει ὀφθαλμούς· καὶ γὰρ τὰ σκληρόφθαλμα φανερὰ καὶ τὰ ἔντομα κοιμώμενα· βραχύυπνα δὲ τὰ τοιαῦτα πάντα, διὸ καὶ λάθοι ἄν τινα πολλάκις πότερον μετέχουσι τοῦ καθεύδειν ἢ οὔ. τῶν δ' ὀστρακοδέρμων κατὰ μὲν τὴν αἴσθησιν οὐδέ πω γέγονε φανερὸν εἰ καθεύδουσιν· εἰ δέ τῳ πιθανὸς ὁ λεχθεὶς λόγος, τοῦτο πεισθήσεται. ὅτι μὲν οὖν ὕπνου κοινωνεῖ τὰ ζῷα πάντα, φανερὸν ἐκ τούτων. τῷ γὰρ αἴσθησιν ἔχειν ὥρισται τὸ ζῷον, τῆς δ' αἰσθήσεως τρόπον τινὰ τὴν μὲν ἀκινησίαν καὶ οἷον δεσμὸν τὸν ὕπνον εἶναί φαμεν, τὴν δὲ λύσιν καὶ τὴν ἄνεσιν ἐγρήγορσιν. τῶν δὲ φυτῶν οὐδὲν οἷόν τε κοινωνεῖν οὐδετέρου τούτων τῶν παθημάτων· ἄνευ μὲν γὰρ αἰσθήσεως οὐχ ὑπάρχει οὔτε ὕπνος οὔτε ἐγρήγορσις· οἷς δ’ αἴσθησις ὑπάρχει, καὶ τὸ λυπεῖσθαι καὶ τὸ χαίρειν· οἷς δὲ ταῦτα, καὶ ἐπιθυμία· τοῖς δὲ φυτοῖς οὐδὲν ὑπάρχει τούτων. σημεῖον δ’ ὅτι καὶ τὸ ἔργον τὸ αὑτοῦ ποιεῖ τὸ θρεπτικὸν [455a] μόριον ἐν τῷ καθεύδειν μᾶλλον ἢ ἐν τῷ ἐγρηγορέναι· τρέφεται γὰρ καὶ αὐξάνεται τότε μᾶλλον, ὡς οὐδὲν προσδεόμενα πρὸς ταῦτα τῆς αἰσθήσεως.

Διὰ τί δὲ καθεύδει καὶ ἐγρήγορε καὶ διὰ ποίαν τινὰ αἴσθησιν ἢ ποίας, εἰ διὰ πλείους, σκεπτέον. ἐπεὶ δ’ ἔνια μὲν τῶν ζῴων ἔχει τὰς αἰσθήσεις πάσας, ἔνια δ’ οὐκ ἔχει, οἷον ὄψιν, τὴν δ’ ἁφὴν καὶ τὴν γεῦσιν ἅπαντα ἔχει, πλὴν εἴ τι τῶν ζῴων ἀτελές (εἴρηται δὲ περὶ αὐτῶν ἐν τοῖς Περὶ ψυχῆς), ἀδύνατον δ’ ἐστὶν ἁπλῶς ὁποιανοῦν αἴσθησιν αἰσθάνεσθαι τὸ καθεῦδον ζῷον, φανερὸν ὅτι πάσαις ἀναγκαῖον ὑπάρχειν τὸ αὐτὸ πάθος ἐν τῷ καλουμένῳ ὕπνῳ· εἰ γὰρ τῇ μέν, τῇ δὲ μή, ταύτῃ καθεῦδον αἰσθήσεται, τοῦτο δ’ ἀδύνατον. ἐπεὶ δ’ ὑπάρχει καθ’ ἑκάστην αἴσθησιν τὸ μέν τι ἴδιον, τὸ δέ τι κοινόν, ἴδιον μὲν οἷον τῇ ὄψει τὸ ὁρᾶν, τῇ δ’ ἀκοῇ τὸ ἀκούειν, καὶ ταῖς ἄλλαις ἑκάστῃ κατὰ τὸν αὐτὸν τρόπον, ἔστι δέ τις καὶ κοινὴ δύναμις ἀκολουθοῦσα πάσαις, ᾗ καὶ ὅτι ὁρᾷ καὶ ἀκούει αἰσθάνεται (οὐ γὰρ δὴ τῇ γε ὄψει ὁρᾷ ὅτι ὁρᾷ, καὶ κρίνει δὴ καὶ δύναται κρίνειν ὅτι ἕτερα τὰ γλυκέα τῶν λευκῶν οὔτε γεύσει οὔτε ὄψει οὔτε ἀμφοῖν, ἀλλά τινι κοινῷ μορίῳ τῶν αἰσθητηρίων ἁπάντων· ἔστι μὲν γὰρ μία αἴσθησις, καὶ τὸ κύριον αἰσθητήριον ἕν, τὸ δ’ εἶναι αἰσθήσει τοῦ γένους ἑκάστου ἕτερον, οἷον ψόφου καὶ χρώματος), τοῦτο δ’ ἅμα τῷ ἁπτικῷ μάλιστα ὑπάρχει (τοῦτο μὲν γὰρ χωρίζεται τῶν ἄλλων αἰσθητηρίων, τὰ δ’ ἄλλα τούτου ἀχώριστα, εἴρηται δὲ περὶ αὐτῶν ἐν τοῖς Περὶ ψυχῆς θεωρήμασιν), φανερὸν τοίνυν ὅτι τούτου ἐστὶ πάθος ἡ ἐγρήγορσις καὶ ὁ ὕπνος. διὸ καὶ πᾶσιν ὑπάρχει τοῖς ζῴοις· καὶ γὰρ ἡ ἁφὴ μόνη πᾶσιν· εἰ γὰρ τῷ πάσας τι πεπονθέναι τὰς αἰσθήσεις ἐγίγνετο τὸ καθεύδειν, ἄτοπον εἰ αἷς οὔτε ἀνάγκη οὔτε δυνατὸν τρόπον τινὰ ἐνεργεῖν ἅμα, ταύτας ἀναγκαῖον ἀργεῖν ἅμα καὶ ἀκινητίζειν· τοὐναντίον γὰρ εὐλογώτερον συνέβαινεν ἂν αὐταῖς, τὸ μὴ ἅμα ἠρεμεῖν. ὡς δὲ νῦν λέγομεν, εὐλόγως ἔχει καὶ περὶ τούτων· τοῦ γὰρ κυρίου τῶν ἄλλων πάντων αἰσθητηρίου, καὶ πρὸς ὃ συντείνει τἆλλα, πεπονθότος τι συμπάσχειν ἀναγκαῖον [455b] καὶ τὰ λοιπὰ πάντα, ἐκείνων δέ τινος ἀδυνατοῦντος οὐκ ἀνάγκη τοῦτ’ ἀδυνατεῖν.

φανερὸν δὲ ἐκ πολλῶν ὅτι οὐκ ἐν τῷ τὰς αἰσθήσεις ἀργεῖν καὶ μὴ χρῆσθαι αὐταῖς ὁ ὕπνος, οὐδ’ ἐν τῷ μὴ δύνασθαι αἰσθάνεσθαι (καὶ γὰρ ἐν ταῖς λειποψυχίαις τοιοῦτόν τι συμβαίνει· ἀδυναμία γὰρ αἰσθήσεως ἡ λειποψυχία, γίγνονται δὲ καὶ ἔκνοιαί τινες τοιαῦται· ἔτι δ’ οἱ τὰς ἐν τῷ αὐχένι φλέβας καταλαμβανόμενοι ἀναίσθητοι γίγνονται), ἀλλ’ ὅταν ἡ ἀδυναμία τῆς χρήσεως μήτ’ ἐν τῷ τυχόντι αἰσθητηρίῳ, μήτε δι’ ἣν ἔτυχεν αἰτίαν, ἀλλά, καθάπερ εἴρηται νῦν, ἐν τῷ πρώτῳ ᾧ αἰσθάνεται πάντων· ὅταν μὲν γὰρ τοῦτ’ ἀδυνατήσῃ, ἀνάγκη καὶ τοῖς αἰσθητηρίοις πᾶσιν ἀδυνατεῖν αἰσθέσθαι, ὅταν δ’ ἐκείνων τι, οὐκ ἀνάγκη τούτῳ.

δι’ ἣν δ’ αἰτίαν συμβαίνει τὸ καθεύδειν, καὶ ποῖόν τι τὸ πάθος ἐστί, λεκτέον. ἐπεὶ δὲ τρόποι πλείους τῆς αἰτίας (καὶ γὰρ τὸ τίνος ἕνεκεν, καὶ ὅθεν ἡ ἀρχὴ τῆς κινήσεως, καὶ τὴν ὕλην καὶ τὸν λόγον αἴτιον εἶναί φαμεν), πρῶτον μὲν οὖν ἐπειδὴ λέγομεν τὴν φύσιν ἕνεκά του ποιεῖν, τοῦτο δὲ ἀγαθόν τι, τὴν δ’ ἀνάπαυσιν παντὶ τῷ πεφυκότι κινεῖσθαι, μὴ δυναμένῳ δ’ ἀεὶ καὶ συνεχῶς κινεῖσθαι μεθ’ ἡδονῆς, ἀναγκαῖον εἶναι καὶ ὠφέλιμον, τῷ δὲ ὕπνῳ αὐτῇ τῇ ἀληθείᾳ προσάπτουσι τὴν μεταφορὰν ταύτην ὡς ἀναπαύσει ὄντι - ὥστε σωτηρίας ἕνεκα τῶν ζῴων ὑπάρχει. ἡ δ’ ἐγρήγορσις τέλος· τὸ γὰρ αἰσθάνεσθαι καὶ τὸ φρονεῖν πᾶσι τέλος οἷς ὑπάρχει θάτερον αὐτῶν. βέλτιστα γὰρ ταῦτα, τὸ δὲ τέλος βέλτιστον. ἔτι δὲ ἀναγκαῖον ἑκάστῳ τῶν ζῴων ὑπάρχειν τὸν ὕπνον. λέγω δ’ ἐξ ὑποθέσεως τὴν ἀνάγκην, ὅτι εἰ ζῷον ἔσται ἔχον τὴν αὑτοῦ φύσιν, ἐξ ἀνάγκης τινὰ ὑπάρχειν αὐτῷ δεῖ, καὶ τούτων ὑπαρχόντων ἕτερα ὑπάρχειν. ἔτι δὲ ποίας κινήσεως καὶ πράξεως ἐν τοῖς σώμασι γιγνομένης συμβαίνει τό τε ἐγρηγορέναι καὶ τὸ καθεύδειν τοῖς ζῴοις, μετὰ ταῦτα λεκτέον. τοῖς μὲν οὖν ἄλλοις ζῴοις καθάπερ τοῖς ἐναίμοις ὑποληπτέον εἶναι τὰ αἴτια τοῦ πάθους ἢ ταὐτὰ ἢ τὰ ἀνάλογον, τοῖς δ’ ἐναίμοις ἅπερ τοῖς ἀνθρώποις· ὥστε ἐκ τούτων πάντα θεωρητέον.

ὅτι μὲν οὖν ἡ τῆς αἰσθήσεως ἀρχὴ γίγνεται [456a] ἀπὸ τοῦ αὐτοῦ μέρους τοῖς ζῴοις ἀφ’ οὗπερ καὶ ἡ τῆς κινήσεως, διώρισται πρότερον ἐν ἑτέροις. αὕτη δέ ἐστι τριῶν διωρισμένων τόπων ὁ μέσος κεφαλῆς καὶ τῆς κάτω κοιλίας. τοῖς μὲν οὖν ἐναίμοις τοῦτ’ ἐστὶ τὸ περὶ τὴν καρδίαν μέρος. πάντα γὰρ τὰ ἔναιμα καρδίαν ἔχει, καὶ ἡ ἀρχὴ τῆς κινήσεως καὶ τῆς αἰσθήσεως τῆς κυρίας ἐντεῦθέν ἐστιν. τῆς μὲν οὖν κινήσεως φανερὸν ὅτι καὶ ἡ τοῦ πνεύματος ἀρχὴ καὶ ὅλως ἡ τῆς καταψύξεώς ἐστιν ἐνταῦθα, καὶ τὸ ἀναπνεῖν τε καὶ τὸ τῷ ὑγρῷ καταψύχεσθαι πρός γε τὴν σωτηρίαν τοῦ ἐν τούτῳ μορίῳ θερμοῦ ἡ φύσις πεπόρικεν· ῥηθήσεται δὲ περὶ αὐτῆς ὕστερον καθ’ αὑτήν. τοῖς δὲ ἀναίμοις καὶ τοῖς ἐντόμοις καὶ μὴ δεχομένοις πνεῦμα ἐν τῷ ἀνάλογον τὸ σύμφυτον πνεῦμα ἀναφυσώμενον καὶ συνιζάνον φαίνεται. δῆλον δὲ τοῦτο ἐπὶ τῶν ὁλοπτέρων, οἷον σφηκῶν καὶ μελιττῶν, καὶ ἐν ταῖς μυίαις καὶ ὅσα τοιαῦτα. ἐπεὶ δὲ κινεῖν μέν τι ἢ ποιεῖν ἄνευ ἰσχύος ἀδύνατον, ἰσχὺν δὲ ποιεῖ ἡ τοῦ πνεύματος κάθεξις, τοῖς μὲν εἰσφερομένοις ἡ θύραθεν, τοῖς δὲ μὴ ἀναπνέουσιν ἡ σύμφυτος (διὸ καὶ βομβοῦντα φαίνεται τὰ πτερωτά, ὅταν κινῆται, τῇ τρίψει τοῦ πνεύματος προσπίπτοντος πρὸς τὸ ὑπόζωμα τῶν ὁλοπτέρων), κινεῖται δὲ πᾶν αἰσθήσεώς τινος γενομένης, ἢ οἰκείας ἢ ἀλλοτρίας, ἐν τῷ πρώτῳ αἰσθητηρίῳ - εἰ δή ἐστιν ὁ ὕπνος καὶ ἡ ἐγρήγορσις πάθη τοῦ μορίου τούτου, ἐν ᾧ μὲν τόπῳ καὶ ἐν ᾧ μορίῳ πρώτῳ γίγνεται ὁ ὕπνος καὶ ἡ ἐγρήγορσις, φανερόν. κινοῦνται δ' ἔνιοι καθεύδοντες καὶ ποιοῦσι πολλὰ ἐγρηγορικά, οὐ μέντοι ἄνευ φαντάσματος καὶ αἰσθήσεώς τινος· τὸ γὰρ ἐνύπνιόν ἐστιν αἴσθημα τρόπον τινά· λεκτέον δὲ περὶ αὐτῶν ὕστερον. διότι δὲ τὰ μὲν ἐνύπνια μνημονεύουσιν ἐγερθέντες, τὰς δ' ἐγρηγορικὰς πράξεις ἀμνημονοῦσιν, ἐν τοῖς Προβληματικοῖς εἴρηται.

Ἐχόμενον δὲ τῶν εἰρημένων ἐστὶν ἐπελθεῖν τίνων γιγνομένων καὶ πόθεν ἡ ἀρχὴ τοῦ πάθους γίγνεται, τοῦ τ' ἐγρηγορέναι καὶ τοῦ καθεύδειν. φανερὸν δὴ ὅτι ἐπεὶ ἀναγκαῖον τῷ ζῴῳ, ὅταν αἴσθησιν ἔχῃ, τότε πρῶτον τροφήν τε λαμβάνειν καὶ αὔξησιν, τροφὴ δ' ἐστὶ πᾶσιν ἡ ἐσχάτη τοῖς μὲν ἐναίμοις ἡ τοῦ αἵματος φύσις, τοῖς δ' ἀναίμοις τὸ ἀνάλογον, [456b] τόπος δὲ τοῦ αἵματος αἱ φλέβες, τούτων δ' ἀρχὴ ἡ καρδία (φανερὸν δὲ τὸ λεχθὲν ἐκ τῶν ἀνατομῶν) - τῆς μὲν οὖν θύραθεν τροφῆς εἰσιούσης εἰς τοὺς δεκτικοὺς τόπους γίγνεται ἡ ἀναθυμίασις εἰς τὰς φλέβας, ἐκεῖ δὲ μεταβάλλουσα ἐξαιματοῦται καὶ πορεύεται ἐπὶ τὴν ἀρχήν. εἴρηται δὲ περὶ τούτων ἐν τοῖς Περὶ τροφῆς· νῦν δὲ ἀναληπτέον ὑπὲρ αὐτῶν τούτου χάριν, ὅπως τὰς ἀρχὰς τῆς κινήσεως θεωρήσωμεν, καὶ τί πάσχοντος τοῦ μορίου τοῦ αἰσθητικοῦ συμβαίνει ἡ ἐγρήγορσις καὶ ὁ ὕπνος. οὐ γάρ ἐστιν ὁ ὕπνος ἡτισοῦν ἀδυναμία τοῦ αἰσθητικοῦ, καθάπερ εἴρηται· καὶ γὰρ ἔκνοια καὶ πνιγμός τις καὶ λειποψυχία ποιεῖ τὴν τοιαύτην ἀδυναμίαν. ἤδη δὲ γεγένηταί τισι καὶ φαντασία λειποψυχήσασιν ἰσχυρῶς.

τοῦτο μὲν οὖν ἔχει τινὰ ἀπορίαν· εἰ γὰρ ἐνδέχεται καταδαρθεῖν τὸν λειποψυχήσαντα, ἐνδέχοιτ' ἂν ἐνύπνιον εἶναι καὶ τὸ φάντασμα. πολλὰ δ' ἐστὶν ἃ λέγουσιν οἱ σφόδρα λειποψυχήσαντες καὶ δόξαντες τεθνάναι· περὶ ὧν τὸν αὐτὸν λόγον ὑποληπτέον εἶναι πάντων. ἀλλὰ γάρ, ὥσπερ εἴπομεν, οὐκ ἔστιν ὁ ὕπνος ἀδυναμία πᾶσα τοῦ αἰσθητικοῦ, ἀλλ' ἐκ τῆς περὶ τὴν τροφὴν ἀναθυμιάσεως γίγνεται τὸ πάθος τοῦτο· ἀνάγκη γὰρ τὸ ἀναθυμιώμενον μέχρι του ὠθεῖσθαι, εἶτ' ἀντιστρέφειν καὶ μεταβάλλειν καθάπερ εὔριπον. τὸ δὲ θερμὸν ἑκάστου τῶν ζῴων πρὸς τὸ ἄνω πέφυκε φέρεσθαι· ὅταν δ' ἐν τοῖς ἄνω τόποις γένηται, ἀθρόον πάλιν ἀντιστρέφει καὶ καταφέρεται. διὸ μάλιστα γίγνονται ὕπνοι ἀπὸ τῆς τροφῆς· ἀθρόον γὰρ πολὺ τό τε ὑγρὸν καὶ τὸ σωματῶδες ἀναφέρεται. ἱστάμενον μὲν οὖν βαρύνει καὶ ποιεῖ νυστάζειν· ὅταν δὲ ῥέψῃ κάτω καὶ ἀντιστρέψαν ἀπώσῃ τὸ θερμόν, τότε γίγνεται ὁ ὕπνος καὶ τὸ ζῷον καθεύδει. σημεῖον δὲ τούτων καὶ τὰ ὑπνωτικά· πάντα γὰρ καρηβαρίαν ποιεῖ, καὶ τὰ ποτὰ καὶ τὰ βρωτά, μήκων, μανδραγόρας, οἶνος, αἶραι. καὶ καταφερόμενοι καὶ νυστάζοντες τοῦτο δοκοῦσι πάσχειν, καὶ ἀδυνατοῦσιν αἴρειν τὴν κεφαλὴν καὶ τὰ βλέφαρα. καὶ μετὰ τὰ σιτία μάλιστα τοιοῦτος ὁ ὕπνος· πολλὴ γὰρ ἡ ἀπὸ τῶν σιτίων ἀναθυμίασις. ἔτι δ’ ἐκ κόπων ἐνίων· ὁ μὲν γὰρ κόπος συντηκτικόν, τὸ δὲ σύντηγμα γίγνεται ὥσπερ τροφὴ ἄπεπτος, [457a] ἂν μὴ ψυχρὸν ᾖ. καὶ νόσοι δέ τινες τὸ αὐτὸ τοῦτο ποιοῦσιν, ὅσαι ἀπὸ περιττώματος ὑγροῦ καὶ θερμοῦ, οἷον συμβαίνει τοῖς πυρέττουσι καὶ ἐν τοῖς ληθάργοις. ἔτι δ’ ἡ πρώτη ἡλικία· τὰ γὰρ παιδία καθεύδει σφόδρα διὰ τὸ τὴν τροφὴν ἄνω φέρεσθαι πᾶσαν. σημεῖον δὲ τὸ ὑπερβάλλειν τὸ μέγεθος τῶν ἄνω πρὸς τὰ κάτω κατὰ τὴν πρώτην ἡλικίαν, διὰ τὸ ἐπὶ ταῦτα γίγνεσθαι τὴν αὔξησιν. διὰ ταύτην δὲ τὴν αἰτίαν καὶ ἐπιληπτικὰ γίγνεται· ὅμοιον γὰρ ὁ ὕπνος ἐπιλήψει, καὶ ἔστιν τρόπον τινὰ ὁ ὕπνος ἐπίληψις. διὸ καὶ συμβαίνει τισὶν ἡ ἀρχὴ τούτου τοῦ πάθους καθεύδουσιν, καὶ καθεύδοντες μὲν ἁλίσκονται, ἐγρηγορότες δ’ οὔ· ὅταν γὰρ πολὺ φέρηται τὸ πνεῦμα ἄνω, καταβαῖνον πάλιν τὰς φλέβας ὀγκοῖ, καὶ συνθλίβει τὸν πόρον δι’ οὗ ἡ ἀναπνοὴ γίγνεται. διὸ τοῖς παιδίοις οὐ συμφέρουσιν οἱ οἶνοι, οὐδὲ ταῖς τίτθαις (διαφέρει γὰρ ἴσως οὐδὲν αὐτὰ πίνειν ἢ τὰς τίτθας), ἀλλὰ δεῖ πίνειν ὑδαρῆ καὶ ὀλίγον· πνευματῶδες γὰρ ὁ οἶνος καὶ τούτου μᾶλλον ὁ μέλας. οὕτω δὲ τὰ ἄνω πλήρη τροφῆς τοῖς παιδίοις, ὥστε πέντε μηνῶν οὐδὲ στρέφουσι τὸν αὐχένα· ὥσπερ γὰρ τοῖς σφόδρα μεθύουσιν, ὑγρότης ἀναφέρεται πολλή. εὔλογον δὲ τοῦτ’ εἶναι τὸ πάθος αἴτιον καὶ τοῦ ἠρεμεῖν ἐν ταῖς μήτραις τὰ ἔμβρυα τὸ πρῶτον. καὶ τὸ ὅλον δὲ φίλυπνοι οἱ ἀδηλόφλεβοι καὶ οἱ νανώδεις καὶ οἱ μεγαλοκέφαλοι· τῶν μὲν γὰρ αἱ φλέβες στεναί, ὥστ’ οὐ ῥᾴδιον διαρρεῖν κατιὸν τὸ ὑγρόν, τοῖς δὲ νανώδεσι καὶ μεγαλοκεφάλοις ἡ ἄνω ὁρμὴ πολλὴ καὶ ἀναθυμίασις. οἱ δὲ φλεβώδεις οὐχ ὑπνωτικοὶ δι’ εὔροιαν τῶν πόρων, ἂν μή τι ἄλλο πάθος ἔχωσιν ὑπεναντίον. οὐδ’ οἱ μελαγχολικοί· κατέψυκται γὰρ ὁ εἴσω τόπος, ὥστ’ οὐ γίγνεται πλῆθος αὐτοῖς ἀναθυμιάσεως. διὰ τοῦτο γὰρ καὶ βρωτικοί, σκληφροὶ ὄντες· ὥσπερ γὰρ οὐδὲν ἀπολελαυκότα διάκειται τὰ σώματα αὐτοῖς. ἡ δὲ μέλαινα χολὴ φύσει ψυχρὰ οὖσα καὶ τὸν θρεπτικὸν τόπον ψυχρὸν ποιεῖ καὶ τὰ ἄλλα μόρια, ὅπου ἂν ὑπάρχῃ δυνάμει τὸ τοιοῦτον περίττωμα. ὥστε φανερὸν ἐκ [457b] τῶν εἰρημένων ὅτι ὁ ὕπνος ἐστὶ σύνοδός τις τοῦ θερμοῦ εἴσω καὶ ἀντιπερίστασις φυσικὴ διὰ τὴν εἰρημένην αἰτίαν· διὸ πολλὴ ἡ κίνησις τοῦ ὑπνοῦντος. ὅθεν δ’ ἐκλείπει, καταψύχεται καὶ διὰ ψῦξιν καταπίπτει τὰ βλέφαρα, καὶ τὰ μὲν ἄνω κατέψυκται καὶ τὰ ἔξω, τὰ δ’ ἔντος καὶ τὰ κάτω θερμά, οἷον τὰ περὶ τοὺς πόδας καὶ τὰ εἴσω.

καίτοι τοῦτό τις ἀπορήσειεν ἄν, ὅτι μετὰ τὰ σιτία ἰσχυρότατος ὁ ὕπνος γίγνεται, καὶ ἔστιν ὑπνωτικὰ οἶνος καὶ ἄλλα θερμότητα ἔχοντα τοιαῦτα, ἔστι δ’ οὐκ εὔλογον τὸν μὲν ὕπνον εἶναι κατάψυξιν, τὰ δ’ αἴτια τοῦ καθεύδειν θερμά. πότερον οὖν τοῦτο συμβαίνει ὅτι ὥσπερ ἡ κοιλία κενὴ μὲν οὖσα θερμή ἐστιν, ἡ δὲ πλήρωσις αὐτὴν καταψύχει διὰ τὴν κίνησιν, οὕτω καὶ οἱ ἐν τῇ κεφαλῇ πόροι καὶ τόποι καταψύχονται ἀναφερομένης τῆς ἀναθυμιάσεως; ἢ ὥσπερ τοῖς προσχεομένοις τὸ θερμὸν ἐξαίφνης φρίκη γίγνεται, κἀκεῖ ἀνιόντος τοῦ θερμοῦ ἀθροιζόμενον τὸ ψυχρὸν καταψύχει, καὶ τὸ κατὰ φύσιν θερμὸν ποιεῖ ἐξαδυνατεῖν καὶ ὑποχωρεῖν; ἔτι δὲ πολλῆς ἐμπιπτούσης τροφῆς, ἣν ἀνάγει τὸ θερμόν, ὥσπερ τὸ πῦρ ἐπιτιθεμένων τῶν ξύλων, καταψύχεται, ἕως ἂν καταπεφθῇ. γίγνεται γὰρ ὁ ὕπνος, ὥσπερ εἴρηται, τοῦ σωματώδους ἀναφερομένου ὑπὸ τοῦ θερμοῦ διὰ τῶν φλεβῶν πρὸς τὴν κεφαλήν· ὅταν δὲ μηκέτι δύνηται, ἀλλὰ τῷ πλήθει ὑπερβάλλῃ τὸ ἀναχθέν, πάλιν ἀνταπωθεῖται καὶ κάτω ῥεῖ (διὸ καὶ πίπτουσί γε ὑποσπωμένου τοῦ θερμοῦ τοῦ ἀνάγοντος οἱ ἄνθρωποι· μόνον γὰρ ὀρθὸν τῶν ζῴων), καὶ ἐπιπεσὸν μὲν ἔκνοιαν ποιεῖ, ὕστερον δὲ φαντασίαν.

ἢ αἱ μὲν νῦν λεγόμεναι λύσεις ἐνδεχόμεναι μέν εἰσι τοῦ γίγνεσθαι τὴν κατάψυξιν, οὐ μὴν ἀλλὰ κύριός γ’ ἐστὶν ὁ τόπος ὁ περὶ τὸν ἐγκέφαλον, ὥσπερ ἐν ἄλλοις εἴρηται. πάντων δ’ ἐστὶ τῶν ἐν τῷ σώματι ψυχρότατον ὁ ἐγκέφαλος, τοῖς δὲ μὴ ἔχουσι τὸ ἀνάλογον τούτῳ μόριον. ὥσπερ οὖν τὸ ἀπατμίζον ὑγρὸν ὑπὸ τῆς τοῦ ἡλίου θερμότητος, ὅταν ἔλθῃ εἰς τὸν ἄνω τόπον, διὰ τὴν ψυχρότητα αὐτοῦ καταψύχεται καὶ συστὰν καταφέρεται [458a] γενόμενον πάλιν ὕδωρ, οὕτως ἐν τῇ ἀναφορᾷ τοῦ θερμοῦ τῇ πρὸς τὸν ἐγκέφαλον ἡ μὲν περιττωματικὴ ἀναθυμίασις εἰς φλέγμα συνίσταται (διὸ καὶ οἱ κατάρροι φαίνονται γιγνόμενοι ἐκ τῆς κεφαλῆς), ἡ δὲ τρόφιμος καὶ μὴ νοσώδης καταφέρεται συνισταμένη καὶ καταψύχει τὸ θερμόν. πρὸς δὲ τὸ καταψύχεσθαι καὶ μὴ δέχεσθαι ῥᾳδίως τὴν ἀναθυμίασιν συμβάλλεται καὶ ἡ λεπτότης καὶ [ἡ] στενότης τῶν περὶ τὸν ἐγκέφαλον φλεβῶν. τῆς μὲν οὖν καταψύξεως τοῦτ’ ἐστὶν αἴτιον, καίπερ τῆς ἀναθυμιάσεως ὑπερβαλλούσης τῇ θερμότητι.

ἐγείρεται δ’ ὅταν πεφθῇ καὶ κρατήσῃ ἡ συνεωσμένη θερμότης ἐν ὀλίγῳ πολλὴ ἐκ τοῦ περιεστῶτος, καὶ διακριθῇ τό τε σωματωδέστερον αἷμα καὶ τὸ καθαρώτερον. ἔστι δὲ λεπτότατον μὲν αἷμα καὶ καθαρώτατον τὸ ἐν τῇ κεφαλῇ, παχύτατον δὲ καὶ θολερώτατον τὸ ἐν τοῖς κάτω μέρεσιν. παντὸς δὲ τοῦ αἵματος ἀρχή, ὥσπερ εἴρηται καὶ ἐνταῦθα καὶ ἐν ἄλλοις, ἡ καρδία. τῶν δ’ ἐν τῇ καρδίᾳ ἑκατέρας τῆς θαλάμης κοινὴ ἡ μέση· ἐκείνων δ’ ἑκατέρα δέχεται ἐξ ἑκατέρας τῆς φλεβός, τῆς τε μεγάλης καλουμένης καὶ τῆς ἀορτῆς· ἐν δὲ τῇ μέσῃ γίγνεται ἡ διάκρισις. ἀλλὰ τὸ μὲν διορίζειν περὶ τούτων ἑτέρων ἐστὶ λόγων οἰκειότερον· διὰ δὲ τὸ γίγνεσθαι ἀδιακριτώτερον τὸ αἷμα μετὰ τὴν τῆς τροφῆς προσφορὰν ὕπνος γίγνεται, ἕως ἂν διακριθῇ τοῦ αἵματος τὸ μὲν καθαρώτερον εἰς τὰ ἄνω, τὸ δὲ θολερώτερον εἰς τὰ κάτω· ὅταν δὲ τοῦτο συμβῇ, ἐγείρονται ἀπολυθέντα τοῦ ἐκ τῆς τροφῆς βάρους.

τί μὲν οὖν τὸ αἴτιον τοῦ καθεύδειν εἴρηται, ὅτι ἡ [ὑπὸ] τοῦ σωματώδους τοῦ ἀναφερομένου ὑπὸ τοῦ συμφύτου θερμοῦ ἀντιπερίστασις ἀθρόως ἐπὶ τὸ πρῶτον αἰσθητήριον· καὶ τί ἐστιν ὁ ὕπνος, ὅτι τοῦ πρώτου αἰσθητηρίου κατάληψις πρὸς τὸ μὴ δύνασθαι ἐνεργεῖν, ἐξ ἀνάγκης μὲν γινόμενος (οὐ γὰρ ἐνδέχεται ζῷον εἶναι μὴ συμβαινόντων τῶν ἀπεργαζομένων αὐτό), ἕνεκα δὲ σωτηρίας· σῴζει γὰρ ἡ ἀνάπαυσις.

Περι Ενυπνιων (458a) On Dreams

[458a] Μετὰ δὲ ταῦτα περὶ ἐνυπνίου ἐπιζητητέον, καὶ πρῶτον [458b] τίνι τῶν τῆς ψυχῆς φαίνεται, καὶ πότερον τοῦ νοητικοῦ τὸ πάθος ἐστὶ τοῦτο ἢ τοῦ αἰσθητικοῦ· τούτοις γὰρ μόνοις τῶν ἐν ἡμῖν γνωρίζομέν τι. εἰ δ’ ἡ χρῆσις ὄψεως ὅρασις, καὶ ἀκοῆς τὸ ἀκούειν, καὶ ὅλως αἰσθήσεως τὸ αἰσθάνεσθαι, κοινὰ δ’ ἐστὶ τῶν αἰσθήσεων οἷον σχῆμα καὶ μέγεθος καὶ κίνησις καὶ τἆλλα τὰ τοιαῦτα, ἴδια δ’ οἷον χρῶμα ψόφος χυμός, ἀδυνατεῖ δὲ πάντα μύοντα καὶ καθεύδοντα ὁρᾶν, ὁμοίως δὲ καὶ ἐπὶ τῶν λοιπῶν, δῆλον ὅτι οὐκ αἰσθανόμεθα οὐδὲν ἐν τοῖς ὕπνοις· οὐκ ἄρα γε τῇ αἰσθήσει τὸ ἐνύπνιον αἰσθανόμεθα.

ἀλλὰ μὴν οὐδὲ τῇ δόξῃ· οὐ γὰρ μόνον τὸ προσιόν φαμεν ἄνθρωπον ἢ ἵππον εἶναι, ἀλλὰ καὶ λευκὸν ἢ καλόν· ὧν ἡ δόξα ἄνευ αἰσθήσεως οὐδὲν ἂν φήσειεν, οὔτ’ ἀληθῶς οὔτε ψευδῶς. ἐν δὲ τοῖς ὕπνοις συμβαίνει τὴν ψυχὴν τοῦτο ποιεῖν· ὁμοίως γὰρ ὅτι ἄνθρωπος καὶ ὅτι λευκὸς ὁ προσιὼν δοκοῦμεν ὁρᾶν. ἔτι παρὰ τὸ ἐνύπνιον ἐννοοῦμεν ἄλλο τι, καθάπερ ἐν τῷ ἐγρηγορέναι αἰσθανόμενοί τι. περὶ οὗ γὰρ αἰσθανόμεθα, πολλάκις καὶ διανοούμεθά τι· οὕτω καὶ ἐν τοῖς ὕπνοις παρὰ τὰ φαντάσματα ἐνίοτε ἄλλα ἐννοοῦμεν. φανείη δ’ ἄν τῳ τοῦτο, εἴ τις προσέχοι τὸν νοῦν καὶ πειρῷτο μνημονεύειν ἀναστάς. ἤδη δέ τινες καὶ ἑωράκασιν ἐνύπνια τοιαῦτα, οἷον οἱ δοκοῦντες κατὰ τὸ μνημονικὸν παράγγελμα τίθεσθαι τὰ προβαλλόμενα· συμβαίνει γὰρ αὐτοῖς πολλάκις ἄλλο τι παρὰ τὸ ἐνύπνιον τίθεσθαι πρὸ ὀμμάτων εἰς τὸν τόπον φάντασμα· ὥστε δῆλον ὅτι οὐκ ἐνύπνιον πᾶν τὸ ἐν ὕπνῳ φάντασμα, καὶ ὅτι ὃ ἐννοοῦμεν τῇ δόξῃ δοξάζομεν. δῆλον δὲ περὶ τούτων ἁπάντων τό γε τοσοῦτον, ὅτι τὸ αὐτὸ ᾧ καὶ ἐγρηγορότες ἐν ταῖς νόσοις ἀπατώμεθα, τοῦτ’ αὐτὸ καὶ ἐν τῷ ὕπνῳ ποιεῖ τὸ πάθος. καὶ ὑγιαίνουσι δὲ καὶ εἰδόσιν ὅμως ὁ ἥλιος ποδιαῖος εἶναι δοκεῖ. ἀλλ’ εἴτε δὴ ταὐτὸν εἴθ’ ἕτερον τὸ φανταστικὸν τῆς ψυχῆς καὶ τὸ αἰσθητικόν, οὐδὲν ἧττον οὐ γίνεται ἄνευ τοῦ ὁρᾶν καὶ αἰσθάνεσθαί τι· τὸ γὰρ παρορᾶν καὶ παρακούειν ὁρῶντος ἀληθές τι καὶ ἀκούοντος, οὐ μέντοι τοῦτο ὃ οἴεται. ἐν δὲ τῷ ὕπνῳ ὑπόκειται μηδὲν ὁρᾶν [459a] μηδ’ ἀκούειν μηδ’ ὅλως αἰσθάνεσθαι. ἆρ’ οὖν τὸ μὲν μὴ ὁρᾶν μηδὲν ἀληθές, τὸ δὲ μηδὲν πάσχειν τὴν αἴσθησιν οὐκ ἀληθές, ἀλλ’ ἐνδέχεται καὶ τὴν ὄψιν πάσχειν τι καὶ τὰς ἄλλας αἰσθήσεις, ἕκαστον δὲ τούτων ὥσπερ ἐγρηγορότος προσβάλλει μέν πως τῇ αἰσθήσει, οὐχ οὕτω δὲ ὥσπερ ἐγρηγορότος· καὶ ὁτὲ μὲν ἡ δόξα λέγει ὅτι ψεῦδος, ὥσπερ ἐγρηγορόσιν, ὁτὲ δὲ κατέχεται καὶ ἀκολουθεῖ τῷ φαντάσματι;

ὅτι μὲν οὖν οὐκ ἔστι τοῦ δοξάζοντος οὐδὲ τοῦ διανοουμένου τὸ πάθος τοῦτο ὃ καλοῦμεν ἐνυπνιάζειν, φανερόν. ἀλλ’ οὐδὲ τοῦ αἰσθανομένου ἁπλῶς· ὁρᾶν γὰρ ἂν ἦν καὶ ἀκούειν ἁπλῶς. ἀλλὰ πῶς δὴ καὶ τίνα τρόπον, ἐπισκεπτέον. ὑποκείσθω μὲν οὖν, ὅπερ ἐστὶ καὶ φανερόν, ὅτι τοῦ αἰσθητικοῦ τὸ πάθος, εἴπερ καὶ ὁ ὕπνος· οὐ γὰρ ἄλλῳ μέν τινι τῶν ζῴων ὑπάρχει ὁ ὕπνος, ἄλλῳ δὲ τὸ ἐνυπνιάζειν, ἀλλὰ τῷ αὐτῷ. ἐπεὶ δὲ περὶ φαντασίας ἐν τοῖς Περὶ ψυχῆς εἴρηται, καὶ ἔστι μὲν τὸ αὐτὸ τῷ αἰσθητικῷ τὸ φανταστικόν, τὸ δ’ εἶναι φανταστικῷ καὶ αἰσθητικῷ ἕτερον, ἔστι δὲ φαντασία ἡ ὑπὸ τῆς κατ’ ἐνέργειαν αἰσθήσεως γινομένη κίνησις, τὸ δ’ ἐνύπνιον φάντασμά τι φαίνεται εἶναι (τὸ γὰρ ἐν ὕπνῳ φάντασμα ἐνύπνιον λέγομεν, εἴθ’ ἁπλῶς εἴτε τρόπον τινὰ γινόμενον), φανερὸν ὅτι τοῦ αἰσθητικοῦ μέν ἐστι τὸ ἐνυπνιάζειν, τούτου δ’ ᾗ φανταστικόν.

Τί δ’ ἐστὶ τὸ ἐνύπνιον, καὶ πῶς γίνεται, ἐκ τῶν περὶ τὸν ὕπνον συμβαινόντων μάλιστ’ ἂν θεωρήσαιμεν. τὰ γὰρ αἰσθητὰ καθ’ ἕκαστον αἰσθητήριον ἡμῖν ἐμποιοῦσιν αἴσθησιν, καὶ τὸ γινόμενον ὑπ’ αὐτῶν πάθος οὐ μόνον ἐνυπάρχει ἐν τοῖς αἰσθητηρίοις ἐνεργουσῶν τῶν αἰσθήσεων, ἀλλὰ καὶ ἀπελθουσῶν. παραπλήσιον γὰρ τὸ πάθος ἐπί τε τούτων καὶ ἐπὶ τῶν φερομένων ἔοικεν εἶναι. καὶ γὰρ ἐπὶ τῶν φερομένων τοῦ κινήσαντος οὐκέτι θιγγάνοντος κινεῖται· τὸ γὰρ κινῆσαν ἐκίνησεν ἀέρα τινά, καὶ πάλιν οὗτος κινούμενος ἕτερον· καὶ τοῦτον δὴ τὸν τρόπον, ἕως ἂν στῇ, ποιεῖται τὴν κίνησιν καὶ ἐν [459b] ἀέρι καὶ ἐν τοῖς ὑγροῖς.

ὁμοίως δὲ ὑπολαβεῖν τοῦτο δεῖ καὶ ἐπ’ ἀλλοιώσεως· τὸ γὰρ θερμανθὲν ὑπὸ τοῦ θερμοῦ τὸ πλησίον θερμαίνει, καὶ τοῦτο διαδίδωσιν ἕως τῆς ἀρχῆς. ὥστε καὶ ἐν τῷ αἰσθάνεσθαι, ἐπειδή ἐστιν ἀλλοίωσίς τις ἡ κατ’ ἐνέργειαν αἴσθησις, ἀνάγκη τοῦτο συμβαίνειν. διὸ τὸ πάθος ἐστὶν οὐ μόνον ἐν αἰσθανομένοις τοῖς αἰσθητηρίοις, ἀλλὰ καὶ ἐν πεπαυμένοις, καὶ ἐν βάθει καὶ ἐπιπολῆς. φανερὸν δὲ ὅταν συνεχῶς αἰσθανώμεθά τι· μεταφερόντων γὰρ τὴν αἴσθησιν ἀκολουθεῖ τὸ πάθος, οἷον ἐκ τοῦ ἡλίου εἰς τὸ σκότος· συμβαίνει γὰρ μηδὲν ὁρᾶν διὰ τὴν ἔτι ὑποῦσαν κίνησιν ἐν τοῖς ὄμμασιν ὑπὸ τοῦ φωτός. κἂν πρὸς ἓν χρῶμα πολὺν χρόνον βλέψωμεν ἢ λευκὸν ἢ χλωρόν, τοιοῦτον φαίνεται ἐφ’ ὅπερ ἂν τὴν ὄψιν μεταβάλωμεν. κἂν πρὸς τὸν ἥλιον βλέψαντες ἢ ἄλλο τι λαμπρὸν μύσωμεν, παρατηρήσασι φαίνεται κατ’ εὐθυωρίαν, ᾗ συμβαίνει τὴν ὄψιν ὁρᾶν, πρῶτον μὲν τοιοῦτον τὴν χρόαν, εἶτα μεταβάλλει εἰς φοινικοῦν κἄπειτα πορφυροῦν, ἕως ἂν εἰς τὴν μέλαιναν ἔλθῃ χρόαν καὶ ἀφανισθῇ. καὶ ἀπὸ τῶν κινουμένων δὲ μεταβάλλουσιν, οἷον ἀπὸ τῶν ποταμῶν, μάλιστα δὲ ἀπὸ τῶν τάχιστα ῥεόντων, φαίνεται [γὰρ] τὰ ἠρεμοῦντα κινούμενα. γίνονται δὲ καὶ ἀπὸ τῶν μεγάλων ψόφων δύσκωφοι καὶ ἀπὸ τῶν ἰσχυρῶν ὀσμῶν δύσοσμοι, καὶ ἐπὶ τῶν ὁμοίων ‹ὁμοίως›. ταῦτά γε δὴ φανερῶς συμβαίνει τοῦτον τὸν τρόπον.

ὅτι δὲ ταχὺ τὰ αἰσθητήρια καὶ μικρᾶς διαφορᾶς αἰσθάνεται, σημεῖον τὸ ἐπὶ τῶν ἐνόπτρων γινόμενον· περὶ οὗ καὶ αὐτοῦ ἐπιστήσας σκέψαιτό τις ἂν καὶ ἀπορήσειεν. ἅμα δ’ ἐξ αὐτοῦ δῆλον ὅτι ὥσπερ καὶ ἡ ὄψις πάσχει, οὕτω καὶ ποιεῖ τι. ἐν γὰρ τοῖς ἐνόπτροις τοῖς σφόδρα καθαροῖς, ὅταν τῶν καταμηνίων ταῖς γυναιξὶ γινομένων ἐμβλέψωσιν εἰς τὸ κάτοπτρον, γίνεται τὸ ἐπιπολῆς τοῦ ἐνόπτρου οἷον νεφέλη αἱματώδης· κἂν μὲν καινὸν ᾖ τὸ κάτοπτρον, οὐ ῥᾴδιον ἐκμάξαι τὴν τοιαύτην κηλίδα, ἐὰν δὲ παλαιόν, ῥᾶον. αἴτιον δέ, ὥσπερ εἴπομεν, [460a] ὅτι οὐ μόνον πάσχει ἡ ὄψις ὑπὸ τοῦ ἀέρος, ἀλλὰ καὶ ποιεῖ τι καὶ κινεῖ, ὥσπερ καὶ τὰ λαμπρά· καὶ γὰρ ἡ ὄψις τῶν λαμπρῶν καὶ ἐχόντων χρῶμα. τὰ μὲν οὖν ὄμματα εὐλόγως, ὅταν ᾖ τὰ καταμήνια, διακεῖται ὥσπερ καὶ ἕτερον μέρος ὁτιοῦν· καὶ γὰρ φύσει τυγχάνουσι φλεβώδεις ὄντες. διὸ γινομένων τῶν καταμηνίων διὰ ταραχὴν καὶ φλεγμασίαν αἱματικὴν ἡμῖν μὲν ἡ ἐν τοῖς ὄμμασι διαφορὰ ἄδηλος, ἔνεστι δέ (ἡ γὰρ αὐτὴ φύσις σπέρματος καὶ καταμηνίων), ὁ δ’ ἀὴρ κινεῖται ὑπ’ αὐτῶν, καὶ τὸν ἐπὶ τῶν κατόπτρων ἀέρα συνεχῆ ὄντα ποιόν τινα ποιεῖ καὶ τοιοῦτον οἷον αὐτὸς πάσχει· ὁ δὲ τοῦ κατόπτρου τὴν ἐπιφάνειαν. ὥσπερ δὲ τῶν ἱματίων, τὰ μάλιστα καθαρὰ τάχιστα κηλιδοῦται· τὸ γὰρ καθαρὸν ἀκριβῶς δηλοῖ ὅ τι ἂν δέξηται, καὶ τὸ μάλιστα τὰς ἐλαχίστας κινήσεις. ὁ δὲ χαλκὸς διὰ μὲν τὸ λεῖος εἶναι ὁποιασοῦν ἁφῆς αἰσθάνεται μάλιστα (δεῖ δὲ νοῆσαι οἷον τρίψιν οὖσαν τὴν τοῦ ἀέρος ἁφὴν καὶ ὥσπερ ἔκμαξιν καὶ ἀνάπλυσιν), διὰ δὲ τὸ καθαρὸν ἔνδηλος γίνεται ὁπηλικηοῦν οὖσα. τοῦ δὲ μὴ ἀπιέναι ταχέως ἐκ τῶν καινῶν κατόπτρων αἴτιον τὸ καθαρὸν εἶναι καὶ λεῖον· διαδεύται γὰρ διὰ τῶν τοιούτων καὶ εἰς βάθος καὶ πάντῃ, διὰ μὲν τὸ καθαρὸν εἰς βάθος, διὰ δὲ τὸ λεῖον πάντῃ. ἐν δὲ τοῖς παλαιοῖς οὐκ ἐμμένει, ὅτι οὐχ ὁμοίως εἰσδύεται ἡ κηλὶς ἀλλ’ ἐπιπολαιότερον.

ὅτι μὲν οὖν καὶ ὑπὸ τῶν μικρῶν διαφορῶν γίνεται κίνησις, καὶ ὅτι ταχεῖα ἡ αἴσθησις, καὶ ὅτι οὐ μόνον πάσχει, ἀλλὰ καὶ ἀντιποιεῖ τὸ τῶν χρωμάτων αἰσθητήριον, φανερὸν ἐκ τούτων. μαρτυρεῖ δὲ τοῖς εἰρημένοις καὶ τὰ περὶ τοὺς οἴνους καὶ τὴν μυρεψίαν συμβαίνοντα. τό τε γὰρ παρασκευασθὲν ἔλαιον ταχέως λαμβάνει τὰς τῶν πλησίον ὀσμάς, καὶ οἱ οἶνοι τὸ αὐτὸ τοῦτο πάσχουσιν· οὐ γὰρ μόνον τῶν ἐμβαλλομένων ἢ ὑποκιρναμένων ἀλλὰ καὶ τῶν πλησίον τοῖς ἀγγείοις τιθεμένων ἢ πεφυκότων ἀναλαμβάνουσι τὰς ὀσμάς.

πρὸς δὲ τὴν ἐξ ἀρχῆς [460b] σκέψιν ὑποκείσθω ἓν μέν, ὅπερ ἐκ τῶν εἰρημένων φανερόν, ὅτι καὶ ἀπελθόντος τοῦ θύραθεν αἰσθητοῦ ἐμμένει τὰ αἰσθήματα αἰσθητὰ ὄντα, πρὸς δὲ τούτοις ὅτι ῥᾳδίως ἀπατώμεθα περὶ τὰς αἰσθήσεις ἐν τοῖς πάθεσιν ὄντες, ἄλλοι δὲ ἐν ἄλλοις, οἷον ὁ δειλὸς ἐν φόβῳ, ὁ δ’ ἐρωτικὸς ἐν ἔρωτι, ὥστε δοκεῖν ἀπὸ μικρᾶς ὁμοιότητος τὸν μὲν τοὺς πολεμίους ὁρᾶν, τὸν δὲ τὸν ἐρώμενον· καὶ ταῦτα ὅσῳ ἂν ἐμπαθέστερος ᾖ, τοσούτῳ ἀπ’ ἐλάσσονος ὁμοιότητος φαίνεται. τὸν αὐτὸν δὲ τρόπον καὶ ἐν ὀργαῖς καὶ ἐν πάσαις ἐπιθυμίαις εὐαπάτητοι γίνονται πάντες, καὶ μᾶλλον ὅσῳ ἂν μᾶλλον ἐν τοῖς πάθεσιν ὦσιν. διὸ καὶ τοῖς πυρέττουσιν ἐνίοτε φαίνεται ζῷα ἐν τοῖς τοίχοις ἀπὸ μικρᾶς ὁμοιότητος τῶν γραμμῶν συντιθεμένων. καὶ ταῦτ’ ἐνίοτε συνεπιτείνει τοῖς πάθεσιν οὕτως, ὥστε, ἂν μὲν μὴ σφόδρα κάμνωσι, μὴ λανθάνειν ὅτι ψεῦδος, ἐὰν δὲ μεῖζον ᾖ τὸ πάθος, καὶ κινεῖσθαι πρὸς αὐτά. αἴτιον δὲ τοῦ συμβαίνειν ταῦτα τὸ μὴ κατὰ τὴν αὐτὴν δύναμιν κρίνειν τό τε κύριον καὶ ᾧ τὰ φαντάσματα γίνεται. τούτου δὲ σημεῖον ὅτι φαίνεται μὲν ὁ ἥλιος ποδιαῖος, ἀντίφησι δὲ πολλάκις ἕτερόν τι πρὸς τὴν φαντασίαν. καὶ τῇ ἐπαλλάξει τῶν δακτύλων τὸ ἓν δύο φαίνεται, ἀλλ’ ὅμως οὔ φαμεν δύο· κυριωτέρα γὰρ τῆς ἁφῆς ἡ ὄψις. εἰ δ’ ἦν ἡ ἁφὴ μόνη, κἂν ἐκρίνομεν τὸ ἓν δύο. τοῦ δὲ διεψεῦσθαι αἴτιον ὅτι οὐ μόνον τοῦ αἰσθητοῦ κινοῦντος φαίνεται ἁδήποτε, ἀλλὰ καὶ τῆς αἰσθήσεως κινουμένης αὐτῆς, ἐὰν ὡσαύτως κινῆται ὥσπερ καὶ ὑπὸ τοῦ αἰσθητοῦ· λέγω δ’ οἷον ἡ γῆ δοκεῖ τοῖς πλέουσι κινεῖσθαι κινουμένης τῆς ὄψεως ὑπ’ ἄλλου.

Ἐκ δὴ τούτων φανερὸν ὅτι οὐ μόνον ἐγρηγορότων αἱ κινήσεις αἱ ἀπὸ τῶν αἰσθημάτων γινόμεναι τῶν τε θύραθεν καὶ τῶν ἐκ τοῦ σώματος ἐνυπάρχουσιν, ἀλλὰ καὶ ὅταν γένηται τὸ πάθος τοῦτο ὃ καλεῖται ὕπνος, καὶ μᾶλλον τότε φαίνονται. μεθ’ ἡμέραν μὲν γὰρ ἐκκρούονται ἐνεργουσῶν τῶν [461a] αἰσθήσεων καὶ τῆς διανοίας, καὶ ἀφανίζονται ὥσπερ παρὰ πολὺ πῦρ ἔλαττον καὶ λῦπαι καὶ ἡδοναὶ μικραὶ παρὰ μεγάλας, παυσαμένων δὲ ἐπιπολάζει καὶ τὰ μικρά· νύκτωρ δὲ δι’ ἀργίαν τῶν κατὰ μόριον αἰσθήσεων καὶ ἀδυναμίαν τοῦ ἐνεργεῖν, διὰ τὸ ἐκ τῶν ἔξω εἰς τὸ ἐντὸς γίνεσθαι τὴν τοῦ θερμοῦ παλίρροιαν, ἐπὶ τὴν ἀρχὴν τῆς αἰσθήσεως καταφέρονται καὶ γίνονται φανεραὶ καθισταμένης τῆς ταραχῆς.

δεῖ δὲ ὑπολαβεῖν ὥσπερ τὰς μικρὰς δίνας τὰς ἐν τοῖς ποταμοῖς γινομένας, οὕτω τὴν κίνησιν ἑκάστην γίνεσθαι συνεχῶς, πολλάκις μὲν ὁμοίως, πολλάκις δὲ διαλυομένας εἰς ἄλλα σχήματα διὰ τὴν ἀντίκρουσιν. διὸ καὶ μετὰ τὴν τροφὴν καὶ πάμπαν νέοις οὖσιν, οἷον τοῖς παιδίοις, οὐ γίνεται ἐνύπνια· πολλὴ γὰρ ἡ κίνησις διὰ τὴν ἀπὸ τῆς τροφῆς θερμότητα. ὥστε καθάπερ ἐν ὑγρῷ, ἐὰν σφόδρα κινῇ τις, ὁτὲ μὲν οὐθὲν φαίνεται εἴδωλον, ὁτὲ δὲ φαίνεται μέν, διεστραμμένον δὲ πάμπαν, ὥστε φαίνεσθαι ἀλλοῖον ἢ οἷόν ἐστιν, ἠρεμήσαντος δὲ καθαρὰ καὶ φανερά, οὕτω καὶ ἐν τῷ καθεύδειν τὰ φαντάσματα καὶ αἱ ὑπόλοιποι κινήσεις αἱ συμβαίνουσαι ἀπὸ τῶν αἰσθημάτων ὁτὲ μὲν ὑπὸ μείζονος οὔσης τῆς εἰρημένης κινήσεως ἀφανίζονται πάμπαν, ὁτὲ δὲ τεταραγμέναι φαίνονται αἱ ὄψεις καὶ τερατώδεις, καὶ οὐκ εἰρόμενα τὰ ἐνύπνια, οἷον τοῖς μελαγχολικοῖς καὶ πυρέττουσι καὶ οἰνωμένοις· πάντα γὰρ τὰ τοιαῦτα πάθη πνευματώδη ὄντα πολλὴν ποιεῖ κίνησιν καὶ ταραχήν. καθισταμένου δὲ καὶ διακρινομένου τοῦ αἵματος ἐν τοῖς ἐναίμοις, σῳζομένη τῶν αἰσθημάτων ἡ κίνησις ἀφ' ἑκάστου τῶν αἰσθητηρίων εἰρόμενά τε ποιεῖ τὰ ἐνύπνια, καὶ φαίνεσθαί τι καὶ δοκεῖν διὰ μὲν τὰ ἀπὸ τῆς ὄψεως καταφερόμενα ὁρᾶν, διὰ δὲ τὰ ἀπὸ τῆς ἀκοῆς ἀκούειν, ὁμοιοτρόπως δὲ καὶ ἀπὸ τῶν ἄλλων αἰσθητηρίων· τῷ μὲν γὰρ ἐκεῖθεν ἀφικνεῖσθαι τὴν κίνησιν πρὸς τὴν ἀρχὴν καὶ ἐγρηγορὼς δοκεῖ [461b] ὁρᾶν καὶ ἀκούειν καὶ αἰσθάνεσθαι, καὶ διὰ τὸ τὴν ὄψιν ἐνίοτε κινεῖσθαι δοκεῖν, οὐ κινουμένην, ὁρᾶν φαμεν, καὶ τῷ τὴν ἁφὴν δύο κινήσεις εἰσαγγέλλειν τὸ ἓν δύο δοκεῖ. ὅλως γὰρ τὸ ἀφ' ἑκάστης αἰσθήσεώς φησιν ἡ ἀρχή, ἐὰν μὴ ἑτέρα κυριωτέρα ἀντιφῇ. φαίνεται μὲν οὖν πάντως, δοκεῖ δὲ οὐ πάντως τὸ φαινόμενον, ἀλλ' ἂν τὸ ἐπικρῖνον κατέχηται ἢ μὴ κινῆται τὴν οἰκείαν κίνησιν.

ὥσπερ δ' εἴπομεν ὅτι ἄλλοι δι' ἄλλο πάθος εὐαπάτητοι, οὕτως ὁ καθεύδων διὰ τὸν ὕπνον καὶ τὸ κινεῖσθαι τὰ αἰσθητήρια καὶ τἆλλα τὰ συμβαίνοντα περὶ τὴν αἴσθησιν, ὥστε τὸ μικρὰν ἔχον ὁμοιότητα φαίνεται ἐκεῖνο. ὅταν γὰρ καθεύδῃ, κατιόντος τοῦ πλείστου αἵματος ἐπὶ τὴν ἀρχὴν συγκατέρχονται αἱ ἐνοῦσαι κινήσεις, αἱ μὲν δυνάμει αἱ δὲ ἐνεργείᾳ. οὕτω δ' ἔχουσιν ὥστε ἐν τῇ κινήσει τῃδὶ ἥδε ἐπιπολάσει ἐξ αὐτοῦ ἡ κίνησις, ἂν δ' αὕτη φθαρῇ, ἥδε. καὶ πρὸς ἀλλήλας δὴ ἔχουσιν ὥσπερ οἱ πεπλασμένοι βάτραχοι οἱ ἀνιόντες ἐν τῷ ὕδατι τηκομένου τοῦ ἁλός - οὕτως ἔνεισι δυνάμει, ἀνειμένου δὲ τοῦ κωλύοντος ἐνεργοῦσιν, καὶ λυόμεναι ἐν ὀλίγῳ τῷ λοιπῷ αἵματι τῷ ἐν τοῖς αἰσθητηρίοις κινοῦνται, ἔχουσαι ὁμοιότητα ὥσπερ τὰ ἐν τοῖς νέφεσιν, ἃ παρεικάζουσιν ἀνθρώποις καὶ κενταύροις ταχέως μεταβάλλοντα. τούτων δὲ ἕκαστόν ἐστιν, ὥσπερ εἴρηται, ὑπόλειμμα τοῦ ἐν τῇ ἐνεργείᾳ αἰσθήματος· καὶ ἀπελθόντος τοῦ ἀληθοῦς ἔνεστι, καὶ ἀληθὲς εἰπεῖν ὅτι τοιοῦτον οἷον Κορίσκος, ἀλλ' οὐ Κορίσκος. ὅτε δὲ ᾐσθάνετο, οὐκ ἔλεγε Κορίσκον τὸ κύριον καὶ τὸ ἐπικρῖνον, ἀλλὰ διὰ τοῦτο ἐκεῖνον Κορίσκον τὸν ἀληθινόν. ὃ δὴ καὶ αἰσθανόμενον λέγει τοῦτο, ἐὰν μὴ παντελῶς κατέχηται ὑπὸ τοῦ αἵματος, ὥσπερ αἰσθανόμενον τοῦτο κινεῖται ὑπὸ τῶν κινήσεων τῶν ἐν τοῖς αἰσθητηρίοις, καὶ δοκεῖ τὸ ὅμοιον αὐτὸ εἶναι τὸ ἀληθές· καὶ τοσαύτη τοῦ ὕπνου ἡ δύναμις ὥστε ποιεῖν τοῦτο λανθάνειν. ὥσπερ οὖν εἴ τινα λανθάνοι ὑποβαλλόμενος ὁ δάκτυλος τῷ ὀφθαλμῷ, [462a] οὐ μόνον φανεῖται ἀλλὰ καὶ δόξει εἶναι δύο τὸ ἕν, ἂν δὲ μὴ λανθάνῃ, φανεῖται μὲν οὐ δόξει δέ, οὕτω καὶ ἐν τοῖς ὕπνοις, ἐὰν μὲν αἰσθάνηται ὅτι καθεύδει, καὶ τοῦ πάθους ἐν ᾧ ἡ αἴσθησις τοῦ ὑπνωτικοῦ, φαίνεται μέν, λέγει δέ τι ἐν αὐτῷ ὅτι φαίνεται μὲν Κορίσκος, οὐκ ἔστι δὲ ὁ Κορίσκος (πολλάκις γὰρ καθεύδοντος λέγει τι ἐν τῇ ψυχῇ ὅτι ἐνύπνιον τὸ φαινόμενον)· ἐὰν δὲ λανθάνῃ ὅτι καθεύδει, οὐδὲν ἀντιφήσει τῇ φαντασίᾳ.

ὅτι δὲ ἀληθῆ λέγομεν καὶ εἰσὶ κινήσεις φανταστικαὶ ἐν τοῖς αἰσθητηρίοις, δῆλον, ἐάν τις προσέχων πειρᾶται μνημονεύειν ἃ πάσχομεν καταφερόμενοί τε καὶ ἐγειρόμενοι· ἐνίοτε γὰρ τὰ φαινόμενα εἴδωλα καθεύδοντι φωράσει ἐγειρόμενος κινήσεις οὔσας ἐν τοῖς αἰσθητηρίοις· καὶ ἐνίοις γε τῶν νεωτέρων καὶ πάμπαν διαβλέπουσιν, ἐὰν ᾖ σκότος, φαίνεται εἴδωλα πολλὰ κινούμενα, ὥστ᾽ ἐγκαλύπτεσθαι πολλάκις φοβουμένους. ἐκ δὴ τούτων ἁπάντων δεῖ συλλογίσασθαι ὅτι ἐστὶ τὸ ἐνύπνιον φάντασμα μέν τι καὶ ἐν ὕπνῳ· τὰ γὰρ ἄρτι λεχθέντα εἴδωλα οὐκ ἔστιν ἐνύπνια, οὐδ᾽ εἴ τι ἄλλο λελυμένων τῶν αἰσθήσεων φαίνεται· οὐδὲ τὸ ἐν ὕπνῳ φάντασμα πᾶν. πρῶτον μὲν γὰρ ἐνίοις συμβαίνει καὶ αἰσθάνεσθαί πῃ καὶ ψόφων καὶ φωτὸς καὶ χυμοῦ καὶ ἁφῆς, ἀσθενικῶς μέντοι καὶ οἷον πόρρωθεν· ἤδη γὰρ ἐν τῷ καθεύδειν ὑποβλέποντες, ὃ ἠρέμα ἑώρων φῶς τοῦ λύχνου καθεύδοντες, ὡς ᾤοντο, ἐπεγερθέντες εὐθὺς ἐγνώρισαν τὸ τοῦ λύχνου ὄν, καὶ ἀλεκτρυόνων καὶ κυνῶν φωνὴν ἠρέμα ἀκούοντες ἐγερθέντες σαφῶς ἐγνώρισαν. ἔνιοι δὲ καὶ ἀποκρίνονται ἐρωτώμενοι· ἐνδέχεται γὰρ τοῦ ἐγρηγορέναι καὶ καθεύδειν ἁπλῶς θατέρου ὑπάρχοντος θάτερόν πῃ ὑπάρχειν. ὧν οὐθὲν ἐνύπνιον φατέον, οὐδ᾽ ὅσαι δὴ ἐν τῷ ὕπνῳ γίνονται ἀληθεῖς ἔννοιαι παρὰ τὰ φαντάσματα, ἀλλὰ τὸ φάντασμα τὸ ἀπὸ τῆς κινήσεως τῶν αἰσθημάτων, ὅταν ἐν τῷ καθεύδειν ᾖ, ᾗ καθεύδει, τοῦτ᾽ ἐστὶν ἐνύπνιον.

ἤδη δέ τισι συμβέβηκεν μηδὲν [462b] ἐνύπνιον ἑωρακέναι κατὰ τὸν βίον, τοῖς δὲ πόρρω που προελθούσης τῆς ἡλικίας ἰδεῖν πρότερον μὴ ἑωρακόσιν. τὸ δ᾽ αἴτιον τοῦ μὴ γίνεσθαι παραπλήσιον φαίνεται τῷ ἐπὶ τῶν παιδίων καὶ μετὰ τὴν τροφήν. ὅσοις γὰρ συνέστηκεν ἡ φύσις ὥστε πολλὴν ἀναθυμίασιν πρὸς τὸν ἄνω τόπον ἀναφέρεσθαι, ἣ πάλιν καταφερομένη ποιεῖ πλῆθος κινήσεως, εὐλόγως τούτοις οὐδὲν φαίνεται φάντασμα. προϊούσης δὲ τῆς ἡλικίας οὐδὲν ἄτοπον φανῆναι ἐνύπνιον· μεταβολῆς γάρ τινος γενομένης ἢ καθ’ ἡλικίαν ἢ κατὰ πάθος ἀναγκαῖον συμβῆναι τὴν ἐναντίωσιν ταύτην.

Περι Τησ καθ’ Υπνον Μαντικησ (462b) On Divination in Sleep

[462b] Περὶ δὲ τῆς μαντικῆς τῆς ἐν τοῖς ὕπνοις γινομένης καὶ λεγομένης συμβαίνειν ἀπὸ τῶν ἐνυπνίων, οὔτε καταφρονῆσαι ῥᾴδιον οὔτε πεισθῆναι. τὸ μὲν γὰρ πάντας ἢ πολλοὺς ὑπολαμβάνειν ἔχειν τι σημειῶδες τὰ ἐνύπνια παρέχεται πίστιν ὡς ἐξ ἐμπειρίας λεγόμενον, καὶ τὸ περὶ ἐνίων εἶναι τὴν μαντικὴν ἐν τοῖς ἐνυπνίοις οὐκ ἄπιστον· ἔχει γάρ τινα λόγον· διὸ καὶ περὶ τῶν ἄλλων ἐνυπνίων ὁμοίως ἄν τις οἰηθείη. τὸ δὲ μηδεμίαν αἰτίαν εὔλογον ὁρᾶν καθ’ ἣν ἂν γίνοιτο, τοῦτο δὴ ἀπιστεῖν ποιεῖ· τό τε γὰρ θεὸν εἶναι τὸν πέμποντα, πρὸς τῇ ἄλλῃ ἀλογίᾳ, καὶ τὸ μὴ τοῖς βελτίστοις καὶ φρονιμωτάτοις ἀλλὰ τοῖς τυχοῦσι πέμπειν ἄτοπον. ἀφαιρεθείσης δὲ τῆς ἀπὸ τοῦ θεοῦ αἰτίας οὐδεμία τῶν ἄλλων εὔλογος εἶναι φαίνεται αἰτία· τοῦ γὰρ περὶ τῶν ἐφ’ Ἡρακλείαις στήλαις ἢ τῶν ἐν Βορυσθένει προορᾶν τινας ὑπὲρ τὴν ἡμετέραν εἶναι δόξειεν ἂν σύνεσιν εὑρεῖν τὴν ἀρχήν. ἀνάγκη δ’ οὖν τὰ ἐνύπνια ἢ αἴτια εἶναι ἢ σημεῖα τῶν γινομένων ἢ συμπτώματα, ἢ πάντα ἢ ἔνια τούτων ἢ ἓν μόνον. λέγω δ’ αἴτιον μὲν οἷον τὴν σελήνην τοῦ ἐκλείπειν τὸν ἥλιον, καὶ τὸν κόπον τοῦ πυρετοῦ, σημεῖον δὲ τῆς ἐκλείψεως τὸ τὸν ἀστέρα εἰσελθεῖν, τὴν δὲ τραχύτητα τῆς γλώττης τοῦ πυρέττειν, σύμπτωμα δὲ τὸ βαδίζοντος ἐκλείπειν τὸν ἥλιον· [463a] οὔτε γὰρ σημεῖον τοῦ ἐκλείπειν τοῦτ’ ἐστὶν οὔτ’ αἴτιον, οὔθ’ ἡ ἔκλειψις τοῦ βαδίζειν· διὸ τῶν συμπτωμάτων οὐδὲν οὔτε ἀεὶ γίνεται, οὔθ’ ὡς ἐπὶ τὸ πολύ. ἆρ’ οὖν ἐστι τῶν ἐνυπνίων τὰ μὲν αἴτια, τὰ δὲ σημεῖα, οἷον τῶν περὶ τὸ σῶμα συμβαινόντων; λέγουσι γοῦν καὶ τῶν ἰατρῶν οἱ χαρίεντες ὅτι δεῖ σφόδρα προσέχειν τοῖς ἐνυπνίοις· εὔλογον δὲ οὕτως ὑπολαβεῖν καὶ τοῖς μὴ τεχνίταις μέν, σκοπουμένοις δέ τι καὶ φιλοσοφοῦσιν. αἱ γὰρ μεθ’ ἡμέραν γινόμεναι κινήσεις, ἂν μὴ σφόδρα μεγάλαι ὦσι καὶ ἰσχυραί, λανθάνουσι παρὰ μείζους τὰς ἐγρηγορικὰς κινήσεις, ἐν δὲ τῷ καθεύδειν τοὐναντίον· καὶ γὰρ αἱ μικραὶ μεγάλαι δοκοῦσιν εἶναι. δῆλον δ’ ἐπὶ τῶν συμβαινόντων κατὰ τοὺς ὕπνους πολλάκις· οἴονται γὰρ κεραυνοῦσθαι καὶ βροντᾶσθαι μικρῶν ἤχων ἐν τοῖς ὠσὶ γινομένων, καὶ μέλιτος καὶ γλυκέων χυμῶν ἀπολαύειν ἀκαριαίου φλέγματος καταρρέοντος, καὶ βαδίζειν διὰ πυρὸς καὶ θερμαίνεσθαι σφόδρα μικρᾶς θερμασίας περί τινα μέρη γινομένης, ἐπεγειρομένοις δὲ ταῦτα

φανερὰ τοῦτον ἔχοντα τὸν τρόπον· ὥστ’ ἐπεὶ μικραὶ πάντων αἱ ἀρχαί, δῆλον ὅτι καὶ τῶν νόσων καὶ τῶν ἄλλων παθημάτων τῶν ἐν τοῖς σώμασι μελλόντων γίνεσθαι. φανερὸν οὖν ὅτι ταῦτα ἀναγκαῖον ἐν τοῖς ὕπνοις εἶναι καταφανῆ μᾶλλον ἢ ἐν τῷ ἐγρηγορέναι.

ἀλλὰ μὴν καὶ ἔνιά γε τῶν καθ’ ὕπνον φαντασμάτων αἴτια εἶναι τῶν οἰκείων ἑκάστῳ πράξεων οὐκ ἄλογον· ὥσπερ γὰρ μέλλοντες πράττειν ἢ ἐν ταῖς πράξεσιν ὄντες ἢ πεπραχότες πολλάκις εὐθυονειρίᾳ ταύταις σύνεσμεν καὶ πράττομεν (αἴτιον δ’ ὅτι προωδοποιημένη τυγχάνει ἡ κίνησις ἀπὸ τῶν μεθ’ ἡμέραν ἀρχῶν), οὕτω πάλιν ἀναγκαῖον καὶ τὰς καθ’ ὕπνον κινήσεις πολλάκις ἀρχὰς εἶναι τῶν μεθ’ ἡμέραν πράξεων διὰ τὸ προωδοποιῆσθαι πάλιν καὶ τούτων τὴν διάνοιαν ἐν τοῖς φαντάσμασι τοῖς νυκτερινοῖς. οὕτω μὲν οὖν ἐνδέχεται τῶν ἐνυπνίων ἔνια καὶ σημεῖα καὶ αἴτια εἶναι. τὰ δὲ πολλὰ συμπτώμασιν [463b] ἔοικε, μάλιστα δὲ τά τε ὑπερβατὰ πάντα καὶ ὧν μὴ ἐν αὐτοῖς ἡ ἀρχή, ἀλλὰ περὶ ναυμαχίας καὶ τῶν πόρρω συμβαινόντων ἐστίν· περὶ γὰρ τούτων τὸν αὐτὸν τρόπον ἔχειν εἰκὸς ὂν ὅταν μεμνημένῳ τινὶ περί τινος τυχῃ τοῦτο γιγνόμενον· τί γὰρ κωλύει καὶ ἐν τοῖς ὕπνοις οὕτως; μᾶλλον δ’ εἰκὸς πολλὰ τοιαῦτα συμβαίνειν. ὥσπερ οὖν οὐδὲ τὸ μνησθῆναι περὶ τοῦδε σημεῖον οὐδὲ αἴτιον τοῦ παραγενέσθαι αὐτόν, οὕτως οὐδ’ ἐκεῖ τοῦ ἀποβῆναι τὸ ἐνύπνιον τῷ ἰδόντι οὔτε σημεῖον οὔτ’ αἴτιον, ἀλλὰ σύμπτωμα. διὸ καὶ πολλὰ τῶν ἐνυπνίων οὐκ ἀποβαίνει· τὰ γὰρ συμπτώματα οὔτε ἀεὶ οὔθ’ ὡς ἐπὶ τὸ πολὺ γίγνεται.

Ὅλως δὲ ἐπεὶ καὶ τῶν ἄλλων ζῴων ὀνειρώττει τινά, θεόπεμπτα μὲν οὐκ ἂν εἴη τὰ ἐνύπνια, οὐδὲ γέγονε τούτου χάριν (δαιμόνια μέντοι· ἡ γὰρ φύσις δαιμονία, ἀλλ’ οὐ θεία). σημεῖον δέ· πάνυ γὰρ εὐτελεῖς ἄνθρωποι προορατικοί εἰσι καὶ εὐθυόνειροι, ὡς οὐ θεοῦ πέμποντος, ἀλλ’ ὅσων ὥσπερ ἂν εἰ λάλος ἡ φύσις ἐστὶ καὶ μελαγχολική, παντοδαπὰς ὄψεις ὁρῶσιν· διὰ γὰρ τὸ πολλὰ καὶ παντοδαπὰ κινεῖσθαι ἐπιτυγχάνουσιν ὁμοίοις θεωρήμασιν, ἐπιτυχεῖς ὄντες ἐν τούτοις ὥσπερ ἔνιοι ἀρτιάζοντες· ὥσπερ γὰρ καὶ λέγεται “ἂν πολλὰ βάλλῃς, ἄλλοτ’ ἀλλοῖον βαλεῖς”, καὶ ἐπὶ τούτων τοῦτο συμβαίνει. ὅτι δ’ οὐκ ἀποβαίνει πολλὰ τῶν ἐνυπνίων, οὐδὲν ἄτοπον· οὐδὲ γὰρ τῶν ἐν τοῖς σώμασι σημείων καὶ τῶν οὐρανίων, οἷον τὰ τῶν ὑδάτων καὶ τὰ τῶν πνευμάτων (ἂν γὰρ ἄλλη κυριωτέρα ταύτης συμβῇ κίνησις, ἀφ’ ἧς μελλούσης ἐγένετο τὸ σημεῖον, οὐ γίνεται), καὶ πολλὰ βουλευθέντα καλῶς τῶν πραχθῆναι δεόντων διελύθη δι’ ἄλλας κυριωτέρας ἀρχάς. ὅλως γὰρ οὐ πᾶν γίνεται τὸ μελλῆσαν, οὐδὲ τὸ αὐτὸ τὸ ἐσόμενον καὶ τὸ μέλλον· ἀλλ’ ὅμως ἀρχάς γέ τινας λεκτέον εἶναι ἀφ’ ὧν οὐκ ἐπετελέσθη, καὶ σημεῖα πέφυκε ταὐτά τινων οὐ γενομένων.

περὶ δὲ τῶν μὴ τοιαύτας [464a] ἐχόντων ἀρχὰς ἐνυπνίων οἵας εἴπομεν, ἀλλ' ὑπερορίας ἢ τοῖς χρόνοις ἢ τοῖς τόποις ἢ τοῖς μεγέθεσιν, ἢ τούτων μὲν μηδέν, μὴ μέντοι γε ἐν αὑτοῖς ἐχόντων τὰς ἄρχας τῶν ἰδόντων τὸ ἐνύπνιον, εἰ μὴ γίνεται τὸ προορᾶν ἀπὸ συμπτώματος, τοιόνδ' ἂν εἴη μᾶλλον ἢ ὥσπερ λέγει Δημόκριτος εἴδωλα καὶ ἀπορροίας αἰτιώμενος. ὥσπερ γὰρ ὅταν κινήσῃ τι τὸ ὕδωρ ἢ τὸν ἀέρα, τοῦθ' ἕτερον ἐκίνησε, καὶ παυσαμένου ἐκείνου συμβαίνει τὴν τοιαύτην κίνησιν προϊέναι μέχρι τινός, τοῦ κινήσαντος οὐ πάροντος, οὕτως οὐδὲν κωλύει κίνησίν τινα καὶ αἴσθησιν ἀφικνεῖσθαι πρὸς τὰς ψυχὰς τὰς ἐνυπνιαζούσας (ἀφ' ὧν ἐκεῖνος τὰ εἴδωλα ποιεῖ καὶ τὰς ἀπορροίας), καὶ ὅποι δὴ ἔτυχεν ἀφικνουμένας μᾶλλον αἰσθητὰς εἶναι νύκτωρ διὰ τὸ μεθ' ἡμέραν φερομένας διαλύεσθαι μᾶλλον (ἀταραχωδέστερος γὰρ ὁ ἀὴρ τῆς νυκτὸς διὰ τὸ νηνεμωτέρας εἶναι τὰς νύκτας), καὶ ἐν τῷ σώματι ποιεῖν αἴσθησιν διὰ τὸν ὕπνον, διὰ τὸ καὶ τῶν μικρῶν κινήσεων τῶν ἐντὸς αἰσθάνεσθαι καθεύδοντας μᾶλλον ἢ ἐγρηγορότας. αὗται δ' αἱ κινήσεις φαντάσματα ποιοῦσιν, ἐξ ὧν προορῶσι τὰ μέλλοντα καὶ περὶ τῶν τοιούτων, καὶ διὰ ταῦτα συμβαίνει τὸ πάθος τοῦτο τοῖς τυχοῦσι καὶ οὐ τοῖς φρονιμωτάτοις. μεθ' ἡμέραν τε γὰρ ἐγίνετ' ἂν καὶ τοῖς σοφοῖς, εἰ θεὸς ἦν ὁ πέμπων· οὕτω δ' εἰκὸς τοὺς τυχόντας προορᾶν· ἡ γὰρ διάνοια τῶν τοιούτων οὐ φροντιστική, ἀλλ' ὥσπερ ἔρημος καὶ κενὴ πάντων, καὶ κινηθεῖσα κατὰ τὸ κινοῦν ἄγεται.

τοῦ δ' ἐνίους τῶν ἐκστατικῶν προορᾶν αἴτιον ὅτι αἱ οἰκεῖαι κινήσεις οὐκ ἐνοχλοῦσιν ἀλλ' ἀπορραπίζονται· τῶν ξενικῶν οὖν μάλιστα αἰσθάνονται. τὸ δέ τινας εὐθυονείρους εἶναι καὶ τὸ τοὺς γνωρίμους περὶ τῶν γνωρίμων μάλιστα προορᾶν συμβαίνει διὰ τὸ μάλιστα τοὺς γνωρίμους ὑπὲρ ἀλλήλων φροντίζειν· ὥσπερ γὰρ πόρρω ὄντων τάχιστα γνωρίζουσι καὶ αἰσθάνονται, οὕτω καὶ τῶν κινήσεων· αἱ γὰρ τῶν γνωρίμων γνωριμώτεραι. οἱ δὲ μελαγχολικοὶ διὰ τὸ σφοδρόν, ὥσπερ βάλλοντες πόρρωθεν, εὔστοχοί εἰσιν, καὶ διὰ τὸ μεταβλητικὸν [464b] ταχὺ τὸ ἐχόμενον φαντάζεται αὐτοῖς· ὥσπερ γὰρ τὰ Φιλαινίδος ποιήματα καὶ οἱ ἐμμανεῖς ἐχόμενα τοῦ ὁμοίου λέγουσι καὶ διανοοῦνται, οἷον Ἀφροδίτην φροδίτην, καὶ οὕτω συνείρουσιν εἰς τὸ πρόσω. ἔτι δὲ διὰ τὴν σφοδρότητα οὐκ ἐκκρούεται αὐτῶν ἡ κίνησις ὑφ' ἑτέρας κινήσεως.

τεχνικώτατος δ' ἐστὶ κριτὴς ἐνυπνίων ὅστις δύναται τὰς ὁμοιότητας θεωρεῖν· τὰς γὰρ εὐθυονειρίας κρίνειν παντός ἐστιν. λέγω δὲ τὰς ὁμοιότητας, ὅτι παραπλήσια συμβαίνει τὰ φαντάσματα τοῖς ἐν τοῖς ὕδασιν εἰδώλοις, καθάπερ καὶ πρότερον εἴπομεν. ἐκεῖ δέ, ἂν πολλὴ γίγνηται ἡ κίνησις, οὐδὲν ὁμοία γίνεται ἡ ἔμφασις καὶ τὰ εἴδωλα τοῖς ἀληθινοῖς. δεινὸς δὴ τὰς ἐμφάσεις κρίνειν εἴη ἂν ὁ δυνάμενος ταχὺ διαισθάνεσθαι καὶ συνορᾶν τὰ διαπεφορημένα καὶ διεστραμμένα τῶν εἰδώλων, ὅτι ἐστὶν ἀνθρώπου ἢ ἵππου ἢ ὁτουδήποτε, κἀκεῖ δὴ ὁμοίως τί δύναται τὸ ἐνύπνιον τοῦτο. ἡ γὰρ κίνησις ἐκκόπτει τὴν εὐθυονειρίαν. τί μὲν οὖν ἐστιν ὕπνος καὶ τί ἐνύπνιον, καὶ διὰ τίν’ αἰτίαν ἑκάτερον αὐτῶν γίνεται, ἔτι δὲ περὶ τῆς ἐκ τῶν ἐνυπνίων μαντείας εἴρηται περὶ πάσης· [περὶ δὲ κινήσεως τῆς κοινῆς τῶν ζῴων λεκτέον.]

Περι Μακροβιοτητοσ και Βραχυβιοτητοσ (464b) On Length and Shortness of Life

[464b] Περὶ δὲ τοῦ τὰ μὲν εἶναι μακρόβια τῶν ζῴων τὰ δὲ βραχύβια, καὶ περὶ ζωῆς ὅλως μήκους καὶ βραχύτητος, ἐπισκεπτέον τὰς αἰτίας, ἀρχὴ δὲ τῆς σκέψεως ἀναγκαία πρῶτον ἐκ τοῦ διαπορῆσαι περὶ αὐτῶν. οὐ γάρ ἐστι δῆλον πότερον ἕτερον ἢ τὸ αὐτὸ αἴτιον πᾶσι τοῖς ζῴοις καὶ φυτοῖς τοῦ τὰ μὲν εἶναι μακρόβια τὰ δὲ βραχύβια (καὶ γὰρ τῶν φυτῶν τὰ μὲν ἐπέτειον τὰ δὲ πολυχρόνιον ἔχει τὴν ζωήν)· ἔτι δὲ πότερον ταὐτὰ μακρόβια καὶ τὴν φύσιν ὑγιεινὰ τῶν φύσει συνεστώτων, ἢ κεχώρισται [καὶ] τὸ βραχύβιον καὶ τὸ νοσῶδες, ἢ κατ’ ἐνίας μὲν νόσους ἐπαλλάττει τὰ νοσώδη τὴν φύσιν σώματα τοῖς βραχυβίοις, κατ’ ἐνίας δ’ οὐδὲν κωλύει νοσώδεις εἶναι μακροβίους ὄντας. περὶ μὲν οὖν ὕπνου καὶ ἐγρηγόρσεως εἴρηται πρότερον, περὶ δὲ ζωῆς καὶ θανάτου λεκτέον ὕστερον, ὁμοίως δὲ καὶ περὶ νόσου καὶ ὑγιείας, ὅσον ἐπιβάλλει τῇ φυσικῇ φιλοσοφίᾳ· νῦν [465a] δὲ περὶ τὰς αἰτίας τοῦ τὰ μὲν εἶναι μακρόβια τὰ δὲ βραχύβια, καθάπερ εἴρηται πρότερον, θεωρητέον. ἔστι δ’ ἔχοντα τὴν διαφορὰν ταύτην ὅλα τε πρὸς ὅλα γένη καὶ τῶν ὑφ’ ἓν εἶδος ἕτερα πρὸς ἕτερα. λέγω δὲ κατὰ γένος μὲν διαφέρειν οἷον ἄνθρωπον πρὸς ἵππον (μακροβιώτερον γὰρ τὸ τῶν ἀνθρώπων γένος ἢ τὸ τῶν ἵππων), κατ’ εἶδος δ’ ἄνθρωπον πρὸς ἄνθρωπον· εἰσὶ γὰρ καὶ ἄνθρωποι οἱ μὲν μακρόβιοι οἱ δὲ βραχύβιοι ἕτεροι καθ’ ἑτέρους τόπους διεστῶτες (τὰ μὲν γὰρ ἐν τοῖς θερμοῖς τῶν ἐθνῶν μακροβιώτερα, τὰ δ’ ἐν τοῖς ψυχροῖς βραχυβιώτερα), καὶ τῶν τὸν αὐτὸν δὲ τόπον οἰκούντων διαφέρουσιν ὁμοίως τινὲς ταύτην τὴν πρὸς ἀλλήλους διαφοράν.

Δεῖ δὴ λαβεῖν τί τὸ εὔφθαρτον ἐν τοῖς φύσει συνεστῶσι καὶ τί τὸ οὐκ εὔφθαρτον. πῦρ γὰρ καὶ ὕδωρ καὶ τὰ τούτοις συγγενῆ, οὐκ ἔχοντα τὴν αὐτὴν δύναμιν, τυγχάνει γενέσεως καὶ φθορᾶς αἴτια ἀλλήλοις, ὥστε καὶ τῶν ἄλλων ἕκαστον ἐκ τούτων ὄντα καὶ συνεστῶτα μετέχειν τῆς τούτων φύσεως εὔλογον, ὅσα μὴ συνθέσει ἐκ πολλῶν ἐστιν, οἷον οἰκία. περὶ μὲν οὖν τῶν ἄλλων ἕτερος λόγος· εἰσὶ γὰρ ἴδιαι φθοραὶ πολλοῖς τῶν ὄντων, οἷον ἐπιστήμῃ ‹καὶ ἀγνοίᾳ›, καὶ ὑγιείᾳ καὶ νόσῳ· ταῦτα γὰρ φθείρεται καὶ μὴ φθειρομένων τῶν δεκτικῶν ἀλλὰ σῳζομένων, οἷον ἀγνοίας μὲν φθορὰ ἀνάμνησις καὶ μάθησις, ἐπιστήμης δὲ λήθη καὶ ἀπάτη. κατὰ συμβεβηκὸς δ’ ἀκολουθοῦσι τοῖς φυσικοῖς αἱ τῶν ἄλλων φθοραί· φθειρομένων γὰρ τῶν ζῴων φθείρεται καὶ ἡ ἐπιστήμη καὶ ἡ ὑγίεια ἡ ἐν τοῖς ζῴοις. διὸ καὶ περὶ ψυχῆς λογίσαιτ' ἄν τις ἐκ τούτων· εἰ γάρ ἐστι μὴ φύσει ἀλλ' ὥσπερ ἐπιστήμη ἐν ψυχῇ, οὕτω καὶ ψυχὴ ἐν σώματι, εἴη ἄν τις αὐτῆς καὶ ἄλλη φθορὰ παρὰ τὴν φθορὰν ἣν φθείρεται φθειρομένου τοῦ σώματος. ὥστ' ἐπεὶ οὐ φαίνεται τοιαύτη οὖσα, ἄλλως ἂν ἔχοι πρὸς τὴν τοῦ σώματος κοινωνίαν.

[465b] Ἴσως δ' ἄν τις ἀπορήσειεν εὐλόγως, ἆρ' ἔστιν οὗ ἄφθαρτον ἔσται τὸ φθαρτόν, οἷον τὸ πῦρ ἄνω, οὗ μὴ ἔστι τὸ ἐναντίον. φθείρεται γὰρ τὰ μὲν ὑπάρχοντα τοῖς ἐναντίοις κατὰ συμβεβηκός, τῷ ἐκεῖνα φθείρεσθαι (ἀναιρεῖται γὰρ τἀναντία ὑπ' ἀλλήλων), κατὰ συμβεβηκὸς δ' οὐθὲν τῶν ἐν ταῖς οὐσίαις ἐναντίων φθείρεται, διὰ τὸ μηθενὸς ὑποκειμένου κατηγορεῖσθαι τὴν οὐσίαν. ὥσθ' ᾧ μὴ ἔστιν ἐναντίον καὶ ὅπου μὴ ἔστιν, ἀδύνατον ἂν εἴη φθαρῆναι· τί γὰρ ἔσται τὸ φθεροῦν, εἴπερ ὑπ' ἐναντίων μὲν φθείρεσθαι συμβαίνει μόνων, τοῦτο δὲ μὴ ὑπάρχει, ἢ ὅλως ἢ ἐνταῦθα; ἢ τοῦτο τῇ μὲν ἀληθές ἐστι τῇ δ' οὔ; ἀδύνατον γὰρ τῷ ὕλην ἔχοντι μὴ ὑπάρχειν πως τὸ ἐναντίον. παντὶ μὲν γὰρ ἐνεῖναι τὸ θερμὸν ἢ τὸ εὐθὺ ἐνδέχεται, πᾶν δ' εἶναι ἀδύνατον ἢ θερμὸν ἢ εὐθὺ ἢ λευκόν· ἔσται γὰρ τὰ πάθη κεχωρισμένα. εἰ οὖν, ὅταν ἅμα ᾖ τὸ ποιητικὸν καὶ τὸ παθητικόν, ἀεὶ τὸ μὲν ποιεῖ τὸ δὲ πάσχει, ἀδύνατον μὴ μεταβάλλειν. ἔτι καὶ εἰ ἀνάγκη περίττωμα ποιεῖν, τὸ δὲ περίττωμα ἐναντίον· ἐξ ἐναντίου γὰρ ἀεὶ ἡ μεταβολή, τὸ δὲ περίττωμα ὑπόλειμμα τοῦ προτέρου. εἰ δὲ πᾶν ἐξελαύνει τὸ ἐνεργείᾳ ἐναντίον, κἂν ἐνταῦθ' ἄφθαρτον ἂν εἴη. ἢ οὔ, ἀλλ' ὑπὸ τοῦ περιέχοντος φθείρεται; εἰ μὲν οὖν, ἱκανὸν ἐκ τῶν εἰρημένων· εἰ δὲ μή, ὑποθέσθαι δεῖ ὅτι ἔνεστί τι ἐνεργείᾳ ἐναντίον, καὶ περίττωμα γίνεται. [διὸ ἡ ἐλάττων φλὸξ κατακαίεται ὑπὸ τῆς πολλῆς κατὰ συμβεβηκός, ὅτι ἡ τροφὴ ἣν ἐκείνη ἐν πολλῷ χρόνῳ ἀναλίσκει, τὸν καπνόν, ταύτην ἡ πολλὴ φλὸξ ταχύ.] διὸ πάντα ἀεὶ ἐν κινήσει ἐστί, καὶ γίνεται ἢ φθείρεται. τὸ δὲ περιέχον ἢ συμπράττει ἢ ἀντιπράττει· καὶ διὰ τοῦτο μετατιθέμενα πολυχρονιώτερα μὲν γίνεται καὶ ὀλιγοχρονιώτερα τῆς φύσεως, ἀίδια δ' οὐδαμοῦ, ὅσοις ἐναντία ἔστιν· εὐθὺς γὰρ ἡ ὕλη τὸ ἐναντίον ἔχει, ὥστ' εἰ μὲν τοῦ ποῦ, κατὰ τόπον μεταβάλλει, εἰ δὲ τοῦ ποσοῦ, κατ' αὔξησιν καὶ φθίσιν, εἰ δὲ πάθους, ἀλλοιοῦται.

[466a] Ἔστι δ' οὔτε τὰ μέγιστα ἀφθαρτότερα (ἵππος γὰρ ἀνθρώπου βραχυβιώτερον) οὔτε τὰ μικρά (ἐπέτεια γὰρ τὰ πολλὰ τῶν ἐντόμων), οὔτε τὰ φυτὰ ὅλως τῶν ζῴων (ἐπέτεια γὰρ ἔνια τῶν φυτῶν), οὔτε τὰ ἔναιμα (μέλιττα γὰρ πολυχρονιώτερον ἐνίων ἐναίμων) οὔτε τὰ ἄναιμα (τὰ γὰρ μαλάκια ἐπέτεια μέν, ἄναιμα δέ), οὔτε τὰ ἐν τῇ γῇ (καὶ γὰρ φυτὰ ἐπέτεια

ἔστι καὶ ζῷα πεζά) οὔτε τὰ ἐν τῇ θαλάττῃ (καὶ γὰρ ἐκεῖ βραχύβια καὶ τὰ ὀστρακηρὰ καὶ τὰ μαλάκια). ὅλως δὲ τὰ μακροβιώτατα ἐν τοῖς φυτοῖς ἐστιν, οἷον ὁ φοῖνιξ. εἶτ' ἐν τοῖς ἐναίμοις ζῴοις μᾶλλον ἢ ἐν τοῖς ἀναίμοις, καὶ ἐν τοῖς πεζοῖς ἢ ἐν τοῖς ἐνύδροις· ὥστε καὶ συνδυασθέντων ἐν τοῖς ἐναίμοις καὶ πεζοῖς τὰ μακροβιώτατα τῶν ζῴων ἐστίν, οἷον ἄνθρωπος καὶ ἐλέφας. καὶ δὴ καὶ τὰ μείζω ὡς ἐπὶ τὸ πολὺ εἰπεῖν τῶν ἐλαττόνων μακροβιώτερα· καὶ γὰρ τοῖς ἄλλοις συμβέβηκε τοῖς μακροβιωτάτοις μέγεθος, ὥσπερ καὶ τοῖς εἰρημένοις.

Τὴν δ' αἰτίαν περὶ τούτων ἁπάντων ἐντεῦθεν ἄν τις θεωρήσειεν. δεῖ γὰρ λαβεῖν ὅτι τὸ ζῷόν ἐστι φύσει ὑγρὸν καὶ θερμόν, καὶ τὸ ζῆν τοιοῦτον, τὸ δὲ γῆρας ξηρὸν καὶ ψυχρόν, καὶ τὸ τεθνηκός· φαίνεται γὰρ οὕτως. ὕλη δὲ τῶν σωμάτων τοῖς ζῴοις ταῦτα, τὸ θερμὸν καὶ τὸ ψυχρόν, καὶ τὸ ξηρὸν καὶ τὸ ὑγρόν. ἀνάγκη τοίνυν γηράσκοντα ξηραίνεσθαι· διὸ δεῖ μὴ εὐξήραντον εἶναι τὸ ὑγρόν. καὶ διὰ τοῦτο τὰ λιπαρὰ ἄσηπτα· αἴτιον δ' ὅτι ἀέρος, ὁ δ' ἀὴρ πρὸς τἆλλα πῦρ, πῦρ δ' οὐ γίνεται σαπρόν. οὐδ' αὖ ὀλίγον δεῖ εἶναι τὸ ὑγρόν· εὐξήραντον γὰρ καὶ τὸ ὀλίγον. διὸ καὶ τὰ μεγάλα καὶ ζῷα καὶ φυτὰ ὡς ὅλως εἰπεῖν μακροβιώτερα, καθάπερ ἐλέχθη πρότερον· εὔλογον γὰρ τὰ μείζω πλέον ἔχειν ὑγρόν. οὐ μόνον δὲ διὰ τοῦτο μακροβιώτερα· δύο γὰρ τὰ αἴτια, τό τε ποσὸν καὶ τὸ ποιόν, ὥστε δεῖ μὴ μόνον πλῆθος εἶναι ὑγροῦ, ἀλλὰ τοῦτο καὶ θερμόν, ἵνα μήτε εὔπηκτον μήτε εὐξήραντον ᾖ. καὶ διὰ τοῦτο ἄνθρωπος μακρόβιον μᾶλλον ἐνίων μειζόνων· μακροβιώτερα γὰρ τὰ λειπόμενα τῷ πλήθει τοῦ [466b] ὑγροῦ, ἐὰν πλείονι λόγῳ ὑπερέχῃ κατὰ τὸ ποιὸν ἢ λείπεται κατὰ τὸ ποσόν. ἔστι δ' ἐνίοις μὲν τὸ θερμὸν τὸ λιπαρόν, ὃ ἅμα ποιεῖ τό τε μὴ εὐξήραντον καὶ τὸ μὴ εὔψυκτον· ἐνίοις δ' ἄλλον ἔχει χυμόν.

ἔτι δεῖ τὸ μέλλον εἶναι μὴ εὔφθαρτον μὴ περιττωματικὸν εἶναι. ἀναιρεῖ γὰρ τὸ τοιοῦτον ἢ νόσῳ ἢ φύσει· ἐναντία γὰρ ἡ τοῦ περιττώματος δύναμις καὶ φθαρτικὴ ἡ μὲν τῆς φύσεως ἡ δὲ μορίου. διὸ καὶ τὰ ὀχευτικὰ καὶ πολύσπερμα γηράσκει ταχύ· τὸ γὰρ σπέρμα περίττωμα, καὶ ἔτι ξηραίνει ἀπιόν. καὶ διὰ τοῦτο ἡμίονος μακροβιώτερος καὶ ἵππου καὶ ὄνου, ἐξ ὧν ἐγένετο, καὶ τὰ θήλεα τῶν ἀρρένων, ἐὰν ὀχευτικὰ ᾖ τὰ ἄρρενα· διὸ οἱ στρουθοὶ οἱ ἄρρενες βραχυβιώτεροι τῶν θηλειῶν. ἔτι δὲ καὶ ὅσα πονητικὰ τῶν ἀρρένων καὶ διὰ τὸν πόνον γηράσκει μᾶλλον· ξηραίνει γὰρ ὁ πόνος, τὸ δὲ γῆρας ξηρόν ἐστιν. φύσει δὲ καὶ ὡς ἐπὶ τὸ πᾶν εἰπεῖν τὰ ἄρρενα τῶν θηλειῶν μακροβιώτερα· αἴτιον δ' ὅτι θερμότερον ζῷον τὸ ἄρρεν τοῦ θήλεος.

τὰ δ’ αὐτὰ ἐν τοῖς ἀλεεινοῖς μακροβιώτερά ἐστιν ἢ ἐν τοῖς ψυχροῖς τόποις, διὰ τὴν αὐτὴν αἰτίαν δι’ ἥνπερ καὶ μείζω. καὶ μάλιστ’ ἐπίδηλον τὸ μέγεθος τῶν τὴν φύσιν ψυχρῶν ζῴων· διὸ οἵ τ’ ὄφεις καὶ αἱ σαῦραι καὶ τὰ φολιδωτὰ μεγάλα ἐν τοῖς θερμοῖς τόποις, καὶ ἐν τῇ θαλάττῃ τῇ ἐρυθρᾷ τὰ ὀστρακόδερμα· τῆς τε γὰρ αὐξήσεως ἡ θερμὴ ὑγρότης αἰτία καὶ τῆς ζωῆς. ἐν δὲ τοῖς ψυχροῖς τόποις ὑδατωδέστερον τὸ ὑγρὸν τὸ ἐν τοῖς ζῴοις ἐστίν· διὸ εὔπηκτον, ὥστε τὰ μὲν οὐ γίνεται ὅλως τῶν ζῴων τῶν ὀλιγαίμων ἢ ἀναίμων ἐν τοῖς πρὸς τὴν ἄρκτον τόποις, οὔτε τὰ πεζὰ ἐν τῇ γῇ οὔτε τὰ ἔνυδρα ἐν τῇ θαλάττῃ, τὰ δὲ γίνεται μέν, ἐλάττω δὲ καὶ βραχυβιώτερα· ἀφαιρεῖται γὰρ ὁ πάγος τὴν αὔξησιν. τροφὴν δὲ μὴ λαμβάνοντα καὶ τὰ φυτὰ καὶ τὰ ζῷα φθείρεται· συντήκει γὰρ αὐτὰ ἑαυτά· ὥσπερ γὰρ ἡ πολλὴ φλὸξ κατακαίει καὶ φθείρει τὴν ὀλίγην τῷ τὴν τροφὴν ἀναλίσκειν, οὕτω τὸ φυσικὸν θερμόν, τὸ πρῶτον πεπτικὸν ‹ὄν›, ἀναλίσκει τὴν ὕλην ἐν ᾗ ἐστιν. τὰ δ’ ἔνυδρα τῶν πεζῶν ἧττον μακρόβια οὐχ ὅτι [467a] ὑγρὰ ἁπλῶς, ἀλλ’ ὅτι ὑδατώδη· τὸ δὲ τοιοῦτον ὑγρὸν εὔφθαρτον, ὅτι ψυχρὸν καὶ εὔπηκτον. καὶ τὸ ἄναιμον διὰ τὸ αὐτό, ἐὰν μὴ μεγέθει ἀπαμύνηται· οὔτε γὰρ λίπος οὔτε γλυκὺ ἔχει. ἐν γὰρ ζῴῳ τὸ λιπαρὸν γλυκύ· διὸ αἱ μέλιτται μακροβιώτεραι ἑτέρων μειζόνων ζῴων.

Ἐν δὲ τοῖς φυτοῖς ἐστι τὰ μακροβιώτατα, καὶ μᾶλλον ἢ ἐν τοῖς ζῴοις, πρῶτον μὲν ὅτι ἧττον ὑδατώδη, ὥστ’ οὐκ εὔπηκτα· εἶτ’ ἔχει λιπαρότητα καὶ γλισχρότητα, διὸ καὶ ξηρὰ καὶ γεώδη ὄντα ὅμως οὐκ εὐξήραντον ἔχουσι τὸ ὑγρόν. περὶ δὲ τοῦ πολυχρόνιον εἶναι τὴν τῶν δένδρων φύσιν δεῖ λαβεῖν τὴν αἰτίαν· ἔχει γὰρ ἰδίαν πρὸς τὰ ζῷα, πλὴν πρὸς τὰ ἔντομα. νέα γὰρ ἀεὶ τὰ φυτὰ γίνεται· διὸ πολυχρόνια. ἀεὶ γὰρ ἕτεροι οἱ πτόρθοι, οἱ δὲ γηράσκουσιν, καὶ αἱ ῥίζαι ὁμοίως. ἀλλ’ οὐχ ἅμα, ἀλλ’ ὁτὲ μὲν μόνον τὸ στέλεχος καὶ οἱ κλάδοι ἀπώλοντο, ἕτεροι δὲ παρεφύησαν· ὅταν δ’ οὕτως ποιῶσιν, αἱ ῥίζαι ἄλλαι ἐκ τοῦ ὑπάρχοντος γίνονται, καὶ οὕτως ἀεὶ διατελεῖ τὸ μὲν φθειρόμενον τὸ δὲ γινόμενον· διὸ καὶ μακρόβια. ἔοικε δὲ τὰ φυτὰ τοῖς ἐντόμοις, ὥσπερ εἴρηται πρότερον· διαιρούμενα γὰρ ζῇ, καὶ δύο καὶ πολλὰ γίνεται ἐξ ἑνός. τὰ δ’ ἔντομα μέχρι μὲν τοῦ ζῆν ἦλθεν, πολὺν δ’ οὐ δύναται χρόνον· οὐ γὰρ ἔχει ὄργανα, οὐδὲ δύναται ποιεῖν αὐτὰ ἡ ἀρχὴ ἡ ἐν ἑκάστῳ. ἡ δ’ ἐν τῷ φυτῷ δύναται· πανταχῇ γὰρ ἔχει καὶ ῥίζαν καὶ καυλὸν δυνάμει. διὸ ἀπὸ ταύτης ἀεὶ προέρχεται τὸ μὲν νέον τὸ δὲ γηράσκον, μικρόν τι διαφέροντα τοῦ εἶναι μακρόβια οὕτως ὥσπερ τὰ ἀποφυτευόμενα. καὶ γὰρ ἐν τῇ ἀποφυτείᾳ τρόπον τινὰ φαίη ἄν τις ταὐτὰ συμβαίνειν· μόριον γάρ τι τὸ ἀποφυτευθέν. ἐν μὲν οὖν τῇ ἀποφυτείᾳ χωριζομένων συμβαίνει τοῦτο, ἐκεῖ δὲ διὰ τοῦ συνεχοῦς. αἴτιον δ’ ὅτι ἐνυπάρχει πάντῃ ἡ ἀρχὴ δυνάμει ἐνοῦσα.

συμβαίνει δὲ ταὐτὸ ἐπί τε τῶν ζῴων καὶ φυτῶν. ἔν τε γὰρ τοῖς ζῴοις τὰ ἄρρενα μακροβιώτερα ὡς ἐπὶ τὸ πολύ - τούτων δὲ τὰ ἄνω μείζω ἢ τὰ κάτω (νανωδέστερον γὰρ τοῦ θήλεος τὸ ἄρρεν), ἐν δὲ τῷ ἄνω τὸ θερμόν, καὶ τὸ ψυχρὸν ἐν τῷ κάτω - καὶ τῶν φυτῶν τὰ κεφαλοβαρῆ μακροβιώτερα.

[467b] τοιαῦτα δὲ τὰ μὴ ἐπέτεια ἀλλὰ δενδρώδη· τὸ γὰρ ἄνω τοῦ φυτοῦ καὶ κεφαλὴ ἡ ῥίζα ἐστί, τὰ δ' ἐπέτεια ἐπὶ τὰ κάτω καὶ τὸν καρπὸν λαμβάνει τὴν αὔξησιν. ἀλλὰ περὶ μὲν τούτων καὶ καθ' αὑτὰ ἐν τοῖς Περὶ φυτῶν διορισθήσεται· νῦν δὲ περὶ τῶν ἄλλων [ζῴων] εἴρηται τὸ αἴτιον περί τε μεγέθους ζωῆς καὶ βραχυβιότητος. λοιπὸν δ' ἡμῖν θεωρῆσαι περί τε νεότητος καὶ γήρως καὶ ζωῆς καὶ θανάτου· τούτων γὰρ διορισθέντων τέλος ἂν ἡ περὶ τῶν ζῴων ἔχοι μέθοδος.

Περι Νεοτητοσ και Γηρωσ, και Ζωησ και Θανατου, και Αναπνοησ (467b) On Youth, Old Age, Life and Death, and Respiration

[467b] Περὶ δὲ νεότητος καὶ γήρως καὶ περὶ ζωῆς καὶ θανάτου λεκτέον νῦν· ἅμα δὲ καὶ περὶ ἀναπνοῆς ἀναγκαῖον ἴσως τὰς αἰτίας εἰπεῖν· ἐνίοις γὰρ τῶν ζῴων διὰ τοῦτο συμβαίνει τὸ ζῆν καὶ τὸ μὴ ζῆν. ἐπεὶ δὲ περὶ ψυχῆς ἐν ἑτέροις διώρισται, καὶ δῆλον ὅτι οὐχ οἷόν τ' εἶναι σῶμα τὴν οὐσίαν αὐτῆς, ἀλλ' ὅμως ὅτι γ' ἔν τινι τοῦ σώματος ὑπάρχει μορίῳ φανερόν, καὶ ἐν τούτῳ τινὶ τῶν ἐχόντων δύναμιν ἐν τοῖς μορίοις, τὰ μὲν οὖν ἄλλα τῆς ψυχῆς ἢ μόρια ἢ δυνάμεις, ὁποτέρως ποτὲ δεῖ καλεῖν, ἀφείσθω τὰ νῦν· ὅσα δὲ ζῷα λέγεται καὶ ζῆν, ἐν μὲν τοῖς ἀμφοτέρων τούτων τετυχηκόσι (λέγω δ' ἀμφοτέρων τοῦ τε ζῷον εἶναι καὶ τοῦ ζῆν) ἀνάγκη ταὐτὸν εἶναι καὶ ἓν μόριον καθ' ὅ τε ζῇ καὶ καθ' ὃ προσαγορεύομεν αὐτὸ ζῷον· τὸ μὲν γὰρ ζῷον ᾗ ζῷον ἀδύνατον μὴ ζῆν· ᾗ δὲ ζῇ, ταύτῃ ζῷον ὑπάρχειν οὐκ ἀναγκαῖον· τὰ γὰρ φυτὰ ζῇ μέν, οὐκ ἔχει δ' αἴσθησιν, τῷ δ' αἰσθάνεσθαι τὸ ζῷον πρὸς τὸ μὴ ζῷον διορίζομεν.

ἀριθμῷ μὲν οὖν ἀναγκαῖον ἓν εἶναι καὶ τὸ αὐτὸ τοῦτο τὸ μόριον, τῷ δ' εἶναι πλείω καὶ ἕτερα· οὐ γὰρ ταὐτὸ τὸ ζῴῳ εἶναι καὶ τὸ ζῆν. ἐπεὶ οὖν τῶν ἰδίων αἰσθητηρίων ἕν τι κοινόν ἐστιν αἰσθητήριον, εἰς ὃ τὰς κατ' ἐνέργειαν αἰσθήσεις ἀναγκαῖον ἀπαντᾶν, τοῦτο δ' ἂν εἴη μέσον τοῦ πρόσθεν καλουμένου καὶ ὄπισθεν (ἔμπροσθεν μὲν γὰρ λέγεται ἐφ' ὅ ἐστιν ἡμῖν ἡ αἴσθησις, ὄπισθεν δὲ τὸ ἀντικείμενον), ἔτι δὲ διῃρημένου τοῦ σώματος τῶν ζώντων πάντων τῷ τ' ἄνω καὶ κάτω (πάντα γὰρ ἔχει τὸ ἄνω καὶ τὸ κάτω, ὥστε καὶ τὰ φυτά), δῆλον ὅτι τὴν θρεπτικὴν [468a] ἀρχὴν ἔχοι ἂν ἐν μέσῳ τούτων· καθ' ὃ μὲν γὰρ εἰσέρχεται μόριον ἡ τροφή, ἄνω καλοῦμεν, πρὸς αὐτὸ βλέποντες ἀλλ' οὐ πρὸς τὸ περιέχον ὅλον, κάτω δὲ καθ' ὃ τὸ περίττωμα ἀφίησι τὸ πρῶτον. ἔχει δ' ἐναντίως τοῖς φυτοῖς τοῦτο καὶ τοῖς ζῴοις· τῷ μὲν γὰρ ἀνθρώπῳ διὰ τὴν ὀρθότητα μάλιστα ὑπάρχει τοῦτο τῶν ζῴων, τὸ ἔχειν τὸ ἄνω μόριον πρὸς τὸ τοῦ παντὸς ἄνω, τοῖς δ' ἄλλοις μεταξύ· τοῖς δὲ φυτοῖς ἀκινήτοις οὖσι καὶ λαμβάνουσιν ἐκ τῆς γῆς τὴν τροφὴν ἀναγκαῖον ἀεὶ κάτω τοῦτ' ἔχειν τὸ μόριον. ἀνάλογον γάρ εἰσιν αἱ ῥίζαι τοῖς φυτοῖς καὶ τὸ καλούμενον στόμα τοῖς ζῴοις, δι’ οὗ τὴν τροφὴν τὰ μὲν ἐκ τῆς γῆς λαμβάνει, τὰ δὲ δι’ αὑτῶν.

Τριῶν δὲ μερῶν ὄντων εἰς ἃ διαιρεῖται πάντα τὰ τέλεια τῶν ζῴων, ἑνὸς μὲν ᾗ δέχεται τὴν τροφήν, ἑνὸς δ’ ᾗ τὸ περίττωμα προΐεται, τρίτου δὲ τοῦ μέσου τούτων, τοῦτο ἐν μὲν τοῖς μεγίστοις τῶν ζῴων καλεῖται στῆθος, ἐν δὲ τοῖς ἄλλοις τὸ ἀνάλογον, διήρθρωται δὲ μᾶλλον ἑτέροις ἑτέρων. ὅσα δ’ αὐτῶν ἐστι πορευτικά, πρόσκειται καὶ μόρια τὰ πρὸς ταύτην τὴν ὑπηρεσίαν, οἷς τὸ πᾶν οἴσουσι κύτος, σκέλη τε καὶ πόδες καὶ τὰ τούτοις ἔχοντα τὴν αὐτὴν δύναμιν. ἀλλ’ ἥ γε τῆς θρεπτικῆς ἀρχὴ ψυχῆς ἐν τῷ μέσῳ τῶν τριῶν μορίων καὶ κατὰ τὴν αἴσθησιν οὖσα φαίνεται καὶ κατὰ τὸν λόγον· πολλὰ γὰρ τῶν ζῴων ἀφαιρουμένου ἑκατέρου τῶν μορίων, τῆς τε καλουμένης κεφαλῆς καὶ τοῦ δεκτικοῦ τῆς τροφῆς, ζῇ μεθ’ οὗπερ ἂν ᾖ τὸ μέσον. δῆλον δ’ ἐπὶ τῶν ἐντόμων, οἷον σφηκῶν τε καὶ μελιττῶν, τοῦτο συμβαῖνον· καὶ τῶν μὴ ἐντόμων δὲ πολλὰ διαιρούμενα δύναται ζῆν διὰ τὸ θρεπτικόν. τὸ δὲ τοιοῦτον μόριον ἐνεργείᾳ μὲν ἔχει ἕν, δυνάμει δὲ πλείω· τὸν αὐτὸν γὰρ συνέστηκε τοῖς φυτοῖς τρόπον· καὶ γὰρ τὰ φυτὰ διαιρούμενα ζῇ χωρίς, καὶ γίνεται πολλὰ ἀπὸ μιᾶς ἀρχῆς δένδρα. δι’ ἣν δ’ αἰτίαν τὰ μὲν οὐ δύναται διαιρούμενα ζῆν, τὰ δ’ ἀποφυτεύεται τῶν φυτῶν, ἕτερος [468b] ἔσται λόγος. ἀλλ’ ὁμοίως ἔχει κατά γε τοῦτο τά τε φυτὰ καὶ τὸ τῶν ἐντόμων γένος.

ἀνάγκη δὲ καὶ τὴν θρεπτικὴν ψυχὴν ἐνεργείᾳ μὲν ἐν τοῖς ἔχουσιν εἶναι μίαν, δυνάμει δὲ πλείους, ὁμοίως δὲ καὶ τὴν αἰσθητικήν· φαίνεται γὰρ ἔχοντα αἴσθησιν τὰ διαιρούμενα αὐτῶν. ἀλλὰ πρὸς τὸ σῴζεσθαι τὴν φύσιν, τὰ μὲν φυτὰ δύναται, ταῦτα δ’ οὐ δύναται διὰ τὸ μὴ ἔχειν ὄργανα πρὸς σωτηρίαν, ἐνδεᾶ τ’ εἶναι τὰ μὲν τοῦ ληψομένου τὰ δὲ τοῦ δεξομένου τὴν τροφήν, τὰ δ’ ἄλλων τε καὶ τούτων ἀμφοτέρων. ἐοίκασι γὰρ τὰ τοιαῦτα τῶν ζῴων πολλοῖς ζῴοις συμπεφυκόσιν (τὰ δ’ ἄριστα συνεστηκότα τοῦτ’ οὐ πάσχει τῶν ζῴων διὰ τὸ εἶναι τὴν φύσιν αὐτῶν ὡς ἐνδέχεται μάλιστα μίαν). διὸ καὶ μικρὰν αἴσθησιν ἔνια ποιεῖ διαιρούμενα τῶν μορίων ὅτι ἔχει τι ψυχικὸν πάθος· χωριζομένων γὰρ τῶν σπλάγχνων ποιεῖται κίνησιν, οἷον καὶ αἱ χελῶναι τῆς καρδίας ἀφῃρημένης.

Ἔτι δὲ ἐπί τε τῶν φυτῶν δῆλον καὶ ἐπὶ τῶν ζῴων, τῶν μὲν φυτῶν τήν τ’ ἐκ τῶν σπερμάτων γένεσιν ἐπισκοποῦσι καὶ τὰς ἐμφυτείας τε καὶ τὰς ἀποφυτείας. ἥ τε γὰρ ἐκ τῶν σπερμάτων γένεσις συμβαίνει πᾶσιν ἐκ τοῦ μέσου (διθύρων γὰρ ὄντων πάντων, ᾗ συμπέφυκεν καὶ τὸ μέσον ἔστιν ἑκατέρου τῶν μορίων, ἐντεῦθεν ὅ τε καυλὸς ἐκφύεται καὶ ἡ ῥίζα τῶν φυομένων, ἡ δ’ ἀρχὴ τὸ μέσον αὐτῶν ἐστιν), ἔν τε ταῖς ἐμφυτείαις καὶ ταῖς ἀποφυτείαις μάλιστα συμβαίνει τοῦτο περὶ τοὺς ὄζους· ἔστι γὰρ ἀρχή τις ὁ ὄζος τοῦ κλάδου, ἅμα δὲ καὶ μέσον, ὥστε ἢ τοῦτο ἀφαιροῦσιν ἢ εἰς τοῦτο ἐμβάλλουσιν, ἵνα ἢ ὁ κλάδος ἢ αἱ ῥίζαι ἐκ τούτου γίνωνται, ὡς οὔσης τῆς ἀρχῆς ἐκ τοῦ μέσου κλάδου καὶ ῥίζης. καὶ τῶν ζῴων τῶν ἐναίμων ἡ καρδία γίνεται πρῶτον· τοῦτο δὲ δῆλον ἐξ ὧν ἐν τοῖς ἐνδεχομένοις ἔτι γινομένοις ἰδεῖν τεθεωρήκαμεν. ὥστε καὶ ἐν τοῖς ἀναίμοις ἀναγκαῖον τὸ ἀνάλογον τῇ καρδίᾳ γίνεσθαι πρῶτον. ἡ δὲ καρδία ὅτι ἐστὶν ἀρχή, τῶν φλεβῶν ἐν τοῖς περὶ τὰ Πέρη τῶν ζῴων εἴρηται [469a] πρότερον· καὶ ὅτι τὸ αἷμα τοῖς ἐναίμοις ἐστὶ τελευταία τροφή, ἐξ οὗ γίνεται τὰ μόρια. φανερὸν τοίνυν ὅτι μίαν μέν τινα ἐργασίαν ἡ τοῦ στόματος λειτουργεῖ δύναμις, ἑτέραν δ’ ἡ τῆς κοιλίας, περὶ τὴν τροφήν, ἡ δὲ καρδία κυριωτάτη, καὶ τὸ τέλος ἐπιτίθησιν. ὥστ’ ἀνάγκη καὶ τῆς αἰσθητικῆς καὶ τῆς θρεπτικῆς ψυχῆς ἐν τῇ καρδίᾳ τὴν ἀρχὴν εἶναι τοῖς ἐναίμοις· τὰ γὰρ τῶν ἄλλων μορίων ἔργα περὶ τὴν τροφὴν τοῦ ταύτης ἔργου χάριν ἐστί· δεῖ μὲν γὰρ τὸ κύριον πρὸς τὸ οὗ ἕνεκα διατελεῖν, ἀλλ’ οὐκ ἐν τοῖς τούτου ἕνεκα, οἷον ἰατρὸς πρὸς τὴν ὑγίειαν.

ἀλλὰ μὴν τό γε κύριον τῶν αἰσθήσεων ἐν ταύτῃ τοῖς ἐναίμοις πᾶσιν· ἐν τούτῳ γὰρ ἀναγκαῖον εἶναι τὸ πάντων τῶν αἰσθητηρίων κοινὸν αἰσθητήριον. δύο δὲ φανερῶς ἐνταῦθα συντεινούσας ὁρῶμεν, τήν τε γεῦσιν καὶ τὴν ἁφήν, ὥστε καὶ τὰς ἄλλας ἀναγκαῖον· ἐν τούτῳ μὲν γὰρ τοῖς ἄλλοις αἰσθητηρίοις ἐνδέχεται ποιεῖσθαι τὴν κίνησιν, ταῦτα δ’ οὐδὲν συντείνει πρὸς τὸν ἄνω τόπον. χωρὶς δὲ τούτων, εἰ τὸ ζῆν ἐν τούτῳ τῷ μορίῳ πᾶσίν ἐστι, δῆλον ὅτι καὶ τὴν αἰσθητικὴν ἀρχὴν ἀναγκαῖον· ᾗ μὲν γὰρ ζῷον, ταύτῃ καὶ ζῆν φαμεν, ᾗ δ’ αἰσθητικόν, ταύτῃ τὸ σῶμα ζῷον εἶναι λέγομεν. διὰ τί δ’ αἱ μὲν τῶν αἰσθήσεων φανερῶς συντείνουσι πρὸς τὴν καρδίαν, αἱ δ’ εἰσὶν ἐν τῇ κεφαλῇ (διὸ καὶ δοκεῖ τισιν αἰσθάνεσθαι τὰ ζῷα διὰ τὸν ἐγκέφαλον), τὸ αἴτιον τούτων ἐν ἑτέροις εἴρηται χωρίς.

κατὰ μὲν οὖν τὰ φαινόμενα δῆλον ἐκ τῶν εἰρημένων ὅτι ἐν τούτῳ τε καὶ ἐν τῷ μέσῳ τοῦ σώματος τῶν τριῶν μορίων ἥ τε τῆς αἰσθητικῆς ψυχῆς ἀρχή ἐστι καὶ ἡ τῆς αὐξητικῆς καὶ θρεπτικῆς· κατὰ δὲ τὸν λόγον, ὅτι τὴν φύσιν ὁρῶμεν ἐν πᾶσιν ἐκ τῶν δυνατῶν ποιοῦσαν τὸ κάλλιστον· ἐν τῷ μέσῳ δὲ τῆς οὐσίας τῆς ἀρχῆς οὔσης ἑκατέρας μάλιστα ἂν ἀποτελοῖ τῶν μορίων ἑκάτερον τὸ αὑτοῦ ἔργον, τό τε κατεργαζόμενον τὴν ἐσχάτην τροφὴν καὶ τὸ δεκτικόν· πρὸς ἑκατέρῳ γὰρ αὐτῶν οὕτως ἔσται, καὶ ἔστιν ἡ τοῦ τοιούτου μέσου χώρα ἄρχοντος [469b] χώρα. ἔτι τὸ χρώμενον καὶ ᾧ χρῆται τὸ χρώμενον δεῖ διαφέρειν (ὥσπερ δὲ τὴν δύναμιν, οὕτως, ἂν ἐνδέχηται, καὶ τὸν τόπον), ὥσπερ οἵ τ’ αὐλοὶ καὶ τὸ κινοῦν τοὺς αὐλούς, ἡ χείρ. εἴπερ οὖν τὸ ζῷον ὥρισται τῷ τὴν αἰσθητικὴν ἔχειν ψυχήν, τοῖς μὲν ἐναίμοις ἀναγκαῖον ἐν τῇ καρδίᾳ ταύτην ἔχειν τὴν ἀρχήν, τοῖς δ’ ἀναίμοις ἐν τῷ ἀνάλογον μορίῳ. πάντα δὲ τὰ μόρια καὶ πᾶν τὸ σῶμα τῶν ζῴων ἔχει τινὰ σύμφυτον θερμότητα φυσικήν· διὸ ζῶντα μὲν φαίνεται θερμά, τελευτῶντα δὲ καὶ στερισκόμενα τοῦ ζῆν τοὐναντίον. ἀναγκαῖον δὴ ταύτης τὴν ἀρχὴν τῆς θερμότητος ἐν τῇ καρδίᾳ τοῖς ἐναίμοις εἶναι, τοῖς δ’ ἀναίμοις ἐν τῷ ἀνάλογον· ἐργάζεται γὰρ καὶ πέττει τῷ φυσικῷ θερμῷ τὴν τροφὴν πάντα, μάλιστα δὲ τὸ κυριώτατον. διὸ τῶν μὲν ἄλλων μορίων ψυχομένων ὑπομένει τὸ ζῆν, τοῦ δ’ ἐν ταύτῃ φθείρεται πάμπαν, διὰ τὸ τὴν ἀρχὴν ἐντεῦθεν τῆς θερμότητος ἠρτῆσθαι πᾶσι, καὶ τῆς ψυχῆς ὥσπερ ἐμπεπυρευμένης ἐν τοῖς μορίοις τούτοις, τῶν μὲν ἀναίμων ἐν τῷ ἀνάλογον, ἐν δὲ τῇ καρδίᾳ τῶν ἐναίμων. ἀνάγκη τοίνυν ἅμα τό τε ζῆν ὑπάρχειν καὶ τὴν τοῦ θερμοῦ τούτου σωτηρίαν, καὶ τὸν καλούμενον θάνατον εἶναι τὴν τούτου φθοράν.

Ἀλλὰ μὴν πυρός γε δύο ὁρῶμεν φθοράς, μάρανσίν τε καὶ σβέσιν. καλοῦμεν δὲ τὴν μὲν ὑφ’ αὑτοῦ μάρανσιν, τὴν δ’ ὑπὸ τῶν ἐναντίων σβέσιν, [τὴν μὲν γήρᾳ, τὴν δὲ βίαιον,] συμβαίνει δ’ ἀμφοτέρας διὰ ταὐτὸ γίνεσθαι τὰς φθοράς· ὑπολειπούσης γὰρ τῆς τροφῆς, οὐ δυναμένου λαμβάνειν τοῦ θερμοῦ τὴν τροφήν, φθορὰ γίνεται τοῦ πυρός. τὸ μὲν γὰρ ἐναντίον παῦον τὴν πέψιν κωλύει τρέφεσθαι· ὁτὲ δὲ μαραίνεσθαι συμβαίνει, πλείονος ἀθροιζομένου θερμοῦ διὰ τὸ μὴ ἀναπνεῖν μηδὲ καταψύχεσθαι· ταχὺ γὰρ καὶ οὕτω καταναλίσκει τὴν τροφὴν πολὺ συναθροιζόμενον τὸ θερμόν, καὶ φθάνει καταναλίσκον πρὶν ἐπιστῆναι τὴν ἀναθυμίασιν. διόπερ οὐ μόνον μαραίνεται τὸ ἔλαττον παρὰ τὸ πλεῖον πῦρ, ἀλλὰ καὶ αὐτὴ καθ’ αὑτὴν ἡ τοῦ λύχνου φλὸξ ἐντιθεμένη πλείονι φλογὶ [470a] κατακαίεται, καθάπερ ὁτιοῦν ἄλλο τῶν καυστῶν. αἴτιον δ’ ὅτι τὴν μὲν οὖσαν ἐν τῇ φλογὶ τροφὴν φθάνει λαμβάνουσα ἡ μείζων φλὸξ πρὶν ἐπελθεῖν ἑτέραν, τὸ δὲ πῦρ ἀεὶ διατελεῖ γινόμενον καὶ ῥέον ὥσπερ ποταμός, ἀλλὰ λανθάνει διὰ τὸ τάχος. δῆλον τοίνυν ὡς εἴπερ δεῖ σῴζεσθαι τὸ θερμόν (τοῦτο δ’ ἀναγκαῖον, εἴπερ μέλλει ζῆν), δεῖ γίνεσθαί τινα τοῦ θερμοῦ τοῦ ἐν τῇ ἀρχῇ κατάψυξιν. παράδειγμα δὲ τούτου λαβεῖν ἔστι τὸ συμβαῖνον ἐπὶ τῶν καταπνιγομένων ἀνθράκων· ἂν μὲν γὰρ ὦσι περιπεπωμασμένοι τῷ καλουμένῳ πνιγεῖ συνεχῶς, ἀποσβέννυνται ταχέως· ἂν δὲ παρ’ ἄλληλά τις ποιῇ πυκνὰ τὴν ἀφαίρεσιν καὶ τὴν ἐπίθεσιν, μένουσι πεπυρωμένοι πολὺν χρόνον. ἡ δ’ ἔγκρυψις σῴζει τὸ πῦρ· οὔτε γὰρ ἀποπνεῖν κωλύεται, διὰ μανότητα τῆς τέφρας, ἀντιφράττει τε τῷ πέριξ ἀέρι πρὸς τὸ μὴ σβεννύναι, τῷ πλήθει τῆς ἐνυπαρχούσης αὐτῷ θερμότητος. ἀλλὰ περὶ μὲν τῆς αἰτίας ταύτης, ὅτι τὸ ἐναντίον συμβαίνει τῷ ἐγκρυπτομένῳ καὶ καταπνιγομένῳ πυρί (τὸ μὲν γὰρ μαραίνεται, τὸ δὲ διαμένει πλείω χρόνον), εἴρηται ἐν τοῖς προβλήμασιν.

Ἐπεὶ δὲ πᾶν ζῶν ἔχει ψυχήν, αὕτη δ’ οὐκ ἄνευ φυσικῆς ὑπάρχει θερμότητος, ὥσπερ εἴπομεν, τοῖς μὲν φυτοῖς ἡ διὰ τῆς τροφῆς καὶ τοῦ περιέχοντος ἱκανὴ γίνεται βοήθεια πρὸς τὴν τοῦ φυσικοῦ θερμοῦ σωτηρίαν. καὶ γὰρ ἡ τροφὴ ποιεῖ κατάψυξιν εἰσιοῦσα, καθάπερ καὶ τοῖς ἀνθρώποις τὸ πρῶτον προσενεγκαμένοις, αἱ δὲ νηστεῖαι θερμαίνουσι καὶ δίψας ποιοῦσιν· ἀκίνητος γὰρ ὢν ὁ ἀὴρ ἀεὶ θερμαίνεται, τῆς δὲ τροφῆς εἰσιούσης καταψύχεται κινούμενος, ἕως ἂν λάβῃ τὴν πέψιν. ἐὰν δὲ τὸ περιέχον ὑπερβάλλῃ ψυχρότητι διὰ τὴν ὥραν, ἰσχυρῶν γινομένων πάγων, ἐξαυαίνεται ἡ τοῦ θερμοῦ ἰσχύς, ἂν δὲ συμβαίνῃ καύματα καὶ μὴ δύνηται τὸ σπώμενον ἐκ τῆς γῆς ὑγρὸν καταψύχειν, φθείρεται μαραινόμενον τὸ θερμόν, καὶ λέγεται σφακελίζειν καὶ ἀστρόβλητα γίνεσθαι τὰ δένδρα περὶ τοὺς καιροὺς τούτους. διὸ καὶ γένη τινὰ λίθων ταῖς ῥίζαις ὑποβάλλουσι καὶ ὕδωρ ἐν ἀγγείοις, ὅπως αἱ ῥίζαι ψύχωνται τῶν φυτῶν. τῶν δὲ ζῴων ἐπεὶ τὰ μέν ἐστιν ἔνυδρα τὰ δ’ ἐν τῷ ἀέρι ποιεῖται τὴν δίαιταν, ἐκ τούτων καὶ διὰ τούτων πορίζεται τὴν κατάψυξιν, τὰ μὲν τῷ ὕδατι τὰ δὲ τῷ ἀέρι. τίνα δὲ τρόπον καὶ πῶς, λεκτέον ἐπιστήσασι τὸν λόγον μᾶλλον.

Ανωνυμου περι Πνευματοσ (481a) On Breath

[481a] Τίς ἡ τοῦ ἐμφύτου πνεύματος διαμονή, καὶ τίς ἡ αὔξησις; ὁρῶμεν γὰρ ὅτι πλέον καὶ ἰσχυρότερον γίνεται καὶ καθ' ἡλικίας μεταβολὴν καὶ κατὰ διάθεσιν σώματος. ἢ ὡς τἆλλα μέρη, προσγινομένου τινός; προσγίνεται δὲ τροφὴ τοῖς ἐμψύχοις, ὥστε ταύτην σκεπτέον ποία τε καὶ πόθεν. δύο δὴ τρόποι δι' ὧν γίνεται, ἢ διὰ τῆς ἀναπνοῆς, ἢ διὰ τῆς κατὰ τὴν τῆς τροφῆς προσφορὰν πέψεως, καθάπερ τοῖς ἄλλοις. τούτων ἴσως οὐχ ἧττον ἂν [οὐχ οὕτω] δόξειεν διὰ τῆς τροφῆς· σῶμα γὰρ ὑπὸ σώματος τρέφεται, τὸ δὲ πνεῦμα σῶμα. τίς οὖν ὁ τρόπος; ἢ δῆλον ὡς ἐκ τῆς φλεβὸς ὁλκῇ τινι καὶ πέψει. τὸ γὰρ αἷμα ἡ ἐσχάτη τροφὴ καὶ ἡ αὐτὴ πᾶσιν. ὥσπερ οὖν καὶ εἰς τὸ ἀγγεῖον αὐτοῦ καὶ εἰς τὸ περιεχόμενον λαμβάνει τροφὴν εἰς τὸ θερμόν. ἄγει δ' ὁ ἀὴρ τὴν ἐνέργειαν ποιῶν, τήν τε πεπτικὴν αὐτὸς αὑτῷ προστιθεὶς αὔξει καὶ τρέφει. οὐδὲν δ' ἴσως ἄτοπον αὐτό γε τοῦτο, ἀλλὰ γενέσθαι τὸ πρῶτον ἐκ τῆς τροφῆς. καθαρώτερον γὰρ ὃ τῇ ψυχῇ συμφυές, εἰ μὴ καὶ τὴν ψυχὴν ὕστερον λέγοι γίνεσθαι, διακρινομένων τῶν σπερμάτων καὶ εἰς φύσιν ἰόντων. εἴτε περίττωμα πάσης τροφῆς ἐστι, ποίᾳ διαπέμπεται τοῦτο; κατὰ μὲν γὰρ τὴν ἐκπνοὴν οὐκ εὔλογον· ἀντιλαμβάνει γὰρ εὐθύς. λοιπὸν δὲ δῆλον ὅτι διὰ τῶν τῆς ἀρτηρίας πόρων. τὸ δ' ἐκκρινόμενον ἤτοι λεπτότερον ἢ παχύτερον. ἀμφοτέρως δ' ἄτοπον, εἰ τοῦτο πάντων ἔσται καθαρώτατον. εἰ δὲ παχύτερον, ἔσονταί τινες πόροι μείζους. εἰ δ' ἄρα κατὰ τοὺς αὐτοὺς λαμβάνει καὶ ἐκπέμπει, τοῦτ' αὐτὸ παράλογον καὶ ἄτοπον. ἡ μὲν οὖν ἐκ τῆς τροφῆς αὔξησις καὶ διαμονὴ σχεδὸν ταῦτα.

Ἡ δ' ἐκ τῆς ἀναπνοῆς, ὥσπερ Ἀριστογένης οἴεται (τροφὴν γὰρ οἴεται καὶ τὸ πνεῦμα πεττομένου τοῦ ἀέρος ἐν τῷ πνεύμονι· τοῦτο δ' εἰς τὰ ἀγγεῖα διαδίδοσθαι, τὸ [481b] περίττωμα πάλιν ἐκπέμπεσθαι) πλείους ἔχει τὰς ἀπορίας. ἥ τε γὰρ πέψις ὑπὸ τίνος; εἰκὸς μὲν γὰρ ὑπ' αὐτοῦ, καθάπερ καὶ τῶν ἄλλων. αὐτὸ δὲ τοῦτ' ἄτοπον, εἰ μὴ διαφέρει τοῦ ἔξω ἀέρος· οὕτω δ' ἡ θερμότης ἂν πέττοι. καὶ μὴν καὶ παχύτερον αὐτὸν εὔλογον εἶναι μεθ' ὑγρότητος τῆς ἀπὸ τῶν ἀγγείων ὄντα καὶ τῶν ὅλων ὄγκων, ὥσθ' ἡ πέψις ἂν εἰς τὸ σωματῶδες εἴη. τὸ δὲ περίττωμα, εἴπερ γίνεται λεπτότερον, οὐ πιθανόν. ἄλογος δὲ καὶ ἡ ταχυτὴς τῆς πέψεως. εὐθὺς γὰρ μετὰ τὴν εἰσπνοὴν ἡ ἐκπνοή. τί οὖν τὸ οὕτω ταχὺ μεταβάλλον καὶ ἀλλοιοῦν; ὑπολάβοι γὰρ ἄν τις μάλιστα τὸ θερμόν, καὶ μαρτυρεῖ οὕτως ἡ αἴσθησις· ὁ γὰρ ἐκπνεόμενος θερμός. ἔτι δ’ εἰ μὲν ἐν τῷ πνεύμονι καὶ τῇ ἀρτηρίᾳ τὸ πεττόμενον, ἡ τοῦ θερμοῦ δύναμις ἐν τούτοις· ὅπερ οὔ φασιν, ἀλλ’ ἐν τῇ κινήσει τῇ τοῦ πνεύματος ἐκθερμαίνεσθαι τὴν τροφήν. εἰ δ’ ἐξ ἑτέρου τινὸς οἷον ἐπισπᾶται ἢ καὶ κινοῦντος δέχεται, τοῦτ’ ἔτι θαυμασιώτερον. ἅμα δὲ καὶ οὐκ αὐτὸ τὸ πρῶτον κινοῦν. ἔτι δ’ ἡ μὲν ἀναπνοὴ μέχρι τοῦ πνεύμονος, ὥσπερ λέγουσιν αὐτοί, τὸ δὲ πνεῦμα δι’ ὅλου τὸ σύμφυτον. εἰ δ’ ἀπὸ τούτου διαδίδοται καὶ πρὸς τὰ κάτω καὶ πρὸς τὰ ἄλλα, πῶς ἡ πέψις οὕτω ταχεῖα; θαυμασιώτερον γὰρ τοῦτο καὶ μεῖζον· οὐ γὰρ διαπέμπει τοῦτό γ’ εὐθὺς πεττόμενον τὸν ἀέρα τοῖς κάτω. καίτοι τὸ μὲν δόξειεν ‹ἂν› ἀναγκαῖον εἶναι τοῦτο τῆς πέψεως γινομένης ἐν τῷ πνεύμονι τῆς τ’ ἀναπνοῆς κοινωνούντων καὶ τῶν κάτω, μεῖζον δ’ οὕτως ἔτι καὶ παραδοξότερον τὸ συμβαῖνον· οἷον γὰρ διόδῳ καὶ θίξει γίνεται μόνον ἡ πέψις. ἄλογον δὲ καὶ τουτὶ καὶ λογοδεστερον, εἰ ὁ αὐτὸς πόρος τῆς τροφῆς καὶ τοῦ περιττώματος. εἰ δὲ δι’ ἄλλου τινὸς τῶν ἐντός, οἱ αὐτοὶ λόγοι οἳ καὶ πρότερον, εἰ μὴ τοῦτο λέγοι τις, ὡς οὐ πάσης τῆς τροφῆς οὐδὲ πᾶσι γίνεται περίττωμα, [482a] καθάπερ οὐδὲ τοῖς φυτοῖς, ἐπεὶ οὐδὲ τῶν τοῦ σώματος μερῶν ἑκάστου λαβεῖν ἐστιν, εἰ μή, ὅτι γε παντός. ἀλλ’ ἄρα γε ἡ μὲν ἀγγείων αὔξησις ἡ αὐτὴ καὶ τῶν ἄλλων μορίων, εὐρυνομένων δὲ καὶ διισταμένων τούτων πλείων ὁ ἀὴρ ὁ εἰσρέων καὶ ἐκρέων. εἰ δέ τι ἀναγκαῖον ἐνυπάρχει, τοῦτο αὐτὸ ζητεῖται, τίς ὁ φυσικός; καὶ πῶς οὗτος πλείων ὑγιῶς, ἐκ τούτου φανερὸν ἂν εἴη. τοῖς δὲ δὴ μὴ ἀναπνευστικοῖς τίς ἡ τροφὴ τοῦ συμφύτου καὶ τίς ἡ αὔξησις; οὐ γὰρ ἔτι τούτοις ἀπὸ τοῦ ἔξωθεν. εἰ δ’ ἀπὸ τῶν ἐντὸς καὶ τῆς κοινῆς τροφῆς, εὔλογον κἀκείνοις· ἀπὸ γὰρ τῶν αὐτῶν τὰ ὅμοια καὶ ὡσαύτως, εἰ μὴ ἄρα καὶ τούτοις ἀπὸ τοῦ ἐκτός, ὥσπερ καὶ τῶν ὀσμῶν αἰσθάνονται. ἀλλ’ οὔτοιγ’ οἷον ἀναπνοὴ γίνεται. περὶ οὗ κἂν ἀπορήσειέ τις, εἰ κατὰ ἀλήθειάν ἐστιν, αὐτό τε τοῦτο προφέρων καὶ τὴν ἐπίσπασιν τῆς τροφῆς (ὁλκὴ γὰρ ἅμα πνεύματος), ἔτι δ’ ὑπὲρ τῆς καταψύξεως ἀντιλέγων, ὡς κἀκείνων δεομένων. εἰ δὲ διὰ τοῦ ὑποζώματος αὐτοῖς γίνεται, ταύτῃ δῆλον ὅτι καὶ ἡ τοῦ ἀέρος εἴσοδος· ὥσθ’ ὅμοιόν τι τῇ ἀναπνοῇ. πλὴν οὐκ ἀφορίζεται τίς ‹ἡ› ὁλκὴ καὶ ὑπὸ τίνος, ἢ εἰ μὴ ὁλκή, πῶς ἡ εἴσοδος; εἰ μὴ ἄρα αὐτομάτως. τοῦτο μὲν οὖν ἔχει καὶ αὐτὸ καθ’ αὑτὸ σκέψιν. τοῖς δὲ δὴ ἐνύγροις τίς ἡ τροφὴ καὶ αὔξησις τοῦ συμφύτου; χωρὶς γὰρ τοῦ μὴ ἀναπνεῖν οὐδ’ ἐνυπάρχειν ὅλως ἐν τῷ ὑγρῷ φαμεν ἀέρα. λοιπὸν ἄρα διὰ τῆς τροφῆς, ὡς οὐχ ὁμοίως πᾶσιν, ἢ κἀκεῖνα διὰ τῆς τροφῆς τὰ ‹μὴ› ἔνυγρα· τριῶν γὰρ τούτων ἀναγκαῖον ἕν. καὶ ταῦτα μὲν ὡς περὶ τὴν αὔξησιν καὶ τροφὴν τοῦ πνεύματος.

Περὶ δὲ ἀναπνοῆς οἱ μὲν οὐ λέγουσι τίνος χάριν, ἀλλὰ μόνον ὃν τρόπον γίνεται, καθάπερ Ἐμπεδοκλῆς καὶ Δημόκριτος· οἱ δ’ οὐδὲ τὸν τρόπον ὅλως λέγουσιν, ἀλλ’ ὡς φανερῷ χρῶνται. δεῖ δὲ καὶ εἰ καταψύξεως χάριν, αὐτὸ τοῦτο διασαφῆσαι. εἰ γὰρ ἐν τοῖς ἄνω τὸ θερμόν, οὐκ ἂν ἔτι δέοιτο κάτω. τὸ δὲ σύμφυτον πνεῦμα δι’ ὅλου, καὶ ἀρχὴ ἀπὸ τοῦ πνεύμονος. δοκεῖ δὲ καὶ τὸ τῆς ἀναπνοῆς εἰς πάντα διαδίδοσθαι κατὰ συνέχειαν, ὥστε τοῦτο δεικτέον ὡς οὐκ ἔστιν. ἄτοπον δὲ εἰ μὴ δεῖταί τινος κινήσεως καὶ [482b] οἷον τροφῆς. εἰ δὲ διαπνεῖ πρὸς πᾶν, οὐκ ‹ἂν› ἔτι καταψύξεως εἴη χάριν. ἀλλὰ μὴν καὶ ἡ διάδοσις ἄλλως τ’ ἀναίσθητος, καὶ τὸ τάχος αὐτῆς. καὶ πάλιν τὸ τῆς παλιρροίας, εἴπερ ἀπὸ πάντων, θαυμαστόν, πλὴν εἰ ἄλλον τρόπον ἀπὸ τῶν ἐσχάτων, τὸ δὲ πρώτως καὶ κυρίως ἀπὸ τῶν περὶ τὴν καρδίαν. ἐν πολλοῖς δ’ οὕτω τὸ τῶν ἐνεργειῶν καὶ τῶν δυνάμεων. ἄτοπον οὖν ὅμως εἰ καὶ εἰς τὸ ὀστοῦν διαδίδοται· καὶ γὰρ δὴ τοῦτό φασιν ἐξ ἀρτηριῶν. διό, καθάπερ εἴρηται, σκεπτέον περὶ ἀναπνοῆς, καὶ τίνος ἕνεκα καὶ ποίοις μέρεσι καὶ πῶς. ἔτι δὲ οὐδ’ ἐπιφορὰ τῆς τροφῆς φέρεται πᾶσι δι’ ἀρτηριῶν, οἷον αὐτοῖς τε τοῖς ἀγγείοις καὶ ἄλλοις τισὶ τῶν μερῶν· ζῇ δὲ ‹ὥσπερ› τὰ φυτὰ καὶ τρέφεται. ταῦτα μὲν οἰκειότερά πως τοῖς περὶ τὰς τροφάς.

Ἐπεὶ δὲ τρεῖς αἱ κινήσεις τοῦ ἐν τῇ ἀρτηρίᾳ πνεύματος, ἀναπνοή, σφυγμός, τρίτη δ’ ἡ τὴν τροφὴν ἐπάγουσα καὶ κατεργαζομένη, λεκτέον ὑπὲρ ἑκάστης καὶ ποῦ καὶ πῶς καὶ τίνος χάριν. τούτων δ’ ἡ μὲν τοῦ σφυγμοῦ καὶ τῇ αἰσθήσει φανερὰ καθ’ ὁτιοῦν μέρος ἁπτομένοις, ἡ δὲ τῆς ἀναπνοῆς μέχρι μέν του φανερά, τὸ δὲ πλέον κατὰ λόγον, ἡ δὲ τῆς τροφῆς ἅπασα κατὰ λόγον ὡς εἰπεῖν, ὡς ἐκ τῶν συμβαινόντων δὲ κατὰ τὴν αἴσθησιν. ἡ μὲν οὖν ἀναπνοὴ δῆλον ὡς ἀπὸ τοῦ ἐντὸς ἔχει τὴν ἀρχήν, εἴτε ψυχῆς δύναμιν εἴτε ψυχὴν δεῖ λέγειν ταύτην, εἴτε καὶ ἄλλην τινὰ σωμάτων μίξιν, ἣ δι’ αὐτῶν ποιεῖ τὴν τοιαύτην ὁλκήν. ἡ δὲ θρεπτικὴ δόξειεν ἂν ἀπὸ τῆς ἀναπνοῆς· αὕτη γὰρ ἀνταποδίδοται, καὶ ὁμοία τῷ ἀληθεῖ. εἰ δὲ μή, πᾶν ὁμαλίζει τοῖς χρόνοις τὸ σῶμα κατὰ τὴν τοιαύτην κίνησιν. ἢ εἰ μηδὲν διαφέρει τὸ ἅμα, πάντα τὰ μέρη σκεπτέον. ὁ δὲ σφυγμὸς ἴδιός τις παρὰ ταύτας τῇ μὲν ἂν δοκῶν εἶναι κατὰ συμβεβηκός, εἴπερ, ὅταν ἐν ὑγρῷ πλῆθος ᾖ θερμότητος, ἀνάγκη τὸ ἐκπνευματούμενον διὰ τὴν ἐναπόληψιν ποιεῖν σφυγμόν, ἐν τῇ ἀρχῇ δὲ καὶ πρῶτον, εἴπερ τοῖς πρώτοις σύμφυτον· [ἐν γὰρ τῇ καρδίᾳ μάλιστα καὶ πρῶτον, ἀφ’ ἧς καὶ τοῖς ἄλλοις.] τάχα δὲ πρὸς τὴν ὑποκειμένην οὐσίαν τοῦ ζῴου τὴν ἐκ τῆς ἐνεργείας ἀνάγκη τοῦτο παρακολουθεῖν. ὅτι δ’ οὐδὲν πρὸς τὴν ἀναπνοὴν ὁ σφυγμός, [483a] σημεῖον· ἐάν τε γὰρ πυκνὸν ἐάν τε ὁμαλὸν ἐάν τε σφοδρὸν ἢ ἀραιὸν ἀναπνέῃ τις, ὅ γε σφυγμὸς ὅμοιος καὶ ὁ αὐτός, ἀλλ’ ἡ ἀνωμαλία γίνεται καὶ ἐπίτασις ἔν τε σωματικοῖς τισι πάθεσι καὶ ἐν τοῖς τῆς ψυχῆς φόβοις ἐλπίσιν ἀγωνίαις. εἰ δὲ καὶ ἐν ταῖς ἀρτηρίαις ὁ σφυγμός, κἂν ὁ αὐτὸς ὢν ἐν ῥυθμῷ καὶ ὁμαλὸς ᾖ, σκεπτέον· οὐκ ἔοικε δέ γε τοῖς μακρὰν ἀπηρτημένοις. ἥκιστα δ’ ἕνεκά του φαίνεται γίνεσθαι, καθάπερ εἴρηται. τὸ γὰρ αὖ τῆς ἀναπνοῆς καὶ τῆς ἐπαγωγῆς, εἴθ’ ὡς ἕτερα πάμπαν ἀλλήλων εἴθ’ ὡς θάτερον πρὸς θάτερον, ἕνεκά του φαίνεται καὶ ἔχει τινὰ λόγον. τριῶν δ’ οὐσῶν πρότερον εὔλογον εἶναι τήν τε σφυγμώδη καὶ τὴν ἀναπνευστικήν· ἡ γὰρ τροφὴ προϋπάρχοντος. ἢ οὔ; τὸ μὲν γὰρ ἀναπνεῖν, ὅταν ἀπολυθῇ τῆς κυούσης, ἡ δ’ ἐπιφορὰ καὶ ἡ τροφὴ καὶ ξυνισταμένου καὶ ξυνεστηκότος· ὁ δὲ σφυγμὸς εὐθὺς ἐν τῇ ἀρχῇ ξυνισταμένης τῆς καρδίας, καθάπερ ἐν τοῖς ᾠοῖς γίνεται φανερόν. ὥστε αὕτη πρώτη, καὶ ἔοικεν ἐνεργείᾳ τινὶ καὶ οὐκ ἐναπολήψει πνεύματος, εἰ μὴ ἄρα τοῦτο πρὸς τὴν ἐνέργειαν. τὸ δὲ πνεῦμα τὸ ἐκ τῆς ἀναπνοῆς φέρεσθαι μὲν εἰς τὴν κοιλίαν, οὐ διὰ τοῦ στομάχου (τοῦτο μὲν γὰρ ἀδύνατον), ἀλλὰ πόρον εἶναι παρὰ τὴν ὀσφύν, δι’ οὗ τὸ πνεῦμα τῇ ἀναπνοῇ φέρεσθαι ἐκ τοῦ βρογχίου εἰς τὴν κοιλίαν καὶ πάλιν ἔξω· τοῦτο δὲ τῇ αἰσθήσει φανερόν. ἔχει δ’ ἀπορίαν καὶ τὰ περὶ τὴν αἴσθησιν. εἰ γὰρ ἡ ἀρτηρία μόνον αἰσθάνεται, πότερα τῷ πνεύματι τῷ δι’ αὐτῆς, ἢ τῷ ὄγκῳ, ἢ τῷ σώματι; ἢ εἴπερ ὁ ἀὴρ πρῶτον ὑπὸ τὴν ψυχήν, τῷ κυριωτέρῳ τε καὶ προτέρῳ; τί οὖν ἡ ψυχή; δύναμίν φασι τὴν αἰτίαν τῆς κινήσεως τῆς τοιαύτης. ἢ δῆλον ὡς οὐκ ὀρθῶς ἐπιτιμήσεις τοῖς τὸ λογιστικὸν καὶ θυμικόν· καὶ γὰρ οὗτοι ὡς δυνάμεις λέγουσιν. ἀλλ’ εἰ δὴ ἡ ψυχὴ ἐν τῷ ἀέρι τούτῳ, οὗτός γε κοινός. ἢ πάσχων γέ τι καὶ ἀλλοιούμενος εὐλόγως, ἂν ἔμψυχον ἢ ψυχή, πρὸς τὸ συγγενὲς φέρεται καὶ τῷ ὁμοίῳ τὸ ὅμοιον αὔξεται. ἢ οὔ; τὸ γὰρ ὅλον οὐκ ἀήρ, ἀλλὰ συμβαλλόμενόν τι πρὸς ταύτην τὴν δύναμιν ὁ ἀήρ. ἢ οὐ, ‹ἀλλὰ› τὸ ταύτην ποιοῦν, καὶ τὸ ποιῆσαν τοῦτ’ ἀρχὴ καὶ ὑπόθεσις; [483b] τοῖς δὲ μὴ ἀναπνέουσιν, ἵνα ἀνεπίμικτος τῷ ἔξω. ἢ οὔ, ἀλλὰ κατ’ ἄλλον τρόπον μειγνύμενος; τίς οὖν ἡ διαφορὰ τοῦ ἐν τῇ ἀρτηρίᾳ πρὸς τὸν ἔξω; διαφέρειν γὰρ εὔλογον, τάχα δὲ καὶ ἀναγκαῖον, λεπτότητι. ἀλλ’ ἔτι δὲ καθ’ αὑτὸν θερμὸς ἢ ὑφ’ ἑτέρου; φαίνεται γὰρ ὁ ἔσω καθάπερ ὁ ἔξω· βοηθεῖται δὲ τῇ καταψύξει. πότερα δέ; ἔξω μὲν γὰρ πραΰς, ἐμπεριληφθεὶς δὲ πνεῦμα, καθάπερ πυκνωθεὶς καὶ διαδοθείς πως. ἢ μίξιν τινὰ ἀνάγκη λαμβάνειν, ἐν ὑγρότητί τε καὶ σωματικοῖς ὄγκοις ἀναστρεφόμενον; οὐκ ἄρα λεπτότατος, εἴπερ μέμεικται. καὶ μὴν εὔλογόν γε τὸ πρῶτον δεκτικὸν ψυχῆς, εἰ μὴ ἄρα καὶ ἡ ψυχὴ τοιοῦτον, καὶ οὐ καθαρόν τι καὶ ἀμιγές. τὴν ἀρτηρίαν μόνον εἶναι δεκτικὴν πνεύματος, τὸ δὲ νεῦρον οὔ. διαφέρειν δὲ καὶ ὅτι τὸ μὲν νεῦρον ἔχει τάσιν, ἡ δ’ ἀρτηρία ταχὺ διαρρήγνυται, καθάπερ καὶ ἡ φλέψ. τὸ δὲ δέρμα ἐκ φλεβὸς καὶ νεύρου καὶ ἀρτηρίας, ἐκ φλεβὸς μὲν ὅτι κεντηθὲν αἷμα ἀναδίδωσιν, ἐκ νεύρου δὲ ὅτι τάσιν ἔχει, ἐξ ἀρτηρίας δὲ ὅτι διαπνοὴν ἔχει. μόνον γὰρ δεκτικὸν πνεύματος ἡ ἀρτηρία. τὰς δὲ φλέβας ἔχειν πόρους, ἐν αἷς τὸ θερμὸν ὂν ὥσπερ ἐν χαλκείῳ θερμαίνειν τὸ αἷμα· φύσει γὰρ οὐκ εἶναι θερμόν, ἀλλ’ ὥσπερ τὰ τηκτὰ διαχεῖσθαι· διὸ καὶ πήγνυσθαι τὴν ἀρτηρίαν, καὶ ἔχειν ὑγρότητα καὶ ἐν αὑτῇ καὶ ἐν τοῖς χιτῶσι τοῖς περιέχουσι τὸ κοίλωμα. φανερὸν δ’ ἔκ τε τῶν ἀνατομῶν εἶναι, καὶ ὅτι εἰς τὸ ἔντερον καὶ εἰς τὴν κοιλίαν αἵ τε φλέβες καὶ αἱ ἀρτηρίαι συνάπτουσιν, ἃς εἰκὸς εἶναι τὴν τροφὴν ἕλκειν. ἐκ δὲ τῶν φλεβῶν εἰς τὰς σάρκας διαδίδοσθαι τὴν τροφήν, οὐ κατὰ τὰ πλάγια ἀλλὰ κατὰ τὸ στόμα, καθάπερ σωλῆνας. ἀποτείνειν γὰρ ἐκ τῶν πλαγίων φλεβῶν φλέβια λεπτὰ ἐκ τῆς μεγάλης φλεβὸς καὶ τῆς ἀρτηρίας παρ’ ἑκάστην πλευράν, καὶ ἀρτηρίαν καὶ φλέβα παρακεῖσθαι· καὶ τὰ ὀστέα δὲ καθάπτειν τὰ νεῦρα καὶ τὰς φλέβας καὶ εἰς μέσα καὶ εἰς τὰς συμβολὰς τῶν κεφαλῶν, δι’ ὧν τὴν τροφὴν δέχεσθαι τοὺς ἰχθύας καὶ ἀναπνεῖν· εἰ δὲ μὴ ἀνέπνεον, ἐξαιρεθέντας ἂν ἐκ τοῦ ὑγροῦ εὐθὺς θνήσκειν. τὰς δὲ φλέβας καὶ τὰς [484a] ἀρτηρίας συνάπτειν εἰς ἀλλήλας καὶ τῇ αἰσθήσει φανερὸν εἶναι. τοῦτο δ’ οὐκ ἂν συμβαίνειν, εἰ μὴ ἐδεῖτο καὶ τὸ ὑγρὸν πνεύματος καὶ τὸ πνεῦμα ὑγροῦ, τῷ θερμὸν εἶναι ἐν νεύρῳ καὶ ἀρτηρίᾳ καὶ φλεβί, θερμότατον δὲ καὶ οἷον φλεβωδέστατον τὸ ἐν τῷ νεύρῳ. ἄτοπον οὖν τῇ τοῦ πνεύματος χώρᾳ τὸ θερμόν, ἄλλως τε καὶ καταψύξεως χάριν. εἰ δὲ ποιεῖ καὶ οἷον ἀναζωπυρεῖ θερμῷ τὸ θερμόν, γίγνοιτ’ ἄν. ἔτι πάντων τῶν ἐχόντων θερμότητα σύμφυτον πῶς ἡ διαμονή, μηδενὸς ἀντικειμένου μηδὲ καταψύχοντος; ὅτι γὰρ πάντα δεῖται καταψύξεως, σχεδὸν φανερὸν τῷ ‹τὸ› αἷμα κατέχειν ἐν τῇ φλεβὶ τὸ θερμὸν οἷον ἀποστέγον· διὸ καὶ ὅταν ἐκρυῇ, μεθιέναι τε καὶ θνήσκειν, τῷ τὸ ἧπαρ οὐκ ἔχειν οὐδεμίαν ἀρτηρίαν.

Πότερον δὲ τὸ σπέρμα διὰ τῆς ἀρτηρίας ὡς καὶ συνθλιβόμενον, καὶ ἐν τῇ προέσει μόνον; ἐν οἷς δὴ φαίνεται καὶ ἡ ἐξ αἵματος μεταβολὴ τῷ τὰ νεῦρα ἀπὸ τῶν ὀστῶν τρέφεσθαι· καθάπτει γὰρ αὐτά. ἢ οὐδὲ τοῦτ’ ἀληθές· καὶ γὰρ ἐν τῇ καρδίᾳ νεῦρον, καὶ νεῦρα δὲ ἐκ τῶν ὀστῶν ἠρτημένα. οὐ συνάπτει δὲ ἐν ἑτέρῳ, ἀλλ’ εἰς σάρκα ἀποτελευτᾷ. ἢ τουτό γ’ οὐθέν· εἴη γὰρ ἂν οὐθὲν ἧττον ἀπὸ τοῦ ὀστοῦ ἡ τροφή. αὐτοῖς δ’ ἀπὸ τοῦ νεύρου τοῖς ὀστοῖς μᾶλλον τὴν τροφήν. ἄτοπον γὰρ καὶ τοῦτο. ξηρὸν ‹γὰρ› φύσει καὶ οὐκ ἔχον πόρους ὑγρούς· ἡ τροφὴ δ’ ὑγρόν. σκεπτέον δὲ πρότερον, εἴπερ ἀπὸ τῶν ὀστῶν, τίς ἡ τοῦ ὀστοῦ τροφή, ἢ φέρουσι πόροι καὶ ἐκ τῆς φλεβὸς καὶ ἐκ τῆς ἀρτηρίας εἰς αὐτό. καὶ ἐν πολλοῖς μὲν εὔδηλοι, μάλιστα δ’ εἰς τὴν ῥάχιν. τὰς δ’ ἀπὸ τῶν ὀστῶν γίνεσθαι συνεχεῖς, ὥσπερ ταῖς πλευραῖς·

τούτους δ’ ἀπὸ τῆς κοιλίας τίνα τρόπον, ἢ πῶς τῆς ὁλκῆς γινομένης; ἢ τὰ πολλὰ ἄχονδρα, καθάπερ ἡ ῥάχις· ἀλλ’ οὔτοι πρὸς τὴν κίνησιν. ἢ συνάψεως χάριν; δεῖ δέ, καὶ εἰ ἀπὸ τοῦ νεύρου τὸ ὀστοῦν τρέφεται, τὴν τοῦ νεύρου τροφὴν εἰδέναι. ἡμεῖς δέ φαμεν ἐκ τῆς ὑγρότητος γλίσχρας οὔσης τῆς περὶ [τὸ] αὐτό. πόθεν δ’ αὐτὴ καὶ πῶς, λεκτέον. τὸ ἐκ φλεβὸς καὶ ἀρτηρίας τὴν σάρκα, ὅτι πανταχόθεν αἷμα τῇ κεντήσει, ψεῦδος ἐπί γε τῶν ἄλλων ζῴων, οἷον ὀρνίθων καὶ ὄφεων καὶ ἰχθύων ἢ ὅλως τῶν ᾠοτόκων· ἀλλὰ τῶν πολυαίμων τοῦτ’ ἴδιον, ἐπεὶ τῶν ὀρνιθίων γε καὶ τεμνομένων τὸ στῆθος ἰχώρ, οὐχ αἷμα. Ἐμπεδοκλῆς δὲ ἐκ νεύρου τὸν ὄνυχα [484b] τῇ πήξει. ἆρ’ οὖν οὕτω καὶ δέρμα πρὸς σάρκα; ἀλλὰ τοῖς ὀστρακοδέρμοις καὶ μαλακοστράκοις πῶς ἀπὸ τῶν ἐκτὸς ἡ τροφή; τοὐναντίον γὰρ δοκεῖ μᾶλλον ἀπὸ τῶν ἐντὸς ἢ τῶν ἐκτός. ἔτι δὲ ποία καὶ διὰ τίνων ἡ ἐκ τῆς κοιλίας δίοδος; καὶ πάλιν ἡ ἐκείνων ἀναστροφὴ πρὸς τὴν σάρκα, καίπερ ἄλογος οὖσα. πολὺ γάρ τι θαυμαστὸν φαίνεται καὶ ἀδύνατον ὅλως. ἄρα γε ἄλλοις ἄλλη τροφή, καὶ οὐ πᾶσι τροφὴ τὸ αἷμα· πλὴν ἐκ τούτου τἆλλα.

Τὴν τῶν ὀστῶν φύσιν ἄρα σκεπτέον εἰ πρὸς κίνησιν ἢ πρὸς ἔρεισμα καὶ πρὸς τὸ στέγειν καὶ περιέχειν, ἔτι δ’ εἰ ὥσπερ ἀρχαὶ ἔνια, καθάπερ ὁ πόλος. λέγω δὲ πρὸς μὲν κίνησιν, οἷον ποδὸς ἢ χειρὸς ἢ σκέλους ἢ ἀγκῶνος, ὁμοίως τήν τε καμπτικὴν καὶ τὴν κατὰ τόπον· οὐδὲ γὰρ τὴν τοπικὴν οἷόν τε ἄνευ κάμψεως. σχεδὸν δὲ καὶ τὰ ἐρείσματα ἐν τούτοις. τὴν δὲ τοῦ στέγειν καὶ περιέχειν, οἷον τὰ ἐν τῇ κεφαλῇ τὸν ἐγκέφαλον, καὶ ὅσοι δὴ τὸν μυελὸν ἀρχήν. αἱ δὲ πλευραὶ τοῦ συγκλείειν. ἀρχὴ δὲ καὶ μένον ἡ ῥάχις, ἀφ’ ἧς καὶ αἱ πλευραὶ πρὸς τὴν σύγκλεισιν. ἀνάγκη γὰρ εἶναί τι τοιοῦτον· ἅπαν γὰρ τὸ κινούμενον ἐξ ἠρεμοῦντος. ἅμα δὲ καὶ δεῖ γε εἶναι τὸ οὗ ἕνεκα. ἐν ᾧ δὴ καὶ τὴν ἀρχὴν ἔνιοι, τόν τε ῥαχίτην καὶ τὸν ἐγκέφαλον. ἔτι δὲ παρὰ ταῦτ’ ἐπισυναφῆς καὶ συγκλείσεως χάριν, οἷον ἡ κλείς· ὅθεν ἴσως καὶ τοὔνομα. πρὸς δὲ τὴν χρείαν ἕκαστον καλῶς. οὐδὲ γὰρ ἡ κάμψις, οὔτε τοῦ ὅλου οὔτε τῶν μερῶν, εἰ μὴ τοιαῦτα, οἷον ῥάχις, πούς, ἀγκών. εἴσω γὰρ δεῖ τὴν κάμψιν πρὸς τὴν χρείαν, ὁμοίως δὲ καὶ τὴν τοῦ ποδὸς καὶ τῶν ἄλλων τοιαύτην. ἅπαντα δὲ ἕνεκά του, καὶ τὰ ἐν τούτοις ὀστᾶ, οἷον ἡ ἐν τῷ ἀγκῶνι κερκὶς ἕνεκα τῆς στροφῆς τοῦ ἀγκῶνος καὶ τῆς χειρός. οὐ γὰρ ‹ἂν› ἐδυνάμεθα πρηνῆ καὶ ὑπτίαν κινεῖν ἄνευ ταύτης, οὐδὲ τοὺς πόδας ἐπαίρειν καὶ κάμπτειν, εἰ μὴ δύο αἱ ἐν τῇ κινήσει κερκίδες. ὡσαύτως δὲ καὶ τὰ ἄλλα σκεπτέον, οἷον ἡ τοῦ τραχήλου κίνησις, εἰ ἓν τὸ ὀστοῦν. δεῖ δὲ καὶ ὅσα πρὸς κατάληψιν ἢ σύνδεσμον, οἷον ἡ μύλη ἡ ἐπὶ τῷ γόνατι. ἀλλὰ καὶ διὰ τί τοῖς ἄλλοις οὔ. ὅσα μὲν οὖν κινητικά, πάντα μὲν μετὰ νεύρων, ἴσως δ’ ὅσα πρακτικῶς, μάλιστα, οἷον τὰ περὶ ἀγκῶνα καὶ σκέλη καὶ χεῖρας καὶ πόδας. τὰ δ’ ἄλλα συνδέσμου χάριν, ὅσα δεῖται. ἐνίοις γὰρ ἴσως οὐδὲν ἢ ἐπ’ ὀλίγον, οἷον ἡ ῥάχις· ἀλλ’ ἡ [485a] κάμψις. καὶ γὰρ ἡ πρὸς ἄλληλα κόλλησις ἰχώρ ἐστι καὶ ὑγρότης μυξώδης. τὰ δὲ καὶ συνδεῖται νεύροις, οἷον τὰ περὶ τὰ ἄρθρα.

Πάντων δ’ ἐστὶ λόγος ὁ βελτίων ὡς καὶ νῦν ζητεῖν· ἀλλὰ τὰς ἀρχὰς ἐφ’ ἱκανόν, ὧν χάριν, σκεπτέον. οὐκ ἂν δόξειε κινήσεως ἕνεκα τὰ ὀστᾶ, ἀλλὰ μᾶλλον τὰ νεῦρα ἢ τὰ ἀνάλογον, ἐν ᾧ πρώτῳ τὸ πνεῦμα τὸ κινητικόν, ἐπεὶ καὶ ἡ κοιλία κινεῖται καὶ ἡ καρδία νεῦρα ἔχει· τὰ δ’ οὐ πᾶσιν, ἀλλ’ ἐνίοις, ἀνάγκη καὶ πρὸς τὴν τοιαύτην κίνησιν νεῦρα ἔχειν, ἢ εἰς τὸ ὁ γὰρ πολύπους ἐπ’ ὀλίγον καὶ κακῶς βαδίζει. δεῖ γὰρ τοῦτο λαβεῖν ὥσπερ ἀρχήν, ὅτι πᾶσιν [ἢ] ἄλλου τινὸς χάριν ἄλλα πρὸς τὴν κίνησιν τὴν οἰκείαν, οἷον τοῖς μὲν πεζοῖς πόδας, καὶ τοῦτο τοῖς μὲν ὀρθοῖς δύο, τοῖς δὲ παντελῶς ἐπὶ τῆς γῆς πλείους, ὅσοις ἡ ὕλη γεωδεστέρα καὶ ψυχροτέρα (τὰ δὲ καὶ ἄποδα ὅλως ἐγχωρεῖ· βίᾳ γὰρ οὕτω κινεῖσθαι) τοῖς ‹δὲ› πτηνοῖς πτέρυγας, καὶ τούτων τὴν μορφὴν οἰκείαν τῇ φύσει, διάφορα δὲ τοῖς πτητικωτέροις καὶ βραδυτέροις. πόδας δὲ τροφῆς χάριν καὶ ἀναστάσεως, πλὴν τῆς νυκτερίδος· διὸ καὶ τὴν τροφὴν ἐκ τοῦ ἀέρος. καὶ μὴ δεῖσθαι διαναπαύσεως· οὐ δέονται γὰρ δι’ ἄλλων. τὰ δὲ ὀστρακόδερμα τῶν ἐνύδρων ὑπόποδα διὰ τὸ βάρος. καὶ ταῦτα μὲν πρὸς τὴν κατὰ τόπον ἀλλαγήν· ὅσα δὲ πρὸς τὴν ἄλλην χρείαν, ὥσπερ ὑφηγεῖται καὶ ἑκάστου τὰ ἴδια, καὶ εἴ τι μὴ προφανές, οἷον διὰ τί τὰ πολύποδα βραδύτατα. (καίτοι τὰ τετράποδα θάττω τῶν διπόδων) πότερον ὅτι ἐπὶ γῆς ὅλα τὰ σώματα ἢ ὅτι φύσει ψυχρὰ καὶ δυσκίνητα ἢ δι’ ἄλλην αἰτίαν.

Οἱ ἀναιροῦντες ὡς οὐ τὸ θερμὸν τὸ ἐργαζόμενον ἐν τοῖς σώμασιν, ἢ ὅτι μία τις φορὰ καὶ δύναμις ἡ τμητικὴ τοῦ πυρός, οὐ καλῶς λέγουσιν. οὐδὲ γὰρ ὅλα τοῖς ἀψύχοις ταὐτὸ ποιεῖ πᾶσιν, ἀλλὰ τὰ μὲν πυκνοῖ, τὰ δὲ μανοῖ, καὶ τήκει, τὰ δὲ πήγνυσιν. ἐν δὲ δὴ τοῖς ἐμψύχοις οὕτως ὑποληπτέον, ὥσπερ φύσεως πῦρ ζητοῦντα, καθάπερ τέχνης· καὶ γὰρ ἐν ταῖς τέχναις ἕτερον τὸ χρυσοχοϊκὸν καὶ τὸ χαλκευτικὸν καὶ τὸ τεκτονικὸν πῦρ ἀποτελεῖ, καὶ τὸ μαγειρικόν. ἴσως δ’ ἀληθέστερον ὅτι αἱ τέχναι· χρῶνται γὰρ [485b] ὥσπερ ὀργάνῳ μαλάττουσαι καὶ τήκουσαι καὶ ξηραίνουσαι, ἔνια δὲ καὶ ῥυθμίζουσαι. τὸ αὐτὸ δὴ τοῦτο καὶ αἱ φύσεις· ὅθεν δὴ καὶ ‹αἱ› πρὸς ἄλληλα διαφοραί. διὸ γελοῖον πρὸς τὸ ἔξω κρίνειν· εἴτε γὰρ διακρῖνον εἴτε λεπτῦνον εἴθ’ ὁτιδήποτ’ ἐστὶ τὸ θερμαίνεσθαι καὶ πυροῦσθαι, διάφορα ἕξει τὰ ἔργα τοῖς χρωμένοις. ἀλλ’ αἱ μὲν τέχναι ὡς ὀργάνῳ χρῶνται, ἡ δὲ φύσις ἅμα καὶ ὡς ὕλῃ. οὐ δὴ τοῦτο χαλεπόν, ἀλλὰ μᾶλλον τὸ τὴν φύσιν αὐτὴν νοῆσαι τὴν χρωμένην, ἥτις ἅμα τοῖς αἰσθητοῖς πάθεσι καὶ τὸν ῥυθμὸν ἀποδώσει. τοῦτο γὰρ οὐκέτι πυρὸς οὐδὲ πνεύματος. τούτοις δὴ καταμεμεῖχθαι τοιαύτην δύναμιν θαυμαστόν. ἔτι δὲ τοῦτο θαυμαστὸν ταὐτὸν καὶ περὶ ψυχῆς· ἐν τούτοις γὰρ ὑπάρχει. διόπερ οὐ κακῶς εἰς ταὐτόν, ἢ ἁπλῶς ἢ μόριόν τι τὸ δημιουργοῦν, καὶ τὸ τὴν κίνησιν ἀεὶ τὴν ὁμοίαν ὑπάρχειν ἐνεργοῦν. καὶ γὰρ ἡ φύσις, ἀφ’ ἧς καὶ ἡ γένεσις. ἀλλὰ δὴ τίς ἡ διαφορὰ τοῦ καθ’ ἕκαστον θερμοῦ, εἴθ’ ὡς ὄργανον εἴθ’ ὡς ὕλην εἴθ’ ὡς ἄμφω; πυρὸς γὰρ διαφοραὶ κατὰ τὸ μᾶλλον καὶ ἧττον. τοῦτο δὲ σχεδὸν ὥσπερ ἐν μίξει καὶ ἀμιξίᾳ· τὸ γὰρ καθαρώτερον μᾶλλον. ὁ αὐτὸς δὲ λόγος καὶ ἐπὶ τῶν ἄλλων ἁπλῶν. ἀνάγκη γάρ, ἐπείπερ ἕτερον ὀστοῦν καὶ σὰρξ ᾗ ἵππου καὶ ᾗ βοός, ἢ τῷ ἐξ ἑτέρων εἶναι ἢ τῇ χρήσει διαφέρειν. εἰ μὲν οὖν ἕτερα, τίνες αἱ διαφοραὶ ἑκάστου τῶν ἁπλῶν καὶ τίς ταύτας γὰρ ζητοῦμεν. εἰ δὲ ταὐτά, τοῖς λόγοις ἂν διαφέροι. ἀνάγκη γὰρ δυοῖν θάτερον, καθάπερ ἐν τοῖς ἄλλοις· οἴνου μὲν γὰρ καὶ μέλιτος κρᾶσις διὰ τὸ ὑποκείμενον, οἴνου δ’ αὐτοῦ, εἴπερ ἑτέρα, διὰ τὸν λόγον. διὸ καὶ Ἐμπεδοκλῆς μίαν ἁπλῶς τὴν τοῦ ὀστοῦ φύσιν εἴπερ ἅπαντα τὸν αὐτὸν λόγον ἔχει τῆς μίξεως, ἀδιάφορα ἐχρῆν ἵππου καὶ λέοντος καὶ ἀνθρώπου εἶναι. νῦν δὲ διαφέρει σκληρότητι, μαλακότητι, πυκνότητι, τοῖς ἄλλοις ὁμοίως καὶ σὰρξ καὶ τὰ ἄλλα μόρια. ἔτι δὲ τὰ ἐν τῷ αὐτῷ ζῴῳ διαφέρουσι πυκνότητι καὶ μανότητι καὶ τοῖς ἄλλοις, ὥστ’ οὐχ ἡ αὐτὴ κρᾶσις. παχὺ μὲν γὰρ καὶ λεπτὸν καὶ μέγα καὶ μικρὸν ‹ἂν› εἴη ἐν τῷ ποσῷ, σκληρὸν δὲ καὶ πυκνὸν καὶ τὰ ἐναντία τούτοις ἐν τῷ ποιῷ τῷ τῆς μίξεως. ἀναγκαῖον δὲ τοῖς οὕτω λέγουσιν εἰδέναι, πῶς τὸ δημιουργοῦν ἕτερον εἴη ἂν καὶ τῷ [486a] τοῦτο πλέον ἢ ἔλαττον εἶναι, καὶ τῷ καθ’ αὑτὸ καὶ ‹τῷ› μεμειγμένῳ ἢ ἐν ἄλλῳ πυροῦσθαι [καθάπερ τὰ ἑψόμενα καὶ ὀπτώμενα. ὅπερ ἴσως ἀληθές]. ἅμα γὰρ ἐγκαταμείγνυται καὶ ποιεῖ τὸ τῆς φύσεως. ἆρα ὁ αὐτὸς καὶ περὶ σαρκὸς [486b] λόγος· καὶ γὰρ αἱ αὐταὶ διαφοραί, σχεδὸν δὲ καὶ περὶ φλεβὸς καὶ ἀρτηρίας καὶ τῶν λοιπῶν. ὥστε δυεῖν θάτερον, ἢ οὐχ εἷς ὁ λόγος τούτων κατὰ τὴν μίξιν, ἢ οὐ σκληρότητι καὶ πυκνότητι καὶ τοῖς ἐναντίοις τοὺς λόγους ληπτέον.

Κεφάλαιο 1

(486a.) Τῶν ἐν τοῖς ζῴοις μορίων τὰ μέν ἐστιν ἀσύνθετα, ὅσα διαιρεῖται εἰς ὁμοιομερῆ, οἷον σάρκες εἰς σάρκας, τὰ δὲ σύνθετα, ὅσα εἰς ἀνομοιομερῆ, οἷον ἡ χεὶρ οὐκ εἰς χεῖρας διαιρεῖται οὐδὲ τὸ πρόσωπον εἰς πρόσωπα. Τῶν δὲ τοιούτων ἔνια οὐ μόνον μέρη ἀλλὰ καὶ μέλη καλεῖται. Τοιαῦτα δ’ ἐστὶν ὅσα τῶν μερῶν ὅλα ὄντα ἕτερα μέρη ἔχει ἐν αὐτοῖς, οἷον κεφαλὴ καὶ σκέλος καὶ χεὶρ καὶ ὅλος ὁ βραχίων καὶ ὁ θώραξ· ταῦτα γὰρ αὐτά τ’ ἐστὶ μέρη ὅλα, καὶ ἔστιν αὐτῶν ἕτερα μόρια. Πάντα δὲ τὰ ἀνομοιομερῆ σύγκειται ἐκ τῶν ὁμοιομερῶν, οἷον χεὶρ ἐκ σαρκὸς καὶ νεύρων καὶ ὀστῶν.

Ἔχει δὲ τῶν ζῴων ἔνια μὲν πάντα τὰ μόρια ταὐτὰ ἀλλήλοις, ἔνια δ’ ἕτερα. Ταὐτὰ δὲ τὰ μὲν εἴδει τῶν μορίων ἐστίν, οἷον ἀνθρώπου ῥὶς καὶ ὀφθαλμὸς ἀνθρώπου ῥινὶ καὶ ὀφθαλμῷ, καὶ σαρκὶ σὰρξ καὶ ὀστῷ ὀστοῦν· τὸν αὐτὸν δὲ τρόπον καὶ ἵππου καὶ τῶν ἄλλων ζῴων, ὅσα τῷ εἴδει ταὐτὰ λέγομεν ἑαυτοῖς· ὁμοίως γὰρ ὥσπερ τὸ ὅλον ἔχει πρὸς τὸ ὅλον, καὶ τῶν μορίων ἔχει ἕκαστον πρὸς ἕκαστον. Τὰ δὲ ταὐτὰ μέν ἐστιν, διαφέρει δὲ καθ’ ὑπεροχὴν καὶ ἔλλειψιν, ὅσων τὸ γένος ἐστὶ ταὐτόν. Λέγω δὲ γένος οἷον ὄρνιθα καὶ ἰχθύν· τούτων γὰρ ἑκάτερον ἔχει διαφορὰν κατὰ τὸ γένος, καὶ ἔστιν εἴδη πλείω ἰχθύων καὶ ὀρνίθων. Διαφέρει δὲ σχεδὸν τὰ πλεῖστα τῶν (486b.) μορίων ἐν αὐτοῖς παρὰ τὰς τῶν παθημάτων ἐναντιώσεις, οἷον Χρώματος καὶ σχήματος, τῷ τὰ μὲν μᾶλλον αὐτὰ πεπονθέναι τὰ δ’ ἧττον, ἔτι δὲ πλήθει καὶ ὀλιγότητι καὶ μεγέθει καὶ σμικρότητι καὶ ὅλως ὑπεροχῇ καὶ ἐλλείψει. Τὰ μὲν γάρ ἐστι μαλακόσαρκα αὐτῶν τὰ δὲ σκληρόσαρκα, καὶ τὰ μὲν μακρὸν ἔχει τὸ ῥύγχος τὰ δὲ βραχύ, καὶ τὰ μὲν πολύπτερα τὰ δ’ ὀλιγόπτερά ἐστιν. Οὐ μὴν ἀλλ’ ἔνιά γε καὶ ἐν τούτοις ἕτερα ἑτέροις μόρια ὑπάρχει, οἷον τὰ μὲν ἔχει πλῆκτρα τὰ δ’ οὔ, καὶ τὰ μὲν λόφον ἔχει τὰ δ’ οὐκ ἔχει. Ἀλλ’ ὡς εἰπεῖν τὰ πλεῖστα καὶ ἐξ ὧν μερῶν ὁ πᾶς ὄγκος συνέστηκεν, ἢ ταὐτά ἐστιν ἢ διαφέρει τοῖς τ’ ἐναντίοις καὶ καθ’ ὑπεροχὴν καὶ ἔλλειψιν· τὸ γὰρ μᾶλλον καὶ ἧττον ὑπεροχὴν ἄν τις καὶ ἔλλειψιν θείη. Ἔνια δὲ τῶν ζῴων οὔτε εἴδει τὰ μόρια ταὐτὰ ἔχει οὔτε καθ’ ὑπεροχὴν καὶ ἔλλειψιν, ἀλλὰ κατ’ ἀναλογίαν, οἷον πέπονθεν ὀστοῦν πρὸς ἄκανθαν καὶ ὄνυξ πρὸς ὁπλὴν καὶ χεὶρ πρὸς χηλὴν καὶ πρὸς πτερὸν λεπίς· ὃ γὰρ ἐν ὄρνιθι πτερόν, τοῦτο ἐν τῷ ἰχθύι ἐστὶ λεπίς. Κατὰ μὲν οὖν τὰ μόρια ἃ ἔχουσιν ἕκαστα τῶν ζῴων, τοῦτόν τε τὸν τρόπον ἕτερά ἐστι καὶ ταὐτά, καὶ ἔτι τῇ θέσει τῶν μερῶν·

πολλὰ γὰρ τῶν ζῴων ἔχει μὲν ταὐτὰ μέρη, ἀλλὰ κείμενα οὐχ ὡσαύτως, οἷον μαστοὺς τὰ μὲν ἐν τῷ στήθει τὰ (487a.) δὲ πρὸς τοῖς μηροῖς.

Ἔστι δὲ τῶν ὁμοιομερῶν τὰ μὲν μαλακὰ καὶ ὑγρά, τὰ δὲ ξηρὰ καὶ στερεά, ὑγρὰ μέν, ἢ ὅλως ἢ ἕως ἂν ᾖ ἐν τῇ φύσει, οἷον αἷμα, ἰχώρ, πιμελή, στέαρ, μυελός, γονή, χολή, γάλα ἐν τοῖς ἔχουσι, σάρξ τε καὶ τὰ τούτοις ἀνάλογον, ἔτι ἄλλον τρόπον τὰ περιττώματα, οἷον φλέγμα, καὶ τὰ ὑποστήματα τῆς κοιλίας καὶ κύστεως· ξηρὰ δὲ καὶ στερεὰ οἷον νεῦρον, δέρμα, φλέψ, θρίξ, ὀστοῦν, χόνδρος, ὄνυξ, κέρας (ὁμώνυμον γὰρ τὸ μέρος, ὅταν τῷ σχήματι καὶ τὸ ὅλον λέγηται κέρας), ἔτι ὅσα ἀνάλογον τούτοις.

Αἱ δὲ διαφοραὶ τῶν ζῴων εἰσὶ κατά τε τοὺς βίους καὶ τὰς πράξεις καὶ τὰ ἤθη καὶ τὰ μόρια, περὶ ὧν τύπῳ μὲν εἴπωμεν πρῶτον, ὕστερον δὲ περὶ ἕκαστον γένος ἐπιστήσαντες ἐροῦμεν. Εἰσὶ δὲ διαφοραὶ κατὰ μὲν τοὺς βίους καὶ τὰ ἤθη καὶ τὰς πράξεις αἱ τοιαίδε, ᾗ τὰ μὲν ἔνυδρα αὐτῶν ἐστι τὰ δὲ χερσαῖα, ἔνυδρα δὲ διχῶς, τὰ μὲν ὅτι τὸν βίον καὶ τὴν τροφὴν ποιεῖται ἐν τῷ ὑγρῷ, καὶ δέχεται τὸ ὑγρὸν καὶ ἀφίησι, τούτου δὲ στερισκόμενα οὐ δύναται ζῆν, οἷον πολλοῖς συμβαίνει τῶν ἰχθύων· τὰ δὲ τὴν μὲν τροφὴν ποιεῖται καὶ τὴν διατριβὴν ἐν τῷ ὑγρῷ, οὐ μέντοι δέχεται τὸ ὕδωρ ἀλλὰ τὸν ἀέρα, καὶ γεννᾷ ἔξω. Πολλὰ δ’ ἐστὶ τοιαῦτα καὶ πεζά, ὥσπερ ἐνυδρὶς καὶ λάταξ καὶ κροκόδειλος, καὶ πτηνά, οἷον αἴθυια καὶ κολυμβίς, καὶ ἄποδα, οἷον ὕδρος. Ἔνια δὲ τὴν μὲν τροφὴν ἐν τῷ ὑγρῷ ποιεῖται καὶ οὐ δύναται ζῆν ἐκτός, οὐ μέντοι δέχεται οὔτε τὸν ἀέρα οὔτε τὸ ὑγρόν, οἷον ἀκαλήφη καὶ τὰ ὄστρεα. Τῶν δ’ ἐνύδρων τὰ μέν ἐστι θαλάττια, τὰ δὲ ποτάμια, τὰ δὲ λιμναῖα, τὰ δὲ τελματιαῖα, οἷον βάτραχος καὶ κορδύλος.

Τῶν δὲ χερσαίων τὰ μὲν δέχεται τὸν ἀέρα καὶ ἀφίησιν, ὃ καλεῖται ἀναπνεῖν καὶ ἐκπνεῖν, οἷον ἄνθρωπος καὶ πάντα ὅσα πλεύμονα ἔχει τῶν χερσαίων· τὰ δὲ τὸν ἀέρα μὲν οὐ δέχεται, ζῇ δὲ καὶ τὴν τροφὴν ἔχει ἐν τῇ γῇ, οἷον σφὴξ καὶ μέλιττα καὶ τὰ ἄλλα ἔντομα. Καλῶ δ’ ἔντομα ὅσα ἔχει κατὰ τὸ σῶμα ἐντομάς, ἢ ἐν τοῖς ὑπτίοις ἢ ἐν τούτοις τε καὶ τοῖς πρανέσιν. Καὶ τῶν μὲν χερσαίων (487b.) πολλά, ὥσπερ εἴρηται, ἐκ τοῦ ὑγροῦ τὴν τροφὴν πορίζεται τῶν δ’ ἐνύδρων καὶ δεχομένων τὴν θάλατταν οὐδὲν ἐκ τῆς γῆς. Ἔνια δὲ τῶν ζῴων τὸ μὲν πρῶτον ζῇ ἐν τῷ ὑγρῷ, ἔπειτα μεταβάλλει εἰς ἄλλην μορφὴν καὶ ζῇ ἔξω, οἷον ἐπὶ τῶν ἐν τοῖς ποταμοῖς ἀσκαρίδων· γίνεται γὰρ ἐξ αὐτῶν ὁ οἶστρος.

Ἔτι τὰ μέν ἐστι μόνιμα τῶν ζῴων, τὰ δὲ μεταβλητικά. Ἔστι δὲ τὰ μόνιμα ἐν τῷ ὑγρῷ· τῶν δὲ χερσαίων οὐδὲν μόνιμον. Ἐν δὲ τῷ ὑγρῷ πολλὰ τῷ προσπεφυκέναι ζῇ, οἷον γένη ὀστρέων πολλά. Δοκεῖ δὲ καὶ ὁ σπόγγος ἔχειν τινὰ αἴσθησιν· σημεῖον δ’ ὅτι χαλεπώτερον ἀποσπᾶται, ἂν μὴ γένηται λαθραίως ἡ κίνησις, ὥς φασιν. Τὰ δὲ καὶ προσφύεται καὶ ἀπολύεται, οἷόν ἐστι γένος τι τῆς καλουμένης ἀκαλήφης· τούτων γάρ τινες νύκτωρ ἀπολυόμεναι νέμονται.

Πολλὰ δ’ ἀπολελυμένα μέν ἐστιν ἀκίνητα δέ, οἷον ὄστρεα καὶ τὰ καλούμενα ὁλοθούρια. Τὰ δὲ νευστικά, οἷον ἰχθύες καὶ τὰ μαλάκια καὶ τὰ μαλακόστρακα, οἷον κάραβοι. Τὰ δὲ πορευτικά, οἷον τὸ τῶν καρκίνων γένος· τοῦτο γὰρ ἔνυδρον ὂν τὴν φύσιν πορευτικόν ἐστιν.

Τῶν δὲ χερσαίων ἐστὶ τὰ μὲν πτηνά, ὥσπερ ὄρνιθες καὶ μέλιτται, καὶ ταῦτ’ ἄλλον τρόπον ἀλλήλων, τὰ δὲ πεζά. Καὶ τῶν πεζῶν τὰ μὲν πορευτικά, τὰ δ’ ἑρπυστικά, τὰ δ’ ἰλυσπαστικά. Πτηνὸν δὲ μόνον οὐδέν ἐστιν, ὥσπερ νευστικὸν μόνον ἰχθύς· καὶ γὰρ τὰ δερμόπτερα πεζεύει, καὶ νυκτερίδι πόδες εἰσί, καὶ τῇ φώκῃ κεκολοβωμένοι πόδες. Καὶ τῶν ὀρνίθων εἰσί τινες κακόποδες, οἳ διὰ τοῦτο καλοῦνται ἄποδες· ἔστι δ’ εὔπτερον τοῦτο τὸ ὀρνίθιον. Σχεδὸν δὲ καὶ τὰ ὅμοια αὐτῷ εὔπτερα μὲν κακόποδα δ’ ἐστίν, οἷον χελιδὼν καὶ δρεπανίς· ὁμοιότροπά τε γὰρ καὶ ὁμοιόπτερα πάντα ταῦτα, καὶ τὰς ὄψεις ἐγγὺς ἀλλήλων. Φαίνεται δ’ ὁ μὲν ἄπους πᾶσαν ὥραν, ἡ δὲ δρεπανὶς ὅταν ὕσῃ τοῦ θέρους· τότε γὰρ ὁρᾶται καὶ ἁλίσκεται, ὅλως δὲ καὶ σπάνιόν ἐστι τοῦτο τὸ ὄρνεον. Πορευτικὰ δὲ καὶ νευστικὰ πολλὰ τῶν ζῴων ἐστίν.

Εἰσὶ δὲ καὶ αἱ τοιαίδε διαφοραὶ κατὰ τοὺς βίους καὶ τὰς πράξεις. Τὰ μὲν γὰρ αὐτῶν ἐστιν ἀγελαῖα τὰ δὲ (488a.) μοναδικά, καὶ πεζὰ καὶ πτηνὰ καὶ πλωτά, τὰ δ’ ἐπαμφοτερίζει. Καὶ τῶν ἀγελαίων καὶ τῶν μοναδικῶν τὰ μὲν πολιτικὰ τὰ δὲ σποραδικά ἐστιν. Ἀγελαῖα μὲν οὖν οἷον ἐν τοῖς πτηνοῖς τὸ τῶν περιστερῶν γένος καὶ γέρανος καὶ κύκνος (γαμψώνυχον δ’ οὐδὲν ἀγελαῖον), καὶ τῶν πλωτῶν πολλὰ γένη τῶν ἰχθύων, οἷον οὓς καλοῦσι δρομάδας, θύννοι, πηλαμύδες, ἀμίαι· ὁ δ’ ἄνθρωπος ἐπαμφοτερίζει. Πολιτικὰ δ’ ἐστὶν ὧν ἕν τι καὶ κοινὸν γίνεται πάντων τὸ ἔργον· ὅπερ οὐ πάντα ποιεῖ τὰ ἀγελαῖα. Ἔστι δὲ τοιοῦτον ἄνθρωπος, μέλιττα, σφήξ, μύρμηξ, γέρανος. Καὶ τούτων τὰ μὲν ὑφ’ ἡγεμόνα ἐστὶ τὰ δ’ ἄναρχα, οἷον γέρανος μὲν καὶ τὸ τῶν μελιττῶν γένος ὑφ’ ἡγεμόνα, μύρμηκες δὲ καὶ μυρία ἄλλα ἄναρχα. Καὶ τὰ μὲν ἐπιδημητικὰ καὶ τῶν ἀγελαίων καὶ τῶν μοναδικῶν, τὰ δ’ ἐκτοπιστικά.

Καὶ τὰ μὲν σαρκοφάγα, τὰ δὲ καρποφάγα, τὰ δὲ παμφάγα, τὰ δ’ ἰδιότροφα, οἷον τὸ τῶν μελιττῶν γένος καὶ τὸ τῶν ἀραχνῶν· τὸ μὲν γὰρ μέλιτι καί τισιν ἄλλοις ὀλίγοις τῶν γλυκέων χρῆται τροφῇ, οἱ δ’ ἀράχναι ἀπὸ τῆς τῶν μυιῶν θήρας ζῶσιν, τὰ δ’ ἰχθύσι χρῶνται τροφῇ. Καὶ τὰ μὲν θηρευτικά, τὰ δὲ θησαυριστικὰ τῆς τροφῆς ἐστι, τὰ δ’ οὔ. Καὶ τὰ μὲν οἰκητικὰ τὰ δ’ ἄοικα, οἰκητικὰ μὲν οἷον ἀσπάλαξ, μῦς, μύρμηξ, μέλιττα, ἄοικα δὲ πολλὰ τῶν ἐντόμων καὶ τῶν τετραπόδων. Ἔτι τοῖς τόποις τὰ μὲν τρωγλοδυτικά, οἷον σαύρα, ὄφις, τὰ δ’ ὑπέργεια, οἷον ἵππος, κύων. Καὶ τὰ μὲν τρηματώδη τὰ δ’ ἄτρητα. Καὶ τὰ μὲν νυκτερόβια, οἷον γλαύξ, νυκτερίς, τὰ δ’ ἐν τῷ φωτὶ ζῇ.

Ἔτι δ’ ἥμερα καὶ ἄγρια, καὶ τὰ μὲν ἀεί, οἷον ὄνος καὶ ὀρεὺς ἀεὶ ἥμερα, τὰ δ’ ἄγρια, ὥσπερ πάρδαλις καὶ λύκος· τὰ δὲ καὶ ἡμεροῦσθαι δύναται ταχύ, οἷον ἐλέφας. Ἔτι ἄλλον τρόπον· πάντα γὰρ ὅσα ἥμερά ἐστι γένη, καὶ ἄγριά ἐστιν, οἷον ἵπποι, βόες, ὕες, ἄνθρωποι, πρόβατα, αἶγες, κύνες.

Καὶ τὰ μὲν ψοφητικά, τὰ δ’ ἄφωνα, τὰ δὲ φωνήεντα, καὶ τούτων τὰ μὲν διάλεκτον ἔχει τὰ δ’ ἀγράμματα, καὶ τὰ μὲν κωτίλα τὰ δὲ σιγηλά, τὰ δ’ ᾠδικὰ τὰ δ’ ἄνῳδα· πάντων (488b.) δὲ κοινὸν τὸ περὶ τὰς ὀχείας μάλιστα ᾄδειν καὶ λαλεῖν.

Καὶ τὰ μὲν ἄγροικα, ὥσπερ φάττα, τὰ δ’ ὄρεια, ὥσπερ ἔποψ, τὰ δὲ συνανθρωπίζει, οἷον περιστερά.

Καὶ τὰ μὲν ἀφροδισιαστικά, οἷον τὸ τῶν περδίκων καὶ ἀλεκτρυόνων γένος, τὰ δ’ ἁγνευτικά, οἷον τὸ τῶν κορακοειδῶν ὀρνίθων γένος· ταῦτα γὰρ σπανίως ποιεῖται τὴν ὀχείαν.

Καὶ τῶν θαλαττίων τὰ μὲν πελάγια, τὰ δ’ αἰγιαλώδη, τὰ δὲ πετραῖα.

Ἔτι τὰ μὲν ἀμυντικὰ τὰ δὲ φυλακτικά· ἔστι δ’ ἀμυντικὰ μὲν ὅσα ἢ ἐπιτίθεται ἢ ἀδικούμενα ἀμύνεται, φυλακτικὰ δ’ ὅσα πρὸς τὸ μὴ παθεῖν τι ἔχει ἐν αὑτοῖς ἀλεωρήν.

Διαφέρουσι δὲ καὶ ταῖς τοιαῖσδε διαφοραῖς κατὰ τὸ ἦθος.

Τὰ μὲν γάρ ἐστι πρᾶα καὶ δύσθυμα καὶ οὐκ ἐνστατικά, οἷον βοῦς, τὰ δὲ θυμώδη καὶ ἐνστατικὰ καὶ ἀμαθῆ, οἷον ὗς ἄγριος, τὰ δὲ φρόνιμα καὶ δειλά, οἷον ἔλαφος, δασύπους, τὰ δ’ ἀνελεύθερα καὶ ἐπίβουλα, οἷον οἱ ὄφεις, τὰ δ’ ἐλευθέρια καὶ ἀνδρεῖα καὶ εὐγενῆ, οἷον λέων, τὰ δὲ γενναῖα καὶ ἄγρια καὶ ἐπίβουλα, οἷον λύκος· εὐγενὲς μὲν γάρ ἐστι τὸ ἐξ ἀγαθοῦ γένους, γενναῖον δὲ τὸ μὴ ἐξιστάμενον ἐκ τῆς αὑτοῦ φύσεως. Καὶ τὰ μὲν πανοῦργα καὶ κακοῦργα, οἷον ἀλώπηξ, τὰ δὲ θυμικὰ καὶ φιλητικὰ καὶ θωπευτικά, οἷον κύων, τὰ δὲ πρᾶα καὶ τιθασσευτικά, οἷον ἐλέφας, τὰ δ’ αἰσχυντηλὰ καὶ φυλακτικά, οἷον χήν, τὰ δὲ φθονερὰ καὶ φιλόκαλα, οἷον ταώς. Βουλευτικὸν δὲ μόνον ἄνθρωπός ἐστι τῶν ζῴων. Καὶ μνήμης μὲν καὶ διδαχῆς πολλὰ κοινωνεῖ, ἀναμιμνήσκεσθαι δ’ οὐδὲν ἄλλο δύναται πλὴν ἄνθρωπος.

Περὶ ἕκαστον δὲ τῶν γενῶν τά τε περὶ τὰ ἤθη καὶ τοὺς βίους ὕστερον λεχθήσεται δι’ ἀκριβείας μᾶλλον.

Κεφάλαιο 2

Πάντων δ’ ἐστὶ τῶν ζῴων κοινὰ μόρια, ᾧ δέχεται τὴν τροφὴν καὶ εἰς ὃ δέχεται· ταῦτα δ’ ἐστὶ ταὐτὰ καὶ ἕτερα κατὰ τοὺς εἰρημένους τρόπους, ἢ κατ’ εἶδος ἢ καθ’ ὑπεροχὴν ἢ κατ’ ἀναλογίαν ἢ τῇ θέσει διαφέροντα. Μετὰ δὲ ταῦτα ἄλλα κοινὰ μόρια ἔχει τὰ πλεῖστα τῶν ζῴων πρὸς τούτοις, ᾗ ἀφίησι τὸ περίττωμα τῆς τροφῆς [καὶ ᾗ λαμβάνει]· οὐ (489a.) γὰρ πᾶσιν ὑπάρχει τοῦτο. Καλεῖται δ’ ᾗ μὲν λαμβάνει, στόμα, εἰς ὃ δὲ δέχεται, κοιλία· τὸ δὲ λοιπὸν πολυώνυμόν ἐστιν. Τοῦ δὲ περιττώματος ὄντος διττοῦ, ὅσα μὲν ἔχει δεκτικὰ μόρια τοῦ ὑγροῦ περιττώματος, ἔχει καὶ τῆς ξηρᾶς τροφῆς, ὅσα δὲ ταύτης, ἐκείνης οὐ πάντα. Διὸ ὅσα μὲν κύστιν ἔχει, καὶ κοιλίαν ἔχει, ὅσα δὲ κοιλίαν ἔχει, οὐ πάντα κύστιν ἔχει.

Ὀνομάζεται γὰρ τὸ μὲν τῆς ὑγρᾶς περιττώσεως δεκτικὸν μόριον κύστις, κοιλία δὲ τὸ τῆς ξηρᾶς.

Κεφάλαιο 3

Τῶν δὲ λοιπῶν πολλοῖς ὑπάρχει ταῦτά τε τὰ μόρια καὶ ἔτι ᾗ τὸ σπέρμα ἀφιᾶσιν· καὶ τούτων ἐν οἷς μὲν ὑπάρχει γένεσις ζῴων τὸ μὲν εἰς αὑτὸ ἀφιέν, τὸ δ' εἰς ἕτερον. Καλεῖται δὲ τὸ μὲν εἰς αὑτὸ ἀφιὲν θῆλυ, τὸ δ' εἰς τοῦτο ἄρρεν. Ἐν ἐνίοις δ' οὐκ ἔστι τὸ ἄρρεν καὶ θῆλυ· ᾗ καὶ τῶν μορίων τῶν πρὸς τὴν δημιουργίαν ταύτην διαφέρει τὸ εἶδος· τὰ μὲν γὰρ ἔχει ὑστέραν, τὰ δὲ τὸ ἀνάλογον. Ὅσα μὲν οὖν ἀναγκαιότατα μόρια τοῖς ζῴοις τὰ μὲν πᾶσιν ἔχειν συμβέβηκε, τὰ δὲ τοῖς πλείστοις, ταῦτ' ἐστίν.

Πᾶσι δὲ τοῖς ζῴοις αἴσθησις μία ὑπάρχει κοινὴ μόνη ἡ ἁφή, ὥστε καὶ ἐν ᾧ αὕτη μορίῳ γίνεσθαι πέφυκεν, ἀνώνυμόν ἐστιν· τοῖς μὲν γὰρ ταὐτὸ τοῖς δὲ τὸ ἀνάλογόν ἐστιν.

Κεφάλαιο 4

Ἔχει δὲ καὶ ὑγρότητα πᾶν ζῷον, ἧς στερισκόμενον ἢ φύσει ἢ βίᾳ φθείρεται. Ἔτι ἐν ᾧ γίνεται, τοῦτο ἄλλο. Ἔστι δὲ τοῦτο τοῖς μὲν αἷμα καὶ φλέψ, τοῖς δὲ τὸ ἀνάλογον τούτων· ἔστι δ’ ἀτελῆ ταῦτα, οἷον τὸ μὲν ἲς τὸ δ’ ἰχώρ. Ἡ μὲν οὖν ἁφὴ ἐν ὁμοιομερεῖ ἐγγίνεται μέρει, οἷον ἐν σαρκὶ ἢ τοιούτῳ τινί, καὶ ὅλως ἐν τοῖς αἱματικοῖς, ὅσα ἔχει αἷμα· τοῖς δ’ ἐν τῷ ἀνάλογον, πᾶσι δ’ ἐν τοῖς ὁμοιομερέσιν. Αἱ δὲ ποιητικαὶ δυνάμεις ἐν τοῖς ἀνομοιομερέσιν, οἷον ἡ τῆς τροφῆς ἐργασία ἐν στόματι καὶ ἡ τῆς κινήσεως τῆς κατὰ τόπον ἐν ποσὶν ἢ πτέρυξιν ἢ τοῖς ἀνάλογον.

Πρὸς δὲ τούτοις τὰ μὲν ἔναιμα τυγχάνει ὄντα, οἷον ἄνθρωπος καὶ ἵππος καὶ πάνθ’ ὅσα ἢ ἄποδά ἐστι τέλεα ὄντα ἢ δίποδα ἢ τετράποδα, τὰ δ’ ἄναιμα, οἷον μέλιττα καὶ σφὴξ καὶ τῶν θαλαττίων σηπία καὶ κάραβος καὶ πάνθ’ ὅσα πλείους πόδας ἔχει τεττάρων.

Κεφάλαιο 5

Καὶ τὰ μὲν ζῳοτόκα τὰ δ' ᾠοτόκα τὰ δὲ σκωληκοτόκα, ζῳοτόκα μὲν οἷον ἄνθρωπος καὶ ἵππος (489b.) καὶ φώκη καὶ τὰ ἄλλα ὅσα ἔχει τρίχας, καὶ τῶν ἐνύδρων τὰ κητώδη, οἷον δελφίς, καὶ τὰ καλούμενα σελάχη. Τούτων δὲ τὰ μὲν αὐλὸν ἔχει, βράγχια δ' οὐκ ἔχει, οἷον δελφὶς καὶ φάλαινα (ἔχει δ' ὁ μὲν δελφὶς τὸν αὐλὸν διὰ τοῦ νώτου, ἡ δὲ φάλαινα ἐν τῷ μετώπῳ), τὰ δ' ἀκάλυπτα βράγχια, οἷον τὰ σελάχη, γαλεοί τε καὶ βάτοι.

Καλεῖται δ' ᾠὸν μὲν τῶν κυημάτων τῶν τελείων, ἐξ οὗ γίνεται τὸ γινόμενον ζῷον, ἐκ μορίου τὴν ἀρχήν, τὸ δ' ἄλλο τροφὴ τῷ γινομένῳ ἐστίν· σκώληξ δ' ἐστὶν ἐξ οὗ ὅλου ὅλον γίνεται τὸ ζῷον, διαρθρουμένου καὶ αὐξανομένου τοῦ κυήματος. Τὰ μὲν οὖν ἐν αὑτοῖς ᾠοτοκεῖ τῶν ζῳοτόκων, οἷον τὰ σελάχη, τὰ δὲ ζῳοτοκεῖ ἐν αὑτοῖς, οἷον ἄνθρωπος καὶ ἵππος· εἰς δὲ τὸ φανερὸν τῶν μὲν τελεωθέντος τοῦ κυήματος ζῷον ἐξέρχεται, τῶν δ' ᾠόν, τῶν δὲ σκώληξ.

Τῶν δ' ᾠῶν τὰ μὲν ὀστρακόδερμά ἐστι καὶ δίχροα, οἷον τὰ τῶν ὀρνίθων, τὰ δὲ μαλακόδερμα καὶ μονόχροα, οἷον τὰ τῶν σελαχῶν. Καὶ τῶν σκωλήκων οἱ μὲν εὐθὺς κινητικοὶ οἱ δ' ἀκίνητοι. Ἀλλὰ περὶ μὲν τούτων ἐν τοῖς περὶ γενέσεως δι' ἀκριβείας ὕστερον λεκτέον.

Ἔτι δὲ τῶν ζῴων τὰ μὲν ἔχει πόδας τὰ δ' ἄποδα, καὶ τῶν ἐχόντων τὰ μὲν δύο πόδας ἔχει, οἷον ἄνθρωπος καὶ ὄρνις μόνα, τὰ δὲ τέτταρας, οἷον σαύρα καὶ κύων, τὰ δὲ πλείους, οἷον σκολόπενδρα καὶ μέλιττα· πάντα δ' ἀρτίους ἔχει πόδας.

Τῶν δὲ νευστικῶν ὅσα ἄποδα, τὰ μὲν πτερύγια ἔχει, ὥσπερ ἰχθύς, καὶ τούτων οἱ μὲν τέτταρα πτερύγια, δύο μὲν ἄνω ἐν τοῖς πρανέσι, δύο δὲ κάτω ἐν τοῖς ὑπτίοις, οἷον χρύσοφρυς καὶ λάβραξ, τὰ δὲ δύο μόνον, ὅσα προμήκη καὶ λεῖα, οἷον ἔγχελυς καὶ γόγγρος· τὰ δ' ὅλως οὐκ ἔχει, οἷον σμύραινα καὶ ὅσα ἄλλα χρῆται τῇ θαλάττῃ ὥσπερ οἱ ὄφεις τῇ γῇ, καὶ ἐν τῷ ὑγρῷ ὁμοίως νέουσιν. Τῶν δὲ σελαχῶν ἔνια μὲν οὐκ ἔχει πτερύγια, οἷον τὰ πλατέα καὶ κερκοφόρα, ὥσπερ βάτος καὶ τρυγών, ἀλλ' αὐτοῖς νεῖ τοῖς πλάτεσιν· βάτραχος δ' ἔχει, καὶ ὅσα τὸ πλάτος μὴ ἔχει ἀπολελεπτυσμένον. Ὅσα δὲ δοκεῖ πόδας ἔχειν, καθάπερ καὶ τὰ μαλάκια, τούτοις νεῖ καὶ τοῖς πτερυγίοις, καὶ θᾶττον ἐπὶ κύτος, οἷον σηπία καὶ τευθὶς καὶ (490a.) πολύπους· βαδίζει δὲ τούτων οὐδέτερον, ὥσπερ πολύπους.

Τὰ δὲ σκληρόδερμα, οἷον κάραβος, τοῖς οὐραίοις νεῖ, τάχιστα δ' ἐπὶ τὴν κέρκον τοῖς ἐν ἐκείνῃ πτερυγίοις· καὶ ὁ κορδύλος τοῖς ποσὶ καὶ τῷ οὐραίῳ·

ἔχει δ’ ὅμοιον γλάνει τὸ οὐραῖον, ὡς μικρὸν εἰκάσαι μεγάλῳ. Τῶν δὲ πτηνῶν τὰ μὲν πτερωτά ἐστιν, οἷον ἀετὸς καὶ ἱέραξ, τὰ δὲ πτιλωτά, οἷον μέλιττα καὶ μηλολόνθη, τὰ δὲ δερμόπτερα, οἷον ἀλώπηξ καὶ νυκτερίς. Πτερωτὰ μὲν οὖν ἐστιν ὅσα ἔναιμα, καὶ δερμόπτερα ὡσαύτως· πτιλωτὰ δ’ ὅσα ἄναιμα, οἷον τὰ ἔντομα.

Ἔστι δὲ τὰ μὲν πτερωτὰ καὶ δερμόπτερα δίποδα πάντα ἢ ἄποδα· λέγονται γὰρ εἶναί τινες ὄφεις τοιοῦτοι περὶ Αἰθιοπίαν.

Τὸ μὲν οὖν πτερωτὸν γένος τῶν ζῴων ὄρνις καλεῖται, τὰ δὲ λοιπὰ δύο ἀνώνυμα ἑνὶ ὀνόματι.

Τῶν δὲ πτηνῶν μὲν ἀναίμων δὲ τὰ μὲν κολεόπτερά ἐστιν (ἔχει γὰρ ἐν ἐλύτρῳ τὰ πτερά, οἷον αἱ μηλολόνθαι καὶ οἱ κάνθαροι), τὰ δ’ ἀνέλυτρα, καὶ τούτων τὰ μὲν δίπτερα τὰ δὲ τετράπτερα, τετράπτερα μὲν ὅσα μέγεθος ἔχει ἢ ὅσα ὀπισθόκεντρά ἐστι, δίπτερα δ’ ὅσα ἢ μέγεθος μὴ ἔχει ἢ ἐμπροσθόκεντρά ἐστιν.

Τῶν δὲ κολεοπτέρων οὐδὲν ἔχει κέντρον. Τὰ δὲ δίπτερα ἔμπροσθεν ἔχει τὰ κέντρα, οἷον μυῖα καὶ μύωψ καὶ οἶστρος καὶ ἐμπίς. Πάντα δὲ τὰ ἄναιμα ἐλάττω τὰ μεγέθη ἐστὶ τῶν ἐναίμων ζῴων· πλὴν ὀλίγα ἐν τῇ θαλάττῃ μείζονα ἄναιμά ἐστιν, οἷον τῶν μαλακίων ἔνια. Μέγιστα δὲ γίνεται ταῦτα τὰ γένη αὐτῶν ἐν τοῖς ἀλεεινοτάτοις, καὶ ἐν τῇ θαλάττῃ μᾶλλον ἢ ἐν τῇ γῇ καὶ ἐν τοῖς γλυκέσιν ὕδασιν.

Κινεῖται δὲ τὰ κινούμενα πάντα τέτταρσι σημείοις ἢ πλείοσι, τὰ μὲν ἔναιμα τέτταρσι μόνον, οἷον ἄνθρωπος μὲν χερσὶ δυσὶ καὶ ποσὶ δυσίν, ὄρνις δὲ πτέρυξι δυσὶ καὶ ποσὶ δυσί, τὰ δὲ τετράποδα καὶ ἰχθύες τὰ μὲν τέτταρσι ποσίν, οἱ δὲ τέτταρσι πτερυγίοις. Ὅσα δὲ δύο ἔχει πτερύγια ἢ ὅλως μή, οἷον ὄφις, τέτταρσι σημείοις οὐδὲν ἧττον· αἱ γὰρ καμπαὶ τέτταρες, ἢ δύο σὺν τοῖς πτερυγίοις. Ὅσα δ’ ἄναιμα ὄντα πλείους πόδας ἔχει, εἴτε πτηνὰ εἴτε πεζά, σημείοις κινεῖται πλείοσιν, οἷον τὸ καλούμενον ζῷον ἐφήμερον τέτταρσι καὶ (490b.) ποσὶ καὶ πτεροῖς· τούτῳ γὰρ οὐ μόνον κατὰ τὸν βίον συμβαίνει τὸ ἴδιον, ὅθεν καὶ τὴν ἐπωνυμίαν ἔχει, ἀλλ’ ὅτι καὶ πτηνόν ἐστι τετράπουν ὄν.

Πάντα δὲ κινεῖται ὁμοίως, τὰ τετράποδα καὶ πολύποδα· κατὰ διάμετρον γὰρ κινεῖται. Τὰ μὲν οὖν ἄλλα ζῷα δύο τοὺς ἡγεμόνας ἔχει πόδας, ὁ δὲ καρκίνος μόνος τῶν ζῴων τέτταρας.

Κεφάλαιο 6

Γένη δὲ μέγιστα τῶν ζῴων, εἰς ἃ διῄρηται τἆλλα ζῷα, τάδ’ ἐστίν, ἓν μὲν ὀρνίθων, ἓν δ’ ἰχθύων, ἄλλο δὲ κῆτος. Ταῦτα μὲν οὖν πάντα ἔναιμά ἐστιν. Ἄλλο δὲ γένος ἐστὶ τὸ τῶν ὀστρακοδέρμων, ὃ καλεῖται ὄστρεον· ἄλλο τὸ τῶν μαλακοστράκων, ἀνώνυμον ἑνὶ ὀνόματι, οἷον κάραβοι καὶ γένη τινὰ καρκίνων καὶ ἀστακῶν· ἄλλο τὸ τῶν μαλακίων, οἷον τευθίδες τε καὶ τεῦθοι καὶ σηπίαι· ἕτερον τὸ τῶν ἐντόμων. Ταῦτα δὲ πάντα μέν ἐστιν ἄναιμα, ὅσα δὲ πόδας ἔχει, πολύποδα· τῶν δ’ ἐντόμων ἔνια καὶ πτηνά ἐστιν.

Τῶν δὲ λοιπῶν ζῴων οὐκέτι τὰ γένη μεγάλα· οὐ γὰρ περιέχει πολλὰ εἴδη ἓν εἶδος, ἀλλὰ τὸ μέν ἐστιν ἁπλοῦν αὐτὸ οὐκ ἔχον διαφορὰν τὸ εἶδος, οἷον ἄνθρωπος, τὰ δ’ ἔχει μέν, ἀλλ’ ἀνώνυμα τὰ εἴδη. Ἔστι γὰρ τὰ τετράποδα καὶ μὴ πτερωτὰ ἔναιμα μὲν πάντα, ἀλλὰ τὰ μὲν ζῳοτόκα τὰ δ’ ᾠοτόκα αὐτῶν. Ὅσα μὲν οὖν ζῳοτόκα, οὐ πάντα τρίχας ἔχει, ὅσα δ’ ᾠοτόκα, φολίδας· ἔστι δ’ ἡ φολὶς ὅμοιον χώρᾳ λεπίδος. Ἄπουν δὲ φύσει ἐστὶν ἔναιμον πεζὸν τὸ τῶν ὄφεων γένος· ἔστι δὲ τοῦτο φολιδωτόν. Ἀλλ’ οἱ μὲν ἄλλοι ᾠοτοκοῦσιν ὄφεις, ἡ δ’ ἔχιδνα μόνον ζῳοτοκεῖ. Τὰ μὲν γὰρ ζῳοτοκοῦντα οὐ πάντα τρίχας ἔχει· καὶ γὰρ τῶν ἰχθύων τινὲς ζῳοτοκοῦσιν· ὅσα μέντοι ἔχει τρίχας, ἅπαντα ζῳοτοκεῖ.

Τριχῶν γάρ τι εἶδος θετέον καὶ τὰς ἀκανθώδεις τρίχας, οἵας οἱ χερσαῖοι ἔχουσιν ἐχῖνοι καὶ οἱ ὕστριχες· τριχὸς γὰρ χρείαν παρέχουσιν, ἀλλ’ οὐ ποδῶν, ὥσπερ αἱ τῶν θαλαττίων.

Τοῦ δὲ γένους τοῦ τῶν τετραπόδων ζῴων καὶ ζῳοτόκων εἴδη μέν ἐστι πολλά, ἀνώνυμα δέ· ἀλλὰ καθ’ ἕκαστον αὐτῶν ὡς εἰπεῖν, ὥσπερ ἄνθρωπος εἴρηται, λέων, ἔλαφος, ἵππος, κύων καὶ τἆλλα τοῦτον τὸν τρόπον, ἐπεί ἐστιν ἕν τι γένος μόνον (491a.) ἐπὶ τοῖς λοφούροις καλουμένοις, οἷον ἵππῳ καὶ ὄνῳ καὶ ὀρεῖ καὶ γίννῳ [καὶ ἴννῳ] καὶ ταῖς ἐν Συρίᾳ καλουμέναις ἡμιόνοις, αἳ καλοῦνται ἡμίονοι δι’ ὁμοιότητα, οὐκ οὖσαι ἁπλῶς τὸ αὐτὸ εἶδος· καὶ γὰρ ὀχεύονται καὶ γεννῶνται ἐξ ἀλλήλων. Διὸ καὶ χωρὶς λαμβάνοντας ἀνάγκη θεωρεῖν ἑκάστου τὴν φύσιν αὐτῶν.

Ταῦτα μὲν οὖν τοῦτον τὸν τρόπον εἴρηται νῦν ὡς ἐν τύπῳ, γεύματος χάριν περὶ ὅσων καὶ ὅσα θεωρητέον· δι’ ἀκριβείας δ’ ὕστερον ἐροῦμεν, ἵνα πρῶτον τὰς ὑπαρχούσας διαφορὰς καὶ τὰ συρβεβηκότα πᾶσι λαμβάνωμεν. Μετὰ δὲ τοῦτο τὰς αἰτίας τούτων πειρατέον εὑρεῖν. Οὕτω γὰρ κατὰ φύσιν ἐστὶ ποιεῖσθαι τὴν μέθοδον, ὑπαρχούσης τῆς ἱστορίας τῆς περὶ ἕκαστον·

περὶ ὧν τε γὰρ καὶ ἐξ ὧν εἶναι δεῖ τὴν ἀπόδειξιν, ἐκ τούτων γίνεται φανερόν.

Ληπτέον δὲ πρῶτον τὰ μέρη τῶν ζῴων ἐξ ὧν συνέστηκεν. Κατὰ γὰρ ταῦτα μάλιστα καὶ πρῶτα διαφέρει καὶ τὰ ὅλα, ἢ τῷ τὰ μὲν ἔχειν τὰ δὲ μὴ ἔχειν, ἢ τῇ θέσει καὶ τῇ τάξει, ἢ καὶ κατὰ τὰς εἰρημένας πρότερον διαφοράς, εἴδει καὶ ὑπεροχῇ καὶ ἀναλογίᾳ καὶ τῶν παθημάτων ἐναντιότητι. Πρῶτον δὲ τὰ τοῦ ἀνθρώπου μέρη ληπτέον· ὥσπερ γὰρ τὰ νομίσματα πρὸς τὸ αὑτοῖς ἕκαστοι γνωριμώτατον δοκιμάζουσιν, οὕτω δὴ καὶ ἐν τοῖς ἄλλοις· ὁ δ’ ἄνθρωπος τῶν ζῴων γνωριμώτατον ἡμῖν ἐξ ἀνάγκης ἐστίν. Τῇ μὲν οὖν αἰσθήσει οὐκ ἄδηλα τὰ μόρια· ὅμως δ’ ἕνεκεν τοῦ μὴ παραλιπεῖν τε τὸ ἐφεξῆς καὶ τοῦ λόγον ἔχειν μετὰ τῆς αἰσθήσεως, λεκτέον τὰ μέρη πρῶτον μὲν τὰ ὀργανικά, εἶτα τὰ ὁμοιομερῆ.

Κεφάλαιο 7

Μέγιστα μὲν οὖν ἐστι τάδε τῶν μερῶν εἰς ἃ διαιρεῖται τὸ σῶμα τὸ σύνολον, κεφαλή, αὐχήν, θώραξ, βραχίονες δύο, σκέλη δύο (τὸ ἀπ’ αὐχένος μέχρι αἰδοίων κύτος, ὃ καλεῖται θώραξ). Κεφαλῆς μὲν οὖν μέρη τὸ μὲν τριχωτὸν κρανίον καλεῖται. Τούτου δὲ μέρη τὸ μὲν πρόσθιον βρέγμα, ὑστερογενές (τελευταῖον γὰρ τῶν ἐν τῷ σώματι πήγνυται ὀστῶν), τὸ δ’ ὀπίσθιον ἰνίον, μέσον δ’ ἰνίου καὶ βρέγματος κορυφή. Ὑπὸ μὲν οὖν τὸ βρέγμα ὁ ἐγκέφαλός ἐστιν, τὸ δ’ (491b.) ἰνίον κενόν. Ἔστι δὲ τὸ κρανίον ἅπαν ἀραιὸν ὀστοῦν, στρογγύλον, ἀσάρκῳ δέρματι περιεχόμενον. Ἔχει δὲ ῥαφὰς τῶν μὲν γυναικῶν μίαν κύκλῳ, τῶν δ’ ἀνδρῶν τρεῖς εἰς ἓν συναπτούσας ὡς ἐπὶ τὸ πολύ· ἤδη δ’ ὠμμένη ἐστὶ κεφαλὴ ἀνδρὸς οὐδεμίαν ἔχουσα ῥαφήν. Τοῦ δὲ κρανίου κορυφὴ καλεῖται τὸ μέσον λίσσωμα τῶν τριχῶν. Τοῦτο δ’ ἐνίοις διπλοῦν ἐστιν· γίνονται γάρ τινες δικόροφοι, οὐ τῷ ὀστῷ ἀλλὰ τῇ τῶν τριχῶν λισσώσει.

Κεφάλαιο 8

Τὸ δ’ ὑπὸ τὸ κρανίον ὀνομάζεται πρόσωπον ἐπὶ μόνου τῶν ἄλλων ζῴων ἀνθρώπου· ἰχθύος γὰρ καὶ βοὸς οὐ λέγεται πρόσωπον. Προσώπου δὲ τὸ μὲν ὑπὸ τὸ βρέγμα μεταξὺ τῶν ὀμμάτων μέτωπον. Τοῦτο δ’ οἷς μὲν μέγα, βραδύτεροι, οἷς δὲ μικρόν, εὐκίνητοι· καὶ οἷς μὲν πλατύ, ἐκστατικοί, οἷς δὲ περιφερές, θυμικοί.

Κεφάλαιο 9

Ὑπὸ δὲ τῷ μετώπῳ ὀφρύες διφυεῖς· ὧν αἱ μὲν εὐθεῖαι μαλακοῦ ἤθους σημεῖον, αἱ δὲ πρὸς τὴν ῥῖνα τὴν καμπυλότητ’ ἔχουσαι στρυφνοῦ, αἱ δὲ πρὸς τοὺς κροτάφους μωκοῦ καὶ εἴρωνος, αἱ δὲ κατεσπασμέναι φθόνου. Ὑφ’ αἷς ὀφθαλμοί. Οὗτοι κατὰ φύσιν δύο. Τούτων μέρη ἑκατέρου βλέφαρον τὸ ἄνω καὶ κάτω. Τούτου τρίχες αἱ ἔσχαται βλεφαρίδες. Τὸ δ’ ἐντὸς τοῦ ὀφθαλμοῦ, τὸ μὲν ὑγρόν, ᾧ βλέπει, κόρη, τὸ δὲ περὶ τοῦτο μέλαν, τὸ δ’ ἐκτὸς τούτου λευκόν. Κοινὸν δὲ τῆς βλεφαρίδος μέρος τῆς ἄνω καὶ κάτω κανθοὶ δύο, ὁ μὲν πρὸς τῇ ῥινί, ὁ δὲ πρὸς τοῖς κροτάφοις· οἳ ἂν μὲν ὦσι μακροί, κακοηθείας σημεῖον, ἂν δ’ οἷον οἱ ἰκτῖνες κρεῶδες ἔχωσι τὸ πρὸς τῷ μυκτῆρι, πονηρίας.

Τὰ μὲν οὖν ἄλλα γένη πάντα τῶν ζῴων πλὴν τῶν ὀστρακοδέρμων καὶ εἴ τι ἄλλο ἀτελές, ἔχει ὀφθαλμούς· τὰ δὲ ζῳοτόκα πάντα πλὴν ἀσπάλακος. Τοῦτον δὲ τρόπον μέν τιν’ ἔχειν ἂν θείη τις, ὅλως δ’ οὐκ ἔχειν. Ὅλως μὲν γὰρ οὔθ’ ὁρᾷ οὔτ’ ἔχει εἰς τὸ φανερὸν δήλους ὀφθαλμούς· ἀφαιρεθέντος δὲ τοῦ δέρματος ἔχει τήν τε χώραν τῶν ὀμμάτων καὶ τῶν ὀφθαλμῶν τὰ μέλανα κατὰ τὸν τόπον καὶ τὴν χώραν τὴν φύσει τοῖς ὀφθαλμοῖς ὑπάρχουσαν ἐν τῷ ἐκτός, ὡς ἐν τῇ γενέσει πηρουμένων καὶ ἐπιφυομένου τοῦ δέρματος.

Κεφάλαιο 10

Ὀφθαλμοῦ (492a.) δὲ τὸ μὲν λευκὸν ὅμοιον ὡς ἐπὶ τὸ πολὺ πᾶσιν, τὸ δὲ καλούμενον μέλαν διαφέρει· τοῖς μὲν γάρ ἐστι μέλαν, τοῖς δὲ σφόδρα γλαυκόν, τοῖς δὲ χαροπόν, ἐνίοις δὲ αἰγωπόν· τοῦτο ἤθους βελτίστου σημεῖον καὶ πρὸς ὀξύτητα ὄψεως κράτιστον.

Μόνον δ’ ἢ μάλιστα τῶν ζῴων ἄνθρωπος πολύχρους τὰ ὄμματά ἐστιν· τῶν δ’ ἄλλων ἓν εἶδος· ἵπποι δὲ γίνονται γλαυκοὶ ἔνιοι.

Τῶν δ’ ὀφθαλμῶν οἱ μὲν μεγάλοι, οἱ δὲ μικροί, οἱ δὲ μέσοι· οἱ μέσοι βέλτιστοι. Καὶ ἢ ἐκτὸς σφόδρα ἢ ἐντὸς ἢ μέσως· τούτων οἱ ἐντὸς μάλιστα ὀξυωπέστατοι ἐπὶ παντὸς ζῴου, τὸ δὲ μέσον ἤθους βελτίστου σημεῖον. Καὶ ἢ σκαρδαμυκτικοὶ ἢ ἀτενεῖς ἢ μέσοι· βελτίστου δ’ ἤθους οἱ μέσοι, ἐκείνων δ’ ὁ μὲν ἀναιδὴς ὁ δ’ ἀβέβαιος.

Κεφάλαιο 11

Ἔτι δὲ κεφαλῆς μόριον, δι’ οὗ ἀκούει, ἄπνουν, τὸ οὖς· Ἀλκμαίων γὰρ οὐκ ἀληθῆ λέγει, φάμενος ἀναπνεῖν τὰς αἶγας κατὰ τὰ ὦτα. Ὠτὸς δὲ μέρος τὸ μὲν ἀνώνυμον, τὸ δὲ λοβός. Ὅλον δ’ ἐκ χόνδρου καὶ σαρκὸς σύγκειται. Εἴσω δὲ τὴν μὲν φύσιν ἔχει οἷον οἱ στρόμβοι, τὸ δ’ ἔσχατον ὀστοῦν ὅμοιον τῷ ὠτί, εἰς ὃ ὥσπερ ἀγγεῖον ἔσχατον ἀφικνεῖται ὁ ψόφος. Τοῦτο δ’ εἰς μὲν τὸν ἐγκέφαλον οὐκ ἔχει πόρον, εἰς δὲ τὸν τοῦ στόματος οὐρανόν· καὶ ἐκ τοῦ ἐγκεφάλου φλὲψ τείνει εἰς αὐτό. Περαίνουσι δὲ καὶ οἱ ὀφθαλμοὶ εἰς τὸν ἐγκέφαλον, καὶ κεῖται ἐπὶ φλεβίου ἑκάτερος. Ἀκίνητον δὲ τὸ οὖς ἄνθρωπος ἔχει μόνος τῶν ἐχόντων τοῦτο τὸ μόριον. Τῶν γὰρ ἐχόντων ἀκοὴν τὰ μὲν ἔχει ὦτα, τὰ δ’ οὐκ ἔχει, ἀλλὰ τὸν πόρον φανερόν, οἷον ὅσα πτερωτὰ ἢ φολιδωτά. Ὅσα δὲ ζῳοτοκεῖ, ἔξω φώκης καὶ δελφῖνος καὶ τῶν ἄλλων ὅσα οὕτω κητώδη, πάντα ἔχει ὦτα· ζῳοτοκεῖ γὰρ καὶ τὰ σελάχη· ἀλλὰ μόνον ἄνθρωπος οὐ κινεῖ. Ἡ μὲν οὖν φώκη πόρους ἔχει φανεροὺς ᾗ ἀκούει· ὁ δὲ δελφὶς ἀκούει μέν, οὐκ ἔχει δ’ ὦτα.

Τὰ δ’ ἄλλα κινεῖ πάντα. Κεῖται δὲ τὰ ὦτα ἐπὶ τῆς αὐτῆς περιφερείας τοῖς ὀφθαλμοῖς, καὶ οὐχ ὥσπερ ἐνίοις τῶν τετραπόδων ἄνωθεν. Ὤτων δὲ τὰ μὲν ψιλά, τὰ δὲ δασέα, τὰ δὲ μέσα· βέλτιστα δὲ τὰ μέσα πρὸς ἀκοήν, ἦθος δ’ οὐδὲν σημαίνει. Καὶ ἢ μεγάλα ἢ μικρὰ ἢ μέσα, ἢ ἐπανεστηκότα (492b.) σφόδρα ἢ οὐδὲν ἢ μέσον· τὰ δὲ μέσα βελτίστου ἤθους σημεῖον, τὰ δὲ μεγάλα καὶ ἐπανεστηκότα μωρολογίας καὶ ἀδολεσχίας. Τὸ δὲ μεταξὺ ὀφθαλμοῦ καὶ ὠτὸς καὶ κορυφῆς καλεῖται κρόταφος.

Ἔτι προσώπου μέρος τὸ μὲν ὂν τῷ πνεύματι πόρος ῥίς· καὶ γὰρ ἀναπνεῖ καὶ ἐκπνεῖ ταύτῃ, καὶ ὁ πταρμὸς διὰ ταύτης γίνεται, πνεύματος ἀθρόου ἔξοδος, σημεῖον οἰωνιστικὸν καὶ ἱερὸν μόνον τῶν πνευμάτων. Ἅμα δ’ ἡ ἀνάπνευσις καὶ ἔκπνευσις γίνεται εἰς τὸ στῆθος, καὶ ἀδύνατον χωρὶς τοῖς μυκτῆρσιν ἀναπνεῦσαι ἢ ἐκπνεῦσαι, διὰ τὸ ἐκ τοῦ στήθους εἶναι τὴν ἀναπνοὴν καὶ ἐκπνοὴν κατὰ τὸν γαργαρεῶνα, καὶ μὴ ἐκ τῆς κεφαλῆς τινι μέρει· ἐνδέχεται δὲ καὶ μὴ χρώμενον ταύτῃ ζῆν. Ἡ δ’ ὄσφρησις γίνεται διὰ τούτου τοῦ μέρους· αὕτη δ’ ἐστὶν ἡ αἴσθησις ὀσμῆς. Εὐκίνητος δ’ ὁ μυκτήρ, καὶ οὐχ ὥσπερ τὸ οὖς ἀκίνητον κατ’ ἰδίαν. Μέρος δ’ αὐτοῦ τὸ μὲν διάφραγμα χόνδρος, τὸ δ’ ὀχέτευμα κενόν· ἔστι γὰρ ὁ μυκτὴρ διχότομος. Τοῖς δ’ ἐλέφασιν ὁ μυκτὴρ γίνεται μακρὸς καὶ ἰσχυρός, καὶ χρῆται αὐτῷ ὥσπερ χειρί· προσάγεταί τε γὰρ καὶ λαμβάνει τούτῳ καὶ εἰς τὸ στόμα προσφέρεται τὴν τροφήν, καὶ τὴν ὑγρὰν καὶ τὴν ξηράν, μόνον τῶν ζῴων.

Ἔτι δὲ σιαγόνες δύο· τούτων τὸ πρόσθιον γένειον, τὸ δ’ ὀπίσθιον γένυς. Κινεῖ δὲ πάντα τὰ ζῷα τὴν κάτωθεν γένυν, πλὴν τοῦ ποταμίου κροκοδείλου· οὗτος δὲ τὴν ἄνω μόνον.

Μετὰ δὲ τὴν ῥῖνα χείλη δύο, σὰρξ εὐκίνητος. Τὸ δ’ ἐντὸς στόμα σιαγόνων καὶ χειλῶν. Τούτου μέρη τὸ μὲν ὑπερῷα τὸ δὲ φάρυγξ. Τὸ δ’ αἰσθητικὸν χυμοῦ γλῶττα· ἡ δ’ αἴσθησις ἐν τῷ ἄκρῳ· ἐὰν δέ <τι> ἐπὶ τὸ πλατὺ ἐπιτεθῇ, ἧττον. Αἰσθάνεται δὲ καὶ ὧν ἡ ἄλλη σὰρξ πάντων, οἷον σκληροῦ θερμοῦ καὶ ψυχροῦ καθ’ ὁτιοῦν μέρος, ὥσπερ καὶ χυμοῦ. Αὕτη δ’ ἢ πλατεῖα ἢ στενὴ ἢ μέση· ἡ μέση δὲ βελτίστη καὶ σαφεστάτη.

Καὶ ἢ λελυμένη ἢ καταδεδεμένη, ὥσπερ τοῖς ψελλοῖς καὶ τοῖς τραυλοῖς. Ἔστι δ’ ἡ γλῶττα σὰρξ μανὴ καὶ σομφή.

Ταύτης τι μέρος ἐπιγλωττίς. Καὶ τὸ μὲν διφυὲς τοῦ (493a.) στόματος παρίσθμιον, τὸ δὲ πολυφυὲς οὖλον· σάρκινα δὲ ταῦτα. Ἐντὸς δ’ ὀδόντες ὀστέινοι. Εἴσω δ’ ἄλλο μόριον σταφυλοφόρον, κίων ἐπίφλεβος· ὃς ἐὰν ἐξυγρανθεὶς φλεγμήνῃ, σταφυλὴ καλεῖται καὶ πνίγει.

Κεφάλαιο 12

Αὐχὴν δὲ τὸ μεταξὺ προσώπου καὶ θώρακος. Καὶ τούτου τὸ μὲν πρόσθιον μέρος λάρυγξ, [τὸ δ’ ὀπίσθιον στόμαχος].

Τούτου δὲ τὸ μὲν χονδρῶδες καὶ πρόσθιον, δι’ οὗ ἡ φωνὴ καὶ ἡ ἀναπνοή, ἀρτηρία· τὸ δὲ σαρκῶδες στόμαχος, ἐντὸς πρὸ τῆς ῥάχεως. Τὸ δ’ ὀπίσθιον αὐχένος μέρος ἐπωμίς. Ταῦτα μὲν οὖν τὰ μόρια μέχρι τοῦ θώρακος.

Θώρακος δὲ μέρη τὰ μὲν πρόσθια τὰ δ’ ὀπίσθια.

Πρῶτον μὲν μετὰ τὸν αὐχένα ἐν τοῖς προσθίοις στῆθος διφυὲς μαστοῖς. Τούτων ἡ θηλὴ διφυής, δι’ ἧς τοῖς θήλεσι τὸ γάλα διηθεῖται· ὁ δὲ μαστὸς μανός. Ἐγγίνεται δὲ καὶ τοῖς ἄρρεσι γάλα· ἀλλὰ πυκνὴ ἡ σὰρξ τοῖς ἄρρεσι, ταῖς δὲ γυναιξὶ σομφὴ καὶ πόρων μεστή.

Κεφάλαιο 13

Μετὰ δὲ τὸν θώρακα ἐν τοῖς προσθίοις γαστήρ, καὶ ταύτης ῥίζα ὀμφαλός· ὑπόρριζον δὲ τὸ μὲν διφυὲς λαγών, τὸ δὲ μονοφυὲς τὸ μὲν ὑπὸ τὸν ὀμφαλὸν ἦτρον (τούτου δὲ τὸ ἔσχατον ἐπίσιον), τὸ δ’ ὑπὲρ τὸν ὀμφαλὸν ὑποχόνδριον, τὸ δὲ κοινὸν ὑποχονδρίου καὶ λαγόνος χολάς.

Τῶν δ’ ὄπισθεν διάζωμα μὲν ἡ ὀσφύς (ὅθεν καὶ τοὔνομ’ ἔχει· δοκεῖ γὰρ εἶναι ἰσοφυές), τοῦ δὲ διεξοδικοῦ τὸ μὲν οἷον ἐφέδρανον γλουτός, τὸ δ’ ἐν ᾧ στρέφεται ὁ μηρός, κοτυληδών.

Τοῦ δὲ θήλεος ἴδιον μέρος ὑστέρα, καὶ τοῦ ἄρρενος αἰδοῖον, ἔξωθεν ἐπὶ τῷ τέλει τοῦ θώρακος, διμερές, τὸ μὲν ἄκρον σαρκῶδες καὶ ἀεὶ λεῖον <καὶ> ὡς εἰπεῖν ἴσον, ὃ καλεῖται βάλανος, τὸ δὲ περὶ αὐτὴν ἀνώνυμον δέρμα, ὃ ἐὰν διακοπῇ, οὐ συμφύεται, οὐδὲ γνάθος οὐδὲ βλεφαρίς. Κοινὸν δὲ τούτου καὶ τῆς βαλάνου ἀκροποσθία. Τὸ δὲ λοιπὸν μέρος χονδρῶδες, εὐαυξές, καὶ ἐξέρχεται καὶ εἰσέρχεται ἐναντίως ἢ τοῖς λοφούροις. Τοῦ δ’ αἰδοίου ὑποκάτω ὄρχεις δύο. Τὸ δὲ πέριξ δέρμα, ὃ καλεῖται ὄσχεος. Οἱ δ’ ὄρχεις οὔτε ταὐτὸ σαρκὶ οὔτε πόρρω σαρκός· ὃν (493b.) τρόπον δ’ ἔχουσιν, ὕστερον δι’ ἀκριβείας λεχθήσεται καθόλου περὶ πάντων τῶν τοιούτων μορίων.

Κεφάλαιο 14

Τὸ δὲ τῆς γυναικὸς αἰδοῖον ἐξ ἐναντίας τῷ τῶν ἀρρένων· κοῖλον γὰρ τὸ ὑπὸ τὴν ἥβην καὶ οὐχ ὥσπερ τὸ τοῦ ἄρρενος ἐξεστηκός. Καὶ οὐρήθρα ἔξω τῶν ὑστερῶν, δίοδος τῷ σπέρματι τοῦ ἄρρενος. Τοῦ δ’ ὑγροῦ περιττώματος ἀμφοῖν ἔξοδος.

Κοινὸν δὲ μέρος αὐχένος καὶ στήθους σφαγή, πλευρᾶς δὲ καὶ βραχίονος καὶ ὤμου μασχάλη, μηροῦ δὲ καὶ ἤτρου βουβών. Μηροῦ δὲ καὶ γλουτοῦ τὸ ἐντὸς περίνεον, μηροῦ δὲ καὶ γλουτοῦ τὸ ἔξω ὑπογλουτίς.

Θώρακος δὲ περὶ μὲν τῶν ἔμπροσθεν εἴρηται, τοῦ δὲ στήθους τὸ ὄπισθεν νῶτος.

Κεφάλαιο 15

Νώτου δὲ μέρη ὠμοπλάται δύο καὶ ῥάχις, ὑποκάτωθεν δὲ κατὰ τὴν γαστέρα ὀσφύς. Κοινὸν δὲ τοῦ ἄνω καὶ κάτω τοῦ θώρακος πλευραί, ἑκατέρωθεν ὀκτώ· περὶ γὰρ Λιγύων τῶν καλουμένων ἑπταπλεύρων οὐδενός πω ἀξιοπίστου ἀκηκόαμεν.

Ἔχει δ’ ὁ ἄνθρωπος καὶ τὸ ἄνω καὶ τὸ κάτω, καὶ τὰ ἔμπροσθεν καὶ τὰ ὀπίσθια, καὶ δεξιὰ καὶ ἀριστερά. Τὰ μὲν οὖν δεξιὰ καὶ ἀριστερὰ ὅμοια σχεδὸν ἐν τοῖς μέρεσι καὶ ταὐτὰ πάντα, πλὴν ἀσθενέστερα τὰ ἀριστερά· τὰ δ’ ὀπίσθια τοῖς προσθίοις ἀνόμοια, καὶ τὰ κάτω τοῖς ἄνω, πλὴν ὧδε ὅμοια, τὰ κάτω τοῦ ἤτρου οἷον τὸ πρόσωπον εὐσαρκίᾳ καὶ ἀσαρκίᾳ, καὶ τὰ σκέλη πρὸς τοὺς βραχίονας ἀντίκειται· καὶ οἷς βραχεῖς οἱ ἀγκῶνες, καὶ οἱ μηροὶ ὡς ἐπὶ τὸ πολύ, καὶ οἷς οἱ πόδες μικροί, καὶ αἱ χεῖρες.

Κώλων δὲ τὸ μὲν διφυὲς βραχίων· βραχίονος δὲ ὦμος, ἀγκών, ὠλέκρανον, πῆχυς, χείρ· χειρὸς δὲ θέναρ, δάκτυλοι πέντε· δακτύλου δὲ τὸ μὲν καμπτικὸν κόνδυλος, τὸ δ’ ἄκαμπτον φάλαγξ. Δάκτυλος δ’ ὁ μὲν μέγας μονοκόνδυλος, οἱ δ’ ἄλλοι δικόνδυλοι. Ἡ δὲ κάμψις καὶ τῷ βραχίονι καὶ τῷ δακτύλῳ εἴσω πᾶσιν· κάμπτεται δ’ ὁ βραχίων κατὰ τὸ ὠλέκρανον. Χειρὸς δὲ τὸ μὲν ἐντὸς θέναρ, σαρκῶδες καὶ διῃρημένον ἄρθροις, τοῖς μὲν μακροβίοις ἑνὶ ἢ (494a.) δυσὶ δι’ ὅλου, τοῖς δὲ βραχυβίοις δυσὶ καὶ οὐ δι’ ὅλου. Ἄρθρον δὲ χειρὸς καὶ βραχίονος καρπός. Τὸ δ’ ἔξω τῆς χειρὸς νευρῶδες καὶ ἀνώνυμον.

Κώλων δὲ διμερὲς ἄλλο σκέλος. Σκέλους δὲ τὸ μὲν ἀμφικέφαλον μηρός, τὸ δὲ πλανησίεδρον μύλη, τὸ δὲ διόστεον κνήμη, καὶ ταύτης τὸ μὲν πρόσθιον ἀντικνήμιον, τὸ δ’ ὀπίσθιον γαστροκνημία, σὰρξ νευρώδης καὶ φλεβώδης, τοῖς μὲν ἀνεσπασμένη ἄνω πρὸς τὴν ἰγνύν, ὅσοι μεγάλα τὰ ἰσχία ἔχουσι, τοῖς δ’ ἐναντίως κατεσπασμένη· τὸ δ’ ἔσχατον ἀντικνημίου σφυρόν, διφυὲς ἐν ἑκατέρῳ τῷ σκέλει. Τὸ δὲ πολυόστεον τοῦ σκέλους πούς. Τούτου δὲ τὸ μὲν ὀπίσθιον μέρος πτέρνα, τὸ δ’ ἐμπρόσθιον τοῦ ποδὸς τὸ μὲν ἐσχισμένον δάκτυλοι πέντε, τὸ δὲ σαρκῶδες κάτωθεν στῆθος, τὸ δ’ ἄνωθεν ἐν τοῖς πρανέσι νευρῶδες καὶ ἀνώνυμον. Δακτύλου δὲ τὸ μὲν ὄνυξ, τὸ δὲ καμπή· πάντων δ’ ὁ ὄνυξ ἐπ’ ἄκρῳ· μονόκαμπτοι δὲ πάντες οἱ κάτω δάκτυλοι. Τοῦ δὲ ποδὸς ὅσοις τὸ ἐντὸς παχὺ καὶ μὴ κοῖλον, ἀλλὰ βαίνουσιν ὅλῳ, πανοῦργοι. Κοινὸν δὲ μηροῦ καὶ κνήμης γόνυ καμπή.

Ταῦτα μὲν οὖν τὰ μέρη κοινὰ καὶ θήλεος καὶ ἄρρενος.

Ἡ δὲ θέσις τῶν μερῶν πρὸς τὸ ἄνω καὶ κάτω καὶ πρόσθιον καὶ ὀπίσθιον καὶ δεξιὸν καὶ ἀριστερὸν ὡς ἔχει, φανερὰ μὲν ἂν εἶναι δόξειε τὰ ἔξωθεν κατὰ τὴν αἴσθησιν, οὐ μὴν ἀλλὰ διὰ τὴν αὐτὴν αἰτίαν λεκτέον δι’ ἥνπερ καὶ τὰ πρότερον εἰρήκαμεν, ἵνα περαίνηται τὸ ἐφεξῆς, καὶ καταριθμουμένων ὅπως ἧττον λανθάνῃ τὰ μὴ τὸν αὐτὸν ἔχοντα τρόπον ἐπί τε τῶν ἄλλων ζῴων καὶ ἐπὶ τῶν ἀνθρώπων.

Μάλιστα δ’ ἔχει διωρισμένα πρὸς τοὺς κατὰ φύσιν τόπους τὰ ἄνω καὶ κάτω ἄνθρωπος τῶν ἄλλων ζῴων· τά τε γὰρ ἄνω καὶ κάτω πρὸς τὰ τοῦ παντὸς ἄνω καὶ κάτω τέτακται. Τὸν αὐτὸν τρόπον καὶ τὰ πρόσθια καὶ τὰ ὀπίσθια καὶ τὰ δεξιὰ καὶ τὰ ἀριστερὰ κατὰ φύσιν ἔχει. Τῶν δ’ ἄλλων ζῴων τὰ μὲν οὐκ ἔχει, τὰ δ’ ἔχει μὲν συγκεχυμένα δ’ ἔχει μᾶλλον. Ἡ μὲν οὖν κεφαλὴ πᾶσιν ἄνω πρὸς τὸ σῶμα τὸ ἑαυτῶν· ὁ δ’ ἄνθρωπος μόνος, ὥσπερ εἴρηται, πρὸς τὸ τοῦ ὅλου τελειωθεὶς (494b.) ἔχει τοῦτο τὸ μόριον.

Μετὰ δὲ τὴν κεφαλήν ἐστιν ὁ αὐχήν, εἶτα στῆθος καὶ νῶτος, τὸ μὲν ἐκ τοῦ πρόσθεν τὸ δ’ ἐκ τοῦ ὄπισθεν. Καὶ ἐχόμενα τούτων γαστὴρ καὶ ὀσφὺς καὶ αἰδοῖον καὶ ἰσχίον, εἶτα μηρὸς καὶ κνήμη, τελευταῖον δὲ πόδες. Εἰς τὸ πρόσθεν δὲ καὶ τὰ σκέλη τὴν κάμψιν ἔχει, ἐφ’ ὃ καὶ ἡ πορεία, καὶ τῶν ποδῶν τὸ κινητικώτερον μέρος καὶ ἡ κάμψις· ἡ δὲ πτέρνα ἐκ τοῦ ὄπισθεν· τῶν δὲ σφυρῶν ἑκάτερον κατὰ τὸ οὖς. Ἐκ δὲ τῶν πλαγίων τῶν δεξιῶν καὶ τῶν ἀριστερῶν οἱ βραχίονες, τὴν κάμψιν ἔχοντες εἰς τὸ ἐντός, ὥστε τὰ κυρτὰ τῶν σκελῶν καὶ τῶν βραχιόνων πρὸς ἄλληλα εἶναι ἐπ’ ἀνθρώπου μάλιστα.

Τὰς δ’ αἰσθήσεις καὶ τὰ αἰσθητήρια, ὀφθαλμοὺς καὶ μυκτῆρας καὶ γλῶτταν, ἐπὶ ταὐτὸ καὶ εἰς τὸ πρόσθιον ἔχει· τὴν δ’ ἀκοὴν καὶ τὸ αἰσθητήριον αὐτῆς, τὰ ὦτα, ἐκ τοῦ πλαγίου μέν, ἐπὶ τῆς αὐτῆς δὲ περιφερείας τοῖς ὄμμασιν. Τὰ δ’ ὄμματα ἐλάχιστον κατὰ μέγεθος διέστηκεν ἀνθρώπῳ τῶν ζῴων. Ἔχει δ’ ἀκριβεστάτην ἄνθρωπος τῶν αἰσθήσεων τὴν ἁφήν, δευτέραν δὲ τὴν γεῦσιν· ἐν δὲ ταῖς ἄλλαις λείπεται πολλῶν.

Κεφάλαιο 16

Τὰ μὲν οὖν μόρια τὰ πρὸς τὴν ἔξω ἐπιφάνειαν τοῦτον τέτακται τὸν τρόπον, καὶ καθάπερ ἐλέχθη, διωνόμασταί τε μάλιστα καὶ γνώριμα διὰ τὴν συνήθειάν ἐστιν· τὰ δ’ ἐντὸς τοὐναντίον. Ἄγνωστα γάρ ἐστι μάλιστα τὰ τῶν ἀνθρώπων, ὥστε δεῖ πρὸς τὰ τῶν ἄλλων μόρια ζῴων ἀνάγοντας σκοπεῖν, οἷς ἔχει παραπλησίαν τὴν φύσιν.

Πρῶτον μὲν οὖν τῆς κεφαλῆς κεῖται τὴν θέσιν ἐν τῷ πρόσθεν ἔχων ὁ ἐγκέφαλος. Ὁμοίως δὲ καὶ τοῖς ἄλλοις ζῴοις, ὅσα ἔχει τοῦτο τὸ μόριον· ἔχει δ’ ἅπαντα ὅσα ἔχει αἷμα, καὶ ἔτι τὰ μαλάκια· κατὰ μέγεθος δ’ ὁμοίως ἔχει ἄνθρωπος πλεῖστον ἐγκέφαλον καὶ ὑγρότατον. Ὑμένες δ’ αὐτὸν δύο περιέχουσιν, ὁ μὲν περὶ τὸ ὀστοῦν ἰσχυρότερος, ὁ δὲ περὶ αὐτὸν τὸν ἐγκέφαλον ἥττων ἐκείνου. Διφυὴς δ’ ἐν πᾶσίν ἐστιν ὁ ἐγκέφαλος. Καὶ ἐπὶ τούτου ἡ καλουμένη παρεγκεφαλὶς ἔσχατον, ἑτέραν ἔχουσα τὴν μορφὴν καὶ κατὰ τὴν ἁφὴν καὶ κατὰ τὴν ὄψιν.

Τὸ δ’ ὄπισθεν τῆς κεφαλῆς κενὸν καὶ κοῖλον πᾶσιν, ὡς ἑκάστοις (495a.) ὑπάρχει μεγέθους. Ἔνια μὲν γὰρ μεγάλην ἔχει τὴν κεφαλήν, τὸ δ’ ὑποκείμενον τοῦ προσώπου μόριον ἔλαττον, ὅσα στρογγυλοπρόσωπα· τὰ δὲ τὴν μὲν κεφαλὴν μικράν, τὰς δὲ σιαγόνας μακράς, οἷον τὸ τῶν λοφούρων γένος πᾶν.

Ἄναιμος δ’ ὁ ἐγκέφαλος ἅπασι, καὶ οὐδεμίαν ἔχων ἐν αὑτῷ φλέβα, καὶ θιγγανόμενος κατὰ φύσιν ψυχρός. Ἔχει δ’ ἐν τῷ μέσῳ ὁ τῶν πλείστων [πᾶς] κοῖλόν τι μικρόν. Ἡ δὲ περὶ αὐτὸν μῆνιγξ φλεβώδης· ἔστι δ’ ὑμὴν δερματικὸς ἡ μῆνιγξ ὁ περιέχων τὸν ἐγκέφαλον. Ὑπὲρ δὲ τοῦ ἐγκεφάλου λεπτότατον ὀστοῦν καὶ ἀσθενέστατον τῆς κεφαλῆς ἐστιν, ὃ καλεῖται βρέγμα.

Φέρουσι δ’ ἐκ τοῦ ὀφθαλμοῦ τρεῖς πόροι εἰς τὸν ἐγκέφαλον, ὁ μὲν μέγιστος καὶ ὁ μέσος εἰς τὴν παρεγκεφαλίδα, ὁ δ’ ἐλάχιστος εἰς αὐτὸν τὸν ἐγκέφαλον· ἐλάχιστος δ’ ἐστὶν ὁ πρὸς τῷ μυκτῆρι μάλιστα. Οἱ μὲν οὖν μέγιστοι παράλληλοί εἰσι καὶ οὐ συμπίπτουσιν, οἱ δὲ μέσοι συμπίπτουσι (δῆλον δὲ τοῦτο μάλιστα ἐπὶ τῶν ἰχθύων)· καὶ γὰρ ἐγγύτερον οὗτοι τοῦ ἐγκεφάλου ἢ οἱ μεγάλοι· οἱ δ’ ἐλάχιστοι πλεῖστόν τε ἀπήρτηνται ἀλλήλων καὶ οὐ συμπίπτουσιν.

Ἐντὸς δὲ τοῦ αὐχένος ὅ τ’ οἰσοφάγος καλούμενός ἐστιν, ἔχων τὴν ἐπωνυμίαν ἀπὸ τοῦ μήκους καὶ τῆς στενότητος, καὶ ἡ ἀρτηρία. Πρότερον δὲ τῇ θέσει ἡ ἀρτηρία κεῖται τοῦ οἰσοφάγου ἐν πᾶσι τοῖς ἔχουσιν αὐτήν· ἔχει δὲ ταύτην πάντα ὅσαπερ πλεύμονα ἔχει.

Ἔστι δ’ ἡ μὲν ἀρτηρία χονδρώδης τὴν φύσιν καὶ ὀλίγαιμος, πολλοῖς λεπτοῖς φλεβίοις περιεχομένη, κεῖται δ’ ἐπὶ μὲν τὰ ἄνω πρὸς τὸ στόμα κατὰ τὴν ἐκ τῶν μυκτήρων σύντρησιν εἰς τὸ στόμα, ᾗ καὶ ὅταν πίνοντες ἀνασπάσωσί τι τοῦ ποτοῦ, χωρεῖ ἐκ τοῦ στόματος διὰ τῶν μυκτήρων ἔξω. Μεταξὺ δ’ ἔχει τῶν τρήσεων τὴν ἐπιγλωττίδα καλουμένην, ἐπιπτύσσεσθαι δυναμένην ἐπὶ τὸ τῆς ἀρτηρίας τρῆμα τὸ εἰς τὸ στόμα τεῖνον. Ταύτῃ δὲ τὸ πέρας συνήρτηται τῆς γλώττης. Ἐπὶ δὲ θάτερα καθήκει εἰς τὸ μεταξὺ τοῦ πλεύμονος, εἶτ’ ἀπὸ τούτου σχίζεται εἰς ἑκάτερον τῶν μερῶν τοῦ πλεύμονος. Θέλει γὰρ εἶναι διμερὴς ὁ πλεύμων ἐν ἅπασι τοῖς ἔχουσιν αὐτόν· ἀλλ’ ἐν μὲν τοῖς ζῳοτόκοις οὐχ ὁμοίως ἡ διάστασις φανερά, ἥκιστα (495b.) δ’ ἐν ἀνθρώπῳ. Ἔστι δ’ οὐ πολυσχιδὴς ὁ τοῦ ἀνθρώπου, ὥσπερ ἐνίων ζῳοτόκων, οὐδὲ λεῖος, ἀλλ’ ἔχει ἀνωμαλίαν.

Ἐν δὲ τοῖς ᾠοτόκοις, οἷον ὄρνισι καὶ τῶν τετραπόδων ὅσα ᾠοτόκα, πολὺ τὸ μέρος ἑκάτερον ἀπ’ ἀλλήλων ἔσχισται, ὥστε δοκεῖν δύο ἔχειν πλεύμονας· καὶ ἀπὸ μιᾶς δύο ἐστὶ μόρια τῆς ἀρτηρίας, εἰς ἑκάτερον τὸ μέρος τείνοντα τοῦ πλεύμονος. Συνήρτηται δὲ καὶ τῇ μεγάλῃ φλεβὶ καὶ τῇ ἀορτῇ καλουμένῃ.

Φυσωμένης δὲ τῆς ἀρτηρίας διαδίδωσιν εἰς τὰ κοῖλα μέρη τοῦ πλεύμονος τὸ πνεῦμα. Ταῦτα δὲ διαφύσεις ἔχει χονδρώδεις εἰς ὀξὺ συνηκούσας· ἐκ δὲ τῶν διαφύσεων τρήματα διὰ παντός ἐστι τοῦ πλεύμονος, ἀεὶ ἐκ μειζόνων εἰς ἐλάττω διαδιδόμενα.

Συνήρτηται δὲ καὶ ἡ καρδία τῇ ἀρτηρίᾳ πιμελώδεσι καὶ χονδρώδεσι καὶ ἰνώδεσι δεσμοῖς· ᾗ δὲ συνήρτηται, κοῖλόν ἐστιν. Φυσωμένης δὲ τῆς ἀρτηρίας ἐν ἐνίοις μὲν οὐ κατάδηλον ποιεῖ, ἐν δὲ τοῖς μείζοσι τῶν ζῴων δῆλον ὅτι εἰσέρχεται τὸ πνεῦμα εἰς αὐτήν. Ἡ μὲν οὖν ἀρτηρία τοῦτον ἔχει τὸν τρόπον, καὶ δέχεται μόνον τὸ πνεῦμα καὶ ἀφίησιν, ἄλλο δ’ οὐδὲν οὔτε ξηρὸν οὔθ’ ὑγρόν, ἢ πόνον παρέχει, ἕως ἂν ἐκβήξῃ τὸ κατελθόν.

Ὁ δὲ στόμαχος ἤρτηται μὲν ἄνωθεν ἀπὸ τοῦ στόματος, ἐχόμενος τῆς ἀρτηρίας, συνεχὴς ὢν πρός τε τὴν ῥάχιν καὶ τὴν ἀρτηρίαν ὑμενώδεσι δεσμοῖς, τελευτᾷ δὲ διὰ τοῦ διαζώματος εἰς τὴν κοιλίαν, σαρκοειδὴς ὢν τὴν φύσιν, καὶ τάσιν ἔχων καὶ ἐπὶ μῆκος καὶ ἐπὶ πλάτος.

Ἡ δὲ κοιλία ἡ τοῦ ἀνθρώπου ὁμοία τῇ κυνείᾳ ἐστίν· οὐ πολλῷ γὰρ τοῦ ἐντέρου μείζων, ἀλλ’ ἐοικυῖα οἱονεὶ ἐντέρῳ τινὶ εὖρος ἔχοντι· εἶτα ἔντερον ἁπλοῦν, εἱλιγμένον, ἐπιεικῶς πλατύ. Ἡ δὲ κάτω κοιλία ὁμοία τῇ ὑείᾳ· πλατεῖά τε γάρ ἐστι, καὶ τὸ ἀπὸ ταύτης πρὸς τὴν ἕδραν παχὺ καὶ βραχύ. Τὸ δ’ ἐπίπλοον ἀπὸ μέσης τῆς κοιλίας ἤρτηται, ἔστι δὲ τὴν φύσιν ὑμὴν πιμελώδης, ὥσπερ καὶ τοῖς ἄλλοις τοῖς μονοκοιλίοις καὶ ἀμφώδουσιν.

Ὑπὲρ δὲ τῶν ἐντέρων τὸ μεσεντέριόν ἐστιν· ὑμενῶδες δ’ ἐστὶ καὶ τοῦτο καὶ πλατύ, καὶ πῖον γίνεται. Ἐξήρτηται δ’ ἐκ τῆς μεγάλης φλεβὸς καὶ τῆς ἀορτῆς, καὶ δι’ αὐτοῦ φλέβες πολλαὶ καὶ πυκναί, (496a.) κατατείνουσαι πρὸς τὴν τῶν ἐντέρων θέσιν, ἄνωθεν ἀρξάμεναι μέχρι κάτω. Τὰ μὲν οὖν περὶ τὸν στόμαχον καὶ τὴν ἀρτηρίαν οὕτως ἔχει, καὶ τὰ περὶ τὴν κοιλίαν.

Κεφάλαιο 17

Ἡ δὲ καρδία ἔχει μὲν τρεῖς κοιλίας, κεῖται δ’ ἀνωτέρω τοῦ πλεύμονος κατὰ τὴν σχίσιν τῆς ἀρτηρίας, ἔχει δ’ ὑμένα πιμελώδη καὶ παχύν, ᾗ προσπέφυκε τῇ φλεβὶ τῇ μεγάλῃ καὶ τῇ ἀορτῇ. Κεῖται δ’ ἐπὶ τῇ ἀορτῇ κατὰ τὰ ὀξέα.

Κεῖται δὲ τὰ ὀξέα κατὰ τὸ στῆθος ὁμοίως ἁπάντων τῶν ζῴων, ὅσα ἔχει στῆθος. Πᾶσι δ’ ὁμοίως καὶ τοῖς ἔχουσι καὶ τοῖς μὴ ἔχουσι τοῦτο τὸ μόριον εἰς τὸ πρόσθεν ἔχει ἡ καρδία τὸ ὀξύ· λάθοι δ’ ἂν πολλάκις διὰ τὸ μεταπίπτειν διαιρουμένων. Τὸ δὲ κυρτὸν αὐτῆς ἐστιν ἄνω. Ἔχει δὲ τὸ ὀξὺ σαρκῶδες ἐπὶ πολὺ καὶ πυκνόν, καὶ ἐν τοῖς κοίλοις αὐτῆς νεῦρα ἔνεστιν.

Κεῖται δὲ τὴν θέσιν ἐν μὲν τοῖς ἄλλοις κατὰ μέσον τὸ στῆθος, ὅσα ἔχει στῆθος, τοῖς δ’ ἀνθρώποις ἐν τοῖς ἀριστεροῖς μᾶλλον, μικρὸν τῆς διαιρέσεως τῶν μαστῶν ἐγκλίνουσα εἰς τὸν ἀριστερὸν μαστὸν ἐν τῷ ἄνω μέρει τοῦ στήθους.

Καὶ οὔτε μεγάλη, τό θ’ ὅλον αὐτῆς εἶδος οὐ πρόμηκές ἐστιν ἀλλὰ στρογγυλώτερον· πλὴν τὸ ἄκρον εἰς ὀξὺ συνῆκται. Ἔχει δὲ κοιλίας τρεῖς, ὥσπερ εἴρηται, μεγίστην μὲν τὴν ἐν τοῖς δεξιοῖς, ἐλαχίστην δὲ τὴν ἐν τοῖς ἀριστεροῖς, μέσην δὲ μεγέθει τὴν ἀνὰ μέσον· καί εἰσιν εἰς τὸν πλεύμονα τετρημέναι πᾶσαι. [Ἀμφοτέρας δ’ ἔχει τὰς δύο μικράς, καὶ τὸν πλεύμονα τετρημένας πάσας]. Κατάδηλον δὲ κατὰ μίαν τῶν κοιλιῶν.

Κάτωθεν δ’ ἐκ τῆς προσφύσεως· κατὰ μὲν τὴν μεγίστην κοιλίαν ἐξήρτηται τῇ μεγάλῃ φλεβί, πρὸς ἣν καὶ τὸ μεσεντέριόν ἐστι, κατὰ δὲ τὴν μέσην τῇ ἀορτῇ.

Φέρουσι δὲ καὶ εἰς τὸν πλεύμονα πόροι ἀπὸ τῆς καρδίας, καὶ σχίζονται τὸν αὐτὸν τρόπον ὅνπερ ἡ ἀρτηρία, κατὰ πάντα τὸν πλεύμονα παρακολουθοῦντες τοῖς ἀπὸ τῆς ἀρτηρίας. Ἐπάνω δ’ εἰσὶν οἱ ἀπὸ τῆς καρδίας· πόρος δ’ οὐδείς ἐστι κοινός, ἀλλὰ διὰ τὴν σύναψιν δέχονται τὸ πνεῦμα καὶ τῇ καρδίᾳ διαπέμπουσιν· φέρει γὰρ ὁ μὲν εἰς τὸ δεξιὸν κοῖλον τῶν πόρων, ὁ δ’ εἰς τὸ ἀριστερόν. Περὶ δὲ τῆς φλεβὸς τῆς μεγάλης καὶ τῆς ἀορτῆς κατ’ αὐτὰς κοινῇ περὶ ἀμφοτέρων ἐροῦμεν ὕστερον.

Αἷμα (496b.) δὲ πλεῖστον μὲν ὁ πλεύμων ἔχει τῶν ἐν τοῖς ζῴοις μορίων τοῖς ἔχουσί τε πλεύμονα καὶ ζῳοτοκοῦσιν ἐν αὑτοῖς τε καὶ ἐκτός· ἅπας μὲν γάρ ἐστι σομφός, παρ’ ἑκάστην δὲ τὴν σύριγγα πόροι Φέρουσι τῆς μεγάλης Φλεβός. Ἀλλ’ οἱ νομίζοντες εἶναι κενὸν διηπάτηνται, θεωροῦντες τοὺς

ἐξῃρημένους ἐκ τῶν διαιρουμένων τῶν ζῴων, ὧν εὐθὺς ἐξελήλυθε τὸ αἷμα ἀθρόον.

Τῶν δ’ ἄλλων σπλάγχνων ἡ καρδία μόνον ἔχει αἷμα. Καὶ ὁ μὲν πλεύμων οὐκ ἐν αὑτῷ ἀλλ’ ἐν ταῖς φλεψίν, ἡ δὲ καρδία ἐν αὑτῇ· ἐν ἑκάστῃ γὰρ ἔχει αἷμα τῶν κοιλιῶν, λεπτότατον δ’ ἐστὶ τὸ ἐν τῇ μέσῃ.

Ὑπὸ δὲ τὸν πλεύμονά ἐστι τὸ διάζωμα τὸ τοῦ θώρακος, αἱ καλούμεναι φρένες, πρὸς μὲν τὰ πλευρὰ καὶ τὰ ὑποχόνδρια καὶ τὴν ῥάχιν συνηρτημέναι, ἐν μέσῳ δ’ ἔχει τὰ λεπτὰ καὶ ὑμενώδη. Ἔχει δὲ δι’ αὐτοῦ καὶ φλέβας τεταμένας· εἰσὶ δ’ αἱ τοῦ ἀνθρώπου φρένες παχεῖαι ὡς κατὰ λόγον τοῦ σώματος.

Ὑπὸ δὲ τὸ διάζωμα ἐν μὲν τοῖς δεξιοῖς κεῖται τὸ ἧπαρ, ἐν δὲ τοῖς ἀριστεροῖς ὁ σπλήν, ὁμοίως ἐν ἅπασι τοῖς ἔχουσι ταῦτα τὰ μόρια κατὰ φύσιν καὶ μὴ τερατωδῶς· ἤδη γὰρ ὦπται μετηλλαχότα τὴν τάξιν ἔν τισι τῶν τετραπόδων. Συνήρτηται δὲ τῇ κοιλίᾳ κατὰ τὸ ἐπίπλοον. Τὴν δ’ ὄψιν ἐστὶν ὁ τοῦ ἀνθρώπου σπλὴν στενὸς καὶ μακρός, ὅμοιος τῷ ὑείῳ. Τὸ δ’ ἧπαρ ὡς μὲν ἐπὶ τὸ πολὺ καὶ ἐν τοῖς πλείστοις ἔχει χολήν, ἐπ’ ἐνίοις δ’ οὐκ ἔπεστιν. Στρογγύλον δ’ ἐστὶ τὸ τοῦ ἀνθρώπου ἧπαρ καὶ ὅμοιον τῷ βοείῳ. Συμβαίνει δὲ τοῦτο καὶ ἐν τοῖς ἱερείοις, οἷον ἐν μὲν τόπῳ τινὶ τῆς ἐν Εὐβοίᾳ Χαλκιδικῆς οὐκ ἔχει τὰ πρόβατα χολήν, ἐν δὲ Νάξῳ πάντα σχεδὸν τὰ τετράποδα τοσαύτην ὥστ’ ἐκπλήττεσθαι τοὺς θύοντας τῶν ξένων, οἰομένους αὑτῶν ἴδιον εἶναι τὸ σημεῖον, ἀλλ’ οὐ φύσιν αὐτῶν εἶναι ταύτην. Προσπέφυκε δὲ τῇ μεγάλῃ φλεβὶ τὸ ἧπαρ, τῇ δ’ ἀορτῇ οὐ κοινωνεῖ· διὰ γὰρ τοῦ ἥπατος διέχει ἡ ἀπὸ τῆς μεγάλης φλεβὸς φλέψ, ᾗ αἱ καλούμεναι πύλαι εἰσὶ τοῦ ἥπατος. Συνήρτηται δὲ καὶ ὁ σπλὴν τῇ μεγάλῃ φλεβὶ μόνον· τείνει γὰρ ἀπ’ αὐτῆς φλὲψ εἰς τὸν σπλῆνα.

Μετὰ δὲ ταῦτα οἱ νεφροὶ πρὸς αὐτῇ τῇ ῥάχει κεῖνται, ὅμοιοι τὴν φύσιν ὄντες τοῖς βοείοις. (497a.) Ἀνώτερος δ’ ὁ δεξιός ἐστιν ἐν πᾶσι τοῖς ζῴοις τοῖς ἔχουσι νεφρούς· καὶ ἐλάττω δὲ πιμελὴν ἔχει τοῦ ἀριστεροῦ καὶ αὐχμηρότερος ὁ δεξιός. Ἐν πᾶσι δ’ ἔχει ὁμοίως τοῖς ἄλλοις καὶ τοῦτο. Φέρουσι δ’ εἰς αὐτοὺς πόροι ἔκ τε τῆς μεγάλης φλεβὸς καὶ τῆς ἀορτῆς, πλὴν οὐκ εἰς τὸ κοῖλον. Ἔχουσι γὰρ οἱ νεφροὶ ἐν μέσῳ κοῖλον, οἱ μὲν μεῖζον οἱ δ’ ἔλαττον, πλὴν οἱ τῆς φώκης· οὗτοι δ’ ὅμοιοι τοῖς βοείοις ὄντες στερεώτατοι πάντων εἰσίν. Οἱ δὲ πόροι οἱ τείνοντες εἰς αὐτοὺς εἰς τὸ σῶμα καταναλίσκονται τῶν νεφρῶν· σημεῖον δ’ ὅτι οὐ περαίνουσι τὸ μὴ ἔχειν αἷμα μηδὲ πήγνυσθαι ἐν αὐτοῖς.

Ἔχουσι δὲ κοιλίαν, ὥσπερ εἴρηται, μικράν. Ἐκ δὲ τοῦ κοίλου τῶν νεφρῶν φέρουσιν εἰς τὴν κύστιν πόροι δύο νεανικοί, καὶ ἄλλοι ἐκ τῆς ἀορτῆς ἰσχυροὶ καὶ συνεχεῖς. Ἐκ μέσου δὲ τῶν νεφρῶν ἑκατέρου φλὲψ κοίλη καὶ νευρώδης ἐξήρτηται, τείνουσα παρ’ αὐτὴν τὴν ῥάχιν διὰ τῶν στενῶν· εἶτα εἰς ἑκάτερον τὸ ἰσχίον ἀφανίζονται, καὶ πάλιν δῆλαι γίνονται τεταμέναι πρὸς τὸ ἰσχίον. Αὗται δ’ αἱ ἀποτομαὶ τῶν φλεβίων εἰς τὴν κύστιν καθήκουσιν. Τελευταία γὰρ ἡ κύστις κεῖται, τὴν μὲν ἐξάρτησιν ἔχουσα τοῖς ἀπὸ τῶν νεφρῶν τεταμένοις πόροις παρὰ τὸν καυλὸν τὸν ἐπὶ τὴν οὐρήθραν τείνοντα, καὶ σχεδὸν πάντῃ κύκλῳ λεπτοῖς καὶ ἰνώδεσιν ὑμενίοις ἐστὶ προσειλημμένη, παραπλησίοις οὖσι τρόπον τινὰ τῷ διαζώματι τοῦ θώρακος. Ἔστι δ’ ἡ τοῦ ἀνθρώπου κύστις ἐπιεικῶς ἔχουσα μέγεθος.

Πρὸς δὲ τὸν καυλὸν τὸν τῆς κύστεως συνήρτηται τὸ αἰδοῖον, τὸ μὲν ἐξωτάτω τρῆμα συνερρωγὸς εἰς ταὐτό, μικρὸν δ’ ὑποκάτω. Τὸ μὲν οὖν εἰς τοὺς ὄρχεις φέρει τῶν τρημάτων, τὸ δ’ εἰς τὴν κύστιν, νευρῶδες καὶ χονδρῶδες ὄν. Τοῦτον δ’ ἐξήρτηνται οἱ ὄρχεις τοῖς ἄρρεσι, περὶ ὧν ἐν τοῖς κοινῇ λεγομένοις διορισθήσεται πῶς ἔχουσιν.

Τὸν αὐτὸν δὲ τρόπον καὶ ἐν τῷ θήλει πάντα πέφυκεν· διαφέρει γὰρ οὐδενὶ τῶν ἔσω πλὴν ταῖς ὑστέραις, ὧν ἡ μὲν ὄψις θεωρείσθω ἐκ τῆς διαγραφῆς τῆς ἐν ταῖς ἀνατομαῖς, ἡ δὲ θέσις ἐστὶν ἐπὶ τοῖς ἐντέροις· ἐπὶ δὲ τῆς ὑστέρας ἡ κύστις. Λεκτέον δὲ καὶ περὶ ὑστερῶν κοινῇ πασῶν ἐν τοῖς ἑπομένοις· οὔτε γὰρ ὅμοιαι πᾶσιν οὔθ’ ὁμοίως ἔχουσιν.

(497b.) Τὰ μὲν οὖν μόρια καὶ τὰ ἐντὸς καὶ τὰ ἐκτὸς τοῦ ἀνθρώπου ταῦτα καὶ τοιαῦτα, καὶ τοῦτον ἔχει τὸν τρόπον.

Βιβλίο 2

Κεφάλαιο 1

Τῶν δ’ ἄλλων ζῴων τὰ μόρια τὰ μὲν κοινὰ πάντων ἐστίν, ὥσπερ εἴρηται πρότερον, τὰ δὲ γενῶν τινων. Ταὐτὰ δὲ καὶ ἕτερά ἐστιν ἀλλήλων τὸν ἤδη πολλάκις εἰρημένον τρόπον. Σχεδὸν γὰρ ὅσα γ’ ἐστὶ γένει ἕτερα τῶν ζῴων, καὶ τὰ πλεῖστα τῶν μερῶν ἔχει ἕτερα τῷ εἴδει, καὶ τὰ μὲν κατ’ ἀναλογίαν ἀδιάφορα μόνον, τῷ γένει δ’ ἕτερα, τὰ δὲ τῷ γένει μὲν ταὐτὰ τῷ εἴδει δ’ ἕτερα· πολλὰ δὲ τοῖς μὲν ὑπάρχει, τοῖς δ’ οὐχ ὑπάρχει.

Τὰ μὲν οὖν τετράποδα καὶ ζῳοτόκα κεφαλὴν μὲν ἔχει καὶ αὐχένα καὶ τὰ ἐν τῇ κεφαλῇ μόρια ἅπαντα, διαφέρει δὲ τὰς μορφὰς τῶν μορίων ἕκαστον. Καὶ ὅ γε λέων τὸ τοῦ αὐχένος ἔχει ἓν ὀστοῦν, σφονδύλους δ’ οὐκ ἔχει· τὰ δ’ ἐντὸς ἀνοιχθεὶς ὅμοια πάντ’ ἔχει κυνί. Ἔχει δὲ τὰ τετράποδα ζῷα καὶ ζῳοτόκα ἀντὶ τῶν βραχιόνων σκέλη πρόσθια, πάντα μὲν τὰ τετράποδα, μάλιστα δ’ ἀνάλογα ταῖς χερσὶ τὰ πολυσχιδῆ αὐτῶν· χρῆται γὰρ πρὸς πολλὰ ὡς χερσίν. Καὶ τὰ ἀριστερὰ δ’ ἧττον ἔχει ἀπολελυμένα τῶν ἀνθρώπων, πλὴν ἐλέφαντος. Οὗτος δὲ τά τε περὶ τοὺς δακτύλους ἀδιαρθρωτότερα ἔχει τῶν ποδῶν, καὶ τὰ πρόσθια σκέλη πολλῷ μείζω. Ἔστι δὲ πενταδάκτυλον, καὶ πρὸς τοῖς ὀπισθίοις σκέλεσι σφυρὰ ἔχει βραχέα. Ἔχει δὲ μυκτῆρα τοιοῦτον καὶ τηλικοῦτον ὥστε ἀντὶ χειρῶν ἔχειν αὐτόν· πίνει γὰρ καὶ ἐσθίει ὀρέγων τούτῳ εἰς τὸ στόμα, καὶ τῷ ἐλεφαντιστῇ ἀνορέγει ἄνω. Τούτῳ καὶ δένδρα ἀνασπᾷ, καὶ διὰ τοῦ ὕδατος βαδίζων τούτῳ ἀναφυσᾷ. Τῷ δ’ ἄκρῳ ἐγκλίνει, οὐ κάμπτεται δέ· χονδρῶδες γὰρ ἔχει. Μόνον δὲ καὶ ἀμφιδέξιον γίνεται τῶν ἄλλων ζῴων ἄνθρωπος.

Τῷ δὲ στήθει τῷ τοῦ ἀνθρώπου πάντα τὰ ζῷα ἀνάλογον ἔχει τοῦτο τὸ μόριον, ἀλλ’ οὐχ ὅμοιον· ὁ μὲν γὰρ πλατὺ τὸ στῆθος, τὰ δ’ ἄλλα στενόν. Μαστοὺς δ’ οὐκ ἔχει οὐδὲν ἐν τῷ πρόσθεν ἀλλ’ ἢ ἄνθρωπος· ὁ δ’ ἐλέφας ἔχει (498a.) μὲν μαστοὺς δύο, ἀλλ’ οὐκ ἐν τῷ στήθει ἀλλὰ πρὸς τῷ στήθει.

Τὰς δὲ κάμψεις τῶν κώλων καὶ τῶν ἔμπροσθεν καὶ τῶν ὄπισθεν ὑπεναντίας ἔχουσι καὶ ἑαυταῖς καὶ ταῖς τοῦ ἀνθρώπου καμπαῖς, πλὴν ἐλέφαντος. Τοῖς μὲν γὰρ ζῳοτόκοις τῶν τετραπόδων κάμπτεται τὰ μὲν πρόσθια εἰς τὸ πρόσθεν τὰ δ’ ὀπίσθια εἰς τοὔπισθεν, καὶ ἔχουσι τὰ κοῖλα τῆς περιφερείας πρὸς ἄλληλα ἀντεστραμμένα· ὁ δ’ ἐλέφας οὐχ ὥσπερ ἔλεγόν τινες, ἀλλὰ συγκαθίζει καὶ κάμπτει τὰ σκέλη, πλὴν οὐ δύναται διὰ τὸ βάρος ἐπ’ ἀμφότερα ἅμα, ἀλλ’ ἀνακλίνεται ἢ ἐπὶ τὰ εὐώνυμα ἢ ἐπὶ τὰ δεξιά, καὶ καθεύδει ἐν τούτῳ τῷ σχήματι, κάμπτει δὲ τὰ ὀπίσθια σκέλη ὥσπερ ἄνθρωπος.

Τοῖς ᾠοτόκοις δέ, ὥσπερ κροκοδείλῳ καὶ σαύρᾳ καὶ τοῖς ἄλλοις τοῖς τοιούτοις ἅπασιν, ἀμφότερα τὰ σκέλη καὶ τὰ πρόσθια καὶ τὰ ὀπίσθια εἰς τὸ πρόσθεν κάμπτεται, μικρὸν εἰς τὸ πλάγιον παρεγκλίνοντα. Ὁμοίως δὲ καὶ τοῖς ἄλλοις τοῖς πολύποσιν· πλὴν τὰ μεταξὺ τῶν ἐσχάτων ἀεὶ ἐπαμφοτερίζει καὶ τὴν κάμψιν ἔχει εἰς τὸ πλάγιον μᾶλλον. Ὁ δ' ἄνθρωπος ἄμφω τὰς καμπὰς τῶν κώλων ἐπὶ ταὐτὸ ἔχει καὶ ἐξ ἐναντίας· τοὺς μὲν γὰρ βραχίονας εἰς τοὔπισθεν κάμπτει, πλὴν μικρὸν βεβλαίσωται ἐπὶ τὰ πλάγια τὰ ἐντός, τὰ δὲ σκέλη εἰς τοὔμπροσθεν. Εἰς δὲ τὸ ὄπισθεν τά τε πρόσθια καὶ τὰ ὀπίσθια οὐδὲν κάμπτει τῶν ζῴων. Ἐναντίως δὲ τοῖς ἀγκῶσι καὶ τοῖς προσθίοις σκέλεσιν ἡ τῶν ὤμων ἔχει καμπὴ πᾶσι, καὶ τῶν ὄπισθεν γονάτων ἡ τῶν ἰσχίων, ὥστ' ἐπεὶ ὁ ἄνθρωπος τοῖς ἄλλοις ἐναντίως κάμπτει, καὶ οἱ ταὔτ' ἔχοντες ἐναντίως.

Παραπλησίους δὲ τὰς καμπὰς ἔχει καὶ ὁ ὄρνις τοῖς τετράποσι ζῴοις· δίπους γὰρ ὢν τὰ μὲν σκέλη εἰς τὸ ὄπισθεν κάμπτει, ἀντὶ δὲ βραχιόνων καὶ σκελῶν τῶν ἔμπροσθεν πτέρυγας ἔχει, ὧν ἡ κάμψις ἐστὶν εἰς τὸ πρόσθεν. Ἡ δὲ φώκη ὥσπερ πεπηρωμένον τετράπουν ἐστίν· εὐθὺς γὰρ ἔχει μετὰ τὴν ὠμοπλάτην τοὺς πόδας ὁμοίους χερσίν, ὥσπερ καὶ οἱ τῆς ἄρκτου· πενταδάκτυλοι γάρ εἰσι, καὶ ἕκαστος τῶν (498b.) δακτύλων καμπὰς ἔχει τρεῖς καὶ ὄνυχα οὐ μέγαν· οἱ δ' ὀπίσθιοι πόδες πενταδάκτυλοι μέν εἰσι, καὶ τὰς καμπὰς καὶ τοὺς ὄνυχας ὁμοίους ἔχουσι τοῖς προσθίοις, τῷ δὲ σχήματι παραπλήσιοι ταῖς τῶν ἰχθύων οὐραῖς εἰσιν.

Αἱ δὲ κινήσεις τῶν ζῴων τῶν μὲν τετραπόδων καὶ πολυπόδων κατὰ διάμετρόν εἰσι, καὶ ἑστᾶσιν οὕτως· ἡ δ' ἀρχὴ ἀπὸ τῶν δεξιῶν πᾶσιν. Κατὰ σκέλος δὲ βαδίζουσιν ὅ τε λέων καὶ αἱ κάμηλοι ἀμφότεραι, αἵ τε Βακτριαναὶ καὶ αἱ Ἀράβιαι. Τὸ δὲ κατὰ σκέλος ἐστὶν ὅτε οὐ προβαίνει τῷ ἀριστερῷ τὸ δεξιόν, ἀλλ' ἐπακολουθεῖ.

Ἔχουσι δὲ τὰ τετράποδα ζῷα, ὅσα μὲν ὁ ἄνθρωπος μόρια ἔχει ἐν τῷ πρόσθεν, κάτω ἐν τοῖς ὑπτίοις, τὰ δ' ὀπίσθια ἐν τοῖς πρανέσιν. Ἔτι δὲ τὰ πλεῖστα κέρκον ἔχει· καὶ γὰρ ἡ φώκη μικρὰν ἔχει, ὁμοίαν τῇ τοῦ ἐλάφου. Περὶ δὲ τῶν πιθηκοειδῶν ζῴων ὕστερον διορισθήσεται. Πάντα δ' ὅσα τετράποδα καὶ ζῳοτόκα, δασέα ὡς εἰπεῖν ἐστι, καὶ οὐχ ὥσπερ ὁ ἄνθρωπος ὀλιγότριχον καὶ μικρότριχον πλὴν τῆς κεφαλῆς, τὴν δὲ κεφαλὴν δασύτατον τῶν ζῴων. Ἔτι δὲ τῶν μὲν ἄλλων ζῴων τῶν ἐχόντων τρίχας τὰ πρανῆ δασύτερα, τὰ δ' ὕπτια ἢ λεῖα πάμπαν ἢ ἧττον δασέα· ὁ δ' ἄνθρωπος τοὐναντίον. Καὶ βλεφαρίδας ὁ μὲν ἄνθρωπος ἐπ' ἄμφω ἔχει, καὶ ἐν μασχάλαις ἔχει τρίχας καὶ ἐπὶ τῆς ἥβης· τῶν δ' ἄλλων οὐδὲν οὔτε τούτων οὐδέτερον οὔτε τὴν κάτω βλεφαρίδα, ἀλλὰ κάτωθεν τοῦ βλεφάρου ἐνίοις μαναὶ τρίχες πεφύκασιν.

Αὐτῶν δὲ τῶν τετραπόδων καὶ τρίχας ἐχόντων τῶν μὲν ἅπαν τὸ σῶμα δασύ, καθάπερ ὑὸς καὶ ἄρκτου καὶ κυνός· τὰ δὲ δασύτερα τὸν αὐχένα ὁμοίως πάντῃ, οἷον ὅσα χαίτην ἔχει, ὥσπερ λέων· τὰ δ' ἐπὶ τῷ πρανεῖ τοῦ αὐχένος ἀπὸ τῆς κεφαλῆς μέχρι τῆς ἀκρωμίας, οἷον ὅσα λοφιὰν ἔχει, ὥσπερ ἵππος καὶ ὀρεὺς καὶ τῶν ἀγρίων καὶ κερατοφόρων βόνασος. Ἔχει δὲ καὶ ὁ ἱππέλαφος καλούμενος ἐπὶ τῇ ἀκρωμίᾳ χαίτην καὶ τὸ θηρίον τὸ πάρδιον ὀνομαζόμενον· ἀπὸ δὲ τῆς κεφαλῆς ἐπὶ τὴν ἀκρωμίαν λεπτὴν ἑκάτερον· ἰδίᾳ δ' ὁ ἱππέλαφος πώγωνα (499a.) ἔχει κατὰ τὸν λάρυγγα. Ἔστι δ' ἀμφότερα κερατοφόρα καὶ διχαλά· ἡ δὲ θήλεια ἱππέλαφος οὐκ ἔχει κέρατα. Τὸ δὲ μέγεθός ἐστι τούτου τοῦ ζῴου ἐλάφῳ προσεμφερές. Γίνονται δ' οἱ ἱππέλαφοι ἐν Ἀραχώταις, οὗπερ καὶ οἱ βόες οἱ ἄγριοι. Διαφέρουσι δ' οἱ ἄγριοι τῶν ἡμέρων ὅσον περ οἱ ὕες οἱ ἄγριοι πρὸς τοὺς ἡμέρους· μέλανές τε γάρ εἰσι καὶ ἰσχυροὶ τῷ εἴδει καὶ ἐπίγρυποι, τὰ δὲ κέρατα ἐξυπτιάζοντα ἔχουσι μᾶλλον· τὰ δὲ τῶν ἱππελάφων κέρατα παραπλήσια τοῖς τῆς δορκάδος εἰσίν. Ὁ δ' ἐλέφας ἥκιστα δασύς ἐστι τῶν τετραπόδων. Ἀκολουθοῦσι δὲ κατὰ τὸ σῶμα καὶ αἱ κέρκοι δασύτητι καὶ ψιλότητι, ὅσων αἱ κέρκοι μέγεθος ἔχουσιν· ἔνια γὰρ μικρὰν ἔχει πάμπαν.

Αἱ δὲ κάμηλοι ἴδιον ἔχουσι παρὰ τἆλλα τετράποδα τὸν καλούμενον ὕβον ἐπὶ τῷ νώτῳ. Διαφέρουσι δ' αἱ Βάκτριαι τῶν Ἀραβίων· αἱ μὲν γὰρ δύο ἔχουσιν ὕβους, αἱ δ' ἕνα μόνον, ἄλλον δ' ἔχουσιν ὕβον τοιοῦτον οἷον ἄνω ἐν τοῖς κάτω, ἐφ' οὗ, ὅταν κατακλιθῇ εἰς γόνατα, ἐστήρικται τὸ ἄλλο σῶμα. Θηλὰς μὲν οὖν ἔχει τέτταρας ἡ κάμηλος ὥσπερ βοῦς, καὶ κέρκον ὁμοίαν ὄνῳ, τὸ δ' αἰδοῖον ὄπισθεν. Καὶ γόνυ δ' ἔχει ἐν ἑκάστῳ τῷ σκέλει ἕν, καὶ τὰς καμπὰς οὐ πλείους, ὥσπερ λέγουσί τινες, ἀλλὰ φαίνεται διὰ τὴν ὑπόσταλσιν τῆς κοιλίας. Καὶ ἀστράγαλον ὅμοιον μὲν βοΐ, ἰσχνὸν δὲ καὶ μικρὸν ὡς κατὰ τὸ μέγεθος. Ἔστι δὲ διχαλὸν καὶ οὐκ ἄμφωδον, διχαλὸν δ' ὧδε. Ἐκ μὲν τοῦ ὄπισθεν μικρὸν ἔσχισται μέχρι τῆς δευτέρας καμπῆς τῶν δακτύλων· τὰ δ' ἔμπροσθεν ἔσχισται μικρόν, ὅσον ἄχρι τῆς πρώτης καμπῆς τῶν δακτύλων ἐπ' ἄκρῳ, τέτταρα· καὶ ἔστι τι καὶ διὰ μέσου τῶν σχισμάτων, ὥσπερ τοῖς χησίν. Ὁ δὲ πούς ἐστι κάτωθεν σαρκώδης, ὥσπερ καὶ οἱ τῶν ἄρκτων· διὸ καὶ τὰς εἰς πόλεμον ἰούσας ὑποδοῦσι καρβατίναις, ὅταν ἀλγήσωσιν.

Πάντα δὲ τὰ τετράποδα ὀστώδη τὰ σκέλη ἔχει καὶ νευρώδη καὶ ἄσαρκα· ὅλως δὲ καὶ τἆλλα ζῷα ἅπαντα, (499b.) ὅσα ἔχει πόδας, ἐκτὸς ἀνθρώπου. Ἔτι δ' ἀνίσχια· καὶ γὰρ οἱ ὄρνιθες ἔτι μᾶλλον τοῦτο πεπόνθασιν. Ὁ δ' ἄνθρωπος τοὐναντίον· σαρκώδη γὰρ ἔχει σχεδὸν μάλιστα τοῦ σώματος τὰ ἰσχία καὶ τοὺς μηροὺς καὶ τὰς κνήμας· αἱ γὰρ καλούμεναι γαστροκνημίαι ἐν ταῖς κνήμαις εἰσὶ σαρκώδεις.

Τῶν δὲ τετραπόδων καὶ ἐναίμων καὶ ζῳοτόκων τὰ μέν ἐστι πολυσχιδῆ, ὥσπερ αἱ τοῦ ἀνθρώπου χεῖρες καὶ οἱ πόδες (πολυδάκτυλα γὰρ ἔνιά ἐστιν, οἷον λέων, κύων, πάρδαλις), τὰ δὲ δισχιδῆ, καὶ ἀντὶ τῶν ὀνύχων χηλὰς ἔχει, ὥσπερ πρόβατον καὶ αἴξ καὶ ἔλαφος καὶ ἵππος ὁ ποτάμιος· τὰ δ’ ἀσχιδῆ, οἷον τὰ μώνυχα, ὥσπερ ἵππος καὶ ὀρεύς. Τὸ δὲ τῶν ὑῶν γένος ἐπαμφοτερίζει· εἰσὶ γὰρ καὶ ἐν Ἰλλυριοῖς καὶ ἐν Παιονίᾳ καὶ ἄλλοθι μώνυχες ὕες. Τὰ μὲν οὖν διχαλὰ δύο ἔχει σχίσεις ὄπισθεν· τοῖς δὲ μώνυξι τοῦτ’ ἐστὶ συνεχές.

Ἔστι δὲ καὶ τὰ μὲν κερατοφόρα τῶν ζῴων τὰ δ’ ἄκερα. Τὰ μὲν οὖν πλεῖστα τῶν ἐχόντων κέρατα διχαλὰ κατὰ φύσιν ἐστίν, οἷον βοῦς καὶ ἔλαφος καὶ αἴξ· μώνυχον δὲ καὶ δίκερων οὐδὲν ὦπται. Μονοκέρατα δὲ καὶ μώνυχα ὀλίγα, οἷον ὁ Ἰνδικὸς ὄνος. Μονόκερων δὲ καὶ διχαλὸν ὄρυξ. Καὶ ἀστράγαλον δ’ ὁ Ἰνδικὸς ὄνος ἔχει τῶν μωνύχων μόνον· ἡ γὰρ ὗς, ὥσπερ ἐλέχθη πρότερον, ἐπαμφοτερίζει, διὸ καὶ οὐ καλλιαστράγαλόν ἐστιν. Τῶν δὲ διχαλῶν πολλὰ ἔχει ἀστράγαλον. Πολυσχιδὲς δ’ οὐδὲν ὦπται τοιοῦτον ἔχον ἀστράγαλον, ὥσπερ οὐδ’ ἄνθρωπος, ἀλλ’ ἡ μὲν λὺγξ ὅμοιον ἡμιαστραγαλίῳ, ὁ δὲ λέων, οἷόν περ πλάττουσι, λαβυρινθώδη. Πάντα δὲ τὰ ἔχοντα ἀστραγάλους ἐν τοῖς ὄπισθεν ἔχει σκέλεσιν. Ἔχει δ’ ὀρθὸν τὸν ἀστράγαλον ἐν τῇ καμπῇ, τὸ μὲν πρανὲς ἔξω, τὸ δ’ ὕπτιον εἴσω, καὶ τὰ μὲν κῷα ἐντὸς ἐστραμμένα πρὸς ἄλληλα, τὰ δὲ χῖα καλούμενα ἔξω, καὶ τὰς κεραίας ἄνω. Ἡ μὲν οὖν θέσις τῶν ἀστραγάλων τοῖς ἔχουσι πᾶσι τοῦτον ἔχει τὸν τρόπον.

Διχαλὰ δ’ ἅμα καὶ χαίτην ἔχοντα καὶ κέρατα δύο κεκαμμένα εἰς αὑτά ἐστιν (500a.) ἔνια τῶν ζῴων, οἷον ὁ βόνασος, ὃς γίνεται περὶ τὴν Παιονίαν καὶ τὴν Μαιδικήν. Πάντα δ’ ὅσα κερατοφόρα, τετράποδά ἐστιν, εἰ μή τι κατὰ μεταφορὰν λέγεται ἔχειν κέρας καὶ λόγου χάριν, ὥσπερ τοὺς περὶ Θήβας ὄφεις οἱ Αἰγύπτιοί φασιν, ἔχοντας ἐπανάστασιν ὅσον προφάσεως χάριν.

Τῶν δ’ ἐχόντων κέρας δι’ ὅλου μὲν ἔχει στερεὸν μόνον ἔλαφος, τὰ δ’ ἄλλα κοῖλα μέχρι τινός, τὸ δ’ ἔσχατον στερεόν. Τὸ μὲν οὖν κοῖλον ἐκ τοῦ δέρματος πέφυκε μᾶλλον· ὃ δὲ περὶ τοῦτο περιήρμοσται τὸ στερεὸν ἐκ τῶν ὀστῶν, οἷον τὰ κέρατα τῶν βοῶν. Ἀποβάλλει δὲ τὰ κέρατα μόνον ἔλαφος κατ’ ἔτος, ἀρξάμενος ἀπὸ διετοῦς, καὶ πάλιν φύει· τὰ δ’ ἄλλα συνεχῶς ἔχει, ἐὰν μή τι βίᾳ πηρωθῇ.

Ἔτι δὲ περί τε τοὺς μαστοὺς ὑπεναντίως ἐν τοῖς ἄλλοις ζῴοις ὑπάρχει πρὸς αὑτά τε καὶ πρὸς τὸν ἄνθρωπον, καὶ περὶ τὰ ὄργανα τὰ χρήσιμα πρὸς τὴν ὀχείαν. Τὰ μὲν γὰρ ἔμπροσθεν ἔχει τοὺς μαστοὺς ἐν τῷ στήθει ἢ πρὸς τῷ στήθει, καὶ δύο μαστοὺς καὶ δύο θηλάς, ὥσπερ ἄνθρωπος καὶ ἐλέφας, καθάπερ εἴρηται πρότερον. Καὶ γὰρ ὁ ἐλέφας ἔχει τοὺς μαστοὺς δύο περὶ τὰς μασχάλας· ἔχει δ' ἡ θήλεια τοὺς μαστοὺς μικροὺς παντελῶς καὶ οὐ κατὰ λόγον τοῦ σώματος, ὥστ' ἐκ τοῦ πλαγίου μὴ πάνυ ὁρᾶν· ἔχουσι δὲ καὶ οἱ ἄρρενες μαστούς, ὥσπερ αἱ θήλειαι, μικροὺς παντελῶς. Ἡ δ' ἄρκτος τέτταρας. Τὰ δὲ δύο μὲν μαστοὺς ἔχει, ἐν τοῖς μηροῖς δ' ἔχει, καὶ τὰς θηλὰς δύο, ὥσπερ πρόβατον· τὰ δὲ τέτταρας θηλάς, ὥσπερ βοῦς. Τὰ δ' οὔτ' ἐν τῷ στήθει ἔχει τοὺς μαστοὺς οὔτ' ἐν τοῖς μηροῖς, ἀλλ' ἐν τῇ γαστρί, οἷον κύων καὶ ὗς, καὶ πολλούς, οὐ πάντας δ' ἴσους. Τὰ μὲν οὖν ἄλλα πλείους ἔχει, ἡ δὲ πάρδαλις τέτταρας ἐν τῇ γαστρί, ἡ δὲ λέαινα δύο ἐν τῇ γαστρί. Ἔχει δὲ καὶ ἡ κάμηλος μαστοὺς δύο καὶ θηλὰς τέτταρας, ὥσπερ ὁ βοῦς. Τῶν δὲ μωνύχων τὰ ἄρρενα οὐκ ἔχουσι μαστούς, πλὴν ὅσα ἐοίκασι τῇ μητρί, ὅπερ συμβαίνει ἐπὶ τῶν ἵππων.

Τὰ δ' αἰδοῖα τῶν μὲν ἀρρένων τὰ μὲν ἔξω ἔχει, οἷον ἄνθρωπος καὶ ἵππος καὶ ἄλλα πολλά, τὰ δ' ἐντός, (500b.) ὥσπερ δελφίς· καὶ τῶν ἔξω δ' ἐχόντων τὰ μὲν εἰς τὸ πρόσθεν, ὥσπερ καὶ τὰ εἰρημένα, καὶ τούτων τὰ μὲν ἀπολελυμένα καὶ τὸ αἰδοῖον καὶ τοὺς ὄρχεις, ὥσπερ ἄνθρωπος, τὰ δὲ πρὸς τῇ γαστρὶ καὶ τοὺς ὄρχεις καὶ τὸ αἰδοῖον, καὶ τὰ μὲν μᾶλλον τὰ δ' ἧττον ἀπολελυμένα· οὐ γὰρ ὡσαύτως ἀπολέλυται κάπρῳ καὶ ἵππῳ τοῦτο τὸ μόριον. Ἔχει δὲ καὶ ὁ ἐλέφας τὸ αἰδοῖον ὅμοιον μὲν ἵππῳ, μικρὸν δὲ καὶ οὐκ ἀνὰ λόγον τοῦ σώματος, τοὺς δ' ὄρχεις οὐκ ἔξω φανερούς, ἀλλ' ἐντὸς περὶ τοὺς νεφρούς· διὸ καὶ ἐν τῇ ὀχείᾳ ἀπαλλάττεται ταχέως. Ἡ δὲ θήλεια τὸ αἰδοῖον ἔχει ἐν τῷ τόπῳ οὗ τὰ οὔθατα τῶν προβάτων ἐστίν· ὅταν δ' ὀργᾷ ὀχεύεσθαι, ἀνασπᾷ ἄνω καὶ ἐκτρέπει πρὸς τὸν ἔξω τόπον, ὥστε ῥᾳδίαν εἶναι τῷ ἄρρενι τὴν ὀχείαν· ἀνέρρωγε δ' ἐπιεικῶς ἐπὶ πολὺ τὸ αἰδοῖον.

Τοῖς μὲν οὖν πλείστοις αὐτῶν τὰ αἰδοῖα τοῦτον ἔχει τὸν τρόπον· ἔνια δ' ὀπισθουρητικά ἐστιν, οἷον λὺγξ καὶ λέων καὶ κάμηλος καὶ δασύπους. Τὰ μὲν οὖν ἄρρενα ὑπεναντίως ἔχει ἀλλήλοις, καθάπερ εἴρηται, τὰ δὲ θήλεα πάντα ὀπισθουρητικά ἐστιν· καὶ γὰρ ὁ θῆλυς ἐλέφας ἔχει τὰ αἰδοῖα ὑπὸ τοῖς μηροῖς, καθάπερ καὶ τἆλλα.

Τῶν δ' αἰδοίων διαφορὰ πολλή ἐστιν. Τὰ μὲν γὰρ ἔχει χονδρῶδες τὸ αἰδοῖον καὶ σαρκῶδες, ὥσπερ ἄνθρωπος· τὸ μὲν οὖν σαρκῶδες οὐκ ἐμφυσᾶται, τὸ δὲ χονδρῶδες ἔχει αὔξησιν. Τὰ δὲ νευρώδη, οἷον καμήλου καὶ ἐλάφου, τὰ δ' ὀστώδη, ὥσπερ ἀλώπεκος καὶ λύκου καὶ ἴκτιδος καὶ γαλῆς· καὶ γὰρ ἡ γαλῆ ὀστοῦν ἔχει τὸ αἰδοῖον.

Πρὸς δὲ τούτοις ὁ μὲν ἄνθρωπος τελειωθεὶς τὰ ἄνω ἔχει ἐλάττω τῶν κάτωθεν, τὰ δ' ἄλλα ζῷα, ὅσα ἔναιμα, τοὐναντίον. Λέγομεν δ' ἄνω τὸ ἀπὸ κεφαλῆς μέχρι τοῦ μορίου ᾗ ἡ τοῦ περιττώματός ἐστιν ἔξοδος, κάτω δὲ τὸ ἀπὸ τούτου λοιπόν. Τοῖς μὲν οὖν ἔχουσι πόδας τὸ ὀπίσθιόν ἐστι σκέλος τὸ κάτωθεν μέρος πρὸς τὸ μέγεθος, τοῖς δὲ μὴ ἔχουσιν οὐραὶ καὶ κέρκοι καὶ τὰ τοιαῦτα.

Τελειούμενα μὲν οὖν τοιαῦτ' ἐστίν, ἐν δὲ τῇ αὐξήσει διαφέρει· ὁ μὲν γὰρ ἄνθρωπος μείζω τὰ ἄνω ἔχει νέος ὢν ἢ τὰ κάτω, αὐξανόμενος δὲ μεταβάλλει (501a.) τοὐναντίον (διὸ καὶ μόνον οὐ τὴν αὐτὴν κίνησιν ποιεῖται τῆς πορείας νέος ὢν καὶ τελειωθείς, ἀλλὰ τὸ πρῶτον παιδίον ὂν ἕρπει τετραποδίζον), τὰ δ' ἀνὰ λόγον ἀποδίδωσι τὴν αὔξησιν, οἷον κύων. Ἔνια δὲ τὸ πρῶτον ἐλάττω τὰ ἄνω, τὰ δὲ κάτω μείζω ἔχει, αὐξανόμενα δὲ τὰ ἄνω γίνεται μείζω, ὥσπερ τὰ λοφοῦρα· τούτων γὰρ οὐδὲν γίνεται μεῖζον ὕστερον τὸ ἀπὸ τῆς ὁπλῆς μέχρι τοῦ ἰσχίου.

Ἔστι δὲ καὶ περὶ τοὺς ὀδόντας πολλὴ διαφορὰ τοῖς ἄλλοις ζῴοις καὶ πρὸς αὑτὰ καὶ πρὸς ἄνθρωπον. Ἔχει μὲν γὰρ πάντα ὀδόντας ὅσα τετράποδα καὶ ἔναιμα καὶ ζῳοτόκα, ἀλλὰ πρῶτον τὰ μέν ἐστιν ἀμφώδοντα, τὰ δ' οὐκ ἀμφώδοντα. Ὅσα μὲν γάρ ἐστι κερατοφόρα, οὐκ ἀμφώδοντα· οὐ γὰρ ἔχει τοὺς προσθίους ὀδόντας ἐπὶ τῆς ἄνω σιαγόνος.

Ἔστι δ' ἔνια οὐκ ἀμφώδοντα καὶ ἀκέρατα, οἷον κάμηλος. Καὶ τὰ μὲν χαυλιόδοντας ἔχει, ὥσπερ οἱ ἄρρενες ὕες, τὰ δ' οὐκ ἔχει. Ἔτι δὲ τὰ μέν ἐστι καρχαρόδοντα αὐτῶν, οἷον λέων καὶ πάρδαλις καὶ κύων, τὰ δ' ἀνεπάλλακτα, οἷον ἵππος καὶ βοῦς· καρχαρόδοντα γάρ ἐστιν ὅσα ἐπαλλάττει τοὺς ὀδόντας τοὺς ὀξεῖς. Ἅμα δὲ χαυλιόδοντα καὶ κέρας οὐδὲν ἔχει ζῷον, οὐδὲ καρχαρόδουν καὶ τούτων θάτερον. Τὰ δὲ πλεῖστα τοὺς προσθίους ἔχει ὀξεῖς, τοὺς δ' ἐντὸς πλατεῖς. Ἡ δὲ φώκη καρχαρόδουν ἐστὶ πᾶσι τοῖς ὀδοῦσιν, ὡς ἐπαλλάττουσα τῷ γένει τῶν ἰχθύων· οἱ γὰρ ἰχθύες πάντες σχεδὸν καρχαρόδοντές εἰσιν.

Διστοίχους δ' ὀδόντας οὐδὲν ἔχει τούτων τῶν γενῶν. Ἔστι δέ τι, εἰ δεῖ πιστεῦσαι Κτησίᾳ· ἐκεῖνος γὰρ τὸ ἐν Ἰνδοῖς θηρίον, ᾧ ὄνομα εἶναι μαρτιχόραν, τοῦτ' ἔχειν ἐπ' ἀμφότερά φησι τριστοίχους τοὺς ὀδόντας· εἶναι δὲ μέγεθος μὲν ἡλίκον λέοντα καὶ δασὺ ὁμοίως, καὶ πόδας ἔχειν ὁμοίους, πρόσωπον δὲ καὶ ὦτα ἀνθρωποειδές, τὸ δ' ὄμμα γλαυκόν, τὸ δὲ χρῶμα κινναβάρινον, τὴν δὲ κέρκον ὁμοίαν τῇ τοῦ σκορπίου τοῦ χερσαίου, ἐν ᾗ κέντρον ἔχειν καὶ τὰς ἀποφυάδας ἀπακοντίζειν, φθέγγεσθαι δ' ὅμοιον φωνῇ ἅμα σύριγγος καὶ σάλπιγγος, ταχὺ δὲ θεῖν οὐχ ἧττον τῶν (501b.) ἐλάφων, καὶ εἶναι ἄγριον καὶ ἀνθρωποφάγον.

Ἄνθρωπος μὲν οὖν βάλλει τοὺς ὀδόντας, βάλλει δὲ καὶ ἄλλα τῶν ζῴων, οἷον ἵππος καὶ ὀρεὺς καὶ ὄνος. Βάλλει δ' ἄνθρωπος τοὺς προσθίους, τοὺς δὲ γομφίους οὐδὲν βάλλει τῶν ζῴων. Ὗς δ' ὅλως οὐδένα βάλλει τῶν ὀδόντων.

Κεφάλαιο 2

Περὶ δὲ τῶν κυνῶν ἀμφισβητεῖται, καὶ οἱ μὲν ὅλως οὐκ οἴονται βάλλειν οὐδένα αὐτούς, οἱ δὲ τοὺς κυνόδοντας μόνον· ὦπται δ’ ὅτι βάλλει καθάπερ καὶ ἄνθρωπος, ἀλλὰ λανθάνει διὰ τὸ μὴ βάλλειν πρότερον πρὶν ὑποφυῶσιν ἐντὸς ἴσοι. Ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν ἀγρίων εἰκὸς συμβαίνειν, ἐπεὶ λέγονταί γε τοὺς κυνόδοντας μόνον βάλλειν. Τοὺς δὲ κύνας διαγινώσκουσι τοὺς νεωτέρους καὶ πρεσβυτέρους ἐκ τῶν ὀδόντων· οἱ μὲν γὰρ νέοι λευκοὺς ἔχουσι καὶ ὀξεῖς τοὺς ὀδόντας, οἱ δὲ πρεσβύτεροι μέλανας καὶ ἀμβλεῖς.

Κεφάλαιο 3

Ἐναντίως δὲ πρὸς τἆλλα ζῷα καὶ ἐπὶ τῶν ἵππων συμβαίνει· τὰ μὲν γὰρ ἄλλα ζῷα πρεσβύτερα γινόμενα μελαντέρους ἔχει τοὺς ὀδόντας, ὁ δ’ ἵππος λευκοτέρους.

Ὁρίζουσι δὲ τούς τε ὀξεῖς καὶ τοὺς πλατεῖς οἱ καλούμενοι κυνόδοντες, ἀμφοτέρων μετέχοντες τῆς μορφῆς· κάτωθεν μὲν γὰρ πλατεῖς, ἄνωθεν δ’ εἰσὶν ὀξεῖς.

Ἔχουσι δὲ πλείους οἱ ἄρρενες τῶν θηλειῶν ὀδόντας καὶ ἐν ἀνθρώποις καὶ ἐπὶ προβάτων καὶ αἰγῶν καὶ ὑῶν· ἐπὶ δὲ τῶν ἄλλων οὐ τεθεώρηταί πω.

Ὅσοι δὲ πλείους ἔχουσι, μακροβιώτεροι ὡς ἐπὶ τὸ πολύ εἰσιν, οἱ δ’ ἐλάττους καὶ ἀραιόδοντες ὡς ἐπὶ τὸ πολὺ βραχυβιώτεροι.

Κεφάλαιο 4

Φύονται δ’ οἱ τελευταῖοι τοῖς ἀνθρώποις γόμφιοι, οὓς καλοῦσι κραντῆρας, περὶ τὰ εἴκοσιν ἔτη καὶ ἀνδράσι καὶ γυναιξίν. Ἤδη δέ τισι γυναιξὶ καὶ ὀγδοήκοντα ἐτῶν οὔσαις ἔφυσαν γόμφιοι ἐν τοῖς ἐσχάτοις, πόνον παρασχόντες ἐν τῇ ἀνατολῇ, καὶ ἀνδράσιν ὡσαύτως· τοῦτο δὲ συμβαίνει ὅσοις ἂν μὴ ἐν τῇ ἡλικίᾳ ἀνατείλωσιν οἱ κραντῆρες.

Κεφάλαιο 5

Ὁ δ’ ἐλέφας ὀδόντας μὲν ἔχει τέτταρας ἐφ’ ἑκάτερα, οἷς κατεργάζεται τὴν τροφήν (λεαίνει δ’ ὥσπερ κρίμνα), χωρὶς δὲ τούτων ἄλλους δύο τοὺς μεγάλους. Ὁ μὲν οὖν ἄρρην τούτους ἔχει μεγάλους τε καὶ ἀνασίμους, ἡ δὲ θήλεια μικροὺς καὶ ἐξ (502a.) ἐναντίας τοῖς ἄρρεσιν· κάτω γὰρ οἱ ὀδόντες βλέπουσιν.

Κεφάλαιο 6

Ἔχει δ’ ὁ ἐλέφας εὐθὺς γενόμενος ὀδόντας, τοὺς μέντοι μεγάλους ἀδήλους τὸ πρῶτον. Γλῶτταν δ’ ἔχει μικράν τε σφόδρα καὶ ἐντός, ὥστε ἔργον ἐστὶν ἰδεῖν.

Κεφάλαιο 7

Ἔχουσι δὲ τὰ ζῷα καὶ τὰ μεγέθη διαφέροντα τοῦ στόματος. Τῶν μὲν γάρ ἐστι τὰ στόματα ἀνερρωγότα, ὥσπερ κυνὸς καὶ λέοντος καὶ πάντων τῶν καρχαροδόντων, τὰ δὲ μικρόστομα, ὥσπερ ἄνθρωπος, τὰ δὲ μεταξύ, οἷον τὸ τῶν ὑῶν γένος.

Ὁ δ’ ἵππος ὁ ποτάμιος ὁ ἐν Αἰγύπτῳ χαίτην μὲν ἔχει ὥσπερ ἵππος, διχαλὸν δ’ ἐστὶν ὥσπερ βοῦς, τὴν δ’ ὄψιν σιμός. Ἔχει δὲ καὶ ἀστράγαλον ὥσπερ τὰ διχαλά, καὶ χαυλιόδοντας ὑποφαινομένους, κέρκον δ’ ὑός, φωνὴν δ’ ἵππου· μέγεθος δ’ ἐστὶν ἡλίκον ὄνος. Τοῦ δὲ δέρματος τὸ πάχος ὥστε δόρατα ποιεῖσθαι ἐξ αὐτοῦ. Τὰ δ’ ἐντὸς ἔχει ὅμοια ἵππῳ καὶ ὄνῳ.

Κεφάλαιο 8

Ἔνια δὲ τῶν ζῴων ἐπαμφοτερίζει τὴν φύσιν τῷ τ’ ἀνθρώπῳ καὶ τοῖς τετράποσιν, οἷον πίθηκοι καὶ κῆβοι καὶ κυνοκέφαλοι. Ἔστι δ’ ὁ μὲν κῆβος πίθηκος ἔχων οὐράν. Καὶ οἱ κυνοκέφαλοι δὲ τὴν αὐτὴν ἔχουσι μορφὴν τοῖς πιθήκοις, πλὴν μείζονές τ’ εἰσὶ καὶ ἰσχυρότεροι καὶ τὰ πρόσωπα ἔχοντες κυνοειδέστερα, ἔτι δ’ ἀγριώτερά τε τὰ ἤθη καὶ τοὺς ὀδόντας ἔχουσι κυνοειδεστέρους καὶ ἰσχυροτέρους. Οἱ δὲ πίθηκοι δασεῖς μέν εἰσι τὰ πρανῆ ὡς ὄντες τετράποδες, καὶ τὰ ὕπτια δ’ ὡσαύτως ὡς ὄντες ἀνθρωποειδεῖς (τοῦτο γὰρ ἐπὶ τῶν ἀνθρώπων ἐναντίως ἔχει καὶ ἐπὶ τῶν τετραπόδων, καθάπερ ἐλέχθη πρότερον)· πλὴν ἥ τε θρὶξ παχεῖα, καὶ δασεῖς ἐπ’ ἀμφότερα σφόδρα εἰσὶν οἱ πίθηκοι. Τὸ δὲ πρόσωπον ἔχει πολλὰς ὁμοιότητας τῷ τοῦ ἀνθρώπου· καὶ γὰρ μυκτῆρας καὶ ὦτα παραπλήσια ἔχει, καὶ ὀδόντας ὥσπερ ὁ ἄνθρωπος, καὶ τοὺς προσθίους καὶ τοὺς γομφίους.

Ἔτι δὲ βλεφαρίδας τῶν ἄλλων τετραπόδων ἐπὶ θάτερα οὐκ ἐχόντων οὗτος ἔχει μὲν λεπτὰς δὲ σφόδρα, καὶ μᾶλλον τὰς κάτω, καὶ μικρὰς πάμπαν· τὰ γὰρ ἄλλα τετράποδα ταύτας οὐκ ἔχει.

Ἔτι δ’ ἐν τῷ στήθει δύο θηλὰς μαστῶν μικρῶν. Ἔχει δὲ καὶ βραχίονας ὥσπερ ἄνθρωπος, πλὴν (502b.) δασεῖς· καὶ κάμπτει καὶ τούτους καὶ τὰ σκέλη ὥσπερ ἄνθρωπος, τὰς περιφερείας πρὸς ἀλλήλας ἀμφοτέρων τῶν κώλων. Πρὸς δὲ τούτοις χεῖρας καὶ δακτύλους καὶ ὄνυχας ὁμοίους ἀνθρώπῳ, πλὴν πάντα ταῦτα ἐπὶ τὸ θηριωδέστερον.

Ἰδίους δὲ τοὺς πόδας· εἰσὶ γὰρ οἷον χεῖρες μεγάλαι, καὶ οἱ δάκτυλοι ὥσπερ οἱ τῶν χειρῶν, ὁ μέσος μακρότατος, καὶ τὸ κάτω τοῦ ποδὸς χειρὶ ὅμοιον, πλὴν ἐπιμηκέστερον τοῦ τῆς χειρός, ἐπὶ τὰ ἔσχατα τεῖνον, καθάπερ θέναρ· τοῦτο δ’ ἐπ’ ἄκρου σκληρότερον, κακῶς καὶ ἀμυδρῶς μιμούμενον πτέρνην. Κέχρηται δὲ τοῖς ποσὶν ἐπ’ ἄμφω, καὶ ὡς χερσὶ καὶ ὡς ποσί, καὶ συγκάμπτει ὥσπερ χεῖρας. Ἔχει δὲ τὸν ἀγκῶνα καὶ τὸν μηρὸν βραχεῖς ὡς πρὸς τὸν βραχίονα καὶ τὴν κνήμην. Ὀμφαλὸν δ’ ἐξέχοντα μὲν οὐκ ἔχει, σκληρὸν δέ τι κατὰ τὸν τόπον τοῦ ὀμφαλοῦ. Τὰ δ’ ἄνω τοῦ κάτω πολὺ μείζονα ἔχει, ὥσπερ τὰ τετράποδα· σχεδὸν γὰρ ὡς πέντε πρὸς τρία ἐστίν. Καὶ διά τε ταῦτα καὶ διὰ τὸ τοὺς πόδας ἔχειν ὁμοίους χερσὶ καὶ ὡσπερανεὶ συγκειμένους ἐκ χειρὸς καὶ ποδός (ἐκ μὲν ποδὸς κατὰ τὸ τῆς πτέρνης ἔσχατον, ἐκ δὲ χειρὸς τἆλλα μέρη· καὶ γὰρ οἱ δάκτυλοι ἔχουσι τὸ καλούμενον θέναρ), διατελεῖ δὲ τὸν πλείω χρόνον τετράπουν ὂν μᾶλλον ἢ ὀρθόν· καὶ οὔτ’ ἰσχία ἔχει ὡς τετράπουν ὂν οὔτε κέρκον ὡς δίπουν, πλὴν μικρὰν τὸ ὅλον, ὅσον σημείου χάριν. Ἔχει δὲ καὶ τὸ αἰδοῖον ἡ θήλεια ὅμοιον γυναικί, ὁ δ’ ἄρρην κυνωδέστερον ἢ ὁ ἄνθρωπος.

Κεφάλαιο 9

Οἱ δὲ κῆβοι, καθάπερ εἴρηται πρότερον, ἔχουσι κέρκον. Τὰ δ’ ἐντὸς διαιρεθέντα ὅμοια ἔχουσιν ἀνθρώπῳ πάντα τὰ τοιαῦτα.

Τὰ μὲν οὖν τῶν εἰς τὸ ἐκτὸς ζῳοτοκούντων μόρια τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 10

Τὰ δὲ τετράποδα μὲν ᾠοτόκα δὲ καὶ ἔναιμα (οὐδὲν δὲ ᾠοτοκεῖ χερσαῖον καὶ ἔναιμον μὴ τετράπουν ὂν ἢ ἄπουν) κεφαλὴν μὲν ἔχει καὶ αὐχένα καὶ νῶτον καὶ τὰ πρανῆ καὶ τὰ ὕπτια τοῦ σώματος, ἔτι δὲ σκέλη πρόσθια καὶ ὀπίσθια καὶ τὸ ἀνάλογον τῷ στήθει, ὥσπερ τὰ ζῳοτόκα τῶν τετραπόδων, καὶ κέρκον τὰ μὲν πλεῖστα μείζω, ὀλίγα δ' ἐλάττω. Πάντα δὲ πολυδάκτυλα καὶ πολυσχιδῆ ἐστι τὰ τοιαῦτα. Πρὸς δὲ τούτοις τὰ αἰσθητήρια καὶ γλῶτταν (503a.) πάντα, πλὴν ὁ ἐν Αἰγύπτῳ κροκόδειλος. Οὗτος δὲ παραπλησίως τῶν ἰχθύων τισίν· ὅλως μὲν γὰρ οἱ ἰχθύες ἀκανθώδη καὶ οὐκ ἀπολελυμένην ἔχουσι τὴν γλῶτταν, ἔνιοι δὲ πάμπαν λεῖον καὶ ἀδιάρθρωτον τὸν τόπον μὴ ἐγκλίναντι σφόδρα τὸ χεῖλος.

Ὦτα δ' οὐκ ἔχουσιν ἀλλὰ τὸν πόρον τῆς ἀκοῆς μόνον πάντα τὰ τοιαῦτα· οὐδὲ μαστούς, οὐδ' αἰδοῖον, οὐδ' ὄρχεις ἔξω φανεροὺς ἀλλ' ἐντός, οὐδὲ τρίχας, ἀλλὰ πάντ' ἐστὶ φολιδωτά. Ἔτι δὲ καρχαρόδοντα πάντα.

Οἱ δὲ κροκόδειλοι οἱ ποτάμιοι ἔχουσιν ὀφθαλμοὺς μὲν ὑός, ὀδόντας δὲ μεγάλους καὶ χαυλιόδοντας καὶ ὄνυχας ἰσχυροὺς καὶ δέρμα ἄρρηκτον φολιδωτόν· βλέπουσι δ' ἐν μὲν τῷ ὕδατι φαύλως, ἔξω δ' ὀξύτατον. Τὴν μὲν οὖν ἡμέραν ἐν τῇ γῇ τὸ πλεῖστον διατρίβει, τὴν δὲ νύκτα ἐν τῷ ὕδατι· ἀλεεινότερον γάρ ἐστι τῆς αἰθρίας.

Κεφάλαιο 11

Ὁ δὲ χαμαιλέων ὅλον μὲν τοῦ σώματος ἔχει τὸ σχῆμα σαυροειδές, τὰ δὲ πλευρὰ κάτω καθήκει συνάπτοντα πρὸς τὸ ὑπογάστριον, καθάπερ τοῖς ἰχθύσι, καὶ ἡ ῥάχις ἐπανέστηκεν ὁμοίως τῇ τῶν ἰχθύων. Τὸ δὲ πρόσωπον ὁμοιότατον τῷ τοῦ χοιροπιθήκου. Κέρκον δ’ ἔχει μακρὰν σφόδρα, εἰς λεπτὸν καθήκουσαν καὶ συνελιττομένην ἐπὶ πολύ, καθάπερ ἱμάντα. Μετεωρότερος δ’ ἐστὶ τῇ ἀπὸ τῆς γῆς ἀποστάσει τῶν σαύρων, τὰς δὲ καμπὰς τῶν σκελῶν καθάπερ οἱ σαῦροι ἔχει. Τῶν δὲ ποδῶν ἕκαστος αὐτοῦ διχῇ διῄρηται εἰς μέρη θέσιν ὁμοίαν πρὸς αὑτὰ ἔχοντα οἵανπερ ὁ μέγας ἡμῶν δάκτυλος πρὸς τὸ λοιπὸν τῆς χειρὸς ἀντίθεσιν ἔχει. Ἐπὶ βραχὺ δὲ καὶ τούτων τῶν μερῶν ἕκαστον διῄρηται εἴς τινας δακτύλους, τῶν μὲν ἔμπροσθεν ποδῶν τὰ μὲν πρὸς αὑτὸν τρίχα, τὰ δ’ ἐκτὸς δίχα, τῶν δ’ ὀπισθίων τὰ μὲν πρὸς αὑτὸν δίχα, τὰ δ’ ἐκτὸς τρίχα. Ἔχει δὲ καὶ ὀνύχια ἐπὶ τούτων ὅμοια τοῖς τῶν γαμψωνύχων.

Τραχὺ δ’ ἔχει ὅλον τὸ σῶμα, καθάπερ ὁ κροκόδειλος. Ὀφθαλμοὺς δ’ ἔχει ἐν κοίλῳ τε κειμένους καὶ μεγάλους σφόδρα καὶ στρογγύλους καὶ δέρματι ὁμοίῳ τῷ τοῦ λοιποῦ σώματος περιεχομένους. Κατὰ μέσους δ’ αὐτοὺς διαλέλειπται μικρὰ τῇ ὄψει χώρα, δι’ ἧς ὁρᾷ· οὐδέποτε δὲ τῷ δέρματι ἐπικαλύπτει τοῦτο. Στρέφει δὲ (503b.) τὸν ὀφθαλμὸν κύκλῳ τὴν ὄψιν ἐπὶ πάντας τοὺς τόπους μεταβάλλει, καὶ οὕτως ὁρᾷ ὃ βούλεται.

Τῆς δὲ χροιᾶς ἡ μεταβολὴ ἐμφυσωμένῳ αὐτῷ γίνεται· ἔχει δὲ καὶ μέλαιναν ταύτην, οὐ πόρρω τῆς τῶν κροκοδείλων, καὶ ὠχρὰν καθάπερ οἱ σαῦροι, μέλανι ὥσπερ τὰ παρδάλια διαπεποικιλμένην. Γίνεται δὲ καθ’ ἅπαν τὸ σῶμα αὐτοῦ ἡ τοιαύτη μεταβολή· καὶ γὰρ οἱ ὀφθαλμοὶ συμμεταβάλλουσιν ὁμοίως τῷ λοιπῷ σώματι καὶ ἡ κέρκος. Ἡ δὲ κίνησις αὐτοῦ νωθὴς ἰσχυρῶς ἐστι, καθάπερ ἡ τῶν χελωνῶν. Καὶ ἀποθνήσκων τε ὠχρὸς γίνεται, καὶ τελευτήσαντος αὐτοῦ ἡ χροιὰ τοιαύτη ἐστίν.

Τὰ δὲ περὶ τὸν στόμαχον καὶ τὴν ἀρτηρίαν ὁμοίως ἔχει τοῖς σαύροις κείμενα. Σάρκα δ’ οὐδαμοῦ ἔχει πλὴν πρὸς τῇ κεφαλῇ καὶ ταῖς σιαγόσιν ὀλίγα σαρκία, καὶ περὶ ἄκραν τὴν τῆς κέρκου πρόσφυσιν. Καὶ αἷμα δ’ ἔχει περί τε τὴν καρδίαν μόνον καὶ τὰ ὄμματα καὶ τὸν ἄνω τῆς καρδίας τόπον, καὶ ὅσα ἀπὸ τούτων φλέβια ἀποτείνει· ἔστι δὲ καὶ ἐν τούτοις βραχὺ παντελῶς. Κεῖται δὲ καὶ ὁ ἐγκέφαλος ἀνώτερον μὲν ὀλίγῳ τῶν ὀφθαλμῶν, συνεχὴς δὲ τούτοις.

Περιαιρεθέντος δὲ τοῦ ἔξωθεν δέρματος τῶν ὀφθαλμῶν περιέχει τι διαλάμπον διὰ τούτων, οἷον κρίκος χαλκοῦς λεπτός.

Καθ’ ἅπαν δ’ αὐτοῦ τὸ σῶμα σχεδὸν διατείνουσιν ὑμένες πολλοὶ καὶ ἰσχυροὶ καὶ πολὺ ὑπερβάλλοντες τῶν περὶ τὰ λοιπὰ ὑπαρχόντων. Ἐνεργεῖ δὲ καὶ τῷ πνεύματι ἀνατετμημένος ὅλος ἐπὶ πολὺν χρόνον, βραχείας ἰσχυρῶς ἔτι κινήσεως ἐν αὐτῷ περὶ τὴν καρδίαν οὔσης, καὶ συνάγει διαφερόντως μὲν τὰ περὶ τὰ πλευρά, οὐ μὴν ἀλλὰ καὶ τὰ λοιπὰ μέρη τοῦ σώματος. Σπλῆνα δ’ οὐδαμοῦ ἔχει φανερόν. Φωλεύει δὲ καθάπερ οἱ σαῦροι.

Κεφάλαιο 12

Ὁμοίως δ’ ἔνια μόρια καὶ οἱ ὄρνιθες τοῖς εἰρημένοις ἔχουσι ζῴοις· καὶ γὰρ κεφαλὴν καὶ αὐχένα πάντ’ ἔχει καὶ νῶτον καὶ τὰ ὕπτια τοῦ σώματος καὶ τὸ ἀνάλογον τῷ στήθει· σκέλη δὲ δύο καθάπερ ἄνθρωπος μάλιστα τῶν ζῴων· πλὴν κάμπτει εἰς τοὔπισθεν ὁμοίως τοῖς τετράποσιν, ὥσπερ εἴρηται πρότερον. Χεῖρας δ’ οὐδὲ πόδας προσθίους ἔχει, ἀλλὰ πτέρυγας ἴδιον πρὸς τὰ ἄλλα ζῷα. Ἔτι δὲ τὸ ἰσχίον ὅμοιον (504a.) μηρῷ μακρὸν καὶ προσπεφυκὸς μέχρι ὑπὸ μέσην τὴν γαστέρα, ὥστε δοκεῖν διαιρούμενον μηρὸν εἶναι, τὸν δὲ μηρὸν μεταξὺ τῆς κνήμης, ἕτερόν τι μέρος. Μεγίστους δὲ τοὺς μηροὺς ἔχει τὰ γαμψώνυχα τῶν ὀρνίθων, καὶ τὸ στῆθος ἰσχυρότερον τῶν ἄλλων.

Πολυώνυχοι δ’ εἰσὶ πάντες οἱ ὄρνιθες, ἔτι δὲ πολυσχιδεῖς τρόπον τινὰ πάντες· τῶν μὲν γὰρ πλείστων διῄρηνται οἱ δάκτυλοι, τὰ δὲ πλωτὰ στεγανόποδά ἐστι, διηρθρωμένους δ’ ἔχει καὶ χωριστοὺς <τοὺς> δακτύλους. Εἰσὶ δ’ ὅσοι αὐτῶν μετεωρίζονται πάντες τετραδάκτυλοι· τρεῖς μὲν γὰρ εἰς τὸ ἔμπροσθεν ἕνα δ’ εἰς τὸ ὄπισθεν κείμενον ἔχουσιν οἱ πλεῖστοι ἀντὶ πτέρνης· ὀλίγοι δέ τινες δύο μὲν ἔμπροσθεν δύο δ’ ὄπισθεν, οἷον ἡ καλουμένη ἴυγξ. Αὕτη δ’ ἐστὶ μικρῷ μὲν μείζων σπίζης, τὸ δ’ εἶδος ποικίλον, ἴδια δ’ ἔχει τά τε περὶ τοὺς δακτύλους καὶ τὴν γλῶτταν ὁμοίαν τοῖς ὄφεσιν· ἔχει γὰρ ἐπὶ μῆκος ἔκτασιν καὶ ἐπὶ τέτταρας δακτύλους, καὶ πάλιν συστέλλεται εἰς ἑαυτήν. Ἔτι δὲ περιστρέφει τὸν τράχηλον εἰς τοὐπίσω τοῦ λοιποῦ σώματος ἠρεμοῦντος, καθάπερ οἱ ὄφεις. Ὄνυχας δ’ ἔχει μεγάλους μὲν ὁμοίως μέντοι πεφυκότας τοῖς τῶν κολοιῶν· τῇ δὲ φωνῇ τρίζει.

Στόμα δ’ οἱ ὄρνιθες ἔχουσι μὲν ἴδιον δέ· οὔτε γὰρ χείλη οὔτ’ ὀδόντας ἔχουσιν, ἀλλὰ ῥύγχος, οὔτ’ ὦτα οὔτε μυκτῆρας, ἀλλὰ τοὺς πόρους τούτων τῶν αἰσθήσεων, τῶν μὲν μυκτήρων ἐν τῷ ῥύγχει, τῆς δ’ ἀκοῆς ἐν τῇ κεφαλῇ. Ὀφθαλμοὺς δὲ πάντες καθάπερ καὶ τἆλλα ζῷα δύο, ἄνευ βλεφαρίδων. Μύουσι δ’ οἱ βαρεῖς τῷ κάτω βλεφάρῳ, σκαρδαμύττουσι δ’ ἐκ τοῦ κανθοῦ δέρματι ἐπιόντι πάντες, οἱ δὲ γλαυκώδεις τῶν ὀρνίθων καὶ τῷ ἄνω βλεφάρῳ. Τὸ δ’ αὐτὸ τοῦτο ποιοῦσι καὶ τὰ φολιδωτά, οἷον οἱ σαῦροι καὶ τἆλλα τὰ ὁμοιογενῆ τούτοις τῶν ζῴων· μύουσι γὰρ τῇ κάτω βλεφαρίδι πάντες, οὐ μέντοι σκαρδαμύττουσί γε ὥσπερ οἱ ὄρνιθες.

Ἔτι δ’ οὔτε φολίδας οὔτε τρίχας ἔχουσιν, ἀλλὰ πτερά· τὰ δὲ πτερὰ ἔχει καυλὸν ἅπαντα. Καὶ οὐρὰν μὲν οὐκ ἔχουσιν, ὀρροπύγιον δέ, οἱ μὲν

μακροσκελεῖς καὶ στεγανόποδες βραχύ, οἱ δ’ ἐναντίοι μέγα. Καὶ οὗτοι μὲν πρὸς τῇ γαστρὶ τοὺς πόδας ἔχοντες πέτονται, οἱ δὲ μικρουρροπύγιοι ἐκτεταμένους.

Καὶ γλῶτταν ἅπαντες, ταύτην δ’ ἀνομοίαν· οἱ (504b.) μὲν γὰρ μακρὰν οἱ δὲ βραχεῖαν. Μάλιστα δὲ τῶν ζῴων μετὰ τὸν ἄνθρωπον γράμματα φθέγγεται ἔνια τῶν ὀρνίθων γένη· τοιαῦτα δ’ ἐστὶ τὰ πλατύγλωττα αὐτῶν μάλιστα.

Τὴν ἀλλὰ συνάγει καὶ διοίγει τὸν πόρον ὥστε μηδὲν κατιέναι τῶν ἐχόντων βάρος ἐπὶ τὸν πλεύμονα.

Γένη δ’ ἔνια τῶν ὀρνίθων ἔχει καὶ πλῆκτρα· γαμψώνυχον δ’ ἅμα καὶ πλῆκτρον ἔχον οὐδέν. Ἔστι δὲ τὰ μὲν γαμψώνυχα τῶν πτητικῶν, τὰ δὲ πληκτροφόρα τῶν βαρέων.

Ἔτι δ’ ἔνια τῶν ὀρνέων λόφον ἔχουσι, τὰ μὲν αὐτῶν τῶν πτερῶν ἐπανεστηκότα, ὁ δ’ ἀλεκτρυὼν μόνος ἴδιον· οὔτε γὰρ σάρξ ἐστιν οὔτε πόρρω σαρκὸς τὴν φύσιν.

Κεφάλαιο 13

Τῶν δ’ ἐνύδρων ζῴων τὸ τῶν ἰχθύων γένος ἓν ἀπὸ τῶν ἄλλων ἀφώρισται, πολλὰς περιέχον ἰδέας. Κεφαλὴν μὲν γὰρ ἔχει καὶ τὰ πρανῆ καὶ τὰ ὕπτια, ἐν ᾧ τόπῳ ἡ γαστὴρ καὶ τὰ σπλάγχνα· καὶ ὀπίσθιον οὐραῖον συνεχὲς ἔχει καὶ ἄσχιστον· τοῦτο δ’ οὐ πᾶσιν ὅμοιον. Αὐχένα δ’ οὐδεὶς ἔχει ἰχθύς, οὐδὲ κῶλον οὐδέν, οὐδ’ ὄρχεις ὅλως, οὔτ’ ἐντὸς οὔτ’ ἐκτός, οὐδὲ μαστούς. Τοῦτο μὲν οὖν ὅλως οὐδ’ ἄλλο οὐδὲν τῶν μὴ ζῳοτοκούντων, οὐδὲ τὰ ζῳοτοκοῦντα πάντα, ἀλλ’ ὅσα εὐθὺς ἐν αὑτοῖς ζῳοτοκεῖ καὶ μὴ ᾠοτοκεῖ πρῶτον. Καὶ γὰρ ὁ δελφὶς ζῳοτοκεῖ, διὸ ἔχει μαστοὺς δύο, οὐκ ἄνω δ’ ἀλλὰ πλησίον τῶν ἄρθρων. Ἔχει δ’ οὐχ ὥσπερ τὰ τετράποδα ἐπιφανεῖς θηλάς, ἀλλ’ οἷον ῥύακας δύο, ἑκατέρωθεν ἐκ τῶν πλαγίων ἕνα, ἐξ ὧν τὸ γάλα ῥεῖ· καὶ θηλάζεται ὑπὸ τῶν τέκνων παρακολουθούντων· καὶ τοῦτο ὦπται ἤδη ὑπό τινων φανερῶς.

Οἱ δ’ ἰχθύες, ὥσπερ εἴρηται, οὔτε μαστοὺς ἔχουσιν οὔτ’ αἰδοίων πόρον ἐκτὸς οὐδένα φανερόν. Ἴδιον δ’ ἔχουσι τό τε τῶν βραγχίων, ᾗ τὸ ὕδωρ ἀφιᾶσι δεξάμενοι κατὰ τὸ στόμα, καὶ τὰ πτερύγια, οἱ μὲν πλεῖστοι τέτταρα, οἱ δὲ προμήκεις δύο, οἷον ἔγχελυς, δύο ὄντα πρὸς τὰ βράγχια. Ὁμοίως δὲ καὶ κεστρεῖς, οἷον ἐν Σιφαῖς οἱ ἐν τῇ λίμνῃ, δύο, καὶ ἡ καλουμένη ταινία ὡσαύτως. Ἔνια δὲ τῶν προμήκων οὐδὲ πτερύγια ἔχει, οἷον σμύραινα, οὐδὲ τὰ βράγχια διηρθρωμένα ὁμοίως τοῖς ἄλλοις ἰχθύσιν.

Αὐτῶν δὲ τῶν ἐχόντων βράγχια τὰ μὲν (505a.) ἔχει ἐπικάλυμμα τοῖς βραγχίοις, τὰ δὲ σελάχη πάντα ἀκάλυπτα. Καὶ τὰ μὲν ἔχοντα καλύμματα πάντα ἐκ πλαγίου ἔχει τὰ βράγχια, τῶν δὲ σελαχῶν τὰ μὲν πλατέα κάτω ἐν τοῖς ὑπτίοις, οἷον νάρκη καὶ βάτος, τὰ δὲ προμήκη ἐν τοῖς πλαγίοις, οἷον πάντα τὰ γαλεώδη. Ὁ δὲ βάτραχος ἐκ πλαγίου μὲν ἔχει, καλυπτόμενα δ’ οὐκ ἀκανθώδει καλύμματι ὥσπερ οἱ μὴ σελαχώδεις, ἀλλὰ δερματώδει.

Ἔτι δὲ τῶν ἐχόντων βράγχια τῶν μὲν ἁπλᾶ ἐστι τὰ βράγχια, τῶν δὲ διπλᾶ· τὸ δ’ ἔσχατον πρὸς τὸ σῶμα πάντων ἁπλοῦν. Καὶ πάλιν τὰ μὲν ὀλίγα βράγχια ἔχει, τὰ δὲ πλῆθος βραγχίων· ἴσα δ’ ἐφ’ ἑκάτερα πάντες. Ἔχει δ’ ὁ ἐλάχιστα ἔχων ἓν ἐφ’ ἑκάτερα βράγχιον, διπλοῦν δὲ τοῦτο, οἷον κάπρος· οἱ δὲ δύο ἐφ’ ἑκάτερα, τὸ μὲν ἁπλοῦν τὸ δὲ διπλοῦν, οἷον γόγγρος καὶ σκάρος· οἱ δὲ τέτταρα ἐφ’ ἑκάτερα ἁπλᾶ, οἷον ἔλλοψ, συναγρίς, σμύραινα, ἔγχελυς· οἱ δὲ τέτταρα μὲν δίστοιχα δὲ πλὴν τοῦ ἐσχάτου, οἷον κίχλη καὶ πέρκη καὶ γλάνις καὶ κυπρῖνος. Ἔχουσι δὲ καὶ οἱ γαλεώδεις διπλᾶ πάντες, καὶ πέντ’ ἐφ’ ἑκάτερα· ὁ δὲ ξιφίας ὀκτὼ διπλᾶ. Περὶ μὲν οὖν πλήθους βραγχίων ἐν τοῖς ἰχθύσι τοῦτον ἔχει τὸν τρόπον.

Ἔτι δὲ πρὸς τἆλλα ζῷα οἱ ἰχθύες διαφέρουσι πρὸς τῇ διαφορᾷ τῇ περὶ τὰ βράγχια· οὔτε γὰρ ὥσπερ τῶν πεζῶν ὅσα ζῳοτόκα ἔχει τρίχας, οὔθ’ ὥσπερ ἔνια τῶν ᾠοτοκούντων τετραπόδων φολίδας, οὔθ’ ὡς τὸ τῶν ὀρνέων γένος πτερωτόν, ἀλλ’ οἱ μὲν πλεῖστοι αὐτῶν λεπιδωτοί εἰσιν, ὀλίγοι δέ τινες τραχεῖς, ἐλάχιστον δ’ ἐστὶ πλῆθος αὐτῶν τὸ λεῖον. Τῶν μὲν οὖν σελαχῶν τὰ μὲν τραχέα ἐστὶ τὰ δὲ λεῖα, γόγγρος δὲ καὶ ἔγχελυς καὶ θύννος τῶν λείων.

Καρχαρόδοντες δὲ πάντες οἱ ἰχθύες ἔξω τοῦ σκάρου· καὶ πάντες ἔχουσιν ὀξεῖς τοὺς ὀδόντας καὶ πολυστοίχους, καὶ ἔνιοι ἐν τῇ γλώττῃ. Καὶ γλῶτταν σκληρὰν καὶ ἀκανθώδη ἔχουσι, καὶ προσπεφυκυῖαν οὕτως ὥστ’ ἐνίοτε μὴ δοκεῖν ἔχειν.

Τὸ δὲ στόμα οἱ μὲν ἀνερρωγός, ὥσπερ ἔνια τῶν ζῳοτοκούντων καὶ τετραπόδων. Τῶν δ’ αἰσθητηρίων τῶν μὲν ἄλλων οὐδὲν ἔχουσι φανερὸν οὔτ’ αὐτὸ οὔτε τοὺς πόρους, οὔτ’ ἀκοῆς οὔτ’ ὀσφρήσεως· ὀφθαλμοὺς δὲ πάντες ἔχουσιν ἄνευ βλεφάρων, οὐ (505b.) σκληρόφθαλμοι ὄντες.

Ἔναιμον μὲν οὖν ἐστιν ἅπαν τὸ τῶν ἰχθύων γένος, εἰσὶ δ’ αὐτῶν οἱ μὲν ᾠοτόκοι οἱ δὲ ζῳοτόκοι, οἱ μὲν λεπιδωτοὶ πάντες ᾠοτόκοι, τὰ δὲ σελάχη πάντα ζῳοτόκα πλὴν βατράχου.

Κεφάλαιο 14

Λοιπὸν δὲ τῶν ἐναίμων ζῴων τὸ τῶν ὄφεων γένος. Ἔστι δὲ κοινὸν ἀμφοῖν· τὸ μὲν γὰρ πλεῖστον αὐτῶν χερσαῖόν ἐστιν, ὀλίγον δὲ τὸ τῶν ἐνύδρων ἐν τοῖς ποτίμοις ὕδασι διατελεῖ.

Εἰσὶ δὲ καὶ θαλάττιοι ὄφεις, παραπλήσιοι τὴν μορφὴν τοῖς χερσαίοις τἆλλα· πλὴν τὴν κεφαλὴν ἔχουσι γογγροειδεστέραν. Γένη δὲ πολλὰ τῶν θαλαττίων ὄφεών ἐστι, καὶ χρόαν ἔχουσι παντοδαπήν· οὐ γίνονται δ’ οὗτοι ἐν τοῖς σφόδρα βαθέσιν. Ἄποδες δ’ εἰσὶν οἱ ὄφεις ὥσπερ τὸ τῶν ἰχθύων γένος.

Εἰσὶ δὲ καὶ σκολόπενδραι θαλάττιαι, παραπλήσιαι τὸ εἶδος ταῖς χερσαίαις, τὸ δὲ μέγεθος μικρῷ ἐλάττους· γίνονται δὲ περὶ τοὺς πετρώδεις τόπους. Τὴν δὲ χροιάν εἰσιν ἐρυθρότεραι καὶ πολύποδες μᾶλλον καὶ λεπτοσκελέστεραι τῶν χερσαίων. Οὐ γίνονται δ’ οὐδ’ αὗται, ὥσπερ οὐδ’ οἱ ὄφεις, ἐν τοῖς βαθέσι σφόδρα.

Ἔστι δ’ ἰχθύδιόν τι τῶν πετραίων, ὃ καλοῦσί τινες ἐχενηΐδα, καὶ χρῶνταί τινες αὐτῷ πρὸς δίκας καὶ φίλτρα· ἔστι δ’ ἄβρωτον· τοῦτο δ’ ἔνιοί φασιν ἔχειν πόδας οὐκ ἔχον, ἀλλὰ φαίνεται διὰ τὸ τὰς πτέρυγας ὁμοίας ἔχειν ποσίν.

Τὰ μὲν οὖν ἔξω μόρια, καὶ πόσα καὶ ποῖα τῶν ἐναίμων ζῴων, καὶ τίνας ἔχει πρὸς ἄλληλα διαφοράς, εἴρηται.

Κεφάλαιο 15

Τὰ δ’ ἐντὸς πῶς ἔχει, λεκτέον ἐν τοῖς ἐναίμοις ζῴοις πρῶτον· τούτῳ γὰρ διαφέρει τὰ μέγιστα γένη πρὸς τὰ λοιπὰ τῶν ἄλλων ζῴων, τῷ τὰ μὲν ἔναιμα τὰ δ’ ἄναιμα εἶναι.

Ἔστι δὲ ταῦτα ἄνθρωπός τε καὶ τὰ ζῳοτόκα τῶν τετραπόδων, ἔτι δὲ καὶ τὰ ᾠοτόκα τῶν τετραπόδων καὶ ὄρνις καὶ ἰχθὺς καὶ κῆτος, καὶ εἴ τι ἄλλο ἀνώνυμόν ἐστι διὰ τὸ μὴ εἶναι γένος ἀλλ’ ἁπλοῦν τὸ εἶδος ἐπὶ τῶν καθ’ ἕκαστον, οἷον ὄφις καὶ κροκόδειλος.

Ὅσα μὲν οὖν ἐστι τετράποδα καὶ ζῳοτόκα, στόμαχον μὲν καὶ ἀρτηρίαν πάντ’ ἔχει, καὶ κείμενα τὸν αὐτὸν τρόπον ὥσπερ ἐν τοῖς ἀνθρώποις· ὁμοίως δὲ καὶ ὅσα ᾠοτοκεῖ τῶν τετραπόδων, καὶ ἐν τοῖς ὄρνισιν· ἀλλὰ τοῖς (506a.) εἴδεσι τῶν μορίων τούτων διαφέρουσιν. Ὅλως δὲ πάντα ὅσα τὸν ἀέρα δεχόμενα ἀναπνεῖ καὶ ἐκπνεῖ, πάντ’ ἔχει πλεύμονα καὶ ἀρτηρίαν καὶ στόμαχον, καὶ τὴν θέσιν τοῦ στομάχου καὶ τῆς ἀρτηρίας ὁμοίως, ἀλλ’ οὐχ ὅμοια, τὸν δὲ πλεύμονα οὔθ’ ὅμοιον οὔτε τῇ θέσει ὁμοίως ἔχοντα.

Ἔτι δὲ καρδίαν ἅπαντ’ ἔχει ὅσα αἷμα ἔχει, καὶ τὸ διάζωμα, ὃ καλοῦνται φρένες· ἀλλ’ ἐν τοῖς μικροῖς διὰ λεπτότητα καὶ σμικρότητα οὐ φαίνεται ὁμοίως, πλὴν ἐν τῇ καρδίᾳ. Ἴδιον δ’ ἐστὶν ἐπὶ τῶν βοῶν· ἔστι γάρ τι γένος βοῶν, ἀλλ’ οὐ πάντες, ὃ ἔχει ἐν τῇ καρδίᾳ ὀστοῦν. Ἔχει δὲ καὶ ἡ τῶν ἵππων καρδία ὀστοῦν.

Πλεύμονα δ’ οὐ πάντα, οἷον ἰχθὺς οὐκ ἔχει, οὐδ’ εἴ τι ἄλλο τῶν ζῴων ἔχει βράγχια. Καὶ ἧπαρ ἅπαντ’ ἔχει ὅσαπερ αἷμα. Σπλῆνα δὲ τὰ πλεῖστα ἔχει ὅσαπερ καὶ αἷμα. Τὰ δὲ πολλὰ τῶν μὴ ζῳοτόκων ἀλλ’ ᾠοτόκων μικρὸν ἔχει τὸν σπλῆνα οὕτως ὥστε λανθάνειν ὀλίγου τὴν αἴσθησιν, ἔν τε τοῖς ὄρνισι τοῖς πλείστοις, οἷον ἐν περιστερᾷ καὶ ἰκτίνῳ καὶ ἱέρακι καὶ γλαυκί· ὁ δ’ αἰγοκέφαλος ὅλως οὐκ ἔχει. Καὶ ἐπὶ τῶν ᾠοτόκων δὲ καὶ τετραπόδων τὸν αὐτὸν τρόπον ἔχει· μικρὸν γὰρ πάμπαν ἔχουσι καὶ ταῦτα, οἷον χελώνη, ἑμύς, φρύνη, σαῦρος, κροκόδειλος, βάτραχος.

Χολὴν δὲ τῶν ζῴων τὰ μὲν ἔχει τὰ δ’ οὐκ ἔχει ἐπὶ τῷ ἥπατι. Τῶν μὲν ζῳοτόκων καὶ τετραπόδων ἔλαφος οὐκ ἔχει οὐδὲ πρόξ, ἔτι δ’ ἵππος, ὀρεύς, ὄνος, φώκη καὶ τῶν ὑῶν ἔνιοι. Τῶν δ’ ἐλάφων αἱ ἀχαΐναι καλούμεναι δοκοῦσιν ἔχειν ἐν τῇ κέρκῳ χολήν· ἔστι δ’ ὃ λέγουσι τὸ μὲν χρῶμα ὅμοιον χολῇ, οὐ μέντοι ὅλον ὑγρὸν οὕτως, ἀλλ’ ὅμοιον τῷ τοῦ σπληνὸς τὰ ἐντός.

Σκώληκας μέντοι πάντες ἔχουσιν ἐν τῇ κεφαλῇ ζῶντας· ἐγγίνονται δ’ ὑποκάτω τοῦ ὑπογλωττίου ἐν τῷ κοίλῳ καὶ περὶ τὸν σφόνδυλον, ᾗ ἡ κεφαλὴ προσπέφυκε, τὸ μέγεθος οὐκ ἐλάττους ὄντες τῶν μεγίστων εὐλῶν· ἐγγίνονται δ’ ἀθρόοι καὶ συνεχεῖς, τὸν ἀριθμὸν δ’ εἰσὶ μάλιστα περὶ εἴκοσι.

Χολὴν μὲν οὖν οὐκ ἔχουσιν οἱ ἔλαφοι, ὥσπερ εἴρηται· τὸ δ’ ἔντερον αὐτῶν ἐστι πικρὸν οὕτως ὥστε μηδὲ τοὺς κύνας ἐθέλειν ἐσθίειν, ἂν μὴ (506b.) σφόδρα πίων ᾖ ὁ ἔλαφος. Ἔχει δὲ καὶ ὁ ἐλέφας τὸ ἧπαρ ἄχολον μέν, τεμνομένου μέντοι περὶ τὸν τόπον οὗ τοῖς ἔχουσιν ἐπιφύεται ἡ χολή, ῥεῖ ὑγρότης χολώδης ἢ πλείων ἢ ἐλάττων.

Τῶν δὲ δεχομένων τὴν θάλατταν καὶ ἐχόντων πλεύμονα δελφὶς οὐκ ἔχει χολήν. Οἱ δ’ ὄρνιθες καὶ οἱ ἰχθύες πάντες ἔχουσι, καὶ τὰ ᾠοτόκα καὶ τετράποδα, καὶ ὡς ἐπίπαν εἰπεῖν ἢ πλείω ἢ ἐλάττω· ἀλλ’ οἱ μὲν πρὸς τῷ ἥπατι τῶν ἰχθύων, οἷον οἵ τε γαλεώδεις καὶ γλάνις καὶ ῥίνη καὶ λειόβατος καὶ νάρκη καὶ τῶν μακρῶν ἔγχελυς καὶ βελόνη καὶ ζύγαινα. Ἔχει δὲ καὶ ὁ καλλιώνυμος ἐπὶ τῷ ἥπατι, ὅσπερ ἔχει μεγίστην τῶν ἰχθύων ὡς κατὰ μέγεθος. Οἱ δὲ πρὸς τοῖς ἐντέροις ἔχουσιν, ἀποτεταμένην ἀπὸ τοῦ ἥπατος πόροις ἐνίοις πάνυ λεπτοῖς. Ἡ μὲν οὖν ἀμία παρὰ τὸ ἔντερον παρατεταμένην ἰσομήκη ἔχει, πολλάκις δὲ καὶ ἐπαναδίπλωμα· οἱ δ’ ἄλλοι πρὸς τοῖς ἐντέροις, οἱ μὲν πορρώτερον οἱ δ’ ἐγγύτερον, οἷον βάτραχος, ἔλοψ, συναγρία, σμύραινα, ξιφίας. Πολλάκις δὲ καὶ τὸ αὐτὸ γένος ἐπ’ ἀμφότερα φαίνεται ἔχον, οἷον γόγγροι οἱ μὲν πρὸς τῷ ἥπατι, οἱ δὲ κάτω ἀπηρτημένην. Ὁμοίως δ’ ἔχει τοῦτο καὶ ἐπὶ τῶν ὀρνίθων· ἔνιοι γὰρ πρὸς τῇ κοιλίᾳ ἔχουσιν, οἱ δὲ πρὸς τοῖς ἐντέροις τὴν χολήν, οἷον περιστερά, κόραξ, ὄρτυξ, χελιδών, στρουθός. Ἔνιοι δ’ ἅμα πρὸς τῷ ἥπατι ἔχουσι καὶ πρὸς τῇ κοιλίᾳ, οἷον αἰγοκέφαλος, οἱ δ’ ἅμα πρὸς τῷ ἥπατι καὶ τοῖς ἐντέροις, οἷον ἱέραξ καὶ ἰκτῖνος.

Κεφάλαιο 16

Νεφροὺς δὲ καὶ κύστιν τὰ μὲν ζῳοτόκα τῶν τετραπόδων πάντ’ ἔχει· ὅσα δ’ ᾠοτοκεῖ, τῶν μὲν ἄλλων οὐδὲν ἔχει, οἷον οὔτ’ ὄρνις οὔτ’ ἰχθύς, τῶν δὲ τετραπόδων μόνη χελώνη ἡ θαλαττία μέγεθος κατὰ λόγον τῶν ἄλλων μορίων. Ὁμοίους δ’ ἔχει τοὺς νεφροὺς ἡ θαλαττία χελώνη τοῖς βοείοις· ἔστι δ’ ὁ τοῦ βοὸς οἷον ἐκ πολλῶν μικρῶν εἷς συγκείμενος. Ἔχει δὲ καὶ ὁ βόνασος τὰ ἐντὸς ἅπαντα ὅμοια βοΐ.

Κεφάλαιο 17

Τῇ δὲ θέσει, ὅσα ἔχει ταῦτα τὰ μόρια, ὁμοίως κείμενα ἔχει, τήν τε καρδίαν περὶ τὸ μέσον, πλὴν ἐν (507a.) ἀνθρώπῳ· οὗτος δ’ ἐν τῷ ἀριστερῷ μᾶλλον μέρει, καθάπερ ἐλέχθη πρότερον. Ἔχει δὲ καὶ τὸ ὀξὺ ἡ καρδία πάντων εἰς τὸ πρόσθεν· πλὴν ἐπὶ τῶν ἰχθύων οὐκ ἂν δόξειεν· οὐ γὰρ πρὸς τὸ στῆθος ἔχει τὸ ὀξύ, ἀλλὰ πρὸς τὴν κεφαλὴν καὶ τὸ στόμα. Ἀνήρτηται δ’ αὐτῶν τὸ ἄκρον ᾗ συνάπτει τὰ βράγχια ἀλλήλοις τὰ δεξιὰ καὶ τὰ ἀριστερά. Εἰσὶ δὲ καὶ ἄλλοι πόροι τεταμένοι ἐξ αὐτῆς εἰς ἕκαστον τῶν βραγχίων, μείζους μὲν τοῖς μείζοσιν, ἐλάττους δὲ τοῖς ἐλάττοσιν· ὁ δ’ ἐπ’ ἄκρας τῆς καρδίας τοῖς μεγάλοις αὐτῶν σφόδρα παχὺς αὐλός ἐστι καὶ λευκός. Στόμαχον δ’ ὀλίγοι ἔχουσι τῶν ἰχθύων, οἷον γόγγρος καὶ ἔγχελυς, καὶ οὗτοι μικρόν.

Καὶ τὸ ἧπαρ τοῖς ἔχουσι τοῖς μὲν ἀσχιδὲς ἔχουσίν ἐστιν ἐν τοῖς δεξιοῖς ὅλον, τοῖς δ’ ἐσχισμένον ἀπ’ ἀρχῆς τὸ μεῖζον ἐν τοῖς δεξιοῖς. Ἐνίοις γὰρ ἑκάτερον τὸ μόριον ἀπήρτηται καὶ οὐ συμπέφυκεν ἡ ἀρχή, οἷον τῶν τ’ ἰχθύων τοῖς γαλεώδεσι, καὶ δασυπόδων τι γένος ἐστὶ καὶ ἄλλοθι καὶ περὶ τὴν λίμνην τὴν Βόλβην ἐν τῇ καλουμένῃ Συκίνῃ, οὓς ἄν τις δόξειε δύο ἥπατα ἔχειν διὰ τὸ πόρρω τοὺς πόρους συνάπτειν, ὥσπερ καὶ ἐπὶ τοῦ τῶν ὀρνίθων πλεύμονος.

Καὶ ὁ σπλὴν δ’ ἐστὶ πᾶσιν ἐν τοῖς ἀριστεροῖς κατὰ φύσιν, καὶ οἱ νεφροὶ τοῖς ἔχουσι κείμενοι τὸν αὐτὸν τρόπον· ἤδη δὲ διανοιχθέν τι τῶν τετραπόδων ὤφθη ἔχον τὸν σπλῆνα μὲν ἐν τοῖς δεξιοῖς, τὸ δ’ ἧπαρ ἐν τοῖς ἀριστεροῖς· ἀλλὰ τὰ τοιαῦτα ὡς τέρατα κρίνεται.

Τείνει δ’ ἡ μὲν ἀρτηρία πᾶσιν εἰς τὸν πλεύμονα (ὃν δὲ τρόπον, ὕστερον ἐροῦμεν), ὁ δὲ στόμαχος εἰς τὴν κοιλίαν διὰ τοῦ διαζώματος, ὅσα ἔχει στόμαχον· οἱ γὰρ ἰχθύες, ὥσπερ εἴρηται πρότερον, οἱ πλεῖστοι οὐκ ἔχουσιν, ἀλλ’ εὐθὺς πρὸς τὸ στόμα συνάπτει ἡ κοιλία, διὸ πολλάκις ἐνίοις τῶν μεγάλων διώκουσι τοὺς ἐλάττους προπίπτει ἡ κοιλία εἰς τὸ στόμα.

Ἔχει δὲ κοιλίαν πάντα μὲν τὰ εἰρημένα, καὶ κειμένην ὁμοίως (κεῖται γὰρ ὑπὸ τὸ διάζωμα εὐθύς), καὶ τὸ ἔντερον ἐχόμενον καὶ τελευτῶν πρὸς τὴν ἔξοδον τῆς τροφῆς καὶ τὸν καλούμενον ἀρχόν. Ἀνομοίας δ’ ἔχουσι τὰς κοιλίας.

Πρῶτον μὲν γὰρ τῶν τετραπόδων καὶ ζῳοτόκων ὅσα μὴ ἔστιν ἀμφώδοντα τῶν κερατοφόρων, τέτταρας ἔχει τοὺς τοιούτους πόρους· ἃ δὴ καὶ λέγεται μηρυκάζειν. Διήκει γὰρ ὁ μὲν στόμαχος ἀπὸ τοῦ στόματος ἀρξάμενος ἐπὶ τὰ κάτω παρὰ (507b.) τὸν πλεύμονα, ἀπὸ τοῦ διαζώματος ἐπὶ τὴν κοιλίαν τὴν μεγάλην· αὕτη δ’ ἐστὶ τὰ ἔσω τραχεῖα καὶ διειλημμένη.

Συνήρτηται δ’ αὐτῇ πλησίον τῆς τοῦ στομάχου προσβολῆς ὁ καλούμενος κεκρύφαλος ἀπὸ τῆς ὄψεως· ἔστι γὰρ τὰ μὲν ἔξωθεν ὅμοιος τῇ κοιλίᾳ, τὰ δ’ ἐντὸς ὅμοιος τοῖς πλεκτοῖς κεκρυφάλοις· μεγέθει δὲ πολὺ ἐλάττων ἐστὶν ὁ κεκρύφαλος τῆς κοιλίας. Τούτου δ’ ἔχεται ὁ ἐχῖνος, τὰ ἐντὸς ὢν τραχὺς καὶ πλακώδης, τὸ δὲ μέγεθος παραπλήσιος τῷ κεκρυφάλῳ.

Μετὰ δὲ τοῦτον τὸ καλούμενον ἤνυστρόν ἐστι, τῷ μὲν μεγέθει τοῦ ἐχίνου μεῖζον, τὸ δὲ σχῆμα προμηκέστερον· ἔχει δ’ ἐντὸς πλάκας πολλὰς καὶ μεγάλας καὶ λείας. Ἀπὸ δὲ τούτου τὸ ἔντερον ἤδη.

Τὰ μὲν οὖν κερατοφόρα καὶ μὴ ἀμφώδοντα τοιαύτην ἔχει τὴν κοιλίαν, διαφέρει δὲ πρὸς ἄλληλα τοῖς σχήμασι καὶ τοῖς μεγέθεσι τούτων τε καὶ τῷ τὸν στόμαχον εἰς μέσην ἢ πλαγίαν τείνειν τὴν κοιλίαν. Τὰ δ’ ἀμφώδοντα μίαν ἔχει κοιλίαν, οἷον ἄνθρωπος, ὗς, κύων, ἄρκτος, λέων, λύκος. Ἔχει δὲ καὶ ὁ θὼς πάντα τὰ ἐντὸς ὅμοια λύκῳ.

Πάντα μὲν οὖν ἔχει μίαν κοιλίαν, καὶ μετὰ ταῦτα τὸ ἔντερον· ἀλλὰ τὰ μὲν ἔχει μείζω τὴν κοιλίαν, ὥσπερ ὗς καὶ ἄρκτος (καὶ ἥ γε τῆς ὑὸς ὀλίγας ἔχει λείας πλάκας), τὰ δὲ πολὺ ἐλάττω καὶ οὐ πολλῷ μείζω τοῦ ἐντέρου, καθάπερ λέων καὶ κύων καὶ ἄνθρωπος. Καὶ τῶν ἄλλων δὲ τὰ εἴδη διέστηκε πρὸς τὰς τούτων κοιλίας· τὰ μὲν γὰρ ὑῒ ὁμοίαν ἔχει τὰ δὲ κυνί, καὶ τὰ μείζω καὶ τὰ ἐλάττω τῶν ζῴων ὡσαύτως. Διαφορὰ δὲ καὶ ἐν τούτοις κατὰ τὰ μεγέθη καὶ τὰ σχήματα καὶ πάχη καὶ λεπτότητας ὑπάρχει τὰς τῆς κοιλίας, καὶ κατὰ τὴν τοῦ στομάχου τῇ θέσει σύντρησιν.

Διαφέρει δὲ καὶ ἡ τῶν ἐντέρων φύσις ἑκατέροις τῶν εἰρημένων ζῴων, τοῖς τε μὴ ἀμφώδουσι καὶ τοῖς ἀμφώδουσι, τῷ μεγέθει καὶ πάχει καὶ ταῖς ἐπαναδιπλώσεσιν. Πάντα δὲ μείζω τὰ τῶν μὴ ἀμφωδόντων ἐστίν· καὶ γὰρ αὐτὰ πάντα μείζω· μικρὰ μὲν γὰρ ὀλίγα, πάμπαν δὲ μικρὸν οὐδέν ἐστι κερατοφόρον. Ἔχουσι δ’ ἔνια καὶ ἀποφυάδας τῶν ἐντέρων, εὐθυέντερον δ’ οὐδέν ἐστι μὴ ἀμφώδουν. Ὁ δ’ ἐλέφας ἔντερον ἔχει συμφύσεις ἔχον, ὥστε φαίνεσθαι τέτταρας κοιλίας ἔχειν. Ἐν τούτῳ καὶ ἡ τροφὴ ἐγγίνεται, χωρὶς δ’ οὐκ ἔχει ἀγγεῖον. Καὶ τὰ σπλάγχνα ἔχει παραπλήσια τοῖς (508a.) ὑείοις, πλὴν τὸ μὲν ἧπαρ τετραπλάσιον τοῦ βοείου καὶ τἆλλα, τὸν δὲ σπλῆνα ἐλάττω ἢ κατὰ λόγον.

Τὸν αὐτὸν δὲ τρόπον ἔχει τὰ περὶ τὴν κοιλίαν καὶ τὴν τῶν ἐντέρων φύσιν καὶ τοῖς τετράποσι μὲν τῶν ζῴων ᾠοτόκοις δέ, οἷον χελώνῃ χερσαίᾳ καὶ χελώνῃ θαλαττίᾳ καὶ σαύρᾳ καὶ τοῖς κροκοδείλοις ἀμφοῖν καὶ πᾶσιν ὅλως τοῖς τοιούτοις· ἁπλῆν τε γὰρ ἔχουσι καὶ μίαν τὴν κοιλίαν, καὶ τὰ μὲν ὁμοίαν τῇ ὑείᾳ, τὰ δὲ τῇ τοῦ κυνός.

Τὸ δὲ τῶν ὄφεων γένος ὅμοιόν ἐστι καὶ ἔχει παραπλήσια σχεδὸν πάντα τῶν πεζῶν καὶ ᾠοτόκων τοῖς σαύροις, εἴ τις μῆκος ἀποδοὺς αὐτοῖς ἀφέλοι τοὺς πόδας. Φολιδωτόν τε γάρ ἐστι, καὶ τὰ πρανῆ καὶ τὰ ὕπτια παραπλήσια τούτοις ἔχει· πλὴν ὄρχεις οὐκ ἔχει, ἀλλ' ὥσπερ ἰχθὺς δύο πόρους εἰς ἓν συνάπτοντας καὶ τὴν ὑστέραν μακρὰν καὶ δικρόαν. Τὰ δ' ἄλλα τὰ ἐντὸς τὰ αὐτὰ τοῖς σαύροις, πλὴν ἅπαντα διὰ τὴν στενότητα καὶ τὸ μῆκος στενὰ καὶ μακρὰ τὰ σπλάγχνα, ὥστε καὶ λανθάνειν διὰ τὴν ὁμοιότητα τῶν σχημάτων· τήν τε γὰρ ἀρτηρίαν ἔχει σφόδρα μακράν, ἔτι δὲ μακρότερον τὸν στόμαχον. Ἀρχὴ δὲ τῆς ἀρτηρίας πρὸς αὐτῷ ἐστι τῷ στόματι, ὥστε δοκεῖν ὑπὸ ταύτην εἶναι τὴν γλῶτταν. Προέχειν δὲ δοκεῖ τῆς γλώττης ἡ ἀρτηρία διὰ τὸ συσπᾶσθαι τὴν γλῶτταν καὶ μὴ μένειν ὥσπερ τοῖς ἄλλοις. Ἔστι δ' ἡ γλῶττα λεπτὴ καὶ μακρὰ καὶ μέλαινα, καὶ ἐξέρχεται μέχρι πόρρω. Ἴδιον δὲ παρὰ τὰς τῶν ἄλλων γλώττας ἔχουσι καὶ οἱ ὄφεις καὶ οἱ σαῦροι τὸ δικρόαν αὐτῶν εἶναι τὴν γλῶτταν ἄκραν, πολὺ δὲ μάλιστα οἱ ὄφεις· τὰ γὰρ ἄκρα αὐτῶν ἐστι λεπτὰ ὥσπερ τρίχες.

Ἔχει δὲ καὶ ἡ φώκη ἐσχισμένην τὴν γλῶτταν.

Τὴν δὲ κοιλίαν ὁ ὄφις ἔχει οἷον ἔντερον εὐρυχωρέστερον, ὁμοίαν τῇ τοῦ κυνός· εἶτα τὸ ἔντερον μακρὸν καὶ λεπτὸν καὶ μέχρι τοῦ τέλους ἕν. Ἐπὶ δὲ τοῦ φάρυγγος ἡ καρδία, μικρὰ δὲ καὶ νεφροειδής· διὸ δόξειεν ἂν ἐνίοτε οὐ πρὸς τὸ στῆθος ἔχειν τὸ ὀξύ. Εἶθ' ὁ πλεύμων ἁπλοῦς, ἰνώδει πόρῳ διηρθρωμένος καὶ μακρὸς σφόδρα καὶ πολὺ ἀπηρτημένος τῆς καρδίας. Καὶ τὸ ἧπαρ μακρὸν καὶ ἁπλοῦν, σπλῆνα δὲ μικρὸν καὶ στρογγύλον, ὥσπερ καὶ οἱ σαῦροι. Χολὴν δ' ἔχει ὁμοίως τοῖς (508b.) ἰχθύσιν· οἱ μὲν γὰρ ὕδροι πρὸς τῷ ἥπατι ἔχουσιν, οἱ δ' ἄλλοι πρὸς τοῖς ἐντέροις ὡς ἐπὶ τὸ πολύ. Καρχαρόδοντες δὲ πάντες εἰσίν. Πλευρὰς δ' ἔχουσιν ἴσας ταῖς ἐν τῷ μηνὶ ἡμέραις· τριάκοντα γὰρ ἔχουσιν. Λέγουσι δέ τινες συμβαίνειν περὶ τοὺς ὄφεις τὸ αὐτὸ ὅπερ καὶ περὶ τοὺς νεοττοὺς τῶν χελιδόνων· ἐὰν γάρ τις ἐκκεντήσῃ τὰ ὄμματα τῶν ὄφεων, φασὶ φύεσθαι πάλιν. Καὶ αἱ κέρκοι δὲ ἀποτεμνόμεναι τῶν τε σαύρων καὶ τῶν ὄφεων φύονται.

Ὡσαύτως δὲ καὶ τοῖς ἰχθύσιν ἔχει τὰ περὶ τὰ ἔντερα καὶ τὴν κοιλίαν· μίαν γὰρ καὶ ἁπλῆν ἔχουσι, διαφέρουσαν τοῖς σχήμασιν. Ἔνιοι γὰρ πάμπαν ἐντεροειδῆ ἔχουσιν, οἷον ὃν καλοῦσι σκάρον, ὃς δὴ καὶ δοκεῖ μόνος ἰχθὺς μηρυκάζειν. Καὶ τὸ τοῦ ἐντέρου δὲ μέγεθος ἁπλοῦν, καὶ ἀναδίπλωσιν ἔχει, ὃ ἀναλύεται εἰς ἕν.

Ἴδιον δὲ τῶν ἰχθύων ἐστὶ καὶ τῶν ὀρνίθων τῶν πλείστων τὸ ἔχειν ἀποφυάδας· ἀλλ’ οἱ μὲν ὄρνιθες κάτωθεν καὶ ὀλίγας, οἱ δ’ ἰχθύες ἄνωθεν περὶ τὴν κοιλίαν, καὶ ἔνιοι πολλάς, οἷον κωβιός, γαλεός, πέρκη, σκορπίος, κίθαρος, τρίγλη, σπάρος· ὁ δὲ κεστρεὺς ἐπὶ μὲν θάτερα τῆς κοιλίας πολλάς, ἐπὶ δὲ θάτερα μίαν. Ἔνιοι δ’ ἔχουσι μὲν ὀλίγας δέ, οἷον ἥπατος, γλαῦκος· ἔχει δὲ καὶ ὁ χρύσοφρυς ὀλίγας. Διαφέρουσι δὲ καὶ αὐτοὶ αὑτῶν, οἷον χρύσοφρυς ἔχει ὁ μὲν πλείους ὁ δ’ ἐλάττους. Εἰσὶ δὲ καὶ οἳ ὅλως οὐκ ἔχουσιν, οἷον οἱ πλεῖστοι τῶν σελαχωδῶν· τῶν δ’ ἄλλων οἱ μὲν ὀλίγας, οἱ δὲ καὶ πάνυ πολλάς. Πάντες δὲ παρ’ αὐτὴν ἔχουσι τὴν κοιλίαν τὰς ἀποφυάδας οἱ ἰχθύες.

Οἱ δ’ ὄρνιθες ἔχουσι καὶ πρὸς ἀλλήλους καὶ πρὸς τἆλλα ζῷα περὶ τὰ ἐντὸς μέρη διαφοράν. Οἱ μὲν γὰρ ἔχουσι πρὸ τῆς κοιλίας πρόλοβον, οἷον ἀλεκτρυών, φάττα, περιστερά, πέρδιξ· ἔστι δ’ ὁ πρόλοβος δέρμα κοῖλον καὶ μέγα, ἐν ᾧ ἡ τροφὴ πρώτη εἰσιοῦσα ἄπεπτός ἐστιν.

Ἔστι δ’ αὐτόθι μὲν ἀπὸ τοῦ στομάχου στενότερος, ἔπειτα εὐρύτερος, ᾗ δὲ καθήκει πάλιν πρὸς τὴν κοιλίαν, λεπτότερος.

Τὴν δὲ κοιλίαν σαρκώδη καὶ στιφρὰν οἱ πλεῖστοι ἔχουσι, καὶ ἔσωθεν δέρμα ἰσχυρὸν καὶ ἀφαιρούμενον ἀπὸ τοῦ σαρκώδους.

Οἱ δὲ πρόλοβον μὲν οὐκ ἔχουσιν, ἀλλ’ ἀντὶ τούτου τὸν στόμαχον εὐρὺν καὶ πλατύν, ἢ δι’ ὅλου ἢ τὸ πρὸς τὴν κοιλίαν τεῖνον, οἷον (509a.) κολοιὸς καὶ κόραξ καὶ κορώνη. Ἔχει δὲ καὶ ὁ ὄρτυξ τοῦ στομάχου τὸ πλατὺ κάτω, καὶ ὁ αἰγοκέφαλος μικρὸν εὐρύτερον τὸ κάτω καὶ ἡ γλαύξ. Νῆττα δὲ καὶ χὴν καὶ λάρος καὶ καταρράκτης καὶ ὠτὶς τὸν στόμαχον εὐρὺν καὶ πλατὺν ὅλον, καὶ ἄλλοι δὲ πολλοὶ τῶν ὀρνίθων ὁμοίως. Ἔνιοι δὲ τῆς κοιλίας αὐτῆς τι ἔχουσιν ὅμοιον προλόβῳ, οἷον ἡ κεγχρηΐς.

Ἔστι δ’ ἃ οὐκ ἔχει οὔτε τὸν στόμαχον οὔτε τὸν πρόλοβον εὐρύν, ἀλλὰ τὴν κοιλίαν μακράν, ὅσα μικρὰ τῶν ὀρνίθων, οἷον χελιδὼν καὶ στρουθός. Ὀλίγοι δ’ οὔτε τὸν πρόλοβον ἔχουσιν οὔτε τὸν στόμαχον εὐρύν, ἀλλὰ σφόδρα μακρόν, ὅσοι τὸν αὐχένα μακρὸν ἔχουσιν, οἷον πορφυρίων· σχεδὸν δ’ οὗτοι καὶ τὸ περίττωμα ὑγρότερον τῶν ἄλλων προΐενται πάντες. Ὁ δ’ ὄρτυξ ἰδίως ἔχει ταῦτα πρὸς τοὺς ἄλλους· ἔχει γὰρ καὶ πρόλοβον καὶ πρὸ τῆς γαστρὸς τὸν στόμαχον εὐρὺν καὶ πλάτος ἔχοντα· διέχει δ’ ὁ πρόλοβος τοῦ πρὸ τῆς γαστρὸς στομάχου συχνὸν ὡς κατὰ μέγεθος.

Ἔχουσι δὲ καὶ λεπτὸν τὸ ἔντερον οἱ πλεῖστοι καὶ ἁπλοῦν ἀναλυόμενον. Τὰς δ’ ἀποφυάδας ἔχουσιν οἱ ὄρνιθες, καθάπερ εἴρηται, ὀλίγας, καὶ οὐκ ἄνωθεν ὥσπερ οἱ ἰχθύες, ἀλλὰ κάτωθεν κατὰ τὴν τοῦ ἐντέρου τελευτήν. Ἔχουσι δ’ οὐ πάντες ἀλλ’ οἱ πλεῖστοι, οἷον ἀλεκτρυών, πέρδιξ, νῆττα, νυκτικόραξ, λόκαλος, ἀσκάλαφος, χήν, κύκνος, ὠτίς, γλαύξ. Ἔχουσι δὲ καὶ τῶν μικρῶν τινές, ἀλλὰ μικρὰ πάμπαν, οἷον στρουθός.

Κεφάλαιο 1

Περὶ μὲν οὖν τῶν ἄλλων μορίων τῶν ἐντὸς εἴρηται, καὶ πόσα καὶ ποῖ' ἄττα, καὶ τίνας ἔχει πρὸς ἄλληλα διαφοράς· λοιπὸν δὲ περὶ τῶν εἰς τὴν γένεσιν συντελούντων μορίων εἰπεῖν.

Ταῦτα γὰρ τοῖς μὲν θήλεσι πᾶσιν ἐντός ἐστι, τὰ δὲ τῶν ἀρρένων διαφορὰς ἔχει πλείους. Τὰ μὲν γὰρ ὅλως τῶν ἐναίμων ζῴων οὐκ ἔχει ὄρχεις, τὰ δ' ἔχει μὲν ἐντὸς δ' ἔχει, καὶ τῶν ἐντὸς ἐχόντων τὰ μὲν πρὸς τῇ ὀσφύϊ ἔχει περὶ τὸν τῶν νεφρῶν τόπον, τὰ δὲ πρὸς τῇ γαστρί, τὰ δ' ἐκτός. Καὶ τὸ αἰδοῖον τούτων τοῖς μὲν συνήρτηται πρὸς τὴν (509b.) γαστέρα, τοῖς δ' ἀφεῖται καθάπερ καὶ οἱ ὄρχεις· πρὸς δὲ τὴν γαστέρα συνήρτηται ἄλλως τοῖς τ' ἐμπροσθουρητικοῖς καὶ τοῖς ὀπισθουρητικοῖς.

Τῶν μὲν οὖν ἰχθύων οὐδεὶς ὄρχεις ἔχει, οὐδ' εἴ τι ἄλλο ἔχει βράγχια, οὐδὲ τὸ τῶν ὄφεων γένος ἅπαν, οὐδ' ὅλως ἄπουν οὐδέν, ὅσα μὴ ζῳοτοκεῖ ἐν αὑτοῖς. Οἱ δ' ὄρνιθες ἔχουσι μὲν ὄρχεις, ἔχουσι δ' ἐντὸς πρὸς τῇ ὀσφύϊ.

Καὶ τῶν τετραπόδων ὅσα ᾠοτοκεῖ, τὸν αὐτὸν ἔχει τρόπον, οἷον σαύρα καὶ χελώνη καὶ κροκόδειλος, καὶ τῶν ζῳοτόκων ἐχῖνος. Τὰ δὲ τῶν ἐντὸς ἐχόντων πρὸς τῇ γαστρὶ ἔχει, οἷον τῶν ἀπόδων μὲν δελφίς, τῶν δὲ τετραπόδων καὶ ζῳοτόκων ἐλέφας· τὰ δ' ἄλλα φανεροὺς ἔχει.

Ἡ δ' ἐξάρτησις ἡ πρὸς τὴν κοιλίαν καὶ τὸν τόπον τὸν συνεχῆ τίνα διαφορὰν ἔχει, πρότερον εἴρηται· τοῖς μὲν γὰρ ἐκ τοῦ ὄπισθεν συνεχεῖς καὶ οὐκ ἀπηρτημένοι εἰσίν, οἷον τῷ γένει τῷ τῶν ὑῶν, τοῖς δ' ἀπηρτημένοι, καθάπερ τοῖς ἀνθρώποις. Οἱ μὲν οὖν ἰχθύες ὄρχεις μὲν οὐκ ἔχουσιν, ὥσπερ εἴρηται πρότερον, οὐδ' οἱ ὄφεις· πόρους δὲ δύο ἔχουσιν ἀπὸ τοῦ ὑποζώματος ἠρτημένους ἐφ' ἑκάτερα τῆς ῥάχεως, συνάπτοντας εἰς ἕνα πόρον ἄνωθεν τῆς τοῦ περιττώματος ἐξόδου· τὸ δ' ἄνωθεν λέγομεν τὸ πρὸς τὴν ἄκανθαν. Οὗτοι δὲ γίνονται περὶ τὴν ὥραν τῆς ὀχείας θοροῦ πλήρεις, καὶ θλιβομένων ἐξέρχεται τὸ σπέρμα λευκόν. Αὐτοὶ δὲ πρὸς αὑτοὺς ἣν ἔχουσι διαφοράν, ἔκ τε τῶν ἀνατομῶν δεῖ θεωρεῖν καὶ ὕστερον λεχθήσεται ἐν τοῖς περὶ ἕκαστον αὐτῶν ἰδίοις ἀκριβέστερον.

Ὅσα δ' ᾠοτοκεῖ ἢ δίποδα ὄντα ἢ τετράποδα, πάντ' ἔχει ὄρχεις πρὸς τῇ ὀσφύϊ κάτωθεν τοῦ διαζώματος, τὰ μὲν λευκοτέρους τὰ δ' ὠχροτέρους, λεπτοῖς πάμπαν φλεβίοις περιεχομένους. Καὶ ἀφ' ἑκατέρου τείνει πόρος συνάπτων εἰς ἕν, καθάπερ καὶ τοῖς ἰχθύσιν, ὑπὲρ τῆς τοῦ περιττώματος ἐξόδου. Τοῦτο δ' ἐστὶν αἰδοῖον, ὃ τοῖς μὲν μικροῖς ἄδηλον, ἐν δὲ τοῖς

μείζοσιν, οἷον ἐν χηνὶ καὶ τοῖς τηλικούτοις, φανερώτερον γίνεται, ὅταν ἡ ὀχεία πρόσφατος ᾖ.

Οἱ δὲ πόροι καὶ τοῖς ἰχθύσι καὶ τούτοις προσπεφύκασι πρὸς τῇ ὀσφύϊ ὑποκάτω τῆς κοιλίας καὶ τῶν ἐντέρων, μεταξὺ τῆς μεγάλης φλεβός, ἀφ' ἧς τείνουσι πόροι εἰς ἑκάτερον τῶν ὄρχεων. Ὥσπερ δὲ τοῖς ἰχθύσι περὶ μὲν τὴν ὥραν (510a.) τῆς ὀχείας θορός τε φαίνεται ἐνὼν καὶ οἱ πόροι σφόδρα δῆλοι, ὅταν δὲ παρέλθῃ ἡ ὥρα, ἄδηλοι καὶ οἱ πόροι ἐνίοτε, οὕτω καὶ τῶν ὀρνίθων οἱ ὄρχεις· πρὶν μὲν ὀχεύειν, οἱ μὲν μικροὺς οἱ δὲ πάμπαν ἀδήλους ἔχουσιν, ὅταν δ' ὀχεύωσι, σφόδρα μεγάλους ἴσχουσιν. Ἐπιδηλότατα δὲ τοῦτο συμβαίνει ταῖς φάτταις καὶ τοῖς πέρδιξιν, ὥστ' ἔνιοι οἴονται οὐδ' ἔχειν τοῦ χειμῶνος ὄρχεις αὐτά.

Τῶν δ' ἐν τῷ ἔμπροσθεν ἐχόντων τοὺς ὄρχεις οἱ μὲν ἐντὸς ἔχουσι πρὸς τῇ γαστρί, καθάπερ δελφίς, οἱ δ' ἐκτὸς ἐν τῷ φανερῷ πρὸς τῷ τέλει τῆς γαστρός. Τούτοις δὲ τὰ μὲν ἄλλα ἔχει τὸν αὐτὸν τρόπον, διαφέρουσι δ' ὅτι οἱ μὲν αὐτῶν ἔχουσι καθ' αὑτοὺς τοὺς ὄρχεις, οἱ δ' ἐν τῇ καλουμένῃ ὀσχέᾳ, ὅσοι ἔξωθεν.

Αὐτοὶ δ' οἱ ὄρχεις ἐν πᾶσι τοῖς πεζοῖς καὶ ζῳοτόκοις τόνδ' ἔχουσι τὸν τρόπον. Τείνουσιν ἐκ τῆς ἀορτῆς πόροι φλεβικοὶ μέχρι τῆς κεφαλῆς ἑκατέρου τοῦ ὄρχεως, καὶ ἄλλοι ἀπὸ τῶν νεφρῶν δύο· εἰσὶ δ' οὗτοι μὲν αἱματώδεις, οἱ δ' ἐκ τῆς ἀορτῆς ἄναιμοι. Ἀπὸ δὲ τῆς κεφαλῆς πρὸς αὐτῷ τῷ ὄρχει πόρος ἐστὶ πυκνότερος ἐκείνου καὶ νευρωδέστερος, ὃς ἀνακάμπτει πάλιν ἐν ἑκατέρῳ τῷ ὄρχει πρὸς τὴν κεφαλὴν τοῦ ὄρχεως· ἀπὸ δὲ τῆς κεφαλῆς ἑκατέρας πάλιν εἰς ταὐτὸ συνάπτουσιν εἰς τὸ πρόσθεν ἐπὶ τὸ αἰδοῖον. Οἱ δ' ἐπανακάμπτοντες πόροι καὶ προσκαθήμενοι τοῖς ὄρχεσιν ὑμένι περιειλημμένοι εἰσὶ τῷ αὐτῷ, ὥστε δοκεῖν ἕνα εἶναι πόρον, ἂν μὴ διέλῃ τὸν ὑμένα τις. Ὁ μὲν οὖν προσκαθήμενος πόρος ἔτι αἱματῶδες ἔχει τὸ ὑγρόν, ἧττον μέντοι τῶν ἄνω τῶν ἐκ τῆς ἀορτῆς· ἐν δὲ τοῖς ἐπανακάμπτουσιν εἰς τὸν καυλὸν τὸν ἐν τῷ αἰδοίῳ λευκή ἐστιν ἡ ὑγρότης. Φέρει δὲ καὶ ἀπὸ τῆς κύστεως πόρος, καὶ συνάπτει ἄνωθεν εἰς τὸν καυλόν· περὶ τοῦτον δ' οἷον κέλυφός ἐστι τὸ καλούμενον αἰδοῖον. Θεωρείσθω δὲ τὰ εἰρημένα ταῦτα ἐκ τῆς ὑπογραφῆς τῆσδε. Τῶν πόρων ἀρχὴ τῶν ἀπὸ τῆς ἀορτῆς, ἐφ' οἷς Α· κεφαλαὶ τῶν ὄρχεων καὶ οἱ καθήκοντες πόροι, ἐφ' οἷς ΚΚ· οἱ ἀπὸ τούτων πρὸς τῷ ὄρχει προσκαθήμενοι, ἐφ' οἷς τὰ ΩΩ· οἱ δ' ἀνακάμπτοντες, ἐν οἷς ἡ ὑγρότης ἡ λευκή, ἐφ' οἷς τὰ ΒΒ· αἰδοῖον Δ, κύστις Ε, ὄρχεις δ' ἐν οἷς τὰ ΨΨ.

Ἀποτεμνομένων δ' ἢ (510b.) ἀφαιρουμένων τῶν ὄρχεων αὐτῶν ἀνασπῶνται οἱ πόροι ἄνω. Διαφθείρουσι δ' οἱ μὲν ἔτι νέων ὄντων τρίψει, οἱ

δὲ καὶ ὕστερον ἐκτέμνοντες· συνέβη δ’ ἤδη ταῦρον ἐκτμηθέντα καὶ εὐθὺς ἐπιβάντα ὀχεῦσαι καὶ γεννῆσαι. Τὰ μὲν οὖν περὶ τοὺς ὄρχεις τοῖς ζῴοις τοῦτον ἔχει τὸν τρόπον.

Αἱ δ’ ὑστέραι τῶν ἐχόντων ὑστέρας ζῴων οὔτε τὸν αὐτὸν τρόπον ἔχουσιν οὔθ’ ὅμοιαι πάντων εἰσίν, ἀλλὰ διαφέρουσι καὶ τῶν ζῳοτοκούντων πρὸς ἄλληλα καὶ τῶν ᾠοτοκούντων. Δίκροαι μὲν οὖν εἰσιν ἁπάντων τῶν πρὸς τοῖς ἄρθροις ἐχόντων τὰς ὑστέρας, καὶ τὸ μὲν αὐτῶν ἐν τοῖς δεξιοῖς μέρεσι, τὸ δ’ ἕτερον ἐν τοῖς ἀριστεροῖς ἐστιν· ἡ δ’ ἀρχὴ μία καὶ τὸ στόμα ἕν, οἷον καυλὸς σαρκώδης σφόδρα καὶ χονδρώδης τοῖς πλείστοις καὶ μεγίστοις.

Καλεῖται δὲ τούτων τὸ μὲν ὑστέρα καὶ δελφύς (ὅθεν καὶ ἀδελφοὺς προσαγορεύουσι), μήτρα δ’ ὁ καυλὸς καὶ τὸ στόμα τῆς ὑστέρας. Ὅσα μὲν οὖν ἐστι ζῳοτόκα καὶ δίποδα καὶ τετράποδα, τούτων μὲν ἡ ὑστέρα πάντων ἐστὶ κάτω τοῦ ὑποζώματος, οἷον ἀνθρώπῳ καὶ κυνὶ καὶ ὑῒ καὶ ἵππῳ καὶ βοΐ· καὶ τοῖς κερατοφόροις ὁμοίως ταὐτά γ’ ἔχει πᾶσιν. Ἐπ’ ἄκρων δ’ αἱ ὑστέραι τῶν καλουμένων κερατίων εἱλιγμὸν ἔχουσιν αἱ τῶν πλείστων.

Τῶν δ’ ᾠοτοκούντων εἰς τοὐμφανὲς οὐχ ὁμοίως ἁπάντων ἔχουσιν, ἀλλ’ αἱ μὲν τῶν ὀρνίθων πρὸς τῷ ὑποζώματι, αἱ δὲ τῶν ἰχθύων κάτῳ καθάπερ αἱ τῶν ζῳοτοκούντων διπόδων καὶ τετραπόδων, πλὴν λεπταὶ καὶ ὑμενώδεις καὶ μακραί, ὥστ’ ἐν τοῖς σφόδρα μικροῖς τῶν ἰχθύων δοκεῖν ἑκατέραν ᾠὸν εἶναι ἕν, ὡς δύο ἐχόντων ᾠὰ τῶν ἰχθύων τούτων, ὅσων λέγεται τὸ ᾠὸν εἶναι ψαθυρόν· ἔστι γὰρ οὐχ ἓν ἀλλὰ πολλά, διόπερ διαχεῖται εἰς πολλά.

Ἡ δὲ τῶν ὀρνίθων ὑστέρα κάτωθεν μὲν ἔχει τὸν καυλὸν σαρκώδη καὶ στιφρόν, τὰ δὲ πρὸς τῷ ὑποζώματι ὑμενώδη καὶ λεπτὰ πάμπαν, ὥστε δόξαι ἂν ἔξω τῆς ὑστέρας εἶναι τὰ ᾠά. Ἐν μὲν οὖν τοῖς μείζοσι τῶν ὀρνίθων δῆλός ἐστιν ὁ ὑμὴν μᾶλλον, καὶ φυσώμενος διὰ τοῦ καυλοῦ αἴρεται καὶ κολποῦται· ἐν δὲ τοῖς μικροῖς ἀδηλότερα πάντα ταῦτα.

Τὸν αὐτὸν δὲ τρόπον ἔχει ἡ ὑστέρα καὶ ἐν τοῖς τετράποσι μὲν τῶν ζῴων ᾠοτόκοις δέ, οἷον χελώνῃ καὶ σαύρᾳ καὶ βατράχοις καὶ τοῖς ἄλλοις (511a.) τοῖς τοιούτοις· ὁ μὲν γὰρ καυλὸς κάτωθεν εἷς καὶ σαρκωδέστερος, ἡ δὲ σχίσις καὶ τὰ ᾠὰ ἄνω πρὸς τῷ ὑποζώματι.

Ὅσα δὲ τῶν ἀπόδων εἰς τὸ φανερὸν μὲν ζῳοτοκεῖ ἐν αὑτοῖς δ’ ᾠοτοκεῖ, οἷον οἵ τε γαλεοὶ καὶ τἆλλα τὰ καλούμενα σελάχη (καλεῖται δὲ σέλαχος ὃ ἂν ἄπουν ὂν καὶ βράγχια ἔχον ζῳοτόκον ᾖ), τούτων δὴ δικρόα μὲν ἡ ὑστέρα, ὁμοίως δὲ καὶ πρὸς τὸ ὑπόζωμα τείνει, καθάπερ καὶ τῶν ὀρνίθων. Ἔτι δὲ διὰ μέσου τῶν δικρόων κάτωθεν ἀρξαμένη μέχρι πρὸς τὸ ὑπόζωμα τείνει, καὶ τὰ ᾠὰ ἐνταῦθα γίνεται καὶ ἄνω ἐπ’ ἀρχῇ τοῦ ὑποζώματος· εἶτα προελθόντα εἰς τὴν εὐρυχωρίαν ζῷα γίνεται ἐκ τῶν ᾠῶν. Αὐτῶν δὲ τούτων πρὸς ἄλληλά τε καὶ πρὸς τοὺς ἄλλους ἰχθῦς ἡ διαφορὰ τῶν ὑστερῶν ἀκριβέστερον ἂν θεωρηθείη τοῖς σχήμασιν ἐκ τῶν ἀνατομῶν.

Ἔχει δὲ καὶ τὸ τῶν ὄφεων γένος πρός τε ταῦτα καὶ πρὸς ἄλληλα διαφοράν. Τὰ μὲν γὰρ ἄλλα γένη τῶν ὄφεων ᾠοτοκεῖ πάντα, ὁ δ’ ἔχις ζῳοτοκεῖ μόνον, ᾠοτοκήσας ἐν αὑτῷ πρῶτον· διὸ παραπλησίως ἔχει τὰ περὶ τὴν ὑστέραν τοῖς σελάχεσιν. Ἡ δὲ τῶν ὄφεων ὑστέρα μακρά, καθάπερ τὸ σῶμα, τείνει κάτωθεν ἀρξαμένη ἀφ’ ἑνὸς πόρου συνεχής, ἔνθεν καὶ ἔνθεν τῆς ἀκάνθης, οἷον πόρος ἑκάτερος ὤν, μέχρι πρὸς τὸ ὑπόζωμα, ἐν ᾗ τὰ ᾠὰ κατὰ στοῖχον ἐγγίνεται, καὶ ἐκτίκτει οὐ καθ’ ἓν ἀλλὰ συνεχές.

Ἔχει δὲ τὴν ὑστέραν, ὅσα μὲν ζῳοτοκεῖ καὶ ἐν αὑτοῖς καὶ εἰς τοὐμφανές, ἄνωθεν τῆς κοιλίας, ὅσα δ’ ᾠοτοκεῖ, πάντα κάτωθεν πρὸς τῇ ὀσφύϊ. Ὅσα δ’ εἰς τὸ φανερὸν μὲν ζῳοτοκεῖ ἐν αὑτοῖς δ’ ᾠοτοκεῖ, ἐπαμφοτερίζει· τὸ μὲν γὰρ κάτωθεν πρὸς τὴν ὀσφὺν αὐτῆς μέρος ἐστίν, ἐν ᾧ τὰ ᾠά, τὸ δὲ περὶ τὴν ἔξοδον ἐπάνω τῶν ἐντέρων.

Ἔτι δὲ διαφορὰ καὶ ἥδε πρὸς ἀλλήλας ἐστὶ τῶν ὑστερῶν. Τὰ μὲν γὰρ κερατοφόρα καὶ μὴ ἀμφώδοντα ἔχει κοτυληδόνας ἐν τῇ ὑστέρᾳ, ὅταν ἔχῃ τὸ ἔμβρυον, καὶ τῶν ἀμφωδόντων οἷον δασύπους καὶ μῦς καὶ νυκτερίς· τὰ δ’ ἄλλα τὰ ἀμφώδοντα καὶ ζῳοτόκα καὶ ὑπόποδα πάντα λείαν ἔχει τὴν ὑστέραν, καὶ ἡ τῶν ἐμβρύων ἐξάρτησις ἐξ αὐτῆς ἐστι τῆς ὑστέρας, ἀλλ’ οὐκ ἐκ κοτυληδόνος.

Τὰ μὲν οὖν ἀνομοιομερῆ ἐν τοῖς ζῴοις μέρη τοῦτον ἔχει (511b.) τὸν τρόπον, καὶ τὰ ἐκτὸς καὶ τὰ ἐντός.

Κεφάλαιο 2

Τῶν δ’ ὁμοιομερῶν κοινότατον μέν ἐστι τὸ αἷμα πᾶσι τοῖς ἐναίμοις ζῴοις καὶ τὸ μόριον ἐν ᾧ πέφυκεν ἐγγίνεσθαι (τοῦτο δὲ καλεῖται φλέψ), ἔπειτα δὲ τὸ ἀνάλογον τούτοις, ἰχὼρ καὶ ἶνες, καὶ ὃ μάλιστα δή ἐστι τὸ σῶμα τῶν ζῴων, ἡ σὰρξ καὶ τὸ τούτῳ ἀνάλογον ἐν ἑκάστῳ μόριον, ἔτι ὀστοῦν καὶ τὸ ἀνάλογον τούτῳ, οἷον ἄκανθα καὶ χόνδρος· ἔτι δὲ δέρμα, ὑμήν, νεῦρα, τρίχες, ὄνυχες, καὶ τὰ ὁμολογούμενα τούτοις· πρὸς δὲ τούτοις πιμελή, στέαρ καὶ τὰ περιττώματα· ταῦτα δ’ ἐστὶ κόπρος, φλέγμα, χολὴ ξανθὴ καὶ μέλαινα.

Ἐπεὶ δ’ ἀρχῇ ἔοικεν ἡ τοῦ αἵματος φύσις καὶ ἡ τῶν φλεβῶν, πρῶτον περὶ τούτων λεκτέον, ἄλλως τ’ ἐπειδὴ καὶ τῶν πρότερον εἰρηκότων τινὲς οὐ καλῶς λέγουσιν. Αἴτιον δὲ τῆς ἀγνοίας τὸ δυσθεώρητον αὐτῶν. Ἐν μὲν γὰρ τοῖς τεθνεῶσι τῶν ζῴων ἄδηλος ἡ φύσις τῶν κυριωτάτων φλεβῶν διὰ τὸ συμπίπτειν εὐθὺς ἐξιόντος τοῦ αἵματος μάλιστα ταύτας (ἐκ τούτων γὰρ ἐκχεῖται ἀθρόον ὥσπερ ἐξ ἀγγείου· καθ’ αὑτὸ γὰρ οὐδὲν ἔχει αἷμα, πλὴν ὀλίγον ἐν τῇ καρδίᾳ, ἀλλὰ πᾶν ἐστιν ἐν ταῖς φλεψίν). Ἐν δὲ τοῖς ζῶσιν ἀδύνατόν ἐστι θεάσασθαι πῶς ἔχουσιν· ἐντὸς γὰρ ἡ φύσις αὐτῶν. Ὥσθ’ οἱ μὲν ἐν τεθνεῶσι καὶ διῃρημένοις τοῖς ζῴοις θεωροῦντες τὰς μεγίστας ἀρχὰς οὐκ ἐθεώρουν, οἱ δ’ ἐν τοῖς λελεπτυσμένοις σφόδρα ἀνθρώποις ἐκ τῶν τότε ἔξωθεν φαινομένων τὰς ἀρχὰς τῶν φλεβῶν διώρισαν.

Συέννεσις μὲν ὁ Κύπριος ἰατρὸς τόνδε τὸν τρόπον λέγει. Αἱ φλέβες αἱ παχεῖαι ὧδε πεφύκασιν, ἐκ τοῦ ὀμφαλοῦ παρὰ τὴν ὀσφὺν διὰ τοῦ νώτου παρὰ τὸν πλεύμονα ὑπὸ τοὺς μαστούς, ἡ μὲν ἐκ τοῦ δεξιοῦ εἰς τὰ ἀριστερά, ἡ δ’ ἐκ τοῦ ἀριστεροῦ εἰς τὸ δεξιόν, ἡ μὲν ἐκ τοῦ ἀριστεροῦ διὰ τοῦ ἥπατος εἰς τὸν νεφρὸν καὶ εἰς τὸν ὄρχιν, ἡ δ’ ἐκ τοῦ δεξιοῦ εἰς τὸν σπλῆνα καὶ νεφρὸν καὶ ὄρχιν, ἐντεῦθεν δ’ εἰς τὸ αἰδοῖον.

Διογένης δ’ ὁ Ἀπολλωνιάτης τάδε λέγει. Αἱ φλέβες ἐν τῷ ἀνθρώπῳ ὧδ’ ἔχουσιν. Εἰσὶ δύο μέγισται· αὗται τείνουσι διὰ τῆς κοιλίας παρὰ τὴν νωτιαίαν ἄκανθαν, ἡ μὲν ἐπὶ δεξιὰ ἡ δ’ ἐπ’ ἀριστερά, εἰς τὰ σκέλη ἑκατέρα παρ’ ἑαυτῇ, καὶ ἄνω εἰς τὴν κεφαλὴν παρὰ τὰς κλεῖδας διὰ τῶν σφαγῶν. Ἀπὸ δὲ τούτων καθ’ (512a.) ἅπαν τὸ σῶμα φλέβες διατείνουσιν, ἀπὸ μὲν τῆς δεξιᾶς εἰς τὰ δεξιά, ἀπὸ δὲ τῆς ἀριστερᾶς εἰς τὰ ἀριστερά, μέγισται μὲν δύο εἰς τὴν καρδίαν περὶ αὐτὴν τὴν νωτιαίαν ἄκανθαν, ἕτεραι δ’ ὀλίγον ἀνωτέρω διὰ τῶν στηθῶν ὑπὸ τὴν μασχάλην εἰς ἑκατέραν τὴν χεῖρα τὴν παρ’ ἑαυτῇ· καὶ καλεῖται ἡ μὲν σπληνῖτις, ἡ δ’ ἡπατῖτις. Σχίζεται δ’ αὐτῶν ἄκρα ἑκατέρα, ἡ μὲν ἐπὶ τὸν μέγαν δάκτυλον, ἡ δ’ ἐπὶ τὸν ταρσόν· ἀπὸ δὲ τούτων λεπταὶ καὶ πολύοζοι ἐπὶ τὴν ἄλλην χεῖρα καὶ δακτύλους. Ἕτεραι δὲ λεπτότεραι ἀπὸ τῶν πρώτων φλεβῶν τείνουσιν, ἀπὸ μὲν τῆς δεξιᾶς εἰς τὸ ἧπαρ, ἀπὸ δὲ τῆς ἀριστερᾶς εἰς τὸν σπλῆνα καὶ τοὺς νεφρούς. Αἱ δ’ εἰς τὰ σκέλη τείνουσαι σχίζονται κατὰ τὴν πρόσφυσιν, καὶ διὰ παντὸς τοῦ μηροῦ τείνουσιν. Ἡ δὲ μεγίστη αὐτῶν ὄπισθεν τείνει τοῦ μηροῦ, καὶ ἐκφαίνεται παχεῖα· ἑτέρα δ’ εἴσω τοῦ μηροῦ, μικρὸν ἧττον παχεῖα ἐκείνης. Ἔπειτα παρὰ τὸ γόνυ τείνουσιν εἰς τὴν κνήμην τε καὶ τὸν πόδα. Καὶ καθάπερ αἱ εἰς τὰς χεῖρας, καὶ ἐπὶ τὸν ταρσὸν τοῦ ποδὸς καθήκουσι, καὶ ἐντεῦθεν ἐπὶ τοὺς δακτύλους διατείνουσιν. Σχίζονται δὲ καὶ ἐπὶ τὴν κοιλίαν καὶ τὸ πλευρὸν πολλαὶ ἀπ’ αὐτῶν καὶ λεπταὶ φλέβες.

Αἱ δ’ εἰς τὴν κεφαλὴν τείνουσαι διὰ τῶν σφαγῶν φαίνονται ἐν τῷ αὐχένι μεγάλαι· ἀφ’ ἑκατέρας δ’ αὐτῶν, ᾗ τελευτᾷ, σχίζονται εἰς τὴν κεφαλὴν πολλαί, αἱ μὲν ἐκ τῶν δεξιῶν εἰς τὰ ἀριστερά, αἱ δ’ ἐκ τῶν ἀριστερῶν εἰς τὰ δεξιά· τελευτῶσι δὲ παρὰ τὸ οὖς ἑκάτεραι. Ἔστι δ’ ἑτέρα φλὲψ ἐν τῷ τραχήλῳ παρὰ τὴν μεγάλην ἑκατέρωθεν, ἐλάττων ἐκείνης ὀλίγον, εἰς ἣν αἱ πλεῖσται ἐκ τῆς κεφαλῆς συνέχουσιν αὐτῆς· καὶ αὗται τείνουσι διὰ τῶν σφαγῶν εἴσω, καὶ ἀπ’ αὐτῶν ἑκατέρας ὑπὸ τὴν ὠμοπλάτην τείνουσι καὶ εἰς τὰς χεῖρας. Καὶ φαίνονται παρά τε τὴν σπληνῖτιν καὶ τὴν ἡπατῖτιν ἕτεραι ὀλίγον ἐλάττους, ἃς ἀποσχάζουσιν, ὅταν τι ὑπὸ τὸ δέρμα λυπῇ· ἂν δέ τι περὶ τὴν κοιλίαν, τὴν ἡπατῖτιν καὶ τὴν σπληνῖτιν. Τείνουσι δὲ καὶ ὑπὸ τοὺς μαστοὺς ἀπὸ (512b.) τούτων ἕτεραι. Ἕτεραι δ’ εἰσὶν αἱ ἀπὸ ἑκατέρας τείνουσαι διὰ τοῦ νωτιαίου μυελοῦ εἰς τοὺς ὄρχεις, λεπταί. Ἕτεραι δ’ ὑπὸ τὸ δέρμα καὶ διὰ τῆς σαρκὸς τείνουσιν εἰς τοὺς νεφρούς, καὶ τελευτῶσιν εἰς τοὺς ὄρχεις τοῖς ἀνδράσι, ταῖς δὲ γυναιξὶν εἰς τὰς ὑστέρας. Αἱ δὲ φλέβες αἱ μὲν πρῶται ἐκ τῆς κοιλίας εὐρύτεραί εἰσιν, ἔπειτα λεπτότεραι γίνονται, ἕως ἂν μεταβάλωσιν ἐκ τῶν δεξιῶν εἰς τὰ ἀριστερὰ καὶ ἐκ τούτων εἰς τὰ δεξιά· αὗται δὲ σπερματίδες καλοῦνται.

Τὸ δ’ αἷμα τὸ μὲν παχύτατον ὑπὸ τῶν σαρκῶν ἐγγίνεται· ὑπερβάλλον δ’ εἰς τοὺς τόπους τούτους λεπτὸν καὶ θερμὸν καὶ ἀφρῶδες γίνεται.

Κεφάλαιο 3

Συέννεσις μὲν οὖν καὶ Διογένης οὕτως εἰρήκασιν, Πόλυβος δ’ ὧδε. Τὰ δὲ τῶν φλεβῶν τέτταρα ζεύγη ἐστίν, ἓν μὲν ἀπὸ τοῦ ἐξόπισθεν τῆς κεφαλῆς διὰ τοῦ αὐχένος ἔξωθεν παρὰ τὴν ῥάχιν ἔνθεν καὶ ἔνθεν μέχρι τῶν ἰσχίων εἰς τὰ σκέλη, ἔπειτα διὰ τῶν κνημῶν ἐκ τῶν σφυρῶν εἴς τ’ ἔξω καὶ εἰς τοὺς πόδας· διὸ καὶ τὰς φλεβοτομίας ποιοῦνται τῶν περὶ τὸν νῶτον ἀλγημάτων καὶ ἰσχίον ἀπὸ τῶν ἰγνύων καὶ τῶν σφυρῶν ἔξωθεν. Ἕτεραι δὲ φλέβες ἐκ τῆς κεφαλῆς παρὰ τὰ ὦτα διὰ τοῦ αὐχένος, αἳ καλοῦνται σφαγίτιδες, ἔνδοθεν παρὰ τὴν ῥάχιν ἑκάτεραι φέρουσαι παρὰ τὰς ψύας εἰς τοὺς ὄρχεις καὶ εἰς τοὺς μηρούς, καὶ διὰ τῶν ἰγνύων τοῦ ἔνδοθεν μορίου καὶ διὰ τῶν κνημῶν ἐπὶ τὰ σφυρὰ τὰ εἴσω καὶ τοὺς πόδας· διὸ καὶ τὰς φλεβοτομίας ποιοῦνται τῶν περὶ τὰς ψύας καὶ τοὺς ὄρχεις ἀλγημάτων ἀπὸ τῶν ἰγνύων καὶ τῶν σφυρῶν <εἴσωθεν>.

Τὸ δὲ τρίτον ζεῦγος ἐκ τῶν κροτάφων διὰ τοῦ αὐχένος ὑπὸ τὰς ὠμοπλάτας εἰς τὸν πλεύμονα ἀφικνοῦνται, αἱ μὲν ἐκ τῶν δεξιῶν εἰς τὰ ἀριστερὰ ὑπὸ τὸν μαστὸν καὶ εἰς τὸν σπλῆνά τε καὶ εἰς τὸν νεφρόν, αἱ δ’ ἀπὸ τῶν ἀριστερῶν εἰς τὸν δεξιὸν ἐκ τοῦ πλεύμονος ὑπὸ τὸν μαστὸν καὶ ἧπαρ καὶ εἰς τὸν νεφρόν· ἄμφω δὲ τελευτῶσιν εἰς τὸν ἀρχόν. Αἱ δὲ τέταρται ἀπὸ τοῦ ἔμπροσθεν τῆς κεφαλῆς καὶ (513a.) τῶν ὀφθαλμῶν ὑπὸ τὸν αὐχένα καὶ τὰς κλεῖδας· ἐντεῦθεν δὲ τείνουσι διὰ τῶν βραχιόνων ἄνωθεν εἰς τὰς καμπάς, εἶτα διὰ τῶν πήχεων ἐπὶ τοὺς καρποὺς καὶ τὰς συγκαμπάς, καὶ διὰ τῶν βραχιόνων τοῦ κάτωθεν μορίου εἰς τὰς μασχάλας, καὶ ἐπὶ lt;τὸ> τῶν πλευρῶν ἄνωθεν, ἕως ἡ μὲν ἐπὶ τὸν σπλῆνα ἡ δ’ ἐπὶ τὸ ἧπαρ ἀφίκηται· εἶθ’ ὑπὲρ τῆς γαστρὸς εἰς τὸ αἰδοῖον ἄμφω τελευτῶσιν.

Τὰ μὲν οὖν ὑπὸ τῶν ἄλλων εἰρημένα σχεδὸν ταῦτ’ ἐστίν· εἰσὶ δὲ καὶ τῶν περὶ φύσιν οἳ τοιαύτην μὲν οὐκ ἐπραγματεύθησαν ἀκριβολογίαν περὶ τὰς φλέβας, πάντες δ’ ὁμοίως τὴν ἀρχὴν αὐτῶν ἐκ τῆς κεφαλῆς καὶ τοῦ ἐγκεφάλου ποιοῦσι, λέγοντες οὐ καλῶς. Χαλεπῆς δ’ οὔσης, ὥσπερ εἴρηται πρότερον, τῆς θεωρίας ἐν μόνοις τοῖς ἀποπεπνιγμένοις τῶν ζῴων προλεπτυνθεῖσιν ἔστιν ἱκανῶς καταμαθεῖν, εἴ τινι περὶ τῶν τοιούτων ἐπιμελές.

Ἔχει δὲ τοῦτον τὸν τρόπον ἡ τῶν φλεβῶν φύσις. Δύο φλέβες εἰσὶν ἐν τῷ θώρακι κατὰ τὴν ῥάχιν ἐντός, ἔστι δὲ κειμένη αὐτῶν ἡ μὲν μείζων ἐν τοῖς ἔμπροσθεν, ἡ δ’ ἐλάττων ὄπισθεν ταύτης, καὶ ἡ μὲν μείζων ἐν τοῖς δεξιοῖς μᾶλλον, ἡ δ’ ἐλάττων ἐν τοῖς ἀριστεροῖς, ἣν καλοῦσί τινες ἀορτὴν ἐκ τοῦ τεθεᾶσθαι καὶ ἐν τοῖς τεθνεῶσι τὸ νευρῶδες αὐτῆς μόριον. Αὗται δ’ ἔχουσι τὰς ἀρχὰς ἀπὸ τῆς καρδίας· διὰ μὲν γὰρ τῶν ἄλλων σπλάγχνων, ᾗ τυγχάνουσι τείνουσαι, ὅλαι δι’ αὐτῶν διέρχονται σωζόμεναι καὶ οὖσαι φλέβες, ἡ δὲ καρδία ὥσπερ μόριον αὐτῶν ἐστι, καὶ μᾶλλον τῆς ἐμπροσθίας καὶ μείζονος, διὰ τὸ ἄνω μὲν καὶ κάτω τὰς φλέβας εἶναι ταύτας, ἐν μέσῳ δ’ αὐτῶν τὴν καρδίαν.

Ἔχουσι δ’ αἱ καρδίαι πᾶσαι μὲν κοιλίας ἐν αὐταῖς, ἀλλ’ αἱ μὲν τῶν σφόδρα μικρῶν ζῴων μόλις φανερὰν τὴν μεγίστην ἔχουσι, τὰ δὲ μέσα τῷ μεγέθει τῶν ζῴων καὶ τὴν ἑτέραν, τὰ δὲ μέγιστα τὰς τρεῖς. Ἔστι δὲ τῆς καρδίας τὸ ὀξὺ ἐχούσης εἰς τὸ πρόσθεν, καθάπερ εἴρηται πρότερον, ἡ μεγίστη μὲν κοιλία ἐν τοῖς δεξιοῖς καὶ ἀνωτάτω αὐτῆς, ἡ δ’ ἐλαχίστη ἐν τοῖς ἀριστεροῖς, ἡ δὲ μέση μεγέθει τούτων ἐν τῷ μέσῳ ἀμφοῖν· ἀμφότεραι δὲ πολλῷ ἐλάττους εἰσὶ τῆς μεγίστης. Συντέτρηνται μέντοι πᾶσαι αὗται πρὸς τὸν πλεύμονα, ἀλλ’ ἄδηλοι διὰ σμικρότητα τῶν (513b.) πόρων πλὴν μιᾶς.

Ἡ μὲν οὖν μεγάλη φλὲψ ἐκ τῆς μεγίστης ἤρτηται κοίλιας τῆς ἄνω καὶ ἐν τοῖς δεξιοῖς, εἶτα διὰ τοῦ κοίλου τοῦ μέσου τείνεται πάλιν φλέψ, ὡς οὔσης τῆς κοιλίας μορίου τῆς φλεβὸς ἐν ᾧ λιμνάζει τὸ αἷμα. Ἡ δ’ ἀορτὴ ἀπὸ τῆς μέσης· πλὴν οὐχ οὕτως ἀλλὰ κατὰ στενωτέραν σύριγγα πολλῷ κοινωνεῖ. Καὶ ἡ μὲν φλὲψ διὰ τῆς καρδίας, εἰς δὲ τὴν ἀορτὴν ἀπὸ τῆς καρδίας τείνει. Καὶ ἔστιν ἡ μὲν μεγάλη φλὲψ ὑμενώδης καὶ δερματώδης, ἡ δ’ ἀορτὴ στενωτέρα μὲν ταύτης, σφόδρα δὲ νευρώδης· καὶ ἀποτεινομένη πόρρω πρός τε τὴν κεφαλὴν καὶ πρὸς τὰ κάτω μόρια στενή τε γίνεται καὶ νευρώδης πάμπαν.

Τείνει δὲ πρῶτον μὲν ἄνω ἀπὸ τῆς καρδίας τῆς μεγάλης φλεβὸς μόριον πρὸς τὸν πλεύμονα καὶ τὴν σύναψιν τῆς ἀορτῆς, ἄσχιστος καὶ μεγάλη οὖσα φλέψ. Σχίζεται δ’ ἀπ’ αὐτῆς μόρια δύο, τὸ μὲν ἐπὶ τὸν πλεύμονα, τὸ δ’ ἐπὶ τὴν ῥάχιν καὶ τὸν ὕστατον τοῦ τραχήλου σφόνδυλον. Ἡ μὲν οὖν ἐπὶ τὸν πλεύμονα τείνουσα φλὲψ εἰς διμερῆ ὄντ’ αὐτὸν διχῇ σχίζεται πρῶτον, εἶτα παρ’ ἑκάστην σύριγγα καὶ ἕκαστον τρῆμα τείνει, μείζων μὲν παρὰ τὰ μείζω, ἐλάττων δὲ παρὰ τὰ ἐλάττω, οὕτως ὥστε μηδὲν εἶναι μόριον λαβεῖν ἐν ᾧ οὐ τρῆμά τ’ ἔνεστι καὶ φλέβιον· τὰ γὰρ τελευταῖα τῷ μεγέθει ἄδηλα διὰ τὴν μικρότητά ἐστιν, ἀλλὰ πᾶς ὁ πλεύμων φαίνεται μεστὸς ὢν αἵματος. Ἐπάνω δ’ οἱ ἀπὸ τῆς φλεβός εἰσι πόροι τῶν ἀπὸ τῆς ἀρτηρίας συρίγγων τεινουσῶν. Ἡ δ’ ἐπὶ τὸν σφόνδυλον τοῦ τραχήλου τείνουσα φλὲψ καὶ τὴν ῥάχιν πάλιν παρὰ τὴν ῥάχιν τείνει· ἣν καὶ μηρος ἐν τοῖς ἔπεσιν εἴρηκε ποιήσας “ἀπὸ δὲ φλέβα πᾶσαν ἔκερσεν, ἥ τ’ ἀνὰ νῶτα θέουσα διαμπερὲς αὐχέν’ ἱκάνει”. Ἀπὸ δὲ ταύτης τείνουσι παρά τε τὴν πλευρὰν ἑκάστην φλέβια καὶ πρὸς ἕκαστον τὸν σφόνδυλον, κατὰ δὲ τὸν ὑπὲρ τῶν νεφρῶν σφόνδυλον σχίζεται διχῇ.

Ταῦτα μὲν οὖν τὰ μόρια ἀπὸ τῆς μεγάλης φλεβὸς τοῦτον ἔσχισται τὸν τρόπον· ὑπεράνω δὲ τούτων ἀπὸ τῆς ἐκ τῆς καρδίας τεταμένης πάλιν ἡ ὅλη σχίζεται εἰς δύο τόπους. Αἱ μὲν γὰρ φέρουσιν εἰς τὰ πλάγια καὶ τὰς κλεῖδας, κἄπειτα διὰ τῶν μασχαλῶν τοῖς μὲν ἀνθρώποις εἰς τοὺς βραχίονας, τοῖς δὲ τετράποσιν εἰς (514a.) τὰ πρόσθια σκέλη τείνουσι, τοῖς δ’ ὄρνισιν εἰς τὰς πτέρυγας, τοῖς δ’ ἰχθύσιν εἰς τὰ πτερύγια τὰ πρανῆ. Αἱ δ’ ἀρχαὶ τούτων τῶν φλεβῶν, ᾗ σχίζονται τὸ πρῶτον, καλοῦνται σφαγίτιδες· ᾗ δὲ σχίζονται εἰς τὸν αὐχένα [ἀπὸ τῆς μεγάλης φλεβός], παρὰ τὴν ἀρτηρίαν τείνουσι τὴν τοῦ πλεύμονος· ὧν ἐπιλαμβανομένων ἐνίοτε ἔξωθεν ἄνευ πνιγμοῦ καταπίπτουσιν οἱ ἄνθρωποι μετ’ ἀναισθησίας, τὰ βλέφαρα συμβεβληκότες. Οὕτω δὲ τείνουσαι, καὶ μεταξὺ λαμβάνουσαι τὴν ἀρτηρίαν, φέρουσι μέχρι τῶν ὤτων, ᾗ συμβάλλουσιν αἱ γένυες τῇ κεφαλῇ. Πάλιν δ’ ἐντεῦθεν εἰς τέτταρας σχίζονται φλέβας, ὧν μία μὲν ἐπανακάμψασα καταβαίνει διὰ τοῦ τραχήλου καὶ τοῦ ὤμου, καὶ συμβάλλει τῇ πρότερον ἀποσχίσει τῆς φλεβὸς κατὰ τὴν τοῦ βραχίονος καμπήν, τὸ δ’ ἕτερον μόριον εἰς τὴν χεῖρα τελευτᾷ καὶ τοὺς δακτύλους· μία δ’ ἑτέρα ἀφ’ ἑκατέρου τοῦ τόπου τοῦ περὶ τὰ ὦτα ἐπὶ τὸν ἐγκέφαλον τείνει, καὶ σχίζεται εἰς πολλὰ καὶ λεπτὰ φλέβια εἰς τὴν καλουμένην μήνιγγα τὴν περὶ τὸν ἐγκέφαλον. Αὐτὸς δ’ ὁ ἐγκέφαλος ἄναιμος πάντων ἐστί, καὶ οὔτε μικρὸν οὔτε μέγα φλέβιον τελευτᾷ εἰς αὐτόν. Τῶν δὲ λοιπῶν τῶν ἀπὸ τῆς φλεβὸς ταύτης σχισθεισῶν φλεβῶν αἱ μὲν τὴν κεφαλὴν κύκλῳ περιλαμβάνουσιν, αἱ δ’ εἰς τὰ αἰσθητήρια ἀποτελευτῶσι καὶ τοὺς ὀδόντας λεπτοῖς πάμπαν φλεβίοις.

Κεφάλαιο 4

Τὸν δ’ αὐτὸν τρόπον καὶ τὰ τῆς ἐλάττονος φλεβός, καλουμένης δ’ ἀορτῆς, ἔσχισται μέρη, συμπαρακολουθοῦντα τοῖς τῆς μεγάλης· πλὴν ἐλάττους οἱ πόροι καὶ τὰ φλέβια πολλῷ ἐλάττω ταύτης ἐστὶ τῶν τῆς μεγάλης φλεβός.

Τὰ μὲν οὖν ἄνωθεν τῆς καρδίας τοῦτον ἔχουσι τὸν τρόπον αἱ φλέβες· τὸ δ’ ὑποκάτω τῆς καρδίας μέρος τῆς μεγάλης φλεβὸς τείνει μετέωρον διὰ τοῦ ὑποζώματος, συνέχεται δὲ καὶ πρὸς τὴν ἀορτὴν καὶ πρὸς τὴν ῥάχιν πόροις ὑμενώδεσι καὶ χαλαροῖς. Τείνει δ’ ἀπ’ αὐτῆς μία μὲν διὰ τοῦ ἥπατος φλέψ, βραχεῖα μὲν πλατεῖα δέ, ἀφ’ ἧς πολλαὶ καὶ λεπταὶ εἰς τὸ ἧπαρ ἀποτείνουσαι ἀφανίζονται. Δύο δ’ ἀπὸ τῆς διὰ τοῦ ἥπατος φλεβὸς ἀποσχίσεις εἰσίν, ὧν ἡ μὲν εἰς τὸ ὑπόζωμα τελευτᾷ καὶ τὰς καλουμένας φρένας, ἡ δὲ πάλιν ἐπανελθοῦσα διὰ τῆς μασχάλης εἰς τὸν (514b.) βραχίονα τὸν δεξιὸν συμβάλλει ταῖς ἑτέραις φλεψὶ κατὰ τὴν ἐντὸς καμπήν· διὸ ἀποσχαζόντων τῶν ἰατρῶν ταύτην ἀπολύονταί τινων πόνων περὶ τὸ ἧπαρ.

Ἐκ δὲ τῶν ἀριστερῶν αὐτῆς μικρὰ μὲν παχεῖα δὲ φλὲψ τείνει εἰς τὸν σπλῆνα, καὶ ἀφανίζεται τὰ ἀπ’ αὐτῆς φλέβια εἰς τοῦτον. Ἕτερον δὲ μέρος ἀπὸ τῶν ἀριστερῶν τῆς μεγάλης φλεβὸς ἀποσχισθὲν τὸν αὐτὸν τρόπον ἀναβαίνει ἐπὶ τὸν ἀριστερὸν βραχίονα· πλὴν ἐκείνη μὲν ἡ διὰ τοῦ ἥπατός ἐστιν, αὕτη δ’ ἑτέρα τῆς εἰς τὸν σπλῆνα τεινούσης.

Ἔτι δ’ ἄλλαι ἀπὸ τῆς μεγάλης φλεβὸς ἀποσχίζονται, ἡ μὲν ἐπὶ τὸ ἐπίπλοον, ἡ δ’ ἐπὶ τὸ καλούμενον πάγκρεας. Ἀπὸ δὲ ταύτης πολλαὶ φλέβες διὰ τοῦ μεσεντερίου τείνουσιν. Πᾶσαι δ’ αὗται εἰς μίαν φλέβα μεγάλην τελευτῶσιν, παρὰ πᾶν τὸ ἔντερον καὶ τὴν κοιλίαν μέχρι τοῦ στομάχου τεταμένην. Καὶ περὶ ταῦτα τὰ μόρια πολλαὶ ἀπ’ αὐτῶν σχίζονται φλέβες.

Μέχρι μὲν οὖν τῶν νεφρῶν μία οὖσα ἑκατέρα τείνει, καὶ ἡ ἀορτὴ καὶ ἡ μεγάλη φλέψ· ἐνταῦθα δὲ πρός τε τὴν ῥάχιν μᾶλλον προσπεφύκασι, καὶ σχίζονται εἰς δύο ὡσπερεὶ λάμβδα ἑκάτερα, καὶ γίνεται εἰς τοὔπισθεν μᾶλλον ἡ μεγάλη φλὲψ τῆς ἀορτῆς. Προσπέφυκε δ’ ἡ ἀορτὴ μάλιστα τῇ ῥάχει περὶ τὴν καρδίαν· ἡ δὲ πρόσφυσίς ἐστι φλεβίοις νευρώδεσι καὶ μικροῖς.

Ἔστι δ’ ἡ ἀορτὴ ἀπὸ μὲν τῆς καρδίας ἀγομένη εὖ μάλα κοίλη, προϊοῦσα δ’ ἐστὶ στενωτέρα καὶ νευρωδεστέρα. Τείνουσι δὲ καὶ ἀπὸ τῆς ἀορτῆς εἰς τὸ μεσεντέριον φλέβες ὥσπερ αἱ ἀπὸ τῆς μεγάλης φλεβός, πλὴν πολλῷ λειπόμεναι τῷ μεγέθει· στεναὶ γάρ εἰσι καὶ ἰνώδεις· λεπτοῖς γὰρ καὶ ποικίλοις καὶ ἰνώδεσι τελευτῶσι φλεβίοις. Εἰς δὲ τὸ ἧπαρ καὶ τὸν σπλῆνα οὐδεμία τείνει ἀπὸ τῆς ἀορτῆς φλέψ.

Αἱ δὲ σχίσεις ἑκατέρας τῆς φλεβὸς τείνουσιν εἰς τὸ ἰσχίον ἑκάτερον, καὶ καθάπτουσιν εἰς τὸ ὀστοῦν ἀμφότεραι. Φέρουσι δὲ καὶ εἰς τοὺς νεφροὺς ἀπό τε τῆς μεγάλης φλεβὸς καὶ τῆς ἀορτῆς φλέβες· πλὴν οὐκ εἰς τὸ κοῖλον ἀλλ’ εἰς τὸ σῶμα καταναλίσκονται τῶν νεφρῶν. Ἀπὸ μὲν οὖν τῆς ἀορτῆς ἄλλοι δύο πόροι φέρουσιν εἰς τὴν κύστιν, ἰσχυροὶ καὶ συνεχεῖς, καὶ ἄλλοι ἐκ τοῦ κοίλου τῶν νεφρῶν, οὐδὲν κοινωνοῦντες τῇ μεγάλῃ φλεβί. Ἐκ μέσου δὲ τῶν νεφρῶν ἑκατέρου φλὲψ κοίλη καὶ νευρώδης ἐξήρτηται, τείνουσα παρ’ αὐτὴν τὴν ῥάχιν διὰ (515a.) τῶν στενῶν· εἶτα εἰς ἑκάτερον τὸ ἰσχίον ἀφανίζεται ἑκατέρα πρῶτον, ἔπειτα δῆλαι γίνονται πάλιν διατεταμέναι πρὸς τὸ ἰσχίον. Καθάπτουσι δὲ πρὸς τὴν κύστιν καὶ τὸ αἰδοῖον τὰ πέρατα αὐτῶν ἐν τοῖς ἄρρεσιν, ἐν δὲ τοῖς θήλεσι πρὸς τὰς ὑστέρας. Τείνει δ’ ἀπὸ μὲν τῆς μεγάλης φλεβὸς οὐδεμία εἰς τὰς ὑστέρας, ἀπὸ δὲ τῆς ἀορτῆς πολλαὶ καὶ πυκναί. Τείνουσι δ’ ἀπὸ τῆς ἀορτῆς καὶ τῆς μεγάλης φλεβὸς ἀπὸ τῶν σχιζομένων καὶ ἄλλαι, αἱ μὲν ἐπὶ τοὺς βουβῶνας πρῶτον μεγάλαι καὶ κοῖλαι, ἔπειτα διὰ τῶν σκελῶν τελευτῶσιν εἰς τοὺς πόδας καὶ τοὺς δακτύλους· καὶ πάλιν ἕτεραι διὰ τῶν βουβώνων καὶ τῶν μηρῶν φέρουσιν ἐναλλάξ, ἡ μὲν ἐκ τῶν ἀριστερῶν εἰς τὰ δεξιά, ἡ δ’ εἰς τὰ ἀριστερὰ ἐκ τῶν δεξιῶν· καὶ συνάπτουσι περὶ τὰς ἰγνύας ταῖς ἑτέραις φλεψίν.

Ὃν μὲν οὖν τρόπον ἔχουσιν αἱ φλέβες καὶ πόθεν ἤρτηνται τὰς ἀρχάς, φανερὸν ἐκ τούτων. Ἔχει δ’ ἐν ἅπασι μὲν τοῖς ἐναίμοις ζῴοις οὕτω τὰ περὶ τὰς ἀρχὰς καὶ τὰς μεγίστας φλέβας (τὸ γὰρ ἄλλο πλῆθος τῶν φλεβῶν οὐχ ὡσαύτως ἔχει πᾶσιν· οὐδὲ γὰρ τὰ μέρη τὸν αὐτὸν τρόπον ἔχουσιν, οὐδὲ ταῦτα πάντα ἔχουσιν), οὐ μὴν οὐδ’ ὁμοίως ἐν ἅπασίν ἐστι φανερόν, ἀλλὰ μάλιστα ἐν τοῖς μάλιστα πολυαίμοις καὶ μεγίστοις. Ἐν γὰρ τοῖς μικροῖς καὶ μὴ πολυαίμοις ἢ διὰ φύσιν ἢ διὰ πιότητα τοῦ σώματος οὐχ ὁμοίως ἔστι καταμαθεῖν· τῶν μὲν γὰρ οἱ πόροι συγκεχυμένοι καθάπερ ὀχετοί τινες ὑπὸ πολλῆς ἰλύος εἰσίν, οἱ δ’ ὀλίγας καὶ ταύτας ἶνας ἀντὶ φλεβῶν ἔχουσιν. Ἡ δὲ μεγάλη φλὲψ ἐν πᾶσι μάλιστα διάδηλος, καὶ τοῖς μικροῖς.

Κεφάλαιο 5

Τὰ δὲ νεῦρα τοῖς ζῴοις ἔχει τόνδε τὸν τρόπον. Ἡ μὲν ἀρχὴ καὶ τούτων ἐστὶν ἀπὸ τῆς καρδίας· καὶ γὰρ ἐν αὑτῇ ἡ καρδία ἔχει νεῦρα ἐν τῇ μεγίστῃ κοιλίᾳ, καὶ ἡ καλουμένη ἀορτὴ νευρώδης ἐστὶ φλέψ, τὰ μὲν τελευταῖα καὶ παντελῶς αὐτῆς· ἄκοιλα γάρ ἐστι, καὶ τάσιν ἔχει τοιαύτην οἵαν περ τὰ νεῦρα, ᾗ τελευτᾷ πρὸς τὰς καμπὰς τῶν ὀστῶν. Οὐ μὴν ἀλλ' οὐκ ἔστι συνεχὴς ἡ τῶν νεύρων φύσις ἀπὸ μιᾶς ἀρχῆς, ὥσπερ αἱ φλέβες. Αἱ μὲν γὰρ φλέβες, ὥσπερ ἐν τοῖς γραφομένοις κανάβοις, τὸ τοῦ σώματος ἔχουσι σχῆμα παντὸς (515b.) οὕτως ὥστ' ἐν τοῖς σφόδρα λελεπτυσμένοις πάντα τὸν ὄγκον φαίνεσθαι πλήρη φλεβίων (γίνεται γὰρ ὁ αὐτὸς τόπος λεπτῶν μὲν ὄντων φλέβια, παχυνθέντων δὲ σάρκες), τὰ δὲ νεῦρα διεσπασμένα περὶ τὰ ἄρθρα καὶ τὰς τῶν ὀστῶν ἐστι κάμψεις. Εἰ δ' ἦν συνεχὴς ἡ φύσις αὐτῶν, ἐν τοῖς λελεπτυσμένοις ἂν καταφανὴς ἐγίνετο ἡ συνέχεια πάντων.

Μέγιστα δὲ μέρη τῶν νεύρων τό τε περὶ τὸ μόριον τὸ τῆς ἅλσεως κύριον (καλεῖται δὲ τοῦτο ἰγνύα), καὶ ἕτερον νεῦρον διπτυχές, ὁ τένων, καὶ τὰ πρὸς τὴν ἰσχὺν βοηθητικά, ἐπίτονός τε καὶ ὠμιαία. Τὰ δ' ἀνώνυμα περὶ τὴν τῶν ὀστῶν ἐστι κάμψιν· πάντα γὰρ τὰ ὀστᾶ, ὅσα ἁπτόμενα πρὸς ἄλληλα σύγκεινται, συνδέδενται νεύροις, καὶ περὶ πάντα ἐστὶ τὰ ὀστᾶ πλῆθος νεύρων. Πλὴν ἐν τῇ κεφαλῇ οὐκ ἔστιν οὐδέν, ἀλλ' αἱ ῥαφαὶ αὐταὶ τῶν ὀστῶν συνέχουσιν αὐτήν.

Ἔστι δ' ἡ τοῦ νεύρου φύσις σχιστὴ κατὰ μῆκος, κατὰ δὲ πλάτος ἄσχιστος καὶ τάσιν ἔχουσα πολλήν. Ὑγρότης δὲ περὶ αὐτὰ μυξώδης γίνεται, λευκὴ καὶ κολλώδης, ᾗ τρέφεται καὶ ἐξ ἧς γινόμενα φαίνεται. Ἡ μὲν οὖν φλὲψ δύναται πυροῦσθαι, νεῦρον δὲ πᾶν φθείρεται πυρωθέν· κἂν διακοπῇ, οὐ συμφύεται πάλιν. Οὐ λαμβάνει δ' οὐδὲ νάρκη, ὅπου μὴ νεῦρόν ἐστι τοῦ σώματος.

Πλεῖστα δ' ἐστὶ νεῦρα περὶ τοὺς πόδας καὶ τὰς χεῖρας καὶ πλευρὰς καὶ ὠμοπλάτας καὶ περὶ τὸν αὐχένα καὶ τοὺς βραχίονας. Ἔχει δὲ νεῦρα πάντα ὅσα ἔχει αἷμα· ἀλλ' ἐν οἷς μή εἰσι καμπαὶ ἀλλ' ἄποδα καὶ ἄχειρά ἐστι, λεπτὰ καὶ ἄδηλα· διὸ τῶν ἰχθύων μάλιστά ἐστι δῆλα πρὸς τοῖς πτερυγίοις.

Κεφάλαιο 6

Αἱ δ’ ἶνές εἰσι μεταξὺ νεύρου καὶ φλεβός. Ἔνιαι δ’ αὐτῶν ἔχουσιν ὑγρότητα τὴν τοῦ ἰχῶρος, καὶ διέχουσιν ἀπό τε τῶν νεύρων πρὸς τὰς φλέβας καὶ ἀπ’ ἐκείνων πρὸς τὰ νεῦρα.

Ἔστι δὲ καὶ ἄλλο γένος ἰνῶν, ὃ γίνεται μὲν ἐν αἵματι, οὐκ ἐν ἅπαντος δὲ ζῴου αἵματι· ὧν ἐξαιρουμένων ἐκ τοῦ αἵματος οὐ πήγνυται τὸ αἷμα, ἐὰν δὲ μὴ ἐξαιρεθῶσι, πήγνυται.

Ἐν μὲν οὖν τῷ τῶν πλείστων αἵματι ζῴων ἔνεισιν, ἐν δὲ τῷ τῆς ἐλάφου καὶ προκὸς καὶ βουβαλίδος καὶ ἄλλων τινῶν οὐκ ἔνεισιν ἶνες· διὸ καὶ οὐ πήγνυται αὐτῶν τὸ αἷμα ὁμοίως τοῖς (516a.) ἄλλοις, ἀλλὰ τὸ μὲν τῶν ἐλάφων παραπλησίως τῷ τῶν δασυπόδων (ἔστι δ’ ἀμφοτέρων αὐτῶν ἡ πῆξις οὐ στιφρά, καθάπερ ἡ τῶν ἄλλων, ἀλλὰ πλαδῶσα, καθάπερ ἡ τοῦ γάλακτος, ἄν τις εἰς αὐτὸ τὸ πῆγμα μὴ ἐμβάλῃ), τὸ δὲ τῆς βουβαλίδος πήγνυται μᾶλλον· παραπλησίως γὰρ συνίσταται ἢ μικρῷ ἧττον τοῦ τῶν προβάτων.

Περὶ μὲν οὖν φλεβὸς καὶ νεύρου καὶ ἰνὸς τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 7

Τὰ δ’ ὀστᾶ τοῖς ζῴοις ἀφ’ ἑνὸς πάντα συνηρτημένα ἐστὶ καὶ συνεχῆ ἀλλήλοις ὥσπερ αἱ φλέβες· αὐτὸ δὲ καθ’ αὑτὸ οὐδέν ἐστιν ὀστοῦν. Ἀρχὴ δ’ ἡ ῥάχις ἐστὶν ἐν πᾶσι τοῖς ἔχουσιν ὀστᾶ. Σύγκειται δ’ ἡ ῥάχις ἐκ σφονδύλων, τείνει δ’ ἀπὸ τῆς κεφαλῆς μέχρι πρὸς τὰ ἰσχία. Οἱ μὲν οὖν σφόνδυλοι πάντες τετρημένοι εἰσίν, ἄνω δὲ τὸ τῆς κεφαλῆς ὀστοῦν συνεχές ἐστι τοῖς ἐσχάτοις σφονδύλοις, ὃ καλεῖται κρανίον.

Τούτου δὲ τὸ πριονωτὸν μέρος ῥαφή. Ἔστι δ’ οὐ πᾶσιν ὁμοίως ἔχον τοῦτο τοῖς ζῴοις· τὰ μὲν γὰρ ἔχει μονόστεον τὸ κρανίον, ὥσπερ κύων, τὰ δὲ συγκείμενον, ὥσπερ ἄνθρωπος, καὶ τούτου τὸ μὲν θῆλυ κύκλῳ ἔχει τὴν ῥαφήν, τὸ δ’ ἄρρεν τρεῖς ῥαφὰς ἄνωθεν συναπτούσας, τριγωνοειδεῖς· ἤδη δ’ ὤφθη καὶ ἀνδρὸς κεφαλὴ οὐκ ἔχουσα ῥαφάς.

Σύγκειται δ’ ἡ κεφαλὴ οὐκ ἐκ τεττάρων ὀστῶν, ἀλλ’ ἐξ ἕξ· ἔστι δὲ δύο τούτων περὶ τὰ ὦτα, μικρὰ πρὸς τὰ λοιπά. Ἀπὸ δὲ τῆς κεφαλῆς αἱ σιαγόνες τείνουσιν ὀστᾶ. Κινεῖται δὲ τοῖς μὲν ἄλλοις ζῴοις ἅπασιν ἡ κάτωθεν σιαγών· ὁ δὲ κροκόδειλος ὁ ποτάμιος μόνος τῶν ζῴων κινεῖ τὴν σιαγόνα τὴν ἄνωθεν. Ἐν δὲ ταῖς σιαγόσιν ἔνεστι τὸ τῶν ὀδόντων γένος, ὀστοῦν τῇ μὲν ἄτρητον τῇ δὲ τρητόν, καὶ ἀδύνατον γλύφεσθαι τῶν ὀστῶν μόνον.

Ἀπὸ δὲ τῆς ῥάχεως, ἥπερ περόνη ἐστί, καὶ αἱ κλεῖδες καὶ αἱ πλευραί. Ἔστι δὲ καὶ τὸ στῆθος ἐπὶ πλευραῖς κείμενον· ἀλλ’ αὗται μὲν συνάπτουσιν, αἱ δ’ ἄλλαι ἀσύναπτοι· οὐδὲν γὰρ ἔχει ζῷον ὀστοῦν περὶ τὴν κοιλίαν. Ἔτι δὲ τά τ’ ἐν τοῖς ὤμοις ὀστᾶ, καὶ αἱ καλούμεναι ὠμοπλάται, καὶ τὰ τῶν βραχιόνων ἐχόμενα, καὶ τούτων τὰ ἐν ταῖς χερσίν. Ὅσα δ’ ἔχει σκέλη πρόσθια, καὶ ἐν τούτοις τὸν αὐτὸν ἔχει τρόπον.

Κάτω δ’ ᾗ περαίνει, μετὰ τὸ ἰσχίον ἡ κοτυληδών ἐστι καὶ τὰ τῶν σκελῶν ἤδη ὀστᾶ, τά τ’ ἐν τοῖς μηροῖς καὶ κνήμαις, οἳ (516b.) καλοῦνται κωλῆνες, ὧν μέρος τὰ σφυρά, καὶ τούτων τὰ καλούμενα πλῆκτρα ἐν τοῖς ἔχουσι σφυρόν· καὶ τούτοις συνεχῆ τὰ ἐν τοῖς ποσίν.

Ὅσα μὲν οὖν τῶν ἐναίμων καὶ πεζῶν ζῳοτόκα ἐστίν, οὐ πολὺ διαφέρει τὰ ὀστᾶ, ἀλλὰ κατ’ ἀναλογίαν μόνον σκληρότητι καὶ μαλακότητι καὶ μεγέθει. Ἔτι δὲ τὰ μὲν ἔχει μυελὸν τὰ δ’ οὐκ ἔχει τῶν ἐν τῷ αὐτῷ ζῴῳ ὀστῶν.

Ἔνια δὲ ζῷα οὐδ’ ἂν ἔχειν δόξειεν ὅλως μυελὸν ἐν τοῖς ὀστοῖς, οἷον λέων, διὰ τὸ πάμπαν ἔχειν μικρὸν καὶ λεπτὸν καὶ ἐν ὀλίγοις· ἔχει δὲ καὶ ἐν τοῖς μηροῖς καὶ βραχίοσιν. Στερεὰ δὲ πάντων μάλιστα ὁ λέων ἔχει τὰ ὀστᾶ·

οὕτω γάρ ἐστι σκληρὰ ὥστε συντριβομένων ὥσπερ ἐκ λίθων ἐκλάμπειν πῦρ.

Ἔχει δὲ καὶ ὁ δελφὶς ὀστᾶ, ἀλλ’ οὐκ ἄκανθαν. Τὰ δὲ τῶν ἄλλων ζῴων τῶν ἐναίμων τὰ μὲν μικρὸν παραλλάττει, οἷον τὰ τῶν ὀρνίθων, τὰ δὲ τῷ ἀνάλογόν ἐστι ταὐτά, οἷον ἐν τοῖς ἰχθύσι· τούτων γὰρ τὰ μὲν ζῳοτοκοῦντα χονδράκανθά ἐστιν, οἷον τὰ καλούμενα σελάχη, τὰ δ’ ᾠοτοκοῦντα ἄκανθαν ἔχει, ἥ ἐστιν ὥσπερ ἐν τοῖς τετράποσιν ἡ ῥάχις. Ἴδιον δ’ ἐν τοῖς ἰχθύσιν, ὅτι ἐν ἐνίοις εἰσὶ κατὰ τὴν σάρκα κεχωρισμένα ἀκάνθια λεπτά. Ὁμοίως δὲ καὶ ὁ ὄφις ἔχει τοῖς ἰχθύσιν· ἀκανθώδης γὰρ ἡ ῥάχις αὐτοῦ ἐστιν.

Τὰ δὲ τῶν τετραπόδων μὲν ᾠοτοκούντων δὲ τῶν μὲν μειζόνων ὀστωδέστερά ἐστι, τῶν δ’ ἐλαττόνων ἀκανθωδέστερα. Πάντα δὲ τὰ ζῷα ὅσα ἔναιμά ἐστιν, ἔχει ῥάχιν ἢ ὀστώδη ἢ ἀκανθώδη· τὰ δ’ ἄλλα μόρια τῶν ὀστῶν ἐν ἐνίοις μέν ἐστιν, ἐν ἐνίοις δ’ οὐκ ἔστιν, ἀλλ’ ὡς ὑπάρχει τοῦ ἔχειν τὰ μόρια, οὕτω καὶ τοῦ ἔχειν τὰ ἐν τούτοις ὀστᾶ. Ὅσα γὰρ μὴ ἔχει σκέλη καὶ βραχίονας, οὐδὲ κωλῆνας ἔχει, οὐδ’ ὅσα ταὐτὰ μὲν ἔχει μόρια, μὴ ὅμοια δέ· καὶ γὰρ ἐν τούτοις ἢ τῷ μᾶλλον καὶ ἧττον διαφέρει ἢ τῷ ἀνάλογον.

Τὰ μὲν οὖν περὶ τὴν τῶν ὀστῶν φύσιν τοῦτον ἔχει τὸν τρόπον τοῖς ζῴοις.

Κεφάλαιο 8

Ἔστι δὲ καὶ ὁ χόνδρος τῆς αὐτῆς φύσεως τοῖς ὀστοῖς, ἀλλὰ τῷ μᾶλλον διαφέρει καὶ ἧττον.

Καὶ ὥσπερ οὐδ’ ὀστοῦν οὐδ’ ὁ χόνδρος αὐξάνεται, ἂν ἀποκοπῇ.

Εἰσὶ δ’ ἐν μὲν τοῖς χερσαίοις καὶ ζῳοτόκοις τῶν ἐναίμων ἄτρητοι οἱ χόνδροι, καὶ οὐ γίνεται ἐν αὐτοῖς ὥσπερ ἐν τοῖς ὀστοῖς μυελός· ἐν δὲ τοῖς σελάχεσιν (ταῦτα γάρ ἐστι (517a.) χονδράκανθα) ἔνεστιν αὐτῶν ἐν τοῖς πλατέσι τὸ κατὰ τὴν ῥάχιν ἀνάλογον τοῖς ὀστοῖς χονδρῶδες, ἐν οἷς ὑπάρχει ὑγρότης μυελώδης. Τῶν δὲ ζῳοτοκούντων καὶ πεζῶν περί τε τὰ ὦτα χόνδροι εἰσὶ καὶ τοὺς μυκτῆρας καὶ ἔνια ἀκρωτήρια τῶν ὀστῶν.

Κεφάλαιο 9

Ἔτι δ’ ἐστὶν ἄλλα γένη μορίων, οὔτε τὴν αὐτὴν ἔχοντα φύσιν τούτοις οὔτε πόρρω τούτων, οἷον ὄνυχές τε καὶ ὁπλαὶ καὶ χηλαὶ καὶ κέρατα, καὶ ἔτι παρὰ ταῦτα ῥύγχος, οἷον ἔχουσιν οἱ ὄρνιθες, ἐν οἷς ὑπάρχει ταῦτα τὰ μόρια τῶν ζῴων. Ταῦτα μὲν γὰρ καὶ καμπτὰ καὶ σχιστά, ὀστοῦν δ’ οὐδὲν καμπτὸν οὐδὲ σχιστόν, ἀλλὰ θραυστόν. Καὶ τὰ χρώματα τῶν κεράτων καὶ ὀνύχων καὶ χηλῆς καὶ ὁπλῆς κατὰ τὴν τοῦ δέρματος καὶ τὴν τῶν τριχῶν ἀκολουθεῖ χρόαν.

Τῶν τε γὰρ μελανοδερμάτων μέλανα τὰ κέρατα καὶ αἱ ὁπλαὶ καὶ αἱ χηλαί, ὅσα χηλὰς ἔχει, καὶ τῶν λευκῶν λευκά, μεταξὺ δὲ τὰ τῶν ἀνὰ μέσον. Ἔχει δὲ καὶ περὶ τοὺς ὄνυχας τὸν αὐτὸν τρόπον. Οἱ δ’ ὀδόντες κατὰ τὴν τῶν ὀστῶν εἰσι φύσιν. Διόπερ τῶν μελάνων ἀνθρώπων, ὥσπερ Αἰθιόπων καὶ τῶν τοιούτων, οἱ μὲν ὀδόντες λευκοὶ καὶ τὰ ὀστᾶ, οἱ δ’ ὄνυχες μέλανες, ὥσπερ καὶ τὸ πᾶν δέρμα.
